4225	1	/policies/access-to-housing/	<p>I've lived in Bryn Mawr for 20+ years and loved every part of it. It's sense of community, it's small town feel, it's access to downtown, it's access to parks and lakes, it's access to public transportation. It is called a neighborhood within a park because we are surrounded by Theodore Wirth and Cedar Lake. The core of Bryn Mawr is made up of single family homes and a few duplexes.</p> <p>I myself have been in the process of converting our duplex into a single family home. When I applied for the permit, the city advised me to think carefully because of zoning, I can not easily convert it back into a duplex in the future should I change my mind.</p> <p>I also live within a couple blocks of a major Metro Transit route.</p> <p>Now the City is saying that they want to change the zoning so that someone can build one or more four-plex housing on all sides of me. I live amid cute smaller bungalows, that any developer can afford to buy up and build monstrosities. This is simply a crime perpetrated by the city looking for more tax dollars from the residential base.</p> <p>The city has done a terrible job of promoting and developing a commercial and corporate base in downtown Minneapolis to help support the city's growth with a strong tax base. Instead, the companies have flex the city for more tax friendly suburbs, leaving many buildings vacant. Who assumes this loss in tax base? The resident's of Minneapolis, that's who. Now the city is just looking for ways to get more residents into the city to foot the bill, without any thought as to what makes the Minneapolis neighborhoods what they are.</p> <p>I have had to struggle with the Minneapolis School District for years as they have tried to redraw lines and cut school budgets to offset the losses that the city has lost in tax base. You've allowed people to sit on the school board that don't even live in Minneapolis. What do they care about the school district? They are not vested in it. I've fought that battle because I love the neighborhood that I live in. Now the city wants to destroy the neighborhood as well. I believe there are people involved in this decision making process that also do not live in the city neighborhoods that are being affected. What do they care?</p> <p>All I can say is that I urge you to rethink this short-sighted plan and consider all that Minneapolis has to offer it's residents may be lost when you create high-density neighborhoods.</p> <p>Erik Wilson 232 Sheridan Avenue S. Minneapolis, MN 55405 612-414-2552</p>	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4226	1	/policies/access-to-housing/	1) Go slow on the migration of multifamily dwellings radiating from downtown, along transit corridors. Be careful not to get too far ahead of demonstrated demand. Encourage gradual contiguous growth along these corridors instead of leapfrogging developments. 2) Eliminate proposals to allow fourplexes throughout the city; instead, relax zoning regulations to permit owner-occupants to have more tenants who are not family members. Take care to maintain the aesthetic characteristics of residential neighborhoods.	7/18/2018
4227	3	/policies/production-and-processing/	Add Arts Production as a protected class for production processing areas. d&E. Protect Production Areas-do not allow non-production in Production Areas. f. Protect older industrial buildings for future production and processing uses (not Non-Production uses.)	7/18/2018
4228	1	/policies/access-to-housing/	I agree that we should link public transit and bike infrastructure to locations of higher density housing, and let's invest in even more high quality transit options!! I love the high frequency bus service, the A-line, all the protected bike lanes, and so let's make sure more people can have access to them! Love it!	7/18/2018
4229	6	/policies/pedestrian-oriented-building-and-site-de	Reconsider whether elimination of minimal off-street parking, e.g, for restaurants, would simply increase congestion and user frustration. Keep in mind that many city restaurants and bars are metro-wide destinations and depend on auto users as well as transit users.	7/18/2018
4230	2	/policies/access-to-employment/	YES YES YES YES, cannot agree strongly enough!! At the same time we need to be mindful of the changing nature of work and the way people need to access places to get work done. The fact that the new Amazon warehouse is in Shakopee is a huge missed opportunity regionally IMHO. Let's think about employment and housing nodes in a network, as the old hub-and-spoke model may be going by the wayside...	7/18/2018
4231	11	/policies/skyways/	Good that you are not joining the anti-skyway hue and cry. They are an important local adaptation to our climate, and add a lot of synergy to the downtown. Connect the HCMC complex to the main skyway system ASAP.	7/18/2018
4232	5	/policies/visual-quality-of-new-development/	Require City-funded projects to include public art which is purchased locally.	7/18/2018
4233	3	/policies/production-and-processing/	Love the concept here - just need to be mindful of how these things get laid out and the infrastructure in place too as more residential/ped/bike people are in closer quarters with manufacturing/truck traffic to move goods around.... Have to make sure safe paths are the most appealing for people and that we don't hamstring the companies that need easy/convenient truck traffic aren't pushed out and away.	7/18/2018
4234	29	/policies/creative-sector-economy/	Protect existing Arts Districts.	7/18/2018
4235	17	/policies/complete-streets/	.. but don't think you are going to eliminate automobile use just by making it more difficult. I am a daily transit user but I recognize the difficulty of living in this metro area and performing routine activities such as grocery shopping, medical appointments, child transportation, etc., without using a car.	7/18/2018
4236	4	/policies/access-to-commercial-goods-and-service	YAY! LOVE IT! I think that walkable mixed use neighborhoods are the best, and we have all too few of them, so let's do it!	7/18/2018

4238	20	/policies/transit/	I strongly support this, thanks!	7/18/2018
4239	30	/policies/arts-and-cultural-assets/	Protect the existing infrastructure of production space within the Northeast Minneapolis Arts District.	7/18/2018
4240	1	/policies/access-to-housing/	The 2040 plan should be changed to preserve single family homes and expand the used housing stock as "starter homes" for families in all parts of the City especially where "arts district" designations or arts-maker spaces are needed like all of Northeast and North Minneapolis. NO tear downs of single family or duplexes for four plexes.	7/18/2018
4241	24	/policies/shared-mobility/	Waiting for nice ride to expand to the rest of the city (see previous comment)	7/18/2018
4242	1	/policies/access-to-housing/	Policy 43 - Support existing home owners in affording and maintaining their homes. Place a cap on property taxes for those who have owned their homes for 20 yrs or more. Recently a former Mpls resident (not retired) told me he had lived in Mpls for 40 yrs and was forced to move to a suburb due to rising property taxes. This is especially important for the elderly, the disabled, people of color, indigenous people and those with low-incomes.	7/18/2018
4243	28	/policies/msp-airport/	And quieter. Encourage increased use of regional airports, with good transit connections to them from MSP and from other major transit hubs.	7/18/2018
4244	50	/policies/access-to-technology/	Improve the user experience on all city digital websites to make more user-friendly. Continue to support and grow open data projects	7/18/2018
4245	3	/policies/production-and-processing/	Add language to expand and maintain the current arts and maker spaces through the City for the expansion of arts, ideas, businesses at the humane and local level. Stop development gold diggers in the neighborhoods.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4246	3	/policies/production-and-processing/	dd Arts Production as a protected class for production processing areas. Regarding Action Steps d & e: Protect Production Areas - do not allow non-production in Production Areas. Regarding Action Step f: Protect older industrial buildings for future production and processing uses (not Non-Production uses). Keep Minneapolis a livable space for people and animals. Stop corporate takeover.	7/18/2018
4247	31	/policies/creative-workers/	Provide Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of space forcing artists out of the city.	7/18/2018
4248	5	/policies/visual-quality-of-new-development/	I agree that we should be requiring more of developers in terms of the streetscape and public realm improvements they provide (I say this as a market rate developer myself). Let's make design quality an important piece of approving projects. However, I think it is difficult to figure out the right mechanism to do this - we don't want the "faux historical" look that so many new urbanist projects have gotten, etc. etc. So I encourage you to design whatever system comes out of this very carefully so that great design and public realm is given a boost and a strong platform of support, but cannot be prescribed, or we will end up with compromised faux historic stuff....And PLEASE require more sidewalk/public realm/streetscape stuff of developers. That's what has more of an impact on the people who experience it than whether or not the building is a story taller. Give height, but ask for greatness on the ground floor in return.	7/18/2018
4249	29	/policies/creative-sector-economy/	Require City funded projects to include public art which is purchased locally. Not like the monstrosity of the downtown public library that Minneapolis residents are paying 500,000 in bonds while we bankrupted the library system and gave it to Hennepin County. SHAME on Rybak government for giving away our jewels to the developers. SHAME FREY government if he extends these give away policies to housing and small businesses.	7/18/2018
4250	0.1	/topics/land-use-built-form/	I am opposed to allowing fourplexes to be built wherever a developer wants to put them. I think other options to increase housing supply are better than creating a complete land grab. For instance, on 44th and Nicollet, there used to be a garden store. Now a landscaping company has purchased the property and now it has become a big parking lot for their trucks. A nice four or five story building could have been built there. What an opportunity- it's right on the bus line and would provide a lot more housing than building a few fourplexes here and there. Plus it would improve the streetscape. I can't say the same thing for tearing down cared-for vintage homes and building a modern box. I haven't been very impressed with the quality of construction for recently built homes.	7/18/2018
4251	30	/policies/arts-and-cultural-assets/	Protect the existing infrastructure of production space within the Northeast Minneapolis Arts District. Artists saved NE Minneapolis from being demolished once before and now we have to fight the BEND OVER forces of destruction.	7/18/2018
4252	33	/policies/affordable-housing-production/	Eliminate four-plex (Frey-plex?) options in traditional single-family home areas. Instead, allow owner-occupants more leeway to rent to non-family tenants. Consider Mpls commitment to affordable housing in a larger metro context, i.e. using hypothetical numbers, if the metro needs 10% of its housing to be in the "affordable" category, Mpls's commitment to affordable housing should not exceed an extra 25%, meaning no more than 12.5 percent of its housing stock is required to be in the "affordable" category.	7/18/2018
4253	6	/policies/pedestrian-oriented-building-and-site-de	YES YES YES YES YES. Cannot agree more with this priority list. Cars are responsible for the erosion of the public realm, huge environmental damage and the decay of public health due to our sedentary lifestyles. Don't let the car-lovers dissuade you! The market also proves this out - where the most expensive places to live in cities? The walkable neighborhoods! That's where people want to be!	7/18/2018
4254	31	/policies/creative-workers/	Provide Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of space forcing artists out of the City.	7/18/2018
4255	31	/policies/creative-workers/	Provide Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of space forcing artists out of the City. Without the artists in Minneapolis we would just be a cold Fridley. If you want to destroy our city keep the 2040 Plan. It is a plan for the uber wealthy to make uber money.	7/18/2018
4256	1	/policies/access-to-housing/	I support all these action steps. And especially in the Minneapolis lakes neighborhoods, such as Kenwood that are currently almost entirely single family dwellings - allow for more small multi-family units.	7/18/2018
4257	38	/policies/affordable-housing-near-transit-and-job	Except in existing industrial production areas. A city that makes nothing is worth nothing. Keep industrial production areas free of housing so we can build things to sell to others in this town. We can't eat the service economy. Who ya going to serve, you got to serve somebody, why not serve the people.	7/18/2018
4258	58	/policies/business-districts-and-corridors/	Support the existing Arts Districts Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4259	7	/policies/public-realm/	Yep - I think you can require more of developers in this area (meaning public realm improvements) too. Especially in the already-established desirable neighborhoods. If you don't make it a condition, there are very few who will do it voluntarily - sad, but true. If you establish this now, land prices will adjust accordingly, so new transactions going forward will account for this additional cost in developing it. Sticks it a little bit for the people who already have sunk costs in their land values, but those have been going up anyway, so not that many people will get caught in between.	7/18/2018
4260	81	/policies/social-connectedness/	Support the existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community. Preserve existing buildings.	7/18/2018
4261	54	/policies/supporting-economic-growth/	improve existing properties and infrastructure Without saving and improving infrastructure our 1929 sewer system will fail under the increased density. MPLS doesn't have the money to become NYC. STOP the developer give-a-way at the expense of the residents.	7/18/2018
4262	4	/policies/access-to-commercial-goods-and-service	Yes, to complete neighborhoods! Especially in the food-desert inner city neighborhoods.	7/18/2018
4263	8	/policies/public-safety-through-environmental-de	Yes - this should already come out of the pedestrian oriented approach though, so just make sure it doesn't get onerous to add in the public safety review piece. If you do the walkable high quality streetscape approach to new development it should be fine.	7/18/2018
4264	38	/policies/affordable-housing-near-transit-and-job	Except in existing industrial production areas.	7/18/2018
4265	30	/policies/arts-and-cultural-assets/	Protect the existing infrastructure of production space within the Northeast Minneapolis Arts District.	7/18/2018
4266	9	/policies/open-spaces-in-new-development/	Yes - all good, but let's make sure we develop a good, flexible framework so that it encourages high quality design, otherwise we end up with useless windswept plazas sometimes....	7/18/2018
4267	34	/policies/affordable-housing-preservation/	Also, preserve the solid middle-class and professional class owner-occupied housing stock that helps make Minneapolis the beautiful city that it is. Although I don't ever expect to own a nice house near one of the lakes, I greatly appreciate those who are willing to buy, occupy, and maintain those homes. The same goes with equal force to the average (say, the 20th to 90th income percentile) home and homeowner. Don't force ourselves to re-learn a lesson we learned 30-40 years ago: we will not promote racial equity or a vibrant urban environment by driving the middle class out of the city.	7/18/2018
4268	10	/policies/street-grid/	YES YES YES YES.	7/18/2018
4269	55	/policies/business-innovation-and-expansion/	Add preserving existing uses, assets and Art Districts. Small businesses start in garages and basements. We need to keep the small spaces for the little people to invent things. Don't displace the creative business owners and artists.	7/18/2018
4270	30	/policies/arts-and-cultural-assets/	Protect existing Arts Districts.	7/18/2018
4271	1	/policies/access-to-housing/	Zoning changes should not precede anticipated circumstances but should respond to actual demand. As just one example, Franklin Avenue west of Hennepin should not be zoned as a high-frequency route until it actually becomes a high-frequency route. As another example, permitting fourplexes any where without considering parking, relying on market forces to address parking issues is misguided and will not be effective. What supports this newly expressed confidence in the wisdom and charity of real estate developers? And with fourplexes the wisdom of amateur real estate developers? Again, zoning laws shouldn't be adopted to lead change but to permit naturally occurring change. Whatever the flaws of historic decisions, we now own the consequences and must adopt policies in light of current realities rather than as if we were starting with a new city. We have serious housing issues that must readdressed, but we also have unique neighborhoods near the central city that make Minneapolis a very attractive place to live. We need to maintain those while addressing our issues not addressing those issues at the expense of what makes us unique. Moreover, believing that any of our serious housing problems would be meaningfully addressed by four-plexus anywhere is not supported by others' experiences.	7/18/2018
4272	1	/policies/access-to-housing/	Protect existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, and especially within the Northeast Minneapolis Arts District.	7/18/2018
4273	11	/policies/skyways/	As a relative newcomer to Minneapolis, I find the total lack of consistent signage and aids to navigation (beyond an almost illegible map) to be a huge missed opportunity for the skyways. I know it costs \$\$, but maybe figure out a publi-private partnership framework to get it done/maintained?	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4274	3	/policies/production-and-processing/	Add Arts Production as a protected class for production processing areas. Regarding Action Steps d & e: Protect Production Areas - do not allow non-production in Production Areas. Regarding Action Step f: Protect older industrial buildings for future production and processing uses (not Non-Production uses).	7/18/2018
4275	5	/policies/visual-quality-of-new-development/	Require City funded projects to include public art which is purchased locally.	7/18/2018
4276	58	/policies/business-districts-and-corridors/	Regarding Action Step g: Support the existing Arts Districts. Regarding Action Step h: Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement. Look at Jackson Flats at 18 1/2 ST NE and Jackson St NE. See how affordable housing can be done right. Encourage this not tear downs.	7/18/2018
4277	35	/policies/innovative-housing-types/	.. but don't throw out the distinctive and beneficial local architecture and single family housing patterns. Affordable housing has to be balanced against having a city that remains attractive to the middle and professional classes.	7/18/2018
4278	19	/policies/bicycling/	Biking is fine, but why not have the lanes on streets that run parallel to the main routes? It might make for easier co-existence between bikes and motor vehicles. Throttling Portland and Park Avenues with bike lanes was not very helpful, in my opinion.	7/18/2018
4279	54	/policies/supporting-economic-growth/	Improve existing properties and infrastructure.	7/18/2018
4280	12	/policies/lighting/	Yes - please incorporate the latest on impacts to wildlife, etc. too when rethinking this.	7/18/2018
4281	1	/policies/access-to-housing/	I don't agree with allowing fourplexes in established single family neighborhoods. It would be a mistake and irreversible. I would like the city to look at restricting AirBNB rentals first. Right now, in Kingfield alone, there are 122 whole homes (I excluded single rooms/suites) available for rent. That's an insane amount. Just think if local families were able to purchase or rent these homes instead of out-of-towners. That would alleviate a lot of the housing pressure!	7/18/2018
4282	5	/policies/visual-quality-of-new-development/	Require City funded projects to include public art which is purchased locally. Build new structures to reflect a distinctive identity.	7/18/2018
4283	36	/policies/innovative-housing-strategies/	see previous comments and reservations about a policy that promotes affordable housing ahead of other urban concerns.	7/18/2018
4284	29	/policies/creative-sector-economy/	Protect, maintain and nurture existing Arts Districts.	7/18/2018
4285	30	/policies/arts-and-cultural-assets/	Protect the existing infrastructure of production space within the Northeast Minneapolis Arts District.	7/18/2018
4286	31	/policies/creative-workers/	Provide Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of space forcing artists out of the City.	7/18/2018
4287	38	/policies/affordable-housing-near-transit-and-job-	Except in existing industrial production areas.	7/18/2018
4288	54	/policies/supporting-economic-growth/	Improve existing properties and infrastructure	7/18/2018
4289	13	/policies/landscaping/	With all the sidewalk renovations going on, it is a bummer to not see more integrated raingardens into tree pits, etc. Why not set up a framework similar to Seattle's green streets program and get all new construction to comply with it? More expensive in the short term, and requires a fresh perspective from public works, etc. BUT green infrastructure has MUCH better long term value than Grey infrastructure and you get the doubled impact of better pedestrian experience, improves property values, etc.	7/18/2018
4290	55	/policies/business-innovation-and-expansion/	Add preserving existing uses, assets and Art Districts.	7/18/2018
4291	56	/policies/supporting-small-businesses/	Add artists to this section (support the development and growth of small business and artists).	7/18/2018
4292	81	/policies/social-connectedness/	Support the existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community. Preserve existing buildings. Don't turn everything into UPTOWN. UPTOWN hates what the developers have done to it. UPTOWN is a rape ridden, concrete and fake brick facade of a real space that is not suited to families or artists or Minneapolitans. WE DON'T want to be NYC. What makes Minneapolis a good place to live is the lack of UPTOWNS in rest of Minneapolis. WE want MAKE not FAKE.	7/18/2018
4293	58	/policies/business-districts-and-corridors/	Just as with 56, name the arts as economic drivers.	7/18/2018
4294	55	/policies/business-innovation-and-expansion/	Add preserving existing uses, assets, and Arts Districts.	7/18/2018
4295	58	/policies/business-districts-and-corridors/	Regarding Action Step g: Support the existing Arts Districts. Regarding Action Step h: Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement.	7/18/2018
4296	14	/policies/tree-canopy-and-urban-forest/	Please make this as user-friendly as possible (ie it would be great if a small business owner can just seamlessly add new tree pits and know what species and size to use without extensive consultation and design fees, etc.)	7/18/2018
4297	81	/policies/social-connectedness/	Support the existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community. Preserve existing buildings.	7/18/2018
4298	1	/policies/access-to-housing/	Why are we only discussing fourplexes outside the city's downtown core? What's wrong with 6 homes on a single lot, or 20? We need more housing, let's allow that housing to be built anywhere, especially in highly sought-after locations like Ward 13. More mixed-use would help create more walkable neighborhoods too.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4299	37	/policies/mixed-income-housing/	Don't create a city with a patchwork of 3 or 4-story walkups. Preserve architectural integrity where neighborhoods are thriving (in other words, don't achieve equity through a leveling process). On the other hand, give owner-occupants more leeway to rent to non-family members.	7/18/2018
4300	5	/policies/visual-quality-of-new-development/	Policy 5. while the city may not dictate the architectural style of new bldgs, the city can and should set standards for developers - zoning regulations and changes in zoning regulations will have an impact on the aesthetic quality and personality of the neighborhood. My neighborhood is made up of bungalows - each one distinctive in it design - with lawns and gardens that reflect the creativity and individuality of the individual owners. This is the PERSONALITY of this neighborhood. when these bungalows are destroyed and structures are built that do not fit in with the neighborhood are built, it affects the aesthetics of the neighborhood and the quality of life for the residents.	7/18/2018
4301	39	/policies/fair-housing/	I am pleased to see the city reaffirm its support for fair housing opportunity.	7/18/2018
4302	15	/policies/transportation-and-equity/	Agreed - this is super important and great. HOWEVER, we also need to change the (seemingly very Minnesotan) attitude about public transportation and create a system where public transit is the BEST way to get around, regardless of whether or not you have the money for a private vehicle. I feel like today it is largely seen as a means of last resort for those that don't have other options - let's change that around and make it the PREFERRED way to get around! YEAH!!!	7/18/2018
4303	42	/policies/expand-homeownership/	All are good ideas	7/18/2018
4304	56	/policies/supporting-small-businesses/	Add Artists to this section(Support the development and growth of small business and artists.)	7/18/2018
4305	43	/policies/housing-displacement/	Help lower income homeowners stay in their homes thru property tax relief and income-adjusted mortgage assistance.	7/18/2018
4306	16	/policies/environmental-impacts-of-transportation/	YES - let's be a leader, we are ideally situated to show the country how to do it! And please think carefully about how to design systems of entitlements/approvals that facilitate innovation in this area. i.e. - what if a developer wants to build a lower parking ratio but the bank won't finance it unless more parking gets built - can the City provide a credit guarantee to support the lower parking ratio? Crazy idea probably, but we need to think big to be a leader!	7/18/2018
4307	17	/policies/complete-streets/	Yes yes yes yes. But City should try and communicate and outreach more about why this is important, and how it actually makes streets safer for drivers too, and how maybe cars are going to be going slower on a given street now, but that maybe that was the whole point in the first place! I feel like the naysayers are always thinking about this in terms of the bikers being supported (only) and the dialogue needs to be more inclusive.	7/18/2018
4308	47	/policies/housing-maintenance/	This includes avoiding the tear-down of single family homes to build multiple family dwellings (and its opposite, teardowns for substantially upgrading the home)	7/18/2018
4309	18	/policies/walking/	YES. Also - can the City support innovative ways of clearing sidewalks in winter too? Like what about integrating snowmelt systems into new sidewalks that get built that are powered by renewables (i.e. sewer heat recovery or solar thermal, or district energy, etc. etc.) Making the regulatory framework for that easier and perhaps funding some pilots? Holland, MI apparently has a system that is tied to a power plant near their downtown - can it use wate heat from somewhere or maybe the MERC?	7/18/2018
4310	58	/policies/business-districts-and-corridors/	g.Support the existing Arts Districts. h.Develop programs &strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement.	7/18/2018
4311	19	/policies/bicycling/	Keep on going!! Proud that we are a national leader in this area, but let's not rest on our laurels ere - can always expand!	7/18/2018
4312	19	/policies/bicycling/	If we are to reduce our reliance on cars, we cannot prioritize bicycles over transit. We need more people using transit and that requires reduction in transit travel time, not increases in travel time due to congestion caused by under-used bike lanes, such as those on 26th and 28th in south Minneapolis. Let's improve transit and remain flexible to respond to future circumstances like driverless vehicles, and in no case should we lock in inflexible, 100 year-old technology like rail.	7/18/2018
4313	20	/policies/transit/	Yep - be open to innovation (ie embrace welcome and support things like Bird scooters, etc.) and mobilize citizens and business leaders to support the expansion and maintenance of a robust system. Prioritize putting it in the right corridors though, over the "easy to get land approvals" corridor. i.e. I don't want to object to any transit investments, but it would make much more sense to e running one of the light rail lines down Hennepin, Lyndale or Nicollet instead of through Cedar Lake area.... Minneapolis should be focused not just getting suburban commuters into the core, but how people can get around within Minneapolis.	7/18/2018
4314	81	/policies/social-connectedness/	Support the existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community. *Preserve existing buildings.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4315	21	/policies/freight/	Yeah, this is important, but hard to make the argument to have freight impeding the growth of passenger transit... Dunno how to make a constructive comment, but I feel like the freight companies seem to have all the power here and that seems like a narrow use.	7/18/2018
4316	22	/policies/downtown-transportation/	Yes - I think the curbside issue will need to be looked at very carefully, as more and more private companies take space once seen as public... I'd rather see street parking usurped for these things (i.e. Uber/Lyft dropoff zones that are safer, more bike parking where cars used to park rather than taking sidewalks from pedestrians, etc.)	7/18/2018
4317	23	/policies/coordinated-development-strategy/	Yes - only District systems are going to provide the leaps forward in energy and water efficiency we need. If left to individual building developments we can only get so far.	7/18/2018
4318	24	/policies/shared-mobility/	Yes - thinking carefully about streetscape/curbside impacts is key. Don't get caught flat-footed!	7/18/2018
4319	20	/policies/transit/	Agree with focussing on outcomes not modes. For example, what is the positive outcome of spending \$2 billion dollars to run a railroad (100 year-old technology) through two miles of unoccupied park land where no one will get on or get off? Spend money on technology with flexibility to adapt to changing circumstances, like driverless vehicles.	7/18/2018
4320	25	/policies/innovations-in-transportation-and-infras	Yes - please try and build a reputation as a place that encourages experiments and innovation and support that (rather than seeming overly regulatory and hidebound).	7/18/2018
4321	26	/policies/vision-zero/	yep - use data and encourage innovation, make sure people understand this is a priority.	7/18/2018
4322	1	/policies/access-to-housing/	I am a longtime Minneapolis resident, owning and living in a duplex in a diverse neighborhood. I support efforts to diversity neighborhoods (demographically and in terms of housing types). I, however, urge consideration of the effects of multiple-unit housing structures on community building and social capital. We live on a bus route in a neighborhood that is primarily single-family homes, but also includes a number of duplexes and one 4-unit building. In our 30-plus years in the neighborhood, we have never gotten to know the residents in the 4-plex, whereas we are friends with the neighbors in the duplexes and single family homes. It seems like owners of single family homes and duplexes are more likely to be out mowing the lawn, shoveling snow, and working in the garage, and this provides opportunity to build friendships and community. In our observation, the rental residents in the 4-unit building come and go and do not become part of the community. I am not opposed to rental property... I was a renter for many years but made no lasting connections in my rental communities. I would like to see every opportunity for people to build social capital and engagement in their community.	7/18/2018
4323	25	/policies/innovations-in-transportation-and-infras	Avoid inflexible 100 year-old technology like street cars and rail, light or otherwise.	7/18/2018
4324	6	/policies/pedestrian-oriented-building-and-site-de	Policy 6. I am generally in agreement with these goals and action steps. Kudos to Minneapolis for being one of the most bike friendly cities in the U S. However, putting bike paths on busy streets without adequate separation between bikes and motorized vehicles is unsafe - especially as traffic increases with increase in electric (eg silent) cars and buses. Also, it seems impractical and unwise to rule out repair stations for hybrid or electric vehicles. Having adequate set-backs for buildings will contribute to pedestrian safety and more green spaces. The buildings that have recently been built in my neighborhood have unfortunately received waivers from the city regarding these kind of set-back requirements.	7/18/2018
4325	19	/policies/bicycling/	As an avid cyclist, I support efforts to encourage cycling as a safe and viable means of transportation. I think Minneapolis is moving in the right direction in this area, and can learn about other innovative ways to protect and serve cyclists and pedestrians from cities in Europe who are far ahead of the US in this regard. I recently lost a dear friend to a bike-vehicle accident in St. Paul. Please consider innovations (e.g., adjusted signal light timing) to protect cyclists at intersections, which is where most bike accidents occur.	7/18/2018
4326	4	/policies/access-to-commercial-goods-and-service	Keep residential single/bungalows/ family homes strong; keep larger multi family units on borders or high traffic routes and nodes. Preserve Minneapolis neighborhoods. Local streets are stressed by increasing occupancy rates.	7/18/2018
4327	7	/policies/public-realm/	Policy 7.Public Realm.This policy is vague and under-developed.However, since it purports to address "Climate change" - I submit that residents should be rewarded for generating less trash. Those who compost or live alone may require trash pick-up only once per month, yet we receive a mere \$2 credit on our water bill - while our water bills have increased over the yrs, the \$2 credit remains the same. I propose encouraging residents to generate less trash by providing smaller trash AND RECYCLING carts - and giving them a \$10 credit on their bill. Also, ban plastic bags, food containers, and drinking straws - and do it NOW.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4328	59	/policies/downtown/	I haven't noticed promotion of any public safety strategies downtown. I have been down town nearly every week day for 45 years. Clusters of people hanging out and obstructing pedestrian access to our sidewalks are inhibiting to pedestrians regardless of race, age or gender of the cluster members, and we have now eliminated anti-loitering laws and authorized public consumption of marijuana. How does a police officer deal with these groups? I feel safer on the streets of Manhattan than I do on Hennepin Avenue downtown. I understand that enforcement of laws cannot be perceived as racially biased, but the answer to that cannot be no enforcement. This is a big issue. Nicollet Mall, for a variety of reasons is a shell of its former self, and one contributing issue is perception of public safety.	7/18/2018
4329	35	/policies/innovative-housing-types/	Zoning needs to respect neighborhood boundaries. Keep commercial concentrated to business nodes. Honor previous neighborhood plan goals that respect a blending of zoning.	7/18/2018
4330	34	/policies/affordable-housing-preservation/	This is important.	7/18/2018
4331	49	/policies/educational-and-economic-access/	We want to do more than eliminate racial disparities in access to education. We want to improve the educational opportunities for everyone. Open enrollment is not helping our public schools in Minneapolis even though it may be helping individual students avoid underperforming Minneapolis schools. We need to put more resources into our public schools.	7/18/2018
4332	28	/policies/msp-airport/	Prioritize improved bicycling access to the airport. You must be kidding! Spend that money on our schools.	7/18/2018
4333	33	/policies/affordable-housing-production/	Good. Caution regarding bigger quad homes built on blocks of single family in residential. Keep bigger units to major streets which border the neighborhoods, or keep to major nodes.	7/18/2018
4334	0.1	/topics/land-use-built-form/	Why aren't there any single-family only zoned areas? Most single-family homeowners have worked really hard all their lives to be able to afford to live in these areas. And our taxes reflect our investment in our neighborhoods, such as the East Isles neighborhood. We pay a heavy tax to live here & appreciate our neighborhoods. Anyone, from anywhere is able to move to these areas if they can afford to purchase a home here. I see no ethnic or racial bias about that policy. One of the great things I love about Minneapolis is that everyone uses the park systems. There are ALL walks of life, economic income levels, ethnicities, ages, etc. represented when I walk around the lakes area. It is open to EVERYONE to enjoy & so many people utilize it. Of course there are going to be wealthier areas of ANY city & that's ok, those people can afford to live there. What the city can & should do is work to improve all areas within the city, as currently zoned. I realize there needs to be some expansion, but eliminating single-family neighborhoods city-wide is not fair to those who have worked really hard to be able to move & live in those areas.	7/18/2018
4335	48	/policies/data-driven-decisions/	This makes sense, but how do you square it with your decision to let developers decide where and how to build four-plexes everywhere? No appoint in collecting and analyzing a lot of data if you are not going to use it to make decisions.	7/18/2018
4336	1	/policies/access-to-housing/	I am concerned about allowing 4 plex units throughout the city without regard to neighborhood input. This issue was discussed at the Windom Park CIA meeting and the issue of refining to R3 was rejected for several reasons. Some reasons include parking, especially during winter, traffic congestion, and the reason many of us moved here to begin with; we like the neighborhood feel. We need to promote more home ownership which most renters want.	7/18/2018
4337	37	/policies/mixed-income-housing/	Yes!	7/18/2018
4338	9	/policies/open-spaces-in-new-development/	Policy 9. Open spaces. A large percentage of our city's open spaces should be open green spaces if they are going to utilize climate sensitive design principles. With the pressures of increasing population and climate change, urban planners need to realize that solutions that benefit the non-human environment also benefit humans - we have a symbiotic relationship. Every tree helps fight global warming, reduces the amount of greenhouse gases in the atmosphere, and helps cool the city in warm weather. Trees and other vegetation are natural solutions for addressing storm-water run-off, erosion, and air pollution. Today we cannot listen to the news without hearing of another natural disaster - including devastating floods in cities that have paved over their green spaces, infestations of destructive insects, and colony-collapse among the bee population. More trees results in less flooding, more birds that eat unwanted insects, and better air quality. Lets help the MN Pollution Control Agency to reduce their spraying for mosquitoes by having more trees and birds. Community gardens and backyard gardens improve people's physical and mental health, as well as providing low-cost healthy food. The greenery along our roadways reduces the stress of rush-hour commuting. Private green spaces are important. In Victoria Australia, the Planning Minister has called for garden areas in new developments. Green spaces around private dwellings encourage social interaction, decreasing the dangers of alienation and social isolation in urban environments.	7/18/2018
4339	50	/policies/access-to-technology/	Fix IT Tech was a great idea - and why was it not fully supported in the past is beyond me. In the ways that our world is changing, there will be too many that will NOT have access. Got to make sure that this does not happen.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4340	82	/policies/aging/	I know that the how will come later, but it will be interesting to see what happens.	7/18/2018
4341	10	/policies/street-grid/	<p>Policy 10. Adding new streets seems in conflict with Policy 6 which has the stated goal of putting pedestrians and bicyclists first and cars last. "Consider relinquishing the City's ownership over vacations as a last resort, in order to preserve the network of city streets and arterials."</p> <p>- This sounds like a 'cave-in' to demands of developers.</p> <p>While living on a corner places greater demands on me as a home owner, I support the maintaining of sidewalks - they provide a place for people to walk, walk their dogs, and a safe place for children to walk or ride their bikes and trikes. I do not believe in the present system of making the home owners on corner lots pay for the entire cost of PUBLIC sidewalk replacement.</p>	7/18/2018
4342	14	/policies/tree-canopy-and-urban-forest/	<p>I don't see any real "requirement" here for new developments to work around trees rather than to cut them down. In fact, the phrases "retain mature trees, replace lost trees" suggests that if a developer wants more space and cuts down a tree, all they have to do is "replace" the "lost" tree -- "lost" to "progress," I guess.</p> <p>If I walk 2 blocks in every direction from my house, I calculate that we have lost 30-plus trees since 2005. The elms have been cut down due to dutch elm disease (save for the few that are inoculated). The ash trees are being cut down even though it is cheaper to inoculate them). Rows of locust trees were cut down near 31st and Franklin. And maple after maple seems to be dying, no matter their size, age, or location.</p>	7/18/2018
4343	17	/policies/complete-streets/	I love that the city is prioritizing transit. Anecdotally, I have heard people talk about how they wish they could use the bus and hope it increases frequency to allow for flexible schedules. I would support street infrastructure that would facilitate better transit.	7/18/2018
4344	1	/policies/access-to-housing/	We strongly oppose rezoning of neighborhoods to provide increased density. A few people, developers and sales agents will make money, while the people who have paid property taxes for years will see the neighborhoods that they love change.	7/18/2018
4345	80	/policies/development-near-metro-stations/	I am excited for the light rail expansions and the dense, mixed use development that will come along with it. I hope the city prioritizes LRT.	7/18/2018
4346	1	/policies/access-to-housing/	I support increasing housing options within neighborhoods, including adding apartments, duplexes, 3-unit and 4-unit dwellings to neighborhoods that currently are primarily single-family homes.	7/18/2018
4347	14	/policies/tree-canopy-and-urban-forest/	<p>Policy 14 Tree Canopy and Urban Forest: Improve the tree canopy and urban forest.</p> <p>This policy and these Action Steps demonstrate the wisdom of City Planners. The concern is that they will be shoved aside by the pressures of short-sighted, corporate, economic considerations.</p>	7/18/2018
4348	84	/policies/public-safety/	It is unfortunate to have a vision for the city of Minneapolis that cannot explicitly name "police brutality" as a real problem -- and one that can be addressed through very feasible accountability and harm-reduction mechanisms (disciplinary re-set, police liability insurance, re-establishing a robust civilian review, banning "warrior" trainings, etc). It is impossible to "build trust" across power disparities when the more powerful party is not held accountable.	7/18/2018
4349	15	/policies/transportation-and-equity/	<p>POLICY 15 - Transportation and Equity: Ensure that the quality and function of the transportation system contributes to equitable outcomes for all people.</p> <p>This should be one of the priorities for City Planners. One should not have to take 3 buses and spend an hour going to work when they live only about 8 miles from where they work.</p> <p>The city should find a way to make it easier for low-income people to purchase long-term bus passes.</p>	7/18/2018
4350	16	/policies/environmental-impacts-of-transportation/	Fix the damage done by freeways. Cap them or remove them.	7/18/2018
4351	16	/policies/environmental-impacts-of-transportation/	Require larger employers to have (and execute on) travel demand management plans before allowing them to expand private parking facilities.	7/18/2018
4352	0.1	/topics/land-use-built-form/	I'm glad to see upzoning in Lowry Hill East. I believe it will be positive for the city to remove restriction zoning which prevents our city from being able to respond to changes in market pressures. I'm hoping these changes will stay in the final draft and allow the Wedge to grow as a community.	7/18/2018
4353	30	/policies/arts-and-cultural-assets/	People will not want to utilize the culture opportunities and arts offered by the city if it is difficult of move about in the city. If it is a hazard to get to the activities. This difficulty will be due to the goal of limiting parking and narrowing the streets. I have attempted to ride the train downtown to a baseball game and I had to drive from Minneapolis to the suburbs to find parking to take the light rail to the Twins Game, what a joke.	7/18/2018
4354	25	/policies/innovations-in-transportation-and-infras	I hope that autonomous vehicles are not used as an excuse to not develop LRT. Light rail solves so many problems that autonomous vehicles cannot.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4355	16	/policies/environmental-impacts-of-transportation/	<p>POLICY 16 - Environmental Impacts of Transportation: Reduce the energy, carbon, and health impacts of transportation through reduced single-occupancy vehicle trips and phasing out of fossil fuel vehicles.</p> <p>Sitting in rush-hour traffic increases emissions from autos. Encouraging businesses to stagger their operating hours or to allow employees to tele-commute would reduce this problem.</p> <p>For those who may be elderly or handicapped, providing adult tricycles or electric bikes would be a welcome addition.</p>	7/18/2018
4356	76	/policies/new-parks/	<p>I was surprised when I moved here that there is no major park along the river. Minneapolis was built because of the river, and a public space where everyone is welcome to enjoy it would be the envy of cities around the country.</p>	7/18/2018
4357	1	/policies/access-to-housing/	<p>Composting compulsory.</p>	7/18/2018
4358	55	/policies/business-innovation-and-expansion/	<p>I am particularly concerned that Minneapolis has become service industry centric, with job growth primarily in restaurants and other low-skill fields. The action steps above sound swell, but what about steps that support our existing high-skill employers like Valspar, Honeywell, Coloplast, and Graco? I tried without success to find any listing of manufacturers based in Minneapolis. That, of itself, is telling.</p>	7/18/2018
4359	19	/policies/bicycling/	<p>POLICY 18 - Walking: Improve the pedestrian environment in order to encourage walking as a mode of transportation</p> <p>See Policy 6 feedback:Kudos to Minneapolis for being one of the most bike friendly cities in the U S. However, putting bike paths on busy streets without adequate separation between bikes and motorized vehicles is unsafe - especially as traffic increases with increase in electric (eg silent) cars and buses</p> <p>For some of us, it is difficult to place our bikes on the front of buses or on the hooks of the light rail. It would be helpful if a remedy could be found for this.</p> <p>Encourage and support bike repair shops - especially those that offer low-cost services.</p> <p>Provide access to adult tricycles.</p>	7/18/2018
4360	3	/policies/production-and-processing/	<p>I noted some concerns in connection with policy 55 about the city's efforts with regard to existing manufacturers that I echo here. These actions steps address a few concerns, but not the real or perceived antagonism to those businesses which provide real, skilled jobs. I'm thinking specifically of the City's battles with Graco. It strikes me as short-sighted at best not to work closely with such an employer, not to roll over to every demand, but in partnership to further a shared goal of more skilled, living wage jobs accessible to all residents.</p>	7/18/2018
4361	33	/policies/affordable-housing-production/	<p>The goals are good, but this will require raising revenue, and the methods of doing so (bonds, taxes, laws requiring a percentage of units to be affordable) should be addressed here.</p>	7/18/2018
4362	52	/policies/human-capital-and-a-trained-workforce/	<p>The 2040 plan is written from a management rather than labor perspective. This is not surprising, as private business has consumed public governance. As such, it is framed in the typical language of neoliberal capitalism, which ignores the structure of the economy, the labor market, and corporate business practices, preferring to focus on worker education. Workers can compete for, or have "access" or "opportunity" to get jobs that pay living wages. In this game, the "meritocracy," sure, anyone can have a living wage; but not everyone can have a living wage.</p> <p>Goal #4 (Living Wage Jobs) states "To achieve the goal of ensuring residents access to a living-wage job, the City of Minneapolis will invest in education and skills training so residents, especially low-income residents, residents of color and indigenous residents, have opportunities to prepare for and participate in Minneapolis's growing economy."</p> <p>In this rendering, it's "the economy" that workers must conform to, which they might be able to thrive in if they get enough education. But getting an education is not the only way that workers can have a better chance of landing a living-wage job. Where's the support for a \$15/hour minimum wage? Where's the paid parental leave? Where's the acknowledgement of wage theft? The support for unions? The focus of the 2040 plan is on the individual worker rather than economic policy. And it lets business off the hook.</p>	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4363	18	/policies/walking/	<p>I've got a big action step you've missed entirely--enforce current city regulations on snow removal! I walk all over my neighborhood, both for pure recreational purposes and to shop at nearby stores. In the winter, I'm literally risking my life. This problem is more acute for the elderly, but it affects all of us. I remember vividly taking a fall on an icy sidewalk when I was pregnant with our son.</p> <p>On a year round basis, could we please not allow development to block sidewalks? In NYC, they manage to construct dozen story towers without shutting off sidewalks, but here in MPLS we routinely allow builders to shut off all street side access. Stop letting them do that!</p>	7/18/2018
4364	41	/policies/tenant-protections/	Maybe we need rent stabilization?	7/18/2018
4365	20	/policies/transit/	<p>POLICY 20 - Transit: Increase the frequency, speed, and reliability of the public transit system in order to increase ridership and support new housing and jobs</p> <p>In coordinating Urban development with surrounding areas, Minneapolis should have more 'spokes' to the suburbs, so that as population pressures increase on the city, people have the option of living in out-lying areas. It would also provide those living in the city to take public transport to their jobs in the suburbs, and provide suburbanites a way to get into the city for sports and cultural events. I gave up going to my grandson's 6 o'clock baseball games in Eagan because it took me over an hour to drive from south Minneapolis to Eagan - a distance of 15 miles.</p>	7/18/2018
4366	19	/policies/bicycling/	Enough already! I spent last fall trying to get back and forth to Abbott NW (for medical treatment for lymphedema, so don't tell me I could have biked there!) on 28th and 26th streets to find them jammed with cars, but with bike lanes where I rarely saw a single bicycle. We've gone too far and are favoring a mode of transportation that is closed off from large chunks of our population, including families with infants or multiple children, those with disabilities, the elderly, those with jobs that do not favor a disheveled or sweaty appearance, those whose school or work requires transporting equipment or bulky items. The bike policy seems to focus solely on the young, childless, privileged, and able--a white boys frat, if you will.	7/18/2018
4367	67	/policies/climate-resilient-communities/	Aging Infrastructure in general needs to be addressed. We cannot add this amount of density with our current infrastructure. That should all be updated first before we even look at increasing density.	7/18/2018
4368	85	/policies/access-to-health-social-and-emergency-s	Traffic around Children's Hospital and Abbott Northwest Hospital is very difficult and made more difficult by ongoing construction. Do there need to be so many bike lanes around the hospital? Most hospital staff and patients get to the hospital via cars, buses, taxi, metro mobility, ambulance, etc. I believe that road access to these hospitals could be significantly improved without additional bike lanes.	7/18/2018
4369	20	/policies/transit/	Terrific steps, but steps that need to be taken BEFORE increasing density in most areas of the city. Also, mass transit does not address real issues families and the elderly face for point to point transportation needs.	7/18/2018
4370	13	/policies/landscaping/	How does the increased density and allowing construction of four-plexes throughout the city tie to this goal, when it seems that such development will decrease our pervious surface space? We may not be paving paradise to put up a parking lot, but it's close. We need to increase our green space, not decrease it!	7/18/2018
4371	11	/policies/skyways/	I think it is important to not discourage the development of skyways for mixed use and residential buildings. While I appreciate the goal of encouraging street use as indicated in item g, having additional means to connect residential and mixed use buildings downtown allows for development of a more vibrant city life in all seasons. Additionally, if more downtown residents have the option to walk from their apartment/condo in a climate controlled environment, this will further city goals for a healthier population, reduce vehicle traffic in downtown during winter and inclement weather, reduce pollution as a result of decreased vehicle emissions, and increase mobility for residents that may have difficulty traversing sidewalks in the winter due to snow obstructions or ice.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4372	0.1	/topics/land-use-built-form/	<p>Land Use Built Form</p> <p>Allowing 6 story structures on Nicollet and Chicago Avenues south of Lake Street and 3 story buildings on the other side of these blocks is an awful idea that will destroy the character of the neighborhoods along these streets. Advocating 4 story buildings along Lyndale, Bryant and Xerxes Avenues south of Lake Street and 50th Street isn't much better.</p> <p>Alternative: I recommend that buildings along Nicollet and Chicago Avenues be limited to a maximum of 3 stories ("Corridor 3" status) and the other side of the block remain zoned for single family homes only. To help with population growth, I recommend that the city should only zone for 6 story buildings along Nicollet Avenue where the block is currently commercial in character and acts as a transportation node, such as Nicollet and 46th Street and Nicollet and 54th Street. These Corridor 3 buildings and strategically located Corridor 6 buildings need to provide their own off-street parking. To think that many people are going to abandon cars for public transportation is naive. If the city really does need tall residential buildings (those more than 3 stories tall) they should be developed closer to where the jobs are, not in single family residential areas. Have developers build affordable housing in downtown (rather than million dollar apartments) and near current industrial and retail areas.</p> <p>Objections: I have several reasons for my objection to zoning for 6 story buildings along Nicollet Avenue adjacent to where I currently live. 1) City Hall is in Effect Playing Bait & Switch - My wife and I did a great deal of research and searching where to live in the Twin Cities nearly 33 years ago. We decided to remain in Minneapolis because we wanted sidewalks, boulevard trees, access to wonderful parks and libraries, easy access to downtown, convenient bus routes and a diverse population of people. In return for these amenities, which I'm now calling the "bait", we were willing to live near Nicollet Avenue and 50th with its airplane noise and congestion from street traffic and the traffic associated with Justice Alan Page School and Washburn High School. They seemed like a small price to pay in order to live in a beautiful neighborhood within the city. If we knew that the city would some day zone our block for 6 story apartment buildings and 3 story apartments on our street, we would never have settled here. 2) Discourages Maintaining & Investing in Home - We have spent well over \$200,000 dollars over the years for improvements to our home as well as many tens of thousands of dollars in maintenance to our home. All our neighbors on Belmont Avenue have also spent large sums to keep their homes and our neighborhood looking beautiful. If there is a possibility that someone is going to put up a 6 story building behind me on Nicollet Avenue or a 3 story building next to me on Belmont Avenue, I probably won't continue to invest in improvements to my home. For example, we are considering putting up solar panels to reduce our use of electricity generated from natural gas and to charge</p>	7/18/2018
4373	80	/policies/development-near-metro-stations/	It makes sense to concentrate housing and commercial development near metro stations rather than allowing for 6 story structures along entire transit corridors in parts of the city that are distant from downtown.	7/18/2018
4374	33	/policies/affordable-housing-production/	There are noble goals but where are the specifics? Policies to have affordable housing should have been in place prior to the draft plan being released. I don't see anything discussing renovating houses that were once affordable but are not in need of repair so cannot be rented. What about forcing the slum land lords to clean up their affordable housing?	7/18/2018
4375	23	/policies/coordinated-development-strategy/	POLICY 23 - Coordinated Development Strategy: Coordinate the development of housing, businesses, and infrastructure in geographic areas where a district-wide approach has the greatest opportunity for achieving Minneapolis 2040 goals.	7/18/2018
4376	34	/policies/affordable-housing-preservation/	Minneapolis needs better public transportation to and from the suburbs. Where are the specifics for these action steps? It is hard to support a plan that is so vague.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4377	0.1	/topics/land-use-built-form/	<p>Land Use Build Form</p> <p>Allowing 6 story structures on Nicollet and Chicago Avenues south of Lake Street and 3 story buildings on the other side of these blocks is an awful idea that will destroy the character of the neighborhoods along these streets. Advocating 4 story buildings along Lyndale, Bryant and Xerxes Avenues south of Lake Street and 50th Street isn't much better.</p> <p>Alternative:</p> <p>I recommend that buildings along Nicollet and Chicago Avenues be limited to a maximum of 3 stories ("Corridor 3" status) and the other side of the block remain zoned for single family homes only. To help with population growth, I recommend that the city should only zone for 6 story buildings along Nicollet Avenue where the block is currently commercial in character and acts as a transportation node, such as Nicollet and 46th Street and Nicollet and 54th Street. These Corridor 3 buildings and strategically located Corridor 6 buildings need to provide their own off-street parking. To think that many people are going to abandon cars for public transportation is naive.</p> <p>If the city really does need tall residential buildings (those more than 3 stories tall) they should be developed closer to where the jobs are, not in single family residential areas. Have developers build affordable housing in downtown (rather than million dollar apartments) and near current industrial and retail areas.</p> <p>Objections:</p> <p>I have additional reasons (additions to an earlier submittal) for my objection to zoning for 6 story buildings along Nicollet Avenue adjacent to where I currently live.</p> <p>5) Congestion - We already are pressed for street parking during the school year. Much of the streets are already parked up by faculty and students of Washburn High School and the faculty at Justice Alan Page. The principal at Washburn High School went as far as to suggest to the Tangletown Neighborhood Association that perhaps residence could rent their home parking area to teacher's cars. Nicollet and 50th Street are already busy and noisy and it will become worse if we have additional residents from 6 story apartments with ground floor businesses.</p> <p>6) Overwhelming City Resources - Additional residents are going to put added pressure on the city schools, parks and libraries. Does the plan call for more schools, parks and larger libraries? I don't imagine the larger tax base is going to cover these additional costs.</p> <p>7) Property Values - It's pretty obvious and certain that 6 story apartment buildings along Nicollet Avenue are going to have a negative effect on the property value of my home and those of my neighbors.</p>	7/18/2018
4378	35	/policies/innovative-housing-types/	<p>Please provide us with examples of cities in the US that have expanded housing to increase density and affordability that has been successful. San Francisco, Portland and Seattle all "blew it" with their plans. Yes they created more density but not affordability and those cities are now almost unlivable.</p>	7/18/2018
4379	33	/policies/affordable-housing-production/	<p>Bullet "B" needs clarification. I am 71 years old and plan to live in our two story house until I die. I support having programs that can retrofit people's houses with chair lifts, 1st floor bathrooms, etc. At meetings, I have heard there is the belief that people want to move out of their large homes and into 4-plexes on their same block to stay in their community. This is not true! My friends who are downsizing are moving to condos or apartments that are already in Minneapolis or the inner rings of suburbs. They drive because our mass transit system is so bad and they are doing fine.</p>	7/18/2018
4380	33	/policies/affordable-housing-production/	<p>If the population of MPLS is projected to increase from 420K to 460K by the year 2040, which is only 10% growth, well short of 1950s population, why would it make sense to dramatically increase density by allowing 4-plexes (or more) throughout the city's properties that are currently single-family? The numbers don't add up. This is a risky move. Maybe it will make housing more affordable, although the experts disagree with that. Also possible is that some neighborhoods will end up with significant vacant property. I don't think vacant property has been good for Baltimore or Detroit, and it would not be good for our city either.</p>	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4381	6	/policies/pedestrian-oriented-building-and-site-de	Re Step k: It is simply unrealistic to eliminate off-street parking minimums, unless you also prohibit vehicle ownership by City residents. An alternative is to require one off-street parking space for every two living units in new or remodeled residential developments - still unlikely to be sufficient, but a step toward the astonishingly unreasonable stated goal of giving walking first priority as a means of transportation. Unreasonable, because there is NO ONE - children, young adults, mid-life adults, elderly, disabled, et cetera, who never needs a form of transportation other than walking. And some residents will never be able to travel any distance, no matter how short, without the use of motorized transportation.	7/18/2018
4382	26	/policies/vision-zero/	POLICY 26 - Vision Zero: Eliminate fatalities and serious injuries that are a result of crashes on City streets by 2027 Eliminating traffic fatalities will require solutions that reflect the causes of those traffic fatalities - drunk driving, distracted driving, driving while under the influence of drugs, poorly maintained streets (e.g. a motorist or bicyclists swerving to avoid a chug hole), etc. Research should reveal where and why most traffic fatalities occur - eg. there have been a number of fatalities at the intersections of the light rail with cars or bicyclists. Persons who have lost their DL due to drunk driving should be kept off the streets	7/18/2018
4383	27	/policies/transportation-partnerships/	POLICY 27 - Transportation Partnerships: Create and seize opportunities to leverage funding opportunities with regional partners or others making investments in the city. When partnering with private investors or developers, the city needs to keep in mind that the goals of these private partners may not be compatible with the goals of the city or the welfare of the residents. The focus of private investors is economic and often short-term. The focus of the city includes goals that are social, cultural, and environmental.	7/18/2018
4384	3	/policies/production-and-processing/	G) if the areas are relatively large, make sure walking in particular isn't just safe/easy/comfortable to the area, but through it as well. Encourage other uses, including housing, in the same areas in order to keep non-peak commute times safe and comfortable with reliable transit access.	7/18/2018
4385	3	/policies/production-and-processing/	Consider prioritizing and focusing on manufacturing and processing of already existing goods; innovation in not just recycling and reuse, but in distribution and collection are growing "new" fields that offer huge GHG reductions for consumers and can dovetail with technological and systems innovation.	7/18/2018
4386	28	/policies/msp-airport/	POLICY 28 - MSP Airport: Support and take an active role in strategies to make MSP International Airport more modern, efficient, connected, and environmentally sound. The noise (and possibly air) pollution from planes taking off from the MSP airport has adversely affected the quality of life for many south Minneapolis residents for decades. It is time for the city to do something about this.	7/18/2018
4387	18	/policies/walking/	Thank you. Susan Perry wrote this week about SUVs causing pedestrian deaths. https://www.minnpost.com/second-opinion/2018/07/investigative-report-suvs-are-major-factor-rise-pedestrian-deaths	7/18/2018
4388	30	/policies/arts-and-cultural-assets/	POLICY 30 - Arts and Cultural Assets: Support economic development, global competitiveness, and city livability by promoting local arts and cultural assets Even with cuts to education funding, we need to continue to recognize the value of music and art in our public schools, as well as in our greater community	7/18/2018
4389	33	/policies/affordable-housing-production/	No where is there a requirement that housing creators (aka developers) include a minimum percentage of affordable units within their developments. Without such a requirement, this entire policy is worthless rhetoric. If you really want to create affordable housing throughout the City, create minimum requirements for EVERY development.	7/18/2018
4390	69	/policies/renewable-and-carbon-free-energy/	renewable natural gas is a misnomer! Delete Action Step d	7/18/2018
4391	33	/policies/affordable-housing-production/	POLICY 33 Affordable Housing Production: Produce housing units that meet the changing needs of Minneapolis residents in terms of unit sizes, housing types, levels of affordability, and locations. the city could work with groups such as Habitat for Humanity.	7/18/2018
4392	17	/policies/complete-streets/	While this sounds amazing, We live in a climate that is not conducive to biking over half of the year. Plus, many residents have families and need automobiles to get around. This plan is biased against this demographic.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4393	51	/policies/healthy-pre-k-development/	<p>I'm all in favor of helping children who are born into poverty. It's complicated, I know. I don't know if are interested in this article about children in poverty / single parents, etc. but it goes into detail about this. http://www3.uakron.edu/schulze/401/readings/singleparfam.htm</p> <p>Why isn't there a bullet point in the action steps that would help break the cycle of children in poverty -- and I am talking about helping prevent teen pregnancies, multiple pregnancies to single mothers (any demographic, black, white, native). Obviously having a child is a choice and God-forbid we judge someone for getting pregnant. These action steps should support family planning and contraception to any woman who is in need. Education for young women to help prevent pregnancies. Back up the bus! Break the cycle. And, definitely support the children we have with items C, D and F.</p>	7/18/2018
4394	0.1	/topics/land-use-built-form/	<p>I agree that Minneapolis needs to invest in its future and we need to invest in infrastructure to support that growth. My concerns center around the parking challenges that will result from the proposed increased density and the negative impact of multi-dwelling buildings that become rental properties (likely with remote landlords) in areas that are currently single family homes. We see on a block to block basis how rental units negatively impact those blocks - properties are not well maintained by their absentee landlords and there is not a "bonding" of rental tenants compared to those invested in their homes. Also how will the education system /school infrastructure be upgraded to account for the new students? It's great to have high traffic corridors for those traveling through, but not for those who have to live there.</p>	7/18/2018
4395	42	/policies/expand-homeownership/	<p>We need homes for people to buy. This plan currently encourages upzoning which will result in tearing down homes to construct numerous multi unit buildings further reducing they housing stock. We should be advocated for preserving smaller single family homes to provide that mix of housing.</p>	7/18/2018
4396	34	/policies/affordable-housing-preservation/	<p>POLICY 34 - Affordable Housing Preservation: Preserve existing housing using targeted, priority-based strategies. Housing becomes unaffordable when existing home owners are forced out of their homes by rising property taxes. The city needs to place a cap on property taxes for those who have lived in their home for 20 years or more.</p> <p>Also, the city could incentivize landlords of rental properties to keep their rents at affordable levels by creating a dB with the names of landlords willing to participate. Include in that dB, the names of contractors, plumbers, and electricians who are willing to provide quality services at reasonable prices for landlords who are in the participating dB. the incentive for landlords would be that it would be less costly for them to maintain their properties.</p>	7/19/2018
4397	1	/policies/access-to-housing/	<p>Expansion of housing options by upsizing houses to 4-places everywhere doesn't account for the public infrastructure needed to account for 4 times the people on the same amount of space. It will need to be done a little more deliberately than just drawing two lines across the map. Residents who worked hard to afford nice homes in quiet neighborhoods are unlikely to look kindly on the argument that 4 unit buildings towering over them on all sides is necessary and progressive when the only housing being built is upscale luxury condos that don't address disparities at all.</p>	7/19/2018
4398	1	/policies/access-to-housing/	<p>In NE Minneapolis, a rent control should be put into place (and tax benefits for landlords as well) or we will risk losing the artists who live, work and pay rent there now.</p>	7/19/2018
4399	1	/policies/access-to-housing/	<p>I don't see concrete steps involved to ensure that more housing density will lead to increased availability of any level of affordable housing.</p>	7/19/2018
4400	30	/policies/arts-and-cultural-assets/	<p>Northeast Minneapolis will not last another 10 years without rent control and tax breaks for landlords. None of the above will do a thing to help artists.</p>	7/19/2018
4401	26	/policies/vision-zero/	<p>I support Vision Zero as a part of the plan. I would like to see enforcement de-prioritized as a strategy to accomplish Vision Zero. Enforcement is inequitable. Enforcement exacerbates racial disparities. We also have other strategies, like improved infrastructure, that will be more effective to achieve this goal.</p>	7/19/2018
4402	42	/policies/expand-homeownership/	<p>POLICY 42 - Expand Homeownership: Improve access to homeownership, especially among low-income residents and people of color.</p> <p>Expanding home ownership is good in that people usually take pride in and care for property that they own, especially when they realize that it may be a long-term investment - they should be educated and cautioned regarding taking out ARMs or Adjustable Rate Mortgages.</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4403	15	/policies/transportation-and-equity/	Including Vision Zero is an important policy to include to achieve equity in transportation. However, it should not include enforcement. Please eliminate priorities on enforcement.	7/19/2018
4404	26	/policies/vision-zero/	Vision zero is a great plan - I believe safety can be improved and through design! Use this policy to transform the physical space.	7/19/2018
4405	26	/policies/vision-zero/	I would like to express concern about the racial bias inherit in using human enforcement to enforce vision zero goals	7/19/2018
4406	6	/policies/pedestrian-oriented-building-and-site-de	I support pedestrian oriented building and site designs! I want to see more folks able to access more resources in their neighborhoods by walking right in from the sidewalk. I also support removing parking requirements city wide, as well as prohibiting new drive thrus and gas stations. I would like to see more policy about limiting surface parking lots.	7/19/2018
4407	6	/policies/pedestrian-oriented-building-and-site-de	Could you please provide more information on how to eliminate danger of curb cuts and walking past parking lots.	7/19/2018
4408	6	/policies/pedestrian-oriented-building-and-site-de	I believe this is a very important policy within the city of Minneapolis. Making an environment that makes pedestrians more visible is a good thing and I support this.	7/19/2018
4409	6	/policies/pedestrian-oriented-building-and-site-de	Thank you for including this policy. It is important for making walking safe and enjoyable for people. It needs more detail for how to discourage surface parking lots, like possibly charging a large stormwater fee at the time of construction for increasing hard surfaces.	7/19/2018
4410	26	/policies/vision-zero/	Please weight consideration to designing better bike and pedestrian infrastructure that make people safer and preventing deaths rather than enforcement since enforcement is a proven method used to adversely affect people of color and also isn't effective in changing behavior.	7/19/2018
4411	1	/policies/access-to-housing/	Goal #2 More residents and jobs. I'm disappointed that the Metropolitan Council and the City of Minneapolis feel that it's urgent to accommodate a larger population in the Twin Cities. I would like to see local government advocating and leading in the area of maintaining a sustainable population, in other words, advancing the idea of zero population growth through education. I don't believe we're going to solve the adverse effects of man-induced climate change and other forms of environmental degradation simply through technological means. We need to maintain a sustainable world human population and the role of local government in this endeavor is crucial particularly with the people we have currently at the federal level in Washington D.C. While it can be argued that it is good environmentally to pack more people in cities rather than converting farm and undeveloped rural land into housing and commercial enterprises, it would be even better if we also educate people to understand the importance of limiting the number of their children to 2 or 3. I'm cynical enough to believe that the desire of the 2040 plan to address population growth is largely driven by pressure from corporations and other forms of business to have an oversupply of workers so they can limit wages and benefits and by politicians who want a bigger tax base.	7/19/2018
4412	19	/policies/bicycling/	I would love to see greenways and protected bikeways specifically mentioned in the plan as ways to encourage biking and walking as options in the city.	7/19/2018
4413	6	/policies/pedestrian-oriented-building-and-site-de	Would prohibiting new gas stations also prohibit the construction of charging centers for electric vehicles, which would discourage a new technology fighting climate change	7/19/2018
4414	6	/policies/pedestrian-oriented-building-and-site-de	This seems odd to require windows to allow seeing into all buildings. I can imagine buildings such as a church or daycare that don't want people looking in. Or perhaps I'm building a factory that needs more space without windows. Are their areas of the city where that is allowed?	7/19/2018
4415	18	/policies/walking/	I am thrilled to see the focus on walking. I would like to see details around winter sidewalk maintenance. It is very difficult for folks to walk in the winter, and impossible for some folks who live with disabilities or use mobility devices.	7/19/2018
4416	6	/policies/pedestrian-oriented-building-and-site-de	This seems odd to require windows to allow seeing into all buildings. I can imagine buildings such as a church or daycare that don't want people looking in. Or perhaps I'm building a factory that needs more space without windows. Are their areas of the city where that is allowed?	7/19/2018
4417	19	/policies/bicycling/	Minneapolis is a great bicycling city, I feel that the protected bike lanes need to mentioned specifically along with the neighborhood "Greenway Trails" including removal connection barriers.	7/19/2018
4418	83	/policies/people-with-disabilities/	Winter sidewalk maintenance is critical for ensuring access to the city for people with disabilities. Add winter sidewalk maintenance with a priority network that is run by the City.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4419	83	/policies/people-with-disabilities/	I would like to see a plan for winter sidewalk maintenance included - folks living with disabilities have a very difficult time getting around in the winter - for some folks it is impossible to leave their homes.	7/19/2018
4420	17	/policies/complete-streets/	There is no mention of creating greenways to make safe biking or walking and no mention of creating protected bikeways (sharrows are not effective protection). There is also no acknowledgement of a plan for winter sidewalk maintenance. Please include these things!	7/19/2018
4421	19	/policies/bicycling/	Bikeway designs using parked cars to "protect" cyclists from moving traffic are inappropriate and should be eliminated from any and all guidance toward picking styles of bikeway. Vehicle passengers unused to traffic outside their doors are too dangerous for cyclists	7/19/2018
4422	77	/policies/park-access/	I fully support this Policy and action plan. Would encourage an action step that involves winter safety plans for walking and biking.	7/19/2018
4423	1	/policies/access-to-housing/	I strongly oppose the building of multi-family units on single-family Lots in neighborhoods that were never designed to carry such a load. Alleys are not designed to carry additional Vehicles. Streets are not designed to accommodate additional parking. Could easily add an additional 6 vehicles per lot. Streets are not designed to accommodate this and mass transit is not an option that is viable in our neighborhood. This plan is idealistic but not realistic.	7/19/2018
4424	18	/policies/walking/	I fully support this Policy and action plan. Would encourage an action step that involves winter safety plans for walking and biking.	7/19/2018
4425	19	/policies/bicycling/	I fully support this Policy and action plan. Would encourage an action step that involves winter safety plans for walking and biking.	7/19/2018
4426	83	/policies/people-with-disabilities/	I fully support this Policy and action plan. Would encourage an action step that involves winter safety plans for walking and biking.	7/19/2018
4427	19	/policies/bicycling/	As a bicyclist I hate the bump out intersections because they eliminate the bike lane at the intersection and they narrow the intersection so much that larger vehicles turning end up in the oncoming lane and as a bicyclist I end up having to jump out of the way. The narrower Nicollet is also like this. I have to drag my bus up onto the sidewalk to get out of the way of the buses turning	7/19/2018
4428	46	/policies/healthy-housing/	<p>POLICY 46 - Healthy Housing: Proactively address health hazards in housing and advance design that improves physical and mental health.</p> <p>The city should require investors and developers to use quality building materials - that are ecological, non-toxic, and low-maintenance. One of my neighbors suffers from asbestosis from having worked with insulation before he retired. While asbestos has been outlawed, we still have legal materials that may adversely affect human health and the environment. For example, vinyl siding, when heated to high temperatures or burned, emits dioxin - a highly toxic carcinogen. The city needs to be aware of the various building materials and their advantages and disadvantages, when approving new developments.</p> <p>Installation of solar panels on buildings should be encouraged. Those who have solar panels should be protected by regulations that make it illegal to erect a building to the south that blocks out the sun from the building with solar panels.</p>	7/19/2018
4429	47	/policies/housing-maintenance/	<p>POLICY 47 - Housing Maintenance</p> <p>Place a cap on property taxes for those who have owned their homes for 20 yrs or more.</p>	7/19/2018
4430	1	/policies/access-to-housing/	Tearing down existing homes to build denser housing will destroy our Uptown neighborhoods and drive out residents. There is already a healthy blend of single homes, multi-plex, apartments, etc., with a healthy blend of races, ages, orientations. The existing density has however, created a parking disaster. More density will bring more cars, with no where to park. I will remind the planners that we have winter here in Minneapolis and it is just too cold to walk very far, so residents own cars. Creating zoning where you can build basically anything, will drive down property values. Our homes are our long term investment. As an aging single-family home dweller, I am insulted by your plan to ship me off to a multi-family so that some one young can take over my home. Simply, NOT acceptable! If you want young people with families, fix the horrible school system so residents don't have to move to the suburbs when the kids reach school age.	7/19/2018
4431	1	/policies/access-to-housing/	I am strongly opposed to rezoning single family home lots to multi-unit. This policy favors developers and completely undermines single family home owners who moved herewith the not unreasonable expectation that they would live in a neighborhood zoned for houses.	7/19/2018
4432	49	/policies/educational-and-economic-access/	<p>POLICY 49 - Educational and Economic Access: Increase equitable access to educational and economic opportunities</p> <p>Support our libraries as well as our schools - they provide vital functions in our community. Education is the life blood of a democratic society.</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4433	33	/policies/affordable-housing-production/	<p>I hear that eventually you hope to have more job in north Minneapolis.</p> <p>I think it is very important that the "affordable housing" be built closer to jobs- e.g. on the Bloomington border, near the Quarry shopping center, or, near some of the larger nursing homes.</p> <p>There are very few jobs in north Minneapolis, and the ones that are here seem to be filled by residents outside 55411. Coloplast did not live up to their hiring expectations</p>	7/19/2018
4434	50	/policies/access-to-technology/	<p>POLICY 50 - Access to Technology</p> <p>Libraries provide many people with access to the internet who would not otherwise be able to afford it - support our libraries.</p> <p>People in all communities, at all income levels need access to the internet - for educational purposes, employment, and to connect socially. We need internet neutrality - even as the federal government tries to take this away from us.</p> <p>Also, the city needs to ensure that residents will have choices when it comes to internet providers - there should not be a monopoly - especially when the ISPs are not regulated like the public utilities.</p>	7/19/2018
4435	1	/policies/access-to-housing/	<p>I like parts of the plan: more density in downtown and near transit areas, but am not keen on seeing 3 and 4 unit buildings in single family areas, mainly because landlords don't care that much about their properties other than collecting rent. The rentals in my neighborhood are weedfilled in the summer and rarely shoveled in the winter. One renter on my block was turning tricks. Who wants to put up with that? I think the quality of all housing will go down if this policy is passed.</p>	7/19/2018
4436	51	/policies/healthy-pre-k-development/	<p>POLICY 51 - Healthy Pre-K Development</p> <p>the greatest/most rapid brain development occurs the last month prenatally and the first year after birth. Children's brains continue to develop very rapidly during the pre-school ages. Children develop their attitudes toward school and toward themselves as learners during these early years. It is absolutely crucial that we support early childhood education. Some other developed countries are far ahead of us in this area - we can catch up.</p>	7/19/2018
4437	33	/policies/affordable-housing-production/	<p>If you truly want more affordable housing, build it near business areas, close to transit and shopping.</p>	7/19/2018
4438	34	/policies/affordable-housing-preservation/	<p>all good ideas...</p>	7/19/2018
4439	35	/policies/innovative-housing-types/	<p>too vague. what does that mean?</p>	7/19/2018
4440	45	/policies/leverage-housing-programs-to-benefit-c	<p>the city must be careful not to stick its fingers in too many pies: I think step B is overkill. Our citizens will need to stand up for what they want, or is the city the parent in chief?</p>	7/19/2018
4441	53	/policies/quality-of-life/	<p>POLICY 53 - Quality of Life</p> <p>Minneapolis has something that most other cities do not have - neighborhoods. Neighborhoods have personalities, they give people a sense of belonging and a sense of stability. When doing our urban planning we should be careful not to destroy neighborhoods - there will be many corporate and economic pressures to do so. We need access to clean water, clean air, good food, and a sense of belonging. Like Mr, Rogers taught us - neighborhoods are important to our quality of life.</p>	7/19/2018
4442	46	/policies/healthy-housing/	<p>for the most part, the city is about 50 years too late on this issue</p>	7/19/2018
4443	33	/policies/affordable-housing-production/	<p>Within this policy, part of affordability is utility income consumption. Take some pages from California. It is very possible to provide an affordable and super energy net zero house; very easy. I know. I live in one. It just needs to be a priority for many reasons. This must be in the plan because it reduces energy consumption and at the same time puts more money back in the hands of the homeowners.</p>	7/19/2018
4444	1	/policies/access-to-housing/	<p>Regarding the action steps cited above, specifically items 'd' and 'e' why should this be an 'all or none' zoning change? Because many of the goals in this housing plan are dependent on other branches of government to fulfill (developing transit options for instance), allowing an unfettered ability to convert 100% single family lots with up to four dwelling units, we may experience unintended consequences. I would advocate for a phased in approach whereby for example, a maximum of 20% of single family residential lots can be converted over the first 5 years of the plan so that impacts can be evaluated and correctional steps can be taken. Regarding high density proposals on public transit routes, I am particularly concerned about the proposed 30 unit high rise on the Calhoun Village site. This area is a traffic nightmare already and adding another 800+ units seems particularly problematic.</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4445	1	/policies/access-to-housing/	<p>The equity promised by communism sounded good in theory, too. The difference between the Soviet Union and Minneapolis is that the Soviets could erect walls to keep people from leaving.</p> <p>In case you don't understand what I am saying, let me be more direct: this plan is atrocious. I live here precisely because I can live in a place that feels like a small town.</p> <p>And have you ever been to New York City or Hong Kong? Densification hasn't made them more affordable; it has simply made them terrible places to live.</p>	7/19/2018
4446	47	/policies/housing-maintenance/	<p>Hey! Houses are EXPENSIVE and not for everyone, plus, homeowners and landlords need to be responsible. It would be great if landlords could do what is currently the law.</p>	7/19/2018
4447	33	/policies/affordable-housing-production/	<p>The equity promised by communism sounded good in theory, too. The difference between the Soviet Union and Minneapolis is that the Soviets could erect walls to keep people from leaving.</p> <p>In case you don't understand what I am saying, let me be more direct: this plan is atrocious. I live here precisely because I can live in a place that feels like a small town.</p> <p>And have you ever been to New York City or Hong Kong? Densification hasn't made them more affordable; it has simply made them terrible places to live.</p>	7/19/2018
4448	34	/policies/affordable-housing-preservation/	<p>Naturally occurring affordable housing is a dog whistle word. Why not put affordable housing around all parts of the city. It will raise everyone up. There are businesses everywhere in the city and all types of housing should be available for all income levels.</p>	7/19/2018
4449	38	/policies/affordable-housing-near-transit-and-job-	<p>The equity promised by communism sounded good in theory, too. The difference between the Soviet Union and Minneapolis is that the Soviets could erect walls to keep people from leaving.</p> <p>In case you don't understand what I am saying, let me be more direct: this plan is atrocious. I live here precisely because I can live in a place that feels like a small town.</p> <p>And have you ever been to New York City or Hong Kong? Densification hasn't made them more affordable; it has simply made them terrible places to live.</p>	7/19/2018
4450	68	/policies/energy-efficient-buildings/	<p>please consider how much it costs to force people into expanded building codes. There should be some measure of reason applied - if it double or triples the cost of the improvement...or the increased cost will cause the project to never break even (payback is longer than the operating life of the product)...then it should not be required.</p>	7/19/2018
4451	34	/policies/affordable-housing-preservation/	<p>Preservation of existing housing stock is like throwing money in a lake. Older houses use a lot more energy, have old foundations and will not be appropriate in the coming years. there has to be a better solution.</p>	7/19/2018
4452	1	/policies/access-to-housing/	<p>Larger units like 3 and 4 family need to be contained and restricted to major bus/transit lines. Bringing in a 4-plex next to single family homes will negativity effect the people currently owning and living their. Why would you do this? People live in neighborhoods for a reason. Why crowd them out, or do something that would decrease their investment ?</p>	7/19/2018
4453	0.1	/topics/land-use-built-form/	<p>Please do not fill West Broadway with low income housing like you did to Plymouth after the riots. Time for the rest of the city to bear their fair share of low income residents - and the complications many bring to the neighborhoods where they end up</p>	7/19/2018
4454	17	/policies/complete-streets/	<p>This is the first I've heard of this plan; don't you think it should be advertised to Mpls residents???</p> <p>When I worked at the U of M and DT Mpls, I did walk home when the weather was nice. It usually took about 90 minutes. Guess what the biggest problem was? No public toilets! This is a big deal for a woman, how are you going to solve it?</p>	7/19/2018
4455	95	/policies/heritage-preservation-financial-incentive	<p>should not be limited to low income properties. preserving our history all over the city should be the goal.</p>	7/19/2018
4456	18	/policies/walking/	<p>right. Don't forget the toilets.</p>	7/19/2018
4457	6	/policies/pedestrian-oriented-building-and-site-de	<p>People do drive cars. I am an avid bicyclist but I don't bike in winter and I don't do all my errands on a bike. This whole plan sounds pie in the sky. I notice all your pictures up top show lovely sidewalks in the summer, not the winter. Bicycles are great and I do ride all over but this plan just seems not realistic. If you want people to get rid of cars we need to GREATLY improve public transit, not assume everyone is going to bike.</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4458	59	/policies/downtown/	<p>POLICY 59 - Downtown</p> <p>Downtown Minneapolis has green spaces and great restaurants that make it a welcoming place. I believe the biggest barrier to people wanting to work, shop, or visit downtown is traffic and parking. Public transit serves some areas of the city well in this regard, but for other areas and the close-in suburbs, there could be improvements to public transport. Also, frequent construction barriers prevent people from wanting to go downtown.</p>	7/19/2018
4459	76	/policies/new-parks/	Please partner better with the Minneapolis Park Board. They are working on their North Side Master Plan and it's very different than what you're trying to do here. Talk to each other?	7/19/2018
4460	77	/policies/park-access/	please do not let the park board build a dome in North Commons Park.	7/19/2018
4461	1	/policies/access-to-housing/	it's good to have diversity in housing stock. I would like there to be more scrutiny in tearing down houses over 75 years old....let's not tear down all of our beautiful old homes for four-plexes.	7/19/2018
4462	16	/policies/environmental-impacts-of-transportation/	<p>Zero emission vehicles are still vehicles and will require parking facilities.</p> <p>Any thought to creating parking facilities on the periphery of downtown and then provide free, emission free shuttle service to downtown.</p>	7/19/2018
4463	34	/policies/affordable-housing-preservation/	Tiny houses could be a great starting point for people living in poverty. Should also assign a social worker to live in the tiny house neighborhood to assist while the tenants work, save and eventually move up and out into something not subsidized.	7/19/2018
4464	1	/policies/access-to-housing/	I am speaking from the perspective of a homeowner of a single family home on Fremont near the lakes and near the Rose Garden. These are historic homes with a lot of long term residents who are looking to retire in the city despite high taxes and despite not having children using the school systems they are paying into. These residents want to live in the city despite the taxes they pay because they want to live there and support the city they love. They happily do this. Many are city leaders and on boards of our nonprofits etc. If four buildings were put on a lot next to our home, for example, this would take over a million dollars or more out of the value of our home. This would destroy the value of our home. The same could happen to any of our neighbors. In retirement how could we handle such a loss. Should we stay in the city with such inherent uncertainty? What happens to the investment value of the homes in these historic neighborhoods? These homes were bought with the expectation zoning wouldn't change to create such an investment risk. It is unfair to ask certain people to take that sort of magnitude of loss just because they live in a more expensive home and caring about people in those homes isn't currently in fashion. I regret my prior support of this mayor. I am a democrat but not a socialist.	7/19/2018
4465	35	/policies/innovative-housing-types/	Tiny houses! Four per 40-foot lot near transit corridors. There are lots of empty lots within a few blocks of the 5 and 19 lines in north Minneapolis. also plan for a social worker to live in one of the houses so the tenants have easy access to services.	7/19/2018
4466	36	/policies/innovative-housing-strategies/	Tiny houses! four per 40 foot lot!	7/19/2018
4467	61	/policies/environmental-justice/	<p>POLICY 61 - Environmental Justice</p> <p>Our Atty General, Lori Swanson, has fought for environment justice - forcing companies to clean up the toxic chemicals they leave behind. I hope we recognize and support the Attorney General</p>	7/19/2018
4468	37	/policies/mixed-income-housing/	you should only issue 'so-many' permits for affordable housing per district per year. Most of it ends up in North Minneapolis...time for other neighborhoods to shoulder some of this burden.	7/19/2018
4469	20	/policies/transit/	we cannot be a great city without more light rail	7/19/2018
4470	1	/policies/access-to-housing/	<p>As a Minneapolis resident for 25 plus years my strong view is that the proposal would destroy the neighborhoods that make the city great. The fourplex plan will benefit developers and speculators. Single family homes will be destroyed and replaced. A neighborhood that is sprinkled with fourplexes will forever change its fabric and spirit and the value of the homes directly near the fourplexes, which is not only unfair to those homeowners, but potentially financially crippling. If the fourplexes are apartments our neighborhoods will become more transient. If they are condos the units will only be compelling options as long as they include the best amenities. At some point that will not be enough and the condos will fail because buyers will look to the next development with the most up to date amenities. The problems with this across the board plan are endless.</p> <p>You represent us, not a perceived future citizen. Who is this plan for-- the voters living in the city today, or some perceived future transient?</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4471	39	/policies/fair-housing/	Please protect landlords from low income tenants. They are often harder on rental units, unreliable for paying rent and if they trash the unit, aside from the small damage deposit - good luck getting any money in small claims to fix what the tenant left behind. For every pro-tenant policy, you should have a companion pro-landlord policy. For example....your idea to require all landlords to accept section 8 vouchers....fine....create a damage fund landlords can apply to for grants to remedy what was done to their property by allowing the section 8 renter to live there.	7/19/2018
4472	1	/policies/access-to-housing/	I feel we are being punished along Emerson and Fremont Avenues in north Minneapolis. The number 5 bus is dicey- I have frequently ridden it to work. Recently I was propositioned in graphic visual and verbal crude terms for sex by a man offering the change in his pocket (less than \$1) Recently, I sat on a seat that appeared wet, but I was carrying a lot of things to work, so I sat down. It turns out it was not water but rather urine. Frequently, people and the bus driver play "blink." The passenger wants to board without paying his fare. Yes, it is usually a "he." It is worst with the morning rush hour because the bus driver must decide whether to have the bus run even more late, or, reinforce to freeloaders that this is a good time to ride without paying their fare. So because I live on the #5 bus route, I get to have 6 to 8 story buildings destroying the sense of community I enjoy to permit the suburbanites to have a quicker and easier ride to downtown. I will have to walk farther, so, in actuality it will increase my transit time to downtown.	7/19/2018
4473	40	/policies/homelessness/	Tiny houses in sw minneapolis! Time for them to contribute toward solving this problem.	7/19/2018
4474	19	/policies/bicycling/	I support biking as a mode of transportation that should be encouraged. The selection process for bikeways (thinking specifically of the 26th and 28th street bike lanes)was extremely flawed. I don't understand this all or none approach to this and many other action steps. Why not have a trial period and then assess impacts? An example of this was in my neighborhood when different traffic calming methods were tried for a while and data was collected and analyzed for impact.	7/19/2018
4475	1	/policies/access-to-housing/	I hear that there is a lot of expense to be covered with the fixed rail transit. This benefits the suburbanites, not, the folks living in north Minneapolis. The Bottineau line avoids north Minneapolis, but will give a scenic ride to the suburbanites going through our park land. Putting high density housing on Emerson and Fremont Avenues north will cut up our neighborhood to allow the suburbanites easy access to downtown.	7/19/2018
4476	16	/policies/environmental-impacts-of-transportation/	The only way to reduce car use is to greatly improve public transit so that people can actually get to places in the city they need to go, not just downtown, in a timely manner that is cheaper than driving. More bus lines, that run much more frequently. Light rail is nice but too expensive. The enhanced bus lanes are a good way to go. More of them please.	7/19/2018
4477	41	/policies/tenant-protections/	Please add some bullets around how you're going to help landlords. A lot of them don't make tons of money on their property...and when you consider what's at stake and their only recourse is to keep the damage deposit...when they're trusting the tenant with a unit worth tens of thousands of dollars....you need to even things up and cover losses landlords incur by accepting section 8 vouchers.	7/19/2018
4478	16	/policies/environmental-impacts-of-transportation/	The only way to reduce car use is to greatly improve public transit so that people can actually get to places in the city they need to go, not just downtown, in a timely manner that is cheaper than driving. More bus lines, that run much more frequently. Light rail is nice but too expensive. The enhanced bus lanes are a good way to go. More of them please.	7/19/2018
4479	33	/policies/affordable-housing-production/	Part of why we lost affordable housing is that the city inspections have not enforced infractions to the worst landlords e.g. Mr Kahn. The city is responsible for his displaced tenants, the city should have never allowed those buildings to be so disgusting.	7/19/2018
4480	2	/policies/access-to-employment/	The policy seems positive but I don't see job opportunities similar to the job I have that has greatly helped our family. I have a job with a very large world-wide company in Eagan. There are no jobs on public transportation routes that would allow me the same opportunities. What I see in 2040 is the possibility of a lot of part-time or low-pay jobs, not jobs that can sustain a family. This is more distressing knowing that the new proposed housing is going to be very expensive. Some or many of us will continue to need our jobs in the suburbs that require use of an automobile and it's very clear that 2040 is discouraging automobile use.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4481	62	/policies/contaminated-sites/	<p>POLICY 62 - Contaminated Sites: Remediate contaminated sites to improve the environmental and economic health of the city and its residents</p> <p>The city should not put economic growth above access to clean water and air. It should not grant waivers to developers and companies who want permission to pollute our environment. Agreements with developers should include clauses making them responsible for engaging in ecological practices and making them fiscally responsible for any contamination they cause. The Minneapolis taxpayer should not have to clean up their messes.</p> <p>Our Atty General, Lori Swanson has fought for environment justice - forcing companies to clean up the toxic chemicals they leave behind. I hope we recognize and support the Attorney General.</p>	7/19/2018
4482	1	/policies/access-to-housing/	<p>I hear the sales pitch that 4-plexes will allow poor folks to own their own home and earn rental income off the other 3 units.</p> <p>I have a hard time believing a bank would lend that large amount of money to someone who has never owned a single family home before.</p> <p>These 4-plexes will be built by developers, and become the slums of tomorrow.</p>	7/19/2018
4483	16	/policies/environmental-impacts-of-transportation/	<p>In step e you mention fees as incentives. This should only be done cautiously as these can disproportionately affect poorer people unless the fees are somehow based on income.</p>	7/19/2018
4484	1	/policies/access-to-housing/	<p>I live in a neighborhood just north of Downtown. My neighborhood has a great sense of community. We frequently have get-togethers.</p> <p>If you put a series of high density housing on my block, I will have neither the space in my home, nor the budget to host a party including the number of families that will live in high density housing.</p> <p>Why do you have to break up our fragile but beloved neighborhood?</p> <p>If people want to live in anonymous large dense housing units, please put them on a commercial corridor, not a residential street like Emerson and Fremont.</p>	7/19/2018
4485	16	/policies/environmental-impacts-of-transportation/	<p>In step j you mention shared mobility. We had car 2 go and our tax structure made them leave. What are you changing to have options like this come back? People loved that option. They were all over my neighborhood.</p>	7/19/2018
4486	1	/policies/access-to-housing/	<p>I understand that the greatest housing need if for "ultra low income" households.</p> <p>To avoid the concentration of poverty that was experienced in the days of redlining, I would like have other neighborhoods step to the plate at allow some of these folks to live in neighborhoods with more jobs and more family mentors.</p>	7/19/2018
4487	63	/policies/food-access/	<p>POLICY 63 - Food Access:</p> <p>Promote community and backyard gardens. Contact your representatives at the federal level to advocate for adequate funding of the FDA - the agency that is supposed to be monitoring and enforcing the regulations regarding the safety of our food supply</p>	7/19/2018
4488	0.1	/topics/land-use-built-form/	<p>Interior 1 depictions are not attractive at all and wipe out any resemblance to the Interior 1 neighborhoods as they are today. Such drastic changes are not necessary and much more thought should have been given to other options. These proposed neighborhood designs will likely cause "family flight" to the suburbs. What will happen when the single people who can afford the new expensive housing start to have families and decide they want yards and SFHs? They will leave, in large numbers. Please do not move forward with this experiment.</p>	7/19/2018
4489	58	/policies/business-districts-and-corridors/	<p>I hear that Emerson and Fremont Ave North are being treated as a "corridor." We don't have the commerce for them to be considered a corridor, they are residential streets.</p> <p>We don't have the benefit of heavy rail, though I have heard that we need to share the added expense.</p> <p>I don't see that the rapid busses will cost more than the existing busses. Using the increased heavy rail costs as the reasons we need to have dense housing on Emerson and Fremont Avenues north doesn't seem believable to me.</p> <p>I would have liked the benefit of the Bottineau line in north Minneapolis, instead it skips us and gives a beautiful commute to the long-distance commuters coming to downtown.</p> <p>Put the dense housing near those who benefit.</p>	7/19/2018
4490	65	/policies/urban-agriculture-and-food-production/	<p>POLICY 65 - Urban Agriculture and Food Production</p> <p>Support farmers markets over redevelopment that squeezes out the farmers markets.</p> <p>Promote educational opportunities in which people who have vegetable gardens or are have chickens can teach others.</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4491	93	/policies/stewarding-historic-properties/	We have beautiful historic houses in north Minneapolis, especially in the Old Highland Neighborhood- Aldrich to Girard, Broadway to Plymouth. Please don't put high density housing mixed in with our beautiful homes. A better option, would be to come up with technical and economic support to allow folks to buy a beautiful old home and restore the gems that we have here at an affordable price.	7/19/2018
4492	93	/policies/stewarding-historic-properties/	We have beautiful historic houses in north Minneapolis, especially in the Old Highland Neighborhood- Aldrich to Girard, Broadway to Plymouth. Please don't put high density housing mixed in with our beautiful homes. A better option, would be to come up with technical and economic support to allow folks to buy a beautiful old home and restore the gems that we have here at an affordable price.	7/19/2018
4493	78	/policies/park-design-and-programming/	I felt totally surprised to find that North Commons has been undergoing a 2 year process to make recommendations for updates. I have lived here for 30 years and consider myself fairly well connected. I heard about the recommendations less than 2 weeks ago. I was told they surveyed the folks who go to North Commons. They should have surveyed residents to find out why they don't go there, and what amenities they would like to see there	7/19/2018
4494	71	/policies/soil-health/	Add a city composting site where people can pick up compost made from organic recycling and yard waste composting. Some cities even deliver it on the same trucks that pick up organic waste.	7/19/2018
4495	71	/policies/soil-health/	Stop planting city parks and lawns with Kentucky bluegrass. It doesn't benefit the environment.	7/19/2018
4496	71	/policies/soil-health/	Find ways to reduce use of road and sidewalk salt. This is terrible for our waterways and soil health. Work with the u of m extension people.	7/19/2018
4497	66	/policies/air-quality/	POLICY 66 - Air Quality: Improve air quality by reducing emissions of pollutants that harm human health and the environment. Minneapolis needs to continue to value clean air and clean water above all else for its residents. In China they wear face masks to go about outside in their big cities because they valued fast development over clean air. In Flint MI they poisoned their children with lead because they tried to save money when paying for their water. Minneapolis needs to put clean air and clean water as a number one priority.- to often clean air regulations are not properly enforced and especially the biggest polluters get away with polluting and taxpayers are left with the cost in terms of health and money. Minneapolis need to hold accountable both the small and the big polluters. The Federal government, under the current administration wants to gut the Clean Air Act - we need to enforce it locally as well as contacting our federal representatives - air does not stop at state boundaries.	7/19/2018
4498	65	/policies/urban-agriculture-and-food-production/	Step J doesn't belong in this section. That is about many more things than urban agriculture.	7/19/2018
4499	65	/policies/urban-agriculture-and-food-production/	Get rid of the city ordinance that forbids vegetables grown on boulevards. It's stupid. Mixing vegetables and flowers is beautiful and great for soil health and pest control. My vegetable garden provides more pollinator habitat and improves mot soil than anyone's grass.	7/19/2018
4500	65	/policies/urban-agriculture-and-food-production/	The city should implement a city wide Japanese beetle management policy. It's impossible to manage them yard by yard. Traps work but only if done in a large area. We need the city to get everyone to work together on this.	7/19/2018
4501	70	/policies/ecology-and-habitat/	Work with state and federal entities to plant milkweed for monarchs anywhere it is feasible on city property, along roadways, and encourage private landowners.	7/19/2018
4502	70	/policies/ecology-and-habitat/	Reduce use of sidewalk salt and road salt. I see it in drifts in parking lots and sidewalks. Make campaigns educating people about the damage it does. It is irreversible. Talk with the people at the u of m department of soil, water and climate about it for guidance.	7/19/2018
4503	1	/policies/access-to-housing/	C. Define better what you mean by public transit routes by supplying a very detailed map of the planned routes along with the density and frequency of public transportation on these routes Specify the distance from these routes where multifamily housing and high density housing will be allowed In general, I recommend allowing multi family and high density housing only where the area is currently zoned for commercial activity (build above commercial real estate) e. Do not allow multi dwelling units in single-family home areas unless the development project is approved by vote at 2/3 majority by all residents in a 2 blocks area around the proposed development. The vote should take place only after each household recognizes that they have been directly informed (in person, by phone, by email, or by text) both by the city of Minneapolis and by the developer. This should apply to every development project even if a precedent has been approved in the concerned block	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4504	68	/policies/energy-efficient-buildings/	<p>POLICY 68 - Energy Efficient Buildings The city has some great plans - it should also consider geo-thermal energy sources.</p> <p>Regarding use of 'grey water', I have used the water that drains from my wash machine to flush the toilet - why couldn't buildings be built so that the water that drains from the wash machine goes directly to the toilet tank?</p> <p>I have heard that it is possible to construct buildings so that they actually produce more energy than they consume - the city of Minneapolis is probably already aware of these technologies and will hopefully incorporate them into the new city regulations for new buildings.</p>	7/19/2018
4505	1	/policies/access-to-housing/	<p>I understand allowing higher density along transit corridors, but on the blocks that are not along bus or train routes, please continue zoning that limits 4-plex structures. These neighborhoods have diversity, many of us use the transit almost exclusively and we know each other! We share house keys and feed each others pets and our homes allow for green space. Please limit 4-plex zoning to transit routes. Thank you.</p>	7/19/2018
4506	70	/policies/ecology-and-habitat/	<p>Plastic trash is a huge problem. Go back to the fight of banning plastic bags straws, takeout containers, anything you can. Require businesses to pick up trash on their property. Parts of our city are absolutely disgusting. Have a general campaign to beautify the city by picking up litter and not litterino at all. Teach it in the schools.</p>	7/19/2018
4507	28	/policies/msp-airport/	<p>I'll comment on F because noise is the thing that affects me the most. I live on 56th and 11th Avenue -- sure, we chose to live here in spite of the airplane noise. It's been 6 years and I just can't handle it anymore. My house is FOR SALE. I will be moving to a quieter neighborhood. The overflights sometimes begin at 5:00 am. Sometimes I wake up in the middle of the night -- 3:33 am once -- to the roar of a plane. The overflights continue way past midnight. I use subtitles on my TV so I can catch the dialog. Conversations outside are on "PAUSE" every 3 minutes during airport "rush hour." When running or walking Lake Nokomis the planes roar overhead. It's hard to believe that as a city we would allow noise pollution to ruin a huge part of our beautiful neighborhoods. Also item B. Low priority people. Pedestrians walking to the airport. With a suitcase. Not very practical. come on. Same with bicycles -- WHY would anyone ride a bike and schlep a suitcase. Oh, maybe they're going to pick someone up and give them a ride on the handlebars! Item E. YES! Thumbs up. Go green. Reduce waste. Item C. Not sure what role the MAC would have in supporting development of jet fuels -- financial support? Keep the dollars here improving our airport and let the airlines figure out the fuel.</p>	7/19/2018
4508	2	/policies/access-to-employment/	<p>a. Clarify this action step. It can be interpreted in many ways, allowing for abuse by developers c. This contradicts action step C of policy 1. You need to specify the ration of housing/businesses allowed within the same land area. Also specify the type of businesses allowed in these areas</p>	7/19/2018
4509	83	/policies/people-with-disabilities/	<p>F. Actually enforce sidewalk snow shoveling! We have ordinaceson the books. Use them. I am not a disabled person so I cannot speak for myself on this issue but it is one of the most frequent remarked upon aspects os winter living on local social media that I follow. I also work with the general public every day and frequently talk with people who use wheelchairs or parents pushing strollers complaining about the lack of enforcement. There are property owners who never shovel.</p>	7/19/2018
4510	70	/policies/ecology-and-habitat/	<p>POLICY 70 - Ecology and Habitat: Wonderful goals, and Minneapolis already has some wonderful natural habitats - the bee-friendly environment along Lake Nokomis, etc - but we have a long way to go. We are still allowing unfiltered water from city streets to contaminate our lakes with trash - e.g. Lake Hiawatha. there are things the city could be doing right now to stop trash from city streets from flowing into our lakes.</p>	7/19/2018
4511	68	/policies/energy-efficient-buildings/	<p>This is a very important policy for our city, and I support all Action steps listed. One additional and often overlooked aspect of green building design is the embodied carbon of new structures. Refer to Architecture 2030 for more on this subject.</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4512	75	/policies/waste-reduction/	<p>Policy 75 - Waste Reduction</p> <p>Residents should be rewarded for generating less trash. Those who compost or live alone may require trash pick-up only once per month instead of once per week, yet we receive a mere \$2 credit on our water bill - while our water bills have increased over the yrs, the \$2 credit remains the same. I propose encouraging residents to generate less trash by providing smaller trash AND RECYCLING carts - and giving them a \$10 credit on their bill.</p> <p>Encourage people to take cloth bags to do grocery shopping and to buy in bulk when possible. Also, ban plastic bags, food containers, and drinking straws - and do it NOW</p>	7/19/2018
4513	58	/policies/business-districts-and-corridors/	<p>Business corridors will never thrive without parking. The city leaders have already emptied Uptown of small businesses, after doing the same thing to downtown. I see parking nowhere in this plan, and I believe that will force businesses to close.</p>	7/19/2018
4514	51	/policies/healthy-pre-k-development/	<p>There is nothing in this plan about schools! You plan for density without looking at the impacts on education. I'm a teacher at Whittier. I believe this plan will displace many families because developers will buy up affordable housing and build fourplexes that will not serve the large families that come to our school. Large families want single family homes.</p>	7/19/2018
4515	81	/policies/social-connectedness/	<p>Social connectedness does not come from density. It comes from knowing our neighbors. This whole "engagement" period is a perfect example of how social media does not create real connectedness. Most people don't have any idea what the 2040 plan even means. If this had been developed through neighborhoods from the beginning, and not after you were pressured to hold meetings with council members, many more people would be involved.</p>	7/19/2018
4516	83	/policies/people-with-disabilities/	<p>This plan does not prioritize people with disabilities. My husband goes through periods when he can't walk and he has to take metro mobility. The lack of planning for traffic along 28th, 26th, and 36th, and instead, huge bike paths, is unrealistic and unhelpful for those of us with disabilities.</p>	7/19/2018
4517	82	/policies/aging/	<p>You closed the Southwest Senior Center and sold it for micro apartments with no parking -- that pretty much sums up this city council's approach to aging. Bikes, bikes, bikes. You are creating a city for the wealthy, young, and able.</p>	7/19/2018
4518	78	/policies/park-design-and-programming/	<p>POLICY 78 - Park Design and Programming</p> <p>the concerts at our parks during the summer should be maintained or increased.</p>	7/19/2018
4519	61	/policies/environmental-justice/	<p>I have asthma, and yet I have seen no push in our neighborhood to curb particle pollution. Nor do I believe this plan really shows commitment. Cars are not the only source. Combustion pollution comes from wood fires, barbecues, and restaurants. Wood fires in homes and restaurants is one third of the particle pollution in the city. This city needs to form an exchange program -- wood fireplaces in exchange for gas. Follow Montreal's lead.</p>	7/19/2018
4520	85	/policies/access-to-health-social-and-emergency-s	<p>You have already failed at creating access to health care institutions by building bike lanes to and from Abbott and by creating dense development that bottlenecks on the north side of Bde Maka Ska. I know four doctors and two nurses who commute daily from our block alone. Park Nicollet and Methodist serve many in our neighborhood, but you are creating less access to health care when you increase traffic congestion.</p>	7/19/2018
4521	18	/policies/walking/	<p>I love walking around the lakes, but I believe the increased density will make walking through Uptown and to Calhoun Village much less appealing. Who wants to cross six lanes in busy traffic? Traffic is getting worse, and the planners must live in an alternate reality.</p>	7/19/2018
4522	79	/policies/healthy-youth-development/	<p>POLICY 79 - Healthy Youth Development</p> <p>My grandson participated in advocating for and planning the new skate park in his community - teaching him civic engagement. I don't know if Minneapolis is doing similar things, but it should be.</p>	7/19/2018
4523	19	/policies/bicycling/	<p>I wish you could design bike paths that expand six months of the year and contract six months of the year on major commuting sites. We don't need large bike lanes in winter, but they are used much more in summer. Flexible bike lanes would be a good compromise. Did all the city planners come here from San Francisco? They seem not to understand winter is a reality, a long reality.</p>	7/19/2018
4524	36	/policies/innovative-housing-strategies/	<p>I do not believe the strategies of upcoming and building density on transit lines will actually meet the goals of this plan. I have seen already neighbors in my daughter's neighborhood, along 38th, getting letters asking if they want to sell their homes. Why? Developers, speculators, want to build and make profit. How does this help affordable housing?</p>	7/19/2018
4525	1	/policies/access-to-housing/	<p>I do not believe the more you develop, the more will trickle down into lower income groups. I don't believe in trickle-down economics. Affordable housing is currently seen as paying 60 percent of your income for housing. What about the people who pay forty or fifty percent and have kids?</p> <p>They are the ones who are going to lose with this plan. As neighborhoods get gentrified, they will be left out.</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4526	81	/policies/social-connectedness/	POLICY 81 - Social Connectedness: The neighborhood newspapers and the e-democracy forum on the internet are good ways to stay connected to one's neighborhood.	7/19/2018
4527	1	/policies/access-to-housing/	Unless you greatly improve public transit all of these people will need cars to get where they need to go. Especially to work. Not allowing for adequate parking will be a problem. I sometimes work at the Summer library which is in an area of the city that has too many cars for the streets. I don't know if people doing have off street parking or why it is that way because it's mostly residential. People park in no parking areas constantly. In school bus zones, in front of hydrants, all the way past the corner blocking curb cuts. They ignore snow emergency rules and park on both sides. It's always a mess. Saying people should give up cars doesn't make it happen.	7/19/2018
4528	1	/policies/access-to-housing/	Unless you greatly improve public transit all of these people will need cars to get where they need to go. Especially to work. Not allowing for adequate parking will be a problem. I sometimes work at the Summer library which is in an area of the city that has too many cars for the streets. I don't know if people doing have off street parking or why it is that way because it's mostly residential. People park in no parking areas constantly. In school bus zones, in front of hydrants, all the way past the corner blocking curb cuts. They ignore snow emergency rules and park on both sides. It's always a mess. Saying people should give up cars doesn't make it happen.	7/19/2018
4529	5	/policies/visual-quality-of-new-development/	This is where Minneapolis has totally failed in recent years. All the buildings look the same in Uptown, University, and much of downtown, too. What happened to interesting design instead of bland? Old buildings have character that the new ones don't have. The Bader development and Sons of Norway are two examples. They belong on highway 62 or 494, not in the historic lakes area. We are losing so many opportunities to build interesting architecture that would make this city special. If the city doesn't put pressure on developers to come up with interesting designs, no one else will. It's really sad so much old is torn down and what's put up lacks character.	7/19/2018
4530	82	/policies/aging/	POLICY 82 - Aging: Expand resources and opportunities for meaningful engagement and independent living, assisted living, and long-term care housing for older Minneapolis residents so they can be a vital part of the fabric of our community. Place a cap on property taxes for those who have owned their homes for 20 yrs or more. Advocate for businesses and government agencies hiring the elderly.	7/19/2018
4531	5	/policies/visual-quality-of-new-development/	I hope with all the tall glass BADER towers near the lake and glass towers near the river that city planners are insisting on bird death mitigation on windows. Glass towers are deadly for migratory birds. Bader's building is glass on four sides, and it's very near Lake Bde Maka Ska. To provide bird proof reflective glass should not be optional. This plan says nothing about buildings that support the environment!	7/19/2018
4532	18	/policies/walking/	Why is there no mention of snow removal?	7/19/2018
4533	84	/policies/public-safety/	POLICY 84 - Public Safety Reduce gun violence by reducing the number of guns. Require universal background checks and outlaw automatic assault weapons. Require doctors who prescribe opioids to be aware of their addictive quality. Prosecute drug companies that falsify information about the addictiveness and side effects of their drugs. Require doctors who are on the payrolls of pharmaceutical companies to disclose this information to their patients.	7/19/2018
4534	1	/policies/access-to-housing/	Per Heather Worthington, the blanket rezoning of an entire city to create a variety of housing is untested anywhere. Why are we not at least trying pilot areas of these ideas rather than recklessly gambling with our entire city that these unproven policies will work? And where does the plan lay out how any housing will be guaranteed to be affordable housing - however that is actually measured. Currently once rezoned it looks like a free for all for developers - supported by the approved 2040Comp Plan with no contingencies if this blanket rezoning doesn't work very well or developers buy numerous homes on any one block, thereby really destroying any sense of the single family home environment.	7/19/2018
4535	2	/policies/access-to-employment/	So we are holding back density in downtown to accommodate future employers to grow? If I am interpreting this correctly, I would think leaving employer location to the employers could allow for opportunities in other parts of the city - not exclusively downtown. And growing downtown density, which clearly the city is been very happy to do over the past number of years, could put less strain on the neighborhoods.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4536	92	/policies/identify-and-evaluate-historic-resources/	POLICY 92 - Identify and Evaluate Historic Resources historic Some buildings may not at first glance appear to have historic significance such as the modest small bungalow. However, these homes represent an era when even modest homes were often built with beautiful craftsmanship. the Bungalow Club takes an interest in the history and the restoration of these homes. Unfortunately in some neighborhoods, these bungalows are being demolished and replaced with monstrous boiler-plate homes that do not fit in with the neighborhood and look almost identical to each other.	7/19/2018
4537	4	/policies/access-to-commercial-goods-and-services/	I feel this plan is really overreaching. Determining where new small grocery shops should be, where employers should establish. Planning is important, but this is butting up to being eerily "engineered." I think you are overstepping your task.	7/19/2018
4538	6	/policies/pedestrian-oriented-building-and-site-design/	My first question would be how quickly do you see this coming to fruition? As much as I am a Climate Change believer and climate advocate, I find the tactic of just making the use of cards too hard really crummy. If this would in place inside the next 10 years then I say shame on you. We simply do not live in this world yet and by eliminating reasonable car/parking use you are pushing out most people - especially older people. Also, this assumes a much better mass transit system. I don't believe that falls under the 2040 comp plan as it is out of your purview. I would suggest you work with whatever departments do develop and improve our mass transit system before edging out cars as primary transit.	7/19/2018
4539	9	/policies/open-spaces-in-new-development/	With the density you are planning - we will lose so much natural green space. I fear the entire city will look like a business park that added some live plant elements. That is certainly what the drawings look like.	7/19/2018
4540	96	/policies/heritage-preservation-recognition/	POLICY 96 - Heritage Preservation Recognition: Expand recognition programs related to heritage preservation activities Howe School in the Longfellow neighborhood of south Minneapolis was beautifully restored and deserving of recognition.	7/19/2018
4541	14	/policies/tree-canopy-and-urban-forest/	I am not sure where you are going to put these trees with all of the density. I would say Mpls already does a good job with boulevard trees.	7/19/2018
4542	70	/policies/ecology-and-habitat/	Collaborate with the Minnesota DNR to plant pollinators plants along our highway corridors, like 35W and highway 55. They already have programs that are looking into this.	7/19/2018
4543	70	/policies/ecology-and-habitat/	Work with metro blooms on blooming alleys and blooming boulevards. Great ideas.	7/19/2018
4544	7	/policies/public-realm/	Make all street lights LED and also come up with better standards for street lighting.	7/19/2018
4545	92	/policies/identify-and-evaluate-historic-resources/	What about the Minnehaha Hiawatha Corridor. There are tons of historic building that need help with adaptive reuse.	7/19/2018
4546	91	/policies/heritage-preservation-outreach/	Provide funding for developer that do really cool adaptive reuse projects. Make them more attractive financially for developers.	7/19/2018
4547	12	/policies/lighting/	Make all lighting LED. And work with MDOT to get pedestrian level lighting along some highways, such as highway 55.	7/19/2018
4548	24	/policies/shared-mobility/	Look at other shared forms of mobility, such as scooters!	7/19/2018
4549	76	/policies/new-parks/	Work to use green/blue streets to connect parks and build more greenways!	7/19/2018
4550	80	/policies/development-near-metro-stations/	This is great. also work to improve the public space on roads around metro stations. Hiawatha and Lake is horrible, and highway 55 is extremely bad for development.	7/19/2018
4551	25	/policies/innovations-in-transportation-and-infrastructure/	The transition to new and high tech transportation will not be equitable if the city does not drive it. Rather than planning for the possibility of less parking for suburbanites and wealthier Minneapolitans in downtown and near shopping centers, the city should make that a more explicit goal. It should be paired with advantages for transportation systems that cater to disadvantaged communities such as improved pedestrian access and transit lanes to facilitate ABRT on every urban bus corridor.	7/19/2018
4552	24	/policies/shared-mobility/	Recent research has shown that shared use cars currently replace lower emission impact trips (transit and walking) at a rate similar to single occupant vehicle trips. Shared use car companies take advantage of the same infrastructure bias that supports cars but instead of conferring the benefits to residents through time savings, seeks to transfer some of that value to out of state private capital. Increasing the cost of driving for all will be more important to driving transportation change than simply letting technology companies create shared mobility solutions that will suit the interests of their investors.	7/19/2018
4553	15	/policies/transportation-and-equity/	The city holds the keys to improving transit performance by creating transit advantages that give people who don't have a car a time-competitive trip. A bus should never be stuck in traffic and the city will not be successful in creating an equitable transit system unless that is an explicit goal.	7/19/2018
4554	15	/policies/transportation-and-equity/	The 20-year streets funding program needs to explicitly plan for equity by finding ways to reduce the cost of infrastructure on disadvantaged communities. That means finding ways to reduce assessments by shrinking costs (possibly reducing road widths at the time of reconstruction) and ensuring that communities traditionally burdened by pass-through traffic have a say in redesigning streets to become less-friendly to wealthy people passing through, emitting pollution and compromising the safety of those who are least able to afford a car.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4555	16	/policies/environmental-impacts-of-transportation/	Reducing the amount of pavement is also an important environmental goal that has been omitted. This would help manage stormwater and creates fewer emissions and less waste in the reconstruction process. Furthermore, it will fundamentally disincentivize single occupant vehicles by taking away the speed advantage that allows for a wealth transfer, in the form of time, from those who have cars to those who do not. Creation of transit-only lanes at the expense of parking or general traffic lanes is the only reason for not reducing a street's width that should be justified by city policy.	7/19/2018
4556	16	/policies/environmental-impacts-of-transportation/	While trying to reduce congestion seems to logically reduce environmental impacts, traditional traffic engineering approaches to congestion mitigation tend to focus on reducing wait times at intersections and speeding up vehicle travel. These changes will perpetuate the inequities and environmental unsustainability of our single occupant vehicle-focused transportation system. Congestion is a way to confer the cost of driving to drivers (through their time) in the absence of a pricing system that indicates the true cost of people's choices. If the city can not implement congestion pricing or mandatory minimum pricing for commuter parking, the goal of congestion management is fundamentally in conflict with many of the goals of creating complete streets that are well-suited to users that are not in a car.	7/19/2018
4557	17	/policies/complete-streets/	The fundamental question for every reconstruction project on a street with bus service should be "why can't transit lanes be constructed?" The consistent pattern of starting with the idea that the number of general travel lanes currently on a street is the baseline is a flawed approach to complete streets. The baseline should be what we want, and the same number of general lanes as current configuration should only be reconstructed if all other users have been satisfied first. This needs to be an explicit policy, otherwise local resistance will undermine the change that we need to make every single time.	7/19/2018
4558	18	/policies/walking/	Ban drive thrus city-wide. Ban parking lots along the street frontage city wide. Re-classify auto maintenance businesses (including gas stations) as industrial uses and do not make them conditional uses anywhere. These uses create a pedestrian-hostile environment and permitting them is antithetical to this goal.	7/19/2018
4559	20	/policies/transit/	Part D is the fundamental thing that Minneapolis should undertake for transit. Saving metro transit time will mean more trips with the same buses and will simultaneously create equity effects by giving transit riders their time 'back'. Transit lanes should be converted general lanes in every instance, a street should not become wider in order to accommodate transit advantage as that contradicts the goal of making the city pedestrian-oriented (which is an important goal to support transit use).	7/19/2018
4560	10	/policies/street-grid/	The street grid and the non-motorized connection grid should be called out separately. Having a full-size street everywhere contradicts environmental and non-motorized transportation goals and should not be the city's aim as it would make driving easier, not harder. However, creating a high density and resilient network of paths, sidewalks, and bikeways is a critical policy for making transit, walking, and biking the preferred modes.	7/19/2018
4561	22	/policies/downtown-transportation/	Simply put, commuter parking should not be less expensive than hourly parking. The city should increase the cost of commuter parking through an impact fee that funds transit advantages in order to reduce peak hour congestion and make walking in downtown more enjoyable.	7/19/2018
4562	22	/policies/downtown-transportation/	Streets connected to freeways should be limited to 2 lanes within the first block of the city, especially if one way, to calm the speed of drivers entering the city from outside of its borders. The city environment needs to assert itself and making people wait on the ramp would do that and would give transit distinct advantages.	7/19/2018
4563	27	/policies/transportation-partnerships/	Create a transportation impact fee for private parking spaces in DT Minneapolis to fund transit advantages in DT.	7/19/2018
4564	26	/policies/vision-zero/	Recognizing the reality that enforcement is the last resort option, every street should be engineered with fewer general traffic lanes and the narrowest possible crossing distance. Free right turns and left turn slip lanes should be eliminated. Congestion may result, but it is necessary to save lives.	7/19/2018
4565	1	/policies/access-to-housing/	I fully support this goal and believe that continuing to allow single-family exclusionary zoning in the city would undermine every other goal outlined in this plan. It is critical to equity that we discontinue the wealth transfer from people that can afford a large single family home and a car at the expense of people who can not or choose not to buy this type of residence.	7/19/2018
4566	40	/policies/homelessness/	An action step related to housing for people with mental and physical health limitations should be explicit and should acknowledge that employment and training may not be as important as simply ensuring that these people have access to the support services to keep them healthy even if they are not able to work again. Dignity should be a goal.	7/19/2018
4567	1	/policies/access-to-housing/	I am not in favor of action step "e". Those of us who purchased single family homes did so because we favor this kind of neighborhood. I do not believe that developers of 2,3,and 4 unit dwellings will build affordable units in any case and you will simply create more density, less livability, without creating affordability.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4568	0.1	/topics/land-use-built-form/	<p>Hello -</p> <p>I would encourage you to review the Corridor 6 ruling on address: 8 E Minnehaha Parkway, 16 E Minnhaha Parkway. Both of those do not have access to Nicollet (they are under the bridge) and on the scenic parkway. I would recommend they be considered an Interior Category. This seems to be a strong variation from Minneapolis Park Department rules (they will not allow US high Speed Internet to these address, but seem to approved 6+ story multi-unit dwellings). Please review, thanks!</p> <p>Pete (20 E Minnehaha Parkway)</p>	7/19/2018
4569	35	/policies/innovative-housing-types/	Please set guidelines for developers and contractors that they use high end materials and design new structures that fit in with the historical structures of neighborhoods.	7/19/2018
4570	37	/policies/mixed-income-housing/	It would be helpful to have specifics attached to this goal. Please preserve the current supply of story and story and a half houses in all of our neighborhoods which are affordable for low income families and couples who had huge college debt. Currently developers are purchasing these house and building larger two story houses that are made of poor materials, architecturally uninspired and are not affordable for low income families.	7/19/2018
4571	38	/policies/affordable-housing-near-transit-and-job	Please do not rezone the city to chop up single family neighborhoods. If you do so, you MUST require off-street parking, must set up funds to replace old sewer systems which will not be able to handle the extra demands, set up funds for school expansion, medical clinics, etc. for the added populations.	7/19/2018
4572	84	/policies/public-safety/	I appreciate the action step to ensure first responders reflect the diversity of the city's residents. I hope this includes all public safety divisions, not only MPD. It would also be nice to have some incentives in place to encourage more city residents to work in public safety.	7/19/2018
4573	80	/policies/development-near-metro-stations/	There is so much under this goal it is hard to know where to begin with comments. First, please define "Metro Stations." Is this every single bus stop? We do not have a good transit system in Minneapolis. We need far more light rail, bus routes need to be improved or added to, etc. Thinking people are going to get rid of their cars is unrealistic. The average family uses their cars for multiple stops per day that do not have mass transit options: home to day care, day care to work, work to grocery store, grocery store to day care, day care to home, home to sports activities and then home again. Off-street parking must be included in all multi family options. We live in a state where it snows five months of the year. With lots of snow, parking is only allowed on one side of the street. Parking is already difficult in many areas due to the expansion of restaurants that are given variances by the city council waving the requirement for parking.	7/19/2018
4574	40	/policies/homelessness/	I encourage you to work with church communities to open up churches that are being closed to provide shelter for the homeless and food.	7/19/2018
4575	40	/policies/homelessness/	Spread the word to the homeless or those in need of food to look for the blue food storage boxes that are popping up outside of churches such as Saint Luke's on 46th and Colfax south. Maybe an on-line or paper map to be given to those in need showing where these boxes are located would be helpful.	7/19/2018
4576	41	/policies/tenant-protections/	I support these goals. Tenant's rights must be protected and land lords must be held accountable for keeping their properties up to code and in good repair.	7/19/2018
4577	42	/policies/expand-homeownership/	Very good goals. Having more specifics would be helpful. Be sure to include those who will benefit from these goals in your dialogue to gain an understanding of their challenges, where they need education and help.	7/19/2018
4578	43	/policies/housing-displacement/	I support these goals.	7/19/2018
4579	44	/policies/comprehensive-investments/	Make sure the housing that is developed is suitable and desirable for those in need. Just because you live at the poverty level does not mean you don't want to live in well built and well designed housing. Engage the community in your decision making process.	7/19/2018
4580	23	/policies/coordinated-development-strategy/	More specifics for these actions steps would be helpful.	7/19/2018
4581	45	/policies/leverage-housing-programs-to-benefit-c	Please place regulations upon the developers and the contractors that ensure quality housing is being built. I agree with these action steps. We must include our immigrant communities in dialogues.	7/19/2018
4582	46	/policies/healthy-housing/	I agree with these steps. Be sure to include green space in your plans. We need our green spaces to stay physically and mentally healthy.	7/19/2018
4583	47	/policies/housing-maintenance/	I agree with these action steps.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4584	48	/policies/data-driven-decisions/	Thank you for all of the work you are doing. We must get the word out to the community so all can be engaged. I am not impressed with the way the 2040 program has been rolled out. So many people living in the city are not aware of it and how it will impact them. Think of better ways to inform the community.	7/19/2018
4585	1	/policies/access-to-housing/	I am in strong opposition of the 2040 plan. Tangletown is a historic cornerstone of south Minneapolis, and it's history should be preserved. The proposed rezoning of Nicollet and the east side of Belmont to allow for 3-story and 6-story apartment buildings will take away from the strong sense of community we feel hear in this neighborhood. In March, my husband and I moved to this area to get away from the more urban infiltration apparent in the Uptwon Minneapolis area. Making these significant changes to our newfound neighborhood that we already love so much would be absolutely devastating. I understand the need for more affordable housing in the Twin Cities metro area, but please please please do not choose to build these apartment complexes in such a charming and historic piece of Minneapolis. Thank you for your time. Tess Hosier	7/19/2018
4586	1	/policies/access-to-housing/	Yes! I love the honesty of naming the ways that zoning is historically linked to the racial and economic disparities that our city lives with today. This is unacceptable, and I appreciate the willingness to think differently about the city's approach to housing accessibility to help alleviate these disparities. I strongly support more housing options in every area of the city, including duplexes, triplexes, and fourplexes in all areas. Here are three reasons why: 1. More people are moving to Minneapolis right now than we have seen in a long time, and without new housing options, the housing market will naturally favor those with money who are able to outcompete those without money. In the neighborhood I live in (Folwell), this means displacement of longtime residents who love this city but won't be able to afford to live here anymore. Building more housing everywhere and getting creative about how we do it allows folks to stay in their homes in my neighborhood. 2. One of the city's goals is to address climate change, and increased density helps address that, as more people live in smaller spaces, use public transit, and walk and bike to work. There are lots of jobs in Minneapolis (though I do think they could be less concentrated than in downtown), and every unit of housing we don't build here means a unit built in the suburbs and a commute that comes with it. Furthermore, we need to be prepared for the possibility of "climate refugees" in the coming decades. As sea levels rise and temperatures in the south get higher, Minneapolis will be an attractive place to live. 3. I think a variety of housing options everywhere builds a stronger sense of community. More density means more people in public spaces, learning to be ok with each other and celebrate their lives together. And as people age out of their homes, they'll be able to stay in their beloved neighborhoods in a smaller housing option like a unit in a fourplex. This is actually a huge issue in my neighborhood - there are lots of lower middle class folks who are in their seventies and slowing down, but are still stuck in their homes because they're scared to leave and really don't know how.	7/19/2018
4587	20	/policies/transit/	In order to achieve the City's complete streets, complete neighborhood, transit, environmental, and equity goals, among others, the City must commit to end the perceived need to own a car. Then it needs to identify and take the steps necessary to reach that goal by 2040. Those steps are essentially the policies that advance the City's complete neighborhood goals. Declare War on Needing a Car. The city can easily measure its progress toward the goal by polling residents for that one question. It's a simple metric that will communicate how well the City is progressing toward complete neighborhoods, accessible employment, and many other goals.	7/19/2018
4588	5	/policies/visual-quality-of-new-development/	New construction should follow LEED certified guidelines.	7/19/2018
4589	1	/policies/access-to-housing/	I love the attempt to allow fair housing for all. BUT I'm concerned about the 4-plexes everywhere, and what that will do to the tree-filled, neighborhood vibe. Could you allow duplexes everywhere and get the same result? Or "tiny houses" as a Star Tribune letter suggested, to allow more density without filling the streets with big 4-plex apartment buildings? I want affordable housing and reduced disparities, but I do love our tree filled green neighborhoods. Could we work harder to think outside the box to get both?	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4590	1	/policies/access-to-housing/	By engineering housing artificially , you will effectively deteriorate the neighborhoods causing home value to decrease and residents fleeing to the suburbs leaving a city resembling Detroit with a hollow center. Where will the tax money then come from? We support affordable housing and believe in cities that take care of everyone or everyone suffers, but this is a very very poor plan. It reminds me of the 60's when the planners in Minneapolis leveled beautiful old buildings to "beautify" the city artificially with drab, ugly, depressing buildings that we are still living with and can't figure out why no one wants to go Downtown anymore. Has anyone on this planning committee talked to other city planners, visited other cities, looked at what mistakes were made elsewhere? There are so many areas of the city that would easily accommodate housing without destroying neighborhoods. There are parking lots downtown that should be built on for one thing; especially if cars are to be discouraged. There are seedy motels and businesses that should be leveled and built on, not quiet neighborhoods. Once you've built all these buildings, no one will want to move to Mpls because it is now so ugly. Talk about "pave paradise put up a parking lot". It seems like Minneapolis never learns. Block E is another great example. One of the ugliest blocks in America; who would want to go Downtown with that kind of ambience. That is what the neighborhoods will look like. No one will want to live there.	7/19/2018
4591	38	/policies/affordable-housing-near-transit-and-job-	I will add this comment here as I can't find the correct box. We support diminishing cars and using transit , biking, and walking, but biking and walking has gotten too dangerous even with all the added paths. There are way too many cars now and they are ALL on their phones!!! Until Minneapolis decides to do something about all the people driving on their phones you will continue to have people killed will trying to walk or bike. We used to bike to work, the store, everywhere; but now only bike on the Greenway or another secluded path. Watching people on their phones is horrifying. I'm afraid it will never be enforced as legislators and city leaders are all guilty of driving will talking and texting.	7/19/2018
4592	14	/policies/tree-canopy-and-urban-forest/	I support these action steps, let's plant a lot of trees, especially trees that will shade and cover playgrounds, parks and streets!	7/19/2018
4593	0.1	/topics/land-use-built-form/	I support the policy of allowing additional housing flexibility within neighborhoods in Minneapolis. Duplexes, triplexes, and fourplexes should be legal in this city, even in single family neighborhoods.	7/19/2018
4594	19	/policies/bicycling/	I support the push for improved bicycle facilities in the Mpls and believe the city should invest more in high-quality bike infrastructure such as protected bike lanes and off-street paths.	7/19/2018
4595	17	/policies/complete-streets/	I strongly support the Complete Streets policy. I'd like to see the city be more bold in implementing Complete Streets. Other cities have experimented with a variety of good designs, let's learn from them, move boldly, and not waste time running our own experiments. For example, let's put in concrete dividers between car lanes and protected bike lanes, let's skip the flexible-hit post phase.	7/19/2018
4596	17	/policies/complete-streets/	I support the new hierarchy of transportation modes and users. Transportation for private vehicles should not be the only focus of our roadway system.	7/19/2018
4597	19	/policies/bicycling/	I don't think that these action steps are bold enough to accomplish the goal of 15% mode share in nine years. Action Step (A) should be more bold and say something like, "Accelerate the pace of building a connected network of protected bikeways to 20+ miles per year for the next ten years." Action Step (C) is good, and I'd really like to see the city take designs that other northern cities have already successfully implemented, and implement them directly here, without feeling the need to experiment with them on a small scale.	7/19/2018
4598	35	/policies/innovative-housing-types/	Hello, I would like to see the 30 story buildings reduced to 10-15 stories. It is concerning to think in Minneapolis we would have such high buildings outside of downtown.	7/19/2018
4599	22	/policies/downtown-transportation/	I'd like to see Nicollet Mall turned in to a pedestrian / bicyclist only zone. The busses that run down the mall run at walking speed right now anyway. In addition, they are dangerous for the pedestrians that are on Nicollet Mall, and they are unpleasant for people eating or drinking at establishments on Nicollet Mall. Let's move the buses back to where they were running when the Mall was being reconstructed.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4600	0.1	/topics/land-use-built-form/	<p>Hello - We live at 1129 Cedar Lake Rd S - which is a quiet and charming neighborhood that successfully straddles the nuances of residential and business. This neighborhood has been featured and written up in magazines and print news for its cohesiveness through community gatherings and delightful cottage type structures. We pride ourselves on our diversity.</p> <p>We are directly across the street from a strip of land currently zoned as mixed use corridor that borders Wayzata Blvd S (a frontage road) and highway 394 West. The 2040 plan will change this area to a Transit 10 designation. We absolutely do not want to have the height of the buildings go up from the current 3 stories to a maximum of 10 stories (or more if requested). Such a change would cause massive congestion and parking concerns, the height would block the view of the trees, apt./condo windows would be glaring into our home. It would harm the constitution of our neighborhood. There is currently a lovely urban garden with flowers and vegetables within this site.</p> <p>We propose a mixed use area consisting of a community playground for the many children in our neighborhood, urban gardens for the residents, perhaps a coffee shop, and dwellings that are no higher than three stories.</p> <p>Our property taxes are over \$9,000 each year. We welcome and look forward to collaborating on a vibrant and meaningful plan. The interests \$\$\$ of property developers should not drown out the views of caring residents who have lived here for generations.</p>	7/19/2018
4601	24	/policies/shared-mobility/	I strongly support Action Steps C, E and F.	7/19/2018
4602	1	/policies/access-to-housing/	<p>I definitely do not want "small-scale residential structures on traditional size city lots with up to four dwelling units, including single family, duplex, 3-unit, 4-unit, and accessory dwelling unit building types" in my neighborhood.</p> <p>We are ignoring the real problem, that is the need to reduce the planet's human population. Focus on that, and leave my neighborhood alone; it would disrupt tranquility and only amount to a band-aid fix.</p> <p>Gerald Grant east 34 St and south 48th Ave, (ward 2, precinct 8)</p>	7/19/2018
4603	25	/policies/innovations-in-transportation-and-infras	<p>I strongly disagree with Action Steps B and H - we don't allow drug companies to experiment on the public without their knowledge, but that's effectively what we're doing with automated vehicles. Autonomous vehicle manufacturers should be heavily and strongly regulated. Minneapolis should not be a place where citizens should have to fear for their lives because a programmer failed to foresee a particular scenario in their code.</p> <p>Minneapolis should be a place where its streets and laws are designed to protect people, and not the interests of autonomous vehicle manufacturers.</p>	7/19/2018
4604	26	/policies/vision-zero/	Action Steps A - F seem like just a lot of bureaucracy. Action Step H seems like it should take the highest priority of any of these Action Steps, and the only one that will really have much of an impact - we must design streets that slow down automobile traffic, and that favor pedestrian and cyclist safety.	7/19/2018
4605	10	/policies/street-grid/	Providing free parking on most of the street grid conflicts with most of the City's adopted goals for this land use planning process. The city needs a plan for ending this subsidy for car ownership.	7/19/2018
4606	27	/policies/transportation-partnerships/	Please wrestle more control of our major thoroughfares from Hennepin County. We need to slow down the traffic on these streets to make them safer through design. We also need to advocate for the ability to set our own speed limits at the state legislature.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			<p>There is an old saying with many variations and authors, but to whom much is given, much will be required.</p> <p>Our city is blessed with an abundance of natural resources, which bring both opportunity and responsibility. Many thoughtful, well intentioned and talented people have participated in the ongoing conversation about the Minneapolis 2040 plan. It sometimes appears that most of those voices are on the side of the citizens of the city rather than the planners who drafted their vision for the future. Meetings inviting comment were, in our experience, too few and too short to fully give voice to people who came with honest concerns.</p> <p>2040 seems to nod at some of the essential building blocks of a vibrant, thriving, successful metropolitan area; transit, jobs, affordable housing. A closer look finds not much concentration on education, historic preservation or environmental health. The draft plan appears all about real estate and little about what really makes a community.</p> <p>The things that make our city beautiful, liveable and unique are undermined by many of the policies and land use proposals in the Plan. Respect is lacking for long standing and thoughtfully articulated environmental ordinances in favor of developers' favorite buzzword, "density". The plan theorizes that all social problems will be solved if Minneapolis would only build enough apartments in some strategically identified "transit corridors", and existing residents and neighborhoods silenced.</p> <p>Many have testified in general terms about the negative impact on some of the city's most beautiful, historic neighborhoods. I will put my perspective into much more personal terms. After a year long search, my husband and I purchased a condo that we hoped would be our home until we could no longer live independently. We considered Downtown, with its energy and corresponding density. We decided that we wanted a place that offered closer proximity to lakes and access to nature. We are not young. We are not bikers. But we love to walk for fun and exercise. We walk whenever we can to shop, use the public library, do our banking and just appreciate being outdoors.</p> <p>When we moved into Calhoun Isles, a historically significant building, a representative from the Assessor's office came to inspect our property for tax evaluation. He walked in and had the same "WOW" reaction we did when we decided to buy this condo. His comment, when he told us our assessment would increase, was that we have a "million dollar view". Subsequently we learned about the already approved Brickstone Apartments which will block a large portion of that view of Bde Maka Ska between the Excelsior Executive Office Building and the Lake Point Condos on the corner of Dean Parkway and Lake Street. A hotel proposed for the site of the current BP gas station will block another portion of the view. I continue to be infuriated that the Shoreland Overlay ordinance is ignored and variances granted for projects that threaten the health of our environment and contribute to unmanageable traffic congestion and public safety. We</p>	7/19/2018
4607	80	/policies/development-near-metro-stations/		
4608	0.1	/topics/land-use-built-form/	I like the plan so far.	7/19/2018
4609	28	/policies/msp-airport/	Since we missed our chance to move MSP away from our densely-populated urban core like Denver did over twenty years ago, I support these Action Steps, especially making MSP more accessible by transit, foot and bike. I also support advocating for more rail travel options instead of airplane travel.	7/19/2018
4610	14	/policies/tree-canopy-and-urban-forest/	I would like to see a specific goal in terms of the number of trees planted i.e. 250,000 trees will be planted between 2020 and 2040. The language above seems somewhat vague.	7/19/2018
4611	1	/policies/access-to-housing/	Any new housing should have off street parking for at minimum every unit.	7/19/2018
4612	0.1	/topics/land-use-built-form/	Transit 15 should have new construction with no greater than 4 stories (not 15 and never more) when near the city lakes. All new construction should have off street parking for all housing units. This is to respect the lakes and avoid furthering the current traffic jamming that occurs at the intersection of Lake and Excelsior. The HiRISE proposed at the BP site northwest of lake Bde Mka Ska should not be approved. There has already been an overbuilding of dense housing.	7/19/2018
4613	80	/policies/development-near-metro-stations/	New multiple housing should be no greater than 4 stories near the city lakes to respect the Lakes and furthering the already ad traffic jams near Lake and excelsior. Off street parking for every new unit at minimum should be a requirement.	7/19/2018
4614	6	/policies/pedestrian-oriented-building-and-site-de	Off street parking requirements should remain and be required at minimum for every new unit being built. This will help making the current bad congestion worse and streets passable especially in the winter.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4615	0.1	/topics/land-use-built-form/	Transit 15 should have new construction with no greater than 4 stories (not 15 and never more) when near the city lakes. All new construction should have off street parking for all units. This is to respect the lakes and avoid furthering the current traffic jams occurring at the intersection of Lake and Excelsior. The HiRISE proposed at the BP site northwest of lake Bde Mka Ska should not be approved.	7/19/2018
4616	0.1	/topics/land-use-built-form/	The plan as written for Bryant Ave S from 31st Ave to 36th and further south opens the door to a radical change in the nature of the street. Bryant Ave S makes a safe bikeway in part because it is not as densely populated with large apartments and (especially) commercial use. While Bryant could certainly handle more 4-plexes or 3-story apartment buildings, especially those designed for families rather than single professionals, building on the model of Lyndale or Hennepin (taller buildings, mixed use retail) would reduce the viability of the Bryant bikeway and have a harmful effect on transit overall. Excessive build up on Bryant would also dramatically change the character of all streets from Aldrich to Girard, suppressing the value of property in those areas.	7/19/2018
4617	76	/policies/new-parks/	I agree we need accessible parks for all!	7/19/2018
4618	82	/policies/aging/	create senior "communities" within Minneapolis so that aging city dwellers do not need to move to outer ring suburbs or into high rise buildings with dependency on elevators to have single level housing. These communities should include access to increasing levels of support from independent living to assisted living to nursing home care. These communities should include "out the door" access to green spaces and walkways, and include transportation services. Although outside Minneapolis proper, the land vacated by the Ford Plant in St. Paul would be excellent for such a community.	7/19/2018
4619	60	/policies/intrinsic-value-of-properties/	This plan does not value Minneapolis's beautiful stock of single family homes--an prized attribute that is unrivaled by any city in the country. Why would you sacrifice this treasure for sake of almost always butt-ugly developer-designed fouxplexes that impoverish (read pay out rent) the citizens and enrich (read rental income) developers?	7/19/2018
4620	60	/policies/intrinsic-value-of-properties/	If you really valued our properties, you wouldn't allow fourplexes that will destroy the character of our neighborhoods and congest our potholed streets with spill over parking from fouxplex residents who will not be biking and busing everywhere. Your utopian visions will have many, many, many unintended consequences.	7/19/2018
4621	60	/policies/intrinsic-value-of-properties/	The City Planning Commission is a joke. They already approve 95% of everything despite citizen protests and input, so I'm not even sure why you need to go through this 2040 charade. You City Planners won't listen to these comments any more than you do in the hearings. Democracy in MPLS is dead. Long live central-planners!	7/19/2018
4622	14	/policies/tree-canopy-and-urban-forest/	The tree canopy is a our crown jewel. Why do you want to destroy it with 20-30 story towers right in the heart of our city. Shame on you! Listen to the citizens! Don't sell our city off to developers! No one wants a mini-Hong Kong at Excelsior and Lake. Same with all of your 4-6 story corridors that will become concrete blocks with no trees. We will soon look like Soviet Moscow. Their city planners thought they new best, too. Have some humility. Listen to the residents of this great city. Don't wreck it.	7/19/2018
4623	80	/policies/development-near-metro-stations/	We need better, faster, smoother transit in South and Southwest Minneapolis. And along with that much more housing along these corridors.	7/19/2018
4624	1	/policies/access-to-housing/	In regard to "traditional size city lots" affected by draft Policy 1, action steps d and e should be limited to specifically allow the following: 1. Reconfiguration of existing single-family homes into multiple units. 2. Construction of 1-4 unit structures on already vacant land. 3. Construction of 1-4 unit infill structures behind existing structures. Proposed multi-unit structures that require the demolition of existing single family structure(s) should require a variance if not located along public transit routes or existing mid- and high-density residential districts. These compromises to draft Policy 1 (including allowance of variances on a case-by-case basis) would continue to support the goals related to density and affordability, but also support the goals related to ecology and heritage preservation.	7/19/2018
4625	55	/policies/business-innovation-and-expansion/	Add Creative Sector Businesses to this "â€" There is no reason the creative sector should be excluded from entrepreneurship.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4626	77	/policies/park-access/	A request/suggestion to improve the safety and accessibility of the walking/bike path along Cedar Av.: extend the paved path from the south-east end of the bridge over Lake Nokomis along Cedar Av. to the signal light at the intersection of Cedar Av. and Nokomis Parkway. Also, to improve pedestrian, bike and vehicle safety at the intersection of Cedar Av. and Nokomis Parkway (by Fat Lorenzo's): make the left lane heading north coming off of Highway 77 a "left turn only" lane clearly signed as such before rounding the curve off of Hwy 77, including a left turn arrow light. Also, prohibit left turns for north heading traffic off of Cedar Av. onto the road adjoining the street by Fat Lorenzo's. So that homeowners along Edgewater Blvd. are not unduly inconvenienced by this left turn restriction, develop an intersecting street between Nokomis Pkwy and Edgewater Blvd. west of Cedar Av. to "naturally" intersect with, for example, 16th Av. I believe these changes would significantly increase the safety and traffic flow for pedestrians, bikes and vehicles at this busy intersection. Thank you for considering this proposal.	7/19/2018
4627	56	/policies/supporting-small-businesses/	Add all Creative Sector jobs to this, not only art.	7/19/2018
4628	38	/policies/affordable-housing-near-transit-and-job-	Re: zoning changes to allow multi dwelling units along transit corridors. Please make a distinction between commercial Corredorâ€™s and residential Corredor us. Only allow zoning changes along commercial Corredor us. To do otherwise will be detrimental to residential neighborhoods that happen to have a bus line that runs through them.	7/19/2018
4629	58	/policies/business-districts-and-corridors/	The Arts are economic drivers. For instance: High Point Center for Printmaking is on Lake Street. Anahata Collective on Lyndale. Artists, designers, and other creative professionals are often left out of the conversations regarding business. Many creative types PREFER buildings with character, stories, and living history. How about targeting creative hubs and investing in their vibrancy and success?	7/19/2018
4630	1	/policies/access-to-housing/	<p>I am concerned about the heights and widths of buildings in neighborhoods. Already the housing stock being built in SW Minneapolis as single family homes are too large for the lots and the neighborhood. Changing the nature of the neighborhoods, dwarfing neighboring housing and casting shadows on what was once a sunny side lot.</p> <p>Higher density 3 or 4 story multi-family housing placed adjacent to lovely 2 bedroom 1.5 story bungalows will change the feel and nature of our neighborhoods and cast shadows on neighbors.</p> <p>Already our higher density neighborhoods don't have easy access to parking for residents and guests. Building higher density housing in neighborhoods where there are not off-street parking solutions will disrupt the livability of neighborhoods, especially during snow emergency events. If higher density housing was even going to be considered there would need to be language in the zoning that would require at minimum one off-street parking space/garage stall per unit. A fourplex would require a four stall garage or at least a surface parking lot of 4 spaces.</p> <p>I feel that neighborhoods should be zoned for single family residential housing, with allowances for existing duplexes/triplexes, etc. Let the density exist where density already exists. Downtown Minneapolis, Uptown, and Lower NE Minneapolis.</p> <p>In neighborhoods there are families that want to host birthday parties for their children and invite elderly relatives. Being able to park close to the house you are visiting is important for daily visitors and overnight guests.</p>	7/19/2018
4631	80	/policies/development-near-metro-stations/	Re: zoning changes to allow multi dwelling units along transit corridors. Please make a distinction between commercial corridors and residential corridors. Only allow zoning changes along commercial corridors. To do otherwise will be detrimental to residential neighborhoods that happen to have a bus line that runs through them.	7/19/2018
4632	15	/policies/transportation-and-equity/	Please know that drivers use alleys to short cut around stop signals and general delays caused by traffic. Please include deterrents to alley traffic in your planning.	7/19/2018
4633	1	/policies/access-to-housing/	I am fine with duplexes or two dwelling units ("granny flat") on a traditional-size city lot. A four-plex on a traditionally-sized city lot is not acceptable. If a four-plex is to be built, it needs to span two lots.	7/19/2018
4634	34	/policies/affordable-housing-preservation/	Tiny houses ("granny flats") and rental units above garages would be helpful in increasing affordable housing.	7/19/2018
4635	1	/policies/access-to-housing/	One of the greatest needs in the city is reasonably-priced housing for "young seniors." People in the early phases of retirement want single-story housing with attached garages. There is little such housing available. Senior townhomes are needed.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4636	18	/policies/walking/	<p>I support all of these.</p> <p>In addition, (1) enforcement of laws around traffic yielding to pedestrians would be important.</p> <p>(2) Timely removal of snow at corners and curbs is critical.</p>	7/19/2018
4637	17	/policies/complete-streets/	<p>Move the bicycle lanes to less-driven streets.</p> <p>Make more streets in the residential areas into one-way streets.</p> <p>Face the reality that this is a winter climate, and bicycles are not feasible for many people for many months of the year.</p>	7/19/2018
4638	28	/policies/msp-airport/	<p>Provide easily accessible reports about airport noise, by location and time of day.</p> <p>Goal b is nice, but unrealistic. Public transport to the airport is good. Bicycling and walking to the airport??? Unless you have no luggage, that is not reasonable.</p>	7/19/2018
4639	82	/policies/aging/	<p>I support all of these steps.</p>	7/19/2018
4640	1	/policies/access-to-housing/	<p>The key is access to AFFORDABLE HOUSING. Why this comp plan evades that issue says much about how detached this plan is from the realities of the working class. I would like to see this whole plan scrapped until affordable housing and the access to it is given the seriousness it deserves.</p>	7/19/2018
4641	84	/policies/public-safety/	<p>Include requirements that vacant properties not sit vacant and unmaintained.</p> <p>Please do something about panhandlers and those begging at city intersections. This is a public health hazard.</p>	7/19/2018
4642	47	/policies/housing-maintenance/	<p>Enforce existing laws about maintaining your property.</p> <p>It is disheartening to see poorly maintained properties, with lawns not mowed, sidewalks not shoveled, and roofs and garages in disrepair. I would like to see the fire department do safety assessments of "hoarder houses."</p>	7/19/2018
4643	0.1	/topics/land-use-built-form/	<p>I would like to see all 4 corners of the Grand and 46th St S intersection be included in the Corridor Mixed Use designation. Ideally, the lots along 46th St between Lyndale and 35W would all allow for more of a mixed use function. This would help strengthen Orange Line use in the area if the walk to the station was more built-up with denser housing and pedestrian-scale amenities and fewer single family lots.</p>	7/19/2018
4644	33	/policies/affordable-housing-production/	<p>I support the rezoning of single-family homes into quadraplexes if there are reasonable limits on this. I suggest a limit to the number of quads allowed per block, and have some cap on how many can be developer owned vs. owner-occupied. This should be consistent across zip codes and neighborhoods. I write this as the owner of a single-family home in a mostly single-family home neighborhood (Longfellow.)</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4645	82	/policies/aging/	<p>On behalf of the Minneapolis Advisory Committee on Aging, I am respectfully submitting this Draft Re-write that includes some additions of key importance to our advisory committee. Please reference a recently sent email as well. Thank you! Rebecca Furman, MACOA Member At Large.</p> <p>POLICY 82 Aging Expand resources and opportunities for meaningful engagement and independent living, assisted living, and long term care housing for older Minneapolis residents so they can be a vital part of the fabric of our community.</p> <p>The population of Minneapolis, the surrounding region and the entire nation is becoming older. As of 2013 (the last available reporting data) 25% of the City’s population is 50 years+. The vast majority of aging individuals report interest in staying in their present homes and communities as long as they are able to do so. Minneapolis was the first City in Minnesota join the AARP National Network of Age-Friendly Cities, an affiliate of the World Health Organization’s Global Age-Friendly Cities and Communities. In January 2017 the Minneapolis City Council and Mayor approved the City’s Age-Friendly Action Plan. In it the City acknowledged responsibility to create and expand housing options and supports, assure accessible transportation and walkways, and develop targeted health and wellness programs to ensure that aging residents can remain healthy, safe, connected and engaged in the homes and neighborhoods that they love as long as they are able (see reference document Minneapolis for a Lifetime: Age Friendly Action Plan, Nov 9, 2016)</p> <p>Housing: Accessible and affordable housing options with health and social supports as needed to allow older Minneapolitans to age in their homes and/or communities or their homes are integral to retaining and supporting the city’s aging population. Currently, a significant number of Minneapolis neighborhoods have few housing options other than single family homes, reducing opportunity for many residents to age in their community. Most Minneapolis neighborhoods currently lack organized neighborhood health and social support programs to assure that aging individuals are healthy, safe, connected to community activities and resources.</p> <p>Transportation: The city’s aging residents also need walkable neighborhoods and multimodal transportation options that meet their needs. And it’s not enough to simply provide options; these walkways and modes of transportation must also be accessible, maintained and free of snow and ice in the winter.</p> <p>Health and Wellness: The growing aging population is also experiencing a new phenomenon in history – fewer and more dispersed family members to aid in care and social connectedness. Minneapolis’s Age Friendly Action Plan has recognized the City’s added responsibility to develop and expand programs and to assure physical spaces for aging individuals that support wellness, safety, active social and civic engagement.</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4646	82	/policies/aging/	<p>ACTION STEPS The City will seek to accomplish the following action steps to expand resources and opportunities for meaningful engagement and independent living, assisted living, and long-term care housing for older Minneapolis residents so they can be a vital part of the fabric of our community.</p> <ul style="list-style-type: none"> a. Ensure access to safe, affordable and accessible housing options for Minneapolis residents as they age. b. Ensure assistance to seniors at risk of being unable to remain in their current homes because of problems in housing accessibility and affordability. c. Strengthen and promote multimodal and tailored transportation options that meet the needs of aging Minneapolitans, with a focus on pedestrian safety for older adults including removal of snow and ice, curb cuts, and access to transportation systems available on a fixed income budget. d. Provide opportunities for older residents to leverage their experience and contribute to their communities through volunteering, working, intergenerational engagement and lifelong learning. e. Expand and promote mental and physical health and wellness initiatives, activities and services for older Minneapolis residents. f. Expand the commitment to support and expand the reach of neighborhood-based social, chore and health monitoring programs. g. Establish a methodology for identifying the number of older residents and their needs for sustaining livability within their own neighborhoods. h. Continued commitment to collaborate with independent operations such as the Minneapolis Park Board, Department of Public Works, non-profit senior health care and social support organizations to pursue solutions to the challenges of fulfilling City’s commitment to being “Age-Friendly City”. <p>Related Policies: Please include the following in a section “This Policy Relates To:”, and cross reference in other policies:</p> <ul style="list-style-type: none"> 1. Access to Housing “ add a clause for older residents 18. Walking 20. Transit “ include Snow and Ice removal for easier access 37. Mixed Income Housing 53. Quality of Life “ since 25% of the city is the Older Adult “ seek ways to promote and identify a higher quality of life 	7/19/2018
4647	1	/policies/access-to-housing/	I know that the city does not control the transit system.... but I think strengthening existing transit routes along the proposed transit corridors is very important.	7/19/2018
4648	0.1	/topics/land-use-built-form/	This is insanity. How does throwing out 100+ years of zoning begin to address affordable housing? That's the primary goal correct? This plan surrenders local control (i.e. neighborhoods) to any speculator with sufficient capital to do whatever they please. This plan essentially abolishes the single family home, does not begin to solve the affordable housing issue and puts money in the hands of land speculators.	7/19/2018
4649	15	/policies/transportation-and-equity/	Transit should be prioritized over private vehicles EVERYWHERE in the city. Those who rely solely on transit should not have to spend 3X the amount of time going from point A to point B. If trips are sped up for these people than those who can elect to use their cars will be more likely to switch to transit. Bus-only lanes, signal prioritization, elimination of parking spaces to make space, all are good options. Streetcars in Nicollet would be fantastic but given the high cost a bus-only BRT lane with would be just as effective.	7/19/2018
4650	17	/policies/complete-streets/	<p>Yes! Prioritize speed and frequency of transit. This is the only way to get an average person to use transit more regularly for all types of trips.</p> <p>Stops every 2 blocks instead of every block would make a difference in speed with minimal impact on perceived distance to the stop.</p> <p>Also, the current focus on rush hour service does a disservice to those trying to make mid-day trips or those whose schedules don't match a typical work day.</p>	7/19/2018
4651	34	/policies/affordable-housing-preservation/	Yes! The more the better.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4652	33	/policies/affordable-housing-production/	Yes! The more the better. Ideally work with developers to integrate these units into new developments. We need more socio-economic mixing within neighborhoods and buildings.	7/19/2018
4653	38	/policies/affordable-housing-near-transit-and-job-	Yes! The more the better.	7/19/2018
4654	80	/policies/development-near-metro-stations/	Yes! The more the better.	7/19/2018
4655	40	/policies/homelessness/	Look into supporting Housing First programs more fully.	7/19/2018
4656	12	/policies/lighting/	I support this policy and the related action steps	7/19/2018
4657	43	/policies/housing-displacement/	Make sure new developments include affordable housing. Involve neighborhood groups in development decisions.	7/19/2018
4658	13	/policies/landscaping/	I support this policy and the related action steps.	7/19/2018
4659	14	/policies/tree-canopy-and-urban-forest/	I support this policy and the related action steps.	7/19/2018
4660	15	/policies/transportation-and-equity/	I support this policy and the related action steps.	7/19/2018
4661	35	/policies/innovative-housing-types/	Yes, more innovative housing types are in demand! Younger residents are looking for more options and education and support from the city could encourage developers to provide that product.	7/19/2018
4662	37	/policies/mixed-income-housing/	Yes!	7/19/2018
4663	16	/policies/environmental-impacts-of-transportation-	I support this policy and the related action steps.	7/19/2018
4664	80	/policies/development-near-metro-stations/	Yes!	7/19/2018
4665	33	/policies/affordable-housing-production/	Housing types need to be addressed on a neighborhood by neighborhood basis. As a resident of Prospect Park, we are threatened by the influx of student housing and absentee landlords, which have all but destroyed much of Marcy Holmes. We have a good mix of multifamily and single family in the neighborhood now, but allowing single family to be converted to multifamily will increase the chances that the neighborhood will be dominated by rentals and absentee landlords. We are already experiencing a rapid change on the edges of our community with multifamily housing, and I feel that the proposed changes in this plan will further threaten the stability that the neighborhood experiences currently.	7/19/2018
4666	17	/policies/complete-streets/	I support this policy and the related action steps.	7/19/2018
4667	18	/policies/walking/	I support this policy and the related action steps.	7/19/2018
4668	19	/policies/bicycling/	I support this policy and the related action steps.	7/19/2018
4669	20	/policies/transit/	I support this policy and the related action steps.	7/19/2018
4670	1	/policies/access-to-housing/	Yes to all of this! Especially Action step e. I live in a primarily single-family home neighborhood and I would love to increase the density in all of these ways. It would help support the commercial nodes near my home and create a more traditional, vibrant neighborhood!	7/19/2018
4671	33	/policies/affordable-housing-production/	I am a Ward 10 Resident, recent grad, and renter. Minneapolis was attractive to me as a place to start a career because (unlike many coastal cities) it enabled me to pay my rent while having enough left over to pay down student loans and save money for my future. With a rental vacancy rate that is too low and rents steadily increasing, I am very worried about displacement. I don't want us to turn into San Francisco. We need to add 4,000 units a year just for rents to stay where they are. Direct city support for affordable housing can help at the margin, but the scale of the need is enormous. We just need to build more homes for people! The plan is a big step in the right direction. Over half of the city is made up of renters. Oftentimes, these are not the loudest voices, but as tension around the plan heats up I hope the Council will keep the challenges renters face in mind and stick to its guns.	7/19/2018
4672	76	/policies/new-parks/	Acquiring new park land now is essential to the future livability of Minneapolis. I fully support adding parks to the neighborhoods that lack them; the benefits of parks and green space are far-reaching. We all do better when we all do better.	7/19/2018
4673	17	/policies/complete-streets/	Yes! Make our pedestrian, biker, and transit-rider environment pleasant and safe!	7/19/2018
4674	12	/policies/lighting/	If the City already "regulates lighting produced on private property, particularly in relation to impacts on surrounding uses" it's not being enforced! Homeowners are installing brighter and even brighter lights, unshielded, shining onto adjacent properties and into home's windows. They are blinding and intrusive.	7/19/2018
4675	10	/policies/street-grid/	The City should formally adopt a policy seeking to cap the freeways to restore the street grid and heal freeway scars cutting through our city.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4676	1	/policies/access-to-housing/	<p>I live in Fulton, a neighborhood interior "farthest from downtown". I strongly oppose changing the interior of my neighborhood from single family houses to multiple small dwellings on single lots (even though this probably is an option that wouldn't be used by developers) or putting large multi-unit buildings among single family homes.</p> <p>We have been battling the destruction of smaller homes in this neighborhood to no avail. This change in zoning would only allow more destruction of neighborhood diversity, not enhance it.</p> <p>Our neighborhood is popular because it had a variety of housing options in a wide price range. Many small house for couples starting out, and moderate sized ones for growing families, and smaller duplexes and 4-plexes for renters. Squeezing larger multi-unit buildings on small lots, at high rents, hardly creates a diverse healthy city. It destroys neighborhoods in the true sense of the word, and creates wealth for developers.</p>	7/19/2018
4677	19	/policies/bicycling/	<p>Mpls. is doing a fine job of helping people feel more comfortable biking, but until driving a car is the less attractive option, nothing will really change.</p> <p>"Incentives that promote biking" could be heavier taxes on car registration/permitting and better enforcement of traffic rules and regulations. Hello! "red means stop" and 30mph is too high for a metropolitan area.</p>	7/19/2018
4678	0.1	/topics/land-use-built-form/	<p>We live in Linden Hills. We have fought to keep developers from building single family behemoths for years. This is a historic neighborhood with character that already has lots of 4 plexes. Higher density can be added with 2 story 4 plexes throughout the area without destroying the neighborhoods with higher density corridors. Without specific government intervention to make housing units affordable (subsidize builders for high price lots?) there will never be affordable housing here. Or much diversity. I'm in favor of both goals. You can buy reasonable houses and add affordable units or halfway houses to increase both affordability and diversity. That won't destroy the character. The plan as written aids big developers and destroys character without creating affordability or diversity. But not this give away to developers who will never build affordable housing on lots this expensive.</p>	7/19/2018
4679	16	/policies/environmental-impacts-of-transportation/	<p>All this sounds great. Looking at 35W this morning made me wonder, "Why isn't this going to be 2 lanes each way all the time with a stellar light rail down the center that runs every 5-10 minutes?" We it's easier, people use it. The Hiawatha line should be a giant wake up call as to the success of excellent public transit. If only people understood what a rail line is watched out...</p>	7/19/2018
4680	38	/policies/affordable-housing-near-transit-and-job-growth/	<p>The proposal to lift zoning restrictions in single-family neighborhoods to allow for the building of four-unit apartment buildings will destroy neighborhoods of single family homes. The value of these areas is that they're not dense and have affordable starter homes.</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4681	38	/policies/affordable-housing-near-transit-and-job-	<p>To the 2040 Planners And Linea Palmisano</p> <p>I am a long-time resident of the Fulton neighborhood in Minneapolis and I love it here. I've made many friends among the other homeowners nearby. We have moderate incomes, similar strong common-sense values and we enjoy taking care of our modest homes and yards. Our kids have grown up together with a sense of love and stability. Over the 32 years I have lived here, I have noticed changes; older people move on and young families move in. That's the natural order of things. But in the recent past, many of our small, cozy homes have been replaced by big, boxy, out-of-proportion houses that look like Paul Bunyan had fun with Legos and chose to drop them in our area. The cohesive charm and livability of our neighborhood have been eroded.</p> <p>Now we're presented with this 2040 Plan whose goals include solving the "affordable housing crisis" and creating "a more vibrant, dense metropolis". The plan suggests implanting "moderate-density apartments (fourplexes) in virtually all single-family neighborhoods". In my opinion, this would further degrade the character of our beloved neighborhood. Transient renters aren't necessarily going to invest in the activities and concerns of our community. Their added vehicles could also increase our parking problems. Tim Keane states "That densification will result in affordable housing is driven by an argument...based upon an unproven theory - that Minneapolis can use 'density' to achieve housing affordability. The evidence from every other North American city shows the opposite: that density is associated with less affordability, in part because building bigger and higher costs more per unit." He continues - "This radical land-use experiment will cost Minneapolis our most affordable homes, because developers are in the business of maximizing profits...developers will tear down the lowest-priced homes. These teardowns will be replaced with investor-owned rental fourplexes, which will be more expensive than the houses that were removed, in part because the price of new housing must include the cost of the housing that was bull-dozered." I agree with Linea Palmisano, who says "I struggle with why we should increase density along interior streets yet not address why our transit corridors aren't being developed today with different types of housing."</p> <p>In the 2040 plan, there ARE proposals to expand home ownership for low-income people and to offer support groups to counsel homebuyers. These make sense to me. Please let us keep some semblance of the lovely and safe neighborhoods we grew up in. Radical change is not always the best solution.</p> <p>Respectfully, April Grande</p>	7/19/2018
4682	5	/policies/visual-quality-of-new-development/	<p>I get what B is getting at, but I think it's unclear. What engaging street faces/streetscapes offer is use and small scale facades, each with their own entrance. With that built form, whether the building is one structure or multiple, it's the freedom for individual occupants to customize their windows and signage and landscaping that makes for good places to be. Specific recommendations: doorways/entrances matter more than material type; personalization matters and these rights should be protected by the city as possible, overriding landlord/developer/neighborhood association desires for uniformity; the city needs to start reviewing proposals from the pedestrian perspective, rather than zoomed out from above or from a mid-street, driver perspective.</p>	7/19/2018
4683	0.1	/topics/land-use-built-form/	<p>The 2040 plan needs major revisions! The goals are admirable and important, the proposed implementation is awful! Please listen to the citizens of all neighborhoods in Minneapolis,</p>	7/19/2018
4684	0.1	/topics/land-use-built-form/	<p>http://www.startribune.com/minneapolis-2040-plan-an-open-inquiry-to-city-officials/488555651/</p>	7/19/2018
4685	29	/policies/creative-sector-economy/	<p>It is difficult for any artist, white or of color, to make a living as an artist. I've been an artist for almost 50 years and have always had to work another job to actually support myself. Eventually I won't be able to do the job I've always done due to aging and will be relying on social security and my art sales to support myself. I hope you will realize that in the arts most of us are struggling financially whether white or of color.</p>	7/19/2018
4686	5	/policies/visual-quality-of-new-development/	<p>B seems like it doesn't address the need to preserve and encourage more alleyways and other small scale right of ways that help create a more human scale network for walkability.</p>	7/19/2018
4687	5	/policies/visual-quality-of-new-development/	<p>E. I'm concerned that E is too vague and adds barriers for new development/more affordability in homes and retail spaces without contributing to the experience of people walking or serving to protect public health or well-being.</p>	7/19/2018
4688	5	/policies/visual-quality-of-new-development/	<p>F is vague to a layperson but perhaps makes sense within the field. But abrupt transitions between land uses are often really compelling spaces and add a great deal of depth to an experience of a place.</p>	7/19/2018
4689	5	/policies/visual-quality-of-new-development/	<p>I like g; it often seems like the standards are used by some special interest groups as a way of delaying developments by saying things aren't ok here, it can go elsewhere.</p>	7/19/2018
4690	33	/policies/affordable-housing-production/	<p>PLEASE consider inclusionary zoning! For profit developers are not going to do this on their own. Non-profit developers can never cobble enough subsidy together to do it quickly and efficiently.</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4691	82	/policies/aging/	Intergenerational: Consider incentives for senior housing to be constructed near (or even part of) schools. Older residents would connect with young students and students would benefit from learning about and from older residents.	7/19/2018
4692	28	/policies/msp-airport/	This policy needs to be clearer in what the city will do to reduce its own emissions from flight and to actively reduce GHG emissions from very dirty modes regardless of the (long-term) promise of cleaner fuels.	7/19/2018
4693	33	/policies/affordable-housing-production/	Lissen, you whipper-snappers with your fancy "degrees" and "policies", I've got a mind to take you to the woodshed and learn you a thing or too! I'm the founder and president of "Neighbors Unwilling To Accept New Dwelling Options Of Any Nature!" Whatever "progressive" ideas you have to make this city "better", NUTAN DOAN! is against it! There is no housing "shortage" -- what we have is a people overage! And "housing options"? I say the only options we should have is what color you get to paint your house -- when you BUY real estate and become a Real American!	7/19/2018
4694	43	/policies/housing-displacement/	As a senior nearing retirement and owning a single family home on the Corridor 4 with a Interior 3 right behind us I can only imagine what will happen to our taxes. Our fear is we will be "taxed-out" of our home very quickly. I also can't foresee how you could provide enough parking spaces for these 1 to 4 story buildings especially with our snow removal plans. I realize you are assuming people will forgo their cars for other transportation but still many will not.	7/19/2018
4695	83	/policies/people-with-disabilities/	New construction should all be ADA compliant to make doorways automatic, wide enough for wheelchairs, etc. Who's to say that apartment buildings marketed for physically-able tenants today won't some day require ADA access?	7/19/2018
4696	66	/policies/air-quality/	Trees! City should identify small and undeveloped parcels for groves of trees to help reduce air pollution and reduce stress! Develop a ratio of hard surfaces to land so that more and taller buildings are offset by a proportionate amount of area for trees. Trees along sidewalks are not sufficient, but clustering trees for greater impact.	7/19/2018
4697	1	/policies/access-to-housing/	I have lived at 4224 Queen Avenue So. (overlooking Lake Harriet) for 29 years. We already have a number of apartment buildings, duplexes and triplexes in the immediate area. I believe it would be a huge mistake to allow 4-plexes on every lot. It would destroy what makes this such a wonderful neighborhood. Thanks for your consideration. John Lundquist	7/19/2018
4698	62	/policies/contaminated-sites/	Perhaps these areas should be designated for lower density, i.e. single-family homes!	7/19/2018
4699	37	/policies/mixed-income-housing/	Are there any examples of cities that have attempted this via the means stated? Where has this succeed either partially or completely?	7/19/2018
4700	67	/policies/climate-resilient-communities/	Incentives builders to put gardens on rooftops. Consider denying underground parking construction due to potential damage from torrential rain storms.	7/19/2018
4701	46	/policies/healthy-housing/	Increase funding for lead abatement in existing homes. Establish regular communication with "mom and pop" landlords to insure their rental housing is not substandard and repaired in a timely manner. Increase rental license fee to pay for more inspectors.	7/19/2018
4702	44	/policies/comprehensive-investments/	Acknowledge that not everyone is capable of managing a household. Provide incentives to developers to create and maintain supportive housing.	7/19/2018
4703	51	/policies/healthy-pre-k-development/	Employers should provide paid maternity leave; on-site daycare!	7/19/2018
4704	79	/policies/healthy-youth-development/	Collaborate with Park & Rec to staff "youth centers" and establish programs to develop youth leadership, especially for those who disdain academics.	7/19/2018
4705	76	/policies/new-parks/	One thing missing from the "New Parks" policy is the idea of expanding existing parks (in addition to building new ones). With the increase in density/population, existing parks will come under increased use. For example, would we consider turning the roadways around the chain of lakes into greenspace and/or into bike/pedestrian trails to accommodate increased park use?	7/19/2018
4706	79	/policies/healthy-youth-development/	Engage youth in civic action via clean up of neighborhoods, and recognizing needs of community; develop leadership skills. Develop programs to recruit and recognize student non-academic efforts such as snow-shoveling for example.	7/19/2018
4707	49	/policies/educational-and-economic-access/	I am concerned by the indifference this policy shows regarding charter schools and other efforts to privatize our K-12 system. I think we should make it clear that Minneapolis opposes any effort to privatize our K-12 system, because such a privatization will only increase racial and economic disparities. We cannot allow the city to work with or accidentally enable these privatization efforts. Also, this plan is missing any explicit mention of new or expanded MPS K-12 schools, which will surely be as necessary with the increase in population. We would need to start planning now to set aside/purchase sufficient parcels in each neighborhood to either expand existing school building footprints or build new ones.	7/19/2018
4708	19	/policies/bicycling/	I'm all for biking opportunities. However, I am starting to get very perturbed by all the bikers who don't follow traffic laws. It is getting very dangerous out there for bikers and drivers alike. Give tickets to bikers who don't follow laws, just like car drivers that don't!!!	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4709	58	/policies/business-districts-and-corridors/	I support this policy. My preferred neighborhoods are those with business districts that are dominated by local businesses. I don't like the fact that most of Lake/Hennepin is now national chains. I do appreciate that these national chains have stepped in to and maintained many of our beautiful, well-made older buildings, but it is far less interesting than locally owned shops. I would like the city to actively support locally owned businesses in these clusters.	7/19/2018
4710	81	/policies/social-connectedness/	To me, transportation - or lack of it - can be biggest barrier to staying connected with the community. The city needs to lean more on Metro Transit to not just increase bus service, but also to communicate about routes et al in an effective manner. I'm not talking about texting to find out when next bus arrives! I want to know where bus routes go - North,South East or West. What ever happened to color-coding!!! I don't know where to add this particular comment, so here goes: take a look at Hwy 94 going along the Mississippi by north Mpls. I wonder why there aren't a few more bridges that join North Mpls. to Northeast Mpls. Why isn't there an exit/entrance ramp at Lowry? I'm sure federal dollars would be involved, but to me it's an example of keeping races apart - away from housing and jobs both.	7/19/2018
4711	82	/policies/aging/	Older people who love their older, single-family home may be electing to stay put because no senior housing in their neighborhood is in sight. To be intergenerational, city needs to be more direct with developers about what types of buildings it wants - not just how dense or how tall. That is, start designating certain sites for senior housing.	7/19/2018
4712	0.1	/topics/land-use-built-form/	It's amazing to me that the city is willing to destabilize and destroy these neighborhoods with multi-lot, multi-family developments on streets adjacent to the transit lines. These are the most stable and desirable neighborhoods in the city, and the fact that they are mainly single family is what makes them desirable. Besides the obvious gains for developers, who made their biggest contributions to the mayor and Councilperson Bender, I cannot see what destroying these neighborhoods does for the long term health of the city. Once they're gone, they won't come back, and St. Paul and Edina will be the big gainers of hard working homeowners and Minneapolis will become all transient renters. The city needs both areas of single family homes and of higher density rentals, not a huge mishmash, which is what this plan proposes.	7/19/2018
4713	1	/policies/access-to-housing/	I think we should ban developers grossing more than a few million dollars per year. We should ban out of state developers. New housing is fine, but wouldn't it be better if it were built by the people of Mpls, for the people?	7/19/2018
4714	0.1	/topics/land-use-built-form/	I understand the arguments for Interior 1 to allow the development of fourplexes, and I think allowing a distribution of affordable housing across the city makes sense. The doubts enter because of the city's track record on allowing huge McMansions that consumed their narrow lots (thus dominating their block and ruining the skylight for their neighbors) and on not holding landlords/tenants accountable for various violations (like allowing tenants to burn 6'-tall bonfires in their backyardâ€”the tenants didn't care because they were on a short-term lease and no one in the neighborhood knew who the landlord was or how to reach them). If we could ensure better setback and lot-use requirements and make the fourplexes into longer-term-resident properties, then go for it. If not, then maybe duplexes are the best we can do for Interior 1. Also, some of these "high frequency transit routes" are a fantasy. Penn Ave. S, Xerxes, 50th, Bryant? We would need to see some radical changes to Metro Transit options along these routes to support the Corridor 4 density you are suggesting there. As we have seen with other transit-based developments (green line), the *permanent or semi-permanent* transit has to be in place before the development will happen. We would need something akin to Metro Transit's A Line in St. Paul on all of these streets to rise to the level of "high frequency transit routes." The Minneapolis 2040 plan seems to lack any commitments from Metro Transit to support these initiatives, so it feels like there is work to be done on that front before you can proceed.	7/19/2018
4715	33	/policies/affordable-housing-production/	You don't need to "create" housing. A lot of housing used to be affordable because there were in-town local landlords that knew everybody. Houses were cheap because they weren't trying to compete with million dollar condos and an influx of yuppies from neighboring semi-urban centers. Now you have millionaires from other states just here to take advantage of people of the city. You have boring professionals moving here to be taken advantage of. Meanwhile the rest of us have become slaves to the service industry, getting only crumbs of the professionals' salaries, unable to afford a dwelling of our own. Lifelong inner-city resident speaking here, I'm 32, and I've seen all this happen to my parents, my peers, and my neighbors. No one I grew up with can afford a house in their home neighborhood. Most only can rent because they know the right landlord who give them a deal. Drive all the nameless, faceless property owners out of this city! Tell the yuppies to go back to Iowa City!	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4716	2	/policies/access-to-employment/	Only if this includes on-the-job training, without student loans, for regular people. If not, then you know we all just become your favorite server, Uber driver, or cashier, which leads to no credit, alcoholism, inability to purchase property, 0 security, and potentially, a loss of self-esteem.	7/19/2018
4717	42	/policies/expand-homeownership/	I find it odd that the only reason assumed for the disparity in housing between white households and non white households is housing discrimination. I'm not saying there hasn't been discrimination nor that the legacy of it persists. However, a large percentage of the people of color in Minneapolis are fairly recent immigrants who have moved here seeking a better life. Many of them are coming here with very little wealth so of course it will take them some time to be able to afford to purchase a home. For example we have the largest group of Somali Americans in the country. I'm not surprised that many of them do not own homes yet but I fully expect that to change as they settle in and work together as families. This is an example of situational poverty. This is similar to my their recent immigrant groups or really mostly immigrant groups fleeing bad situations. It will take time to build family wealth. I wish this report somehow measured how long people had lived here to show whether with time people were able to build wealth enough to buy a home.	7/19/2018
4718	80	/policies/development-near-metro-stations/	This should not include destroying valuable community economic players in order to build bus stations for suburbanites to come to downtown. Why did you eminent domain Good Grocer? Transportation corridors always come at the expense of poor communities, and you need to find a different way to do things.	7/19/2018
4719	88	/policies/public-services-policy/	I'd love to see most requirements for permits loosened and replaced with clear guidelines. For instance, if I'm holding an outdoor event for senior citizens, and people will need a microphone and small speaker to be able to hear each other, it's absurd that I have to go to City Hall and pay over \$100, when the event is not even as loud as a motorcycle driving by or a plane flying over-head. You could just say no permit is necessary for one-time events lasting less than 2 hours that are below 100 decibels. Or something as simple as that. Multiply this by trying to do just about anything - too much permitting, and it's all inconsistently explained and enforced. This goes for small business and residential life. thanks!	7/19/2018
4720	49	/policies/educational-and-economic-access/	Someone shouldn't have to be educated in a Western education system in order to have a livelihood. All people are valuable to Minneapolis, not just the ones who went to college. Everyone can do something, and everyone deserves a place to live and food. Surely we can figure this out without forcing people to conform to ridiculous standards that not even white people want to do?	7/19/2018
4721	64	/policies/food-businesses/	The city should let me sell food out of my house. And also not charge a \$500 permitting fee.	7/19/2018
4722	84	/policies/public-safety/	I'm all for the abolition of police!	7/19/2018
4723	52	/policies/human-capital-and-a-trained-workforce/	Until we abolish capitalism, this can't happen. There will always be disparities unless a cap is put on how many dollars one can have.	7/19/2018
4724	1	/policies/access-to-housing/	Please remove zoning proposal that adds apartments and 4 plexus to interior neighborhoods. We need to preserve the character of our neighborhoods. This will only remove more single family homes available to families.	7/19/2018
4725	62	/policies/contaminated-sites/	I own a brownfield site- my sense is that it would be easier to just pay to have all the dirt hauled to a landfill than it would be to navigate the grant system - And this is also true for any other business or residential contamination I'm interested in mediating. It seems like the result is that grant money goes to big developers who deal with these issues over and over again, and not to folks who own one home or commercial site. I'd love to see priority put on assisting owners of single properties with remediation and de-contamination.	7/19/2018
4726	0.1	/topics/land-use-built-form/	This plan destabilizes our neighborhood and is a giveaway to developers, who are already flooding our block with solicitations to buy up multiple homes. How changing a quiet block from relatively affordable (for the area) modest sized, owner occupied homes where everyone knows each other to cheaply made apartment buildings that will age poorly and house a transient population that will move elsewhere when they marry, have kids, etc. is a positive for the city escapes me. It certainly will hurt us, as we chose to invest on a block without multi-family zoning and paid a premium for it. Now, either we sell for a substantial loss or stay and watch the block we love get demolished so some absentee landlords and developers can make a buck. Shameful.	7/19/2018
4727	46	/policies/healthy-housing/	Maybe if you didn't eminent domain good food markets in poor neighborhoods (like Good Grocer), people would have better health outcomes.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4728	40	/policies/homelessness/	In your statement above you mention mental illness as a cause of homelessness but none of the action steps address this topic. I am a librarian in the public library system and interact with many homeless people on a daily basis. So often mental illness is a big part of the struggle. We are failing people as a society if we do not offer housing and care to people who are truly unable to provide it for themselves. Right now so many people in our prison system are there because they are mentally ill and we have no other place to put them. This is a disgrace.	7/19/2018
4729	80	/policies/development-near-metro-stations/	Minnehaha and Lake would be a great area to connect to the Midtown/Lake LRT station. There's bus stops all over, but no easy way for bikers or pedestrians to travel the 1,000 feet from our block to the LRT station. The LAST comprehensive plan showed this as a dense, Transit Oriented Development zone, but it's still mostly a Target parking lot. Please give the sidewalk from 22nd Ave to Minnehaha some love - remove obstructions, enforce snow and ice removal, add some lights, make the street bikeable? We are doing the Transit Oriented Development (Hook and Ladder, The Hub, Moon Palace Books, Du Nord, Midori's, Gandhi Mahal, etc), we just need City/County help - with some sidewalks, lighting, crosswalks, snow removal, traffic calming, etc. Thanks!	7/19/2018
4730	5	/policies/visual-quality-of-new-development/	Minnesota Citizens for the Protection of Migratory Birds recommends requiring bird-safe glass to reduce the collision risk as well as add to the energy efficiency of buildings. The city should amend the zoning code to require that all new construction use bird-safe glass for the first 40 - 60 feet of the buildings. All the glass used in new buildings are an increased hazard to birds. Birds are important pollinators and a primary killer of birds is glass collisions. If we want to be viewed as an environmentally minded, forward thinking city we need to be aware of this danger and change our building codes.	7/19/2018
4731	0.1	/topics/land-use-built-form/	<p>Only a glance at the Built Form map's depiction of the area bounded by Penn Avenue South, 50th Street as it proceeds east of Penn and Minnehaha Creek shows that if building that even approaches this density occurs a neighborhood will have been destroyed and people who chose this neighborhood for its park-like setting, access to open and uncrowded recreational space, trees, peace and quiet will flee the city as the value of their homes decreases.</p> <p>The notion that thousands of lots now zoned for single family dwelling units should all now be subject to development as four-plexes and multiple family dwellings is absurd. There is no compelling reason why Minneapolis should have to lose its character in order to make space for many, many more people. This Plan has an all-or-nothing feel. Why not try managed, selectively located, incremental change and see how that works rather than a blanket approach that threatens every pocket of peace and quiet in the City?</p> <p>What makes it even worse in my neighborhood is the notion that four-plexes don't need to provide on-site parking and that the "market" should decide how much parking is needed. The "market" will come in and build a number of four-plexes without on-site parking, rent them out, and if it doesn't work the entire block will have to live with the predictable consequences for the next 50 years. The "market" doesn't get to decide to put just any use on a lot of build to any height on a lot. Why does it get to decide about on-site parking? Get your planners out on the street counting parked cars at night and then tell me where another one or two dozen cars will fit. This makes no sense whatever.</p>	7/19/2018
4732	1	/policies/access-to-housing/	By allowing multiple unit housing anywhere I believe that the chances of the dream of ever owning your own home will disappear, especially for the lower wage earners. Any affordable housing will be bought and turned into multi-unit rental property by the already wealthy and developers who will profit from those that can't afford to buy their own home because all of the "cheap" housing will be bought up and turned into.... multi-unit housing owned by the already wealthy. So, who is this Plan really helping? Put up some multi story apartment buildings near transit lines to keep the cost of living down and transportation available for people to get to jobs so that maybe they can maybe save enough to someday buy their own home and have a nice yard for their kids to play in, don't take the most affordable houses out of the market.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4733	51	/policies/healthy-pre-k-development/	As an early childhood educator for the last 35 plus years, who has worked in MPS during the last third of my career, I applaud this goal. But please be aware that just adding more pre-K opportunities is not adequate. I have seen some horrendous preschool and child care situations in Minneapolis. Any work to increase access also HAS to work towards improving the quality of programs. Children "fail" preschools and Kindergartens because the programs are not developmentally appropriate. Many are geared to rote learning, with much stress on math and reading skills before the kids are ready for that type of learning. The "Parent Aware" star program does not adequately show the problems in centers, at least it didn't a couple years ago. The ratings at that point did not look at Social/Emotional indicators, the most basic and most important area for infants and young children. I hope this is changing. Please help ALL children in Minneapolis be able to access play-based, developmentally appropriate care and education.	7/19/2018
4734	72	/policies/sustainable-water-system-management/	how about reduce road salt and sidewalk salt use as this as a huge pollution problem in our lakes and rivers?	7/19/2018
4735	1	/policies/access-to-housing/	Yes 4 plexes. do not compromise with people about sprinkler concerns or transit corridors.	7/19/2018
4736	1	/policies/access-to-housing/	Fix zoning to modern approach to fix past exclusionary zoning and redlining. Fourplexes everywhere if not more.	7/19/2018
4737	1	/policies/access-to-housing/	<p>4plex good. Undo the racist history of redlining in this city - see this post:</p> <p>Fourplexes, Freeways, and Fearmongering by Nicole Salica on July 19, 2018 in 2040 Minneapolis Comprehensive Plan, Maps I'm very tired of white people using the words "bulldozing" and "eminent domain" to spread fear and misinformation about the 2040 Comp Plan, when literal city blocks of communities of color were leveled and replaced with bare pavement in living memory.</p> <p>I hadn't seen the redlining maps overlaid on the current-day city, or maybe just not in this way.</p> <p>There's a pattern that holds through the entire city, corner to corner to downtown. Take a look at David Cook's map that pulls data from the Mapping Inequality Project and the Minneapolis 2040 site, and it's plain as day.</p> <p>I was at a 2040 meeting for held by my neighborhood (Elliot Park) association, and one of the residents hadn't been super involved, but she had heard the fearmongering about bulldozing and eminent domain, and she talked about how she remembered what the area was like before the freeway went in.</p> <p>How is a fourplex like a freeway?</p> <p>It's not.</p>	7/19/2018
4738	1	/policies/access-to-housing/	Support fourplexes everywhere, no exceptions. All neighborhoods.	7/19/2018
4739	0.1	/topics/land-use-built-form/	Rezoning side streets like ours for multi-lot apartment buildings is a terrible idea. This blanket approach to rezoning the entire city ranks up there with past short-sighted decisions from city council and planning that we have yet to recover from, like urban renewal from the 50s and 60s and the Kmart on Nicollet. If implemented, this will change the character of our city forever, adding more of what we already have and are adding at a breakneck speed (new apartment buildings) and erasing what cannot be brought back (quiet, desirable, historic single-family neighborhoods). Minneapolis has a terrible record of preserving things that are valuable, charming or historic - let's place the opinions of the people who own homes in these neighborhoods over those of activists and developers who do not.	7/19/2018
4740	1	/policies/access-to-housing/	More housing is the only long-term solution to the problem of a shortage. More housing NOW, for housing in the future. Nhoods with amenities - schools, grocery stores - don't have enough housing to support them.	7/19/2018
4741	1	/policies/access-to-housing/	It would be great to see more than fourplexes city-wide. As long as we're talking about relegalizing fourplexes, it might be good to see other small multifamily housing types, perhaps up to 6-unit multifamily buildings should be relegalized citywide. Since 4-units triggers sprinkler and ADA requirements, perhaps we should allow 6 units as well.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4742	1	/policies/access-to-housing/	<p>We need housing, we're growing and have a shortage this is a long term goal. Everyone can't afford a large SFH and richer neighborhoods have not had to take their share of housing. They have benefitted from lots of amenities and we should open those neighborhoods to more people. We need more housing options.</p> <p>Diversity in living means also addressing various needs for residents in our shared communities, including smaller home owners, families, and elderly.</p> <p>Where is the evidence from other cities concerning the zoning proposals and their expected results? The evidence is out there, in cities from Seattle to New York.</p> <p>In terms of maintaining homeowners in the city: few can buy homes in the city of Seattle, Chicago, Philadelphia, Boston, New York, and so on. When people are ready to buy a home, they can often only afford one outside of the city. This is one of the positive things which draws people to Minneapolis: homeownership is still relatively affordable in various neighborhoods across the city.</p> <p>If there is a concern of inequity with the larger mansion-size homes going in some neighborhoods, perhaps the city should look at limiting the allowances for those larger homes on each block, which have already been a concern for the residents of those neighborhoods for many years.</p> <p>When I read by one of the maps the official comment that Linden Hills is not dense, and thus not equitable, I was very confused by that summary. There are many neighborhoods which are also not dense in Minneapolis, which are more equitable. Likewise, Uptown/Carag/Ecco are dense neighborhoods, but they are certainly not much more equitable. Density does not ensure equity by any means.</p> <p>I have lived in Chicago and other cities where there is more mixed housing. The result is the wealthy own the large homes, and they own the rentals. And, the closer you are to Lake Michigan, the more expensive things get. The same can be said for the lakes in Minneapolis.</p> <p>We lived in a duplex in Uptown (Carag). We had made a home there, as a family of four, on the 3300 block of Emerson. This block is roughly 50% single family homes and 50% duplexes. On the adjacent blocks (Fremont) and even the next block on Emerson were much larger four story units. Although dense and with some variety, the population mostly includes empty-nesters and young renters with their first jobs Downtown. There were two other families on the entire block who had just had children, still under the age of 5. There were only two other families at our group bus stop, which covered a few blocks, even though the area was very dense, and people were happy with the schools in the area. People with growing kids often eventually moved, because they outgrew their rentals and wanted a home, but couldn't afford one in the area.</p>	7/19/2018
4743	1	/policies/access-to-housing/		7/19/2018
4744	1	/policies/access-to-housing/	<p>People who are most affected by housing crisis are working on day to day problems and are not able to plan for future - or even submit comments on this plan.</p>	7/19/2018
4745	1	/policies/access-to-housing/	<p>I read a recent article on Streets.mn showed a combined map of redlining and the 2040 built form proposal, and doing some analysis on the numbers. It looks like current draft is maintaining very long-standing pattern of less access to housing in wealthier neighborhoods through Interior 1 and Interior 2. This is a major improvement over existing single family zoning, but Interior 1 and Interior 2 coincide with historic HOLC zones graded A and B for wealthier residents. Perhaps we should be aiming for Interior 3 city-wide to account for this. Worth note, a history of redlining is in the city's #1 goal with the comp plan.</p>	7/19/2018
4746	1	/policies/access-to-housing/	<p>More housing is the only long-term solution to a housing shortage, especially if we anticipate a growing population by 2040. Without more housing, disparities will only widen among the haves and have-nots. Housing belongs in all parts of the city, especially in areas with access to rich amenities (schools, parks, transit, grocery stores). Small scale housing, such as fourplexes, should be allowed throughout the city. A mix of housing types is important to the city's growth and is in line with how the city has grown historically.</p>	7/19/2018
4747	1	/policies/access-to-housing/	<p>built form transitions should go smoothly - no dropping suddenly down 3 steps in one block</p>	7/19/2018
4748	1	/policies/access-to-housing/	<p>Equitable increase in affordable housing supply is critical to start strong in this plan. We need all of the built form to reflect the severe shortage of affordable housing. We need the ability to build housing in dense, walkable ways. Fourplexes are good!</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4749	1	/policies/access-to-housing/	I support this, please enter this into the record. 6 stories everywhere. https://streets.mn/2018/07/18/positively-4th-st-one-block-shows-us-the-way-in-minneapolis-2040/	7/19/2018
4750	19	/policies/bicycling/	While it's a worthy goal to want to increase bicycle riding/commuting, we see the negative impacts from increased bike lanes. My car is running longer, burning more fuel, now that there are less lanes for cars on major roads (especially thinking 26/28streets). I have a disability and never will be able to commute by bike, though I take the bus when I can. I fear that we will become a city for young adults, and people will move out to the suburbs when they want to start a family, because of the increased congestion due to reduced flow of cars by restricted lanes.	7/19/2018
4751	28	/policies/msp-airport/	B. Honestly? People are going to walk to the airport from Minneapolis? This is a priority? Isn't that what the light rail is for? How many people are trying to walk to the airport now and are stymied by lack of sidewalks?	7/19/2018
4752	2	/policies/access-to-employment/	People shouldn't need a car to access jobs. Let's invest in transit and other modes.	7/19/2018
4753	2	/policies/access-to-employment/	Everyone has a right to a job in the city without reliance upon a car. Mixed use housing and retail will help!! Removing parking requirements across the board will also help!!! Gets more land available for use.	7/19/2018
4754	2	/policies/access-to-employment/	Everyone has a right to a job in Minneapolis without relying on a car. We should remove parking requirements downtown and near the downtown core, especially in areas near the light rail and other transit centers.	7/19/2018
4755	4	/policies/access-to-commercial-goods-and-service	<p>Why are we using our city to experiment and then study the dynamics when the evidence is out there in other cities, and even in our own neighborhoods?</p> <p>Along with density in urban living, often comes higher rent for business tenants – the result is that rapid change in rents (and/or taxes) smaller businesses such as the ones we are used to in the Twin Cities, whether Bibelot Shops and Dunn Brothers. With higher rents or more corporate competition, they may eventually need to give way to Starbucks or the ever present Dunkin Donuts in Chicago. We have seen this trend over time in Uptown, Northeast, and elsewhere.</p> <p>While I am not opposed to the integration of chain retailers in the city, I strongly believe they need to be considered very, very carefully. Hyde Park near The University of Chicago went through this transformation decades ago. This is a global trend, of course. I lived in Chicago twice: in the early nineties (on an Urban Studies program, working at Roberto Clemente High School, and living in the Bucktown neighborhood when it was still a Latino neighborhood), and late nineties through 2000 (also living near Bucktown, in Wicker Park). In those 5 years in between, I saw how Gap stores and CB2 took over smaller storefronts, how family restaurants became more exclusive ones, or chains.</p> <p>Larger stores in urban areas are not always sustainable, and can often end up as a vacant building. We see this with the vacancy of the former Gap (later Victoria's Secret) on Lake and Hennepin.</p> <p>Unintended results of rapid expanded zoning can include greater vacancies, or, at best, “flipping” of chain establishments as they try different locations every few years, as for them – it is an experiment – they are not invested in the neighborhood as a community. Currently on Lake Street, Tum Rup Thai is being remodeled to be a Buffalo Wild Wings express chain.</p> <p>While it may seem the “norm” nowadays that this is the trajectory for retail pockets, Minneapolis and St. Paul have maintained their unique stance with local retail shops through these decades of chain-retail development all over the country. While this could eventually happen here on a broader scale, the proposals would likely hasten this type of development, and render the unique corner-shop neighborhoods from 43rd/Upton to 48th/Chicago similar to neighborhoods like Uptown, or Burnsville, for that matter.</p> <p>I urge the City of Minneapolis to consider carefully the legacy of allowing rapid and major changes with retail presence in our city; i.e. Lake Street K-Mart.</p>	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4756	4	/policies/access-to-commercial-goods-and-service	<p>Why are we using our city to experiment and then study the dynamics when the evidence is out there in other cities, and even in our own neighborhoods?</p> <p>Along with density in urban living, often comes higher rent for business tenants – the result is that rapid change in rents (and/or taxes) smaller businesses such as the ones we are used to in the Twin Cities, whether Bibelot Shops and Dunn Brothers. 4757	2	/policies/access-to-employment/	Mixed use developments or adaptive reuses are GREAT. Smaller commercial spaces are ALSO GREAT. Small delis or cheese shops?? would be so great in tiny multi-use 4plex-like stuff	7/19/2018
4758	2	/policies/access-to-employment/	More commercial spaces (smaller spaces) everywhere which will lead to jobs.	7/19/2018
4759	2	/policies/access-to-employment/	Removing parking requirements and allowing for mixed use and adaptive spaces in new development will help accomplish goals	7/19/2018
4760	4	/policies/access-to-commercial-goods-and-service	Everyone should be able to walk to a grocery store from their home.	7/19/2018
4761	4	/policies/access-to-commercial-goods-and-service	The goal we had and met about x% of people being within walking distance of a park is good: we should expand that! Food, entertainment, more food, transit, more food... retail of various types!	7/19/2018
4762	4	/policies/access-to-commercial-goods-and-service	Everyone should have access to grocery store, shops, entertainment within walking distance of their home. All neighborhoods should be walkable and have access to amenities, it shouldn't be reserved for selected areas.	7/19/2018
4763	4	/policies/access-to-commercial-goods-and-service	90 percent of Minneapolis lives within walking distance of a park. Why don't we make a similar goal for grocery stores and other commercial spaces? We need more mixed use in commercial areas so people can live near food, entertainment, transit, etc. New commercial storefronts should be small enough so that local businesses can afford them.	7/19/2018
4764	6	/policies/pedestrian-oriented-building-and-site-de	I'd like to require more bike parking in dense areas	7/19/2018
4765	6	/policies/pedestrian-oriented-building-and-site-de	Pedestrians should feel safer at major intersections. And ALL sidewalks should be ADA accessible and should be usable for people in wheelchairs.	7/19/2018
4766	6	/policies/pedestrian-oriented-building-and-site-de	The city should get much more serious about snow removal on sidewalks so that sidewalks are accessible.	7/19/2018
4767	6	/policies/pedestrian-oriented-building-and-site-de	Large setbacks aren't good. Wide pedestrian sidewalks for pedestrians and ADA accessible. Year-round accessible sidewalks. Maximum of building parking. More bike parking and pedestrian oriented entrances facing the street.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4768	6	/policies/pedestrian-oriented-building-and-site-de	Buildings should be oriented for pedestrians instead of cars. New buildings should not be required by the city to build parking, and Minneapolis should implement a parking maximum. Sidewalks should go above and beyond being merely ADA-accessible, they should be welcoming. I support the city's proposed action steps in this draft of the comp plan.	7/19/2018
4769	6	/policies/pedestrian-oriented-building-and-site-de	I strongly support everything here!	7/19/2018
4770	1	/policies/access-to-housing/	I am a supporter of increasing the number of affordable housing options for people. However, I am wary about developers who "promise" a certain number or percentage of affordable units, only to not follow through. This has/is happening in Whittier neighborhood, which is leading to gentrification and leaving many of those in poverty without housing. Also, in Uptown the rate of building and expansion has led to some of our friends moving to the suburbs, because they needed a car, and density is happening without taking into account places for vehicles. PLEASE be careful and conscientious about growth. It's not realistic to think people will give up their cars and remain happy tax-paying citizens if we just push density. We are not taking into account those who might be most dependent on cars (disabled, those with young children, etc) I hate to see the flight to the suburbs or outer rings spike again because we are not taking everyone's needs into account.	7/19/2018
4771	6	/policies/pedestrian-oriented-building-and-site-de	Reduction of setbacks and wider sidewalks are helpful. Where alleys are present near a pedestrian-heavy they should be designed with some pedestrian access and use in mind. Building permeability should be prioritized as well. In specific areas with heavy pedestrian use where vehicle access is still required it would be nice to consider shared space as well.	7/19/2018
4772	6	/policies/pedestrian-oriented-building-and-site-de	Setbacks suck. Please let us have actual sidewalks with ample space for good furniture like bike racks, benches (not anti-people benches). Make 100% of sidewalks and transit stops ADA accessible to wheelchair users, year round. Support (a) strongly. Ground level parking creates a hostile pedestrian environment - support (k) strongly. (n) is good and should be HECK YEAH implemented YESTERDAY.	7/19/2018
4773	6	/policies/pedestrian-oriented-building-and-site-de	Put other users first. We shouldn't continue with a car centric system, put people first. Other more vulnerable users.	7/19/2018
4774	11	/policies/skyways/	No more skyways.	7/19/2018
4775	11	/policies/skyways/	Skyways should be banned.	7/19/2018
4776	11	/policies/skyways/	Ban skyways unless the building has adequate sidewalk-facing commercial frontage.	7/19/2018
4777	12	/policies/lighting/	Better lighting throughout the city. Some areas are not well lit.	7/19/2018
4778	12	/policies/lighting/	Be aware of lights pointing into windows and the light spectrum causing sleep issues to those residents.	7/19/2018
4779	11	/policies/skyways/	No new skyways, please. We have enough.	7/19/2018
4780	73	/policies/stormwater-management/	Please please make policies that will actually reduce salt pollution	7/19/2018
4781	15	/policies/transportation-and-equity/	Jobs shouldn't require ownership of a car. More investments in our transportation system.	7/19/2018
4782	73	/policies/stormwater-management/	We need a city requirement that requires new development to capture their stormwater runoff -- maybe new buildings should be required to capture some percentage of the water that will fall on their property? Or should be capable of capturing all water up to a 1" rainfall on their property?	7/19/2018
4783	15	/policies/transportation-and-equity/	We need to ensure our transportation system goes above and beyond ADA requirements. Expanding LRT and BRT are critical.	7/19/2018
4784	15	/policies/transportation-and-equity/	This policy should also talk about ADA compliance for those in wheelchairs! That's equity too. Ensuring people in ALL regions of the city have access to good transit is critical. Stop putting cars first - put people FIRST.	7/19/2018
4785	17	/policies/complete-streets/	FUCK YEAH	7/19/2018
4786	15	/policies/transportation-and-equity/	Yep	7/19/2018
4787	17	/policies/complete-streets/	i agree how you prioritized this list.. peeps first	7/19/2018
4788	17	/policies/complete-streets/	I love this prioritized list of putting people above automobiles. Let's make it work!	7/19/2018
4789	17	/policies/complete-streets/	I believe in this policy.	7/19/2018
4790	17	/policies/complete-streets/	I agree with prioritizing people (walkers, bikers, transit users). Need to break away from the current system that is still car centric.	7/19/2018
4791	18	/policies/walking/	Put more resources towards making sidewalks usable	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4792	18	/policies/walking/	Consider stormwater when building and repairing sidewalks -- design and grade sidewalks and medians and surrounding land so that water doesn't run onto and pool on sidewalks -- with smarter water design, raingardens, and other water infiltration best management practices, there should be fewer sidewalks that just turn into pools of water/sheets of ice. Especially stop "berming" up lawn/land next to sidewalks.	7/19/2018
4793	18	/policies/walking/	We should have accessible sidewalks and bikeways year round. City should be responsible for clearing winter sidewalks. Invest in sidewalks and not only streets. Dedicate funds to maintain sidewalks, and bike ways actually invest in other projects that benefit walkers and bikers	7/19/2018
4794	18	/policies/walking/	Consider stormwater when building and repairing sidewalks -- design and grade sidewalks and medians and surrounding land so that water doesn't run onto and pool on sidewalks -- with smarter water design, raingardens, and other water infiltration best management practices, there should be fewer sidewalks that just turn into pools of water/sheets of ice. Especially stop "berming" up lawn/land next to sidewalks.	7/19/2018
4795	18	/policies/walking/	Make this a "complete year" plan: Winter maintenance is CRITICAL. Need to implement city shoveling! Like Burlington, VT, that'd be great. Public works needs to get more funding for bike lanes and sidewalks - and WAY less for cars.	7/19/2018
4796	18	/policies/walking/	smooth roads that are cleared all year would be preferable	7/19/2018
4797	18	/policies/walking/	Encourage / support heated sidewalks in heavy pedestrian areas.	7/19/2018
4798	18	/policies/walking/	The city should make it easier to dedicate more resources to maintaining sidewalks and bikeways. This is especially true when it comes to the winter. I would love to see more traffic calming measures (narrower lanes, for example) throughout the city.	7/19/2018
4799	26	/policies/vision-zero/	Yes I support this!!	7/19/2018
4800	26	/policies/vision-zero/	Ban cars downtown	7/19/2018
4801	26	/policies/vision-zero/	How to implement vision zero: ban cars.	7/19/2018
4802	26	/policies/vision-zero/	these commenting people are all narcissist and self centered	7/19/2018
4803	26	/policies/vision-zero/	re: autonomous vehicles: Prohibit zero-passenger vehicles.	7/19/2018
4804	26	/policies/vision-zero/	Autonomous Vehicles are not the answer for our future. We can do away with parking if we expect these to be popular. Strict regulations for AVs. Harsher penalties for hitting people and killing them.	7/19/2018
4805	26	/policies/vision-zero/	Create friction for cars: make streets too narrow for cars to pass comfortably. Design for lower speeds.	7/19/2018
4806	26	/policies/vision-zero/	20 I'd plenty, lower speed limit and design streets that slow traffic and speed.	7/19/2018
4807	26	/policies/vision-zero/	It's time for Minneapolis to consider banning cars in the downtown core. We need lower speed limits and to design streets so that people do not feel comfortable driving at excessive speeds, especially in areas where there are pedestrians.	7/19/2018
4808	18	/policies/walking/	I agree that innovative street design is necessary to make walking safer. I'm excited to see the explicit strategies of curb extensions, bump outs, traffic calming, etc. My concern is that priority has not been given with regards to funding. I'm very familiar with the CLIC process, and CLIC members can only comment on projects that Public Works has already defined and set a budget request for. Even though sidewalk-related projects are always ranked very high with CLIC, there is no way in which CLIC members, who are in a way community voices, request that there be more funding for such projects. With the City's Complete Streets policy and high rank from CLIC, it would make sense for Public Works to really take these policies to heart and bring forth more walking-improvement-related projects.	7/19/2018
4809	25	/policies/innovations-in-transportation-and-infras	Pre-emptively ban zero-occupancy autonomous vehicle trips so that dense areas aren't overrun with autonomous vehicles. Find ways to encourage or require maximum occupancy in autonomous vehicles.	7/19/2018
4810	26	/policies/vision-zero/	In residential areas, design streets for 20 mph, not 30. Sign streets for lower speeds. When full rebuilds of streets need to be done, take the opportunity to narrow them.	7/19/2018
4811	26	/policies/vision-zero/	i. whatever enforcement you provide, take steps to make it not racist.	7/19/2018
4812	26	/policies/vision-zero/	Eliminate racism in traffic law enforcement	7/19/2018
4813	26	/policies/vision-zero/	Move away from car centric system, focus on people and vulnerable users. Whatever enforcement is applied don't make it Target underrepresented people (POCI).	7/19/2018
4814	26	/policies/vision-zero/	If you do focus on enforcement, make sure it is equitable on type of transportation--and not racially-motivated.	7/19/2018
4815	33	/policies/affordable-housing-production/	I support all these!!	7/19/2018
4816	33	/policies/affordable-housing-production/	Build affordable housing throughout the city, not just in certain neighborhoods. Also fund public housing.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4817	82	/policies/aging/	Minneapolis residents want to age in the community they know. More housing types, including senior housing, will make it easier for a family to sell their single-family home and remain in the neighborhood. We also must consider that seniors might not want to drive and should be able to get groceries and have access to other amenities within walking distance.	7/19/2018
4818	33	/policies/affordable-housing-production/	Prioritize building housing on city-owned land that is affordable at 30% AMI	7/19/2018
4819	26	/policies/vision-zero/	I support these action steps. Design is the key determinant to safety, and enforcement should be a backup.	7/19/2018
4820	33	/policies/affordable-housing-production/	I would recommend that the City try its best to plan for the coming of autonomous vehicles as much as possible.	7/19/2018
4821	33	/policies/affordable-housing-production/	FOURPLEXES RULE don't concentrate new affordable housing developments in only a few parts of the city. FUND PUBLIC HOUSING. on city owned land. for 30% ami. 60% ami is nice but really: that's very nearly market rate for a rental unit in most neighborhoods.	7/19/2018
4822	33	/policies/affordable-housing-production/	Allow people to age in place. City owned land should require it to be accessible at 30% AMI. Build more housing and invest in public housing, dedicated funds.	7/19/2018
4823	33	/policies/affordable-housing-production/	tax forfeited land should go to the city and should have public housing built on it at 30% or lower AMI.	7/19/2018
4824	33	/policies/affordable-housing-production/	Give people housing flexibility, everyone doesn't want to live in a large SFH. Fourplexes everywhere, no carveouts for rich property owners.	7/19/2018
4825	33	/policies/affordable-housing-production/	implement (higher?) empty lot taxes	7/19/2018
4826	1	/policies/access-to-housing/	I live in an established Mpls neighborhood and we already have over 40% multi-unit dwellings on our block. I see no need to incentivize more multi-units. In regards to encouraging and allowing building new rental buildings that would accommodate up to 4 dwellings in established primarily single-family residential neighborhoods, I AM AGAINST THIS TACTIC for the following reasons/factors: --Parking congestion: no accommodation for off-street parking and already crowded street parking. --New multi-unit residences (in established residential neighborhoods) will attract non-professional absentee landlords, just looking for a quick source of income. --New multi-dwellings will have longer-term effect of causing established areas to lose their neighborhood feel and appeal, causing families to move out of Mpls. --There is already too many existing homes being torn down, resulting in new mega-large square boxy houses being added . . . and these neighborhoods are losing their quaintness and appeal Overall, I believe we should be encouraging home ownership where possible. But to increase numbers of rental units, I encourage only development of the draft-proposal "Corridor" and "Transit" multi-unit style buildings (i.e., in areas that already contain taller and larger traditional apartment (and condo) buildings. Thanks for your consideration.	7/19/2018
4827	18	/policies/walking/	How is it that this section makes no reference to snow? In fact in the entire 2040 plan I found two references to the word snow and one for ice. Winter is a pretty critical factor in determining how walkable our city is.	7/19/2018
4828	33	/policies/affordable-housing-production/	Encourage development by taxing land that is not used.	7/19/2018
4829	33	/policies/affordable-housing-production/	Minneapolis owns properties that could be turned into affordable housing. These should be required to have a certain percentage of units available for those making less than 30 percent of AMI. Minneapolis needs to build much more affordable housing to compensate for the loss of it over the years. We need to build affordable housing across the city, not just in North or in Phillips. How about some new affordable housing in Linden Hills, which happens to have access to great schools?	7/19/2018
4830	33	/policies/affordable-housing-production/	keep up the good work	7/19/2018
4831	33	/policies/affordable-housing-production/	parking lots owned by churches and universities should be ""encouraged"" to build on that land instead of leaving it barren.	7/19/2018
4832	33	/policies/affordable-housing-production/	Encourage places of worship to redevelop their parking lots to provide affordable housing	7/19/2018
4833	33	/policies/affordable-housing-production/	Encourage development of parking lots, especially large church parking lots for affordable housing.	7/19/2018
4834	34	/policies/affordable-housing-preservation/	YES, please encourage and retain housing for large/multigenerational housing	7/19/2018
4835	18	/policies/walking/	What about snow plowing and how long it takes to clear all of the corners and the problems when boulevard areas are so narrow that plows push all of the snow onto the sidewalk? I have witnessed business owners downtown shoveling the snow pushed onto their sidewalk back into the street as there is no where else for them to put it. Snow is reality in Mpls. We need to plan for it's removal, how and when and budget for it.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4836	34	/policies/affordable-housing-preservation/	Build future NOAH. Build more housing.	7/19/2018
4837	34	/policies/affordable-housing-preservation/	Build future NOAH	7/19/2018
4838	34	/policies/affordable-housing-preservation/	assisting property owners with capitol repairs so that they can keep rents low	7/19/2018
4839	34	/policies/affordable-housing-preservation/	Future naturally-occurring affordable housing is our current market-rate housing. Let's build more now so that future generations can enjoy affordable rents in 2040.	7/19/2018
4840	43	/policies/housing-displacement/	Costs are rising because Minneapolis keep subsidizing out of state billionaires and their playgrounds, and paying City Council members \$98K per year to basically be on vacation, from the look of things. I'm looking at you, Alondra.	7/19/2018
4841	34	/policies/affordable-housing-preservation/	build senior housing. give people housing choices at all stages of their life. future NOAH is current market rate - build it. (b) bring back rooming/boarded houses - legalize existing ones. update occupancy maximums and update our definition of family.	7/19/2018
4842	34	/policies/affordable-housing-preservation/	Legalize SRO, boarding houses. Families are getting smaller. Allow large houses to become fourplexes, be converted to smaller units. More 1 bedrooms and family size housing not just houses.	7/19/2018
4843	36	/policies/innovative-housing-strategies/	\$10 million annually for affordable housing is not enough.	7/19/2018
4844	33	/policies/affordable-housing-production/	I support the idea of having more housing choice and flexibility in housing. It is sort of irrational that our cultural tradition is to buy a house when we're young adults and live there until we die. Our space needs and physical capabilities change as we grow families, kids move out, and we age. It makes sense that residents have multiple options in their community throughout their lives.	7/19/2018
4845	36	/policies/innovative-housing-strategies/	Invest more money in affordable housing, increase property taxes on everyone. Not just new construction.	7/19/2018
4846	1	/policies/access-to-housing/	I agree with the need for more affordable housing. However, as a 30-year resident of Linden Hills, the idea that developers will buy up land in this neighborhood to build affordable housing is ridiculous. It will only lead to more expensive apartment and million-dollar condos. The only ones who will benefit are the developers.	7/19/2018
4847	36	/policies/innovative-housing-strategies/	10m annually is frickin nothing. this budget needs about 10x increasing. Buy out all the parking ramps in downtown and convert them to housing.	7/19/2018
4848	18	/policies/walking/	If something is supposed to be a crosswalk please put up a crosswalk signs, even better a button to push that makes lights flash. There is a weird cement median thing in my neighborhood in NE on Lowry Ave and Polk St. that I think is supposed to help people cross the street but there are no crosswalk signs. My kids who walk to school and have to cross Lowry purposely don't cross there because it seems even more dangerous, people speed up to go around others trying to turn, it squeezes out bicyclists. I don't know anyone around here who knows what the point of that thing is. they put up a similar construction on Johnson and 20th but there is a crosswalk sign so people stop.	7/19/2018
4849	36	/policies/innovative-housing-strategies/	local property owners are perfect for solving this issue	7/19/2018
4850	36	/policies/innovative-housing-strategies/	10 million dollars annually dedicated to affordable housing is not nearly enough. We need to increase this funding substantially to build enough affordable housing for everyone.	7/19/2018
4851	35	/policies/innovative-housing-types/	Require any future parking ramps that are built to have ground floor retail and to be eventually able to be converted to housing later.	7/19/2018
4852	35	/policies/innovative-housing-types/	make sure any parking ramps built (though none should be) are convertible to future housing. and that they have first (+ second / skyway level) retail.	7/19/2018
4853	35	/policies/innovative-housing-types/	Allow new parking to be converted to housing. Ramps and new parking.	7/19/2018
4854	36	/policies/innovative-housing-strategies/	Consider guidance / restrictions on the design of new parking ramps to ensure that they could be converted to housing at a later date should they no longer be needed.	7/19/2018
4855	37	/policies/mixed-income-housing/	Inclusionary zoning as long as it doesn't decrease development. Mixed income neighborhoods every single place.	7/19/2018
4856	37	/policies/mixed-income-housing/	Let the city subsidize the "missed rent" practice of the mandatory IZ homes.	7/19/2018
4857	40	/policies/homelessness/	Connect people with resources and build homes.	7/19/2018
4858	38	/policies/affordable-housing-near-transit-and-job-	YES	7/19/2018
4859	51	/policies/healthy-pre-k-development/	I support this.	7/19/2018
4860	37	/policies/mixed-income-housing/	The city should look at inclusionary zoning options, but should be careful not to require so much so that new housing construction is slowed significantly. Inclusionary zoning should be used to create a small number of units and is not a solution by itself to the affordability problem.	7/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4861	39	/policies/fair-housing/	sounds good to me	7/19/2018
4862	39	/policies/fair-housing/	This is a great item--Minneapolis should aim to work with neighboring cities to make sure any work we do is not canceled out by reductions in fair housing in their municipalities.	7/19/2018
4863	39	/policies/fair-housing/	Allow section 8 everywhere and make the process easier.	7/19/2018
4864	39	/policies/fair-housing/	YEP	7/19/2018
4865	34	/policies/affordable-housing-preservation/	Allow more housing to be built as of right. Basic supply and demand theory shows that we just need more housing in general. We disallowed much housing development several decades ago, and as a result, the NOAH is mostly housing that is from the 1970s and older. Had we continued the housing development trends in the 1980s, 90s, and 00s, that would have dampened the now current rapid rise in housing costs. I love the idea of establishing ways to allow single room occupancy, co-ops, and multi-generational housing. If there is a way to encourage more units with 3+ bedrooms, that would also be wonderful to accommodate larger families.	7/19/2018
4866	39	/policies/fair-housing/	Expand the number of property owners who accept Sec 8 vouchers	7/19/2018
4867	39	/policies/fair-housing/	Everyone should have safe housing. Test that it works. Make all these stronger.	7/20/2018
4868	39	/policies/fair-housing/	I strongly support all the with's action steps as part of this. The city must look at what the barriers to housing are and make sure landlords comply with fair housing law.	7/20/2018
4869	39	/policies/fair-housing/	Enforce strict and heavy financial penalties for people who violate fair housing.	7/20/2018
4870	1	/policies/access-to-housing/	Where is the plan for additional or improved transit on "transit corridors?" Until that happens people will continue to use their cars as they do now - including the new renters who it is assumed will have fewer cars and drive less. What is the evidence for that assumption? The current transit system does not provide "frequent, fast and reliable" transportation to work and school. We take the bus. We also drive. But one has to allow twice the time in taking the bus that it takes in a car for the same trip.	7/20/2018
4871	39	/policies/fair-housing/	Harsh regulations for people who break fair housing rules. Make acceptance of section 8 everywhere.	7/20/2018
4872	39	/policies/fair-housing/	Is there a way to discourage people from flaunting their "we don't accept section 8" in their housing advertisements as though it's a selling point?	7/20/2018
4873	59	/policies/downtown/	24 lively downtown more small food carts.	7/20/2018
4874	39	/policies/fair-housing/	Yes. Just yes. Expand and streamline section 8. (d) should be enforced like liquor laws, with equally harsh penalties. penalizing offenders where it matters - in their pockets. as a percentage of rents, not a flat rate. prohibit advertising "no section 8 allowed" on smaller landlords as this is a bat-signal for racists.	7/20/2018
4875	39	/policies/fair-housing/	The city should outlaw advertising that an apartment does not take Section 8. We also need to increase the penalties for landlords who take advantage of tenants.	7/20/2018
4876	39	/policies/fair-housing/	Conduct fair housing testing to ensure compliance in the rental housing community with fair housing law. audit those habitual offenders and financially punish them	7/20/2018
4877	56	/policies/supporting-small-businesses/	Prolonged construction projects have limited or cut off access to many small businesses and some have been forced to close. Protected existing small businesses should also be considered.	7/20/2018
4878	41	/policies/tenant-protections/	Consider policy to increase the number and diversity of landlords / property owners to encourage more options for renters.	7/20/2018
4879	34	/policies/affordable-housing-preservation/	"Creating strategies" is not an action step. Kind of like "I don't know how to do that, but trust me, we'll get to it later."	7/20/2018
4880	41	/policies/tenant-protections/	Tackle repair issues without displacing tenants. City should have more power in helping tenants. Maybe make repairs and charge property owner.	7/20/2018
4881	41	/policies/tenant-protections/	Would like the City to do a better job of working with landlords to make sure repairs happen so that it's not incumbent upon tenants to report their landlords AND so that repairs happen before they get to a point where the building gets to such a state that tenants are displaced.	7/20/2018
4882	19	/policies/bicycling/	Whenever we are redoing an intersection with stoplights please move the post with the push button next to the street so bicyclists can push it without going onto the sidewalk.	7/20/2018
4883	40	/policies/homelessness/	Supporting and "deepening the connections" are meaningless phrases. Really, tell me how you are going to do it.	7/20/2018
4884	41	/policies/tenant-protections/	Great ideas here https://medium.com/neighbors-for-more-neighbors/minneapolis-2040-tenant-protections-6206723176ab	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4885	41	/policies/tenant-protections/	Renters are often unwilling to report substandard conditions due to the potential for eviction. Minneapolis should pro-actively work with landlords to ensure that repairs happen quickly without potentially displacing tenants (by revoking a rental license). The City of Minneapolis should provide legal counsel for tenants facing eviction.	7/20/2018
4886	19	/policies/bicycling/	Please enforce parking restrictions when people park on bike lanes.	7/20/2018
4887	39	/policies/fair-housing/	As the saying goes, you can't manage what you don't measure. I think it is great that one of the action steps here is to assess fair housing on a regular basis. I don't know that this would fit for the high level visioning of the comp plan, but I think there should also be a higher penalty for those who violate fair housing standards.	7/20/2018
4888	59	/policies/downtown/	Dwindling downtown parking options and rising prices discourage shopping trips downtown.	7/20/2018
4889	41	/policies/tenant-protections/	substandard conditions of rental housing are being partly caused by renters inability to stay housed if they report issues. provide a template lease agreement from the city for free for small landlords. provide in rental license. educate small landlords.	7/20/2018
4890	1	/policies/access-to-housing/	Consult this thread and maps. Fix this. https://twitter.com/divergentdave/status/1019991663148765187?s=19	7/20/2018
4891	19	/policies/bicycling/	I like the intersection painting for bicycles when there is a green box area for bicycles so if you want to turn left instead of having to move to the left, into car lanes and wait in the left turn lane among and behind cars you continue in the bike lane on the right up to the intersection and then can move in front of stopped cars over to the front of the left turn lane. There are some intersections painted like this on the U of M campus.	7/20/2018
4892	43	/policies/housing-displacement/	Allow housing co-ops with tools if a building is for sale. Focus on POCs. More flexibility in housing types.	7/20/2018
4893	43	/policies/housing-displacement/	Encourage programs to help interested people, particularly of vulnerable populations, transition their rental properties to co-ops or similar frameworks.	7/20/2018
4894	43	/policies/housing-displacement/	Allow funds to help convert properties to income properties if they're owner occupied. Support with info or help.	7/20/2018
4895	43	/policies/housing-displacement/	empower the peeps to want to be independent	7/20/2018
4896	43	/policies/housing-displacement/	Establish waiting period when buildings are up for sale to allow non-profit organization or tenant to purchase building.	7/20/2018
4897	43	/policies/housing-displacement/	Prioritize the inclusion of affordable housing in redevelopment activity. yes please	7/20/2018
4898	43	/policies/housing-displacement/	(d) see if we can provide resources for tenants to buy out owners on small properties or housing. help people convert their homes into duplex/triplex/etc. help people find contractors and use equity in their homes to create more units. help people build their own granny flats for them to move in to while they rent out the house to the next generation family.	7/20/2018
4899	43	/policies/housing-displacement/	Consider adding resources/tools for existing homeowners who are POC, indigenous, or vulnerable to convert their single family home to a duplex if they want (this would also help more POC/indigenous/vulnerable folks become landlords and earn more income). Also, the ability to "age in place" is important for elderly (or soon to be elderly) so options for them to convert a single family home into a duplex could be helpful.	7/20/2018
4900	43	/policies/housing-displacement/	Encourage first right of refusal policies for existing tenants when their property goes up for sale.	7/20/2018
4901	43	/policies/housing-displacement/	allow the tenants to have first right of refusal to raise funds and purchase the property	7/20/2018
4902	43	/policies/housing-displacement/	Give small land lords tools and home owners tools to add units to existing building. This could include funding for adding units, educating tenants on hiring contractors, nuts and bolts of construction, etc.	7/20/2018
4903	43	/policies/housing-displacement/	give people reasonable time to move - 30 days is not enough. 90 days would be helpful. give tenants the first right of refusal on sales of properties - let people invest in the homes they've been living in, and improve them! imagine wonderful rooftops of hyperlocal solar and vegetable gardens, colorful walls... renters are very creative people!!	7/20/2018
4904	43	/policies/housing-displacement/	I'd love if there was a minimum time required before a sale of housing by a landlord to give time for non-profit organizations to buy it, or for renters to organize and buy it.	7/20/2018
4905	43	/policies/housing-displacement/	Give families the chance to stay during the school year, so their kids can finish the school year. Coordinate with other groups to help people.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4906	43	/policies/housing-displacement/	Another idea would be to find ways to help occupants convert their properties into multi-tenant housing either through resources to help owners learn how to use their house's equity to finance the conversion of the property.	7/20/2018
4907	80	/policies/development-near-metro-stations/	Another idea for apartment buildings is to put a first right of refusal to tenants or non-profits on properties going up for sale.	7/20/2018
4908	80	/policies/development-near-metro-stations/	Expand definition of transit corridors to several blocks. Treat BRT like LRT. Don't allow people to undo transit because they don't want development.	7/20/2018
4909	80	/policies/development-near-metro-stations/	More development around bus rapid transit lines!	7/20/2018
4910	1	/policies/access-to-housing/	expand the definition of transit corridors from one block to several. franklin blue line stop is criminally underdeveloped. kenwood new stops on green line will need to be developed.	7/20/2018
4911	68	/policies/energy-efficient-buildings/	I think the city's housing action steps are the strongest aspect of the comprehensive plan, and I applaud the courage and boldness on display. In particular, I strongly support the decision to end exclusionary single-family restrictions citywide, rather than piecemeal. This is important because it's the only way to solve the problem in a structural way that will be able to scale up smoothly as the demand for housing continues to grow. It's also important because a citywide policy will reduce the burden of densification placed on any particular neighborhood--rather than heavily concentrating development in certain areas and potentially displacing communities, this allows growth to happen gradually and organically. It also helps reduce the concentration of wealth that has been occurring as huge developers and massive towers have dominated the growth in housing stock.	7/20/2018
4912	68	/policies/energy-efficient-buildings/	do pilots in buildings small medium and large to get off natural gas ASAP.	7/20/2018
4913	68	/policies/energy-efficient-buildings/	Invest resources and pilots of buildings to get off natural gas, for c to meet our goal and conduct studies. Climate change is real.	7/20/2018
4914	0.1	/topics/land-use-built-form/	Supportive of moving away from natural gas. Encourage pilot testing ways to heat buildings without natural gas now.	7/20/2018
4915	19	/policies/bicycling/	You will be doing the Victory neighborhood a great disservice by eroding a beautiful and iconic neighborhood with new housing. The housing stock is of excellent quality and should be rehabilitated rather than redeveloped. It maybe the only area in the north where people feel they are not living in the worst district in the city. Bad idea for Victory.	7/20/2018
4916	0.1	/topics/land-use-built-form/	I am an avid bicyclist and bike commuter. I appreciate the many bike lanes and marked share the road signs etc. However, not every road needs one. Sometimes we need to step back and think about what really makes sense. A bike lane was recently put in on 18th ave in NE Minneapolis. The city took away land from people's yards to make an offstreet paved bike lane. The houses along that road already had a very limited setback. There are people now who don't have any yard left, they step out their front door, down their steps and onto a bike lane. This really wasn't necessary. Bikes and cars could have shared the road there, we've done it for years. Sometimes it seems the city is just adding lanes to say they've added more and up the total. There is also a completely unnecessary bike lane along 3rd ave in NE. 3rd is not that busy, riding my bike on it with traffic is not difficult. The paved path that is taking away green space on the boulevard is horrible and bumpy and like riding on a washboard so no one is ever on it anyway.	7/20/2018
4917	0.1	/topics/land-use-built-form/	Penn and Glenwood and Penn and 55 should be treated like other lrt corridors and at minimum be transit 15-20	7/20/2018
4918	19	/policies/bicycling/	Downtown east needs to have a higher minimum height. Only 8 stories right in downtown! That's not high enough to meet the needs of our growing city.	7/20/2018
4919	0.1	/topics/land-use-built-form/	I'm not sure what you mean by zoning regulations about storage lockers, changing and shower facilities etc but please do not require all small businesses to do this. If we do those businesses will simply locate elsewhere. I am a biker and I do commute to work. I don't expect my work to provide me with a shower. I do expect at least a bike rack to lock my bike and even better a secure storage area but I see that as a bonus.	7/20/2018
4920	68	/policies/energy-efficient-buildings/	Get rid of interior 1, it just further redlining and exclusionary zoning.	7/20/2018
4921	1	/policies/access-to-housing/	I fully support the need to get off of natural gas as soon as possible and to electrify our heating. I would also support the city promoting pilot projects in various-sized buildings to electrify heating and to serve the example to other owners and developers.	7/20/2018
4922	68	/policies/energy-efficient-buildings/	regarding victory neighborhood: i do not like the plans for any housing or businesses over 2 stories in height. this includes all your plans for local streets such as Penn and 44th avenues, and your plans for the area near Ryan lake and victory dog park. i do not see a need for businesses in the dog park. jeanstanestlow@gmail.com, 4211 newton av no , mpls, 55412	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4923	19	/policies/bicycling/	I'm not sure what you mean by zoning regulations about storage lockers, changing and shower facilities etc but please do not require all small businesses to do this. If we do those businesses will simply locate elsewhere. I am a biker and I do commute to work. I don't expect my work to provide me with a shower. I do expect at least a bike rack to lock my bike and even better a secure storage area but I see that as a bonus. In general, promoting more bike racks, and the good kind that you can lock up a bike securely.	7/20/2018
4924	0.1	/topics/land-use-built-form/	There will be bus rapid transit along Penn avenue, and a southwest light rail route, so it seems like Penn/Glenwood and Penn/55 should have more development (e.g. designate as corridor 6) since they'll be near METRO stations. On a personal note, I live in Bryn Mawr and would love to have the added amenities that designation as corridor 6 would allow.	7/20/2018
4925	0.1	/topics/land-use-built-form/	Expand the width of transit corridors from one block to a 5-10 minute walk from the actual street with high frequency transit. This would allow more people to live close to and use the good transit	7/20/2018
4926	0.1	/topics/land-use-built-form/	Consider adding higher density / Corridor 6 nodes at main intersections along 50th (France, Xerxes, Penn).	7/20/2018
4927	0.1	/topics/land-use-built-form/	Lyndale should be considered a transit corridor for the full length, extending south of 36th to the Richfield border.	7/20/2018
4928	0.1	/topics/land-use-built-form/	increase housing density decrease setbacks increase height increase density decrease all that prohibits increased density..	7/20/2018
4929	0.1	/topics/land-use-built-form/	There should be greater flexibility in this form. Like there should be up to six units!	7/20/2018
4930	0.1	/topics/land-use-built-form/	The difference between interior 1 and interior 2 seems so meaningless. Can all interior 1 spaces be changed to interior 2? It would seem to offer more flexibility for future growth needs without impacting neighborhoods in a meaningful way.	7/20/2018
4931	0.1	/topics/land-use-built-form/	This is good - Interior 1 should be eliminated and this should be the lowest density and form allowed.	7/20/2018
4932	0.1	/topics/land-use-built-form/	I generally like how this built-form map allows for greater housing quantity and density. I like the concept of concentrating higher density along commercial and transit corridors. I am however disappointed that the density along these corridors does not extend very far into the neighborhoods. I would be in favor of extending more of Interior 3 further into the neighborhoods, because an extra block or two walk is very feasible for transit-riders.	7/20/2018
4933	1	/policies/access-to-housing/	I live in a single-family home in Ward 12, and I appreciate the atmosphere that our neighborhood has. However, I support the plan to allow four-plexes in my neighborhood. I believe that greater density is in the best interest of the City of Minneapolis and the region. Transit services will be better utilized, businesses will benefit, and residents needing more housing options will gain in the long run. Although it is controversial among my neighbors, I urge you to continue the momentum toward more varieties of housing throughout Minneapolis. Nathan Johnson 3428 36th Ave S Minneapolis	7/20/2018
4934	1	/policies/access-to-housing/	In order to fix redlining address this https://s3.ca-central-1.amazonaws.com/divergentdave-geojson/map.html	7/20/2018
4935	0.1	/topics/land-use-built-form/	The difference between 2.5 and 3 stories has always been fairly squishy and arbitrary to me. A neighborhood with 2.5 story buildings is essentially the same as one with 3 story buildings. For this reason, I would support changing the current Interior 2 areas to Interior 3 areas. In particular, a number of the the Interior 2 areas are home to wealthier landowners. If the City is serious about caring about equity, it should not provide the wealthier areas with special treatment by more or less maintaining the status quo in those areas.	7/20/2018
4936	0.1	/topics/land-use-built-form/	i do not agree that north of lowry is only zoned R1 it should be Zoned R3	7/20/2018
4937	17	/policies/complete-streets/	Reclaim highway 55 as a people centered street. It could be one lane each way with a turn lane. That could be open space for a park. More housing could be built instead of having frontage roads and excess road space. A barrier separating the neighborhood could be eliminated	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4938	1	/policies/access-to-housing/	I believe the city is correct to focus on affordable housing, and I agree with the focus on density around transportation corridors so that we can further develop our mass transit in order to meet our green house emission reduction goals and increase the quality of life for residents by making commutes faster, cheaper, and easier. However, I believe the plan as is amounts to a massive wealth generator for corporate real estate developers who build not with the long-term interests of the city in mind but rather with the short-term interests of profit maximization. The real estate bubbles of the past prove that the real estate market is largely a broken machine that needs a lot of regulation to "work properly." These regulations should include a demand for integrated affordable housing in every new middle and large-scale development, solar panels on every large-scale development, the inclusion of 3-bedroom or large 2-bedroom units for families, green space, and much more small-scale units for sale to owner-occupants than what the market currently finds "profitable." Regarding action step e. -- The idea of adding more small-scale multi-units in all neighborhoods is a good one, and I think fits with the history of this city, which has many beautiful brick four-plexes scattered throughout the neighborhoods -- the availability of duplexes on the other hand is quite lacking. Opening up the market for small-scale, medium-density residential dwellings is the perfect place to balance the corporate large-scale developments that will rapidly occur along transit corridors (though ownership of apartments in these buildings should also be available to increase the housing options available, per the stated goal of this policy) with the requirement that every dwelling be owner-occupied through the duration of the comp plan (through 2040) either by a single owner who lives on the property or through a multiple-owner HOA.	7/20/2018
4939	17	/policies/complete-streets/	Reclaim highway 55 as a people centered street. It could be one lane each way with a turn lane. That could be open space for a park. More housing could be built instead of having frontage roads and excess road space. A barrier separating the neighborhood could be eliminated	7/20/2018
4940	0.1	/topics/land-use-built-form/	I support allowing up to four units on all parcels in the city. As an owner of a triplex, I would like to be able to construct an ADU and add another unit as of right to my property. Adding a unit creates more housing i the city, adds a bit more density that is benefit to the transit system, and improves my financial situation.	7/20/2018
4941	64	/policies/food-businesses/	Free the food trucks! Eliminate areas where food trucks are currently prohibited. Encourage food trucks to operate near parks.	7/20/2018
4942	33	/policies/affordable-housing-production/	Thank you for including this policy. I think we can strengthen this by ensuring that the requirements for the amount of affordable housing offered in a new development match the income level of the area in which the proposed development is located in order to combat gentrification -- the maintenance of these proportions should continue through the duration of the comp plan (year 2040). Generating profits for a development should not supersede the imperative to ensure that the people who live in a neighborhood before the start of development can afford to stay there.	7/20/2018
4943	85	/policies/access-to-health-social-and-emergency-s	make sure the people you're hiring to run these programs are from unprivileged communities	7/20/2018
4944	34	/policies/affordable-housing-preservation/	Policy 34: Affordable Housing Preservation: This is an extremely important part of the affordable housing solution, and I don't think it has been given enough thought. One idea would be to create incentives for owners of naturally occurring affordable housing to access loans to maintain the building without increasing rents above inflation. These options could include loans that are forgiven if the conditions are met within a long timeframe (10 years), with penalties for breaking the conditions. Other ideas include property tax breaks for innovative housing within existing dwellings such as group homes for the disabled, refugees, seniors, newly-released felons; communal living projects; and mixed-generation housing.	7/20/2018
4945	90	/policies/technology-in-the-economy/	This is a half-hearted attempt at encouraging growth in one of the cleanest sectors with the highest paying jobs in the world. "Fostering" is a word that's half way between "spawning" and "adopting", like in children who are neither/nor. I'm not getting a sense that the manufacturing sector would be happy if their workforce left lower paying positions to earn six-figure jobs in technology. Even stating "with a focus on Minneapolis residents" leaves one wondering if the City really cares; a truly aggressive strategy would be attracting (or stealing) talent from around the world to build a world-class technology workforce.	7/20/2018
4946	1	/policies/access-to-housing/	Regarding d. & e., housing should not be automatically allowed due to the 2040 plan, but be considered on a case-by-case basis, and with adequate notification time to the surrounding residents and businesses. Developers should plan their developments in accordance with a neighborhood's Small Area Plan, if such a plan exists. If a neighborhood is opposed to a development, it should not be allowed to be built, or should be modified to harmoniously complement the Small Area Plan and the fabric of the existing structures and green spaces. It is important to preserve green space, for people to rejuvenate, and not turn too much of it over to developers. --Janet Lenius	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4947	35	/policies/innovative-housing-types/	Thank you for including this policy. I believe this is an exciting area for our city in many different ways -- not only for the goal of protecting and increasing affordable housing, but also in continuing Minneapolis' history of cultural innovation. Not only should barriers be removed, but incentives should be put in place. Research in the market is important, but we could also be national leaders and push the market in innovative housing forward. Many of my comments from policy 34 apply here (incentives for those with disabilities, refugees, artists, seniors, newly-released felons; communal living projects; and mixed-generation housing).	7/20/2018
4948	4	/policies/access-to-commercial-goods-and-service	<p>It's great that the city recognizes Complete Neighborhoods as an important part of a carbon-neutral, equitable, healthy, desirable, and economically sustainable city.</p> <p>Unfortunately, Minneapolis 2040 does not go nearly far enough in backing these words up with action. The plan is stuck in the outdated mindset that multi-use is something that occurs in carefully-groomed pockets, through large-scale redevelopments and private-public partnerships. In fact, multi-use is most effective when it's widespread and hands-off, allowing services to organically locate within and throughout existing communities on a larger scale.</p> <p>The city should take a cue from its housing plan, and consider allowing very low-impact commercial uses--like corner stores and coffee shops--throughout the city without exception. Better still would be a zoning plan following the Japanese model--where zones are dictated by the "maximum nuisance" allowed, rather than a strict map dictating exactly what goes where. At the very least, the meager map of commercial corridors in the draft plan should be greatly expanded to ensure there are no services deserts. Otherwise we risk maintaining the status quo, where complete neighborhoods are a luxury good available in a few small--and expensive--pockets throughout the city.</p>	7/20/2018
4949	1	/policies/access-to-housing/	There is an important distinction between commercial corridors along light-rail routes and residential corridors and bus lines. Increasing the density along these residential corridors will destroy the character and vitality of the neighborhoods. I live in North Mpls, and am well aware (as you must be) that developers are not going to buy the large, expensive homes in Kenwood and Linden Hills to tear them down and put up 4-plexes and larger apartment buildings. But that is very likely to happen on the north side, where land and building prices are lower and developers can make a quick profit. This poses an unfair burden on northside residents who live in an already-fragile area and who struggle every day to keep their neighborhood safe and livable. Moreover, the city (inspections, licensing, police) has proven to be incapable of holding landlords accountable for the state of their properties, and of enforcing existing ordinances regarding habitable properties -- so increasing density to the extent proposed is a disaster in the making. This approach will isolate north minneapolis neighborhoods from the vibrancy of the rest of the city by concentrating poverty more than redlining ever did.	7/20/2018
4950	38	/policies/affordable-housing-near-transit-and-job-	There is a huge difference between commercial corridors along light-rail lines and residential corridors with buses. Don't confuse the two and sacrifice neighborhoods and livability!	7/20/2018
4951	89	/policies/technology-in-the-city-enterprise/	If you want to collect data, please make sure you are investing in sound information security practices. I support my taxes going to pay for a few IT security professionals who know what they are doing. And please learn from Atlanta's mistake earlier. Backups are essential. Do not rely on people to protect their data every day, as most cannot. Promote automation of data protection. Have a disaster response plan in place to protect against extended and expensive recovery times.	7/20/2018
4952	33	/policies/affordable-housing-production/	please stop throwing money at builders to "subsidize" affordable housing. Please help the poor create wealth by throwing money at them in the form of vouchers and comprehensive programs to help them buy housing and by doing that build their own wealth and stabilize communities. Builders work around affordability as we see in many of the subsidized artists buildings. Stop catering to the greed of builders and help your own people	7/20/2018
4953	34	/policies/affordable-housing-preservation/	also stop making all housing look the same. Again, invest in people not corporate builders	7/20/2018
4954	38	/policies/affordable-housing-near-transit-and-job-	Increasing housing density along commercial rail corridors is one thing; increasing housing density along residential corridors (with bus routes) is another. In North Mpls, all we get are buses; the light rail skirts the northside in favor of providing scenic rides through the parks for suburban riders. So when you increase density on northside streets, just where is everybody supposed to go? There aren't jobs nearby, and there isn't easy transit access to jobs. So destroy the fragile neighborhoods of north minneapolis, and concentrate poverty here more than ever. You know that the fancy houses in kenwood won't be the ones that are being torn down.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4955	35	/policies/innovative-housing-types/	please also look at expanding laws around mother in law apartments and lofts in single housing yards/garages etc,... My family would like to have a long term housing solution that includes the ability to have tiny/small houses in the back yard with independent plumbing/electric/gas. More to the point allow expansion of alternative energies in small scale projects	7/20/2018
4956	1	/policies/access-to-housing/	In a. add: Allow housing in designated Innovation Districts. Add policy 98: The City will seek to accomplish the following action steps in Innovation Districts to support and experiment with new policies, practices and systems and to support and require developments that are consistent with the City's highest goals as expressed in this plan.	7/20/2018
4957	25	/policies/innovations-in-transportation-and-infras	Please promote multi-family and workplace electric vehicle charging. Owners of these types of buildings may not even know EV charging is something valuable they can add to their property. See: www.multiphousingcharging.com and www.workplacecharging.com The author of these websites is a local man, Jukka Kukkonen. He has been recognized in the public sphere for his knowledge and expertise.	7/20/2018
4958	37	/policies/mixed-income-housing/	work at controlling gentrification now before it's too late. Vigorously create and implement programs to help POC stay in their communities. Create programs for landlords to get loans and grants to improve rental housing. Create programs to help low income families to buy up rental properties and please please figure out a way for low income people to get into foreclosed houses that sit unoccupied for years because banks are unwilling to sell them for less than the former mortgages. If grant and loan programs existed to help buy and fix foreclosed homes we would reinvigorate our poorest neighborhoods.	7/20/2018
4959	6	/policies/pedestrian-oriented-building-and-site-de	Add and new action step.Encourage the establishment of shared parking lots and ramps to serve multiple properties and land uses. If you are going to reduce the parking requirement a shared parking policy to address offstreet parking is needed.	7/20/2018
4960	39	/policies/fair-housing/	Stop allowing landlords to opt out of renting to people with section 8 vouchers. Normalize housing subsidies and work to decrease negative stereotypes about people using section 8. Actively fine and punish landlords who create barriers to families, POC, disabled persons, ELL people from attaining housing.	7/20/2018
4961	41	/policies/tenant-protections/	rent control now, stop allowing the market to decide who can afford the basic human right or shelter	7/20/2018
4962	37	/policies/mixed-income-housing/	The action steps are vague, especially in getting mid-market, non-income limited housing built in areas where the market does not now support it. Specifically, parts of NE Minneapolis, most of North Minneapolis, Seward neighborhood, Cedar Riverside, Ventura Village and the Phillips neighborhoods. In the past, Minneapolis has used tools like tax-increment financing to build the first market rate housing in the north loop and on the East bank of the Mississippi. This tool needs to be used in other areas. This effort should target mid-market housing and not be used for luxury housing.	7/20/2018
4963	31	/policies/creative-workers/	Please title this section "Artists and Creative Workers" Artists and creatives are not the same. "Creatives" tend to work in client-based situations that are better funded than artists who are doing work that is disruptive, challenging and not "for hire." In lumping them together we loose the value that non-commercial artists bring to our city.	7/20/2018
4964	3	/policies/production-and-processing/	Add new action step.Designate Innovation Districts to demonstrate and serve as an experimental laboratories for production, processing and distribution of products, ideas and services in parts of the city where traditional industrial uses and/or structures are no longer economically viable or appropriate to meet new economic realities but where mixed-use job intensive research, development, and new technologies and low-impact production, processing, and distribution businesses and institutions can prosper. Add new action step: Allow residential uses within "Production and Processing" and "Production Mixed Use" districts subject to a designated amount of Production and Processing land uses and application of district systems; this would apply only to designated Innovation Districts such as Towerside.	7/20/2018
4965	24	/policies/shared-mobility/	In Action step i add:"in Innovation Districts allow limited, complementary workforce housing." Please do not feel as though residents have a right to on-street parking. The roads are publicly owned and are not free to maintain, so they should be put to the use that most benefits the public. That may be on-street parking in low-traffic neighborhoods. Or it may be bicycle lanes and wide sidewalks where people like to move through. Also, be very careful with dockless bike shares. Cities have already been badly burned by not regulating those businesses carefully. Shared cars and docked bicycles are good things.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4966	42	/policies/expand-homeownership/	this isn't enough and it isn't that much different than what you are already doing. create loan and grant programs that allow low income to get into homes. the current income limits for grant programs for down payments and for low income home buyer and home improvement loans are too low/limited. Expand your ability to help more people. Create programs to help lower income families buy foreclosed properties and to be able to rehab them where needed. Create policy that doesn't allow banks to sit on foreclosed homes for long periods of time. Create programs where banks will be allowed to see homes for less than previous mortgages owed. Fund more complete programs to help first time buyers. Currently non-profits do not go beyond simple credit counseling	7/20/2018
4967	44	/policies/comprehensive-investments/	yes!	7/20/2018
4968	32	/policies/arts-in-community-development/	Cultural corridors are tricky places as they tend to collapse identities and can be exclusionary. How can we develop cultural corridors that acknowledge multiple cultures, where multiple cultures can get funding / recognition?	7/20/2018
4969	25	/policies/innovations-in-transportation-and-infras	Make sure to differentiate between drones for different uses. Autonomous drones for package delivery should be regulated differently from piloted inspection drones or hobbyist drones.	7/20/2018
4970	23	/policies/coordinated-development-strategy/	Add action step: Innovation Districts: Establish and support Innovation Districts that require above-standard developments and systems including use of district-scale infrastructure and systems, demonstration of flexible policies and practices that allow for experimentation and to model innovative practices consistent with the City's most ambitious goals for sustainability, job development, production, equity and public realm. In action step b add : and the development and operation of district systems such as stormwater, energy, waste management, and shared parking In action step d. add "and the pooling of tax increment revenue,"	7/20/2018
4971	54	/policies/supporting-economic-growth/	Add action step: "Support the designation and development of Innovation Districts where new technologies and models of district systems, collaboration and sustainable mixed-use can be tested and evaluated for broader application."	7/20/2018
4972	43	/policies/housing-displacement/	yes! Stop rewarding greed. Low income neighborhoods are swallowed up by those having enough money to invest and rehab. Allow people to remain in their neighborhoods and be able to buy rentals, homes for sale and foreclosed. support communities buy creating granting programs, non profit support with comprehensive support in buying homes, in rehabbing homes and with creating safer communities	7/20/2018

4977	33	/policies/affordable-housing-production/	Action Step a "Create housing for residents of all income levels across the entire city needs to include creating mid-market housing (not income limited and not luxury) housing in all parts of the city, especially in neighborhoods that have not seen new mid-market developments (except for a few single family homes for in some cases over 40 years. (Near North, parts of NE, the Phillips neighborhoods, Ventura Village, Cedar Riverside and Seward for example).	7/20/2018
4978	37	/policies/mixed-income-housing/	Mixed income housing is extremely important. This policy is vague and should be developed with stronger action items. Integrated housing should be a requirement for every middle and large-development project.	7/20/2018
4979	80	/policies/development-near-metro-stations/	In action step a add at the end of statement: "including Innovation Districts'	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4980	1	/policies/access-to-housing/	We believe that the 2040 proposal expanding housing density represents a huge overreach in urban planning. Relying on a number of poorly thought out and incomplete assumptions. For years Minneapolis has been credited with maintaining and developing viable, stable and eco-friendly neighborhoods basically consistently of single family homes. The assumption that this is now irresponsible and must essentially be eliminated is extremely presumptuous and unfair. Minneapolis has a history of demolishing historic buildings. It now appears that this predisposition may very well expand to destroying historic neighborhoods. A personal example of recent changes in urban planning has to do with our own experience. A little over 20 years ago we requested a permit to put in a curb cut and parking pad for our single family home, which had no off street parking. we were required to present our request to the neighborhood organization and the city planning commission. The concern being with the amount of green space taken up and water drainage for our proposed 9' by 7' parking pad. Approval of the request depended on our having to install pavers for the parking pad, changing the location of the front sidewalk leading to our house and a detailed plan for landscaping. During this tim	7/20/2018
4981	38	/policies/affordable-housing-near-transit-and-job-	Higher density along transit corridors and near job centers makes a lot of sense.	7/20/2018
4982	1	/policies/access-to-housing/	Add to action step 1 at the end of statement: "not included included in designated Innovation districts." Add to action step d add at the end of statement; " consistent with scale, spacing and pattern of development and designated conservation districts."	7/20/2018
4983	6	/policies/pedestrian-oriented-building-and-site-de	Add new action step:Encourage the establishment of shared parking lots and ramps to serve multiple properties and land uses.	7/20/2018
4984	1	/policies/access-to-housing/	Please consider using the Housing and Transportation Index (H+T) when evaluating cost burden. As someone who lives in a rather expensive apartment (for my personal financial situation) but rarely needs a car, the H+T metric more accurately reflects the impact of where I live on the affordability of living in Minneapolis.	7/20/2018
4985	36	/policies/innovative-housing-strategies/	Add new action step: Require inclusion of affordable workforce housing opportunities in Innovation Districts.	7/20/2018
4986	33	/policies/affordable-housing-production/	Action Step C; Pursue policies, tools and programs to ensure long-term housing affordability should include some actually suggestions on how to. For example, the City and other government units should only provide financial support to organizations that are willing to keep the developments affordable for at least 40 yearsâ€”not for only the 10 to 20 years that current policies allow. This will probably mean providing most of the support to community based nonprofit organizations (e.g. Seward Towers Corporation*, Redesign, Inc**) (* STC just rehabilitated the over 600 units in over 50 year old Seward Towers to keep them affordable for another 20 years. ** Redesign, Inc just renewed Section 8 for almost 50 townhouse units in Seward, including 12 over the objections of its private equity partner)	7/20/2018
4987	38	/policies/affordable-housing-near-transit-and-job-	Add to action step a: "in Innovation districts" so it reads: a.Maximize opportunities to create affordable housing near transit stations, in Innovation Districts, and along high-frequency transit corridors.	7/20/2018
4988	1	/policies/access-to-housing/	I am a current resident of Minneapolis and have lived in the City of Minneapolis for almost my entire life. I fully support the goal of increasing access to housing, particularly for those who currently lack affordable housing and face economic and structural barriers to housing. The Minneapolis 2040 proposal is misguided in thinking that rezoning our city lots will increase affordable housing. Zoning can not address income inequalities created by overt racism, structural racism, and the many causes of poverty. Minnesota, and Minneapolis in particular, has some of the worst disparities in income, health outcomes, and education. We can adopt policies to change this. The Minneapolis minimum wage law was a good first step. The Minneapolis 2040 plan will increase housing but as far as I can see there are little if any plans to assure that housing is affordable for the people who currently can not afford housing in Minneapolis. In other words, we can't solve income inequalities and racism with housing stock. Please listen to the feedback I know you are getting from residents of Minneapolis and take the time to write a plan that is more realistic about the broad policy changes necessary to assure ACCESS to AFFORDABLE housing.	7/20/2018
4989	76	/policies/new-parks/	delete action step c. It is not needed	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4990	1	/policies/access-to-housing/	<p>We believe that the 2040 proposal expanding housing density represents a huge overreach in urban planning. Relying on a number of poorly thought out and incomplete assumptions. For years Minneapolis has been credited with maintaining and developing viable, stable and eco-friendly neighborhoods basically consistently of single family homes. The assumption that this is now irresponsible and must essentially be eliminated is extremely presumptuous and unfair. Minneapolis has a history of demolishing historic buildings. It now appears that this predisposition may very well expand to destroying historic neighborhoods. A personal example of recent changes in urban planning has to do with our own experience. 4996	0.1	/topics/land-use-built-form/	<p>The proposed zoning change for single-family homes to multiple family dwellings is unacceptable.</p> <ol style="list-style-type: none"> 1. The infrastructure is not in place to support the increase of density, including sewer, water, gas, and electricity 2. The transportation system is not in place to support the increase of population. If you think that people will walk or bike is a complete mistake. For half the year, people cannot walk or bike everywhere due to icy or snow covered walkways and because of the cold. And the city will never make the investment in public transportation that would make it work. 3. People will keep wanting to drive cars, whether you like it or not. Where are you going to have them park? Are you going to charge for street parking in residential areas? 4. This plan will benefit developers. Where are the checks and balance to control them and the city officials who will allow the projects to go forward? 5. The size and height of the proposed buildings will completely change the landscape and considerably reduce the vegetation and wild life in the city with significant impact on the environment 6. The park system will not sustain the increase of density and how will the quality of water in the lakes be controlled? 7. The traffic around the main corridors will not be sustainable. 8. What kind of businesses will be allowed along the main corridors? We don't need additional retail and restaurants. We need grocery stores and convenient stores if we need to walk everywhere 9. The people of Minneapolis love the city for the quality of life and the balance between city amenities, population density, and nature. This plan will completely change the city dynamics and balance. How does it maintain or improve the current quality of life 10. It looks like this plan has nothing to do with the goals stated in the introduction. It is a poorly disguised way to hide the only true two goals: benefit developers and increase revenues for the city. It has nothing to do with the well being of the citizen 11. Even if this plan has been in development for multiple years, it was not well advertised to the citizen and giving only a month to comment since it has finally been made broadly aware is not enough. 12. A change of this scope should not be decided by the city council but by the citizen of Minneapolis through a direct vote. 	7/20/2018
4997	30	/policies/arts-and-cultural-assets/	<p>Add to Action Step introduction: The City will seek to accomplish the following action steps to support economic development, global competitiveness, and city livability by promoting local arts and cultural assets and the development of arts and creative districts as a part of Innovation Districts.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4999	1	/policies/access-to-housing/	<p>We believe that the 2040 proposal expanding housing density represents a huge overreach in urban planning. Relying on a number of poorly thought out and incomplete assumptions. For years Minneapolis has been credited with maintaining and developing viable, stable and eco-friendly neighborhoods basically consistently of single family homes. The assumption that this is now irresponsible and must essentially be eliminated is extremely presumptuous and unfair. Minneapolis has a history of demolishing historic buildings. It now appears that this predisposition may very well expand to destroying historic neighborhoods. A personal example of recent changes in urban planning has to do with our own experience. A little over 20 years ago we requested a permit to put in a curb cut and parking pad for our single family home, which had no off street parking. we were required to present our request to the neighborhood organization and the city planning commission. The concern being with the amount of green space taken up and water drainage for our proposed 9' by 7' parking pad. Approval of the request depended on our having to install pavers for the parking pad, changing the location of the front sidewalk leading to our house and a detailed plan for landscaping. There was a suggestion that we would pay more in our water bill due to eliminating drainage. Then within a year or two the city began allowing the demolition of smaller homes for the construction of costly large homes which occupied almost entire lots. Complaints to the city regarding everything from shoddy construction practices to rainwater drainage, snow removal and neighboring property damage were met by excuses from the city of not having enough building inspectors. When questions about elimination of smaller more affordable homes in southwest Minneapolis were asked of Mayor Frey, (then on the City Council) he stated that he didn't believe there were any affordable homes in southwest Minneapolis. There have been virtually no efforts on the part of the city to explore programs which would promote the purchase of existing single family homes by low income people. Now, suddenly, the city is proposing a plan which would potentially eliminate traditional single family neighborhoods in Minneapolis. The prospect of having a fourplex built on a single family lot with no off street parking, no yard space, the elimination of most green space and four families occupying the space formerly occupied by one family not to mention the imposing structure on one or both sides of the existing single family home makes the prospect of buying or keeping a single family home in this area much less desirable. We can only imagine the concerns of recent residents who purchased newly constructed homes or paid premium prices for older homes in order to live in the neighborhood as it exists, now facing the prospect of a fourplex or larger building to radically change the features they thought they were obtaining moving into the area. Geographically Minneapolis is a very small area in terms of the Metropolitan area the Metropolitan Council presides over. Why is Minneapolis attempting to assume an extraordinarily large share of the density expansion for the Metropolitan Region? Since this is a Metropolitan Council Initiative, it would imply that this type of long term planning would involve working jointly with neighboring cities. The 2040 Plan seems to treat Minneapolis as a rather isolated entity. Perhaps working with the Met Council to encourage a greater cooperative effort through out the Metro area in order to deal with future density issues would result in a far better more comprehensive plan. As the 2040 plan stands now it is fairly easy to project an exit by present homeowners to neighboring cities. As for the unique and ambitious scope of this plan, it seems unfair to expose the citizens of Minneapolis to the significant risk involved in its implementation.</p>	7/20/2018
5000	11	/policies/skyways/	Due to the harsh winter weather, I would not work in downtown Minneapolis without the skyway.	7/20/2018
5001	37	/policies/mixed-income-housing/	I don't know what this means - its written in esoteric jargon. You need to use plain English - what specific actions will result from this policy? We've tried mixed incoming housing - you see it everyday in the Riverside Multi-color tile high rise. It didn't work. We've also tried radical re-engineering of our urban environment (in the 60s) which resulted in losing many of our architecturally and historically significant buildings (the old Minneapolis Public Library).	7/20/2018
5002	25	/policies/innovations-in-transportation-and-infras	<p>It's great that the city is choosing to proactively regulate and plan for AVs. It seems that we've learned the lessons of the past--where the rise of traditional cars rapidly redefined the city landscape, before citizens or city officials had the opportunity to set reasonable boundaries and protect residents, pedestrians, and land usage.</p> <p>I would encourage the city to adopt an even stronger stance: specifically, to underestimate the benefits of AVs and overestimate the risks. There's a great danger in assuming AVs will be a transportation panacea as some have claimed, and a great danger in assuming AVs won't present a new and unique nuisance compared to the myriad existing problems posed by cars in the urban environment.</p>	7/20/2018
5003	39	/policies/fair-housing/	I don't know what this means. Please use plain English - what specific actions are being proposed in this policy?	7/20/2018
5004	3	/policies/production-and-processing/	A significant amount of this goal can be accomplished without the threat to existing neighborhoods that the plan now proposed.	7/20/2018
5005	23	/policies/coordinated-development-strategy/	Again, plain English.....	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5006	20	/policies/transit/	<p>This transportation plan is not specific enough. As long as it will take more than 5 minutes to walk to or from a public transportation stop in the winter, as long as it will take more than 3 minutes to wait for public transportation to go to the final destination, and as long as it will take more than 50% more time to go from point a to point b compared to taking a car, then no one who is currently using a car will switch to public transportation.</p> <p>When this infrastructure is in place, then and only then this plan can investigate changing the zoning and allow an increase in population density</p>	7/20/2018
5007	1	/policies/access-to-housing/	<p>I think allowing 4 units per City lot is very reasonable. I live on a block that has a mix of single family homes, duplexes, and one fourplex. I like living near a fourplex because people are more often in the front yard, and that one building does a lot to make the block feel safe and welcoming. One of our neighbors from the fourplex knocked on our door to let us know when we left our car parked on the street with the lights on. If another property on our block were to add units (like if a duplex added a unit as an ADU), I'd support that. The more people we have living on our block, the better. It's nice to see people when I walk outside. Thank you for including the reasonable idea of 4-units per City lot in the plan, I support it strongly.</p>	7/20/2018
5008	28	/policies/msp-airport/	<p>The airport isn't in Mpls. Making the airport a pedestrian destination is ridiculous.</p>	7/20/2018
5009	42	/policies/expand-homeownership/	<p>Expanding homeownership is a crucial aspect of affordable housing and perhaps the least developed policy among the city's potential tool chest for achieving its stated goal. Home ownership and quality public education are the primary ways that people generate wealth in America (household generation of wealth here meaning "get out of the cycle of bill by bill living"). Another way of saying this within an equity framework is that homeownership and quality public education are the primary tools we have of lifting people out of generational poverty. The massive amount of housing development called for by the 2040 plan guarantees that enormous sums of wealth will be generated -- these can go almost exclusively to the corporate real estate speculators, or it can be divided up among the people who actually live there by insisting that occupant ownership be an element in new development.</p> <p>Another issue to consider is that many people do not want to own but need cheaper rents to improve their quality of life, while many who want to own a home of some kind cannot find something they can afford and thus their forced participation in the rental market creates a negative feedback loop of escalating rental prices.</p> <p>In sum, the national real estate market boom and crash cycles, the failure of San Francisco, Seattle, Portland, Denver, and other places to drastically increase their population and housing without massive displacement proves that the market cannot be allowed to regulate itself about the types of housing it determines it can make a profit from. This crisis calls for more innovative and bold methods of giving people the choices they deserve and the opportunities to own the real estate equity they generate from their housing payments. One idea would be to require a certain number of owner-occupied dwellings for each new development project. Another would be to create forgivable loans for first time homeowners with good credit but low income. Another idea would be to require all small-scale housing in single unit zoning to be owner-occupied. Yet another idea would be to transfer foreclosed homes to non-profits working with low-income families seeking home ownership paths, or to open these to low-income good-credit first-time homeowners. In this framework it would be crucial to require these buildings to remain owner occupied through the duration of the comprehensive plan period (2040). It will also require maintaining skepticism to claims by developers that the market doesn't want a particular kind of housing (for example, larger owner-occupied apartments / condos with 2 or 3-bedrooms for families, or non-luxury housing), or that requiring ownership, integrated housing, and other affordable housing items mean that the project won't generate "enough" profit. Over the period of time that affordable housing has shrunk, profit margins for real estate have skyrocketed. This is not a coincidence.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5010	2	/policies/access-to-employment/	<p>I like letter 'd' in this, but I hope you'll leave a little bit of flexibility here. Also, because large parking structures generate so much traffic, which is expensive to manage and has a number of negative impacts on the surrounding areas, I hope the City will implement all means available to discourage the construction of structured parking. Right now there are at least 4 major parking structures under construction, 3 in the north loop, as well as the Wells Fargo parking ramp next to the Midtown Greenway. Why aren't these ramps being better screened / or wrapped with active uses? In some cases there is some mitigation, but couldn't there be more?</p> <p>Also, perhaps the planning commission/City could require employers to give employees an equivalent subsidy regardless of their mode choice. Let's say for the sake of an example that a parking space costs \$30,000 to build, and has an expected life of 30 years, equating to a driving subsidy of \$1,000/year for the employee. The business offering this space should also offer \$1,000 per year to employees who walk, take transit, or bus. The payment could be as cash or in the form of transit passes, reimbursement for bike stuff, health premium discounts, etc...</p> <p>If the City could encourage local employers to provide equal incentives for any mode of travel, this would likely result in less motor-vehicle traffic, better health for employees, and better air quality and safety for neighborhoods.</p>	7/20/2018
5011	43	/policies/housing-displacement/	This is a crucial affordable housing policy, thank you for including it. This could be strengthened with programs that assist people of color, indigenous people, and vulnerable populations in not only maintaining their homes but also in becoming first-time homeowners.	7/20/2018
5012	4	/policies/access-to-commercial-goods-and-service	Yes to all of this! We have some smaller commercial nodes in our neighborhood, and it would be great to see more flexibility and support for their growth.	7/20/2018
5013	67	/policies/climate-resilient-communities/	<p>I commend the city for taking the climate crisis seriously. It is the greatest global issue--by far--faced by our generations, and Minnesota in particular has seen, and is projected to see, some of the most rapid temperature rises anywhere in the world. Implementing rapid decarbonization and planning for an urban geography substantially different from today's should not only be top priorities, but must factor into every major decision made at the city level, even when it may force compromises on other priorities.</p> <p>In particular, it's great that the city includes transportation emissions in emissions profiles and goals. Too many states and peer regions are willing to look narrowly at the electrical grid when setting these types of targets.</p>	7/20/2018
5014	6	/policies/pedestrian-oriented-building-and-site-de	Requiring ground-floor windows is an excellent step. So many blocks (especially downtown) have buildings that fail to provide much interaction with the sidewalk, which is a lost opportunity. As new development occurs, please insist on better than the status quo!	7/20/2018
5015	5	/policies/visual-quality-of-new-development/	<p>Once again this seems to be incredibly overreaching. The example of the large expensive houses recently built in Minneapolis illustrates that the city did not act in any comprehensive manor to ensure that they would have a positive effect on the neighborhood other than to increase the tax base. When complaints were made to the city regarding shoddy construction practices no allowances for rain drainage or snow removal, the aesthetic effect on neighboring homes and often the complete elimination of green space we were told that the city didn't have enough housing inspectors to keep up with the complaints. Can we really believe that the developers and contractors who stand to make huge profits from this plan would be responsive to these concerns and that closely monitored by the city. The adoption of this plan would result in a truly unbelievable amount of interest and activity by contractors and developers who have the most to gain by this plan.</p> <p>Based on past experience we have very real concerns that the city could effectively monitor and enforce this development.</p>	7/20/2018
5016	45	/policies/leverage-housing-programs-to-benefit-c	The city needs to be proactive about protecting us from international, national, and regional real estate speculation.	7/20/2018
5017	7	/policies/public-realm/	Please make it easier to convert on-street parking spaces into green space. I like the parklets that rotate around the City, and it would be great if these could be made permanent where there's interest. I'd rather have more green space in front of my house than the on-street parking that's there now. Reducing the excess amount of on-street parking will be a big help in making our public realm more inviting and interesting.	7/20/2018
5018	17	/policies/complete-streets/	<p>I am a biker and a walker. I commute 20 miles per day by bike from April to November, so I consider myself the perfect audience for this plan, and yet I am completely opposed to it. As long as a plan like this one will vilify motor vehicles and make life miserable for car drivers, it will never be adopted by the majority of people and will be completely counter-productive by creating tension and division leading to the rise of populist extremes. To achieve the goals, the plan must engage car drivers by presenting a viable alternative to driving while improving driving conditions at the same time so they are faced with two good solutions.</p> <p>Also, ever forget that we live in Minnesota where climate has a significant influence in the mode of transportation we choose to use.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5019	33	/policies/affordable-housing-production/	<p>How many affordable rental units will be created, either as new development or as re-definition of existing units to ensure that the number of unit will meet the projected need?</p> <p>Also, a time table of when sufficient numbers will be available is a necessary element to indicate when the goal will be reached.</p> <p>Doing both in the context of the 30% income level is especially important.</p>	7/20/2018
5020	8	/policies/public-safety-through-environmental-de	<p>Also please make streets narrower so that cars slow down and less frequently crash into signposts, buildings, people, etc...</p> <p>Narrower is safer, and it leaves more space for other things.</p>	7/20/2018
5021	0.1	/topics/land-use-built-form/	<p>The historic houses around Lake of the Isles are very unique to our city. This is a stellar scenic area to visit and I do not want to see any larger apartment buildings. I think it is a mistake to allow fourplexes here because there might be tear downs. ADU's are fine but I do not want to see tear downs around this scenic and unique area of our city.</p>	7/20/2018
5022	10	/policies/street-grid/	<p>Yes to the sidewalk grid. I don't think we need a street grid as fine-grained as our current grid for cars though. Letting cars drive and park darn near everywhere creates a redundant over-supply of pavement for cars. I can park east of my house, or west of my house, or south of my house, and it's all a 30-second walk from my house. I don't need that much parking. I'd rather have less parking and more green space.</p> <p>I understand the general desire for a grid, and the general benefits. But there are many benefits to strategically closing sections of the grid for cars, while keeping the grid open for pedestrians and bikes.</p> <p>Vehicles that travel at 30 mph don't need the same fine-grained network of routes as people who travel at 4 miles per hour on foot, or bikes moving at 12 mph.</p>	7/20/2018
5023	0.1	/topics/land-use-built-form/	<p>I have lived and worked in Minneapolis my entire life. My career has been in real estate development, and primarily in multifamily development. Coming from that background, I believe that this plan is way to aggressive. This should be the 2100 plan. I live in south Minneapolis and when I see what is proposed for Sheridan/Linden Hills Blvd area and Bryant/ Colfax/ Aldrich Ave So. it reminds me of how we allowed older historical commercial gems in downtown Minneapolis to be lost and now we are talking about doing the same to alot of our single family housing stock. Single family homes are being disparaged and made out to be the evil foe in this plan, but yet they are preferred housing class of families. So this plan becomes an attack on families. I also completely disagree with the blanket allowance of 3 and 4 plexes in all areas. One of the lousiest housing stock is produced when older single family homes (2 and 2.5 story) are converted into duplexes triplexes and Quads. The conversions typical produce poor units, bad sound transmission, vertical exiting issues, utility separation issues, and spaces that don't really work. I also imagine that smaller affordable single family homes would be lost to tear downs to create 4 plexes, thus eliminating the most affordable Single Family homes.</p> <p>John Bell</p>	7/20/2018
5024	6	/policies/pedestrian-oriented-building-and-site-de	<p>It is unrealistic to place such a low priority on peoples need and desire to own and drive private automobiles. Making it increasingly difficult to own a vehicle in this city will only add to congestion problems and a perceived need to move out of Minneapolis. Concerns such as the climate, necessity to travel, personal physical limitations, recreational opportunities, time constraints, personal safety, etc., make attempts to radically change Minneapolis residents use of automobiles something to be very careful with. Current congestion caused by the creation of grossly underused bike lanes and the reduction of off street parking requirements for new businesses and apartment buildings are examples. A drive through low income areas of the city reveals a very large number of vehicles parked along city streets, even where high frequency public transportation routes are close by. This includes neighborhoods with alleys offering off street parking. Public transportation in the city of Minneapolis has been unreliable due to bus operator shortages, numerous events on high frequency transit routes promoted by the city, frequent rail disruptions, etc., and there is no indication that those conditions will change. Those that work early morning or over night shifts must have access to an automobile. Walking several miles to your job during our winter weather conditions could be a life safety issue. Not all residents will have the luxury of living close enough to work, no matter how much the city would like to believe that to be the case.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5025	47	/policies/housing-maintenance/	<p>Thank you for including this policy -- when you travel to other places the experience is largely guided by the built environment and it gives you a sense of the cultural legacies and how people live. The same is true for those who actually reside in a place -- the experience is largely guided by the built environment -- though it is easier to take this truth for granted. As someone who lives in a neighborhood with many multi-unit buildings in converted hundred year old homes, I know that action item (c) can and should be strengthened. Not only should rental property owners be supported in maintaining the buildings, they should be required to do so. Many of these property owners are the worst kind of speculators, putting almost none of the rental profit they generate back into the property. In a hot market they sell the property at inflated prices and the new developers claim that the only way to recoup their investment is to tear down the building -- thus destroying the naturally occurring affordable housing and forever destroying the history of the place -- and start again with market rate and luxury housing that do not make long-term residency in the neighborhood sustainable.</p>	7/20/2018
5026	15	/policies/transportation-and-equity/	<p>It's going to be tough to accomplish this unless a significant investment is made in biking & walking infrastructure that actually prioritizes biking and walking. Our premier bike route (Midtown Greenway) still has stop signs when it meets minor streets. Isn't this absurd?</p> <p>It will take much more robust bike infrastructure to make people who are new to biking feel safe and comfortable. The City should get a lot bolder on this front if we want to see more equitable outcomes.</p>	7/20/2018
5027	17	/policies/complete-streets/	<p>The City's budget should reflect this. The CLIC budget and maintenance budget don't seem to have caught up with this important policy. We still have a 'cars-first' budget, and that should change, since most of our infrastructure investment has gone towards cars for decades.</p>	7/20/2018
5028	7	/policies/public-realm/	<p>Shared streets harms public transportation efficiency which seems contrary to one of the goals of this plan. In addition, shared streets introduces safety conflicts between bicycles, pedestrians and transit vehicles along with other modes of transportation., Shared streets which narrow driving lanes, also increases pollution in areas of concentrated poverty where high occurrences of asthma occur. This goal seems contrary to having a greener city with clean air and water.</p>	7/20/2018
5029	48	/policies/data-driven-decisions/	<p>I would like to voice my support for this particular policy -- though it would seem unnecessary. At a ward discussion on the 2040 plan I was shocked when the director of long-range planning stated in response to a question about providing more opportunities for homeownership and wealth generation for those who occupy the dwellings that we were just "going to have to come up with some new ways of generating wealth," and while she couldn't elaborate what those new ways would be she was sure there were some economists working on it. This kind of attitude about city planning cannot be accepted. The city needs to remain committed to data-driven initiatives and decisions in order to meet the enormous challenges and take advantage of the opportunities.</p>	7/20/2018
5030	18	/policies/walking/	<p>The standard design for intersections should involve huge bumpouts. There is no reason for little intersections to be as wide and dangerous as they currently are. From little neighborhood intersections to street crossings downtown, nearly every intersection in Minneapolis could be substantially better.</p> <p>A lot of the new ADA ramps (especially downtown) have the unintended and unfortunate impact of encouraging sweeping, fast turns by cars around corners. Please add curb bumpouts when those are installed to reduce the turning radius for cars.</p>	7/20/2018
5031	17	/policies/complete-streets/	<p>Please address signal timing for pedestrians. I shouldn't have to wait 2 or 3 minutes to cross the street. Especially when traffic engineers are unwilling to make safety improvements to streets that would delay drivers a few seconds on average, it feels deeply disrespectful to make pedestrians wait for minutes at a time to cross a single street.</p> <p>It's especially odd that some of the worst lights (in terms of pedestrian delay) are in Uptown and along Lake Street near Minnehaha - two areas with very walkable commercial districts.</p>	7/20/2018
5032	25	/policies/innovations-in-transportation-and-infras	<p>The best way to regulate autonomous vehicles would be to quickly re-design our streets so that they are safer for everyone, regardless of who is driving the vehicles. Most neighborhood streets don't need to be designed for 40 mph traffic, and we'd all be better off in the long run if they were narrowed and designed for 20 mph traffic. Even on major arterials there's a lot of room to make them safer. Our current driving environment that encourages speeding is dangerous today, and will continue to be dangerous when autonomous cars are programmed to fit into general traffic patterns.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5033	20	/policies/transit/	<p>I support the city's efforts to expand transit, but would like to see more concrete support and prioritization. I worry that choosing not to take opinions on transit modes leaves the city in a weaker position as an advocate for better transit, and makes it harder to muster the political will to make necessary but possibly controversial choices.</p> <p>As a concrete example, the recent and ongoing work planning major street reconstructions (e.g., Hennepin) has not consistent with the city's stated Complete Streets goals. Despite the goals we have on paper, we are still very much stuck in the mindset that we allocate most of the street to cars, then maybe squeeze in some transit advantages if there's space. It's important that we come into these planning processes with strong, stated preferences for particular modes and for dedicated rights-of-way so that we don't compromise on the general principles of putting transit first.</p> <p>In addition, we should be planning an intercompatible transit network, not just a series of isolated corridors and routes. Long-term plans for mode usage is an important step in ensuring that routes benefit from sharing passengers, trackage/rights-of-way, vehicles, stations, timetables, and other infrastructure.</p>	7/20/2018
5034	8	/policies/public-safety-through-environmental-de	<p>To date, the city seems to be significantly lacking in the ability to take enforcement action when it is called for. Public transportation is notoriously unsafe. The city's recent backing away from taking enforcement action in the sale of marijuana in downtown Minneapolis is another example. The elimination of the narcotics and vice units in the police department further illustrates this. Can we really believe that radically increasing the population density of the city wouldn't result in far greater crime and concerns for public safety. Environmental design in and of itself is not the solution to solving all the crime issues in the city. The unwillingness of city leaders to enforce laws on these types of low level crimes, drug dealing, public drinking, urination, defecation and prostitution on our city streets, bus stops, bus shelters and rail stations is an example of this. Most of these areas have great lighting, many eyes on the street and were designed using police and HSEM principles.</p>	7/20/2018
5035	26	/policies/vision-zero/	<p>Yes. To get this implemented, we need Public Works to get out of the way and allow citizens and neighborhoods to make changes to streets (with consultation and permission from Public Works) so that safety improvements can be built more quickly.</p> <p>We also need Public Works to make the safest possible designs the new standard, rather than treating them as innovations and special cases. For example, 10-foot lanes should be the standard, and anything wider (faster, more dangerous), should require serious discussion and consideration.</p> <p>I have mixed feelings about enforcement. Police-driver interactions don't always end well. At the same time, when drivers know that they won't get tickets for speeding, blowing stop signs, or failing to yield to pedestrians, the resulting driving culture isn't great for human survival either.</p>	7/20/2018
5036	27	/policies/transportation-partnerships/	<p>Impact fees for development should be based on the number of parking spaces. For example, a parking ramp should have a high impact fee, while a neighborhood cafe (without any off-street parking) should have no impact fee. An apartment building with 50 off-street spaces should have a fee 1/2 that of an apartment building with 100 off-street spaces.</p>	7/20/2018
5037	10	/policies/street-grid/	<p>This can be accomplished without implementing the entire plan.</p>	7/20/2018
5038	33	/policies/affordable-housing-production/	<p>For aging in place, more flexibility around ADU's could be helpful. Also, 4-plexes wouldn't hurt. I've had conversations with older colleagues who feel that a 4-plex would be the perfect way to retire. They could have their kids in 1 or 2 of the apartments, or could have friends or renters in 1 or 2 of the apartments. The intergenerational community and the ability to live with friends (but have some separation/privacy) would extend their ability to remain independent.</p> <p>Even if 4-plexes aren't allowed, it would be nice if ADU's could have more than one unit. For example, two studio apartments could fit in the space of a 3-car garage easily. Why not allow ADU's to have multiple units? This could also be helpful in providing affordable housing options, and in making Minneapolis more practical for families with a need for multi-generational spaces.</p>	7/20/2018
5039	11	/policies/skyways/	<p>Minneapolis should learn from the experience of St. Paul, that has experienced a significant amount of crime in the skyways. Crime is centered around transit and rail facilities and often spills into the skyway from there. The inability of Minneapolis to effectively police these areas results in private buildings potentially closing their portion of the skyway which in effect could trap innocent victims in them with criminals. Higher density would most likely exacerbate the probability of this occurring.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5040	34	/policies/affordable-housing-preservation/	<p>ADU's have not really taken off. They have been developed at a snails pace. I think the restrictions on size should be relaxed a bit, and this might go a long way to making them more feasible in more cases.</p> <p>Doing everything possible to allow more supply of housing to be built will help keep prices from skyrocketing. It will be hard to get to a more balanced vacancy rate without offering more ways to get new homes and apartments built in Minneapolis.</p> <p>I'd strongly encourage the City to relax the restrictions on ADUs. It doesn't make sense (to me) that I can build a garage for car storage that's bigger than what I'd be allowed to build if the intent was to house people. Are cars more important than people?</p>	7/20/2018
5041	1	/policies/access-to-housing/	<p>The city has failed spectacularly to persuade residents that this plan will achieve any of the goals it claims to work toward, and in all honesty, the city isn't even trying. Home owners are getting the message loud and clear that we are standing in the way of 'progress' and the city will be better off once we've been taxed out of our homes and sent packing. I will not forget any representative that allows this plan to proceed.</p>	7/20/2018
5042	12	/policies/lighting/	<p>The problem with lighting if regulations are not enforced is that many new developments and schools, use the type of lighting that ends up having the "Walmart" effect of daylight 24-7. This includes the new bus rapid transit shelters that Metro Transit has installed on the Aline and soon to be on the C, D and E lines. This style of "Walmart" lighting will impact residents and again has the potential of residents leaving the city.</p>	7/20/2018
5043	37	/policies/mixed-income-housing/	<p>I support expanding the inclusionary housing policies and tools. As part of this, allowing more types of development to be built 'by right' is critical. As long as every development needs variances and CUP's to get built, there will be a lot of time wasted (and unnecessary risk) for developers trying to get through the process. If the City wants to be inclusive, then certain basic types of development should be allowed Citywide. This will encourage affordable development because (1) it will be harder for neighborhoods to block affordable housing, and (2) it will be less risky/costly to do development.</p> <p>It would be ironic if the new comp plan included new 'inclusionary housing' policies while also upholding the exclusionary zoning policies of the distant past.</p>	7/20/2018
5044	13	/policies/landscaping/	<p>Even with this plan nothing will increase the amount of green space with the type of development this plan proposes. For example when developers replaced smaller homes with large expensive homes, they eliminated every tree on the existing lot, thus increasing the impervious surface of each lot.</p>	7/20/2018
5045	59	/policies/downtown/	<p>Downtown has a lot of dangerous 3-lane 1-way streets that are hostile to pedestrians while providing far more traffic capacity than is actually needed. Certainly in a few places these streets are warranted by the amount of traffic, but in many places they are just wasteful. Getting these streets narrower, greener, and safer is necessary to achieving all that the City wants to see happen downtown. The block of 4th Ave just south of Washington Avenue is just one example of a 3-lane street that could easily be 2 lanes and be much more pleasant for everyone. There are many other blocks that are similarly over-paved.</p>	7/20/2018
5046	70	/policies/ecology-and-habitat/	<p>Replace massive amounts of on-street parking with rain gardens please.</p>	7/20/2018
5047	14	/policies/tree-canopy-and-urban-forest/	<p>This goal won't be attained with large structures on these lots that were previous single family homes with large trees. Where boulevards remain they can add new trees, which are going to take decades to grow to a significant heights, not to mention the number of trees that will be completely eliminated where they once grew in yards of single family dwellings, now replaced by fourplexes and apartment buildings,with large areas of impervious surface. For example many of the trees on the new Nicollet Mall died. Even with structural soils boulevard trees or those planted in concrete have a history of not surviving due to our cold climate, drought and chemical uses on impervious surfaces.</p>	7/20/2018
5048	13	/policies/landscaping/	<p>I strongly support requiring all city lots to maximize storm water mitigation. Not just encouraged to be in accordance as noted above, but required.</p>	7/20/2018
5049	15	/policies/transportation-and-equity/	<p>Minneapolis currently has the some of the most frequent service in areas of concentrated poverty. Safe reliable transit depends on a variety of things, including fewer detours due to construction and too frequent events on those MSA roadways. Additionally, transit riders who don't feel safe due to the lack of enforcement by policy personnel of even low level crimes and presence will gravitate toward automobiles not matter how smooth the street surface is.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5050	82	/policies/aging/	<p>By 2040, I'll be over 60. I'm guessing that many of the people commenting on this plan are older than me, and the pictures I've seen from some of the engagement events look like a good portion of the participants will be in nursing homes by 2040.</p> <p>I hope that as you evaluate and weigh the feedback you get on this plan, you will give the most weight to comments from people who are younger than me. People who will still be early in their careers by 2040, people who will have young children at home in 2040, people who will be moving out of their college rentals and looking for a more permanent place to live in 2040. I think my neighbor who is 83 should certainly have a voice in the process, but I hope his voice doesn't drown out the needs of people who are now 23, or 13, or 3. They will be living with the results of this plan much longer than he will, and much longer than I will.</p> <p>Thank you for putting together such a thorough and thoughtful plan.</p>	7/20/2018
5051	17	/policies/complete-streets/	<p>In placing consideration for cars last, the plan seems to be extremely presumptuous that people will willingly give up automobiles as their primary means of transportation. It will be extremely difficult to redesign the city to accommodate peoples needs and lifestyles to facilitate this goal. To imagine that the city will be able to create self contained neighborhoods and adequate public transportation to accommodate peoples needs to meet time constraints, medical needs, recreational opportunities, etc., is unrealistic. Older citizens are limited often in terms of even walking to public transportation, standing or waiting for public transportation in extreme cold or heat, let along making use of bicycles. There exposure to crime also increases with the inability to simply get in their automobile and drive to their desired destination. Several recent attacks on senior citizens at transit stops in our area are an example of this. People's desire to simply travel out state for vacation, family gatherings, camping opportunities, etc., are dependent on private automobiles.</p>	7/20/2018
5052	18	/policies/walking/	<p>This can be done without implementing the entire plan. Plus the implementation of the entire plan would not increase walking to a significant degree. The plan seems to completely disregard climate conditions in Minnesota. There are very significant periods during the year were it is imply to cold, to hot, to slippery etc., to realistically expect the majority of citizens to employ walking as a primary means of transportation.</p>	7/20/2018
5053	19	/policies/bicycling/	<p>The established bicycle lanes are grossly underused at the present time, especially during winter and extremely hot conditions, etc., On streets where traffic lanes have been eliminated to create bicycle lanes it is an every day occurrence to find traffic, including public transit buses backed up literally for miles and to notice a handful of bikes at best using the bicycle lanes even in idea weather. In the winter months the bicycle lanes are virtually unused.</p>	7/20/2018
5054	20	/policies/transit/	<p>The funding for public transportation does not come from the city of Minneapolis. Public transportation ridership in the region has dropped significantly in the last few years especially on the urban local buses. There a number of factors that are contributing to this including gas prices, modal options such as Lyft and Uber, shared bikes and cars, walking and reliability due to frequent construction, special events on transit streets and rail disruptions.</p>	7/20/2018
5055	21	/policies/freight/	<p>This can be done without implementing the entire plan.</p>	7/20/2018
5056	22	/policies/downtown-transportation/	<p>There has been no initiative or ability to do this thus far. It is concerning that the city would think they could accomplish this goal by implementing an even more complex plan.</p>	7/20/2018
5057	35	/policies/innovative-housing-types/	<p>Smaller units/apartment options would be great. But too many of these pop up that are "luxury" and expensive. I would love to see some small, simple Low cost options for people who prefer to live simply so they can live and save in a lower income.</p>	7/20/2018
5058	23	/policies/coordinated-development-strategy/	<p>Obviously the city does not have the funding to implement this plan alone, it is presumptuous and unrealistic to presume that outside funding is going to be available to implement this plan with the consistency that would be necessary to make it even marginally successful. This goal specifically call out by number f. that the city would strategically acquire and dispose of property in order to implement coordinate district-wide development plans in these areas. This seems in conflict with statements made recently by city council members to reassure citizens that no property will be condemned for public use. What about homes that are to be replaced for high density housing and development along public transportation lines.This has already occurred near the 38th Street Station to line the pockets of private developers, who seem to benefit the most from this plan.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5059	1	/policies/access-to-housing/	<p>I live on the 4900 block of Fremont Ave. S. Although the bus line is one block from my door, I do not take the bus to town because the trip time is 2 to 3 times as long as a car ride. I do not take it to the grocery store because I can't carry a week of groceries for my family on the bus. This plan will not change that.</p> <p>Were a developer to decide to purchase my house and tear it down to build a four-plex, s/he would incur a purchase price in excess of \$600,000. If s/he chose to replace it with a building of the same quality, the construction costs would be high. Then, of course, s/he would have to make a profit. The result would new dwellings offered to buyers (or renters) at a price-per-square-foot far higher than that of the current structure. Moreover, the footprint increase necessitated by erecting a multi-unit structure on this small, shared-driveway lot would obliterate its small front and back yards (which are currently gardens). A prospective buyer (or renter) would likely be a person with much money and little aesthetic sensibility. Is that the city's goal for this neighborhood?</p>	7/20/2018
5060	17	/policies/complete-streets/	<p>The current levels of traffic congestion (especially in summer months) are already a major problem in the Minneapolis and metro area. I do not see transit options keeping pace with development. I am concerned that all of the new high density housing is contributing to highway and urban street congestion. I support biking and walking, but we need to be realistic that with an aging and ability-diverse population, not everyone can choose those options. Therefore, public transit must increase significantly, with buses/trains stopping at nearly every block in business and residential districts, if we are going to encourage diverse participation in urban life. Also, to encourage clean air for bikers and pedestrians, mass transit (and as many other vehicles as possible) needs to be electric and/or extremely low-emission. Perhaps we will need a fleet of bike taxis as well, to meet the goal of bike-dominant transport but still meet the needs of those who cannot walk or ride a bike.</p>	7/20/2018
5061	0.1	/topics/land-use-built-form/	<p>Please use Raymond Dehn's policy plan to structure the final draft of 2040. https://s3-us-west-2.amazonaws.com/policy.raymonddehn.com/Housing+Policy+Paper.pdf</p> <p>You upzone some areas but not everywhere and you structure affordable housing into the center of the debate. Redlining didn't benefit single family homeowners any more than it did realtors, developers and lenders and it's they, not single families, who will benefit if this plan isn't modified.</p>	7/20/2018
5062	35	/policies/innovative-housing-types/	<p>if by "removing barriers to innovative and creative housing options" means rezoning the entire city, you should say that outright. I am totally against forcing a blanket policy on the entire city. Your web site is terrible.</p>	7/20/2018
5063	36	/policies/innovative-housing-strategies/	<p>If you are referring to rezoning the city for multi dwellings, you should say it outright. I am against rezoning the city.</p>	7/20/2018
5064	34	/policies/affordable-housing-preservation/	<p>I am against rezoning the city. Take that out of your plan.</p>	7/20/2018
5065	33	/policies/affordable-housing-production/	<p>Do not rezone the city.</p>	7/20/2018
5066	1	/policies/access-to-housing/	<p>Do not rezone the entire city. Focus on areas where rezoning is welcomed by current residents and let them decide their fate.</p>	7/20/2018
5067	1	/policies/access-to-housing/	<p>The city through 2040 has tried to make it out that single family home owners were the sui generis beneficiaries of redlining when in fact it was realtors and developers and lenders who followed those maps and guided families into those homes. And the city now purports to solve redlining by allowing realtors and developers and lenders to profit once again. There is no denying that we need urban planning and that may include mixed unit approaches all over the city but simply remapping the red lines and then throwing open the doors to developers when there is, what, a 97% approval rate at the zoning commission is no answer. If this is what passes for new urbanism I hope we become the city that redefines the term to suit our needs rather than molding the city to a market-rate model of faux equity.</p>	7/20/2018
5068	0.1	/topics/land-use-built-form/	<p>Building neighborhoods around excellent walkable schools in every neighborhood isn't part of the plan and that's too bad. Take this draft and march it to the Davis Center and sit down with Ed Graff and tell him you want plans for people living around schools in all parts of the city and that they should all be in good working order and all have excellent teachers and we should stop busing kids all over and yanking them out of their neighborhoods into charter schools and school choice lotteries. Stop giving charter schools land that can be used to develop affordable housing!</p>	7/20/2018
5069	1	/policies/access-to-housing/	<p>Protect existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, and especially within the Northeast Minneapolis Arts District. Density should NOT be the primary focus of planning as preserving neighborhoods and vitality should be considered as at least as important.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5070	3	/policies/production-and-processing/	Add Arts Production as a protected class for production processing areas. d.&.e. Protect Production Areas - do not allow non-production in Production Areas. f. Protect older industrial buildings for future production and processing uses (not Non-Production uses).	7/20/2018

5076	55	/policies/business-innovation-and-expansion/	Add preserving existing uses, assets and Art Districts.	7/20/2018
5077	56	/policies/supporting-small-businesses/	Add artists to this section (Support the development and growth of small business and artists.)	7/20/2018
5078	58	/policies/business-districts-and-corridors/	g. Support the existing Arts Districts h. Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement.	7/20/2018
5079	81	/policies/social-connectedness/	*Support the existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community. *Preserve existing buildings.	7/20/2018
5080	1	/policies/access-to-housing/	This plan prioritizes multi-family housing increasing population density further. Allowing duplex, triplex and quad housing on existing lots where you can already typically hear your neighbors every sneeze does not improve QUALITY of life. It does lead to quantity...of population, conflict, and social, political, and policing needs. Continuing the trend of demolishing single family housing and turning primarily single family home neighborhoods into more metropolis high density population areas further decreases the neighborhood feel and connectivity of such neighborhoods.	7/20/2018
5081	33	/policies/affordable-housing-production/	At a meeting, a city planner admitted that the proposed plan would not result in affordable housing in the historic Lowry Hill and Kenwood neighborhoods. It seems that the argument of affordable housing in those areas is a ruse to simply allow developers to build more luxury multiunit housing to destroy these charming historic neighborhoods. Why is no one asking about Mayor Frey's conflict of interest in light of his wife working with and for developers?	7/20/2018
5082	1	/policies/access-to-housing/	I very much support the changes that promote diversity in housing types, INCLUDING, allowing up to a 4-plex in traditionally R1A neighborhoods. As someone who lived in duplexes and 4-plexes in my early post college days, I loved being able to have the option to live in a rental that was not a large scale building. As someone looking towards the future as I age, I would love to be able to downsize at some point and go back to living in a small scale rental in my neighborhood. There are not many options now. As an architect working on small scale non-profit housing developments, I am always trying to push the envelope to develop something new, not just repeat the standard 3 bedroom, 2 bath house. Pushing the acceptance of ADUs was a success. What about small scale pocket neighborhoods? There are lots of ways that we can bring density to our single family neighborhoods without destroying the character. Please continue to promote this diversity as well as think about going even further. What about ADUs? A neighbor of mine wants to build a detached one in her backyard for her mother-in-law. But, she is thinking ahead to resale. If she adds another "house" to her property, she has just priced out a large portion of the potential buyers. What about allowing division of property in this case?? Regarding allowing multi-family on public transit routes, this makes sense!! I will be looking for the policies that boost our public trans system as well.....	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5083	33	/policies/affordable-housing-production/	<p>From my work in small scale affordable housing:</p> <p>The cost of construction is what it is. There is no way around that fact that building any affordable housing unit requires a LOT of subsidy. Mayor Frey talks of \$50 million for affordable housing. That is what is needed. Nothing is really going to change unless we can change political will to support this need. Put the money where our values lie.</p> <p>Actively support organizations like the City of Lakes Community Land Trust. They are the only ones out there with a mechanism to allow long term affordability. Encourage/incentivize others to come up with a plan as well.</p> <p>How will you support low-income owners aging in place? Grants/loans for rehab to make things accessible? New (subsidized) housing for the elderly in their neighborhoods which allows them to sell their home to new young families?</p> <p>New tools to produce units at 30 or 50% AMI? Inclusionary zoning!!!</p>	7/20/2018
5084	34	/policies/affordable-housing-preservation/	<p>How do you address this through the zoning code???</p> <p>Regarding strategies surrounding multi-generational housing... this is in the wrong box I know (new vs. preservation), but when I have been on projects to develop multi-generational housing, the City has limited their funding contributions to that equal to a single family home. If these houses are serving more than one household, up the funding contribution.</p>	7/20/2018
5085	35	/policies/innovative-housing-types/	<p>Think about removing the conditional use permit requirement for doing cluster developments. Make it easier to do small scale, higher density housing in typical single family neighborhoods. Example at 810 Main Street (which you have showed a photo on on the Housing Goal page). 6 houses on 2(1/2?) lots. Perfect option to bring in a bit more density while this development completely fits in with the neighborhood.</p> <p>Whether this will bring affordability is another discussion. I know how much these little houses on Main are valued at. They are not affordable. Density alone will not bring affordability. It will only make up a small portion of the deficit.</p>	7/20/2018
5086	37	/policies/mixed-income-housing/	<p>Fully support!!!! Now back it up with enforceable policy. Inclusionary zoning. This would go a long way toward addressing your rhetoric surrounding equity in housing access and combat the effects of the long history of segregation that you have laid out in the housing goal section.</p>	7/20/2018
5087	38	/policies/affordable-housing-near-transit-and-job-	<p>Fully support this. Also will be looking to find out how the City will support transit development.</p> <p>I especially like this forward thinking as one my children is visually impaired and will never be able to drive a car. This is not just good for people with low incomes, but also those that are not able to drive OR are eventually able to make the choice not to if there is good infrastructure in place.</p>	7/20/2018
5088	80	/policies/development-near-metro-stations/	<p>Applaud the large number of action items around this area of development that deal with the pedestrian and the human aspect of a high density development.</p>	7/20/2018
5089	59	/policies/downtown/	<p>For action item c to be successful there needs to be affordable housing for residents who work downtown to live downtown.</p>	7/20/2018
5090	40	/policies/homelessness/	<p>Support efforts to prevent homelessness such as situations in which the county can identify households that are in danger of losing their housing, but are living in a situation in which they will never be able to find new housing should they lose their existing home. Partnerships between the county and organizations like the CLCLT have been addressing this - the City could step in as a partner as well.</p> <p>What ever happened to the One Stop events that got all service providers in one place to assist the many concerns that the homeless have? Is there a permanent place for this now? If not, there should be.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5091	42	/policies/expand-homeownership/	<p>The City of Lakes Community Land Trust!!</p> <p>What kind of policies can the City bring to the table to strengthen the ways in which programs such as the CLCLT and Build Wealth and others serve communities of color?</p> <p>Can the City create a zoning overlay that indicates areas in which any new single family home be one that is long term affordable?</p>	7/20/2018
5092	43	/policies/housing-displacement/	<p>inclusionary zoning.</p> <p>support land banking efforts for future affordable housing when identifying neighborhoods where market trends indicate coming gentrification.</p>	7/20/2018
5093	23	/policies/coordinated-development-strategy/	<p>It is always good to have people working in the same direction on something. Developing in a way that creates a sustainable and self-supporting environment makes sense.</p>	7/20/2018
5094	45	/policies/leverage-housing-programs-to-benefit-c	<p>Make the process of hiring local, small business, people of color, etc. easier. CERT certification and things like those sorts of regulation restrict the pool of potential workers. I have gone through the process. It is doable, but takes quite a bit of time and may be daunting to someone with less experience. There are a lot of qualified people out there that are not listed on the CERT list or others as meeting the requirements to have their hours counted in programs like this.</p> <p>Make reporting requirements easier for developers in this regard easier as well.</p> <p>Employ the assistance of organizations such as Marnita's Table in order to get 51% people of color to the table at important conversations regarding community participation.</p>	7/20/2018
5095	46	/policies/healthy-housing/	<p>include all of these priorities when working on affordable housing preservation efforts.</p>	7/20/2018
5096	47	/policies/housing-maintenance/	<p>Bring back the "This Old Home" tax deferral option for people putting maintenance expenses into the City's old housing stock?? Provide a program for rental owners as well?</p>	7/20/2018
5097	6	/policies/pedestrian-oriented-building-and-site-de	<p>These ideas sound lovely but I can see them pushing out new development with so many regulations. What if I was going to build a new light industrial building but now the city says I have to have windows everywhere. That would make it very difficult to maximize the use of space. Walking home in my neighborhood yesterday I looked at the buildings and thought about windows. Commercial buildings facing the street did have large windows in the front as you would expect but for those on the corners they didn't have them on the sides. These parts of the buildings hide things like kitchens and workspaces. I did not feel endangered or disappointed as I walked past the brick walls. These are vibrant businesses in my neighborhood. Many of them are owned by recent immigrants. Too many building requirements will send innovation, new businesses elsewhere. What if I wanted to build a new clinic or a church on a corner? Clinics may have some windows but not usually transparent windows into examining rooms. Churches often have stained glass so that would be against your rules too.</p>	7/20/2018
5098	48	/policies/data-driven-decisions/	<p>Data can be helpful. Make sure to use this when presenting to communities in community engagement processes. Use it in a way to help quell the fear that always seems to arise when any new change is suggested (i.e. the extreme fear around the 4-plex possibilities).</p>	7/20/2018
5099	6	/policies/pedestrian-oriented-building-and-site-de	<p>Does no one who wrote this plan own a car? I realize we are trying to reduce car use and I'm sure this will happen but we aren't there yet. If there is no off street parking what are we going to do during snow emergencies? Is it a coincidence that none of the pictures in this report show winter? Unless we suddenly have amazing transit that takes people everywhere very easily and cheaply this is going to create street nightmares full of cars everywhere.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5100	20	/policies/transit/	<p>This is super important. While in reviewing this comp plan, my main focus in on housing due to my line of work in small scale affordable housing development, I think transportation is probably one of the key factors regarding livability as a city grows in density.</p> <p>This is also one of the key areas of change that people are fearful about. Traffic is already a problem. Parking is already a problem. I appreciate many of the strategies to get more people walking/biking (the complete neighborhood design), but there will always be a need to venture out of the neighborhood and having a top notch public trans system is one of the main factors in making a dense city livable.</p> <p>While suburban/downtown transit is important for the workforce, it is equally important to improve the neighborhood to neighborhood transportation options as that is where you will also eliminate a lot of the single person car trips.</p>	7/20/2018
5101	16	/policies/environmental-impacts-of-transportation/	<p>This is the future - the city must push for this. Much of the push back is from people who are not able to bike everywhere in the city. Also, our climate is not friendly toward year round bikers. Public trans will have to step up its' game to get everyone on board in reducing car trips.</p>	7/20/2018
5102	17	/policies/complete-streets/	<p>The City seems to be moving ahead on this pretty quickly. I think that we are in a transition phase. There are still many people who do not support this. Traffic is worse and half the street is taken up by a bike lane. Intersections are confusing. Snow covers up the lines on the streets...</p> <p>I am in support of this effort, however, I think a lot more work and education and people's adjustments to change will need to happen before this is seen to be working.</p> <p>Agree with the context based approach suggestion. Whether this works or not is very dependent on the unique situations in different parts of the city, who is using those routes, what commercial or services are along those routes, etc.</p>	7/20/2018
5103	18	/policies/walking/	<p>There should be more intersections with no turn on red signs. Especially those near parks, and schools and very busy bus stops. Too many people turn without noticing pedestrians. I would like to see enforcement of traffic laws in general focusing on driver behavior that endangers pedestrians. Speeding, running lights or stop signs, crowding into intersections when the light is green even though there isn't room to get across (downtown) leaving no crosswalk for people. Also please actually enforce parking laws such as no parking zones, not parking too close to corners or driveways or alleys which make it so hard for people to see around these parked vehicles.</p>	7/20/2018
5104	0.1	/topics/land-use-built-form/	<p>I am totally against the Interior 1 Built Form district. Allowing 3 or 4 unit buildings on a typical city lot will ruin the character of residential neighborhoods. I have lived on abbott ave south for over 30 years. The house next to us was torn down and replaced with a large mcmansion. The building took up most of the lot and eliminated the back yard. This was before new ordinances that restricted the size of new replacement homes. Newer homes since then have been better designed preserving some small amount of green space in the yard. Allowing 3 or 4 unit buildings would be dropping current design requirements and go back to full lots being consumed by buildings. The renderings shown suggest reducing the front yard setbacks to allow for larger buildings, further ruining the character of single family neighborhoods. Only single family and duplex buildings should be allowed with the current lot use restrictions enforced.</p>	7/20/2018
5105	19	/policies/bicycling/	<p>I biked in Munich 25 years ago and wished our city could have such a great bike system. We are getting there. We are still in transition. Keep studying best practices. Think about winter effects on this structure.</p>	7/20/2018
5106	73	/policies/stormwater-management/	<p>L. Also education people and businesses about the overuse of sidewalk salt</p>	7/20/2018
5107	73	/policies/stormwater-management/	<p>Public campaigns about lawn chemicals that get into waterways.</p>	7/20/2018
5108	82	/policies/aging/	<p>PEDESTRIAN SAFETY!!! Please add improvements to Pedestrian safety to this plan.</p>	7/20/2018

5110	79	/policies/healthy-youth-development/	<p>PEDESTRIAN SAFETY! How can my child who is 12 safely walk to the YWCA in Uptown without nearly being hit by a car in the process. Improve the pedestrian experience with a focus on safety.</p>	7/20/2018
5111	1	/policies/access-to-housing/	<p>Protect existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, and especially within the Northeast Minneapolis Arts District.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5112	1	/policies/access-to-housing/	<p>HOW!?</p> <p>I believe the arguments around the 2040 Housing Plan have been so polarized because the details of HOW have not been laid out for the citizens to react to. In draft 2, we should be allowed to comment on the details missing from the current draft. HOW will it work? WE NEED TO KNOW. The Planners expect the citizens of Minneapolis to weigh in on a plan without showing how these things will be accomplished! Neighbors for More Neighbors choose to review the plan through the lense that benefits their agenda of adding more people to the city. While Wedge Live is activating neighborhood interest through a series of "Don't Bulldoze Our Neighborhoods" signs. One side is looking through rose colored glasses, while the other side is preparing for the worst-case scenario. Meanwhile CMs and Heather Worthington are unable to answer basic questions about affordability, testing the plan's efficacy, property values, potential what-if scenarios, and the like. It's as if the people in charge of writing this plan got so caught up in the plan itself, that they forgot to think it through.</p>	7/20/2018
5113	3	/policies/production-and-processing/	Require City funded projects to include public art which is purchased locally	7/20/2018
5114	33	/policies/affordable-housing-production/	<p>Has the city investigated HOW it lost 15,000 homes? Did they simply disappear? Neighborhoods need revitalization. These communities need investment in the whole picture in order to fuel demand. Because when one looks at the maps, it's not hard to see that where the most money will be made by developers is in SW Minneapolis. Housing is more than placing a structure near a transit line. Please, take a bigger look at the neighborhoods that need housing the MOST and rework this plan.</p> <p>To that end: it is absolutely shameful that the people involved in drafting this plan could not speak to more affordability. My cousin, who lives in Wisconsin, would like to move her family of six to Minneapolis. She and her partner are both interviewing for jobs in social justice but with four kids, they would like a larger space. They are now looking as far out as Isanti and Lindstrom to be able to afford something. They can't afford Minneapolis now, and without a plan that includes affordability, they never will.</p> <p>It's as if the people drafting the document don't really understand the communities and what they need. The 2040 Plan does very little to address rounding out communities where proposed density is being lauded as the answer. There is more to a neighborhood than housing. Is there a market? Restaurants? Retail shops? Office space for local services like plumbers, insurance agents, a vet? I was shocked to see there wasn't more to the idea of neighborhood revitalization for the neighborhoods that need it most.</p> <p>What the plan fails to do is paint a cohesive picture especially for the most underserved neighborhoods as to how this plan is going to fix the disparities. Again: HOW?</p>	7/20/2018
5115	5	/policies/visual-quality-of-new-development/	Require City funded projects to include public art which is purchased locally	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5116	38	/policies/affordable-housing-near-transit-and-job-	<p>INFRASTRUCTURE IMPROVEMENTS</p> <p>Increasing density along transit lines is a great idea IN THEORY.</p> <p>This plan does not address how the neighborhoods will absorb and manage that increased density. Making more housing is only ONE PART of a very complicated equation. Pedestrian safety is hardly mentioned. The notion that cars will disappear is a joke! Spend some time around Lake Street and Dean Parkway and/or Market Street on a Friday afternoon, around 5 pm and tell me Uptown has absorbed the current levels of density as it is! Without significant infrastructure changes, pedestrian right-of-way safety opportunities like raised crosswalks, lighted crosswalks, etc. the city will not be able to absorb the proposed changes. And where is mention of schools? Parks (not "green spaces") Where is affordable and low-income housing? PLEASE GO BACK AND REWORK THIS PLAN to MAKE IT MORE PEOPLE FRIENDLY. Think of it from the perspective of the people who will live here, instead of the perspective of a city planner.</p> <p>If Downtown, Uptown, the Lakes, Linden Hills, etc. are also local tourism destinations, we have to factor in the amount of Minneapolis tourism we take in on a weekly basis. Basic infrastructure improvements must go hand-in-hand with this plan.</p> <p>The city has consistently dismissed pedestrian and traffic-related safety concerns related to upzoning, new development, and growing density. Even in this plan, the city "prioritizes walking first" but has only done so as it relates to development. Minimizing parking spaces for cars, and dismissing cars in general is NOT a plan! HOW will the neighborhoods absorb more people? More density? How will neighborhoods reduce increased congestion, traffic, accidents, speeding cars, and safety concerns for residents, especially those who reside near the lakes or more urban centers?</p> <p>Where is the plan to include and implement autonomous vehicles? These are "self-driving" cars. They will be here before you know it.</p>	7/20/2018
5117	80	/policies/development-near-metro-stations/	<p>INFRASTRUCTURE IMPROVEMENTS</p> <p>Increasing density along transit lines is a great idea IN THEORY.</p> <p>This plan does not address how the neighborhoods will absorb and manage that increased density. 5120	1	/policies/access-to-housing/	<p>What the plan fails to do is paint a cohesive picture especially for the most underserved neighborhoods as to how this plan is going to fix the disparities. Again: HOW?</p> <p>Many homes in Mpls were built at least 100 years ago. These houses are old, some run-down, many in need of repairs and maintenance. The costs of saving them are sometimes higher than rebuilding something new. But with each tear-down, we lose another piece of our history. How about instead of the open-ended plan that would allow developers carte balance to tear down old structures and replace with new, larger ones, We:</p> <ul style="list-style-type: none"> - Incentivize current property owners to fix up their own place? - What if we further incentivized property owners to convert their existing properties into larger, multi-family units? The more units, the more subsidies Most of what concerns me with the language of upzoning along transit lines, and along the residential interior is HOW has not been worked out. What's to keep developers from snapping up the existing starter home stock (which is already low)? - What if you froze tear down/rebuild construction until the vacant lots are filled? That would show you were serious about prioritizing housing in the areas that need it most, not just in the ares where developers can make the most money (SW). - What if you forced developers who wanted to do a build on a vacant lot, to do so within the affordable "box." (This is what IKEA does, by the way. They begin with the item and the price, then they figure out how to make it work.) In one section of the plan, you discuss cultural heritage and preservation. To say that the 2040 plan respects the heritage of our city in one area, but would allow the destruction of many 100 year old homes, seems completely at odds. In a revision, I would like to see more definitive language about preserving original structures and keeping the integrity of neighborhoods. - Show you're serious about Policies 60 and 94 by not allowing our old homes to be torn down by developers. 	7/20/2018

5128	79	/policies/healthy-youth-development/	<p>SCHEMATIC MOVEMENTS THAT CORRELATE WITH A GROWING CITY</p> <p>If Minneapolis Public Schools are funded majorly through state aid (which is comprised of a combination of sources, but mostly through state sales and income taxes*), and through property taxes, and taxable rental income of property owners ... HOW is it that the population of MPLS continues to rise (with said housing shortage) yet MPS budgets continue to get slashed? I understand MPS is a completely different entity with a different governing body and budgeting process. But big-picture: If the city is growing, how are our schools still economically in decline? This plan does nothing to address overlays to schools (an in fact "in the case of Kenwood School, proposed to use Penn Ave S. as increasing density, putting 450 school children at risk.)</p> <p>The funding for schools would seem to grow from the (growing, not shrinking) population. I find it hard to believe that with property taxes being what they are in our neighborhood (and on the rise), that our schools are suffering as they are. One would think they should be thriving as a result of tax hikes, increased revenue from income and sales taxes of so many new people! Nope. MPS continues to slash budgets city wide. It doesn't add up. Plus, it's the property owners "not the renters" who end up paying the most toward school funding. Increasing density does not round out the community "especially education" as a whole. The 2040 plan asks us to invest in our young people ... but not in our schools! This is bananas.</p> <p>FYI - Both of these questions will be on the ballot in November (potentially Raising Property Taxes for PROPERTY OWNERS, not renters)</p> <p>MPS Strong Referendum sample ballot with explanations On November 6, look for the following questions on your general election ballot.</p> <p>School District Question 1: Approval of School District Referendum Revenue Authorization The Board of Special School District No. 1 (Minneapolis Public Schools) has proposed to increase its general education revenue by \$485.00 per pupil. The proposed referendum revenue authorization would increase each year by the rate of inflation and be applicable for seven years beginning with taxes payable in 2019, unless otherwise revoked or reduced as provided by law.</p> <p>Yes/No</p> <p>Shall the increase in the revenue proposed by the board of Special School District No. 1 be approved? (goes to the right to the yes/no bubbles)</p>	7/20/2018
5129	29	/policies/creative-sector-economy/	Keep the creative sector creative! Allow creativity to thrive in those areas, by keeping them accessible, attractive and affordable. Support diversity of cultures and ages to keep this vital part of our local economy vibrant!	7/20/2018
5130	84	/policies/public-safety/	What about pedestrian safety? Have you looked at the X crosswalks in LA? More needs to be done in Minneapolis to educate drivers, and protect pedestrians, especially if this plan is to promote "walking first."	7/20/2018
5131	76	/policies/new-parks/	This is very important for equity reasons. We have a world class park system and we should make sure all have access in their neighborhoods.	7/20/2018
5132	6	/policies/pedestrian-oriented-building-and-site-de	We go into this level of detail around pedestrian focused design of buildings, while meanwhile it's hardly safe to cross the street in Uptown? Improve crosswalks!!! Improve pedestrian safety!	7/20/2018
5133	88	/policies/public-services-policy/	Good, but more trained inspectors are needed. A new fancy cafe did extensive renovations before opening which required permits. Why were they allowed to build something that made it impossible for a wheelchair to get in the front door? More than half the tables are also too tall for the young people in our community who need to use electric carts.	7/20/2018
5134	1	/policies/access-to-housing/	As a whole, 2040 Plan disenfranchises property owners and neighborhood groups from having any input on the fabric of their communities. Within this plan, there are far too many blanket policy changes that take thoughtful consideration and debate out of the approval process. Please, put the neighborhoods BACK into the process. Especially the taxpayers.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5135	88	/policies/public-services-policy/	As a whole, 2040 Plan disenfranchises property owners and neighborhood groups from having any input on the fabric of their communities. Within this plan, there are far too many blanket policy changes that take thoughtful consideration and debate out of the approval process. Please, put the neighborhoods BACK into the process.	7/20/2018
5136	3	/policies/production-and-processing/	Hello! I work in NE. Many of my friends live here and I have some friends with studios here. I hope you expand and maintain areas for production, processing, and distribution of products, services, and ideas. We need to include artistic production and services in the Policy. Please consider adding them as a protected class for production processing areas. Our artists are part of the reason that NE is becoming vibrant again. I don't want to lose what makes this area so unique. --Chris Madsen, 612-722-9982	7/20/2018
5137	5	/policies/visual-quality-of-new-development/	Hello. I hope the Policy you craft will ensure a high-quality and distinctive physical environment in all parts of the city through building and site design requirements. There's a lot of leeway in how the qualifiers 'high quality' or 'distinctive' could be interpreted. Also, there is no mention of public art at all. Please require City funded projects to include public art which is purchased locally. The State of MN used this method, in the past, to bring art to every new building. It adds to the glory of the city at a small cost and constantly reminds builders and the public that art gives back in a multitude of ways. Thank you. Chris Madsen, 612-722-9982	7/20/2018
5138	89	/policies/technology-in-the-city-enterprise/	I'm all for cameras in public places plagued repeatably by vandalism. A few of us neighbors go out to clean graffiti off public art, Murals, mailboxes and signs in our Community on a weekly basis. Gang Tagging is a concern. We also see graffiti that seems racist or incites violence. It is very destructive. We have seen dangerous graffiti obscuring freeway signs. I sincerely hope that some of these folks find outlets for their "Art" that doesn't destroy property and make our neighborhood look like it doesn't care.	7/20/2018
5139	29	/policies/creative-sector-economy/	Hello. Our artists give back a great deal to the community. Look at how our community has changed since Art-A-Whirl was founded. We were the top city in the country, two years ago for our NE Arts District! Please ensure growth and sustainability in the creative sector economy by providing arts, culture and design organizations, creative entrepreneurs, and small businesses with working, material, and physical capital resources. Acknowledge and highlight the significant contributions made by creative sector, and the capital and space needs necessary to sustain the creative economy. We need to protect our existing arts districts. Buildings get sold and artists get dislocated. Suddenly the art effect is diminished and people start to feel unvalued. If the policy doesn't acknowledge the importance of concentration and community to arts production, all of our arts organizations become at risk. Thank you, Chris Madsen, 612-722-9982	7/20/2018
5140	30	/policies/arts-and-cultural-assets/	Hello. It's not enough to promote the assets we have. We also need to protect them, with wording that encompasses our existing arts infrastructure and community as critical to the local arts it calls to protect. Without thoughtful language in the policy, developers will move in and trade the arts infrastructure for the biggest price. We've seen seniors get dumped out of low-income housing and we've seen arts buildings get revamped for condo's. Let's protect what we have, so that NE continues to shine for both the residents and the artists that work here. Thank you, Chris Madsen, 612-722-9982	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5141	0.1 /topics/land-use-built-form/	<p>We have enjoyed living in our home in southwest Minneapolis for over 26 years. We have serious concerns about the draft of the Minneapolis 2040 Comprehensive Plan. We agree that housing affordability is an important goal; however, we believe indiscriminate rezoning of our neighborhoods to allow fourplexes will not address this affordability goal. Rather, it will enrich the developers and leave us with more density that remains unaffordable to low-income residents. We believe that the goal of addressing affordable housing should be focused and cannot be solved simply through rezoning. We also think that any plan to tackle housing affordability should seek a metro-wide solution that involves our suburban counterparts.</p> <p>Regarding increased density. We understand that housing trends are putting pressure on cities to increase their density of housing stock. Having said that, the growth should be managed in such a way that our neighborhoods maintain a good quality of life. Some areas can handle increased density better than others can and great care and discernment must be employed in making these rezoning decisions. In our neighborhood, adding more density that increases congestion and limits parking will diminish our quality of life. As it is, the increased airport noise has been detrimental to our enjoyment of our neighborhood over the past couple of years. At some point, neighborhoods will hit a tipping point in which people seek out other places to live. Our Minneapolis "golden egg" of a livable city risks being broken. It would be unfortunate to see this happen and we rely on the wisdom of our elected leaders to think very carefully of the various unintended consequences that could occur under this current plan.</p> <p>We do not support increasing density on our interior streets.</p>	7/20/2018
5142	0.1 /topics/land-use-built-form/	<p>I have lived in the City of Minneapolis for 37 years, with 34 of those years in owner-occupied single family housing. Minneapolis is unique among major US cities in that it still offers this housing option within the city limits. As a Midwestern city, this makes sense, in that many of its residents migrated here from farms and small towns, and had this option not been available, they would undoubtedly have chosen to locate in the suburbs instead.</p> <p>The 2040 Plan proposal to upzone all currently zoned single family parcels to allow for multi-unit buildings, with no off-street parking requirements, will destroy the city as it now exists. The current demand for housing is not for small rental units in a fourplex with no yard or garage. Would-be homebuyers are not engaging in bidding wars to rent apartments; rather, they are looking for single family homes in neighborhoods of similar types of homes. The Plan fails to recognize this reality.</p> <p>Furthermore, the underlying assumptions that grocery stores and other retail establishments will miraculously appear every three or four blocks and residents will bike, walk or take public transit to reach those establishments are unrealistic. Given the trend toward online shopping and door-to-door delivery of goods, it seems more likely that the number of brick-and-mortar retail establishments will decline rather than expand (as has already happened in the downtown core, including, in particular, along the newly and costly "redesigned" Nicollet Mall). As for public transit service, it is mediocre at best and it is not readily available in many parts of the city. (For several years I took the bus to my office downtown, but I gave up after the schedule was cut back to only a few hours a day and after too many mornings of waiting in below-zero temperatures for a bus that never appeared.) There is no reason to expect any significant improvement on this front, other than perhaps along a few light rail corridors. Also, regardless of the effects of climate change, it is still going to be cold and snowy for 5 - 6 months out of the year, and there is little desire on the part of most residents to bike or walk through the snow for blocks and blocks with bags full of groceries. People are going to continue to drive to and from their destinations, even if it those destinations are only a few blocks away.</p> <p>The 2040 website states that the plan "does not call for the end of single family homes," but this will be the result if the plan is implemented. Most houses in my neighborhood have valuations in excess of \$500,000, but almost every block has at least one house that is in marginal condition at best. If this plan is implemented, it is only a matter of time until those properties are purchased by nonresident developers and turned into multiunit buildings, with rent or resale prices far above anything that could be reasonably be considered "affordable." Once that process begins, others on the block will sell in order to avoid being the last single family house standing in a neighborhood of multiunit rental buildings. This pattern has historically happened in other parts of the city (see Lowry Hill East and Whittier as examples) and there is no reason to believe that it will not be repeated if the zoning in neighborhoods where single family housing</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5143	0.1 /topics/land-use-built-form/		<p>"No, City Council President Lisa Bender and planning director Heather Worthington, all the residents of the 10th Ward are not fine with what is happening there. Rather, as citizens throughout Minneapolis are now experiencing, 10th Ward residents who express concern or propose modifications are labeled as NIMBYS, racists, classists or, at best, alarmists, or simply resistant to change. This justifies dismissing any questioning of city leaders -who by the way, never informed the public during their recent campaigns of their eagerness to reshape the entire city.</p> <p>At the July 11 VFW meeting, Worthington called the desire to preserve open and green spaces 'white pastoralism.' Really? Is she actually suggesting that people of color have no need for trees, grass, plants and unpolluted lakes? Or that only white people care about the environment? Or that research showing the positive effect of nature on physical and mental health is merely a reflection of white privilege?" Tamara Kaiser, Minneapolis. Letter to the STARTRIBUNE 7/20/18</p> <p>I couldn't have said it better. Ms Worthington needs to resign for her hateful speech and total disrespect for the hardworking, tax-paying middle class people who pay her salary and whom she is supposed to serve. I am one of them. Please assign someone else who really cares about all people and the environment into her position now. For an example of the environment she wants to make more dense and thus less inhabitable just try driving or biking down the very streets targeted for more density - Nicollet, Chicago, Penn, and Lyndale. These streets and neighborhoods are already packed with buildings, pavement, and businesses. People living in them are under incredible and unhealthy stress already.</p> <p>IF increased density is necessary, let's line up the mansions and huge yards around Lake Harriet first. But 2040 has no provision for affordable housing and developers will not be willing to spend the money necessary to "densify" the wealthy neighborhoods. Again, the poor and middle class will carry this burden.</p> <p>STOP IT!</p>	7/20/2018
5144	0.1 /topics/land-use-built-form/		<p>Over development around the city lakes with high rise construction will create such congestion as to destroy the amenity that makes the city unique.</p>	7/20/2018
5145	31 /policies/creative-workers/		<p>Hello.</p> <p>I work in NE for two artists. This job provides my livelihood. I also am an artist. Supporting our creative Workers makes good sense, economically. We're a very inventive group and given resources and opportunities to thrive, we can give back to our communities. It seems as though the policy fails to acknowledge the importance of the existing infrastructure and community as "resources . . . to thrive". This is a real mistake. Artists want to be a valuable part of the community. They love to give back. But if they have no resources, some of them lash out, and express themselves in less fortunate ways, like graffiti.</p> <p>I never want to see us as a "little Los Angeles." Providing Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of space forcing artists out of the City makes it easier for artists to find a space to work and live within the community. They are no longer disenfranchised. They are supported and celebrated for what they create and then NE Minneapolis becomes an even bigger draw to the outside world.</p> <p>Thank you, Chris Madsen, 612-722-9982</p>	7/20/2018
5146	38 /policies/affordable-housing-near-transit-and-job-		<p>Hello.</p> <p>Affordable housing is very important, always. What's really wonderful, is when it is mixed, having both high end and low end right next to each other, or in the same building, so that both ends of the economic spectrum see the value of the "other." It's also important that the policy recognizes the importance of production zones.</p> <p>Thank you, Chris Madsen, 612-722-9982</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5147	0.1	/topics/land-use-built-form/	Please! I live on Sheridan Avenue in Linden Hills. But don't zone it as interior 4!!! 2 should be the highest and that could reach throughout the neighborhood to increase density near the bus stops. Put a half way house here or subsidize 2 ½ story low income housing (developers will NEVER do this in this neighborhood) I'm all for it. You are instead gifting developers will destroy the character as they try to do with behemoth SINGLE family homes that we also fight in the neighborhood. We're a reliably political progressive and inclusive neighborhood but happen to be expensive. Please don't call us racist or NIMBY people. We value green spaces and character wherever they are found or can be developed. We support things we will never use in the service of diversity and fairness. This destruction of character and esthetics will serve neither affordable housing or diversity, just developers. And they have enough as it is! Please listen	7/20/2018
5148	33	/policies/affordable-housing-production/	These are all worthy goals but I don't see specifics within them that ensure their success. I have questions about where the funds will come from, I also wonder how we will be able to inspect and maintain existing and or new structures when the city inspectors already seem overwhelmed and inspections of low income rentals are far and few between. Where will the funds come from to afford both current standards that aren't being met and new construction?	7/20/2018
5149	0.1	/topics/land-use-built-form/	The corridors identified in the Plan include Sheridan and 44th. Both of these streets are narrow, normal, or customary residential streets that already carry bike lane designations and bus routes. In fact, Sheridan is so narrow that it prohibits parking on one side of the street from William Berry Parkway to 44th to accommodate the current traffic. Down 44th, while there is parking on both sides, it is a narrow, normal-width residential street; in the winter, at times, the street is down to a lane or lane and a half, at best. Notwithstanding, the 2040 Plan treats these streets the same as Hennepin Avenue, Lyndale Avenue, France Avenue, and 50th Street. All of these are four-lane and/or adapted two-lane roads that are wide and sweeping boulevards that can better accommodate the 2040 Plan. Sheridan and 44th are not physically capable of supporting four (or more) story buildings. And their accompanying "Interior 3" designated areas also cannot support 3 story buildings. These blocks (which are on the adjacent parcels to the commercial corridors) are made up primarily of single family homes which will negatively impact the supply housing stock for families in the community. These blocks simply do not have the capacity to properly handle the additional traffic, parking, and other demands that would be created as those are developed, much less the overflow of traffic and parking from the structurally insufficient commercial corridors.	7/20/2018
5150	50	/policies/access-to-technology/	Affordable internet access for those of us who can not afford \$50.00 a month would be a great step!	7/20/2018
5151	30	/policies/arts-and-cultural-assets/	I am so glad that you have identified these goals that support the creative and innovative spirits of our diverse citizenry. These values are so important to acknowledge because they make our growing multicultural city rich and engaging. They give all of us inspiration and joy!	7/20/2018
5152	1	/policies/access-to-housing/	The broad brush rezoning doesn't feel like city planning, rather it seems to be a total relegation of responsibility which will lead to city pandemonium, with the primary winners being the developers and the losers being current residents. Ironically, the rezoning will actually be counterproductive to the stated goal as the current stock of affordable housing will be redeveloped into apartments which will not be any more affordable. Additionally, the lack of any parking requirements will create significant issues at the present time. There may come a day when ride sharing takes a bigger share of commuting, but at present time this is not a feasible alternative. The current state of this country is that we are a car society, and likely will be for the foreseeable future - This needs to be recognized in city planning.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5162	84	/policies/public-safety/	<p>While gardening in a public place, I've run into a young woman who I believe needs help. She said that she was an alcoholic, then that she really wasn't, but drank because of the way she had been treated by men. She seemed on the verge of doing something to further put herself at risk. We talked for a few minutes and I asked her to Please take care of herself. She hugged me and went away. I've seen her twice there. I think she lacks confidence to take control of her life. One Day At A Time. In any case, I wish I had a card to give her with a number to call for free counseling. I'm not sure what her problems are, but I recall there used to be one number for all kinds of counselling and referrals. Re-instate that and make it better.</p> <p>We also have a problem with people taking a shortcut across BNSF tracks that diagonally dissect our neighborhood. Two people have died crossing in the wrong place, even though there is a good safety at-grade crossing just a half block away. Mary was a young mother walking her dog and thought she was being careful. She waited for a train to pass, but didn't see the one coming from the other direction. Jordan was looking forward to beginning classes at the U of MN. Neighbors saw the railroad cleaning up his remains. His housemates were devastated and I brought them muffins. His former teammates thought a fence to prevent another tragedy would be a good memorial. Our neighborhood association has asked the city to erect a fence on each side to keep people from crossing there. I've seen a woman with a toddler crossing there, people walking dogs, and young people running back and forth across while laughing and throwing a cooler and it's contents across. Furniture has been dumped there. A railroad crossing sign was added, but it is only on one side and cannot be read unless you are already crossing.</p>	7/20/2018

5175	41	/policies/tenant-protections/	<p>Minneapolis Public Housing Authority (MPHA) agrees that improving tenant protections is a key to improving living conditions in rental housing and ensuring renters have choice in their housing decisions. Action step e specifically calls out a collaboration with MPHA and the Section 8 Housing Choice Voucher Program. This ordinance is a city-led initiative and supported by action steps taken by the city.</p> <p>Recommendation: In action step e, remove "Minneapolis Public Housing Authority" and replace with "property owners and housing providers."</p>	7/20/2018
5176	20	/policies/transit/	<p>I don't drive or bike. I take the bus or walk. When we bought our home one of my requirements was that it be within a couple blocks of the 6 bus line which at that time ran from Roseville through Dinkytown, the University of Minnesota, Downtown, Uptown, and all the way to Southdale without a transfer. Busses continued to the two end malls till the stores closed. Metro Transit changed the routes. If I want to go to Rosedale I have to transfer, but the transfer location changes for different times of day and is at a freeway ramp with little foot traffic. I wouldn't transfer there at night, but there is no evening bus service there, so if I want to go there I need to take a cab home. My Mom used to get up at 4:00 am to catch her bus to work in Saint Paul. I understand wanting to give drivers a break by stringing shorter routes, but could we have longer routes and switch off drivers? How about a bus service from Downtown to the Minnesota Zoo twice a day on weekends?</p>	7/20/2018
5177	1	/policies/access-to-housing/	<p>YES. We must end exclusionary zoning! Unnecessary regulations on the number of neighbors in a particular area have resulted in increased prices and have negatively impacted low income and people of color. We must allow up to 4 units on every residential parcel through the city. There must NOT be any exception to this - especially in our wealthiest neighborhoods that have shut people out for decades.</p>	7/20/2018
5178	43	/policies/housing-displacement/	<p>The number one way to reduce displacement is to allow enough housing to be built. We must allow more housing by right in every neighborhood and on every parcel.</p>	7/20/2018
5179	11	/policies/skyways/	<p>Sounds good. Please add maps that include businesses every time a skyway crosses a street. Make the street level sidewalks more attractive by adding plants, modified rain gardens to take the runoff from all that concrete.</p>	7/20/2018
5180	35	/policies/innovative-housing-types/	<p>Social housing. The city should issue bonds and build cheap good housing all over the city. Stop waiting for private developers to lead!</p>	7/20/2018
5181	36	/policies/innovative-housing-strategies/	<p>Guarantee tenant right to counsel in landlord disputes. Team with Mid Minnesota Legal Aid.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5182	26	/policies/vision-zero/	I highly approve of all of the goals listed here for Vision Zero. This is long overdue, as pedestrians and cyclists are menaced on a daily basis by scofflaw car drivers. Our city is far less safe than it should be, and it's all because of reckless drivers. I strongly approve of the enforcement aspect of this policy, though all of its goals are laudable.	7/20/2018
5183	0.1	/topics/land-use-built-form/	<p>WE have lived in Minneapolis since 1962 and purchased 2 homes in southwest. We purposely purchased homes in zoning areas where there would not be multi family dwellings or commercial areas next door to us. If we had purchased homes next to these areas, we would not be surprised by development in such areas as the Bryant/50th Street intersection that is a block from us. We have had long existing transportation hubs in our neighborhood and it appears to me that this is where multi-family housing should be built. This encourages more families to live here but preserves the well built and some would argue as we have important Elmslie homes here for example, historic housing stock that we continue to put thousands of dollars of preservation and restoration. Just this year we have put at least \$20,000 in brick and chimney restoration and plan on putting another \$20,000 in kitchen renovation. The Metropolitan Airport Commission invested \$20,000 into this house this year and by the constant sightings of their construction crews in this area have invested in many homes in this area. I know 3 other homes in this block alone.</p> <p>I am concerned about single family homes being converted to multi family homes. I have a friend renovating a 1880 built home in North Chicago. The neighborhood was re-zoned for multi family and the house historic elements were ripped out and the house fell in dis-repair. They have spent years restoring this home to bring it back to its' original state. So we want our neighborhoods to fall into dis-repair this way and most of the time not be in good enough shape to repair?</p> <p>I am not against multi-family dwellings in this area, but I think we have plenty of options in existing commercial areas so that we do not have to threaten 1/2 blocks into established single family dwellings in our city and have a blanket re-zoning of every single family home in the city. I am not talking about just South and Southwest either. I happened to be up in Northeast and noticed signs against 2040 as well. People are proud of their neighborhoods and I presume everyone in a single family home does not want to be threatened no matter where they live in the city.</p> <p>I am concerned that we do not have any estimates of how many people we need to accommodate in the next 50-100 years. This plan does not address that we have an entire development area right across the Ford bridge in St. Paul where there will be a very large opportunity for people to live and very close to the Hiawatha train line.</p> <p>That also brings up my concern that transportation has not been addressed. I know that we want to plan for fewer cars, but transportation especially in the outer rings of the city are not dependable. The argument that 20% of the population will be able to rides bikes is not plausible when either the cold, snow and extreme heat leave this option off the table. When I had jury duty last fall, it was suggested I take the train to downtown. It seemed absurd that I should drive nearly 10 miles to get to the train to go downtown and then drive 10 miles back. The bus was not an option as I needed to be on call and had less than an hour to get to the court house.</p> <p>I would like the city to slow down and give the residents more time to discuss this. I feel that most people are not aware of this plan and only recently have heard about this through Next Door in the past couple of weeks and the plan was just discussed in the Southwest Journal in the last edition, one week before feedback deadline.</p>	7/20/2018
5184	0.1	/topics/land-use-built-form/	Franklin Avenue in Lowry Hill is not a high frequency route! Blanket rezoning of the corridor to 4 stories -- on a street that is now largely single family houses would be a mistake.	7/20/2018
5185	0.1	/topics/land-use-built-form/	I think the wholesale zoning of areas in single family neighborhoods to Interior 3 and Corridor 4 is a bad idea and a blank check for developers to build high cost housing. I would like to see more oversight of development, not less. I would much prefer to see a more thoughtful approach to increase density. When projects are approved on a case by case basis, that enables the City to ensure that the building includes affordable housing and amenities like bicycle parking. Under Action steps for Affordable Housing, I would like to see the City include requirements for affordable housing in large housing developments. Making Minneapolis a more livable city for everyone is a laudable goal. But it is important not to lose the qualities that make Minneapolis desirable now.	7/20/2018
5186	1	/policies/access-to-housing/	To me developers are winning here, not the people!	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5187	0.1	/topics/land-use-built-form/	<p>As a homeowner in Minneapolis near the 50th & France area, I have particular concern with proposed mixed-use development and including siting multi-family (duplex, 3-, 4-plex units) on site currently occupied by single family homes. While I am, in general, in support of denser urban development and a focus on alternative transportation from an environmental perspective, I would argue that it is not a good fit for proposed area near 50th & France:</p> <ol style="list-style-type: none"> 1. Street parking is already limited. Denser development would create further scarcity. Increased traffic and streets lined with parked cars increases the safety risk to children who are often less visible to drivers. The Fulton neighborhood has a high concentration of families with young children 2. Cars are a necessity in this area, unfortunately. Many individuals in this area have to commute to downtown or the western suburbs. There simply is not even alternative transportation options to meet that need and for many, pedestrian options are out of the question due to distances. A comprehensive transportation plan with light rail and express buses would be necessary for this to begin to make sense. I would also note that direct bus routes along France Ave to the University of Minnesota have been eliminated thereby complicating this. <p>Given the need for transportation to offset the impact of densification of the community, it would seem to make more sense to begin in the downtown core and expand outward. Attempting to do this in the outskirts is problematic since many individuals living in these communities have to commute to their places of employment.</p>	7/20/2018
5188	9	/policies/open-spaces-in-new-development/	<p>Brian Crotteau 20 Jul 2018: I like the idea of plazas and open spaces on what could be very housing-dense streets under the new plan. But open space and plazas should not be confused with green space. We also need real green space with native plants and habitat for wildlife, for water runoff/ quality and space that allows for trees.</p>	7/20/2018
5189	4	/policies/access-to-commercial-goods-and-service	<p>b and e should also contemplate preservation and expansion of light commercial uses in neighborhoods at nodal points in order to advance the goal of complete neighborhoods.</p>	7/20/2018
5190	17	/policies/complete-streets/	<p>It's time to look forward toward a future that isn't hamstrung by land use choices designed around our mid 19th century love affair with the private automobile. Nostalgia for car dependency culture is a luxury we can no longer afford.</p>	7/20/2018
5191	5	/policies/visual-quality-of-new-development/	<p>Brian Crotteau 20 Jul 2018: We support the text describing the visual quality of new buildings, but many of the setbacks are not enough to ensure some green space and room for trees.</p>	7/20/2018
5192	25	/policies/innovations-in-transportation-and-infras	<p>In Addition, visual quality should talk about green building practices, such as green exteriors, green rooftops, solar, etc.</p> <p>(a) should read "proactively regulate all private automobiles"</p>	7/20/2018
5193	15	/policies/transportation-and-equity/	<p>The intent of the Policy is good, but it isn't clear that the action steps will have any effect. There should be a mention of the fact that freeways like I35 and I94 destroyed neighborhoods and continue to result in barriers, pollution, and concentrations of poverty. Also, the way resources have been disproportionately put towards making it easy to own and store private vehicles in Minneapolis seems inequitable. There is little investment in making it easy to walk, bike and take transit. The text needs a lot of work.</p>	7/20/2018
5194	7	/policies/public-realm/	<p>Brian Crotteau 20 Jul 2018: The current draft plan does not do enough to ensure no net loss (we need a net gain) of green space, not just more concrete. The city needs space for trees, gardens, natural areas and especially natural areas in and around new and existing parks. We need more native habitat with native plants to support a sustainable ecosystem.</p>	7/20/2018
5195	4	/policies/access-to-commercial-goods-and-service	<p>To promote the city's goal of complete neighborhoods, every land-use decision must be assessed through a lens of whether it promotes higher-priority transportation modes. Does a land-use decision promote using a bus, train, car sharing/rental, or walkable proximity vs. does it promote owning a private automobile? Decisions that promote private automobile ownership should be pursued if there is no alternative that does a superior job of promoting the former.</p>	7/20/2018
5196	14	/policies/tree-canopy-and-urban-forest/	<p>Brian Crotteau 20 Jul 2018: While I applaud the 2040 plan to increase the canopy, the current build form map would do the opposite by turning single family home streets with trees and yards into Interior 3 and Corridor 4. 3 and 4 allow 4 stories (or more because the city always grants height and footprint variances) and footprint to the edge of the lots, which will eliminate green space, trees, gardens and space for water to seep into the ground.</p>	7/20/2018
5197	16	/policies/environmental-impacts-of-transportation	<p>I would love to see incentives and encouragement of single car households for families. This would mean that public transportation would be safe, timely, and widespread</p>	7/20/2018
5198	20	/policies/transit/	<p>Brian Crotteau 20 Jul 2018: I support the general direction of the transit section but we need more investment in light rail and electric trolley corridors, not just more bus routes.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5199	51	/policies/healthy-pre-k-development/	Emphasis should be placed on targeted home nursing visits to assist young parents with learning to foster the health and education of the youngest minority children. Somehow these families must develop a culture that values and promotes learning at all levels. I doubt that City initiatives will be to any effect, and I would support the City encouraging voluntary community initiatives.	7/20/2018
5200	17	/policies/complete-streets/	I think the complete streets policy needs to be implemented as strenuously as possible- accommodating healthier, more environmentally conscious modes of transit-even at the expense of drivability in the city	7/20/2018
5201	19	/policies/bicycling/	As a biker, I find physical barriers for bike lanes are more effective and feel safer than paint. For example, Blaisdell has plastic posts marking its bike lane- I vastly prefer taking blaisdell in my commute instead of Bryant where there is paint and signage	7/20/2018
5202	67	/policies/climate-resilient-communities/	Brian Crotteau 20 Jul 2018: Many of the renderings and illustrations of interior 3, corridor 4, 5, etc. show enormous new apartment building taking up multiple lots, right to the edge of the lots and I see no requirements for green building codes, such as green rooftops, rooftop gardens, green space requirements. The current 2040 plan takes away too many trees, eliminates space for runoff and eliminates green space.	7/20/2018
5203	16	/policies/environmental-impacts-of-transportation/	The intent of this Policy is good, but the action steps are very weak and likely will make no impact. It is currently very easy to drive a car in Minneapolis because we have freeways, highways, and wide streets that make it the fastest and most desirable option. We also have free parking on most of our streets, or at least plenty of paid parking choices in the most dense areas. To make it inconvenient to drive, the alternatives like walking, biking, and transit need to be a lot better, and it needs to get more expensive and inconvenient to drive everywhere. Why does the City even own and operate giant parking ramps? Tear them down or sell them to private owners who will need to pay property taxes. Dismantle Hiawatha Avenue as a divided highway making the area actually pleasant to walk, bike and take transit. Cover the freeways or begin planning to phase them out. Put some money into making bus stops comfortable, widen sidewalks, slow car traffic.	7/20/2018
5204	20	/policies/transit/	I want four more (at least) light rail/train corridors- two more running north/south connecting Minneapolis to Richfield, Bloomington, Edina, Columbia heights, Brooklyn Park and Brooklyn center and two more running east west between Saint Paul and Minneapolis	7/20/2018
5205	47	/policies/housing-maintenance/	The plan's promotion of "upzoning" huge area of the residential city is directly opposed to this goal. Homeowners and landlords facing substantial expenditures to maintain their existing buildings will instead sell to the newly empowered developers of "denser" housing. The result will be less owned-occupied housing.	7/20/2018
5206	60	/policies/intrinsic-value-of-properties/	These are excellent actions steps to help with heritage preservation. But won't they conflict with plans to allow 6 story buildings on combined lots on major transit corridors, and to allow 4 story buildings on combined lots on the next level corridors? Exclude some transit corridor blocks from intensive development, using heritage preservation values as part of the criteria.	7/20/2018
5207	0.1	/topics/land-use-built-form/	20 Jul 2018 Brian Crotteau: Too many artificially made so-called corridors go way too far in creating Corridor 4 and Interior 3 zones which eliminate too many single family homes. Corridor 4 and Interior 3 should be scaled back and limited to blighted areas and areas that need re-development. Instead of spreading out upzoning across the entire city, we would like to see redevelopment happen in and around business clusters or little mini-main streets, first served by transit. Do not take out historic, well kept single family homes and duplexes in already thriving neighborhoods and instead focus on making parts of the city that need help into nice places that people want to live and work. Areas that could use focused upzoning could include Lyndale/ Diamond Lake Rd. zone, all along Lake Street, Franklin Avenue west of Hennepin, all along Broadway up through North, Northeast along both University and Central.	7/20/2018
5208	26	/policies/vision-zero/	The Pedestrian Crash Study was released about 9 months ago and there has been almost no effort to make improvements at the most dangerous intersections. Most of them are owned by Hennepin County, which shouldn't be an excuse. Public Works continues to be oriented towards moving and storing cars first, with making safe and comfortable places to walk as the lowest priority. The jargon described in this Policy is unlikely to change that fact.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			<p>Unethical approach to community involvement</p> <p>Despite living in Minneapolis since before the “2040” planning process began in 2016, my family and most of our community was unaware of the Minneapolis 2040 plan. We never hear anything on the news, print publications, or even a direct mailing. At a minimum each effected resident should have received a mailing about the proposed changes and also the opportunities to guide this plant. That did not happen. This appears to be the city pulling a “fast one” under the radar.</p> <p>Unethical and possibly Illegal rezoning of private property Property owners should have the right to vote if they want their whole city re-zoned. I consider the MPLS2040 approach unethical and possible Illegal. In Seattle the residents ended up suing the city to stop a comparable plan, and I would fully support that action here both with involvement and also resources. This would be a great case for a competent firm to take on “ They”ll get great PR if they squash this planned failure that is Minneapolis 2040.</p> <p>Complete disregard for property values Last night at the 10th ward meeting the response to concerns over property values was essentially “too bad we need to right the wrongs of the past.” This is unethical and un-American. If you spend your time focused in the rear-view mirror you will never accomplish anything. Additionally, property ownership has been a cornerstone in building the foundation of financial stability since July 4th 1776. What a terrible message for the city to send: we don’t care how our policy will affect your property values. You will push large taxpayers out of the city.</p> <p>Unintended Consequences Developers will not buy mansions and redevelop them in du/quad-plexes. Ironically, they will buy the city’s most affordable houses to do that. All real world examples of up-zoning quantitatively and imperially prove that increasing density this way drives prices up. This has FAILED in Seattle, Portland, Fresno, and San-Francisco. Last evening in response to these facts, the response basically was “we know it’s only ever failed but well figure it out.” This seems incredibly reckless and I personally have no confidence in the city to “figure it out on the fly.” Furthermore, you will erode your tax base as you erode property values and will either need to curb spending or spread the difference out over everyone else including those you are trying to help.</p> <p>This will end political careers Minneapolis has been “working” as evidenced by the strong demand growth over the past decade. I cannot fathom the logic behind trying to change almost all the existing framework that has allowed this city to thrive! Make no mistake about it: if this plan is brought to</p>	7/20/2018
5209	1	/policies/access-to-housing/		
5210	94	/policies/heritage-preservation-regulation/	These seem like extremely important steps. I'm surprised these items aren't already in place.	7/20/2018
5211	27	/policies/transportation-partnerships/	The partnerships with MNDOT and Hennepin County described in this Policy have resulted in freeways, highways, and streets that are designed solely to move cars efficiently. They are awful places for walkers, bikers, and transit users. Stop accepting funding to make our City awful for people who don't drive.	7/20/2018
5212	50	/policies/access-to-technology/	The language used to discuss Policy 50, technology access in Minneapolis, needs to be more specific. In particular, action step B has the potential to truly increase access. However, I would recommend including plans that would require all multi-dwelling housing units to be equipped with more than one connection for internet providers. In addition, a program should be created to encourage multi-dwelling unit owners to NOT sign the non-compete clauses often required when selecting an internet provider for the complex. Both of these suggestions help remove barriers to private development of city infrastructure. This also can increase competition and hopefully decrease internet prices.	7/20/2018
5213	41	/policies/tenant-protections/	The action steps should include instruction of tenants in their obligations as well as their rights. Too many landlords decline to participate in Section 8 programs because their experience with tenants leads them to fear destruction of their rental property through misuse and ignorance of basic codes of behavior. If Section 8 tenants are satisfactory tenants, landlord participation will increase.	7/20/2018
5214	12	/policies/lighting/	In the past, pedestrian scale lighting on important shared trails has been denied because it was tied to property assessments. Such was the case for the recently completed 26th Avenue North and later the 18th Avenue NE shared bike bed path that stretches from Theodore Wirth to the Diagonal Trail. In applying this policy, consideration should be given retroactively to projects denied previously by property tax assessments.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5215	80	/policies/development-near-metro-stations/	The development of real property uses around the Metro stations is likely to be most successful if left to private citizens responding to the opportunities. The less the intervention of City government in this process, the better. Central planning does not have a good record anywhere in the world. Why imagine that Minneapolis will be different?	7/20/2018
5216	12	/policies/lighting/	Highly are with applying PSL to neighborhood business nodes to encourage walking and business development.	7/20/2018
5217	83	/policies/people-with-disabilities/	The Public Works Department has done a poor job identifying accessibility barriers and implementing projects to address them. The existing ADA Transition Plan was never reviewed or approved by the City Council, and the document does the bare minimum. It focuses on replacing pedestrian ramps, but continues at a slow pace to accomplish it over decades. It doesn't mention sidewalk gaps, sidewalks with barriers (i.e. poles, trees, etc.), sidewalk gaps, snow & ice clearance. narrow sidewalks, or inaccessible bus stops. Public Works is only now creating a new ADA Transition Plan, and based on past experience, I expect it to have little impact.	7/20/2018
5218	0.1	/topics/land-use-built-form/	The Corridor 6 area located in and around 4700 OSSEO RD is currently the Victory Dog Park and wildflower area. I object to the proposal to turn this area into staging/production for the Ryan Lake housing build. Please indicate if there is a proposal to create a replacement dog park. This is an incredibly important feature of this northside neighborhood.	7/20/2018
5219	62	/policies/contaminated-sites/	https://www.wakefieldbiochar.com/ways-to-use-biochar/ The above link includes a YouTube video about how they're using Biochar in St. Louis for soil remediation. Recommend biochar be investigated as a carbon sequestration/natural way for remediation purposes when considered effective both in efficacy and cost.	7/20/2018
5220	0.1	/topics/land-use-built-form/	I am a resident of Minneapolis at 3131 Excelsior Blvd. I realize I have chosen to live in a high density, urban neighborhood, but increasing the density seems counterproductive to me, and to your high ideals for development for the City of Minneapolis. I applaud those high ideals, but increasing urban density does not seem a way to add quality of life. I understand that you hope to encourage people living in the city to abandon their personal automobiles and substitute public transportation for getting around. Perhaps the younger generations will move in this direction eventually, but I still think Americans are married to their cars and will not give them up. Allowing high density building to be created without corresponding parking options creates a nightmare of traffic. Allowing high density building to be created shrinks our open, green spaces, for which Minneapolis has become so well-known and well-regarded. Allowing high density building to be created may devalue some of our properties, if we no longer have views, or parking options, or parking options for friends to visit us, or green spaces nearby in which to play and exercise. Idealism may be the starting point for change, but it must give way to practical considerations, if you truly want us who live in Minneapolis to have healthy and happy lives here. Bravo to inclusion and affordable housing, though I see zero evidence of that being available to anyone right now in Minneapolis (friends, and adult children of friends, are unable to purchase housing in desired neighborhoods due to impossible costs of housing.) Something is amiss with your ideals about that aspect of the plan. However, my main concern is your dedication to urban density. If I want to live in the Loop in Chicago, or in Manhattan, I'll move there. I don't want that. I want parks and lakes and space to move around and breathe, and not look into the windows of the 30-story monstrosity next door. Doubtless, you don't care about what I, or anyone else in Minneapolis wants. I'm beginning to think you want what I read in the Strib, quoting someone who said the Minneapolis City Council just wants to beat Portland, Oregon, as the best city in the country for bicycles. M.J. Mercer	7/20/2018
5221	19	/policies/bicycling/	More emphasis should be placed upon having safe and easily available parking at businesses, shopping and recreation areas. The parking should be near entrances and use locations similar to handicap parking where it encourages both visitors and employees to bicycle. Racks such as old school yard racks prevalent in parks and shopping areas is inadequate and should be updated.	7/20/2018
5222	33	/policies/affordable-housing-production/	Density is good for homeowners and the community. It allows people (like me) to buy small units (450 sf) at a younger age and have a stable month to month living situation (financially). The brownstones of Whitter are beautiful and add so much to the aesthetic of the skyline. It reminds me that we are in a vibrant city full of people (who want the city to be better) and those neighborhoods are more closely tied together. Despite what some in the suburbs and less dense metro areas may publicly state, communities are stronger when they are dense -- more resources, more manpower, more opportunities for friendships and new activities.	7/20/2018
5223	36	/policies/innovative-housing-strategies/	Split up for sale homes into multi-housing units. I've seen plenty of homes in Uptown/Whittier that look exactly like "single-family" homes which are actually 3-5 apartments. There are plenty of people that would like to fill those homes, and local landlords will have guaranteed tenants and income. Win win	7/20/2018
5224	1	/policies/access-to-housing/	I strongly support increased housing density throughout Minneapolis. I am a home owner in Seward. It is very important to me that there be enough housing in the city for everyone. There isn't currently, and increased density can help with this. I also highly value quality public transportation and vibrant street life, and I know increased density helps with this. I support the plan to allow zoning for fourplexes in all parts of the city.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5225	0.1	/topics/land-use-built-form/	Preserve the Kenilworth corridor for public park space as promised! The 2014 MOU b/t Met Council and the City of Mpls "The council intends that any property located in the Kenilworth Corridor that it may acquire from the Hennepin County Regional Rail Authority that it will not actively use for either the (SWLRT) Project or freight rail shall be conveyed to the Minneapolis Park and Recreation Board for use as parkland upon terms and conditions that are agreeable to both the Council and the Park Board." Follow through on this commitment and do NOT allow building construction in this space.	7/20/2018
5226	16	/policies/environmental-impacts-of-transportation/	<p>More express buses to get around the city (like they have from the uptown area to the U). More heat shelters around the bus areas, I don't take the bus in the winter simply because I don't like to stand in the freezing weather for 15 minutes (especially since bus times can be unreliable in the winter time).</p> <p>Light rail is great for bringing people from the suburbs into the city for work (even though they should go a bit faster). But if you want to have people use public transportation it needs to be fast and RELIABLE on time. I loved taking the light rail to work in the winter since I lived only 10 minutes from the stop. I could show up a few minutes before the train came and I would never miss it (no waiting around in the cold wondering if it'll ever come). But for city dwellers, why aren't we building a subway, sure it would take 5 years or so to build it but then it's done. No taking up car space, can go faster, and can stop in more places in the city for the locals</p>	7/20/2018
5227	1	/policies/access-to-housing/	I agree with these action steps, but I think there need to be specific mechanisms to ensure that new housing (such as fourplexes in "non-impacted" neighborhoods) has income restrictions, to be available to people earning 30-50 MMI. And there need to be protections in place to prevent absentee developers/landlords from tearing down existing housing and/or building cheap new housing just to make a profit. I also would like to see more specific efforts to add housing density and affordability in neighborhoods that currently have very little, such as Southwest Minneapolis.	7/20/2018
5228	14	/policies/tree-canopy-and-urban-forest/	Please evaluate why the trees are dying and create preventative plans based off it. Within the last 18 mos I've been at my house, 3/4 of our trees were cut down.. and a couple just grew into large bushes from the stumps, which blocks the sidewalk and creates no shade.	7/20/2018
5229	0.1	/topics/land-use-built-form/	I am not in favor of allowing unlimited amounts of fourplexes in so many (all, really) neighborhoods. This is a radical change with foreseeable negative effects. It is top-down and a heavy-handed, one-size-fits-all proposal that should NOT be enacted.	7/20/2018
5230	75	/policies/waste-reduction/	Before getting everyone on the compost train, what about recycling plastic bags at home. I don't care to save my plastic bags in my very small apartment to take them to the businesses in the suburbs (a whole weekend event).	7/20/2018
5231	33	/policies/affordable-housing-production/	Yes! But forget about targeting 80% MMI. I think all new city affordable housing resources should be devoted to people/families earning 30-50% MMI, with a majority benefiting the lowest income levels.	7/20/2018
5232	34	/policies/affordable-housing-preservation/	I would like to see the Affordable Housing Trust Fund increased to \$20 million/year, and to find a designated source of income for it.	7/20/2018
5233	73	/policies/stormwater-management/	<p>From https://www.theurbanist.org/2015/10/21/will-soil-save-cities-from-climate-change/</p> <p>Philadelphia received accolades for its green stormwater management plan that saved the city the expense of adding storm sewer capacity by greening the riverfront to reduce demand. Other cities are following Philadelphia's lead and restorative land management could amplify those efforts by capturing more carbon and make the soil even more absorbent and healthy.</p> <p>The virtuous cycle green management techniques foster isn't well documented, but Philadelphia has found many perks: "The widespread implementation of green stormwater infrastructure also promises what city officials like to tout as a "triple win" for Philadelphia: a cleaner environment; cost-effective stormwater solutions that provide jobs for local people; and a social fabric reinforced by better neighborhood parks and public spaces. Another benefit is that unlike pipes known only by engineers, many elements of green infrastructure can be seen and tended by the entire community." This is also what restorative agriculture looks like in an urban setting.</p>	7/20/2018
5234	37	/policies/mixed-income-housing/	I agree, but I would not like to see City resources being used to support higher income (60-80% MMI) housing. Mixed income housing is fine, but in neighborhoods such as southwest Minneapolis, the focus should be on filling in the gap, producing housing for households at 30-50% MMI. In effect that would help produce mixed income neighborhoods.	7/20/2018
5235	38	/policies/affordable-housing-near-transit-and-job/	Definitely yes, but this needs to be done in a way that does NOT gentrify those (and adjacent) neighborhoods.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5236	28	/policies/msp-airport/	<p>Stop being so supportive of the growth of MSP. More flights does not make the City a better place. It makes it noisier and more stressful and a less desirable place to live.</p> <p>In 2012 the FAA predicted there would be a 90% increase in air traffic in the next 20 years. Minneapolis residents should not be asked to endure that volume of noise and disruption.</p> <p>The City should be working with MSP to limit flights between 6am and 10pm. Air traffic noise begins at 5am and does not start to taper off until 10:30 or 11pm. This is unacceptable!</p> <p>Studies show that even when sleeping, the sympathetic nervous system reacts to noise “ plane, train, traffic ” by elevating heart rates, blood pressure and respiration. If the City is worried about residents’ health, then airport noise needs to be addressed.</p> <p>A study out of the EU shows that children attending elementary schools near major airports showed that noise had a significant impact on reading comprehension, memory, and hyperactivity. For every 5 decibels of increase in noise, reading scores dropped the equivalent of a two-month delay!!</p> <p>National Park Service noise maps show Minneapolis as one of the loudest cities in the USA at 53-54 decibels. Beside impacting humans, it also negatively impacts wildlife. By raising the ambient sound in the city, including parks, by a mere 5 decibels it reduces the distance at which prey species can hear predators approaching by 45% which is quite literally a matter of life and death. Noise also impacts the effectiveness of mating calls for frogs and birds as it can take them longer to hear and find a potential mate.</p> <p>It's time to look at regional solution to airport noise, including the construction or expansion of an airport north of the cities.</p>	7/20/2018
5237	6	/policies/pedestrian-oriented-building-and-site-de	<p>h. - need to think about snow storage!</p> <p>k. I strongly disagree with this statement. the elimination of off street parking minimums should based on formula that takes into account different levels of transit availability, and demographics of the nbrhd.</p>	7/20/2018
5238	33	/policies/affordable-housing-production/	<p>This is a very important goal, and one that must be met.</p>	7/20/2018
5239	0.1	/topics/land-use-built-form/	<p>I think the general aim of this policy is excellent and look forward to seeing more specifics on how 2040 will desegregate my neighborhood</p>	7/20/2018
5240	8	/policies/public-safety-through-environmental-de	<p>Please call out Dark Sky lighting!! The City should be providing education to developers and contractors about lighting, working with hardware stores and big box stores to stock Dark Sky lighting fixtures, and helping residents navigate this neighbors who insist on intense security lighting.</p>	7/20/2018
5241	37	/policies/mixed-income-housing/	<p>We must especially work to locate new affordable, dense housing in the wealthiest areas as development by right. For example, the small proposal on Hennepin Ave near Franklin Ave - this infill development of supportive housing should have been allowed by right. All sorts of people deserve to live in all of our neighborhoods.</p>	7/20/2018
5242	1	/policies/access-to-housing/	<p>Part e is an essential step that must be taken. As a resident of SouthEast Como who is seeing my rent increase, I strongly wish for 3 and 4-plexes to be allowed in my neighborhood.</p>	7/20/2018
5243	1	/policies/access-to-housing/	<p>Four plexes allowed everywhere by right is a fantastic example of incremental increases in options for new neighbors throughout our city. We must allow more homes - attached homes - to be built on EVERY parcel in Minneapolis. It is the only way to ensure as many neighborhoods remain accessible to as many people as possible.</p>	7/20/2018
5244	12	/policies/lighting/	<p>Commit to replacing all street lights with fixtures that meet dark sky standards, AND do not increase the glare or light bounce by increasing light wattage.</p> <p>I volunteer the 35th Ave S between 51st & 52nd streets, and the alley between 35th & 34th to be a pilot project to show the before and after.</p>	7/20/2018
5245	35	/policies/innovative-housing-types/	<p>Enabling the use of tiny homes within the city or creating a tiny home community would be really beneficial in creating affordable housing. Having one-level housing would also be extremely beneficial for our aging population, as falls within the home are one of the main concerns for elderly homeowners.</p>	7/20/2018
5246	13	/policies/landscaping/	<p>Call out that it needs to be well maintained landscaping! Need to also think about how the built environment & its treatment impacts the plants (hard surface, lighting, and salt)</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5247	14	/policies/tree-canopy-and-urban-forest/	<p>Share this article with business districts that are resisting trees - - https://dirt.asla.org/2018/07/10/interview-with-robert-gibbs-trees-cause-you-to-spend-more/</p> <p>What about incentivizing property owners to keep their boulevard trees alive? If mature tree preservation is important, what about a tax reduction for those of us who pay to inoculate our elm trees?</p> <p>Need an alert system for homeowners within a six block radius of an elm tree found with DED. Give those homeowners the opportunity to protect their trees.</p> <p>Need forestry to do more specific to oak species - they should be looking for and condemning oak trees with oak wilt and oak blight on private property in order to protect the rest of the canopy. N need to expand their powers beyond EAB & DED.</p> <p>\$100 per tax payer is not persuasive number. need to provide the grand total to show what a big deal trees are.</p>	7/20/2018
5248	0.1	/topics/land-use-built-form/	<p>While I agree with the 14 goals of the draft 2040 Comprehensive Plan (small business support, environment, reducing disparities, etc.), rezoning the entire city is extreme, unnecessary and even could be at cross purposes to the goals of the plan.</p> <p>Blanket upzoning is unnecessary. The city was able to absorb 40,000 residents over the last 20 years with its current zoning. There is no justification that current zoning cannot accommodate another 40,000 projected residents over the next 20 years. There are thousand of new housing units already in the pipeline. In short, blanket upzoning is not necessary to meet availability needs.</p> <p>It has been stated by several city and community leaders as well as the City's Long Range Planning Director that blanket upzoning does not lead to addressing the city's affordable housing crisis. In fact, there is research and real world examples where such an approach leads to an even wider gap. Blanket upzoning is not only unnecessary it could make the affordable housing crisis worse.</p> <p>We should be striving to improve all parts of the city and for all of its residents. It is not necessary to adopt the proposed zoning changes in the draft 2040 Comprehensive Plan to do so.</p>	7/20/2018
5249	0.1	/topics/land-use-built-form/	<p>Allowing four-plexes in small residential areas will continue to ruin the appeal of these neighborhoods. It is already a problem with developers tearing down smaller homes only to put together very poorly built (in 60 days or less) oversized homes on a small lot. The only folks who are going to win in the scenario are property developers; not actual tax paying residents. I understand that we need more housing in Minneapolis in general and with the ever increasing rent and property prices creates a vacuum. I believe that incentivizing down payment programs and refurbishing of existing homes will be able to disperse the populous more accordingly rather than trying to force mass amounts into already over populated areas.</p>	7/20/2018
5250	33	/policies/affordable-housing-production/	<p>Action steps are too vague. With new policies to encourage multiple-family and 4-plex housing, we cannot trust the marketplace to keep costs down. A percentage of new housing must be made affordable by regulation, and the regulation must have a longer time limit, say 50 years instead of ten years of controlled rent.</p>	7/20/2018
5251	1	/policies/access-to-housing/	<p>Step E requires more analysis and better planning. The specification on which neighborhood interiors this plan is focusing on is simply a mapping exercise versus true analysis, there is no detailed economic plan as to why greater housing supply is required in these interiors and the biggest issue is how this influx of residents is even possible with current infrastructure. Building duplex, 3-unit, and 4-unit lots in most "neighborhood interiors" will clog streets with parking issues, cause more issues with snow removal, and ultimately not be possible on "traditional size city lots". This clearly is simply a case of blindly highlighting a map of Minneapolis vs. being strategic with the right "interiors" that can support this type of growth.</p>	7/20/2018
5252	1	/policies/access-to-housing/	<p>Please be sure to PROTECT existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, and especially within the Northeast Minneapolis Arts District.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5253	0.1	/topics/land-use-built-form/	<p>Political double speak for this is what you want to hear but in the end we will give contracts and tax breaks to our buddies and the handful of other folks who can afford it and have the wherewithal to figure it out. Meanwhile, the tax paying citizens how aren't displaced in the name of development wont be able to afford to stay in their current homes (or if they can, their neighborhood vibe and landscape will be forever changed) due to tax increases for property and paying the public transportation fees etc and put up with the construction mess, and the "affordable housing" will cost so much the displaced locals will be lucky to afford to move in. AND..... there wont be a police, fire, legal or public transit system in place to handle the extra load so good luck with that too. But hey, it sounds like we mean well so we can keep our job and our friends, shell companies and foreign investors will profit.</p>	7/20/2018
5254	46	/policies/healthy-housing/	<p>I think it's imperative that radon testing is done on the purchase of all homes. Right now, it's an optional service in the home-buying process and most people aren't aware of the severe impacts of radon. It's the second leading cause of lung cancer. It would be beneficial if we could provide more education from the public sector, i.e. state and local government, and/or private sector, i.e. real estate agencies. Even if home-buyers received a one-page handout about radon, or a post was made on the City social media site. If more people were aware of radon and its effects, it could lead to lower incidences of lung cancer in Minnesota.</p>	7/20/2018
5255	29	/policies/creative-sector-economy/	<p>Protect existing Arts Districts. Artists and arts based small businesses do better when we're allowed to be in community with one another!! Part of what makes the NE Mpls. Arts district an attractive area is the high concentration of artists. If our spaces, buildings, studios, etc. are not protected...and if costs at our buildings are increased, we cannot continue to exist.</p>	7/20/2018
5256	1	/policies/access-to-housing/	<p>Let's promote infill housing. On any new housing land, no new single family mansion houses. If land is redeveloped, it's one of these.</p> <p>And for goodness sake, any zoning that only allows for a single family house to be built on any property that is currently a duplex, triplex, etc. has got to be changed back to allow that a multi-family unit be allowed. Let's not at least go backwards on any property within the city.</p> <p>From https://www.cob.org/gov/dept/pcd/Pages/infill-housing-toolkit.aspx</p> <p>"Infill housing is one of the best ways to make use of our remaining residential land. This type of housing focuses on developing vacant or underused land in urban areas, and helps to reduce sprawl, while encouraging long-term sustainability and housing options for all types of individuals and families.</p> <p>The Infill Toolkit represents nine traditional housing types that use a limited amount of residential space. In general, these housing types represent small homes that have a low transportation impact, make the best use of the City's remaining land and allow for new affordable housing options.</p> <p>These housing types include:</p> <ul style="list-style-type: none"> Cottages Carriage houses over existing garages Townhouses Duplexes Triplexes Small or smaller lot detached, single-family houses Detached accessory dwelling units Shared courtyard housing Garden courtyard housing <p>All of these housing types can be built in Bellingham's residential zones, with exception to most single-family zones, neighborhood commercial zones and the Lake Whatcom Watershed.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5257	1	/policies/access-to-housing/	In order to appeal to a variety of people, there should be a variety of housing. Minneapolis already has this! We chose to live in a mixed use neighborhood in uptown but not everyone wants that. If I bought a single family home in an area with other single family homes I would be quite upset to have some of those homes turned into multiplexes. If that were to happen, there would be no difference between parts of the city. Everything would be the same and you would lose people. If I wanted a high rise, I would move to downtown. If I wanted a single family home, I would move to Fulton. If you are concerned that there is not affordable housing in Minneapolis, work to improve the areas that are considered "not desirable". Otherwise you will get an entire city of "not desirable". Fair does not mean everyone has to have the same thing.	7/20/2018
5258	76	/policies/new-parks/	Our parks are wonderful and we should make sure that everyone lives within a certain radius of green space	7/20/2018
5259	51	/policies/healthy-pre-k-development/	Universal all day pre-k is the key to reducing the pervasive achievement gaps within Minnesota. It should be available to all children aged 3-4, regardless of income. Childcare costs are so expensive and there's no guarantee that children will receive early childhood education at daycare. It's becoming more and more difficult for the average two-parent household to work and afford daycare costs. If we had an all day universal pre-k program, more parents could stay in the workforce and contribute to society. Moreover, children would receive early childhood education and parents could also avoid the high costs of daycare. New York City was able to find money within their budget to implement a universal pre-k. If we don't have the funding, can we offer all day universal pre-k at a sliding fee scale? Can we secure private capital or increase the local sales tax, income tax, or property tax? As John Rawls wrote, "deliberative democracy also recognizes that without wide-spread education in the basic aspects of constitutional democratic government for all citizens, and without a public informed about pressing problems, crucial political and social decisions simply cannot be made".	7/20/2018
5260	78	/policies/park-design-and-programming/	Our parks do a nice job of offering a variety of things in a variety of areas. When I had small children, we visited the wading pools at many parks. It would be great if there was a wading pool within walking or biking distance of all residents.	7/20/2018
5261	49	/policies/educational-and-economic-access/	It would be monumental if we had legislation to support child care needs. Not only are families having to face the high costs of child care, but families are also faced with an increased responsibility to take care of elder parents. There's just not enough support from the public and private sector to financially and emotionally stay afloat in our modern times.	7/20/2018
5262	39	/policies/fair-housing/	These are fine ideas, but I wouldn't call them action steps. Would fair housing testing be done in collaboration with the Housing Discrimination Law Project at Legal Aid? Can the City identify any "teeth" to bring to the enforcement of fair housing laws?	7/20/2018
5263	1	/policies/access-to-housing/	I am currently someone who is highly impacted by the very high and rising rental rates. In general I very much support this policy. The one area of concern I have is the number of multi family units allowed on each block and the way that apartment buildings are built. I worry that allowing an unlimited number of multi family dwellings on a block will result in basically row houses and a decreased level of livability. I also worry about multi family dwellings and apartments being allowed to be built all the way up to the property line eliminating any green spaces in that area.	7/20/2018
5264	33	/policies/affordable-housing-production/	While I understand the desire to provide affordable housing for all, there are many many reasons why people choose to live where they live. Neighborhoods have distinctive personalities, and by people choose to live in their neighborhood in part based on that personality. By creating an "all the same" you would be destroying each neighborhood vibe. Raise up the areas that are neglected, and leave the thriving areas alone. Uptown was once an undesirable area, now it is bustling. The north loop is another example. Northeast has a very artsy and blue collar vibe. People create communities within these areas. Let them be what they are going to be without forcing them to be what you want them to be.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5265	17	/policies/complete-streets/	<p>In order to make meaningful progress on a policy to "plan, design, build, maintain, and operate the city's transportation system in a way that prioritizes walking first, followed by bicycling and transit use, and lastly motor vehicle use," the city must end its practice of socializing the costs of private automobile transportation as completely as possible. It need to look for creative and innovative ways to recover costs from cost-causers, and in rough proportion to their cost causation, with the city's modal priorities in mind. Doing so would provide appropriate price signals to users of Minneapolis's transportation infrastructure so they can make rational choices about their modes of transportation.</p> <p>These principles of matching costs to cost-causers and sending appropriate price signals to drive behavior are well understood concepts in the field of utility regulation, and it is time to stop socializing costs that are disproportionately caused by car ownership and car trips.</p> <p>The city can start by evaluating the amount of city property devoted to free private vehicle storage and exploring ways to recover those costs from car owners (with appropriate provision for financial hardship-- those costs should be borne by people with the ability to pay).</p>	7/20/2018
5266	41	/policies/tenant-protections/	Work with MPHA and other large rental property owners/managers to create more equitable tenant selection policies and practices. Arbitrary rules such as not accepting tenants with any UD's on their record should be discouraged. Tenants, like everyone else, deserve the opportunity to explain their rental histories, and deserve a second (or third) chance.	7/20/2018
5267	10	/policies/street-grid/	Action step d: what does "ownership over vacations" mean in this usage?	7/20/2018
5268	42	/policies/expand-homeownership/	I agree with the focus for home-ownership on communities of color and renters with low incomes. City resources should NOT be used to support white middle class home-ownership in "impacted" (or other) neighborhoods.	7/20/2018
5269	1	/policies/access-to-housing/	This is a good and important policy. Every person that wants to live in Minneapolis, and near its jobs, but can't afford to at market rates, is forced to contribute to sprawl and then drive into the city. This is a completely avoidable net loss for society and for the residents of Minneapolis. Artificial political constraints on housing supply raise housing prices and the wealthy and well-connected of the city should not be given a pass on their shared responsibility to welcome more residents.	7/20/2018
5270	85	/policies/access-to-health-social-and-emergency-s	On behalf of Allina Health and our 10,000+ employees in Minneapolis we look forward to an open, collaborative dialogue about the work we are already doing to advance the priorities of Policy 85 regarding access to health, social and emergency services and if there are additional aligned opportunities to form partnerships with the city to best collectively serve the needs of our community. Among many other initiatives, we are providing a variety of services to try to meet the mental health and substance abuse treatment needs of the communities we serve. We are also currently developing a new model to better identify needs and integrate access to social services into our clinical care. Our federally required Community Health Needs Assessment continues to be the primary tool we rely upon to connect us to community identified health-related priorities.	7/20/2018
5271	1	/policies/access-to-housing/	Please put this in the public record. Yes, affordable housing is important. But do not put developers before families who live in neighborhoods that would become more concrete and less green with the current plan. Green space...not only parks, in neighborhoods is one of Minneapolis' many draws. Also, more hard space means more run off into our lakes, the pride of Minneapolis. Please revise this plan.	7/20/2018
5272	86	/policies/healthy-food-in-institutions/	As a large healthcare provider with a significant campus in Minneapolis, Allina Health understands the important of access to affordable nutritious food and strives to provide a healthy food environment to our employees, patients and the surrounding community. Efforts like hosting a farmers market on Abbott Northwestern campus, support for the Midtown Global Market, changing to healthier food service vendors and community services and education are just some examples of our work in this area. We strongly encourage the city to implement a transparent, open process that allows time for learning and discussion of incentives to reach healthy food goals with the impacted institutions and organizations rather than creating additional regulations.	7/20/2018
5273	18	/policies/walking/	Action step e: current full-width streets are already considerably narrowed by snow banks in the winter; why purposely narrow streets to the point of impassibility?	7/20/2018
5274	45	/policies/leverage-housing-programs-to-benefit-c	Please include representative outcomes in setting hiring "priorities", as well as consequences when hiring goals are not met.	7/20/2018
5275	38	/policies/affordable-housing-near-transit-and-job	I love this! What good is affordable housing if it is out of reach of the transit lines? We need the most new housing along transit stations.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5276	49	/policies/educational-and-economic-access/	Housing segregation in Minneapolis has a huge impact on access to good educational opportunities. Public schools that are in majority white communities (such as in SW Minneapolis) should set aside at least 20% of their "seats" for students from impacted neighborhoods. A mini "choice is yours" program should be expanded.	7/20/2018
5277	90	/policies/technology-in-the-economy/	I think that we really need to invest in encouraging folks with liberal arts backgrounds to do career shifts and re-training into the tech sector. Having a non-STEM educational background can humanize the tech that is built!	7/20/2018
5278	89	/policies/technology-in-the-city-enterprise/	This is so important, I have not had great experiences with city information systems.	7/20/2018
5279	26	/policies/vision-zero/	Action step f; what is "perceived safety"?	7/20/2018
5280	1	/policies/access-to-housing/	I think that 4 plexes are great, we need to have rules about how high those 4 plexes are built up. Two-story 4 plexes are great. 4 story 4 plexes are a nightmare.	7/20/2018
5281	33	/policies/affordable-housing-production/	The development of higher density, multi-family housing is needed throughout the city, including communities that are currently all single-family households. The City should develop policies/practices to ensure that all neighborhoods include a mix of homeowner and affordable, higher density rental housing.	7/20/2018
5282	28	/policies/msp-airport/	Action step b: pedestrian access to the airport...seriously? From where?	7/20/2018
5283	1	/policies/access-to-housing/	<p>Please eliminate Policy 1 Action Step e) which calls for blanket rezoning, an extreme and unnecessary action to take.</p> <p>The idea of eliminating single-family home zoning requires more study and trials now, before it can be considered a reasonable change. Otherwise, some neighborhoods in the City will instantly go from 50% - 80% single-family zoning to 0%, which is indeed a radical change and even reckless considering that the City won't predict what will happen (i.e., what developers will do to maximize profits).</p> <p>According to the Met Council, Minneapolis population grew by almost 40,000 since 2010. We don't need to rezone the whole city to accommodate the 50,000 or so population increase over the next 20 years; current zoning would be sufficient. The housing building boom is already happening: http://m.startribune.com/index.php/developers-propose-hundreds-of-apartments-units-in-minneapolis/488326041/</p> <p>Alternatively, revise this action step to read: "Investigate potential strategies and tools to achieve greater housing supply and diversity in neighborhood interiors farthest from downtown that today contain primarily single-family homes."</p>	7/20/2018
5284	5	/policies/visual-quality-of-new-development/	I like these goals	7/20/2018
5285	1	/policies/access-to-housing/	<p>Need to make sure that those managing the housing and land not only respect the residents by making their housing options affordable, good quality, and environmentally friendly, but have the community in mind when building new structures or adding onto news ones. Do we have plans to uplift and treat our homelessness population with respect by providing safe and desirable places to stay to ALL income levels? Do we have plans to help college students not acquire a ton of debt because of academic and housing costs? Housing quality is something that is directly linked to financial wealth and neighborhood segregation, and we need to make sure that all Minnesotans get an opportunity to good housing in all neighbors. How do we support the citizen and not let big contractors take advantage of them?</p>	7/20/2018
5286	1	/policies/access-to-housing/	Please eliminate Policy 1 Action Step a) which calls for allowing housing to be built in all areas of the City. Some places, including parkland, should be off limits for development, including housing. The action step is so broad as to be meaningless, and it's unnecessary and could have unintended consequences.	7/20/2018
5287	91	/policies/heritage-preservation-outreach/	This is sound thinking	7/20/2018
5288	81	/policies/social-connectedness/	I like that you are thinking of the entire community in these arenas.	7/20/2018
5289	66	/policies/air-quality/	Please strengthen Policy 66 Action Step i) to include enforcement of backyard fire ordinances. In some neighborhoods, people already have to keep their windows shut because of air pollution caused by recreational fires, for health reasons. As the population grows, the number of fires may increase, furthering degrading air quality.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5290	33	/policies/affordable-housing-production/	<p>The 2040 Plan lacks details and clarity on how it will specifically address racial equity and affordable housing. I would have a lot more peace of mind if the 2040 Plan included language stating all new multi-family homes must include 30%, or more, affordable housing rental prices. Simply allowing for more housing density at market rates does not address affordable housing, or racial equity. As presented the plan is a boon for developers who face no mandates to increase affordable housing. All of this is at the expense of existing neighborhoods.</p>	7/20/2018
5291	66	/policies/air-quality/	<p>Please strengthen Policy 66 Action Step i) to include policies to regulate and reduce air pollution caused by yard maintenance including leaf blowers and lawn mowers. In some neighborhoods, people already have to keep their windows shut because of air pollution and noise pollution caused by these devices. As the population grows, the number of leaf blowers and lawn mowers might increase, furthering degrading air quality.</p> <p>Also please outright BAN two-stroke engines, which are known to be an environmental hazard. "In leaf blowers, two-stroke engines have been shown to emit contaminants comparable to large automobiles." https://www.washingtonpost.com/national/health-science/how-bad-for-the-environment-are-gas-powered-leaf-blowers/2013/09/16/8eed7b9a-18bb-11e3-a628-7e6dde8f889d_story.html?utm_term=.1fc511281199</p>	7/20/2018
5292	34	/policies/affordable-housing-preservation/	<p>In the last decade, eight homes on my block in SW Mpls have been torn down. Before the tear downs, all of them were lovely, small, affordable homes. None of their replacements are any of those three things. One is soon going on the market for \$1.2 million. If affordable housing is truly a goal of Minneapolis, you can't leave it up to the developers as to what is built. Most are only out to make a quick buck. They care little for quality or decent workmanship, and they certainly don't give a hoot about affordable housing.</p>	7/20/2018
5293	34	/policies/affordable-housing-preservation/	<p>Work to preserve the starter homes that are being torn down extremely quickly in SW Mpls. There aren't enough of them, and the monstrosities that replace them are not anyone's idea of starter homes. When we moved into this neighborhood 25 years ago, it was an excellent mix of families, singles, retirees, etc. People at a variety of income levels could afford to live here. No more, and lots of rich people moving in has NOT improved the neighborhood. Primarily they work and don't add or give back much (if anything) to the neighborhood.</p>	7/20/2018
5294	1	/policies/access-to-housing/	<p>Talk of building four-plexes throughout the city are ridiculous. Developers, out for a quick buck, will now snatch up the nicest of homes when they go on the market, as they'll always make money when replacing a single home with a four-plex. Almost all of our city lots are way too small to fit any kind of a comfortable four-plex, let alone if you add in garages, which are useful in our climate. Developers will win, as they have with the single-family homes. Neighborhoods will lose.</p>	7/20/2018
5295	0.1	/topics/land-use-built-form/	<p>I don't have time to look at all of these documents, but I will say that I am unhappy with the direction we are going. Many of the ideas here are laudable, but I am concerned about how they are being implemented. What makes Minneapolis an enjoyable place to live is its affordability, its green space, its small town-big city feel, it's former unique neighborhoods. I really dislike the big push for growth. I don't like seeing how all of our funky neighborhoods have been flipped - small, local businesses run out and replaced with the corporate garbage of every corner in America, every new construction built to the sky in the style of luxury condos and apartments and parking ramps, increasing cost and taxes so that no one will be able to afford the places they live. Bike paths take up all the roads with lanes that aren't actually protected. Public transportation is nice, but must it run through our green space? I appreciate the focus on alternative transportation but I think this is not the way to do it. The ideals of the plan are great, but I disagree with much of the implementation.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5296	67	/policies/climate-resilient-communities/	<p>a) is so vague as to be meaningless--and seems more a goal than a policy.</p> <p>Isn't b) already happening, and the justification for a Chief Resilience Officer at City Hall? Anticipate and prepare for pressures and shocks that climate change will introduce or worsen by collaborating across City departments, government agencies, private businesses and organizations, and resident networks. This wording is too weak--collaboration across City departments, government agencies, private businesses and organizations, and resident networks should already be happening for many reasons.</p> <p>c) Increase carbon sequestration in soils is too vague. Which soils, where and how to increase carbon sequestration? Perhaps: "Investigate and apply methods to increase carbon sequestration on public and private lands."</p> <p>Since e) is under the purview of MPRB, "Establish an urban tree canopy goal and adopt a plan to manage the urban heat island effect across all communities." should mention MPRB, and should be strengthened to do more than establish a tree canopy goal.</p> <p>f) should be stronger: "Conduct risk and cost-benefit analyses for increasingly extreme rain events on all stormwater infrastructure investments AND apply those analyses to reduce stormwater runoff."</p>	7/20/2018
5297	67	/policies/climate-resilient-communities/	<p>Since e) is under the purview of MPRB, "Establish an urban tree canopy goal and adopt a plan to manage the urban heat island effect across all communities." should mention MPRB, and should be broadened to address not just the urban heat island effect, but the increased challenges to trees from climate change, invasive species, and increased development.</p>	7/20/2018
5298	33	/policies/affordable-housing-production/	<p>Make sure to make funds available to home owners and not just to developers. Make the American dream a reality for low income people of color. Make money available to buy and to up keep single family homes in disadvantaged neighborhoods. I have searched for assistance for home owners in Minneapolis and ageism also plays a role. Money is available for developers to build low income places and take rent from low income people. But if you are a senior home owner the only available help is help OUT of you home! That's a disgrace!</p>	7/20/2018
5299	1	/policies/access-to-housing/	<p>I'm deeply concerned about the re-zoning that would occur as part of this plan which would allow high density dwellings in our historic residential neighborhoods. Part of what is great and livable about Minneapolis is all the neighborhoods with single family homes where middle class families can actually afford to own their own home. There is a sense of pride, rootedness and community when you own your home that is different from renting. Homeowners are invested in their communities in a way that landlords are certainly not. Let's work to make it possible for more Minneapolis residents to own their own home---particularly people of color--- not create more opportunities for developers and landlords to make a buck. High density zoning may make sense in some neighborhoods but this should be examined on a neighborhood by neighborhood scale with input from community members. This 2040 plan is so removed from the people it seems totalitarian and decidedly anti-democratic.</p>	7/20/2018
5300	1	/policies/access-to-housing/	<p>Allowing high rise apartments in the bde maka ska area will destroy the residential character of the neighborhood, especially without significantly improved transit. 4-5 story multi family dwellings are a far more inviting and better solution. Transit must also be improved: bring back the trolleys!</p>	7/20/2018
5301	33	/policies/affordable-housing-production/	<p>Minneapolis has bend over backwards to supply affordable housing for the Metropolitan area for the last hundred years. The suburbs have done little and enacted zoning laws to keep affordable housing out of their neighborhoods. It is their turn to accommodate the affordable housing needs of the metropolitan area. Our home values have finally started to rise. No policy should depress prices now.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5302	68	/policies/energy-efficient-buildings/	<p>a) is too weak with the weak verb Pursue; strengthen to: Design and implement a deep-carbon building retrofit program, including a fuel-switching component that eliminates fossil fuel dependency from all existing buildings.</p> <p>b) Prioritize and incentivize energy efficiency improvements in existing residential and commercial buildings with program emphasis on low-income neighborhoods and Green Zones. What does prioritize mean here? Strengthen with: Establish a program to incentivize energy efficiency improvements in existing residential and commercial buildings with program emphasis on low-income neighborhoods and Green Zones</p> <p>d) For those projects supported with City financing, encourage sustainable design practices and principles with a focus on robust energy efficiency and building envelope. Should be strengthened to cover not just projects with City financing. Change to: For those projects supported with City financing, require sustainable design practices and principles with a focus on robust energy efficiency and building envelope.</p> <p>e) strengthen to: For privately-funded projects, encourage and incentivize sustainable design practices/principles (awards, competitions, etc.)</p>	7/20/2018
5303	51	/policies/healthy-pre-k-development/	It's ridiculous that you have to enter a lottery to participate in Early Child Family Education programming in Minneapolis. No other surrounding city seems to have this policy. Increase the number of ECFE opportunities so all families who wish to participate can do so.	7/20/2018
5304	83	/policies/people-with-disabilities/	As a disabled individual, I have found it highly problematic that bike traffic has dominated the street and sidewalk planning over the past decade. For those of us reliant on adequate sidewalk space and efficient driving lanes, the over-emphasis on the streetscape towards those willing and able to bicycle is deeply concerning. Please factor the need for effective transportation options through smooth sidewalks and adequate driving lanes; to not do so would be discriminatory at worst and inattentive to resident needs at best.	7/20/2018
5305	85	/policies/access-to-health-social-and-emergency-s	Broader access to mental health services, please!!!	7/20/2018
5306	0.1	/topics/land-use-built-form/	<p>As a long term homeowner on a busy SW Minneapolis street, you will effectively steal part of the retirement savings I have sacrificed to accumulate. I have paid my mortgage and for improvements to my house. My house has increased in value because of my improvements. If you zone my street for six story apartment buildings, you have effectively stolen my equity by devaluing my property.</p> <p>I will be filing to dramatically decrease the property tax I pay if this plan is approved. What a bunch of crooks - stealing from the middle class and lining the pockets of the wealthy developers.</p>	7/20/2018
5307	33	/policies/affordable-housing-production/	Your new zoning plan will not meet your goal of providing more affordable housing for low income people. Stop giving our money to the wealthy developers. They will not provide low income housing, but rather elite housing that destroys the nature and charm of the existing city. You will effectively be destroying the jeweled charm of our beautiful city.	7/20/2018
5308	70	/policies/ecology-and-habitat/	This policy's action steps should also include a step that seeks to actually preserve existing natural land environments as natural preserves. Many residents remain highly concerned that the city chose to sell acres of untouched, natural park land around the water pumping station at 40th st. and France Ave. Ensuring that the natural land be preserved in as natural a state as possible should be an action step for the city to prioritize. Step E's reference to collaborations with MPRB and other organizations is good, but specifically mentioning preservation of natural land needs inclusion in this policy.	7/20/2018
5309	37	/policies/mixed-income-housing/	<p>I think mixed income housing is essential, especially for our schools. If poverty is concentrated in one area, the schools reflect that. It's also easier to create a sense of us vs them when you don't live near people of different incomes.</p> <p>A few years ago I was thinking, "I can see why people wouldn't want low income housing in their neighborhood," and then I realized I have a lot in my neighborhood, Seward, and it is not a problem.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5310	0.1	/topics/land-use-built-form/	<p>This is not representing the vast majority of homeowners in South Minneapolis. The Minneapolis City Council's and Mayor's jobs are to REPRESENT us. We need to scrap this zoning 'plan' and start over, with resident input.</p> <p>Also, the City needs to mail each and every resident a letter stating how many levels (i.e. from single family upzoned to 3 story apartment or 4plex) is proposed for their property. Homeowners are owed at least this much. Many are truly unaware!</p>	7/20/2018
5311	29	/policies/creative-sector-economy/	<p>My thought is that big corp will move in and think the improvements will be so much better. When in actuality they will be destroying the charm and appeal of North East Mpls. We used to go to Uptown all the time years ago. Now its a waste land and boring. Big corp so called improved that too.</p>	7/20/2018
5312	0.1	/topics/land-use-built-form/	<p>As a resident of Minneapolis, I am completely opposed to this Upzoning plan. Please vote against it and start over with a more reasonable plan.</p>	7/20/2018
5313	1	/policies/access-to-housing/	<p>e. The plan does not show HOW this policy will result in below market prices or even market rate prices. The outcomes will be just like it has been in other places that have tried this type of policy. It is no more than throw the door open and let the developers get rich. This goes for both ownership market values and rental market values. This is naive and unrealistic wishful thinking.</p>	7/20/2018
5314	0.1	/topics/land-use-built-form/	<p>I strongly oppose the 2040 plan. As a 15+ year resident of the Armatage neighborhood of SW Minneapolis, I do not support multi family housing units in our neighborhood.</p>	7/20/2018
5315	1	/policies/access-to-housing/	<p>In regards to d. This statement seems very open: "allow new housing within that existing range." We already allow new housing so what do you really mean by "new housing"? A big housing project with no parking next to a single family home?</p> <p>In regards to e. are the structures "3-unit, 4-unit" going to have height requirements? or is my small home going to be next to the new modern high ceiling apts. and will they require to have parking or will they just fill up the street with their cars?</p> <p>I like the idea of adding some of these homes as starter homes are hard to find for people just starting out...but isn't part of that problem bldrs coming in and tearing down the starter home and building the mini mansion homes...I agree we need all kinds of dwelling places, however I hope as each permit is given to builders who are in it just for the money and not the community will be looked at very carefully we are a city of lakes and parks not cement and sterile environment. There is a lot to all of these proposals and hard to maneuver through all of it...a great way for things to slip through the cracks and slyly get stuff passed without residents knowing ...good luck to us all.....</p>	7/20/2018
5316	1	/policies/access-to-housing/	<p>I strongly oppose Action step e. I live in a neighborhood of single family homes built between approximately 1920 and 1950. It is diverse in every way imaginable: age, race, household composition, income, and home ownership/rental. Neighbors know and look out for one another. Children play in each others yards (How will that happen in a fourplex which typically has no yard?) Building anything larger than a duplex will utterly destroy the character of this neighborhood (Cleveland, North Minneapolis).</p>	7/20/2018
5317	19	/policies/bicycling/	<p>It is incredibly poor urban planning to ensure traffic congestion for the many while increasing the number of bike lanes for the few. While I support the creation and maintenance of dedicated bike paths, such as the Greenway, it should not come at the expense of existing traffic arteries that operate effectively and reduce the amount of car traffic on neighborhood streets. For example, 26th and 28th Street were excellent east-west arteries that are now reduced to two- and even one-lane streets, yet the dedicated Greenway is all of 2-4 blocks to the south. As a result, both of these thoroughfares are now crowded and unpleasant to drive, and their congestion has resulted in a great increase in residential car traffic. This is urban planning at its worst, producing ineffective results and angry residents.</p> <p>Quite simply, a majority of Minneapolis commuters are not about to begin bicycling in winter months, nor should those with physical or age-related restrictions be expected to give up their driving rights. I would like to see some kind of balance whereby some dedicated bikeways are created (as alongside existing light rail lines), more light rail lines are built, and streets and avenues intended primarily for car traffic are maintained. I would also like to see greater responsiveness in this matter to the stated positions taken by home and business owners.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5318	1	/policies/access-to-housing/	Do not push current single family residents from their homes as the neighborhood already has diversity of nationality, businesses & has some duplexes & apartments nearby. I already walk in my area & shop here. I do not want to be forced to move for at least 10-15 years & I love to walk all over to the businesses,lakes,creek,ride my bike & love the atmosphere . I know my neighbors & feel very safe here. It is already walkable,yet busy. More multiple housing units would just increase congestion.	7/20/2018
5319	84	/policies/public-safety/	I am all in favor of greater diversity in the ranks for those who are first responders to crime, medical and fire emergencies. First and foremost, however, I support hiring and supporting those most qualified to be hired as police officers, fire fighters and EMT's. Of course diversity is important and, ideally, should reflect the demographics of the urban population they serve. But more important still is ensuring that the men and women who show up at a critical moment to provide help are the same people best trained, prepared and committed to the task at hand.	7/20/2018
5320	0.2	/small-area-plans/	I live in an area of single family homes. I have lived in apartments and liked that also, but chose to live in this type of area. I think that most cities have single family home areas and it enhances the appeal of those cities. I do not agree with 6 story buildings along Lyndale AVE South. I think it is not in character with the neighborhood. I also do not agree with the rezoning of single family homes to allow for 4 plexes anywhere the developers decide to put them. Developers are probably not city residents interested in the city in any way other than making money selling buildings. It seems to me that putting 4 plexes next to single family homes will lower the value of the homes they are next to. Most of the population has their home as their biggest investment in their life and a loss of that investment would be unfair to the homeowners. I believe that these changes will make the city a less desirable place to live. I am completely opposed to the 2040 plan.	7/20/2018
5321	1	/policies/access-to-housing/	Minneapolis has experienced past discriminatory policies which are well evidenced in certain parts of the city, including the North Side. The lawsuit which led to the demolition of the projects and the construction of Heritage Park is a case in point. We all learned that concentrating poverty does not work! In implementing its policies designed to reduce disparities, the City needs to review the facts underlying each individual neighborhood. For example, the Old Highland neighborhood in north Minneapolis has a low income population of 42.58% below the poverty line per the 2010 Census. It does not need more low income housing. Spread it around to other neighborhoods in the City.	7/20/2018
5322	0.1	/topics/land-use-built-form/	My name is Gloria Plautz, and I live at 4849 Dupont Avenue South. I think you are doing a very bad job of promoting this plan, first of all. I am not necessarily against greater density, but this plan seems to destroy the sense of neighborhood which most of us most treasure. It says absolutely NOTHING about how new buildings must look, either, and does nothing to retain the architectural charm of our neighborhoods. I think what people are opposing is charming older homes being torn down and replaced with the kind of dreadful buildings under construction at Southdale. Most of the multiple family buildings being put up near me of late are absolutely ugly. The city long prohibited mother-in-law apartments, but now is trying to force upon us ugly apartments with no provision for the parking which would come with them. I don't know if this plan was designed by contractors, but it certainly looks like it has! Definitely the discussion period should be extended. If it is not, I expect several people will pay for it in the next election.	7/20/2018
5323	58	/policies/business-districts-and-corridors/	Specifically include Arts Districts along with Business Districts and Corridors	7/20/2018
5324	50	/policies/access-to-technology/	I am encouraged by the city's plans around digital equity and inclusion, but what are the specific steps for Part A? Will there be a Minneapolis-based organization that provides the same kinds of services to low-income individuals and families as St. Paul's PCs for People? Among other things, PCs for People sells affordable, mobile internet hotspots, ideal for individuals and families who may move often and/or are priced out of other internet options. Local and private internet providers seem to struggle with conveying the relevance of high-speed fiber internet technology. What role will local government play in educating and promoting digital resources to the marginalized and underserved populations in our communities? How might the digital literacy programs be extended to affordable housing complexes, community centers and employment services? I believe the facilitation described must be active and reach everyone in the city.	7/20/2018
5325	56	/policies/supporting-small-businesses/	Add artists in the growth and development of small businesses: "Support the development and growth of small businesses and artists."	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5326	42	/policies/expand-homeownership/	Research studies have documented repeatedly that home ownership is an important contributor to neighborhood stability. The home ownership effect applies regardless of homeowners income level: low income, moderate income or other income home owners all demonstrated the positive impact of home ownership on neighborhoods. Neighborhoods that are currently experiencing problems can be helped by increasing the percentage of home ownership. For example, in the Old Highland neighborhood the ratio of home owner units is at 43% vs rental units at 56%. Ideally, home owner units should account for at least 50% of total housing units. Neighborhoods like Old Highland need more home ownership support to remain stable.	7/20/2018
5327	20	/policies/transit/	Nonsmoking must be enforced in and around all waiting areas for transport.	7/20/2018
5328	6	/policies/pedestrian-oriented-building-and-site-de	Love all of this, especially providing sufficient setbacks from street to building to allow room for pedestrians. With snowfall in winter especially, but also with sidewalk cafes in summer and panhandlers, it can become difficult to navigate sidewalks now. Widening these spaces is paramount to pedestrian use of space-- as is eliminating smoking in all these areas and discouraging car traffic in as many areas as possible to improve air quality for those trying to breathe out of doors.	7/20/2018
5329	11	/policies/skyways/	I see no reason to artificially limit skyway development-- there are costs to build them, so if they are being built it is because there is an anticipated need that outweighs the anticipated cost. I'd also encourage charity walks and expo events use these spaces to improve their profile and make use of the space during weekend mornings or other low-traffic times.	7/20/2018
5330	1	/policies/access-to-housing/	I understand that Minneapolis is growing and that we need to facilitate that growth, but we also need to think about long term investment of residents in the city. I have no problem with increasing the density in downtown areas. Although I feel what makes Minneapolis a great city is retention in the most southern and northern areas of residents. I this is done be keeping as many single family houses in those section. Minneapolis is made great by it's diversity of people and not the plans. Without these plans the suburbs would just continue to grow. I understand this is one way to increase tax base but this will also cause more problems if the city does not maintain balance. Make sure when you think about these plans you think about all people not just the plans that you did. Having seen how other cities evolve downtown will grow, but make sure you don't lose the charm that draws families to stay and grow families of all different income levels in Minneapolis. Remember a short term plan gain doesn't help in the long term. Put People over plans and listen.	7/20/2018
5331	48	/policies/data-driven-decisions/	Implementation of policies uniformly across the city's neighborhoods is not smart planning. Each neighborhoods individual characteristics need to be considered when implementing policies in a comprehensive plan. For example, we know that concentrating poverty in certain neighborhoods does not work. So before implementing more low-income housing, consider where low income housing already exists. For example, in the Old Highland neighborhood 42.58% of the population is below the Low Income poverty line per the 2010 census. That translates to a Median Family Income in 2010 Inflation Adjusted Dollars at \$33,370 (according to the American Community Survey 2006 - 2010 estimates). Mixed income development is the ideal. That means a neighborhood that already has a high percentage of Low Income needs development for more moderate income individuals/families.	7/20/2018
5332	7	/policies/public-realm/	Air quality needs improvement. Eliminate smoking and wood smoke in city entertainment and transit corridors and especially in residential areas.	7/20/2018
5333	1	/policies/access-to-housing/	Today, money provides access to housing regardless of color or creed. Allowing increased density throughout the city will do nothing to help people live wherever they want in the city. The premise behind this policy proposal seems to be a simplistic supply side economic argument that by increasing supply, prices will fall. Economics is a far more complex social science that defies a simple equation. Development will follow the money, and will occur in those areas of high demand. Those developments will not be affordable because there is money to be made. So, how does this help assure that all city residents can access those areas of the city? They still need money to do so. The only ones who will benefit from this policy are developers and their clientele who already can afford access. As to the idea of reducing greenhouse gas emissions by increasing density, you sure as heck better have the transportation systems in place first, because without them you will instead be faced with even more cars on streets that can't hold them. One of the areas in which the greatest density is proposed is that on the west side of the city, north of Lake Calhoun, an area already paralyzed by traffic. To add more housing now, without any way except cars to transport folks, is guarantied to worsen air quality.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5334	19	/policies/bicycling/	Bike lanes need to be protected and drivers need to know bikes can take a lane, especially on one-lane one-way streets where there isn't room to safely pass with large vehicles. Also air quality needs to be improved with sources of wood smoke eliminated so riding through neighborhoods is safe for everyone, even those with asthma or other need for clean air to breathe.	7/20/2018
5335	54	/policies/supporting-economic-growth/	Add: improve existing properties and infrastructure to support the existing Arts District	7/20/2018
5336	82	/policies/aging/	An aging population can't rely strictly on mass transportation or bicycling. The city needs to recognize that some people need cars. An aging population also can't deal with inaccessible streets resulting from the failure to clear snow, or sidewalks blocked to accommodate building developers. Enforce existing snow clearance regulations. Don't allow sidewalks to be shut to make life easier for developers.	7/20/2018
5337	0.2	/small-area-plans/	I very much support the comments of the League of Women Voters on the 2040 plan. I also support increased density along transit and commercial corridors, but I would like the successful single-family interior neighborhoods to remain as they are. These neighborhoods provide our city and our city schools with an important tax-base even when homeowners send their children to private schools. Parking is also a great concern. We in Southwest Minneapolis are not the city's enemies. Many of us have lived here for 40 years and done our best to keep the city alive.	7/20/2018
5338	31	/policies/creative-workers/	ADD: i. Provide Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of space forcing artists out of the City.	7/20/2018
5339	83	/policies/people-with-disabilities/	People with disabilities can't navigate sidewalks blocked with snow or to make building easier for developers. Enforce snow clearance. Don't allow developers to block sidewalks for construction.	7/20/2018
5340	1	/policies/access-to-housing/	Protection for setbacks and height limits need to stay in place-- new structures in residential neighborhoods must not take more air/light/lot space than existing structures. In addition, those building the multifamily dwellings must pay estimated costs for increased noise and disruptions (such as increased need for police presence and response to noise calls resulting from increased density/thinner walls/etc) so as not to degrade quality of life that exists in Minneapolis today.	7/20/2018
5341	30	/policies/arts-and-cultural-assets/	Add: Protect the existing infrastructure of production space within the Northeast Minneapolis Arts District.	7/20/2018
5342	38	/policies/affordable-housing-near-transit-and-job-	I support this policy. While many residents are reluctant to see change to their low-density semi-suburban neighborhoods, climate change requires lifestyle changes. The city should strongly encourage housing options that allow residents to break from the assumption that every adult needs a car. More people should have access to already functional bike and transit infrastructure (which of course has plenty of room for growth as well).	7/20/2018
5343	80	/policies/development-near-metro-stations/	I support this policy. Enabling more people to reduce driving by supporting dense livable neighborhoods near transit corridors is an essential response to climate change.	7/20/2018
5344	29	/policies/creative-sector-economy/	In order to maintain affordable property for both creative and suppliers for the long term, property taxes and property value must remain stable. I am thinking of the typical demise of areas like NE which become gentrified. As property value climbs, the creative class and those that supply them can no longer afford to stay. It is happening now to the Riverplace neighborhood with apartments replacing other business. The north loop is another example. However we can keep buildings like Northrup King and Casket Arts from being swallowed up by developers is the goal.	7/20/2018
5345	41	/policies/tenant-protections/	I support this policy. Minneapolis should support organizations like Homeline, and ensure that they are adequately funded.	7/20/2018
5346	33	/policies/affordable-housing-production/	The policy of increased density across all areas of the city collides with the policies geared toward making the city more livable, walkable, and accessible to the extent that parking isn't part of the building calculation. By not providing off-street parking, and without a fundamental change in people's driving habits which are years off, cars will be on streets. That comes at a cost to all of us trying to navigate those streets. Why not charge for the privilege of parking, by requiring permits for street parking?	7/20/2018
5347	29	/policies/creative-sector-economy/	Support and encourage using the existing Arts Districts to serve as incubators for the creative sector.	7/20/2018
5348	0.1	/topics/land-use-built-form/	I am concerned, as many, that the increase in density will ultimately reduce the availability of affordable housing, degrade the character of the city and benefit wealthy developers at the expense of everyone else.	7/20/2018
5349	5	/policies/visual-quality-of-new-development/	i. Expand requirements for public art in city projects to make the city more interesting.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5350	79	/policies/healthy-youth-development/	So many of the photographs on this site show children, but very little of this plan talks about parks and schools. I understand that we have a separate park system and school system, but how does this plan relate to either? Where are the athletic facilities for the children in our denser neighborhoods? Where are the schools and classrooms to educate them? How do we get kids to those places? How do we encourage participation in after school activities of all kinds? It's hard to bike with baseball or hockey gear or a trumpet or guitar.	7/20/2018
5351	5	/policies/visual-quality-of-new-development/	Recognize the distinctiveness of the North East Arts District and preserve it.	7/20/2018
5352	33	/policies/affordable-housing-production/	I am strongly strongly opposed to refining and putting four plexes up all over our neighborhoods!!! And with no additional parking. This is not a good plan and only benefits builders who will tear down beautiful homes and ruin our new neighborhood.	7/20/2018
5353	3	/policies/production-and-processing/	North Mpls needs more jobs! Our neighborhoods are impacted by several factors that contribute to high unemployment. For example, the population in the Old Highland neighborhood in Near North is 47.8% Black or African-American. According to data detailed in the Comprehensive Plan, "the unemployment rate for blacks and American Indians is approximately three times higher than it is for white non-hispanics." We need jobs in north Mpls so individuals do not have to spent hours commuting to their jobs. We have a high population of young people in our neighborhood. These young people need employment training and jobs so they can launch their careers. Their parents need local jobs so they can spend more time with their families instead of commuting. The training opportunities that currently exist in north Mpls need strong support from the City including Emerge, and the proposed Northgate Training and Technical Center on Plymouth.	7/20/2018
5354	3	/policies/production-and-processing/	Protect and preserve the North East Arts District	7/20/2018
5355	1	/policies/access-to-housing/	I support all of the action steps listed here, particularly upzoning in neighborhoods that are currently primarily zoned for SFDs.	7/20/2018
5356	1	/policies/access-to-housing/	Protect existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, and especially within the Northeast Minneapolis Arts District.	7/20/2018
5357	1	/policies/access-to-housing/	Why will tearing down existing single family homes in the neighborhoods referenced in letter "e" create more affordable housing? This multi-family housing will be designed, built, and owned by developers and/or investors, what will insure that this housing creates more opportunities for lower income people? Have you considered the fact that when homes are sold to developers, instead of to an owner/occupant, that builder will care NOTHING about the neighbors or the neighborhood. Why have you created a policy that purposely pits one segment of our city against another - i.e., homeowners vs. renters, newcomers vs. long time residents, old vs. young, etc. This policy is divisive and frightening for people that have invested a considerable portion of their life savings in their houses. YOU CAN'T CHANGE THE RULES IN THE MIDDLE OF THE GAME without serious consequences. Something else you may want to consider - as soon as the city changes zoning restrictions in single family residential neighborhoods, many seniors and adult children of aging parents will simply stop maintaining their homes, knowing that they can sell it to a developer at any time, skip paying a real estate commission, and walk away. The rest of the neighborhood is left to deal with the fall out: dumpsters in the street for months at a time, asbestos dust flying everywhere, noise from 7 am til 7 pm. I have lived through it and it is awful. I came to Minneapolis to get away from all of that. If you tip the scales too far in the direction of renters vs. homeowners (Mpls. is already primarily a city of tenants), you will change the character of the neighborhoods forever, and create areas of disinvestment. And just for the record, I am not elitist, racist, or uncaring about my fellow human beings. I am very sorry about the racist federal housing lending policies from the early 20th century but this is not the answer. Finally, where is the money going to come from the build the housing that is affordable for the people making 30% of median income? I hope you are not making the mistake of thinking that Ben Carson and HUD are going to help us in any way.	7/20/2018
5358	1	/policies/access-to-housing/	I am hugely opposed to this plan! Building high rises and four plexes in our neighborhood will ruin it! You will push people out of the city and the economics will not work. When homes cost upwards of \$800,000 the only option will be to create luxurious condos that will not be affordable and ruin the character of our neighborhoods. Families will leave. It will not be affordable	7/20/2018
5359	20	/policies/transit/	The more I think about the priorities you have set, the more I think that creating dense transit options BEFORE creating high density developments will be essential. Without a dense, extensive transit system, and with all the priorities for walking and biking, new residents will not be able to get around. How can this work? Right now, existing transit is not convenient for many many people, it doesn't cover enough destinations and times. And you will lose people to the suburbs, where they can use cars.	7/20/2018
5360	33	/policies/affordable-housing-production/	I support policies that promote housing stability for cost-burdened households.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5361	17	/policies/complete-streets/	I could not help but notice that EVERY SINGLE PICTURE on the Minneapolis 2040 website shows scenes of Minneapolis in the summer. Where are the pictures of people walking and biking in the winter? I can't believe what an incredible oversight that is, especially after the winter we just had. It is naive to think that cars are going to become unimportant to city residents. The most recent example of this is the one way streets of 26th and 28th Streets, these are major east west arterial streets and are constantly choked with traffic, and this precedes the 35W reconstruction project.	7/20/2018
5362	41	/policies/tenant-protections/	I support policies that protect tenants from retaliation when reporting code violations.	7/20/2018
5363	58	/policies/business-districts-and-corridors/	West Broadway in north Mpls has several historic buildings which should be preserved as the City promotes and attracts businesses to West Broadway. Many of these historic buildings have already been lost to previous planning department initiatives to replace them with strip malls. The neighborhoods in north Mpls were opposed to the strip malls when they were first introduced and that opinion has not changed. The strip malls have not thrived. They continue to have difficulty attracting viable businesses. They are a haven for crime and "after the bar closes" parties. The police continually report difficulties trying to control criminal activity in these strip malls after hours. The parking lots are filled with litter and have no amenities that would attract greater lawful consumer economic activity. Please preserve what we have left and discontinue previous destructive practices implemented in the name of economic development.	7/20/2018
5364	0.1	/topics/land-use-built-form/	In the land use and built form section, I am submitting the following "rhetorical questions". Proposed city wide density increases. 1. Will there be a substantive effect on utilities: Local Sewer System capacity, Water carrier capacity, electrical grid? 2. MPCA future anticipated requirement to treat Storm Sewer effluent. How does resultant decrease in pervious surfaces affect this? Will dwellings be required to handle rain runoff on the property? Ground Water capacity to handle this? 3. School and Park capacity effects? 4. Street Infrastructure: Increased traffic effects on road wear and increased cost in maintenance? 5. If behavioral studies are valid that single family home residents/owners are dramatically more involved in the community, what level of multi-dwelling vs. single family land use will change the character of community involvement in the city of Minneapolis?	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5365	4	/policies/access-to-commercial-goods-and-service	<p>Please include something about Establishing and Strengthening Focal points. This builds community ownership in area. Plus provides jobs in community, encourages walking, etc. The below was from the 2014 Oak Park, Ill comprehensive plan. I love Oak Park, nice place to visit my relatives!</p> <p>Establishing and Strengthening Focal Points Objective 4.1.1. Establish and strengthen focal points, such as schools, parks, commercial districts, and other community gathering spaces, within the village's neighborhoods.</p> <p>Strong focal points are a common characteristic of healthy neighborhoods and communities, providing gathering places and fostering interaction among neighbors and visitors. Oak Park's neighborhoods are rich with community facilities, including schools and parks, in addition to shopping areas and religious institutions, all of which have the potential to anchor Oak Park's neighborhoods. In many neighborhoods, such amenities already function as focal points, while they may be lacking in other neighborhoods. Working with its community partners and neighborhood groups, Village government could identify and strengthen focal points to reinforce the social fabric of the community. This can be achieved by enhancing these areas with plazas and pavilions, pocket parks, and other flexible spaces, promoting community gatherings and hosting special events throughout the year.</p>	7/20/2018
5366	0.1	/topics/land-use-built-form/	<p>I think a duplex should be the largest building type in Interior 1 spaces. There is not enough parking and larger residents would make the single family homes leave the city. It would be the end to single family homes.</p>	7/20/2018
5367	1	/policies/access-to-housing/	<p>I SUPPORT the Access to Housing policy and its proposed Action Steps. Increased density within traditional neighborhoods comprised of single-family homes can be successfully accommodated with the introduction of 2-4 unit structures, particularly if Minneapolis maintains a rigorous design review process that continues to require minimum standards for project design and building materials. This may require that such projects be approved by Conditional Use Permit or other means to assure sufficient public review.</p> <p>Paul Gates 4917 Garfield Ave.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5368	0.1 /topics/land-use-built-form/	<p>It is obvious that the city planners and the city council members do not live in the West Calhoun neighborhood. If they did, the 2040 plan for the north west section of West Calhoun would not be in the form that it is today and it would not have been approved by the city council.</p> <p>The 2040 plan for the West Calhoun neighborhood, especially for the area of Calhoun Square, Calhoun Village, W. 32nd St., Ivy Lane., Zenith Ave. S., Lake Street, Excelsior Blvd., and the Bader Towers apartment area, is a very detrimental plan for the neighborhood. The plan as it now stands makes this small area totally unlivable.</p> <p>The plan as it is today shows nothing but wall to wall high rises, up to 33 stories high, and wall to wall concrete for the entire area. I see no greenery other than along the lake and the greenway. There are no shops or restaurants shown. The plan states that there will not be adequate parking for the tenants of the buildings. The buildings are not set back from the streets. There are no trees and no greenery except a couple of bushes.</p> <p>I would be in favor of building attractive low rise apartment buildings (4-5 stories maximum) that incorporate shops and restaurants on the ground level of every building and that contained adequate underground parking for all residents in the buildings. I specify "attractive" buildings because the last apartment building that was constructed at 3118 W Lake St. is an ugly monstrosity that looks cheap and detracts from the entire neighborhood. The area also needs green space around the buildings and trees lining the streets on both sides and down the center of the streets.</p> <p>However, the 2040 plan for this area shows multiple high rises (up to 33 stories) filling every conceivable spot of land. All of these tall buildings will make the area unlivable, will create wind tunnels, and will destroy greenery, views, and privacy. The wall to wall cement will increase the heat index for this area. The increased number of cars will create even more congestion in an area which is already severely congested and which is dangerous for pedestrians. The lack of trees and greenery will deter people from wanting to live in the neighborhood.</p> <p>In addition, the light rail line is being constructed in the wrong place. The light rail line should be going east long Lake Street and NOT through Cedar-Isles-Kenwood. The light rail should go along Lake Street to the Hiawatha line or further, perhaps to the river. It should have feeder lines along Hennepin, Lyndale, Blaisedell, Chicago, and Bloomington or Cedar, and more. The stops should be no more than 5-6 blocks apart at most. There should be a link so that people can easily and conveniently use the light rail to get to the University of Minnesota and the University of Minnesota Medical Center.</p>	7/20/2018
------	----------------------------------	--	-----------

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5369	36	/policies/innovative-housing-strategies/	<p>Something to think about from :https://www.oak-park.us/sites/default/files/planning-documents/2014-09-15-envision-oak-park-comprehensive-plan-small.pdf</p> <p>Objective 7.4.5. Support apartment properties and condominium associations so they can continue to provide high quality multi-family housing throughout Oak Park.</p> <p>According to the US Census, in 2012 an estimated 47% of Oak Park's total housing units were in apartment or condominium buildings with three or more units. This type of housing represents the majority of the community's accessible housing and is prominent in many of the village's neighborhoods. The Village could work with apartment building owners and condominium associations to ensure that properties are well-maintained. This can be done through incentives for buildings that include accessible housing and investment in structures and sites beyond standard maintenance, the coordinated provision of contracted services, such as lawn maintenance, snow removal, etc., that creates economic savings, and on-going communication with properties to ensure emerging challenges are addressed to the extent possible through municipal codes and policies.</p>	7/20/2018
5370	50	/policies/access-to-technology/	What specific barriers currently exist to private development of citywide information infrastructure?	7/20/2018
5371	1	/policies/access-to-housing/	If you allow 3 and 4 unit dwellings on small lots you must require that they follow and respect the same height, setback, lot coverage, and perviousness controls as the single family homes to respect the scale and fabric of the neighborhoods. Do NOT increase height and massing restrictions because that will dwarf existing single family homes, block light access to gardens and outdoor spaces, place units overlooking back yards existing residents enjoy as partially private, and entirely change the calm, quiet qualities sought by the families the City is claiming it wants to offer single family housing opportunities for.	7/20/2018
5372	1	/policies/access-to-housing/	In SF neighborhoods, the concept of allowing 1-4 unit bldgs on single lots needs to include design guidelines for the buildings. The greater unit bldgs should blend in with the existing housing styles. There should also be a limit on the number of 2-4 unit structures built on each block, so we don't once again concentrate low income housing.	7/20/2018
5373	63	/policies/food-access/	If the above two issues aren't addressed: design guidelines and limited number per block, than this idea should not be implemented. Kathy Larsen, Fulton neighborhood.	7/20/2018
5373	63	/policies/food-access/	what exactly is intended by G? who is going to determine what is unhealthy? if you're vegan, would you argue meat is unhealthy? how will this impact food trucks and event vendors?	7/20/2018
5374	64	/policies/food-businesses/	how can the City alter its ordinances and policies so that the kitchens found in recreation centers can used for people to preserve food or make value-added food products and sell them at markets, etc? if the City could alter its policies, there would be way more kitchens available to entrepreneurs.	7/20/2018
5375	49	/policies/educational-and-economic-access/	Agree with #1 & #2 above. Providing equal educational opportunities to some should NOT mean reducing educational opportunities for others. MPS must have excellence as a goal -- for all students. The city workforce needs to be competent more than it needs to reflect every demographic.	7/20/2018
5376	1	/policies/access-to-housing/	This is for developers and have nothing for residents. Developers are stymied by our building regulations and want to tear down our beautiful old houses to build ugly buildings that will be rented out at high rents to make them a sickening amount of money. No to fourplexes	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5377	65	/policies/urban-agriculture-and-food-production/	<p>When Homegrown Mpls started, we were promised that garden space for residents would become available on the open spaces adjacent to fire stations & other city owned land - this would provide access to water, secure tool storage, a sense of security to reduce veggie theft or vandalism. What happened to that promise?</p> <p>The City could give vacant lots to the park system - with ongoing source of maintenance funds - to hold in perpetuity for community garden space.</p> <p>I would encourage the City to conduct research into the unintended consequences of supporting urban ag in the city - specifically how it negatively impacts existing farmers' market vendors. Many of these vendors are immigrants and communities of color and based on informal conversations, vendors have to go more markets, end up with more left over produce, etc. Could the focus for the City be more on providing facilities so that vendors could create value-added products to stretch the season and make more money from their hard work farming/growing?</p>	7/20/2018
5378	41	/policies/tenant-protections/	<p>Many Landlords with "affordable rates" have non smoking rules. A large percentage of people with mental illness also happen to be smokers. Obviously not healthy, but smoking helps relieve stress. When a tenant violates a Lease by smoking, termination leads to a "bad record", which results in the inability to find housing. this is just a simple example of hundreds. So unless the affordable housing people (society) learn to understand the complexities of their clients, we will still have a homeless problem.</p>	7/20/2018
5379	50	/policies/access-to-technology/	<p>Depends on what "private development" you're talking about. Note that equal access to information infrastructure includes cost -- both in dollars and in percentage of income.</p>	7/20/2018
5380	37	/policies/mixed-income-housing/	<p>I am in complete agreement with a broader base of affordable housing. I am unclear as to the research documented link between zoning changes and increased affordable housing absent other supports such as tax advantages for developers or public income based rental or home purchase financial support. The plan well documents the effect zoning has had on exclusionary development. It is less clear to me that zoning changes alone will lead to broader housing choices. It appears to me, instead, that market factors would seem to support whatever development results in the greatest return to developers. My assumption is that public sector direct subsidization of rents/house purchases is too great a financial challenge for the City and as a result there is a hope that zoning changes alone will work on this challenge. I am not sure I see the research based support for this supposition.</p>	7/20/2018
5381	51	/policies/healthy-pre-k-development/	<p>Need to add something about making day care safe --improve licensing requirements and follow through. The city should accept some of the responsibility to ensure daycare is not accessible but safe -- every day.</p>	7/20/2018
5382	70	/policies/ecology-and-habitat/	<p>please refer to pollinators generally and not specifically bee pollinators.</p> <p>b. this would also benefit songbirds. 80 to 90% of a baby songbird's diet is insects! not just "bee pollinators".</p> <p>should also think very strongly if eliminate is the correct word when referencing pesticides. if the City is managing invasive species, judicious use may be required as there are few organic means that have proven successful against terrestrial invasives.</p> <p>The City will need to develop a wildlife management plan. Creating more habitat doesn't mean only the good things will show. water habitat will result in more mosquitoes - which can carry assorted viruses. other habitats will support ticks, also virus and disease carriers.</p> <p>g. what about terrestrial corridors, like the Midtown Greenway? this could be widened and enhanced to serve that purpose.</p>	7/20/2018
5383	72	/policies/sustainable-water-system-management/	<p>f. the vast majority of riparian areas are owned by the MPRB. the City should provide an ongoing maintenance funds to the MPRB to ensure these areas are resilient to flooding.</p> <p>g. while native species would be ideal, in light of global climate change, should really be emphasizing the right plant in the right place. Mpls is no longer zone 3 to 4. we are more zone 4 to 5 which means different plants will now grow here and could be more resilient. as a result, Mpls will end up with novel ecosystems.</p>	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5384	52	/policies/human-capital-and-a-trained-workforce/	Most of these "action steps" seem too general... and generic. Take another look; be more specific. Among the barriers to holding jobs, include reliable, affordable day care... and both routine and emergency transportation needs. Also: don't stick your head in the sand about disruptive technologies that are going to happen anyway.	7/20/2018
5385	55	/policies/business-innovation-and-expansion/	Not all business startups and expansions are worth promoting. Entrepreneurial connections should not be race/color/gender-based (especially if you want them to be effective). Allowing/incentivizing home-based businesses could be in here somewhere.	7/20/2018
5386	73	/policies/stormwater-management/	<p>What new funding will be directed to the Mpls park system to support these action steps?</p> <p>The City needs to start acquiring additional land to handle stormwater runoff rather than relying on parks to absorb the brunt of storm events. Park flooding prevents the use of recreational facilities.</p> <p>e. is the City contributing funds to the park system to help with this specific action step?</p> <p>g. please refer to pollinators generally, not just bee pollinators.</p> <p>h. interconnected habitat corridors will also benefit wildlife that residents may not appreciate including turkeys, white tail deer, and coyotes. the City will need to develop a wildlife management plan. The DNR does not look kindly on the creation of habitat and then a request for a permit to remove the wildlife.</p>	7/20/2018
5387	63	/policies/food-access/	One suggestion is to work with local convenience stores to have them stock healthy, affordable food options. Also, it may be helpful to coordinate bus routes to stop at health food locations for community members who don't have another mode of transportation.	7/20/2018
5388	56	/policies/supporting-small-businesses/	Note that many small businesses are very high income employers (law firms; investment groups; insurance agents, consulting firms, etc.) Be sure that "small business" means what you think it should and be wary of offering resources to those who don't need it -- regardless of the gender/color of owners.	7/20/2018
5389	0.1	/topics/land-use-built-form/	I am very much opposed to the proposed zoning changes for the residential neighborhoods. I chose to live on a block with single family homes. Behind our house, the homes on Cedar Avenue are some single and some duplexes. The plan makes three and four story apartment possible on my block.	7/20/2018
5390	29	/policies/creative-sector-economy/	Protect existing arts districts!	7/20/2018
5391	76	/policies/new-parks/	<p>need to focus on the size & QUALITY of the parks. the ability to walk to a triangle park is not the same as walking to Powderhorn or North Commons.</p> <p>Give Alice Rainville Park to the Mpls park system with an increase in funding for its maintenance and programming (some capital funds to develop it would be good too). This "park" does not currently read as public space nor does it provide recreational amenities for nearby residents. The City should also buy out the four or five single family homes located along the edge of this "park" so that the new park could be complete and completely available to the public.</p>	7/20/2018
5392	86	/policies/healthy-food-in-institutions/	In regards to healthy food skills education, having classes that teach people how to make healthy food can be more beneficial than just advocating for healthy food choices. If children and adults know how to combine ingredients to make a healthy meal, they can change their lives. It could be beneficial to have students pick out ingredients from the garden and have a local chef teach them how to make a meal. A live cooking demo could be interesting and fun, and you could pass out the recipe afterwards. Or, have a family fun fit day where kids learn about healthy food choices from dietitians, athletes, and other role models within the community.	7/20/2018
5393	3	/policies/production-and-processing/	This list needs to be condensed. The phrase "production and processing" needs to be clarified with examples -- both those that are and those that aren't. Also could clarify what "mixed use" means in this context.	7/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5394	78	/policies/park-design-and-programming/	<p>Every place that the 2040 plan references parks, the Minneapolis Park & Recreation Board should be identified and called out as the responsible party. And then call out how the City is going to alter & improve funding to support all the listed action steps.</p> <p>In the first paragraph need to also call out AGING populations.</p> <p>within action steps - while the additional funding for neighborhood parks is fantastic, the fact is that the regional park system serves more residents than neighborhood parks, and that residents value regional parks and natural areas more than they value recreation centers (see the survey from the MPRB's current Comp Plan). How can the City help support the regional park & trail system?</p> <p>Overall, need more emphasis on access to NATURE!</p> <p>g. Needs one more word: Ensure a variety of QUALITY park experiences across the city.</p> <p>l. need to call out that this would be for both self-directed activities (which the majority of park users are!) and staff led programming</p> <p>k. Please start this statement this phrase: With guidance from educators and scientists, . . . and then the rest of the statement. In this way the content/program the artist creates will be accurate. thank you.</p>	7/20/2018
5395	79	/policies/healthy-youth-development/	<p>this section should also address issues of access to nature, impact of city noise - especially near airport and freeways, impact of too much light (impact to sleep patterns).</p> <p>Please reference Last Child in the Woods, The Nature Fix, as well as Balanced & Barefoot to learn how important access to Nature is for everyone - all ages, cultures, and abilities!</p>	7/21/2018
5396	33	/policies/affordable-housing-production/	<p>Use tax policy. If a developer builds apartments affordable to the 80th percentile, s/he gets a 20% break on property taxes. At fifty percent, s/he gets a 50% break, and so on. BUT, if the developer (or any other owner) takes the building out of the affordable market at any time, s/he has to repay all the property taxes that were forgiven.</p> <p>This will discourage the "flipping" of buildings that has displaced so many low-income people.</p>	7/21/2018
5397	81	/policies/social-connectedness/	<p>d. add in libraries</p> <p>e. what kind of education? funded by what entity?</p> <p>f. another example would be the Mpls Monarch Festival ~ Festival de la Monarca</p>	7/21/2018
5398	82	/policies/aging/	<p>Access to recreational opportunities - how frequently are benches placed along trails? Where's the shade? What are the outdoor activities available for elders in the winter?</p> <p>Embed services that allow elders to age in place. Where's the senior housing and assisted living housing in each neighborhood within walking distance of the market, the drugstore, etc.?</p>	7/21/2018
5399	33	/policies/affordable-housing-production/	<p>I would be very interested in options for rent-controlled housing, as has been done in NYC -- so among existing rental options, helping to maintain its affordability, instead of allowing landlords to keep raising rent year over year.</p> <p>I would also be interested in preserving much of the character of neighborhoods, so not adding a ton of huge generic apartment buildings in new areas of the city, but finding ways to intersperse multi-unit housing and ensure it blends into the neighborhood. It seems that Minneapolis lost a fair amount of its character in earlier decades of redevelopment, some of which St. Paul preserved by its different approach, so if there are ways to preserve the character of Minneapolis that still exists, while still providing affordable housing, that would be a priority for me.</p>	7/21/2018
5400	33	/policies/affordable-housing-production/	<p>I was able to find good info from your blog articles. http://alternatif188bet.com</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5401	20	/policies/transit/	If there are ways to support supplemental transit such as HourCar or Car2Go car sharing programs, that seems like a helpful way to create more options and alternatives to fill in the gaps of transportation.	7/21/2018
5402	61	/policies/environmental-justice/	To minimize the rich vs. poor divide that this plan retains with respect to environmental quality (e.g., by retaining low density in high price areas like Kenwood), I suggest city-wide policies to limit noise, car pollution, smoking outdoors, campfires, and laundry chemical exhaust, etc that will be much more offensive in the dense areas.	7/21/2018
5403	33	/policies/affordable-housing-production/	The plan seems to argue that upzoning single family neighborhoods will help with affordability, but in at least two open houses I went to, planners admitted there is no basis for that affordability argument. The only way that will happen is if you cheapen standards (not requiring as many windows, lowest quality carpet, etc). If the idea is that simply having more housing will eventually lower the cost of all housing, rather than packing 4-plexes into single family neighborhoods, adding more housing would be much better in apartment buildings with elevators that are designed for ALL residents (including disabled)) and that have roof-mounted ventilation systems and other features which upper units of four-plexes don't provide. You would have to convert 44 single family homes to four-plexes to get as many new units as from just one new 132 unit building. As a former four-plex condo owner, I like them, but they are hardly a solution to affordability, and they are not senior-friendly.	7/21/2018
5404	6	/policies/pedestrian-oriented-building-and-site-de	Action Step 6K: There must be a minimum of parking spaces for each house, apartment and business. Do you really want all of the city to be congested and discouraging of business by not requiring parking minimums? This policy is short sighted and a disaster in the making.	7/21/2018
5405	0.1	/topics/land-use-built-form/	<p>Here are our thoughts on the Minneapolis 2040 plan from two very concerned, Fulton residents:</p> <ul style="list-style-type: none"> *We recently moved to the Fulton neighborhood this year (after deciding against building a new home in Excelsior or Wayzata) because of neighborhood feel, unique single family homes, proximity to the lakes, our jobs, downtown, shopping and many other amenities *While we agree that housing costs are high, encouraging density in housing will not guarantee affordable housing. *Without government intervention, developers and investors will charge market rate. *Zoning that permits building multi-family housing where existing zoning allows single-family will remove the already limited supply of affordable houses. The least expensive houses will likely be targeted by investors as sites for potential apartment building re-builds. *Traffic congestion in 50th and France Ave intersection and parking on the side streets is challenging. The existing plan does not require builders to add off-street parking for prospective residents. Adding more residents will likely make parking very difficult for them and for current residents. *More people will be biking in the future? That is not realistic for several segments of existing and future residents (e.g., the elderly, parents with multiple children, the list goes on) The streets may be bike friendly, however our climate is not bike friendly for at least six months of the year (think about global climate change impact on future severe weather). <p>Proposed solutions to grow our city into the future:</p> <ul style="list-style-type: none"> *Focus improving the existing infrastructure. Help people in and around our city access better, more efficient transport to Minneapolis amenities without changing the makeup of individual neighborhoods. *Improve our schools - the focus on helping people access "good schools" in "better" sections of Minneapolis sadly ignores the schools and neighborhoods with serious challenges. Strong education will bring better paying jobs and improve the opportunity for many of us to live 	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5406	0.1	/topics/land-use-built-form/	<p>It is not acceptable to allow 3 and 4 units to built on standard size city lots anywhere in the city, especially without any set back requirements, minimum lot size, maximum square footage for the structure footprint to ensure there is a certain percentage of pervious surface on the lot, mandatory off street parking, or height limits to ensure neighbors to the north of the new construction can still get sunlight.</p> <p>The existing standards for allowable home heights is already to high and is unfair & unkind for adjacent homeowners. this should also be changed.</p> <p>demand to not block the sun.This will negatively impact adjacent homeowners e ithout additional limits including required setbacks from adjacent homes, not blocking sunlight for the house to the north of the new construction, off street parking,</p>	7/21/2018
5407	19	/policies/bicycling/	<p>As an active urban biker and car-owner, I think the biking community needs far better self-policing or the police and park police need to enforce bike traffic. By signaling that itâ€™s OK for bikes to ignore traffic lights and other rules, we are encouraging dangerous behavior, bad for the cyclists and for the cars and pedestrians that are in their way. If we donâ€™t get serious about this, we may end up needing to reinstate bike license laws, but with radio chips in the licenses, so that police can identify the bike and cite its owner.</p>	7/21/2018
5408	1	/policies/access-to-housing/	<p>Action step 1E: What is a "traditional size lot?" My neighborhood has lots of 40' by 125'and it would turn a nice residential neighborhood into a dump if someone built anything other than a duplex on the "traditional lot." Wanting space for your home and a yard for the kids to play in is one of the reasons residents moved to the suburbs.</p>	7/21/2018
5409	0.1	/topics/land-use-built-form/	<p>I am a resident of the Wedge neighborhood, and Iâ€™m writing to express my deep concern- actually, my fear- about the Comprehensive 2040 plan.</p> <p>If allowed to proceed as is, the rezoning aspect of this plan will absolutely strip away every single thing that makes Minneapolis delightful, charming, and livable. I cannot imagine who the people on this committee are to dream up such a plan- have they driven through South Minneapolis?? Do they live there?? Why on earth would you envision a Minneapolis without itâ€™s majestic old homes?? The idea that developers could come into neighborhoods, devouring lots two at at time, rip down unique, historic homes, and instead build ugly, generic, concrete behemoths is simply unconscionable!</p> <p>This plan destroy neighborhoods on so many levels. What makes Minneapolis such a joy to live in? What makes Minneapolis a Mecca for people looking for close knit communities? Why do families choose to live in Minneapolis instead of the suburbs? I would argue that part of what makes Minneapolis such a shining star is its older homes and the people who live in them, lovingly care for them, restore them to their original glory, and create gardens that are fun and individual. Not to mention the old growth trees sheltering these streets and homes and neighbors. You want to allow outside corporate developers to come in and redesign this majestic city? Using the cheapest, ugliest materials possible (of course each home will have unyielding, toxic, plastic laminate flooring), these developers will march through our gracious neighborhoods like Godzilla, devouring our rich history, ripping down stately oaks and elms, and making every block a cookie cutter replica of every other block. Soon our gracious city will be indistinguishable from Des Moines, Phoenix, and Fargo. Just another generic, concrete jungle.</p> <p>I implore you to reconsider the rezoning aspect of the Comp 2040 plan. It will ruin our city.</p> <p>Sincerely, Jen Lubow 2605 Fremont Avenue South #301 Minneapolis, MN 55408 Jlubow@yahoo.com 612-501-3934</p>	7/21/2018
5410	3	/policies/production-and-processing/	<p>The past and current direction of the city has driven out businesses of manufacturing and industries. Your plan is too much policing.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5411	10	/policies/street-grid/	Strategy 10d: What does this mean????	7/21/2018
5412	11	/policies/skyways/	Skyways are a great development for downtown and should be utilized wherever possible downtown. July 17, 2018	7/21/2018
5413	0.1	/topics/land-use-built-form/	<p>Mayor Jacob Frey, Council President Lisa Bender, Council Member Linea Palmisano,</p> <p>I am writing to provide feedback and react to The 2040 Comprehensive Plan for Minneapolis. I have read most of the plan, it is a daunting document. I have also attended a "listening" session for Ward 10.</p> <p>I am a resident of the 13th Ward. As background I was an executive with what is now Ameriprise and worked downtown for 25 years. I was a vice president in our corporate Strategic Planning Department so I have some background in long range planning. I have also run national implementation projects in our sales force. Additionally, I have been and my wife currently is a small business owner.</p> <p>My comments focus on the most drastic and risky change proposed, the rezoning of most of the residential housing in Minneapolis. Your proposed policy 48 states: Use data and research to guide and evaluation housing priorities, policies, and programs.</p> <p>It appears that you are addressing the housing issues with an ideology that is not data based. The Plan does a good job of summarizing historical issues but there is no cause-effect relationship that mass rezoning will solve historical problems. Heather stated at the Ward 10 meeting that other cities, e.g. Seattle, Portland, etc, have not gotten rezoning right. Yet she did not say why they got it wrong and why Minneapolis will get it right.</p> <p>-Where is the data of other successes and failures? -What is Minneapolis doing to remove barriers to success? -What alternatives were considered? If none were developed, this is a red flag.</p> <p>There is data on projected growth, but not on the growth in housing units, or affordable housing units as a result of this plan. Why not? You should have projections by year. Every corporate plan would require projections with sensitivity analysis.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5414	33	/policies/affordable-housing-production/	<p>affordable housing is being talked about in this plan. But unless new affordable housing is subsidized by the government, it will not happen on a scale needed. New construction is just too expensive.</p> <p>New development in the Uptown area are largely for people with mid to high income. The units are getting smaller and the rents are getting larger. Example: the Sons of Norway development of over 300 units, 400 sq ft each, will have starting rents at \$1200/mo. This is NOT affordable. And not sustainable. When young people decide that 400 sq ft units are not going to meet their needs, they'll abandon the city for less expensive housing in the suburbs. It's happening elsewhere in the country. And Uptown will be left with semi-vacant buildings with low demand -- on their way to becoming slums, I'm afraid.</p> <p>A better model. Subsidize converting classic apartment buildings into co-ops. The Nokoma, a small classic apartment building in Stevens Square, was converted to a co-op for people with annual income under \$37,000. A young couple can OWN a 800+ sq ft one-bedroom co-op apartment for about \$800/mo including mortgage and HOA, with a down payment of only \$12,000. This is the way to allow young people to invest in their own future AND simultaneously learn care about the future of their city. It was subsidized by Beacon, a non-profit organization associated with Plymouth Church. Why doesn't the City look at some of the many great classic small apartment buildings in Uptown and incentivize owners to convert their buildings in this way.</p> <p>4-plexes all over the city are not the answer. There is too much leeway for investors to capitalize on this proposal. But DUPLEXES might be part of the solution. I own a duplex and it has been a great retirement plan for me as well as doubling the housing options on the same footprint as a singlefamily home. Owner-occupied duplexes are a plus for the community. People stay longer, improve them over the years, care about their community, because it's their home, not just an "income property." I've lived in my duplex for 24 years. Some of my tenants have stayed as long as 7 years. That's how to create a real, a stable neighborhood. NOT with "junior apartments" or so-called "one bed" studios that people will soon "grow out of" as soon as they want to live as a couple or start a family.</p> <p>Another solution. Allowing "granny-flats" could help everyone and not jeopardize the general appearance of established low-rise neighborhoods. Allowing single-family home owners remodel or rebuild their OWN garages with added small apartments would do a lot to provide TRULY AFFORDABLE housing for both homeowner and renter alike. A home equity loan subsidized by the City -- low interest or no interest, long-term repayment plan -- would motivate RESIDENTS, not DEVELOPERS to come up with creative ways to provide extra housing for the city (and extra incomes for themselves) without wrecking the normal set-backs, volumes, curb appeal and general appearance of residential neighborhoods.</p>	7/21/2018
------	----	--	---	-----------

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5415	1	/policies/access-to-housing/	<p>I do not support rezoning for the insertion of small scale residential rental buildings on traditional city lots that could allow up to 4 dwelling units, including single family, duplex, 3-unit, 4-unit and accessory dwelling unit building types to increase neighborhood density. The small city lots are too small and would not safely accommodate these larger rental entities. With multifamily units there will be an increased need for parking. The residents in these units will have vehicle which require parking, which should not be on the street. Residents within the city have already experienced reduced parking availability. In the winter snow removal is already an issue in the city. On some street parking has been made available on only one side of some city streets.</p> <p>This rezoning/development alters the integrity of neighborhoods. The goal of many families is home ownership. Habitat for Humanity helps individuals help families to achieve this goal.</p> <p>Rental units could alter the stability of the neighborhood. Many families think of renting as a transitional time in their lives and thus there can be significant turnover in apartment residents. This turnover alter the feel and fabric of the neighborhood.</p> <p>This type of development does not address low income or affordable housing. The building of these structure and the other apartment structures put forth in this plan will not lower the rental individual have to pay, but the increase in construction will certainly benefit the developers.</p> <p>It is very important to monitor the stability and quality of the high density rental housing along pubic transit routes. Does the city have the staff to adequately monitor the status of that housing as well as the increase of housing that is projected to come.</p> <p>I lived in a owned a home in a high density neighborhood in Minneapolis and had many occassions where myself or my family were robbed or assaulted (the neighborhood was a mixture of home owners and rental property). As rental units in the neighborhood increased up my experiences with robberies increased until we moved. We/I do not want people leaving Minneapolis.</p>	7/21/2018
5416	16	/policies/environmental-impacts-of-transportation/	<p>Let's be leaders in transportation technology. For example, autonomous trackless trams that run on virtual rail lines and have been tested in China. Australia, Singapore and the UK are leaders in preparing for it. The great news is that it costs a tiny fraction of regular light rail. Let's be leaders instead of trying to match Denver and Portland!</p> <p>"The political, legislative, regulatory and economic issues are going to be much more important than the technological issues," Canberra programmer Kent Fitch said in this article: http://www.abc.net.au/news/2018-07-19/new-technologies-see-light-rail-advocates-change-track/10004258</p>	7/21/2018
5417	0.1	/topics/land-use-built-form/	<p>I am NOT in favor of increasing the density in, or height of, residential structures on this block. I live across the street (even side) and the proposed taller structures would block the morning sunlight and increase street parking, which is already difficult with family density (children with cars) and neighboring churches. The current ratio of 2 duplexes per 25 single-family dwellings between 44th and 45th on Colfax works well yet if exceeded will change the feel from a true neighborhood to a transient place to live where people are not invested in building relationships with neighbors.</p>	7/21/2018
5418	78	/policies/park-design-and-programming/	<p>We have an independent Park Board in Minneapolis. While all these action steps are great, I'm quite sure they are the responsibility of the Minneapolis Park and Recreation Board, and not the purview of the City of Minneapolis.</p>	7/21/2018
5419	0.1	/topics/land-use-built-form/	<p>I'd like every property that abuts a "Goods and Services Corridor" as detailed on the future land use form to be zoned mixed use. Currently, this map seems to merely reflect the current use of each parcel, leaving way too much zoned neighborhood/residential. In a city of increasing density, we should be allowing increasing intensity of use along all parts of these corridors.</p>	7/21/2018
5420	7	/policies/public-realm/	<p>I don't see a policy addressing the core mission of city government -- maintaining the sewer system in good repair -- but maybe I missed it. The sewer pipes under many streets are 100 years old. Many main lines from homes in my old neighborhood have recently been repaired or replaced; is the sewer system likely to develop problems in the near future as well?</p>	7/21/2018
5421	68	/policies/energy-efficient-buildings/	<p>All city buildings should harness solar power, and the city should continue to look for opportunities to run its own utilities in the future, to pressure Xcel and CenterPoint to be better stewards of the environment.</p>	7/21/2018
5422	84	/policies/public-safety/	<p>Does the City need to plan and budget for protection of our internet and communications infrastructure?</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5423	49	/policies/educational-and-economic-access/	<p>The action steps in this policy are so broad they seem unachievable. For instance, Action Step C essentially outlines maintaining the status quo and outlines multiple goals within the action step which are huge unto themselves.</p> <p>If the goal is also way too broad. The steps to achieve educational access and to achieve economic access may not be the same steps. Honestly, this goal is obviously about economics and not about education. You should be clear and strip education out, as it is getting only lip service here.</p>	7/21/2018
5424	63	/policies/food-access/	I see nothing about support for community gardens - seems a no-brainer to me.	7/21/2018
5425	0.1	/topics/land-use-built-form/	It is with urgency that we need to change our living patterns; we continue to devastate our environment with our spread out cities, polluting individualized transportation choices, big-box retail, sprawling developments, etc. A denser city is a more sustainable city. I don't believe a city with more housing and greater density is the cure-all for reducing our inequities and disparities - and this plan is lacking in prescriptions for ensuring housing affordability and equal opportunities for all - but increased density is necessary if we are to make strides in limiting our waste, our pollution, and our wasteful land use. To that end, this plan doesn't go far enough in allowing for increasing intensity of use throughout the city.	7/21/2018
5426	0.1	/topics/land-use-built-form/	<p>The Kenilworth Corridor should not be designated for development. This area, now greenspace, woods and prairie restoration, is intended to be protected as public park space per a 2014 Memorandum of Understanding between Met Council and the City of Minneapolis which states</p> <p>“The council intends that any property located in the Kenilworth Corridor that it may acquire from the Hennepin County Regional Rail Authority that it will not actively use for either the (SWLRT) Project or freight rail shall be conveyed to the Minneapolis Park and Recreation Board for use as parkland upon terms and conditions that are agreeable to both the Council and the Park Board.”</p>	7/21/2018
5427	79	/policies/healthy-youth-development/	<p>The first 3 of these action steps seem particularly fuzzy - they seem like filler.</p> <p>We are going to have to spend a lot more money than we are spending now on child protection services, foster care, emergency shelters, drug treatment, young offender diversion, and low-cost counseling, longer-term therapy. All kids and young adults should have a place to play sports, and a way to get the equipment if they don't have it.</p> <p>We need more mentoring, big-brother/big-sister, and take-a-kid-to-work programs.</p> <p>And their parents need access to free/low cost child care. Well-baby and basic child healthcare should be free.</p> <p>Their parents need free or low/cost transportation.</p> <p>Improving the welfare of our children is my highest priority. I am willing to pay more taxes to make that happen.</p>	7/21/2018
5428	25	/policies/innovations-in-transportation-and-infras	Graph shows electricity to be the largest % of the emissions yet you are supporting electric cars. Where is data about age composition of city residents in 2040? Families cannot use bus, walking or riding a bike to get kids to sports events, to get from work, then to school, then to home and still have time for homework, dinner, etc. Older people and women of all ages are not going to be walking the streets in the dark or on the ice. All your friends can't live in YOUR "complete" neighborhood.	7/21/2018
5429	76	/policies/new-parks/	There should be a park comparable to Minnehaha or Bde Maka Ska on the near north side.	7/21/2018
5430	1	/policies/access-to-housing/	I am deeply concerned about the idea of allowing a proliferation of multi-unit dwellings in traditional single-family home communities. This will lead to greater congestion, parking scarcity, and neighborhood transformation that is driven by commercial developers and gentrifiers rather than the stated goal of addressing legacies of racism endemic to so much housing policy during the 20th century.	7/21/2018
5431	39	/policies/fair-housing/	What ever does this mean??	7/21/2018
5432	2	/policies/access-to-employment/	A critical assumption of this policy rests on the assumption that we have a quality public transportation system here and that people will use it. What is driving this assumption? Yes, we have light rail and buses but there is still enormous reliance on cars as the primary transportation system. If this doesn't change this plan will simply increase gridlock throughout the city.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5433	82	/policies/aging/	How?? At this point, the city is making it more difficult for this population to get around in the city. Adding bicycle lanes on main thoroughfares rather than giving bicyclists a separate street makes the traffic unbearable and dangerous. Getting over the piles of snow at every corner and the unshoveled sidewalks makes it hard to walk anywhere.	7/21/2018
5434	14	/policies/tree-canopy-and-urban-forest/	The strong advocacy in this proposal for greatly increased high density housing is a direct assault on the urban forest of Minneapolis. The types of housing contemplated will block sunlight and use land that will threaten not support our urban forest.	7/21/2018
5435	42	/policies/expand-homeownership/	Some kind of grants? Funding for things like a downpayment, buying points to lower the cost of a mortgage, necessary improvements/maintenance would all help lower income people get into a home.	7/21/2018
5436	93	/policies/stewarding-historic-properties/	Develop and provide incentives that encourage the preservation of historically significant properties, recognizing that owners will bear significant costs. Support the development of strategies that will harmonize the need for modern conveniences in older buildings with a desire to preserve the historic character of areas and structures.	7/21/2018
5437	38	/policies/affordable-housing-near-transit-and-job/	The term "large-scale development" in relation to housing makes me think of the Riverside Towers, or the stark, plain, ugly brick high-rises on Franklin Avenue. Building those types of things will harm the areas in which they are built, and the only people who will really benefit are the out-of-state developers who build them.	7/21/2018
5438	36	/policies/innovative-housing-strategies/	Good large scale development might exist, but I don't think we have any in the City now. What is going to be different? This is so diffuse as to be meaningless.	7/21/2018
5439	80	/policies/development-near-metro-stations/	I applaud the goal to develop near Metro stations. This will be key, given the increased development in Minneapolis. That said, while public transportation has improved, there's a significant amount of improvement still to go to make the city as viable and effective as this policy implies. Cutting routes won't help. It's counterproductive for people to have to take 2-3 buses to get to work; or to take twice as long taking the Green Line between downtown Minneapolis and downtown St. Paul as it would take to drive (and park); or if someone works weekends, it's 30 minutes to an hour between buses. Currently, transportation is in no way able to handle the population density proposed in this plan. Further, this plan appears not to address this shortfall.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5440	53	/policies/quality-of-life/	<p>I think we should put something in our plan like they have in Oak Park, Ill plan. I think we're missing a "Community" topic! https://www.oak-park.us/sites/default/files/planning-documents/2014-09-15-envision-oak-park-comprehensive-plan-small.pdf</p> <p>Supporting Neighborhood Organizations Objective 7.2.4. Expand the presence of neighborhood organizations to enhance local communication networks and allow residents to improve the broader Oak Park community through neighborhood-based involvement.</p> <p>The Southeast Oak Park Community Organization, or SEOPCO, was founded out of the residents'™ desire to preserve Barrie Park. Today, the organization provides a variety of services for residents, including events, awareness, updates on local and community-wide initiatives, and more. In many areas of Oak Park, the block serves as the social unit. However, the Village should support the creation of new neighborhood organizations that would serve as resources for maintaining open communications with municipal staff and elected leaders, and for encouraging participation and interaction at a broader le</p>	7/21/2018
5441	0.1	/topics/land-use-built-form/	<p>Awful. Simply awful. Worst plan ever. Leave our zoning alone and scrap this entire plan. You are cocking this up so badly. You are the worst city council ever, like really, ever.</p>	7/21/2018
5442	0.1	/topics/land-use-built-form/	<p>As the owner of a condominium at Calhoun Place, on Excelsior Blvd, I am horrified by the amount - and height - of buildings proposed for this area. Not forgetting the resultant large increase in people, requiring additional services. There is already significant traffic issues and dangerous pedestrian crossings, particularly where Lake and Excelsior roads meet. I feel that the large increase in tall buildings will also obstruct the views of Lake Calhoun and completely change the character of this area. I cannot understand why one would seek to massively develop a unique neighborhood next to a lake area that is enjoyed by many - not only those living nearby.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5443	0.1	/topics/land-use-built-form/	<p>Please refer to general comment submitted.</p> <p>Commentary on the 2040 Draft Comprehensive Plan for Minneapolis</p> <p>Dr. William Tozer w.tozer@williamtozerassociates.com</p> <p>Summary of Recommendations</p> <p>In summary, I would argue that the Land Use and Built Form components of the Draft 2040 Comprehensive Plan for Minneapolis require significant and substantial revision before they should be approved. Even if widespread corridor development is a longer-term goal, the current plan under consideration should concentrate on fewer, already-burgeoning corridors such as Hennepin, Lyndale, Nicollet and Central Avenues” rather than risk spreading building investment too thinly, and consequently achieving very little positive change to the urban space of any of them. The final version of the 2040 Plan should dispense with the proposals for new corridors in favor of strategic nodal development to facilitate possible future corridors without causing destructive changes in the immediate ten-year time frame. The 2040 Plan also needs to be revised to offer finer-grained restrictions on height, density and setbacks that ensure development is sympathetic to existing buildings and residents in distinctly different existing neighborhoods” and to allow for and encourage more organic growth and change. Finally, I would propose that the new Comprehensive Plan for Minneapolis needs to include proposals to improve access to parks and urban outdoor space, including leveraging the unique characteristics of the Minneapolis”s lake setting. In conclusion I would suggest that while the name of the Comprehensive Plan currently under review” Minneapolis 2040” is intended to show consideration of a longer time horizon than the immediate ten-year remit, it has been over-zealous in doing so and has looked much further ahead” to the detriment of the current situation and needs. The final version of this Comprehensive Plan for Minneapolis needs to focus more keenly on the time frame in hand, albeit with an eye on much longer term goals.</p>	7/21/2018
5444	19	/policies/bicycling/	Can some streets be designated for bike lanes and buses, like Bryant Ave. S, instead of putting cars, bikes and buses together?	7/21/2018
5445	5	/policies/visual-quality-of-new-development/	Make sure there is adequate parking, particularly for multi-unit rental property. I believe the law was changed awhile back, and that was a huge mistake. Things are just too crowded.	7/21/2018
5446	24	/policies/shared-mobility/	What happened that "car-to-go" left Minneapolis? That is a model that has been successful in other cities? Why not here?	7/21/2018
5447	71	/policies/soil-health/	The city has adopted a policy of using no pesticides on city property and encourages citizens to do the same. It is not promoted or advertised much. There are so many lawn services still using harmful chemicals and using lots of leaf blowers. It would be awesome if the city could do more to promote electric lawn mowers for homeowners, fewer leaf blowers and non-chemical lawn care as part it's soil health and air quality.	7/21/2018
5448	1	/policies/access-to-housing/	We do NOT want multi-unit housing on single family residential streets that happen to be adjacent to 50th, Penn, and Xerxes Aves S in Lynnhurst. Teardowns will occur, and expensive 3 to 6 story apartment buildings are inappropriate for quiet single family neighborhoods.	7/21/2018
5449	5	/policies/visual-quality-of-new-development/	I think that Minneapolis needs to demand more of developers in terms of visual quality and building quality. There have been very nice buildings constructed and there have been others that look like they will not last 20 years and that are just plain ugly. Architectural variety is fine but it should be attractive and enduring, not with cheap windows and ugly colors. That is some of the push back that is happening from residents. They don't trust some of the plans to allow more development because they don't trust that it will be attractive and durable based on some of the buildings they have seen go up. If Minneapolis is environmentally conscious, then attractive, good quality buildings that can stand the test of time need to go up. Not something that will be torn down in 20 years because it wasn't done right the first time.	7/21/2018
5450	5	/policies/visual-quality-of-new-development/	This is so important to get right. I would go so far as to say that some spots deserve a higher level of protection, even design standards for new facades. I am thinking of the places where you find several houses in a row, or even a whole block, that were clearly built from the same basic set of plans, or by the same builder 50 or 60 or 70 years ago. Now they look different from each other, but the same, too. There is something about those pockets of sameness that is part of what makes a place feel like a neighborhood. I can't think of a better way to say it, but I think it's important.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5451	0.1	/topics/land-use-built-form/	It is completely inappropriate for the Lynnhurst neighborhood along 50th Street to be zoned to tall apartment buildings. My single family reasonably affordable house which is mid block on Logan Ave S adjacent to 50th could be torn down and a 3 story four plex built. This would NOT be a low income apartment building considering the property values in this neighborhood. It's nonsense density increase for no reason except to increase the property tax base. Get rid of the up-zoning in single family house neighborhoods.	7/21/2018
5452	0.1	/topics/land-use-built-form/	i love more housing option and the different option to add density, such a duplexes, fourplexes, and adus.	7/21/2018
5453	49	/policies/educational-and-economic-access/	<p>"Support businesses in providing fair wages and worker protections." Too vague. What will the City do, when will it get done, how much will it cost?</p> <p>"Increase job training, youth apprenticeships, and transitional and temporary employment opportunities." What is the City already doing? What does "increase" actually mean, how measured? Is there a 10 year plan?</p> <p>"Continue to work with the MPS....eliminate racial disparities in access....? What is the City already doing? What will happen in next 10 years, how measured?</p> <p>"Recruit and retain a diverse City workforce that reflects the demographics of the city." Where is City now? What is the goal?</p> <p>Why isn't the Civil Rights Dept. included here? My perception is that it used to be stronger and more active than it is today. How is contract compliance doing and what are the goals for 10 years from now? What about teaching people to use this service if they suspect they were denied access to education, employment and housing? How about proactive studies and enforcement?</p>	7/21/2018
5454	74	/policies/integration-of-water-management-into-	Make it a requirement that larger developments meet with the local watershed district. Look to the living building challenge for other requirements and policies around water.	7/21/2018
5455	51	/policies/healthy-pre-k-development/	We need more bike/pedestrian/transit accessible child care center in all our neighborhoods. make sure there are enough mixed use lots to develop walkable childcare in each neighborhood.	7/21/2018
5456	50	/policies/access-to-technology/	<p>"Facilitate digital literacy and access to technological tools for residents to use in finding jobs, interacting with government and connecting with one another." How will City do this? How many served each year? At what cost? Will City evaluate outcomes?</p> <p>"Remove barriers to private development of citywide information infrastructure." What, exactly, does this mean? Is this the City contracting with private companies for City infrastructure needs? Or is this letting the cell phone and cable companies do whatever they want? Too vague.</p> <p>"Proactively ensure that all residents have equal access to information infrastructure." Again, vague. Does this mean connections for every residential structure? Will the City provide equipment and cell phones on a sliding fee scale?</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5457	0.1	/topics/land-use-built-form/	<p>This approach to upzoning to create high density housing is problematic in many respects.</p> <p>a. Removing significant amounts of existing affordable single-family housing to develop multi-family units on multiple lots is in direct opposition to several policies that focus on preservation of naturally occurring affordable housing, managing gentrification, expanding home ownership, development benefitting the communities (e.g., Policies 42, 43, 44, 45, 47). For example, the blocks along Minnehaha Avenue and adjacent interior half-block that would be rezoned to Corridor 4 and Interior 3, respectively, could remove as many as 30 affordable single-family homes in each block. These houses in the greater Longfellow neighborhood are largely considered affordable entry-level and move-up properties. The availability of affordable single-family housing is a well-cognized problem in the city. From a recent story by Minnesota Public Radio: Demand is strongest in the Twin Cities for entry level homes – those that cost less than \$300,000 – followed by so-called "move-up homes" – which sell for between \$300,000 and \$450,000. If developers aren't building new homes within those price ranges, the Twin Cities' near record-low housing supply will continue to shrink – and affordable housing will become harder and harder for the middle class to reach. In an area that's expected to add 780,000 people over the next 10 years, that worries planners at the Metropolitan Council, economists and homebuilders like Heuer. "I've got young daughters, from 18 to 30, and they will struggle to buy homes," Heuer said. "As our prices increase and less people are able to buy homes it leads to increasing inequality. The biggest way people build wealth in this country is by buying a home." https://www.mprnews.org/story/2018/07/03/starter-homes-twin-cities-metro-prices</p> <p>b. Restricting the expansion of Interior 2 designation to the neighborhoods closest to downtown appears to perpetuate the noted discriminatory housing policies that the Plan purports to address. Why shouldn't lots be combined and multifamily units be built in Linden Hills neighborhoods under Interior 2 zoning as proposed for Cooper, Central and North side neighborhoods? If "complete neighborhoods" are the goal throughout the city, then the upzoning should be equally applied throughout the city.</p> <p>c. Concentrating and expanding high density housing in the inner city does not necessarily speak to the environmental goals and policies of the plan:</p> <ul style="list-style-type: none"> i. High density buildings that displace green space exacerbate the urban heat island effect. We need to reduce the impermeable area with more open/green space and trees, not less. ii. One of the comp plan's principles is that more people will use public transit to reduce pollution. Reality is that car ownership is not going away in this northern climate. Perhaps a more practical focus should be on preparing for and encouraging the inevitable growth and dominance of low/zero-emission vehicles (including public transit) such as electric cars well before 2040. iii. Removing greenspace from our inner city further removes people from a relationship to the out-of-doors. This disconnect from the natural environment is a well-recognized problem for society as a whole. Maximizing opportunities for families to have access to greenspace, for children to play in yards, for people to grow vegetables and pollinator-friendly gardens should be a significant consideration 	7/21/2018
5458	1	/policies/access-to-housing/	I fully support this part of the plan. Zoning codes should be updated to allow higher density throughout the city, especially close to transit lines, downtown, major highways/arteries and commercial districts. No neighborhood should be able to block upzoning because of claims that it will alter its 'character.' All areas of the city must be open to new development. Let the market, not NIMBYism decide and denser construction will happen where it makes sense to do so.	7/21/2018
5459	85	/policies/access-to-health-social-and-emergency-s	we need to have high quality housing options for all people. place where people can feel dignified. look at skid row housing in LA and how the building well designed place for people to live. then integrate innovated programs where people can slowly work their way out of poverty.	7/21/2018
5460	46	/policies/healthy-housing/	Check out skid row housing trust!!	7/21/2018
5461	35	/policies/innovative-housing-types/	Please, please, please stop the McMansions.	7/21/2018
5462	34	/policies/affordable-housing-preservation/	Removal of large amounts of affordable single family housing to accommodate multi-unit buildings along transit corridors and interior 2 and 3 designated areas does not support this goal. Affordable housing such as are found in the traditional bungalow neighborhoods are a draw to young families. They invest in the houses, improve them, send their children to Minneapolis Public Schools and support the community in so many ways. Multi-unit housing will not provide the kind of housing that many young families desire and they will be lost to other communities that have placed a priority on preserving single-family housing.	7/21/2018
5463	19	/policies/bicycling/	provide more support for existing businesses to put in covered staff bike storage, and also to provide grants for more bike racks outside businesses.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5464	58	/policies/business-districts-and-corridors/	Looks at the Minnehaha-Hiawatha corridor, and help brand this as the Min Hi Line. Also, help brand growing business districts within neighborhoods, such as in Longfellow by the riverview theater or Nokomis east by town hall lanes. Also, partner with art groups, such as LOLA (league of longfellow artists)	7/21/2018
5465	17	/policies/complete-streets/	What about "blue streets" or "green streets". Look at what portland is doing with green streets. In April 2007, the Portland City Council approved a Green street resolution, report, and policy to promote and incorporate the use of green street facilities in public and private development.	7/21/2018
5466	51	/policies/healthy-pre-k-development/	<p>"Increase early childhood screening before or at age 3." Does the City do this? If so, what is present rate? What is City goal for increase each year for next 10 years?</p> <p>"Improve mental health services for children ages birth to 5." Is there a problem with providers? If so, isn't this an issue for medical community and the State? What improvements does the City want to see?</p> <p>"Decrease language disparities among children ages birth to 5 by promoting the importance of reading, talking and singing to babies and young children." A laudable goal. This sounds like a pr campaign. Will it be internal or contracted out? How much money to reach how many people?</p> <p>"Increase access to prenatal care and targeted home-visit services for new parents, including fathers." Does the City do this? If so, how will access be increased?</p> <p>"Increase resources and support for low-income families to foster economic stability and access to healthy and safe housing." What kind of resources and support will the City offer? What is the current number of people served? What kind of increases does the City want to see? Might the City start by funding the needed repairs at Glendale to preserve that family housing that fosters economic stability?</p> <p>"Increase resources for low-income families to access high-quality early learning programs to promote kindergarten readiness." So, will the City provide grants for these kids to use at local nursery schools and park pre-K programs? What other resources is the City thinking about? Starting nursery schools?</p> <p>"Increase the number of high-quality child care slots in Minneapolis." Isn't this a State and County issue? If not, what is the base today and how many slots per year increase does the City want to see? How will this be done?</p>	7/21/2018
5467	49	/policies/educational-and-economic-access/	We need to have the best school in the metro! This is why a lot of people move out of minneapolis.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5468	0.1	/topics/land-use-built-form/	<p>I think that your zoning changes are sudden and drastic compared to how the city has been zoned until now. That is a drastic change to open up ALL low density residential areas to housing that includes not just duplexes, but also four-plexes on single city lots. I think you should start more gradually than that. I agree with the idea of higher density on transit lines and I like the idea of a bit less density on the back side of the blocks from the transit lines (interior). But I believe that in areas that are currently low density, you should limit those to duplexes for interior 1, and that in areas where there is no interior 2 in your plan (and it jumps from interior 1 to interior 3) you should change interior 3 to interior 2 for now. Some of the zoning changes are too drastic and open up Pandora's box to developers to potentially tearing down too much. Once you open that up, it's going to be hard to go back. Take it a step at a time and don't rush into it. You could really screw up the character of many neighborhoods by overdoing it right off the bat. And if part of your vision is heritage preservation of built housing, don't overly encourage teardown and rebuilding of current structures thru blanket zoning changes without considering the character of each neighborhood. Sometimes one size does not fit all. I think you should look more closely at what is currently there in each neighborhood to determine zoning changes and have the neighborhoods weigh in on where zoning changes should occur. Plus, a lot of new housing in single family neighborhoods is not going to be affordable housing, maybe relative to owning a home it will be, but it will be density, not affordability. Also, please don't overbuild the area northwest of Bde Maka Ska. Traffic is already terrible thru there and it's in general not an easy area to navigate by any form of transportation. Please consider the quality of the lakes, the air, and the water there. Why over-love an area that people love for it's beauty. It will no longer be beautiful if overbuilt and over-loved. Keep it an area accessible for the public, not everyone trying to get a private view of the lake.</p>	7/21/2018
5469	53	/policies/quality-of-life/	<p>Our wide avenues lined with single-family houses set back from the road where boulevard trees have room to arch over the roadway are such an asset to this city and speak to our high quality of life. A drive down re-constructed Minnehaha Avenue gives one the feel of being somewhere other than in the middle of a large city--it's so inviting. The renderings of Corridor and Interior 2/3 buildings are hardly so inviting. Eliminating existing single family housing and replacing it with large multi-unit buildings will significantly change the character of the neighborhoods which cannot be brought back once gone. Large multi-unit housing should be limited and carefully located throughout the city to minimize the degradation of our strong neighborhoods and allow those residents to become part of the community instead of being isolated in buildings surrounded by busy streets and other tall buildings.</p>	7/21/2018
5470	49	/policies/educational-and-economic-access/	<p>Not sure if I missed something, but on each graph, there is no explanation of what the yellow line is...is that white people?</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5471	55	/policies/business-innovation-and-expansion/	<p>"Promote the local ecosystem for innovation and entrepreneurship." This is totally not clear especially as the overwhelming local ecosystem is the built environment. Is this urban agriculture?</p> <p>"Connect entrepreneurs, with a focus on women, indigenous people and people of color, to resources, including market information, talent, other support organizations, technical assistance, real estate options and capital." Does this mean making referrals? If so, who, at what cost, projected numbers of people served.</p> <p>"Promote business startups and expansions." Is this CPED or a promotional campaign? More detail needed. Also, establish goals or benchmarks.</p> <p>"Attract new capital for entrepreneurs and startups." How much capital over 10 years?</p> <p>"Explore zoning modifications that reduce or eliminate barriers to innovative and alternative uses of space, especially for smaller-scale entrepreneurs." Too vague. Either explain why this can't be handled through zoning process, including conditional uses or zoning code amendments, or delete.</p> <p>"Support connections between academic research and private industry." If this isn't going to be somebody's job, delete it. (Have the City Council pass a "support" resolution. Done.) If it is somebody's job, explain why the City is spending funds on this.</p> <p>"Coordinate with the strategies and actions of the state, county, Greater MSP and other regional partners." This sounds like pre-approval of others' strategies and actions. Revise to "Monitor." Add coordination where this action furthers City plans.</p> <p>"Align City policies and resources toward attracting and retaining businesses with low negative community impacts that provide a high density of quality jobs or otherwise significantly enhance the vibrancy of the regional economy." Vague.</p> <p>This section is nebulous. The Met Council is predicting that the City will add 17,000-18,000 jobs between 2020-2040. Where will they be? Hospitality, transportation, trades, tech, health care, communication, etc.? Nobody expects an exact prediction but a plan that focuses on sectors from education/training to recruitment and placement, with opportunities for entrepreneurs, would be more practical.</p>	7/21/2018
5472	56	/policies/supporting-small-businesses/	<p>"Create opportunities for Minneapolis small businesses, prioritizing those owned by people of color, women and those with low incomes, to close the equity gap." Does the City have a set-aside program? If not, will it implement one?</p> <p>"Increase the participation of small businesses in City procurement contracting opportunities." Kudos to Purchasing for progress already made!</p> <p>"Diversify business technical assistance tools and programs by creating niche-based programs." This is not clear.</p> <p>"Coordinate with stakeholders to identify and improve opportunities to support small businesses." Too vague. Delete.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5473	2	/policies/access-to-employment/	<p>"Develop minimum development densities for downtown and areas served by regional transit lines to ensure that enough land is available to accommodate projected employment growth." This is probably a mistake, overplanning. New businesses and jobs are more likely to locate outside of downtown where real estate is cheaper. Bus routes can change. More importantly, if you want to create a walkable city life, then it is time to envision jobs + housing + shopping within walking distance.</p> <p>"Guide new office and institutional uses to locations well-served by public transportation." Most of the City is well-served by public transportation and the City can advocate for bus route changes if needed. Plus workers tend to need only two transports a day, usually during rush hours. Again, it's more important to have housing the workers can afford and shops the workers can afford nearby for walkable city living.</p> <p>"Encourage large medical, educational, and cultural institutions to grow within their existing footprint, especially where territorial expansion would result in a reduction of housing stock." Alternately, require large institutions to replace lost housing units, preferably with housing affordable to low-income to very-low-income people.</p> <p>Missing from this discussion is telecommuting or working from home. The City might consider using it's financial position in subsidies, purchasing and contracts to encourage this practice. Based on positions, the City might take the lead in promoting this practice.</p>	7/21/2018
5474	31	/policies/creative-workers/	<p>"Creative workers" seem to have become the deserving poor. Why is this plan focusing on "creative workers" and not recreation workers, child care workers, home care assistants, laborers, etc. Is a muralist more deserving than a health care translator? A potter worth more than a rehab carpenter? A singer worth more than a park maintenance worker? I know the muralist, the potter and the singer and they are the same as the translator, the carpenter and the park worker. Two of the three are no longer employed in 'The Arts' but, of course, they are still creative people. It's not fair to single out one field to the exclusion of all others. All workers deserve support.</p>	7/21/2018
5475	42	/policies/expand-homeownership/	<p>This policy does not do enough. The City needs to establish and financially support paths to homeownership. Look to the past and bring back programs that worked including down payment assistance, closing cost grants, co-ops, co-mortgages, sweat equity, land trusts, forgivable rehab loans, etc. Some of this can come from City bonding. Most will have to come from the State and the federal government. So advocate until the funding is secured. The boomers had these types of assistance. The parents of the boomers had the G.I. Bill. Our tradition has been to help folks into home ownership and this is greatly needed again by the Millennial generation.</p>	7/21/2018
5476	34	/policies/affordable-housing-preservation/	<p>"The City will seek to accomplish the following action steps to preserve existing housing using targeted, priority-based strategies." What are the targets and what are the priorities? This is The Plan - these should be stated.</p> <p>a. "Create and strengthen strategies to retain naturally occurring affordable housing." This would be passing an unknown. What are the strategies?</p> <p>b. "Create strategies to retain existing housing types that are not currently being constructed in the marketplace, such as single room occupancy, large family and multigenerational housing." Is this supposed to be an exception to a.? Because, except for high rises, mid-rises, ADUs, and McMansions, I haven't seen any existing housing types currently being constructed.</p>	7/21/2018
5477	1	/policies/access-to-housing/	<p>Protect existing industrial/commercial zoneings to allow for sustaining and growing arts production and small businesses, and especially within the Northeast Minneapolis Arts District.</p>	7/21/2018
5478	3	/policies/production-and-processing/	<p>Add Arts Production as a protected class for production processing areas.</p>	7/21/2018
5479	5	/policies/visual-quality-of-new-development/	<p>Require City funded projects to include public art which is purchased locally.</p>	7/21/2018
5480	30	/policies/arts-and-cultural-assets/	<p>Protect the existing infrastructure of production space within the Northeast Minneapolis Arts District.</p>	7/21/2018
5481	31	/policies/creative-workers/	<p>Provide Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of space forcing artists out of the City.</p>	7/21/2018
5482	56	/policies/supporting-small-businesses/	<p>Add artists to this section (Support the development and growth of small business and artists.)</p>	7/21/2018
5483	58	/policies/business-districts-and-corridors/	<p>g. Support the existing Arts Districts</p> <p>h. Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5484	81	/policies/social-connectedness/	<p>*Support the existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community.</p> <p>*Preserve existing buildings.</p>	7/21/2018
5485	1	/policies/access-to-housing/	<p>I am a resident of a neighborhood interior and object to changing the zoning. I rented for 10 years before owning. I can attest that renters simply do not value or care for the property the same way owners do. We view the property as not ours to maintain and temporary. The result to the property is obvious. One simple example is the difference between the street in Grand Ave and 38th Street with multiple 4 plexes, and the streets just one or two blocks over.</p> <p>Home ownership should be promoted and more widely available. I would love increased diversity in our neighborhood and support policies that increase ownership opportunities.</p> <p>We can not deny the pride and care that goes along with ownership versus renting. Increased rental properties in single family neighborhoods will inevitably bring down the value of the properties as a whole. If the new zoning is implemented, my family will keep and close eye on the possibility of moving before home values decrease.</p> <p>My hope is the plan truly understands the value of single family home neighborhoods and works to promote access to ownership over merely allowing developers to come in and create multi unit rentals.</p>	7/21/2018
5486	0.1	/topics/land-use-built-form/	<p>What you have done to the Linden Hills neighborhood is disgusting. The Sheridan Ave corridor and surrounding streets (Upton & Linden Hills Blvd) are grossly over-zoned for apartments and large complexes. This will kill our land value and degrade our neighborhood community. All of those areas should be rezoned to Interior 1 and Interior 2 built form districts. This is an egregious grab by developers and our community will suffer. You should come and meet the people in these houses and areas you are re-zoning. It is wrong of you to do this to our neighborhood.</p>	7/21/2018
5487	51	/policies/healthy-pre-k-development/	<p>Within this goal, this is the only policy that is directly focused on education and education preparedness. Given the importance of pre-K education and access to quality daycare and pre-k education in predicting long term educational success and economic success as an adult, I am so surprised that there is not more focus on education in the overall 2040 plan. Honestly, affordable housing doesn't matter if your workforce isn't prepared, and parents can't find affordable childcare for their children.</p> <p>I have a five year old daughter who has been in a daycare downtown Minneapolis near my work since she was six months old. I was on a waiting list for the first six months of her life and cobbled together care with relatives. When her spot opened up, her infant care was \$1,700/month. Her toddler care was \$1,450/month. Her little kid care was \$1,330/month. Over the last five years I have paid between \$15,000 and \$20,000 per year to ensure she has quality, safe daycare. In total I have paid almost \$100,000 since she was born for childcare; she is only five years old. I make well above the average income in Minneapolis, but for childcare within the city, the rates are so unbelievable high, especially in and around downtown. Greater, specific focus here and on true pre-K access would set Minneapolis apart so much more than a complex housing policy. Advancing, and doubling down on our legacy of great education and partnering with the Minneapolis schools to create a powerful public/municipal/private partnership to education would be a powerful statement about our commitment to the future.</p>	7/21/2018
5488	93	/policies/stewarding-historic-properties/	<p>What about neighborhoods with historic homes that are not historic districts? How do we keep 1.5 story houses with character and history that make up the fabric of some neighborhoods from being torn down or crowded out by new construction four-plexes?</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5489	1	/policies/access-to-housing/	<p>I oppose Action Step e. because it would change the nature and uniformity of my SF neighborhood. I chose to live in the Armatage neighborhood because it was almost exclusively made up of SF residences. Also, these types of neighborhoods have been the backbone of the city, providing residents with a safe place to live and engage one another. I grew up in Detroit, MI leaving in this type of neighborhood. I chose Armatage to give my kids the same opportunity and I want die living in my SF residence. Lastly, it's not fair to change the rules on a property owner when the ordinance/zoning of said property is the reason why you purchased it. We're not Houston, TX!</p> <p>Reasons why such a change in zoning will not produce the desired increase in affordable housing units.</p> <p>1. I'm a banker by profession and I teach economics PT at MCTC. I understand how markets work and how RE developers make money. The proposed idea to allow new, 4-unit structures to be built on SF lots would result in units that would be priced at a level to allow for a reasonable profit to the developer. The expense of building such a structure + the relative attractiveness of this type of neighborhood would produce a "market" rate rent/purchase price that would be out of reach for the underserved community looking for affordable rents.</p> <p>2. Smaller SF residents such as mine would be the first structures to be targeted by developers for teardown and construction of a 3- or 4-unit building. There are many citizens who are in search of this type of property. Why would we ever reduce this highly desirable, more affordable SF option? The city would be promoting the elimination of this housing option through this proposed policy.</p> <p>Observation: Knowing that this idea would create quite a stir in many SF resident neighborhoods, why wouldn't the city engage its citizens in talk-back sessions to determine whether such a proposal would serve the interests of the citizenry? According to your maps, there were no talk-back sessions (2016 or 2017) in SW, SE or NE. Why were these areas of the city excluded from this important community engagement tool?</p>	7/21/2018
5490	10	/policies/street-grid/	<p>Mndot needs to be a part of this and share in this goal. Minneapolis didn't take advantage of BLRT to rectify 6 lanes of Olson Memorial Highway cutting off near north. If we couldn't stand up Mndot and get lane reduction with the Bottoneau LRT, who's to say we'll ever be able to stand up to Mndot. North is cut off from the river with an incredibly wide right of way that extends way beyond its need for traffic capacity.</p>	7/21/2018
5491	1	/policies/access-to-housing/	<p>As the owner of two units of currently affordable housing (Duplex) I find it ironic that the property tax and soon the rental license fees are increasing at an alarming rate. These costs will have to be passed on to the renters. Also studies have shown that increasing supply as in changing zoning requirements does not necessarily translate into affordable housing. Home ownership is the goal of most renters and generally leads to more neighborhood involvement. As a city we need to push more in this direction. There are new technologies that drive down the cost of construction and we need to focus more on ownership.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5492	36	/policies/innovative-housing-strategies/	<p>These action steps for exploring new strategies make a great deal of sense. However, I'd like to remind the City that we did enter into a massive conversation about and took action on addressing affordable housing with NRP 1 and 2. Having participated in both programs in three different areas of the city, I can say the NRP was a great tool to increase/promote engagement on housing issues. The City should consider launching NRP 3.</p> <p>Much of the 2040 document and process feels like a "top-down" approach which doesn't inspire confidence among the citizens of this great city. Why re-invent the wheel when we already have NRP as a good guide book.</p> <p>Also, given that the city says it has limited resources, it could focus NRP 3 exclusively on several underserved areas like north and near south Mpls. Let the citizens in those affected areas help draft the plan to bring affordable housing to their neighborhoods. As a reminder, the city did conduct feedback sessions in these neighborhoods. We know that they want affordable and safe housing. Now it's time for the city to step up and find ways, including working with Hennepin County and the State of Minnesota, to make this happen.</p> <p>Lastly, the city needs to put some dollars behind the concept of re-introducing new, affordable housing units through the cooperative housing model. I work in this field and I'm amazed that the city hasn't done more to promote this "commonsense" idea and provide capital to help these citizen groups create this type of housing.</p>	7/21/2018
5493	17	/policies/complete-streets/	With biking as a higher priority over autos and the costs associated with maintaining bike lanes and biking/walking trails we need to consider licensing bikes as we do cars. Also discouraging cars can drive out good tax paying citizens who need cars for their jobs or for their commute to the suburbs.	7/21/2018
5494	25	/policies/innovations-in-transportation-and-infras	I am not sure where to put this comment but I can tell a lot of work has gone into this plan, much of which is very good. It also appears that much of the plan has already been implemented prior to approval with the added biking lanes, park improvements, etc. I only hope all neighborhoods are on boards with the changes already implemented and we have the budget to support these changes curt and looking to the future.	7/21/2018
5495	38	/policies/affordable-housing-near-transit-and-job	At a recent meeting on the 2040 plan, the presenter justified more housing density along transportation corridors in order to justify the expense in public infrastructure. Rail corridors and Rapid Bus corridors were treated the same. This is not fair since a lot more expensive infrastructure goes into Rail corridors than a Bus corridor. Furthermore, Bus corridors are more likely to go through residential neighborhoods than Rail corridors. The examples used in that presentation referred to University Avenue and Hiawatha Avenue. Those transportation corridors run through commercial and industrial corridors and are very different from an Emerson/Fremont corridor which runs through residential neighborhoods. The infrastructure is not the same and they should not be treated the same when it comes to the subject of housing density.	7/21/2018
5496	0.1	/topics/land-use-built-form/	Two areas in Interior 3 and/or Corridor 4 should not allow for high-density, multi-story buildings: 1) areas adjacent to Victory Memorial Parkway should retain the current look of this historical site, and increased traffic on the parkway would be a problem; 2) the area along Ryan Lake should not be overdeveloped and overwhelm this small park area; increased traffic would be a problem in this small neighborhood too.	7/21/2018
5497	76	/policies/new-parks/	In addition to new parks as identified above, policies should also address that fact that as population grows, existing parks may have to expanded and/or renovated to properly support that new density.	7/21/2018
5498	78	/policies/park-design-and-programming/	This is within jurisdiction of the MPRB, not the Minneapolis municipal government.	7/21/2018
5499	0.1	/topics/land-use-built-form/	While I agree we as a community need to move towards higher density, it feels like some of the upper height limits of new development are excessive. Is there any merit in looking at an approach that reduces those upper height limits in the transit corridors while promoting a slightly higher density in the adjacent "single family" areas? That would reduce the height contrast between those corridors and the adjacent residential neighborhoods and achieve a combined overall urban density. I think people can walk more than a couple of blocks to reach a transit route.	7/21/2018
5500	1	/policies/access-to-housing/	4plex city b*tch!! yeaaa (also the population numbers shown in the video might be low) https://youtu.be/kvA_DtvW4u0	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5501	14	/policies/tree-canopy-and-urban-forest/	<p>I support the policy to improve the tree canopy and urban forest. However, the success of this policy is unsupportable to a great extent by several other policies that encourage density and development along transit corridors and Metro stations. Case in point, the insane rendering of proposed development near the West Lake St. Station and Excelsior Blvd. has nothing but huge highrises that will be developed with no regard to human scale and green space. Developers want to build as many units in every square inch that is allowed. They make no money on trees or grass or parks. Without strict oversight and enforcement of proposed development, we will have huge expanses of concrete and steel and no green space.</p> <p>Maria Henly, 3151 Dean Court , Minneapolis</p>	7/21/2018
5502	6	/policies/pedestrian-oriented-building-and-site-de	<p>This policy and especially sub-policies K and N ignore the realities that Minneapolis citizens still need and use cars on a, pretty much, daily basis for basic transportation. If off-street parking for multifamily housing is eliminated, streets will be CLOGGED with parked cars. This is both unsightly and narrows the streets for moving vehicles, especially during the winter when snow piles are a consistent presence. Furthermore, during Snow Emergencies, cars will have no place to go, further complicating plowing efforts and making life in the city even a bigger hassle.</p> <p>Families, senior citizens, and regular folks NEED cars to get to jobs that aren't conveniently located on transit routes. They need cars to transport kids to daycare, sporting events, and to visit family and friends in other parts of town. They need cars to grocery shop. If they need cars, they need parking.</p>	7/21/2018
5503	0.1	/topics/land-use-built-form/	<p>And How are we to know where this is???? How about a Street name or marker?</p>	7/21/2018
5504	81	/policies/social-connectedness/	<p>People are socially connected in stable neighborhoods. You need to keep single family homes and not up zone to the point of driving people out by rising rents and taxes. Keep our neighborhoods more stable by promoting home ownership!</p>	7/21/2018
5505	82	/policies/aging/	<p>Older people have a harder time walking, biking and taking public transportation, and yet you have failed to provide for those who can still drive. In addition, your bike lanes are impeding people from having handicap parking in front of their house and they have to go across the street! What are you thinking? Get parking back as part of this plan!</p>	7/21/2018
5506	79	/policies/healthy-youth-development/	<p>I see so many young people playing basketball in pick up games at my local park. If you up zone as radically as you wish, there will not be the park infrastructure to support the kids coming in. No to the zoning changes.</p>	7/21/2018
5507	61	/policies/environmental-justice/	<p>You need to go back to small area plans and involve neighborhoods that way. This top down approach is not nearly as effective as a getting input from the neighborhoods. Restore small area plans and money for neighborhood organizations.</p>	7/21/2018
5508	27	/policies/transportation-partnerships/	<p>This policy lacks a key component for transportation partnerships: promoting policies in workplaces that will allow more opportunities for flexible work hours and tele-commuting for jobs that can be performed from home, rather than needing to commute into a workplace every day. In addition, employers should be encouraged and incentivized to offer van-pooling and commuter ride-share options to minimize traffic. Also, offering flexible work hours would minimize rush-hour traffic snarls. A couple of my adult children work in locations where mass transit is simply NOT AVAILABLE. Their very large, corporate employers do not offer any sort of vanpooling from sites across the metro for their thousands of employees. And, according to my adult children, they could easily work from home a couple of days a week, if it were allowed. But NO! They have to slog to their workplace, during rush hour, across the metro, 5 days a week. Even if one person works kind of close to home, it is rare that both people have jobs that they can use mass transit to get to work. This is the reality. Pie-in-the-sky dreams that everyone works, has daycare, grocery shops and has family within 6 blocks of their home is unrealistic. Plus, how many people can realistically walk or bike to do any of the above 12 months of the year?? I'm guessing that less than 1% of Minneapolis residents are in this category. That leaves 99% of us still in need of cars and parking and roads and highways for our lives. Where is the policy that recognizes that reality?</p>	7/21/2018
5509	1	/policies/access-to-housing/	<p>Thank you City of Minneapolis for this incredibly forward-thinking policy. As a longtime Minneapolis resident, I am very supportive of the plans to increase the variety of housing options, allow for more multi-family housing across the city, and encourage more homes near transit options. A step in the right direction!</p> <p>All of this is right in line with your laudable first goal: "The City of Minneapolis will work to undo the legacy that remains from racially discriminatory housing policies by increasing access to opportunity through a greater diversity of housing types, especially in areas that lack housing options as a result of discriminatory housing policy." THANK YOU for making this equity work a priority. I ask you to make sure you are listening to all voices -- and consider those who do not have the skills, knowledge, or ability to speak up in these forums themselves. They will benefit from this work.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5510	66	/policies/air-quality/	Your massive up zoning will resort in more traffic and people idling for longer times. Keep the current zoning and work on traffic mitigation so that the air quality improves.	7/21/2018
5511	2	/policies/access-to-employment/	I agree with, and would like to thank you for, action step 2d in particular: "Encourage large medical, educational, and cultural institutions to grow within their existing footprint, especially where territorial expansion would result in a reduction of housing stock." Thank you for considering that homes are as important as jobs -- if we add jobs at the expense of homes, we will still struggle to have the equitable city we need in the future.	7/21/2018
5512	46	/policies/healthy-housing/	This plan puts at risk the affordable starter homes that currently exist. Instead of allowing developers to buy these and tear them down, get a home buying plan for people who will live in and invest in Minneapolis. Then have home improvement loans that have no or low interest offered to those who qualify based on their income. Healthier homes happen when someone cares about them. Homeowners care.	7/21/2018
5513	27	/policies/transportation-partnerships/	This policy fails to recognize that EMPLOYERS in the metro area have a huge role to play as partners in solving transportation issues. Why don't more employers offer shared commuting opportunities to their employees who live all over the city? Employers should be much more flexible in allowing tele-commuting; that is allowing employees to work from home when at all possible. With the technology available today so much more could be done with teleconferencing that would not demand 5 people travelling across the city to sit in one room and talk. Much, much more can be done by employers if they would allow more flexible work hours so rush hour(s) are not so bad and getting worse.	7/21/2018
5514	56	/policies/supporting-small-businesses/	<p>What you are listing as 'action steps' are actually more like goals. What I mean is that 'action steps' must have some sort of measurable assessment and a timeline -- none of your stated action steps have anything of the sort.</p> <p>Is there a way to make your action steps more specific, with measurable actions that are realistic and can be attached to a timeline?</p> <p>For example, when you say 'coordinate with stakeholders' how will you do that? An action plan would be more like...</p> <p>...we will set up a specific plan for contacting all businesses with <20 employees in each ward by mid-year 2019. We will achieve that using a combination of electronic outreach, physical mailers, and in-person outreach. Once we have that list, we will develop a forum for business owners to network with each other and with city staff to communicate their challenges or what could be done to make our city more attractive for new small business entrepreneurs while supporting development and stability of our established small businesses. We will hold our first kick-off of that forum in January of 2020 following the rush of the holiday retail season. At that forum, we will seek input from business owners as to how they would derive value from the continuing forum and work to implement that by a renewed list of input-driven action items and forward planning by Aug 1, 2020. Our success will be measured in our ability to deliver action items at or before deadlines, metrics on percentage of registered small (<20 employee) businesses against those we receive confirmation of contact (engagement) with, and percentage retention of small business participants following through the three intial milestones of (a) contact (b) kick off forum (c) feedback on moving forward after mid-year of 2020.</p> <p>That is an action plan. Stop being lazy and start listing specific actions that you can be held accountable for rather than making vague statements.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5515	27	/policies/transportation-partnerships/	This policy lacks a key component for transportation partnerships: promoting policies in workplaces that will allow more opportunities for flexible work hours and tele-commuting for jobs that can be performed from home, rather than needing to commute into a workplace every day. In addition, employers should be encouraged and incentivized to offer van-pooling and commuter ride-share options to minimize traffic. Also, offering flexible work hours would minimize rush-hour traffic snarls. A couple of my adult children work in locations where mass transit is simply NOT AVAILABLE. Their very large, corporate employers do not offer any sort of vanpooling from sites across the metro for their thousands of employees. And, according to my adult children, they could easily work from home a couple of days a week, if it were allowed. But NO! They have to slog to their workplace, during rush hour, across the metro, 5 days a week. Even if one person works kind of close to home, it is rare that both people have jobs that they can use mass transit to get to work. This is the reality. Pie-in-the-sky dreams that everyone works, has daycare, grocery shops and has family within 6 blocks of their home is unrealistic. Plus, how many people can realistically walk or bike to do any of the above 12 months of the year?? I'm guessing that less than 1% of Minneapolis residents are in this category. That leaves 99% of us still in need of cars and parking and roads and highways for our lives. Where is the policy that recognizes that reality?	7/21/2018
5516	3	/policies/production-and-processing/	I wholeheartedly agree with your action step 3g in particular: "Improve transit, bicycle and pedestrian access to areas of employment, including Production and Distribution Areas and Production Mixed Use Areas." Transit options to areas of employment MUST continue to improve with faster, more consistent service (and, where possible, the kinds of modern amenities like rapid transit or light rail, to lure additional new riders with preconceived notions of buses). If we want a growing, denser city, we have to make investments in making it EASIER to travel by transit -- and that starts with the bottleneck times of commuting to jobs.	7/21/2018
5517	71	/policies/soil-health/	Regarding points (f) & (g); I would like the city to be more specific in defining how they will 'reduce impervious cover' and prevent soil compaction in new construction sites. Without specifics there is no way to understand how the city intends to measure what a 'reduction in impervious cover' or what compacted soils constitute. Additionally, how will new construction be regulated regarding loss of trees, greenspace, or compaction caused by heavy equipment?	7/21/2018
5518	80	/policies/development-near-metro-stations/	"Prohibit the establishment of park-and-ride facilities" ? Does this refer to "near METRO stations" in the city? If public transit is developed and improved, people will use it.	7/21/2018
5519	38	/policies/affordable-housing-near-transit-and-job-	This makes sense.	7/21/2018
5520	42	/policies/expand-homeownership/	These goals are laudable but you have not stated anything about how the city will preserve existing owner-occupied housing (both single-family homes, condos, and -plexes). How will Minneapolis prevent conversion of existing owner-occupied dwelling into rental properties owned by commercial developers?	7/21/2018
5521	36	/policies/innovative-housing-strategies/	Affordable Housing is something nobody can argue against. But the developers will NOT develop it. They will only build housing that they think will maximize their returns (I don't fault them for this). Therefore, we need to require them to allocate part of every development (10%) to be built at a lower cost (no granite countertops, etc...) that can be sold or rented to residents of modest means. This would also accomplish making housing more inclusive for all in every neighborhood and not isolating senior citizens and the poor into buildings and neighborhoods that are separate and unequal.	7/21/2018
5522	1	/policies/access-to-housing/	By allowing open building of multi family dwellings in all neighborhoods, you run the risk of losing community. There should be restrictions on the number of 4 plex, duplex, etc allowed in a single block. Depending on the sales price of the single family home..there could be blocks of duplex and multi family 4 plex's, most likely rentals which means more transient people, less rooted to the neighborhood. Also, parking and transportation, Are you thinking that cars will be like land lines today, nearly extinct?	7/21/2018
5523	0.2	/small-area-plans/	It makes sense to develop corridors with mixed land use and mixed housing. sticking apartment buildings in the middle of blocks of single-family units makes no sense.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5524	1	/policies/access-to-housing/	<p>I am very unhappy with the housing component of the 2040 plan. I live at 4532 Aldrich Ave. S and feel that the new 2040 plan will change our neighborhood for the worse. We have a great street with young families who go to public school together. We have block parties and there is a close neighborhood feel. There are also a few duplexes on the block. The ones that are owner occupied on one level are great, with renters who are part of the neighborhood. However, the ones that are not owner occupied usually have residents who have not chosen to be a part of the close atmosphere despite being invited to join. Sometimes these renters are problematic. Having more rental properties will be detrimental to the block. It will also decrease affordable housing and just be a big giveaway to developers wanting to purchase affordable houses to tear them down and put in larger rental properties. This proposal is a terrible idea. I voted for Mayor Frey and did like him prior to this, but am considering changing my vote for the next election. I am curious, where does Jacob Frey live and will they be building new rental properties on his block?</p>	7/21/2018
5525	76	/policies/new-parks/	<p>Most of this is within the jurisdiction of the MPRB not the municipality. When it isn't the City should be following the park board's plan..The disposition of park dedication fees is proscribed by state statute to benefit the development that paid the fee.</p>	7/21/2018
5526	48	/policies/data-driven-decisions/	<p>Thank you for stating the need for data-driven decisions.</p> <p>How has the planning group responsible for this document used data to inform their proposed changes to zoning?</p> <p>Heather Worthington has stated on record that existing Met Council data was the source of projected population growth and that the planning team did not do any internal analyses. Furthermore, the City has repeatedly refused to provide numbers on how much new housing would be created through proposed upzoning -- in any data-driven process, that information would be readily available for review. When asked about economic impacts of this plan, Heather Worthington has stated she 'is not an economist' and that 'they had not worked with one' when drafting this plan.</p> <p>Stating that you want to make 'data driven decisions' while repeatedly claiming ignorance of numbers in the process of planning is lazy and hypocritical.</p>	7/21/2018
5527	48	/policies/data-driven-decisions/	<p>Thank you for stating the need for data-driven decisions.</p> <p>How has the planning group responsible for this document used data to inform their proposed changes to zoning?</p> <p>Heather Worthington has stated on record that existing Met Council data was the source of projected population growth and that the planning team did not do any internal analyses. Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5528	35	/policies/innovative-housing-types/	<p>We believe that Minneapolis has very few housing options for the thousands of aging baby boomers residents, ages 54-72, who will be seeking alternative housing in the next 20 years and who wish to remain as Minneapolis residents. These residents bought their homes, raised their families, and provided support for their communities and neighbors in the City.</p> <p>We think the leading edge of aging baby boomers who are home owners in Southwest Minneapolis could provide an opportunity for Minneapolis to create some innovations in housing that could also address the emerging housing needs of some Minneapolis millennials. The leading edge of baby boomers are entering their late 60s & early 70s which typically is a time when people start to downsize and move, often to the suburbs. Likewise, some of the Minneapolis millennials are entering their mid-30s, starting families, want to remain in Minneapolis and are interested in affordable alternatives to high rise apartments.</p> <p>The Southwest Minneapolis boomer homeowners we talked with will be seeking alternatives to their homes that are more accessible, have less maintenance but are still in their neighborhoods. Currently there are not a lot of options in Southwest Minneapolis, and we think those boomers will be moving to the suburbs e.g. consider the senior housing building boom in Edina. In addition around the country some cities are starting to see millennials leave in search of affordable family housing and that trend may eventually reach Minneapolis.</p> <p>To retain the older baby boomers and also millennials, the city of Minneapolis could look at creating more housing options in "missing middle" in the Southwest housing market which includes smaller condos, triplexes, duplexes etc that have at least two bedrooms. Some concrete actions that Minneapolis could take include:</p> <ol style="list-style-type: none"> 1.Map the available small parcels of land in Southwest Minneapolis that could be developed into smaller housing options, particularly as demos. Perhaps a church or business has a little used parking lot that could be converted. 2.Contact the US cities currently experiencing the exodus of millennials to see what housing options they are developing to retain the millennials. 3.Meet with the Southwest Minneapolis communities that have dense populations of aging boomers to better understand their preferences. 4.Quantify the demand for smaller owner occupied housing among Southwest Mpls baby boomers and mid-30yr old millennials 5.Engage the developers who are interested in smaller neighborhood based projects in a discussion of the emerging housing trends that are alternatives to tall apartment buildings. 6.Create a "tour of southwest homes" that the home owners have adapted to age in place as a way to palpably demonstrate what 	7/21/2018
5529	1	/policies/access-to-housing/	<p>Please consider the huge displacement issue you are causing. Thus far, the new apartments going up do not meet affordable housing standards and in fact are much more expensive than existing buildings. Many residents have already been displaced. If your claim to enhance the diversity and equity of Minneapolis is genuine, you need to slow down and rethink your approach. Luxury apartments with amenities like swimming pools and fitness rooms do not promote community. We have so many existing amenities in our city: parks, YWCA, YMCA, libraries etc. within walking/biking distance of new buildings. Maybe if these new buildings focused on really living in the neighborhood, they could reduce the silly amenities and reduce the rents.</p>	7/21/2018
5530	84	/policies/public-safety/	<p>First responders need to be able to navigate our roads in a timely fashion. We can not sustain the amount of growth in our cities and have our streets remain passable. Scale back on the up zoning. In fact, keep the current zoning.</p>	7/21/2018
5531	6	/policies/pedestrian-oriented-building-and-site-de	<p>Are you out of your mind? Prohibit establishment of new gas stations and auto repair shops? You are anti business. So you want people to drive less, but those who drive will now be forced to drive farther to get the services they need. Rethink this. Also, maintain setback, even when the buildings are taller, so there is a place to put snow in the winter. When there are not boulevards, there is no place to throw snow. When there are no boulevards, there is no place to walk our dogs. SCALE THIS BACK!</p>	7/21/2018
5532	9	/policies/open-spaces-in-new-development/	<p>These open spaces must be GREEN! If you add as much hardscape as this plans calls for, we will have so much storm water run off that our precious lakes will be adversely affected.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5533	93	/policies/stewarding-historic-properties/	<p>I like that you are encouraging the preservation of historic materials found in public spaces.</p> <p>As the city grows and public spaces change, how will these be preserved? Will they be re-purposed at other sites or sold to private individuals?</p> <p>Is there a system to provide bidding/access to materials that would otherwise end up in a landfill?</p> <p>Could the city develop a historic materials re-use center similar to what UMN does with old university property/equipment?</p>	7/21/2018
5534	78	/policies/park-design-and-programming/	<p>In Bryn Mawr, the park board added volleyball courts. White people are now using the park that was historically used by people of color. What were you thinking? Also, one square block of park for for each neighborhood will not suffice if you allow as much up zoning as you have in this plan. Our parks will be over run and no good to anyone!</p>	7/21/2018
5535	3	/policies/production-and-processing/	<p>The basic point of this section is to allow re-development of property to larger companies that have the potential to hire diverse group of workers. It is wrapped up with the wording you will protect the landscape of the city. It all sounds fine on paper... but this information in the 2040 plan seems very broad. Open to intrepertation of the current city council at the time.</p>	7/21/2018
5536	12	/policies/lighting/	<p>If you allow too much height in neighborhoods, where people typically walk with their families and dogs, you will have to have lighting that creates too much light pollution. Lower the height in all residential areas, including along transit lines.</p>	7/21/2018
5537	47	/policies/housing-maintenance/	<p>I would like to see the city develop a system of providing financial assistance to owner-occupied properties for upgrade/repair of mechanical and structural aspects of buildings (not cosmetic upgrades).</p> <p>This should also include funds to upgrade structural components of buildings (such as windows/insulation) to help deal with changes in the external environment, such as increased noise pollution from air traffic and increased population density.</p>	7/21/2018
5538	18	/policies/walking/	<p>The city has prioritized biking over walking. The bike ways are plowed in winter before the curb cuts, which make our sidewalks impassible. Also, if you allow development to go out to the property line, and get rid of boulevards, where will people walk? Just trying walking on Bryant Ave. S in the winter. Darn near impossible. And those properties have front lawns where they can throw snow! This plan will make walking less safe.</p>	7/21/2018
5539	4	/policies/access-to-commercial-goods-and-service	<p>Per action step 4c, I strongly support allowing increased small retail/commercial mixed into residential neighborhoods. Thank you for this proposal to support & increase that work. Some of our great neighborhoods of the Twin Cities (Linden Hills, Grand Ave in St. Paul, etc.) have exactly this. More walkable, "complete" neighborhoods not only reduce car trips, but also make life easier and more affordable to those in the neighborhood.</p> <p>Per action step 4e, I also agree with increasing density in existing commercial corridors - we need more homes for everyone in this city, everywhere. Particularly in commercial corridors, more concentrations of people will also help to support more small business (& by extension, jobs) in Minneapolis.</p> <p>Finally, this tidbit is depressing >>> "The city also has 11 low-income census tracts in which residents live more than a mile from a full-service grocery store." Thank you for recognizing this disparity, and putting action steps into place to address it.</p>	7/21/2018
5540	4	/policies/access-to-commercial-goods-and-service	<p>Make sure when you are developing this new analytical framework, you don't spend millions of tax payers money and not have it work. Seems a constant problem in the government with studies.</p>	7/21/2018
5541	19	/policies/bicycling/	<p>Too many bikeways. It is a waste of money when the VAST majority of people bike when the weather is nice. Also, these bikeways are being placed in front of homes and people can't park, lose their handicap parking access in front of their homes, etc. I am not opposed to share ways, but I think we have enough bikeways. I realize this is Ms. Benders' baby, but enough already.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5542	43	/policies/housing-displacement/	<p>The city needs to specify how it will prevent displacement of disabled and elderly citizens who need cars for transportation.</p> <p>The current plan is focused on prioritizing bike-transit for young able-bodied citizens and actively harms vulnerable citizens that require a vehicle for transportation.</p> <p>Citing a future scenario of yet un-deployed technological innovations as a way of dismissing this problem is not sufficient, and is dismissive of the very residents this plan is claiming to want to help protect.</p>	7/21/2018
5543	43	/policies/housing-displacement/	<p>The city needs to have an active policy of capping property tax increases over time -- this year we have seen large hikes in property taxes in established neighborhoods coupled with loss of homestead credits.</p> <p>For many owner-occupant residents on fixed incomes, this represents a threat to their ability to stay in their homes.</p> <p>For renters, these increased property taxes are passed on via their landlords in the form of increased rent bills.</p> <p>The city claims that we are in an affordable housing crisis yet perpetuates the problem through continued, increasing taxes that owner-occupants are less able to cope with than commercial landlords.</p>	7/21/2018
5544	35	/policies/innovative-housing-types/	<p>This is a very vague policy statement. It sounds like there is no plan, just a committee to sit down & waste our money & resources with little actually accomplished.</p>	7/21/2018
5545	1	/policies/access-to-housing/	<p>I believe multi-use housing is a great solution & think our neighbors need to be more open-minded about this idea.</p>	7/21/2018
5546	60	/policies/intrinsic-value-of-properties/	<p>Please be thoughtful about the history of our city. When you tear down entire blocks it can destroy our unique personality. Think: Block E! If that had been redeveloped organically over time, it could have been much more successful and now there's no turning back. The North Loop slowly and organically has transformed and I think it's working. The balance of old and new is so very important in preserving our character. It's already gone too far in some areas like Uptown, where Lake Street from Bde Maka Ska to Hennepin Avenue is becoming generic, suburban, unfriendly and WAY TOO EXPENSIVE. The original older apartments and multi unit buildings are so well built, more affordable and stand the test of time. I'm worried these new buildings will not last more than a few decades.</p>	7/21/2018
5547	73	/policies/stormwater-management/	<p>I would like to see a specific set of measurable actions as to how commercial developers (non owner-occupied) will be assessed regarding storm-water impact through addition of concrete/impermeable surfaces.</p> <p>If there are fines or regulatory fees recovered from such developments, please specify how these will be used specifically to improve our stormwater infrastructure for the neighborhoods in which the developments occur.</p>	7/21/2018
5548	1	/policies/access-to-housing/	<p>I am most concerned about point "e" that allows for 4-unit housing on a traditional size lot in neighborhoods that contain primarily single-family homes. Having a larger taller building on a traditional size lot can only adversely affect the quality of life for the neighbors on adjacent lots. There are issues of sunlight, air flow, views from windows. If parking is not required, that adds to issues of safety on the street and sidewalks and visibility for pedestrians, cyclists and drivers. Many of these neighborhoods are not suited for higher density housing. The plan needs to be more discerning about where the high density housing is allowed.</p>	7/21/2018
5549	24	/policies/shared-mobility/	<p>We had a wonderful system of Car-2-Go vehicles a few years back. These were convenient because they did not require parking in defined spots, and could be used heavily as one-way modes of transport in conjunction with bus/LRT when necessary. I had a membership, as did my wife, and we relied on these heavily when our one owned vehicle broke down for several months over the winter and we were saving for repairs. It literally saved our jobs when we lost our vehicle and did not have much money. Biking/Bus/LRT alone would not have been sufficient due to increased transit times when using only these modes of transport during winter months.</p> <p>We were notified that the service left the city of Minneapolis due to the heavy taxes levied on their service in this state, which were some of the highest. Car-2-Go is still active in other cities across the US and Canada.</p> <p>Why did we lose this awesome service in such a 'forward-thinking' transit city? What is the city doing to bring them back?</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5550	0.1	/topics/land-use-built-form/	As a resident of the 13th ward, I am very concerned about the proposed zoning changes. These changes would drastically, and negatively, impact the character of the area by allowing multi-family housing development to encroach on these beautiful old neighborhoods while most likely not actually adding what most people would consider affordable housing. As a former resident of Chicago where this type of development was allowed, I have experienced first-hand how it impacts a neighborhood's character, density, congestion, crime, etc. I urge you to reconsider the proposed zoning changes.	7/21/2018
5551	83	/policies/people-with-disabilities/	What is the city doing to ensure it is livable for people with disabilities that rely on their own vehicle as a mode of transport? Do any city policies address concerns of citizens that are disabled and cannot bike or take public transit for their needs?	7/21/2018
5552	1	/policies/access-to-housing/	<p>Please consider this article I wrote for Streets.mn in support of 2040 Plan https://streets.mn/2018/07/20/the-2040-comprehensive-plan-completing-minneapolis-neighborhoods/</p> <p>I've provided the text below:</p> <p>Minneapolis is a city of neighborhoods, 72 to be exact. They are the places we live, learn, and play. While we all live in a neighborhood, most of us don't live in a complete neighborhood. Instead, for too many of us, neighborhoods are the places we leave nearly every day. Nine out of ten trips in Minneapolis are by car, often times for necessities that just aren't found in enough neighborhoods. Reducing driving is difficult when it is a necessity, even for those who wish they didn't need to drive. One of the goals of the 2040 comprehensive plan is to create more complete neighborhoods, that have the necessities and amenities that we want and need.</p> <p>Our city gets some things geographically right. Almost all of us (97%) are within a 10 minute walk to a city park. Libraries and schools are similarly accessible. We've collectively decided that everyone in the city has the right to accessible places to learn and play. A park, a school, and a library are a great building blocks of a neighborhood. However, a complete neighborhood needs at least a grocery store, a pharmacy and a day care center. Most of us would probably like to live near a hardware store, a restaurant, and a coffee shop as well. Most neighborhoods don't have these amenities, let alone the delis, butcher shops, florists, gift shops, dentists, barber shops, and salons that come to mind when we think of neighborhood businesses.</p> <p>All a complete neighborhood needs is space for businesses to operate and enough customers with a short walk away, which allows for a great diversity of necessity-filled neighborhoods. The neighborhoods that make up Uptown are complete, as are the North Loop and Near-North East. A complete neighborhood doesn't have to mean big apartment buildings or busy streets. Linden Hills doesn't have any tall buildings, but 40% of its housing units are in multi-family buildings allowing its plethora of shops, restaurants, and small businesses to thrive, and support a dense enough population for bus service every 15 minutes. Wealth isn't enough to complete a neighborhood. It is the density that makes all of its amenities possible. Lynnhurst, whose median household income actually exceeds Linden Hills by \$27,000, has neither the density (11% of housing units are in multi-family buildings) or the space for businesses to operate (Penn Avenue, Lyndale Avenue, 50th Street, and 54th Street are all predominantly single family homes). In terms of walkability, and transit access, Lynnhurst is hardly thriving. Meanwhile, neighborhoods like Whittier and Seward, in which multi-family housing isn't an anomaly, but wealth is, have nearly everything you need within a short walk away.</p>	7/21/2018
5553	23	/policies/coordinated-development-strategy/	Please work on a coordinated development strategy for the Hi-Lake area, especially the Target parking lot and the rainbow food site. These are terrible public spaces right now and they are in such a prime location.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5554	20	/policies/transit/	<p>The 2040 Plan justifies both the upzoning of the city and the elimination of requiring developers provide off-street parking based in part on the existence of so-called "transit corridors." I believe that city planners have simply chosen to call streets with bus routes on them "transit corridors." I live at 4815 Colfax Avenue South, right next to the Bryant Avenue "transit corridor." Just because buses occasionally go down that street does not by any stretch of the imagination make this a transit corridor. It is instead a quiet street ringed by duplexes and single family homes. It does not have the necessary infrastructure to support residents living here without a car. I am a loyal bus commuter to downtown so I know the very real limits of our current transit system. I also know how the system is financed and that is NOT through city dollars. Despite the encouragement of the local Chambers of Commerce, our state legislature has refused time and time again to provide more money to MetroTransit. In the roughly ten years I have been riding the 146 downtown, I have seen more and more cutbacks in the service on the route and more and more fare hikes. There is a huge difference between providing decent service to downtown Minneapolis (which we have) and decent service everywhere around town (which we most assuredly do NOT have) and on which the 2040 plan relies to jettison the need for off-street parking. There is no realistic basis to believe that enough dollars are available to support the massive upgrade of transit citywide required to support the plan. Instead, let's focus our subsidies -- for renovating existing housing, for supporting home buyers for affordable housing, and for transit -- on the areas of greatest need. That is not southwest Minneapolis. Elizabeth C. Buckingham, 4815 Colfax Ave S</p>	7/21/2018
5555	35	/policies/innovative-housing-types/	<p>It would be cool if there could be incentives for home owners to build accessory dwellings to rent at an affordable rate. Instead of tearing down beautifully built homes throughout Minneapolis, fill in areas that will no longer be needed if indeed cars go away. It could create mixed communities and desired density. For some homes, if the garage is eliminated, a duplex could even fit. I'm thinking the Michael Lander home on 34th and Irving in ECCO. It added density and it's modern architecture creates a lovely balance without losing the historic integrity of the neighborhood.</p>	7/21/2018
5556	49	/policies/educational-and-economic-access/	<p>Your 'action steps' do not have any quantifiable specifics or timelines associated with them, and are woefully inadequate in addressing the need for high-quality access to public education throughout the entire city, not just specific neighborhoods.</p> <p>I would like to see the city work proactively with MPS to increase the quality of education THROUGHOUT the city rather than focus on how to allow more people to access the few high-quality schools that are available in specific sections of the city.</p> <p>It seems like the city has 'given up' on trying to create more desirable neighborhoods by revitalizing the schools in sections of the city that have struggling schools. Instead, they are promoting flight from local school districts.</p> <p>Economic opportunity starts with education, which everyone in every part of the city should have a right to -- without having to move or drive to the other side of town!</p>	7/21/2018
5557	15	/policies/transportation-and-equity/	<p>As shown by the continuing shortfalls in the MetroTransit budget, we have limited ability to finance increased transit service. We need to focus on areas where residents cannot afford cars, not on areas where service is used largely only for commuting downtown and back. Given the sprawl of our entire metro area and most residents need to go into areas outside the city on a regular basis, we cannot afford to rely on "market forces" to determine if parking should be provided.</p>	7/21/2018
5558	1	/policies/access-to-housing/	<p>I am deeply concerned and against rezoning to allow more teardowns of individual family homes and replacement with multifamily dwellings. We need more density, yes. But it should be smartly done, not let developers destroy at will. This plan is extremely radical, per my contacts in the development community around the country. And it won't achieve its stated end: to create more affordable housing. Studies have been done which have shown this. Minneapolis is a city that's the envy of the country. One of the things that makes it so special is its livable, beautiful neighborhoods. This plan takes a metaphorical and literal sledgehammer to one of the basic foundations of this area. With an end that won't be achieved.// Suddenly, the city seems intent on a zoning plan with some theoretically outstanding goals. But I resent what I feel is an arrogance, and unproven sense of surety, that seems to underly those who are pushing so strongly for this. Let's show some humility before upending so many communities. PLEASE REWORK THIS DENSITY PLAN!!!! One article I read said it well: we need "smart density". This plan is NOT smart.</p>	7/21/2018
5559	2	/policies/access-to-employment/	<p>All good.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5560	28	/policies/msp-airport/	B. The pedestrian and bicycling access would only be useful to a small percentage of people coming to the airport. This should be a low priority item. F. Strongly support this because it is getting worse and worse and impacting more and more residents.	7/21/2018
5561	5	/policies/visual-quality-of-new-development/	Please provide transparency in how the city is ensuring building materials of new developments are 'durable'. What is the guideline on how many years of longevity are required in engineering plans for new developments? My little house is 100+ years old and will probably go for another 100; from what we can gather, we probably are the 8th family to have inhabited the house. Will new developments be held to that standard?	7/21/2018
5562	3	/policies/production-and-processing/	Good goals.	7/21/2018
5563	38	/policies/affordable-housing-near-transit-and-job-	Agree with these policies at a high level but how the city is proposing to implement them through massive upzoning and calling all bus routes transit corridors will result in too little money being spent in too large an area.	7/21/2018
5564	60	/policies/intrinsic-value-of-properties/	In light of the dramatic, experimental upzoning of neighborhoods proposed in this 2040 plan, what specifically is the city doing to 'Recognize and promote the value of the built environment and landscape as an asset that enhances community identity and a sense of place.' I have been repeatedly told by city staff when inquiring on this point and my concerns of what it will do to community that 'change happens' rather than given any sort of reasonable or factually supported response. How do citizens access data and reports as to what the city is doing with respect to point (a)? How is this being recorded, reported, or supported by the city?	7/21/2018
5565	92	/policies/identify-and-evaluate-historic-resources,	I live in Lynnhurst and understand that many properties in our neighborhood might have historical significance and could not be demolished for this reason -- even if the massive upzoning to our area is implemented. Before there are ANY zoning changes to our area this topic should be explored. Moreover, the historical nature of our neighborhood is an important reason to preserve it. Let's not ignore residences under this policy.	7/21/2018
5566	1	/policies/access-to-housing/	There is plenty of housing in Minneapolis. It is just not affordable. And so the solution you propose is to build more apartments, which are crazy expensive, and hardly affordable. 1. More interior 1 and 2 space. Eliminate interior 3 space. It will decimate our neighborhoods as you have them defined. 2. Height in interior 1 and 2 (and 3 if you insist) MUST REMAIN at 2.5 stories. My block has mixed housing, but still feels like a neighborhood because the apartments and fourplexes are 2.5 stories. MAKE NO EXCEPTION TO THIS RULE. 3. Even along transit routes that are not the major ones like Hiawatha, the height should never be more than 4.5 stories. Again, this will keep the neighborhoods more livable and there is no longer a need for interior 3 as you don't have as much height at the transit corridors and the transition is smooth.	7/21/2018
5567	33	/policies/affordable-housing-production/	a. Create housing for residents of all income levels across the entire city. What? I can't afford to live in Kenwood, or in the luxury apartments that you have approved of. It is crazy to think that you can engineer this. I approve of having mixed income housing, but realistically, not everyone will ever be able to afford to live in every neighborhood. Your plan does NOTHING to address the need for affordable housing. In every meeting I have attended, Ms. Worthington has admitted as much. In fact, this will have the opposite affect. You need to rework this plan so it is not so developer friendly, but Minneapolis resident friendly. If this plan were so great, why would people in ward 5 be asking to be exempt from this plan?	7/21/2018
5568	34	/policies/affordable-housing-preservation/	YES! And you do this by not allowing developers to get their hands on starter homes and lower income properties, tearing them down and building "market rate" apartments. We all know that market rate is code of the highest possible rent. How do you do this? Get rid of your massive up zoning and start over!	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5569	3	/policies/production-and-processing/	<p>If 'production' areas are a priority, why is the area North of 62 between Lyndale and Nicollet being proposed for rezoning to Corridor 6?</p> <p>That area would be perfect for some of the industries you are describing above, but instead the proposed zoning change would be for something akin to the North Loop area? That is, fancy first floor shops/restaurants and then high rise luxury condos/apartments?</p> <p>Why isn't that area being developed into clean maker space and rapid prototyping facilities, or targeted towards entrepreneurs that need larger square footage to produce goods? Maybe it could be a trades-focused incubator or something for students who want a different path (I partially opted out of high-school for a trade school and it was the best thing I ever did)</p> <p>Isn't it more important to ensure there is space that can provide jobs and support entrepreneurship to current citizens rather than luxury lofts for future residents?</p>	7/21/2018
5570	47	/policies/housing-maintenance/	<p>This policy is laudable but will be unachievable if the plan succeeds in its quest to upzone the entire city. Then, large-scale and out-of-town developers will buy up property, re-develop it and resell it to the highest bidder. Even if there is some affordable housing produced by it, the number of units gained will likely be much less than the units lost. Renters at a Ward 10 meeting I attended spoke of renters in their buildings already being priced out by rent hikes drive by taxes increases from recent upzoning. These same tax increases will drive out homeowners on fixed incomes and homeowners in small properties with limited means. Moreover, upzoning limits the incentives of existing homeowners to improve their properties because developers will not be willing to pay extra for maintenance if the goal is to tear down the property. Policy 47 is a good policy and one that can best be achieved through targeted aid to those who need it most, not through blanket upzoning.</p>	7/21/2018
5571	36	/policies/innovative-housing-strategies/	<p>Engage in the most local dialog and collaboration. That is neighborhood associations! Fund them, give them power and listen to them. Yes to programs that maintain current affordable housing and starter homes.</p>	7/21/2018
5572	6	/policies/pedestrian-oriented-building-and-site-de	<p>I am very concerned and skeptical of the plan's emphasis on the other modes of transportation over automobiles. For the foreseeable future, many more people will use cars versus public transportation and especially bikes. I've lived here for 40 years and have noticed that it sometimes gets pretty cold in the winter. :) I've also lived here and noticed that there are a lot of people here over the age of 35, or are disabled, or aren't close to public transportation or where public transportation leaves them off far from their destinations. Sure, we should add more bike paths, and encourage commercial enterprises near residential areas. But without some balance in this process, the plan unwittingly is really a plan that punishes -- or simply makes life infinitely harder and more inconvenient -- for the old, the "older", infirm, and those with physical challenges. I would hope the goal of this plan is that "we're all in this together." But this initial plan and its priorities are not based upon a feeling of "us" - but pitting one against another. Let's have a balanced program for God's sake. And remember, Minneapolis' weather. It's punishing enough for large swaths of our population. Don't make it worse - and force those who love it here to move to Phoenix! Make measured changes - and not leave so many of us "home alone," or "out in the cold," because you make the automobile an enemy and hard to use.</p>	7/21/2018
5573	0.1	/topics/land-use-built-form/	<p>I'm looking at these various housing options. Some make sense and some scare me. If the current built form map is approved, I urge you to consider a vetting process for the new buildings. Both for the quality of the materials being used and the architectural integrity of the design. Perhaps a committee of respected Minneapolis architects could come up with design standards that must be met. It might even vary from neighborhood to neighborhood.. turn of the century, bungalows, post war etc. Once again, the fabric of our city is at stake. What took 100+ years to organically develop could be destroyed in a couple of decades if not done thoughtfully! I'm only referring to architecture here, so please don't use my comment out of context.</p>	7/21/2018
5574	9	/policies/open-spaces-in-new-development/	<p>Public is public and private is private. If the City wants more spaces for use by the public then the taxpayers are going to have to pay for it, sooner or later. It would not be reasonable or fair to require a private property owners to provide a public park and then have to pay for upkeep, insurance, policing, replacement, etc. Review the third and fifth amendments to the US Constitution.</p>	7/21/2018
5575	8	/policies/public-safety-through-environmental-de	<p>Excellent ideas!!!</p>	7/21/2018
5576	9	/policies/open-spaces-in-new-development/	<p>Good ideas!</p>	7/21/2018
5577	0.1	/topics/land-use-built-form/	<p>The strip of land in the Kenilworth corridor is now woods and prairie restoration and it is protected as a public park as of 2014 Met council. This area has already been poorly impacted by a possible LRT ruining the bike path and can not be used as a corridor.</p>	7/21/2018
5578	11	/policies/skyways/	<p>Good ideas!</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5579	12	/policies/lighting/	Good ideas!	7/21/2018
5580	6	/policies/pedestrian-oriented-building-and-site-de	Cars are not going away anytime soon. People with disabilities, young children and the elderly should be able to use automobiles. Automobiles need gas stations and repair. We should not eliminate these types of businesses from the city.	7/21/2018
5581	13	/policies/landscaping/	Good ideas.	7/21/2018
5582	0.1	/topics/land-use-built-form/	I like the idea of allowing Carriage Houses as accessory dwellings. Please be absolutely sure to maintain controls (max heights, FAR, setbacks, etc.) on built form that respects the architectural scale and housing fabric so that we do not drastically change the character of neighborhoods by plowing down SF homes and replacing them with more massive buildings casting shade and negatively affecting the semi-privacy of backyards that families seek out. I would like to see progressive time-phased limits on the number and concentration of multi-units to ensure some areas are not bulldozed and changed entirely unless it is thoroughly approved by neighboring residents. 2030 plan, anyone?	7/21/2018
5583	49	/policies/educational-and-economic-access/	The schools need more funding to hire more teachers, aides, and generally keep up with the increased numbers of students.	7/21/2018
5584	15	/policies/transportation-and-equity/	If decisions are made on objective (not political) basis then there is no need to worry about equity. A street is a street regardless of who uses it, lives on it or owns property on it.	7/21/2018
5585	17	/policies/complete-streets/	"Prioritize projects that will improve the pedestrian, bicycle, and transit networks when developing the City's long-range Capital Improvement Program." This action step ignores many factors in what prioritizes projects today including maintaining infrastructure and most importantly safety of existing infrastructure. The action step should not be part of the plan. Instead work with CLIC and Public Works to understand their respective rating systems and adjust accordingly.	7/21/2018
5586	0.1	/topics/land-use-built-form/	This policy will diminish any charm Minneapolis has left after already allowing the absurd amount of condos constructed in the last few years. Parking and traffic are already a disaster, this will only add to that as well.	7/21/2018
5587	1	/policies/access-to-housing/	<p>Minneapolis is one of the most progressive cities that I have ever lived in, which I love about it. It was the first place I ever experienced a tight-knit community, where people actually looked out for each other and still had block parties.</p> <p>As such, I was shocked and dismayed the way this plan has been rolled out (or silently pushed through) because it takes what could be a wonderful resource of progressive allies in specific parts of the city and dismisses/demonizes their concerns, turning them instead into enemies, and pitting neighbors against neighbors. I was horrified to see my neighbors referred to as 'bootlickers' and find comments that their concerns were not valid because they would die sooner than younger citizens.</p> <p>Furthermore, telling homeowners that the idea of building equity in an owner-occupied dwelling instead of constantly paying increasing rents to a landlord is an 'outdated' concept is not only out-of-touch with reality, it is also incredibly callous and insensitive to many people who may have lost their homes due to the recent mortgage crisis, natural disasters, or other calamity. My guess is that people making such idiotic proclamations have never been through the tragedy of home loss, eviction, or homelessness.</p> <p>Acting like homeownership is something to be ashamed of is wrong, and particularly egregious when the lead planner making the statement owns a single-family home. The fact that there was no response from our Mayor when this was said exemplifies the dismissive, elitist worldview he must share with Heather Worthington.</p> <p>If the city were serious about promoting density while encouraging strong communities, especially to neighborhoods that have been historically wronged or under-served, then this plan would focus on increasing rates of owner-occupancy and not lazily defer to 'let the market figure it out' trickle-down housing.</p> <p>Say it with me now: OWNER-OCCUPANCY!</p> <p>Owning can help families build wealth over time, and this plan does NOT focus on helping renters transition to owners, but rather on converting owner-occupied properties to commercial rentals.</p> <p>Shame on you for this terrible, divisive plan that will be a hallmark of your careers. You should all lose your jobs.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5588	58	/policies/business-districts-and-corridors/	Not sure we need to use city resources to "brand and market" local retail/arts districts. Seems like that should be a private/non-profit sector task. Try to preserve some of the physical appearance of these districts/corridors... making everything a glass/concrete/steel box doesn't contribute to this goal.	7/21/2018
5589	49	/policies/educational-and-economic-access/	YES to fair wages, job training and Public Schools playing their part in equity across the city. Intense development throughout Minneapolis at present is raising rents and forcing people out of their neighborhoods. If this gentrification continues, the inequity will increase and much of our diversity will be pushed to outlying areas. Think Seattle, Portland, NYC. This would make access to jobs in the city even harder, especially when our mass transit isn't up to speed. Intersectionality should not be overlooked in this 2040 plan when it comes to those who do not have as much input. PLEASE think about the consequences of moving too fast.	7/21/2018
5590	1	/policies/access-to-housing/	<p>I think the policy is horrendous: it is unproven (not supported by any studies, data, examples, etc.), draconian, and ill-advised. Re-zoning EVERY residential lot in the City to allow at least a 4-plex is easy to do from GIS but is insane in reality. Besides likely increasing expensive condos and leading to LESS affordable housing, this policy will decimate neighborhoods.</p> <p>Also, the Plan does not link policies to assess how one policy will support or work against another. For example, building 4-plexes on "traditional" city lots (PLEASE define your terms: what is "traditional"?) will tremendously increase impervious surfaces, causing even more serious stormwater management problems.</p> <p>For schooling, my family already open-enrolls in a non-Minneapolis school district due to the schools' inability to meet our son's educational needs. Despite this, we've stayed in Minneapolis and had planned to age in place. This draft plan has us realizing it is time to get out before the developers descend even more than they have with tear downs.</p> <p>What are you thinking and whose voices you are really listening to?</p>	7/21/2018
5591	1	/policies/access-to-housing/	<p>The number of existing multi-unit structures should be a factor in how many new such structures are allowed on each block. This will address the opposition to the plan based on the notion of "giving developers free reign" to radically change existing building patterns. If the goal is to diversify such housing across the city's neighborhoods without undue disruption of existing housing distribution, I'd suggest the following:</p> <p>1) (described in step d.) Do not allow additional multi-unit structures in neighborhoods and or blocks that already have a certain high percentage (TBD) of such structures. This will avoid "dumping" of such housing in traditionally low-income areas that already have an (over?) abundance of multi-unit housing, particularly that designated as affordable.</p> <p>2) (described in step e) In neighborhoods or blocks with no or very few multi-unit structures, allow such structures but with a limited percentage (TBD) per-block or neighborhood. This will address the concerns of home-owners that their block will be radically transformed in a way that will jeopardize their home equity and cause parking problems, etc., while still spreading the opportunity (and benefits and challenges) of multi-unit housing in an equitable fashion throughout the city.</p>	7/21/2018
5592	29	/policies/creative-sector-economy/	All good ideas. Note that we are competing for these people and businesses with other cities and states... and that the payoff in this kind of investment is very high. Creativity -- like water --tends to find its own levels. Don't overdue pushing resources based on color/geography.	7/21/2018
5593	0.1	/topics/land-use-built-form/	Interior 3 type zoning: The sample drawing that accompanies Interior-3 shows how out of place this proposed housing would be in my Lynnhurst neighborhood: replacing individual 100 year-old homes with cookie cutter developments, destroying trees, increasing run-off into Lake Harriet and yielding no affordable housing. It is appropriate for neighborhoods nearest downtown on a targeted basis, not anywhere in the city that happens to be near "not on a bus route. Liz Buckingham, 4815 Colfax Ave. S.	7/21/2018
5594	81	/policies/social-connectedness/	Neighborhood organizations are critical to the city for continued citizen engagement. Although this is not the only venue for community engagement, they have a built infrastructure that can make it happen deeply and frequently. The city must continue to support neighborhood organizations through ongoing funding and assistance in creating greater diversity in their leadership.	7/21/2018
5595	31	/policies/creative-workers/	This has too strong a "color" focus. Creative people merit help based on the quality of their minds and hearts - their work -- not the color of their skin. Forcing resources based on color diminished the unique capabilities of creative people in all fields -- and note that this is not limited to the arts.	7/21/2018
5596	6	/policies/pedestrian-oriented-building-and-site-de	<p>Removing all offstreet parking requirements throughout the city is both an exclusive action step and a recipe for disaster. Cars are not going away anytime soon. They need to park somewhere. Families with young children, the disabled and the elderly all rely on automobiles.</p> <p>Pretending we have a fully functional transit system that can serve everyone in all parts of the city is irresponsible and not inclusive.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5597	1	/policies/access-to-housing/	I know a lot of people in my neighborhood - I live in greater Longfellow (Howe specifically) - have vocally opposed building of 4-plexes, specifically, in our interior neighborhoods. I disagree with them and I am fully supportive of diversifying our housing stock in our area in particular. I believe that attractive duplex, 3-plex and 4-plex units can be added to vacant lots (or tear-downs when the existing house cannot reasonably be preserved) in our area, if they are built to an appropriate scale for the surrounding 1 and a half story bungalows.	7/21/2018
5598	1	/policies/access-to-housing/	We absolutely oppose allowing new 3-4 unit structures in wide sections of the city. Your historical perspective perhaps overstates the role of racism in the development of housing types in Mpls. Other factors came into play and still do. Allowing new housing in close-in neighborhoods that match the existing range should NOT mean allowing 4-plexes on every block, or cramming apartment buildings beside single family/duplexes, nor should it continue to allow demolishing smaller homes to permit super-large single houses. Of all the action plans, this one needs the most re-thinking.	7/21/2018
5599	6	/policies/pedestrian-oriented-building-and-site-de	Do not allow the "grandfathering" of existing auto repair facilities that are in neighborhoods. Once the current owner is no longer in business the property must be used for another purpose, one that is not auto repair related.	7/21/2018
5600	33	/policies/affordable-housing-production/	Be sure you fund enforcement of these policies -- and do it! Also raise the priority of "aging in place" -- regardless of color and geography (and to some extent, income). The roots of this city are at least as valuable as the new growth.	7/21/2018
5601	73	/policies/stormwater-management/	Toward the goal of reducing impermeable surfaces. With the goal of increased housing density, make sure that any new multifamily housing is required at least not to increase the % of impermeable surfaces and to include trees in the design plans, and green space as well. It helps with the heat sink and livability as well. City budget support to incent this might be needed.	7/21/2018
5602	0.1	/topics/land-use-built-form/	Please upzone the entire city and not listen to all these angry dusty old white people who have nothing to do but be brainwashed by Carol Becker and all her lies. We have to get rid of exclusionary zoning upon which this city is built on and all these old white homeowners in Southwest Minneapolis and Kenwood need to get over it.	7/21/2018
5603	34	/policies/affordable-housing-preservation/	Good.	7/21/2018
5604	0.1	/topics/land-use-built-form/	Please upzone the entire city and not listen to all these angry dusty old white people who have nothing to do but be brainwashed by Carol Becker and all her lies. We have to get rid of exclusionary zoning upon which this city is built on and all these old white homeowners in Southwest Minneapolis and Kenwood need to get over it.	7/21/2018
5605	13	/policies/landscaping/	A requirement for MAINTAINING this landscaping policy. Too often, particularly in small commercial areas and neighborhood business nodes, landscaping is installed but not maintained or, even worse, removed over time.	7/21/2018
5606	37	/policies/mixed-income-housing/	Good.	7/21/2018
5607	17	/policies/complete-streets/	Under the current biking plan, bikes are often sharing space with transit busses making the bike lanes unsafe for recreational bikers. Bike plans should offer alternative bike routes through neighborhood commercial nodes.	7/21/2018
5608	9	/policies/open-spaces-in-new-development/	Great, but how do you ensure this in conjunction with affordable units?	7/21/2018
5609	38	/policies/affordable-housing-near-transit-and-job	We see the reasoning behind these steps but... this is a northern city with long, dangerous winters. Cars are not going away in the immediate future, and only gradually over the next 20 years. Mix realism with the idealism and stage policies appropriately.	7/21/2018
5610	1	/policies/access-to-housing/	This all sounds wonderful. As someone who doesn't drive, I appreciate the push for density to make living without a car even more convenient than it is today.	7/21/2018
5611	34	/policies/affordable-housing-preservation/	Create overlay districts that discourage single-family rental housing - providing more single-family homeownership opportunities especially in areas where there are significant "starter" homes.	7/21/2018
5612	39	/policies/fair-housing/	Note that "people most impacted" include both those of color and others. Also note discriminatory barriers for older residents. Public policies like these are only part of the solution. You must hold private developers to the same standards.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5613	18	/policies/walking/	<p>All this won't do any good if the area surrounding them is not perceived as safe. Over the years the areas I consider walking alone safe, especially at night, have shrunk. Why take unnecessary risks?</p> <p>Most sidewalks are in residential areas. They don't need special treatment, just maintenance and completion.</p> <p>Sidewalks need to be maintained so they are reasonably level and free of obstructions. After snow storms the corners are often blocked until City crews can come back to clear them. Even if the homeowner clears the way it can be blocked when City crews come back to widen the plowed area.</p> <p>The year before last neighborhood property owners with defective sidewalks were required to replace them. But those with missing sidewalks were not required to remedy the situation (and not because of lack of right of way). Neither were the handicapped ramps fixed. Ending this special treatment would fix this problem without requiring a new program. It had been over 30 years since this was last done in our neighborhood. There were many dangerous uneven sidewalks. Every 10 years would be more reasonable and make it part of the TISH program (so no new program would be required).</p>	7/21/2018
5614	35	/policies/innovative-housing-types/	Address the water, sewer, and utility line connections that will allow for more than a single family house on a lot. ADU's built on a lot but not connected to the main structure should be able to access stand-alone utilities.	7/21/2018
5615	40	/policies/homelessness/	Work with the churches and other non-profits, not against them. Be an ally with community leaders engaged in fighting homelessness.	7/21/2018
5616	36	/policies/innovative-housing-strategies/	Consider a tax levy to increase the City's \$10 million funds.	7/21/2018
5617	17	/policies/complete-streets/	Create a "housing" dedication fee (similar to the park dedication fee) to increase the City funds available to create new housing.	7/21/2018
5618	41	/policies/tenant-protections/	As someone who has lived my entire life without a driver's license, and now in my sixth decade of life, I appreciate these Action Steps!	7/21/2018
5619	42	/policies/expand-homeownership/	Note that renters include a wide variety of people, not just those of color. Young people, recent college grads, seniors -- all are important contributors to the quality of life in the city. Make sure all renters benefit from your policies.	7/21/2018
5620	47	/policies/housing-maintenance/	This is to focused on people of color. It needs to be revised to include others -- especially young families of all colors (and education/income levels) who can't afford to own homes in the city.	7/21/2018
5621	0.1	/topics/land-use-built-form/	Preserve the majority of single-family housing for homeowners. Create more opportunities for development of duplexes, tri-plexes and four plexes	7/21/2018
5622	43	/policies/housing-displacement/	I'm afraid that parts of this plan will destroy the neighborhood warmth that attracted our family to Minneapolis five years ago after we finished our MD and PhD in Chicago. Minneapolis has a great character and a lot of protected neighborhood gems and natural splendor that Chicago doesn't, and this plan appears to hand the keys over to developers. The cleanliness, the healthiness, the fresh air, and the green space were all big attractors for us, and we fell in love with the bike paths. There's a big natural and neighborhood cost of handing over the natural Kenilworth corridor + Franklin + 21st street and into a "corridor 4" class for redevelopment. The fact that the city has-- at least previously-- made greenspace and neighborhoods a priority gives Minneapolis a warm, distinctive character. Please keep it alive. Thank you.	7/21/2018
5623	56	/policies/supporting-small-businesses/	"Gentrification" is a mixed bag. It can mean ruining affordable neighborhoods, but it can also mean improving neighborhoods in trouble. Policies need to be carefully -- and wisely -- targeted, not broad brush. And they need to be flexible.	7/21/2018
5624	57	/policies/cluster-strategy/	Create funding sources for small businesses. Develop programs with local banks that would require a percentage of their funding capacity to be directed to businesses that are difficult to fund - creating a pool of funds that are reserved for small businesses in underrepresented communities.	7/21/2018
5625	58	/policies/business-districts-and-corridors/	Unattainable unless there is funding attached to this effort. Currently, the City does not have the resources to accomplish this effort.	7/21/2018
5626	44	/policies/comprehensive-investments/	Support a commercial community land trust.	7/21/2018
			Good, affordable housing doesn't matter if there is recurring violence in the streets. Good, higher cost housing doesn't matter if the police can't (or won't) be effective in stopping robberies, break-ins, etc. Both diminish the livability of neighborhoods, and both require co-ordinated action plans.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5627	38	/policies/affordable-housing-near-transit-and-job-	The best idea I've heard so far is to start by allowing modest zoning growth along the current high-traffic corridors. As the growth fills in and reaches defined thresholds of apartments and density, the next adjacent blocks become available for the next stages of expansion. This process continues indefinitely, as thresholds are reached and blocks become available for rezoning the expansions remain more predictable and responsive to actual growth needs over the decades. Neighborhoods which are currently remote from current public transportation corridors would be limited to stricter requirements (e.g. duplex only limits, required off-street parking, etc.) until the density growth eventually reaches that neighborhood, and/or the city provides new efficient transportation hubs within the neighborhood to justify the more aggressive rezoning.	7/21/2018
5628	64	/policies/food-businesses/	Private, for-profit businesses, cannot succeed in underrepresented communities without strong financial support, not only from the community but from banks and other private funders.	7/21/2018
5629	23	/policies/coordinated-development-strategy/	Note the repeated use of "in these areas." ALL areas of the city need good base services: snow plowing, fixing potholes, maintaining sidewalks, paths, parks and amenities, personal and property security, etc. Interdepartmental teams are a good idea -- but, again, they should serve all neighborhoods, not just some.	7/21/2018
5630	17	/policies/complete-streets/	<p>I am strongly against this prioritization. The policy should be written so that walking, bikes, and public transportation are to be encouraged whenever possible. But to PRIORITIZE all these at the expense of those who want to, or need to, drive is egregious!</p> <p>First, the obvious facts: 1) In decent weather, this policy discriminates against the elderly, the infirm, those with physical challenges AND the monumental majority of those who simply prefer the convenience of using their cars. Of course, we need to figure out ways to deal with our additional population - but this is an uncalled for overreach of power by the city if it's implemented. 2) for 6 months of the year, in our climate, it's a DANGEROUS policy - forcing the elderly, the infirm, and those with physical challenges to be virtual shut-ins on many days of the year. 80 year olds, and even 40 year olds, are not going to be walking/biking/waiting at bus stops/walking from bus stops to their appointments in the heart of winter. What are the writers of this first draft thinking!!!!??? 3) I find the mindset behind this plan similar to that of the old days of Apple Versus Microsoft. I love Apple products, but in earlier days it was a kind of religion. There was a messianic sense in the way people who loved Apple talked about them. Apple: "I am a superior human being for using their products." Microsoft (from Apple lovers): "You are unworthy and low lifes." Well, that's the way it feels for walking/biking advocates versus those (idiots) who prefer to drive. CLEARLY, UNDERLYING THIS IS NOT JUST A FEELING OF WHAT'S GOOD FOR THE CITY, where we can agree or disagree. BUT RATHER, IT IS MORALLY SUPERIOR TO WALK OR BIKE THAN DRIVE. And those who disagree, SCREW 'EM. I DON'T CARE!!! C'mon - we all have to live together, right? Add to the ease of bikes, walking, and certainly public transportation. But making everything else a priority compared to aiding those who want to, or need to, drive? THIS IS SIMPLY WRONG, AND WRONG-HEADED. AND NOT THE ROLE OF OUR CITY GOVERNMENT. Sorry.</p>	7/21/2018
5631	0.1	/topics/land-use-built-form/	<p>The built form zoning looks like the city is planning to greatly increase its density. While there is currently an affordable housing shortage, there are also boom and bust cycles and it appears that there is a possibility of overbuilding. I am also concerned that city will not adequately plan for the infrastructure needed to support greater density. Reducing roads to accommodate bicycles is one such example. Some parts of the city are already too congested and fewer lanes won't help.</p> <p>In addition, there are a lot of fears the city will abuse its authority of eminent domain to facilitate this growth.</p> <p>The city's elected officials need to make themselves widely available to their constituents to answer questions and give information. They should also pay attention to comments on social media forums.</p>	7/21/2018
5632	58	/policies/business-districts-and-corridors/	The best idea I've heard so far is to start by allowing modest zoning growth along the current high-traffic corridors. As the growth fills in and reaches defined thresholds of apartments and density, the next adjacent blocks become available for the next stages of expansion. This process continues indefinitely, as thresholds are reached and blocks become available for rezoning the expansions remain more predictable and responsive to actual growth needs over the decades. Neighborhoods which are currently remote from current public transportation corridors would be limited to stricter requirements (e.g. duplex only limits, required off-street parking, etc.) until the density growth eventually reaches that neighborhood, and/or the city provides new efficient transportation hubs within the neighborhood to justify the more aggressive rezoning.	7/21/2018
5633	18	/policies/walking/	Narrow street widths????? Don't make it unsafe to drive! Particularly in winter.	7/21/2018
5634	45	/policies/leverage-housing-programs-to-benefit-c	Your action plans seem to contradict your policy goal. Hiring local sounds good... unless you can get the job done better by hiring the best people/businesses for the job. Same thing for hiring specific groups based on color/gender, etc. You need to listen to community voices whether they speak English or don't.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5635	18	/policies/walking/	I support the general direction of this policy. However, I would like to see how the city plans to deal with winter - since for about half the year our sidewalks are often covered with ice and snow making walking and rolling perilous for many folks. Also re: "fill existing sidewalk gaps where appropriate." I would argue that there is no place in the city where a sidewalk gap is appropriate.	7/21/2018
5636	46	/policies/healthy-housing/	Note that radon is naturally occurring in the city. Shouldn't radon abatement programs be co-funded by the city? Community gathering areas (both inside and outside) should be part of all large-scale housing developments.	7/21/2018
5637	20	/policies/transit/	Please make replacing wornout diesel buses with electric buses with a goal to have them all be electric in the near future. We need cleaner air downtown.	7/21/2018
5638	33	/policies/affordable-housing-production/	I soundly support this! It is so important for there to be more affordable housing in the city.	7/21/2018
5639	15	/policies/transportation-and-equity/	Need to look at better management of sidewalk cleaning regulations. Icy pavements and blocked sidewalks near intersections impact a lot of people -- regardless of color, location, age, etc. The regulations seem to be poorly enforced -- both ways: some sidewalks have long stretches that are not cleared... on the other hand we have been cited when our sidewalks were cleared.	7/21/2018
5640	9	/policies/open-spaces-in-new-development/	Public is public and private is private. If the City wants more spaces for use by the public then the taxpayers are going to have to pay for it, sooner or later. It would not be reasonable or fair to require a private property owners to provide a public park and then have to pay for upkeep, insurance, policing, replacement, etc. Review the third and fifth amendments to the US Constitution.	7/21/2018
5641	16	/policies/environmental-impacts-of-transportation/	You're not doing very well with managing congestion. Talking about it doesn't help. Work with MDOT so we don't paralyze the city every summer. We need a better structure for allowing events that close off approaches to neighborhoods -- running and bike races, for instance, require longer car trips because we can't into or out of our homes. Note that cars and carbon emissions will not disappear immediately. Implement policies in stages that reflect both current realities and longer term goals.	7/21/2018
5642	61	/policies/environmental-justice/	This sounds too vague. You need to have fewer action steps and clarify exactly what you mean. Also, consider adding seniors to your list of those negatively impacted. Also, recognize that "gentrification" is a complex term, not one to be universally "avoided."	7/21/2018
5643	66	/policies/air-quality/	Add light pollution -- especially around parks and natural assets. Work with the Park Board on policies such as arbitrarily lighting ball fields, ice rinks, etc, when no one is using them. Since ozone is naturally occurring in the city, allocate city funds for abatement, especially for homes occupied by seniors and low income people.	7/21/2018
5644	62	/policies/contaminated-sites/	OK.	7/21/2018
5645	81	/policies/social-connectedness/	Add incentives for businesses and multi-unit housing developers to include public/community gathering spaces. Encourage public officials, police, emergency responders, etc. to attend local gatherings -- block parties, events, etc. Encourage local "natural" gathering spaces in every community -- grocery markets, bars, pubs, etc.	7/21/2018
5646	85	/policies/access-to-health-social-and-emergency-services/	It would help if the police actually did something about "nuisance" crimes -- robberies, break-ins, stolen bikes and cars, disregard for pedestrian walkways, etc. The "big" things matter -- shootings, murders, attacks, etc., but the small things matter too.	7/21/2018
5647	63	/policies/food-access/	"Healthy" and "unhealthy" are not absolute terms for all people. Do we really want the city to be the arbiter of this kind of thing? Encouraging local, smaller grocery stores/markets (and local gathering spots like bars, pubs, coffee shops, etc. is a good priority.	7/21/2018
5648	0.1	/topics/land-use-built-form/	As density of dwelling units increases, how does the city propose to handle parking issues? It is not wise to make 20 year assumptions considering how much the 2020 plan could never have predicted. Nobody knows what effects if any autonomous vehicles will have on parking demands and making assumptions based on them, mass transit is highly dependent on state and federal funding we cannot predict or bank on, and people live increasingly decentralized lives that cannot always be served by 4 bus transfers without eating an entire day of productivity. I agree we should reduce vehicle trips, but the larger part of the population will still in this winter city want to keep access to their own vehicles, and they will be parked.	7/21/2018
5649	86	/policies/healthy-food-in-institutions/	Encourage more community gardens -- places where homeowners and renters can grow their own food.	7/21/2018
5650	78	/policies/park-design-and-programming/	One thing that gets overlooked: as the population ages and young families get busier with two-earner incomes, active grandparenting is increasing. Add action steps to help. For instance: parks can encourage multi-generational activities. Sidewalk intersections need to be cleared so older people can push strollers around them.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5651	1	/policies/access-to-housing/	<p>I strongly support the purpose of this Action Plan: we DO need more housing in Minneapolis; we also need affordable housing. I support higher density on and very near metro transportation routes. I also support multi-family housing that goes deeper into single-family dominated areas. I live in Fulton Neighborhood....so Fulton, Linden Hills, etc.</p> <p>My concern is that the city get some control of this and hold onto the control; otherwise, the builders will decide FOR us, which has not been the best result. How can the City maintain control.</p> <p>Regulation:</p> <p>1) Allow only one duplex and only one 3-unit or 4-unit housing structure per 1 square interior city block. If that block already has one of each, the builder will have to go onto another city block. It will decrease parking concerns, yet still encourage diversity and add density equally; people will share this change.</p> <p>2) Put a ceiling on what a 3-unit or 4-unit housing unit building can sell for: In Fulton, the going price is \$800,000 to \$900,000 per infill house. If the builder can only sell the units for \$300,000 each with the 3-unit dwelling and \$250,000 each in a 4-unit dwelling, this builder will not milk the system and build these multi-family units to make a bigger profit; he will make about the same --- We want affordable housing in the nicer neighborhoods so we can all truly experience diversity and start the authentic integration process in Minneapolis.</p> <p>If we have to rewrite ordinances, so be it. This plan would encourage anywhere from 5-6 buyers --for these individual units -- that would be more affordable to first-time home-buyers, lower middle-class buyers and one-income families perhaps.</p>	7/21/2018
5652	5	/policies/visual-quality-of-new-development/	<p>All good ideas, but not consistently or uniformly applied. Item b (multiple buildings on full block development) is often ignored. More specific guidelines, such as SAFHD standards, are too easily ignored.</p> <p>If fourplexes everywhere are allowed the design guidance will have to be more specific and actually enforced.</p>	7/21/2018
5653	1	/policies/access-to-housing/	<p>It is impossible to comment on this goal because it is not quantified and defined. Increase how much? Does scale mean size of the structure or the number of dwelling units? What is high frequency? The maps have bus routes that don't exist or can't be called high frequency by any definition. The maps that characterize neighborhoods are not correct. Why is the neighborhood used as a unit of evaluation? There is a difference between a neighborhood where apartment buildings and single-family houses are jumbled together and one where the two types of buildings are in distinct areas. Has anyone done research on how people define the area around their residence that is significant to them?</p> <p>Why is housing, rather than employment, being prioritized for areas around transit, especially LRT? (I find calling a couple of LRT lines "Metro" pretentious.)</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5654	18	/policies/walking/	<p>I see no mention of winter maintenance. With winter typically lasting for 4-6 months/year, and getting more extreme each year, it is critical that winter maintenance of walking facilities is prioritized. It is completely unacceptable that sidewalks become unusable for an entire winter. 311 calls/app seem to do nothing, which frustrates the user and discourages repeated follow up. Without any consequence, it seems that some property owners will not properly remove snow/ice from the sidewalks for which they are responsible. If a municipal sidewalk clearing program is to be installed, it should be all or nothing - it shouldn't rely on priority networks because that could discourage property owners from clearing sidewalks not on the priority network.</p> <p>If it is left up to property owners entirely, there must be swift consequences for leaving sidewalks uncleared. If property owners are unable to clear their sidewalks due to factors outside their control, they should be able to receive assistance.</p> <p>As the freeze/thaw cycle gets worse with climate change, sidewalks become even more dangerous. This is particularly an issue with high pedestrian volumes surrounding the U of M campus - snow is not cleared, it gets compacted by people walking, turns icy, melts, turns icier, etc. The city cannot expect people to adopt a walking mode if half of the year the infrastructure is unsafe, unreasonable, and honestly just feels insulting to use. Putting the burden on sidewalk users to report negligent properties (again, especially because it seems to do no good to call 311) is inequitable. It takes a lot of time to report each negligent property if you are walking any amount of distance in a day, and becomes particularly disheartening when it is necessary to report the same properties again and again, day after day, snow event after snow event, melt after freeze.</p> <p>Winter is nothing new and I can't believe this isn't better taken care of as of 2018, however, it needs to be improved immensely by 2040. We need to start now and make big changes. Streets are cleared for cars - we need to clear sidewalks for pedestrians. And need to take it as seriously.</p>	7/21/2018
5655	33	/policies/affordable-housing-production/	<p>I support this Action Step whole-heartedly. I am aging in place with my wife in a craftsman 1 1/2 story bungalow in Fulton Neighborhood. We have invested a great deal in maintaining and upgrading our home while maintaining the same footprint. We have a McMansion on both sides of us now as well as 1 behind and another 2 doors down. We are perceived as low-income folks by them because our house is smaller and technically older. However, we have good retirement savings and are definitely solidly middle-class. Still, we understand how and why diversity disappears if we leave it entirely to the market and the builders -- and the architects.</p> <p>If the market and builders have their way [because profit is much more important than any human being or community], there will never be any diversity of cultures, ages, race, class, background and income. The rich will be the only ones for blocks around, except for the streets with duplexes --- that are really invisible to the people who dominate the neighborhood. They are nice people, but this neighborhood is NOT and has never been integrated.</p> <p>I say create some 1 or 2 affordable housing units/buildings on every city block -- to get the changes this policy wants. It will enrich each block, wake each block up and integrate our high-class neighborhoods. It will also decrease ignorance and fear.</p>	7/21/2018
5656	41	/policies/tenant-protections/	<p>I hope that another action step is hiring more housing code enforcement staff. When I have talked to staff before and neighbors have filed complaints, it takes a very long time for poor conditions to change for the better in part because there aren't enough code enforcement staff to address all complaints. I suggest you add increased capacity for housing violation code enforcement as an action step in the housing chapter of the comprehensive plan.</p>	7/21/2018
5657	42	/policies/expand-homeownership/	<p>What does "support" for non profit orgs and wealth-building housing models look like? Does it mean the City of Minneapolis will say "that's a good idea" or does it mean that there will be funding for those programs? Will the City lead those initiatives? I hope this is more clear in the future and the City takes an ACTIVE role in making sure that homeownership is appropriately offered to those that are ready. Many families of color lost their homes during the last recession, in part because of poor lending standards. The City should act to correct this, BOTH by promoting homebuyer education so fewer people accept poor mortgage products/scams AND by supporting wealth-building housing models among families of color and low/mod inc households.</p>	7/21/2018
5658	43	/policies/housing-displacement/	<p>One of the programs to expand that best prevents displacement of low/mod inc families is the community land trust model. I hope that the City offers financial support to CLCLT to expand their work.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5659	38	/policies/affordable-housing-near-transit-and-job-	There is nothing in your plan that truly addresses affordable housing. In the words of your presenters, density will not help the affordable housing crisis. You need to preserve starter homes, duplexes, fourplexes and older, smaller apartment buildings to maintain the affordable rents they are currently offering. A program that incentivizes such properties to keep their rents lower would be better than new development because new construction is too expensive to be affordable.	7/21/2018
5660	4	/policies/access-to-commercial-goods-and-service	Action step h is particularly important as there may be a surfeit of retail space on the ground floor of new development. Be more creative about what ground floor spaces will serve the public and activate the sidewalk.	7/21/2018
5661	23	/policies/coordinated-development-strategy/	<p>it is odd to me that this is the first housing strategy with action steps that explicitly note "prioritizing use of city dollars." I think nearly every housing policy mentioned in 2040 needs city dollars, and action steps should make that clear if that is the intent.</p> <p>I know that right now, the Council is considering a policy to require that all brownfield redevelopment include affordable housing. I think that the last action step for this policy (Strategically acquire and dispose of property in order to implement coordinated district-wide development plans in these areas) should have the same requirement for all parcels of adequate size-- these coordinated development properties should be required to have affordable housing.</p>	7/21/2018
5662	46	/policies/healthy-housing/	I think that using a policy similar to the PW policy for improving streets (which weighs both the degradation of the infrastructure and the amount of vulnerable populations that reside nearby) with addressing maintenance of housing would be a great idea-- perhaps that is what is intended in the first action step (Focus resources for housing improvement programs and actions in historically underinvested communities where unhealthy housing has caused poor health outcomes.)	7/21/2018
5663	29	/policies/creative-sector-economy/	Recognize the importance of concentrations and communities of artists in the spaces where they work. Don't dilute it with housing, don't redevelop it for website companies and design agencies...they will come naturally to areas of low rent at the start. In the Northeast Minneapolis Arts District, for example "the arts at work" is a production district. Broadway to 26th, Central to the River. There's a need for big spaces for big projects, natural ventilation and sound isolation, away from neighbors so they don't have to smell the odors, smoke, or noise that's inherent in the industrial aspects of arts processes. These big former industry buildings encourage multiple creative people to interact with each other. Businesses that serve needs of the artists working in the district should also be welcomed. The area is gentrifying with brew pubs and restaurants; just don't let it get to a tipping point or you'll kill the golden goose.	7/21/2018
5664	47	/policies/housing-maintenance/	I think there should be a huge focus on the 4th policy, this is INCREDIBLY important and deserves funding and staff time. (Expand financial and technical resources for the maintenance and improvement of owner-occupied and rental properties with conditions that ensure the continued affordability of the housing units.)	7/21/2018
5665	48	/policies/data-driven-decisions/	I'm glad that this section has such robust and detailed action steps and focuses on helping vulnerable and historically excluded populations. Please practice authentic community engagement.	7/21/2018
5666	1	/policies/access-to-housing/	<p>Action step b should define Downtown as west of the river and bounded by freeways.</p> <p>It's fine to allow more density in all neighborhoods, but don't let new development overwhelm its neighbors.</p> <p>If fourplexes are to be allowed design guidelines must be clear and enforced strictly and uniformly with few CUPs or variances granted.</p>	7/21/2018
5667	5	/policies/visual-quality-of-new-development/	<p>Are you sure "a" and "g" are not in conflict with each other? "High quality" and "distinctive" are not defined, and different communities have different scales. Would like to see more homage paid to the historic buildings and scale of community surrounding any new structure be taken into account when something new is built. Too many proposals look cookie-cutter and suburban; another design trend I dislike is using a hodge-podge of materials to take elements from the surrounding area. A nightmare if repairs are needed. City-funded projects, and even projects for which zoning variances or other city intervention are needed, should be required to include a percentage of the project budget to hire local artists and crafts people to do not just "plop" art sculptures but incorporate art into the overall building design: handmade tile accents in bathrooms and entryways, galleries in common areas, locally-handmade furniture and metal work for lobbies and garden spaces. When planned from the start, local art does not need to cost more than buying and shipping from across the country.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5668	6	/policies/pedestrian-oriented-building-and-site-de	<p>All good ideas, especially repeating that pedestrians get priority.</p> <p>There should be special mention of measures to make the public realm safe and pleasant in the winter.</p> <p>Automobile servicing will still have a place in the city for many years. Will I have to drive to the suburbs to get my oil changed?</p>	7/21/2018
5669	1	/policies/access-to-housing/	<p>Protect existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, especially within the Northeast Minneapolis Arts District (Broadway to 26th between Central and Marshall St. NE). The arts uses within the district are not compatible with new housing that may take issue with odors and odd-hours noise produced in an area where artists are constructing their work. The presence of artists provides "eyes on the street" at all hours.</p>	7/21/2018
5670	7	/policies/public-realm/	<p>New development should heal the grid when the opportunity arises. Improvements to the public realm should be focused on complete streets rather than plazas and private spaces that feel unwelcoming to the public.</p> <p>Open up new pedestrian connections wherever possible.</p>	7/21/2018
5671	33	/policies/affordable-housing-production/	<p>Re 2040 plan proposed zoning changes</p> <p>The proposal for extreme zoning changes to achieve housing equity are an untested approach. Why should we believe that "trickle down" affordable housing will work any better for people at the lower end of the economic scale than "trickle down" economics has? No amount of home construction will overcome racism, ageism, nimbyism, educational disparities, lack of economic opportunities, etc, etc. I think it would be better to double down on policies to directly reduce income disparities, so that more people have sustainable incomes and can choose where they want to live and what kind of housing they want to have. I am troubled by the idea that developers from outside our communities will profit the most from the new building opportunities. How about mandating that all developers taking advantage of any new zoning must be well-run nonprofits, rather than commercial developers? That way, new housing would be even more affordable, benefiting the folks most in need of affordable housing options.</p> <p>We need extremely strong safeguards in the 2040 plan to ensure that higher density doesn't rob our city of the quality-of-life advantages that make it such an attractive place to live (green space, mature tree canopy, open sky & sunlight, clean air, working infrastructure, quiet neighborhoods, high-quality housing construction, etc), all of which would be diminished by the housing density and taller building heights proposed.</p> <p>How will major, widespread development stress the city's infrastructure? How will it stress the city's already heavily used recreation facilities, parks and lakes? What compensation will there be for long-term homeowners whose property values go down when their property is shadowed by new, noisy, tall buildings that cut off light, air, and green space?</p> <p>Lastly, I would like to see an effort to contact every Mpls resident with details of the proposed zoning changes, followed by polling of all residents to find out how much (or, more likely, how little) support there is for such drastic across-the-board zoning changes. I wonder how many Minneapolis neighborhoods, if given a choice, would opt-in to the proposed changes. I suspect you would find that the majority of neighborhoods, from low-income to affluent, would oppose the proposed changes as too drastic, unrealistic, and quite possibly ineffective in achieving the goal of affordable housing for all.</p>	7/21/2018
5672	8	/policies/public-safety-through-environmental-de	<p>Nice to see some diagrams to explain the Action Steps.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5673	3	/policies/production-and-processing/	<p>Particularly in Northeast Minneapolis, add Arts Production as a protected class for production processing areas. These arts uses are not compatible with housing as they can involve odd-hours work that is noisy and smelly.</p> <p>d.&.e. Protect Production Areas - do not allow non-production in Production Areas; exceptions might be businesses that serve the workers of these areas.</p> <p>f. Protect older industrial buildings for future production and processing uses (not non-production uses). Require more stringent environmental testing before approving sites for re-use as housing. The ground might be cleaned up, but the buildings may retain harmful levels of chemicals in the dust, brick, concrete and tile. I'm a big fan of preserving historic buildings, I would just like to see them used for arts and other businesses rather than housing, in many cases.</p>	7/21/2018
5674	1	/policies/access-to-housing/	Require multifamily units to architecturally fit into the neighborhoods. So many of the new units being built are boxy and look cheap and would not add to the neighborhood aesthetic.	7/21/2018
5675	10	/policies/street-grid/	An excellent addition to the plan. The more connections the better, especially for pedestrians.	7/21/2018
5676	0.1	/topics/land-use-built-form/	I really do not think the majority of lots are large enough to support a 3 or 4 unit structure. Current setbacks should be kept.	7/21/2018
5677	31	/policies/creative-workers/	Buildings where arts are produced provide free opportunities for artists to relate to and learn from each other, even though art is for the most part an individual process. If artists are priced out of these buildings, they lose that random spark. Provide property tax abatement opportunities to owners of arts production buildings to prevent the cost of space forcing artists out of the City, and perhaps to encourage others to invest in this use rather than convert their big old buildings to housing.	7/21/2018
5678	49	/policies/educational-and-economic-access/	<p>1) Teachers and support staff must be given time and resources to develop interventions, incentive activities and additional activities that are relevant to engaging the entire diversity in any classroom. Create context and history of America and draw parallels. This time and resource addition will cost money; I support more \$</p> <p>2) I encourage teacher and staff training and ongoing discussions about classroom environments and social justice. Dialogue.</p> <p>3) I strongly support training workshops about classroom behavior differences between verbal/extrovert learning styles and nonverbal/introvert learning styles as they intersect with minority culture and the dominant culture. Reading between the lines: voice tone, volume, etc. to decrease inherent bias and flush it out.</p> <p>4) Job training, internships and transitional support services for minority students is absolutely essential for getting more students of color into the job market at the level they are fully capable of.</p> <p>5) We must increase awareness in the hiring procedures and create incentives for employers to increase and sustain a wide diversity of employees.</p> <p>6) Regular feedback to employers about workers protections; can we provide more transparency about employee wages?</p> <p>With so many of these action steps, \$\$\$\$\$\$ is key. Perhaps the old Public Service announcements on radio and television that communicate the cause/effect and the importance of helping our young people gain access to resources that have not been available. NOTHING CHANGES IF NOTHING CHANGES.</p>	7/21/2018
5679	38	/policies/affordable-housing-near-transit-and-job-	Be careful not to encroach on industrial production districts, particularly those accommodating artists, as they are a community worth protecting from too much density. Artists need cars to haul their supplies and haul their work to shows and galleries.	7/21/2018
5680	0.1	/topics/land-use-built-form/	I seriously think these should be scaled back along streets such as Xerxes and Penn. they should be corridor 3 since they do not go through the city.	7/21/2018
5681	11	/policies/skyways/	Good Action Steps. All new development in the designated area should include obvious connections between street and skyway system on every block face.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5682	56	/policies/supporting-small-businesses/	Artists are business people, but should be called out specifically so as not to be lost in the shuffle. Often a production artist will be working on a commission for a piece of functional piece of art, like an iron gate or a dyed fabric wall covering, and teaching classes, and working another job, all at the same time. They have unique needs. Art as an industry does not have its share of people of color, perhaps due to its uncertain nature. Embracing the arts as you would any other business will help make it more stable and therefore attract more creative workers of color.	7/21/2018
5683	50	/policies/access-to-technology/	<p>I support all three of these actions. However, people of all ages need regular access and practice with technology and the information that is available as a result.</p> <p>* I think we need to give our public libraries more resources for ---</p> <p>1) advertising and promoting small group and individual trainings on computers 2) training youth and elder volunteers to be available in the libraries to train and mentor and troubleshoot the public when they are using the internet and the library resources online.</p> <p>3) A partnership with MnScu to link these youth and returning learners technology training with the opportunities of a community college....partnerships in technology proficiency in school and on-the-job. Can we share expertise?</p> <p>4) A public campaign for technology use for better jobs and income rather than being pulled in by entertainment and email. Smart technology learning, resources and job skills. Again, PSAs about this. It must be visual and mediated.</p>	7/21/2018
5684	13	/policies/landscaping/	Landscaping should look good in winter and perhaps mitigate the harsh climate.	7/21/2018
5685	58	/policies/business-districts-and-corridors/	<p>Add: g. Support the existing Arts Districts</p> <p>Add h. Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement.</p>	7/21/2018
5686	15	/policies/transportation-and-equity/	Should the plan try to anticipate the possible effects of autonomous vehicles on the transportation system?	7/21/2018
5687	1	/policies/access-to-housing/	<p>As a 15-year resident of Southwest Minneapolis, I support the proposal to permit and support up to four dwelling units on a traditional lot. Our family is interested in using this to help us care for my parents as they age, while still giving them their own dwelling space.</p> <p>Some people have concerns about the increased development this may bring to our neighborhood. I have seen several ranch homes on our block replaced with suburban-style "McMansions" built "on spec." That development is already here, but it's neither protecting the old character of the neighborhood, nor building a new livable community.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5688	0.1 /topics/land-use-built-form/	<p>First, I'd like to thank all of you for your work on the draft plan and all the outreach sessions. Huge thanks to the person(s) transcribing every comment submitted on post it notes. There has been so many ways to comment and much engagement for years. I'd like to make two points, the draft plan reinforces redlining/exclusionary zoning (get rid of Interior 1 and see below) and please don't compromise for the sake of compromise. Do you think allowing duplexes with ADUs everywhere will make the people upset about this plan okay? They want nothing to change and want exclusionary neighborhoods where the entry fee is being being to afford a large expensive single family home. POCI have less accumulated wealth and aren't likely to afford that entry free.</p> <p>Nothing you do will make the status quo people happy so don't bother trying. I keep hearing that fourplexes will be difficult to construct because of a requirement of a sprinkler system. I ask for you to allow the most progressive policy don't restrict land use. Let the finances dictate that but not your policy or this plan. There are large SFH that could be converted that I believe wouldn't need the sprinkler system since they're old and already constructed. So allow our old housing stock to be converted to fourplexes.</p> <p>This plan doesn't go far enough we should have allowed even more everywhere by right. Why do the lakes area (Isles, Harriet, etc) have such low recommendations, shouldn't more people be able to live in those amenity rich areas that have a history of excluding POCI from housing. I realize a person could put parcels together for a larger structure but I think this is unlikely to happen and difficult to coordinate. We still concentrate housing to corridors which are often very polluted, noisy, and have cars traveling at unsafe speeds. Our past growth shows that nothing bad happens when you have a mixture of buildings in the neighborhood interiors it actually makes for a better pedestrian experience, let's embrace that. Why does Downtown East minimum height start at 8 stories, shouldn't more be encouraged as a bare minimum. Why is it that blocks from a transit corridor, bus and light rail, has such low recommendations-- people do walk distances for transit and the environment should reflect this. It should be higher more blocks into a neighborhood. We have a chance to do good and we should take it, aim high.</p> <p>By following the past pattern of development some areas will get more change, and others benefit from the past redlining and racial covenants. For example, from Hennepin south of Franklin (in Ward 7), the west side of Hennepin should be upzoned to have the same density as the east side of Hennepin to correct the history of racists zoning and redlining. The Lowry Hill East side in Ward 10 is more diverse (less white) and affordable compared to the exclusive Ward 7. I'm asking for more consistency. Why are we still protecting desirable rich white areas and from who are we protecting them? Look at the redlining maps and your current maps to see how you're continuing the pattern. You have an important job to make a city that works for marginalized people, let's correct the wrongs of the past by going even further. You can do it, you have a chance to improve it and really reflect equity for underrepresented people and their voices.</p>	7/21/2018
5689	51 /policies/healthy-pre-k-development/	<p>These are all so essential to making real change in Minneapolis, BUT HOW AND WHERE DO WE GET THE MONEY?</p> <ol style="list-style-type: none"> 1. Publicize and make visible the economic impact of early childhood education, intervention, reading aloud, Pre-K enrollment and turning off the tv as a babysitter in any home. Get the word out in dollars and cents. 2. Can we tax the wealthy some way to invest in poor children and low-income families so that they can work at their true potential and have doorways into the full-spectrum of activities, jobs, services and arts in the city? 3. What about Big Brother/Big Sister programs where older kids volunteer to help elementary kids get support, help, listening and time from older students? Can more minority elders and parents be invited into the schools to talk about career paths, education and study habits or building self-esteem? Can we bring the community into the education and training settings to be part of that solution? 4. We must continue to fund and fundraise for programs that are working and need to grow. 	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5690	0.1	/topics/land-use-built-form/	<p>We do not support the Minneapolis 2040 Plan as it is drafted right now. The end goals are admirable, but the methods to achieve them are misguided. Minneapolis already housed significantly more residents in the 1950s (520K) than it is expecting in the 2040s (460K) so it is unclear why such a radical plan is needed. In a free market, goals like housing density and affordability cannot be forced. The past is littered with "grand planned communities" with goals to remake an area or right past wrongs. However residents are trying to meet government-imposed goals, they are trying to meet their daily needs and build the communities they live in so these "grand plans" fail miserably. The Met Council should not force an out-of-touch, theoretical plan on a living, thriving city. The Council needs to develop a plan that puts more emphasis on supporting residents in their existing communities, making neighborhoods more attractive to current and new residents, and further emphasizing the transit hubs already developed.</p> <p>We cannot adequately support the current number of school-aged residents of Southwest in the schools we have now, how will we educate more? The city cannot even mobilize to plow the existing streets in Southwest in a reasonable amount of time, how does it propose to manage increased volume, crowding, and flow on those very streets? Increased density is fine if you have the infrastructure to deal with it. The city does not. It will also force families who seek homes (not apartments) and good schools to the suburbs, as happens in other established cities such as Chicago and Boston. Is that part of the plan? Then who will pay to plow the roads and fund the schools and train the police?</p> <p>While it's commendable that you are thinking ahead, let's not lose sight of current and immediate future needs that remain unmet. And let's come up with a plan to deal effectively TODAY and TOMORROW with the social concerns that seem to be driving this plan - by improving existing neighborhoods and schools. Then, once we can actually function successfully as a major metropolitan area - in all neighborhoods, perhaps it would be time to have a discussion about next steps.</p>	7/21/2018
5691	17	/policies/complete-streets/	Complete Streets should be the second highest priority after more housing. As part of putting pedestrians first, would love for the city to examine its policy against installing "No Turn On Red" signs and install more at intersections within 5 blocks of schools.	7/21/2018
5692	16	/policies/environmental-impacts-of-transportation/	It should be noted that walking is the lowest impact transportation system. Don't be afraid to put the word 'pedestrian' in this policy.	7/21/2018
5693	1	/policies/access-to-housing/	I am fully in support of the plan for neighborhood interiors farthest from downtown. We need more types of housing in Fulton to support a range of incomes and lifestyle choices. I also welcome renters. Note to neighbors: I am well over 30.	7/21/2018
5694	17	/policies/complete-streets/	Action steps should include the responsibility of new development to enhance the Complete Street if faces.	7/21/2018
5695	52	/policies/human-capital-and-a-trained-workforce/	<p>I think these are all important and essential action steps. However, as I go to fast food places, ice cream parlors, drugstores, shops and department stores, I think employee training and support services really aren't there for hourly wage workers everywhere. It is a sink or swim environment. Many young people, minority women, and older workers do not get very much supervision, initial training, ongoing feedback or check-ins.</p> <p>Since so many hourly wage jobs are where poorer people and part-time homemakers begin, this could be improved throughout the culture. What incentives for the employers? Show them the money lost, the loss of efficiency, morale troubles, etc.</p> <p>On-the-job training is really a thing of the past and that is a loss. Could employers have incentives [tax discounts] if they add supervision, video training and discussions, something that would help all employees improve on the job and move toward promotions sooner?</p> <p>Second Harvest Heartland trains volunteers all the time -- on-the-spot and ongoing. Perhaps the city could offer \$ incentives for them to do some on-the-job training in industries like MacDonald, Dollar Store, Department stores, etc.</p>	7/21/2018
5696	15	/policies/transportation-and-equity/	In our climate, people are not going to be biking in the winter. To not consider car traffic and parking is not realistic. We need to plan for parking. It is already difficult to get around the city with the density we currently have. If you want to prioritize public transportation, let's create a better public transit system before adding density.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5697	26	/policies/vision-zero/	<p>I doubt this goal can be achieved without draconian measures. How do you prevent a child from running into the street after a ball, the ice cream truck, or to see the cool thing a friend has. Do crashes and fatalities caused by police pursuits count? those on freeways? Do the action steps directly relate to the causes of the fatalities and serious injuries? What is a serious injury? A minor injury to a child or young person can create a chain of events that result in incapacitation or death for an old person. The impact on mental health can be much greater than a physical injury. Pedestrians and bicyclists should not be excused from changing their behavior to make themselves safer.</p> <p>The relationship between cost and benefit is probably not linear. The "cost" of preventing the last pedestrian fatality/injury is probably much greater than the first reduction in fatalities/injuries. At what point is it appropriate to spend the money for bicycle safety improvements. If one had \$100 to spend on safety improvements. For it you could buy one less pedestrian fatality, five less bicycle fatalities, or ten less traffic fatalities. Is it morally justifiable to spend the money to save the pedestrian?</p>	7/21/2018
5698	1	/policies/access-to-housing/	<p>I am against the new designations to allow curb to alley building in residential areas. I have lived in my home for 25 years and have worked hard to keep this a livable, quiet community. There should also always be parking requirements for neighborhoods. The idea that people will bike to commute is a pipe dream at best. On the nicest summer days I see maybe 1 to 4 people on bikes during my daily commute. I am not against 4-plex's but they need to fit in with the current design in a neighborhood. Not destroy the fabric of a community. I do not want a building towering over my property, blocking the sun, infringing on my privacy all in the name of density. This would also bring down property values. I love my neighborhood and do not want it ruined with a short sighted ill thought out plan devised by bureaucrats.</p>	7/21/2018
5699	33	/policies/affordable-housing-production/	<p>I am VERY concerned about the elderly in Minneapolis. They are not going to be able to "age in place" for much longer. The cost of property taxes alone are putting them out of their housing.</p>	7/21/2018
5700	43	/policies/housing-displacement/	<p>Need to cap property taxation regarding exiting resident due to spiraling property taxes. Both home owners as well as renters need to be protected from the property tax forcing them from neighborhoods. This is the city using market values and falsely assume you can pay because your asset has increased only option for fixed income people is move.</p> <p>Ordinary people often are seeing large increases in values but not able to keep up with Hennepin Co. property tax system that is not connected to the original ability to pay. There needs to be a cap for low income and fixed income that is not more than 20% of a property taxpayer's income... do not consider assets but income only regarding property tax.</p> <p>Only the wealthy will be able to keep their houses in many parts of mpls. The exiting community having some income diversity by longstanding residents will be go completely to those that have the money or can get subsidized.</p>	7/21/2018
5701	19	/policies/bicycling/	<p>The City needs to invest as much in an improved pedestrian environment as it does for the bicycle network. 100% of citizens are pedestrians. Fewer are cyclists.</p>	7/21/2018
5702	34	/policies/affordable-housing-preservation/	<p>50% of the medium income is not something that I would call affordable. New housing is not the answer unless builders are made to have lower rental rates. Currently, and in this plan, the city is enticing developers to build so called market rate apartments. The rents on these units tend to be in \$1,100 to 1,800 for studios, 1,400 to 2,600 for one bedrooms and even more for larger units. This is not affordable to lower income people.</p>	7/21/2018
5703	54	/policies/supporting-economic-growth/	<p>Economic growth, in particular job creation and preservation, should be a goal co-equal with wisely stewarding the land and waters of the city, after the core city services (public safety and sewer, water and streets) are provided.</p>	7/21/2018
5704	21	/policies/freight/	<p>Too bad that the photo for this Policy is of a Dinkytown railroad siding that would serve the City better as part of Granary Corridor connecting the Stone Arch Bridge to the Dinkytown Greenway.</p>	7/21/2018
5705	22	/policies/downtown-transportation/	<p>Good that the vertical connection from street to skyway is reiterated.</p>	7/21/2018
5706	80	/policies/development-near-metro-stations/	<p>I'm very excited about high-density development near the METRO lines. As a Minneapolis resident who doesn't own a car, I want more places that prioritize walking, rolling, and bicycling to connect to major transit lines.</p>	7/21/2018
5707	33	/policies/affordable-housing-production/	<p>Affordable housing is a right, and I'm glad to see this is a policy for the city. I could not afford to rent my apartment now if it were at "market rate." More housing helps keep prices stable and ensures people don't experience homelessness.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5708	1	/policies/access-to-housing/	<p>We strongly disagree with allowing multi-family housing units in primarily residential neighborhoods. With the addition of numerous extra vehicles (6 or more) on-street parking would be a problem, as would more traffic in the neighborhood. Additional traffic would destroy the quality of our quiet neighborhoods.</p> <p>We are not convinced it would provide affordable housing. With the development we've witnessed in the past and the prices charged for new homes, we're not convinced any new structures would be built to provide affordable housing. We support leaving the existing zoning regulations in place. Smaller, more affordable single-family housing would be preferable to large, high-end homes. We do not support buildings of 20 or 30 stories around the lakes areas. Keep these neighborhoods as they are. High rise buildings, with affordable rent, along transit routes make much more sense.</p> <p>Richard and Faith Wisland, Minneapolis residents for 42 years</p>	7/21/2018
5709	17	/policies/complete-streets/	Complete Streets policies serve people first, rather than cars. This is the city I want to live in - a walkable city where neighbors can connect to their local businesses and each other!	7/21/2018
5710	24	/policies/shared-mobility/	Make sure that shared mobility actually enhances access for all. Question of equity.	7/21/2018
5711	55	/policies/business-innovation-and-expansion/	Lovely platitudes. And utterly meaningless. I would bet a great deal that the author of these action steps has never successfully attained the core goal: the creation and expansion of a business. As someone who founded and for 30 years was the principal of a company that started as nothing but risk, one employee and the willingness to work, and which when I sold my interest, employed over 200 people, I know what virtually every entrepreneur comes to know: the best you as government can do is stay out of the way. If you don't understand in a realistic sense how business works, you have no hope of helping.	7/21/2018
5712	19	/policies/bicycling/	As a person who gets around primarily by bike, these policies are really important to my safety and health. I support the bikeway network, continued learning around best practices in building bikeways, and zoning that promotes bicycling.	7/21/2018
5713	56	/policies/supporting-small-businesses/	Grand idea: support small business by trying to micro-manage scheduling and employment costs. So far, Minneapolis is on target to learn the lesson of Seattle: if you raise the cost of labor, business will buy less of it.	7/21/2018
5714	35	/policies/innovative-housing-types/	Innovative housing such as curb to alley buildings in neighborhoods that are primarily single family, duplex, 4-plex mixes is not a good plan. It is quite the opposite. I am also firmly against plans to end parking requirements for new construction. Thinking that residents are going to ride bicycles for commuting and errands is not a plan for Minneapolis weather/climate. Even on the nicest days I see few, if any bicycle commuters anywhere in downtown or the surrounding areas. Our mass transit options are also very inadequate and do not support a large influx of people. One example would be the large developments near the Star/Tribune printing plant. I have walked around that area on the nicest of days and rarely, if ever, see a pedestrian walking or bicycling. I do however see them pulling out of the parking garages in their cars. As a homeowner I do expect there to be parking at least within a block of my home. Also, the city and developers statements that residents do not have any rights to street parking since they don't own the streets is also suspect now that city residents are expected to pay for the repaving of the streets in front of their homes.	7/21/2018
5715	18	/policies/walking/	Please start with the basics of making walking safe - enforce existing requirements to remove snow and ice from sidewalks. Most residents and businesses do their part, but there are habitual violators that get by with never clearing their walk (even after 10+ inch snowfalls) and submitting complaints to 311 seems to do nothing. We can't walk if the sidewalks are treacherous and we have to risk a serious fall just trying to get to the bus stop or neighborhood business node.	7/21/2018
5716	8	/policies/public-safety-through-environmental-de	We agree with designs to make our streets safer and to minimize graffiti tagging. Richard and Faith Wisland, Minneapolis residents for 42 years	7/21/2018
5717	18	/policies/walking/	We all walk! I support policies that ensure people can walk safely, walk joyfully, and walk frequently.	7/21/2018
5718	28	/policies/msp-airport/	<p>Does it mean spread out the noise or concentrate it in the areas where mitigative measures have been provided. It's difficult to understand most of the other proposed action steps. But the Airbus 380 in the room is the airport itself.</p> <p>Is it feasible to maintain MSP at its current location indefinitely? What should the City's position be about relocation of the airport? Should it promote relocation at the appropriate time. As the airport is within no municipality could/should the City annex it if the airport vacates all or part of the current facility?</p>	7/21/2018
5719	14	/policies/tree-canopy-and-urban-forest/	We agree with this plan's objectives. We like trees and they provide many benefits to humans through a cleaner environment. Richard and Faith Wisland, Minneapolis residents for 42 years	7/21/2018
5720	29	/policies/creative-sector-economy/	What is the proper building scale for creativity?	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5721	12	/policies/lighting/	<p>First.....I applaud the fact that future of conscientious lighting design is part of policy.</p> <p>Not totally comfortable with idea of using artist rendering of multi unit dwellings image as a reference point. I'm hopeful that Minneapolis is NOT projected to have less family oriented homesteads than multi unit structures. As to lighting itself amongst existing single family blocks as well as more densely populated areas, certainly the first real reason for them is to navigate safely in what ever mode is used. As light fixtures and bulb illumination types are decided on....NONE, I repeat....NONE should be the piercing bright LED unless specially shielded or be of a new generation of very soft/incandescent like LED. I believe, the verdict is still out on this type of visually uncomfortable light concerning "health".</p> <p>I refer not only the public thoroughfares, but also private yard/driveway light usage types and purposes. Many people have sleep issues which certainly relate to outside light brightness.....causing many serious problems(health, job, relationships). People should not be forced to provide extra blackout window treatments because another feels they own their own light pollution rules. This needs to be looked at in the plan.....ordinance wise.</p> <p>Also, of course.....safe passage (to and from) can be a delicate proposition concerning properly lit night lighting. More lighting to make night into daylight for safety is not the answer. We will only imprison ourselves from natures darkness and possibly overlook the need for solving reasons why street crimes exist.</p> <p>Before I move on to next comment.....just want to say something, where I believe am not alone. I live across from a park and a freeway beyond it. The light pollution from LED lights that are perhaps 1/8th and 1/2 mile away can literally produce enough light in rooms that turning on a light in dark is not ever needed. This is a total waste of energy. Hope this info is helpful.</p>	7/21/2018
5722	0.1	/topics/land-use-built-form/	<p>Under the following part of the plan: "In neighborhood interiors farthest from downtown that today contain primarily single-family homes, achieve greater housing supply and diversity by allowing small-scale residential structures on traditional size city lots with up to four dwelling units, including single family, duplex, 3-unit, 4-unit, and accessory dwelling unit building types."</p> <p>I would like to see the text changed to read more like this: "Investigate potential strategies and tools to achieve greater housing supply and diversity in neighborhood interiors farthest from downtown that today contain primarily single-family homes."</p> <p>I believe the idea of eliminating single-family home zoning requires more study and trials now, before it can be considered a reasonable change. The plan as currently stated is too radical a step to take without further study. I do not believe there is enough existing data to support the rezoning actions as currently proposed.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5723	12	/policies/lighting/	<p>First.....I applaud the fact that future of conscientious lighting design is part of policy.</p> <p>Not totally comfortable with idea of using artist rendering of multi unit dwellings image as a reference point. I'm hopeful that Minneapolis is NOT projected to have less family oriented homesteads than multi unit structures. As to lighting itself amongst existing single family blocks as well as more densely populated areas, certainly the first real reason for them is to navigate safely in what ever mode is used. As light fixtures and bulb illumination types are decided on....NONE, I repeat....NONE should be the piercing bright LED unless specially shielded or be of a new generation of very soft/incandescent like LED. I believe, the verdict is still out on this type of visually uncomfortable light concerning "health".</p> <p>I refer not only the public thoroughfares, but also private yard/driveway light usage types and purposes. This is a total waste of energy. Hope this info is helpful.</p>	7/21/2018
5724	73	/policies/stormwater-management/	<p>When zoning changes are made to Chapter 546 of the Zoning Ordinance, consider adding minimum requirements for permeable square footage, gray water collection, and/or green roofs to the Yard Requirements and/or Building Bulk Requirements in order to facilitate drainage and minimize runoff. Many of these lots are small and have long driveways. Clarifying Building Bulk and Yard requirements does not necessarily allow for sufficient drainage should long driveways, larger dwellings and/or impermeable reduce permeable space. Perhaps some high density areas should require collection of rain water for gray water use or the inclusion of green roofs. Adding these requirements would help ensure better drainage and could facilitate building site conformance to help manage higher runoff loads.</p>	7/21/2018
5725	28	/policies/msp-airport/	<p>Don't let establishing pedestrian access to MSP take away from more important pedestrian enhancements.</p>	7/21/2018
5726	63	/policies/food-access/	<p>Require grocery stores to stock nutritious food? Are you aware of the meaning of the word "nutritious"? If so, are you of the opinion that grocery stores don't carry food that is nutritious?</p> <p>Similarly, since you want to discourage unhealthy food, do you understand that all food is unhealthy in certain amounts and in certain concentrations, and all food is unhealthy in excess?</p> <p>This makes as much sense as NY attempting to address obesity by limiting the size of software drink containers. IT is not the food that is the problem in people's nutrition, it is the impulse to eat too much or to eat one sort of food to the exclusion of a more balanced diet. It is not within the reasonable control of the city to alter that human impulse, and the belief that you can do so is little more than an exercise in hubris.</p>	7/21/2018
5727	67	/policies/climate-resilient-communities/	<p>When zoning changes are made to Chapter 546 of the Zoning Ordinance, consider adding minimum requirements for permeable square footage, gray water collection, and/or green roofs to the Yard Requirements and/or Building Bulk Requirements in order to facilitate drainage and minimize runoff. Many of these lots are small and have long driveways. Clarifying Building Bulk and Yard requirements does not necessarily allow for sufficient drainage should long driveways, larger dwellings and/or impermeable reduce permeable space. Perhaps some high density areas should require collection of rain water for gray water use or the inclusion of green roofs. Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5728	19	/policies/bicycling/	This goal is unrealistic in this climate, unrealistic in a metro area where so many residents work outside of the city, and unrealistic for residents with children. Please stop wasting tax payer money on bicycle lanes. You built them, and few use them. Building more wont convince anyone to start bicycling for transportation.	7/21/2018
5729	35	/policies/innovative-housing-types/	Yes! Zoning limitations are a huge barrier to the development of new communities in neighborhoods.	7/21/2018
5730	19	/policies/bicycling/	Please start enforcing traffic laws for bicyclists. Three-times more cyclists running stop signs and not yielding to pedestrians is just as bad as car traffic.	7/21/2018
5731	33	/policies/affordable-housing-production/	Locate housing close to work to reduce the cost of commuting. Live near your work.	7/21/2018
5732	9	/policies/open-spaces-in-new-development/	Open spaces and green spaces should be required for all new development, not merely encouraged.	7/21/2018
5733	38	/policies/affordable-housing-near-transit-and-job-	Live near your work is a great idea.	7/21/2018
5734	70	/policies/ecology-and-habitat/	Rather than commenting on each policy in the Clean Environment section, we submit this one statement to strongly support all the environmental efforts and policies the City of Minneapolis has currently implemented and proposes for the future. Clean water, air, soil, waste management, and control of pollutants are all critical to healthy citizens and environments. We appreciate all that Minneapolis has done with recycling and organic collections. The overall plan, Minneapolis 2040, is very comprehensive and well thought out and planned on all issues. Richard and Faith Wisland, Minneapolis residents for 42 years	7/21/2018
5735	53	/policies/quality-of-life/	Think about the quality of life in a Winter City.	7/21/2018
5736	36	/policies/innovative-housing-strategies/	Treat housing light Minnesota treats wetlands. If affordable housing is destroyed, require developers to include affordable homes in the new development, or contribute to the cost of housing the displaced people.	7/21/2018
5737	6	/policies/pedestrian-oriented-building-and-site-de	Is the intention of this policy to drive business away from local businesses to the suburbs? Because that will be the result. Minneapolis residents are minutes away from plentiful amenities in neighboring communities including Golden Valley, St. Louis Park, Edina, Richfield, Bloomington (and on and on) that offer the convenience of parking. I like to patron local businesses and restaurants, but if you make it too difficult, then I'll just take my business elsewhere. Cars aren't going to go away. Its great to encourage various means of transportation, but this policy takes it too far. Please be more realistic and balanced in your approach.	7/21/2018
5738	55	/policies/business-innovation-and-expansion/	Work collaboratively with the U of M to develop underused land in the University District for innovation. The UD is unique in the City.	7/21/2018
5739	17	/policies/complete-streets/	If the changes in the comprehensive plan are implemented, there will be more people on Minneapolis streets. Streets should be preemptively made complete BEFORE new development. Otherwise the city will be playing catch up on creating appropriate sidewalks, bike lanes, and other infrastructure. The city still has not caught up to increased population in uptown, or even Lowry Hill while density in that area has not changed much in 80 years. Areas with good bike and pedestrian infrastructure will also help spur development, and help ameliorate concerns of current residents who will inevitably worry that current infrastructure won't keep up with future density.	7/21/2018
5740	57	/policies/cluster-strategy/	The University District has great geography for such a cluster.	7/21/2018
5741	1	/policies/access-to-housing/	The City is not even close to building out to the residential density that our current zoning allows. With such broad and dramatic increases in the zoning being proposed in the 2040 plan, we risk creating buildings that are "one-off warts" in a neighborhood. If the City really does still want single family homes in Minneapolis, the Plan should keep many R1 and R1A areas and only increase zoning where it makes the most sense. If the City did more to encourage the comprehensive "build-out" to what is currently authorized, I believe we could create an increase in density to allow the city's growth plan without many zoning changes and continue to make similar allowances for conditional use permits and variances in high transit zone areas.	7/21/2018
5742	20	/policies/transit/	While taking pride in using public transportation, we feel that fixed systems such as light rail or street cars are likely to miss the mark in a rapidly changing world of transit. Public transportation systems need to be flexible and nimble. Fixed rail and similar routes are not and cost more to develop and operate. The City needs to factor in increasing use of artificial intelligence, driverless vehicles, driving systems such as Lyft and Uber and the desire by younger members of the population to use individualized and more efficient means of transportation. ((See for example, The Economist, Volume 427, No. 9097, "Missing the Bus," (June 23, 2018)).	7/21/2018
5743	59	/policies/downtown/	The Central Riverfront should be called out as a great downtown asset, especially for tourism.	7/21/2018
5744	70	/policies/ecology-and-habitat/	Good to see habitat corridors mentioned,	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5745	32	/policies/arts-in-community-development/	<p>We support more public art, including more art in partnership with COC and low-income communities</p> <p>We support art programs that encourage place-making on community corridors</p> <p>We support art around the city that represents, reflects, and engages with local communities who are not currently reflected in the vernacular of the built, designed, and named environments, regardless of community make-up</p> <p>We look forward to art that engages with the walking realm, with a focus on:</p> <p>Temporary, interactive, site-specific, and activating art</p> <p>Art without red tape</p> <p>Art at pedestrian scale</p> <p>Crosswalks/sewer covers</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/21/2018
5746	0.1	/topics/land-use-built-form/	<p>Please stop this horrible plan. Why does the council and City get to make decisions for the people??? This does not work for the city. This is a BIG mistake. There must be other options but you only provided one option. Please stop the plan. Stop pushing your ideas on people. This makes me furious. Thank you.</p>	7/21/2018
5747	0.1	/topics/land-use-built-form/	<p>This is a terrible idea and please don't follow through with it.</p>	7/21/2018
5748	0.1	/topics/land-use-built-form/	<p>Please stop this horrible plan. Why does the council and City get to make decisions for the people??? This does not work for the city. This is a BIG mistake. There must be other options but you only provided one option. Please stop the plan. Stop pushing your ideas on people. This makes me furious. Thank you.</p>	7/21/2018
5749	10	/policies/street-grid/	<p>Minneapolis' "long blocks" are more than 600' long, which is 200' longer than an ideal block for retail/ comfortable pedestrian distances. The City should consider adding half blocks to certain areas of the city to break up these blocks and make them more conducive to business nodes.</p> <p>Also, the street grid makes for quite a dull urban fabric, and angled streets that cut through the grid should be greatly enhanced with mini parks and buildings that accentuate the angles (i.e. the Flat Iron Building in NYC). Hennepin Avenue and Minnehaha are places this should be implemented.</p> <p>This strategy doesn't seem to address alleys and their future design. Also, should the City design all streets on the grid to provide free parking on each side? Residential streets on the grid could have mid-block bump-outs, rain gardens, curves, speed bumps, and other features to make them more interesting and slow traffic. There have got to be more creative action steps for this Policy.</p>	7/21/2018
5750	80	/policies/development-near-metro-stations/	<p>We strongly support this policy. We encourage this kind of land use throughout Minneapolis, but especially around transit stops and near other destinations. In particular, we support:</p> <p>allowing/encouraging high intensity land use</p> <p>TOD, with a preference for development that supports additional transit amenities and ensures a mix of incomes/affordability in both residences and commercial</p> <p>small block size, including use of alleys/shared streets and streets that limit private motor vehicle access</p> <p>Accessibility via walking infrastructure, including streets that limit motorized vehicles</p> <p>Sidewalk-oriented buildings, active ground-floor uses that include multiple entrances</p> <p>Public space designed to facilitate meeting up/lingering/play/relaxation/community</p> <p>We support j, particularly the bans on auto-oriented uses and park-and-ride facilities, but I request that j go further, and that streets be designed for small scale human-oriented activities, with vehicle access limited to only as necessary (deliveries, mobility vehicles), rather than being allowed by-right in all areas.</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/21/2018
5751	0.1	/topics/land-use-built-form/	<p>I know for a fact from litigation I have been involved in, that the City's infrastructure is not significant enough to handle the current load. The City will need to make drastic improvements in sewer and water infrastructure. This plan is premature, under designed, and based on good fuzzy thoughts rather than real world options. Stop and rethink how Minneapolis should and can grow.</p>	7/21/2018
5752	76	/policies/new-parks/	<p>Action Step c seems unnecessary as the current ordinance already assigns the fee to new park facilities near the development. Clarify this.</p> <p>Has MPRB been consulted about this proposed Action Step?</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5753	84	/policies/public-safety/	You forgot a pretty important action step - train police how to deescalate situations without use of deadly force.	7/21/2018
5754	72	/policies/sustainable-water-system-management/	I know for a fact from litigation I haven involved with that the City's current sewer and water systems are truly lacking. Our infrastructure is not capable of handling the growth contemplated by this plan. We need to address the infrastructure before we decide where and how to grow. Stop, rethink, and redo the 2040 plan.	7/21/2018
5755	77	/policies/park-access/	Connecting parks may be as useful as improving individual parks. A pedestrian and bike friendly street network is as important to the City's public realm as are its parks.	7/21/2018
5756	65	/policies/urban-agriculture-and-food-production/	Access to the riverfront is as important as access along it.	7/21/2018
5757	0.1	/topics/land-use-built-form/	m. Don't rezone single-family homes so that having a home garden isn't something only a few can enjoy. Negative Impact to Park Users: The plan proposes zoning several parcels (3033 and 3131 Excelsior, 3322 and 3323 Ivy, 3210 Zenith) immediately adjacent to the lake and park to allow for 10 story buildings. If buildings of that size were built, it would significantly diminish the experience of park users. Park users would have less interaction with nature and open space as well as less light. Simply put, buildings of those size should not be right next to a park. Impact on the Environment: Bde Maka Ska, Cedar Lake, and Lake of the Isles are connected and an important habitat for birds and animals. The three lakes are important to migrating birds and are part of a critical migratory path for them. There are seventeen policies related to the environment in the plan. It does not appear that the impact of upzoning anticipated around these lakes on these policies has been studied or analyzed. We would hope that the impact of larger buildings so close to these lakes be fully understood before changes are made and buildings go up. Lake and Park Access: The proposed plan makes frequent reference to making parks and open space more accessible to all. We are fortunate enough to have had access to Bde Maka Ska and have used it for years. We see a diverse group of people from all parts of the city arriving in cars to access the lake for walking, fishing, picnicking, soccer, running, volleyball, swimming, and other activities. Transit is available (I commuted to downtown for many years on either the 12 or 17 bus) but many groups of people bring fishing gear, grills, coolers, picnic baskets, folding chairs, strollers, kayaks, and other items that cannot be brought by bus. We see many people with disabilities and families with small children. It is important that they can park their cars. Allowing ten story buildings immediately adjacent to the park and lake would inevitably result in highly constrained parking, limiting access to people from other neighborhoods and those who need to arrive by car. The lake and park should be accessible by car to people from all parts of the city. Robert Raul and Barbara de la Vega 3150 West Calhoun Blvd.	7/21/2018
5758	80	/policies/development-near-metro-stations/	Action Step f is particularly important for pedestrians.	7/21/2018
5759	1	/policies/access-to-housing/	I agree with the goal of increasing quality, affordable housing, ensuring a mix of housing and increasing the supply of housing, however I do not feel that a blanket approach to rezoning all single family home neighborhoods is the right approach. Adding density to single family neighborhoods will make them less desirable. People that choose to live in single family neighborhoods are looking for lower density living, that is why they choose a neighborhood not a condo in downtown. Alternatives to blanket rezoning are: 1- establish maximums for rezoned property in any given neighborhood or city block (ie: max of 10% homes can be rezoned on any city block)- this would ensure increased density and access is spread throughout the city and also ensure single family neighborhoods are allowed to maintain lower density quality than keeps many people and families living in the city. 2- maintain rezoning planned for transit routes and areas identified for high density living, and offer more city programming to increase access to single family housing for lower income brackets and minorities in all neighborhoods.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5760	20	/policies/transit/	<p>We support the city focusing on outcomes (where people want to be and where people are coming from and how they want to feel en route) rather than mode-siloed operations and vision.</p> <p>We support a stronger regional transit network, including connections to greater minnesota, to improve access to jobs as well as to reduce car-dependency and a car-requirement for those who wish to visit other parts of the state/region</p> <p>We support higher quality transit-related infrastructure (bus shelters, heating, lights) and encourage the city to also consider seating for those with limited mobility, as well as restroom and food access, and play/infrastructure for children to engage with. We support more frequent and 24/7 bus service to allow transit to be a viable and safe option, particularly for those who are low income and transit-dependent or for whom car ownership/car-dependency functions as a regressive tax (Speaking of transit-related infrastructure, SNOW CLEARANCE.)</p> <p>We support coordinating and planning transit with new development, to avoid replicating car-dominance, car-centrism, and car-dependency</p> <p>We support high-frequency bus lines; we would like to see higher frequencies than are currently offered on hi-frequency transit routes</p> <p>We support reduction of freeway lanes and use of existing freeway lanes for dedicated transit/biking/walk purposes</p> <p>We support more transit routes providing more direct connections between all parts of the city: for example, North to Northeast, North to Southwest</p> <p>More late-night transit lines and special event service (e.g., run the University express buses back from Uptown at bar close)</p> <p>Plan for off-prescription uses of transit and allow/encourage them: eliminate transit fares during extreme weather events (heat advisories, snow emergencies); increase bus frequency during frostbite weather, coordinate with social services and shelters for serving needs of people experiencing homelessness</p> <p>Do not use transit for police activities, whether ICE or rounding up non-violent protestors.</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/21/2018
5761	82	/policies/aging/	Action step b should include safe sidewalks for aging pedestrians.	7/21/2018
5762	46	/policies/healthy-housing/	Make stricter standards requiring landlords to maintain safe and clean rentals. Increase inspections and enforcements in underserved communities that don't have the means to fight landlords in court or have an understanding of tenant rights. Revoke licenses from slumlords.	7/21/2018
5763	83	/policies/people-with-disabilities/	Continue to make sidewalks accessible for all abilities.	7/21/2018
5764	20	/policies/transit/	<p>The action steps of this Policy are too general and need more detail about where and by what method transit will be improved. There are locations currently with enough density to justify significant transit improvements like Downtown, Uptown, Central Avenue, Lake Street, the U of MN, Seward, Chicago Avenue, etc., right? What are these places, and could bus tunnels, subways, streetcars, trams, bus-only lanes, ABRT work there? If not, how many people are needed to make those upgrades possible because the current bus system is too slow, infrequent, and gets stuck in car traffic.</p> <p>What are the locations in the City with low densities, and how many more people are needed there to make transit work better?</p> <p>Metro Transit doesn't appear to have enough resources to make most of the improvements needed to make transit service work well in Minneapolis. Can the City fund upgraded bus service, bus shelters, benches, signage, shoveling of snow at bus stops, etc?</p> <p>Except for the two LRT lines, the transit system is pretty bad, so much bolder action will be required to make service better by 2040.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5765	19	/policies/bicycling/	<p>We support this policy of improving and expanding bicycle facilities</p> <p>We support streets that center people (bicyclists and peds) over other modes, including a rapid expansion of true shared streets that use environmental cues to create safe spaces for biking for all ages/abilities regardless of the presence of motorized vehicles</p> <p>We support planning for secure and accessible bike parking and storage, including sheltered and indoor bike parking, in all new builds and remodels, in all street redesigns.</p> <p>We support coordinating with MetroTransit and other city-regulated transportation services to provide better bike access on buses and trains, including for those unable to lift their bikes.</p> <p>We support wider bike lanes that allow for bicyclists to pass each other without going onto the sidewalk.</p> <p>We support prioritizing bike lane snow clearance, particularly as it benefits those using wheelchairs and strollers and carts</p> <p>We extend this support to other small scale wheeled mobility aids, including scooters, skateboards, strollers, tricycles, cargo-bikes, unicycles. In particular, I encourage the city to consider the needs of disabled cyclists, bikes as assistive or mobility, devices, and/or biking with children, seniors, and/or cargo.</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/21/2018
5766	14	/policies/tree-canopy-and-urban-forest/	<p>I'd like the city to coordinate with Mpls Park & Rec in acquiring parcels for clusters of trees and other plantings. To me, this is especially true with more hard surfaces such as buildings, streets and parking lots. More trees increase/improve air quality and reduce respiratory illnesses. And the sight of trees is a stress reliever. Not all residents are able to visit the BWCA, so this is especially important for disabled and people with less money.</p>	7/21/2018
5767	0.1	/topics/land-use-built-form/	<p>I am concerned about the economic opportunities presented to small and local business in the Minneapolis 2040 plan. The 2040 plan seems to create business opportunities for large developers and chain retail and only gives lip service to small developers and independent business. What I don't see in the plan is a limitation on the density of national chain vs local retail. We need to make sure low-income areas are adequately served with businesses that make viable neighborhoods, and more affluent areas not overserved with bland national chains instead of businesses that build a local economy.</p> <p>I encourage the committee to read the article in the June 2018 Harpers Magazine, "The Death of New York City". It details the policy pitfalls that have rendered the city a hostile environment for lower and middle income residents and small/local businesses. NYC is now a 'desert' of chain stores and luxury development, and has rapidly lost its cosmopolitan appeal.</p> <p>https://harpers.org/blog/2018/06/podcast-the-death-of-new-york-city/</p>	7/21/2018
5768	74	/policies/integration-of-water-management-into-	<p>Climate change may bring torrential rain, so consider "dis-allowing" underground parking lots deeper than 2 levels.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5769	48 /policies/data-driven-decisions/	<p>policy # 48</p> <p>What is the average density we are using as a goal??. similar to what city? The increase of density to address the need for more people and provide a balance community is in line with many of us. The impression for me is good data , good goals, thoughtful polices but a suggested questionable method to rework well established neighborhoods. Is this the first place we need to look for density increase techniques. At lease from the meetings I have attended it seems to be the primary focus to add residents by increasing density on existing corridors. The proposal assumes that it is best to rework exiting corridors rather than rethink how we add to the city while not changing and forcing exiting properties to conform to a ' Chicago ' like format... high density around each single/duplex housing neighborhood. I distrust the market to be fair or take on reasonable planning however recently we have witness the North Loop and the Hiawatha grain storage area be put to use successfully as housing. The failure in these projects are in not providing for a diverse or lower income as well as the middle class. This is due to being unregulated developments regarding urban planning and future development needs a 2040 plan.</p> <p>However lets look at the recent 'market strategy' of using retired industrial or under performing commercial space which has been an enhancement to neighborhoods. These have become islands of increased density with out reshaping exiting communities; they have been additions not distortion to the community.. The present proposal is to increase density is by layering via mapping the exiting street grid with higher number of living units. These selected islands can max the concentrated planning effort offer more efficient building of living units, better afford amenities and offer quality transportation depots. This type of search out land and acquiring it for development and setting the guide lines should be the Metro Council and Mpls 2040 role not investors. I think we need to think how to implement this plan so we better and more thoughtful bring developments that are enhancement to adjacent neighborhoods. This can be a more targeted to keeping the city intact while increasing both mpls and the immediate metro living and transportations systems. The solutions need to be conceived with the near suburbs it is the working part of the city and there is more open space and with in 10 miles of city center. From the start we need to be drafting this 2040 plan with the "real city' not the lines on a map. We all live in several communities on a daily basis our communities are a continuum in the real world yet we are going to develope separate community drafts and then bang out a common urban plan? Conclusion:</p>	7/21/2018
5770	43 /policies/housing-displacement/	<p>The proposed city-wide upzoning is guaranteed to make displacement worse. This plan seeks to reduce the number of single-family homes, which will result in remaining areas with single-family homes being gentrified. Single-family home ownership (or rental) will be out of reach for most. This plan is big on talk but contradictory in action.</p>	7/21/2018
5771	7 /policies/public-realm/	<p>Consider sanctions on developers who fail to provide landscaping as promised in their proposals.</p>	7/21/2018
5772	61 /policies/environmental-justice/	<p>This Policy seems to ignore the fact that freeways and highways were plowed through Minneapolis wrecking neighborhoods and leaving huge barriers and environmental effects for many people of color. Olson Highway will be rebuilt as a 6-lane roadway for the future Blue Line extension rather than being made into a normal street for people. It creates a huge barrier through North Minneapolis. I94, I35W, and I394 create huge barriers mostly get get suburban people in and out of town.</p> <p>This Policy needs lots of work.</p>	7/21/2018
5773	1 /policies/access-to-housing/	<p>I'm concerned that developers of multi-unit housing are allowed variances to construct non-ADA compliant structures. Please. It is ridiculous to overlook disabled and aging population and allow some developers to construct buildings that don't meet requirements of Americans with Disabilities act. This contributes to segregation of groups by abilities/disabilities.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5774	78	/policies/park-design-and-programming/	<p>We support equity-based park prioritization and programming and active recruitment of minority/immigrant residents, as well as multi-lingual and fully accessible support and services</p> <p>e. We support universal accessibility of all all parks, including partnering with MetroTransit to provide robust, frequent, year-round transit access to all parks, including a free grand rounds circulator.</p> <p>We support much higher-intensity land uses, both housing and commercial, directly adjacent to parks, especially to our most-visited parks.</p> <p>We support food forests</p> <p>We support year-round, 24/7 full accessible, non-gendered restrooms in every park and at frequent intervals in all parks and along all parkways/around all waterways</p> <p>We support removing private motorized vehicles from parkways</p> <p>We support maintaining (especially snow/ice) and lighting all paths within all parks as part of our walking and biking infrastructure</p> <p>We support phasing out mixed-use paths; we support transitioning car-routes to two-way bike traffic</p> <p>We support maintained and publicized paths across frozen lakes and waterways as safety permits, to allow integration of winter & education/equity</p> <p>In general, make parks places to move through as well as places to be.</p> <p>I support trees for climbing</p> <p>I particularly support point j</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/21/2018
5775	16	/policies/environmental-impacts-of-transportation/	I think reducing our impact on the climate is really important and I support all of the action steps in this policy.	7/21/2018
5776	0.1	/topics/land-use-built-form/	No parallel regulation to ensure new housing includes low cost options. We must have this before the plan is approved.	7/21/2018
5777	18	/policies/walking/	<p>This should be a natural goal for anyone and is, but not all can walk for several reasons and should not be assumed. One of our greatest enjoyments is to experience the freedom of independence to be in natural progression in space.....motion/movement. To actually arrive at a destination by one's personal energy has potential of lifting self-confidence exponentially. Should be taught as societal need in this time.</p> <p>People with a walking disability may need support here. Not sure how to address, but did not see committed initiative here advocating for persons with disabilities.....perhaps elsewhere. Creativity starts anywhere.....maybe here. I'm aware of new adaptive cycling initiatives.....not adaptive walking (yet). We must all adapt to all considerations of one's abilities. All just a thought that needs percolating.</p> <p>I do have a question about said "visibility" when walkers cross the street. Who's visibility? Feel positive toward.....experimental change of intersection crosswalks to be " stop all street traffic in any direction" then allow pedestrians to walk diagonal or perpendicular to nearest destination. Very little risk of contact creating injury.....such as right vehicle turners. Also.....walkers may save time?</p> <p>In terms of pedestrian safety at sidewalk curbs that are adjacent to bike lanes.....any movement across into street by walker looking left(right?)may cause serious injury. Think need for various reminders until imbedded in our more bike conscience society.</p> <p>Love this WALK possibility policy section.....can't help think of how efficient it is as a choice.....you make it and there's basically NO WAITING or TOOLS NEEDED(for majority).</p>	7/21/2018
5778	0.1	/topics/land-use-built-form/	Zones are not applied consistently. South of Lakestreet, Chicago and Nicollet bear the brunt of 6 story buildings.	7/21/2018
5779	42	/policies/expand-homeownership/	Expanding homeownership is a great goal, but how will you accomplish this when other policies in this plan are working against this policy? Areas with homes accessible to low and moderate income households will be gentrified and will no longer be within reach when the stock of single-family homes is decreased due to upzoning. Additionally, the upzoning is targeting streets that currently have lower cost homes (due to location on busier streets) which will further make it difficult for low to moderate income households from enjoying the financial benefits of home ownership.	7/21/2018
5780	0.1	/topics/land-use-built-form/	Every lot in the city does not have to be zoned for a fourplex.	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5781	21	/policies/freight/	<p>a. Encourage these changes: limit vehicle size (by regulation or by street design) so that the needs of moving freight aren't creating hazardous and unpleasant conditions on our major community corridors, particularly for nonmotorized modes. Go further than simply encouraging smaller vehicles. Recoup financial costs to the city of non-linear stress on infrastructure as well as public health costs from larger motorized vehicles.</p> <p>b. Identify and solve the ways in which freight acts as a barrier between our communities, particularly for those traveling on foot. Reduce the distance between crossings over freight rail infrastructure for non-motorized transportation.</p> <p>c. Especially pedestrian safety!</p> <p>d. Yes to this! Start with "encouraging smaller vehicles . . ." and MINIMIZE truck routes so we can keep tighter turn radii and safer and shorter pedestrian street crossings throughout more of our city. Design truck routes so that trucks are not traveling through our densest residential areas and along our most vibrant commercial corridors except as necessary for deliveries. Use racial/economic equity and public health metrics (air and noise pollution) to determine which truck routes will impact the fewest people.</p> <p>e. Encourage electrification of freight vehicles and transition to nonmotorized commercial delivery, automation of platooning, better timing of large vehicle deliveries, coordination of commercial waste disposal, etc.</p> <p>Restrict delivery times to reduce conflicts with people walking and using transit out in our communities.</p> <p>~ Julias Tabbut and Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/21/2018
5782	0.1	/topics/land-use-built-form/	<p>The plan is currently too high risk. Change at this level has not been tried elsewhere yet. We don't need to be the guinea pigs.</p> <p>Look what has happened with the 'natural pool' on the north side. Change at this level is a risk, we do not need to be the 1st.</p>	7/21/2018
5783	0.1	/topics/land-use-built-form/	<p>I'm concerned about more 2-3-&4 dwelling units being built. My rhetorical questions are who will be owning & developing? Right now owners not living in the neighborhood collecting section 8 housing rent have neglected these properties. If multiple unit housing goes in, I would want a cooperative ownership to keep pride in the neighborhood. Also, my concern is that the smaller lots and homes are not attracting young families. The trend is when young couples start having children they move to suburbs or neighborhoods with bigger homes and yards and safer streets.</p> <p>Finally, I can't imagine more people together on these smaller lots. Do we need to consider congestion in the outer neighborhoods? It seems with all the multi-housing units near St. Anthony Main, North Loop, and downtown are better suited for those who enjoy closer & more populated communities. I'm concerned about losing the quaint, quieter neighborhood feeling, yet enjoying the closeness to all the amenities of downtown culture and commerce. How big do we want our city to be? There is only so much land with lots of beautiful green space. Why always more, bigger, better when discussing solutions for creating diverse, equal, and ecological conscious communities.</p> <p>I love my friendly, small-town-feeling Audubon neighborhood with mostly single family homes and neighbors who recognize me at the coop, post office, library, etc. I love the transit accessibility, walking, and bike friendly growth. I also LOVE the diversity and hope to see 1st and 2nd generation Latinos and Muslims of my community find the prosperity and hope that I as a granddaughter of immigrants was able to find. And that finally Indigenous people and any person of African descent will feel safe to express authentic being, practice cultural traditions, and no longer feel hindered by poverty. I'm not sure multiple dwellings are a solution. In fact as I've witnessed growth in the Twin Cities area, it is sometimes part of the problem. I would ask, how can we keep the prices of the smaller single family homes affordable and more consistent with what they are actually worth?</p> <p>These are my stream of conscious thoughts as I witness this wave of develop-happy activity flow NE across the river. As I crossed the Plymouth bridge the other day, I noticed man made buildings surging up over the serene tree line along the river. Where does that stop? Will city streets that form neighborhoods of single family homes also disappear?</p>	7/21/2018
5784	0.1	/topics/land-use-built-form/	<p>I am concerned about our parks and lakes losing their appeal as they are surrounded and overshadowed by tall buildings.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5785	0.1	/topics/land-use-built-form/	<p>in theory, aspects of this plan appear workable. I have several points to make on varying proposals, but, was unable to locate the option to comment on individual items.</p> <p>1. The builders/owners/developers accept the plan of providing a % of affordable units, but, many other cities have found that in reality, they find it much more lucrative to just pay the fines. Make those fines even close to the diff. betw afford. rent and market value and the city will be making a huge subsidy.</p> <p>2. Totally opposed to the "no need for parking for new developments!!" It's insane for all the many reasons written in the countless editorials and letters!</p> <p>3: building many more apartment complexes will find many of them virtually empty as the new younger people start families and want to have their own homes. Stats. show ever greater reduction in # of children, which will eventually result in fewer demands for these apartments. Again, other cities, like Dallas, are experiencing this now. If market drops enough tho, maybe then the owners might make the "affordable housing" rental rates, but that will take years to evolve.</p> <p>I live in Uptown and can attest to the parking mess currently. The vast majority of new renters have a vehicle, even if they regularly use public trans. Three young people sharing a rental yields 3 vehicles parked on the street. Winter and no parking on main streets and none in complexes means many unhappy citizens on you phone lines, from the renters and from the "sidestreet" folks, whose street parking is taken by them. Trust me!!</p> <p>Finally, The reduction in density from the 50s to currently, as is so frequently noted as support for more density in housing currently, has been noted by experts and plain citizens to be attributed to reduction in #s of children/families. (Back to #3!)</p> <p>I have voiced my opinions on issues before and found them ignored, as city council seems to present plans for comment that are already essentially fixed in stone. Had to try again on this one!</p> <p>Cynthia Lais cindylais@comcast.net</p>	7/21/2018
5786	10	/policies/street-grid/	<p>a. "Restore the street grid and add new streets to larger blocks for people walking, biking, and using transit . . . and maybe sometimes also for those driving."</p> <p>d. We support the City maintaining and expanding its public ROWs. We encourage the city to explore adding pedestrian-only ROWs in new and existing areas, to allow for more grid porosity. Wording here is ambiguous. Suggest "Maintain the city's ownership of streets in order to . . ."</p> <p>e. We support restoring a grid that prioritizes people; if and when the street grid is opened to private motorized vehicles, we support their presence in only a limited form sharing our streets</p> <p>To ensure a complete grid for pedestrians, give highest priority and funding to pedestrian-oriented streets where there are limited crossings, e.g. bridges, overpasses, underpasses, large blocks, and areas where there are not other nearby parallel walking options (for example, Lake Street between Bde Maka Ska and Lake of the Isles, from West Lake to Uptown). Ensure that people on foot have frequent (no more than 1/10 mile walk in low pedestrian use areas, 1/20th along commercial corridors) and safe means by which to enter or exit any pathway, including to cross over to the other side of the street. Ensure pedestrians are able to choose among different routes, in order to ensure perceived personal safety, to address environmental differences that may shift seasonally, to build community, etc.</p> <p>We support alleys as a vital part of our street grid and as fundamentally people-oriented shared streets and places. We encourage safer alley-to-alley crossings, full ADA accessibility of alleyways. We strongly encourage alley-oriented land uses and development.</p> <p>We support pedestrian-level and pedestrian-oriented (i.e. backlit, not reflective) signage and wayfinding on all public right of ways, including alleys and one-ways.</p> <p>~ Julias Tabbut and Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/21/2018
5787	11	/policies/skyways/	<p>This looks pretty good! Is there any way to address the ambiguity of skyways as public space? Like, who gets to make the rules for them? And when does use become trespassing? We have significant concerns about the quasi-public functions but privatized enforcement of who is allowed in skyways and for what purposes.</p> <p>~ Julia Tabbut, in discussion with other members of the Pedestrian Advisory Committee</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5788	1	/policies/access-to-housing/	<p>I agree with programs that have the goal of providing more access to affordable housing in Minneapolis, but believe that the current 2040 plan is too extreme in this regard, mainly because of the amount of rezoning proposed for certain single family home areas.</p> <p>My family moved to southwest Minneapolis 5 years ago from a larger suburban house because we truly enjoy everything the city has to offer. We love our neighborhood, which is comprised of single family homes, along with some multifamily homes.</p> <p>We would have reconsidered purchasing a home in southwest Minneapolis if the 2040 plan would have been in place. Minneapolis is experiencing a housing market boom because of families like ours, and the extreme nature of the 2040 plan could have a negative impact.</p> <p>Please consider the following as alternatives to the current plan: 1. Rezone to a max % of single family homes in each neighborhood - the cap should be lower than is in the current plan. 2. Subsidize more of the current high density housing areas in the city, such as in the north loop, as these are areas where people already prefer to live in high density areas. 3. Create more income equality in general, and therefore make some current single family homes more accessible.</p>	7/21/2018
5789	68	/policies/energy-efficient-buildings/	<p>Why not consider heating and cooling options that will serve more than individual buildings? Other cities, e.g., NYC, and campuses such as the University of Minnesota have large heating facilities that supply heat to large areas. The 2040 plan should be more far-reaching in its outlook and not just encourage private developers to build greener. The city's POLICIES should DEMAND high standards of energy efficiency. The city should invest in systems that could be duplicated in neighborhoods and would especially benefit residents who do not own their apartments/homes.</p>	7/21/2018
5790	0.1	/topics/land-use-built-form/	<p>My wife and I have lived in the Kenny neighborhood for over 30 years. Like our neighbors we have worked hard to beautiful and improve our home and property.</p> <p>We are totally against the rezoning of our residential areas.</p> <p>With the addition of large occupancy buildings and low income housing many of our friends and neighbors homes and property would greatly diminish in value.</p>	7/21/2018
5791	68	/policies/energy-efficient-buildings/	<p>The policy and action steps are admirable, but lack any REQUIREMENT for private sector development to comply and follow sustainable development practices. While this is not in the purview of the plan, this is the biggest issue with the plan overall. The plan should not be linked to zoning if it does not include requirements for developers to implement these policies AND therefore, recourse for the public to challenge any development that doesn't.</p>	7/21/2018
5792	4	/policies/access-to-commercial-goods-and-service	<p>Yes!</p> <p>a. We support allowing commercial uses by right in the city, starting with their current and historical locations (including in neighborhood interiors) and expanding beyond that to support greater walkability, particularly for residents who may not be able to walk as far. We support eliminating all surface parking lots. (And do we need to keep the big boxes?)</p> <p>b. We support the addition of more commercial throughout the city, allowed by right, regardless of perceived demand or current or predicted presence of public transportation (shouldn't transit adapt to development anyway?). We support the city's commitment to Complete Neighborhoods and request that the city pay particular attention to allowing these options in much greater proximity than is currently proposed, given the mobility restrictions of winter and the dangers of isolation for our most vulnerable residents.</p> <p>Additionally, we support by right commercial areas around our parks, lakes, and waterways, in order to increase their usability and foot traffic at all hours, as well as provide more quasi-public basic needs functions (restrooms, food, seating).</p> <p>d. And add incentives (tax discounts?) for people occupying them, especially if they're offering a type of product or service not already available nearby. (My neighborhood has 637 places to get breakfast and some empty storefronts and that's it.) We request that retail is built into all areas of the city, not just select areas. We request small-scale exterior retail be required on all large-scale institutional uses that otherwise serve limited and specialized functions; for example, hospitals, parking ramps, and single-employer institutions.</p> <p>e. We request that the city allow housing and commercial on all properties by right, not only adjacent to existing commercial. We strongly support easier processes to allow work/home combinations, per historical use, everywhere in the city, including in rentals.</p> <p>f. Not just allow, but incentivize.</p> <p>~ Julias Tabbut and Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5793	30	/policies/arts-and-cultural-assets/	<p>Yes!</p> <p>b. Work to integrate winter (and changing winter within our climate crisis) into our sense of place reflected in the public sector choices; use art to rebuild a year-round walking culture and assist newcomers and those who have not used active transportation through the year to feel more comfortable with it.</p> <p>d. integrate art and infrastructure; use artistic design in infrastructure; reduce needless uniformity in city infrastructure and public right of ways, from sewer covers to light poles to benches to sidewalk repairs. Embrace "functional art."</p> <p>c. and e. Emphasis on "diverse"</p> <p>f. Let the built environment include the pavement (specify it)! We want more crosswalk art, especially. Unique, artistic wayfinding signs would be great too.</p> <p>g. Yes!</p> <p>i. Use art and creative solutions to reduce waste within the city's right of way and to increase human-scale interest/engagement for those on foot.</p> <p>~ Julius Tabbut and Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/21/2018
5794	5	/policies/visual-quality-of-new-development/	<p>I live in an area with multiple types of housing: single family, duplex, triplex and mid-sized multi-family. I appreciate the fact that this variety of housing makes the neighborhood attractive and accessible to a broader range of residents (although I agree that more affordable housing is needed, as the area is still out of reach for many young and lower-income families).</p> <p>Despite their differing sizes and architectural styles, something most of these dwellings have in common is their age, which tends to range between 80 and 100+ years old. Aesthetically speaking, this lends the neighborhood a feel of "unity in diversity" when it comes to built form, which is something current residents value and (I anticipate) future residents very likely will as well, regardless of which type of housing they choose.</p> <p>I understand that neighborhoods are not meant to be time capsules and that some new development will be necessary to make our city a more equitable place. I am concerned, however, that completely excluding community characteristics from consideration when it comes to the aesthetics of new development (Item G above) will erode the historical character of many Minneapolis neighborhoods without making them more affordable. For example, recent suburban-style new builds in Fulton and luxury apartment/condo complexes in Uptown have dwarfed existing housing without, to my knowledge, contributing in any significant way to affordability and equity. Conversely, I've also seen new development done right (respectful of the scale and style of the existing built environment). My fear is that lack of oversight and community input will lead to much more of the former type of development than of the latter.</p> <p>All Minneapolitans should have the right to live surrounded by beauty and a sense of place, regardless of socioeconomic status. I would love people of all income levels to be able to share in and contribute to the character of the neighborhood I love. To that end, I hope city planners will consider including in the Minneapolis 2040 plan:</p> <ul style="list-style-type: none"> -incentives for owners of existing large single-family dwellings to convert them into duplexes or triplexes, which could contribute to affordable housing stock while preserving the historical and aesthetic character of existing neighborhoods. -incentives to build small accessory dwellings on existing lots. -real, effective incentives for developers/building owners to sell/rent affordable units. -a mechanism for community input on and oversight of new developments of a certain size. 	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5795	0.1 /topics/land-use-built-form/	<p>Hi, Good Morning. I am writing as a long time resident of Minneapolis. We have lived at 5533 Aldrich Ave S since 1980. Louise and I and the kids love the close proximity to parks, the creek, bike paths, and the tiny shopping node at 54th and Lyndale. It is a lively sweet neighborhood. Our home is now the on the side of the street that could be open if the current plan is adopted) for larger multiple use buildings. But more significantly the back yard will abut very large mixed use buildings. Hard to say how I feel about the change. Mixed feelings for sure. I support the general aspect of the plan and recognize that change is coming but I do have some concerns I would love to have you folks take a look at'</p> <p>#1 I do not see any guarantees that affordable housing will be required in new housing projects. I think a large percentage of all new housing must be affordable. To do this I think the city should require all housing development in all areas have a percentage of new units be affordable. We do need much stronger language and laws requiring this. The market will not do it.</p> <p>#2 My great fear is that development and change in our neighborhood and other neighborhoods through out the city will be funded and made by out of town entities. We should require all new development come from residents of Minneapolis. Big time out of town developers will chew up our neighborhoods for profit. They are not interested in affordable housing.</p> <p>We are in favor of the vision but just want to know our personal sacrifice at this time will provide housing for folks that really need it. Many thanks,</p> <p>Jeremy Rath, 612-810-0769</p>	7/21/2018
5796	59 /policies/downtown/	<p>a/b) support much smaller scale storefronts to allow smaller businesses to exist in high-value areas. Provide material and institutional support to underrepresented businesses and communities. Encourage and assist a wide variety of small-scale food vendors particularly around transit hubs, particularly outside 9-5.</p> <p>c) Consider more actively supporting and encouraging downtown development that is accessible to low-income people and people with disabilities, given that downtown is the most reliably transit-accessible part of our city in winter, both at grade and in the skyways. Do not do this in ways that segregate populations or reduce other residential growth, but augment it.</p> <p>e. Make sure downtown institutional uses are compatible with walkability and a vibrant streetscape. Prohibit ramps that eliminate open-air sidewalk. Include abundant bike parking. Encourage policies that support walking. Require multiple uses on each block face, rather than single institutional uses, even with multiple entrances/exits.</p> <p>f. I already feel very safe downtown. Ensure that a sense of safety for some does not depend on excluding, repressing, or hiding others, including those experiencing homelessness.</p> <p>g. Do this in a way that reduces vehicle presence downtown. Increase nonvehicle transit access to downtown from all areas, by increasing transit capacity and frequency, eliminating private vehicles during peak pedestrian times, and supporting safe (from dangerous motor vehicle speeds/volumes) and comfortable walking and biking to and from all areas of the city.</p> <p>Ban hostile architecture, including skateboard stoppers, anti-sleeping benches, and anti-sitting devices. Encourage all active and non-private vehicle use transportation, including e-bikes, skateboards, scooters, walking, running, etc.</p> <p>Specify a focus on walking (especially in h.).</p> <p>~ Julias Tabbut and Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/21/2018
5797	1 /policies/access-to-housing/	<p>The draft plan has many thoughtful sections, but the provisions increasing density seem to be without adequate regard for the unique aspects of the respective neighborhoods. In particular, it seems to undervalue preserving the areas around the City's lakes. It would be wiser, I think, to consider how to provide greater access to and enjoyment of the Lakes for more people without compromising the adjacent neighborhoods by attempting to increase housing density, which would benefit only a relative few after all.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5798	0.2	/small-area-plans/	<p>I live near the 38th St. LRT station. Some of the ideas I see in the plan make sense, and others are head-scratchers. I wonder how recently the authors have been in the neighborhood--Sweet Lorraine's hasn't been in business for years. I was also surprised to see the Cardinal mentioned in a paragraph about "blight." Sometimes I go in there and can't get a seat! It's a more vital expression of this neighborhood than some fancy restaurant with a cryptic menu would be.</p> <p>I also get the idea that people aren't fully aware of the 2040 plan--I don't feel like I received a lot of notification. Would you think about giving people an extension to study and comment? There's nothing wrong with changing a self-imposed deadline.</p> <p>Thanks,</p> <p>Rex Levang</p>	7/21/2018
5799	6	/policies/pedestrian-oriented-building-and-site-de	<p>I live in South MSP and support most of the 2040 goals, however I have significant concerns over the proposed changes in parking regulations, zoning minimums.</p> <p>My husband and I both drive, walk, bike and use public transportation. We have tried to minimize our driving as much as possible but we are still dealing with the following hurdles:</p> <ul style="list-style-type: none"> - the weather in MSP for up to 6 months out of the year does not allow safe biking with icy road conditions, and often walking across public streets. The private sidewalks are often cleared better than the roads I have to cross, which can be covered in up to an inch of ice for weeks at a time. In order to encourage walking, we need the city to get a handle on clean and safe winter roads for pedestrians in the South MSP neighborhoods - eliminating current parking zoning requirements for new constructions overnite and in general having anti-parking regulations will be hugely problematic in the short term. The transition away from individual car use and ownership will take some time, probably 10 years or so, when the development of neighborhoods with local retail, services, and a valid point to point transportation system makes it obsolete. Making parking options disappear while at the same time rapidly increasing density is a recipe for disaster in some neighborhoods like ours, where we are already facing huge difficulties with rampant illegal parking blocking alleys, crossings, bus stops and sometime fire lanes. In the three years I have lived in South MSP I have already noticed a deterioration in my safety as a pedestrian with an unchanging number of vehicles trying to cram in less parking and in some instances fewer driving lanes. The elimination of parking should be gradual as to reflect the gradual improvement in the viability of a car-less lifestyle, and should be manifest in a gradual phasing out of parking zoning requirement over a 5-10 year period. To give you just a small example, it still takes me 75 min one way to get to my hematologist appointment less than 5 miles away and the car sharing services told us they will not have a point A-B option for at least another 3 years (right now all your trips with HourCar need to start and end at the same location, which makes it a moot options for over 80% of our trips). - the public transportation system needs to be up to viability for a true car-less lifestyle and has a LONG way to go. I come from Europe and have used public transport most of my life. The current MSP system is non-functional for many point to point travel unless you are traveling from the periphery to the center and back. Traveling from outside the center to another place outside of center can be virtually impossible. - trying to force a car-less lifestyle without providing a reasonable way of achieving is ultimately very discriminatory to a lot of people who are not fully physically functional and thus have to rely on vehicles. This will basically force them out of inner city living and into the suburbs. <p>This is also true of young families</p>	7/21/2018
5800	5	/policies/visual-quality-of-new-development/	<p>While I mainly agree with this policy, I have one suggestion: "ground level" design should be explicitly called out here. The pedestrian & street level environment suffers when design of ground level space is not clearly thought through. I understand this is a wider vision for the future (not explicit guidelines, but it would be nice to see this directive here that ground level requires a special focus to achieve the goal of a high quality physical environment.</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5801	4	/policies/access-to-commercial-goods-and-service	I think the overall idea is important although I have the following thoughts as I observe younger generations and how they function (I am 50 years old and a 20 year resident of South Minneapolis): 1.) many of my nieces and nephews in their 20's and 30's order online - even their groceries are delivered and I think this reduce the need for physical space for commercial use in our future. 2.) On 46th street and Minnehaha it was recently referred to as a 'food desert' which is completely ridiculous as we have 3 grocery stores within 1 mile of my house (Nokomis Grocery store on 34th; Cub on Lake and Lunds across the river. Don't fall victim to the hype and please think critically and cautiously.	7/21/2018
5802	93	/policies/stewarding-historic-properties/	Having four story (or taller) residential buildings across from Kenwood Park, which is eligible for listing on the National Register of Historic Places, and next to Kenwood School and Rec Center, would lead to more traffic create a barrier to access to the restroom and other facilities of the Rec Center both during the school day, for kids at Kenwood School, and park and rec users from all over the city who come to use the athletic fields, tot lot, playground and open space. W. Franklin Avenue in the vicinity of the park should not be categorized to allow four story (or more) buildings.	7/21/2018
5803	6	/policies/pedestrian-oriented-building-and-site-de	<p>YES, THANK YOU for action step 6K. -- "Eliminate off-street parking minimums throughout the City." We need to encourage more people to choose car-free lifestyles, and forcing free parking everywhere does not help us accomplish this. It simply drives up the cost of housing, making it less affordable for more people + continues to reinforce poor transportation choices.</p> <p>YES THANK YOU for action step 6M-- "Require above-grade parking structures to be designed with active uses along the street walls" Walking in parts of downtown is incredibly depressing (and at times, feels very unsafe) due to vast expanses of concrete walls. We can't undo that damage that has made parts of downtown feel totally unlivable -- but we can avoid in future.</p> <p>Thank for action step 6o, which prohibits the establishment of new drive-throughs -- seeing the missteps of St. Paul with Selby & Marshall Starbucks just reinforces what a terrible idea these are in urban environments -- for car/bus trafficflow, for pedestrians and for bikes. Not sure I totally agree with gas stations, though, as I could foresee, with enough additional people in Mpls, the possible need for future gas stations. Perhaps the document would change at that time...</p>	7/21/2018
5804	77	/policies/park-access/	The Parks and Open Spaces policy advocates for not having physical barriers to park access. Allowing 4 story residential buildings across from Kenwood Park would create a traffic/safety and parking nightmare for people from all over the city who use the park and also need to access the facilities of the rec center across the street. (Please note this park is not used only or even primarily by local residents: people come from all over to use the fields, courts and open space.) These are also historic resources with intrinsic value that we need to steward.	7/21/2018
5805	7	/policies/public-realm/	This is all good. I hope you will consider "in street" as the public realm as well. Projects like the rainbow crosswalks (at Loring Park for Pride), multi-colored bike lanes (see: Downtown Des Moines), and brightly painted intersections (see: Portland, OR) can add so much with a simple layer of paint.	7/21/2018
5806	4	/policies/access-to-commercial-goods-and-service	<p>g. We request that when considering regulatory tools to "minimize the impacts of commercial uses have on nearby residential uses," the city:</p> <ul style="list-style-type: none"> i) treat multi-family and mixed-use commercial the same as they would single-family residences, ii) base regulations on known harm (e.g. air and noise pollution, including from private motorized vehicles) rather than allowing exclusionary tactics (e.g. doesn't fit "neighborhood character") iii) balance these concerns with benefits (e.g. some residents may be concerned by restaurants staying open later during Ramadan or to feed people at bar-close, but other residents will be able to practice their cultural traditions, prevent a hangover or sober up before driving, or feel safer walking home after a later work shift) iv) make sure these tools actually address the concerns raised (i.e. if the concern is noise during certain hours, set regulations and design that limits noise, not restrict when businesses are open) <p>~ more from Julias Tabbut and Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/21/2018
5807	10	/policies/street-grid/	<p>I'd like action step 10C go even further -- in addition to improving local transportation across freeways, I think we should be looking at ways to recapture that space entirely - parks, development, etc. Other cities have successfully "hatted" or sunk freeways, why can't Minneapolis aspire to the same in the next 22 years?</p> <p>Also - let's fix Kmart!</p>	7/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5808	11	/policies/skyways/	I would like to suggest an additional action step: if a business is within downtown core and plans to expand the skyway, they must have equivalent ground level retail space available -- and Minneapolis should look for ways to incentivize/disincentivize so that all retail is not limited to 2nd level spaces in a building with both available.	7/21/2018
5809	1	/policies/access-to-housing/	I am not in favor of this policy. I reside in the Kenwood area. The idea of having duplex, 3 unit and 4 unit on Franklin would destroy the area as it's today. The reason why I choose this area coming from Chicago and Boston is because of the styles of the homes and the acquaintance feeling of a neighborhood. It does not appear you have thought this through. I think downtown is wonderful why don't you look at putting more retail such as furniture stores etc things people can walk to rather than driving to the suburbs to find things for their home. The city paid some much money for nicole mall and there nothing to shop for. The focus should be downtown make it a place people are drawn to shop and live.	7/21/2018
5810	1	/policies/access-to-housing/	I disagree with the proposal to allow multi unit structures within areas currently zoned for single family residential. To introduce density to established residential areas after the fact is unfair to homeowners who bought such homes. I support higher densities along transit corridors.	7/21/2018
5811	51	/policies/healthy-pre-k-development/	Improve mental health services for children ages birth to 5: In light of the mental health issues related to violence, significant resources should be applied to this action step.	7/22/2018
5812	1	/policies/access-to-housing/	I believe this 2040 plan is not a good one and should be rejected by the City Council and I am hoping our mayor is against it as well. Mpls. does not need Fourplexes on Every neiginbood block nor Multi unit housing on Busy streets. Developers will profit from this plan, not Residents. This is not a well Thought out plan.	7/22/2018
5813	79	/policies/healthy-youth-development/	POLICY 79 Healthy Youth Development The action step in Pre K Policy relating to mental health in youth up to age 5 should applied to this Policy as well. In light of the mental health issues related to violence, significant resources should be applied to this action step.	7/22/2018
5814	84	/policies/public-safety/	Public Safety: My comment: Hire mental health professionals to be on call to respond, with the police, to emergencies involving persons with mental health issues; develop a guideline/list of emergency situations where it is likely, based on past experience, that mental health will be an issue and include a mental health professional as a first responder. We've got to stop the violence associated with police responders to 911 calls.	7/22/2018
5815	35	/policies/innovative-housing-types/	High density and high rise towers are not the answer. Does anybody in planning really care about what the city residents, your employers, really want, or is it opening the city to outside developers, eager to make a buck?	7/22/2018
5816	35	/policies/innovative-housing-types/	Whatever will create more density! Whatever will create more visual interest! We're for all of it. We support visual complexity, varied setbacks (including 0â€™™), alley-oriented housing and development, small/tiny lot infill, garage conversions, using public parking spaces for tiny homes, converting highways to housing (and reconnecting the walking street grid), adding microblocks and creative infill on wide streets, allowing and assisting those who own large homes with splitting them into multiple units or establishing boarding homes, helping interested individuals purchase and subdivide large homes to increase density, supporting development of multigenerational intentional communities, supporting accidental communities, allowing first-purchase rights and support for apartment buildings being converted to condos, etc. ~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5817	85	/policies/access-to-health-social-and-emergency-s	<p>Access to Health, Social and Emergency Service: Action Step e.Ensure that public health and emergencythat function as buffers to adverse incidents and help protect people’s health. My Comment: Develop/hire mental health professionals to be among the first responders in situations likely to involve mental health issues.</p>	7/22/2018
5818	18	/policies/walking/	<p>I am a huge proponent of walking. I love that I live within a few block of a grocery store, library, pharmacy, doctors office, gift shop and restaurants. I typically walk to these places EXCEPT when it is over 90, under 20 or inclement weather. Then walking is not practical. I love that Minneapolis has invested so much in traffic calming and making our neighborhoods safer for pedestrians.</p> <p>I am cornered though that we need to also value our citizens who CANNOT walk for various reasons.</p>	7/22/2018
5819	17	/policies/complete-streets/	<p>I have to disagree with the idea that people will stop driving and rely instead mostly on walking, biking and transit. I was recently hit in a car accident. As much as I generally prefer to walk to the store and local businesses, I currently cannot walk more than 1 block (for over 2 months!) I cannot even walk to the nearest bus stop. I have no option but to drive. But our streets are so congested currently with the closures on 35W that it can take 10 minutes to drive 4 short blocks. Adding more dense housing on already crowded streets is short-sighted and will take more planning. Many citizens cannot walk or bike or take transit everywhere. Realistically our weather makes walking and biking at all times of year very challenging.</p> <p>I do very much appreciate the effort the city has made to make neighborhood streets more pedestrian friendly.</p>	7/22/2018
5820	14	/policies/tree-canopy-and-urban-forest/	<p>our urban forest and park systems is an incredible asset and huge attraction. As is the green space of yards and building setbacks in residential areas, by which I mean places that are not downtown, uptown and retail nodes.</p>	7/22/2018
5821	3	/policies/production-and-processing/	<p>a. Make sure the large tracts don't interrupt the street grid. Consider the time it takes to walk (including in winter) in the inconvenience of large contiguous tracts.</p> <p>g. Yes! Both to and safely through (maintain safe sidewalks regardless of trucks or heavy machinery).</p> <p>Consider targeting areas without historical production/processing for new production/processing, in order to support these areas increasing in economic diversity and giving lower-income residents in an economically desegregating city the option of walking to their workplaces. Explore partnerships with non-taxable land uses in these areas to find ways to do this.</p> <p>m. Consider the noise and air pollution of vehicles, particularly current fleets of freight vehicles, within the scope of this item. Look to reduce the presence of dangerous large-scale vehicles (vehicles where the driver is at/above on-ground seated height) in keeping public right of ways safe and comfortable for all modes/users.</p> <p>Consider integrating historically marginalized/illegal but valuable pedestrian/small scale services into production and processing in legal and paid ways. For example, trash pickers reduce waste, reduce new consumption, and provide cleaner recycling streams. ~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/22/2018
5822	6	/policies/pedestrian-oriented-building-and-site-de	<p>"prohibit the establishment of new drive-throughs" somebody was not looking forward by permitting a new Starbucks w/drive-through to open a few months ago on the 4800 block of Cedar Ave S.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5823	1	/policies/access-to-housing/	<p>One of the great opportunities for families in our city is relatively affordable single family homes in many parts of the city. It would be a crime to replace these homes with brand spanking new apartment buildings. New construction is by nature more expensive than existing housing stock. Older homes are typically built with better quality materials than are affordable today and can have beautiful design features. The variety of architectural styles from the last 100 years is a huge attraction for many people who want to move into the city.</p> <p>Development should first be focused on condemned properties or those that are in serious disrepair. But we need these "starter homes" to attract families to the city. Most families would rather live in a house with a yard and some space than in an apartment.</p> <p>Why would a family chose to live in a more-expensive apartment on the city border when they could buy a single family home across the line in Richfield?</p>	7/22/2018
5824	33	/policies/affordable-housing-production/	<p>There is new housing in the form of "luxury apartments" going up all over the city, especially downtown and downtown-adjacent. Current market-rate rent in this city is a JOKE! There is a lot of discussion about affordability for low-income persons and families, and I'm all for it. What about those of us in the middle? I make \$50G a year, but it is not feasible for me as a single individual to pay \$1500+ a month to live in one of these new "luxury" buildings. Currently I live in Stevens Square Park, where my rental company has the nerve to charge \$745 for a small 300 sq foot studio in a building that's over 100 years old and offers no real amenity other than location.</p> <p>You cannot just forget about those of us in the middle of the income spectrum who love living downtown, who do not want to move out to the suburbs, who actively contribute to the downtown economy on a daily basis.</p> <p>These policies sound nice, but if something isn't done soon then you won't have any middle income folks downtown by 2040. We'll have all been priced out.</p>	7/22/2018
5825	0.1	/topics/land-use-built-form/	<p>I've lived on 34th Avenue S between 26th St and 27th St for 3 decades. I'm acutely aware of and sympathetic to the need for higher density housing. Several years ago in planning discussions, the suggestion was made to replicate the Brackett Park Apartments along the north side of the Greenway. While these 3 story buildings are taller than the surrounding houses, they are set back and fit into the neighborhood. However building 5 and 6 story buildings on this north side of the Greenway would be inappropriate both in degrading the congenial residential scale of the neighborhood and in placing a heavy traffic burden on residential streets. The access to commercial area is via 31st Ave and 36th Ave. The area I've drawn attention to on the map is on a cul-de-sac at 27th St and 34th Ave S. Building a 5 or 6 story apartment on this dead end site would have a dramatically negative impact on the surrounding residences, especially with regard to traffic congestion. I understand that one principle of the housing policy that changes should benefit all. Please consider medium density for the reuse of the commercial land north of the Greenway.</p>	7/22/2018
5826	34	/policies/affordable-housing-preservation/	<p>We absolutely need more options for affordable housing.</p> <p>I strongly disagree that a focus on new development will bring more affordable housing. typically new development is more expensive, in order for the developer to recoup their costs. When new housing has all the bells and whistles, granite countertops, etc, it naturally costs more than the older building that it replaces.</p> <p>I don't see how the 2040 plan will create more affordable housing. It seems like affordable housing is often subsidized by a church or other organization.</p>	7/22/2018
5827	43	/policies/housing-displacement/	<p>This is a terrible problem. It makes me sick to read about apartment buildings that update all the units and then price their current residents out. People forced to leave their home after decades, through no choice of their own. The city needs to develop regulations to prevent this from happening in existing rental buildings.</p> <p>I see this becoming a bigger problem under the 2040 plan which encourages so much development.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5828	63	/policies/food-access/	<p>a. We strongly support this, but request that the spatial distribution take into account the factors that limit mobility, including seasonally. Specifically, we request that the city consider the pace and needs of individuals with limited mobility navigating the city in winter. We also request that the city include in its assessment whether or not individuals must cross dangerous streets.</p> <p>We encourage the city to explore micro-food options and stores-in-homes. We encourage the city to understand that small scale stores and restaurants serve important mental health and socialization/community functions for those who might otherwise be housebound. We suggest the city be creative in supporting and valuing a high density of these establishments, which may function best in ways that the city is not used to regulating.</p> <p>We support food access that includes encouraging small scale urban agriculture. We encourage the city to explore how the ROW is used and how it might support or augment health food access for renters in particular, while also reducing energy and chemical use and air/noise pollution.</p> <p>We strongly support small scale food access on foot--being able to meet one's basic needs without carrying entire meals or when unexpected needs arise is vital to being able to move independently and freely.</p> <p>Everyone should be able to walk to raw vegetables.</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/22/2018
5829	61	/policies/environmental-justice/	<p>We strongly support this policy! Great!</p> <p>Look at environmental justice by transportation options--ensure that public transportation, biking, and walking are all more reliable and faster options for all residents than private vehicles.</p> <p>d. Ensure that EJ investment also includes making historically less polluted parts of the city open to more people, including programs to support landowners in racially concentrated areas of wealth who would like to partner with social services or non-profits to provide affordable housing.</p> <p>Consider how arterials function as micro-level environmental injustice areas, regardless of area.</p> <p>Examine how renters and transit users are disproportionately impacted by environmental injustice in all areas of the city.</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/22/2018
5830	0.1	/topics/land-use-built-form/	<p>I am concerned that our roads are not built to handle the increased density that is proposed, especially in the neighborhoods farthest away from the city core. Lyndale, Nicollet, 50th Street, 54th Street, 28th Street, 26th Street, Portland, Park Avenue, all have been restriped or engineered in recent years for traffic calming. To handle fewer cars and make the neighborhoods quieter. If we add large apartments buildings on these main streets or down by the southern border with Richfield, it will put too much stress on these local streets. It makes more sense to add density slowly and see how the area is able to absorb the impact.</p> <p>The infrastructure needs to develop as we add density. We need additional schools, parks and green space, transit capacity, services and also a way for people to get around.</p> <p>Dreams of 15% bicycle commuting is impractical. My husband is a huge biker - he bikes to work as often as his job demands and weather permits, but year-round he maybe bikes 20% of the time. He is only able to do this because his office building has a shower and facilities for him to change when he arrives at work. This is not practical for many people. I personally could not physically bike that far, nor is there any way for me to shower and get dressed at work. A bus would take over an hour each day. Instead I drive and arrive in 20 minutes. We would need a significantly improved train system to reduce the load on our local streets.</p>	7/22/2018
5831	28	/policies/msp-airport/	Force Delta to get rid of DC9s and other noisy planes.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5832	15	/policies/transportation-and-equity/	MTC runs very few East/West routes. This needs to change. I'd love to ride but can't get there from here...	7/22/2018
5833	1	/policies/access-to-housing/	We do not need more housing in Minneapolis. Minnesota is large. We need better transit into town so more people can get in and out easily.	7/22/2018
5834	1	/policies/access-to-housing/	I am strongly against increased density. We need to preserve our homes and neighborhoods. This feels like a sell-out to robber barons. Please do NOT rezone and do NOT allow for houses to be torn down to put up multi-family dwellings. Seems like you're just trying to create more revenue...	7/22/2018
5835	1	/policies/access-to-housing/	Accessory dwelling units are good as long as they are owner occupied. Property owner needs to live in one of the units.	7/22/2018
5836	1	/policies/access-to-housing/	4 plexes need to be limited to no more than one per block	7/22/2018
5837	1	/policies/access-to-housing/	My concern is that the low-income, affordable housing will not end up being affordable. It will cost a lot of money to tear down existing homes and build new structures to replace what was torn down. Will investors/landlords want people in their buildings as tenants that have over 30% of their income going into rent. And is it limiting to say you have to be using 60% of your income for rent to even qualify for some of the low-income, affordable units. If investors have a choice in who they rent to, what is the incentive to fill the units with tenants that are below the poverty line vs. tenants with greater incomes. Tax write-offs may not be enough of an incentive. I want to be assured that all dwellings claiming to be used for low income in fact really will be held accountable.	7/22/2018
5838	1	/policies/access-to-housing/	Every single and multifamily lot needs to have at least 1 off street parking space preferably in a garage.	7/22/2018
5839	28	/policies/msp-airport/	Please consider adding mitigating airport noise -- or distributing it more fairly across the Twin Cities metro -- as a separate action step here or in the public health policies of the plan.	7/22/2018
5840	33	/policies/affordable-housing-production/	Put affordable housing where those who can afford the least already have a community like Phillips and near north. They don't want to live in Kenwood anyways.	7/22/2018
5841	33	/policies/affordable-housing-production/	make incentives to convert the empty and boarded up properties in North into affordable homes that individuals can own and create equity.	7/22/2018
5842	1	/policies/access-to-housing/	step d: add "...consistent with the scale, spacing and pattern of existing development" step d add "constant with designated conservation districts." rationale: our neighborhood has a mix of housing types from single family to four-plexes. This mix is terrific because people build or remodel consistent with the scale, spacing, and pattern of development in our neighborhood. The diversity this mix brings is also wonderful. As density increases though, neighborhoods with a mix of housing types like ours, especially those near Universities, hospitals, and transit need some protection so absentee landlords and a few "bad actor" developers who have no interest in a neighborhood cannot build (or remodel current stock into) out-of-scale structures as cheaply as possible to cram as many inside as possible.	7/22/2018
5843	35	/policies/innovative-housing-types/	Housing should "fit" the character of existing neighborhoods in massing.	7/22/2018
5844	37	/policies/mixed-income-housing/	In all honesty this seems like you are trying to cheapen the more valuable properties.	7/22/2018
5845	28	/policies/msp-airport/	The draft of this plan does not address the noise pollution from the airport that disproportionately affects neighborhoods underneath the flight paths of planes. Please measure and publish noise contours and the number of people impacted to map at the international standard. Please consider adding concrete noise reduction goals to the plan.	7/22/2018
5846	0.1	/topics/land-use-built-form/	6 story buildings are too big for east lake st	7/22/2018
5847	0.1	/topics/land-use-built-form/	4 story buildings are too tall for 42nd ave s	7/22/2018
5848	21	/policies/freight/	I support this policy & its action steps.	7/22/2018
5849	36	/policies/innovative-housing-strategies/	add d. require inclusion of affordable workforce housing in innovation districts. We need more affordable housing in general. I'm concerned that lots near light rail transit are not being preserved for affordable housing. I thought building affordable housing near transit was a priority. So far, along transit near my home, we are getting mostly high-end market-rate developments.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5859	0.1	/topics/land-use-built-form/	New construction of single and multifamily homes should maintain a minimum of 50% green space and have off street parking for each unit.	7/22/2018
5860	26	/policies/vision-zero/	I support this policy & its action steps.	7/22/2018
5861	0.1	/topics/land-use-built-form/	New setbacks should be the same as existing ones	7/22/2018
5862	27	/policies/transportation-partnerships/	I support this policy & its action steps.	7/22/2018
5863	0.1	/topics/land-use-built-form/	A 2.5 story house should not be able to be built next to a 1 story house.	7/22/2018
5864	28	/policies/msp-airport/	I support this policy & its action steps.	7/22/2018
5865	91	/policies/heritage-preservation-outreach/	add language throughout to include conservation districts. Conservation Districts provide opportunities for community engagement. Conservation Districts are not as restrictive as a historical designation so allow a greater mix of housing.	7/22/2018
5866	0.1	/topics/land-use-built-form/	The new codes should include protections to the existing home owners. Neighbors should have the right to object to teardowns and larger mass being built on next door lots.	7/22/2018
5867	0.1	/topics/land-use-built-form/	The new plan should encourage home ownership and not landlords.	7/22/2018
5868	29	/policies/creative-sector-economy/	I support this policy & its action steps.	7/22/2018
5869	1	/policies/access-to-housing/	I support this policy and the plan for Minneapolis to expand the housing supply as well as the diversity of the housing stock. The greatest protection we can provide to renters and owners is options; we need to provide people with options to live how they want to in units that support that lifestyle at all stages of their life. I support the upzoning included in this policy section, though I wish it went further in many areas. The city can support denser development in areas that are somewhat excluded from this plan. In particular, neighborhood interiors deserve a proper upzoning-- not just the edges along transit corridors. In many instances, neighborhood interiors are BETTER lots and units for transit-reliant people. For example, in Lowry Hill East, one could choose to live on Lyndale and be close to the 4 bus, or live on Hennepin and be close to the 6 bus. But living in the neighborhood interior allows you to be only a few blocks from 2 great bus routes stops. Protecting neighborhood interiors from upzoning and pushing new dense development to transit corridors currently puts more people (usually poorer people and those making more responsible transit decisions) near the pollution from vehicle traffic. I fully support the sensible upzoning in this policy, but I believe it should go much further. There is no reason we cannot allow a minimum of 6-unit buildings on most lots of the city.	7/22/2018
5870	30	/policies/arts-and-cultural-assets/	I support this policy & its action steps.	7/22/2018
5871	0.1	/topics/land-use-built-form/	ADU's rules need to continue to mandate an owner occupancy.	7/22/2018
5872	31	/policies/creative-workers/	I support this policy & its action steps.	7/22/2018
5873	93	/policies/stewarding-historic-properties/	Add: Support conservation districts in neighborhoods with an eclectic collection of historic structures representing various periods and architectural types to protect, perpetuate and proliferate the visual character evident in its notable architecture, development patterns, scale, engineering and/or landscape.	7/22/2018
5874	0.1	/topics/land-use-built-form/	Blocks without multifamily dwellings should be exempt from one being built on that block.	7/22/2018
5875	94	/policies/heritage-preservation-regulation/	historic preservation zones should not have an associated built form height limit. it's really cool when older buildings are in conversation with newer buildings. the historic zone on 9th st is fine and good, but it shouldn't exclude new tall buildings from that area if we do end up with a building lost in a fire or something. the same should apply to all the historic zones in the city!	7/22/2018
5876	0.1	/topics/land-use-built-form/	This plan seems to favor developers and landlords over home owners.	7/22/2018
5877	32	/policies/arts-in-community-development/	I support this policy & its action steps.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5929	0.1 /topics/land-use-built-form/	<p>I hope this plan undergoes significant revision. I agree with this post on nextdoor.com.</p> <p>Once we've cut down an old-growth forest it cannot be restored. We can replant and it might after a few decades become a pleasant stand of trees, but it will never regain the character, the unique spirit that once permeated the place.</p> <p>Giving free reign for developers to build multi-family units and four- or six-story apartment buildings in neighborhoods of century-old single-family homes might not be the same as the commercial destruction of centuries-old forests, but the loss of neighborhood character, the unique spirit of community, might be analogous.</p> <p>Those who have never experienced the tranquility of an undisturbed ancient forest may be unable to understand what we mean when we speak of its unique character, but that character exists. Those who have not lived for decades in an established community may dismiss concerns about "neighborhood character," but that character exists. That character is why many homeowners have paid double what an identical house might cost in other locations. This is not an ethnic or racial issue. Many people of all races and ethnic backgrounds live in neighborhoods of single-family homes throughout Minneapolis, and each of those neighborhoods has a character which once destroyed by developers cannot be regained.</p> <p>While the City Planners may have lofty goals with the 2040 plan, many of its provisions may be idealistically short-sighted with little regard for significant negative impacts.</p> <p>We might be generous and hope those negative impacts would be "unintended" consequences, but to some extent a reading of the 2040 plan seems to specifically advocate for the destruction of unique neighborhoods, envisioning a homogenous one-size-fits-all housing environment to be imposed throughout the City of Minneapolis. The 2040 plan seems designed to diminish or eliminate the character of neighborhoods dominated by single-family homes.</p> <p>In essence the plan seems to suggest: Not everyone can afford to live in such a neighborhood. Such neighborhoods should therefore not exist.</p> <p>Many residents would like to scrap the 2040 Plan in its entirety. However, if growth is to occur then the City should have a plan to accommodate growth. Perhaps we have some options.</p> <p>If something like the proposed 2040 plan is to be adopted one might hope that it could at least provide for a gradual expansion radiating from existing high-density housing centers. Many neighborhoods have existing commercial centers with islands of high-density housing. A transit corridor may run a mile or more to the next island of high-density housing, with nothing but single-family homes and duplexes in between. If new zoning allows carte blanche building of apartments anywhere along that corridor a developer may choose to build a four- or six-story apartment a half mile from any existing apartment building. The sudden emergence of such a large building looming over the area would drastically impact the surrounding community in all directions.</p>	7/22/2018

5934	6	/policies/pedestrian-oriented-building-and-site-de	<p>Prohibit along with gas stations, the corporate convenience stores- which seem to attract drug dealing and other crimes. The corporate policies of these stores are to "look the other way" for shoplifting, etc. so as not to bring liability to their corporations during an employee/thief, dealer, loiterer, etc. argument. In vulnerable neighborhoods, these stores just bring too many problems. Someone needs to research the statistics on this.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5935	0.1 /topics/land-use-built-form/		<p>(continued from previous comment)</p> <p>This gradual-expansion approach would have several advantages, including some reasonable limits on speculative building. It would constrain expansion while the market determines whether such additional housing is warranted in the existing economy. It would allow realistic evaluation of parking and traffic problems as higher-density housing expands within the area. But the chief advantage would be to mitigate the degree of adverse impact any single building or group of buildings would have on the surrounding neighborhood. Adding a four- or six-story building next to an existing four-story building would have somewhat limited impact on the character of the surrounding neighborhood. Constructing a four- or six-story apartment building several blocks from the nearest four-story building would adversely impact the neighborhood for blocks in all directions.</p> <p>Our advice to City Planners: Move cautiously. Once a community has been destroyed that community is gone forever. Something else will replace it, surely, but that is not necessarily a good thing. Many long-time residents will be hurt in the process. Careful consideration should be directed toward mitigating those adverse impacts.</p> <p>Yes, developers are business people. Their main incentive is to make a profit. Nothing wrong with that. However, zoning laws exist (in part) to constrain developers from building structures that are unsafe or are considered detrimental to the zone within which a structure is being built.</p> <p>One of the great zoning battles of the past 15 years ensued because developers were building huge "infill" houses with minimal setbacks and no green space on blocks of quaint small homes. From the maximize-profit perspective the developer was completely reasonable trying to cram as much square footage of living space into that tiny lot as he/she could possibly cram. However, the City put a stop to the worst of those practices, via changes in zoning laws, because such structures were considered to be detrimental to the neighborhood.</p> <p>Profit motive is fine. It is the foundation of much of our society, and it works well. A primary function of government, however, is to constrain businesses (or individuals) from creating external diseconomies. A factory owner could make a bigger profit if he could dump raw sewage and industrial waste into the nearby river. However, the environmental damage of such behavior (the "diseconomy" in this case) has caused governments of most countries to prohibit that type of business practice.</p> <p>The housing developers in Minneapolis were maximizing profits by building huge structures on tiny lots next to small houses. That was a reasonable business practice.</p>	7/22/2018
5936	0.1 /topics/land-use-built-form/		<p>My family and I moved to the 5200 block of Upton Ave a year ago. We moved out of Uptown Minneapolis and into a neighborhood that had safe streets, single family residential homes, families with young kids, residents that care about the neighborhood, a neighborhood with less traffic, a neighborhood with better schools just to name a few reasons. We moved out of uptown because the area lacked everything I mentioned above. I knew moving into this area that it would cost me a lot more money but I was willing to make the sacrifice because. The 2040 plan does not support anything that I care about. My property tax this last year went up significantly for no reason. People that live in apartment building and folks that are renting do not care about the neighborhood and are not involved with the committee. If there is a need for more housing why not add more in areas like uptown, Northloop, downtown, heck even North Mpls.</p> <p>I am a hardworking, immigrant and a person of color, which I know is rare in the Fulton neighborhood. I want to live in an area that is safe for my kids and I want to live with people that care.</p>	7/22/2018

5944	1	/policies/access-to-housing/	<p>Not everyone wants to live in a multiunit building. If developers get free reign, that is all we will have. We worked hard for over 20 years for our home in Fulton. We love the quiet neighborhood feel in the city. Please do not allow numerous multiunit buildings in the neighborhood we love and chose to raise our young children in. Don't force us to move to the suburbs.</p>	7/22/2018
5945	19	/policies/bicycling/	<p>Here goes. think idea plans are admirable, but needs huge attention in future. Perhaps if we just thought in terms of "pedal or future electric type 2-3 wheel traffic " use within ringed certain tiers from center of city hall get incentives to ride. In turn also will get rewarded with large 1/2 round clear covered winter enclosures(no snow remove needed) for riding year round.</p> <p>Or looking at in addition to looking at potentially well suited streets/alleys or even freeway lanes that may be candidates for exclusive petal/walk/bus traffic only.</p> <p>As possibly the oldest baby boomer in Minneapolis.....could I add or recommend the encouragement of baby boomers to model for future generations that trikes (recumbents?) by their use for stability, commuting, shopping and exercise is a complete win-win activity to help sustain earth, community and self.</p> <p>Finally, didn't notice anything related to support of people with disabilities. Adaptable cycling is growing and needs to be in equation.</p> <p>hope this is helpful</p>	7/22/2018
5946	33	/policies/affordable-housing-production/	Stop adding all the low income housing to the Northside. The businesses need people with moderate and higher incomes to draw new business in. Put the affordable housing in other areas of the city and add some upper scale housing to North.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5947	1	/policies/access-to-housing/	<p>Minneapolis 2040 plan needs significant revision, possible a complete rewrite. The overall goals are laudable, however the tactics are poorly developed and will not support the goals. Comments:</p> <p>Allowing fourplexes in most neighborhoods is a terrible idea. It will not accomplish any goals of increased density, equity and expansion of low income housing. The math simply does not work. A fourplex in an existing neighborhood will cost far too much due to land acquisition cost to offer scale where low income housing is economical. A \$300 - 400 - 500 K lot cannot provide low income housing due to the high expense</p> <p>Transit corridors need better segmentation. Franklin avenue east of Hennepin is suitable for high density, multi-use zoning. West of Hennepin is not - 1 block west of Hennepin is nearly 100% residential.</p> <p>Zoning the Kennilworth corridor 4 is unethical and unconscionable confiscation of a wildlife zone. In a 2014 Memorandum of Understanding, the city of Minneapolis agreed to designate this space as a park. Minneapolis 2040 prioritizes parks - destroying restored prairie accomplishes the opposite.</p> <p>Minneapolis 2040 needs to be completely re-written.</p>	7/22/2018
5948	19	/policies/bicycling/	<p>The notion that 15% of commuters will be riding bikes in a cold weather city does not seem realistic. The Census Bureau reports that only 5 percent of Minneapolis commuters use bikes, and no major city comes close to 15 percent. Portland, with a climate more favorable to biking, is at 7 percent.</p>	7/22/2018
5949	1	/policies/access-to-housing/	<p>In the 1960s, Minneapolis downzoned much of the residential land in Minneapolis. That action went too far. Now the proposal is to up zone all of the residential land—the pendulum is now swinging too far the other direction.</p> <p>First, it needs to be clear that in many areas, the current set-back, height, and floor area ratio regulations remain even if 4-plexes are allowed.</p> <p>Second, there has to be more granularity in the regulations. For example, blocks that are currently single story or story-and-a-half bungalows or ranch-style houses probably should have a maximum height of 2 stories, not 2.5 stories. (yes, I know this is a change in the current standard)</p> <p>Third, most areas that are listed as Interior 2 should be Interior 1. Interior 2 allows for “multifamily buildings on a limited number of combined lots.” This will significantly change the character of the neighborhoods proposed for Interior 2. Interior 1 allows for duplexes, triplexes and 4-plexes on existing lots. This plus allow for auxiliary dwelling units will allow significant increases in the number of dwelling units in these neighborhoods without changing their character.</p>	7/22/2018
5950	34	/policies/affordable-housing-preservation/	<p>b.This plan needs to clearly address the need to keep senior citizen retirees aging in place in their homes. This includes keeping property taxes under control. The City of Minneapolis has made a commitment to its seniors who want to live out their lives in Minneapolis. Now is the time to follow through by way of Minneapolis 2040 Plan.</p>	7/22/2018
5951	84	/policies/public-safety/	<p>Make sure Judges give appropriate sentences to people who commit crimes with guns or other lethal weapons.They need to stop giving probation for gun crimes. Discourage landlords from allowing gang members to live on their properties. Allow evictions of families of gang members as well, after a sufficient warning to keep the gang member off the property.</p>	7/22/2018
5952	3	/policies/production-and-processing/	<p>In some cases the land use map identifies an area as production while the built form map indicates that all building should be a minimum of 2 stories. In Minnesota, only single story productions facilities are economically viable.</p>	7/22/2018
5953	2	/policies/access-to-employment/	<p>These are GREAT</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5954	14	/policies/tree-canopy-and-urban-forest/	<p>This letter to the editor reflects my own feelings about the 2040 plan.</p> <p>No, City Council President Lisa Bender and planning director Heather Worthington, all the residents of the 10th Ward are not fine with what is happening there. Rather, as citizens throughout Minneapolis are now experiencing, 10th Ward residents who express concern or propose modifications are labeled as NIMBYs, racists, classists or, at best, alarmists or simply resistant to change. This justifies dismissing any questioning of city leaders “ who, by the way, never informed the public during their recent campaigns of their eagerness to reshape the entire city.</p> <p>At the July 11 VFW meeting, Worthington called the desire to preserve open and green spaces “white pastoralism.” Really? Is she actually suggesting that people of color have no need for trees, grass, plants and unpolluted lakes? Or that only white people care about the environment? Or that research showing the positive effect of nature on physical and mental health is merely a reflection of white privilege?</p> <p>Beyond the particular issue of green spaces, the use of phrases like “white pastoralism” reflects the divisive strategies of Bender, Worthington and Mayor Jacob Frey. Every step of the way, the discussion has pitted old against young; renters against homeowners; long-term residents against new or anticipated ones; the able-bodied against those with disabilities; drivers against those who can walk, bike or bus to work, shopping, day care, school, or friends and family.</p> <p>As we all know, the current tone in this country is characterized by polarization and demonization of the “other side” and it puts our democracy at risk. I am beyond disheartened to see it play out in our city and be promoted by some city leaders.No, City Council President Lisa Bender and planning director Heather Worthington, all the residents of the 10th Ward are not fine with what is happening there. Rather, as citizens throughout Minneapolis are now experiencing, 10th Ward residents who express concern or propose modifications are labeled as NIMBYs, racists, classists or, at best, alarmists or simply resistant to change. 5955	33	/policies/affordable-housing-production/	<p>This letter to the editor reflects my own thoughts regarding the 2040 plan:</p> <p>The narrative flaw in the housing policy in the Minneapolis 2040 Plan draft is that it pretends to promote racial and income diversity when it is only promoting housing-type diversity. While exclusionary tactics of white, single-family neighborhoods were part of the racist conspiracy to limit black mobility, making them accept fourplexes will not make them more racially or income diverse.</p> <p>Rents and sale prices will be determined by the existing neighborhood market. They will be unaffected by construction cost savings or the modest expansion of the housing supply in the market area.</p> <p>Increasing density and multifamily housing is a good idea, but the city should work with neighborhood residents to identify locations and strategies that allow more density but respect the positive qualities of the existing neighborhood.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5956	1	/policies/access-to-housing/	As a homeowner in two transit corridors, seeing high density cheaply built multistory buildings rise up amidst two story homes I doubt the city's commitment to affordable housing. It would be one thing if these structures were affordable. They are not. They are in no way affordable housing, or geared to families, or long term occupancy. They are even marketed as places to live before you "start your real life". So as much as this policy reads well, knowing that banks snapped up properties on the Northside after the tornado and left them empty while the number of people experiencing homelessness has continued to increase, and seeing the ridiculous proliferation of luxury housing, I worry that it only reads well. It will not protect naturally occurring affordable housing, or supportive communities. It will allow developers to continue their irresponsible, cheaply built but overpriced "developing". They will make money, the city will continue jacking our property taxes, and we will be over-run with privileged renters who care nothing for our neighbors or neighborhoods. It's profit before people.	7/22/2018
5957	6	/policies/pedestrian-oriented-building-and-site-de	This policy needs to be constantly enforced across the city. This should also include the prohibition in all cases of new drive-through facilities unless they also allow bike through and walk through clients. Even then, if there is a potential conflict with people walking or using bikes or transit, the drive through should be prohibited.	7/22/2018
5958	17	/policies/complete-streets/	In order to get people out of their cars you need to develop a very comprehensive, safe and convenient transit system. Elderly may not be able to walk, bike many places.	7/22/2018
5959	1	/policies/access-to-housing/	This commentary in the Star Tribune reflect my own thoughts about the 2040 plan: The 2040 plan allows developers to put fourplexes and sixplexes along major corridors. Residents of the North Side cannot afford to build such units; new construction is expensive and requires access to lots of ready capital. These units will not be owned by neighborhood residents. They will be built and owned by large developers, all of whom live somewhere else, with easy access to lots of capital from out-of-town banks. These houses will not be built around Lake of the Isles. You can be sure that most of the increased density will go into the North Side, where property values are low and where well-financed developers can afford to buy up and bulldoze perfectly good homes in order to provide great tracts of inferior rental housing. Homeownership will go down. Neighborhood stability will get decimated. Poverty will be concentrated further.	7/22/2018
5960	33	/policies/affordable-housing-production/	This commentary in the Star Tribune reflects my own thoughts about the 2040 Plan: City plans to subsidize new construction are perverse. Scores of "starter homes" already exist on the North Side. These are older, often smaller, existing houses, usually in need of some repair, that are well within the financial reach of residents wanting a starter home. City funds available for massive subsidies to out-of-town developers (for tearing down existing housing stock and building "affordable" housing) would be better directed to homesteaders looking to buy or improve an existing house. You need to subsidize renovation, not bulldozers.	7/22/2018
5961	1	/policies/access-to-housing/	There isn't a need for more housing in the city - it's about affordable housing. Rezoning the neighborhoods around the lakes (where housing is already expensive) doesn't make sense. Making multiple units will ruin the current elements that make the city so livable.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5962	37	/policies/mixed-income-housing/	<p>The Built Form Guidance plan within the Interior 1 district, for example, is a one size fits all approach. I don't feel this is justified. A multifamily residence, on a block of single family residences would affect the quality of life regardless of racial/ethnic or otherwise diverse makeup of the residents. It would reduce property values by making the area less desirable to potential buyers seeking a single-family residence. Senior homeowners who have worked hard all their lives to build equity in their homes to generate financial security in retirement could be harmed by reduced property values when it comes time to trade in their equity for financial stability in retirement.</p> <p>Also, the Built Form Guidance plan for Interior 1 districts, for example, appears to assume that a "home" within a multiple family building would be cheaper to own/rent than a single-family home in the same neighborhood. What was the process for coming to that conclusion? How would cost be controlled? Also, what would the guidelines be for the design of multifamily residences, so they don't stick out like a sore thumb among existing single-family residences?</p> <p>Furthermore, The Housing Goal, as it relates to density throughout the City appears to be the result of a "take the easy way" process i.e. it would be much harder to study all neighborhoods in the City and determine whether the Build Form Guidance plan really is the solution for each. Additionally, it appears that there is an assumption that because some city neighborhoods have evolved based on racist-exclusionary policies, then all neighborhoods must have evolved that way. Perhaps the plan should be reconsidered on a neighborhood by neighborhood basis.</p> <p>In addition, I think there is more to solving the housing affordability issue than simply dictating a city-wide Built Form Guidance plan. Education is a major factor, obviously, based on all the data that's been included in the plan. Resources should be developed and directed to schools in neighborhoods that are experiencing substandard education results. An additional factor is housing affordability is living wage jobs. More resources need to be directed toward generating better paying jobs which will allow more people to afford housing within the current zoning environment.</p> <p>I urge the City Planners and the City Council to take these comments into account when generating the final draft of the 2040 plan.</p>	7/22/2018
5963	33	/policies/affordable-housing-production/	I would like to age in place and be able to afford the taxes on my home.	7/22/2018
5964	93	/policies/stewarding-historic-properties/	<p>The commentary in the Star Tribune reflects my own thoughts about the 2040 Plan: The 2040 plan makes no mention of preserving historic structures on W. Broadway and elsewhere. Instead, in the name of progress, you wish to recreate an urban demolition plan throughout our neighborhoods, reminiscent of the Gateway debacle of the 1960s.</p> <p>After years of consultation with neighbors, developers and local business owners, Minneapolis created the West Broadway Alive plan, to guide growth along the W. Broadway corridor for the next 15 years. The City Council passed it. It is current law.</p> <p>If any of the 2040 plan authors had read this plan or even acknowledged its existence that was certainly not made clear. I don't know if this is arrogance, ignorance, incompetence or just sloth. But the residents of Minneapolis deserve more thoughtful action from our elected representatives.</p>	7/22/2018
5965	10	/policies/street-grid/	Restoring the street grid for motorized traffic should not be a priority. In fact, the grid for motorized traffic should be broken up. In many cases it makes sense to interrupt the street grid to reduce through car and truck traffic (recent example is closing 29th Avenue at the Midtown Greenway for Safe Routes to Schools. An older example is closing Milwaukee Avenue and 22nd Street at Milwaukee Avenue to cars)	7/22/2018
5966	51	/policies/healthy-pre-k-development/	Affordable, high-quality child care is next to impossible to find. Where does the support for this come from?	7/22/2018
5967	2	/policies/access-to-employment/	Need to improve education and stimulate civic involvement. We need to take pride in our city and neighborhoods!	7/22/2018
5968	12	/policies/lighting/	<p>As noted in item g: All exterior lighting should be night-sky friendly to reduce light pollution.</p> <p>Also, additional lighting does not reduce crime, it just moves crime to less well light areas.</p> <p>Finally, public light fixtures should be well designed. They should not be things that try to fake an historic look (like those currently used by public works.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5969	5	/policies/visual-quality-of-new-development/	The City of Minneapolis applied for and was successful in its quest to be part of the US Fish & wildlife Service's the Urban Migratory Bird Treaty (check the records of the City's former sustainability coordinator - Gayle Prest to confirm this). one of the main components of the program is to reduce hazards to birds which means that all building/development proposals (including the lighting, landscaping, glass) need to be reviewed for their potential negative impact to birds. here are the guidelines: http://mn.audubon.org/sites/g/files/amh601/f/05-05-10_bird-safe-building-guidelines.pdf please ensure this review component is embedded in the 2040 plan, and the City's permitting and design review section staff receive training on this, train developers and contractors, and require changes in plans to meet bird safe design	7/22/2018
5970	13	/policies/landscaping/	Landscaping should include state of the art waste water management.	7/22/2018
5971	17	/policies/complete-streets/	The city must insist that Hennepin County and MnDOT follow and fund their complete streets policies. It is totally inappropriate the MnDOT insists that local units of government pay for pedestrian improvements on their bridges.	7/22/2018
5972	17	/policies/complete-streets/	This is an extremely un-family friendly policy. The goal is to make it more difficult for families to drive their children to day care, sports, or other anywhere. This also creates a big burden on any working person who needs their car to attend meetings during the day. Minneapolis is becoming a city that is trying to have a traffic congestion problem to punish drivers. There is no way for the majority of people to walk a child to day care and then walk to work. There is no way to bike a child(ren) to day care and then bike to work for most people. In the meantime, the most expensive transit ever in the state is being planned with stops in wooded areas instead of stops in the areas with the most dense population.	7/22/2018
5973	58	/policies/business-districts-and-corridors/	<p>The city needs to recognize that in many neighborhoods, keeping or even building a healthy commercial corridor with a mix of businesses that addresses the needs of the residents is a long-term and ongoing effort. In many parts of the city, past city actions (during the urban renewal days) have made it hard to maintain a violable commercial corridor. This will mean continued city support for organizations working to maintain these areas. (On Lake Street, the City created the K-Mark development that creates a 2 block gap in the walkable commercial street. In Seward, urban renewal bulldozed most of the commercial buildings on the north side of Franklin, making it almost impossible to maintain a critical mass of commercial activity)</p> <p>Also, commercial corridors need a mix of residents to support them. If the community only includes residents with limited income, there will be little support for the local businesses. Mid-market, non-income limited (non-subsidized) housing needs to be built in all parts of Minneapolis to insure viable commercial corridors.</p>	7/22/2018
5974	19	/policies/bicycling/	The city is adding bike lanes that are not being used without any consideration of the traffic congestion that it is causing. An example of this is 28th Street which rarely sees a biker. The goal of adding bike lanes whether they are needed or used without any consideration to the affect on cars makes it clear that the people making this decision only seek to punish drivers and brag about the miles of bike lanes that the city has without caring if they are even used. In addition, the bike lanes add to the segregation of south Minneapolis. These lanes cut off the Phillips neighborhood from the other parts of the city. It also creates issues for emergency vehicles that are now forced on to the few lanes open.	7/22/2018
5975	1	/policies/access-to-housing/	This plan does not go far enough. South Minneapolis should be zoned for apartment buildings, not just four plexes. As long as it doesn't threaten the health of the lake, there is no reason why large apartment buildings and condos on Lake Harriet should be illegal. It's a nice place to live...let more people live there!	7/22/2018
5976	76	/policies/new-parks/	<p>The City and its members of the Metropolitan Council and the Legislature need to push other parts of the metropolitan area to create more destination parks to reduce the over-use of the Chain of Lakes and Grand Rounds by people from outside the City. (Some of this has happened and Three Rivers Parks needs to be commended for its work but more needs to be done).</p> <p>Decking over freeways for use as parks needs to be considered. (with proper ventilation so that CO2 and CO levels at the park is healthy)</p>	7/22/2018
5977	16	/policies/environmental-impacts-of-transportation/	Once again, the city is aiming to punish drivers by assuming if you have a car, you are a single driver. There is no consideration on the impact of congestion on families. Is anyone making this decision have a family that they need to transport anywhere? Where are the great ideas for improved transit? The idea that bikes are the answer is not considering families, people who aren't able to bike, jobs that you can't bike to, etc.	7/22/2018
5978	20	/policies/transit/	Why are we building a train that has stops in the woods instead of in Uptown?	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5979	94	/policies/heritage-preservation-regulation/	<p>Two comments here: From personal experience, it is clear that Minneapolis needs to make sure that reasonable improvements to historic structures to adapt to modern use are more easily approved. In the case of Milwaukee Avenue, it is clear that the city goes overboard in its regulation, not even following the PUD or the historic district regulation adopted when it was created.</p> <p>Second, zoning needs to preserve the historic fabric of communities. For example the proposed built form map would allow "multifamily buildings on a limited number of combined lots" along Park and Portland north of 38th Avenue. This would destroy the character of those streets that now have great historic homes (that have no "official" designation).</p>	7/22/2018
5980	21	/policies/freight/	In my neighborhood, we have many commercial semi trucks parking along rather narrow industrial streets over nights and weekends. While this is allowed by current zoning and meets the needs of the truck drivers, it causes problems for the businesses along those streets, causes safety issues because of sight-line issues, and spills over into the residential part of the neighborhood. The city needs to provide affordable off-street parking for the trucks that meet the drivers needs and change the law so that the trucks can not park in front of existing businesses or on narrow streets, even when they are zoned industrial.	7/22/2018
5981	60	/policies/intrinsic-value-of-properties/	The land-use and built-form regulations need to be designed to protect the city's heritage. This means the the regulation need to promote the preservation of the "feel" and "character" of neighborhoods and the preservation historic structures that may not qualify for official historic designation. This does not mean keeping everything as it is. It means things like limiting height to 2 stories in neighborhoods that are predominately bungalows for ramblers, it means significantly limiting the ability to combine lots to build large building.	7/22/2018
5982	16	/policies/environmental-impacts-of-transportation/	I support these proposals.	7/22/2018
5983	1	/policies/access-to-housing/	<p>I think it's reasonable to concentrate housing development and density along major transit corridors, such as Hiawatha avenue, University and vacant lots in industrial areas. But to radically change zoning in interior residential areas filled with single family homes on quiet streets is a terrible idea, in my opinion - a complete give away to developers and a destabilizing effect on neighborhoods. And I don't believe it will lead to more affordable housing. Just more expensive housing.</p> <p>We need targeted areas for development, not a wide swath of rezoning in every part of the city. Employ a scapel, not a hammer.</p>	7/22/2018
5984	22	/policies/downtown-transportation/	I support all aspects of this draft policy currently. I would encourage the next version of the plan to call for dedicated bus-only lanes on main downtown arterials (6th/7th/8th Streets).	7/22/2018
5985	19	/policies/bicycling/	Full support for this goal!	7/22/2018
5986	19	/policies/bicycling/	What state do you live in? I will NOT ride a bike in the winter. It is dangerous for EVERYONE on the road, public transit included. Bicyclists DO NOT follow the laws of the road already and this will just get worse.	7/22/2018
5987	12	/policies/lighting/	Ensure that LED streetlights have warmer toned, less harsh bulbs which have less disruption to sleep cycles, wildlife, and light pollution.	7/22/2018
5988	10	/policies/street-grid/	Support restoration of gaps in the street grid: this should extend to supporting land bridges or freeway caps where that infrastructure has disrupted and divided neighborhoods.	7/22/2018
5989	34	/policies/affordable-housing-preservation/	Do not support rent control and do not support its inclusion in this plan. I support policies in the existing plan to preserve and protect affordable housing.	7/22/2018
5990	0.1	/topics/land-use-built-form/	I fully support this map and oppose any efforts to reduce upzoning throughout the city. Folks are concerned that this plan will involve bulldozing their neighborhoods, which it won't. Instead of walking back on this great plan to appease their concerns, refine your messaging to explain why this won't happen. Emphasize that the city isn't going to eminent domain anybody's homes to build new fourplexes. Also change Lake Calhoun to Bde Maka Ska :)	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5991	48	/policies/data-driven-decisions/	<p>I previously commented my support for this policy, especially after a engagement at a ward "question and answer" with the head of long-range planning where she referred to the need to develop alternate modes of wealth creation for families outside homeownership (implying in response to a question about making home ownership available to those who are being squeezed out), and when pressed said that some economists are probably working on it but she doesn't know who. The more and more I think about this issue, the more startling the apparent lack of data driven planning occurring in this process. Much has been made about community engagement but little is said about what city planners have learned from other cities. In fact, the head of long-range planning responded to an anxious resident about the failures of some of these policies, particularly the rezoning features, in Seattle. The head of long-range planning agreed that Seattle, San Fran, Portland, Denver had all "got it wrong," and she didn't know how it would be different here, but she is sure that if we keep participating it will happen. I appreciate the community engagement an public input, but frankly, I want to know that experts have been consulted, that comparative analysis has taken place. When I look over the planning process I see nothing of this sort. No strategic listening sessions with experts from other cities, no visits on the part of planning personnel. I've only had limited contact with the city planners who devised this plan, but based on the statements made at the engagement event I attended, it would seem that real, sustained, rigorous engagement with outside experts and comparative analysis has not occurred. If this has occurred, and if there are specific plans on how to grow at this accelerated rate without committing the failures that drove families and middle class people out of the cities these policies are modeled after, then the public needs to be made aware of this. I have a JD and a PhD in the humanities and even with this extensive graduate education, my ability to understand the implications -- particularly of the zoning changes, and the emphasis on "corridors" versus nodes or routes (for example) is very limited. I need to know that the assumptions made in this plan have been stress tested by a review with outside experts from other cities and from academia.</p>	7/22/2018
5992	1	/policies/access-to-housing/	<p>The new strategy of allowing taller multi-unit buildings would destroy our neighborhood because we have a very narrow neighborhood with only 2 blocks between our busiest streets. We are fine with slightly taller density along the northern busy street (East Hennepin) because it borders and would soften the transition to the industrial area, but along Como Ave. SE allowing higher density and taller buildings would overshadow our small single family homes. The conversion to chopped up rentals during the recession destablized our community. There is a shortage of modest "starter" homes. Most of our housing stock would be in this category. I'd rather see conversions back into owner occupied homes with Land Grants to make them more affordable. So a low income family could buy the house but not the land and be given the chance to repair and improve it. Instead of rental apartments I'd like to see affordable condos above retail or row-houses. Currently duplexes where both units are owner occupied are a popular tend. We know people who were priced out of their vintage apartment building when it's rent was increased to match the new high rises built up around it. It is stressful for people to have to move because their rent had gone up. That keeps them poor. But if the buy a home or modest apartment they have the stability of a mortgage than stays the same.</p>	7/22/2018
5993	1	/policies/access-to-housing/	<p>All of the parts of this plan are important to help Minneapolis stay at least a somewhat affordable place to live, especially part e. There should be a variety of housing options in all neighborhoods including the ones that are now restricted to only single family zoning. The only fair way to achieve this goal is to open up the zoning options in all neighborhoods including those that are currently most desirable and therefore would have the most demand for alternate housing options including 2, 3 or 4 unit dwellings.</p>	7/22/2018
5994	33	/policies/affordable-housing-production/	<p>There should be housing for residents of all income levels in all neighborhoods in the city (part a).</p>	7/22/2018
5995	35	/policies/innovative-housing-types/	<p>Making alternative housing types available in Minneapolis will help the city be affordable and accessible to more people. This is a great plan.</p>	7/22/2018
5996	19	/policies/bicycling/	<p>Minneapolis should keep going with all that it has done to encourage biking and become the best biking city in the US. Bicycle infrastructure is certainly worth the investment.</p>	7/22/2018
5997	4	/policies/access-to-commercial-goods-and-service	<p>This is generally a positive direction, but only if we are adding capacity and incentives for making more walking trips " and not making driving onerous, or chipping away at stable neighborhoods for development's sake.</p> <p>We need to make smaller, discretionary trips safe and pleasant via non- motorized modes. The city needs to pay MUCH more attention to making crossings safe (striping, traffic arming, hawk signals) and less on land use changes. Make it easy, pleasant and safe for us to walk to the hardware store for screws and lawn bags, or for dinner groceries, but our city should still have convenient access by auto to a larger commercial nodes/stores for larger or multiple items and trips, so people's time is not wasted in traveling.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

5998	49	/policies/educational-and-economic-access/	Minneapolis Public Schools needs to hire staff that reflect the student body. Representation matters! The practice of hiring teachers from outside a school community should also be examined critically.	7/22/2018
5999	65	/policies/urban-agriculture-and-food-production/	Good policy and action steps.	7/22/2018
6000	4	/policies/access-to-commercial-goods-and-services/	When we moved here there was a full service grocery 2 miles from home on a bus line. It was replaced by a liquor store. The only groceries in walking distance just sell snacks, smokes, lottery tickets, and grab and go. Now people have to drive to get to a grocery. Years ago I could take the bus downtown for anything I needed beyond the near-by grocery: fabric, books, clothing, appliances, home goods and furniture. Now one has to go out to the suburbs for most of that. When changes are made, do you ever consider what the Community wants or needs? Check out our Small area plans. Top down planning hurts and can be painful for a community. We who live here know what our needs and concerns are.	7/22/2018
6001	49	/policies/educational-and-economic-access/	Through schools: stronger family-school relationships and NO police presence in schools will be necessary for equitable, safe learning environment for all students and families.	7/22/2018
6002	14	/policies/tree-canopy-and-urban-forest/	I support these proposals.	7/22/2018
6003	70	/policies/ecology-and-habitat/	I support these proposals.	7/22/2018
6004	0.1	/topics/land-use-built-form/	I am a millennial resident of Minneapolis. I was fortunate enough a year ago to be able to purchase a single family home in the Standish neighborhood. It had been my dream, since graduating from college, to be able to be a homeowner in the neighborhood I grew up in. I felt very lucky to be able to find an affordable (albeit very small) home that I can call my own. Many of my friends are now in the position I was a year ago---searching for an affordable home in Minneapolis. They have been living in apartments, duplexes, fourplexes and with family members, but have a strong desire to own a home of their own---with a yard, garden space and garage. Unfortunately there aren't many available properties. Bidding wars are common with developers and speculators looking for rental properties. They are snapping up these starter homes eliminating the housing stock that would be available for young people anxious to make Minneapolis their home. They want to be part of a neighborhood community with the common theme of pride of ownership.They would be taxpayers and strong members of their communities. Looking at the Minneapolis 2040 plan, I am VERY concerned --- I feel this proposal will only make the problems of supply worse. Sure you will add density, but developers will be snatching up more and more properties to put up fourplexes and even larger properties. Not only will the starter homes be eliminated, but I fear developers will move to clean out the next tier of homes with the financial incentive to collect rent from multiple tenants in one building. It changes the fabric of a neighborhood with an overabundance of rental properties. I made an investment in my neighborhood and the City of Minneapolis---the largest financial investment I will likely make in my lifetime. If I wanted to live in a neighborhood with rows of fourplexes or larger I could have chosen Chicago, New York or even Downtown Minneapolis. I purchased a home in a residential neighborhood in South Minneapolis, surrounded by other single family homes because that was important to me. To change these neighborhoods would break the trust of all of the homeowners who have committed themselves to Minneapolis.	7/22/2018
6005	73	/policies/stormwater-management/	I support these proposals.	7/22/2018
6006	72	/policies/sustainable-water-system-management/	I support these proposals.	7/22/2018
6007	55	/policies/business-innovation-and-expansion/	Not only encouraging new businesses, but protecting the existing ones in the face of gentrification will be critical. Tearing down buildings to build more (likely unaffordable) housing, and displacing the existing businesses (often POC owned or frequented--thinking of Eat Street in particular right now) is not best practice.	7/22/2018
6008	66	/policies/air-quality/	I support these proposals.	7/22/2018
6009	38	/policies/affordable-housing-near-transit-and-job/	Good policy generally, but the devil is in the details. Action step a. is good. However b. Is too broad. Large parcel development should be encouraged around LRT stations, not on all corridors and nodes. Minneapolis should not make canyons of buildings along all our corridors. One of the things that keeps our city vital and desirable compared to other American cities is that our corridors or still human-scaled, crossable and don't divide neighborhoods. Let's keep it that was in all but the densest corridors.	7/22/2018
6010	20	/policies/transit/	Sure.	7/22/2018
6011	84	/policies/public-safety/	This is interesting, but also paramount to public safety is to enforce the law and to have appropriate police presence and action.	7/22/2018
6012	37	/policies/mixed-income-housing/	Definitely have more regulations to protect housing for all! The free market, as you state, will not hesitate to leave people behind. The people who often need amenity rich areas (people without cars, elderly, disabled, etc.) are the ones being pushed out with the new development. Social class/income diversity will enrich all people's lives! Proximity to those with different lived experiences from your own. I am all in favor of mixed income housing across the city.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6013	19	/policies/bicycling/	I support these proposals.	7/22/2018
6014	28	/policies/msp-airport/	Mitigation of airport noise is particularly important. This is a health hazard.	7/22/2018
6015	15	/policies/transportation-and-equity/	While white supremacy and police brutality are rampant, we will never have equitable streets or transit. For some people, just being exposed on the street, is a hazard. I hope those factors are considered in the equity initiatives outlined in the 20 year street funding plan.	7/22/2018
6016	71	/policies/soil-health/	I support these proposals.	7/22/2018
6017	6	/policies/pedestrian-oriented-building-and-site-de	I strongly support all action steps listed for this policy. I believe that the quality of growth that the city will see in the future is dependent upon a fast, safe, and efficient multi-modal transportation system intertwined with pedestrian-oriented buildings and streetscapes. It is particularly important for parking minimums to be reduced further or eliminated. Recent studies have shown that American cities of all sizes and geographies (Including peer cities like Seattle) have a dramatic oversupply of parking spaces, often multiple times the number of residents. Parking supply has long been a major barrier to and cost of developing new housing, generally passed along to residents in the form of higher rents. As the city grows over the next 22 years, it is critical that housing is affordable to current and future residents, that those residents can reach anywhere they need to in the city by transit, and that they have a vibrant and safe pedestrian environment in which to build their communities. This can be accomplished by all the action steps above, including eliminating parking requirements.	7/22/2018
6018	26	/policies/vision-zero/	I think it's extremely important to protect pedestrians and bicyclists. But I don't understand why saving their lives is a priority over saving the lives of drivers. My kids bicycle through Minneapolis and I do worry about this a lot. But I think it's a sign of arrogance - not meant, of course - but why should the city deem the life of a pedestrian or cyclist more important than the life of a driver? Almost all of us do all three, right?! Including my children. A foolish statement - and worse policy.	7/22/2018
6019	16	/policies/environmental-impacts-of-transportation	Bring back floating car share like Car2Go! This would require modifying the rental car tax system on a state level, which I realize may not be possible. However, this made not owning a car very easy. Additionally, stop putting in new parking garages in downtown if we wish to de-incentivize driving.	7/22/2018
6020	81	/policies/social-connectedness/	I believe that you are on the right track. Acknowledging the role of daily transit in community building will be helpful as well. Sitting alone in your own bubble (car) to and from work isolates you from others. You'd be surprised how many community connections, big and small, can stem from taking the bus, walking, biking, etc.	7/22/2018
6021	28	/policies/msp-airport/	All these goals are good. But I think a major priority should be mitigating airport noise. There are so many wonderful neighborhoods that are hurt by the existing noise they experience - and the city should be watchful that changes in flight patterns do not make it worse. A real balance has to be made between the need for more flights versus the needs of human beings who live on current flight paths. I'd opt towards not allowing willy nilly expansion of flights - with strict caps enforced.	7/22/2018
6022	29	/policies/creative-sector-economy/	Yes, yes, yes. The creative communities add so much in vitality and \$\$ to our area. Good that you're including them in this planning.	7/22/2018
6023	30	/policies/arts-and-cultural-assets/	Yes!	7/22/2018
6024	86	/policies/healthy-food-in-institutions/	Gut the corporate food chains @ the UofM! I am very proud of Minneapolis that so much of the food at the airports and stadiums are at least locally owned, if not at least something resembling real food. Additionally, we do not have too many fast food chains in many parts of the city. However, there are discrepancies! North Minneapolis has a ton of fast food and very little real food options. Abolishing the food deserts citywide is critical to a live-able city for all.	7/22/2018
6025	31	/policies/creative-workers/	Sure.	7/22/2018
6026	32	/policies/arts-in-community-development/	Sure.	7/22/2018
6027	67	/policies/climate-resilient-communities/	The extreme heat in summer, and the ever- more common black ice in the winter due to the fluctuating temps, need to be addressed as part of this.	7/22/2018
6028	1	/policies/access-to-housing/	I wholeheartedly support allowing increased density to be organically dispersed throughout the city through generalized upzoning. Chris Lynch chris80108@gmail.com	7/22/2018
6029	27	/policies/transportation-partnerships/	Action step c is critical to improving transit infrastructure in Minneapolis. Planned major transit investments have generally been too regionally focused, sometimes neglecting the densest and most transit-dependent part of the metro in Minneapolis. Allowing Minneapolis to fund transit improvements that serve its own citizens from its sizable tax base could greatly improve quality of life in the city as it grows over the next 22 years.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6030	33	/policies/affordable-housing-production/	Good goals. But affordable housing will not automatically come as a result of rezoning all existing single family dwellings. In so many cases, it's been demonstrated that simply rezoning will not bring down the costs of housing - and in some cases it appears this kind of change of zoning will result in increased costs. It seems from other cities that affordable housing will mostly be benefited by rent controls, as well as large contributions from the city to the subsidizing of housing.	7/22/2018
6031	35	/policies/innovative-housing-types/	Sure.	7/22/2018
6032	36	/policies/innovative-housing-strategies/	Sure.	7/22/2018
6033	1	/policies/access-to-housing/	<p>Increasing density in and on the edges of downtown makes sense. Increasing density along high-frequency transit routes and near light rail stations also makes sense. Encouraging or providing incentive for (not mandating) mixed-income housing in certain buildings is also laudable.</p> <p>If Minneapolis wants to demonstrate the benefit of building additional light rail lines, continue building up around the blue and green lines. Build up around 35W and 94. Build up in and around downtown. Cedar Ave S. Central Ave NE. W Broadway. Lake St. Lyndale Ave. Hennepin Ave. Hiawatha.</p> <p>What does not make sense is inserting duplexes, triplexes and fourplexes into single family neighborhoods. At current property prices, the neighborhoods most likely to see property turn over from single family to a multi-unit building are in areas where property values are lowest in the city. Very few duplexes or fourplexes that meet the racial, social and economic goals of the 2040 plan will be built in lily-white parts of the city where half million to million dollar home values make building a small, multi-unit building unfeasible.</p> <p>So, the plan to diversify the stock and increase density in single family neighborhoods will backfire. Small multi-unit buildings will be built in lower-income areas, which may increase rental opportunities but will further concentrate market-rate or subsidized housing for low-income people in low-income areas. Affordable single-family entry-level homes in those areas will become even scarcer.</p> <p>The duplex/fourplex proposal trades one set of problems for another. Minneapolis should focus on developing affordable, mixed-income, and completely market rate housing on parcels already zoned for that type of use but which are vacant or under-developed.</p>	7/22/2018
6034	37	/policies/mixed-income-housing/	Sure.	7/22/2018
6035	38	/policies/affordable-housing-near-transit-and-job-	Yes.	7/22/2018
6036	39	/policies/fair-housing/	Of course we should promote and monitor fair housing.	7/22/2018
6037	80	/policies/development-near-metro-stations/	This sounds positive and appropriate. I particularly like f, and g, there truly is not substitute for human scale development.	7/22/2018
6038	1	/policies/access-to-housing/	<p>Do not support the action steps here. Although I appreciate the goal and intent of redressing the legacy of redlining and housing discrimination, this is not well achieved with built form solutions, but by income equality, education equality, non-discrimination in housing.</p> <p>We have many blocks where duplexes and fourplexes mingle fairly happily. We could use some infill where 3-4 townhouses (complying with setbacks and height etc.) if they were on 2 lots. But a fourplex on a single lot in a sf neighborhood is simply too much. And allowing by this byright EVERYWHERE is not fitting, not needed and is frankly just bad idea.</p> <p>It feels to me like we are using a single tool - a blunt instrument and in a brutal way - when there are more tools at our disposal and we can use them more skillfully. Our accessory unit rule changes helped more. The fourplex type rules also would benefit developers more than families. We need to preserve our NOAH sf units as well as offer moderate and higher-priced sf options in our community.</p> <p>Minneapolis doesn't bear the affordable housing need number for the Metro. It is a big region, with lots of housing choices and many cities to share the load for building new capacity - subsidized and market rate.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6039	19	/policies/bicycling/	<p>I would add:</p> <p>e. examine bike-friendly intersection laws, where bikes can legally clear the intersection at a red-light after stopping (if there's no oncoming traffic) [See Portland] - this increases safety for both bikes and cars, given the acceleration disparity.</p> <p>f. actively work to educate the populace on biking rights & laws. (I've been commuting by bike for 18 years, year-round, and while consciousness has raised, we still have a long way to go in this area) adding lanes is great, but it's more powerful if paired with education & consciousness raising.</p>	7/22/2018
6040	17	/policies/complete-streets/	<p>Vision Zero puts great detail into its zoning specifications and it's hard to pinpoint where the details and goals are in harmony because of the lack of empirical data, but on transportation you begin to see how the political agenda is inveigled into policy in such a way that it diminishes or even destroys the intent of the policy advocated. If we are serious about Vision Zero we will have a 20 mph goal in our plan.</p> <p>Right now Vision Zero is paired, more conflated, with the Complete Streets goal of prioritizing pedestrians, and the vaunted bicycle, over cars on our roads which you can see in Policy 17 here: https://minneapolis2040.com/policies/complete-streets/. You can tell these goals aren't about safety, they're about lifestyle and urban design. And so if we are interested in safety we will change our policies to one of something like "shared spaces" which is what Europe does to promote parity between cars and people for the purpose of both development AND safety. Again, the political agenda is apparent and is trumping the intended benefits we should be receiving as residents. One way to get the right policy on roads is to ask ourselves what works.</p> <p>I'll tell you what I've found, based on a considerable amount of research, on road designs that will benefit us on safety, environmental impact, driver satisfaction, planning for autonomous vehicles, and even social justice.</p> <p>1. ROUNDABOUT, TRAFFIC CIRCLES, MINI-CIRCLES</p> <p>Roundabouts. See, it was a pun the whole time! Roundabouts are hated by Americans because they prevent our favorite activity, t-boning each other. We don't like them because they feel french. It feels strange to drive through something and around it at the same time. "Will I enter a worm hole?" But once you become accustomed to them you get these benefits:</p> <p>1) Safety - Roundabouts are the safest form of street interchange. Full stop. They result in fewer fatalities and fewer accidents to such a degree that for that reason alone we should use them but there's more!</p> <p>2) Environmental Impact - Roundabouts prevent or curtail idling at lights and so the air pollution at roundabouts is lower and the fuel burned lower as well so we save gas and money.</p> <p>3) Driver Satisfaction - While Minneapolis government officials don't prioritize driver satisfaction, I do, and so do other Vision Zero plans in other jurisdictions that put drivers and pedestrians and cyclists in an even position rather than creating animus and artificial food pyramids. Roundabouts result in fewer traffic tie ups, less braking, fewer accidents AND shorter commute times, all adding up to a better driving</p>	7/22/2018

6041	26	/policies/vision-zero/		
6042	49	/policies/educational-and-economic-access/	Yes, of course!	7/22/2018
6043	0.1	/topics/land-use-built-form/	I own and live in a single-family home that, under this plan, is on an Interior 3 block. I'm extremely happy about that. Already on our block is a duplex and a 7-unit apartment building, neither of which could be built today, but both of which add to the character and diversity of the built form of our street. Sure, streets with a row of nearly identical bungalows are quaint and all, but not even considering the benefits of having more neighbors, I LOVE the look of a neighborhood in which 100-year old homes sit next to 30 year old homes, which sit next to duplexes and small apartment buildings and (out-of-zoning-compliance) tri-plexes. A visual treat!	7/22/2018
6044	20	/policies/transit/	While major transportation investments are shaped in conjunction with regional partners, I think it should be of the highest importance when working with these partners to push for future transit alignments to serve the densest and most pedestrian-oriented possible routes. This means that planned LRT and BRT alignments through pedestrian-hostile environments like freeways and disused freight railways far from existing housing and commercial nodes should be shifted to corresponding commercial corridors to ensure that The city's pedestrian oriented building and site design policy can be effectively met-building ridership and supporting communities that already use transit.	7/22/2018
6045	48	/policies/data-driven-decisions/	Yes, we should be evidence driven in many decisions. I fear that the changing of the zoning in a one size fits all manner throughout the city is an example of - as far as I can read - a lack of evidence from other cities that this indeed will achieve the key goals it has set out.	7/22/2018
6046	47	/policies/housing-maintenance/	This excellent goal is severely undercut by the misguided policy of changing the zoning from single family to multi family throughout the city. Developers are going to offer high amounts of money to exiting single family home owners to leave their homes - then demolish what are in most cases excellent houses to build multiplex units. That is not neighborhood preservation! It's neighborhood destruction- totally antithetical to the above goal.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6047	42	/policies/expand-homeownership/	Yes.	7/22/2018
6048	41	/policies/tenant-protections/	Yes.	7/22/2018
6049	0.1	/topics/land-use-built-form/	Allowing for the construction and conversion of 4-plexes across Minneapolis is an excellent idea. I do not believe that this will degrade "neighborhood character" any more than tearing down old homes to build giant single family dwellings, and it will increase access to housing for residents all over the city. I have seen no evidence that developers are going to spend significant capital "bulldozing our neighborhoods" for the relatively minor payoff of a 4-plex when they could be building larger units along transit corridors, but I could see many current homeowners converting existing structures into multiple affordable homes. I think that the restriction on combining lots in I1 is an excellent limiting mechanism.	7/22/2018
6050	0.1	/topics/land-use-built-form/	I am fully in support of allowing fourplexes city-wide because we need to find an inventive way to increase our housing supply and address the rising rents in our city.	7/22/2018
6051	40	/policies/homelessness/	Of course we should do everything possible to eliminate homelessness and support homeless individuals and their families with the tools/knowledge/skills necessary to remain out of homelessness. But a related problem I did not see anywhere mentioned in the 2040 plan is dealing with individuals, homeless or not, who are begging on more and more street corners in Minneapolis. The city should be doing whatever it can do to discourage this - whether through incentives or through legislation. I do not underestimate the difficulty involved nor all the nuances involved in why people choose to remain homeless on the street and/or spend much of their day begging on street corners or access streets to and from freeways. We can both be sympathetic to the needs of these people - often suffering from drug problems or alcoholism - and balancing those needs with those of Minneapolis citizens who are made exceedingly uncomfortable or frightened by being propositioned so often in recent years. In a document with about 90 goals, I'm pretty surprised that this is not mentioned as a goal - to humanely reduce the numbers of people asking for money on the streets of our city.	7/22/2018
6052	17	/policies/complete-streets/	You should put people, bicycles and cars in parity so that everyone in the city has equal status on our streets. Roads are primarily for cars but if we do things like slow speed limit to 20 mph we'll make them safer for cyclists and pedestrians without having to game the roads with lines. Please remove the bicycle lines and lanes and invest in protected bike lanes and improving and widening existing trails.	7/22/2018
6053	1	/policies/access-to-housing/	<p>I keep seeing commentary in the Star Tribune and around the internet about how we need to compromise on the comp plan, to strike some form of balance. I'm concerned that the neighborhoods asking for compromise in their favor are neighborhoods that have been getting compromise in their favor for the last century, in the form of racial covenants, redlining, low-intensity zoning, downzoning and historic districts. All of those items and policies have been proven, through study, to increase and worsen housing disparities. Since the first goal of the Comp Plan is reducing disparities, I hope the comp plan considers the weight of opinions from historically and presently housing-resistant neighborhoods, looks at their role in resisting housing in making the housing shortage in the region worse, and acts accordingly.</p> <p>The surprise of it all, is that it seems like compromise was already written into the comp plan land use maps. We should be allowing more housing in South and Southwest neighborhoods, more than the draft currently calls for.</p> <p>Lastly, there's an article in the Star Tribune conflating cause and effect: there seems to be a serious misunderstanding, either by Star Tribune journalists, or by city council members on what caused the housing crisis in San Francisco, and how that connects to the dreaded "density" word, and our own city. People who should know better seem to be assuming that the Comp Plan is a step towards the bad things about housing cost in San Francisco, forgetting about what got them there: a huge increase in jobs, without a corresponding increase in housing. People seem to forget that in San Francisco, people fight any positive changes to solve that problem too, and that similar groups of people to the ones in Southwest asking for the same kinds of compromises that they have long been getting.</p> <p>I hope this process means we do a good enough job of looking at our values and vision for the city in the future, and that we can carry out the #1 goal throughout all parts of the Comp Plan. There's a lot at stake.</p>	7/22/2018
6054	1	/policies/access-to-housing/	Don't overbuild! We don't want to be like Milwaukee. The Pulitzer Prize winning author of Evicted says the city housing situation is no better today. https://www.jsonline.com/story/money/business/2018/01/11/milwaukee-area-apartment-market-vacancy-rate-rises-new-units-outstrip-demand/1024173001/	7/22/2018
6055	2	/policies/access-to-employment/	Stop letting charter schools have access to city land.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6056	3	/policies/production-and-processing/	Maybe focus on the making sure as we densify we don't expose people to toxins.	7/22/2018
6057	3	/policies/production-and-processing/	One thing you can do for equity is to stop drug testing, particularly for marijuana. Encourage businesses to stop testing and stop using criminal records against job applicants. Everyone deserves a fresh start.	7/22/2018
6058	4	/policies/access-to-commercial-goods-and-service	Have a goal of using established business clusters in neighborhoods as your starting point and working from that spot. Use public housing to bolster businesses. And give business incentives to small grocery stores to fight off bodegas and convenience stores that sell junk food.	7/22/2018
6059	5	/policies/visual-quality-of-new-development/	So we're going to have ugly cubes everywhere? No thanks. How about worrying more about the needs for the buildings and making the buildings we do have in poorer neighborhoods better. Direct city investment in improving our existing housing and building unit stock!	7/22/2018
6060	6	/policies/pedestrian-oriented-building-and-site-de	I could not disagree more. We need a Shared Spaces philosophy that integrates cars and people and bicycles and we need to orient streets toward safety using roundabouts and traffic circles.	7/22/2018
6061	7	/policies/public-realm/	This is ridiculous. Let the city breath and it will be fine. Use your city resources to helping the poor. Let developers figure out what their market wants. Just make sure you don't let them have every zoning variance they want like your stacked commission is doing now.	7/22/2018
6062	8	/policies/public-safety-through-environmental-de	Maybe it would be easier to accept graffiti tagging as part of local color and consider it street art. Worry about safety and keeping streets free of debris. Also, woonerfs are alley communities that make those spaces more livable. Don't discriminate against alley culture particularly if you want to densify the city. ADUs can be part of it. Widen all new alleys!	7/22/2018
6063	9	/policies/open-spaces-in-new-development/	Every paved over space is a missed chance to avoid concrete and let people walk on natural surfaces. Grass is better for knees and hips. Create natural environments not concrete amphitheaters.	7/22/2018
6064	11	/policies/skyways/	Why don't you encourage retail/office buildings with skyways to convert space within for residential units. Work with them on the zoning of it. Make some of it cheap affordable housing for the staff who runs support in those buildings. Let them live on site. What is the vacancy rate in those buildings?	7/22/2018
6065	11	/policies/skyways/	http://tcbmag.com/news/articles/2018/april/office-vacancies-on-the-rise Here's an idea. Convert office rental space into temporary shelters and/or into housing for building staff, particularly in Skyway Buildings.	7/22/2018
6066	11	/policies/skyways/	20% commercial vacancy rate here http://tcbmag.com/news/articles/2018/april/office-vacancies-on-the-rise vs. 12% nationally https://www.statista.com/statistics/194054/us-office-vacancy-rate-forecasts-from-2010/	7/22/2018
6067	12	/policies/lighting/	Convert parts of commercial buildings to residential.	7/22/2018
6068	13	/policies/landscaping/	Makes sense.	7/22/2018
6069	14	/policies/tree-canopy-and-urban-forest/	The focus on any non-structural areas should be on getting rid of concrete. Stop paving over everything!	7/22/2018
6070	1	/policies/access-to-housing/	Maybe provide incentives to homeowners to plant trees.	7/22/2018
			Affordable housing???	
			Many compassionate residents of Minneapolis will believe that the 2040 plan guarantees more affordable housing. Please DO NOT BE FOOLED! I have a private psychotherapy practice in a small building on Lyndale and 54th St (which will surely disappear under this plan). Most of my clients have low, no, or fixed incomes. Currently, four of them have been evicted or received Order to Vacate notices, after their affordable apartment buildings were sold to developers who are upgrading them for market-rate renters. These people are or will soon be homeless, forced to look in a diminishing supply for another low-rent apartment.	7/22/2018
			PROFIT motivates developers. They only build affordable housing if forced to do so in order to receive federal loans. Deregulation of zoning laws, making it easier for developers to build for profit rather than the common good, is NOT a way to assist people out of poverty!	

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6071	34	/policies/affordable-housing-preservation/	<p>Affordable housing???</p> <p>Many compassionate residents of Minneapolis will believe that the 2040 plan guarantees more affordable housing. 6072	0.1	/topics/land-use-built-form/	<p>Interior 1 doesn't go far enough. Homes already exist in these neighborhoods that exceed what's allowed under Interior 1. The minimum designation should be Interior 2.</p> <p>Areas that are currently interior 1 should be changed to interior 2. Areas that are interior 2 should be changed to interior 3. Areas that are interior 3 should have their maximum height raised to 5 stories instead of 3.</p>	7/22/2018
6073	0.1	/topics/land-use-built-form/	<p>I live in a neighborhood designated interior 3. I noticed these are some of the most transit accessible neighborhoods in the city. There's no reason we shouldn't allow 4 and 5 story buildings in these neighborhood interiors. These kinds of buildings exist already. The city needs to stop forcing renters to only live along busy, dangerous, polluted corridors.</p>	7/22/2018
6074	61	/policies/environmental-justice/	<p>In order to live up to our commitment to environmental justice: built form guidance along corridors should be changed to allow more density in interiors: up to 5 stories within 4 blocks from "Corridor 6" and all "Transit" designated corridors. In the pre-amble to this section it lists the disproportionate impacts of pollution on "low-income and indigenous communities and communities of color." I think it's great this is acknowledged in the draft. But I'm disappointed that the built form map pushes high density housing on to busy, polluted corridors. Of course this will likely be rental housing, and renters are more likely to be lower income, indigenous, or people of color. People can live 2, 3, and 4 blocks in from a transit corridor and access the bus perfectly fine. The current built form maps give too much deference to flawed historic patterns. The consequences for future generations living in these new buildings are large, as the draft specifies very clearly: "heart attacks, asthma, high blood pressure, lung conditions and low birth weights." Getting just a little distance between people's homes and pollution can make a big difference.</p>	7/22/2018
6075	0.1	/topics/land-use-built-form/	<p>This is a fantastic plan, I'm 100% for it.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6076	1 /policies/access-to-housing/	<p>The biggest problem with the proposal to increase housing/population density is the lack of specifics in its implementation. Basic economics, and the absence of specific goals or incentives, will encourage developers to build fourplexes where the return on investment is best. That means vacant lots on the North Side, and starter homes elsewhere will be the primary candidates for fourplex construction.</p> <p>If the city created a specific new strategy of increased density per block, I think people would be more willing to accept it. An example would be one new fourplex per block, with a half block minimum distance between. Another suggestion is to require or incentivise, that a new fourplex be built on two adjacent lots, increasing the green space and elbow room for the new building and it's residents, while also reducing the impact of parking, traffic, noise, etc.</p> <p>Another idea would be to offer incentives for owner occupied fourplexes. This allows a family to build wealth while it has a real stake in the community.</p> <p>As the proposal stands right now, a neighborhood could be faced with multiple fourplexes in a row, or on a block, dramatically changing the lives on those living in close proximity to the new buildings. On Knox Avenue North and Oak Park North, there is a good example of the wrong way to do this. Prior to the recession, 3 identical, modular, low budget fourplexes in a row were crammed on to 3 residential lots. The fourplexes were marketed to investors as "Dream Homes". Parking became extremely tight for everyone in that area. Traffic and noise are a problem. The investors have not maintained the properties effectively. These fourplexes have not been an improvement, or asset to the community. Quite the opposite.</p> <p>The impact on the lives of those already living in a given neighborhood has been minimized and dismissed by city planners. Indeed, city planners have used past practices of red lining and discrimination, to imply that current residents legitimate questions and concerns about the plan are based on racism. This is unfair, and it devalues the credibility of the city planners in the discussion.</p> <p>Another city strategy is to say that a fourplex on a residential lot is similar in size to some of the teardown-rebuild projects that have been plaguing parts of the city. While the size may be similar, the impact on those adjacent or near a fourplex is significantly greater. All of the teardown/rebuilds resulting in a huge house, have met resistance in the community.</p> <p>And let's not forget, people have made a considerable financial and personal investment in their neighborhood. They trusted that rules protecting their investment and community would not change. What a betrayal for the city to devalue their trust.</p> <p>It is one thing to purchase a house adjacent to a existing fourplex, or on the same block as one. That is a purchase decision a person makes on their own. It is an entirely different thing for the city to encourage fourplex construction to replace single family homes that are adjacent or near owner occupied homes. People have a right to believe that the rules that existed when they purchased their home will continue to be there and protect them.</p>	7/22/2018
6077	0.1 /topics/land-use-built-form/	This is your daily reminder that there is zero data supporting up-zoning's ability to reduce housing affordability	7/22/2018
6078	34 /policies/affordable-housing-preservation/	<p>One way to do retain the cheapest housing stock in any neighborhood you should avoid letting the market play too hard in it. To shift away from classic residential neighborhoods and look at mixed use properties, the vacancy rate is 20% and climbing in the commercial market.</p> <p>Let's convert vacant commercial stock and turn it into residential rentals, at least temporarily. We can start with the Class B stock which is at an astounding 27%</p>	7/22/2018
6079	1 /policies/access-to-housing/	As a homeowner who lives sandwiched between a duplex and a five-plex, I appreciate the diversity of my city block and neighbors. However, I would like this policy to address the possibility of slumlords profiting over neighborhood diversity. This policy appears to position landlords and developers in even great power roles instead of building cooperative or city owned units where renters and owners can economically benefit.	7/22/2018
6080	34 /policies/affordable-housing-preservation/	Anyone agreeing with this BS of a plan is either a consultant or developer that makes money from proposing and implementing it or is in the back pocket of someone who will.	7/22/2018
6081	34 /policies/affordable-housing-preservation/	This plan explains why we've seen groups of Chinese developers scoping out the homes on the west side of Harriet	7/22/2018
6082	34 /policies/affordable-housing-preservation/	Affordable means that is you've paid for your house, you shouldn't be forced out due to the property taxes. If you would do your jobs and figure out how to fix that, you will be applauded. Instead your primary goal is to bring in more money so you can spend it on ridiculous projects and make a name for yourself. You are in t his job to SERVE- find a different job if you have career aspirations for yourself- or go to one of these totally screwed up cities and work there since you seem to think they're so great.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6083	1	/policies/access-to-housing/	Make housing affordable! Reduce property taxes by reducing spending and reverse the law that passed that put the burden of the general fund on Home owners. Take the stadium and pro sports people out of your pocket and make them pay their share. If we have such a problem with upcoming density, then why did you put up all these stadiums to attract people to the city - clearly it wasn't needed.	7/22/2018
6084	38	/policies/affordable-housing-near-transit-and-job-	Your assumption that people will take public transport if they live in a fourplex on a bus route is ludicrous! Any such structures should be required to provide offsteet parking for every unit.	7/22/2018
6085	39	/policies/fair-housing/	Someone needs to care about our elderly. The ones who did the right thing and paid their house over 30 years and now cannot afford the property taxes on their home. These are people who are home to keep an eye on the neighborhood, to bring multi-generational experiences to a neighborhood. Age Diversity matters as well.	7/22/2018
6086	43	/policies/housing-displacement/	You own this one! You created property taxes that force people out of their homes. But that seems to be your goal - that no one owns a home or car. Communists!	7/22/2018
6087	0.1	/topics/land-use-built-form/	I'm a big fan of the 2040 plan because it addresses the lack of housing in our city and will prevent our city's housing prices from rising to a level that is unaffordable for working and middle class people and will encourage the density necessary to wean our city of its dependence on cars. I especially like the 4-plex change.	7/22/2018
6088	42	/policies/expand-homeownership/	This topic is clearly in hear as a decoy because nothing about this plan expands home ownership. And underlying it all is the tax burden you have put on the homeowners. Making more homeowners from cramped condo's only masks the issue you seem unwilling to address. Your spending exceeds the ability of homeowners to support. Change the law back to require commercial real estate support the general fund.	7/22/2018
6089	23	/policies/coordinated-development-strategy/	If you build it - they will come. So just don't build it.	7/22/2018
6090	23	/policies/coordinated-development-strategy/	Nothing coordinated here. Where are the requirements that ensure over-development doesn't occur? Implement Metro wide thresholds on vacancy before any additional development!!!!!!	7/22/2018
6091	1	/policies/access-to-housing/	A-d are doable, effective plans. Regarding e: I have grave concerns that 'small scale residential structures' on traditional size city lots will be disastrous. First: The "traditional" size of a city lot has a range. Where we live, in the Longfellow neighborhood, lots are smaller than many 'traditional' lots south of here, near Nokomis, as well as in SW Mpls. Further, there are currently many small homes that are affordable for people. These small homes are what would be purchased, razed, and a larger structure built. If this is a 3-4 unit structure, it would be jammed in between other single family homes. Duplexes, maybe, but nothing larger. Another note: Developers & landlords will have an eye on profit, so they will build as large & fancy as possible; the end result is there will not be more affordable, dense housing in these areas furthest from downtown; it will be unaffordable to lower income people. Finally: Keep the multifamily units closest to transit routes & retail. Close to employment is less crucial is there is good transit access.	7/22/2018
6092	43	/policies/housing-displacement/	Hmmmmm. Interesting. A HUGE and disproportionate share of taxes are collected from southwest Mpls. And this will DESTROY that part of town. And you're off your rocker if you think a four plex put in place of those homes will be affordable! If the tenants just paid the taxes it would be unaffordable!	7/22/2018
6093	0.1	/topics/land-use-built-form/	This plan is too sweeping and generalized, and doesn't at all take into account the nuances of different neighborhoods. For example, in the neighborhood just to the west of Bryn Mawr Meadows, there are multiple blocks with irregular lots and no alleys. Particularly between Penn and Newton and Cedar Lake Road and 394, which in this plan would be zoned for 3-4 story multifamily buildings, there are multiple lots of varying shapes and sizes and no alleys. How can there be one zoning law for each of these? And how would trash removal work (I assume you can't get each renter to pull their trash can to the curb each week)? And what about emergency access, i.e. in case of fire? This plan needs to take into account the viewpoints of the neighborhoods themselves, which know the issues of their neighborhood at a much more in-depth level than a centralizing Minneapolis planning committee. Bryn Mawr Neighborhood Association certainly has a written neighborhood development plan the city of Minneapolis can and should take into account.	7/22/2018
6094	44	/policies/comprehensive-investments/	Keep the developers not residing in Mpls out of future development. They will ruin our city. Ugly cheap units will be built. Tax it in a way that ensures any money made on development is put toward your insatiable appetite for spending.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6095	42	/policies/expand-homeownership/	<p>To state the obvious, you should be equal in your desire to create affordable housing. What about the rest of us? Just low income and people of color matter? What about people who spend the last 49-50 years paying off their house and saving for retirement rather than spending everything they earned. They also have a right to stay in their home - which is impossible with the property tax rates the way they are. You've positioned this as homeowners against renters, etc. The issue is that you don't put much of the general tax burden on anyone BUT homeowners.</p>	7/22/2018
6096	1	/policies/access-to-housing/	<p>The biggest problem with the proposal to increase housing/population density is the lack of specifics in its implementation. Basic economics, and the absence of specific goals or incentives, will encourage developers to build fourplexes where the return on investment is best. That means vacant lots on the North Side, and starter homes elsewhere will be the primary candidates for fourplex construction.</p> <p>If the city created a specific new strategy of increased density per block, I think people would be more willing to accept it. An example would be one new fourplex per block, with a half block minimum distance between. Another suggestion is to require or incentivise, that a new fourplex be built on two adjacent lots, increasing the green space and elbow room for the new building and it's residents, while also reducing the impact of parking, traffic, noise, etc.</p> <p>Another idea would be to offer incentives for owner occupied fourplexes. This allows a family to build wealth while it has a real stake in the community.</p> <p>As the proposal stands right now, a neighborhood could be faced with multiple fourplexes in a row, or on a block, dramatically changing the lives on those living in close proximity to the new buildings. On Knox Avenue North and Oak Park North, there is a good example of the wrong way to do this. Prior to the recession, 3 identical, modular, low budget fourplexes in a row were crammed on to 3 residential lots. The fourplexes were marketed to investors as "Dream Homes". Parking became extremely tight for everyone in that area. Traffic and noise are a problem. The investors have not maintained the properties effectively. These fourplexes have not been an improvement, or asset to the community. Quite the opposite.</p> <p>The impact on the lives of those already living in a given neighborhood has been minimized and dismissed by city planners. Indeed, city planners have used past practices of red lining and discrimination, to imply that current residents legitimate questions and concerns about the plan are based on racism. This is unfair, and it devalues the credibility of the city planners in the discussion.</p> <p>Another city strategy is to say that a fourplex on a residential lot is similar in size to some of the teardown-rebuild projects that have been plaguing parts of the city. While the size may be similar, the impact on those adjacent or near a fourplex is significantly greater. All of the teardown/rebuilds resulting in a huge house, have met resistance in the community.</p> <p>And let's not forget, people have made a considerable financial and personal investment in their neighborhood. They trusted that rules protecting their investment and community would not change. What a betrayal for the city to devalue their trust.</p> <p>It is one thing to purchase a house adjacent to a existing fourplex, or on the same block as one. That is a purchase decision a person makes on their own. It is an entirely different thing for the city to encourage fourplex construction to replace single family homes that are adjacent or near owner occupied homes. People have a right to believe that the rules that existed when they purchased their home will continue to be there and protect them.</p>	7/22/2018
6097	1	/policies/access-to-housing/	<p>I think your idea about allowing more multi-family housing in neighborhoods farthest from downtown really blows as it stands right now and I am adamantly against it.</p> <p>I'm OK with a duplex, but nothing beyond that.</p> <p>An ADU might be acceptable, but only on a one by one basis with neighborhood sign-off.</p> <p>One other comment I'd like to make concerns your war on the automobile. As far as I'm concerned you'll have plenty of housing stock once you drive everybody to a city that's a bit less hostile.</p> <p>There are a lot of reasons why people drive rather than mass transit, but one of them would be safety. A few back, and it's probably worse now, there were 1900 muggings, beatings, robberies, and sexual attacks, and unfortunately in a city so anti-police, I don't see that changing.</p>	7/22/2018
6098	47	/policies/housing-maintenance/	<p>Hypocrites! The minute you pull a permit to make a repair your taxes go up. You are NOT encouraging home maintenance.</p> <p>And the way property's are assessed is rigged. If a house sells at a lower price you deem it distressed and exclude it from the comps. But when some jerk tears it down and builds an inappropriate monstrosity in it's place, you get that added to the pool right quick!</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6099	0.1 /topics/land-use-built-form/		<p>Thank you for the tremendous effort that went into the 2040 plan and the desire to make our city more equitable and environmentally friendly.</p> <p>I am concerned that the specific policies in the 2040 plan appear unlikely to achieve the laudable goals of decreasing inequity and environmental impact through urban density. After rezoning, developers will, very sensibly, build whatever is most likely to be profitable, specially buildings with as many units that are as expensive as the market will bear. As an example, the two properties next to ours are duplexes with a combined 4 tenants of modest means compared to their neighbors. After rezoning, these two adjoining properties (which are along a transit line) could be combined to build a 2-lot, 4-story apartment building (if I correctly understand the plan). Based on recent development in our neighborhood, Upton 43, these units would likely be upscale and certainly not affordable housing. They would however, increase traffic, strain available parking, and destroy the trees and green space currently in the yards of these properties.</p> <p>Moreover, replacement of single family homes (many of them historic) with large apartment buildings will significantly alter the characteristics of existing neighborhoods and likely lower property values. Before you dismiss this as hypocrisy from wealthy liberals, please consider that I support policies that redistribute wealth to those in need, but do not feel the need to redistribute wealth to property developers. I support efforts to increase density, equity, and protect the environment. However, allowing developers free-reign in no way assures that those goals will be meet.</p> <p>I support the intent of the 2040 plan and propose the following revisions:</p> <ol style="list-style-type: none"> 1.Limit development in designated urban neighborhood blocks currently without large apartment complexes to multi-family dwellings that maintain the character of the neighborhood. Specifically, single-lot 4-plexes with set-backs from the property lines to maintain green space (e.g., backyards). 2.Include specific regulations, funding, or incentives to ensure the creation of affordable housing, that go into effect concurrently with the rezoning. 3.Include specific policies to invest in neighborhoods and people that have been historically marginalized, with specific sources of funding. 4.Enact policies that strengthen the public school system in all areas of the city, such as by decoupling school funding from local property taxes. 5.Include proposals for progressive taxation that ensure everyone contributes to the betterment of our city based on their means. <p>Again, thank you for your desire and work to strengthen our city. Please be open to honest concerns that this plan, while well-intentioned,</p>	7/22/2018
6100	34 /policies/affordable-housing-preservation/		<p>I suppose you think your re-election and/or career advancement depends on being Robin Hood...steeling from those who chose to save instead of spend and giving it to others. Well, we, the responsible, rule following middle class are still a voter base...you can rely on us to actually vote, to understand the issues, to consider the broad perspective of the greater good- but there is a line and you've crossed it.</p>	7/22/2018
6101	0.1 /topics/land-use-built-form/		<p>This plan is too generalized for every lot in the city. For example, in this plan my lot would be zoned Corridor 4 with an allowed building height up to 4 stories. My lot is very small (67.5' x 76'), and I was told I couldn't add an Accessory Dwelling Unit to my garage because the garage was too close to the house. There isn't anywhere to move the garage because of the lot size. So it doesn't make any sense that this plan has now decided that a 4-story building would work in the space.</p>	7/22/2018
6102	34 /policies/affordable-housing-preservation/		<p>This plan teaches our young people that if they save, it will be taken away. If they forgo pleasures today to make themselves into contributing members of society, it will not pay off.</p>	7/22/2018
6103	0.1 /topics/land-use-built-form/		<p>If implemented, this change in zoning to virtually all lots in the city would eventually lead to a wholesale dismantling of much of the green space in the city. Massive amounts of trees, gardens, and yards would be removed in order to fit larger buildings on current city lots. How is this environmentally friendly and citizen friendly?</p>	7/22/2018
6104	7 /policies/public-realm/		<p>I approve and encourage of the effort to increase publicly-accessible spaces. However, Action Step (f) concerns me here. I am not interested in public-private partnerships that result in publicly-accessible, yet nonpublic, spaces. The public should own the spaces.</p>	7/22/2018
6105	15 /policies/transportation-and-equity/		<p>I encourage transit options beyond buses. More trains accessible in more areas of the city and continued development of bike lanes supported by facilities at destinations</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6106	17	/policies/complete-streets/	I would recommend that prioritization be broken down into four parts, not three. Bicycling and transit are not equal methods of transportation and should not receive identical prioritization. Bicycling is not a viable method of transportation for many individuals who are disabled, work jobs where bicycling moderate distances is not practical, or need to travel long distances.	7/22/2018
6107	0.1	/topics/land-use-built-form/	<p>I am concerned that our roads are not built to handle the increased density that is proposed, especially in the neighborhoods farthest away from the city core. Lyndale, Nicollet, 50th Street, 54th Street, 28th Street, 26th Street, Portland, Park Avenue, all have been restriped or engineered in recent years for traffic calming. To handle fewer cars and make the neighborhoods quieter. If we add large apartment buildings on these main streets or down by the southern border with Richfield, it will put too much stress on these local streets. It makes more sense to add density slowly and see how the area is able to absorb the impact.</p> <p>The infrastructure needs to develop as we add density. We need additional schools, parks and green space, transit capacity, services and also a way for people to get around.</p> <p>Dreams of 15% bicycle commuting is impractical. My husband is a huge biker - he bikes to work as often as his job demands and weather permits, but year-round he maybe bikes 20% of the time. He is only able to do this because his office building has a shower and facilities for him to change when he arrives at work. This is not practical for many people. I personally could not physically bike that far, nor is there any way for me to shower and get dressed at work. A bus would take over an hour each day. Instead I drive and arrive in 20 minutes. We would need a significantly improved train system to reduce the load on our local streets.</p>	7/22/2018
6108	78	/policies/park-design-and-programming/	I hope the work already done with Master Plan for the different service areas is honored	7/22/2018
6109	1	/policies/access-to-housing/	I support Action Step (e) to increase the availability of 4-unit buildings and accessory dwelling units. I personally would like to see that increased even further to 6-unit buildings.	7/22/2018
6110	49	/policies/educational-and-economic-access/	<p>First let me state that in the last 5 years Minneapolis has gained about 40,000 new residents. Almost all of them with a median income equal to or lower than what we consider poverty level. This is not sustainable. We have people moving here to suck off the government tit because of our generous welfare system, creating demand for housing which is only pushing the cost of housing up for everyone. It is also causing the taxes in Minneapolis to skyrocket to pay for all of these additional programs, in affect causing those that actually contribute to move to lower taxed states and cities.</p> <p>We need to quit importing poverty!</p> <p>As far as education disparities is concerned, we've been working on reducing the education gap for more than 20 years, and with all of that time and millions and millions of dollars spent, we haven't moved the needle one bit.</p> <p>We have the 'Summit Academy' in North Minneapolis that offers tuition free career education for people of color, yet even though we have employment quota's in almost every state or city funded project, it appears that very few are taking advantage of it. Perhaps they just don't want to work because it's easier just sitting on your ass collecting welfare.</p>	7/22/2018
6111	1	/policies/access-to-housing/	Allowing four-plexes in single-family neighborhoods will exacerbate a problem of housing access we already face: small affordable houses that could serve as starter homes or aging-in-place are in short supply now. The least expensive properties will be the most vulnerable to redevelopment, decreasing opportunities for home ownership and down-sizing while living in a familiar neighborhood. There are other places, including aging commercial corners, where multi-family would be more affordable to build. And immigrant families with many children need larger homes such as those built a hundred years ago.	7/22/2018
6112	1	/policies/access-to-housing/	I live in the CIDNA neighborhood. I strongly support the 2040 plan. If we want to make Minneapolis better for EVERYONE who lives here, we need to update our zoning regulations. More density will reduce inequalities and improve environmental impacts.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6113	0.1	/topics/land-use-built-form/	<p>I have read opinions from people who care deeply about Minneapolis and equity for all its citizens as we grow into this century. I believe that this Interior 1 section of the plan is faulty. The plan does not match the intent to provide affordable housing for all. This Interior 1 plan favors developers over neighborhoods and it creates a situation where profit rather than planning ultimately drives the outcome. Developers can tear down starter homes and build denser housing for higher cost and ultimately higher rents. As written in the Interior Plans, there is nothing to stop developers from flipping a significant percentage of current housing stock in Minneapolis throughout all neighborhoods. This is a dangerous precedent to set in Minneapolis. It reminds me of the decision to close Nicollet Ave at Lake Street in the 1970s. Most now recognize this planning error but the city seems almost powerless to correct it decades later. The affects on housing, density, commerce, and transit in the Nicollet/Lake area are profound and will have lasted 50 years by the time Nicollet is able to be re-opened.</p> <p>I strongly oppose the current wording of the Interior Plans as they relate to replacing current housing with multiple housing up to 4 plexes in Interior 1 particularly.</p>	7/22/2018
6114	1	/policies/access-to-housing/	Love this! It's likely that people will own few, if any, cars in the era of autonomous vehicles, and I'd like to see garages be converted to accessory dwelling units that could be rented.	7/22/2018
6115	80	/policies/development-near-metro-stations/	While generally I agree increased access at all income levels is desirable, by designating entire streets/avenues as homogenous corridors could destroy any semblance of a neighborhood. I'd prefer to see hubs of increased density rather than along the entire street.	7/22/2018
6116	2	/policies/access-to-employment/	I agree with this policy and action steps.	7/22/2018
6117	33	/policies/affordable-housing-production/	<p>It's unclear exactly from this policy what the plan might be, but I'd like to comment on Action Step (e). I oppose a plan that would allow a majority of new housing to be income-restricted affordable housing and luxury housing. The majority of new housing should not be income-restricted or luxury. There's been a prevalence of building one or the other, without building additional housing for median income/wealth individuals and families. This is especially so for renters.</p> <p>I also would like this policy to expand beyond just income and consider "wealth" more generally. This is important for Millennial and Gen Z individuals, who may (on occasion, but not necessarily) have higher incomes, yet also paradoxically have (and continue to have) lower wealth and net worth due to student loan debt (almost guaranteed).</p>	7/22/2018
6118	3	/policies/production-and-processing/	I support this policy and action steps.	7/22/2018
6119	6	/policies/pedestrian-oriented-building-and-site-de	I support this policy and action steps.	7/22/2018
6120	7	/policies/public-realm/	I support this policy and action steps.	7/22/2018
6121	1	/policies/access-to-housing/	Neighborhoods are often described as "desirable" and feel everyone should have access to these desirable neighborhoods. Some are desirable because of location; others are desirable because of single family homes and absence of multistory buildings/complexes. I have hoping for more variability in the proposed plans. Currently, the plans as mapped out have the potential to turn desirable neighborhoods into just places to live. One of the great things about living in Minneapolis is there is opportunity to live in bustling areas if that's your desirable neighborhood or to live in a single family home if that's your desirable neighborhood..	7/22/2018
6122	0.1	/topics/land-use-built-form/	I support fourplexes. The city needs more reasonably priced housing and it seems like a good solution.	7/22/2018
6123	8	/policies/public-safety-through-environmental-de	Support.	7/22/2018
6124	9	/policies/open-spaces-in-new-development/	Support.	7/22/2018
6125	10	/policies/street-grid/	Support.	7/22/2018
6126	11	/policies/skyways/	Support	7/22/2018
6127	12	/policies/lighting/	Support	7/22/2018
6128	13	/policies/landscaping/	Support	7/22/2018
6129	14	/policies/tree-canopy-and-urban-forest/	Support.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6130	0.1	/topics/land-use-built-form/	<p>To whom it may concern, As a 36 year resident of Minneapolis, 3 years as a renter, 33 years as a homeowner, including as owner of 2 owner occupied duplex homes in Uptown. I am very against the rezoning of all neighborhoods to multi-family/multi-story buildings. I believe rezoning of Minneapolis to multifamily units thru out zoned single family neighborhoods is not going to achieve your quest of creating affordable housing. If you intent is to create wealth for developers, congestion, pollution, the elimination of many of our "starter" homes in Minneapolis thru development of large buildings, I think that you are on the right track~if that is not your objective then you need to reconsider this proposal. Very sincerely, Rick Pritchett and Neil Barrett 5420 Girard Ave. So. Minneapolis, MN 55419</p>	7/22/2018
6131	15	/policies/transportation-and-equity/	Support!!!	7/22/2018
6132	0.1	/topics/land-use-built-form/	<p>To whom it may concern, As a 36 year resident of Minneapolis, 3 years as a renter, 33 years as a homeowner, including as owner of 2 owner occupied duplex homes in Uptown. 6133	94	/policies/heritage-preservation-regulation/	<p>Support education for planning staff and the Heritage Preservation Commission to ensure that regulations and guidelines are understood and followed--but allowing for educated interpretation of guidelines as applied to specific circumstances. This will help bring more common sense to the review process and reduce the number of arbitrary decisions based on personal taste. Make the process more transparent and user-friendly. "Certificate of Appropriateness," for example, strikes many as an elitist concept. Much of the preservation terminology is like a foreign language to the general public. "Findings" are often repetitive and bureaucratic. Revise the public hearing process to allow applicants to make a final statement before the close of the hearing to respond to issues raised by members of the public. Also, allow for more interaction between the commissioners and the applicant after the public hearing is closed. The applicants often have additional information, based on their extensive experience with a property/project, that could help commissioners make sound decisions.</p>	7/22/2018
6134	16	/policies/environmental-impacts-of-transportation/	Support, with the caveat that the city insist on representing the public's interest in any partnerships with private companies such as Lyft. The companies are unwilling to share usage data that is needed for evaluation. Also, please ensure that pet transport can be accommodated.	7/22/2018
6135	17	/policies/complete-streets/	I support.	7/22/2018
6136	1	/policies/access-to-housing/	Having visited and lived in other cities, I am a big fan of higher density for Minneapolis. It is a great benefit to residents as it provides many shops and services that are nearby and thus can be reached by walking, biking, and transit. Any land use policy should emphasize New Urbanism and Transit Oriented Development so that different uses aren't spread out based upon policy. However, I think the idea that allowing 4-plexes in all of the city goes too far and that a more common sense middle ground approach to zoning would be better. We don't want to ruin these gems.	7/22/2018
6137	18	/policies/walking/	Support.	7/22/2018
6138	19	/policies/bicycling/	Support.	7/22/2018
6139	20	/policies/transit/	Support!!!	7/22/2018
6140	0.1	/topics/land-use-built-form/	Yes to increasing mixed-income communities and rectifying decades of housing discrimination via redlining and then downzoning. Allowing four-plexes everywhere won't achieve these goals on its own, but it does everyone's skin in the game. So allow them everywhere, including East Lowry.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6141	96	/policies/heritage-preservation-recognition/	There are many ways beyond signs and markers to interpret historic properties; encourage creativity in interpretation.	7/22/2018
6142	21	/policies/freight/	Support.	7/22/2018
6143	22	/policies/downtown-transportation/	Support.	7/22/2018
6144	1	/policies/access-to-housing/	I fully support increased housing density, including 4-unit structures everywhere in the city. Housing affordability is directly linked to supply and demand, and we need to drastically increase supply to reduce high rents in a natural way.	7/22/2018
6145	23	/policies/coordinated-development-strategy/	Support.	7/22/2018
6146	24	/policies/shared-mobility/	Support!	7/22/2018
			I recommend creating a lean electric bus system of smaller vehicles and more frequent service. One piece flow instead of batch processing of people. 30 people buses could run every 5 minutes during peak times, and then flex to every 15 minutes during slow times. Routes could easily flex and smaller buses could access more streets.	7/22/2018
6147	15	/policies/transportation-and-equity/	Drivers would not have to maneuver mega vehicles, creating more accessible jobs.	
6148	25	/policies/innovations-in-transportation-and-infras	I support Minneapolis being proactive and a strong advocate for the public interest in these new technologies.	7/22/2018
6149	26	/policies/vision-zero/	Agree with this.	7/22/2018
6150	27	/policies/transportation-partnerships/	Support.	7/22/2018
6151	28	/policies/msp-airport/	Support.	7/22/2018
6152	29	/policies/creative-sector-economy/	Support.	7/22/2018
6153	93	/policies/stewarding-historic-properties/	The policies in this plan that encourage density threaten historic preservation efforts. This is sometimes a direct danger, when density guidelines ignore the value of designated and potentially eligible properties and districts. In addition, while not all of the buildings and landscapes that developed along streetcar corridors merit designation as historic resources, they are part of the physical identify of the city and provide a rich visual texture that has been built up over more than a century. Do not sacrifice this diversity in a rush to promote other types of diversity.	7/22/2018
6154	30	/policies/arts-and-cultural-assets/	Support.	7/22/2018
6155	31	/policies/creative-workers/	Support.	7/22/2018
6156	0.1	/topics/land-use-built-form/	I can't help but wonder if the mayor / city council members are aligned with developers? Kickbacks anyone? It makes no sense given this plan will ultimately increase housing costs by allowing developers to win. Edina, here I come!	7/22/2018
6157	1	/policies/access-to-housing/	The policies in this plan that encourage building density threaten historic preservation efforts. This is sometimes a direct danger, when density guidelines ignore the value of designated and potentially eligible properties and districts. In addition, while not all of the buildings and landscapes that developed along streetcar corridors merit designation as historic resources, they are part of the physical identify of the city and provide a rich visual texture that has been built up over more than a century. Do not sacrifice this diversity in a rush to promote other types of diversity.	7/22/2018
6158	0.1	/topics/land-use-built-form/	It sure appears this plain aims to be decisive, rather than productively solving the problems with our city (roads and other infrastructure).	7/22/2018
6159	0.1	/topics/land-use-built-form/	Expect a lawsuit from a group or residents like what happened in Seattle.	7/22/2018
6160	33	/policies/affordable-housing-production/	I very much support creating more affordable housing.	7/22/2018
6161	36	/policies/innovative-housing-strategies/	It is unclear if we are also attempting to increase racial integration in neighborhoods. That should be explicitly stated & pursued.	7/22/2018
6162	0.1	/topics/land-use-built-form/	Mayor Frey states you can tear down a small house and build a mansion and this is just an option to build something more affordable. Given the cost of buying and demolishing an existing house is rolled into whatever is to be built, it by nature won't be affordable. You cannot depend on developers interested in profit to be altruistic.	7/22/2018
6163	33	/policies/affordable-housing-production/	Should include increase or incentivize racial integration in neighborhoods.	7/22/2018
6164	40	/policies/homelessness/	I think the city needs to commit more resources to the homeless population and addressing root causes of homelessness.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6165	1	/policies/access-to-housing/	I am a 65 year old professional artist who was born and raised in NE Minneapolis. I've witnessed the changes, decline and now economic interest in this neighborhood throughout the years. My studio and gallery are also located in NE. The NE Arts are the driving force, and have been, for this economic upturn. Protect artists, artists' industrial work spaces, artist owned and operated galleries and coops. We are each a small business and do much to contribute to our community by teaching, sharing and bringing people together.	7/22/2018
6166	0.1	/topics/land-use-built-form/	Changes this drastic fly in the face of basic logic and effective management. Minneapolis has been "working" as evidenced by significant demand growth over the past decade or so. So, let's just change the entire structure that brought in this demand! Private sector business leaders would be laughed out of the room if proposing comparable drastic changes to a successful organization.	7/22/2018
6167	1	/policies/access-to-housing/	I am a 65 year old professional artist who was born and raised in NE Minneapolis. I've witnessed the changes, decline and now economic interest in this neighborhood throughout the years. My studio and gallery are also located in NE. The NE Arts are the driving force, and have been, for this economic upturn. Protect artists, artists' industrial work spaces, artist owned and operated galleries and coops. We are each a small business and do much to contribute to our community by teaching, sharing and bringing people together.	7/22/2018
6168	37	/policies/mixed-income-housing/	Surprised race is not mentioned, only income. Unclear what "Expand the City's inclusionary housing policies and tools" really means. Please be more explicit about integration strategies. We are too segregated.	7/22/2018
6169	84	/policies/public-safety/	Strongly support.	7/22/2018
6170	49	/policies/educational-and-economic-access/	I think it is extremely important that the city focuses on reducing disparities and increasing access to education, including a focus on increased access to higher education.	7/22/2018
6171	39	/policies/fair-housing/	I hope that "Disseminate fair housing information and resources" can include conversation with white folks about the advantages of racially integrated neighborhoods. Access is important, but being welcomed is important too.	7/22/2018
6172	33	/policies/affordable-housing-production/	A greater variety of housing options, and a greater variety of housing, in all neighborhoods is an excellent goal and I support it entirely. My neighborhood (Longfellow) would benefit from a mix of housing options. All we are seeing now is single-family homes being torn down and replaced with bigger single-family homes. That does nothing to help affordable housing or diverse housing needs.	7/22/2018
6173	40	/policies/homelessness/	I'd like to see this be stronger. Can the city build affordable housing for the homeless?	7/22/2018
6174	39	/policies/fair-housing/	Great to include testing to see if the market is really fair! Let all landlords know this is happening!	7/22/2018
6175	42	/policies/expand-homeownership/	Strongly support!	7/22/2018
6176	0.1	/topics/land-use-built-form/	As a homeowner with a single city lot, I have a concern about the development criteria or limitations which would control HOW 4 units would be allowed on a typical lot. If up to 4 units and 2.5 stories are allowed, rules for building setbacks, lot coverage (green space), etc. should be deferential to single family neighbors and should be enforced. NO VARIANCES to exceed or ignore these rules should be allowed. Not every "Interior 1" lot will be suitable for 4 units without variances to reasonable zoning guidelines and residential code criteria, so these lots should be left alone. The city need not encourage developers trying to force their proforma on a parcel that does not fit. Frankly, after what I have personally seen, I do not trust that the city values old homes or has the interests of current homeowners at heart.	7/22/2018
6177	49	/policies/educational-and-economic-access/	Need more info about what "Continue to work with Minneapolis Public Schools and other educational providers to eliminate racial disparities in access to educational opportunities, educational attainment and discipline in schools" means. Detail what's currently being done (I'm aware of nothing) and what's proposed. What can/should the city's role be in supporting the schools?	7/22/2018
6178	20	/policies/transit/	I think the city should focus on increasing public transportation and encouraging fewer people in the metro area to get around using cars.	7/22/2018
6179	0.1	/topics/land-use-built-form/	since July 4 1776 property ownership has been a significant part of building financial stability. Residents concerned of MPLs2040's literally blown off because reducing property values is necessary to right the wrongs of history (per the council members at 10th Ward meeting last week!). Doing this is a historical wrong, so shall my descendants have the right to adversely effect the lives of governor Frey and the city councils decedents?	7/22/2018
6180	43	/policies/housing-displacement/	I support this - and one key is not having an expiration date for when low-income housing inclusions in new developments.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6181	19	/policies/bicycling/	<p>I would like to see better signaling around bike routes. First Avenue, for example, has a protected bike lane but the traffic signaling encourages both right & left turns into intersections where cyclists have right-of-way. The protected bike lane along Oak Street near the University has the same problem.</p> <p>Encouraging cycling is great. I bike commute every day and want more people to feel safe doing the same. But infrastructure won't work on its own. It has to be combined with techniques that reduce dangerous behaviors from drivers. That can be done with signaling, traffic control (roundabouts, for example) and enforcement (actually stopping and ticketing drivers for blowing through lights or crosswalks).</p>	7/22/2018
6182	3	/policies/production-and-processing/	<p>Protect artist industrial work spaces in NE Minneapolis. As you know, artists are on the forefront of economic vitality in a depressed area. As small businesses, we need affordable work spaces, living and places to sell our work. We attract other businesses, fresh interest and young homebuyers to our neighborhood and many times end up being forced out of the area due to increased rents or lack of work space. Our protected industrial spaces are critical to our livelihood.</p>	7/22/2018
6183	0.1	/topics/land-use-built-form/	<p>Do you guys realize that the "expensive" parts of the city will be significantly cost prohibitive for redevelopment as compared to less expensive (ie: linden hills vs. north east)</p>	7/22/2018
6184	52	/policies/human-capital-and-a-trained-workforce/	<p>Please be more clear about the extent to which programs that involve teens will be implemented through schools (like funding for STEM classes?) in partnership with schools (like StepUp), and/or separately.</p>	7/22/2018
6185	77	/policies/park-access/	<p>a.Coordinate winter maintenance of walking/bike paths, establish multi-directional bike trails and connections, eliminate mixed use paths by providing separated paths, establish Complete Streets hierarchy on park paths, eliminate laws regarding park hours to avoid biased enforcement of public right of ways necessary for walkability.</p> <p>b.Provide reliable and frequent public transportation to/on parkways, with frequent stops, to reduce car-dependency in accessing parks and park programming. Consider ADA accessibility of paths within parks. Fill sidewalk gaps along parks, including understanding how sight lines, lighting, and other features impact indirect paths. Design park paths that follow usage and desire lines of pedestrians, while still protecting tree canopy. Consider lack of water/restrooms to be physical barriers to park access that disproportionately impact already marginalized populations, including people who aren't cis-men, people coming from further away, those with disabilities, those who are elderly, and those caring for children. Provide year round access to these.</p> <p>c.Yes!</p> <p>d.Yes! Make pedestrian scale! Make year-round!</p> <p>Include and sign shortest-distance maintained paths (considering destinations like transit stops/commercial nodes/dense residential) across frozen lakes when safe in order to increase sense of place, celebrate winter, and provide reduce distance for walking/biking during cold weather.</p> <p>Consider reducing, limiting, and/or eliminating private motorized vehicles on parkways, in order to protect other modes from speeding vehicles, verbal harassment, and exposure to air/noise pollutions, and to decrease impervious surfaces and water pollution adjacent to waterways.</p> <p>Plan walking paths that are resilient in the face of climate change--if walking paths are directly adjacent to waterways or low-lying areas, create plans so that there are stable detours that do not involve mixed use paths; apply Complete Streets to flooding detours, rerouting to protect most vulnerable users per its hierarchy.</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/22/2018
6186	48	/policies/data-driven-decisions/	<p>This planning process is not following the "core principles of community engagement" in that it totally misses on "how was the feedback collected and analyzed?" Simply listing 300+ assorted word and phrases that supposedly came from the community and then claiming a summary of what it all means is totally not transparent or convincing. In the future we must do better: Give more detail about what those seemingly random feedback words were responding to and in what context and when, and show you how distilled it all down to your take-aways.</p>	7/22/2018
6187	1	/policies/access-to-housing/	<p>I think increased density is great. And I think as more housing is added, it's important to focus on making sure enough affordable housing is being added. Additionally, I think it's important to always consider the environmental impact.</p>	7/22/2018
6188	79	/policies/healthy-youth-development/	<p>This is a tremendously important section, and it's vague. If we're going to make some meaningful commitments to our kids, then let's be specific! After-school programs that will serve x number of students. Safe spaces for teens to just hang out would be awesome! One per neighborhood? Etc.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6189	0.1	/topics/land-use-built-form/	per the 10th wars meeting the city council acknowledged that upcoming has never worked and failed to identify where real world failures (Seattle, Portland, Fresno, LA) went wrong and what they would do differently. Essentially the city council members stated they knew it failed in EVERY instance but theyâ€™d figure it out in the fly. What a disaster	7/22/2018
6190	81	/policies/social-connectedness/	<p>a. Assess whether neighborhood associations fully represent their areas and whether the programs they provide and voices they elevate push for change that benefits or harms the most vulnerable and/or marginalized both within/outside the city.</p> <p>b. Use the public right of way as a fundamental public space; including meeting notices and signs not just for adjacent property owners, but target visual information to places where people walk and gather, including transit stops.</p> <p>Recognize the harm to community of multiple lanes of speeding traffic on community corridors; increase cross-corridor porosity, decrease traffic speeds to increase sense of community.</p> <p>Recognize walkable corridors where homes, businesses, and transit cluster, as the core of communities, rather than exteriors. Reorient city-supported neighborhood associations to places where people gather (community corridors, commercial/transit nodes, schools/parks, rather than centering them around the wealthiest and often lowest-intensity-of-use â€œinteriorsâ€) to allow natural commingling and walking to support community cohesion and city engagement</p> <p>Change city notification laws/policies for parity between renters and property owners, so that renters are not dependent on landlord intermediaries while property owners are notified directly by the city.</p> <p>Use neighborhood association-scale groups and funding to actively support goods and services that support walkability and transit dependency. For example, support repair/tool rental establishments at a scale that doesnâ€™t require car-ownership to access. Support rental of cargo bikes, moving carts, and other infrequently used & human scale items that can reduce car-dependency. Support carshare programs as well.</p> <p>Encourage neighborhood level groups to address, coordinate, assess, and ensure winter maintenance and sidewalk drainage related activities. Empower neighborhoods to reduce dangerous crossings, particularly on commercial corridors.</p> <p>Make sure neighborhood associations are not setting policies that worsen walking conditions nearby (e.g. reducing vehicle through traffic on a street of owner-occupied single family homes, thereby diverting this noise/air pollution to other streets with more marginalized residents).</p>	7/22/2018
6191	0.1	/topics/land-use-built-form/	The city is declaring war on tax payers.	7/22/2018
6192	0.2	/small-area-plans/	As I look at the plan in my area the encroachment of 3 to 4 story multi unit dwellings encroach right into single family homes. The charm and appeal of our neighborhood west of Minnehaha corridor is that it has always been zoned single family, even after the LRT development plan. I strongly feel the new plan is too aggressive in placing large dwellings into single family homes beyond natural busy corridors.	7/22/2018
6193	15	/policies/transportation-and-equity/	Cars and busses will continue to use existing city streets for years to come before any of the equity and emissions goals are realized. There seems to be no mention in the Minneapolis 2040 Plan to address how the city will deal with the current vehicular infrastructure. Driving urban streets is often tedious and dangerous due to heavy vehicular traffic and inadequate traffic signaling (left hand turns at four way signaled intersections . . . tighter lanes due to restriping for bike lanes. . . discontinuity in traffic patterns due to excessive construction, road and utility work) The 2040 plan needs to focus attention on how BETTER to facilitate bus, pedestrian, bike AND Auto traffic, and the coordination of the construction projects required to improve and maintain.	7/22/2018
6194	5	/policies/visual-quality-of-new-development/	Visual quality of new development should also include public art that is commissioned by a local artists. Minneapolis is famous for our arts, theater and music. We have Fortune 500 Companies located in our area. We have the largest sector of philanthropists in the nation. The NE Arts District is loaded with professional artists. Minneapolis - celebrate and nurture these priceless commodities!	7/22/2018
6195	0.1	/topics/land-use-built-form/	Positions keep their jobs by diving citizens. This 2040 plan does exactly that	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6196	83	/policies/people-with-disabilities/	<p>independent; ensure this access year-round. Do not mistake food delivery for the engagement and independence of being able to choose to go to a grocery store or restaurant.</p> <p>c. Ensure that people with disabilities have robust access to accessible housing in all parts of the city; prioritize land uses that provide accessible housing (the more, the better), particularly in areas of the city where these units are few or unavailable, or where the demand for any housing is high (as evidenced by housing prices). Increase land use intensity allowed by right to, at a base, the level of land use intensity that requires ADA accessibility as a default in homes/businesses, in order to make sure that individuals with disabilities have a greater likelihood of finding existing housing in all parts and all blocks in our city.</p> <p>f. Move beyond ADA compliance and consider actual needs for people with disabilities and the Deaf community. Design sidewalks in particular to support Deaf individuals engaged in conversation, or two people using wheelchairs as they walk side-by-side; make common community uses of public space accessible to disabled people. Reduce vehicle speeds to reduce associated noise pollution and its impact on hard of hearing community members.</p> <p>Include non-ADA disability supports within the design of public right of way--make sure that individuals with disabilities are not forced into car-dependency and/or isolation. For example, consider that many individuals may need to sit to rest periodically, or need reliable and predictable access to restrooms or water, or need reliable respite from intense heat or cold, or need shelter from rain or wind. Consider also the way the design of streets impacts those with disabilities or struggling with addiction in how it encourages or discourages vehicle speeds or reduces driver ability to brake for an individual in crisis or unable to accurately assess vehicle velocity/speed.</p> <p>WINTER: This needs to be a major portion of this policy. Recognize and deal with winter conditions in a way that prioritizes community members with disabilities. Recognize that there are varied needs depending on a community member's disabilities and that solutions must be equally robust. Prioritize winter maintenance, mobility, and wayfinding so that disabled community members are not forced into car-dependency or isolated from our community for months at a time.</p> <p>Recognize and address the ways in which our walking environment contributes to and exacerbates disability and isolation, from temporary or permanent disability from falls on uneven or icy/unmaintained sidewalks to injuries from grade changes at intersections to injuries/disability resulting from drivers, to being so dysfunctional/hostile/inhumane that individuals are forced into car-dependency and related health impacts.</p> <p>Ensure that individuals can expect accommodation for the devices that support their mobility and independence, whether wheelchairs, grocery carts, strollers, canes, walkers, bicycles, etc.</p> <p>Ensure that individuals with cognitive disabilities, vision impairment, etc. are included in our city's planning and wayfinding. Explore</p>	7/22/2018
6197	29	/policies/creative-sector-economy/	<p>Protect the NE Arts District. We live, produce, sell, interact with community through our art and contribute to the vibrancy of the NE neighborhood. We use local businesses and also attract people to local businesses here in NE. We strive to make NE Arts District a destination place. Help us!</p>	7/22/2018
6198	0.1	/topics/land-use-built-form/	<p>concerned citizens will band toget and fight this legally like Seattle residents did. This is an abomination of due process, and taxation without representation</p>	7/22/2018
6199	30	/policies/arts-and-cultural-assets/	<p>Protect our current infrastructure of old, industrial work spaces for artists. We need the look, the space and the reasonable rents to continue and succeed in our business of making art.</p>	7/22/2018
6200	1	/policies/access-to-housing/	<p>In reading of the debate over this plan, some describe opposition to the density proposals as founded in "fear", some going so far as to claim that expressed concerns about the plan are "anxieties tied to the populist, fear-driven politics now gripping much of the U.S. and Western Europe". Get a grip! Many of us who oppose the zoning changes already live in dense neighborhoods or those with diverse populations (or both). We don't "fear" others. We are troubled by blanket policies largely untethered to the neighborhoods they would impact. We question increased density in areas unsupported by transportation resources. We ponder the consequences of policies favoring young, single, able-bodied residents on families with young children, the disabled, the elderly. We challenge the premise that increased density will lead to any more affordable housing, or further any goal other than to line the pockets of developers. Labeling our concerns, questions, and arguments as "fear" does everyone a disservice. We care about our city and its future. We would like our city leaders to care about us.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6201	8	/policies/public-safety-through-environmental-de	<p>We support this policy. We request that it include reducing the impact of private motor vehicle traffic (and allotment of this space) on the safety of public spaces.</p> <p>a. We support "eyes on the street" and encourage the city to use land use guidelines to foster and increase how this functions. This includes increasing the number of homes and diversity of all blocks, to increase the likelihood of robust and varied "eyes on the street" regardless of time of day or season (e.g. areas where second-home ownership or frequent vacations is high have reduced "eyes on the street")</p> <p>b. Yes! And support more units and more uses</p> <p>c. And encourage a diversity of users and uses to increase sense of safety and ability to respond 365/24/7</p> <p>d. Couple this with increased intensity of land uses, so that individuals don't feel spotlighted or targeted, or lose night vision in case of intention or unintentional danger in less well lit areas.</p> <p>f. Consider that while some graffiti tagging is problematic, for those on foot, a changing visual landscape is often a positive; tagging often happens in areas that lack pedestrian interest or are otherwise hostile to people; work to change/intensify land use, activate the public right of way through more of the day/year, or support local dynamic and interactive art that provides the benefits of graffiti without associated issues.</p> <p>h. Consider the ways in which traditional policing creates hostile and dangerous public spaces for people of color, LGBTQIA+ people, and poor people. We support safety that is achieved by increasing and diversifying the presence of people, both inside and outside buildings, in the tradition of Jane Jacobs. We support creating public spaces and public right of ways that are not just routes to move through, but places to gather and connect.</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/22/2018
6202	17	/policies/complete-streets/	<p>We strongly support this people-oriented policy and its immediate and robust implementation in all aspects of city policy.</p> <p>We encourage the city to take the lead in educating external agencies who often determine so much around road use, including MNDOT, the Park Board, Hennepin County, as well as subcontractors and consulting firms who partner with the city,</p> <p>We encourage the Complete Streets policy to be implemented openly and transparently, using best practices and with input, feedback, and guidance from relevant advisory committees such as the PAC</p> <p>We encourage regular review of the implementation of the Complete Streets Policy, to understand better the nuances of its success and to guide it as it progresses</p> <p>We request that the City set specific funding goals around modal prioritization and funding. Given the near-total lack of data, we request that this at minimum represents each mode's share of commute, but with numbers reflecting mode goals based on city priorities. For example, if 13% of people walk to work, city funding specifically for pedestrian network improvements would be 13% + 5% of the city's transportation funding (since walking is a modeshare we hope to increase due to benefits/carbon neutrality).</p> <p>Use design-thinking and tools to work to remove car-centrism from the culture of PW, without blame or shame. Work to continue to relearn and rebuild a culture that supports and understands the needs and benefits of non-motorized transportation</p> <p>Encourage hyper-local designs to more quickly learn and share solutions around the city. Improve city capacity for requesting bumpouts, painted crosswalks, etc. Allow fluid and immediate solutions, particularly in areas that are known to be dangerous to those walking. Foster a culture of experimentation and work with City Communications to share the values this provides for our community. Work to integrate flexibility into street design to allow the city to respond robustly and seamlessly to increasingly unpredictable transportation needs as our climate crisis impacts our infrastructure in unexpected ways, from gas prices to an influx of residents to air inversions to urban heat island impacts from roads/highways/parking lots to flooded or icy streets. Design not just using best practices according to the Complete Streets hierarchy, but to allow us to quickly adapt to emergent contexts, uses, and technologies.</p> <p>We support point g., but we recommend the city, as a standard, does not apply for or accept MSA or other funds when they require road designs in opposition to the City's Complete Streets Policy.</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6203	0.1	/topics/land-use-built-form/	Interior Zone 1 regions are mostly made up of single family homes on small lots. The notion of allowing greater density in these zones (including 4 -plexes) will only burden the narrow streets that front these properties. Though most single family homes in these areas have ally garages, residents often park on the streets due to garage size or auto quantity, which leads to heavily parked streets. Winter conditions only compound the problem. A greater densification in these zones will only worsen the driving and parking problem by further taxing an infrastructure designed for a lower density population. The risk to pedestrian and cyclists will also increase with a higher concentration of vehicular traffic. Unless I missed it, the Minneapolis 2040 plan does not appear to address any focus on what to do with the city's existing vehicular infrastructure	7/22/2018
6204	31	/policies/creative-workers/	This is critical for our art businesses! Provide Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of artist studio and gallery space increases which then force artists out of the City. We get people visiting our studios and galleries from all over the country and internationally. This means better PR for Minneapolis and makes our city a desirable place to live and work. Invest in your artist small businesses and the arts production buildings to help us survive and thrive!	7/22/2018
6205	38	/policies/affordable-housing-near-transit-and-job-	Except in existing industrial production areas such as artist work buildings	7/22/2018
6206	0.1	/topics/land-use-built-form/	Interior Zone 1 regions are mostly made up of single family homes on small lots. The notion of allowing greater density in these zones (including 4 -plexes) will only burden the narrow streets that front these properties. Though most single family homes in these areas have ally garages, residents often park on the streets due to garage size or auto quantity, which leads to heavily parked streets. Winter conditions only compound the problem. A greater densification in these zones will only worsen the driving and parking problem by further taxing an infrastructure designed for a lower density population. The risk to pedestrian and cyclists will also increase with a higher concentration of vehicular traffic. Unless I missed it, the Minneapolis 2040 plan does not appear to address any focus on what to do with the city's existing vehicular infrastructure	7/22/2018
6207	54	/policies/supporting-economic-growth/	Improve existing properties and infrastructure. NE Minneapolis has a unique look. Help us maintain that flavor, save and improve on what we've already got going over here.	7/22/2018
6208	55	/policies/business-innovation-and-expansion/	Add preserving existing uses, assets and Art Districts.	7/22/2018
6209	1	/policies/access-to-housing/	If you are forced to water down this plan for single-family-home-owning naysayers, please, whatever you do, do not remove the plan to allow fourplexes city-wide. It's our best shot to increase density lightly, and add more homes for those who need them.	7/22/2018
6210	56	/policies/supporting-small-businesses/	Fouplexes ALREADY exist in every neighborhood. They are great. They make Minneapolis what it is. Please, please maintain that piece. Add artists to this section (Support the development and growth of small business and artists.) NE Minneapolis Arts District!!!	7/22/2018
6211	1	/policies/access-to-housing/	I am writing in strong opposition to this policy for the following reasons: (1) There is no evidence that constructing 4-unit rental buildings in single-family neighborhoods will do anything to improve affordable housing options, (2) this policy will result in the removal of the most affordable owner-occupied housing, (3) the quality of life will be reduced as these 4-unit buildings will be managed by absentee landlords, and that fact the 4-units buildings are out of character with neighborhoods that are largely comprised of single-family housing, (5) this policy will result in the concentration of affordable rental housing in certain neighborhoods which are neighborhoods where the single-family housing that is most affordable will be acquired.	7/22/2018
6212	1	/policies/access-to-housing/	I am in support of most part so of this plan. I strongly oppose part D. Well- connected, single-family neighborhoods should continue to be a housing option for residents. Intermixing multi-family homes into these neighborhoods eliminates that housing option. I currently live in a single-family neighborhood and have lived in neighborhoods with multi-family homes (as BOTH a multi-family dweller and a single-family dweller) and can tell you first hand the social connectedness of neighborhoods with and without multi-family homes is very different...from what I have witnessed the difference stems from state of mind (Is this where i live now? vs Is this my home long-term?). Well-connected single-family neighborhoods are something to be cherished and preserved. Our neighborhood is becoming increasingly diverse in many respects (race, sexual orientation, country of origin) under current zoning. Socioeconomically? No. However, there are numerous other elements of this draft plan that address this. FYI - I support an affordable housing development 1 block from my house. It's the hyperlocal, home-to-home social connectedness that I want to protect. continuity	7/22/2018
6213	58	/policies/business-districts-and-corridors/	Support the existing Arts Districts. Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement. NE Minneapolis Arts District!	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6214	81	/policies/social-connectedness/	Support the existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community. *Preserve existing buildings. We have weekly, monthly and several times a year, art events, interactive creative projects for community. All free. We invite and openly interact with our community on a regular basis. They are thrilled to have us in the neighborhood and tell us all the time!	7/22/2018
6215	15	/policies/transportation-and-equity/	More bus rapid transit service please! In addition to equity, I wish this policy went further to prioritize transit projects whenever major arterial streets are being reviewed.	7/22/2018
6216	16	/policies/environmental-impacts-of-transportation/	In order to advance the city's environmental goals through transportation, the city must also pursue policies that (1) reduce subsidies for car ownership; (2) reduce distances between trip destinations through infill, complete neighborhoods, and reducing the amount of space dedicated to car storage; and (3) internalize historically externalized costs of car trips, recover those costs to the extent possible, and use funds generated to fund and build infrastructure for more sustainable modes of transportation.	7/22/2018
6217	1	/policies/access-to-housing/	I believe that density in Minneapolis needs to increase, but the zoning change proposed in this plan is not the way to do it. Specifically, I am concerned that changing zoning from neighborhoods that currently have single-family houses to allow three- and four-story multi-unit buildings will create inorganic growth that will destroy the character of many historic neighborhoods. Developers will knock down houses -- many of which are over a century old -- to build modern, ugly and cheap buildings that loom over neighboring single family homes. Furthermore, what is to incentivize -- or even enforce -- that these new buildings become affordable units versus the luxury apartments and condos that are popping up in Southwest Minneapolis? More density does not equate automatically with affordable housing!	7/22/2018
6218	0.1	/topics/land-use-built-form/	I am opposed to blanket upzoning. No city has done it right yet and the transportation infrastructure isn't developed enough to not have parking requirements. I'm not sure why the city wants to replace what has made it desirable in the first place. I would support condo units at transit hubs.	7/22/2018
6219	16	/policies/environmental-impacts-of-transportation/	YES - THANK YOU for prioritizing transit & bicycling over single passenger automotive traffic. This is a long time coming. It will be hard, but it will benefit us all in the long run. I applaud this policy, and hope it is not watered down by those who wish to put their head in the sand and maintain the status quo.	7/22/2018
6220	48	/policies/data-driven-decisions/	Data driven decisions also means not weakening comprehensive plan policies in response to misinformation spread by plan opponents, no matter how widely believed or how loudly repeated.	7/22/2018
6221	1	/policies/access-to-housing/	Increasing density in both the downtown core and the interiors farthest from downtown makes a lot of sense. Specifically, allowing up to a 4-unit building anywhere in the city, should the owner desire it, is a fantastic policy to increase the housing supply. I live in a 4-unit condo now and it's the only way I was able to find a starter home in Minneapolis. Single person households should also have available housing across the city.	7/22/2018
6222	1	/policies/access-to-housing/	Policy (d) is important and should not be weakened or removed in response to public clamor based on misinformation. City policies must be based on facts, not unfounded anxieties. If city officials weaken draft policies to appease misinformed critics, they will necessarily undermine the goals that the City adopted to underpin this comprehensive plan, perpetuate historic inequity, and repeat the error of embedding the interests of the wealthy and well-connected at the expense of citywide equity. People who are loud can also be wrong, and misinformed passion should not override fidelity to the goals of this plan. and should not inform city policy.	7/22/2018
6223	14	/policies/tree-canopy-and-urban-forest/	This policy is critical in supporting environmental and resiliency goals. Trees provide shade, stabilize soil, provide oxygen and clean the air. We need to preserve mature trees. When they are removed for development, they should be replaced with large trees perhaps at a proportion like 3 new trees for every one taken. Also, trees could and should be planted on both sides of the freeways and major roads.	7/22/2018
6224	73	/policies/stormwater-management/	Do not give developers variances from stormwater management requirements.	7/22/2018
6225	1	/policies/access-to-housing/	I strongly support this proposal for increased density, housing diversification, and zoning changes. In order to have a successful, healthy, thriving community we need people to be able to afford and have access to housing near food, jobs, and school.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6226	15	/policies/transportation-and-equity/	<p>Searching Parkway in the 2040 plan yields no results. That is telling in that parkways are neglected recreational and transit routes which need to be included in the 20 year streets plan. At this time, the annual budget for parkway repair does not take into consideration the needed reconstructions especially north of 94 and 394. This should be reviewed as an equity decision based upon the condition contrasts. Parkways such as Stinson Parkway and around Lake Harriet are wide enough to allow for striped bike lanes without removing parking. These are commuter routes and the narrowing of the drive lanes to 11' or less would also promote traffic calming.</p>	7/22/2018
6227	1	/policies/access-to-housing/	<p>Notwithstanding some popular beliefs, preserving a neighborhood's "single family home" character does not preclude neighbors from renting out their property; conversely 2-4 multi-unit dwellings does not preclude them from being owner-occupied. Changes to draft policies premised on conflating the benefits of owner-occupation with whether or not a property is a SFH would be a mistake. Preventing additional multi-unit dwellings from being built absolutely DOES NOT do anything to deter property owners from becoming absentee landlords.</p> <p>Assuming owner-occupation is valuable, then additional policies should be adopted to encourage and incentivize it, even and especially for multi-unit dwellings.</p> <p>Lazily conflating the number of residential units with whether a residential property is owner-occupied is an error and should not be a foundation of land use policy.</p>	7/22/2018
6228	17	/policies/complete-streets/	<p>This is awesome. Thank you, full support.</p> <p>However, I know this overarching Policy has been in place since 2016, but doesn't always feel like it actually gets implemented. 3rd Ave downtown -- Complete Streets was thrown out the window. We have so few broad sidewalks & protected bike lanes. Why? We throw them out the moment a single business owner gets upset. I would like to see more "innovative methods" (per action step 17f) -- can we test a protected lane with cheap planters or a wider walkway via sidewalk extenders for a few weeks before we make actual changes to paint/roadway/curbs/concrete? Running tests could help show/prove the value of these opportunities for our streets.</p>	7/22/2018
6229	33	/policies/affordable-housing-production/	<p>None of your upzoning policies support the goals for affordable housing. Instead they follow the model of pricing out low income residents by demolishing affordable housing stock and replacing it with condos that fill the entire city lot and raise the home value across the city to the point that it is unaffordable for 3/4 of the population. On top of the unaffordability the historic houses are in threat of being demolished which will forever alter the face of this city and further erase and degrade the character and local culture of Minneapolis. In its place you will have terribly built buildings that aren't worth more than the pallets their materials were shipped in on. They will not last past one good economic downturn before these buildings themselves will become demolished. The only upside is that an empty lot will look better than the shoddy and mold prone construction that is going on today in so many of Minneapolis's quickly constructed multi storied filing cabinets</p>	7/22/2018
6230	0.2	/small-area-plans/	<p>The small area plans need to be much more detailed and visionary. How are citizens supposed to advocate for great developments if the small area plans do not provide stronger visions. There should be implementation plans, key items/fixes to devote money too, renderings, and funding strategies.</p>	7/22/2018
6231	49	/policies/educational-and-economic-access/	<p>Focus on raising the overall quality of education for all students in order to attract and keep families in Minneapolis Public Schools. The City could work in a positive way with the School Board.</p>	7/22/2018
6232	78	/policies/park-design-and-programming/	<p>The Grand Rounds missing link needs to be called out specially as a specific goal. 20th Century efforts couldn't get it done. Maybe it can happen in the 21st.</p>	7/22/2018
6233	84	/policies/public-safety/	<p>Let's work on trying to figure out how we can reduce the number of police we have as opposed to continually increasing budget and thinking more police are the solution. What would need to happen if we only had 1/4th of current police force. Let's quit criminalizing the poor, mentally challenged, addicted and rather help them. Change out police budget for social service helpers. Work with churches and neighborhood groups to make this a reality.</p>	7/22/2018
6234	1	/policies/access-to-housing/	<p>I am suspicious of fourplex zoning. I don't think it contributes to your goals like you think it would. I think the future will include more multigenerational families in houses. I also think giving developers carte blanche on established neighborhoods is a terrible idea. It certainly won't make things more affordable. Plus, what they will build will never have the quality of an early 20th century home.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6235	9	/policies/open-spaces-in-new-development/	The Grand Rounds missing link needs to be called out specially as a specific goal. 20th Century efforts couldn't get it done. Maybe it can happen in the 21st.	7/22/2018
6236	50	/policies/access-to-technology/	Ensure security of our city's information infrastructure against infiltration and attacks.	7/22/2018
6237	0.2	/small-area-plans/	So the small area plans just turn into a zoning map? Where is the vision for different areas? What do we want our transit oriented development areas to look like? What needs to be done in areas that have not seen high quality development (hi Lake)	7/22/2018
6238	5	/policies/visual-quality-of-new-development/	I support this policy. High quality design is not only attractive, but also is good for mental, physical and emotional health.	7/22/2018
6239	6	/policies/pedestrian-oriented-building-and-site-de	Yes, yes, yes! 100x over. We NEED to be prioritizing people walking.	7/22/2018
6240	42	/policies/expand-homeownership/	Why is the word "condo" missing from this entire document? Ownership in multifamily units is a FANTASTIC way to promote ownership overall -- multifamily ownership can be made much more affordable than single family, and it's a great way to promote the kind of density and complete neighborhoods we need. Please revise this in the next round -- and quit pitting people in the city as "single family homeowner" vs. "multifamily renter." The language use in this document reinforces this (bad) narrative -- many millennials, including myself, WANT to buy a multifamily unit because we simply don't want the space, yard, maintenance, lifestyle, etc. of single family living. It also ignores the huge waves of baby boomers who are choosing to purchase condos and downsize as empty nesters.	7/22/2018
6241	7	/policies/public-realm/	Love and support this policy recommendation. Please also add language around allowing neighbors to take action in improving the public realm in their neighborhood. Allow them to apply for funds and/or assistance for implementation.	7/22/2018
6242	1	/policies/access-to-housing/	I agree with the zoning directions set forth in the 2040 plan. I hope it provides a plan for persons to own affordable housing.	7/22/2018
6243	34	/policies/affordable-housing-preservation/	Please look at the number of AirBNB units listed in Minneapolis. I'm not referring to single rooms in a residence, there are a staggering amount of houses, ap	7/22/2018
6244	8	/policies/public-safety-through-environmental-de	Please add language around removing and restricting hostile public spaces (spikes on possibly seating, uncomfortable benches, etc.)	7/22/2018
6245	9	/policies/open-spaces-in-new-development/	Can we also add requirements on public spaces inside buildings?	7/22/2018
6246	1	/policies/access-to-housing/	This plan would only intensify more low income renters in my north Minneapolis neighborhood. We have enough livability issues without adding more. Every developer would see this as an opportunity for them to destroy affordable single family houses and build four plexes without any off street parking only to drive away long term homeowners like me. Believe me there are lots of beat up cars here and very few bicyclists. If you think it's a good idea why not try it in the nicest area of Minneapolis like southwest first to see if it does really make things affordable and everyone enjoys four plexes then bring it to the rest of Minneapolis. I'm curious how many working on the plan live in north Minneapolis my guess is none.	7/22/2018
6247	66	/policies/air-quality/	All I see in this plan is reduce reduce reduce eliminate. I need to see the goal of adding green space. In Mexico city a very large portion of the urban area is wetlands and organic farms. If that green space in Mexico City were lost or reduced or eliminated due to development the average temperature in the city would rise 35 degrees Fahrenheit. One can imagine what the resulting CO2 contribution would be. If we reduce or eliminate green space in every city lot, continue to cut down every mature tree and replace it with "affordably constructed" developments that happen to allow no room for green space on the entire lot this city will become even more unbreathable. The air quality warnings will increase and the livability will have been sacrificed for a few developers who have made so much money off of Minneapolis that the city's livability is of no concern to them in their maturely treed estates of Minnetonka and beyond.	7/22/2018
6248	11	/policies/skyways/	Require all future buildings to make skyway commercial space have two stories with ground floor access.	7/22/2018
6249	11	/policies/skyways/	Better wayfinding with the skyways. Better understanding on how they operate, etc. Can you walk your dog in the skyways?	7/22/2018
6250	58	/policies/business-districts-and-corridors/	Ensure that business districts are clean and safe. Require property owners to keep their buildings and spaces free of litter, graffiti and other negative visual impacts, and require them to keep up their landscaping.	7/22/2018
6251	58	/policies/business-districts-and-corridors/	Encourage robust communities within business corridors to enhance vibrancy, satisfaction, and safety.	7/22/2018
6252	12	/policies/lighting/	Using lighting as a way to create a sense of place. Use hanging twinkley lights everywhere. So cheap and easy but HUGE impact.	7/22/2018
6253	1	/policies/access-to-housing/	I do not support any form of increased / denser housing activities in Minneapolis this crazy idea will just hurt the city of Minneapolis. This will have a negative impact on single family residential homes neighborhoods to our the city core Tax payers!!!. Additionally, the city has enough low income housing which just brings problems and ore crime into our city and this vision must be stopped!!! The number of resident in Minneapolis is at an acceptable level and we do not need more residents via denser housing!!!	7/22/2018
6254	13	/policies/landscaping/	There should be language in this policy around requiring for green stormwater infrastructure.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6255	0.2	/small-area-plans/	Without small area plans, what tools will residence have to advocate for great transit oriented developments in Minneapolis? Not all developers really care about doing great projects.	7/22/2018
6256	1	/policies/access-to-housing/	It seems to me that you need to engage with first tier suburbs as well. Minneapolis cannot be the only city that absorbs population growth or addresses disparities. Edina, Bloomington, Richfield, and St Louis Park needs to play its part. Permitting more dwellers in existing homes seems to be the first logical step, rather than transforming current single family housing communities to allow 4 plus story buildings. I live on Lyndale Ave in an area that has traditional homes and duplexes as well as apartments. We are diverse, we have diverse housing already. Affordable housing actually starts with PROPERTY TAXES, which are incredibly high. This is the highest line item budget (adjusted per month) for me after my mortgage payment. Can you imagine that? Higher than insurance of any type, utilities, groceries, etc. If you consider that, then you understand why most people cannot afford to live in Minneapolis, and why most landlords cannot afford to offer lower rents. Perhaps the city should consider other means for raising revenue. Perhaps the city should consider cutting the fact from administration, middle management, etc., not in schools or services - I certainly do not feel I get adequate services in Minneapolis for what I pay for. Has anyone ever looked at redundancy? Efficiencies? If the city were run like a business, we could cut admin staff without impacting schools and services. Then we could keep taxes lower and more people could afford to live here.	7/22/2018
6257	1	/policies/access-to-housing/	Will these changes add to the availability of affordable housing throughout city neighborhoods? It seems likely that they would encourage speculative redevelopment for more high rent high cost housing in desirable neighborhoods. Is there any safe guard against this outcome?	7/22/2018
6258	14	/policies/tree-canopy-and-urban-forest/	Provide guidance to residents on tress planting. Provide access to grant funding for tree purchasing and planting.	7/22/2018
6259	44	/policies/comprehensive-investments/	Does "wealth-building housing models" mean home ownership? Because that would be good for everyone, but the Land Use section of this plan seems to prioritize creating opportunities for large developers to build rentals.	7/22/2018
6260	15	/policies/transportation-and-equity/	I strongly support this policy recommendation.	7/22/2018
6261	16	/policies/environmental-impacts-of-transportation/	I strongly support this policy.	7/22/2018
6262	34	/policies/affordable-housing-preservation/	The city needs to review its policies on AirBNB rentals. There are an incredible amount of housing that is unavailable for rent because owners have turned them into short term rentals. I would support a huge tax increase to help mitigate their effect on renter displacement. I personally know of two duplexes and two houses in my neighborhood that are now AirBNB. That's five families that aren't getting housing.	7/22/2018
6263	67	/policies/climate-resilient-communities/	In a climate resilient community you would have urban agricultural production happening in acres of green space that was accessible to all parts of the city. You would allow hoop houses to happen year round and you would not ignore and discourage the efforts of urban farmers contributing to carbon sequestration, and green space. You would protect the green space they cultivated from becoming developed at will and a percentage of the city's available land would be permanently set aside for year round food production that would be able to withstand any disruption in food distribution. You have done none of this. Change course if you want a climate resilient community. If not quit plagiarizing this talking point.	7/22/2018
6264	67	/policies/climate-resilient-communities/	Thank you for including carbon sequestration in soils as a policy. Could you also include an educational effort for citizens as to what they can do in their lawns, gardens to sequestor/draw down carbon as well as supporting farmers who practice this type of agriculture. This has been an underutilized strategy that could have a significant impact and it's good for more nutritious food, helps pollinators and supports storm water management. And..... everybody can participate!	7/22/2018
6265	2	/policies/access-to-employment/	What incentives is the city planning for attracting and keeping larger businesses (who employ 10+ employees)? Seems to me this is the first place to start. Why didn't the city plan for a light rail line to go down 35W, now that it is being torn up? Seems like a wasted opportunity. Why wouldn't Minneapolis do more to encourage green transportation like light rail instead of black smoke buses? We are at an all-time lowest unemployment rate since the 1960s - I have a hard time believing that we have people who are not working, because if they are not working then we need to understand the root cause of why given the unemployment climate. The Minneapolis Economic Development Committee needs to figure out why jobs are not going to its residents. We provide special Metro Mobility buses for the handicapped, why couldn't there be special buses for transportation to the largest of employers at discounted rates?	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6266	2	/policies/access-to-employment/	Most business are moving out of Minneapolis due to high taxes and/or people who do not want to deal with downtown parking/access. I think the City of Minneapolis need to stop wasting tax payer dollar to grow business in downtown areas and focus on maintaining business in the city. AS a Tax payer I am NOT willing to supplement business in Minneapolis with my tax dollars!!! Most of the jobs the city is trying to create are low income type position and this does not help the city. Any job growth should focus on high tech/high income type job position which will raise quality of our City. Also, Any and all business should be self sufficient and not require Minneapolis financial supplimant in and form!!!	7/22/2018
6267	0.2	/small-area-plans/	Without small area plans, what tools will residence have to advocate for great transit oriented developments in Minneapolis? Not all developers really care about doing great projects.	7/22/2018
6268	6	/policies/pedestrian-oriented-building-and-site-de	This just create a significant overhead on Building/business that will hurt out city!!! The Minneapolis 2040 should have NO changes to what is currently in place in this area!!!	7/22/2018
6269	66	/policies/air-quality/	Traffic congestion reduces vehicle miles traveled but increases emissions. Until we have emissions-free vehicles, we should strive to reduce the time vehicles idle in traffic, at stop lights, etc.	7/22/2018
6270	17	/policies/complete-streets/	Add language around training city staff. I work with TONS of city employees (engineers in transportation dept.) who vocally talk about how much they hate bicyclists, think no one walks in MN, and only poor people rely on transit. They admit to prioritizing cars. Also, please fix LAKE STREET. It's such a vibrate corridor that has been ruined by poor street design, angry drivers, unsafe environment for people (walking, biking, etc.), and no enjoyable public realm.	7/22/2018
6271	7	/policies/public-realm/	The Minneapolis 2040 should have NO changes to what is currently in place in this area!!! This will hurt the city of Minneapolis!! Please stop this stupidity to hurt or city and force extra cost on residents!!	7/22/2018
6272	1	/policies/access-to-housing/	The unique character of Minneapolis's™ neighborhoods is what truely makes this city a great place to live. Allowing developers to buy and convert single family homes to multi family complexes in the interior parts of our neighborhoods will ruin this beloved aspect of the city. I completely understand that we need our neighborhoods to evolve as the population continues to grow, but there has to be a better way to do it. Give each neighborhood a growth target, and let each of them figure out a plan to hit it in a way that will keep the integrity of the neighborhood charachter intact.	7/22/2018
6273	40	/policies/homelessness/	Health insurance access needs to be expanded to part time earners - how many people are homeless as the result of one medical emergency that they could not afford, creating a spiral that ends in homelessness? Some people cannot get jobs that are full time and offer health insurance. They may also be low wage and unable to afford it in the marketplace, or have the resources/information to know how to get it.	7/22/2018
6274	19	/policies/bicycling/	Where is an updated bicycle map showing how the system could continue to expand? What about looking at more Greenways or bicycle/pedestrian only streets?	7/22/2018
6275	0.1	/topics/land-use-built-form/	I would anticipate and outflow of the populous to first tier suburbs based on this plan. When that happens the population growth this plan tries to accommodate with be a zero factor, and you will have eroded your taxable base by chasing away high income professionals and also decreasing property values. Well done, city council!	7/22/2018
6276	0.1	/topics/land-use-built-form/	The assumption that building additional 4 plexs will increase affordability is questionable. I have owned a four plex both as non- owner occupied and later a owner occupied. Owning income property is a business, just like any other business. If expenses and taxes increase rents will increase. If it is not owner occupied it will not be maintained a well as owner occupied. I recommend 4 plexs in urban neighborhoods be required to be owner occupied, or at least owner occupancy should be incentivised. Also, in looking at my neighborhood, property valuations are increasing much more rapidly on duplexes and other income property than on single family homes, resulting in increasing rents to subsidize single family homes. Property values for this year went up by as much as 10% on income property, while remaining the same on single family homes. This favors single family properties at the expense of renters and landlords.	7/22/2018
6277	4	/policies/access-to-commercial-goods-and-service	I would require that any new residential building that goes up with more than 2 stories must have retail on the bottom floor. This will means more grocery stores and other stores within walking distance from area residents. "More than a mile" is a sad distance to quote. We should be encouraging residents to be healthier, and walking/biking or carpooling more than a mile there and back shouldn't be a standard.	7/22/2018
6278	14	/policies/tree-canopy-and-urban-forest/	What about more green streets, where more of the right of way is given to planting trees. For example, look at Milwaukee Avenue right here in Minneapolis.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6279	16	/policies/environmental-impacts-of-transportation/	We should be fighting for effective, creative, future-oriented transit for ALL of our city. Minneapolis could easily have the best low-emissions transit system in the world for the cost of one light rail line. I know people like trains, but the planned route for SWLRT, for example, pretty much avoids Minneapolis -- especially areas where diverse and lower-income people live -- and uses our green space to do so.	7/22/2018
6280	11	/policies/skyways/	The greater Minneapolis resident not have to fund the downtown sky ways!! I do not utilize down town areas due to difficult, expens and safty concerns for down town area and I do not want NOT have any of my tax dollars fund the Downtown area and/or skyways!!! The city of Mineapolis should have NO changes in this area from what is in place today!!!	7/22/2018
6281	25	/policies/innovations-in-transportation-and-infras	Interested in making room for electric personal mobility devices. This may mean having an adequate minimum width for "bicycle" lanes. Change name of "bicycle" lanes, maybe "no car" lanes. The city should proactively regulate the use of these lanes, maybe vehicles under a certain width, speed and size of motor. I would consider a increase in the number of electric wheel chairs, visible throughout the city, as a sign of success.	7/22/2018
6282	18	/policies/walking/	In addition to what is written above, please add something around neighbors being able to take matters of street/ped safety in their own hands. Allow for them to apply for funds for traffic calming, street art, etc.	7/22/2018
6283	16	/policies/environmental-impacts-of-transportation/	This MUST self sufficient for costs and must not be supplemented with resident tax dollars. This this can not be self-sufficient and requires financial supplement then this MUST not be down. Minneapolis MUST stop all these useless give-away programs!!!	7/22/2018
6284	19	/policies/bicycling/	Encourage use of creative, less expensive ways of creating safe bikeways (using DeziignLinez, etc.). Please also write in beautification as a way of creating bikeways (planter protected bike lanes). Slowing traffic should also be the number one way we create safe places for people to walk and bike.	7/22/2018
6285	5	/policies/visual-quality-of-new-development/	this is one place where Minneapolis has failed. Other cities have strict requirements for quality and standards, regardless of whether it will force builders to spend more money to build here. Penny wise, pound foolish if we let builders get off cheaply, and it will end up hurting lower income residents the most! What about considering the environment in these requirements? Other progressive cities are requiring white roofs or roof garden plots to reduce overheating which can impact climate change - I notices one of the other policies is to reduce car for greenhouse gas, so why not start requiring our buildings to meet all the well known methods for environmental friendliness. https://e360.yale.edu/features/urban-heat-can-white-roofs-help-cool-the-worlds-warming-cities https://www.scientificamerican.com/article/cool-roofs-might-be-enough-to-save-cities-from-climate-overheating/ Why not engage with the state of Minnesota to enforce something like what the California Air Resources Board requires for cars on the road? Or why not require that cars of Minneapolis residents get emissions testing every 3 years. I can think of many ways in addition to housing design requirements to address the specific goals of the overall policies the city is seeking to achieve.	7/22/2018
6286	33	/policies/affordable-housing-production/	Action Step A.... increasing affordable housing across the city is extremely important. It seems that the resistance to production of affordable homes (the welcoming element) increases proportionally to the wealth of the neighborhood. PLEASE don't let that pressure keep affordable housing from being proportionately distributed. The plans seem to be showing a disproportionate amount of apartments and affordable units being placed in the working class neighborhoods and are concentrated along the corridors. Please spread out the concentration across the city to prevent pockets which give the impression of dispersement. You can increase bussing and light rail through less served areas (higher income areas) to make those areas more navagateable for everyone. Neighborhoods, schools, crime, businesses will benefit from true dispersement of affordability. Sincerely, Karen Nyhus Minneapolis resident of 25+ years Teacher/SLP Social justice believer Neighbor	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6287	20	/policies/transit/	<p>Increase the speed at which we implement BRT including adding BRT to Lake Street (and doing a 4-3 lane conversion).</p> <p>Also, please add language around placemaking at transit stops (they're so dang unappealing right now). Encourage things like reading stands, interactive art, coffee vendors, walk-up bakery windows, idea generating boxes, tables and chairs, etc.)</p> <p>Bus only lanes, especially during peak hours.</p>	7/22/2018
6288	25	/policies/innovations-in-transportation-and-infras	<p>Resident must not need to supplement this this transportation BS!!! This is light utilize for the required cost to build/create and this does not make good business sense!!! Stop this stupidity!!! This is too expensive and is NOT financial self-sufficient and I do not want to supplement costs for this Bad economic decision !! As a resident of Minneapolis I do not want to supplement cost for these excessive and wistful transportation visions!!!</p>	7/22/2018
6289	15	/policies/transportation-and-equity/	<p>Advocate for widespread, forward-thinking transit for all of our citizens. The City has not opposed concentrating limited transit resources on expensive fixed rail routes that serve few lower-income areas. Meanwhile, we have not advocated strongly enough for BRT routes, such as along the current #5 route from Brooklyn Center to the Mall of America or the #21 along Lake Street -- both proposed years ago and nothing has happened.</p> <p>Experience elsewhere shows that when transit budgets get cut, it's not the rail service that goes -- it's the buses that serve neighborhoods. In many US cities, bus riders have formed advocacy groups to fight this inevitable impact. In Minnesota, Metro Transit has forecast a \$110 million operating budget deficit next year, while Hennepin County spends billions on light rail. Equity?</p>	7/22/2018
6290	68	/policies/energy-efficient-buildings/	<p>It's time to get serious about climate action. We must be much more aggressive. The city should commit to a carbon neutral goal by 2050. The reality of climate change and associated impacts is clear, and backed by science. A commitment to carbon neutrality will strengthen our local economy through job creation and reduce vulnerability for residents and business alike.</p>	7/22/2018
6291	21	/policies/freight/	<p>Only allow for platooning on interstates and non-urban highways.</p>	7/22/2018
6292	44	/policies/comprehensive-investments/	<p>Create attractive, positive, aesthetic amenities in areas of the city that need them.</p>	7/22/2018
6293	1	/policies/access-to-housing/	<p>I am a Home Owner in the Victory neighborhood and I say NO to e. duplex, 3-unit, 4-unit since the dwellings on Lake drive currently have 3&4 cars in the lots so NOT taking the Metro Transit. I am a new home owner and Appreciate the Charm of Community not Rentals- More Home Owners!</p>	7/22/2018
6294	22	/policies/downtown-transportation/	<p>Do a better job of re-training your engineers.</p>	7/22/2018
6295	1	/policies/access-to-housing/	<p>I am a Home Owner in the Victory neighborhood and I say NO to e. duplex, 3-unit, 4-unit since the dwellings on Lake drive currently have 3&4 cars in the lots so NOT taking the Metro Transit. I am a new home owner and Appreciate the Charm of Community not Rentals- More Home Owners!</p>	7/22/2018
6296	1	/policies/access-to-housing/	<p>While the goals of the plan are laudable, many details would fundamentally and negatively change the neighborhood character of our city. Allowing unlimited multiplex housing and without offsite parking and overriding neighborhood development plans in primarily single family residential zones will both homogenize as well as reduce the beauty and value of such areas. I'm extremely opposed.</p>	7/22/2018
6297	22	/policies/downtown-transportation/	<p>I support this policy - make implementation easier and faster!</p>	7/22/2018
6298	6	/policies/pedestrian-oriented-building-and-site-de	<p>This is ironic since much of Lyndale Ave is devoted to auto type businesses, gas stations, repair shops, etc. Why not require builders to have underground parking instead of side parking? While I agree that we must prioritize pedestrian walking, I wonder how many residents we will be able to accommodate without adequate space for a vehicle. The reality is that our harsh climate, particularly in the winter, is not conducive to modes of transportation like walking or biking great distances (although I do see people biking in extreme cold weather). I see too many empty buses at various times of the day, so while we can encourage bus use, I think it contributes to pollution and traffic congestion at times when they are not in use or popular use. The transportation system needs an overhaul in that respect. And why did Mpls take out the trolley car system? Why wouldn't we make use of existing rail lines for transportation options going forward? Has Minneapolis considered buying land from neighboring suburbs in order to accomplish some of the many goals it has in the 2040 plan?</p>	7/22/2018
6299	33	/policies/affordable-housing-production/	<p>Stop this denser population BS for affordable house!!! This will hurt local residents and lower value for existing housing!!This will also make it more difficult for resident the live next to this denser house, for parking. I believe this will bring more crime, problems and create a significant financial burden on current residents for police/fire, problems and lower housing values!! remove this as a Minneapolis vision!!!</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6300	24	/policies/shared-mobility/	Allow for the city to innovative and creative with shared use mobility - encourage demonstration and pilot projects.	7/22/2018
6301	68	/policies/energy-efficient-buildings/	Regarding 68.c - A 20 year plan should include action steps beyond "investigating". The plan should "investigate, pursue and implement" decarbonization for heating and industrial energy needs.	7/22/2018
6302	24	/policies/shared-mobility/	I support this policy.	7/22/2018
6303	35	/policies/innovative-housing-types/	Minneapolis, must stop all the stupid housing BS. WE Do not need more resident with Denser populations which is an has been hurting the City. I think the city should focus on High income house that is financially self sufficient and that raise local area property values!! this idea will just hurt local area values and must not be done!!!	7/22/2018
6304	26	/policies/vision-zero/	I fully, fully support this policy. Work to retrofit our streets to make them safer. Make internal training and hiring a big part of this change with the city.	7/22/2018
6305	7	/policies/public-realm/	I put climate change responses in prior section comments, but requiring roof top gardens for new builders - as other countries do -- or white roofs for any new building or replacement roofs -- as other US cities do -- would be a first step. Maintaining and repairing sidewalks instead of requiring residents to do it might also be a good and simple way to accomplish this goal.	7/22/2018
6306	1	/policies/access-to-housing/	The people most opposed to this plan are privileged and don't realize not everyone has access or their luck. Owning is not an option for a lot of people. Design a city that gives renters who are mainly POCI more choice and affordable housing options. These loud voices have had policies help them, let's help others now. Don't be drowned out by their fearmongering let's be hopeful and improve this draft plan. This isn't a giveaway to anyone, as these same people profit when they sell their homes at market rate. It's not like they're selling at below market rate. We need more housing in every single part of the city stop putting all the development in certain areas. Spread it out. We'll be fine, everything will be fine.	7/22/2018
6307	0.1	/topics/land-use-built-form/	People want to live by those similar to them (and I do t mean race). Families donâ€™t want to live next to frat houses. Retirees probably donâ€™t want to live in uptown. A forced change like this would send people from all walks of life fleeing.	7/22/2018
6308	28	/policies/msp-airport/	I suppor this policy. Especially around having bicycling access to the airport! Also, please have a service where people can temporarily leave their boots, coats, hats, etc. when they travel in the winter months to somewhere warm.	7/22/2018
6309	37	/policies/mixed-income-housing/	I do not support mixed income housing!!! WE have to much low income housing that has hurt our neighborhoods. This will bring crime and raise resident cost (i.e. extra Police/Fire costs) This should NOT be done and should be removed as a Minneapolis 2040 Goal!!!	7/22/2018
6310	39	/policies/fair-housing/	This Must be removed as a 2040 mineapolis plan. This should not change from What Minneapolis has today!!!	7/22/2018
6311	29	/policies/creative-sector-economy/	I support this policy.	7/22/2018
6312	30	/policies/arts-and-cultural-assets/	I support this policy. Create a sustainable funding model.	7/22/2018
6313	46	/policies/healthy-housing/	This should NOT change from what Minneapolis has today. Please remove this from Minneapolis 2040!!!!	7/22/2018
6314	8	/policies/public-safety-through-environmental-de	Sounds good, do we have studies to show what works?	7/22/2018
6315	35	/policies/innovative-housing-types/	After 15 years of living and working in New York City, we recently returned to the peace of Minneapolis. We were very happy to find a home in the diverse, sfh neighborhood we lived in previously. I am opposed to the proposal to allow multi-unit buildings on small city lots. I believe my objections apply to much of the city, not just sfh neighborhoods. Without strict guidelines, developers are likely to throw up any structure with no consideration of blending with the neighborhood. Even if the transit system magically improves, people will want cars. (Hauling bags of groceries on the subway or bus is tedious at best.) Not requiring off-street parking will result in more noise and congestion. Please consider the loss of sunlight, old growth trees and privacy. What steps will be taken to insure that any housing changes proposed for the city will be affordable and not just money makers for developers?	7/22/2018
6316	35	/policies/innovative-housing-types/	After 15 years of living and working in New York City, we recently returned to the peace of Minneapolis. We were very happy to find a home in the diverse, sfh neighborhood we lived in previously. I am opposed to the proposal to allow multi-unit buildings on small city lots. I believe my objections apply to much of the city, not just sfh neighborhoods. Without strict guidelines, developers are likely to throw up any structure with no consideration of blending with the neighborhood. Even if the transit system magically improves, people will want cars. (Hauling bags of groceries on the subway or bus is tedious at best.) Not requiring off-street parking will result in more noise and congestion. Please consider the loss of sunlight, old growth trees and privacy. What steps will be taken to insure that any housing changes proposed for the city will be affordable and not just money makers for developers?	7/22/2018
6317	1	/policies/access-to-housing/	Policy 1e is a horrible idea. Fourplexes and multifamily housing in primarily single family home will hurt the character of exiting interior neighborhoods often without achieving other housing goals (e.g., reducing disparities, making housing more affordable, creating complete neighborhoods, increasing proximity to jobs)	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6318	33	/policies/affordable-housing-production/	<p>Action step 33b is especially awesome - as folks age, maintaining a single family home may be difficult. Allowing them to stay in their neighborhood with multifamily options is a great opportunity.</p> <p>Also, thank you, again, for your focus on equity. Too long the city has catered to the wealthy & the comfortable. Action steps 33e and 33f are critical -- we truly need to PRIORITIZE the lower income folks (not compromise here and there) if we want to change the status quo.</p>	7/22/2018
6319	31	/policies/creative-workers/	I support this policy. Reconsider the City's hiring policies/practices to hire for quality talent (not just "good resumes"). Stop only hiring Professional Engineers for jobs that many other intelligent, arguably more creative, people could do better. Don't get me wrong, I'm married to an engineer, but the City seems to have a problem with expanding it's type of employees.	7/22/2018
6320	50	/policies/access-to-technology/	Tax payer should not have to cover cost and/or supplement this financially. This must be financially self sufficient or must not be done!! I think this should not change from what Minneapolis has in place today!!!	7/22/2018
6321	33	/policies/affordable-housing-production/	I support this policy.	7/22/2018
6322	68	/policies/energy-efficient-buildings/	<p>Regarding 68.d - The time to "encourage" has based. The city should require minimum performance for energy efficiency and sustainability for projects at a minimum based on SB 2030 targets for all projects receiving city support. St.Paul's policy is much more aggressive and forward thinking regarding a holistic and flexible approach to achieving targets and goals.</p> <p>A holistic approach to sustainability should be adopted to insure the outcome address human and planetary health.</p>	7/22/2018
6323	52	/policies/human-capital-and-a-trained-workforce/	I think this should not change from what Minneapolis has in place today!!!	7/22/2018
6324	68	/policies/energy-efficient-buildings/	<p>Regarding 68.d - The time to "encourage" has based. The city should require minimum performance for energy efficiency and sustainability for projects at a minimum based on SB 2030 targets for all projects receiving city support. St.Paul's policy is much more aggressive and forward thinking regarding a holistic and flexible approach to achieving targets and goals.</p> <p>A holistic approach to sustainability should be adopted to insure the outcome address human and planetary health.</p>	7/22/2018
6325	34	/policies/affordable-housing-preservation/	I support this policy.	7/22/2018
6326	68	/policies/energy-efficient-buildings/	<p>Regarding 68.d - The time to "encourage" has based. The city should require minimum performance for energy efficiency and sustainability for projects at a minimum based on SB 2030 targets for all projects receiving city support. St.Paul's policy is much more aggressive and forward thinking regarding a holistic and flexible approach to achieving targets and goals.</p> <p>A holistic approach to sustainability should be adopted to insure the outcome address human and planetary health.</p>	7/22/2018
6327	35	/policies/innovative-housing-types/	I support this policy.	7/22/2018
6328	36	/policies/innovative-housing-strategies/	I support this policy.	7/22/2018
6329	51	/policies/healthy-pre-k-development/	I think this should not change from what Minneapolis has in place today!!!	7/22/2018
6330	38	/policies/affordable-housing-near-transit-and-job/	I support this policy.	7/22/2018
6331	38	/policies/affordable-housing-near-transit-and-job/	Yes, yes, yes, this is huge. We need to have more housing along transit corridors, across the city. Please do not allow a small group of naysayers to water this down. If we want to support Metro Transit, they need ridership to continue to grow. If you make it easy for people to live near transit, they will use it. Please maintain action step 38A as much as you can: "Maximize opportunities to create affordable housing near transit stations and along high-frequency transit corridors."	7/22/2018
6332	58	/policies/business-districts-and-corridors/	I think this should not change from what Minneapolis has in place today!!! NO new zoning. Any change Must include local resident input, which can stop this type of growth!!!	7/22/2018
6333	10	/policies/street-grid/	Interestingly enough, the plan to increase pedestrian and biking seems inconsistent with this plan. Years ago, Minneapolis redesigned Lyndale to achieve "traffic calming" measures. It didn't work - Lyndale seems to be busier as a result. Cars fly down the street in excess of the posted speed limit, and talk about connectivity - pedestrians can't even cross the street from one side of Lyndale to the other. How will you accomplish the combination of this policy with the policy for encouraging non-vehicle mobility?	7/22/2018
6334	46	/policies/healthy-housing/	All rentals should be smoke-free. Requiring natural light (windows) in public buildings.	7/22/2018
6335	37	/policies/mixed-income-housing/	This one is huge. Particularly from an educational standpoint, there is a ton of research that mixed income neighborhoods are some of the best ways to improve outcomes for low-income folks. Concentrated poverty helps no one. Thank you for these action steps - I strongly support them as a resident of Minneapolis!	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6336	11	/policies/skyways/	All of these objectives are reasonable given our reliance on the skyway system, and expanding the system throughout downtown should be accomplished.	7/22/2018
6337	53	/policies/quality-of-life/	I support this policy.	7/22/2018
6338	12	/policies/lighting/	Lighting is important and I would hope the city explores environmentally friendly ways to accomplish this, through LED, solar, etc.	7/22/2018
6339	13	/policies/landscaping/	landscaping is great for the environment. What if we require food source plantings - edible vegetables, etc	7/22/2018
6340	1	/policies/access-to-housing/	Subsidize utility connections for homeowners who want to build ADU's on their property but can't afford the utility connections.	7/22/2018
6341	14	/policies/tree-canopy-and-urban-forest/	So long as Mpls can maintain proper trimming	7/22/2018
6342	59	/policies/downtown/	I support this policy. Also, PLACEMAKING	7/22/2018
6343	19	/policies/bicycling/	As a year-round cyclist I support these action steps. However, secured parking will likely only be implemented in new construction. I would also like to see additional support/encouragement for covered bicycle parking near building entrances for existing buildings. Placing bicycle parking near building entrances puts additional eyes on them, thus reducing the chance of stealing, and covering bikes protects them from rain/snow.	7/22/2018
6344	59	/policies/downtown/	The city of Minneapolis has too much focus on Down town area!! Many people like me do not want to deal with down town BS (traffic, high costs, crime, parking, difficulty getting in/out) and actively avoid downtown area!! problems are just getting worse and tax pays MUST not fund bad changes to our city!! All cost for down area must be covered by down town resident, businesses and should not be supplemented through larger Minneapolis area tax dollar. Build stadium in Down town area is bad and must stop!!!!	7/22/2018
6345	15	/policies/transportation-and-equity/	see prior comments on making transportation efficient	7/22/2018
6346	60	/policies/intrinsic-value-of-properties/	I think this should not change from what Minneapolis has in place today!!!	7/22/2018
6347	57	/policies/cluster-strategy/	I think this should not change from what Minneapolis has in place today!!!	7/22/2018
6348	40	/policies/homelessness/	I think this should not change from what Minneapolis has in place today!!!	7/22/2018
6349	1	/policies/access-to-housing/	You write clearly that the current housing situation has its roots in intentionally discriminatory policies. How do you explicitly plan to combat that legacy so that new housing units do not go to people exclusively with ready access to capital, or who are recruited here for high-paying jobs (ie with Target, etc)? How will you make sure the new housing is accessible to the people who need it BECAUSE of the historical and current barriers to capital, credit or being seen as a worthy neighbor?	7/22/2018
6350	16	/policies/environmental-impacts-of-transportation/	I am a 39 year resident of Mpls. with significant work time spent in and around both Northern Mn [Duluth, Tower, and Two Harbors] and Southern MN [Waseca]. Your assumption seems to be that most people want to live in or visit Mpls. My experience is that this assumption is not particularly true. Most people think that shopping is expensive in the city because of parking and because of the hassle/time spent needed to get around. Contrast this with shopping in the suburbs [free parking and easy, close access to stores]. It is thought to be dangerous in the city because the City Council wants arrests to be based on skin color instead of behavior; therefore, allowing more harassing and criminal activity to exist than there needs to be. People believe that public transportation takes more total time to get from one place to another. You need to provide more car friendly incentives to come to and to live in the city, but you are actually planning to make it harder for people to get around in the city. That's a great plan if you want to lose people to the suburbs where "city centers" are now being developed thereby making it increasingly unnecessary to go to the city. You need to put more incentives into this plan and to decrease the penalties you propose.	7/22/2018
6351	68	/policies/energy-efficient-buildings/	Regarding 68.d - The plan should have a comprehensive and holistic approach to sustainability. The emphasis on energy is understandable in light of climate change. However, the future city will need to address and adapt to not only a changing climate, but must also address a myriad of environmental impacts from material toxicity and human and environmental health to resiliency planning and water scarcity and service disruption.	7/22/2018
6352	16	/policies/environmental-impacts-of-transportation/	Perhaps the city can start with its own fleet of vehicles - reducing those and evaluating the needs to maintaining and using vehicles	7/22/2018
6353	71	/policies/soil-health/	Soil Health #71 is a valuable and cost effective policy and proposed actions. But it will take diligent action to get everyone on board. Inattentive and uninformed construction practices -- by the managers as well as workers driving equipment -- commonly compact the soil, causing long term expenses in water and vegetation management.	7/22/2018
6354	65	/policies/urban-agriculture-and-food-production/	I support this policy.	7/22/2018
6355	77	/policies/park-access/	I support this policy.	7/22/2018
6356	43	/policies/housing-displacement/	BAD!!! I think this MUST be removed from Minneapolis 2040 plan has in place today!!! All people of any race must be treated the same!!!	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6357	78	/policies/park-design-and-programming/	I support this policy. Also, culturally appropriate parks!	7/22/2018
6358	81	/policies/social-connectedness/	Placemaking, please!	7/22/2018
6359	24	/policies/shared-mobility/	This should be removed and Minneapolis should make no changes from what is in place today!!!	7/22/2018
6360	23	/policies/coordinated-development-strategy/	This should be removed and Minneapolis should make no changes from what is in place today!!!	7/22/2018
6361	22	/policies/downtown-transportation/	This should be removed and Minneapolis should make no changes from what is in place today!!!	7/22/2018
6362	21	/policies/freight/	This should be removed and Minneapolis should make no changes from what is in place today!!!	7/22/2018
6363	82	/policies/aging/	I support this policy. Also, density in housing, access to transit, ability to safety walk and bike places (food, fun, social cohesion)	7/22/2018
6364	20	/policies/transit/	This should be removed and Minneapolis should make no changes from what is in place today!!!	7/22/2018
6365	28	/policies/msp-airport/	Most people take luggage to the airport when they travel. Prioritizing pedestrian and bicycling access is a ridiculous goal.	7/22/2018
6366	23	/policies/coordinated-development-strategy/	We have several empty office buildings and office space in downtown Minneapolis. Rather than allow another business to fail, it seems to me we can encourage housing development and apartments in existing office building space downtown. Look at the old Macy's building. Residential would be ideal.	7/22/2018
6367	83	/policies/people-with-disabilities/	I support this policy. Also, support Twin Cities Adaptive Cycling and other groups that are working their butts off to do this already.	7/22/2018
6368	1	/policies/access-to-housing/	I appreciate the focus on density and multi-family housing, and I think it's important to allow high-density housing on transit routes. However-- I don't think that high-density housing should only be allowed on those routes. Why should people who live in multi-family buildings be confined to areas that are oftentimes noisy and polluted because of excess car traffic? Neighborhoods with existing supplies of old apartment buildings-- ECCO, say-- are richer, more interesting places for those buildings. Those apartment buildings also allow people who can't afford a 300,000 home to live in those neighborhoods. Why continue to close off most neighborhoods to that sort of development? If Minneapolis is growing, shouldn't areas that have been closed off to multi-family development for generations be allowed to share the burden (or opportunity!) of the new buildings that will be required to house people?	7/22/2018
6369	33	/policies/affordable-housing-production/	After 15 years of living and working in New York City, we recently returned to the peace of Minneapolis. We were very happy to find a home in the diverse, sfh neighborhood we lived in previously. I am opposed to the proposal to allow multi-unit buildings on small city lots. I believe my objections apply to much of the city, not just sfh neighborhoods. Without strict guidelines, developers are likely to throw up any structure with no consideration of blending with the neighborhood. Even if the transit system magically improves, people will want cars. (Hauling bags of groceries on a subway or bus is tedious at best.) Not requiring off-street parking will result in more noise and congestion. Please consider the loss of sunlight, old-growth trees and privacy. What steps will be taken to insure that any housing changes proposed for the city will be affordable and not just money makers for developers?	7/22/2018
6370	19	/policies/bicycling/	Bike BS has gone to fare and needs to scale back. I seeing to many decision for bikes that are being made that have hurt Minneapolis and reduced access in/out of city. This must be removed and should be reduced from what is being done today!!!	7/22/2018
6371	33	/policies/affordable-housing-production/	After 15 years of living and working in New York City, we recently returned to the peace of Minneapolis. We were very happy to find a home in the diverse, sfh neighborhood we lived in previously. I am opposed to the proposal to allow multi-unit buildings on small city lots. I believe my objections apply to much of the city, not just sfh neighborhoods. Without strict guidelines, developers are likely to throw up any structure with no consideration of blending with the neighborhood. Even if the transit system magically improves, people will want cars. (Hauling bags of groceries on a subway or bus is tedious at best.) Not requiring off-street parking will result in more noise and congestion. Please consider the loss of sunlight, old-growth trees and privacy. What steps will be taken to insure that any housing changes proposed for the city will be affordable and not just money makers for developers?	7/22/2018
6372	18	/policies/walking/	I support these action steps. I live on 37th and Lyndale Ave S and as a pedestrian/cyclist it is very difficult to cross Lyndale because of car traffic, even at crosswalks. Sometimes it is so bad that I need to walk to 36th or 38th Street to cross Lyndale, and I am an able-bodied person. Maybe something to add is that where ever there are curb cuts, there could be painted lines to remind drivers that most street corners include a crosswalk. There could be an information campaign about this?	7/22/2018
6373	15	/policies/transportation-and-equity/	This must be self-sufficient or must not be done!!, This should be removed and Minneapolis should make no changes from what is in place today!!!	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6374	1	/policies/access-to-housing/	Minneapolis neighborhoods today are culturally, racially, and religiously diverse. Current zoning is not the cause for why someone cannot afford to buy a single-family home. If you want to actually address historic wrongs, focus on addressing the issues that will help the historically disadvantaged - education and employment. Adding 4-6+ story apartments will not correct the past or create affordable housing.	7/22/2018
6375	12	/policies/lighting/	Very happy to see a plan for efficient lighting that minimizes glare and light pollution!	7/22/2018
6376	12	/policies/lighting/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6377	75	/policies/waste-reduction/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6378	76	/policies/new-parks/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6379	76	/policies/new-parks/	Please build some legit skateparks. Nearly every TC suburb has a better skatepark than Minneapolis. Cities much smaller than Minneapolis have world class skateparks. Minneapolis has world class skaters but no public facilities to support them. Secondly, dense population areas such as downtown, downtown east, north loop and the section of NE nearest downtown are in need of more sports facilities. This could be as simple as multi use courts which support basketball, soccer and other hard surface activities as found all over european cities. Simple calisthenic equipment such as pull up bars, ladders, push up areas etc would be nice too. There is currently nowhere in the city that has any of this equipment.	7/22/2018
6380	77	/policies/park-access/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6381	78	/policies/park-design-and-programming/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6382	24	/policies/shared-mobility/	Can Minneapolis install a toll booth for cars who enter the city limit into downtown? It seems to me that if we want to reduce cars in our city perhaps we start with people who do not live here and pay city taxes or property taxes here.	7/22/2018
6383	79	/policies/healthy-youth-development/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6384	80	/policies/development-near-metro-stations/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6385	81	/policies/social-connectedness/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!! This is just BAD!!!!	7/22/2018
6386	82	/policies/aging/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6387	83	/policies/people-with-disabilities/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6388	84	/policies/public-safety/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6389	85	/policies/access-to-health-social-and-emergency-s	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6390	25	/policies/innovations-in-transportation-and-infras	If you have a lane for automatic vehicles then it should only be for automatic vehicles. Early tests show greater accidents when humans are involved. Has Minneapolis adopted any privacy policies for its residents to protect them concerning drones? What about toll booths for people entering the city by vheicle, who do not live and pay taxes here?	7/22/2018
6391	86	/policies/healthy-food-in-institutions/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6392	88	/policies/public-services-policy/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6393	89	/policies/technology-in-the-city-enterprise/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6394	90	/policies/technology-in-the-economy/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6395	91	/policies/heritage-preservation-outreach/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6396	33	/policies/affordable-housing-production/	How are you going to accomplish this policy? This is too vague. Relying on density and the market to self regulate and drive prices down is a mistake.	7/22/2018
6397	92	/policies/identify-and-evaluate-historic-resources	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6398	6	/policies/pedestrian-oriented-building-and-site-de	The hostility to car transportation is extreme! Prohibiting new gas stations and auto repair facilities??? Discourage and minimize the size of parking lots? Until a far more effective transit system is in place and shown to be sufficient for the needs of the city these goals are going to do far more harm than good for the future of Minneapolis.	7/22/2018
6399	95	/policies/heritage-preservation-financial-incentive	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6400	96	/policies/heritage-preservation-recognition/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6401	97	/policies/heritage-preservation-legislative-advoca	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6402	93	/policies/stewarding-historic-properties/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6403	44	/policies/comprehensive-investments/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6404	28	/policies/msp-airport/	I have lived in Mpls for 20 years and the city failed us with the airport authority plan to mitigate noise and pay residents for new AC or windows. I was on the original plan to receive this mitigation but never did, and paid out of pocket myself. I have little confidence in Mpls to take care of my interests on this given the history of what happened.	7/22/2018
6405	45	/policies/leverage-housing-programs-to-benefit-c	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6406	46	/policies/healthy-housing/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6407	47	/policies/housing-maintenance/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6408	17	/policies/complete-streets/	I love that the city passed a Complete Streets Policy. As a frequent pedestrian, bicyclist, and transit-user, however, I'm often disappointed by what this policy has been implemented when roads are redesigned. One example I'm thinking about is Third Avenue through downtown. While the bollards do make bicycling feel a little safer, the bike lane is still adjacent to a four lane road, on which drivers oftentimes go well over the speed limit. In addition to this, the bike lanes are oftentimes blocked, requiring bicyclists to merge into traffic. This isn't such an obstacle for me-- I'm able-bodied, and an experienced cyclist-- but this sort of design absolutely repels less experienced or confident cyclists from using this bikeway. The concentration of fast-moving car traffic also makes the area less pleasant and safe for pedestrians, too. Thus, I don't understand how this area conforms in any real way to the goals established by the Complete Streets policy. (Other streets-- 26th and 28th Streets, say-- seem to conform to those goals a bit better. I feel much safer being on those streets now!)	7/22/2018
6409	33	/policies/affordable-housing-production/	The following needs to be clearly defined before meaningful discussions can occur.....How is affordable housing defined? Once done, how much would these homes cost? What is the distribution of selling prices? Would families with these median incomes qualify for conventional mortgage loans to buy them? What percent of their monthly disposable income would need to be devoted to housing (mortgage, property taxes, utilities)? Same questions for rental properties.	7/22/2018
6410	1	/policies/access-to-housing/	This goal is in direct conflict with the goal of promoting home ownership. It will make rental units more available and reduce the supply of owner occupied homes.	7/22/2018
6411	58	/policies/business-districts-and-corridors/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6412	6	/policies/pedestrian-oriented-building-and-site-de	Policies should not be hostile to cars--reducing parking, gas stations, car repair shops, They are a critical mode of transportation for many people especially elderly, parents with young children, people with mobility issues and others. Policies should support figuring out how all forms of transportation can co-exist SAFELY.	7/22/2018
6413	17	/policies/complete-streets/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6414	6	/policies/pedestrian-oriented-building-and-site-de	As a lifelong resident of the city of Minneapolis, I support these action steps.	7/22/2018
6415	25	/policies/innovations-in-transportation-and-infras	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6416	28	/policies/msp-airport/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6417	26	/policies/vision-zero/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6418	56	/policies/supporting-small-businesses/	I'm concerned that the rents in new developments will be to expensive for locally owned small businesses. I would support programs to keep their rents affordable. Perhaps requiring new building to have smaller commercial spaces available or, inclusionary zoning policies for commercial leases.	7/22/2018
6419	27	/policies/transportation-partnerships/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6420	30	/policies/arts-and-cultural-assets/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6421	39	/policies/fair-housing/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6422	45	/policies/leverage-housing-programs-to-benefit-c	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6423	1	/policies/access-to-housing/	I support this plan for increased density in the city. The approach in reasonable and logical. The city must develop with a balanced plan that creates walkable transit oriented nodes and corridors, while distributing the population.	7/22/2018
6424	3	/policies/production-and-processing/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6425	4	/policies/access-to-commercial-goods-and-service	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6426	30	/policies/arts-and-cultural-assets/	It would be helpful to see where the statistics and numbers are coming from. It would also be helpful to see how "creative" is being defined. Is it for music? Theater? Painting? Patents? Clothing design? I'm not sure I know what is being evaluated here and how the numbers are being looked at. Perhaps if we had more employers in this industry, or a movie and TV industry like LA, NY or Atlanta, then we would attract more diverse talent.	7/22/2018
6427	5	/policies/visual-quality-of-new-development/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6428	10	/policies/street-grid/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6429	34	/policies/affordable-housing-preservation/	The proposed zoning plan directly conflicts with this policy. Single-family homes along busy streets are naturally occurring affordable housing. Prices of those homes are significantly less than adjacent blocks due to traffic noise. Targeting those streets for building 4-6+ story apartments will reduce the inventory of naturally occurring affordable single-family homes.	7/22/2018
6430	13	/policies/landscaping/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6431	17	/policies/complete-streets/	This should not be changed from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6432	19	/policies/bicycling/	Yes, please continue to invest in bike infrastructure. I love bicycling in Minneapolis. Cycling is still available to too few people as a usable form of transportation, though-- many of our bikeways are still adjacent to dangerous, congested roads. What can the city do to make these roads safer? Will our investment in bicycling infrastructure be joined by investments in the sort of road redesign that forces drivers to slow down, and that makes other modes of transportation viable? And how can the city create infrastructure that makes cycling accessible to more than the current population of cyclists, which is disproportionately young, white, and male?	7/22/2018
6433	19	/policies/bicycling/	This should be reduced significantly from what is currently done in Minneapolis!!! Remove from Minneapolis 2040 vision!!	7/22/2018
6434	31	/policies/creative-workers/	Again, what are we talking about? Chefs? Singers? Writers? I find this goal incredible in light of the recent school budget cuts to funding for creative arts. Try not cutting funding for the arts in middle and high school - there's a place to start. Partner with Minnesota creative outlets to teach at the schools. I would rather spend my money training kids who go to school here already.	7/22/2018
6435	37	/policies/mixed-income-housing/	Are you going to allow developers to simply pay a fine to get out of this?	7/22/2018
6436	33	/policies/affordable-housing-production/	how about housing in empty downtown office space?	7/22/2018
6437	18	/policies/walking/	Though I love walking in Minneapolis, I'm often frustrated by a few things (which this plan may address!). Narrow, obstructed sidewalks, curb cuts for cars into parking lots and alleyways that make walking feel dangerous, and difficult crossing points that make crossing the street difficult and scary, especially for more vulnerable people. Yes to narrower streets, yes to wider sidewalks, yes to pedestrian bumpouts, yes to clearly marked crosswalks at every intersection. Without these sorts of reforms, walking will continue to be inaccessible to too many people, and pedestrians will continue to be injured and killed.	7/22/2018
6438	9	/policies/open-spaces-in-new-development/	More open spaces needed in MPLS with less development. Buildings should be much smaller. Footprint and height should be much more restricted.	7/22/2018
6439	34	/policies/affordable-housing-preservation/	I read an article within the last year about Mpls considering rent control measures. I think that is ridiculous. Mpls can control costs for renters by controlling property taxes and utilities charges. It can control how many individuals it allows -- or requires a landlord to allow-- to live in a dwelling. Perhaps 3 or 4 people can share a one bedroom apartment and we can get away from traditional ideas about what a living space should look like (why couldn't a living room also serve as a bedroom for 2 people)?	7/22/2018
6440	1	/policies/access-to-housing/	I support the action steps listed on this page. However, it would help to note exactly how new policies will encourage housing affordability. The people who have put up lawn signs saying their house will be zoned for extinction seem to forget that each structure has a lifespan. When the oldest/least maintained structures on a block need to be replaced, the city should not prevent homeowners from putting additional units on a lot. A form-based code would encourage new those structures to fit in well with their neighbors.	7/22/2018
6441	16	/policies/environmental-impacts-of-transportation/	High-functioning mass transit needs to be in place before implementing tactics to disincentivize driving. People need efficient ways to travel before the city makes driving unbearable.	7/22/2018
6442	35	/policies/innovative-housing-types/	Having a son who lives in a dorm at college tells me one thing - alternative living models are possible, we must just embrace them as a community. No one in the dorm has their own bathroom. One room the size of a small office space sleeps 2 people, and a common area is available for community engagement. It seems to me that there are ways to address these issues.	7/22/2018
6443	17	/policies/complete-streets/	I think it is incredibly important to to build our city in a way that does not favor cars so strongly. Alternate modes of transportation are important. Many rely on walking and transit. Walking and transit build stronger communities. Walking and transit are more environmentally friendly. Walking and transit make a more appealing city.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6444	17	/policies/complete-streets/	While the goal of encouraging alternative means of transportation is a reasonable one, doing so at the explicit expense of driving is a highly questionable one that can have major unintended consequences on the future of the city. Instead figure out a way for these various modes of transportation to safely co-exist. Policies that place pedestrians and bikers on the same streets as cars and public transportation (buses) creates a danger. alternating pedestrian / bike streets with car / bus streets would be a far safer alternative for all. Recognize that Minneapolis weather is not conducive to a no car policy. The plans here appear to be too extreme for the reality of the situation.	7/22/2018
6445	16	/policies/environmental-impacts-of-transportation/	I agree: if the city is going to address climate change, we'll need to rapidly transition away from a culture that encourages driving alone to every destination. What, practically, does it look like to "disincentivize" driving, though? Does it mean making unpopular decisions, like dedicating lanes of traffic to high-frequency buses? Does it mean making streets narrower, and forcing drivers to slow down? Does it mean fairly pricing parking? I hope so-- too many of the small steps that the city takes to prioritize walking, bicycling, and transit-use are fiercely resisted, and elected officials oftentimes end up hearing only from comfortable, well-organized, very privileged people when making these decisions. What specific steps will the city take to reach these ambitious goals? And how will it amplify the voices of the vulnerable people who stand to benefit most from these sorts of changes?	7/22/2018
6446	1	/policies/access-to-housing/	Regarding 1.e - I support the inclusion of "single family, duplex, 3-unit, 4-unit, and accessory dwelling unit building types" in existing single family neighborhoods. The public debate seems to emphasize this particular aspect of the policy--this seems a kin to fear mongering. The city is already majority renter with some of the most popular areas of the city dominated by rental. Distribution of density by incrementally increasing the population of all neighborhoods is a good idea. The fear of rampant tear downs is just that fear. This is a 20 year plan--not a requirement for future land use, merely an option.	7/22/2018
6447	37	/policies/mixed-income-housing/	What if Mpls strengthened community services and schools in areas that are currently underserved? I know that there are places in Mpls that are less desirable (and more affordable to live) and perhaps if those areas receive greater support for the community then they will thrive.	7/22/2018
6448	38	/policies/affordable-housing-near-transit-and-job-places/	downtown is a huge job center. as I've said, housing in empty downtown retail space would address this.	7/22/2018
6449	70	/policies/ecology-and-habitat/	e. This is currently being done and I support it. It will be important that goals of these organizations are reasonable and in line with the cities water management needs. I fully support all other bullet points	7/22/2018
6450	25	/policies/innovations-in-transportation-and-infrastructure/	Southwest light rail should run along 29th street greenway (where all the potential riders live) not along Kenilworth Corridor which is void of riders. There is already a rail bed along 29th street greenway. Do not double the cost by keeping the Kenilworth train and adding a streetcar system along the greenway.	7/22/2018
6451	1	/policies/access-to-housing/	I want to voice support for increased density. There are always growing pains, but growth is a side effect of having a desirable city. I think the proposed policies are spot on to help the city grow intelligently.	7/22/2018
6452	2	/policies/access-to-employment/	Jobs are a critical part of a successful city in 2040. In the near north side, I am seeing former light industrial buildings being repurposed for say a dog day care which is not in itself a bad thing. However, the consequence of lost jobs from an industrial employer in this space is a problem. Out in Lakeville, the light industry buildings almost all have help wanted signs out. NO transit goes here from the near north side. This is a Zoning variance issue as I understand it- time to stick with our light industrial city zoning and make jobs available here in the city. thx	7/22/2018
6453	11	/policies/skyways/	I would love it if the city worked to promote sidewalk level retail downtown. Too much of downtown feels like a moonscape-- unsafe, unwelcoming, empty. Having more eyes on street, and more things to do at street-level, would help alleviate this.	7/22/2018
6454	1	/policies/access-to-housing/	This document continuously mentions affordable housing. A bigger issue in this city is low-income housing. that is not even mentioned, nor are there any plans on how to deal with that issue.	7/22/2018
6455	36	/policies/innovative-housing-strategies/	Overbuilding around the lakes has nothing to do with affordable housing.	7/22/2018
6456	18	/policies/walking/	Narrowing street widths as a "traffic calming" measure is a terrible idea. It will increase the number of accidents, especially with bicyclists. Narrow lanes with snowy and icy roads are a policy that will lead to far more accidents. Instead consider having a few pedestrian / bicyclist only streets as well as streets for cars.	7/22/2018
6457	10	/policies/street-grid/	I would appreciate any steps the city could take to divide up the crazy-long blocks that are present in many parts of the city, and to make crossing the freeways easier on foot or bicycle. What, specifically, might these steps look like?	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6458	40	/policies/homelessness/	Priority should be for youth. Children should not be homeless. Dormitory type opportunities might be a solution to address homelessness among youth. What about a dormitory with a culinary training school on the main floor?	7/22/2018
6459	1	/policies/access-to-housing/	It's critical that we increase density all over the city in able to support affordable housing and environmentally friendly transportation. If my neighborhood, Howe, had the same density of Kingfield, the change in neighborhood character would be unnoticeable yet we would have 3,000 more people living here (>40% more). Having neighborhoods in this city that are restricted by law to only for single family homes, is unconscionable with the environmental and equity crises we're facing.	7/22/2018
6460	42	/policies/expand-homeownership/	These tools should include methods for ensuring that buyers are not purchasing homes beyond their means, it should be a responsible % of current, and ongoing anticipated income. We should set up new home buyers for success.	7/22/2018
6461	0.1	/topics/land-use-built-form/	<p>I recently moved to Minneapolis from Seattle and it is horrible to see that Minneapolis wants to go the same way with their land development. Seattle neighborhoods completely lost their character with all the new development. Some areas were very similar to Minneapolis neighborhoods and they completely changed. Also, none of the housing put in was truly 'affordable' housing. Rents were still insane, just not as insane as other areas. Additionally, Minneapolis does not have the climate to support a traffic infrastructure that would encourage people to walk/bike. Introducing thousands of more cars into these smaller neighborhoods is bad for traffic and the environment.</p> <p>I live in what would become a 'mixed use zone' and it is so distressing to think of these old, beautiful homes destroyed to put up some cheap, ugly condos/apartments. These homes give Minneapolis character. They are part of the history of the city. There are so many other areas in the city that could and should be developed before reclassifying people's land for commercial purposes. If this proposition continues to go forward I will do everything I can to oppose it, including voting out those who thought it would be a good idea. I love my century old home and the neighborhood it is in.</p>	7/22/2018
6462	27	/policies/transportation-partnerships/	Good goals- HOW in the face of a conservative state legislative majority will Mpls accomplish better in city transit. The increased density without required onsite parking will cause gridlock and make living in Mpls unattractive at the best. Look at NYC with decent rapid transit and the grid lock there. Mpls MUST address policy 27 with funding steps as a keystone to the remainder of the plan 2040. thx	7/22/2018
6463	27	/policies/transportation-partnerships/	Good goals- HOW in the face of a conservative state legislative majority will Mpls accomplish better in city transit. The increased density without required onsite parking will cause gridlock and make living in Mpls unattractive at the best. Look at NYC with decent rapid transit and the grid lock there. Mpls MUST address policy 27 with funding steps as a keystone to the remainder of the plan 2040. thx	7/22/2018
6464	68	/policies/energy-efficient-buildings/	I'm interested in seeing the city provide assistance to multifamily buildings on energy Audits and Energy Efficiency guidance.	7/22/2018
6465	72	/policies/sustainable-water-system-management/	<p>These are good things. I would add the following:</p> <p>Take action against the use of rock salt for de icing for residents. Hennepin County Public Works has taken major steps to reduce their salt application and Minneapolis should do the same. Chlorides in surface water is an increasing threat to habitat here, and downstream.</p>	7/22/2018
6466	80	/policies/development-near-metro-stations/	Looks like an excuse for developers to bulldoze neighborhoods.	7/22/2018
6467	68	/policies/energy-efficient-buildings/	I'm interested in seeing the city provide assistance to multifamily buildings on energy Audits and Energy Efficiency guidance.	7/22/2018
6468	25	/policies/innovations-in-transportation-and-infras	I hope that, whatever investments the city makes to leave room for antonymous vehicles doesn't come at the expense of increased accessibility to public transit and safety for pedestrians and cyclists. Many of the problems that I notice as a pedestrian, cyclist, and transit-user are because of how the city-spaces prioritize car use over other forms of transportation. I'd be much happier if the city focused on enhancing access to transit for everyone than devoting scare resources to a technology that might maintain or exacerbate existing problems.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6469	73	/policies/stormwater-management/	<p>Stormwater management together with Water System Management, Soil Health, and other water related policies is one of my biggest concerns. These are disconnected and poorly developed policies that don't seem to have had enough expert attention. They are written as add-on ideas, not integrated into the central policies of land use, transportation, etc. For example, the action steps for stormwater management are " to manage natural areas in and around surface waters. . . ". This policy should apply to every point in the city, not just "around surface waters". Every point drains very quickly to natural areas and surface waters, and so all areas need to be intensively managed for effective water flow and quality. Stormwater and water system management need to be among the central guides in the land use, built environment, and transportation planning, which should have a goal of no loss of pervious area on any given lot or other small area, and improved management of water coming off pervious areas, including expanding water reuse.</p> <p>I could find no mention of water reuse anywhere. This practice has big potential for growth and impact in the next 20 years.</p>	7/22/2018
6470	41	/policies/tenant-protections/	<p>The city could really step up a lot more here. Regular (and surprise) inspections of rental properties would force landlords to provide safe, clean, and functioning rentals. Tenants wouldn't need to be afraid to speak out if the city did a better job of regulating.</p>	7/22/2018
6471	43	/policies/housing-displacement/	<p>This plan must have more proactive policies to produce and preserve affordable housing in the city. If we allow low income residents to continue to be forced out further from jobs, transit, and other essential resources while housing costs continue to rise for them every other policy in this plan will be ultimately judged as a failure.</p>	7/22/2018
6472	74	/policies/integration-of-water-management-into-	<p>Integrating water management into development is a critical concept but this is a tiny afterthought, not reflected in the land use planning topic.</p>	7/22/2018
6473	90	/policies/technology-in-the-economy/	<p>The city should partner with area community colleges to train our high school graduates for Tech sector jobs.</p>	7/22/2018
6474	19	/policies/bicycling/	<p>As a 60 something resident I appreciate the bike friendly improvements made in NE Minneapolis. I ride for pleasure and occasionally for the short commute to my office.</p> <p>We are a great place to ride for 5 months a year. Once the snow and cold hit the pleasure and practicality of commuting is gone. The prioritization of pedestrian transportation and biking will only work if there is a convenient transit system for the winter.</p> <p>At 80 will I still be able to clamber over the drifts at a bus stop?</p>	7/22/2018
6475	80	/policies/development-near-metro-stations/	<p>I support development adjacent to and near transit stations.</p> <p>The city should support a mix of housing types and options at transit stations. It should be mixed income with no more than 20-30% affordable units to create a diverse and balanced neighborhood. There is solid research on housing income mix leading to neighborhood stability conducted by MN Housing and Minnesota Housing Partnership. Based in science and fact rather than fear and cloaked racism.</p>	7/22/2018
6476	26	/policies/vision-zero/	<p>I appreciate the goals outlined by Vision Zero. I hope the city will prioritize designing streets that require drivers to slow down and make space for pedestrians and cyclists, rather than relying only on enforcement or education. I think enforcement is a problem because communities of color bear the brunt of increased enforcement policies, and I think education is unlikely to be effective if our streets continue to promote speeding, and encourage people to drive to their every destination.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6477	33	/policies/affordable-housing-production/	<p>These comments are part of larger suite of general comments submitted by Doug Pierce and Mr. Deborah Pierce. A PDF of the full set of comments can be downloaded from Box: https://app.box.com/s/z0nrqftm47yotuw24l6ng0wnuuzqhm78</p> <p>Actions the city can actively engage to foster a Generative Economy in Minneapolis. As part of the transformative goals of the 2040 plan, the City should actively engage in fostering, supporting and creating the economic elements needed for the rezoning to effectively reduce inequity and increase inclusiveness.</p> <p>â€¢Work with the state legislature to create a State Owned Bank for supporting affordable housing and retail / commercial development: Through the legislature, the City should foster the creation of a State of Minnesota owned and operated bank to provide green + resilient mortgages, bonds, and financing for businesses, individuals and government use.</p> <p>Example: State of North Dakota owned bank BND - Bank of North Dakota - PDF: https://web.archive.org/web/20111017114915/http://banknd.nd.gov/about_BND/pdfs/faqs.pdf</p> <p>â€¢Support mini-bonds for financing affordable housing: Help non-profit developers use locally crowd-sourced mini-bonds to finance affordable housing and retail / commercial mixed-use projects. The city can assist by underwriting the bonds.</p> <p>Neighborly Mini-bonds: https://neighborly.com/</p> <p>For projects pursuing a PUD in density corridors, require development corporations to be 'Mission' driven (see above) and chartered as Public Benefit Corporations at a minimum, with a strong preference for non-profits and stakeholder owned cooperatives incentivized with development bonuses. They must be chartered to serve the community and life. They should include salary limits on executives (1-5 lowest paid to highest paid). Non-profits are typically in a better position to provide affordable housing because they are not required to maximize profits for shareholders and investors. In addition, use the proposed state owned bank to provide green + resilient bonds and mortgages as a source of capital for non-profit developers.</p> <p>Examples: RELi Resilience Rating System - Community Vitality Credit 5.1 http://online.anyflip.com/zyqc/ojoi/mobile/index.html#p=38</p>	7/22/2018
6478	73	/policies/stormwater-management/	<p>I support all of these.</p> <p>On road salt, a much more aggressive plan to reduce or completely eliminate road salting and residents (over) salting their driveway and walk.</p>	7/22/2018
6479	75	/policies/waste-reduction/	<p>Eliminate ALL single use plastic bags in the city. Require businesses to CHARGE a fee for paper bags or other non-reusable bags for purchase. This will help eliminate waste.</p>	7/22/2018
6480	25	/policies/innovations-in-transportation-and-infras	<p>Support transportation low volume alternates to the single passenger car - Lyft, Uber and hopefully automated vehicles suitable for short trips around town.</p>	7/22/2018
6481	86	/policies/healthy-food-in-institutions/	<p>No processed food. Schools must serve whole foods. I was tired of seeing pizza and chicken nuggets on my kids' menus.</p>	7/22/2018
6482	14	/policies/tree-canopy-and-urban-forest/	<p>Agreed! I live on a street that lost most of its canopy because of disease. What steps will the city take to diversify its tree supply, and make sure that we don't lose large swaths of tree cover again in the future?</p>	7/22/2018
6483	6	/policies/pedestrian-oriented-building-and-site-de	<p>Very interested in seeing sidewalk awnings. My understanding is that current zoning prevents usable awnings because of maximum width restrictions.</p>	7/22/2018
6484	19	/policies/bicycling/	<p>Currently the percentage of people using bikes to commute in Minneapolis is only 5%. There is no city in the U.S. that even has 10% of people using bikes to commute. A radical plan that promotes bikes while trying to actively discourage cars, while noble, seems doomed to failure. Even if the % can be doubled to 10%, and the use of public transportation becomes much greater, that still will leave the large majority of people relying on cars to commute. A hostile policy toward automobiles will anger a large number of people and harm the development of the city. A more balanced and sensible policy is needed.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6485	67	/policies/climate-resilient-communities/	<p>These comments are part of larger suite of general comments submitted by Doug Pierce and Mr. Deborah Pierce. A PDF of the full set of comments can be downloaded from Box: https://app.box.com/s/z0nrqftm47yotuw24l6ng0wnuuzqhm78</p> <p>For projects that increase density beyond the current zoning levels, use a Planned Unit Development (PUD) process coupled with clear and well-developed guidelines to shape developments (even at the individual lot level) so that they provide well considered community benefits. Criteria and guidelines can be clearly defined in advance providing some certainty for residents, neighborhoods, developers and city staff.</p> <p>Develop Small Area Plans (with deep public engagement) for all density corridors. The plans can then become part of the PUD baseline requirements, guidance and the criteria noted above.</p> <p>â€¢Use enforceable Community Benefit Agreements (CBA's) as part of all PUD's: Establish a list of compensating community benefits in return for flexibility in uses, density, and other factors. Uses could include pocket parks, community available meeting + activity space, highly affordable space for daycare, tool shares, repair shops, reuse shops, maker space, co-work space, community radio, newsletters and local internet, community bike repair, bus shelters, community solar gardens, community rain gardens, community vegetable gardens. Examples: RELi Resilience Rating System - Community Vitality Credits Credit 3.2, 3.4, 3.5, 3.8, 3.9 and 3.10. http://online.anyflip.com/zyqc/ojoi/mobile/index.html#p=37</p> <p>â€¢Require measurable, sustainable design criteria: robust levels of energy (70% reductions) + water efficiency (40% reductions), rainwater management, rainwater capture for irrigation (100%), native + adapted plantings, pollinator gardens, the use of low toxin materials, and lumber from ecologically managed forests (FSC). Examples: RELi Resilience Rating System - Energy, Water + Food Category Requisites and Credits: http://online.anyflip.com/zyqc/ojoi/mobile/index.html#p=46</p> <p>â€¢Require measureable, climate-escalated extreme weather adaptation such as planning for torrential rains, passive survivability, crisis back-up power (photovoltaic w/ battery back-up preferred), crisis back-up water, extreme wind resistance and tornado shelters. These amenities, along with cooling shelters can also be provided by projects for the surrounding community. Examples: RELi Resilience Rating System - Hazard Adaptation + Mitigation Category Requisites and Credits: http://online.anyflip.com/zyqc/ojoi/mobile/index.html#p=28</p>	7/22/2018
6486	22	/policies/downtown-transportation/	<p>Severely restricting parking is making Minneapolis a less business friendly place. I am an architect who has frequent 1-2 hour construction meetings downtown. I find myself spending 20-25 minutes spent parking and walking to the meeting. It costs both my clients and myself time and money. Yes walking is healthy but we live in an increasingly competitive business climate with everyone operating on tight schedules.</p>	7/22/2018
6487	74	/policies/integration-of-water-management-into-	<p>I support these practices.</p> <p>Implementing best management practices that are easy to maintain is one very important piece. Many of these that have been built are not being maintained because there is a disconnect between who is responsible for maintenance, and whether there is a penalty for not maintaining them.</p> <p>As a side note- Water pollution is not especially in the 'urban areas like Minneapolis.' It is state wide and the biggest factor is water polluted with fertilizers, pesticides, nitrate, and chloride.</p>	7/22/2018
6488	33	/policies/affordable-housing-production/	<p>More focus and resource on housing affordable to those at 30 & 50% AMI!</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6489	42	/policies/expand-homeownership/	The proposed zoning changes would result in existing single-family homes being replaced with apartments, which will be owned by investors. How are you going to expand home ownership while at the same time reducing the number of homes that can be owned? Low and moderate income households will not be able to afford ownership if the supply of homes that can be owned decreases. The "Tenant Protections" policy states that half of Minneapolis residents are currently renters. With the significant increase in apartments envisioned in the plan, that means an even greater percentage of residents will be renters and not home owners. There are too many contradictions and inconsistencies in this plan.	7/22/2018
6490	42	/policies/expand-homeownership/	It is a great idea to encourage home-ownership among low income residents and communities of color. Home ownership helps to build pride in neighborhoods and can contribute to wealth building. Emphasizing ownership among these groups over rental options should be highly encouraged!	7/22/2018
6491	8	/policies/public-safety-through-environmental-de	Strongly in favor of zoning that encourages more eyes on public space. Too many of our sidewalks are hidden from nearby buildings by parking, landscaping or blank walls.	7/22/2018
6492	17	/policies/complete-streets/	We are a snowy icy place. Adequate funding for snow removal and winter maintenance is a reality that is not specifically mentioned in the biking/pedestrian/transit solutions.	7/22/2018
6493	34	/policies/affordable-housing-preservation/	Protect and preserve the small 500-800 square feet single family homes. Implement tools and resources to prevent NOAH apartment buildings immediately!	7/22/2018
6494	1	/policies/access-to-housing/	<p>I've been living in Near North Mpls for 35 years...I'm strongly opposed to the opportunities investment companies will have with overdeveloping our neighborhood instead of helping citizens who hope to own a home this close to downtown.</p> <p>I've experienced the consequences of living in zip code 411, and being redlined by insurance companies, mortgage companies, and many citizens that reside in the Twin Cities area who are fearful of our neighborhood.</p> <p>Why I stayed, and bought other homes in this area is for the comfort of "living in a small town" in a big city.</p> <p>This neighborhood has always been a great asset for young families to purchase starter homes....building high density, multi density homes will eventually bring market value rental rates that will prevent people from building enough savings to purchase their first home.</p> <p>Our neighborhood will lose the strong sense of community that home ownership brings. Massive rental units will not increase home ownership..</p> <p>And as far as helping to pay for the rapid bus transit proposal on Emerson and Fremont Avenues North....the 5 bus is the busiest line in the city....it's misleading to state that the increased density is required to fund the already busiest transit route in the city!</p> <p>Put the 2040 plan on the ballot, not in the hands of short sighted council members and a Mayor who lacks the experience to make such long term planning decisions.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6495	52	/policies/human-capital-and-a-trained-workforce/	<p>These comments are part of larger suite of General Comments submitted by Doug Pierce and Mr. Deborah Pierce. A PDF of the full set of comments can be downloaded from Box: https://app.box.com/s/z0nrqftm47yotuw24l6ng0wnuuzqhm78</p> <p>The plan should include powerful economic tools that advance a generative socio-economic system and create community based economic equity.</p> <p>Extractive vs. Generative Economics Primary algorithm for both Extractive and Generative economic models: Profit = Revenue - Costs</p> <p>Extractive Economic Model (Exclusive): The model centers around Shareholders (Absentee Owners) + Self-Interest Patterns - Serve Your Own Self-interest - trickle-down economics - Maximize Financial Gains - Minimize Financial Risks - Grow Relentlessly - at almost any cost to others</p> <p>Generative Economic Model (Inclusive): The model centers around Stakeholders (Participant Owners) + Partnership Patterns - Serve Your Partnership(s), then Yourself - trickle up economics - Be Rooted in Membership - keep ownership in stakeholder hands - Mission Controlled Governance - governance by those concerned with mission - Have a Living Purpose - create the conditions for life + sufficiency</p> <p>Adapted from "Owning our Future - Journeys to a Generative Economy" http://www.marjoriekelly.com/books/owning-our-future/</p>	7/22/2018
6496	20	/policies/transit/	<p>The city must do more to drive realistic improvements on transit and not sit on its hands waiting for the federal, state, and metro council to eventually get around to funding. The cost of converting Minneapolis' most used bus lines to aBRT is tiny compared to the benefits. The \$35 million D line aBRT has been constantly pushed back even though it's projected to have 5,000 more daily riders than the \$1 billion Riverview Corridor and 2/3 the ridership of the \$2 billion Southwest LRT. The city must be more proactive on improving transit and not just hand waving when other government entities predictably undermine Minneapolis in favor of other constituencies.</p>	7/22/2018
6497	41	/policies/tenant-protections/	<p>Crack down on problem landlords with higher fines, follow-up inspections and penalties for noncompliance!</p>	7/22/2018
6498	1	/policies/access-to-housing/	<p>I am strongly in favor of all five of these proposals. We desperately need more housing options than just the large expensive single family homes that are being built. The city is already becoming affordable only for those with significant means. Increasing the housing mix across the entirety of the city is a good way to increase affordability.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6499	0.1 /topics/land-use-built-form/		<p>These comments are part of larger suite of General Comments submitted by Doug Pierce and Mr. Deborah Pierce. A PDF of the full set of comments can be downloaded from Box: https://app.box.com/s/z0nrqftm47yotuw24l6ng0wnuuzqhm78</p> <p>For projects that increase density beyond the current zoning levels, use a Planned Unit Development (PUD) process coupled with clear and well-developed guidelines to shape developments (even at the individual lot level) so that they provide well considered community benefits. Criteria and guidelines can be clearly defined in advance providing some certainty for residents, neighborhoods, developers and city staff.</p> <p>Develop Small Area Plans (with deep public engagement) for all density corridors. The plans can then become part of the PUD baseline requirements, guidance and the criteria noted above.</p> <p>Use a prescriptive PUD model with regenerative + resilient design baselines, clear guidelines and criteria to do the following:</p> <ul style="list-style-type: none"> â€¢ Use enforceable Community Benefit Agreements (CBA's) as part of all PUD's: Establish a list of compensating community benefits in return for flexibility in uses, density, and other factors. Uses could include pocket parks, community available meeting + activity space, highly affordable space for daycare, tool shares, repair shops, reuse shops, maker space, co-work space, community radio, newsletters and local internet, community bike repair, bus shelters, community solar gardens, community rain gardens, community vegetable gardens. Examples: RELi Resilience Rating System - Energy, Water + Food Category Requisites and Credits: http://online.anyflip.com/zyqc/ojoi/mobile/index.html#p=46 	7/22/2018
6500	80 /policies/development-near-metro-stations/		<p>Not all metro stations are the same and should not be treated as such. Some are very close to lakes and parks. Some are near busy streets while others are in more residential neighborhoods. The development of dense housing, commercial enterprises and plazas should be in keeping with the natural resources and characteristics of the specific station.</p> <p>Prohibiting park and ride facilities near metro stations seems like a sure way to reduce reliance on them!! This seems counter to virtually all the policies that have been designed to encourage ridership in the past. This seems foolish!</p>	7/22/2018
6501	2 /policies/access-to-employment/		<p>Many of the fortune 500 companies in the metro area have left downtown and set up corporate campuses in the suburbs. Those employers represent some of the best paying jobs with the best benefits and potential for long-term career growth and advancement. How are you going to get those employers to return to the city? How are you going to prevent those that still have offices in the city from leaving? The suburbs are less expensive, offer amenities and conveniences like free parking, how does the city plan to compete for top employers?</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6502	0.1	/topics/land-use-built-form/	<p>I am concerned that our roads are not built to handle the increased density that is proposed, especially in the neighborhoods farthest away from the city core. Lyndale, Nicollet, 50th Street, 54th Street, 28th Street, 26th Street, Portland, Park Avenue, all have been restriped or engineered in recent years for traffic calming. To handle fewer cars and make the neighborhoods quieter. If we add large apartment buildings on these main streets or down by the southern border with Richfield, it will put too much stress on these local streets. It makes more sense to add density slowly and see how the area is able to absorb the impact.</p> <p>The infrastructure needs to develop as we add density. We need additional schools, parks and green space, transit capacity, services and also a way for people to get around.</p> <p>Dreams of 15% bicycle commuting is impractical. My husband is a huge biker - he bikes to work as often as his job demands and weather permits, but year-round he maybe bikes 20% of the time. He is only able to do this because his office building has a shower and facilities for him to change when he arrives at work. This is not practical for many people. I personally could not physically bike that far, nor is there any way for me to shower and get dressed at work. A bus would take over an hour each day. Instead I drive and arrive in 20 minutes. We would need a significantly improved train system to reduce the load on our local streets.</p>	7/22/2018
6503	58	/policies/business-districts-and-corridors/	<p>The city needs to require and promote more commercial spaces in new development, especially in popular neighborhoods, and allow more commercial spaces outside of traditional business districts. Having more commercial spaces will keep high rents from driving away small businesses and restaurants (and by default helping the proliferation of corporate chains). Allowing more commercial development within interior neighborhoods would promote small neighborhood restaurants and shops, along with galleries and other lower revenue businesses while making the neighborhoods themselves more vibrant.</p>	7/22/2018
6504	6	/policies/pedestrian-oriented-building-and-site-de	<p>Yes! Cities are best when they are dense and designed for pedestrians. For years we have undermined vital city life by putting the needs of drivers first. The city of the future must work for pedestrians. The only way to bring about a city that is functional in the peak oil, climate change era, is to begin mandating a transition to a city for people not cars.</p>	7/22/2018
6505	81	/policies/social-connectedness/	<p>Something must be done to address the ways community can participate in the city's processes. The public hearing process is often the only means to voice concerns and when non-traditional communities show up at these hearings, they are often shut down because their comments aren't "relevant". Before you build capacity for community to participate, the system in which you allow participation must be addressed! There's nothing worse than supporting a group of residents to participate in the city's process only to have them shut out of the process at every step.</p>	7/22/2018
6506	56	/policies/supporting-small-businesses/	<p>Small businesses cannot survive in communities overrun with national chains and big box stores. Please consider limiting the amount of chains allowed in the city and prioritize keeping our local, small businesses healthy! I believe it is San Fransisco that is doing something like this to actively keep their local businesses a priority.</p> <p>If I wanted to patronize chains, I would live in the burbs!</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6507	1	/policies/access-to-housing/	<p>We emphatically object to the 2040 Plan. Our major objection is to the assumption that increased density leads to more affordable housing. We believe that only happens if the character and quality of the neighborhood declines. We support affordable housing but believe it needs to be mandated. Increased density will lead to other problems preventing other goals from being achieved. Cities are vibrant when there is a diversity of population especially including families. This plan would make it very difficult for families to stay in the city since the plan is very anti-driving. Families need to get to daycare, jobs and the doctor and that is just not feasible with public transportation. On the personal side, we have some health issues and physically cannot ride a bike. Plus, it snows here. The idea of 15% of the population riding their bike in the winter is crazy. This is a safety issue.</p> <p>We would like to see more planning and decision making moved backed into the neighborhoods like the Neighborhood Revitalization Program that was in place 20 to 30 years ago.</p> <p>Specific to any future plans, Interior 1 should be only single family homes (this is what the majority of families want) and Interior 2 should be up to duplexes only.</p> <p>Other objections:</p> <p>We do not want Minneapolis to be a mini New York with the land-use patterns in Minneapolis to include districts with "every high" densities up to 800 dwelling units per acre.</p> <p>Moderate-density apartments (fourplexes) in virtually all single-family Minneapolis neighborhoods will destroy the character of neighborhoods and families will move out of the city like they do in New York.</p> <p>The Plan is based on a false premise that Minneapolis can use density to achieve housing affordability.</p> <p>The Plan allows developers to determine where density should occur, which will result in tearing down the lowest priced homes. Affordable housing has to be mandated and subsidizes need to be in place.</p> <p>The Plan will exacerbate existing traffic and parking problems when Policy 6 eliminates requirements for adequate off-street parking. Penn and 50th is already a traffic problem and will only get worse with the increased density. Sitting at the light for three cycles is not</p>	7/22/2018
6508	7	/policies/public-realm/	This is excellent. A healthy, safe city is one that has a vital street life. We should take to heart the discussions of an effective social life of cities posed by Jane Jacobs and William Whyte.	7/22/2018
6509	38	/policies/affordable-housing-near-transit-and-job-	Part of building affordable housing means building more housing, generally. The city should allow different dwelling forms, outside of the single family home structure.	7/22/2018
6510	19	/policies/bicycling/	Promoting bicycle use is laudable. However, the size of the investment should be commensurate with the number of people who use bikes relative to other modes of transportation. According the the census, about 5 % of Minneapolis commuters use bikes. Even if the rates doubles or even quadruples that still means that cars and buses will be the predominant vehicle on roadways. Do not expend an inordinate amount of tax dollars to change roadways that will not benefit the vast majority of users. Bike lanes on busy city streets are terrifying. Keep everyone safe and route bicycles to bike paths and side streets.	7/22/2018
6511	33	/policies/affordable-housing-production/	We need policies in place that make affordable housing happen.	7/22/2018
6512	0.1	/topics/land-use-built-form/	Minneapolis: backward facing regressive plan. Way to go you guys, this is a planned disaster	7/22/2018
6513	18	/policies/walking/	I would also like to suggest that the city consider using municipal funds for clearing snow and ice from sidewalks in the winter. Having a functional, walkable city requires clear sidewalks year round. Too many residents engage in the anti-social choice of not properly caring for their sidewalks in winter.	7/22/2018
6514	65	/policies/urban-agriculture-and-food-production/	I strongly support efforts to increase food production in the city.	7/22/2018
6515	29	/policies/creative-sector-economy/	The largest assistance that the plan could give the creative sector is to protect the existing areas where artists live and work from more lucrative market driven development. Particularly endangered is the Logan Park and Central Avenue neighborhooda where the former industrial sites are shown on the built form map as opportunities for large scale, high density residential buildings.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6516	16	/policies/environmental-impacts-of-transportation/	<p>The 2040 plan is the city's last serious chance to take significant steps in fighting carbon emissions. This means prioritizing low carbon transportation and low carbon lifestyles. We need more bus only lanes and we need more density within walking distance of those routes. We need safer infrastructure for cyclists and pedestrians a complete network, not just randomly scattered broken links like Washington Ave. The plan needs to have concrete language about giving other modes priority over single occupancy vehicles within neighborhoods, which could include things like designating streets as bicycle infrastructure so that speed limits can be lowered (while lobbying to change state law), changing the standard design of neighborhood streets so that they're reconstructed to 15-20 mph design speeds and following Seattle's lead by adding traffic circles at intersections neighborhood streets.</p>	7/22/2018
6517	0.1	/topics/land-use-built-form/	<p>Councilman Johnson, Mayor Frey,</p> <p>I have resided in a very small home in the NENA neighborhood for 9 years, after 20 years in MPLS and San Francisco in studio apartments. I urge you to be more thorough in researching predicted outcomes and the impact it would have on the city and the broader region.</p> <p>Changing zoning from single family to 4-plex would obliterate the historic character of my worker-class neighborhood and replace it with a free-for-all for developers and their cookie cutter infill with drag & drop features, aiming for the highest rent they can get. Homeowner's unique pollinator gardens and shade trees would disappear, and casual interactions with neighbors while tending the yard would decrease.</p> <p>Housing is expensive, no doubt, but there are ways to make it more affordable. Not every apartment unit needs the amenities that seem to be default now. Wouldn't units in buildings that have been built recently be more affordable if they did not have in-unit washers & dryers, concierge service, and yoga rooms? Developers can make more money with those features, so what's to stop them from putting those inessential amenities in their buildings?</p> <p>Minneapolis should not aspire to be San Francisco or New York City. We love our lakes, our green corridors, our summers outside, clean air and breeze, and the fact that we are hardy enough to shovel snow and drive icy roads. Don't take that away.</p>	7/22/2018
6518	42	/policies/expand-homeownership/	<p>Great ideas! Supporting home ownership among low income residents and people of color is far better path to affordable housing than building fourplexes throughout the city. It makes more homes affordable and builds wealth.</p>	7/22/2018
6519	17	/policies/complete-streets/	<p>Walking and biking are great modes of transportation for areas of the country that have moderate weather we do not also works when you have high density population and a small area like NYC not LA or MPLS. The of bicycles is good but to purposely make driving more difficult seems inefficient and adds to pollution as traffic snarls increase</p>	7/22/2018
6520	0.1	/topics/land-use-built-form/	<p>The northwest corner of Lake Calhoun includes a small neighborhood of single family homes. This plan totally destroys their neighborhood.</p> <p>Allowing 4-plexes in the Interior 1 areas reduces home ownership, and enriches developers and the rich. It fails to explain how it will help affordability or address any racial disparities.</p> <p>While the goal is to eliminate car usage, eliminating any consideration of parking is TOTALLY misguided. People go where the jobs are, and if the jobs are outside of the city proper, cars will be needed. And so will parking. Most of area 1 should have a plan for at least 1 parking spot per living unit. A 4-plex should have 4 parking spaces. If the lot does not support 4 parking spaces immediately adjacent to the lot, then off street parking should be required. There is already a parking shortage in Uptown. This plan will only spread the parking shortage to other areas of the city.</p>	7/22/2018
6521	0.2	/small-area-plans/	<p>The city needs to re-evaluate the role of neighborhood associations in guiding policy and find ways to give more voice to underrepresented groups. Neighborhood associations should be required to represent the entire community, otherwise they should be treated as what they are - advocacy groups for narrow, privileged groups of residents.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6522	92	/policies/identify-and-evaluate-historic-resources/	Not all significant historic resources are large and economically attractive for preservation and rehabilitation. A mini grant program to assist local residents and community groups in identifying the sites that create a neighborhood level of history. Sometimes just being able to tell the story of a site can aid in gaining the money needed for preservation. Grants could cover applications to the State Cultural and Historic Grant program, publicity, or business planning for potential redevelopment and reuse.	7/22/2018
6523	80	/policies/development-near-metro-stations/	I am strongly in support of this. High density nodes around transit move us towards what the city will need to be.	7/22/2018
6524	5	/policies/visual-quality-of-new-development/	We are opposed to the free zoning of 4-unit buildings everywhere, particularly in established single family neighborhoods. We are opposed to this zoning, and also with this comment, the look and quality of the new housing. We have seen this type of development in many cities, and have talked for years about how ugly it is. Examples we visit often include Denver, Calgary and Houston, cities where our sons reside. There are obvious and extensive knock-downs, rebuilt with larger buildings that don't fit existing established single family residential neighborhoods. They certainly destroy the character, and to us detracts from neighborhood cohesiveness.	7/22/2018
6525	14	/policies/tree-canopy-and-urban-forest/	<p>I agree! The Minneapolis tree canopy is a beautiful asset. Our urban forest sets Minneapolis apart from other major cities and provides so many benefits. But the upzoning in this plan will be detrimental to our urban forest and will require removal of trees and will work against this policy. Please compare the three photos above to the renditions of Corridor 4 and 6 and Interior 3 in the Built Form Map. They look nothing alike. The Built Form Map shows a couple small trees, which is nothing even close to the mature canopy that currently exists in those neighborhoods today. The upzoning vision has no lot set backs, no lot coverage maximums. Many existing trees would need to be cut down in order to make room to build new apartments.</p> <p>My home is set to be rezoned to Corridor 4. The street I live on does not have a boulevard, so the only trees I have are in my back yard. I have a 100+ year old white oak and a mature black walnut. Both large trees extend well over the property lines on both sides. If a neighbor were to sell their home and a 4 story apartment was built, both of those beautiful trees would need to be cut down. They would not survive having substantial large limbs removed to make way for a 4-story structure, and there would be no space for them to continue to grow on my small narrow lot.</p>	7/22/2018
6526	0.1	/topics/land-use-built-form/	The environmental consequences of upzoning either weren't considered, or were disregarded.	7/22/2018
6527	1	/policies/access-to-housing/	It's somewhat disappointing that there seems to be no effort to promotion the creation of new neighborhood business nodes in many of the outer neighborhoods. I live in Waite Park. There are not enough businesses in the interior of the neighborhood. I would love to have more businesses within walking distance of my home.	7/22/2018
6528	7	/policies/public-realm/	There needs to be a much more integrated approach than just saying add more housing. Public transportation and infrastructure needs to be addressed more fully. Water pressure is already low at the edges of the city. Public transportation does not get people to their jobs in a timely manner (it takes me 1.5 hours to get to my job by public transport, and my daughter 2 hrs).	7/22/2018
6529	0.1	/topics/land-use-built-form/	The largest barrier to a better public realm is that the vast majority of public space in the city is devoted to the transportation and storage of cars. By policy allow any neighborhood business to create pop up parks or bike corrals in street parking spaces in front of their business. Lower traffic speeds on all neighborhood streets and redesign those streets to be slower. Prioritize the safety of cyclists and pedestrians.	7/22/2018
6530	18	/policies/walking/	This is a great plan to allow more people to live in the neighborhoods that are most desirable in the city. Any change to the neighborhoods will be gradual and over time people will accept the new buildings as integral parts of their neighborhoods. The current zoning for these neighborhoods ensures that only the wealthiest can afford to live in these neighborhoods and opening them up to greater density will benefit a large number of people.	7/22/2018
			Please don't forget about our elderly, our winters and our current culture. In a utopian setting, people would all be able to walk to nearby amenities throughout life and throughout the year. This isn't realistic in the near future. Car access will remain important in our culture until public transportation is greatly enhanced and we make a major transition in life style. Narrowing roads and focusing mainly on pedestrians and bicyclists will exacerbate already worsening traffic issues. Little attention seems to be paid to parking (a major issue in much of Minneapolis), as well. We need to consider many issues when contemplating and planning for transportation in the future.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6531	0.1	/topics/land-use-built-form/	<p>My name is Alex, I live in the Howe neighborhood, my wife and I finally bought our first house, but have lived in Minneapolis for 33 years. It is a dwarf compared to what is being proposed, we have a one story, modest starter home. In an already unaffordable and competitive market, thanks to house flippers and real estate investment groups, we felt lucky to find this property. It is the type of house that under the 2040 plan, we would have been outbid by a developer who would tear it down to build taller.</p> <p>My biggest concerns have been addressed in many of the letters to the editor and other comments I have read online. The language used in the 2040 plan is great: racial and economic equity, diversity, affordable housing, and innovation, but language will only get us so far. There is no way that the developers, coming from who knows where, are actually interested in achieving, aside from density, the goals outlined in the 2040 plan. The idea that density will generate a more competitive and therefore affordable marketplace for housing is naive, as these properties are flipped they will drive up property value and taxes and drive out single families that have lived in this city for generations. This wool over the eyes planning has happened across the country and is going to happen here if the plan continues. We need responsible growth, you can't just decide that whole swaths of the city can be rezoned, and open the possibility for people with money to just make yet another power grab by developing lucrative rental property. This development needs to be regulated, local, equitable and phased.</p> <p>Phased: Development and rezoning is first allowed on corner lots, and then if those units are rented or purchased (condos), there are neighborhood/area meetings to discuss further rezoning. The eventual long term plan could be on a percentage basis, i.e on a city block along a bus line, 4 corner lots were rezoned, and then meetings held to determine the percentage of other lots that could be rezoned (neighborhoods decide this % as it is directly correlated to their property value and taxes).</p> <p>Size: The rezoning along bus lines should be no larger than 2.5 stories, this limits density to about 12 units per property. If a single family house is demolished and replaced by a 12 unit building, the density increase is dramatic, anything larger will have a more significant negative impact on the neighborhood. For 5 years I lived in the powderhorn neighborhood near 31st and 12th ave, here there are large 4 story brown stones and they limit area parking, increase congestion, and dramatically change sightlines/shade/yard use.</p> <p>Congestion: The rezoning proposal lists the current zoning from my address, stating "The Interior 2 district is typically applied in parts of the city that</p>	7/22/2018
6532	80	/policies/development-near-metro-stations/	<p>Prohibiting auto-oriented uses and park-and-rides will reduce use of the metro lines for people who do not live close to the station. That's a bad policy.</p> <p>All metro station areas are not the same. Some will support very high density. Others, like the stations near the lakes, parks and trails will not (e.g., NW corner of Bde Maka Ska and Byrn Mawr Station). The policy should allow the plans to be tailored to the neighborhoods and environment.</p>	7/22/2018
6533	6	/policies/pedestrian-oriented-building-and-site-de	<p>I fully support all of these policies. We will not have healthy neighborhoods if those neighborhoods are built around the transport, storage, and maintenance of automobiles. Reducing the impact of automobiles and facilitating the ability of people to be on street is essential.</p>	7/22/2018
6534	12	/policies/lighting/	<p>Lighting should also not emit too much blue light which interfere with sleeping.</p>	7/22/2018
6535	0.1	/topics/land-use-built-form/	<p>I believe the zoning to allow 4 unit, 2.5 story units will destroy many of our neighborhoods with our beautiful old homes and in general very small lots. We live very close to our neighbors today and if each of our homes turned into a 4 plex</p>	7/22/2018
6536	3	/policies/production-and-processing/	<p>The policy is missing a vital job creation component in the Production and Distribution section - Industrial Manufacturing (highest wage opportunity), industrial land sites (development acreage) and commercial-residential land for building affordable housing for employees.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6537	1	/policies/access-to-housing/	Equity/Community: Using the language of love, empowerment, growth, collaboration is inspiring and sounds great, however many of the policy/goals are things that we as a city have been striving for and have missed the mark on already. I'm not suggesting we need to be stagnant and not have goals or policies of change, but this plan is proposing changes that don't support existing neighborhoods and their community. It is unacceptable to release a plan like 2040 in this way: mostly finished, and asking for comments. It is reminiscent of how oil companies operate, they arrive with the pipe and start saying that the pipe is already here and they already dug a whole so community and environmental impacts are inconvenient and ultimately not lucrative for them. There needed to be and still needs to be a clear commitment to respecting the residents and homeowners and their families as they will bare the burden after 2040. I heard about this plan by a neighbors yard sign, I never received any documents from the city about the plan or meetings. It seems like goals involving community/equity/outreach/access are improbable when the communication/planning was behind closed doors.	7/22/2018
6538	0.1	/topics/land-use-built-form/	I believe the zoning to allow 4 unit, 2.5 story units will destroy many of our neighborhoods with our beautiful old homes and in general very small lots. We live very close to our neighbors today and if each of our homes turned into a 4 plex it would eliminate any sense of privacy. I am very opposed to such loose zoning. We have seen the downside in Houston, Calgary and Denver.	7/22/2018
6539	93	/policies/stewarding-historic-properties/	As per item k. above the city preservation policies should encourage building owners to improve their properties in a way that is appropriate to the specific structure involved. The historic districts are frequently defaulting the Secretary of Interior's Guidelines for technical preservation. The guidelines are appropriate for structures where the individual significance justifies the high level of conformity to the rules. In a large district such as the Warehouse District with a number of sizes and ages of structures the federal guidelines are too blunt of an instrument to enforce. Thought needs to be given to the economic viability of a structure and the return that will come from exterior improvement. A culture of fear is occurring where building owners are reluctant to put money into smaller structures resulting in deterioration or the buildings being sucked into larger developments.	7/22/2018
6540	83	/policies/people-with-disabilities/	Require extensive training, background and possibly other testing to ensure staff are qualified to care for individuals with mental or physical disabilities	7/22/2018
6541	79	/policies/healthy-youth-development/	Invest in school supported programs. Children often rely on the school staff and connect better within programs including them. Keeping programs related to social emotional development within, through qualified staff and programs advocating for it is extremely beneficial.	7/22/2018
6542	5	/policies/visual-quality-of-new-development/	I believe that any new construction requires tight approval of design, materials and size to ensure it fits with the neighborhood and is appropriate for the lot size. We have spent a lot of time in Denver and Calgary and they have many oversized units (twin homes and 4-plex units) that are much too wide and/or tall and/or are very trendy boxy construction that do not fit with the traditional homes. In all cases, they are not more affordable. I do not want Mpls to turn into that and lose its charm.	7/22/2018
6543	47	/policies/housing-maintenance/	This plan is filled with contradictory goals. Did different individuals draft different sections without talking to each other? How can you "Ensure the preservation and maintenance of existing housing stock" while simultaneously rezoning the existing housing stock in the hopes that it is developed into something else?	7/22/2018
6544	92	/policies/identify-and-evaluate-historic-resources/	Restore St. Anthony Falls! It is the main reason Minneapolis is here. Work with the Army Corps of Engineers to rebuild the falls, replacing the concrete slide and useless lock and dam that exists now with a recreation reflecting the falls's natural, preindustrial state. What a tourist draw to have the largest natural falls on the country's largest and most important river in the heart of our town. What a view from the stone arch bridge.	7/22/2018
6545	0.1	/topics/land-use-built-form/	There is no way that the 13 City Council members can speak for 380K Minneapolis citizens when it is voted on by the Council. There was NO serious notice of the plan, which feels very intentional, and the Plan only advances the interests of our elected officials who have been influenced by developer campaign contributions. We are not stupid. Trash this plan and start over - a compromise is still egregious and unnecessary.	7/22/2018
6546	15	/policies/transportation-and-equity/	The city should be looking into the disparity when it comes to modes of transportation. It appears the city is giving primarily POC areas lack luster BRT without dedicated lanes, so they will just be as reliable and just as slow as current busses, while giving more wealthy and white areas LRT which have their own dedicated lanes and are faster. There should not be this discrepancy between POC and white people when it comes to transportation	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6547	15	/policies/transportation-and-equity/	<p>The city needs to start moving on its street car plans, but also look at it to update it. There are multiple proposed lines that would work better as light rail as they would have more riders per week than the blue line currently does. Under investing in transportation is bad for the city, and the city should be aggressively building out light rail lines building and least two or three at a time to build a complete system that connect the whole city.</p>	7/22/2018
6548	1	/policies/access-to-housing/	<p>Hello 2040,</p> <p>I wanted to make sure I comment on the proposed land use in the 2040 plan.</p> <p>We live in Bryn Mawr on a block that would allow for six story apartments. This is not acceptable.</p> <p>Bryn Mawr is the first neighborhood outside of downtown heading west. The single family homes should remain as such without new zoning ordinances.</p> <p>There is much more land that is available in the city for high density development. This land should be developed first before changing the current neighborhood zoning.</p> <p>Available land examples: The MPLS impound lot and surrounding area known as the banana. Glenwood avenue corridor Downtown open lots from the North Loop all the way to the West Bank Open lots in the Marcy Holmes neighborhood Open lots all along East Hennepin Open areas on Central Avenue Open lots on Stinson Boulevard The Hiawatha corridor</p> <p>Until these areas are fully developed with appropriate housing for all (high end and affordable), the zoning laws should not be changed to impact single family homes in the neighborhoods that make Minneapolis so special.</p> <p>Thank you, Ilan Weiss</p>	7/22/2018
6549	1	/policies/access-to-housing/	<p>Mpls is known for a variety of neighborhoods and housing types that enable life-cycle and affordable housing. SF/duplex areas, such as my neighborhood, need to continue to be a part of that mix. The neighborhood wide blanketing of approach/action e (widespread upgrading/upzoning to 4 units/parcel) goes against the mix and diversity of neighborhoods and housing types that I and my neighbors and others moved here for in the first place.</p> <p>Such potential actions (e) have many potential consequences, and such be focused within 1/2 mile radius of LRT and high frequency fixed route transit stations and 1/4 mile either side of such transit routes.</p> <p>Widespread blanketing of approach/action e will have negative consequences including loss of diversity of medium density single family/duplex neighborhoods and housing types. Other consequences include increased costs and needs and less livability in the areas of stormwater management, snow and ice management and removal, noise (in general, and closeness of more neighbors), solar access for energy and for sunlight into people's living areas, and urban heat island effects (including the types and amounts of trees and greenery possible), among others.</p> <p>Action e should either be eliminated, or modified to focus on transit station areas and transit corridors, and designed pedestrian and/or community commercial corridors.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6550	75	/policies/waste-reduction/	Has the city done an analysis of the environmental impact of tearing down thousands of existing homes over the next 20 years and constructing new 4-8+ apartment buildings in their place? Does the city's waste management or surrounding communities have landfill space to handle that much waste?	7/22/2018
6551	0.1	/topics/land-use-built-form/	As much housing as possible, please! The fewer restrictions the better. Not Interior 1! Density means more jobs, lower housing costs, more economic development, and less pollution. Restricting housing only protects those who already have everything they need, without caring about generational poverty, the environment, or even their own grandchildren.	7/22/2018
6552	15	/policies/transportation-and-equity/	It takes 45 minutes to get from the University of Minnesota to uptown using transit. At the same time it takes 15 minutes to drive to Robinsdale from the the U. It should not take triple time to move within the city than driving to a burb. We need a high capacity, rapid transit system in this city that is either grade separated or has dedicated lanes.	7/22/2018
6553	0.1	/topics/land-use-built-form/	<p>We are homeowners in southwest Minneapolis. We would like to stress two concerns about the first-draft proposal:</p> <p>1) Magnitude of the proposed changes:</p> <p>We are not categorically opposed to residential zoning changes, but the change in the scale of building that would be allowed along transit corridors in SW Minneapolis seems extreme. Allowing for four-story apartment buildings on a (currently) single-family home residential block would drastically change the nature of the neighborhood on both developed and adjacent blocks. Surely a more incremental change is called for.</p> <p>2) The distribution of plan costs:</p> <p>Rezoning can be accomplished with minimal direct financial outlays by the city, but that does not mean that the plan is costless. Rather, certain residents will bear the costs (and benefits) indirectly by changes in property values.</p> <p>If the city makes an improvement on our block, the cost is not paid by the Minneapolis taxpayer at large. Instead, we and our neighbors are charged an assessment. This makes sense: because we and our neighbors are the primary beneficiaries, we bear the costs.</p> <p>Affordable housing in Minneapolis is framed as a benefit to the city at large. If this is indeed the case, then the costs should be borne broadly by residents, not shouldered narrowly by property owners who unluckily own homes whose value falls due to nearby zoning changes.</p> <p>We are a lucky family, but we are not 1 percenters. We stretched our budget to be able to afford to live in our neighborhood because we like it the way it is and long has been. The first-draft plan stands to undo a great deal of careful planning and saving by us and many of our neighbors. We ask that the city take account of these concerns in the upcoming revision.</p> <p>Sincerely, Luke and Emily Threinen</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6554	0.1	/topics/land-use-built-form/	<p>Policy 1 of the Minneapolis 2040 plan is well-intentioned, but it's heavy-handed design is unlikely to accomplish little to reduce disparities or generate affordable housing. Rather, the plan essentially turns over the planning and development of the city to the short-term interests of developers -- whose incentives and planning horizon are in direct conflict with the what City Planners hope to accomplish for 2040. Under the plan, developers would be allowed to develop 4-unit housing on any lot in the city and combine adjacent parcels in select neighborhoods (such as mine, Lowry Hill). These developers would seek to maximize their profit, and minimize the time required to recoup their investment. They will not be beholden to adhere to the character, quality, or livability of the neighborhood -- but whatever will sell at the highest possible price they can obtain. Put simply, while they may care about density, they most certainly don't care about creating affordable housing or reducing disparities (unless that's what market forces demand, or there are other policies or inducements for them to care). Loosening development restrictions gives developers the 'keys to the candy store'.</p> <p>In contrast, home owners have a much longer time horizon and incentives that drive them to invest in maintaining and improving their homes and in building good relationships with their neighbors. The rich fabric of neighborhoods Minneapolis boasts today are a testament to those incentives.</p> <p>In unfettering development, the plan will create decades of uncertainty and real DIS-incentives for homeowners to invest in Minneapolis. Home ownership is for many people their single, largest investment. Why would they invest in Minneapolis -- a risky investment where the rug is likely to be pulled out from underneath them by a multi-plex next door -- when they can invest in the stability and a reliable quality of life in a suburb?</p> <p>I urge City Planners not to abdicate responsibility for creating a livable, affordable, environmentally-smart city to the interests of developers. In outlining sweeping, ham-handed zoning guidelines, the plan takes the 'easy path'. But it's a plan that will destroy the very fabric of the city and result in clear winners (developers) and losers (today's homeowners) without making a dent in affordability or disparities. Instead, you need to look for ways that balance the incentives and interests of all stakeholders -- and that rely on those incentives to create the desired outcomes. This will undoubtedly be a much more complex answer -- and more difficult to find -- but our future demands that you try harder and find a better solution.</p>	7/22/2018
6555	35	/policies/innovative-housing-types/	<p>As a tax paying resident and a constituent of the City of Minneapolis, I strongly oppose your plan. It must be reworked.</p> <p>I recognize that a lot of work and good intentions went into this plan and I too want to advance the interests of all citizens regardless of life-position and circumstance and foster economic growth.</p> <p>But in pursuing those aims you have badly missed the mark by pushing this plan that does not take into account the unique differences and circumstances associated with different neighborhoods and constituencies.</p> <p>The outcome is a one-sized-fits-all zoning policy that blankets the entire city. Unbelievably, your plan would allow almost any residential lot in the city to be bulldozed and turned into a fourplex apartment or condo building. And further, your plan permits almost any single-family home or duplex within two blocks of a bus line to be turned into a sixplex or larger complex. And you propose changes in transit corridors that will further erode existing housing stock. Rather than target density to avoid disruption to our neighborhoods your plan offers density anywhere and everywhere a developer manages to purchase properties.</p> <p>This is a dream plan for speculators and developers. It is a free-for-all that leaves every resident who has invested in their neighborhood's current character at threat of waking up to a vastly different reality in their small corner of the city. You've wrapped this vision up in admirable notions that citizens support: affordable housing, social justice, environmental protection, and others.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6556	1	/policies/access-to-housing/	<p>As a 4th Ward Resident, I am invested in helping my neighbors who face the most economic challenges and disparities today and help them have more prosperity and wellbeing. To me, the goal of simply adding more units of affordable housing in this area makes no sense given we are not able to truly provide safe schools, economic opportunities and eliminate health disparities today. Adding more affordable units here would only exacerbate current disparities and provides no upward mobility, and opportunities to improve community health/wellbeing. Instead of adding more units we need to be thinking - How do we help the existing residents in the 4th ward, get better jobs, access to healthcare, get more social and family supports? Let's eliminate disparities and help the current residents by helping them stay in their homes, improving the substandard rental units, reducing crime, getting everyone access to healthy food before adding units. We have the majority of "affordable housing" today and our community is undererved. If we can't get it right today, what would it solve by adding more units? At the same time as we improve the living for current residents, let's help them stay in their existing homes, and improve the quality of life. Let's help them own property and if they must rent, make the rent super affordable and the units much nicer and safer.</p> <p>At the same time, help people get access to affordable units in other more upscale Wards. These wards have better schools, more amenities and are more able to support lower income folks.</p>	7/22/2018
6557	15	/policies/transportation-and-equity/	Add a fun street car route around the Grand Rounds!!	7/22/2018
6558	18	/policies/walking/	This is great but we need to do more. Intersection designs in pedestrian areas should be reoriented to pedestrians. Turning radii should be as narrow as possible. Slip lanes should be removed. Ban right turn on red. The Lake St-Midtown LRT station is the fourth most popular on the Blue Line behind the MOA, Airport, and US Bank Stadium, yet to get there from the east once a person manages to cross multiple entrances to drive through restaurants and big box stores requires crossing *four consecutive slip lanes* to and from what's practically a freeway. The city needs to be more aggressive and more concerted in restoring these spaces to pedestrians than what this policy implies.	7/22/2018
6559	0.1	/topics/land-use-built-form/	<p>My address is 2112 Oliver Ave S. I am at the base of a peninsula surrounded by Lake of the Isles. With the addition of a restaurant on 21st street, across from Kenwood School, we have severe driving and parking issues already. In the winter, with snow banks and snow emergencies, there are times when 21st isn't passable by emergency vehicles. Allowing denser housing along this already stressed little street the passes from the lake, by a church and a school up to the twisty, hilly streets of Kenwood could not have been proposed by anyone who has actually seen the street and the neighborhood. Apart from fundamentally changing the character and livability of our historic neighborhood, the density proposal lacks a common sense understanding of the physical limitations of an area by a lake, in a penninsula, with hilly, winding streets and established historic buildings with footprints that can't be changed. The proposal is flawed for many reasons, as I'm sure my neighbors have pointed out. But the literal physical impossibility of the plan, in a neighborhood already taxed by the delivery and patron traffic from a small restaurant, competing with school buses and parent pickups and drop offs on both 21st street and Penn is something that was clearly overlooked. The plan for Kenwood is fundamentally flawed and must be rejected.</p> <p>Sarah Brew 2112 Oliver Ave. S. Minneapolis 55405</p>	7/22/2018
6560	82	/policies/aging/	We need more supports to help people age in place. We also need more assisted living communities and units.	7/22/2018
6561	88	/policies/public-services-policy/	<p>"b.Engage the public when making decisions that create, remove, or change a city service, project, or policy." - It would have been nice if you started this now. If it wasn't for social media, I would never have known about Minneapolis 2040! Finding out about such an impactful policy change through the neighborhood rumor mill on social media is ridiculous. Why wasn't this communicated to residents directly in a written notice? Why wasn't this plan communicated through various means and methods?</p> <p>The Minneapolis Waste Management department regularly mails all residents helpful reminders about recycling, organics, hazardous waste, etc. If one city department has figured out how to reach all residents and provide written notices, then there is no excuse for Minneapolis 2040.</p>	7/22/2018
6562	84	/policies/public-safety/	As a 4th Ward resident, we need to improve police responsiveness and go after smaller crimes that impact livability (package thefts, car break ins, etc.)	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6563	0.1	/topics/land-use-built-form/	Do not bulldoze our neighborhoods. The proposed open zoning is not acceptable. The execution of this plan to date has been hypocritical as evidenced by the city support of developments such as Elan, Flux, etc. in areas with relatively convenient public transportation. The residents are overwhelmingly, white, young and affluent in contrast to the stated goals of diversity, inclusion, and affordable housing. It is just sad that new developments continue to be allowed against the recommendations of neighborhood organizations such as CARAG and East Isles, such as the Moxie Hotel (Emerson & Lake) and the complex at between Lake/31st/Holmes/Humbolt. Fix the schools, roads, police, transportation, etc. but leave our neighborhoods alone.	7/22/2018
6564	63	/policies/food-access/	In the 4th ward, we need city employees and the Parks Department to create small mini gardens for access to fresh veggies. Plant fruit trees and bushes we can all enjoy!	7/22/2018
6565	80	/policies/development-near-metro-stations/	I am opposed to allowing and encouraging high rise development over existing 1-story retail at Calhoun Village shopping center on 3 grounds: 1) I would lose passive solar heating in winter and sunlight year-round at my Calhoun-Isles Condominium due to shadowing of proposed 30-story residential over current Calhoun Village shops at 3100 West lake Street 2) I would lose access to walkable retail amenities for grocery/liquor, drug store, book store and coffee shops, and numerous restaurants. 3) Increased traffic on already traffic-choked West Lake and Excelsior intersection would greatly erode my quality of life. Dean Parkway is already backed up during certain hours blocking access to Calhoun Islaes Condo via Dean Ct.	7/22/2018
6566	63	/policies/food-access/	And who will decide what is nutritious and unhealthy? Would it not be simpler to transport the shoppers to the grocery store and back?	7/22/2018
6567	0.1	/topics/land-use-built-form/	I strongly believe that this should be passed. I really like that they are trying to push for more housing all over the city. There shouldn't just be housing in small sections of the city!	7/22/2018
6568	18	/policies/walking/	The 44th and Osseo Road intersection is a hazard. It needs to be re-designed to improve safety and slow traffic. It also need to be more biker / pedestrian traffic. This will help the neighborhood be more livable and improve access to North Market and Webber Library.	7/22/2018
6569	18	/policies/walking/	Need to add another walking safety issue that still seems to always get skirted. Snow removal of sidewalk surfaces in Winter along "many" city sidewalks is not being made clear to homeowners and/or owners that rent single family homes. Often.....some sidewalks are so unsafe(ice) for nearly the whole winter season. If this is occurring year after year now.....I'm not be so confident with many additional small multi unit absentee landlords would be responsible nor be held accountable. No matter what.....we need to be more creative with ways to make certain that ALL surfaces be safe for walkers year round citywide now and in 2040 and beyond, particularly if we feel that walking is our first step toward creating a cleaner air quality and helping reduce climate change .	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6570	17	/policies/complete-streets/	<p>PEDESTRIAN SAFETY: I am a retired single woman living in Uptown who gave up her car 9 years ago as an experiment to try to live without a car" in Minneapolis. 9 years later I am still "car-less" but in my 49 years living in Uptown, I am the ONLY PERSON I KNOW in the neighborhood without a car. It isn't easy to live car-less in Minneapolis!</p> <p>I use the bus and walk to most places. If I can't get to my destination by bus, I'll take a Lyft ride or I'll use Hourcar. These services are helpful, but they are not the solution for everyone.</p> <p>The best thing the city could do to make the sidewalks and streets safer for pedestrians is to convert the one-way streets (Lagoon and Lake Streets especially) back to two-way and SLOW DOWN the speed of vehicles in Uptown.</p> <p>Right now, Lagoon and Hennepin is one of the most dangerous intersections in the area. Two lanes of traffic are turning off of Hennepin on to Lagoon. And all lanes of Lagoon are during across Hennepin. It's not easy for people with walking difficulties to make it across, and as I observe transit users, MANY of them are walking difficulties.</p> <p>PARKING CRISIS. There are at least 4 (four) reasons that parking is going to be an increasing problem in Uptown. At the very least, PERMIT PARKING in street and avenues adjacent to major transit lines will be required to ease the situation. Ideally, we should REVISIT CITY ORDINANCES for parking spaces required in new apartment and commercial developments.</p> <p>1) Transit users who own cars. I see a lot of people on the bus for work and school during the week, which is great, but most transit users own cars and use them to get around evenings and weekends!</p> <p>In my neighborhood, if these transit users live in classic small apartment buildings without garages, they leave their cars parked on the streets. Just take a look at Girard and Fremont any weekday. They are solidly lines with cars.</p> <p>2) Non-resident parking. In addition to residents, some folks are using the residential streets in Uptown as their own "park and ride" -- driving in from suburban neighborhoods, parking free on our streets, and hopping on a bus for the last 20 minutes to downtown.</p> <p>3) New residential and commercial construction. A lot of large, high-density apartment buildings are going up near transit lines. And clearly that is the direction Plan2040 WANTS the city to go! Because city ordinances no longer require developers to provide 1 (one) reserved</p>	7/22/2018
6571	15	/policies/transportation-and-equity/	<p>Equity must also include easy transportation for those who do not bike or walk or find it easy to use public transport. Downtown will lose it's population of retired folk (high property tax payers!) if the focus on downtown streets continues to be fewer car lanes and more bike lanes. Most of us "elders" who live downtown rely on driving, which has become a nightmare downtown. It would be helpful if bike lanes were devoted to certain streets, leaving others with a full complement of car lanes.</p>	7/22/2018
6572	1	/policies/access-to-housing/	<p>There is a need to preserve areas with single family houses and not permit up to 4 unit buildings to be built everywhere. Our single family home is now overshadowed by a 3 story house and a 20 foot (yes 20 feet 2 stories approved) garage with 2 full floors. There is almost no green space left and the house overshadows our 1.25 story house so we have to turn on lights to read on a bright sunny day.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6573	1	/policies/access-to-housing/	<p>I'm all for increasing the supply of housing and diversity but it seems like what is not understood is that people CHOOSE neighborhoods.</p> <p>I've lived in Minneapolis most of my adult life. I left home on the Iron Range at age 18 and attended the University of Minnesota. I lived in apartments with roommates in SE Minneapolis which was appropriate to my situation at that time. I used the bus for most of my transportation.</p> <p>After I graduated and started my career, I lived near Uptown in my own apartment--again, appropriate for my situation--an urban professional starting her career. I took the bus to work most of the time.</p> <p>I've lived in SW Minneapolis since 1989. As my career progressed, I NEEDED to drive to work. My workplaces in the suburbs were not easily accessible by public transportation and I wanted to continue to live in Minneapolis where I have access to restaurants, grocery stores, entertainment and community activities.</p> <p>I am now retired. We've paid off our mortgage but of course continue to pay Minneapolis' high taxes for the neighborhood we've chosen. We plan to travel in our retirement and so need vehicles. We take the bus when it works--like for Lynx games. But we need our cars to allow us the freedom we've earned.</p> <p>I worked in research during my career and often used demographics and psychographics to determine target markets and how to reach them. I learned that "birds of a feather flock together." To manipulate peoples' options in housing is denying choice.</p> <p>It seems like North Minneapolis needs more support to develop good options for affordable housing, including more home ownership; SW Minneapolis, not so much. I'd be fine with using tax dollars to strengthen the areas of Minneapolis that actually need support.</p>	7/22/2018
6574	1	/policies/access-to-housing/	<p>There is a need to preserve areas with single family houses and not permit up to 4 unit buildings to be built everywhere. Our single family home is now overshadowed by a 3 story house and a 20 foot (yes 20 feet 2 stories approved) garage with 2 full floors. There is almost no green space left and the house overshadows our 1.25 story house so we have to turn on lights to read on a bright sunny day.</p>	7/22/2018
6575	9	/policies/open-spaces-in-new-development/	<p>Policy 9 - Open spaces in new development</p> <p>In many instances the Built Form Maps seem to directly contradict the goals of the Policies.especially Policy 9 and the Transportation policies.</p> <p>For example, the Policies state that Preference is to be given to walking/pedestrians, secondly to bicycles, and third to cars and other forms of motorized vehicles. However, the Built Form Maps show the intention to allow higher density housing across a large swath of the south side of the city. The Built Form maps are incompatible not only with the policy of encouraging non-motorized transport, but also incompatible with the stated policy of having more tree canopy and green space.</p> <p>In my neighborhood, new commercial buildings have been going up that are built almost right up to the sidewalks. The city routinely gives the developers waivers not only regarding setback/green space, but also regarding building heights. These waivers given by the city council seem to be given without regard for the pressures put on our traffic flow, sewer systems, police and fire departments, air and soil quality.</p> <p>We are paving over our green spaces and reducing our quality of life for residents Affordable housing can be achieved without reducing our green spaces and without constantly caving into the demands of developers. It is likely that Minneapolis residents who live near Lake of the Isles or Lake Bde Maka Ska do not want to turn their areas into a Centennial Lakes type neighborhoods, surrounded by (expensive) high-rise apartments and commercial buildings and managed plantings, with no wild/natural areas.</p> <p>Looking at the pictorial representation of the Interior 1 areas which reportedly is going to be the least dense area - one sees rows of tightly packed 2.5 story houses, each almost identical to the one next to it, and pavement everywhere, with an occasional small tree - almost like an after-thought. Is this really the 2040 Plan the city of Minneapolis is wanting to adopt? How is this compatible with the stated policies? By the way, my neighborhood is racially and economically diverse - just the way I like it.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6576	18	/policies/walking/	Great idea about widening sidewalks. I would suggest doing downtown/uptown first seeing as the sidewalks there aren't really up to handling the amount of people who use them on a daily basis or when they host large events. Uptown itself needs more beg buttons for pedestrian crossings.	7/22/2018
6577	1	/policies/access-to-housing/	Protect existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, and especially within the Northeast Minneapolis Arts District. a greater number of northeast neighborhoods have owner occupied duplexes , thus adding suability ,small business and a grassroots invest to a neighborhood. by adding more multi dwelling it in creases the chances for non owner occupation , less of a neighborhood invest but just for the money.	7/22/2018
6578	3	/policies/production-and-processing/	Production and Processing: Expand and maintain areas for production, processing, and distribution of products, services, and ideas. Why: The Policy does not include artistic production and services Suggested Comment: Add Arts Production as a protected class for production processing areas. d.&.e. Protect Production Areas - do not allow non-production in Production Areas. f. Protect older industrial buildings for future production and processing uses (not Non-Production uses).	7/22/2018
6579	1	/policies/access-to-housing/	Prioritize development at corridor intersections (i.e. nodes) before mid-block infill. Encourage contextual design over zoning-controlled design.	7/22/2018
6580	5	/policies/visual-quality-of-new-development/	Visual Quality of New Development: Ensure a high-quality and distinctive physical environment in all parts of the city through building and site design requirements. Why: Neither 'high quality' or 'distinctive' is defined and no mention of public art at all. City funded projects to include public art which is purchased locally. To put a limit on buildings that all look the same in an area----- mix up the architecture . At the very least color and materials. If we want the city to be notable strive for a notable look.	7/22/2018
6581	1	/policies/access-to-housing/	This is one of the most important aspects of the plan. We need to make sure that the city can grow in a responsible way with each neighborhood contributing to the city's growth. But this draft plan should go farther. Too much of the density is limited to high-traffic, polluted streets. We need to allow apartment buildings in the quiet, tree lined neighborhood interiors, too. Renters shouldn't be forced to the busiest streets only. Quiet boulevards and parkways should allow denser development. Also, Interior 1 is too low-density. This plan is looking ahead 20 years! We need to think bolder. Interior 2 should be the lowest density allowed in the city, and Seward and Lowry Hill need to be considered Interior 3 due to their proximity to downtown. That was a huge oversight in this draft.	7/22/2018
6582	71	/policies/soil-health/	I support and approve of this policy and its action steps.	7/22/2018
6583	72	/policies/sustainable-water-system-management/	I support and approve of this policy and its action steps.	7/22/2018
6584	2	/policies/access-to-employment/	We need to allow small commercial zoning in neighborhood interiors. That's a huge failure of this plan. Commercial shouldn't be limited to busy corridors. We should allow small office uses to be located in neighborhood interiors.	7/22/2018
6585	0.1	/topics/land-use-built-form/	Production Mixed Use: Add direct language and incentives to preserve artist studios, art centered buildings and creative industry over residential uses in this district. Restrict housing to parcels directly adjacent to transit routes	7/22/2018
6586	73	/policies/stormwater-management/	I support and approve of this policy and its action steps.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6587	29	/policies/creative-sector-economy/	<p>Visual Quality of New Development: Ensure a high-quality and distinctive physical environment in all parts of the city through building and site design requirements.</p> <p>Neither 'high quality' or 'distinctive' is defined and no mention of public art at all.</p> <p>Require City funded projects to include public art which is purchased locally.</p> <p>If the city wants places for the creative sectors to be protect what exists . Don't force them to exist in disjointed pockets that does no one any good. We are need green space, work space and live space to better blend.</p>	7/22/2018
6588	73	/policies/stormwater-management/	I support and approve of this policy and its action steps.	7/22/2018
6589	4	/policies/access-to-commercial-goods-and-service	The plan should allow for small commercial retail in neighborhood interiors. I'm disappointed that so much of the commercial designation is limited to major corridors. Small retail in neighborhood interiors contributes to walkability and unique neighborhood attributes. Plus, as a pedestrian, it's often terrible to walk along the busiest streets in the neighborhood to run errands. A pleasant walk to a small neighborhood market on quiet residential streets would be amazing. It might not be possible in 2018, but as the city gets denser, I hope that this becomes a reality. SO as we look toward 2040, we need to make sure that it's POSSIBLE.	7/22/2018
6590	6	/policies/pedestrian-oriented-building-and-site-de	Wonderful! This is exactly the direction we should be moving as a city. I'm very happy to see this part of the plan. Well done!	7/22/2018
6591	1	/policies/access-to-housing/	Don't assume that everybody over 40 is a no-growth NIMBY! I support higher housing density & greater accessible housing so that Minneapolis is still affordable for my nieces & nephew.	7/22/2018
6592	0.1	/topics/land-use-built-form/	<p>I urge you to note the Built Form Interior 1 designation, and recommend Interior 2 and 3 as the minimum. In certain neighborhoods, it continues a long history of housing restrictions applied to those neighborhoods by redlining and racially restrictive covenants.</p> <p>If the City says our #1 goal is reverse historical disparities created by those restrictions, certain neighborhoods (cough Wards 7 & 13, cough cough) can't once again be left out. Note especially neighborhoods east of Hennepin and parts of Seward are very near to city job centers, yet their proposed built form designation doesn't match this need.</p>	7/22/2018
6593	30	/policies/arts-and-cultural-assets/	<p>Visual Quality of New Development: Ensure a high-quality and distinctive physical environment in all parts of the city through building and site design requirements.</p> <p>Why: Neither 'high quality' or 'distinctive' is defined and no mention of public art at all.</p> <p>Look at preserving the NE Arts District as a whole. Mixed production spaces and existing supportive housing.</p> <p>Require City funded projects to include public art which is purchased locally.</p>	7/22/2018
6594	74	/policies/integration-of-water-management-into-	I support and approve of this policy and its action steps.	7/22/2018
6595	0.1	/topics/land-use-built-form/	<p>We need more housing scheduled to be built in North Minneapolis and also FIRST priority building. The mapping of height in buildings can be more to BETTER serve families of No. Minneapolis and serve the support networks that have been broken down over the last 10 years.</p> <p>Please add to your blueprints for more buildings in North Minneapolis who have paid their taxes and helped to build what is now North Loop and other businesses in that area. Please start building NOW. KerryJo Felder Minneapolis School Board Member</p>	7/22/2018
6596	84	/policies/public-safety/	Thanks. Even as a white person, I resent being policed by people who think of Minneapolis as a foreign territory that needs to be militarily occupied. We need a force that better reflects the community & is accountable for not harming or brutalizing citizens.	7/22/2018
6597	75	/policies/waste-reduction/	I support and approve of this policy and its action steps.	7/22/2018
6598	8	/policies/public-safety-through-environmental-de	This is great. I love new buildings being focused on the street level. I think the pedestrian realm has the greatest impact on how a building FEELS to passersby and its neighbors.	7/22/2018
6599	76	/policies/new-parks/	<p>I support and approve of this policy and its action steps.</p> <p>Be sure to include funding sources for maintenance of park facilities.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6600	1	/policies/access-to-housing/	<p>Increasing supply of housing units and density is important to meet the needs of Minneapolis now and into the future. The zoning changes could help, but without additional controls there is no guarantee of the right mix of housing units being built to meet the needs of growing families in the city.</p> <p>It is not desirable to replace modest 3 bedroom homes suitable for a family of four with 4 small 2 bedroom units suitable for young professionals. Those two bedroom units can be very profitable for developers and I fear that without constraint from the city we will see reduced supply of suitable family homes which will make the city less affordable for families.</p> <p>The goal cannot be just more housing units. A city of tiny single room studios could meet that goal, but who would want to live there? We need a policy that enforces a distribution of unit types, and adequate floor space. Without this we make the city less appealing and push families into the suburbs, exacerbating our transportation problems.</p> <p>The new construction that results from these policy changes should provide desirable homes and neighborhoods for the next 100 years; not just an opportunity for a quick buck.</p>	7/22/2018
6601	77	/policies/park-access/	I support and approve of this policy and its action steps.	7/22/2018
6602	10	/policies/street-grid/	This is critically important in areas like the North Loop. Also in areas that have large industrial uses, like Como and Seward. We need to make sure that we're not passing up opportunities to improve pedestrian and bike connections through super-block developments.	7/22/2018
6603	20	/policies/transit/	The city is far, far too cold in the winter to continue to have such a large above ground transit system. The heat lamps do very little when it's 0 degrees outside with a wind chill of negative twenty. While it would be expensive, the city, county, metro transit, and other agencies should find a way to create an underground transit system that would work for the city and overall all metro region	7/22/2018
6604	78	/policies/park-design-and-programming/	I support and approve of this policy and its action steps. Incorporate urban agriculture into park planning.	7/22/2018
6605	31	/policies/creative-workers/	<p>Visual Quality of New Development: Ensure a high-quality and distinctive physical environment in all parts of the city through building and site design requirements.</p> <p>Why: Neither 'high quality' or 'distinctive' is defined and no mention of public art at all.</p> <p>Require City funded projects to include public art which is purchased locally.</p> <p>Should not the "arts "be open to everyone? equal opportunity</p>	7/22/2018
6606	79	/policies/healthy-youth-development/	I support and approve of this policy and its action steps.	7/22/2018
6607	11	/policies/skyways/	I think this is unfortunate. If this is going to be official policy, then the city should purchase and maintain the skyways and make them truly public spaces. Right now they are exclusionary and building owners choose to exclude certain people (poor, non-white, teens) from using them. And they aren't usable to most people because of how esoteric and bizarre they are. Only regular office workers understand the system well enough. I think it's worth deleting this policy.	7/22/2018
6608	12	/policies/lighting/	Pedestrian scale lighting: Great policy!	7/22/2018
6609	51	/policies/healthy-pre-k-development/	The most important step to achieving most of the educational racial disparity and employment goals would be universal high quality daycare for minneapolis residents ages 0-6	7/22/2018
6610	38	/policies/affordable-housing-near-transit-and-job-	<p>Affordable Housing near Transit and Job Centers: Create more affordable housing near transit and job centers</p> <p>Why: Doesn't recognize importance of production zones as equally important.</p> <p>Except in existing industrial production areas</p> <p>Live / work space so live is near production zones not in them. so both group have room to grow.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6611	17	/policies/complete-streets/	I fully support this. However, in practice, this is hard to enforce. I hope the city makes a full effort to bring public works on-board. I feel like the city engineers continue to make poor decisions that hurt pedestrians. We need to eliminate pushing a button to get a walk signal at a traffic light, and things like curb bump-outs need to be standard practice at almost every intersection any time there is a street reconstruction. We also need to look at narrowing lanes on every major road. AND we should consider more unique street configurations where only bikes and pedestrians can pass through (Like mid-block barriers that prevent thru traffic for cars)	7/22/2018
6612	20	/policies/transit/	The city is far, far too cold in the winter to continue to have such a large above ground transit system. The heat lamps do very little when it's 0 degrees outside with a wind chill of negative twenty. While it would be expensive, the city, county, metro transit, and other agencies should find a way to create an underground transit system that would work for the city and overall all metro region	7/22/2018
6613	18	/policies/walking/	Yes, narrow streets, narrow the lanes. Also widen sidewalks on busy streets, curb bump-outs and pedestrian medians, and ensure that all traffic signals give a walk signal by default every cycle.	7/22/2018
6614	20	/policies/transit/	Floating bus stops, off-board payment systems, all door boarding, low-floor buses, traffic signal prioritization. I know much of this has to do with Metro Transit, but the city could push harder and help create pleasant shelters and bus-only lanes. I'm glad city staff are thinking about this. Buses will continue to be the backbone of our transit system for a long time to come.	7/22/2018
6615	0.1	/topics/land-use-built-form/	I greatly support this policy. As a former resident of San Francisco, I've seen a lack of housing supply continues to drive up the cost of housing for everyone. We cannot afford to repeat their mistakes, and must proactively take action to allow additional housing supply to be built in order to make Minneapolis affordable for the middle and lower class.	7/22/2018
6616	54	/policies/supporting-economic-growth/	<p>Ignores importance of existing infrastructure, community and production to continued economic growth.</p> <p>Add: improve existing properties and infrastructure</p> <p>Building on existing to have the future somewhere to teather to.</p>	7/22/2018
6617	21	/policies/freight/	We need to really push hard on getting smaller freight trucks. The semis ruin our roads and lead to poor road design. In my neighborhood, a safe pedestrian crossing was just widened and made less safe to accommodate large semi traffic. That should never happen.	7/22/2018
6618	80	/policies/development-near-metro-stations/	I generally support and approve of this policy and its action steps. However, I strongly do not support this policy where it involves the intentional destruction of vital single family neighborhoods - for instance the neighborhood along Franklin Avenue west of Hennepin Avenue. The plan to create transit oriented along this particular route to connect to the proposed SW light rail station at 21st Street will adversely affect this wonderful neighborhood; one that is enjoyed not just by its residents, but the many people who come to visit the City lakes.	7/22/2018
6619	81	/policies/social-connectedness/	I support and approve of this policy and its action steps.	7/22/2018
6620	1	/policies/access-to-housing/	<p>I support the increase in small-scale multi-family units, but I do not support the designation residential (urban neighborhood) portions of Nicollet as a Corridor 6 street. I would prefer that Nicollet and the surrounding several streets all be Corridor/Interior 3. Three stories is plenty for adding multi-unit homes to increase density; the new apartment building at 5605 Nicollet provides a good example of this. Six stories is too tall.</p> <p>Other blocks, or portions of blocks, of Nicollet (i.e. the Diamond Lake Road intersection or Nicollet south of 58th St.) that are designated Corridor Mixed Use should build up to a maximum of four stories (Corridor 4). The Zest Apartments at 5426 Nicollet is a good example of this.</p>	7/22/2018
6621	82	/policies/aging/	I support and approve of this policy and its action steps.	7/22/2018
6622	83	/policies/people-with-disabilities/	I support and approve of this policy and its action steps.	7/22/2018
6623	84	/policies/public-safety/	I support and approve of this policy and its action steps.	7/22/2018
6624	85	/policies/access-to-health-social-and-emergency-s-	I support and approve of this policy and its action steps.	7/22/2018
6625	55	/policies/business-innovation-and-expansion/	<p>Just like Policy 54. Ignores importance of existing infrastructure, community and production to continued economic growth.</p> <p>Add preserving existing uses, assets and Art Districts.</p> <p>Link teaching centers to arts and economics to form partnerships for life long learning.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6626	86	/policies/healthy-food-in-institutions/	I support and approve of this policy and its action steps.	7/22/2018
6627	26	/policies/vision-zero/	I appreciate the commitment to eliminate deaths and injuries from car traffic however I ask that the city approach enforcement cautiously. Can speed cameras be used rather than enforcement by police, for example? I am concerned about unequitable law enforcement and enforcement that targets people of color and other vulnerable populations. I think the focus on design decisions that naturally calm traffic is important. We know speed limits alone do not calm traffic, we must alter the existing design of streets to force cars to slow down and drive more safely.	7/22/2018
6628	88	/policies/public-services-policy/	I support and approve of this policy and its action steps.	7/22/2018
6629	89	/policies/technology-in-the-city-enterprise/	I support and approve of this policy and its action steps.	7/22/2018
6630	25	/policies/innovations-in-transportation-and-infras	We need to make sure that autonomous vehicles don't make pedestrian life shittier in Minneapolis. For example, we need to make sure that autonomous vehicles stop for all pedestrians in crosswalks (marked or unmarked). There will be great pressure from the auto companies to make their vehicles travel faster, but we need to hold firm.	7/22/2018
6631	90	/policies/technology-in-the-economy/	I support and approve of this policy and its action steps.	7/22/2018
6632	26	/policies/vision-zero/	A lot of this has to do with street design. I hope our public works staff are on board. We need to be designing narrower lanes on all streets and embracing slower speeds. Some people will complain a lot, but our city shouldn't be a speedway for suburban commuters.	7/22/2018
6633	14	/policies/tree-canopy-and-urban-forest/	Proposed land use/land form changes are at odds with this goal, particularly designations of Corridor 6. One of the most magical aspects of Minneapolis, and one of its keys to air quality, is the extensive tree canopy. But six-story buildings on Nicollet, Chicago, etc. will mean much less tree coverage from either new or old trees. The buildings will tower over any trees that are retained or planted. Corridor 6 and Corridor 4 streets should be reduced to Corridor 3 heights.	7/22/2018
6634	91	/policies/heritage-preservation-outreach/	I support and approve of this policy and its action steps.	7/22/2018
6635	92	/policies/identify-and-evaluate-historic-resources/	I support and approve of this policy and its action steps.	7/22/2018
6636	38	/policies/affordable-housing-near-transit-and-job-	Focusing on affordable housing on transit corridors is spot on.	7/22/2018
6637	93	/policies/stewarding-historic-properties/	I support and approve of this policy and its action steps.	7/22/2018
6638	94	/policies/heritage-preservation-regulation/	I support and approve of this policy and its action steps.	7/22/2018
6639	95	/policies/heritage-preservation-financial-incentive	I support and approve of this policy and its action steps.	7/22/2018
6640	56	/policies/supporting-small-businesses/	Why: Name the arts and arts production as business and not just amenities Add artists to this section (Support the development and growth of small business and artists.) Add owner occupied duplexes as small businesses . they are required to have a license . they provide stable housing and revenue to the city.	7/22/2018
6641	96	/policies/heritage-preservation-recognition/	I support and approve of this policy and its action steps.	7/22/2018
6642	97	/policies/heritage-preservation-legislative-advoca	I support and approve of this policy and its action steps.	7/22/2018
6643	42	/policies/expand-homeownership/	Some aspects of the land use/land form plan are at odds with this housing goal. Increased density and housing stock does not in and of itself mean more housing affordability. If we are going to build up, I want those units to be affordable or at least mixed income. I've owned my home on Nicollet for 10 years. My spouse and I were only able to purchase it because it is a very small house of 770 sq. ft. (and therefore, more affordable) and because we received a forgivable loan from the city of Minneapolis to assist with the downpayment. Prior to moving into our home, we were living in affordable artist housing in St. Paul. With the focus of rezoning on building multi-unit buildings, there is incentive for developers to purchase and raze small homes like mine to erect either multi-unit or large, expensive single family homes. I am concerned about this future reduction in small-footprint, single-family "starter" homes that serve as an entry point into home ownership and wealth building for many people.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6644	42	/policies/expand-homeownership/	<p>Some aspects of the land use/land form plan are at odds with this housing goal. Increased density and housing stock does not in and of itself mean more housing affordability. If we are going to build up, I want those units to be affordable or at least mixed income.</p> <p>I've owned my home on Nicollet for 10 years. My spouse and I were only able to purchase it because it is a very small house of 770 sq. ft. (and therefore, more affordable) and because we received a forgivable loan from the city of Minneapolis to assist with the downpayment. Prior to moving into our home, we were living in affordable artist housing in St. Paul. With the focus of rezoning on building multi-unit buildings, there is incentive for developers to purchase and raze small homes like mine to erect either multi-unit or large, expensive single family homes. I am concerned about this future reduction in small-footprint, single-family "starter" homes that serve as an entry point into home ownership and wealth building for many people.</p>	7/22/2018
6645	58	/policies/business-districts-and-corridors/	<p>g. Support the existing Arts Districts h. Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement. f. thank you</p>	7/22/2018
6646	81	/policies/social-connectedness/	<p>Why: No recognition of the functional success of the mixed use neighborhoods in North East in achieving full social participation - no need to reinvent the wheel.</p> <p>*Support the existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community. *Preserve existing buildings.</p>	7/22/2018
6647	6	/policies/pedestrian-oriented-building-and-site-de	<p>I'd like to see the city prohibit auto-centric development. We have enough gas stations, surface parking lots, and auto repair facilities in the city, Drive thrus are not appropriate for the city and make things unsafe for people walking and biking.</p> <p>I'd love to see mixed use buildings with ground floor shops or other businesses. Having services at the ground level contribute to a vibrant street life and a safe space that incentivizes people to walk.</p>	7/22/2018
6648	53	/policies/quality-of-life/	<p>While doing the above, do not only cater to the "creative class", often white people with \$\$\$\$. When that happens, others are pushed out. Maintain and support the diversity that exists with getting POC, immigrants, refugees involved in community building and small businesses. Too much of what has happened recently in Minneapolis has been catering to white, educated young people who can afford luxury, dorm-like condos and want to live close to their corporate job downtown.</p>	7/22/2018
6649	1	/policies/access-to-housing/	<p>Policy 1: a,b, c, d & e: By transit build park connections, with proportional affordable and market rate housing investing Park Dedication Ordinance Fees (PDOF). Assure equitable distribution of parks and open spaces.</p>	7/22/2018
6650	11	/policies/skyways/	<p>I think this policy heads in the right direction. It is probably unrealistic to have our skyway system disappear so i appreciate a focus on making it more accessible and transparent to the average person. Right now it feels like a secret society that is only designed for downtown professionals. I like the idea of wayfinding signs and more access points. The skyway system must be developed in conjunction with plans and investments to simultaneously make a vibrant and relevant street life though. We need our downtown to be useful, safe, and pleasant at the street level.</p>	7/22/2018
6651	2	/policies/access-to-employment/	<p>Policy 2: a: To ensure land is available to accommodate projected employment growth and utilize Park Dedication Ordinance Fees from jobs creation to grow park connections. 2d? - æwhere territorial expansion would result in a reduction of housing stock.</p>	7/22/2018
6652	3	/policies/production-and-processing/	<p>Policy 3: b, f, g, i, j, k, l, m: prioritize use of lands that have minimal air, water, or noise pollution impacts and that provide quality living-wage jobs by increasing park connectors. Establish land-use regulations that are environmentally sustainable. Improve transit, bicycle and pedestrian access to areas of employment with park connections. Controlling negative externalities through building and site design with environmental standards that are ecologically sustainable and create open spaces for natural decrease of carbon footprint. Explore proactive enforcement of pollution and nuisance ordinances with increased green and open spaces.</p>	7/22/2018
6653	9	/policies/open-spaces-in-new-development/	<p>I am all for these spaces! Work needs to be done to ensure that these spaces are accessible for all. Police presence or surveillance in these spaces prioritizes the safety of some groups over others.</p>	7/22/2018
6654	4	/policies/access-to-commercial-goods-and-service	<p>Policy 4: b, c, h: Commercial areas well-served by public transportation with green connections for walking and biking. Develop new analytical frameworks and tools to accurately track dynamics of urban retail in order to guide the development of green space.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6655	0.1	/topics/land-use-built-form/	Interior 1 is what the vast majority of the city should be. There should be far more interior 1 in the Wedge area, which is already overly dense, and there should be more of this on the north side. There are a lot of starter homes over there that are currently affordable to many. Upzoning those areas risks those homes being bulldozed by developers who will certainly expect to recoup their costs and then some, or rather plenty. Preserve homes that are affordable.	7/22/2018
6656	5	/policies/visual-quality-of-new-development/	Policy 5: c, g: Contribute positively to the public realm with green and open spaces. Apply design standards that are ecologically balanced like bird safety, phosphate free, salinity free, etc.	7/22/2018
6657	6	/policies/pedestrian-oriented-building-and-site-de	Policy 6: e, f, g, h, k, l: Integrate protection to pedestrians to encourage pedestrian activity along the street with a percentage of green space. Minimize building shadowing on public spaces and generation of wind currents at ground level to mitigate winter related ice and snow accumulation. Provide adequate space for pedestrian movement, street trees, landscaping elements of active pedestrian areas and continuous open space and green connections. Promote bicycling with open space connections. Minimize disruptions to pedestrian flow at the street level with continuous green connections.	7/22/2018
6658	7	/policies/public-realm/	Policy 7: a, c, e, f: Develop a framework for public realm improvements citywide inclusive of green and open space connections. Implement public realm improvements including green and open space connections. Integrate public spaces that enhance the pedestrian environment through sensory experiences, public art, peacemaking and green spaces. Explore and implement new ways to improve the public realm via pilot or creative projects in conjunction with public and private partnerships including shared streets like woonerfs.	7/22/2018
6659	8	/policies/public-safety-through-environmental-de	Policy 8: b: Orient new housing to the street to foster safe neighborhoods with treed open spaces and bird safe structures.	7/22/2018
6660	84	/policies/public-safety/	Abolish the police altogether for a community response model based on restorative justice. Police forces originated as slave catchers. I am not sure we can ever over come that. Can Minneapolis lead the country in moving away from this broken system of law enforcement? Imagine what that might do for economic development, job growth, etc!	7/22/2018
6661	33	/policies/affordable-housing-production/	It is extremely unclear to me how your proposal to allow fourplexes in all residential neighborhoods of the city--the rent for which would apparently be set by the market-- would promote this goal.	7/22/2018
6662	9	/policies/open-spaces-in-new-development/	Policy 9: a, b, c, d: Creation of publicly-accessible open spaces and plazas through incentives and requirements and Park Dedication Ordinance Fees. Improve standards for open spaces for wildlife safety. Utilize climate-sensitive design principles as well as seasonally sensitive (to sun/snow) in public plazas and open spaces. Encourage design of open spaces and plazas that facilitate public access to movement along, and views of public amenities as well as protect the amenity such as the Mississippi River, Chain of Lakes. Safety - mention	7/22/2018
6663	1	/policies/access-to-housing/	I am fine with duplexes, four/sixplexes and even small apartment buildings. As long as you limit the height to 2.5 stories in areas that are currently zoned for that. You also must retain the current set backs. The is important to maintain green space, keep the feel of the neighborhoods, snow removal (a safety issue) and access to light and air.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6664	1 /policies/access-to-housing/	<p>What is the source of this demand for housing in the City of Minneapolis or which you speak? How am I to determine that this so-called demand is something which is worthy of restructuring my current lifestyle? Not only my physical environment (quite literally), but also the impact on my personal finances through higher property and other taxes, in addition to the loss of property value I will experience once the city negatively restructures my residential neighborhood, making it less desirable and a shell of its former self?</p> <p>Your proposed zoning is far out of line from what's reasonable. Each neighborhood should be considered differently. There should never be any dangerous blanket zoning. And building new structures should absolutely be in alignment with the current architectural design. A respect for the beauty of our current neighborhoods should be your top priority. Build where it makes sense and is a natural extension of what already exists instead of destroying what has taken years to become such an in-demand place to live.</p> <p>Don't forget who made these neighborhoods great. The middle class. Most of us are invested homeowners who have lived in the city of Minneapolis for years, using our own money, with no public subsidies, to make these neighborhoods some of the best and most desirable in the country. Why would you penalize the citizens who have worked so hard and invested in their neighborhoods, which would translate into a detriment of their own well-being in order to "correct the wrongs" of others who've preceded them, "wrongs" that have occurred through a period of many, many years. And you want to make that "correction" in one fell swoop, which would do nothing but discourage continued homeowner investment from people with the means to do so, as well as possible flight to other parts of the metro area that would not impose such rigid social engineering.</p> <p>Keep in mind that you are *predicting* what's going to happen by the year 2040. Such extreme, drastic measures are simply ludicrous. A more tempered approach seems more logical to re-shape this city.</p> <p>I absolutely agree with Steve Berg when he wrote in the Strib "Liberals in Minneapolis have overstepped on their fourplex idea" and "They've erred also by trying to inject social justice into the zoning code". The Twin Cities has less of an affordable housing problem than a low-income problem!</p> <p>I'm confused by the following statement on your 2040 Plan Website: "These policies and regulations left a lasting effect on the physical characteristics of the city and the financial well-being of its people. Areas of Minneapolis with higher densities and a mix of land uses experienced disinvestment." My question to you here is: By your 2040 proposal to literally re-arrange the physical structure of my own neighborhood as well as other parts of the city, isn't your goal in doing so to accomplish the above? That's what you're trying to do, isn't it? Create higher density and a mix of land uses?</p> <p>It seems to me the real reason for the 2040 Plan is to create more wealth for the city coffers via means of more taxpayers living in a finite parcel of land known as the City of Minneapolis. The 2040 Plan needs to be *substantially* revised, meaning drastic changes to your current proposal, and 4-plexes zoned on every block of every neighborhood needs to be taken off the table immediately. In addition, it is also unfair to displace many of the residents who live in and take good care of their homes on the busier streets of our cities. If I don't want it in my</p>	7/22/2018

6666	10 /policies/street-grid/	<p>Policy 10: a, e: Explore options to restore the street grid with park connections. Restore access for people walking, bicyclists with green and open space connections.</p>	7/22/2018
6667	1 /policies/access-to-housing/	<p>I oppose the upzoning that will occur without neighborhood involvement. Involving the people who live in an area is messy, difficult and NECESSARY. It requires convincing many people that the change is good, workable and beneficial for all stakeholders. Upzoning the entire city by fiat is dangerous and will create unintended consequences.</p>	7/22/2018
6668	11 /policies/skyways/	<p>Policy 11: b: Require maximum transparency for skyways that are bird safe.</p>	7/22/2018
6669	5 /policies/visual-quality-of-new-development/	<p>We need to preserve the beauty and the integrity of our city. I am concerned that many developers are more concerned with the bottom line and that would mean cutting corners on architects and low cost materials. We have Uptown to use as an example for what this would look like. I would like to recommend that the city engage with a panel of architects to ensure that we have a cohesive vision, more language describing the type of materials, materials outside of guidelines, etc. Without a more articulate description it would be a free-for-all.</p>	7/22/2018
6670	82 /policies/aging/	<p>I would love to see Minneapolis take a lead on fostering connectedness across all ages, throughout the lifespan. We are very segregated based on age outside of one own's family a lot of the time.</p>	7/22/2018
6671	18 /policies/walking/	<p>Please be sure to consider people with disabilities and their ability to safely navigate the city. We need many parts of our network to be brought in compliance with ADA. We also need a more comprehensive winter maintenance plan so that everyone can get around. I have found it very difficult to navigate winter sidewalks with my two kids in a stroller. I'd like to walk most places with them year round but there were many times this past winter where the sidewalks were not navigable. It is a real shame to have to drive for those short trips when I should be able to walk safely.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6672	2	/policies/access-to-employment/	<p>What? You want minimum densities in downtown when that is where most of the jobs are? This is double speak. The vacancy rate for commercial is already higher than the national average. This is stupid.</p> <p>And transit can and should include more busses. Why try to build the SWLRT through park lands where it is not accessible, why not work on building a elevated train in the middle of our highways, which are already dedicated to moving many people quickly. The lack of creativity around transit is astounding.</p>	7/22/2018
6673	12	/policies/lighting/	<p>Policy 12: a, c, g: Minimize glare and dark sky conditions and other unnecessary light pollution impacting bird migration. Ensure zoning and industry illumination standards regarding migratory birds. Update zoning code related to dark skies and the environmental benefits of strategic lighting management regarding bird safety.</p>	7/22/2018
6674	13	/policies/landscaping/	<p>Policy 13: a, b, c, e, f, g: In partnership with MPRB, plant and tree types should complement the surrounding area, etc., striving for green and open space connections.</p>	7/22/2018
6675	63	/policies/food-access/	<p>Education should also be an action step here. If someone has grown up eating a certain way (perhaps "unhealthy"), and all of a sudden their neighborhood market is forced to start selling healthier items, that person might not feel compelled or comfortable to all of a sudden switch their diet. We will see gaps in what is provided/desired/familiar to people. A transition that is culturally appropriate is important. The changes also should not be "top down" decisions, or made by people outside of a local community. People from within the community should be involved in determining what food changes happen, and involved in educating people on nutrition, cooking, budgeting, etc.</p>	7/22/2018
6676	19	/policies/bicycling/	<p>Please continue to expand PROTECTED BIKEWAYS in the city. Please use kids on bikes as your guide for design (ie, could a kid safely and confidently bike to school on this bikeway? could a family bike here safely?). Please maintain the bikeways that have already been created. Please re-stripe the bikeways every season so they are clearly marked and visible to people on bikes and people driving.</p>	7/22/2018
6677	3	/policies/production-and-processing/	<p>If you don't have educational/training opportunities for people who are currently employed in low income areas, this is all a moot point. You can set aside land and have the jobs there, but the fact remains, employees need to be trained. Maybe the new employers can be persuaded to offer such training to their new employers (if they are current Minneapolis residents). As for the issue of bike lanes going there? Go look at how many people of color are using the bike lane on Glenwood. This is a stupid waste of area that busses could use.</p>	7/22/2018
6678	17	/policies/complete-streets/	<p>I agree with the Complete Streets hierarchy. However I believe that there are instances where businesses use fearmongering and threatening techniques to get city officials to cower to their demands. Usually the fearmongering revolves around removal of onstreet parking or decreasing lanes of traffic. The city should take an evidence-based approach to design and not submit to individual demands that threaten us people able to wholly enact Complete Streets policy. I'd love to see the city take a more bold approach to Complete Streets. Currently I don't think cars have had to give up much of anything.</p>	7/22/2018
6679	1	/policies/access-to-housing/	<p>totally against 'upzoning' ,, totally against NO ZONING ,, In favor of starter homes and accessible homes. In favor of neighborhoods. Racial equality/affordable housing will not result from unregulated population density. There are Many Wrongs in this section and in every section. The idea of up-zoning has not and will not work ... Up-zoning will destroy each and every Minneapolis community. Plan 2040 should be thrown out and a new plan developed, on the basis of sound evidence rather than unproven theory.</p>	7/22/2018
6680	4	/policies/access-to-commercial-goods-and-service	<p>Again, your emphasis on walking and biking to do errands is lofty, but not very practical. How many people are going to haul their purchases on their bikes in the middle of winter? Very few. Increase buses. This is where our funds will be best spent. Pedestrians and busses. I realize that Ms. Bender is all about bikes, but even she is a two car family now. So let's get real.</p>	7/22/2018
6681	33	/policies/affordable-housing-production/	<p>I love the zoning change. We need to be able to build new housing of all forms, so that people of all backgrounds can have opportunities to access all of Minneapolis's lovely neighborhoods. I understand that the plan has caught a lot of flack for the upzoning policy in particular and that it is likely that it will be scaled back. However I sincerely hope that it is not scaled back too much. People of my generation (millenials) and younger want to live in cities - the people who would like to keep zoning laws the same are already homeowners, looking to protect their investments and keep their neighborhoods frozen in time. The only constant is change, though. I implore you, please consider the future generations who love the Twin Cities and want to live in amazing, affordable, walkable neighborhoods that will only become more inaccessible if we keep to the status quo (aka, most of the city zoned only for SFH's).</p> <p>Finally, thank you all for all the work you have put into this plan. I know there will be revisions to this already great plan but I am confident that we are headed in the right direction.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6682	26	/policies/vision-zero/	I am worried about the police enforcing/ticketing people who might be violating traffic laws under the guise of this goal. Obviously, I do not want deaths due to traffic either, but we KNOW that certain populations are ticketed, pulled over, questioned, hassled, and often killed/injured by law enforcement at much higher rates than others. People who often break traffic laws may be doing so because the system is designed poorly in the first place, they lack education, or they feel unsafe/significantly disadvantaged engaging in the traffic system as it was intended for use--going back to the poor design. This needs to be considered as we move toward a lower fatality death. There is implicit bias in our enforcement system, so adding punitive enforcement will harm some communities over others.	7/22/2018
6683	29	/policies/creative-sector-economy/	Protect current art districts. And, consider that many people can't afford to work in the creative field until they retire from active employment. There are many of us older folks who are adding to the art community and are not considered. I didn't see any provision for trying to support the older arts community in housing or work space.	7/22/2018
6684	0.1	/topics/land-use-built-form/	<p>SEEMS DISASTROUS! It would so degrade my neighborhood that I would move. Planning should enhance the quality of life for all residents not just newcomers. The overwhelming emphasis in this plan is on new residents, with very little attention to improving the quality of life for current residents. Blanket plans to increase density without considering context and impact on existing neighborhoods could degrade the quality of life for many of us. Twenty to thirty story buildings near lakes, like Bde Maka Ska or Lake of the Isles would damage their beauty, degrading one of the greatest assets of the "City of Lakes." They would also add to one of Minneapolis' greatest quality of life problems, traffic congestion. For example, West Lake St. is the only corridor through the Lake from Lake of the Isles to Lake Harriet. To add high rise apartments in that area would increase congestion to an intolerable point. Planners say about 15% of residents along Rapid Transit lines like the proposed Southwest Trail line use public transportation. The rest presumably 85% would walk, bicycle, or, overwhelmingly, use cars. Congestion would become gridlock and intolerable.</p> <p>Planning should be far more nuanced, more creative and take particular neighborhoods circumstances and residential concerns into account. There are many areas where high-rise buildings and more dense housing could be added without degrading existing neighborhoods, parks, lakes or the beauty of the city.</p> <p>Planners seem to view citizens as naughty children who need to be weaned from their cars and bad habits by planners who are wiser and know that density is the key to all our problems. That is the kind of bureaucratic arrogance that leads to movements like the tea party. Planners should work with residents to meet the city's future needs and balance the needs of those of us who live here and vote here now. The plan notes the history of restrictive covenants, now illegal for over half a century, as if to blame residents who want to preserve single family homes or the quality of our parks and lakes for exploiting white privilege. Clearly much needs to be done to make affordable housing available for everyone, more in fact than in this plan which does not seem to offer hope for people with very low incomes. But doing this will be more complicated than a blanket policy of density which will mostly benefit developers who put up high-cost high-rises. Planners also forget that low-income and minority neighborhoods have been most damaged not by single-family home owners but by planners who had an earlier Panacea, expressways and ran them through low income and minority neighborhoods destroying those neighborhoods. Let's not let a new Panacea, density, do similar damage to our city.</p> <p>I strongly support truly meaningful efforts to close the economic gap between white people and people of color and think it should be the city's first priority. I would favor tax increases if needed to make this happen.</p> <p>I believe providing affordable housing should be the next priority. That housing should be widely dispersed and affordable for people with lower incomes than those apparently considered in this plan but I believe the solution is far more complex than simply increasing density. How many more affordable apartments will there be in 20 to 30 story buildings? Why can't all new housing units perhaps as small as 4 units be required to provide at least 25% of their units at affordable rates? There should be solid guarantees that those rates must be maintained</p>	7/22/2018
6685	15	/policies/transportation-and-equity/	The goals for public transportation and bicycle use are way too high. Two large problems exist that will prevent achieving such lofty goals. First, the climate is not conducive to year round cycling. Second, if you make the City more family friendly parents need to get their kids to and from. Right now 33% of kids living in Minneapolis do not attend MPS. Those kids need to get places and this problem will only get worse as the population grows.	7/22/2018
6686	0.1	/topics/land-use-built-form/	4-plexes in I1 zoning just makes sense. It's time to start augmenting the 4-plexes in these hoods built prior to the 70s.	7/22/2018
6687	35	/policies/innovative-housing-types/	Create a program to incentivize ADUs! I'd love to build one in my yard and am considering financing options, but they are expensive to build!	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6688	4	/policies/access-to-commercial-goods-and-service	<p>I have a serious problem with city trying to make everyone get out of their cars. I rode the bus for 12 years until my job moved where we having parking in May of 2017. The bus system is not great in this city especially in the Winter. I paid my dues and I refuse to go back to the bus. Clients are rude on the bus and it is disgusting how some talk. You are trying to turn this city into New York. My next place will not be in Minneapolis. I will downsize in a couple of years outside of Minneapolis where I have lived for 55 years.</p> <p>Marge Cullen NE Mpls</p>	7/22/2018
6689	0.1	/topics/land-use-built-form/	<p>It depends on where the metro stations are. You have already decimated the charm of Uptown. And you are going to pretend that you will be able to get affordable housing units there? Get real. The developers will be charging top dollar for any units you give them permission to build. If you are talking about Hiawatha? That is a different story. Much of Hiawatha was industrial and already tall. So to add taller buildings/housing there is far less disruptive to the current neighborhoods. Maintain height restrictions as they currently exist!</p>	7/22/2018
6690	33	/policies/affordable-housing-production/	<p>Cities are like human beings. They each have their own unique characteristics, their own history, character, personality, and unique charm. The mayor, so he tells us, fell in love with the breathtaking beauty and irresistible allure of our city when he came here to run a Twin Cities Marathon.</p> <p>In fact, he fell so deeply in love with Minneapolis that he moved here from his home in the East. Once here, he fully committed himself to our city -- by running for mayor. He won. And now, like so many young, naïve and inexperienced newlyweds, he wants to change his beloved -- our city -- and change her drastically.</p> <p>With his 2040 plan, it appears the mayor is acting out his personal version of Pygmalion with our fair city with the intention of essentially razing what he must believe to be a hick town on the prairie, and reconstructing a slick, densed-up metropolis fitting his vision of a sophisticated, cutting-edge city of the future.</p> <p>So is this 2040 Plan evidence of a love story gone terribly awry? I don't think so. It's time our Twin Cities news outlets WAKE UP and GET CRACKING. Start investigating what's really going on here. It is time to FOLLOW THE MONEY. Something is rotten in the State of Minnesota. Start by following your nose to the 2040 plan for the City of Minneapolis.</p>	7/22/2018
6691	15	/policies/transportation-and-equity/	<p>It is not safe on the Lake Street light rail station now and it will just get worse. There is no client protection at all.</p> <p>Marge Cullen NE Mpls</p>	7/22/2018
6692	1	/policies/access-to-housing/	<p>Yes, increase housing density in all neighborhoods! Embrace multifamily housing and make it easy for people to build. In addition to housing density, please ensure that businesses and services can pop up easier in neighborhoods, particularly in historically single-family neighborhoods. This will make it easier for people to keep it local and decrease their car trips.</p>	7/22/2018
6693	6	/policies/pedestrian-oriented-building-and-site-de	<p>Walking fine, busses, YES, cars yes. Bikes? The bike lanes are already taking up much needed road space. Share ways are fine, but dedicated bike lanes are slowing down traffic and adding more emissions to our air. Enough already. Our weather is not friendly to bikers too many months of the year to dedicate this much space to bikers. Even many of the bikers agree with me.</p>	7/22/2018
6694	1	/policies/access-to-housing/	<p>I support allowing small-scale multifamily structures in neighborhoods that today are mostly single-family homes. This would increase housing supply, and make these neighborhoods available to more residents.</p>	7/22/2018
6695	29	/policies/creative-sector-economy/	<p>Yes, continues to support, increase our amazing creative sector. What about having Creative Enterprise Zones? The new development in the old Roof Depot across from the Midtown Greenway would be a great place for a CEZ.</p> <p>The Co-Working spaces sprouting up could also foster the kinds of partnerships in c. above, as well as bringing together people from different disciplines, both business and artistic/creative. Innovation (from being 'creative') is important to all sectors. Fits in with step d. above.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6696	33	/policies/affordable-housing-production/	I believe it's necessary to have affordable housing for Minnesotans in need. However, this is a tricky endeavor. State boundaries are merely suggestions, meaning an American citizen can move freely from state to state. My question is: Are we creating affordable housing for Minnesotans or are we creating affordable housing that's attractive to residents in other states? Thus driving up the "demand." I'd like to know how you measure and manage that so-called demand. To what degree is Minneapolis a welfare magnet? It's important to get this right because you are already overburdening your tax base with property taxes that are far too high.	7/22/2018
6697	9	/policies/open-spaces-in-new-development/	Yes, this is a great idea	7/22/2018
6698	14	/policies/tree-canopy-and-urban-forest/	Policy 14: a, c, d: Develop and implement City Strategy in partnership with MPRB to increase canopy which should explore an expansion of funding of the Tree Preservation & Reforestation Tax, incentives to plant and retain and promote species diversity. Ensure healthy tree planting in the right of way by increasing growing spaces and its quality and siting and relocating utilities to avoid conflicts by reviewing Public Works standards.	7/22/2018
6699	5	/policies/visual-quality-of-new-development/	Require that the new buildings are similar in design to the current building so as to blend in! I'm not saying cookie cutter, but for the sake of aesthetics, there needs to be some cohesion and this policy flies in the face of that concept.	7/22/2018
6700	0.1	/topics/land-use-built-form/	The Land Use and Built Form topic states "The . . .four policies â€ Access to Housing, Access to Employment, Production and Processing, and Access to Commercial Goods and Services â€ form the basis for the Future Land Use Map and the Built Form Map that guide the location and characteristics of new buildings." Open spaces and integrating water management should be equal foundations in guiding the location and characteristics of new buildings. Without these, we may have housing, but we will not have livable housing. We will not attract high quality employers. Transportation and water infrastructure will be more expensive or less effective. During land use planning, if water management and open spaces are not equal priority to housing and employment, they will not be addressed. As the city becomes more dense, it is critical to deliberately and aggressively manage water and open spaces. I do not see these acknowledged in the descriptions of the Built Form Districts or Land Use Categories. At a minimum, they should include some description of pervious surface goals.	7/22/2018
6701	15	/policies/transportation-and-equity/	Policy 15: b, c: Provide equitable and ample access to walking and biking by building open space connections. Develop on-going measurements to track effectiveness of transportation system in contributing to equitable outcomes by equitably distributing Park Dedication Ordinance Fees.	7/22/2018
6702	16	/policies/environmental-impacts-of-transportation/	Policy 16: a, h: Require travel demand management strategies for bicycle commuters with open space connections via the Park Dedication Ordinance Fees. Incorporate carbon-reduction design elements into City infrastructure projects with green and open spaces.	7/22/2018
6703	0.1	/topics/land-use-built-form/	As a dweller of the SW Minneapolis area, I am not in favor of this plan. I have lived in Uptown and Chicago and enjoyed the benefits of the density there. I bought a house in SW Minneapolis to no longer live in such a neighborhood. Change happens, and that is life. However, change should be gradual, deliberate, calculated, and pragmatic. This simply runs a wrecking ball through existing neighborhoods (and is fraught with other issues). I sincerely hope this does not go through. If my neighborhood changes that rapidly, I may move to a different city to be insulated from this.	7/22/2018
6704	0.1	/topics/land-use-built-form/	As a dweller of the SW Minneapolis area, I am not in favor of this plan. I have lived in Uptown and Chicago and enjoyed the benefits of the density there. I bought a house in SW Minneapolis to no longer live in such a neighborhood. Change happens, and that is life. However, change should be gradual, deliberate, calculated, and pragmatic. This simply runs a wrecking ball through existing neighborhoods (and is fraught with other issues). I sincerely hope this does not go through. If my neighborhood changes that rapidly, I may move to a different city to be insulated from this.	7/22/2018
6705	17	/policies/complete-streets/	Policy 17: b, d, h: Incorporate Complete Streets Policy into all elements of the public right of way including parkways. Prioritize projects that will improve the pedestrian, bicycle and transit networks when developing the City's long-range capital Improvement Programs including MPRB parkways. ?Develop strong curbside management policies to take full advantage of a dynamic urban environment? ?recycling, garbage pickup?	7/22/2018
6706	18	/policies/walking/	Policy 18: a, b, e, f, g, h, i: Deploy traffic calming measures such as narrow street widths such as West Lake Street. Provide pedestrian connections across barriers such as freeways and busy streets with land bridges to create green and open space connections. Through green and open space connections g, h, i.	7/22/2018
6707	19	/policies/bicycling/	Policy 19: c: Embrace and implement emerging best practices in bikeway design, such as protected intersections and transit islands with Complete Streets around parkways.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6708	20	/policies/transit/	Policy 20: c, e: Support Metro Transit's efforts to install higher quality infrastructure including solar powered bus shelters. Coordinate major transit projects including connections via walking and bicycling with green and open spaces.	7/22/2018
6709	21	/policies/freight/	Policy 21: c: Invest in safety and crossing improvements along active railroad corridors through green and one space connections.	7/22/2018
6710	7	/policies/public-realm/	What will enhance the pedestrian experience is green space, so be sure to maintain setbacks and keep boulevards. Also, keep the buildings to a lower height so people have access to light and air.	7/22/2018
6711	22	/policies/downtown-transportation/	Policy 22: a: Through and within Downtown improve pedestrian and bicycle and amenities with green and open space combinations.	7/22/2018
6712	80	/policies/development-near-metro-stations/	You must have parking for all the new housing going up!	7/22/2018
6713	23	/policies/coordinated-development-strategy/	Policy 23: a, e, : Identify geographic areas most in need of reinvestment, maximizing Park Dedication Ordinance Fees in areas such as around the Upper Harbor, Innovation District. Coordinate districtwide development plans in these areas with green connectors.	7/22/2018
6714	30	/policies/arts-and-cultural-assets/	I'd like to connect this policy and steps to the housing/density and housing access policies. Artists/designers partner with communities when they review proposed developments or even before that, revised zoning on how a neighborhood could change or accommodate affordable housing and/or density. We need to make sure new developments are aesthetic and include green and public spaces. Perhaps that would persuade people fearing density there would be something gained (besides the needs for more housing and affordable housing)	7/22/2018
6715	49	/policies/educational-and-economic-access/	I thought with the change in the minimum wage to move toward \$15/hr, that the City would continue to improve the minimum wage so that all jobs within the City would be considered, at minimum, to be a "living wage." Shouldn't this be covered in this section?	7/22/2018
6716	33	/policies/affordable-housing-production/	I am 100% for this.	7/22/2018
6717	53	/policies/quality-of-life/	Policy 53: c: Maintain and enhance natural environment assets throughout the city to promote and strengthen communities by building barrier free, inclusive and accessible green and open space connections.	7/22/2018
6718	68	/policies/energy-efficient-buildings/	Thank for recognizing the need to incentivize sustainable design practices. Please consider extending this to design quality and context. Quality design emerges from an inclusive process and desire, rather than mandate or design controls.	7/22/2018
6719	1	/policies/access-to-housing/	Also very much for this.	7/22/2018
6720	1	/policies/access-to-housing/	1. I am a huge supporter of increasing density across all neighborhoods. 2. Many of those opposed are confused about what this means -- a lot of rhetoric and fearmongering from some outspoken individuals is making people misunderstand. My recommendation: explicitly write IN THIS PLAN that fourplexes/triplexes/duplex will need to conform to existing single family home sizes. It's been verbally said to these people, but they won't believe it until it is written in the plan. And that's a good way to say, "yes we heard your concerns, and we are going to be more explicit in this new version on design guidance."	7/22/2018
6721	8	/policies/public-safety-through-environmental-de	The pictures shown here do not have boulevards and there will be no where to throw snow, so sidewalks will not be easily maintained properly during winter. Maintain boulevards and for the love of all that is holy, make it a city policy to plow out the curb cuts at every corner BEFORE you do the bike lanes, which are used by far fewer people.	7/22/2018
6722	75	/policies/waste-reduction/	Perfect as written.	7/22/2018
6723	2	/policies/access-to-employment/	Since all people working in Mpls don't necessarily live in Mpls or areas served by public transportation, what are you doing for employees who, for various reasons, must use a personal vehicle to get to work or between work sites?	7/22/2018
6724	9	/policies/open-spaces-in-new-development/	Yes, more of these, but they must be made of permeable surfaces and more green.	7/22/2018
6725	6	/policies/pedestrian-oriented-building-and-site-de	You talk about buildings and regulating them as if they've haven't been built yet. This doesn't make sense. I don't understand how you'll accomplish these goals for existing structures, which is what exists today. Also, eliminating off-street parking minimums is a terrible idea, especially in and around residential neighborhoods. Although I agree with your ideas regarding gas stations, drive-thrus and auto repair, it seems too heavy-handed and dictatorial for a democratic society.	7/22/2018
6726	76	/policies/new-parks/	Yes,I agree with this	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6727	70	/policies/ecology-and-habitat/	<p>Policy 70: a, b, c, d, e, f, g, h: Discourage use of pesticides and herbicides in collaboration with the DNR and State Statues. Eliminate use of neonicotinoids, pesticides in collaboration with State and DNR. Reduce use of salt on roadways. Restructure the oversight of the Shoreland Overlay to a Performance-Based Zoning Code: Recognizing that the built and natural environments should be in balance, seeking to create value and enjoyment for our residents, ensuring projects not only improve water quality, but also improving the quality of life in our communities. Objectives are:</p> <p>Maximize access to light and air of surrounding properties. Limit shadowing of residential properties or significant public spaces. Balance the scale and character of surrounding uses. Preserve views of landmark buildings, significant open spaces or water bodies. Identify critical areas and protect them. Mitigate impervious surfaces. Enhance urban wildlife survival.</p>	7/22/2018
6728	35	/policies/innovative-housing-types/	YES to these!: cooperative housing, bungalow courts, and single room occupancy units	7/22/2018
6729	77	/policies/park-access/	I agree with this	7/22/2018
6730	20	/policies/transit/	<p>The shape the transit system will take depends on which questions you ask. Up to this point, Metro Transit has asked, "How can we get people to work downtown and back?" And it does that very well.</p> <p>However, for the future, the question should be, "How can we make it easy to live without a car?"</p> <p>Suggestions:</p> <ol style="list-style-type: none"> 1. Put high-frequency transit on ALL arterial streets for their entire length. Example, 36th Street is an arterial for much of its length, but it has bus service only from Hennepin to Bryant, at which point the #23 drops down to 38th Street. BOTH 36th and 38th should have transit. Portland and Park should both have frequent service. 50th street should have frequent transit. 2. Make sure that all major destinations are served by transit 3. Emphasize linking existing walkable neighborhoods with transit rather than hoping that develop occurs because you put transit in. 4. Have community meetings and poll transit riders to ask what essential places are difficult to get to 5. All bus stops should have some form of shelter and posted schedules 6. Get rid of routes that snake back and forth among streets and are distinguished from one another only by letters. These are confusing to first-time riders. 	7/22/2018
6731	18	/policies/walking/	Yes! Long overdue.	7/22/2018
6732	73	/policies/stormwater-management/	The interrelated goals of storm water management and the high density built form corridor plans will require a great deal of design and coordination. Hopefully both creative and prescriptive solutions will be considered.	7/22/2018
6733	55	/policies/business-innovation-and-expansion/	City dollars and efforts should focus on supporting worker-owned and cooperatively-owned businesses above privately owned ones. Too often public dollars go towards supporting businesses that don't build community, don't have a real vested interest in their neighborhoods, and don't treat workers well. Cooperatively and worker owned businesses can help counteract this because there isn't someone working from the same profit motive who isn't necessarily as connected to the community. They can also help spread wealth-building wider throughout low-income communities.	7/22/2018
6734	3	/policies/production-and-processing/	Like l and m but what are you really going to do about cleaning up sites that were contaminated years ago and not corrected?	7/22/2018
6735	71	/policies/soil-health/	Policy 71: f: including removal of synthetic turf	7/22/2018
6736	76	/policies/new-parks/	<p>The city is right to focus on the most underserved residents. Some attention should also be paid to the *quality* of the walking path to the park; when the path is safe, shaded, and interesting, 20 minutes is an acceptable walk.</p> <p>Where the path is dangerous, or shadeless, 5 minutes is too much. Examples of dangerous paths include super-narrow sidewalks along busy streets, such as East Franklin.</p> <p>Example of shadeless paths include most bridge-crossing sidewalks.</p>	7/22/2018
6737	35	/policies/innovative-housing-types/	It has been exciting to see city-wide approval of ADU's begin to remove prescriptive barriers. Increased dialogue with the design community can hopefully further this goals.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6738	49	/policies/educational-and-economic-access/	Free technical college or Minnesota state tuition for all MPS graduates would go a long way towards increasing levels of educational attainment in low-income communities and communities of color. It would also help more Minneapolitians than a training program here or there. Plenty of cities and states offer similar programs for us to learn from.	7/22/2018
6739	72	/policies/sustainable-water-system-management/	Policy 72: i: Continue providing safe high-quality drinking water throughout public spaces while being stewards of public resources and infrastructure.	7/22/2018
6740	73	/policies/stormwater-management/	Policy 73: a, b, c, d, e, f, g, h, i, j, k, l: Through collaboration with MPRB, build infrastructure that decreases runoff pollutants to enter the City's bodies of waters to increase water quality.	7/22/2018
6741	12	/policies/lighting/	All good, but go one step further. Have development done in such a way as to allow for access to NATURAL light! Maintain setbacks.	7/22/2018
6742	77	/policies/park-access/	Perfect as written.	7/22/2018
6743	76	/policies/new-parks/	Policy 76: b, c, , d, f, g: In partnership with MPRB, improve the character and health of water resources and reduce impairments. Evaluate and revise City development ordinances to compensate for lack of affordable housing exemption of Park Dedication Ordinance Fees. Facilitate equitable investment of Park Dedication Ordinance Fees through proportional spending via proportional development, eg: 25% of every development required to have affordable housing.	7/22/2018
6744	43	/policies/housing-displacement/	<p>There needs to be quantified, targeted goals for this policy to be useful for working class and oppressed people living in or near Minneapolis.</p> <p>For example, the policy should state in plain language that "minimizing displacement" means ***the percentages of Black, Indigenous and other people of color living in Minneapolis will not decrease*** from their respective high points in recent decades (and preferably, should increase).</p> <p>To that end, the 2040 Comprehensive Plan should also set numerical targets for capping average rents AND home prices, relative to average incomes of Black and Indigenous people--not just within Minneapolis city limits, but regionally, to ensure there are no moveable goalposts or loopholes that allow displacement to go underreported.</p> <p>Specific, numerical definitions and goals within the 2040 Comprehensive Plan would lay the groundwork for more effective City programs to build truly affordable housing and hold landlords to account in the decades to come.</p>	7/22/2018
6745	33	/policies/affordable-housing-production/	<p>The loss of 15,000 affordable housing units while the city has added substantial additional housing/density in recent years -- such as Downtown, Uptown, Northeast, by U of M and along the Greeway and Light Rail -- suggests that the city isn't doing enough to require and incentivize developers of large projects to include a meaningful number of affordable units.</p> <p>That is where a big impact could be made relatively quickly. Those projects of scale are usually near job and transit centers, also supporting goals of job availability, income improvement, and reduced reliance on car traffic. As recent experience in Minneapolis and other large cities illustrates, adding density does not in any way guarantee affordability.</p> <p>Adding fourplexes on standard residential lots throughout the city is a backward and inefficient approach to attempt to address this issue. Plus, it would likely require expensive and extensive investment in infrastructure and regulation for which the city is unprepared.</p> <p>What is being done right now to address availability of affordable units in large projects, to utilize the hundreds of underutilized properties already owned by the city, and to develop different types of housing options along light-rail lines and the largest traffic corridors like Hiawatha, Nicollet, Lake, Portland, Park, Central, Washington?</p> <p>Upending zoning throughout the city, and concentrating more residential real estate in investor hands instead of those of small neighborhood homeowners, is not the most prudent way to address this issue.</p> <p>Destabilizing property values and introducing substantial uncertainty into the aesthetics/dynamics of small single-family streets citywide will result in decreased home ownership and individual investment in the city, less commitment to neighborhood longevity and improvement, and more likelihood of home purchases in suburbs.</p> <p>There is no proof that upzoning every residential property in the city on a speculative basis will result in improvement of affordable housing. So much further study would be required. Please walk before you run, and look close in for opportunities already ripe for the taking!</p>	7/22/2018
6746	58	/policies/business-districts-and-corridors/	Regarding e, what objective criteria do you refer to? And what kind of investment are you talking about? City investment via grants to private businesses or block grants to neighborhood associations? In other words, this is too ambiguous.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6747	58	/policies/business-districts-and-corridors/	Minneapolis needs to direct funding towards making our business corridors comfortable, welcoming places to walk. This will help draw customers. Too many corridors like 38th St, Broadway, parts of Central, and Hennepin have run down public realms with poor lighting, narrow sidewalks, and few places to sit or gather. If our public realm isn't any better than someplace like Richfield that also has freeway access and more parking then people of means will choose to go elsewhere.	7/22/2018
6748	13	/policies/landscaping/	When the landscaping includes cement boxes and does not maintain boulevards because you have allowed the developers to come right up to their property lines, snow can not be removed easy or effectively. Also, if you are to continue to allow boulevard gardens, POLICE them. They are mostly overgrown, not well maintained and in the vast majority of cases, exceed the height allowed by city ordinance, making them a public hazard for safety and visibility.	7/22/2018
6749	77	/policies/park-access/	Policy 77: a, b, c, d: Evaluate lack of park accessibility and potential for market rate and affordable housing development to encourage equitable investment of Park Dedication Ordinance Fees.	7/22/2018
6750	78	/policies/park-design-and-programming/	Policy 78: a, b, c, d, e, f, g, h, i, j, k: Through MPRB leadership,	7/22/2018
6751	81	/policies/social-connectedness/	Policy 81: a, b, c, d, e, f, g: In partnership with other public entities (Hennepin County, Minneapolis Public Schools, Minneapolis Park and Recreation Board)	7/22/2018
6752	1	/policies/access-to-housing/	Very supportive of this policy. A lot of our neighborhoods are already filled with small-scale multi-family buildings, however our zoning code has made them illegal. And buildings like duplexes, triplexes, and fourplexes traditionally blend in really well. Unless you are specifically looking for clues such as multiple doorbells or multiple mailboxes, oftentimes they could be mistaken for single-family homes.	7/22/2018
6753	14	/policies/tree-canopy-and-urban-forest/	Not sure how you plan to do this with the massive up zoning you have proposed in this plan. You can replace mature trees, but they will not really be replaced for decades. Insist that any new development maintains existing trees. And maintain setbacks.	7/22/2018
6754	0.1	/topics/land-use-built-form/	<p>My husband and I have been living at 3110 Benjamin St NE for 19 years. We have seen many young families move in over the years and revitalize the neighborhood. Our corner of Waite Park is a very family oriented neighborhood. I am not against allowing some additional density to our area, but within reason. I think duplexes and accessory dwelling units would be perfectly acceptable. The lots are not large here and houses are very close to each other. I am concerned about allowing 3 or 4 unit dwellings on the lots in our neighborhood. First of all, much more floor area ratio would be needed than is currently allowed (50%) to be able to fit 3 or 4 unit dwellings on these lots. We would lose a lot of green space and also having that many more people in such a small area would increase noise and traffic considerably, as well as block the sun from our yard if such a large building were to be built next door to us.</p> <p>People have moved to this neighborhood because of the quiet, family oriented neighborhood that it is. I don't think it is fair to radically change the zoning laws to penalize the people who are currently living here. As I said I am not against duplexes and accessory dwelling units. I hope you will consider adjusting your proposal for the Interior 1 neighborhoods to include only duplexes and accessory dwelling units. This would increase density a bit without radically changing the character of our neighborhood. Please keep the current maximum floor area ratio at 50%.</p> <p>The house next door to us has been rented out for the last 8 years. We have had good and bad renters. When there were bad renters (roughly 4 years total) they did not respect the neighborhood. Because the houses are so close together, that was quite challenging.</p> <p>I have been coming to community meetings organized by the city and by Kevin Reich and I intend to stay engaged as this process continues to unfold. Thank you for your consideration.</p> <p>Bonnie Fanz 3110 Benjamin St NE 612-227-3684</p>	7/22/2018
6755	33	/policies/affordable-housing-production/	Minneapolis needs to invest real money- and more than just a million dollars here or there- in public housing, low-income cooperatives, and other truly affordable housing options. Developer built affordable housing is often anything but. If the city really wants housing to be affordable, then a larger percentage of it must be publicly and/or cooperatively owned. Public housing doesn't have to mean 20 story concrete towers. It can just as easily be rowhouses, small walk-ups, etc.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6756	2	/policies/access-to-employment/	Increasing employment not just downtown, but along corridors well served by public transit is very important. A healthy mix of housing and employment along the entire length of a transit corridor is vital to achieving balanced, bi-directional flows on transit.	7/22/2018
6757	74	/policies/integration-of-water-management-into-	This is great policy, but seems to fly in the face of the massive development you expect to see with the proposed up zoning. Which is your priority?	7/22/2018
6758	0.1	/topics/land-use-built-form/	Interior 2 or interior 3 should be the minimum	7/22/2018
6759	3	/policies/production-and-processing/	Sites available for production and processing are already too sparse in Minneapolis, so protecting what we already have and expanding is very important.	7/22/2018
6760	33	/policies/affordable-housing-production/	I'd like to see more housing available to people of all income levels in South Minneapolis. Minneapolis is too segregated by race and income right now. I'd also like to see more options like apartments and condos so that when I get too old to maintain my house, I don't need to leave my Southwest Minneapolis neighborhood.	7/22/2018
6761	34	/policies/affordable-housing-preservation/	I support these strategies, but I'd like to see them implemented by directing the market as opposed to the city spending some of its finite money to purchase "naturally occurring affordable housing".	7/22/2018
6762	1	/policies/access-to-housing/	This is a great idea. As a Minneapolis resident we need more housing. This, in the long run, will keep the price of housing affordable. Minneapolis needs to look to the future and provide for the opportunity for all to have their own home.	7/22/2018
6763	78	/policies/park-design-and-programming/	Regarding F: park programming should be 100% free to the greatest extent possible, regardless of income. A peculiarity of Minneapolis people; wealthy residents are also likely to avoid park programming with fees. Fee structures that exclude high-income children would be negative at several levels. Furthermore, reduced fee programming (as opposed to free programming) is often used to "launder" subsidies to programming that only wealthy people use (e.g. subsidized golf courses).	7/22/2018
6764	4	/policies/access-to-commercial-goods-and-service	Expanding access to commercial and retail services is very important to make our neighborhoods truly walkable, bikeable, and transit-friendly places. However, increasing population is also essential to ensure that there are enough people to support our retail and commercial uses.	7/22/2018
6765	1	/policies/access-to-housing/	This is generally great, and zoning should definitely reflect existing uses. Neighborhoods that already have a mixture of housing types should not be zoned single family, and there should not be single-family zoned districts near downtown or on major transit lines. Make sure that transit access, bike facilities and housing density are connected in the city's zoning and planning. 4-unit walk-ups 8 blocks from mediocre transit in the far reaches of the city are just going to lead to worse traffic but closer in they could encourage us to live more sustainably.	7/22/2018
6766	4	/policies/access-to-commercial-goods-and-service	Make sure all commercial and retail uses are pedestrian-oriented first, transit-oriented second. Auto-oriented businesses should be given the lowest priority.	7/22/2018
6767	35	/policies/innovative-housing-types/	I'd love to see more types of housing available in Minneapolis. There is a very cute bungalow court on 44th street that reminds me of some of the residential streets in Paris. I'd love to see more housing like that. I've also seen in magazines from very innovative multi-unit, multi-generational "3-plexes" and "4-plexes" that could be super cool options for families.	7/22/2018
6768	37	/policies/mixed-income-housing/	Neighborhoods like Seward/Longfellow, Linden Hills, etc should be required to carry their fair share of affordable housing instead of just concentrating it in low-income areas.	7/22/2018
6769	1	/policies/access-to-housing/	As a licensed architect, I see the current control policies for development simultaneously necessary and counterproductive, especially to "affordable housing." Specifically for homeowner driven single-family work, the amount of professional resources required to see a project through permitting prohibits the majority of homeowners from embarking on construction, or even improving their property. I appreciate that multifamily housing units will increase lifestyle options for individuals and families, but I hope care is taken to distinguish between the means of a large developer and a single-family home owner when it comes to implementing process.	7/22/2018
6770	51	/policies/healthy-pre-k-development/	Regarding c, you're not going to decrease language disparity by having increased interactions between parents and children, especially if the parent is not a fluent English speaker. Then again, why are you trying to culturally mold all children into one language? There are benefits to differences.	7/22/2018
6771	5	/policies/visual-quality-of-new-development/	Ensuring quality design requirements is a good thing, but we should be careful not to get too carried away that we end up unnecessarily driving up the cost of construction.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6772	36	/policies/innovative-housing-strategies/	I'd really like to see Minneapolis evaluate if some of its roadways could be converted to lots that housing could be built on. Many of our roads are much wider than they need to be, and could conceivably have homes built upon them, and still leave room for automobile and emergency vehicle traffic on at least one side. This is true of 46th Street in Linden Hills, and Sunnyside Ave could also be closed and turned in to a buildable lot. These are just a couple of examples from one neighborhood, I'm sure that there are many other such examples throughout the city.	7/22/2018
6773	1	/policies/access-to-housing/	I support 4 plexes on single family home blocks but I am also concerned about how it will be done. Support #1 - Seniors can downsize but have a home like unit. I have many lady friends age 55-70 who want to downsize their large home but don't want to live in a big high rise senior complex on a busy street with hallways and balconies. They want to walk out their door and sit in their yard and hang out their sheets to dry without apartment rules against it. Support #2, Many older neighborhoods used to have 4-6 plex brownstones on the corners of each block that looked nice and blended with the neighborhood. How about just allowing them on corner lots, this would not change the look of blocks so much. Concern #1, Small bungalow neighborhood blocks are already losing their character with teardown mega homes and modern corrugated metal sided houses being built. Fourplexes should only be allowed with very strict design guidelines which may include blending in the neighborhood. Concern #2: More density with four plexes on each block will mean more cars parked on the street. While I don't mind the parking, the cars all day emit locking and unlocking noises with beeps, honks and chirps which can be heard inside my house. If Mpls zones for more density then all car lock noises should be banned in the city limits. Concern #3: Land and Construction is very expensive. The city should do what it can to ease building rules so that neighborhood residents can build a 4 plex on their own plot and not just deep pocket developers. For example current code requires costly fire sprinkler systems on 4 plexes when sufficient fire proof wall board is cheaper to separate units. Granny flats are now allowed but hardly anyone is building them because of the cost. Has the city really looked at easing some outdated costly building rules so more single family homes can add at least 1 housing unit to their lot?	7/22/2018
6774	40	/policies/homelessness/	They city needs to devote more money and resources to providing better facilities and services for the homeless, especially downtown. There should be safe, welcoming, public drop-in centers and shelters for anyone who needs them downtown instead of a patchwork of overstretched, often religious non-profits with different missions and goals. Also, for far too long we've allowed our central library to take the place of a proper homeless drop in center. A prosperous, developed city should treat its homeless better.	7/22/2018
6775	1	/policies/access-to-housing/	policy 1 - d. and e. I am opposed to both plans to zone a city lot that currently is single family zoned into a multifamily property of up to 4 units. The city does not understand that we are a car-driven city, even for those who bike and walk often, cars are always a necessity. Minneapolis streets have not kept up with the increase of population and therefore we have enough congestion on residential streets with too much parking allowed on both sides of the residential streets. There is absolutely no room for four-plex buildings to be zoned and built on a city lot next to a moderate single family home. We choose to live in our neighborhoods of Kenny, Armatage, Lynnhurst, Fulton because we do NOT want to live in a multifamily building and we do NOT want the extra noise this creates, and we do NOT want cars parked on both sides of a narrow residential street because there are multi-unit housing where a single family home should be. We moved to these neighborhoods to own lovely old houses with bike trails and parks close by to enjoy the full benefit of home ownership. If I wanted to live in an urban, tall buildings blocking the sunlight and constant noise from increased cars and people, I would have bought a condo in downtown Minneapolis. City lots in our neighborhoods have been razed and new huge construction houses are going up every week, these new homes fill the lots with little or no yard left. How can it be logical to allow zoning for a four unit 3 story building onto a standard single family lot size in our neighborhoods? There is simply no space and there is no where to park for up to 12 cars when most of the neighbors have to park on the street anyway due to only having single car garages in these areas. I do not want any builders to have the opportunity to have easy zoning laws that allow for multi-unit buildings to be built next to sweet old houses and I certainly do not want to be a neighbor who has no rights to oppose this happening. This new policy appears to allow for "anything goes!" and the residents cannot stop it from happening. So my voice is against this policy #1 and policy #33 - I chose to live in SW Minneapolis, not Downtown or other high density areas of the city.	7/22/2018
6776	36	/policies/innovative-housing-strategies/	I'd also like to add that Community Land Trusts seem like an interesting idea. I first read about them here: http://urbanplacesandspaces.blogspot.com/2018/03/not-particularly-radical-housing-ideas.html?m=1	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6777	47	/policies/housing-maintenance/	I 1000% agree with this policy. But the current up zoning is likely to increase taxes, allow for buildings that do not fit in to current neighborhoods to be built and thereby ruining the integrity of a neighborhood. This should be a priority over new construction! The older homes may need some TLC, but they are also more affordable than new construction. And for the starter homes that are older, create lending tools for people to fix them up. Also, you need to make sure that taxes don't go so high as to force people from their homes.	7/22/2018
6778	33	/policies/affordable-housing-production/	What's missing in this admirable set of goals is a specific objective, one that's required if we're to think systemically about the future and how to address multiple social goods. This specific objective should be that virtually no one, aside from the wealthiest 5% (to pick an arbitrary number), should be paying more than 15-20% of their income for rental housing. Under prevailing laws and housing realities much of the MN economy is negatively affected by the removal of a great amount of potential disposable income by mortgage payments and rent. We could see an unprecedented boon to the local economy if the great majority of its rental housing citizens were paying substantially less in rent than they currently are. This is only the beginning of what else could be achieved. Right now many people have no money for retirement, many can't afford education, and still many more can't afford healthcare. Let's once and for all bury the notion that rental property is first and foremost a way for property owners to generate wealth. Mpls should officially be indifferent to the financial fortunes of landlords and property developers. We've never lived in an economy in which rental housing is seen as an incidental expense and not a major, scandalous economy-impoverishing mechanism of wealth transference from most people to the top. We need radical and innovative thinking to transcend this historical economic mistake of treating rental housing as investment and not as a basic right. Where's rental control? It should be on the table. Where are the proposals for incremental and continuous rent reduction over time? How is this NOT a consideration? Do we want a thriving arts community or not? Do we want people to have more free time or not? Do we want the local economy to thrive like never before or not? We need to think anew about all aspects of rental housing and how it fits into human life and the rest of the economy.	7/22/2018
6779	6	/policies/pedestrian-oriented-building-and-site-de	Require new buildings located on the corner of an intersection to have their primary entrance located at the corner, like is currently in place in the Hennepin/Lyndale PO District. Wherever possible, require that curb cuts for parking are not placed on primary streets with heavy pedestrian traffic, but preferably on side streets. Where that is not possible, on-street parking needs to be eliminated adjacent to the curb cut so that cars trying to pull out of parking lots can get a clear line of sight for oncoming traffic without pulling out and blocking the sidewalk. Left turns out of parking lots should be prohibited on most arterial streets.	7/22/2018
6780	38	/policies/affordable-housing-near-transit-and-job	I hope that other cities around Minneapolis in the Metro area are also looking to increase the availability of affordable housing near their Transit and Job Centers. I would like to see improved coordination with the cities around us.	7/22/2018
6781	1	/policies/access-to-housing/	Many of the streets you've tagged as high-frequency routes are still small neighborhood streets, such as Upton Ave S and 44th St. This plan looks like it's had a lot of input from land developers who want to build and grow their revenue, rather than considering the neighborhoods and communities. Also, our schools are incredibly crowded already. I'm really disappointed in this planning committee.	7/22/2018
6782	15	/policies/transportation-and-equity/	The city needs to actively fund and support transit and on-street transit infrastructure much like places like Seattle. Every city street design should consider bus bump-outs, waiting areas, bus lanes, etc if it is on a transit route. Without the city taking making sure buses run quickly and efficiently through city streets seriously, any talk about transportation equity is little more than hot air.	7/22/2018
6783	7	/policies/public-realm/	Integrating public realm improvements with street reconstruction and new building construction is a very smart idea.	7/22/2018
6784	8	/policies/public-safety-through-environmental-de	Very supportive of this policy.	7/22/2018
6785	40	/policies/homelessness/	I like these action steps. I'd prefer that no person ever become homeless, but in the interim, I'd like to see an action step around keeping children stable in their current educational setting, even if their guardian(s) should lose their housing.	7/22/2018
6786	79	/policies/healthy-youth-development/	<p>Living in close proximity to noisy roads is closely correlated to chronic health problems and under-socialization in children. There is a mismatch here with our zoning, which allows large number of residential units on noisy roads like Hennepin and Lyndale, while pricing out families from healthy areas like Lake Harriet and Lake of the Isles.</p> <p>Reducing the levels of noise and pollution on these dense residential corridors should be a priority; it should be a higher priority than maintaining low levels of noise and pollution on relatively unpopulated "neighborhood interiors".</p> <p>A long-term solution is to reduce the number of lanes for POV traffic on residential corridors like Hennepin.</p> <p>A quick solution would be to replace noisy diesel buses with all electric buses.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6787	55	/policies/business-innovation-and-expansion/	I don't understand action step a. When you use "ecosystem," does it refer to the economic system or the ecological system? Think it should be rewritten to make plain what is really being said.	7/22/2018
6788	9	/policies/open-spaces-in-new-development/	Very supportive of this policy.	7/22/2018
6789	56	/policies/supporting-small-businesses/	You need to not only the development and growth of small businesses, you need to MAINTAIN the small businesses that currently exist and have existed in our neighborhoods for decades. It is a laudable goal to prioritize small businesses owned by people of color, women and those with low incomes, but you must support all small businesses. Why? They employ local people, those local people live locally, those local people create the stability of our neighborhoods, and help to create community. They are more likely to walk, bike or take public transportation. Many of our local businesses are in smaller, older buildings that are in peril of being bought, developed and then overpriced for the current business, who would probably have gone out of business while their enterprise was disrupted. YES to supporting small business. This should be a priority before up zoning and development.	7/22/2018
6790	10	/policies/street-grid/	Restoring the traditional street grid is very important to improving walkability.	7/22/2018
6791	41	/policies/tenant-protections/	If landlords aren't keeping their housing units in safe, habitable shape, the city should be granted an opportunity to purchase and rehabilitate the landlord's units.	7/22/2018
6792	7	/policies/public-realm/	The majority of Minneapolis' pedestrian realm is really awful- especially in lower-income areas. We seem to still view things like sufficiently wide sidewalks, regularly spaced crosswalks, and adequate lighting as luxuries. If we want a truly sustainable, equitable city, we need to view these as equally important as car infrastructure, and sometimes more. We seem to have finally gotten it when it comes to bike infrastructure but haven't caught up when it comes to walking.	7/22/2018
6793	11	/policies/skyways/	Making sure skyways can coexist and not negatively impact street-level activity is very important.	7/22/2018
6794	42	/policies/expand-homeownership/	The city should create a municipal bank that could lend money specifically for improving access to homeownership for low-income residents and people of color.	7/22/2018
6795	12	/policies/lighting/	Pedestrian scale lighting throughout the entire city is very important. Even in areas that already have pedestrian scale lighting, they are spaced too far apart, leaving gaps in coverage.	7/22/2018
6796	0.1	/topics/land-use-built-form/	I am struck by the controversy about development in the Snelling/St. Clair area of St. Paul. That is the kind of neighborhood where density belongs, not to minimize the concerns of people whose homes will be affected by development. But that is an area, like the part of NE Mpls attracting high-rise development around E Hennepin, where this debate belongs. The idea of plopping down 4 story buildings in neighborhoods that are currently single family home-oriented is just wrong and will be regretted by future generations. Here is the link to the article: http://www.startribune.com/st-clair-snelling-development-may-be-sign-of-fights-to-come/485983771/	7/22/2018
6797	17	/policies/complete-streets/	Complete streets should be taken as the 1st priority, not something to do after thinking about car access or parking. If a street doesn't have pleasant, useable sidewalks, marked crosswalks, safe places to bike, and appropriate transit facilities then it isn't complete. The city needs to also stand up to Hennepin County on this issue.	7/22/2018
6798	13	/policies/landscaping/	Very supportive of this policy.	7/22/2018
6799	43	/policies/housing-displacement/	Upzone areas of Minneapolis that have had racial covenants in the past.	7/22/2018
6800	33	/policies/affordable-housing-production/	Please go back to small area plans and involve neighborhoods that way. This top down approach is not nearly as effective as a getting input from the neighborhoods. Restore small area plans and money for neighborhood organizations.	7/22/2018
6801	18	/policies/walking/	Crosswalks are important pedestrian infrastructure, and they need to be painted and enforced. Minneapolis' defacto policy of not painting crosswalks at unsignalized intersections and not enforcing crosswalk laws needs to change. If people can't safely cross the street then they can't safely walk.	7/22/2018
6802	56	/policies/supporting-small-businesses/	Regarding action d, does this say the City is creating niche-based programs for businesses. If this is referring to software programs, that's not the City's business. If it means special programs to help niche startups, it should be more specific. Most of the time, the City should just get out of the way.	7/22/2018
6803	16	/policies/environmental-impacts-of-transportation/	Regarding Action Step A: TDM strategies are already currently required of new developments for the most part. The most concerning gap is that there is virtually no follow-up after a TDM plan is approved. There should be a full examination of alternatives of the best way to track implementation and offer incentives or disincentives to achieve desired outcomes for individual developments. Please strengthen Action Step A by rephrasing it to start with "Require implementation of..."	7/22/2018
6804	14	/policies/tree-canopy-and-urban-forest/	Protecting and expanding our tree canopy is essential. While our neighborhood interiors already have very good tree canopy coverage, I feel our commercial and mixed-use corridors lack sufficient tree canopy coverage. We should make sure to address that to whatever extent possible.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6805	16	/policies/environmental-impacts-of-transportation/	Regarding Action Step A: TDM strategies are already currently required of new developments for the most part. The most concerning gap is that there is virtually no follow-up after a TDM plan is approved. There should be a full examination of alternatives of the best way to track implementation and offer incentives or disincentives to achieve desired outcomes for individual developments. Please strengthen Action Step A by rephrasing it to start with "Require implementation of..." - Ben Shardlow, Director of Urban Design for the mpls downtown council & Minneapolis Downtown Improvement District	7/22/2018
6806	46	/policies/healthy-housing/	I support all of these action steps. Action steps D and E are particularly exciting to me.	7/22/2018
6807	19	/policies/bicycling/	Downtown and other major gaps in bikeways need to be fixed. Besides 3rd Ave and part of Washington Ave, there are no safe, comfortable bikeways downtown, especially when coming from the north side. Fixing these gaps should take priority over moving volumes of car traffic, even if it means more congestion short term.	7/22/2018
6808	57	/policies/cluster-strategy/	If this means you're going to continue to dump on East Mpls, it's a bad idea. Please identify what clusters you are talking about.	7/22/2018
6809	15	/policies/transportation-and-equity/	Very supportive of this policy.	7/22/2018
6810	79	/policies/healthy-youth-development/	Our K-12 education system is excessively geared towards college prep; this has disastrous outcomes for many students who cannot or dare not proceed to tertiary education. Minneapolis is well positioned to replicate the German fachhochschule system; placing technical/practical education on an equal level parallel to college prep gives German blue collar workers a level of dignity that our high school and college dropouts struggle to achieve. Children must be given the opportunity to pursue a technical/practical education beginning in high school or middle school.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			<p>It's been deeply disheartening to watch the comment period become play out, with supposed city leaders spreading fear and misleading talks. Affluent owners of very expensive homes have come out in force to protest that modest, single family homes will be bulldozed and families forced out of the city. If so, why are we hearing that message from Linden Hills and Lynnhurst and not Longfellow?</p> <p>Meanwhile, is an article of faith that new housing will be more expensive. That's certainly true when we can only replace an existing house with a single house that's bigger and/or fancier, but opening up to small multi unit buildings offer the possibility of units that are in line with existing housing, not to mention offering an increase in unit.</p> <p>But regardless, there is simply no way to keep all of our existing structure and housing affordability. The same number of homes trying to accommodate more people means ever more expensive homes and ever more pressure to remodel or tears down. We're seeing exactly that all over the city, with modest homes disappearing for expensive ones. That trend will continue unless we can build something other than single family homes. You can either preserve structures or affordability, not both.</p> <p>But it's more than housing economics. It's values. Continuing to restrict housing supply, especially in our most desirable neighborhoods, is saying no to new neighbors. It's continuing our economic, opportunity and racial disparities. It's unMinnesotan.</p> <p>I want more neighbors. I want more diversity. I want more people to be able to live close to work and to the things they need. I want more customers for local businesses. I want more people who can ride the bus with me to work. I want more people who can drive less because they live in a city. I want a city that's a place to spend time and enjoy yourself, not a place to drive through.</p> <p>For decades we've allowed ourselves to treat the neighborhoods in the center of the city - especially Greater Phillips - as throughways for people going downtown or across town, dehumanizing the people who actually live there. Park, Portland, 26th and 28th have all had changes to make them safer as roadway, but they're still mostly passage for cars when they should be neighborhood streets.</p> <p>The city is for people. It needs to be allowed to evolve back to a place for people. Housing, sidewalks, bikeways, hospitality and recreation over fast traffic and car storage. This plan has the vision more or less right. Please don't let those who are stuck in the 20th Century undermine it.</p>	7/22/2018
6811	0.1	/topics/land-use-built-form/	Finally, the climate crisis is real. We cannot take meaningful climate action by forcing people to live in far flung suburbs. We need them to	
6812	49	/policies/educational-and-economic-access/	Increasing apprenticeship opportunities is a great idea!	7/22/2018
6813	20	/policies/transit/	Yes! Minneapolis needs to take bus stop design and placement seriously. The details, which the city often controls, make or break transit quality. Too often Metro Transit has good ideas for how to improve local stops only to have them reversed when someone complains to their local council member. The city council and public works should understand how bus routes work and why they're important, and they should be vocal in supporting good transit.	7/22/2018
6814	1	/policies/access-to-housing/	Please protect small business and art production spaces in Northeast Minneapolis	7/22/2018
6815	47	/policies/housing-maintenance/	Coordinate these action steps with Policy 49, and create apprenticeship programs that maintain older homes in the city.	7/22/2018
6816	3	/policies/production-and-processing/	Add art production space as a protected class.	7/22/2018
6817	90	/policies/technology-in-the-economy/	Item a seems out of the realm of the City's capability. The high tech companies know more about this than anyone in the City management. You should definitely engage with the tech companies, but use their products to improve City operations. Don't expect they want your help, just your business.	7/22/2018
6818	51	/policies/healthy-pre-k-development/	The city could help to achieve some of these goals by establishing permanent locations for Early Childhood and Family Education (ECFE) programs. Currently, ECFE programs can get bumped out of the schools that they are in if the principal decides that they need the classroom space for another purpose.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6819	18	/policies/walking/	For Action Step C, please add raised crosswalks and/or tabled intersections to the list of clearly-designated pedestrian areas to be provided. The raised crosswalks on Nicollet have been well-received as a pedestrian enhancement, and they're emerging as a standard streetscape element in other cities that are pursuing Vision Zero initiatives. Raised crosswalks should receive serious consideration as a standard streetscape element rather than being an alternative. - Ben Shardlow, Director of Urban Design for the mpl's downtown council & Minneapolis Downtown Improvement District	7/22/2018
6820	5	/policies/visual-quality-of-new-development/	Require City projects to include public artwork purchased locally.	7/22/2018
6821	29	/policies/creative-sector-economy/	Protect existing Arts Districts.	7/22/2018
6822	52	/policies/human-capital-and-a-trained-workforce/	We need more apprenticeships, like Germany has, to create a skilled workforce, and to allow people to earn a living wage with dignity.	7/22/2018
6823	5	/policies/visual-quality-of-new-development/	These guidelines are such b.s. How does the city think that it can uphold these design standards when they haven't been done before? Our neighborhood in Fulton has been complaining about the poorly designed suburban style houses that have infiltrated our neighborhoods but to no avail. How do you hold developers to a higher standard?	7/22/2018
6824	30	/policies/arts-and-cultural-assets/	Protect the existing infrastructure of artist production spaces in the Northeast Arts District.	7/22/2018
6825	54	/policies/supporting-economic-growth/	Please stop offering tax incentives to major corporations like Amazon and the NFL. That money should be going to the community.	7/22/2018
6826	70	/policies/ecology-and-habitat/	Minneapolis needs to do a full inventory of natural assets and define species it seeks to protect. I can't support any plan that has no specific targets or measures the impact of development on existing habitat.	7/22/2018
6827	20	/policies/transit/	MnPASS lanes provide benefits to the wealthy/those willing to pay and allow them to use lanes all of us have been taxed to build. The freeways are crowded enough as it is without taking away more lanes from the general public. Strongly disagree with g.	7/22/2018
6828	55	/policies/business-innovation-and-expansion/	I disagree with the subtext of Action Step H. Please stop offering tax incentives to major corporations like Amazon and the NFL. That money should be going to the community.	7/22/2018
6829	31	/policies/creative-workers/	Provide property tax abatement opportunities for artist production spaces to allow artists to remain in Minneapolis.	7/22/2018
6830	38	/policies/affordable-housing-near-transit-and-job-	Except in existing production areas	7/22/2018
6831	16	/policies/environmental-impacts-of-transportation-	Disincentivizing SOV trips and incentivizing transit, walking, and biking trips is very important. For new residential development, cost of parking should be required to be unbundled from the overall rent. Transit passes should be required to be bundled with the cost of rent, with the option for residents to get a rent discount if they already have a transit pass through school or work. The city should work with landlords to ensure they are able to provide transit passes to tenants. Encourage district parking wherever possible. All parking along major arterial transportation corridors should be paid parking with dynamic pricing that increases and decreases to match demand. Ideally, all parking should be priced to put it at a disadvantage to taking transit, walking, or biking. On-street parking in neighborhood interiors, especially in neighborhoods where on-street parking is already at a premium, should be permit-only. Parking minimums should be eliminated city wide, and parking maximums should be strongly considered along transit corridors.	7/22/2018
6832	54	/policies/supporting-economic-growth/	Improve existing properties and infrastructure.	7/22/2018
6833	1	/policies/access-to-housing/	I am opposed to tearing down single family homes and replacing with duplexes, four plexes in our single family neighborhood. No one except rich people could afford to buy a duplex, or fourplex. Other corporations and foreign operations will be the only ones able to purchase and those corporations/individuals would not live in the neighborhood.....they would not care about the community....they would only want to make a profit!	7/22/2018
6834	55	/policies/business-innovation-and-expansion/	Preserve existing assets and arts Districts	7/22/2018
6835	56	/policies/supporting-small-businesses/	Add artists to this section	7/22/2018
6836	58	/policies/business-districts-and-corridors/	Support the existing Arts Districts	7/22/2018
6837	81	/policies/social-connectedness/	Preserve existing buildings.	7/22/2018
6838	1	/policies/access-to-housing/	Small lots in South and Southwest Minneapolis will not adequately support multi-unit structures, while maintaining any level of green space. Character of older homes is noticeable in any large city, and should be valued. I am opposed to addition of small scale structures on traditional city lots. I am in favor of limiting large single family dwellings on traditional city lots. I do not believe that the city will manage building sizes, based on approval of excessively large houses right now.	7/22/2018
6839	91	/policies/heritage-preservation-outreach/	Interesting that the goals are to preserve historic properties...but then there is this blanket upzoning. This will only hurt POORER neighborhoods! There are lots of older, historic, and architecturally interesting buildings in North, Phillips, Longfellow, South, Northeast, and Powderhorn...but this city wants to allow unbridled gentification and push affordable housing and struggling residents out of the city. The trend is to save historical buildings, gut them, and turn them into work co-op playgrounds for wealthy young white males. Oh, and feel free to leave your electric scooter at the door so someone else can pick them up!	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6840	0.1	/topics/land-use-built-form/	<p>To the mayor and the city council:</p> <p>I live in a single family home at 5210 Belmont Ave south, one block west of Nicollet. It is proposed that the lot to the south be re-zoned to accommodate a six story building. I have lived here with my wife since 1994. We have worked hard to maintain & improve our property and to build equity in it. Home equity is probably the biggest savings plan for the middle class in this country.</p> <p>What do think, and this is not a rhetorical question, will happen to that equity when that house to the south is razed and a six story building is erected in its place? So my question to you all is simple: What right do you have to take away the value of my property? It seems to me your answer is the end justifies the means. Take away some of the value at 5210 Belmont, so we can seriously increase the value, and hence the tax revenue of a lot on Valleyview. This is the end result, is it not, of higher density-higher tax revenue?</p> <p>So the end result is probably admirable from your perspective: Grow the City's revenue. But does this make the City more affordable? And at whose expense? Mine, apparently.</p> <p>I think it is the second law of physics that states that for every action there is a reaction. It is my opinion that the reaction to your 2040 plan is just beginning. I have loved living in this city since 1981, when I moved here from Faribault. It is sad for me to think that that love may be coming to an end.</p> <p>John Wilhelms 5210 Belmont Ave South john_wilhelms@msn.com</p>	7/22/2018
6841	2	/policies/access-to-employment/	<p>People who live downtown and work downtown are people of financial means. People who work downtown in the service sector and make minimum wage need to live in poor neighborhoods and take light rail and the bus downtown. People who live on less income, \$15-25 per hour cannot afford to live downtown. And the wealthy people do not want to live by poor people. It is an unfortunate fact of life.</p>	7/22/2018
6842	0.1	/topics/land-use-built-form/	<p>This plan has high-sounding goals and descriptions, but the devil is in the details. The plan allows for high-rise buildings up to 30 stories in the area NW of Bde Maka Ska. That is apparently because there might a SW LRT station near there. That LRT line should never be built. It does nothing for residents of the City of Minneapolis. Who will be helped by an LRT line to Eden Prairie? That line will be a safety hazard and environmental disaster.</p> <p>That area is already overbuilt and existing traffic congestion on Excelsior Blvd. and Lake Street already creates unsafe conditions. The proposed rezoning, proposed Calhoun Towers, and LRT station (if ever built) will only exacerbate the dangers. Those dangers have been ignored by the developer and the City Planning Commission and staff, of which few, if any, live in the area.</p> <p>The plan for this area should be killed in its entirety.</p>	7/22/2018
6843	2	/policies/access-to-employment/	<p>Agree about promoting employment growth. Focus on technical, scientific and engineering.</p>	7/22/2018
6844	31	/policies/creative-workers/	<p>The intro to this section does not match the goals. You talk about creative workers (but don't define them) in the intro. The goals basically talk about artists. But the intro could be about creative cooks in food trucks for all we can tell. Rewrite.</p>	7/22/2018
6845	58	/policies/business-districts-and-corridors/	<p>I'd like to see an additional action step here that reduces the impact of automotive traffic on business districts and instead promotes pedestrian, bicycle, and transit users instead. The Lyndale and Lake intersection would be a much more welcoming business district if each corner wasn't separated by 4 or 5 lanes of automotive traffic.</p>	7/22/2018
6846	17	/policies/complete-streets/	<p>Complete streets should also follow NACTO guidelines to the best extent possible as laid out in their "Urban Street Design Guide," "Transit Street Design Guide," and "Urban Bikeway Design Guide." The City should work to take ownership over county roads and trunk highways from Hennepin County and MNDOT. Too often, our complete streets principles cannot be implemented because the streets are county roads and we cannot convince Hennepin County to follow our principles.</p>	7/22/2018
6847	18	/policies/walking/	<p>Very supportive of this policy. The existing auto-oriented design a of a lot of our streets can make walking an unpleasant experience, and needs to be corrected.</p>	7/22/2018
6848	19	/policies/bicycling/	<p>Bike lanes are one of the main reasons I moved here from St. Paul. Bike commuting has totally changed my life. Please continue to expand and improve the city's bikeways. But more importantly, please do a better job of maintaining them in the winter. I am happy to be a year-round bike commuter, but in the winter the plows shove all the snow into the bike lanes. Also, please work with the park board to do a better job of maintaining bike trail connections beneath bridges, etc.</p>	7/22/2018
6849	3	/policies/production-and-processing/	<p>Bicycle access is not realistic for at least half of the year. We are not in a temperate climate, so expecting people to bike in the winter, on ice, is completely unrealistic.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6850	0.1	/topics/land-use-built-form/	The concept of transit corridors needs to be substantially revised. The use of transit corridors here to describe residential streets that have bus service is way out of whack with what a transit corridor is supposed to be thought of. The light rail line in comparison would be a true transit corridor. So on the bus line what's reasonable? Well 1-4 stories with a pre approved way to go higher isn't ok. likewise 1-6 with a pre approved way to go higher isn't ok. these are by and large residential streets, lots of single family, duplex, maybe 4plex build outs. The plan could up zone to make those types of structures legal but to go up to 4 stories effectively as the minimum for all these streets is way more than they should be expected to take. In that same vein, the 3 story build outs all around that are too much for what those areas should be expected to move to. The consequences to families or people living in true small size residential to have buildings towering over them is too easy for density advocates to dismiss as "NIMBY" attitudes, but they are real, people chose where they live based on what it's like and what it is likely to become and this is a huge curve ball for thousands of homeowners who don't think 6 stories - or more - of windows and balconies out their backyard is the way to go.	7/22/2018
6851	19	/policies/bicycling/	Bicycle facilities should meet NACTO guidelines as laid out in their "Urban Bikeway Design Guide." The City needs to explore stronger enforcement of bicycle facilities. Too often, bike lanes are blocked by delivery trucks and other vehicles. Dedicated loading/unloading zones need to be implemented to ensure this does not happen.	7/22/2018
6852	59	/policies/downtown/	I particularly support action steps b and c. I'd also like to see a congestion charge implemented, and more public space given back to transit, pedestrians and bicycles. Too much of downtown is dominated by automobiles. I'd also like to see Nicollet Mall turned in to a pedestrian and bicycle-only mall. The buses are unpleasant for outdoor cafe-goers, they operate slowly, and are dangerous for pedestrians.	7/22/2018
6853	1	/policies/access-to-housing/	Eliminating zoning in the city strikes me as an insane idea. Why would we want to get rid of our various neighborhoods and promote duplexes, triplexes, fourplexes on regular 40- and 50- foot lots? Most of these neighborhoods have small streets and this will increase parking issues. I specifically write about the area near the Kenwood Elementary School. This increased density will no doubt cause major problems for buses trying to bring children to school as well as increasing the likelihood that children will be hit by cars trying to circumvent the parked cars and buses. Furthermore, these neighborhoods will now be subject to the vagaries of the developers, who will not care about maintaining green space and environmentally friendly structures. It will not promote affordable housing at all! Another problem is that we have limited bus service in the Kenwood / Lowry Hill neighborhood so it creating density will require more cars. The additional pollution from this density will endanger the chain of lakes. There are definitely better areas of the city to encourage density - where there is already transportation in place. Hennepin and Lyndale Avenues are both examples of where these larges structures would make more sense.	7/22/2018
6854	64	/policies/food-businesses/	Think this section should also include food non-profits, including community gardens. One goal would be to identify City properties that can be used for local community gardens to foster education and growth of local healthy foods. Could also encourage development of year-round garden production facilities.	7/22/2018
6855	14	/policies/tree-canopy-and-urban-forest/	The massive upzoning will have an impact on tree cover and urban forest by first requiring the removal of mature trees for new construction or replacement, and secondly by restricting the amount of green space available for planting, thirdly more dense means generally less tree maturity given less space to grow (for example in between 4-6 story buildings, even 3 story).	7/22/2018
6856	4	/policies/access-to-commercial-goods-and-service	Yes to hamlet design with access to retail, and reduced driving for errands. However, the prices at these retailers need to be competitive. Biking for half the year is unrealistic for healthy people, and unrealistic for other people.	7/22/2018
6857	14	/policies/tree-canopy-and-urban-forest/	The massive upzoning will have an impact on tree cover and urban forest by first requiring the removal of mature trees for new construction or replacement, and secondly by restricting the amount of green space available for planting, thirdly more dense means generally less tree maturity given less space to grow (for example in between 4-6 story buildings, even 3 story).	7/22/2018
6858	53	/policies/quality-of-life/	Re: a. and b. Yes, even easier now that MSP airport has an arts director. That opens even more ways to promote what Mpls., and the whole region has to offer, including spots in the airport to showcase our theater, music and other arts, I hope. Maybe HOTB and Guthrie already do things there? d. interesting idea to explore--what do our corporate entities think of that? Can the DID help? Re: c. and e., Glad to see we are moving toward pedestrian and bike friendly streets, let's learn more from multicultural cities in U.S. and other countries. Amsterdam, Prague, Berlin have lively urban streets.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6859	21	/policies/freight/	I support these action steps, especially the one that restricts freight rail growth in the city. I would also support the city purchasing the Twin Cities & Western Railroad line, and then decommissioning that line.	7/22/2018
6860	38	/policies/affordable-housing-near-transit-and-job-	The action plan to acquire and assemble property has led to a lot of fear of eminent domain. What is it's purpose? If the city is not planning to pursue eminent domain, and the city is not in the business of developing private parcels, then this should come out of the plan. Also as has been pointed out many times before by many people what this plan calls a "transit corridor" aka residential street with bus service during the day, is not an appropriate dumping ground for massive multi parcel apartment buildings.	7/22/2018
6861	29	/policies/creative-sector-economy/	Create apprenticeships for high school students at "Creative Sector" places of employment.	7/22/2018
6862	0.1	/topics/land-use-built-form/	I oppose the 2040 plan Built Form districts. I live in what would become an Interior 1 zone. I oppose duplex, 3-unit and 4-unit buildings built by right in this zone. My reasoning is this - developers will ask for variances and conditional use permits to increase the number of units as well as the height on any property they buy. Unfortunately, the Planning Commission and City Council has a history of granting conditional use permits and variances to developers in order to increase "density." What safeguards will there be to make sure any development fits in with the neighborhood image, materials, etc? I believe that density should be done at nodes and specified areas, not infill scattered about. I live in Linden Hills and I also oppose designating the LindenHills business district along Upton as a Corridor 4 zone. I feel that 4 story buildings are too massive for that district, which I believe should be kept in rh 1-2.5 story height. At 4 stories by right, developers will ask for conditional use permits to increase the height to 5 or 6 stories...and the Planning Commission will approve them as they always do. Upton Ave South is not France Ave. or west 50th street, where higher buildings make more sense because of the wider streets and high-frequency transit. Your overall diagram looks ordered but must be revised to preserve neighborhoods and smaller commercial areas.	7/22/2018
6863	11	/policies/skyways/	Good combination of actions to preserve skyway system, make it more functional and (a.) regain more access and interest at street, pedestrian level.	7/22/2018
6864	30	/policies/arts-and-cultural-assets/	Making the Mississippi River wild again below St. Anthony Falls would go a long way to making the Mississippi even more of a cultural asset.	7/22/2018
6865	95	/policies/heritage-preservation-financial-incentive	During the Nicollet Mall design competition, the principal of a firm that was a finalist (but didn't end up winning) noted that Minneapolis is full of beautiful historic buildings that are impossible to see half the time because they're not lit properly. This is true, and it's a shame! The existing processes subject the owners of historic properties to a rigorous review process if they decide of their own volition that they want to make architectural lighting improvements, but the lack of a formal process to encourage it amounts to a disincentive. As a northern and a winter city, we live in darkness a lot of the time. If we aspire to being a lively place in all seasons and times of the day, we should actively encourage architectural lighting to give our beautiful buildings a more fitting presence in our nighttime built environment. Please explore developing a financial and technical assistance program to encourage architectural lighting of historic buildings. Ben Shardlow, Director of Urban Design, mpls downtown council & Minneapolis Downtown Improvement District	7/22/2018
6866	0.1	/topics/land-use-built-form/	Creating a "Corridor" classification in the residential neighborhoods is taking this too far. 4-6 story (or taller) buildings on small lots immediately adjacent to 1-2.5 story homes will ruin the feeling of our charming and unique city neighborhoods. The entire city doesn't need to be like uptown.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6867	0.1	/topics/land-use-built-form/	I am apposed to the plan all along 50th street that zones 3 story apartments on half the blocks north and south of 50th. The 4900 blocks of Drew, Chowen, Beard and Abbot have already changed over from small bungalow style blocks to 1/2 mega homes, from \$280,000 homes to \$800,000 homes. These blocks already have night and day jammed parking from 50th street restaurants such as the Red Cow. These blocks already have noise from the airplane path overhead and the high volume of cut through traffic of trucks and cars avoiding the 50th and france stop lights. Don't stress or change our blocks even more. Spread out the density and put 4 plexes or 3 story apartments on every corner in the city. Why do those of us who live on the blocks adjacent to small retail have to loose half the houses on our block?	7/22/2018
6868	31	/policies/creative-workers/	Create apprenticeships for high school students at "Creative Sector" places of employment.	7/22/2018
6869	80	/policies/development-near-metro-stations/	Review bus to metro design in DC. Easy to take a bus from suburb to metro stations. Limited housing near metro stations but very easy to access.	7/22/2018
6870	0.1	/topics/land-use-built-form/	My vote is for single family dwelling neighborhoods should remain as single family dwellings. Allowing 4-plexes and larger buildings will change the historical sweetest and value of neighborhoods. Please rework this current proposal. Thank you	7/22/2018
6871	20	/policies/transit/	The City should partner with Metro Transit to ensure that all transit facilities meet NACTO guidelines as laid out in their "Transit Street Design Guide." For example, for curbside pull-out bus stops, which are the majority of bus stop types in Minneapolis, NACTO says that stop length should be at least the length of a bus plus 10 feet plus a specified length for entrance/exit tapers. Most of our bus stops do not follow these guidelines, and as a result oftentimes they cannot actually pull into a stop. With curbside pull-out stops at the nearside of a signalized intersection, consider adding queue jump signals for buses. Minneapolis should be much more serious of adding bus-only lanes on our busier streets. Minneapolis should strongly encourage Metro Transit to operate bus service with articulated buses, especially on routes that experience overloads during rush hour.	7/22/2018
6872	65	/policies/urban-agriculture-and-food-production/	I don't think that agriculture is an ideal use for an urban parcel, and I'm not sure that I can support it as other than a form of recreation. Rooftop gardens seem like an interesting use of otherwise unused space.	7/22/2018
6873	90	/policies/technology-in-the-economy/	Create apprenticeships for high school students at "Technology" places of employment.	7/22/2018
6874	21	/policies/freight/	Ensure there are dedicated loading/unloading zones along streets and confine loading/unlading of freight to those zones where space constrictions requires on-street loading/unloading. This will ensure that bike and transit facilities are not blocked.	7/22/2018
6875	51	/policies/healthy-pre-k-development/	Getting all kids off to a good start seems like one of the key factors in a child's later success. Perhaps there could be some partnering or mentoring for the parents to help them get their kids to be a part of this.	7/22/2018
6876	62	/policies/contaminated-sites/	Work closely with MPCA in MN.	7/22/2018
6877	66	/policies/air-quality/	I think that Action Step A to reduce vehicle miles is very important!	7/22/2018
6878	33	/policies/affordable-housing-production/	Allowing developers to build 4-story mixed use buildings in Kenwood and Lowry Hill along Franklin, Penn and 21st Street does not make a lot of sense. There is very little public transportation today and the MetCouncil is continuing to decrease service. Not only that, but allowing this type of building will have a negative impact on both Kenwood Park and Lake of the Isles. Furthermore, there is an elementary school at the intersection of Franklin and Penn - the type of buildings you would allow there will severely impact the safety of these children (grades K-5).	7/22/2018
6879	15	/policies/transportation-and-equity/	This is very important! Cars are expensive. Policy 15 should also address the heavy degree to which parking is subsidized, which essentially constitutes a regressive tax. People who can't afford to drive/park end up paying indirectly into the provision of parking for people who do possess the resources necessary to drive a car. That's not fair!	7/22/2018
6880	22	/policies/downtown-transportation/	Strong curbside management policies are extremely important, and requires strong enforcement. Prohibit the expansion of parking facilities in downtown and work to remove existing parking facilities when possible. Entrances/exits to parking ramps conflict with pedestrian and transit movements and these need to be addressed. More strongly restricting parking supply should encourage increased use of transit, walking, biking, and improve safety and reduce congestion on downtown streets.	7/22/2018
6881	49	/policies/educational-and-economic-access/	Re: c. maybe this is someplace else in the plan, but the capability of the school system needs to be strengthened so this can be carried out. Schools need to do a better job with all of our students, preparing them for the next step in life, whether it's college, their first job, or being an active, critical-thinking citizen. (I am a firm believer that education is for the whole person, not only preparing them for a job, though that is certainly important).	7/22/2018
6882	46	/policies/healthy-housing/	There should be another goal of ensuring building contractors in Mpls only use safe building materials (materials that meet defined standards).	7/22/2018
6883	23	/policies/coordinated-development-strategy/	Including district parking strategies with district-wide development approaches is very important.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6884	39	/policies/fair-housing/	Allowing developers and investors to decide where they want to build will not create fair housing choices and access throughout the city.	7/22/2018
6885	6	/policies/pedestrian-oriented-building-and-site-de	The expected use bicycles year round is completely unrealistic. It seems like this plan is based on summer, and good weather, versus ice, snow, wind and excessive cold.	7/22/2018
6886	67	/policies/climate-resilient-communities/	Maintaining and increasing the urban tree canopy seems very important to me. I think that we could also decrease the width of many of our roads, which would give us more exposed, permeable soil, and less hot asphalt. I think that providing incentives to build resilient buildings, like those that meet the Passive House standard, would also be beneficial.	7/22/2018
6887	0.1	/topics/land-use-built-form/	In looking over the 2040 plans for my Bryn Mawr neighborhood, I understand the concepts of increasing population density across the city. But while that looks good on an economic level, I'm not seeing this plan addressing the social impact on Minneapolis citizens. I live in what I perceive to be a socially well connected neighborhood, and feel that simplistically modifying the zoning for my area will likely be great for some real estate developers but isn't taking into account what the citizens have socially invested in their neighborhoods. I feel a sense of ownership and the responsibilities which come along with that level of neighborhood involvement. After reviewing the zoning plans, I fear waking up one day in surrounds which are so completely foreign to what I have today will leave me little choice but to sell the home I so love and leave the city. I'm disappointed in what was presented as a future plan for Minneapolis. Our future residents deserve a more well rounded plan. Thank you. Kent Peterson 2214 Mount View Minneapolis MN 55405 612-217-2252	7/22/2018
6888	24	/policies/shared-mobility/	For car-based shared mobility options, such as Uber/Lyft, Zipcar/Hourcar, and future car sharing AV schemes, we need to make sure that transit, walking, and biking are still seen as more competitive modes. We need to reduce car trips in our city, not merely replace one type of car trip with another.	7/22/2018
6889	0.1	/topics/land-use-built-form/	You neglected to provide a color coded map with red to indicate every residential lot that is proposed to be up-zoned. The whole city would be colored bright red on that map. Every single residential lot would be eligible for a developer or investor to bulldoze the existing single family home and replace it with a fourplex or apartment building. Why would anyone want to gamble on buying a beautiful bungalow on a street of single family homes and wake up one morning surrounded by apartment buildings? How could you come up with such a horrible plan even as a draft? This is unacceptable.	7/22/2018
6890	69	/policies/renewable-and-carbon-free-energy/	I strongly support all of these action steps, with the exception of G. I'm concerned that it could be used as a bludgeon by people that don't want a taller building built to the south of them. They can already purchase a solar easement from their neighbors if they would like to do so. Let's not give those folks another weapon against change and increased density.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6891	1	/policies/access-to-housing/	<p>I am concerned about the implications of this policy and question whether the action steps will actually serve to move us towards the stated goals. Prior to adoption, i request more discussion and data review and reporting as to how/if the above steps, particularly (e) will result in more affordable housing being available; Increasing the supply of housing alone could very possibly turn out to be of greatest benefit for developers residing in the suburbs!</p> <p>Prior to implementation of the above action steps, the city should provide detail as to the impact of the proposed changes on residents' access to adequate parking associated with their home or apartment. Many residents will continue to want/need to use a car (i.e. due to disability, safety, age, work schedules, etc) and if accessible parking is not readily available or decreased this plan should not move forward in its current form.</p> <p>As a Minneapolis resident I oppose adoption of this Minneapolis 2020 policy as currently proposed. I look forward to a revised plan that will better meet the goals of making Minneapolis a more livable, equitable place for all residents.</p> <p>Thank you, Lisa Fink 46th Ave S</p>	7/22/2018
6892	33	/policies/affordable-housing-production/	<p>If you allow 10-30 story mixed use buildings in the Shoreland Overlay District in Cedar-Isles-Dean and West Calhoun, the developers and investors will not include affordable housing without a requirement to do so. Instead, there will be very expensive housing in an area that is already incredibly congested. This makes no sense.</p>	7/22/2018
6893	25	/policies/innovations-in-transportation-and-infras	<p>Car-sharing and ride-sharing services, especially ones that use AV technology, need to be regulated to ensure that transit, walking, and biking are still seen as more competitive modes.</p>	7/22/2018
6894	14	/policies/tree-canopy-and-urban-forest/	<p>Strongly support</p>	7/22/2018
6895	16	/policies/environmental-impacts-of-transportation	<p>I completely agree with these goals. Single passenger car use needs to be discouraged. The more investment we can make in sharing resources, the more energy efficient we will be.</p>	7/22/2018
6896	80	/policies/development-near-metro-stations/	<p>B: Please change to simply "develop housing". We need as much housing as possible, and not only for poor people.</p> <p>C: A minimum level of development near stations is important, but not just for that reason; under-development in the immediate station vicinity (within one block) also makes the station significantly less safe and less convenient. The Hiawatha Line station on Franklin is an example of under-development (surface parking lots) actually creating a frightening hell-scape that actively discourages transit ridership.</p> <p>Dense mixed-use developments promote ridership by making the station itself a destination.</p> <p>G & H: very good!</p> <p>I: This should instead say that plazas and open spaces should not be too large. Very few stations in MN have enough ridership to support even a small plaza; most such plazas would feel deserted and desolate. Consider that Ikebukuro station in Tokyo, with 1.3 million riders per day, has a main plaza less than 2 acres in size.</p> <p>J: Spot on! Consistent with successful examples from around the world.</p>	7/22/2018
6897	13	/policies/landscaping/	<p>We should encourage folks to lower the soil depth of their boulevards so that they may act as a water catchment area.</p>	7/22/2018
6898	26	/policies/vision-zero/	<p>Wherever possible, we should add slow street design elements to slow traffic. Conversion of one-way streets to two-way streets outside downtown should be a priority, as one-way streets encourages increased driving speeds.</p>	7/22/2018
6899	13	/policies/landscaping/	<p>The Nicollet Mall redesign is terrible. It's sterile, unattractive, and does not promote any desire to sit and admire it, despite some random yellow chairs. Really focus on improving aesthetics. I hope Nicollet Mall is not the model.</p>	7/22/2018
6900	27	/policies/transportation-partnerships/	<p>Very supportive of this policy.</p>	7/22/2018
6901	74	/policies/integration-of-water-management-into-	<p>Need much more green to accomplish this. Also critical even in single family home areas.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6902	70	/policies/ecology-and-habitat/	I'd really like to see improved management of the water flowing in to our lakes and streams. The catchment pond near the SW corner of Bde Maka Ska is a great example of this, and I'd like to see more of it. I'd also like to see coyotes and other predators allowed to roam more freely. We have an over-abundance of small animals like rabbits in our neighborhood.	7/22/2018
6903	28	/policies/msp-airport/	Minneapolis should encourage continued growth of MSP as a hub for Delta Airlines, including increased international destinations.	7/22/2018
6904	29	/policies/creative-sector-economy/	Very supportive of this policy.	7/22/2018
6905	30	/policies/arts-and-cultural-assets/	Very supportive of this policy.	7/22/2018
6906	31	/policies/creative-workers/	Very supportive of this policy.	7/22/2018
6907	72	/policies/sustainable-water-system-management/	I'd like to see the city do a better job of filtering out contaminants from storm water before it is dumped in to our lakes and streams. I don't like having to worry about the safety of the water in the days after a rain storm.	7/22/2018
6908	32	/policies/arts-in-community-development/	Very supportive of this policy.	7/22/2018
6909	81	/policies/social-connectedness/	The biggest thing we can do to integrate nursing care residents into daily life is to maintain flat, curbless sidewalks. With our level entry light rail, and our all-season skyway system, MPLS is well positioned to become a veritable magnet for midwest retirees.	7/22/2018
6910	19	/policies/bicycling/	This is unrealistic in our current climate. I am an advocate of biking but cannot see how this is remotely feasible in the winter.	7/22/2018
6911	16	/policies/environmental-impacts-of-transportation/	As a cyclist, some of my most frustrating interactions are with shared mobility cars. When I encounter an automobile idling in a bike lane or generally driving in a directionless and unpredictable manner, it's quite common that I discover an Uber or Lyft sticker on that car. Whether shared mobility drivers are waiting for their passenger to come outside or waiting for their next pick up, they tend to drive in a way that's uniquely frustrating to encounter on a bike. I see the great potential of shared mobility services to reduce the need for a personal automobile, but please consider some of these latent considerations as well. It seems like some kind of travel demand management strategy should apply, given that they place a significant burden on the transportation system.	7/22/2018
6912	91	/policies/heritage-preservation-outreach/	This needs more teeth. It is weak and vague. All structures that reach 100 years or more in age should be evaluated. Minneapolis already destroyed so much, we need to keep what we have left.	7/22/2018
6913	73	/policies/stormwater-management/	I am very impressed with all of the work that the city has done to separate its wastewater and stormwater systems. Chicago has not done this, and it is a significant problem for their residents. I also commend the city on the work that it does to proactively maintain our water systems. All of that being said, I'd like to see the city do a better job of filtering out contaminants from storm water before it is dumped in to our lakes and streams. I don't like having to worry about the safety of the water in the days after a rain storm.	7/22/2018
6914	0.1	/topics/land-use-built-form/	bad plan. It looks like you are hoping to accommodate at least 4 times the current population. There is no need to expand every existing single family to a 4 plex. Keep the single family houses. It is bad enough that the character of the neighborhoods is changing with the teardowns that are replaced with large houses. If this passes as is, the population will vote republican. This is social engineering at its worst. In our neighborhood, the duplexes on Penn are the most likely police calls. By increasing density, you are also encouraging higher crime rates.	7/22/2018
6915	1	/policies/access-to-housing/	This is the most important part of the plan, and I hope you don't back away from some of these really great proposals here just because of a small but vocal group of self-entitled NIMBYs. I love the idea of having duplexes, quads, ADUs and a variety of housing mixed in with our single-family neighborhoods. It will make them more diverse and vibrant places, and help sustain local businesses. I have friends and family who are living the housing crisis right now, and I support building more of any and all types of housing.	7/22/2018
6916	33	/policies/affordable-housing-production/	Expanding tools and resources to finance affordable housing is extremely important, especially if any inclusionary housing policies are to be included. The sad reality is that the private sector is not capable of producing affordable housing in most situations, which is why expanded financial resources is so important.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6917	6	/policies/pedestrian-oriented-building-and-site-de	Disagree with k. Believe all rental properties should be required to provide off-street parking for all their tenants as needed. I live in an area where there are too many cars parked on the street and too many tows during snow emergencies.	7/22/2018
6918	1	/policies/access-to-housing/	Adding multi-unit structures to traditional city lots will decrease tree canopies, increase parking issues, degrade street surfaces more quickly with increased parking, and result in structures that destroy the beauty of the city. Oversized structures are being approved for small lots already, resulting in water run-off issues for neighbors, reduction of green space and loss of charm and beauty.	7/22/2018
6919	15	/policies/transportation-and-equity/	If you truly want to be equitable, you need to include those who are elderly or handicapped. That means cars. There is NO way bikes should have higher priority than busses or cars, because people don't ride them in the winter and yet, you plow bikeways before roads and sidewalk curb corners. Yes to adding more and better busses along routes that are heavily used. No to more bike lanes.	7/22/2018
6920	75	/policies/waste-reduction/	Permanent, in-city options for disposing of household hazardous waste is a great idea! So is providing incentives for businesses and residents to divert materials from the trash. It would be great to allow organics composting at multi-family buildings. Restaurants should have to provide Recycling and Composting options for all of their customers, in addition to trash.	7/22/2018
6921	33	/policies/affordable-housing-production/	Expanded financial resources for affordable housing needs to be paired with zoning policies that allow for increased housing supply, whether it is market rate or affordable. The effects of a restricted housing supply when there is high demand as is currently happening is that the price of older housing stock, which would otherwise be considered as naturally occurring affordable housing, is driven up. Production of new housing at the upper end of the market is needed to relieve pressure on our older housing stock.	7/22/2018
6922	6	/policies/pedestrian-oriented-building-and-site-de	Disagree with o. Drive-thrus and gas stations are still needed. New ones would provide the opportunity for environmental improvements and better use of new technologies.	7/22/2018
6923	16	/policies/environmental-impacts-of-transportation	In order to reduce green house gasses, you have to work toward (not insist on!) reduced car usage, but you also must make sure that traffic does not get congested so cars are not idling while waiting in traffic. You are zealots in your hatred of cars and your flawed policy reflects that. You must learn to be pragmatic if you are to be effective.	7/22/2018
6924	19	/policies/bicycling/	Enforcement of people parking and idling in existing bikeways needs to be improved. Deputize cyclists with action cameras to enable them to be able to hand out tickets?	7/22/2018
6925	34	/policies/affordable-housing-preservation/	Any strategy to preserve existing naturally occurring affordable housing needs to be paired with zoning policies that allow for increased production of market-rate housing to relieve pressure on that already existing housing.	7/22/2018
6926	35	/policies/innovative-housing-types/	Very supportive of this policy.	7/22/2018
6927	93	/policies/stewarding-historic-properties/	Sounds good but my experience is nobody cares enough about most historic structures or can stop Developers once the financial incentive is big enough. This plan provides plenty of financial incentive for redevelopment since it blows open density options in many locations. Density allows developers to pay more to tear down properties since they can spread the land cost over more units/sq footage. Since many historic properties are in desirable areas they are now going to be targets within financial reach.	7/22/2018
6928	36	/policies/innovative-housing-strategies/	Very supportive of this policy.	7/22/2018
6929	81	/policies/social-connectedness/	I particularly support Action Step D around providing safe, welcoming community spaces along streets. We should take back some of this realm from automotive traffic. When I bike with my daughter to school, we say hello to many people along our way. When we drive, we don't say hello to anyone.	7/22/2018
6930	82	/policies/aging/	Yes! These are great action steps!	7/22/2018
6931	17	/policies/complete-streets/	1. Walking (clean out the curb cuts in winter FIRST!) 2. Bussing and mass transit 3. Cars and bikes. To prioritize bikes is crazy in a city where we are crippled by winter several months of the year. More share ways, fewer dedicated bike lanes.	7/22/2018
6932	97	/policies/heritage-preservation-legislative-advoca	This needs to be done and in place before zoning changes occur. Maybe you need to tie zoning changes so they are contingent against certain historic protections being in place.	7/22/2018
6933	37	/policies/mixed-income-housing/	This needs to be paired with increased financial resources for affordable housing as oftentimes mixed-income requirements on developments creates a gap in a developer's pro-forma that cannot be filled with conventional financing.	7/22/2018
6934	85	/policies/access-to-health-social-and-emergency-s	I'd like to see a more robust mental health services rapid response team that can respond to people having mental health troubles, instead of just sending a police officer.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6935	38	/policies/affordable-housing-near-transit-and-job-	As improved access to transportation is capitalized into higher housing prices, strategies to increase affordable housing around transit, as well as prevent displacement of lower-income residents as new transit improvements goes in, is very important.	7/22/2018
6936	0.1	/topics/land-use-built-form/	<p>Tangletown was platted to preserve trees and environmental elements and thus the topography and elevations resulted in the development of a non-conventional street grid. The existing lots were then designed to accommodate the multitude of architect designed single family homes that exist today. Therefore, the topography, existing lot shapes, and elevation of the neighborhood would not lend itself well to the 3-6 story multi-family buildings that are being proposed.</p> <p>To rezone some of the lots to accommodate up to 6 story multi-family developments as are being proposed in this rezoning plan would destroy the character of this neighborhood. In addition, neighborhood living will become more contentious with in-fighting and attorney's fees from those in favor and those against the building of up to 6 story multi-family buildings on properties. For instance, 32 Valleyview Place is the only lot on the West side of Belmont in Tangletown that is a single family home presently and could have a 6 story apartment building as proposed on maps.</p> <p>During the interim before anyone could exercise their rights to upgrade the structure on these up-zoned lots, we may be assured that the tax assessors will be coming into the neighborhood and arguing that what are single family houses should now have land values reflecting a 3-6 story multi-family housing development. This will increase taxes for existing property owners which will decrease the ability of an owner to sell their home at a value which reflects single family housing that exists today (Who would want to buy a house that faces the above neighborhood in-fighting much less pay the taxes on perceived higher valued land?!).</p> <p>Consequently, this proposed up-zoning map needs more work to recognize the existing homeowners and what they would like to see for greater density in their area. This is another example of the city council not recognizing their constituents nor directly soliciting constitutes viewpoints before proposing such radical permanent changes to the city in its entirety.</p>	7/22/2018
6937	20	/policies/transit/	The University of Minnesota is one of the city's largest employers yet most express bus service routes are suspended in the summer. One might think that this would make sense - but I would think that most students live near the campus and those that are using the express service from farther away areas are employees. And most employees work year-round. I would suggest that express routes remain active year-round.	7/22/2018
6938	41	/policies/tenant-protections/	Tenants rights in Minneapolis are already very strong.	7/22/2018
6939	92	/policies/identify-and-evaluate-historic-resources,	<p>I particularly support Action Steps C and D:</p> <p>Work with Minneapolis's cultural communities to identify places of historic and cultural significance.</p> <p>Complete context studies associated with the city's history and overall development, such as the impact of transportation and land use decisions that had citywide impacts.</p>	7/22/2018
6940	1	/policies/access-to-housing/	Your solution does not fit the problem. If the goal is more trips with public transit, the solution of higher density housing does not necessarily solve that. What makes you think that the people who move onto these streets will suddenly be heavy transit users, when 9 of 10 trips by existing residents are taken by car? That's a big leap! I live a block off 50th. Our street is parked half full at minimum and is regularly parked full. I cannot imagine one 6-plex adding between 6-12 cars to our street, let alone the fact that your plan allows for unlimited 6-plexes on this street. The assumption that new residents will somehow be completely different people from current residents, have fewer or no cars, and will take transit significantly more is a huge and unrealistic leap. It will take very little time for you to see this flawed logic if this plan were allowed to progress to reality, and I pity the affected streets who would be stuck with the problem and a pathetic "sorry." If you want to increase transit use, please study the root cause of why people don't take it. Don't use a misguided housing policy and assume it will solve a different issue. (PS - I regularly take transit, walk, and bike. Having on-time transportation is critical and needs to be more of a priority if people are going to rely on it. No excuses.)	7/22/2018
6941	18	/policies/walking/	Regarding e. Narrow streets are not a traffic calming device; they are a traffic frustrating device. It's a stupid statement and should be deleted as it has nothing to do with walking.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6942	0.1	/topics/land-use-built-form/	My understanding is that the Minneapolis 2040 plan includes a transition of West Franklin from Interior 1 / 2 to the Corridor 4 scheme, which would significantly increase the density along Franklin between Hennepin and Kenwood School. This is a bad idea for many reasons. Franklin is at capacity already for single family home egress to the balance of the city. This plan will create major traffic and road congestion on Franklin, forcing drivers to use inefficient side streets, which are particularly burdened in the winter months. Moreover, Lowry Hill / Kenwood is one of the last remaining single family home neighborhoods in Minneapolis and an attractive draw for executives from around the world. It is a world-reknown neighborhood that the city now proposes to turn into a generic, short term condo build opportunity that offers nothing close the stability and diversity of a family, single family neighborhood.	7/22/2018
6943	91	/policies/heritage-preservation-outreach/	I particularly support Action Step B: Expand outreach around heritage preservation activities and resources, particularly focusing on cultural communities, communities of color, indigenous communities and other communities that have traditionally been underrepresented.	7/22/2018
6944	35	/policies/innovative-housing-types/	It makes total sense to review alternative housing types and assess if and where they make sense.	7/22/2018
6945	1	/policies/access-to-housing/	Dense housing creates problems w traffic flow--youth going to Roosevelt take over 38 & Hiawatha; foot & car traffic from E38 st & Hiawatha (Sherman property) becomes a bottle neck of cars & foot traffic) headed to LRT or leaving/entering on 38 E or W.	7/22/2018
6946	39	/policies/fair-housing/	Any conversation around fair housing choice and access throughout the city cannot ignore the historical impact of redlining and single-family zoning has had on fair housing access throughout the city.	7/22/2018
6947	18	/policies/walking/	YES! 1. police boulevard gardens to make sure they are not higher than allowed by city ordinance. Many corners are challenging to cross. 2. plow out every curb cut in the city before you plow bike paths. Walkers are priority over bikers, behave in that fashion. 3. limit the height of buildings to make sure that there is adequate light for people. 4. Make sure there is adequate space to clear snow in winter. 5. Speed up the process for clearing bad sidewalks in winter. it has traditionally taken days, during which time it is perilous to walk. 6. Change the policy that if a flake of snow falls, the 24 hour waiting period begins anew. This slows down the process for getting sidewalks cleared. 7. ENFORCE BIKING LAWS! I can not tell you how many times I have almost been struck by a biker failing to stop or even slow down at an intersection. And the cops turn a blind eye. They are required to follow the rules of the road.	7/22/2018
6948	40	/policies/homelessness/	Very supportive of this policy.	7/22/2018
6949	41	/policies/tenant-protections/	Very supportive of this policy.	7/22/2018
6950	93	/policies/stewarding-historic-properties/	I kind of support these Action Steps, but I don't want to see them used as tools of exclusion by wealthy people, and I also don't want them to take precedence over the work that we need to do to make our buildings more efficient.	7/22/2018
6951	47	/policies/housing-maintenance/	Hold landlords and property owners accountable to maintain buildings. It's less about supporting them and more about holding them accountable for maintaining housing that is safe and healthy for tenants.	7/22/2018
6952	19	/policies/bicycling/	Add another action step of consulting with local residents before making changes regarding bikeways. And, ensure bikeways are properly maintained in the winter.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6953	82	/policies/aging/	<p>"The city's aging residents also need multimodal transportation options that meet their needs. And it's not enough to simply provide options; these modes of transportation must also be accessible, maintained and free of snow and ice in the winter."</p> <p>Comment 1) Having spent almost every day of the last year taking short walks with my very elderly father, I can say walking (or rolling, for those with wheelchairs) is far and away the most important mode. It is fundamental for his health and dignity; it's the only form of transit where he is in complete control, and it's usually his only form of exercise.</p> <p>Comment 2) My father often cannot leave the house in the winter, because the sidewalks are too treacherous to walk on. The policy of asking home-owners to shovel their own sidewalks is systemically broken.</p> <p>Imagine if the city took the same position on road maintenance (asking individuals to shovel the road in front of their house). Some days you couldn't drive to work safely. That's the reality for everybody in this city who doesn't drive (including my elderly dad). It's worse, because if the sidewalk is partly shoveled, and the snow melts and refreezes, it becomes deadly slippery.</p> <p>Suggestion 1: The city should manage a fleet of sidewalk shoveling vehicles.</p> <p>Suggestion 2: The city should ban shoveling on north-facing sidewalks. These sidewalks, trapped in darkness, always end up icy. Shoveling them makes them passable, but not SAFE. Instead, the city should COMPACT the snow on north-face sidewalks.</p>	7/22/2018
6954	42	/policies/expand-homeownership/	Very supportive of this policy. However, support of homeownership should not come at the expense of increased housing options overall, single-family or multi-family.	7/22/2018
6955	94	/policies/heritage-preservation-regulation/	I want to preserve our built environment to some degree, but I don't want historic preservation to be used as another tool of exclusion by wealthy people, and I also don't want historic preservation to take precedence over the work that we need to do to make our buildings more efficient.	7/22/2018
6956	43	/policies/housing-displacement/	Very supportive of this policy.	7/22/2018
6957	20	/policies/transit/	Commuting from suburbs via cars will not decline until we have a metro or train system that encourages such commutes.	7/22/2018
6958	44	/policies/comprehensive-investments/	Very supportive of this policy.	7/22/2018
6959	45	/policies/leverage-housing-programs-to-benefit-c	Very supportive of this policy.	7/22/2018
6960	19	/policies/bicycling/	<p>Are you out of your mind? We can not bike for several months of the year. People with kids need to shop and haul kids to and from by cars, elderly and handicapped are not biking, and the vast majority of healthy people are not biking. This is crazy.</p> <p>Make it safer to bike, sure, but this should NOT be a priority at the expense of handicap spaces, small business access to parking for their patrons, bus and first responders access to getting around easily and cars, yes cars.</p> <p>There is not moat around Minneapolis. Many who live in the city work/shop outside of the city and vice versa. This biking thing is more advisable for cities with weather that is more amenable to this activity.</p>	7/22/2018
6961	2	/policies/access-to-employment/	DT (downtown) is currently filling up with very opinionated elitist who expect a gated community in their \$\$\$& condo's; more police need to be hired through out the city! The "elite" who lived & work DT won't tolerate jobs of living wages -too much non affordable housing has been put in already.	7/22/2018
6962	95	/policies/heritage-preservation-financial-incentive	These Action Steps seem like they could be abused by wealthy people. If the city is going to give any money to help a property owner enhance their historically significant property, then that property should be made open to the public for non-trivial amounts of time every week.	7/22/2018
6963	42	/policies/expand-homeownership/	The policy to allow 4-plex buildings and 6-plex near transit seems to be in opposition to this goal. Won't developers create and own more housing throughout the city? Are these units expected to be mostly condos? You can create tools and support programs all day long, but in the end of the day you aren't solving the root cause of the problem.	7/22/2018
6964	46	/policies/healthy-housing/	Very supportive of this policy.	7/22/2018
6965	47	/policies/housing-maintenance/	Very supportive of this policy.	7/22/2018
6966	14	/policies/tree-canopy-and-urban-forest/	Totally agree with all points a,b,c,d	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6967	40	/policies/homelessness/	I believe that tackling homelessness should be a regional responsibility, not a city-specific one. Create an MTA-like authority or make it the sole responsibility of the Met Council. I also believe that permanent panhandling spots should be illegal. The kinds where the same people set up shop, day after day, and often leave their garbage at these spots.	7/22/2018
6968	97	/policies/heritage-preservation-legislative-advoca	I don't know what this Action Step means because it is written in such an obtuse manner, and as a result, I think that it should probably be removed from the Comp Plan.	7/22/2018
6969	24	/policies/shared-mobility/	What happened to Zip Cars and Cars To Go? At least three families on our block used those services, reducing the need for additional car ownership. Since those services were driven out (I suspect through fees), those families have purchased cars.	7/22/2018
6970	69	/policies/renewable-and-carbon-free-energy/	To seriously address climate change, the Plan should incentivize residents and businesses to conserve water and energy. The City should establish an ongoing campaign to educate residents about how their personal choices can help reduce carbon emissions.	7/22/2018
6971	48	/policies/data-driven-decisions/	Very supportive of this policy. Any data gathered should be made publicly available through an easily accessible online platform.	7/22/2018
6972	48	/policies/data-driven-decisions/	I'd like to see a focus on root cause analysis. You can analyze data and make assumptions based on it. Try spending some time with your problem and ask Why? Then Why (to that), then Why (to the next), etc. It will be a lot more effective than coming up with theories and support programs that will never fix the actual problem.	7/22/2018
6973	49	/policies/educational-and-economic-access/	Very supportive of these policies.	7/22/2018
6974	50	/policies/access-to-technology/	Very supportive of this policy.	7/22/2018
6975	20	/policies/transit/	yes	7/22/2018
6976	53	/policies/quality-of-life/	agree with all action steps	7/22/2018
6977	51	/policies/healthy-pre-k-development/	Very supportive of this policy.	7/22/2018
6978	52	/policies/human-capital-and-a-trained-workforce/	Very supportive of this policy.	7/22/2018
6979	69	/policies/renewable-and-carbon-free-energy/	g. should be strengthened to "Protect and expand solar access on commercial and residential buildings."	7/22/2018
6980	53	/policies/quality-of-life/	Very supportive of this policy.	7/22/2018
6981	69	/policies/renewable-and-carbon-free-energy/	g. should be strengthened to "Protect and expand solar access on commercial and residential buildings."	7/22/2018
6982	88	/policies/public-services-policy/	This is a great goal but I would like to add that the city should offer childcare at civic meetings otherwise many parents of young children will not be able to attend and will be left out of the process.	7/22/2018
6983	70	/policies/ecology-and-habitat/	yes to all	7/22/2018
6984	54	/policies/supporting-economic-growth/	Very supportive of this policy.	7/22/2018
6985	28	/policies/msp-airport/	Airport noise is increasing, is centered over unlucky neighborhoods now, and is not being adequately addressed. We need more use of regional airports for freight and the overnight flights, that have increased exponentially. More efficient takeoff and landing is inconsistent with noise. A huge airport centered in a growing city needs to be managed differently. Add high speed transit between regionals to cut those flights and noise. THIS IS A HUGE ISSUE.	7/22/2018
6986	55	/policies/business-innovation-and-expansion/	Very supportive of this policy.	7/22/2018
6987	56	/policies/supporting-small-businesses/	Very supportive of this policy.	7/22/2018
6988	57	/policies/cluster-strategy/	Very supportive of this policy.	7/22/2018
6989	0.1	/topics/land-use-built-form/	I lived in East Harriet from 2006-July 2018. I fully support the plan to introduce updated zoning to enable more housing density. Having participated in the Mapping Prejudice project by reviewing old deeds for racial covenants and exclusionary language, it makes me sick to think how our neighborhoods are currently fighting to protect the housing stock and neighborhood "culture" that was born from prejudice and exclusion. It only makes sense that in a growing city, there are opportunities to stay in one's neighborhood through a variety of housing choices and price ranges. The fear I hear from my neighbors that our housing will radically change seems unfounded when a tear-down rebuild to a fourplex will likely net an ROI of 6-7% depending on costs, interest rates etc- I believe the fear that fourplexes will replace all of the old housing stock to be unrealistic. I support housing diversity, population diversity, increased transportation that results in safer travel regardless of method, better access to necessities through mixed use, and definitely more equity for all residents (POC, in poverty, etc). Thank you for putting together a plan that reflects these values.	7/22/2018
6990	58	/policies/business-districts-and-corridors/	Very supportive of this policy.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

6991	26	/policies/vision-zero/	I agree with these goals. I understand that it may result in vehicle lane reductions as we have seen on 26th/28th Streets and Blaisdell Avenue. Fewer lanes may also mean an ability to use heavier materials for the vehicular lanes when they are rebuilt, resulting in streets that last longer.	7/22/2018
6992	5	/policies/visual-quality-of-new-development/	All points extremely important	7/22/2018
6993	59	/policies/downtown/	Very supportive of this policy.	7/22/2018
6994	26	/policies/vision-zero/	Add traffic circles, roundabouts and other traffic calming methods. Add jut-outs to narrow lanes. Reduce speed limit through city streets!	7/22/2018
6995	28	/policies/msp-airport/	It seems like MSP is often building new parks my garages at the airport and then advertising heavily to fill them. They are encouraging single passenger vehicle use and they should be reminded to discourage that.	7/22/2018
6996	80	/policies/development-near-metro-stations/	There is a lot of tension regarding this plan and re-zoning for housing development. I believe that much higher density could be built along the Hiawatha LRT line along Hiawatha. There have been some complexes built already, and I think newer ones could be even bigger / denser. There is already an LRT there, rapid bus stops, Hiawatha is a large boulevard, it's a conduit between downtown the U area, the VA, MOA, MSP. That is an area that can sustain lots of new development. Ideally the unsightly, cracked, rusted, rotting grain elevators can be torn down (or forced to improve) and help out an area that is ripe for redevelopment.	7/22/2018
6997	60	/policies/intrinsic-value-of-properties/	While heritage preservation as a whole is important, too often preservation is used as a tool to stop redevelopment and preserve the status quo, even when the property in question is not very significant. We just need to keep that in mind in future conversations on heritage and historic preservation.	7/22/2018
6998	61	/policies/environmental-justice/	b) Ensure areas of environmental injustice experience the benefits of local and regional infrastructure investments, not just the negative consequences. Doesn't seem like an action step--it's a goal. What is the action to ensure that this goal is achieved? c) Strive for regional investments that further reduce environmental and social inequalities in environmental injustice areas. This action step is too weak. It's not enough to strive--it needs to happen. Identify and implement regional investments that further reduce environmental and social inequalities in environmental injustice areas.	7/22/2018
6999	61	/policies/environmental-justice/	Very supportive of this policy.	7/22/2018
7000	62	/policies/contaminated-sites/	Very supportive of this policy.	7/22/2018
7001	84	/policies/public-safety/	The best thing for public safety is small ground-floor street oriented businesses. The employees and owners have their "eyes on the street" and naturally protect neighborhood safety. This is a non-enforcement, community-driven strategy. It would be worthwhile subsidizing them as much as possible (e.g. no property tax for street-facing retail up to 1200 square feet, or eliminating the sales tax for street-facing restaurants).	7/22/2018
7002	63	/policies/food-access/	Very supportive of this policy. Encourage and support the addition of smaller corner stores, in addition to full size grocery stores.	7/22/2018
7003	64	/policies/food-businesses/	Very supportive of this policy.	7/22/2018
7004	65	/policies/urban-agriculture-and-food-production/	Very supportive of this policy.	7/22/2018
7005	66	/policies/air-quality/	Very supportive of this policy.	7/22/2018
7006	18	/policies/walking/	I keep hearing that the city has a complete streets policy and is prioritizing pedestrians first, then bicycles, then cars. What I'm seeing in reality is the exact opposite order. Cars still rule in this city. They are a nuisance. They pollute. They injure people. They kill people. Have a complete streets policy or don't, but don't pretend what we have now is complete streets.	7/22/2018
7007	67	/policies/climate-resilient-communities/	Very supportive of this policy.	7/22/2018
7008	11	/policies/skyways/	Big supporter of skyways, but hours should be uniform and it's frustrating to go to downtown on a weekend - with lots of people - only to find a skyway Starbucks closed.	7/22/2018
7009	68	/policies/energy-efficient-buildings/	Very supportive of this policy.	7/22/2018
7010	69	/policies/renewable-and-carbon-free-energy/	Very supportive of this policy.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7011	1	/policies/access-to-housing/	<p>We strongly oppose Action Step “upzoning single family neighborhoods to include “small scale” residential structures up to four units(!) on a typical (mostly 40-ft) city lot! When we talk to neighbors and friends about this, the reaction is universal disbelief and incredulousness. Our neighborhood, Windom Park Citizens in Action, voted overwhelmingly several months ago against this upzoning proposal, with the caveat of allowing higher densities along high frequency routes.</p> <p>Does anyone seriously think that a developer would come into an upscale neighborhood outside of downtown and find it economically feasible to purchase a property and replace it with a four-unit building in keeping with the surrounding homes and call any part of it affordable? The neighborhoods that would be impacted (and destroyed) are the few middle class neighborhoods with single family homes that remain, given that 80% of city streets already have multi-unit buildings.</p> <p>We live in one of these few single-family neighborhoods. Realtors call it “Desirable” Stinson Triangle. Several of the homes on our block some would consider to be substandard. If any of them should look desirable to a greedy, fly-by developer before a single family looking for a fixer-upper would find it, we’d surely end up with a four-unit ill-fitting monster in our neighborhood. And would the monster include “affordable housing”? No guarantee.</p> <p>Minneapolis has many “desirable” neighborhoods, each offers something that appeals to people who want to live there. Some desire density; some don’t. Please allow Minneapolis to retain its wide-ranging charm. Why must everything be reduced to the lowest common denominator? All things are not equal and they never will be.</p>	7/22/2018
7012	70	/policies/ecology-and-habitat/	Very supportive of this policy.	7/22/2018
7013	34	/policies/affordable-housing-preservation/	I support these goals. However, I think opponents to this plan would appreciate more substance to this section. What proven strategies will he used?	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			<p>Parking!!!!!! The majority of people who invested. Southwest Minneapolis did so because our JOBS required us to drive, haul and care for families. Southwest has become the bread basket of Minneapolis. Those of us who moved to this not so flashy and smaller square footage-home to one day maybe be lucky enough to raise a family house in 1994, are now called ELITIST!!</p> <p>Southwest neighborhoods made Minneapolis cool again!</p> <p>Our sweat equity. Our children breathed fresh air into a forgotten corner of Minneapolis.</p> <p>We did an amazing job!</p> <p>Developers are now over bidding first time home buyers on a \$350,00 home. Tearing down to build something huge that ups my taxes.</p> <p>The fourplexs can be built on any lot with NO parking. AND! Worthington has zoned our blocks for development without establishing variances!</p> <p>Jeanne, this is not about density, equality, racism. The city of Minneapolis is trying to cash in on tax dollars.</p> <p>Wake up Minneapolis!!</p> <p>Those of us who have invested in our homes.....yes my home may be the most valuable asset in my retirement PortfolioManager.....this is a complete land grab without the transit to support the density .</p> <p>I am insulted offended and angry with the 2040 language!</p> <p>Worthington lives in St. Paul. She must take light rail into Minneapolis? Right? Because a car is so economically wrong and her mortgage so high living in St. Paul? At the very least, she must be taking the city bus.</p>	7/22/2018
7014	1	/policies/access-to-housing/	This plan is so offensive on so many levels

			<p>Some thoughts I have after reading about the 2040 plan.</p> <p>Back in the late 1960's I lived in Louisville, KY in a very nice fairly new apartment. The entire neighborhood was multiple occupant buildings with some small strip malls. It was a great beautiful neighborhood. The building I lived in was only two stories. I left there in 1970 to pursue my career. In the 1980's my family and I visited the area again. I was so disappointed in what I found. The buildings were in disrepair (to put it mildly). It had turned into what we called back then a slum. By 2050 what will Lyndale Ave look like?</p> <p>You talk a lot about greenhouse gases. The one gas that has suffered in the last many years is oxygen. We don't have as much as we did 50 years ago. The one plant that I know about that produces oxygen is a tree. I don't believe that tall buildings provide much oxygen. Why not plant a lot of trees? Leave the green areas. Don't build 3000 sf houses on 40 ft lots.</p> <p>Maybe Minneapolis is big enough. Rental property is the last thing any neighborhood needs. We've experienced that in the Kenny neighborhood. Parking is becoming a problem especially in the winter. More residents won't help that situation. Street maintenance is a problem. More residents won't help that either. More residents does mean more police.</p> <p>We've loved the Kenny neighborhood since 1973. It was like living in a suburb. We have space, a lot of green, and great neighbors. Our kids grew up here. Now they have families of their own. Not a one of them (all five) lives in Minneapolis nor do they want to.</p> <p>The one thing I've learned is that big city living is not all it's cracked up to be.</p>	7/22/2018

7023	74	/policies/integration-of-water-management-into-	Very supportive of this policy.	7/22/2018
7024	75	/policies/waste-reduction/	Very supportive of this policy.	7/22/2018
7025	22	/policies/downtown-transportation/	Do NOT get rid of parking downtown if you want people to come in from the metro area. There is not a moat around Minneapolis and you must accommodate cars.	7/22/2018
7026	76	/policies/new-parks/	Very supportive of this policy.	7/22/2018
7027	1	/policies/access-to-housing/	<p>I do not support Policy 1, section e.</p> <p>As a realtor, I see considerably fewer homes in the 'affordable' category for first time buyers. It's a shame that first time buyers can not afford housing in all sections of Minneapolis, due to the lack of housing and higher cost of new construction homes.</p>	7/22/2018
7028	77	/policies/park-access/	Very supportive of this policy.	7/22/2018
7029	20	/policies/transit/	The city should prioritize transit in street throughput, through encouraging and supporting use of transit priority lanes on corridors like Lake Street, Hennepin Avenue, Lyndale Avenue, Central Avenue, and other corridors targeted for transit intensification through arterial BRT development.	7/22/2018
7030	78	/policies/park-design-and-programming/	Very supportive of this policy.	7/22/2018
7031	79	/policies/healthy-youth-development/	Very supportive of this policy.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7032	1	/policies/access-to-housing/	NO to: In neighborhood interiors farthest from downtown that today contain primarily single-family homes, achieve greater housing supply and diversity by allowing small-scale residential structures on traditional size city lots with up to four dwelling units, including single family, duplex, 3-unit, 4-unit, and accessory dwelling unit building types.	7/22/2018
7033	78	/policies/park-design-and-programming/	There really needs to be an Edinborough Park-like young child indoor playground for Minneapolis. There should be non-Fast Food indoor playground options for younger children. We have gyms, indoor tracks, indoor workout rooms, pools, etc., etc. for older children and adults but for that 1-7(ish) set that really needs a _playground_, they really can't get access to one for almost 1/2 the year.	7/22/2018
7034	23	/policies/coordinated-development-strategy/	You can not say "Use data and objective criteria to identify geographic areas most in need of reinvestment and where a coordinated approach would result in achieving Minneapolis 2040 goals", while at the same time saying that you are going to leave this open to the market. Listen to the people in ward 5. They want nothing to do with this plan. They are sick of waiting for good and community friendly development. They do not want their area to be gentrified so the current residents are priced out. Help the areas that need help and discourage development in the areas that are already overdeveloped like S and SW Mpls.	7/22/2018
7035	1	/policies/access-to-housing/	I support and applaud the city's direction to add more housing in my Longfellow / Ward 2 neighborhood. My neighborhood is great because of the mix of housing that exists there today, and I look forward to welcoming more neighbors thanks to this plan's adoption.	7/22/2018
7036	1	/policies/access-to-housing/	I support and applaud the city's direction to add more housing in my Longfellow / Ward 2 neighborhood. My neighborhood is great because of the mix of housing that exists there today, and I look forward to welcoming more neighbors thanks to this plan's adoption.	7/22/2018
7037	25	/policies/innovations-in-transportation-and-infras	The Parks automated parking for parking lots such as the one at Lake Nokomis should work with the City's app.	7/22/2018
7038	26	/policies/vision-zero/	You MUST police bikers! They blow threw stop signs at alarming speeds with little or no thought for pedestrians. They are to follow the rules of the road just as cars are. They need to be accountable for their behavior and the blind eye that the city and cops turn toward their illegal behavior smacks of privilege. The biker are the worst when it comes to street safety.	7/22/2018
7039	25	/policies/innovations-in-transportation-and-infras	I have read about "Smart Streets" - streets that are solar panels with embedded LEDs. Would love a test pilot street or intersection - street around the Convention Center?	7/22/2018
7040	80	/policies/development-near-metro-stations/	I agree with these steps. These are necessary/proven ways to get transit riders to high-value transit corridor investments.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7041	1	/policies/access-to-housing/	<p>In general, a., b. and c. make sense, and d. somewhat. For e. ADU makes sense too. But in all of these, a-e, as density has become the hot topic issue, and is needed to get the amount of housing we need if the trends continue, exactly where and how much is extremely important, following the 'fine grain' approach advocated by Thomas Fisher in the July 21 Streetscapes article in the StarTribune, would be a place to start.</p> <p>You all probably know about this study, but just in case, done in 2016, Strategies for Increasing Housing Supply in High Cost Cities https://www.urban.org/sites/default/files/publication/83656/2000907-strategies-for-increasing-housing-supply-in-high-cost-cities-dc-case-study_2.pdf</p> <p>It includes many strategies in this 2040 plan, but some other ideas. A few highlights: * emphasizing mixed use with increased density on transportation corridors, be careful about increasing property values that price out current residents, but the mixed use makes for more convenience. In this study 'mixed use' was thought to be 'key to success', and to add i affordability, but I didn't get why (p. 20 or 21) * If possible look to re-develop surplus or underused commercial areas/buildings to add in affordable housing and/or density (the reuse of the commercial buildings in the North Loop is exciting, encouraging new development, it's not affordable, the I know of). *'Good design can make change more palatable; bad design exacerbates the problems of change', p.25. Of course, there is the problem of who decides what is aesthetic. That's partly where community engagement and creatives aiding with that engagement come in. *To address the significant barrier of fear and resistance of the community against change in general and density specifically, the need to do incremental change and educate the community about how this kind of change/ addition has worked out in the past. How did it affect the community or neighborhood where the change took place? pp.22-23</p> <p>However the change and density takes place, it's extremely important to keep open to greenspace, placemaking and public art, even more important as you increase the urban nature of the city.</p>	7/22/2018
7042	28	/policies/msp-airport/	<p>You are too funny. Who is going to walk to the airport? With their luggage? Who is going to bike to the airport. This kind of silly language just shows that you are overly zealous in your support of walking and biking. Where it works, I'm in. But this is just stupid.</p>	7/22/2018
7043	34	/policies/affordable-housing-preservation/	<p>In order to preserve NOAH some sensible constraints must be put on developers. Currently developers are buying up affordable starter homes in cash, locking out ordinary citizens. Then the starter homes are "flipped" and resold with a hefty profit margin -- raising overall housing prices; or the starter home is torn down and a new construction house, with a much higher price tag, replaces it; or out-of-state or even out-of-country speculators buy the affordable starter home with cash and it is rented out, with the rental income not spent locally. None of this benefits current, ordinary city residents, and erodes the supply of NOAH. Blanket up-zoning will only encourage the erosion of affordable housing, and will not lower rents, since it will be new construction. Preserve our time-tested, single family homes! They were built to last, and should not be torn down. Instead developers should be incentivized to build on vacant lots.</p>	7/22/2018
7044	20	/policies/transit/	<p>Love light rail and increased non-car options. I am completely opposed to SW Corridor being used to achieve this goal. This will destroy the Minneapolis Parkland near Cedar Lake. 200 some trains per day is not at all acceptable in a city that was thoughtfully developed by saving open space for quality of life for all, for saving access to lakes and green space for all. It is wrong, environmentally high risk, it does not service the more dense part of the city, it will harm wildlife and water. Horrible route. Please put the light rail in an appropriate location and stop with the excuses. It is a huge challenge but it is the right thing to do to save the parks. Why do people love Minneapolis? Lakes and parks, open green space, some busy, some quiet, wildlife, business, beauty. Stop backing down on this.</p>	7/22/2018
7045	30	/policies/arts-and-cultural-assets/	<p>YES! And you will also need to provide parking for patrons to these places. In your utopia, all will walk, bike or ride. In reality, not so much.</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7046	51	/policies/healthy-pre-k-development/	I do not disparage these goals. I do find that all attempts to remedy them in the near past seemed to have had little success. As a society, we don't value children. Changing housing patterns won't fix these issues. We need to have a citywide ethic to value children and to establish stable households of mothers *and* fathers (with the courts backing off from separating fathers from their children). Minimum wage increases help to underpin the family. But a common citywide ethic will do more than anything to establish progress in these goals than housing development changes.	7/22/2018
7047	1	/policies/access-to-housing/	I support adding more housing to minneapolis because we need enough places to live for everyone.	7/22/2018
7048	1	/policies/access-to-housing/	I support adding more homes to Minneapolis. I also support replacing Interior 1 with Interior 2 and 3, because the designation of Interior 1 is not applied with a mind to Goal #1: reducing disparities.	7/22/2018
7049	68	/policies/energy-efficient-buildings/	New construction or significant remodels should require the installation of a DC to AC converter / smart power usage controller installed in the house with at least one (18%+ efficiency / 250+ watt) solar panel.	7/22/2018
7050	33	/policies/affordable-housing-production/	Not everyone will be able to afford to live in any part of the city. I can not afford to live in Linden Hills or Kenwood. And that is okay. This is a ridiculous goal. Ask people living in their neighborhoods if they want to move to a different part of the city or if they want their neighborhood to better serve them. I suspect you'll hear them prefer the latter.	7/22/2018
7051	80	/policies/development-near-metro-stations/	There will be a metro station 2 blocks from me, if the SWLRT is built. Parking will be affected, are you planning a lot near the 21st street station?	7/22/2018
7052	84	/policies/public-safety/	Blocks on residential streets that are the primary drop-off / pick-up zone for elementary schools should be Snow Emergency Routes. If they aren't then during snow emergencies A) that street can be impassable; B) the next several days are dangerous hellscape where the street is half-impassable, half every one is parked on one side with kids running around slippery streets. Just plow those blocks on the Snow Emergency day.	7/22/2018
7053	1	/policies/access-to-housing/	I fully support having more neighbors. Minneapolis had a higher population decades ago than it does today. Lots that used to have multi-unit housing now have single-family homes. Suburbanization and lower density housing has had disastrous environmental and social harm. I support the goals of higher density and more housing.	7/22/2018
7054	1	/policies/access-to-housing/	Cars are expensive and creating more neighborhoods where cars are not necessary is essential to creating affordable neighborhoods. We can't necessarily control the price of homes but we can help control other costs, like the estimated \$6000/year associated with cars, that indirectly make housing more expensive. That \$500/month not spent on a car could pay a lot of rent.	7/22/2018
7055	1	/policies/access-to-housing/	I fully support having more neighbors. Minneapolis had a higher population decades ago than it does today. Lots that used to have multi-unit housing now have single-family homes. Suburbanization and lower density housing has had disastrous environmental and social harm. I support the goals of higher density and more housing.	7/22/2018
7056	54	/policies/supporting-economic-growth/	This city has amputated itself because it has no viable alternative political party. With the DFL party candidates alone capable of getting elected, no alternative party can cause changes to city plans and decisions. As is the case of monopolies and command-driven economies, lack of competition eventually stifles and then kills these organizations. For the sake of the future of Minneapolis, it's time to bring back a multi-party political system in this town.	7/22/2018
7057	34	/policies/affordable-housing-preservation/	YES! You need to maintain the starter homes so people can afford to buy into their neighborhoods. Starter homes are affordable and having people buy means the community will be more stable. And YES, you need to maintain the affordable rental housing that we currently have. By up zoning the whole city, developers will push the rents up in the new spaces, the taxes will go up for all building, the rents that were previously affordable will also go up and poof, affordable housing gone. SMART growth, not blanket growth.	7/22/2018
7058	19	/policies/bicycling/	Having a city friendly for cycling is important to me. I'd like to see the conversion of select streets to cycling-only, instead of adding bike Lanes to busy city streets. Franklin Ave. Is an example of a street vtgat can't handle bike Lanes. But 22nd Street could easily be closed to cars.	7/22/2018
7059	1	/policies/access-to-housing/	Increasing housing supply in all areas of the city is vitally important in order to ensure housing availability for people at all income levels. We live in a mostly single-family-home neighborhood and would welcome buildings with up to four units in our area.	7/22/2018
7060	94	/policies/heritage-preservation-regulation/	Historic preservation shouldn't be used as a tool to stop or prevent development of much needed housing. Every old house is not historic.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7061	5	/policies/visual-quality-of-new-development/	g) Apply design standards, guidance, and regulation consistently across the city regardless of market conditions or community characteristics. This action step should be deleted. It sounds like imposing design standards to make all neighborhoods look the same. Community characteristics should be considered when applying "design standards."	7/22/2018
7062	80	/policies/development-near-metro-stations/	Have the courage to do the light rail right and stop with the excuses. Light rail should not be routed along the shore of Lake Harriet or Lake Nokomis nor should it be routed through Cedar Lake. The pride of Minneapolis?-Lakes, Parks, green space, wildlife, wildflowers, trees, family and kid friendly. We know all the arguments and dilemmas. There is still no excuse or dilemma big enough to justify ruining the Cedar Lake Park area with over 200 train passes running per day. It is wishful thinking and fantasy if you believe it will not ruin the area. It will ruin it. Live with the facts and have the courage to change this. Light rail and beautiful parklands can be part of our beautiful city but not in the same location. I vote, I pay taxes, I am a responsible neighbor and steward of our city. This is so wrong and breeds anger and lack of respect in our city when these plans lack sensitivity.	7/22/2018
7063	94	/policies/heritage-preservation-regulation/	Can we do a better job of preserving POCI history.	7/22/2018
7064	6	/policies/pedestrian-oriented-building-and-site-de	This policy is an excellent idea! I would love to be able to walk to everything I need. I have a car right now because I need it to get to work and to run errands. Pedestrian-friendly development would make healthy, active living easier for me.	7/22/2018
7065	24	/policies/shared-mobility/	Policy 24: a, b: Does everyone have smart phones? Bikeshare presence in the parks - question dockless and scooters.	7/22/2018
7066	35	/policies/innovative-housing-types/	Especially important as we have an aging population and young, working population wanting to live in the city with easy access to amenities. What if you could stay in the neighborhood you've live in for 30yrs when you want to downsize? I know some people in Kenwood have been able to do that. Creative housing options--let's look at them. The 8-80 movement probably has some ideas on how to do that. We can see how it works at the redevelopment of the Ford Plant site. This website has some interesting article about housing (sorry if you already know about it) https://www.strongtowns.org/housing	7/22/2018
7067	6	/policies/pedestrian-oriented-building-and-site-de	This policy is an excellent idea! I would love to be able to walk to everything I need. I have a car right now because I need it to get to work and to run errands. Pedestrian-friendly development would make healthy, active living easier for me.	7/22/2018
7068	0.1	/topics/land-use-built-form/	It's time for Interior 1 to go. Interior 2 would be better as the base form type, even in areas that were not once served by streetcars. Interior 2 would better allow a market-based approach for development in our city, and creates a development environment where new buildings can be more sensitively integrated into existing neighborhoods. It would also be a better form for small developers. The current form favors large developers as in many cases they'll be the only ones with the financial resources to participate in the narrowly upzoned strips along the corridors. (Not opposed to large developers, but this plan makes it their ballgame and no one else's.)	7/22/2018
7069	6	/policies/pedestrian-oriented-building-and-site-de	b) Require active uses on the ground floor of new buildings, with direct connections to the sidewalk. What is an "active use"? Need to add another policy that preserves, protects, and increases trees to ensure a healthy tree canopy for shade, oxygen, habitat, screening and beauty.	7/22/2018
7070	6	/policies/pedestrian-oriented-building-and-site-de	I support the draft policy. I view it as essential to reduce our reliance on cars. I view pleasant urban living as synonymous with not having cars, car noise, and car danger. To the extent that the plan prioritizes any transit over cars, I support it. I think the plan should go further to support transit, biking, and walking.	7/22/2018
7071	93	/policies/stewarding-historic-properties/	You can find similar buildings across the USA. A growing city needs room for people. Historic districts shouldn't be used as a tool to stop growth.	7/22/2018
7072	7	/policies/public-realm/	To "encourage walking and support a high-quality and distinctive built environment" plant more trees. Require that developers and City departments and agencies save trees and plant more trees to provide oxygen, shade, screening, habitat and beauty.	7/22/2018
7073	14	/policies/tree-canopy-and-urban-forest/	Trees are one of my favorite parts of living in Minneapolis. Investing in, and maintaining, our urban forest is a policy I fully support.	7/22/2018
7074	20	/policies/transit/	Looks like Minneapolis is gearing up for more population and higher density of it. Minneapolis has surprisingly poor fast transit connectivity to work hubs (like in Bloomington, Woodbury, Minnetonka etc). There are bus transportation routes which are not frequent and take very long. We need light rail or Subway kind of fast transit.	7/22/2018
7075	7	/policies/public-realm/	Greater investment in public aesthetics would make walking and biking a pleasure.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7076	0.1	/topics/land-use-built-form/	Buildings already exist in Interior 1 that dont conform to that guideline. Request removal of interior 1 and move to interior 2 at a minimum.	7/22/2018
7077	43	/policies/housing-displacement/	<p>Re: "Inclusionary Zoning": Instead of mandating affordable housing to be built in new developments, draft an "Opt-In" policy to incentivize affordable units. Those incentives could be placed on net decreases in property taxes or other elements that The City has exclusive control over that make construction more expensive.</p> <p>That being said, if an occupied NOAH property is torn down and redeveloped, I believe the developer should be solely responsible for preserving the quality of life for the existing tenants.</p> <p>The developer should pay for relocation assistance for the tenants, subsidize their new rent proportionate to their leases, as well as replace 110% of the displaced affordable housing in the new development.</p>	7/22/2018
7078	0.1	/topics/land-use-built-form/	<p>Forms Interior 3 and Corridor 6 are not inherently bad form types, but are more subject to bad developments than other forms. I'm concerned the examples shown would not fit well within existing neighborhoods. A few tweaks that could make these forms better:</p> <ol style="list-style-type: none"> 1. Limit width of development facing the street. Encourage buildings deep off of the street, not wide on the street. 2. Place firm limits on how much of a block a development can take. 3. Place clearer restrictions / guidance on form. Setbacks, massing, etc. 	7/22/2018
7079	0.1	/topics/land-use-built-form/	Finally, for Interior 3, encourage garden-level units (unless the area could reasonably be expected to contain retail).	7/22/2018
7080	0.1	/topics/land-use-built-form/	Should be Corridor 10. Right at an LRT Station.	7/22/2018
7081	6	/policies/pedestrian-oriented-building-and-site-de	<p>This land use plan is absolutely going in the right direction. I wish it went further to end exclusionary zoning in far South and Southwest Minneapolis. Don't let the outsized political power of white property owners short-circuit essential zoning reforms.</p> <p>I'm very in support of having less surface lots, not having gas stations and drivethrus and other car-centric businesses along walkable corridors.</p> <p>I think a lot of the improvements for walkability and transit still come from a very car centric perspective, and I'd like to see some more reflection on whether needs of people who walk and roll come from that perspective, rather than the walkability from the perspective of people who drive.</p>	7/22/2018
7082	76	/policies/new-parks/	<p>This policy is sorely missing "green space" which is not the same as open space.</p> <p>add e. Require that design of new parks include at least 50% green space with trees and native plants (not just turf) not used for active recreation (such as team sports).</p>	7/22/2018
7083	1	/policies/access-to-housing/	I favor allowing 4 plexes in all residential neighborhoods. I've lived in and near multi-unit structures and felt they integrated well with the neighborhood. I would like to see more.	7/22/2018
7084	1	/policies/access-to-housing/	Do not allow wards 7, 13, 12, 2 to get special treatment. They've benefitted from redlining and exclusionary zoning. Consult the mapping prejudice map to see all the racial covenants that didn't allow POCI into certain neighborhoods. These have lasting results on wealth building and how white these areas are. Allow diversity of housing at all price points in every neighborhood. Including subsidized and public housing.	7/22/2018
7085	0.1	/topics/land-use-built-form/	Areas like Hiawatha and 50th should be Corridor 10 or at least Corridor 6. Right at an LRT Station. That's one of the reasons that route was chosen. Allow for significant development around LRT stations. Prove that LRT development can be a spark for development success.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7086	6	/policies/pedestrian-oriented-building-and-site-de	I'm very in support of having less surface lots, not having gas stations and drivethrus and other car-centric businesses along walkable corridors. I think a lot of the improvements for walkability and transit still come from a very car centric perspective, and I'd like to see some more reflection on whether needs of people who walk and roll come from that perspective, rather than the walkability from the perspective of people who drive.	7/22/2018
7087	1	/policies/access-to-housing/	I love this! I love this so much! Go farther! Don't restrict larger apartments to arterial roads - this is a real equity issue!	7/22/2018
7088	0.1	/topics/land-use-built-form/	We need more housing and wealthy white neighborhoods need to shoulder their share of it. It's not equitable to force all the population growth into a few areas, simply because they're currently occupied by lower income renters and people of color without political power. Bold zoning reforms *must* happen.	7/22/2018
7089	6	/policies/pedestrian-oriented-building-and-site-de	I would like to see some focus on making alleyways walkable spaces that can have business frontage and other things. Many other cities do this, and we can do this and double our walkable space!	7/22/2018
7090	83	/policies/people-with-disabilities/	Yes to all of this. Build an environment that works for all users regardless of their abilities. Most of the city isn't accessible.	7/22/2018
7091	35	/policies/innovative-housing-types/	And keep the height to fit in with the current neighborhoods. We do NOT want high buildings in our neighborhoods!	7/22/2018
7092	8	/policies/public-safety-through-environmental-de	Re-appropriate funds to find a way to buy "City-Friendly" emergency vehicles. Firetrucks are obviously a good place to start, but even look into buying smaller vehicles for EMTs and Paramedics. Europe does it, and they're doing fine.	7/22/2018
7093	80	/policies/development-near-metro-stations/	Re: Policy 80. I fully support having a dense node around Lake and Excelsior. This is a logical place for such density, even if light rail transit doesn't happen.	7/22/2018
7094	67	/policies/climate-resilient-communities/	Can incentives be offered for private and commercial and multi unit dwelling to add solar panels etc. Building codes should ensure energy efficient buildings built with integrity. Long term view prevents the city from getting caught with its shorts down as the climate changes.	7/22/2018
7095	11	/policies/skyways/	More residential construction connected to the skyways would be a good thing! This would allow more lifestyle options for people in the city.	7/22/2018
7096	2	/policies/access-to-employment/	re: d., unless there are already un or underused non-res buildings for creative out-posts, or shared with other partners and entities.	7/22/2018
7097	82	/policies/aging/	Allow people to age in place. Convert their large SFH if they choose or build an ADU. We should reform ADU's have specific models people can choose from to streamline the process. Also get rid of the owner occupancy requirement.	7/22/2018
7098	0.1	/topics/land-use-built-form/	Areas like Hiawatha and 50th should be Corridor 10 or at least Corridor 6. Right at an LRT Station. That's one of the reasons that route was chosen. Allow for significant development around LRT stations. Prove that LRT development can be a spark for development success. The area on lower Lyndale where it becomes the I-35 where it's now proposed to be a Corridor 10 is madness.	7/22/2018
7099	19	/policies/bicycling/	Not all of the cities residents can bicycle. Bicyclists are not paying for the additional cost to implement and maintain bikeways and other facilities that benefit them. At least bring back required licensing. Adopt a rational -as opposed to the clearly bicycle-biased- mentality with regard to the distribution of paths. I have (or will soon have) 4 streets and a bike trail available in the 10 blocks between the river and the railroad tracks. All of these are running the same direction. As I observe traffic, each of them is presently underutilized. Further, users are often transgressors of established law, purpose, and patterns associated with these paths. I've got plenty more to say... but I fear it is not worth my energy.	7/22/2018
7100	35	/policies/innovative-housing-types/	Work with neighborhoods to see what they'd like in their areas. You need to start listening to the people and quit forcing things we don't want down our throats.	7/22/2018
7101	6	/policies/pedestrian-oriented-building-and-site-de	I'd like to see an explicit commitment by the city to winter sidewalk maintenance. Leaving it to property owners doesn't work.	7/22/2018
7102	0.1	/topics/land-use-built-form/	The area just north of anwatin school, known as anwatin woods, is currently undeveloped and used by the school. It should be preserved as an outdoor class room especially in light of the new development opportunities the plan creates. The land is currently for sale and should be purchased by the city and donated to the school. This would make up zoning much more palatable to the neighborhood and would significantly reduce opposition to draft #2	7/22/2018
7103	8	/policies/public-safety-through-environmental-de	Greatly Reduce front yard setbacks to 8' maximum and allow 0-lot line development.	7/22/2018
7104	36	/policies/innovative-housing-strategies/	Explore WITH the communities. Don't explore then force it on the communities. You need to go back to SMALL AREA PLANS and adhere to them. This one size fits all approach is not friendly to the residents of Minneapolis who pay your salaries.	7/22/2018
7105	19	/policies/bicycling/	Any time a dudebro takes out a little kid on his bike while he's walking or biking, a 1/4 mile of bike paths should be removed.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7106	78	/policies/park-design-and-programming/	There really needs to be an Edinborough Park-like young child indoor playground for Minneapolis. There should be non-Fast Food indoor playground options for younger children. We have gyms, indoor tracks, indoor workout rooms, pools, etc., etc. for older children and adults but for that 1-7(ish) set that really needs a _playground_, they really can't get access to one for almost 1/2 the year.	7/22/2018
7107	1	/policies/access-to-housing/	I think the blanketed fourplexes where there are now only single family houses idea should be piloted in limited/targeted areas for a few years to see what happens. In the meantime, how about allowing subdividing of current houses (old mansions for example) up to three (or 4?) units as long as structure remains owner occupied for minimum 10 years after conversion. This would allow current homeowners of big houses to make their own living unit smaller (and primarily on the first floor if they are aging), while providing an income to offset increasing property taxes. Neighbors won't complain that it'll become run down since it will remain owner occupied for at least 10 years. This would allow historic preservation of the "neighborhood" feel. The only objection I can see is more cars in neighborhood will result but possibly people attracted to these units would be younger, and people willing to bike, walk, transit to work. Possibly people living in unit could "car" share.	7/22/2018
7108	17	/policies/complete-streets/	We need to actually follow the city's adopted complete streets policy.	7/22/2018
7109	66	/policies/air-quality/	Allow more housing in the neighborhood interiors because corridors are polluted, loud, and dangerous because of the speed of cars. Prioritize people who use other modes. Move away from car centric designs.	7/22/2018
7110	35	/policies/innovative-housing-types/	Please consider "tiny houses" to the list of options, including their use on alleyways and short-ends of blocks. They won't work for everyone, but for certain groups they may be a nice option to add to the housing mix. If necessary, reduce minimum space requirements for such development.	7/22/2018
7111	0.1	/topics/land-use-built-form/	Minneapolis residents have developed and the council has adopted 34 area plans over the last 25 years. These represent the vision of people closest to the needs of their neighborhoods. The 2040 Plan, in a highly centralized and autocratic fashion, would mostly Trump these plans out of existence. Wa, wha what???? Please toss the 2040 in the woods and go back to the 34 area plans, then update the 2020 plan.	7/22/2018
7112	38	/policies/affordable-housing-near-transit-and-job-	Great goal. How are you going to get developers to create affordable housing if all they want to do is maximize their profits. When you open the city to so much development, you are sure to raise the rents / prices of homes.	7/22/2018
7113	2	/policies/access-to-employment/	The whole region definitely desperately needs better concentration of jobs in Mpls and St Paul, but from my perspective, the much greater need in DOWNTOWN Mpls specifically is more housing. I like that job concentration is being addressed here, but I think there are plenty of near-downtown neighborhoods (especially Uptown/East Isles/Lowry Hill East/Whittier, but also the southern parts of Northeast and generally everywhere north of 38th St) where a much higher concentration of jobs would not only enhance the market for major walkability improvements, but also vastly increase the market for improved public transit in those areas.	7/22/2018
7114	15	/policies/transportation-and-equity/	The city does not have an obvious Title VI implementation plan, Limited English Proficiency plan or accessible pedestrian plan that includes federal requirements for sidewalk maintenance as required by federal law. This comprehensive plan does not mention or describe our rights under the civil rights laws that apply to cities or any public entity that receives federal funding. Without these plans, Minneapolis doesn't have a authentic commitment to equity, eliminating racial disparities or removing barriers to civic life for people with disabilities. While all areas of government are subject to these laws, the area of transportation Minneapolis has fallen way short. This commitment should be easy to identify in the comprehensive plan. The comp plan is not just about the Land planning Act. If the City was truly committed to eliminating racial, gender and other disparities, we should see description of general rights under Civil Rights Act of 1964 and other non-discrimination laws in the comp plan, on the city's website and also forms to make formal complaints.	7/22/2018
7115	35	/policies/innovative-housing-types/	Imperative. Having lived in Town Oaks (4th ave and 44th st) for over 40 years, I've experienced low cost housing. Town Oaks has maintained these homes well. We are racially mixed and economically mixed. Our homes are well designed and many town homes are not. Build on the success of Town Oaks. Also explore cooperative housing. We need to raise income levels and we cannot lose the low income folk who are many of our workers. thanks	7/22/2018
7116	1	/policies/access-to-housing/	The city absolutely needs to grapple with the ways that our policies around zoning have historically reinforced racial and economic disparities. Do not let rich, powerful, white homeowners get away with watering this down in the name of preserving "neighborhood character."	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7117	33	/policies/affordable-housing-production/	As denser housing is created adequate+ parking spaces should be required as part of that development. It's crazy to not require adequate+ parking.	7/22/2018
7118	80	/policies/development-near-metro-stations/	Expand several blocks into transit corridors and stations. People do walk to transit so more housing choices should be available several blocks into a neighborhood. We need to plan for the future, everyone won't be able to drive and everyone can't drive right now.	7/22/2018
7119	94	/policies/heritage-preservation-regulation/	Stop heritage preservation regulations from being abused to block or delay new housing.	7/22/2018
7120	40	/policies/homelessness/	Great goals. Hope your policies don't end up creating more homelessness as a result of allowing developers to do what they want where they want and how they want as you have so far. Seattle and others cities haven't gotten it right. Maybe you need to scale back your plans for this go around and work toward the 2050 plan in a more thoughtful manner.	7/22/2018
7121	1	/policies/access-to-housing/	I strongly support encouraging more housing units and allowing for a wider range of housing types in all of Minneapolis. We should not be basing housing policy on the narrow self-interest of existing wealthy homeowners. We have a serious housing shortage and need to do everything possible to alleviate that problem so that everyone who wants to live in Minneapolis has the opportunity to, regardless of financial ability or political connectedness.	7/22/2018
7122	81	/policies/social-connectedness/	Figure out how our transit system can facilitate these steps.	7/22/2018
7123	1	/policies/access-to-housing/	I support higher residential density in our City. I am concerned about the unintended consequence of allowing 4 pieces. In the current housing market it might be feasible to tear down an existing dwelling and replace it with an eyesore that benefits the developer and not the residents.	7/22/2018
7124	19	/policies/bicycling/	I appreciate the draft policy's prioritization of bicycling, and I think it needs to go further. For example, bike lanes are not something I perceive as bicyclist infrastructure. I perceive bike lanes as infrastructure to help cars avoid hitting bicyclists -- bike lanes are car infrastructure. Real bike infrastructure would look like a city-wide network of car-free transportation hubs, like the greenway or the UMN transitway. I ask for policies that reduce the number of streets where cars can drive, and policies that build car-free environments for safer and more pleasant transit.	7/22/2018
7125	8	/policies/public-safety-through-environmental-de	Encourage graffiti!	7/22/2018
7126	6	/policies/pedestrian-oriented-building-and-site-de	It is how some people express and give back to their community. It is just in a manner that is different than the white patriarchy.	7/22/2018
7127	20	/policies/transit/	Safe walking and biking routes throughout the city. It important to have routes that connect, more will use routes if they feel safe.	7/22/2018
7128	33	/policies/affordable-housing-production/	I fully support building any alternative to car-based transportation. Please prioritize transit and enact policy that discourages driving. Where possible/feasible, the city should construct or help pay for underground parking lots (put in under new retail or apartment buildings) to provide parking for increased density until density is high enough to support mass transit systems that work and are effective/efficient. People may still have to walk a block or two from their car to home but at least they would find a parking space and could be off street/covered in winter. PLUS, this would take away the parking issue complaint about why adding density won't work.	7/22/2018
7129	1	/policies/access-to-housing/	The problem with this plan is that on one hand you allow any house in town to be replaced by a fourplex while on the other hand you still have a 2 story lower limit on the main transit routes, such as Lake, Hennepin and Lyndale. And over the past FIVE years, we've actually seen one story businesses built on these routes, each with a drive-thru. So much for density and getting a lower use of cars. But more importantly, your proposed lower limit of 2 stories will do nothing to change the urban blight that these transit routes constitute and clearly does nothing for density. In addition, the fourplex to me is not a multi unit vs private home issue, it is foremost a construction that will obliterate the past, but also go deep into the yard into the alley, erasing in one stroke both green spaces and privacy. This is very much ill thought and needs complete revision, especially in view of your low density approach to the main transit routes. Finally, it's time that Minneapolis adds an aesthetic evaluation to the permit granting process. That should be true for any structure. A process needs to be put in place.	7/22/2018
7130	15	/policies/transportation-and-equity/	I would like to see more aggressive investment in transit enhancements, especially in light rail and arterial BRT.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7131	33	/policies/affordable-housing-production/	Where possible/feasible, the city should construct or help pay for underground parking lots (put in under new retail or apartment buildings) to provide parking for increased density until density is high enough to support mass transit systems that work and are effective/efficient. People may still have to walk a block or two from their car to home but at least they would find a parking space and could be off street/covered in winter. PLUS, this would take away the parking issue complaint about why adding density won't work.	7/22/2018
7132	10	/policies/street-grid/	Diverters, particularly in north Minneapolis, divert pedestrians and bikes more than they divert cars. Bike and pedestrians should have full access to neighborhoods. Redesign diverters, or even better, remove them and replace them with traffic circles like the bike boulevards in north east.	7/22/2018
7133	48	/policies/data-driven-decisions/	Data-driven decisions is a concerning topic. It is well-intentioned but requires us to be able to be smart when interpreting what the data tells us. I have seen plenty of bad commercial decisions made in a data-driven way and have no reason the government or general public would be better in this regard. Not saying don't do it, just handle with extreme care, skepticism and caution.	7/22/2018
7134	80	/policies/development-near-metro-stations/	Raise the height limits around all LRT stations. I've noticed a few stations/future stations with greatly reduced intensity in white, high income areas. Kenwood, CIDNA, Prospect Park, and others. These are billion dollar transit investments. We need to give more people access to them.	7/22/2018
7135	22	/policies/downtown-transportation/	Please add car-free pathways into and out of downtown to all sides of the city. Sharing space with cars is unpleasant and dangerous, and it slows my commute.	7/22/2018
7136	0.1	/topics/land-use-built-form/	I live in Logan Park, a neighborhood that is 50% duplexes or higher (some triplexes and fourplexes). It is the first planned neighborhood in Minneapolis so worthy of a case study of a livable, diverse housing. The single family homes are all mostly 2 stories so the taller duplexes etc, don't feel out of place. But note, though we have smaller lot sizes than the housing built later, everyone has some yard, front and back. This allows for green space and growing a tree canopy. You need to require enough width and depth of the lot size, not just requirements about the height of the building, in order to create livable dense housing. Our blocks are double long. Eliminating every other street helped allow for more space between structures. That would be problematic on newer blocks. In the conceptualization, you show 2-story older houses. Neighborhoods with that style of older houses, probably already have duplexes mixed in on the block. Let's not tear down naturally occurring affordable housing to squeeze in a new fourplex on a skinny lot containing an older home or a duplex. I would like to see a drawing of a neighborhood with houses built in the 1950s with a duplex or fourplex mixed in creatively.	7/22/2018
7137	24	/policies/shared-mobility/	Policy 24: a, b: Does everyone have smart phones? Bikeshare presence in the parks - question dockless and scooters.	7/22/2018
7138	25	/policies/innovations-in-transportation-and-infras	Policy 25: c, d, f, h: Plan for Complete Streets. Encourage and support electric vehicles including City and the public agencies' fleets. Question drones in parks and public spaces - concern for privacy.	7/22/2018
7139	10	/policies/street-grid/	There are still blocks in bryn mawr that don't have sidewalks, two miles from down town. This neighborhood will soon have some of the best transit in the city, but people will need sidewalks to access it.	7/22/2018
7140	26	/policies/vision-zero/	Policy 26: a, b, c, d, e, f, g, h, i, j: Advocate for grade separation of auto and bikes and pedestrians where ever possible.	7/22/2018
7141	84	/policies/public-safety/	I don't believe this policy goes far enough. Only step c (proactively build trust between first responders and the community) even alludes to the very real threat that civilians face a lethal risk when interacting with police. In 20 years I would like to see a city that has a genuinely reformed police force: a department that has minimized the influence of racial and social biases and reduced the temptation for corruption and abuse of power. I would like to see Minneapolis be a national model for other cities to emulate.	7/22/2018
7142	41	/policies/tenant-protections/	I think it would also be worth exploring ways to make sure that rents remain affordable. People in my neighborhoods are seeing such drastic increases in their rents, they are leaving. These are folks who have been here many years.	7/22/2018
7143	27	/policies/transportation-partnerships/	Policy 27: b: Utilize existing City transportation policies to tie decisions to place and context including for grade separation across freeways.	7/22/2018
7144	28	/policies/msp-airport/	Policy 28: b, f: Prioritize improved pedestrian and bicycling access to the airport with park connections. Support efficient takeoff and landing at MSP without utilizing park corridors and to mitigate noise and air pollution.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7145	0.1	/topics/land-use-built-form/	I live in Logan Park, a neighborhood that is 50% duplexes or higher (some triplexes and fourplexes). It is the first planned neighborhood in Minneapolis so worthy of a case study of a livable, diverse housing. The single family homes are all mostly 2 stories so the taller duplexes etc, don't feel out of place. But note, though we have smaller lot sizes than the housing built later, everyone has some yard, front and back. This allows for green space and growing a tree canopy. You need to require enough width and depth of the lot size, not just requirements about the height of the building, in order to create livable dense housing. Our blocks are double long. Eliminating every other street helped allow for more space between structures. That would be problematic on newer blocks. In the conceptualization, you show 2-story older houses. Neighborhoods with that style of older houses, probably already have duplexes mixed in on the block. Let's not tear down naturally occurring affordable housing to squeeze in a new fourplex on a skinny lot containing an older home or a duplex. I would like to see a drawing of a neighborhood with houses built in the 1950s with a duplex or fourplex mixed in creatively.	7/22/2018
7146	0.1	/topics/land-use-built-form/	Linea- I am writing you today with vast concern about th 2040 plan as it relates to zoning. My husband and i just recently purchased our first home in Southwest Minneapolis. Neither of us is from Minneapolis but after living and working in the city for 7 years we have fallen in love with the area and had a goal to purchase a home. We currently live in uptown and love it but hope to start a family soon and decided we wanted a single family home with a yard and a quiet neighborhood. We have worked very hard to save as afford the home we purchased. Your new plan would not only destroy our dreams for our new home as well as put us at extreme financial risk of decrease in our property. I strongly urge you to consider all points of view and repercussions for your neighbors as you redraft the plan.	7/22/2018
7147	29	/policies/creative-sector-economy/	Policy 29: d: Engage diverse creative labor in environmental and ecological projects.	7/22/2018
7148	18	/policies/walking/	Improved sidewalk maintenance would help. Stricter enforcement of tree growth above sidewalks would be helpful, too. These need to be trimmed.	7/22/2018
7149	1	/policies/access-to-housing/	The notion that high-density housing should be added along corridors in historic neighborhoods populated by single family housing with a handful of duplexes and four-plexes (e.g. Kenwood) is terribly misguided. It seems like the city is doubling down on the misguided SWLR route, which commits a cardinal sin for public transit - routing through low density and recreational areas. Because the light rail is planned for an area where there are very few likely riders and where the neighborhood is massively opposed to it, the project is not likely to succeed. I have said all along that it will end up as a riderless eyesore, which at \$147 million per mile puts it in the running for worst transportation project ever. That policy mistake should not be compounded by trying to alter the characteristics of the neighborhoods through with light rail is routed. Instead, politicians should have the sense and courage to route rail through dense neighborhoods, like every other city in the world tries to do. Please do not continue to make decisions that take threaten the most valuable qualities of Minneapolis - trails, lakes, and livable neighborhoods. While density is a worthwhile goal, it should not be accomplished on the expense of fundamentally altering the character of neighborhoods. If you pursue this approach in Kenwood, I suspect a lot of people will leave for places like Edina or St. Paul, where the cities make decisions on behalf of all citizens, and not just developers and the noisy pro-rail crowd.	7/22/2018
7150	41	/policies/tenant-protections/	It's difficult to get info on landlords; difficult to know who has lots of citations from inspectors, etc. It's not transparent. --There currently are not enough housing inspectors to respond to all of the complaints that tenants submit right now. Need more! --What kind of support for other organizations? What would that look like? What do they do now, if anything? --There is a need for more inspectors and a need to make sure all are fully trained on the correct requirements for units designated for Section 8 vouchers.	7/22/2018
7151	30	/policies/arts-and-cultural-assets/	Policy 30: e, h: Support more partnerships like the MIA and Walker on parklands.	7/22/2018
7152	18	/policies/walking/	Yes to foster vibrant public space! Welcoming spaces bring people out to use them	7/22/2018
7153	25	/policies/innovations-in-transportation-and-infras	Please do not allow these policies to invest too much hope in self-driving cars. Individual motorized transit does not have the potential to move enough people, and it will come at too great of an environmental cost. Please prioritize bicycling, walking, and mass transit over cars, whether robot- or person-driven.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7154	31	/policies/creative-workers/	Policy 31: d: Focus on artists of color through environmental; projects.	7/22/2018
7155	32	/policies/arts-in-community-development/	Policy 32: a, c, e: Through placemaking,	7/22/2018
7156	19	/policies/bicycling/	I love the expanding bike routes throughout many areas of the city! AND I would like to see more protected bike lanes that clearly prioritize biking over autos. Though I'm a long-time urban commuter, I rarely feel safe and relaxed while biking in the city because I often don't feel seen and need to watch for opening doors, turning at intersections, etc.. I would like to see more routes, such as the transitway that connects to the U of M, that provide routes exclusively for bikes/pedestrians (or those + buses).	7/22/2018
7157	0.1	/topics/land-use-built-form/	I do not believe that blanket upzoning is necessary to meet the availability needs nor does it solve the affordable housing crisis. If this plan nonetheless moves forward, upzoning the 42nd block of Colfax Ave S. is a bad idea. This block is home to Barton Open School, a magnet school, that draws a ton of car traffic to it twice a day. Mornings are especially treacherous and unsafe as it is. Zoning this for multi-unit and without off street parking requirements will lead to an incredibly unsafe situation for young children and families trying to navigate the street. This is exactly why this plan should be reworked; it is not context sensitive.	7/22/2018
7158	33	/policies/affordable-housing-production/	Policy 33: a, b, c, d, e, f: HOW? There are no "teeth" here. Proactive words needed - REQUIRE, ENFORCE, MANDATE, INITIATE	7/22/2018
7159	28	/policies/msp-airport/	B. Agree! Allow people to bike to the airport with long term bike parking so they can bike home when they return from their trip.	7/22/2018
7160	34	/policies/affordable-housing-preservation/	Policy 34: a, b: Proactive words, enforcing words needed	7/22/2018
7161	33	/policies/affordable-housing-production/	I support affordable housing. The current market preferences units with many bedrooms where landlords find it more profitable to rent the bedrooms to singles or couples , thus pricing out families that need multiple bedrooms. That is a 4 Friends could pay 900 each or 3600 for a 4 bedroom house. Few families compete and pay 3600 a month for their family to have 4 bedrooms	7/22/2018
7162	0.1	/topics/land-use-built-form/	We hear much about the population of Minneapolis in 1950 v 2018. Such a statement is a false equivalency. The metro area was less than 1 million total population in 1950. Today the metro is >4 million. Minneapolis has lost hundreds of blocks to freeways, thousands of du's, but Mpls still serves as the center of the region- now 4 times the population. Our infrastructure investments have not kept pace with the increase in population. Affordable housing is a regional issue and requires regional solutions. Dump the 2040 and go back to neighborhood plans.	7/22/2018
7163	43	/policies/housing-displacement/	A policy around just-cause evictions - "If you don't do anything wrong, you cannot be evicted (creates a unjust blemish on your rental record)." Notice of Sale policy - tenants must get at least 60 days' notice prior to the sale of a property Right of Refusal(?) policy - tenants have the opportunity to purchase the building collectively at the same price that the property owner accepts from a third party buyer; would then turn building into a cooperative living structure of some kind. --Ensuring that the eviction grace period of [xyz] is included in all leases --How to get the City to encourage the N.O.A.H. (naturally-occurring affordable housing) that "older" landlords already create with their older buildings; could there be a tax break incentive for small residential property owners? (in pilot phase right now) --How to support elderly homeowners and elderly property owners? --We currently do not have enough rental units to satisfy demand --Could the City place restrictions on AirBnB? They are taking up inventory that is needed for permanent residents; what other Cities have a model that works? New Orleans? --How many vacant units are there? How could the City incentivize small landlords that may have units not currently in use as apartments but that could be? --Concern: This plan is future-looking, but displacement is already happening	7/22/2018
7164	42	/policies/expand-homeownership/	YES! Homeownership leads to more stable communities and less crime. I support this initiative. But it probably means that your blanket up zoning will not work because it flies in the face of homeownership. In the words of Heather Worthington, home ownership is an archaic way of wealth building and is a thing of the past. I wholeheartedly disagree with her and she should not be in a position of decision making if her statements contradict one of the policies this plan claims to embrace.	7/22/2018
7165	20	/policies/transit/	We need serious, immediate, and substantial investment in a half dozen bus rapid transit projects. This is an economic, climate, and equity issue.	7/22/2018
7166	49	/policies/educational-and-economic-access/	Investing in ALL people is most important; more important than roads.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7167	19	/policies/bicycling/	Always take the weather into consideration. Maintain bikeways in all conditions.	7/22/2018
7168	37	/policies/mixed-income-housing/	Mixed income housing and -- ideally -- neighborhoods creates healthy communities. I think Minneapolis is in danger of increased income segregation along with gentrification. Anything that can be done to prevent this and to promote mixed income communities will be a move in the right direction.	7/22/2018
7169	20	/policies/transit/	Higher quality transit infrastructure and more frequent service is essential.	7/22/2018
7170	4	/policies/access-to-commercial-goods-and-service	Work to remove non commercial uses from commercial corridors. On penn avenue in bryn mawr, century link has a large building used solely for housing servers. It employs no one. It serves no customers directly. It merely takes up what could be valuable commercial or residential space in a neighborhood starved of commercial space. Encouraging uses like this server farm to be in industrial areas would open other areas to be used by actual people.	7/22/2018
7171	95	/policies/heritage-preservation-financial-incentive	How about asking some of the owners and/or residents in "historic properties in low-income communities" what type of help they would appreciate? Of course developers will have a litany of financial benefits that they would like to increase profitability. However people who live in these historical assets are not in it for profit; truly there are better ways to make money.	7/22/2018
7172	43	/policies/housing-displacement/	I support this policy. Not sure how you are going to accomplish this when you up zone the whole city and give way to much leverage to developers.	7/22/2018
7173	26	/policies/vision-zero/	Traffic fatalities are almost exclusively the result of a car hitting a person or another car. The safest thing to do is enact policy that reduces how much driving occurs in Minneapolis. Please enact policies that encourage walking, bicycling, and transit, and please discourage private car use and ownership through parking policy, street design, and wheelage taxes.	7/22/2018
7174	0.1	/topics/land-use-built-form/	I am not a fan of the plan around 50th and Xerxes. The size of the areas that can be redeveloped as multistory high density will remove the character of these neighborhoods. Can the higher density neighborhood areas be focused to main intersections versus along the entire expanse of a high traffic route (ie 50th St).	7/22/2018
7175	4	/policies/access-to-commercial-goods-and-service	This is a great goal but I'm worried it doesn't have teeth! We have a compete streets policy now, but it's only very minimally and often only performatively reflected in real life. I need to know the city is serious about this - it has to go further than adding bike/ped infrastructure and picking a few special extra places for commercial. We need to get very serious, quickly, about limiting private cars' access to large parts of the city. We need to have a serious conversation about the role of and future of freeways and highways within our city limits. We need Interior 2 to be the base level, not Interior 1, and we need ground floor commercial to be allowed by right throughout the entire city	7/22/2018
7176	1	/policies/access-to-housing/	I support this inclusive plan to increase affordable housing in our city. Thank you, Hilary Hall (Linden Hills)	7/22/2018
7177	21	/policies/freight/	I agree with action step B: no expansion of freight rail in Minneapolis. Goods should be moved on existing rails or transferred to smaller-scale vehicles outside the city.	7/22/2018
7178	1	/policies/access-to-housing/	On in favor of muti-family housing along transit routes. I live near "eat street", Nicollet between Franklin & lake. I feel the street would benefit from higher buildings with more housing.	7/22/2018
7179	41	/policies/tenant-protections/	Regarding Policy 41.f - City should in cooperation with owners and residents co-create an effective tenant bill of rights to insure fair treatment. The city also needs to right size its staff to insure timely response and complete follow through occurs for violations. Current staffing levels can not meet the demands to maintain the housing stock.	7/22/2018
7180	6	/policies/pedestrian-oriented-building-and-site-de	I support this policy for a more walkable/public transit linked city. Thank you. Hilary Hall (Linden Hills)	7/22/2018
7181	44	/policies/comprehensive-investments/	Laudable policy. But how will you implement when the partners with whom the city is most likely to work is motivated to make money? Work with the communities you propose to help. Don't assume. Bring them into the conversation and have them help to create the solution. You do not know all. In fact, you don't know what you don't know. So listen.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7182	17	/policies/complete-streets/	<p>Street Parking is not an appropriate land use for the most populated City in the State.</p> <p>Eliminate Street parking in commercial districts and on major thoroughfares to provide the opportunity to turn those neighborhoods into "sticky places", as well as the opportunity to narrow those streets to reduce salt use, reduce lane miles that plows need to traverse, and open up ROW for street trees and green space.</p>	7/22/2018
7183	97	/policies/heritage-preservation-legislative-advoca	<p>The current relationship is not one of partnership. The City wants to expand their regulatory authority and control, rather than provide leadership and inspiration, with respect the owners of historical assets in Minneapolis. The solution is to have the property owners advocating for policies, programs, and legislation that promote and support heritage preservation efforts on their parts. Simply ask first, rather than presume that the "experts" (who have no skin in the game) know best.</p>	7/22/2018
7184	1	/policies/access-to-housing/	<p>I think that allowing more multi-unit dwellings in neighborhoods that are currently zoned for single family units only is necessary to move away from discriminatory housing policies, increase access to desirable parts of our city, and create neighborhoods that are more walkable and transit friendly. I would love to see more 3 or 4 unit dwellings in my own neighborhood (Whittier) as well!</p>	7/22/2018
7185	45	/policies/leverage-housing-programs-to-benefit-c	<p>Good policy. I hope you can make it work. Engage the local community members and LISTEN to them.</p>	7/22/2018
7186	35	/policies/innovative-housing-types/	<p>Innovation and flexibility in housing types in all neighborhoods is important.</p>	7/22/2018
7187	81	/policies/social-connectedness/	<p>Connected folk are healthier, they care for their neighbors, they respect their surroundings and maintain them. This is VITAL to a healthy community and allows opportunities for achieving goals. It is hard work: enabling folk to 'love their neighbor as themselves' because many folk to not love themselves. Suggest the houses of worship could be major resource here.</p>	7/22/2018
7188	18	/policies/walking/	<p>Some public education and awareness around pedestrians would be great. I find that local drivers are eager to go through crosswalks when pedestrians are in them. One place this is a repeated issue (in my life) is the crosswalk on 46th that crosses the onramp to the 35W. This is a high pedestrian zone because of the bus depot in the middle of 35W, but cars are so eager to get on (or off) the 35, that they zoom through the intersection, even when passengers have the right of way. So, it would be useful to put in extra traffic calming measures near major bus stops, and an overall PSA campaign to remind drivers about the laws surrounding pedestrians would be nice. (Bicyclists need this, too; they almost never yield either to cars or pedestrians.)</p>	7/22/2018
7189	0.1	/topics/land-use-built-form/	<p>The East Isles area was platted to preserve trees and environmental elements including lakes and thus the topography resulted in the development of a mixed non-conventional and conventional street grid. The lots are a combination of single family homes and multi-family to accommodate a range of living styles but more density would not be beneficial to the area. Therefore, the topography, existing lot shapes, proximity to the water table, and elevation of the neighborhood would not lend itself well to 3-6 story multi-family buildings that are being proposed in this already densely populated neighborhood.</p> <p>To rezone some of the lots to accommodate up to 6 story multi-family developments as are being proposed in this rezoning plan would further destroy the character and increase the environmental impact of this neighborhood. With the housing development that has happened over the past 10 years along the Greenway and the Lakes, the population of the area has increased. In addition, neighborhood living will become more contentious with in-fighting and attorney's fees from those in favor and those against the building of up to 6 story multi-family buildings on properties.</p> <p>During the interim before anyone could exercise their rights to upgrade the structure on these up-zoned lots, we may be assured that the tax assessors will be coming through the neighborhood and arguing that what today are single family homes tomorrow should have land values reflecting a 3-6 story multi-family housing development. This will increase taxes for existing property owners which will decrease the ability of an owner to sell their home at a value which reflects single family housing that exists today as well as force home ownership to be more costly. Why would someone want to buy a house that faces the above neighborhood in-fighting much less pay the taxes on perceived higher valued land?!</p> <p>Consequently, this proposed up-zoning map needs much more work to recognize the opinions of existing homeowners and what they would like to see for greater density in their area. This is another example of the city council not recognizing their constituents nor directly soliciting constitutes viewpoints before proposing such radical permanent changes to the city in its entirety.</p>	7/22/2018
7190	1	/policies/access-to-housing/	<p>We need to allow fourplexes everywhere or we will continue to see only large luxury buildings be built. Small scale multi family buildings are especially needed where demand is high, such as near the lakes in SW Minneapolis (wards 7, 10, and 13).</p>	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7191	24	/policies/shared-mobility/	I hope Minneapolis can be permissive and welcoming of new forms of shared vehicle programs.	7/22/2018
7192	1	/policies/access-to-housing/	I support having more neighbors! I am eager to have Minneapolis's population grow back to its size years ago. I am concerned that the most segregated, wealthiest, whitest areas of the city are the areas where housing is least encouraged to grow under these policies. Harriet, Linden Hills, Kingfield, and Tangletown are desirable neighborhoods where many people want to live. I wish the draft policy did a better job of opening up those neighborhoods for growth, as many of us would like to live there.	7/22/2018
7193	15	/policies/transportation-and-equity/	Accessibility: In the past several years, street resurfacing projects did not include curb ramp upgrades as required by law. The City should go back to these neighborhoods and complete the projects. As a city policy, check all the resurfacing projects to ensure that curb ramps and other accessibility requirements are met. Include this commitment in the comprehensive plan. Also describe how the city will provide for alternative routes for biking and walking during construction. Several projects in downtown Minneapolis have been major hazards for people walking: they do not appear to meet pedestrian access temporary work zone requirements. Include Environmental Justice in the comp plan as it relates to transportation. Check the FHWA for guidance. Include goals to reduce greenhouse gases and how the city will increase biking, walking and transit use to fulfill the greenhouse reduction goals.	7/22/2018
7194	38	/policies/affordable-housing-near-transit-and-job	Housing near bus lines is good. Our bus lines are usually on busy streets, and cars pollute a lot. Therefore, the plan also calls for a lot of housing near pollution. I don't know how to thread that needle. I do hope that the city takes that conundrum into consideration. Maybe that means more transit on streets that aren't as car-busy, like on grand and Bryant in south Minneapolis. Maybe it means bus only lanes to reduce car traffic. You are smart folks and I hope you can figure that out.	7/22/2018
7195	82	/policies/aging/	Love C. Wisdom is in us older folks and we are dying to share it. At 84 I know what it is like to be treated as incompetent and irrelevant. Don't lose our value.	7/22/2018
7196	10	/policies/street-grid/	Railroads in Northeast Minneapolis especially create barriers for people biking and walking. It forces longer routes for bikes to avoid riding on high traffic routes such as Central avenue and Broadway Ave among others. Bike/ped only bridges over railroads would help increase connectivity and reduce the need for longer routes by these modes. 4 Lane high traffic routes in Northeast should also be accommodating of bikes And more pleasant for walking or rolling along those routes to restore connectivity.	7/22/2018
7197	47	/policies/housing-maintenance/	Excellent policy. You could create a low interest revolving loan program for each community. This could be done through the city, or better yet through neighborhood organizations so it is even more local. We must maintain the current housing stock so that there are affordable homes for people to get started in home ownership.	7/22/2018
7198	6	/policies/pedestrian-oriented-building-and-site-de	I love this but just don't trust that the city is serious about it. What legislative teeth does this have? Right now, for example, there is a huge concrete semaphore pylon blocking the 3rd Ave protected bike lane next to the Convention Center. It's been there for more than a week!! There are still construction projects all over that block sidewalks and bike lanes without providing an alternative for pedestrians or bike riders, while simultaneously providing alternatives for cars at the EXPENSE of pedestrians and bike riders. This is literally the diametric opposite of the mandate of the current complete streets policy. How can I trust that this policy has any teeth at all?	7/22/2018
7199	0.1	/topics/land-use-built-form/	My wife and I currently rent, and live on a busy arterial road. We love it. However, if or when we want to start raising a family, we would like to move off the busy intersection we live at, and to a more interior part of the neighborhood. However, we don't want to own a home, but would rather continue to rent. We support the Minneapolis 2040 Plan zoning and land-use changes that would allow a greater variety of housing to be built in Minneapolis, including fourplexes. This will give families, like my own, more options as we continue to evaluate what type of housing is best for us.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7200	19	/policies/bicycling/	<p>Please also consider how bicyclists can endanger drivers and pedestrians in some of their current habits -- mostly along narrow streets for which the designated bike path is sometimes ignored by bicyclists in favor of the street itself (e.g., Minnehaha Parkway, West River Parkway).</p> <p>Please also consider how to build more equity into bicycling and how to encourage it as a means of commuting, not just as a recreational or exercise regimen. In my experience as a minimal driver, transit rider, and pedestrians, bicyclists are often very aggressive and unwilling to share space or slow down -- but mostly these are not commuting bicyclists. Can you help them chill out a little?</p>	7/22/2018
7201	48	/policies/data-driven-decisions/	"Incorporate community engagement in housing research and data analysis". This should be priority number 1!. You much engage community members as you work with the data. Do not ever underestimate the human, qualitative data that is often overlooked. I don't want a city that is run by numbers crunchers. I want there to be heart and soul in decision making.	7/22/2018
7202	26	/policies/vision-zero/	I support vision zero for the whole metro area. Use proven techniques from other cities, like a raised crosswalk. It provides better visibility for pedestrians and slows cars that may have the tendency to speed.	7/22/2018
7203	33	/policies/affordable-housing-production/	<p>Without plentiful market-rate housing, affordable housing will be elusive or impossible.</p> <p>I support policies that will create plentiful of market housing, and I support policy that will permit or encourage the government to regulate housing and new housing stock to ensure that nobody is displaced or gentrified out of Minneapolis.</p>	7/22/2018
7204	0.1	/topics/land-use-built-form/	I am strongly in support of the proposal to allow up to four housing units to be built in all parts of the city. It is an excellent way to allow small-scale developers to help ease the pressures of the housing crisis by making it legally allowable to have multiple units on a site. The 2-4 unit buildings in my neighborhood (Corcoran) fit in well and are important for helping allow more people to live in our neighborhood, and it shouldn't be illegal to build those in any neighborhood of the city.	7/22/2018
7205	17	/policies/complete-streets/	any street that has car parking allowed must have a city-funded bicycle corral mid block, on both sides if warranted.	7/22/2018
7206	96	/policies/heritage-preservation-recognition/	This especially applies to any and all commercial districts.	7/22/2018
7207	49	/policies/educational-and-economic-access/	Use preservation as a tool to actually preserve, and not as a strategy to slow or halt development.	7/22/2018
7208	53	/policies/quality-of-life/	All good. As for "Recruit and retain a diverse City workforce that reflects the demographics of the city", you need to realize that age is part of diversity, people's backgrounds in business, education, social work, environmentalists... are part of diversity. It is not just how people look, it is how people think and there needs to be room for all voices at the table.	7/22/2018
7209	20	/policies/transit/	Continue providing free/low cost experiences AND provide transportation to these events. If the casinos can afford buses to collect our urban citizens surely we can afford a bus to bring folk to Lake Harriet bandshell, for example, or to a concert or a play.	7/22/2018
7210	17	/policies/complete-streets/	I live in Kenny neighborhood and work at the U and I am an almost 100% transit user for my work commute. (Occasionally, I need to drive if I have to work late or leave early.) I really love MetroTransit and think that a pubic monument should be built to (most of) our city's amazing bus drivers. I like that you are going to build up the infrastructure around bus stops. Shoveling and plowing around these could be better, too. I would also recommend that the express buses to the U didn't restrict so much during the summertime -- there are thousands of employees who still need to go to campus! My driving habits skyrocket in the summer -- precisely when construction makes traffic bad for everyone. Get me off the road, and back into the bus!	7/22/2018
7211	43	/policies/housing-displacement/	I am concerned by the "context based approach" phrasing. If the City's goal is to reduce Emissions and Greenhouse Gasses, Complete Streets should be a blanket policy, because the emissions per person per mile greatly increase as you move down the complete streets pyramid.	7/22/2018
7212	16	/policies/environmental-impacts-of-transportation/	Regarding 43.b - I support the implementation of policies and programs to support the preservation and particularly the rehabilitation of naturally occurring affordable housing. This should include Innovative strategies that co-solve multiple policy goals including energy efficiency, health and resilience.	7/22/2018
			Involvement of resident representation and participation should be a tenet of the policy development.	
			I support the tactics outlined here that will help reduce the hidden subsidies and incentives to drive a single-occupancy car and increase incentives and access for other more sustainable modes of transportation. It is an incredibly important part of our climate action plan.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7213	63	/policies/food-access/	Add density bonuses, use tax incentives to encourage new residential buildings to include grocery stores, even if they are no bigger than a bodega/corner store. New neighbors need to eat too.	7/22/2018
7214	1	/policies/access-to-housing/	Need to keep greenspace and nature amidst the city communities as density increases. In the highest density areas of downtown need planning to insure safety maximized and traffic and parking jams and burdens minimized to keep the areas desirable and livable as density is increased. Single home neighborhoods need to accomodate increased density as needs increase in ways that help to keep neighborhoods vital. 4 plexes may house people that help to care in future for single family dwellers and vice versa	7/22/2018
7215	7	/policies/public-realm/	I love seeing public art mentioned here! Please find partner with local artists and art experts (gallerists, historians, curators) to facilitate these improvements. No need to farm this out.	7/22/2018
7216	37	/policies/mixed-income-housing/	Virtually all disparities the 2040 Plan mentions are far more complex than first changing the physical footprint of established neighborhoods. Obviously the only ones guaranteed to gain from this plan are developers, contractors and future landlords. Most of the 2040 plan relies on financial sources outside of the city to find the basic startups let alone achieving full implementation of the particular goals and policies. The only absolute part of the plan sure to be financially guaranteed from the beginning would be the replacement of single family homes by fourplexes and apartment buildings, due to the fact that developers and contractors stand to make incredible profits when existing restrictions on development are lifted. one only has to remember how fast developers began and completed the the purchase, tear-down and the replacement of smaller homes with large expensive, single family homes. The profits to be realized in being able to replace single family homes with fourplexes and apartment buildings will accelerate the destruction of existing neighborhoods at an unprecedented level. The implication that racial discrimination plays a role in the opposition to the 2040 plan is insulting. Being opposed to a plan that would drastically change the actual physical characteristics of neighborhood is not an indication of racism. The neighborhoods affected are virtually all made up of liberal and progressive citizens as voting records and social actions efforts would indicate. Those objecting to the plan are not objecting to racial diversity in their neighborhood, they are objecting to the extreme structural changes to their neighborhoods, that would have a very significantly negative effect on their homes and lifestyles. It seems very ironic that the vast majority opposed to this recently voted to put some of the city officials in office who are now backing this plan.	7/22/2018
7217	18	/policies/walking/	Snow and ice removal is treating as a descretionary action. Maintaining sidewalks, street crossings, curb ramps is required under the ADA and Minneapolis has not shown a commitment to fulfilling this responsibility. lack of maintenance is a huge safety issue and also a livability issue of major propotation. People who do not drive a car, have disabilities or use transit and walking as their main means of travel are often forced to stay at home or limit their activities because the city continues to rely almost exclusively residentail snow and ice removal. It is not working and has not worked for decades. The ADA is now 26 years old. Minneapolis would do well to start implementing this law as originally intened and has been reaffirmed over the years. The sidewalk maintenance plan in draft form is insufficient. This plan still makes it seem like snow and ice removal is a favor the city does to be a world-class city. This is a major factor in disparities as well.	7/22/2018
7218	1	/policies/access-to-housing/	I really appreciate the thoughtfulness put into improving housing and transportation in the city. I agree that housing is increasingly unaffordable, and much of that stems from the fact that the city demographics are changing more rapidly than the housing stock needed to provide them. I'm glad to see the city is being mindful of the historical policies that have lead to our unfortunate current situation and are taking steps to rectify those ills in the present. I think this plan is a step in the right direction. The only worry I have is that it may not be enough to truly solve the problems we are facing.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7219	0.2	/small-area-plans/	<p>This does not fit well with the South Lyndale Small Area plan. With a few exceptions Corridor 6 is generally a bad fit for the northern part of the South Lyndale area. With the potential exception of the Boulevard Theater and Lehman's Garage blocks, where Corridor 6 may kind of make sense, Corridor 4 would be better down to MN 121. Corridor 6 or higher may also make sense south of the start of MN 121, particularly if 121 is reconfigured. Reopen Lyndale!</p> <p>The "transition" from Corridor 6 to Interior 3 to Interior 1 is not a template for a transition as much as it is a cliff. We need Corridor 3 to be mirrored on both sides of any street where it exists. Preferably, it should be pushed more than one half-block in from the transit corridor. Leaving as it is places the impact on a narrow-strip of single-family homes that are not on the edge of a neighborhood, but are *part of* the neighborhood (as indicated in the small area plan). Extending Interior 3 farther in will increase the number of options for development, while reducing the likelihood of artificially intense development on one side of Garfield or Aldrich while the other side remains Interior 1. And why shouldn't Bryant and Harriet be Interior 3 as well? Expanding it this way would be a more palatable and acceptable solution, and would fit better with the small area plan.</p> <p>Finally, while in a number of ways I support it, the small area plan is functionally out of date. There has been a lot of turnover in the neighborhood since it was created and it should be revisited with the current area residents and businesses.</p>	7/22/2018
7220	18	/policies/walking/	I would like to see a stronger plan in place to make walking more accessible in the city, particularly in the winter. I'd especially like to see a plan for making downtown much more walkable and less car-centered as a key method for making downtown more lively.	7/22/2018
7221	10	/policies/street-grid/	For the love of all things holy, why does Linden Hills and Fulton get to terminate streets to block the grid?	7/22/2018
7222	1	/policies/access-to-housing/	A lot of real estate is being built but it is not affordable to young people starting their 1st job (unless they overcrowd), persons in low wage jobs or elderly! Everything is being built for those who have tech wages or parental support.	7/22/2018
7223	49	/policies/educational-and-economic-access/	Yes I support this! We want a viable, inclusive city where all can make a living. Education is key, alternatives to the "collage track" is needed.	7/22/2018
7224	53	/policies/quality-of-life/	You plan threatens the quality of life in Minneapolis. How many awards have we gotten for our park system. And yet, to up zone at the scale you propose, our parks will not be able to keep up with demand. Our lakes, you are approving high rises that will increase density to the point that traffic will threaten our air quality and the ability to get around easily, and people's access to natural light and air. I wholeheartedly support protecting our quality of life, which is why this is such a terrible plan. Scale it WAY back in height and scope. Plan wisely, for all residents, not just for the city council members to realize their personal vision of the city.	7/22/2018
7225	43	/policies/housing-displacement/	Regarding 43.d - I support this policy. This policy must include a development of effective engagement for resident participation.	7/22/2018
7226	35	/policies/innovative-housing-types/	Regarding 43.e - Appropriate mix of affordability is important for redevelopment. However, the concentration of low-income housing should be avoided and distributed through-out the city, not only in redevelopment of nodes.	7/22/2018
7227	0.1	/topics/land-use-built-form/	Policy 35: a, b: No real action here articulated or even inferred.	7/22/2018
7228	25	/policies/innovations-in-transportation-and-infras	I want to see more neighborhoods using the interior 2 and 3 designation, particularly in South Minneapolis (expanding south from lake, at least through 38-46th?). I'm a renter in the area and would love to settle down in South Minneapolis but see it becoming quickly and increasingly out of reach for me and my family. We don't all need a huge house on a huge lot, and there's room in those neighborhoods for more people. I'm also concerned with some maps I've seen that compare historic redlining in Minneapolis with current areas that are being recommended for lower district zoning. We should make Minneapolis more affordable and available for more people, and fix the errors of our past instead of continuing to entrench them.	7/22/2018
7229	5	/policies/visual-quality-of-new-development/	This technology is very difficult to predict let alone "get ahead" of future innovations.	7/22/2018
7230	19	/policies/bicycling/	Attention to building and surrounding space safety in design and planing . Adequate parking and or transportation to accomodate impact. Green space and nature aesthetic as part of design requirements	7/22/2018
7231	84	/policies/public-safety/	Moving forward, make sure all new Protected Bike Lanes are Curb-Protected, and not Sidewalk level.	7/22/2018
7232	37	/policies/mixed-income-housing/	It is not safe until the training and values of the police are changed to VALUE LIFE above all! The City's goal should be zero (0) fatalities. How cool would that be?!!!!	7/22/2018
			Policy 37: a, c: Prioritize amenity-rich areas with access to parks in promoting mixed income development, where mixed-income models are desired, expected	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7233	36	/policies/innovative-housing-strategies/	Policy 36: a, b: YES preserve affordable housing!!! Explore, expand and maximize resources, partnerships and tools in cluing the Park Dedication Ordinance Fees.	7/22/2018
7234	43	/policies/housing-displacement/	I support this policy.	7/22/2018
7235	33	/policies/affordable-housing-production/	Stop approving mass expensive highrise apartments that cos \$1,000+ for just 1 bedroom.	7/22/2018
7236	0.1	/topics/land-use-built-form/	504 29TH AVE SE â€” rezone to match 501 30TH AVE SE so the grain silos can be converted to residential. If this is a problem, have the owners level em. You did this before when the Milwaukee Road left downtown. Either clean up or get out since because by 2040, this will be the eyesore.	7/22/2018
7237	63	/policies/food-access/	We need to build more housing near grocery stores and encourage more grocery stores to be built. Minneapolis has a high percentage of residents who live within walking distance of a park, and we should strive towards having a similar percentage live close to a grocery store. Expand the area where we allow grocery stores and encourage them to be built.	7/22/2018
7238	44	/policies/comprehensive-investments/	Regarding 44.a - I strongly support this policy, and other policy the remove barriers to home ownership and wealth building. The city should also pursue policy that reverse past systemic discriminator policies both local and national.	7/22/2018
7239	26	/policies/vision-zero/	If the number of bikes and pedestrian traffic would increase there is bound to be an increase in the number of injuries and fatalities. Bicycles and pedestrians don't have the physical protection that motorists, motor vehicles passengers, delivery trucks and semis, and transit vehicles have it is work noting that at the present time there seems to be literally no enforcement or interest in the part of the of bicycle violations.	7/22/2018
7240	19	/policies/bicycling/	I feel this policy will allow cyclists to have opportunities to bike and safer and informed.	7/22/2018
7241	37	/policies/mixed-income-housing/	The city should take up an inclusionary zoning policy to require new housing of over 10 units to set aside some for low-income residents.	7/22/2018
7242	0.1	/topics/land-use-built-form/	100 1ST ST S â€” get rid of the US Post office and level that hideous parking garage so we can see the river. Isnâ€™t there a post office on 9th street downtown or is that one gone too?	7/22/2018
7243	34	/policies/affordable-housing-preservation/	<p>1.Protect all public housing and build more: Create a permanent-public policy, county, city- wide ordinances, and state bills to protect all public housing units as public housing in Minneapolis and build more public housing.Â This includes 42 high rises, over 740 homes, Glendale Townhomes, more public housing homes, and over 6,040 current public housing units. Prohibit the sale or lease of land to private developers/investors, or MPHA becoming a private investor, charging market prices for profit through Low-Income Housing Tax Credits, or Land Use Restrictive Agreements, etc.Â Adhere to the permanent protection land trust Declaration of Trust(DOT).</p> <p>2.Stop the sale and lease of public housing buildings: Public housing properties are currently the first target of conversion by MPHA to private developers, and investors. This includes Glendale Townhomes, Cedar Riverside Public Housing, Elliot Twins, Horn Towers, Friendly Manor, Spring Manor,Â and Rainbow Terrace to name a few. This also includes public housing buildings in Wards that predominantly house East African Somali and Oromo elders that are the first target, and all public housing properties.</p> <p>3.Stop all methods of privatization by MPHA including Section 8 private ownership conversion that will allow 99.99% of the buildings be turned over to private developers. This would displace residents, who will not be relocated after any/all redevelopment to the properties.</p> <p>4.Hold MPHA accountable to fix & repair Glendale Townhomes and Other Properties: MPHA must eliminate its â€œzero budgetâ€ policy for Glendale repairs and maintenance and other properties. This is the only option to preserve Glendale and other properties as they exist now (truly public housing), and to not convert them to any private development, which would permanently displace current residents.</p> <p>5.City oversight of Minneapolis Public Housing Authority (MPHA*): The Comprehensive Plan must re-assert the Cityâ€™s statutory ability to provide public oversight and control of MPHA, and *prevent MPHA from acting as a rogue agency bent on the privatization of public housing and spinning itself off into an unaccountable nonprofit that acts in the interests of private investment funding instead of the public good.</p>	7/22/2018
7244	0.2	/small-area-plans/	I think this 2040 plan is illogical. I do not like it. I am born and raised in Minneapolis. I care about our city.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7245	43	/policies/housing-displacement/	In order to fight displacement, the city needs to build more housing. I am sick of older housing stock being renovated and rents raised. We need new housing stock for higher-income residents in order to preserve naturally occurring affordable housing for everyone else.	7/22/2018
7246	0.1	/topics/land-use-built-form/	How are you defining "traditional size" lots? Older neighborhoods have smaller lots than the housing built later. Yet, the map shows the denser housing (Interior 2) to include not just the 4-unit housing (presumably squished onto a smaller lot than the newer lots, built in the 1950s) but also larger multi-family buildings on combined lots (of undefined size). This is not an option in Interior 1, the less dense, later built neighborhoods. The result will be added density to the older and already high-density neighborhoods. Thi perpetuates the current status quo. It also seems to suggest that older houses (many which are duplexes and triplexes) are not worth saving and should be replaced by new larger multi-family units. New construction is not green. Why not help restore the properties in these older, dense neighborhoods to preserve the naturally occurring affordable housing that has existed in Minneapolis for over 100 years. Why does this plan favor the relatively-newer built housing and neighborhoods?	7/22/2018
7247	0.2	/small-area-plans/	<p>This does not fit well with the South Lyndale Small Area plan. With a few exceptions Corridor 6 is generally a bad fit for the northern part of the South Lyndale area. With the potential exception of the Boulevard Theater and Lehman's Garage blocks, where Corridor 6 may kind of make sense, Corridor 4 would be better down to MN 121. Corridor 6 or higher may also make sense south of the start of MN 121, particularly if 121 is reconfigured. Reopen Lyndale!</p> <p>The "transition" from Corridor 6 to Interior 3 to Interior 1 is not a template for a transition as much as it is a cliff. We need Corridor 3 to be mirrored on both sides of any street where it exists. Preferably, it should be pushed more than one half-block in from the transit corridor. Leaving as it is places the impact on a narrow-strip of single-family homes that are not on the edge of a neighborhood, but are *part of* the neighborhood (as indicated in the small area plan). Extending Interior 3 farther in will increase the number of options for development, while reducing the likelihood of artificially intense development on one side of Garfield or Aldrich while the other side remains Interior 1. And why shouldn't Bryant and Harriet be Interior 3 as well? Expanding it this way would be a more palatable and acceptable solution, and would fit better with the small area plan.</p> <p>Finally, while in a number of ways I support it, the small area plan is functionally out of date. There has been a lot of turnover in the neighborhood since it was created and it should be revisited with the current area residents and businesses.</p>	7/22/2018
7248	40	/policies/homelessness/	You took away opportunities for persons who are homeless to be self sufficient by denying them opportunity to do recycling or odd jobs.	7/22/2018
7249	49	/policies/educational-and-economic-access/	Some of the best schools in Minneapolis are located in southwest Minneapolis, but most residents cannot afford to live there due to lack of available housing. Let's put more dense housing closer to assets like high-quality schools.	7/22/2018
7250	0.1	/topics/land-use-built-form/	I think this is a terrific plan. It offers a simple, clear, and balanced way to increase housing availability in our city. I support the plan!	7/22/2018
7251	43	/policies/housing-displacement/	Policy 43: e: Pair affordable housing with market rate to Park Dedication Ordinance Fees.	7/22/2018
7252	43	/policies/housing-displacement/	<p>1.Stop privatization schemes such as (so-called) "public-private partnerships" for public housing--including HUD's Rental Assistance Demonstration (RAD) program, Section 18 Demolition/Disposition, "Voluntary Conversion," removal of public ownership requirements established by Declarations of Trust on public housing properties, etc.</p> <p>2.Eliminate future displacement: Build more public housing that charges 30% of income for rent for low-income tenants, and stop the privatization of public housing to minimize displacement, homelessness, the housing crisis, social & economic crisis. And, approve Glendale Townhomes application for local historical designation at Minneapolis City Council.</p> <p>3.Income-based definitions of housing affordability, instead of AMI ("area median income") based definitions: The Comprehensive Plan should establish that housing officially deemed "affordable" must guarantee rents are set according families' actual ability to pay, at 30% of their income instead of using AMI, which is inflated statistical averages that include rich, mostly White suburbs, and currently allows developers to continually set higher and higher rents while still being considered "affordable housing."</p>	7/22/2018
7253	44	/policies/comprehensive-investments/	Policy 44: e: Pair affordable housing with market rate to Park Dedication Ordinance Fees.	7/22/2018
7254	35	/policies/innovative-housing-types/	Love it.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7255	56	/policies/supporting-small-businesses/	Small businesses cannot make use of the massive storefronts that come with new development. They are far too expensive. Encourage the creation of smaller storefronts, especially in walkable commercial corridors and those in high-density areas.	7/22/2018
7256	34	/policies/affordable-housing-preservation/	YES!	7/22/2018
7257	33	/policies/affordable-housing-production/	Fund public housing as a public good: Access public funds from the State, County, and City to keep public housing public. Funding for public housing (through the City Levy, County Funds, Affordable Housing fund, etc.) must be added to the City of Minneapolis, County, and State legislative agenda. Public funding to private developers that build temporarily limited-income-based housing for low-income families must be eliminated. Instead, that funding should be used to build more public housing, as well as funding & sustaining public housing, which provides a long-term safety net, and provides social and economic stability to low-income residents of Minneapolis.	7/22/2018
7258	34	/policies/affordable-housing-preservation/	The city has done very little to preserve affordable housing to date. There has been a minimal effort to obtain and develop programs to facilitate lower income potential buyers to be able to purchase homes. For example, allowing for the destruction of modest single family homes to allow for the construction of large extremely expensive homes; and encouraging the construction of expensive apartment buildings over affordable apartment buildings. Developers are only going to build when they are assured of making a profit. Unless the city can produce a means of funding the needed subsidies new construction will prove to be affordable for low income renters and buyers.	7/22/2018
7259	45	/policies/leverage-housing-programs-to-benefit-c	Policy 45: a, c: Maximize Park Dedication Ordinance Fees in racially concentrated areas of poverty.	7/22/2018
7260	33	/policies/affordable-housing-production/	I strongly support policies to create and to preserve more affordable housing.	7/22/2018
7261	17	/policies/complete-streets/	I agree that walking, cycling, and transit need to be prioritized over cars--especially considering the projected growth of Minneapolis. As someone who uses all of these modes of transportation, I think that our reliance on cars makes our city less safe, more polluted, and too dependent on fossil fuels.	7/22/2018
7262	33	/policies/affordable-housing-production/	Yes! Especially in SW.	7/22/2018
7263	35	/policies/innovative-housing-types/	Funding ?	7/22/2018
7264	89	/policies/technology-in-the-city-enterprise/	Give residents access to real tools that the city already pays for (such as IBM's Smarter Cities toolset). Improve and expand the fairly mediocre and not-very-useful open data portal.	7/22/2018
7265	36	/policies/innovative-housing-strategies/	Funding?	7/22/2018
7266	15	/policies/transportation-and-equity/	I strongly support providing equitable and ample access to walking, bicycling, and transit options.	7/22/2018
7267	37	/policies/mixed-income-housing/	Funding?	7/22/2018
7268	46	/policies/healthy-housing/	Policy 46: c, e: improve air quality and park access.	7/22/2018
7269	94	/policies/heritage-preservation-regulation/	Historic preservation is fine, but it should not be used as a tool to prevent new housing from being built, as it has been in the past.	7/22/2018
7270	6	/policies/pedestrian-oriented-building-and-site-de	I love this policy. My favorite times in Minneapolis have been when I've felt truly safe and considered as a pedestrian or cyclist. I just got back from Open Streets Lake Street/Minnehaha, and it was one of the most exciting times I've had recently, feeling the huge breadth of Lake Street being completely open for use without cars setting the speed and tone of the road. I would love more areas in the city set up like Milwaukee Avenue, where houses could share a pedestrian path and landscaping. The first point in the policy above about street-oriented pedestrian access to buildings is promising, but I'd encourage them also to be linked with mandatory bike parking. Bike parking has definitely improved in the last few years, but the more places there are to safely lock your bike, the easier it is to plan a car-free trip.	7/22/2018
7271	35	/policies/innovative-housing-types/	Let's try to find adaptive reuse of our unused grain elevators. They are monuments to the city and our history and we should find ways to convert them to housing rather than tear them down. We already have an example here - 3141 Dean Court.	7/22/2018
7272	11	/policies/skyways/	Great!	7/22/2018
7273	26	/policies/vision-zero/	Minneapolis needs to work with Hennepin County to address the many dangerous intersections within our city. Most occur at intersections involving county roads. Safety should be at the top of our metrics for judging streets, not throughput.	7/22/2018
7274	20	/policies/transit/	Yes to priority transit lanes! Especially along corridors like Hennepin and Lyndale in Uptown where neighborhoods are becoming denser and transit needs to meet this density and encourage more rider usage.	7/22/2018
7275	53	/policies/quality-of-life/	Density and congestion almost always result in an increase in crime and other safety concerns. The city has shown very little initiative thus far in dealing with the crime and safety concerns that exist under present conditions.	7/22/2018
7276	0.1	/topics/land-use-built-form/	Route 9 is not frequent or reliable enough to support the densities illustrated here without expecting car ownership (and parking). Specifically referring to 42nd Avenue South of Lake Street.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7277	24	/policies/shared-mobility/	I'm glad city is trying to be mindful of changes in vehicle ownership and is making moves to make single-occupant driving less attractive via parking incentives for shared mobility vehicles. However, I feel that to really encourage other modes of transportation, which I think the goal of a modern transportation policy should be doing, it has to come at the cost of making driving less attractive. I think this can be done via narrower lanes and other traffic calming devices that frankly just make driving a less convenient tool for everything. I understand this is not a necessarily popular perspective (it's easier to attract with honey than vinegar), but I think it makes the city more able to accomplish the broader goals in this plan. That's because what we're ultimately short on is space, and unfortunately in the past 50+ years of development we've sacrificed a lot of space to cars, which has largely left us with a city designed for cars and not people.	7/22/2018
7278	24	/policies/shared-mobility/	I'm glad city is trying to be mindful of changes in vehicle ownership and is making moves to make single-occupant driving less attractive via parking incentives for shared mobility vehicles. However, I feel that to really encourage other modes of transportation, which I think the goal of a modern transportation policy should be doing, it has to come at the cost of making driving less attractive. I think this can be done via narrower lanes and other traffic calming devices that frankly just make driving a less convenient tool for everything. I understand this is not a necessarily popular perspective (it's easier to attract with honey than vinegar), but I think it makes the city more able to accomplish the broader goals in this plan. That's because what we're ultimately short on is space, and unfortunately in the past 50+ years of development we've sacrificed a lot of space to cars, which has largely left us with a city designed for cars and not people.	7/22/2018
7279	42	/policies/expand-homeownership/	Protect our NOAH by enforcing sensible restraints on developers and speculators to disincentivize teardowns and conversions to rental housing. If there are no starter homes to buy people will be locked into rental housing and lose a major source of economic security.	7/22/2018
7280	1	/policies/access-to-housing/	Protect existing industrial living overlay zoning for what it was intended - to support, sustain and grow the arts production and small businesses, especially within the Northeast Minneapolis Arts District, by allowing live/work space. This is a unique combination of housing and commercial space that can't exist in typical residential areas. Therefore, the former industrial areas that can contain such space, should be preserved for this unique use.	7/22/2018
7281	41	/policies/tenant-protections/	Rental housing should be available, affordable, and stable. Minneapolis should consider what it can do to stabilize rents, both within the city as a whole and within individual leasing agreements.	7/22/2018
7282	59	/policies/downtown/	To date, the city seems to be cutting back on law enforcement activity. The city also seems to lack a concern for traffic issues and affordable parking.	7/22/2018
7283	82	/policies/aging/	It's a fact that driving becomes more dangerous as people age. Senior housing should be built in areas that are walkable, reducing dependence on automobiles. What if we required new senior housing of over 50 units to include a small convenience/grocery store?	7/22/2018
7284	3	/policies/production-and-processing/	Add Arts Production as a protected class for production processing areas. d.&.e. Protect Production Areas - do not allow non-production in Production Areas. f. Protect older industrial buildings for future production and processing uses (not Non-Production uses).	7/22/2018
7285	14	/policies/tree-canopy-and-urban-forest/	Appreciate that attention to trees air and water quality and healthy environment is in the plan as Mpls develops changes and grows	7/22/2018
7286	5	/policies/visual-quality-of-new-development/	Require City funded projects to include public art which is purchased locally.	7/22/2018
7287	5	/policies/visual-quality-of-new-development/	I support this policy!	7/22/2018
7288	29	/policies/creative-sector-economy/	Protect existing Arts Districts.	7/22/2018
7289	35	/policies/innovative-housing-types/	New parking ramps, if built, should be constructed in a way to allow redevelopment into apartments, offices or other uses once they are no longer needed as ramps. This means flat floors (no full-width ramps) and floor height sufficient to allow reuse at a later date.	7/22/2018
7290	82	/policies/aging/	It's a fact that driving becomes more dangerous as people age. Senior housing should be built in areas that are walkable, reducing dependence on automobiles. What if we required new senior housing of over 50 units to include a small convenience/grocery store?	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7291	1	/policies/access-to-housing/	Allowing large apartment buildings filling in quiet residential streets will only destroy the neighborhoods. Developers that buy our affordable houses will be tearing them down to build ugly structures. Since they are for profit companies what they will replace it with will not be affordable. For instance, Washburn and York Avenues are very quiet streets- with traffic diverters forcing all traffic onto Xerxes. This new plan will fill 1/2 of both the streets with 3 story apartments no parking. This brings up another issue as the plan is for all residents to use public transportation. While this a noble thought it is not practical. The bus goes downtown and to Southdale. For the 50% of us who work in suburbs the bus is not an option. My commute is 15 minutes - it would me over an hour using public transportation and would require a long walk - even in winter. I love riding my bike to the grocery store, but cannot in the winter. It doesn't really matter since I will be forced to leave my house and the city that I have loved for 20 years. This plan is clearly written by the developers who want to make even more money destroying the city without creating affordable housing.	7/22/2018
7292	1	/policies/access-to-housing/	.	7/22/2018
7293	14	/policies/tree-canopy-and-urban-forest/	I support this policy. Trees everywhere please! You should also consider fruit trees as a public amenity. They can pollinate effectively if there are enough in a neighborhood. It would be cool to live in a neighborhood with a	7/22/2018
7294	73	/policies/stormwater-management/	The city cannot possibly have the "urban forest" situation the plan predicts while at the same time increasing the structural density the 2040 plan call for. Stormwater and melting snow has to have somewhere to go. Holding ponds and rain gardens will not keep up with the structural density predicted. Draining the waterflow out of the city only increases pollution and flooding concerns down from the city. Efforts to "reuse" runoff would be extremely complicated, expensive and would require more technology and infrastructure than the plan is calling for.	7/22/2018
7295	14	/policies/tree-canopy-and-urban-forest/	I support this policy. Trees everywhere, please! The city should also consider fruit trees within neighborhoods and parks as a public amenity... i.e., a public orchard to share with a neighborhood.	7/22/2018
7296	43	/policies/housing-displacement/	It is rather late to be trying to prevent population displacement. Not so many years ago, building after building on the southside and downtown displaced renters and converted to condos. Well I guess better late than never.	7/22/2018
7297	8	/policies/public-safety-through-environmental-de	I support this policy.	7/22/2018
7298	67	/policies/climate-resilient-communities/	This is an important goal, but this overall topic needs a plan for how we'll handle a potential influx of climate refugees.	7/22/2018
7299	0.1	/topics/land-use-built-form/	401 CHICAGO AVE., How will the achieved goals for 2040 happen when the Vikings stadium, or any stadium, are tax-exempt? Make em pay their fair share. Maybe that is the reason why the stadium wasn't on a referendum since it would be voted down.	7/22/2018
7300	44	/policies/comprehensive-investments/	A cooperative model should be used more extensively. Cooperatives encourage involved residents, create community and give residents a feeling of ownership.	7/22/2018
7301	60	/policies/intrinsic-value-of-properties/	I hope we can avoid the loss of significant buildings and landscapes--such as the loss of the Terrace Theater in Robbinsdale--before such properties with intrinsic value become a blight or problem, meet the issue head-on. Glad to see Peavey Plaza being refurbished.	7/22/2018
7302	91	/policies/heritage-preservation-outreach/	I live in Prospect Park, which is home of Tower Hill Park and the Witch's Hat Water Tower. Both are on National Registry of Historic Places, and are citywide landmarks. Right now, preservation of views to, of, and from the park are being threatened by high-rise development which will diminish and negatively impact the city of Mpls. The skyline view of landmarks like the Witch's Hat Tower is seen for miles, and 2040 development goals don't appear to address detrimental effects of high-density development in relation to skyline views of city landmarks. I wouldn't be aware of 2040 plan were it not for the Witch's Hat/Vermillion development issue in my neighborhood through grassroots information. I think the 2040 plan needs to be put on Minneapolis City Ballot, so everyone in Mpls. truly becomes aware of 2040 plan and its impact on residential neighborhoods and landmarks. Most residents are NOT yet aware of the changes afoot unless there is a development plan like Vermillion going on in their neighborhood now. 2040 needs to respect character and history of neighborhoods, and residents all have a right to be part of the planning process by being better exposed to and informed of 2040 plan. Neighborhoods are unique, and plans should be too. You need to do a better job of informing city residents of 2040 by putting it on the ballot. Inform the citizenry so 2040 becomes a true collaboration between residents and planners.	7/22/2018
7303	78	/policies/park-design-and-programming/	I support this policy.	7/22/2018
7304	76	/policies/new-parks/	I support this policy!	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7305	50	/policies/access-to-technology/	<p>Digital equity/ inclusion is a 3-legged stool: access to reliable, affordable, high speed internet services and devices; basic skills; and relevant content.</p> <p>I'd like to see city add this goal: City of Minneapolis will ensure affordable, reliable, high speed Internet service (25/3 minimum) is provided to every home and business.</p> <p>Today we have inconsistent service from USInternet. We have expensive, low speed service and poor customer service from Comcast and century Link. Minneapolis is a world class city and we deserve world class internet access for all.</p> <p>Note: Minneapolis lent its fiber infrastructure to us wireless, who used it to build a successful business. They used old tech for their affordable service, and many of us cannot connect due to technical difficulties on their end. They are redlining access to their new fiber to home service. City must provide leadership on USInternet deployment -- WiFi and fiber.</p> <p>Also, City has 100 free hot spots that are so difficult to access, they go on unused and most of public are unaware of this service. Let's hold USInternet accountable and let's offer free internet access in public places as promised under last contract.</p>	7/22/2018
7306	29	/policies/creative-sector-economy/	Active support of Quality education and Quality schools for Mpls children and residents will help attract and bolster future workforce. High priority on quality schools and support systems for education of all especially people of color and economically challenged residents	7/22/2018
7307	6	/policies/pedestrian-oriented-building-and-site-de	I support this policy!	7/22/2018
7308	1	/policies/access-to-housing/	<p>This policy contradicts History and Culture goal, and will destroy the essential features that make up Minneapolis unique and desirable neighborhoods. You are suggesting to make small-scale residential structures built 100+ years ago with multi-story buildings. It seems that you want Minneapolis to look more like Chicago, one of only 10 large cities in the US that continue to loose population.</p> <p>Many of the areas you propose to make more dense are not designed to handle XX,000 additional cars. And I would like to see a study that proves that residents along the proposed high-density areas will rely on public transportation. For example, we moved into the neighborhood 8 years ago, I've been working downtown and was excited to take the bus to work to avoid parking issues. I live 4 houses away from West 21st corridor. I grew up in Europe and love public transportation. I took the bus once, then gave it another try, and became very disappointed. It took way too long to get to and from work, and after wasting so much time on each bus trip I was willing to pay \$200/mo for parking downtown. I haven't used the bus since. A few of my neighbors work downtown and they don't use the bus either. Adding multi-story buildings along the proposed future corridors will increase density and number of cars on the old city streets, not designed for heavy traffic.</p> <p>There are many other ways to increase density - e.g. lots of public land on the West side of downtown, around 394, that could be re-purposed to provide greater housing supply, and it is just one of the examples.</p>	7/22/2018
7309	82	/policies/aging/	By placing the great emphasis on biking, pedestrian usage, public transportation and the de-empathizing the use of automobiles, the plan seems to greatly minimize the hardship this would place on older individuals, the climate in Minnesota is a factor which the plan seems to all but ignore. Older citizens frequently have to get to medical appointments, take care of shopping needs, etc., in extreme weather conditions. The hazards they could encounter attempting to get to and wait for public transportation, in extreme weather conditions is not being accounted for. The use of bicycles by the aged should not even be considered; a fall from a bicycle by an aged individual could very well result in life threatening injury or an incapacitating condition for the rest of their life, while the same fall by a younger person might only result in bruising and discomfort	7/22/2018
7310	37	/policies/mixed-income-housing/	I support this goal. I'd like to see the City of Minneapolis incentivize or require affordable housing units as part of new developments. It's super important to create more housing stock and to exercise oversight to ensure that the units that are built aren't just market-rate luxury condos. Let's build up density to meet housing demand and use inclusionary zoning policies, subsidies, or other tools to meet the needs of a wide range of people.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7311	82	/policies/aging/	By placing the great emphasis on biking, pedestrian usage, public transportation and the de-empathizing the use of automobiles, the plan seems to greatly minimize the hardship this would place on older individuals, the climate in Minnesota is a factor which the plan seems to all but ignore. Older citizens frequently have to get to medical appointments, take care of shopping needs, etc., in extreme weather conditions. The hazards they could encounter attempting to get to and wait for public transportation, in extreme weather conditions is not being accounted for. The use of bicycles by the aged should not even be considered; a fall from a bicycle by an aged individual could very well result in life threatening injury or an incapacitating condition for the rest of their life, while the same fall by a younger person might only result in bruising and discomfort.	7/22/2018
7312	81	/policies/social-connectedness/	I love this policy. I spent the day at the Open Streets Lake / Minnehaha day today and it was one of my favorite memories of Minneapolis. Open Streets days are such a valuable amenity for the city, and it should be considered as a model of what we can be more like all the time, not just once a year.	7/22/2018
7313	38	/policies/affordable-housing-near-transit-and-job-	This is great! More transit-oriented development, please.	7/22/2018
7314	80	/policies/development-near-metro-stations/	Yes!	7/22/2018
7315	0.1	/topics/land-use-built-form/	I agree with this draft plan. People who are complaining the loudest over this are afraid of change and want to keep everything the same. This is not reasonable going forward, if the city truly wants to accomplish it's long term goals of the future. Density is good when done right and for the most part, this plan proposes higher density in the appropriate places and along transit lines. If anything, I would double down on the density requirements of certain areas such as the downtown core and require a minimum of 15 stories or more. Urban-style infill development is only going to increase, it's time the city embraces that fact. People will move on and once they see the results aren't the end of the world like some are predicting, all will be well again. Please have the courage to see this through and understand that this is about the Minneapolis of not just today but 20+ years from now. Taller buildings, busier active streets, more transit options, access to good jobs etc. are a sign of a thriving city that more and more people are going to want to be apart of. The decisions you make now will determine if that will be us. Do the right thing and don't bow to pressure from those driven by fear of change and the unknown.	7/22/2018
7316	3	/policies/production-and-processing/	The maps are not available (don't load) to see proposed future Production Areas and Production Mixed Use Areas	7/22/2018
7317	78	/policies/park-design-and-programming/	h. Encourage and reduce barriers to community-driven programming. This wording doesn't make sense because you don't want to encourage barriers. These steps seem to exclude the aging population.	7/22/2018
7318	92	/policies/identify-and-evaluate-historic-resources,	re: f. Glad to see the inclusion of more recent time periods such as 'midcentury' as part of preservation. Some neighborhoods, such as Whittier, have both traditionally historic buildings and more recent, like businesses along Nicollet and Lake St. and Lyndale (though we are still hoping to open up Nicollet). It's not just the buildings. Sometimes it's a style of the design, or signs. Couldn't the Arby 'hat' sign be saved? At least the new development at Lyndale and 26th st. is called 'Rex' in acknowledgement of the hardware store there that sharpened 'everything but your wits'. Let's not be all or nothing about this.	7/22/2018
7319	6	/policies/pedestrian-oriented-building-and-site-de	I agree with most of the above points, but a balance must be struck. Point K. is problematic for livability in our neighborhoods. Off-street parking should be required of developers. It is unrealistic to think that people will not have cars. Balance is the key to preserving the livability of our city.	7/22/2018
7320	40	/policies/homelessness/	This should be a high priority. Would love to see Minneapolis be a leader on exploring housing-first approaches to ending homelessness.	7/22/2018
7321	6	/policies/pedestrian-oriented-building-and-site-de	Yes a thousand times to b. "Require active uses on the ground floor of new buildings, with direct connections to the sidewalk." You can't have a great walking city without places to walk to. I broadly support the rest of the goals outlined here, too, in particular eliminating (or at least greatly reducing) off-street parking minimums.	7/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7322	8	/policies/public-safety-through-environmental-de	<p>"Safe and welcoming environment" has two critical ingredients that aren't addressed here:</p> <ol style="list-style-type: none"> 1. Minimally, very slow traffic and zero midblock curb-cuts. 2. Limited or no police presence! It does not make me feel safe seeing a huge Minneapolis PD SUV parked on the sidewalk on Nicollet Mall! It makes me feel targeted and paranoid, and it makes me feel unwelcome in my own city. 	7/22/2018
7323	33	/policies/affordable-housing-production/	<p>Many compassionate residents of Minneapolis will believe that the 2040 plan guarantees more affordable housing. Please DO NOT BE FOOLED! I have a private psychotherapy practice in a small building on Lyndale and 54th St (which will surely disappear under this plan). Most of my clients have low, no, or fixed incomes. Currently, four of them have been evicted or received Order to Vacate notices, after their affordable apartment buildings were sold to developers who are upgrading them for market-rate renters. These people are or will soon be homeless, forced to look in a diminishing supply for another low-rent apartment. PROFIT motivates developers. They only build affordable housing if forced to do so in order to receive federal loans. Deregulation of zoning laws, making it easier for developers to build for profit rather than the common good, is NOT a way to assist people out of poverty!</p>	7/23/2018
7324	9	/policies/open-spaces-in-new-development/	<p>I like this a lot! What can the city do to make sure these plazas are actually used? There are plenty of examples of plazas and open spaces in the city that sit empty almost all the time. Some of them are places I can't imagine ever wanting to spend time, others are places I can never think of a reason to use, and others are places that don't feel worth the trouble of accessing.</p>	7/23/2018
7325	0.1	/topics/land-use-built-form/	<p>302 1ST ST N, When, who, why, and how do I get white stripes painted on the city streets at non-signalized intersections? North First Street, 55401, is a good example of nothing.</p> <p>I get no answer, nothing on this from the city, and someone is gonna get hit or killed. People are running across the intersections and if you are in a wheel chair, forget it.</p> <p>These cities are for living pedestrians not 1960's automobile traffic flow efficiency.</p> <p>I hope it won't be 2040 before the stripes get painted.</p>	7/23/2018
7326	38	/policies/affordable-housing-near-transit-and-job	<p>This is not good and I bitched about this before.</p> <p>My concern is about unbridled support for growth of business in neighborhoods. Businesses and residents do clash and have opposite interests and stakes. If businesses are encouraged, the well being and safety of the residents have to also be supported. Businesses often bring crime and that is counter to neighborhoods. Require businesses to show what they will do to improve the neighborhood they are moving into so that they are a good neighbor themselves.</p>	7/23/2018
7327	1	/policies/access-to-housing/	<p>How does this plan regulate who makes the money off our community in building/rebuilding our neighborhoods? Will the profit go into the pockets of developers? Politicians/policy makers? Our community?</p> <p>And, please, no building designs for right up to the property lines!</p>	7/23/2018
7328	0.1	/topics/land-use-built-form/	<p>Under Land Use & Built Form --</p> <p>Reconsider the shift to Corridor 4 / Interior 3 along the transit routes throughout the city (e.g. Penn Ave N, Fremont Ave N, France Ave S, Hennepin Ave S, S 4th Ave, ...). Instead decrease by one Built Form District. Specifically, replace Corridor 4s with Interior 3s, Interior 3s with Interior 2s.</p> <p>Consider shifting significant portions of Interior 1s in Southwest sections of the city to Interior 2s. For example, instead of making only one side of the block on either side of the transit routes Interior 3 set 2 blocks on both sides to be Interior 2 around transit routes.</p> <p>This seems to help achieve the goal to increase housing type and density through the city equitably while addressing concerns about excessive building height/mass.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7329	40	/policies/homelessness/	How about a goal like end homelessness in the city - that would be a worthy goal. (The wording of b. really is something totally different.) Set up a city task force to address the coordination of resources. Create city employment programs like Fort Worth, Denver, and San Diego (among others) so that people without a fixed address can access the services they need (mental/chemical/health/etc.) to find employment/safe and stable housing. "Aligning goals" and "supporting" collaboration is NOT going to end homelessness and its consequences; in fact it sounds like politi-speak for "do nothing."	7/23/2018
7330	2	/policies/access-to-employment/	Just a reminder that "locations well-served by public transportation" are not set in stone. We can alter much of our public transportation by updating routes and increasing frequency of the transportation.	7/23/2018
7331	0.1	/topics/land-use-built-form/	<p>Good admirable goals; the implementation is disappointing and counterproductive. Very uncreative, and not very well thought out. No sense of organic development or growth. It seems like all that was done was to overlay and apply colors along bus routes, regardless of what is existing there. 1 to 4 story apartment buildings overlooking Lake of the Isles (#1 bus route)? or the same on the west side of Linden Hills Boulevard (# 6 bus route.) Or along the entire distance of West 50th Street (#46 and #4). No wonder people were upset. As for blanket zoning changes within Interior 1 and 2, it seems that was already tried once before and that resulted in all those ugly apartment buildings built in the 70's mixed in with single family housing, and that was rightfully corrected. Why would you go back to that type of model?</p> <p>I thought at first much of the criticism of this draft seemed inflammatory; till I started looking at it more closely. I expect better from my city. There are tough issues to address; increased density is something that needs to be looked at. The suburban model is unsustainable. Yet this draft would destroy what makes this city what it is, and why people want to live here.</p> <p>I look forward to a very different, improved and more creative second draft. Thank you.</p>	7/23/2018
7332	1	/policies/access-to-housing/	Overall, I think this is a nice concept and glad you are looking into it. However, it seems like it is also one of the ones that is causing quite a bit of concern. I live in Linden Hills and I think having a mixture of single, double, three-plex, and four-plex along transit areas isn't a bad idea - but it could be depending on how it is rolled out, and that isn't clear. First, if the goal of it is to be affordable - you will have to put something else in place to ensure that that actually happens in the Linden Hills neighborhood as most of the new higher density buildings going in are not exactly affordable. Second, are you envisioning solid blocks of 4-plexes? That would be disappointing and change the feel of the neighborhood and one of the reasons people move here. However, I think there is still a way to ensure more affordable housing in our neighborhood. The plan suggests a mix of housing but do you have a proportion in mind? Will the neighborhood or neighbors have any say? Also, if you have high density housing how will you deal with parking and also more surge on our schools? At least in the Linden Hills area our schools are already overpopulated. Thank you.	7/23/2018
7333	20	/policies/transit/	Glad to see Mpls. moving transit along--we have been behind in this area. Especially a., b., d. very important, e. f. (very important) I would like to take transit more often, but it takes too long, and sometimes when I take the bus downtown there are unruly people on the bus. How do you deal with that and at the same time make transit accessible to people who are more reliant on it?	7/23/2018
7334	1	/policies/access-to-housing/	I strongly oppose unlimited 3-story and 4-story residential structures along all public transit routes. Two reasons: 1) our housing policy should not be one-size-fits-all, but should take into account the unique needs and attributes of each neighborhood, and 2) the scale (height and footprint and setback) of new buildings should be in keeping with existing buildings, regardless of whether they are single family or multifamily structures.	7/23/2018
7335	3	/policies/production-and-processing/	Encourage these areas to make use of solar energy and be cognizant of existing solar energy collectors on both business and housing buildings.	7/23/2018
7336	66	/policies/air-quality/	Let's have a worthy goal: Reduce all emissions from city fleet vehicles by 90% by 2020. (Convert to electric or other technology.) Support reduction of emissions by converting all city properties (leased and owned) to solar/wind/renewable energy sources.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7337	1	/policies/access-to-housing/	<p>I am sorry if this already came through. I am having issues with the internet, so I am trying a different browser.</p> <p>Overall, I think this is a nice concept and glad you are looking into it. I live in Linden Hills and I think having a mixture of single, double, three-plex, and four-plex along transit areas isn't a bad idea - but it could be depending on how it is rolled out, and that isn't clear. First, if the goal of it is to be affordable - you will have to put something else in place to ensure that that actually happens in the Linden Hills neighborhood as most of the new higher density buildings going in are not exactly affordable. Will the neighborhood or neighbors have any say? Also, if you have high density housing how will you deal with parking and also more surge on our schools? At least in the Linden Hills area our schools are already overpopulated. Thank you.</p>	7/23/2018
7338	56	/policies/supporting-small-businesses/	<p>Many small businesses are in small building that exist at commercial hubs that are interspersed throughout the city. Many are renting in older building. When these buildings get bought and razed by developers who then build "market rate" rentals, these small businesses get pushed out. If you maintain current height allowances, properties will be less inviting to prospecting developers who care less about the city than making a buck.</p>	7/23/2018
7339	48	/policies/data-driven-decisions/	<p>When you do this and get the results, please share with the community so people can see the impact of what was done, or what trends are coming. I would hope this information would help people get past fears of what could happen or feet stuck in 'the way it used to be'. Not that the past is necessarily something to ignore--historic preservation still important--prioritizing, understanding where we have been.</p>	7/23/2018
7340	39	/policies/fair-housing/	<p>I used to be a landlord in the city. That was until the city started getting their nose in my business. They did so to weed out bad landlords, but in doing so alienated the good ones. Minneapolis has always favored tenants over landlords, to the point where it was absurd to do so in many cases. With the city about to give even more rights favoring the tenant I can't understand why anybody in their right mind would want to do so in Minneapolis. Unfortunately, most of our city leaders don't see what un-intended consequences their actions might have and are actually driving landlords out of the city, creating even more of a rental shortage.</p>	7/23/2018
7341	4	/policies/access-to-commercial-goods-and-service	<p>People also use cars to save time. Our lives are busy. To replace cars, public transit must be convenient and fast. Reduce the need for cars, don't try to eliminate the need for cars.</p>	7/23/2018
7342	6	/policies/pedestrian-oriented-building-and-site-de	<p>This carless utopia is absolutely destined for failure in a society that requires cars. Do not restrict parking or discourage off street parking requirement for businesses. Not all people can walk or bike by the way, so this policy cuts out the elderly and disabled. No thanks! I have difficulty walking myself and cannot bike. Don't cut me out of my own city. Each neighborhood should be able to decide for itself what parking is allowed or not depending on the residents there via its city council. This cookie-cutter one-size-fits-all ideal doesn't work. This policy maybe can work in small block pilots, but don't suddenly decide no more parking, along with substandard challenging transit or ways for people to keep their cars safely.</p>	7/23/2018
7343	1	/policies/access-to-housing/	<p>Yes to more multifamily housing, yes to more density. Our primary concern should be making sure people who live in Minneapolis or want to live in Minneapolis can find places in their price range. Like every other city in the U.S., we have housing discrimination baked into our history, and we need to make sure our focus going forward is on working toward more integrated, equitable communities, not hardening the historical lines between the haves and the have-nots.</p>	7/23/2018
7344	57	/policies/cluster-strategy/	<p>You need to engage the local stake holders in this. Small area plans (one size does not fit all), local small businesses who are already established in the community, and people who live there.</p>	7/23/2018
7345	5	/policies/visual-quality-of-new-development/	<p>Respect the "flavor" of the surrounding architecture. Encourage diversity of architecture. Avoid housing and business "boxes" that look like post-war Germany.</p>	7/23/2018
7346	0.1	/topics/land-use-built-form/	<p>Overall I support the 2040 plan as it is -- in my opinion increased urban density is the most direct step we can take to support the natural environment. I know the plan has met vocal opposition -- in my opinion the two areas where compromise would be best are be limiting the height of the highest apartment buildings, and allowing some restriction on 4-plexes.</p>	7/23/2018
7347	1	/policies/access-to-housing/	<p>I strongly support this policy in order to keep Minneapolis both affordable and diverse.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7348	58	/policies/business-districts-and-corridors/	In order to support business corridors, you must provide parking. People travel to businesses via cars and other modes of transportation, but cars, still cars. You also need to make sure that the height of these corridors is congruent to the existing housing, in most neighborhoods, that means 2.5 stories, MAX, except on major transit ways (this does not include every where a bus passes by). Involve the people in the neighborhood in any decision making. Maintain the small area plan model and FOLLOW the small area plan that is designed with citizen input.	7/23/2018
7349	10	/policies/street-grid/	<p>1. I'm really glad to see the emphasis here on improving access across freeways. I live within 2-3 blocks of both I-94 and I-35W. It's a major pain to get across both - especially 35W, especially when I'm on my bike. It's a little easier getting across 35W now that we have bike lanes on 26th and 28th, but the 28th St lane is tough to get to from the north, and it still generally forces me to go very far out of my way. We need to make it a priority to reconnect the WHOLE street grid across all the freeways - not necessarily for cars, but certainly for pedestrians and bike riders. And that means both ways - no more one-way bike lane pairs that mimic car one-ways, we use the road much more like pedestrians and we need design that reflects that; ie contraflow lanes as default! We have a fabulous temporary contraflow lane set up on part of 28th St right now. Please please please, let's make that permanent and then make it the minimum standard for all bike infrastructure going forward.</p> <p>2. Access across freeways is huge; access across arterial streets is also critical. I live a block north of Franklin and it is a nightmare to get to homes and businesses literally one block away from me because of the conditions on Franklin between signaled intersections. Similarly, I need to cross 3rd Ave at 19th St every day to get to my bus stop and my neighborhood corner store. There's a (very unreliable) stoplight at 18th St but not even a crosswalk at 19th St. It's state law that cars still have to stop for a crossing pedestrian, but they never ever ever do - not private cars, not buses, not municipal vehicles, no one! I've missed buses because of this, I've been threatened both physically and verbally, I've had my life seriously endangered. This is part of this policy and I want to see it reflected.</p> <p>3. Let's think more creatively about opening up our wonderful alleys! Alley access is a great resource and finding better ways to use them could massively improve connectivity for pedestrians and bike riders citywide.</p> <p>4. I want to specifically bring up the Nicollet Ave Kmart. Hopefully there will be some movement there before 2040 and we will be able to go through the process of reconnecting Nicollet. I'm very worried that this process is going to turn Nicollet into another Lyndale, i.e. a street where the free movement of cars has absolute priority. I desperately hope that when the time comes to reconnect Nicollet, the city has the foresight to make that connection available to transit, bikes, and pedestrians ONLY - not private cars, who are by now completely comfortable driving the extra two blocks. I don't bring this up to shoehorn one specific issue into the 2040 plan, though - there are many places in the city where the street grid is broken this way, and where a reconnection could happen in the next 20 years. I'm glad to see language in our comp plan clarifying that the city's priority in those situations is reconnecting the grid for pedestrians, bikes, and transit alone, however I'd like to see a clear statement recognizing that breaks in the grid do not present a remotely equivalent problem for cars, and that it is NOT a priority in most cases to reconnect the grid for their use.</p>	7/23/2018
7350	6	/policies/pedestrian-oriented-building-and-site-de	I oppose prohibiting establishment of new drive-throughs/gas stations/auto repair businesses and facilities. Are you trying to punish car owners?	7/23/2018
7351	51	/policies/healthy-pre-k-development/	<p>two things.</p> <p>Our own Federal Health and Human Services dept did a study a few years back that proved that while a child made some gains with pre-K schooling, those gains had diminished but the 1-3 grades. Meaning Pre-K is a waste of money and resources.</p> <p>Child care.</p> <p>It's just plain wrong expecting the childless to pay for the child care of others. Having a child is a personal decision. If you can't afford one, perhaps you shouldn't have one.</p>	7/23/2018
7352	59	/policies/downtown/	You need to have parking for people to enjoy the amenities of downtown. You can not assume that only Mpls residents can support the activities in the city, and so assume that people coming from the suburbs will need a place to park and ease of getting around.	7/23/2018
7353	8	/policies/public-safety-through-environmental-de	And don't forget about snow removal. I haven't seen anything that acknowledges our seasonal patterns.	7/23/2018
7354	9	/policies/open-spaces-in-new-development/	Yes!!!!	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7355	56	/policies/supporting-small-businesses/	Ensure that these encouraged small businesses are also good neighbors. Restaurants can often create litter and unwanted excessive smells. Ensure regs are in place to sincerely mitigate those effects. Require scrubbers to elim smells and provide grants for small businesses to afford them within first 6 months. Ensure all licensees are required to pick up the litter around their building and participate in block clubs or other neighborhood functions such as National night out.	7/23/2018
7356	60	/policies/intrinsic-value-of-properties/	I support this policy. I would like it to include the intrinsic value of our housing stock. My home will 100 years old next year, but it is a modest 1.5 story bungalow. It is part of the historic fabric of our city. The changes proposed to my neighborhood endanger my home and others like it.	7/23/2018
7357	6	/policies/pedestrian-oriented-building-and-site-de	r. Incorporate green spaces and boulevards to allow for adsorption of stormwater, improve air quality, reduce sound, and support natural systems in the neighborhood.	7/23/2018
7358	6	/policies/pedestrian-oriented-building-and-site-de	As a blind person, I walk several miles every day, in addition to using public transit. These goals expand accessibility and safety for our city.	7/23/2018
7359	88	/policies/public-services-policy/	Public officials must not make decisions or craft policy based on public clamor that is itself driven by unfounded fears. Public statements from prominent and amplified voices opposing aspects of this comprehensive plan have been filled with elementary errors concerning: 1) how market pricing works 2) how property taxes work 3) whether zoning changes will affect how many or which homes are "bulldozed" 4) whether preserving a Single Family zoning designation can have any effect on whether the property is put up for rent and many more. Public officials relying on disinformed popular opposition to justify changing a policy are no better than if they had relied on the underlying falsehood or misinformation themselves. Public input not informed by facts should not then be laundered to nevertheless create public policy. Popularly held false beliefs are still false, and making policy based on falsehoods is not consistent with a government that is proactive or accessible. It is instead a way to avoid making hard or unpopular decisions that are nevertheless necessary for the public interest.	7/23/2018
7360	91	/policies/heritage-preservation-outreach/	There should be more identification of important sites by placement of historical markers -- especially of sites connected to people of color and women, which were neglected in the past.	7/23/2018
7361	61	/policies/environmental-justice/	"Partner with residents and organizations in environmental injustice areas to determine City investments and regulatory changes." Yes! Partner with the local stake holders in doing any work in the city. No top down approaches. More community engagement, more transparency at the city level.	7/23/2018
7362	69	/policies/renewable-and-carbon-free-energy/	Require the encouraged businesses to reduce waste smells, litter, disrepair, by partipating actively in this policy. Donâ€™t encourage businesses in other policies and let them off the hook for these responsibilities.	7/23/2018
7363	12	/policies/lighting/	Make use of solar energy here?	7/23/2018
7364	14	/policies/tree-canopy-and-urban-forest/	Our trees are one of the greatest assets to our city, and one of the features that make Minneapolis stand out. Our trees are being threatened, and reviving a healthy tree canopy is very important.	7/23/2018
7365	62	/policies/contaminated-sites/	This is an easy one. Of course. But who is going to pay for this?	7/23/2018
7366	19	/policies/bicycling/	Fuck you and your war on the automobile. Bikes have a place, but they make up a very small percentage of our population. I'm sick and tired of seeing you take away driving lanes and automobile parking to make way for yet even more un-needed bike lanes. Years ago people used to bike and we never needed lanes. Just don't be an idiot, and OBEY the traffic laws.	7/23/2018
7367	14	/policies/tree-canopy-and-urban-forest/	I support the urban forest!	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7368	0.1	/topics/land-use-built-form/	I love the idea of fourplexes being allowed everywhere in Minneapolis. Housing in Minneapolis is already cheaper than it is in most cities in the US and we need to keep it that way. Keeping the supply at pace with the demand is a good way to do that. I believe this plan is bigger than just Minneapolis; if we follow through with this plan and it is successful (as I believe it will be), we will become a model for every major city in the US to improve housing affordability. We need to be proactive and upzone today, or we will have a housing crisis on our hands tomorrow.	7/23/2018
7369	19	/policies/bicycling/	I wholeheartedly support the continued expansion of the bikeway network in Minneapolis, especially protected bikeways.	7/23/2018
7370	15	/policies/transportation-and-equity/	Please remember the elderly and mobility-impaired in working toward equity	7/23/2018
7371	1	/policies/access-to-housing/	These are really great policies. I especially like the focus of building density along transit lines. This should be inclusionary housing, regardless of neighborhood. The city should consider exploring emerging (electric) transportation technologies that support existing and future transit options to reduce the dependence on individual automobiles and support the reduction of carbon emissions, per the Climate Action Plan.	7/23/2018
7372	1	/policies/access-to-housing/	<p>We are opposed to the approach, the priorities, and the plans comprising the Minneapolis 2040 proposal: rental hyperdensity and widespread residential upzoning.</p> <p>Destructive effect. The Minneapolis 2050 proposal is destructive to the stability and livability of Minneapolis for a wide, healthy mix of residents, young and old, working and students, career and retired. By uprooting neighborhoods and shifting the housing mix to predominantly absentee/speculator ownership, Minneapolis neighborhoods will be radically degraded. Single family home ownership will continue to be an essential part of civic life for Minneapolis in 2040. Careful planning will ensure that these neighborhoods are not damaged by oversized, overbuilt, hyperdense rental units, along arteries or even in the midst of small scale single family houses. It is appalling that the general premise on which the Minneapolis 2040 proposal is essentially constructed is so destructively narrow minded. Minneapolis needs to be a city serving and inhabited by a wide, healthy mix of residents. Constructive city planning cannot be built on the faulty premise is that the predominating city planning needs relate to future typical Minneapolis resident that is a single, 30 year old, white collar career, rental housing resident, whose workplace is a bicycle ride away. Sound city planning can track history trends and realize that healthy family neighborhoods will continue to be essential for Minneapolis “ but Minneapolis 2040 does not promote that vision.</p> <p>Policy contradiction. On point after point concerning zoning, building types, and desired neighborhood land use, the Minneapolis 2040 plan opposes and contradicts the carefully developed, community based, and explicitly detailed Minneapolis neighborhood small area plans, such as the Como Blueprint. It is unwarranted, offensive and destructive bad faith for Minneapolis city government to overturn the community planning decisions made in good faith over decades by Minneapolis, as expressed by Minneapolis residents and (previously) approved by city authority, in these Minneapolis neighborhood plans.</p> <p>Counterproductive outcomes. Cloaked in vague, pseudo-public interest terminology, the Minneapolis 2040 proposal will certainly produce negative outcomes for Minneapolis: less affordable housing availability in general, a smaller stock of first-time family-owned houses, an explosion of ugly, shoddily built multihousing buildings filling lots up to sidewalk edges (as seen in Seattle) along previously attractive, livable residential neighborhood streets. The Minneapolis 2040 proposal is an entree loophole for poorly planned, profit-driven, hyper-dense exploitation of Minneapolis neighborhoods for the developer/banking sector “ the very opposite of smart city planning, smart development, smartly handled selection of zones and land for higher density residential construction.</p> <p>Ignorant planning. Close examination of the Minneapolis 2040 proposal shows off-target planning for new hyper-density development, even in neighborhoods that have already, during the last decade, cooperatively approved and put in new high-density rental developments in</p>	7/23/2018
7373	81	/policies/social-connectedness/	In order for neighborhood organizations to promote the City's goal to expand and promote opportunities for all residents to connect socially and participate fully in the vitality of their community, the city should severely limit the influence and funding of neighborhood organizations that do not have a balance of board membership that approximately matches the neighborhood's ratio of owners and renters. The neighborhood organizations must have a firm incentive to actively seek out and secure such representation when their board membership becomes too lopsided.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7374	63	/policies/food-access/	<p>All good, but F and G. Are you kidding? You can't require what a private business does. This is a ridiculous approach. How about we serve our students healthy foods in the Minneapolis schools, get them used to having healthy food, so they are more likely to want it. Also, how about having healthy foods be more affordable. More community gardens, more small, local farmer's markets... Also, you are going to regulate discouraging unhealthy food outlets? Good luck with that. You need to work on creating a critical mass of people who prefer healthy options, and the rest will follow.</p>	7/23/2018
7375	80	/policies/development-near-metro-stations/	<p>We are opposed to the approach, the priorities, and the plans comprising the Minneapolis 2040 proposal of rental hyper-density and widespread residential upzoning.</p> <p>Destructive effect. 7377		4 /policies/access-to-commercial-goods-and-service	<p>We are opposed to the approach, the priorities, and the plans comprising the Minneapolis 2040 proposal of rental hyper-density and widespread residential upzoning.</p> <p>Destructive effect. The Minneapolis 2050 proposal is destructive to the stability and livability of Minneapolis for a wide, healthy mix of residents, young and old, working and students, career and retired. By uprooting neighborhoods and shifting the housing mix to predominantly absentee/speculator ownership, Minneapolis neighborhoods will be radically degraded. Single family home ownership will continue to be an essential part of civic life for Minneapolis in 2040. Careful planning will ensure that these neighborhoods are not damaged by oversized, overbuilt, hyperdense rental units, along arteries or even in the midst of small scale single family houses. It is appalling that the general premise on which the Minneapolis 2040 proposal is essentially constructed is so destructively narrow minded. Minneapolis needs to be a city serving and inhabited by a wide, healthy mix of residents. Constructive city planning cannot be built on the faulty premise is that the predominating city planning needs relate to future typical Minneapolis resident that is a single, 30 year old, white collar career, rental housing resident, whose workplace is a bicycle ride away. Sound city planning can track history trends and realize that healthy family neighborhoods will continue to be essential for Minneapolis “ but Minneapolis 2040 does not promote that vision.</p> <p>Policy contradiction. On point after point concerning zoning, building types, and desired neighborhood land use, the Minneapolis 2040 plan opposes and contradicts the carefully developed, community based, and explicitly detailed Minneapolis neighborhood small area plans, such as the Como Blueprint. It is unwarranted, offensive and destructive bad faith for Minneapolis city government to overturn the community planning decisions made in good faith over decades by Minneapolis, as expressed by Minneapolis residents and (previously) approved by city authority, in these Minneapolis neighborhood plans.</p> <p>Counterproductive outcomes. Cloaked in vague, pseudo-public interest terminology, the Minneapolis 2040 proposal will certainly produce negative outcomes for Minneapolis: less affordable housing availability in general, a smaller stock of first-time family-owned houses, an explosion of ugly, shoddily built multihousing buildings filling lots up to sidewalk edges (as seen in Seattle) along previously attractive, livable residential neighborhood streets. The Minneapolis 2040 proposal is an entire loophole for poorly planned, profit-driven, hyper-dense exploitation of Minneapolis neighborhoods for the developer/banking sector “ the very opposite of smart city planning, smart development, smartly handled selection of zones and land for higher density residential construction.</p> <p>Ignorant planning. Close examination of the Minneapolis 2040 proposal shows off-target planning for new hyper-density development, even in neighborhoods that have already, during the last decade, cooperatively approved and put in new high-density rental developments in</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7395	46	/policies/healthy-housing/	<p>We are opposed to the approach, the priorities, and the plans comprising the Minneapolis 2040 proposal of rental hyperdensity and widespread residential upzoning.</p> <p>Destructive effect. The Minneapolis 2040 proposal is destructive to the stability and livability of Minneapolis for a wide, healthy mix of residents, young and old, working and students, career and retired. By uprooting neighborhoods and shifting the housing mix to predominantly absentee/speculator ownership, Minneapolis neighborhoods will be radically degraded. Single family home ownership will continue to be an essential part of civic life for Minneapolis in 2040. Careful planning will ensure that these neighborhoods are not damaged by oversized, overbuilt, hyperdense rental units, along arteries or even in the midst of small scale single family houses. It is appalling that the general premise on which the Minneapolis 2040 proposal is essentially constructed is so destructively narrow minded. Minneapolis needs to be a city serving and inhabited by a wide, healthy mix of residents. Constructive city planning cannot be built on the faulty premise that the predominating city planning needs relate to future typical Minneapolis resident that is a single, 30 year old, white collar career, rental housing resident, whose workplace is a bicycle ride away. Sound city planning can track history trends and realize that healthy family neighborhoods will continue to be essential for Minneapolis but Minneapolis 2040 does not promote that vision.</p> <p>Policy contradiction. On point after point concerning zoning, building types, and desired neighborhood land use, the Minneapolis 2040 plan opposes and contradicts the carefully developed, community based, and explicitly detailed Minneapolis neighborhood small area plans, such as the Como Blueprint. It is unwarranted, offensive and destructive bad faith for Minneapolis city government to overturn the community planning decisions made in good faith over decades by Minneapolis, as expressed by Minneapolis residents and (previously) approved by city authority, in these Minneapolis neighborhood plans.</p> <p>Counterproductive outcomes. Cloaked in vague, pseudo-public interest terminology, the Minneapolis 2040 proposal will certainly produce negative outcomes for Minneapolis: less affordable housing availability in general, a smaller stock of first-time family-owned houses, an explosion of ugly, shoddily built multihousing buildings filling lots up to sidewalk edges (as seen in Seattle) along previously attractive, livable residential neighborhood streets. Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7396	11	/policies/skyways/	<p>I'm extremely disappointed to see this in the draft plan. Are we seriously embracing this for another 20 years? Surely we should be making a plan to SHRINK our skyway system, which is what our peer cities like Calgary are already doing!</p> <p>I'm glad to see some (albeit rather tepid) language here directing new commercial to ground floor. I don't think it's nearly enough. We should be planning to ban any new skyway commercial that does not also have a street-level entrance. We know that the skyways have sapped all the life from our streets. We know this! We all know this and we have known it for decades! Why are we just deciding to be okay with this? So many of our peer cities without skyways have downtowns that are a JOY to be in. Our streetscape is hostile. Still! In 2018, we still have a hostile, empty downtown streetscape, in a city that is thriving, that people love living in, and yet we are including a policy in our draft plan to maintain that status quo? I'm just at a loss, honestly.</p> <p>I want to emphasize here, though, that the most important problem with our skyways is not that they've disintegrated our street life, it's that they are privately owned. The primary place public life occurs in downtown Minneapolis is privately owned space. That's an absolute disgrace. We should be ashamed that we've surrendered the best quality of any of any urban place - its public space - to private oversight. This effectively means we don't *have* a city center. It's not open to everyone. Any downtown building can restrict access to anyone at any time, and any portion of the network can close whenever the owners feel like it. That's not a city, that's a mall. It's not ethical, it's not aligned with our city's values and it certainly doesn't match the goals we've identified as crucial for 2040. Furthermore, it means I don't have access to Dairy Queen on the weekend! Sometimes I want Taco Johns for dinner after work hours! I would be able to do that if we made an effort here at reducing skyway commercial and reopening our PUBLIC streetscapes!</p> <p>The 2040 plan should include policy recommendations about the skyways, but they need to be much, much more strategic and much, much more specific about the ways we are going to prioritize public space and ground-level commercial over the status quo. The name of the policy certainly should not be "Use Skyways to Connect Buildings Downtown." That is not a policy that serves the people of Minneapolis. It may be a policy that serves the interests of Target and Wells Fargo, but it doesn't serve me and it sure as hell doesn't serve black and brown Minneapolitans, homeless Minneapolitans, or poor Minneapolitans.</p>	7/23/2018

7398	66	/policies/air-quality/	<p>You will need to mitigate traffic in a number of ways in order to reduce carbon emissions. 1. encourage and make it easier to use public transportation. 2. limit the amount of density in any area. No area can sustain too much density and still have traffic flow without interruption. Too many idling cars will not be good for air quality.</p> <p>For example, the amount of development along Lyndale Ave S. has mad that major node darn near impassible. So much idling happens because of poor city planning. This whole plan risks having more of what this street is experiencing throughout the city. Less density, better air quality.</p>	7/23/2018
7399	12	/policies/lighting/	<p>I like this policy! Is there any way to incorporate some language about street trees as a means of blocking some of that necessary light from second- and third-floor residences? When I moved into my second-floor apartment, I had a nice beautiful street tree outside my window. One summer it lost a branch when it was struck by lightning (the tree itself survived though) and the city very abruptly removed the whole tree. Since then, instead of a tree outside my window, I've had a very, very bright streetlight. I had to invest in high-quality blackout curtains to be able to sleep. I think it's great that there's a plan for lighting that primarily aims down, but I think it would also be cool to incorporate street trees into the planning here. Since we love street trees too. :)</p>	7/23/2018
7400	18	/policies/walking/	<p>Please remember that the streets already get very narrow during snow season.</p>	7/23/2018
7401	67	/policies/climate-resilient-communities/	<p>"Conduct risk and cost-benefit analyses for increasingly extreme rain events on all stormwater infrastructure investments."</p> <p>Too much density resulting in more hardscape and less green space will exacerbate this issue rather than improve it. Less density.</p>	7/23/2018
7402	48	/policies/data-driven-decisions/	<p>Policy 48: a, b, c, d, e, f: Similar to parks and roads, use a racial equity matrix.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7403	52	/policies/human-capital-and-a-trained-workforce/	Policy 53: c, e: Build safe barrier-free connections.	7/23/2018
7404	13	/policies/landscaping/	I like this and I worry about street trees being planted on sidewalks that are too narrow. Eat Street is a nice example of this - the sidewalk is way too narrow and I have to imagine that's going to change at some point in the next 20 years, but unfortunately that's going to have to involve tearing out a whole lot of relatively mature street trees. That's really not great practice, and I'd like to see some more proactive thinking about futureproofing when new streetscapes are landscaped.	7/23/2018
7405	32	/policies/arts-in-community-development/	Work to eliminate racism in all aspects of our community.	7/23/2018
7406	52	/policies/human-capital-and-a-trained-workforce/	<p>d and g. Young people and people who have been under-employed or working jobs that do not engage their minds and interests need to be encouraged to learn about all the jobs that are out there and what education and training they would need to be well-employed.</p> <p>Programs need to start in high school -- through dialogue with resource people, guidance counselors and human resource people from the "real" work world.</p> <p>We must find ways to go into minority and underserved communities to start building relationships and conversations that lead to better opportunities for these people in Minneapolis. We must integrate resource rich people, jobs and areas with resource deprived. This has been known for some time, but really creating this bridge is essential.</p> <p>Both in high school and in community colleges, I've met students who do not realize the specifics of jobs in science, technology, and environment. They must see stepping stones in tangible skills and steps.</p> <p>i. Could artists -- actors, film makers -- create and produce plays and videos that tell the stories of individual workers learning about, training for, and getting jobs in advanced manufacturing. Hands on skills --- help individuals see what these jobs are, how they lead to other jobs, retention and salary/pay scales. Tangible real stories are the key to motivation and new understandings.</p> <p>Community colleges are moving on this; the city MUST connect with these resource people, visions and programs. Apprenticeships and internships are the key. I agree.</p>	7/23/2018
7407	19	/policies/bicycling/	<p>This general direction is good. There's been a lot of progress on this, but there's still a long way to go. The emphasis should be on connectivity to destinations and addressing the gaps in the existing network, as well as building modern bikeways that work for all types of people. This means building protected bikeways on streets with significant amounts of motor vehicle traffic, and it means protecting them with curbs, planters, wide buffers, etc.--not just paint, and not just a narrow strip of pavement and some bollards. It also means giving them enough space when next to parking lanes that they can be maintained in the winter and don't pose a constant dooring risk to bicyclists using them.</p> <p>We should make it goal to become a world-class bicycling city, and we should be willing to allocate resources and make design choices accordingly.</p>	7/23/2018
7408	33	/policies/affordable-housing-production/	Changing policy in this area is not necessarily "If you build it, they will come". I don't have solutions here, but this policy sounds like there would be emphasis on building where the policy-makers this the buildings should be and not necessarily where the residents want to live.	7/23/2018
7409	59	/policies/downtown/	Policy 59: c, d, g, h, i: Expand publicly accessible green space downtown through the use of Park Dedication Ordinance Fees to create placemaking, signage and way- finding.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7410	1	/policies/access-to-housing/	<p>I disagree with the option to eliminate the zoning restrictions and allow for 4-plexes and other high density housing anywhere in the city. There are beautiful neighborhoods with single family homes that would be disrupted and would turn into ugly weird neighborhoods. Multi-family dwellings should require review if in a residential neighborhood. I also disagree with the lack of parking spaces for cars in these sites. If it's a multi-dwelling building, there should be a parking space for each unit.</p> <p>These site will more than likely be owned by large corporation and will not be held by local housing companies - pushing things out of the state.</p> <p>These also will not have an adorable housing component. Affordable housing is much needed in our city at this time.</p>	7/23/2018
7411	81	/policies/social-connectedness/	Support the existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community. Preserve existing buildings.	7/23/2018
7412	1	/policies/access-to-housing/	<p>I live in SW Minneapolis in Fulton Neighborhood. When we moved here in 1992, middle income people could afford to live near the amenities of the lakes, Minnehaha Parkway and the good schools of SW Minneapolis. We bought our house for \$99,500. Although it did need a lot of work, we were able to make those investments gradually over many years, which allowed us to get in to a neighborhood where we really wanted to live at an affordable entry price. I strongly support housing policies that will allow middle income households to move into this neighborhood again. The current spate of \$800k to \$1.2M infill housing currently makes that impossible. I have had a lot of young people tell me that they'd love to live in this neighborhood but didn't even look here because it's out of their price range. I support the objective of having all neighborhoods absorb their share of the population growth that will strengthen the city. I support allowing multifamily housing on select public transit routes. I support the idea that in neighborhood interiors farthest from downtown that currently contain primarily single-family homes, we should achieve greater housing supply and diversity by allowing small-scale residential structures on traditional size city lots. However, I think that 4-plexes go too far in this direction. I would be a lot more comfortable with the proposed policy if it included duplexes, triplexes and accessory dwelling units but not 4-plexes. These are only 5000 sq.ft. lots. I would prefer to make up the difference by allowing multifamily housing on public transit routes to either encompass a larger number of so-called "select" transit routes and/or allowing more units per building on these routes.</p>	7/23/2018
7413	0.1	/topics/land-use-built-form/	I strongly support allowing fourplexes everywhere. It's a gentle way to add more density to the city. I think keeping this part of the plan should be a very high priority, even if it means compromising towards smaller built form along certain corridors.	7/23/2018
7414	60	/policies/intrinsic-value-of-properties/	Policy 60: a, b, c: Through park connections, stimulate economic activity and sustainable development.	7/23/2018
7415	34	/policies/affordable-housing-preservation/	<p>"create strategies": please collect accurate data from other cities who have tried to reach similar goals. What has worked in other cities? And, perhaps more importantly, what has NOT worked? No point in replicating failure.</p>	7/23/2018
7416	58	/policies/business-districts-and-corridors/	g. Support the existing Arts Districts h. Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement.	7/23/2018
7417	35	/policies/innovative-housing-types/	Don't let the housing industry/corporations make policy decisions for our city.	7/23/2018
7418	6	/policies/pedestrian-oriented-building-and-site-de	Good stuff! Especially like the minimization of surface parking lots, prioritization of active uses at street level, elimination of off-street parking minimums, and encouragement of sidewalk space for active pedestrian areas.	7/23/2018
7419	21	/policies/freight/	<p>We get 80 freight train per day on parallel tracks that cut through our neighborhood diagonally. Train safety is a big issue, particularly with the oil tankers. Children love to watch the trains, but it is important to keep people off the tracks except at the one at grade safety crossing. Two people I know died crossing at the wrong place by taking a shortcut just a block away from the official crossing. One was a young mother and girl scout leader who thought she was being careful. She was walking her dog and waited for a train to pass before crossing, but didn't see or hear the train coming from the other direction. Young Athena lost her Mom. The other was a new student beginning at the University. Jordan was killed Oct. 8th in 2017. Our Community has asked that a fence be placed on both sides of the tracks at the top of the closed portion of 21st Ave. SE between Como ave. SE and Talmage Ave. SE. Someone has finally put up a sign saying Railroad Crossing that can only be seen when half way across the tracks. Useless. People know the tracks are there, but cross anyway. I've seen young adults dumping things there and messing around along the tracks. Please help us keep people off the tracks except at the Safety Crossing with it's bells and safety arm.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7420	37	/policies/mixed-income-housing/	As a resident of SW Mpls (Fulton) I very strongly support this goal. High-priced infill housing in our neighborhood is changing the composition of the population toward upper-middle incomes. The neighborhood would benefit from a greater mix of income levels.	7/23/2018
7421	1	/policies/access-to-housing/	<p>When my wife and I lived in uptown in our early 20s and then bought a fixer upper in suburbia because that's what we could afford. 8 years later we used our sweat equity to bring our daughter "back into the city" to our dream neighborhood in Lynnhurst. It is a quiet place that is close to nature, parks, restaurants and family owned businesses.</p> <p>By adding a blanket policy to all of Minneapolis, you are giving developers the rights to bulldoze our 100+ year old neighborhood to put up multi-tenant homes that will not only destroy the character of our neighborhood but drive down the value of our home which we worked so hard to get. If we wanted to live in uptown we would have moved back there. Please rework 2040 and let each neighborhood decide their own fate. If this passes, we will strongly consider move our family back to the suburbs.</p> <p>Thank you for your time and consideration.</p> <p>Erik Sheridan Lynnhurst.</p>	7/23/2018
7422	36	/policies/innovative-housing-strategies/	Affordable housing is important. Perhaps we should consider helping people afford their housing. Focus on getting money into the hands of our residents; let them make their housing decisions based on having money. I don't think the city of Minneapolis can provide a basic income for our residents, but we can work toward a national policy that would benefit our people.	7/23/2018
7423	56	/policies/supporting-small-businesses/	Support the development and growth of small business and artists. Artists are vital small businesses.	7/23/2018
7424	17	/policies/complete-streets/	This is good. But let's actually live up to it. If we say motor vehicle uses come last after walking, biking, and transit, we should be willing to actually make those tradeoffs in the design of our streets.	7/23/2018
7425	2	/policies/access-to-employment/	Encouraging business development outside of downtown in other dense areas well served by transit (Uptown, Prospect Park, etc.) would help diversify employment opportunities in the city.	7/23/2018
7426	23	/policies/coordinated-development-strategy/	Land grants, please. Affordable small condos or rowhouses.	7/23/2018
7427	37	/policies/mixed-income-housing/	I am curious about how to "cultivate a culture of mixed-income housing practice".	7/23/2018
7428	65	/policies/urban-agriculture-and-food-production/	Policy 66: Reducing emissions of pollutants and improve air quality, increase tree canopy in areas of reduced air quality.	7/23/2018
7429	33	/policies/affordable-housing-production/	I strongly support expansion of tools and resources to produce more affordable housing, and prioritizing the needs of households with incomes at or below 30% of median income.	7/23/2018
7430	15	/policies/transportation-and-equity/	We have enough public transportation and bike paths and don't need to add more. Over the past 5 years or less, the city has narrowed most thorough and main streets by adding bike paths while only about 4% of the population uses these bike paths, as an avid biker, I disagree with the city's philosophy that forcing people to bike will help reduce emissions. What about using those funds to support electric vehicle programs instead?	7/23/2018
7431	42	/policies/expand-homeownership/	Get money in the hands of people who need housing.	7/23/2018
7432	0.1	/topics/land-use-built-form/	The proposed Land Use policies are flawed and destructive.	7/23/2018
7433	67	/policies/climate-resilient-communities/	Policy 67: a, d, e, f: In collaboration with MPRB, especially in compact communities.	7/23/2018
7434	49	/policies/educational-and-economic-access/	Strong public schools are so important to achieving these goals but there is very little in the 2040 plan about what MPLs public schools will do. I would like to see the education piece be more of a focus. In this draft it is merely a side note.	7/23/2018
7435	66	/policies/air-quality/	What about promoting electric vehicles as part of a reduction emissions? Look at what is being done in CA and Austin, TX. This would be a much better user if tax payer funding than a bunch of under utilized bike path and bike streets.	7/23/2018
7436	42	/policies/expand-homeownership/	You must also add: PRESERVE a mix of housing types. We need small starter homes (like the house I was able to buy when I was a low-paid nonprofit worker) to be preserved, not to be targeted by developers who want to do ugly, vinyl-clad suburban blowouts. And I mean starter HOUSES, not condos, not townhomes (though we need those too).	7/23/2018
7437	42	/policies/expand-homeownership/	You must also add: PRESERVE a mix of housing types. We need small starter homes (like the house I was able to buy when I was a low-paid nonprofit worker) to be preserved, not to be targeted by developers who want to do ugly, vinyl-clad suburban blowouts. And I mean starter HOUSES, not condos, not townhomes (though we need those too).	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7438	0.1	/topics/land-use-built-form/	Minimum setbacks in residential areas should be eliminated. Attached rowhouses save space, they are eco friendly because they use adjacent houses for insulation, and they look good. There's just nothing wrong with them, so why make them illegal? Legalize rowhouses.	7/23/2018
7439	48	/policies/data-driven-decisions/	Look to other communities nationally to learn what does and does not work.	7/23/2018
7440	3	/policies/production-and-processing/	I support the balance of limiting negative externalities and pollution with the need for high quality, lower barrier to entry jobs. I appreciate point b., prioritizing production uses, since we need good jobs and high tax generating facilities in our city. Thank you!	7/23/2018
7441	19	/policies/bicycling/	Conduct driver education so they understand the bicycles are part of traffic, not an obstacle to traffic. Also, remove bike lanes on 26th and 28th streets. Not all of us can bike. And there is a whole stinking Greenway one street down--if that is too dangerous to bike on, then deal with that instead of adding bike lanes on adjacent streets.	7/23/2018
7442	71	/policies/soil-health/	Policy 71: f: Reduce impervious cover, including removal of synthetic turf	7/23/2018
7443	60	/policies/intrinsic-value-of-properties/	This policy seems to be in direct competition to the change in zoning for housing. Our neighborhoods are part of the cities historic heritage yet the plan wants the ability to place a multi-dwelling and possibly high level property within these historic neighborhoods. Both can't be done. Let's preserve the beauty of our city by not allowing high density, multi level Dwellings within it historic neighborhoods.	7/23/2018
7444	51	/policies/healthy-pre-k-development/	I very much agree with the need to increase high quality childcare slots in the city! Thanks	7/23/2018
7445	50	/policies/access-to-technology/	The information infrastructure is the "utility" of the future. There was a time when not everyone had access to electricity. Use electrical utility as a model to deliver electronic parity to everyone in the city.	7/23/2018
7446	72	/policies/sustainable-water-system-management/	Policy 72: i: Continue providing safe high-quality drinking water throughout public spaces while being stewards of public resources and infrastructure. Collaborate with MPRB toward meeting MPCA's swimmable, fishable, fixable waters\ quality standards.	7/23/2018
7447	6	/policies/pedestrian-oriented-building-and-site-de	Strongly agree with nearly every action step within Policy 6. The city should be oriented towards people, not cars!	7/23/2018
7448	1	/policies/access-to-housing/	If city officials decide to ratify historic racial inequity and existing economic disparities because of unfounded fears and political hyperbole driven by thinly-disguised self-interest, they will perpetuate harms that the goals underlying this plan are intended to ameliorate. The city will suffer from ever widening economic disparity, displacement, sprawl, and ecological harm, just like the Bay Area and Seattle, which let their land use decisions be driven by self interested wealthy landowners who benefit from municipal protection against even attenuated threats to their property values over the social good. Every neighborhood should be expected to share in the benefits and the burdens of growing and accommodating the population influx Minneapolis will receive over the next two decades. Exemptions or carveouts given that correspond to wealth, or property value, or race, whether those correlations are intentional or not, will sharpen divisions in the city and will be a historic mistake. The only equitable policy is one that doesn't choose favorites.	7/23/2018
7449	80	/policies/development-near-metro-stations/	I strongly support development of more walkable districts for living/working/shopping/recreating in the City. We really need this for many, many reasons. Metro stations are a logical place to start given the City's investment in these, but I would really like to see this concept applied more widely than that.	7/23/2018
7450	51	/policies/healthy-pre-k-development/	Make child care affordable. The city should not rely on its grandparents to provide quality pre-school care and enrichment, which I see happening now.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7451	82	/policies/aging/	<p>The 2040 Plan includes many relevant, essential and visionary goals. It evolves into very important policies. Bravo!</p> <p>I am part of this aging population in Minneapolis and I want to be able to remain in my home. This is now called "Aging in Place." Unfortunately, the infill housing boom, although it has many positive benefits such as supporting the tax base, bringing people and families into the city to sustain all kinds of institutions and cultural resources, it has not been positive for Aging in Place:</p> <p>1. The value of my assessed value of my single family home went up \$80,000 in the last 2 years and so taxes are a real consideration. My wife and I want to stay in our home for another 20 years; we have invested a lot in the house and done many improvements. However, we lost a number of trees, views and sunlight. The problem is the market and the builders. They do not all value our bungalows and so one by one, people leave. I want a diverse neighborhood -- and that means diverse in income and wealth.</p> <p>I want Minneapolis to help the aging generation develop ways to stay in our homes with dignity, affordability and creative community connections. If more seniors stayed for longer, we could share mowers, snow blowers, transportation, even check in on each other.</p> <p>I would like the city to put pressure on builders and contractors to not be able to drive aging residents out so they can build \$900,000 and over \$ 1 million houses all up and down the street. Affordable housing for those of us responsibly aging in place.</p> <p>Could Minneapolis look into some of the bartering networks for aging residents -- help with cleaning in exchange for gardening or handyman projects....for example. Exchange market.</p>	7/23/2018
7452	0.1	/topics/land-use-built-form/	This is just illogical enough to turn the state red. Thanks Mayor Frye and city council (all secret republicans)?	7/23/2018
7453	52	/policies/human-capital-and-a-trained-workforce/	We all do better when we all do better. (Paul Wellstone)	7/23/2018
7454	66	/policies/air-quality/	<p>You should be incentivizing and promoting the electrification of power equipment including:</p> <ul style="list-style-type: none"> -Transportation vehicles of all kinds (personal road vehicles, boats, city buses, school buses, delivery vans and trucks, etc.) -Lawn care tools that currently use extremely dirty two-stroke engines. -Furnaces and water heaters -Industrial equipment of all kinds -Power generation through new solar generation 	7/23/2018
7455	76	/policies/new-parks/	I strongly support this policy.	7/23/2018
7456	75	/policies/waste-reduction/	Policy 75: d, f, m: In the public realm.	7/23/2018
7457	28	/policies/msp-airport/	<p>Consider working with the MAC to encourage them to speed up security badging procedures for employees. (Takes 3 weeks between hiring and starting work to get a badge.)</p> <p>Also consider encouraging MAC and the businesses at the airport to follow Minneapolis's minimum wage ordinance so that they provide more stable, living wage jobs (because it's a super high-turnover place now that doesn't make it easy for low income or unemployed people to start working there).</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7458	0.1	/topics/land-use-built-form/	<p>Greater density of housing, industrial and commercial will be needed in the future, as the plan calls for. One of the primary approaches seems to be adding 4 plexes and taller housing to achieve affordability along transit corridors such as the Greenway. The goal is important but the plan needs improving. Does this work or does it disenfranchise lower income people from owning a home and committing to the neighborhood, or those who have invested in housing who fear a large building going up next to them? The plan does not provide data to show this works as intended.</p> <p>Here are some critical components that I recommend:</p> <ul style="list-style-type: none"> - There should be affordable housing units required as part of new housing or mixed use developments. - The plan shouldn't make it easy for big developers to come in and put of aesthetically unsuitable or substandard (but possibly still expensive) housing or mixed use while the profits from doing so simply flow out of Minneapolis. Local contractors need to have priority and I don't know if that is built into the goals and methods of this plan. -It is critical to have neighborhood input into where and how such housing is planned and built in the neighborhoods, especially those that that adjoin transit and major road corridors. That helps with the idea of change by potentially working through change with neighborhoods. Is that built in? - Neighborhood streets such as 23rd Ave S to 25th Ave S along Evergreen that adjoin commercial (Interior district 2 I think where a commercial building cut off several north south streets) need attention now and in this plan. Evergreen for example is problematic because it sometimes attracts drug deals, public urinating, speeding cars and other quality of life issues. What we need is crime prevention through the design of healthy community spaces. This should feature slower streets with narrower lanes that encourage flow through along with more walking and biking. Working with GrayBar the community planted trees and prairies, but more can be done to create beautiful landscapes and wayfinding. The city should think twice about doing this kind of thing in the future. <p>George Boody Mpls resident</p>	7/23/2018
------	-----	------------------------------	--	-----------

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7459	15	/policies/transportation-and-equity/	<p>I'm concerned that the intent behind this policy is simpler than it really will be. Currently there is a serious imbalance favoring improvements for cars over improvements for every other mode. We have such a lengthy process for painting new bike lanes on streets that obviously should have bike lanes - there are so many places a bike lane plan can fail. Meanwhile, car lanes are adjusted and repainted all the time without any meaningful process. I was deeply disappointed that the bike lane buffer on Portland/Park Ave was very abruptly completely removed going into the 35W project, with no engagement whatsoever. That bike lane wasn't great to begin with, and now it's completely unsafe. We need a city that works the opposite way. Changes to street layouts to benefit the movement of transit, bikes, and pedestrians should happen essentially by-right. Changes to street layouts to benefit the movement of cars should never, ever happen without comprehensive engagement with the communities and audiences that will be most negatively affected. Not to bring up Rondo out of turn, but.... Rondo you guys....</p> <p>2. On a related note, it just isn't acceptable that so many of the most important bike/ped improvements have to wait multiple years for preliminary engagement to even start, i.e. until the street in question is scheduled for reconstruction. My understanding is that major street reconstructions are scheduled by CLIC. That's fine, of course, but that just can't be the mechanism we use to decide when we add crucial public safety infrastructure like bike lanes and bumpouts. We've known there's a desperate need for changes on Hennepin Ave between 94 and Lake for, at least, decades, for example, but that street is going to stay exactly the same until 2023, and preliminary planning only started this year. A bike rider was very recently killed on this part of Hennepin. How many more people are in danger because of our inaction? People are literally going to be injured and die because of the way we prioritize and put off bike/ped projects currently. What can we do to streamline this process and get, at least, temporary improvements in places before full-scale reconstructions?</p> <p>3. I'm suspicious of the term "modal needs" - I'd like some assurance the city understands that the perceived need for free-flowing car movement is nearly always not a real need, and indeed in direct conflict with the actual needs of every other mode. "Modal needs" are not objective or value-neutral. We've codified via our complete streets policy that our prevailing value in Minneapolis is the movement of pedestrians, bikes, and transit vehicles - not cars. That priority should be clearly integrated throughout the 2040 plan. In this policy, that means clarifying that the "modal needs" of a street are not an excuse for maintaining dangerous conditions, or even for maintaining relatively acceptable conditions if they are maintained at the expense of pedestrian, bike, and transit access.</p> <p>4. Let's embrace cheap car alternatives like scooters, e-bikes, and dockless bike and scooter share. Let's get the city more involved in the equitable distribution and management of those resources. My ideal 2040 Minneapolis includes a municipal fleet of e-scooters and e-bikes that anyone in the city can use for free.</p>	7/23/2018
7460	34	/policies/affordable-housing-preservation/	We must give nonprofits the first crack at buying NOAH!!	7/23/2018
7461	85	/policies/access-to-health-social-and-emergency-s	Minneapolis should be the first city in the nation to offer free healthcare to all its residents.	7/23/2018
7462	25	/policies/innovations-in-transportation-and-infras	I don't understand why we need narrow transportation corridors? If we want more people in the inner city, the infrastructure needs to be maintained not lessened. What are we looking at - Seattle? If is, visit there. It's an expensive city with a better climate (a lot less snow) and many forms of public transportation including cars. They have not narrowed anything!!	7/23/2018
7463	61	/policies/environmental-justice/	Yes!	7/23/2018
7464	0.1	/topics/land-use-built-form/	With giving so much potential profitability to developers who on the city council is benefiting? We will find out	7/23/2018
7465	35	/policies/innovative-housing-types/	Land grants for low-income buyers, where they can own the house and have funds for improvements while the city owns the land. Owner occupied duplexes where both sides have a mortgage to give them stability from rising rents. Stop the conversion of the small starter homes into cut up rentals owned by investors who don't live in the city or care. An example is a formerly nice house with a 2 door garage. I believe that it has ben divided into at least 3 rental units, one in the garage. There are usually three cars in the driveway plus one parked on the grass and 2 more on the street. They only mow once a month and there is often trash strewn about. There is a big piece of plywood on which tenants practice graffiti and I've seen them throwing trash across the railroad tracks onto other property and laughing about it. Most young people in our community are more responsible than that and a joy to have around, but this property is neglected.	7/23/2018
7466	80	/policies/development-near-metro-stations/	Policy 80: a, b, d: Require Compact mix of, accessible via sidewalks and bicycle facilities through green connections	7/23/2018
7467	0.1	/topics/land-use-built-form/	This is your daily reminder that up zoning has never successfully accomplished the objectives in this plan and has only failed in Seattle,	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7468	68	/policies/energy-efficient-buildings/	New buildings should be built to a very high energy efficiency standard. Net Zero should be an expectation at this point. Solar PV should be integrated into as many new projects as possible.	7/23/2018
7469	1	/policies/access-to-housing/	<p>As a longtime homeowner in south Mpls on a street where there is already a mix of single family homes and rental property my family has experienced first hand how problem rental properties can adversely affect quality of life in neighborhoods. I do not think the city is prepared at all for a significant increase in multi-family housing units. There are not enough housing inspectors or fire inspectors currently to address problems with rental properties. Remember that only a few years ago six people died in a rental property on East Lake Street due to inadequate fire safety inspections.</p> <p>That being said, construction of multi-family units by a developer would likely required monthly rents of \$1600-2000 per unit per month in order to guarantee the investors a return on their money. This in no way can be considered affordable housing. There is also the possibility that new expensive multi-family units will drive up property taxes so that seniors and others on fixed incomes will no longer be able to stay in their homes.</p> <p>It is ridiculous to not require off-street parking, especially in neighborhoods where parking is already tight. It is not summer here year round - we can have vicious snow storms and the city is not able to plow all the streets and alleyways very quickly.</p> <p>Not everyone can go without a car. Not everyone can bike or use public transportation. This plan also seems to ignore the Republican party which is hellbent on making sure that the region has a substandard public transportation system.</p> <p>WCCO channel 4 news reported last week that according to a survey, 92% of millenials want to own their own home. How is this plan going to help them do that? Why would you want to increase the number of people that are forced to be permanent renters all their lives? Unless of course, they leave the city of Minneapolis.</p> <p>No one in Minneapolis wants to be another Seattle with sky-high home prices and an increasing homeless population. How is this plan going to prevent that?</p>	7/23/2018
7470	33	/policies/affordable-housing-production/	prioritizing simple, affordable housing for those at or below 50% of the median income is crucial. This needs to be a top goal, with supports and incentives given to agencies that desire to build this housing.	7/23/2018
7471	9	/policies/open-spaces-in-new-development/	I strongly support this policy.	7/23/2018
7472	0.1	/topics/land-use-built-form/	I think it's the interest of full transparency, that the mayor and city council members need to list. Sit addresses so it's publicly known how they are affected. Something doesn't add up here	7/23/2018
7473	1	/policies/access-to-housing/	Minneapolis should be leading the nation in passive home design to reduce money wasted on heating and cooling, reduce pollution generated from wintertime heating and summertime cooling, and delivering real-world affordability for housing.	7/23/2018
7474	63	/policies/food-access/	I don't support requiring stores to stock anything in particular. If customers want nutritious foods, the stores will stock that. It is not the store's responsibility to educate their customers. Instead, work with public health folks to provide education and incentive to seeking healthful food.	7/23/2018
7475	47	/policies/housing-maintenance/	Make it really hard for people to sell properties to developers where they've intentionally let it fall into disrepair to such a degree that "it's not worth rehabbing."	7/23/2018
7476	9	/policies/open-spaces-in-new-development/	More open public spaces should include community gardens, particularly edible gardens. More public trees should be fruit trees. We need more food to be sourced from where the people are.	7/23/2018
7477	68	/policies/energy-efficient-buildings/	Minneapolis should be a global leader in passive building design to eliminate the need for heating and cooling energy use and pollution.	7/23/2018
7478	0.1	/topics/land-use-built-form/	Interior 2: I think this seems like a great build form policy. I live in Corcoran in a single family home and would like to see more dense land use in my neighborhood. I do, however, take issue with the fact that interior 2 is not planned city-wide. Why should we continue the stricter land use and keep density out of the wealthiest areas of the city? Interior 1 is most common in the richest areas of south Minneapolis. I am sick of rich people continuing to restrict who lives by them and rallying to create and enforce exclusive neighborhoods. While I laid the effort to bring some small increases of potential density to those neighborhoods, and am sensitive to the extreme pushback our wonderful planners have received, it is not enough. Please be more radical and make the built form even across neighborhoods. If you drive around Corcoran and then you drive around Page, the houses are not so different. The shops and streets apes are not so different. What is different is the wealth of the people living there. Please do not pander to the elites and instead plan for all of us. Thank you very much.	7/23/2018
7479	35	/policies/innovative-housing-types/	I support the use of SROs and cooperative style housing to help diversify housing options.	7/23/2018
7480	86	/policies/healthy-food-in-institutions/	Policy 86: c, f: In collaboration with MPRB gardens	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7481	11	/policies/skyways/	Skyways definitely need to connect more directly to the street, and should generally be discouraged. Retail at the skyway level should be discouraged as much as possible and encouraged at street level.	7/23/2018
7482	1	/policies/access-to-housing/	I strongly support all of these policies. It is important for many reasons to increase the types of housing that can be built in neighborhoods throughout the city. I like building more dense housing along transit lines, although I'd suggest that the city include planned transit lines in considerations (B Line, C Line, D Line, E Line, Orange Line, Green Line & Blue Line Extensions).	7/23/2018
7483	3	/policies/production-and-processing/	Thank you for including Action Step "f" encouraging adaptive reuse of older industrial and commercial property. By doing so, this policy could also support goal #7: history and culture.	7/23/2018
7484	73	/policies/stormwater-management/	Honest to pete, I was at Lyndale and Franklin the other day when I saw an old guy at the bus stop who, literally, kicked a plastic pop bottle onto the sewer grate and then ushered it through gap above and into the sewer system below. That made me think we need to cover up all the gaps with the sewer grates. Good lord. Also, homeowners should be regularly reminded to rake up and bag the leaves and goo that accumulate on the sewer grates. Most people don't think it's their responsibility, so they let their streets flood.....	7/23/2018
7485	1	/policies/access-to-housing/	I do not support part e of this policy. It is important to have area of single family homes in our city especially in historic neighborhoods that were designed as single family bungalows. Four pieces etc will erode the character of these neighborhoods. Does the whole city have to be dense? I moved from uptown to longfellw because I didn't want to raise a family in such a busy dense neighborhood. I love my quiet little street in Mpls and worry this plan Will take away these pockets of calm and quiet.	7/23/2018
7486	0.1	/topics/land-use-built-form/	Idealism like this doesn't translate to effective governance. Pull your heads out of the sand and get to work on solving the real problems we are faced with	7/23/2018
7487	33	/policies/affordable-housing-production/	I would ask you to make this section stronger in the next draft. I'd like more specific policy recommendations about how you will expand resources and prioritize the needs of those at the lowest incomes.	7/23/2018
7488	75	/policies/waste-reduction/	Use the smaller sized garbage can as the default size.	7/23/2018
7489	84	/policies/public-safety/	We have growing crime rates as it is in Minneapolis. I think we should find ways to get a handle on this before we look at in massively increasing density across the city. Many people do not even want to visit downtown. Let's work on making our city safe with the population we currently have. Once this is under control, then look at how to maintain that level of safety as we increase density.	7/23/2018
7490	92	/policies/identify-and-evaluate-historic-resources/	Including Native American assets.	7/23/2018
7491	4	/policies/access-to-commercial-goods-and-service/	Why require retail only in new buildings? Couldn't it also be encouraged as part of adaptive reuse in existing buildings?	7/23/2018
7492	0.1	/topics/land-use-built-form/	I wonder if Edina would absorb SW Minneapolis - we will pursue it	7/23/2018
7493	0.1	/topics/land-use-built-form/	The plan will virtually wipeout single family housing in the Como neighborhood. Public policy without public discussion is not public policy.	7/23/2018
7494	0.1	/topics/land-use-built-form/	I appreciate that the future land use map allows for higher densities by right. We need more housing, and this makes many historical non-conforming uses conforming again! As a renter who relies on "missing middle" housing like duplexes and fourplexes to allow me affordable rent where I can comfortably live with my large dog, I'm glad to see that in the future, these types of buildings will not be discouraged by zoning.	7/23/2018
7495	14	/policies/tree-canopy-and-urban-forest/	e. Identify and protect green space in every neighborhood, with emphasis on tree diversity and health, native vegetation, and minimizing turf.	7/23/2018
7496	96	/policies/heritage-preservation-recognition/	Policy 96: a, b: Focus on St Anthony Falls and Mississippi River	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			<p>The 2040 plan does not offer any evidence the proposed policies and zoning changes will improve citizens lives. Increasing both the population density and traffic congestion is unlikely to improve anyone's lives except for the developers that will profit. Can the City Planners provide any proof to answer any of the following questions?</p> <ul style="list-style-type: none"> - Why is rent control is not an option? It is not mentioned in the Plan. - Why not tax developers so the City can build affordable housing in a responsible manner? This is also not mentioned in the Plan. - Why are developers better at providing affordable housing than the City? - How will building randomly located apartment buildings will solve the housing issues? Developers will focus on more expensive areas to make higher profits and these will not be affordable. - How will apartment buildings affect single family home values? Apartments will drive adjacent property values down and drive the remaining stock higher. - What effect will large numbers of renters have on neighborhoods? - How many families will be driven out of Minneapolis as single family homes are replaced with apartments? - How will congestion be affected by eliminating parking? - How much will congestion increase at the Lake/Excelsior intersection if multiple apartment towers are built by Bde Maka Ska? - How will reduced parking affect the elderly, handicapped, and families with children especially during winter? - How will reduced parking will affect street cleaning and snow removal? 	7/23/2018
7497	0.1	/topics/land-use-built-form/	<p>The plan is based on free markets and developers. That has not provided equality in the past and will not in the future. There needs to be</p>	
7498	0.1	/topics/land-use-built-form/	<p>I am supportive of the land use and built form maps. It makes sense to legalize fourplexes in all parts of the city. Many neighborhoods have fourplexes that fit in so well that people don't even notice them or think about them, but it would be illegal to build the same structure today. I also support the higher-density zoning on transit corridors. It makes sense to allow more people to live closer to transit - both because many people want to live near transit (driving up prices), and because having more users nearby will mean more transit riders, which makes our transit system work better.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7499	0.1	/topics/land-use-built-form/	<p>Greater density of housing, industrial and commercial will be needed in the future, as the plan calls for. One of the primary approaches seems to be adding 4 plexes and taller housing to achieve affordability along transit corridors such as the Greenway. The goal is important but the plan needs improving. Does this work or does it disenfranchise lower income people from owning a home and committing to the neighborhood, or those who have invested in housing who fear a large building going up next to them? The plan does not provide data to show this works as intended.</p> <p>Here are some critical components that I recommend:</p> <ul style="list-style-type: none"> - There should be affordable housing units required as part of new housing or mixed use developments. - The plan shouldn't make it easy for big developers to come in and put of aesthetically unsuitable or substandard (but possibly still expensive) housing or mixed use while the profits from doing so simply flow out of Minneapolis. That helps with the idea of change by potentially working through change with neighborhoods. Is that built in? - Neighborhood streets such as 23rd Ave S to 25th Ave S along Evergreen Dr that adjoin commercial (Interior district 2 I think where a commercial building cut off several north south streets) need attention now and in this plan. Evergreen Dr, for example, is problematic because it sometimes attracts drug deals, public urinating, speeding cars, excessive noise from commercial during non business hours at the eastern end of Evergreen Dr, and other quality of life issues. What we need is crime prevention through the design of healthy community spaces. This should feature slower street such as Evergreen Dr with narrower lanes that encourage flow through along with more walking and biking. Working with GrayBar the community planted trees and prairies, More can be done to create beautiful landscapes with appropriate lighting and wayfinding. The city should think twice about doing this kind of thing in the future. The plan has building of up to 10 stories along the southern part of Evergreen--Transit 10-- which would be a significant change to those of us living on the north side of Evergreen. The plan needs proactive and strong neighborhood engagement in this and other areas like it, including Corridor 6 on the Greenway east of Minnehaha Ave. <p>George Boody Mpls resident</p>	7/23/2018
7500	82	/policies/aging/	<p>Snow and ice maintenance is critical. Winter is coming for Minneapolis, it happens every year. Without a plan that ensures snow and ice removed so that ALL sides walks, street crossings, curb ramps and public places are cleared, aging seniors will not have safe mobility and access to community life. Downtown sidewalks are simply onto cleared in winter. And the times I have called to report safety issues, the sewer has been "not our job" ... make it your job. Uphold the American with Disability Act and put a policy in place that doesn't require residential snow removal. That has not worked for years and it really IS your job to make sure public sidewalks are safe and accessible. Minneapolis has a growing number of seniors, this has to be top priority and clearly spelled out in the comp plan. Engage the DOJ to help raise up this responsibility to the Met Council and MnDOT. They have not shown leadership on this and have put all cities at risk for lawsuits and people at risk for broken hips, hospital costs and isolation.</p> <p>https://www.fhwa.dot.gov/civilrights/programs/ada_sect504qa.cfm</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7501	0.1	/topics/land-use-built-form/	<p>Greater density of housing, industrial and commercial will be needed in the future, as the plan calls for. 7502	5	/policies/visual-quality-of-new-development/	I can't help but think there needs to be more clarity included in this policy about new development in historic districts. Action step "g" reads as though it would ignore the design guidelines developed specifically for historic properties.	7/23/2018
7503	0.1	/topics/land-use-built-form/	<p>I do not believe that this plan will increase affordable housing in Southwest Minneapolis. I do not support the plan in the current form. I have many concerns: including traffic, decrease of green spaces, pollution and runoff in our creek and lakes, blending new construction with the historic homes in our neighborhoods, and the increased burden on the school system. I believe that 6 stories is too much down Nicollet in our residential neighborhoods.</p> <p>I went to a planning meeting where the individuals representing the plan said that they are a separate entity from MPS so they could not comment on how they would support the growth. It is hard for me to accept any plan that does not engage the school system during the planning process. It feels like families with children are being ignored and left behind in this plan.</p>	7/23/2018
7504	34	/policies/affordable-housing-preservation/	These are the right policy goals, but I'd ask that you make a stronger and more specific set of policies in the next draft. Some potential policy recommendations could include setting parameters around what rent increases are allowed, programs to help landlords invest in housing if they agree to maintain rent levels, right to first refusal policies, and others.	7/23/2018
7505	35	/policies/innovative-housing-types/	Yes, I support these actions and look forward to seeing the city develop new programs that legalize and incentivize the building of new housing types.	7/23/2018
7506	7	/policies/public-realm/	Although this policy indicates it supports Goal #7, there is nothing within the action steps that speaks about the public realm found in historic districts and near landmarks. How will a "citywide framework" incorporate those unique situations? And, conversely, how can design guidelines support whatever framework(s) are developed?	7/23/2018
7507	38	/policies/affordable-housing-near-transit-and-job	Yes, this is important. Ensure that high density levels are allowed around all METRO stations, not just the ones closer to the core.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7508	14	/policies/tree-canopy-and-urban-forest/	<p>The cost savings attributable to trees are important. The aesthetic value is even more important. I have lived in cities that never replaced their elms after the Dutch Elm epidemic - they feel barren and hot.</p> <p>Right now in SW Minneapolis the incentives provided to developers to preserve trees when building infill housing or major additions is NOT sufficient - it is simply more valuable to them to have a bigger house, or to avoid changes in the house design to move, say, egress window wells 10 or 15 feet to reduce conflict with tree roots, than it is to get a few design points for preserving trees. It will only get worse if people are allowed to build duplexes, triplexes and 4-plexes on these same 5000 sq.ft. lots. If you're serious about retaining mature trees (which take many, many years to be replaced by new growth), the incentives must be much greater than they are now. Otherwise you should be honest and take "retain mature trees" out of your action steps - it simply does not and will not happen.</p> <p>Planting a greater diversity of trees on boulevards is important to minimize the risk of heavy tree loss due to epidemics like Dutch Elm and emerald ash borer.</p>	7/23/2018
7509	0.2	/small-area-plans/	<p>When commercial/industrial abuts residential, there needs to be consideration of -noise from large fans, trucks, etc., especially during evenings and weekends</p> <ul style="list-style-type: none"> - excessive lighting that floods houses during all hours - encouraging workers to respect the privacy of nearby housing 	7/23/2018
7510	11	/policies/skyways/	What does the map in Action Step "g" mean? Is that what is being called the downtown core?	7/23/2018
7511	80	/policies/development-near-metro-stations/	These are good policies. Consider setting parking maximums around transit stations.	7/23/2018
7512	16	/policies/environmental-impacts-of-transportation/	Market-priced parking is so important! Right now so much of our parking is "free," i.e. heavily subsidized by taxpayers and thus free to motorists. This skews people's perception on the relative affordability of driving compared to other modes of transportation. Making people pay the actual costs associated with the amount of space that their vehicles take up is so important in reducing our dependence on cars and encouraging people to explore alternatives. It could also help create jobs: if people decide to take a taxi rather than park their car at a paid lot, that money goes to a driver who probably lives in the city.	7/23/2018
7513	81	/policies/social-connectedness/	<ol style="list-style-type: none"> 1. Community Centers and City Parks are doing such fabulous things. Continue to support and add to their resources, yes. 2. Quiet rooms or areas in restaurants: Many older diners and hard-of-hearing folks cannot enjoy restaurant or stay as long as they'd like because of the noise levels. Can the City encourage restaurants to create quieter rooms or sections of tables [with fabric and drapery, a screen and much softer background music]. Many, many people wants this more and more as the decibel levels in bars and restaurants keeps going up. 3. Nice Ride bikes is fantastic and must continue. Monitor the new dock-less program and make sure it doesn't hurt the progress Minneapolis has already made. It is fabulous. 4. The bus stops in St. Paul are amazing spaces for older people, women, and women with children traveling after dark and in the winter. They have bright light, digital read-outs saying when the next bus is estimated to arrive, maps and information that is easy to read and visible. I assume they have emergency call buttons. They are so bright and welcoming. Minneapolis needs to copy them. 	7/23/2018
7514	17	/policies/complete-streets/	There are so many places where I feel out of place as a pedestrian or cyclist. I agree that our built environment should prioritize the safety of people who are walking, biking, or taking transit. People in gas-guzzling cars don't need to be prioritized or accommodated when they are in a huge, inefficient, 2-ton climate controlled box.	7/23/2018
7515	66	/policies/air-quality/	There are individual facilities that are producing unhealthy amounts of air pollution, for example, the industry in North Minneapolis. The environmental hazards and discrimination is. Rey similar to the problem in Flint, MI. Minneapolis has to be proactive not reactive. Provide leadership not wait until the damage has been done to children and other living things.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7516	80	/policies/development-near-metro-stations/	<p>The Transit-Oriented development is planned along the Kenilworth corridor and adjacent areas. It's a prairie and woods restoration area and it makes Minneapolis a unique and desirable place to live. We should preserve these special green spaces and not trade them for a few apartment buildings. The many other places the City could scarifies for affordable housing.</p> <p>Has the agreement with Minneapolis Park and Recreation Board been signed to re-purpose the land use along the Kenilworth corridor?</p> <p>What will happen if the 21st Street Metro Station is never built? The plan will destroy the neighborhood with no obvious gains.</p>	7/23/2018
7517	20	/policies/transit/	<p>Improving our transit system will improve the quality of life for current residents, and it will help the city continue to grow by attracting new residents. I moved to Minneapolis in 2010 and one of my biggest concerns was that the transit system was not as developed as other cities I was exploring. I know peers of mine from college who wouldn't have even considered Minneapolis because it's hard to get around without owning a car, which is a huge expense.</p>	7/23/2018
7518	20	/policies/transit/	<p>While I appreciate the need to serve high densities, don't forget to ensure high frequency in areas with high ridership (regardless of density). The two may not always be the same.</p>	7/23/2018
7519	41	/policies/tenant-protections/	<p>These are good things, especially in terms of supporting organizations that proactively help tenants know their rights. Consider the following proposals to increase protections for tenants:</p> <ul style="list-style-type: none"> - Rent stablization, allowing for growth in rents at a reasonable rate. - Right to First Refusal for tenants to try and buy a building before it goes on the market. - Setting rules around rental application costs. - Require "just cause" to be proven for evictions. - Assistance for tenants going to housing court. 	7/23/2018
7520	22	/policies/downtown-transportation/	<p>There needs to be a more concerted effort to address safety at downtown bus stops, especially along Hennepin Avenue.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7521	13	/policies/landscaping/	<p>CHANGE THIS SENTENCE FROM Landscaping: Require landscaping in conjunction with new development that complements its surroundings and enhances the built environment.</p> <p>to Landscaping: Require environmentally-friendly landscaping in conjunction with new development that complements its surroundings and enhances the natural and built environment and contributes to ecological health.</p> <p>Please delete a) In general, larger, well-placed, contiguous planting areas that create and define public and private spaces shall be preferred to smaller, disconnected areas. This one is a huge mistake! Every area counts; however small, so wiping out small areas in favor of large areas really threatens the smaller pockets of native plants that help pollinators and birds.</p> <p>Change c. Landscaped areas should include plant and tree types that address ecological function, including the interception and filtration of stormwater, reduction of the urban heat island effect, and preservation and restoration of natural amenities. Diversity of plant types is essential for ecological health; yet mono-plantings continue.</p> <p>Please ADD: Provide incentives for landowners, landlords and homeowners to replace non-native vegetation with native trees and plants that contribute to ecological health.</p> <p>Change e: Landscaping plans should be designed to MINIMIZE future maintenance including the consideration of irrigation systems, drought and salt-resistant species, ongoing performance of storm water treatment practices, snow storage, access to sun, proximity to buildings, paved surfaces and overhead utilities. Please discourage irrigation systems because water shortages will occur and it should be a crime to suck water out of our rivers and lakes to water lawns, which are ecological wastelands.</p> <p>f. Green roofs, living walls, and porous pavement are encouraged but are not meant to be a substitute for ground-level landscaping of sites as landscaping provides both a natural amenity and aesthetic beauty to the urban landscape. Whuuut? Why is this confusing statement here? Does the writer even understand landscaping for the environment?</p>	7/23/2018
7522	11	/policies/skyways/	<p>Skyways are a pragmatic design choice that acknowledge the often-harsh climate of our state. I work in downtown Minneapolis and I am a big supporter of the skyways. They make downtown more vibrant year-round and encourage people to walk and explore the downtown core of the city.</p>	7/23/2018
7523	0.1	/topics/land-use-built-form/	<p>I think this map looks great! Minneapolis is growing, and there is no equitable way to set aside some parts of the city for growth, while restricting it elsewhere. It looks like you are doing a fair job allowing for growth throughout the city. I've heard so much concern from some people in my neighborhood, that I'm honestly surprised to see that the built form for my neighborhood actually looks pretty similar to what's already here. I'm sure there will be pressure to create a vision that is ultimately more restrictive, but I hope we'll be able to resist that pressure, because the best way to create more housing in our city is to build a little more everywhere.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7524	16	/policies/environmental-impacts-of-transportation/	<p>1. We should eliminate laws and regulations that make it harder or less attractive for people to bike and walk. First and foremost, bikes act much more like pedestrians than cars. It doesn't make sense to ask bike riders to act like cars. All that does is make sure the only people who bike in Minneapolis are the ones brave enough to do that - so predominantly young and middle-age straight white men. Bikes need a better solution, and a consistent solution, for left turns. At a clear intersection, bikes don't need to stop at stop signs or wait for green lights. Pedestrians don't need to wait for green lights at clear intersections either! Especially not when it's freezing, hot, or raining! Beyond not tracking logically, the enforcement of these kinds of regulations has historically been alarmingly inequitable. Homeless residents and black and brown residents are exceedingly more likely to be cited for these offenses; meanwhile all our scholarship in transportation planning tells us they literally are not reasonable offenses.</p> <p>2. We need to stop tiptoeing about the damage cars do and the need to restrict their access and freedom of movement. I'm glad to see "continue to disincentivize driving," but we just have to be more frank than that. We need a sharp and immediate reduction in private car use. We have to stop bending to the will of non-residents who commute to Minneapolis (as well as Minneapolis residents who have cars). It is so much more important to curb climate change than to be popular with people who live in Eden Prairie. Can we have an honest conversation about our regional expectations for travel time across the city? Why do we accept that it should take less than 15 minutes to get downtown from Diamond Lake? I don't have a car and it sometimes takes me 45-60 minutes to get from Stevens Square to West Bank on the bus. Intracity travel at 2.5 mph is definitely too slow, but it's time to admit that 45 mph is also too fast. It's not a reasonable expectation in a city, and the sooner we embrace that, the sooner we can take real steps to cut back on cars in the city.</p> <p>3. We need a better transit funding mechanism. This is state legislation unfortunately, but I think we all agree that the status quo is counterproductive for residents of Minneapolis. We need to work with the state to open up new transit funding mechanisms. We should be able to vote tax ourselves (like essentially all of our peer cities do) to fund transit projects like ABRT, the Greenway LRT/streetcar, and the Nicollet-Central corridor.</p> <p>4. Much of this policy relates closely to land use. Many Minneapolis residents (and regional residents) are essentially forced to own and use private cars because we have a shortage of homes and urban neighborhoods where not owning cars makes sense. Reducing our reliance on private cars definitively means building vastly more dense housing in all parts of the city and working to undo job sprawl and cut back on reverse commuting. Anyone can get by without a car if the land use cooperates.</p>	7/23/2018
7525	0.1	/topics/land-use-built-form/	<p>I live at 52 & Washburn and I oppose this outrageous plan which will increase density, decrease community and fail to offer truly affordable housing.</p> <p>This is a strong and vibrant community. Don't destroy some of the neighborhoods that make Minneapolis one of the world's best places to live.</p> <p>Thank you the work you do and your support of our neighbors and communities.</p> <p>Ellin Day</p>	7/23/2018
7526	0.1	/topics/land-use-built-form/	<p>I think this map looks great! Minneapolis is growing, and there is no equitable way to set aside some parts of the city for growth, while restricting it elsewhere. It looks like you are doing a fair job allowing for growth throughout the city.</p> <p>I've heard so much concern from some people in my neighborhood, that I'm honestly surprised to see that the built form for my neighborhood actually looks pretty similar to what's already here. I'm sure there will be pressure to create a vision that is ultimately more restrictive, but I hope we'll be able to resist that pressure, because the best way to create more housing in our city is to build a little more everywhere.</p>	7/23/2018
7527	46	/policies/healthy-housing/	<p>Please add policies around addressing energy efficiency opportunities as part of healthy housing programming.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7528	47	/policies/housing-maintenance/	There is a rapidly growing shortage of workers in the trades. This has been discussed in the trade press for at least 15 years. Skilled workers in HVAC, plumbing and electrical are retiring and are not being replaced by enough new workers. I have recently had several conversations with contractors about tradespeople getting \$3 to \$10k bonuses if they join a company and stay a year. It's going to be hard for low and moderate income people to access affordable help with maintenance if this continues. Can Minneapolis encourage MnSCU to restore an emphasis on technical school programs and encourage marketing the trades to young people as a way to make a good living? Incomes are much, much higher than in the service and retail sectors and the need is large and growing.	7/23/2018
7529	19	/policies/bicycling/	Increase preference for building protected bike lanes over unprotected bike lanes.	7/23/2018
7530	6	/policies/pedestrian-oriented-building-and-site-de	I very strongly support this policy.	7/23/2018
7531	80	/policies/development-near-metro-stations/	Many people want to live near transit corridors, which leads to increased housing and rental prices - especially rental. I agree that it's important to increase the supply of housing near METRO stations, and I am even more in support of ensuring that there is an adequate supply of affordable housing near METRO stations. Public transit might be a convenience for everyone, but it's a necessity for lower-income residents of the city who can't afford to own a car.	7/23/2018
7532	6	/policies/pedestrian-oriented-building-and-site-de	These are great policies. Do them all!	7/23/2018
7533	29	/policies/creative-sector-economy/	The reuse of existing and historic buildings needs to be incorporated into this somewhere--perhaps as part of Action Step "b" or as a new action step. It could then support Goal #7	7/23/2018
7534	34	/policies/affordable-housing-preservation/	We live in North Minneapolis and bought a house in 2017. We have been told that home ownership is the best way to create intergenerational prosperity, so we deeply believe in protecting the access low-income families like ours have to purchase homes, We also believe part of affordable housing is letting residents stay in their homes and promoting home ownership of affordable, fixer-upper, or existing housing stock in the Northside to keep neighborhoods whole.	7/23/2018
7535	51	/policies/healthy-pre-k-development/	i agree with all of the above. I work in this field, and one of the needs seems to be preschool day treatment. the ones we refer to constantly have a waiting list. another need is for child care that can address some of the needs of children who have both child care and social/emotional needs who do not meet the criteria for day treatment.	7/23/2018
7536	83	/policies/people-with-disabilities/	It's so important that the city vastly upgrade its sidewalks and streets to be more accessible for people with disabilities.	7/23/2018
7537	0.1	/topics/land-use-built-form/	I'd like to see more density in my neighborhood in Corcoran. Housing and access are important to me. I'd also like to see friendly bike and transit infrastructure.	7/23/2018
7538	17	/policies/complete-streets/	I need to know that this policy has regulatory teeth. I don't trust that it does. I love it dearly but I don't trust that it will play out. 1. I'm disappointed there's no discussion of winter maintenance here. They aren't complete streets if they aren't complete in January too. 2. There are a whole lot of different entities that perform construction on and adjacent to city streets - public crews, private crews, and contracted crews - and right now, none of them are particularly good at following our existing complete streets policy, and there don't seem to be any repercussions for that failing. What kind of culture change needs to happen to fix that? How can we get all kinds of construction crews on board and make sure their construction accommodations are both compliant and predictable? 3. What are curbside management policies? That's not a phrase I'm familiar with. Some term-defining would be helpful for such an important part of the 2040 plan.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7539	70	/policies/ecology-and-habitat/	<p>a) should be stronger: Discourage use of pesticides and encourage organic practices to improve and maintain soil health and healthy habitat and ecosystems. "and herbicides" is not needed because pesticides include herbicides, insecticides, fungicides, etc.</p> <p>Please add "Implement all components of the Minneapolis Pollinator Resolution" including actions by all City departments to protect pollinators and increase native vegetation for foraging.</p> <p>Please add: Require all new developments to use birdsafe glass or other methods to prevent bird-glass collisions.</p> <p>Please add: Design and deliver public-awareness programs that educate residents about how to protect urban wildlife.</p>	7/23/2018
7540	31	/policies/creative-workers/	There needs to be safe, affordable spaces for making art and other creative endeavors throughout the city. This could include the reuse of existing/historic properties.	7/23/2018
7541	63	/policies/food-access/	these are great ideas and i look forward to them being implemented	7/23/2018
7542	68	/policies/energy-efficient-buildings/	Use city resources to make energy efficiency more accessible for those who face barriers to it - low-income folks, people with language barriers, small business owners, multi-family building tenants, etc.	7/23/2018
7543	18	/policies/walking/	Yes!!!!!!!!!!!!!! YAY!!!!!! I love this policy!!!! Thank you!!!!!!!!!! Do even more! Walking in Minneapolis is one of the great joys of my life and I want everyone to have access to it and I want it to be better for everyone everywhere. Make Minneapolis the best walking city in North America!	7/23/2018
7544	38	/policies/affordable-housing-near-transit-and-job-	We bought a house along Penn Avenue North in part because we are transit-dependent and also because it was affordable and we want to raise a family in North Minneapolis. However, with the C line bus-rapid-transit project and the blue line extension coming to our area, we are nervous about large-scale development that will make Penn Avenue unfriendly or dangerous to children. Why not invest in the families and run-down, "naturally occurring affordable housing" already along Penn instead of opening the doors to out-of-state large developers with one-size-fits all policies and profit motives?	7/23/2018
7545	65	/policies/urban-agriculture-and-food-production/	<p>Add: Prohibit the use of any type of pesticides in community gardens and other food production areas.</p> <p>Add: In all neighborhoods, expand the number and sizes of green spaces in all neighborhoods that provide native vegetation for pollinator forage.</p>	7/23/2018
7546	1	/policies/access-to-housing/	<p>I agree with this proposal. I reside in Kingfield (though on the end closest to Lyndale) and we have a mix of housing types. My neighbors to the south talk about density as if the world is ending. It is so racist and classist and generally awful. I hope that as we look at what to build, that we take into consideration several things:</p> <p>Developers must be required to develop affordable housing. I am troubled when I see a building go up that looks like the one just off the freeway at 35th/2nd where it has an indoor gym and amenities that drive up the cost of the rent. I want to see neighborhoods be able to thrive without relying on gentrification as the only metric of what that means.</p> <p>Additionally, we should very strategically try to build housing that is accessible for aging in place. I own an old, totally inaccessible house. I'll be in my 60s in 2040 and looking at something a bit easier to deal with. However, there's nothing in the area that targets that kind of demographic. I'd love to see that change so we could have a vibrant neighborhood across generations!</p> <p>Please, please, please don't listen to the wealthiest homeowners on this. I know they're loud and make it so that the rest of us can't stomach community meetings. I care, but I can't stand to sit there. It is hard to afford housing in this city. That can't be our future.</p>	7/23/2018
7547	54	/policies/supporting-economic-growth/	There needs to be a specific plan for north Minneapolis that ties together these different economic housing and disparity goals. I get it that these policies apply city wide and so some would be more important than others in north Minneapolis but by not calling it out there is not enough focus there. St. Paul has a special section for their big opportunity zones. That makes more sense. Let's make it a focus to really move north Minneapolis to a place where more people want to live there.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7548	30	/policies/arts-and-cultural-assets/	<p>1. The Minnesota Orchestra is back stronger than ever and that is a real asset. Support student passes and tickets in any way possible.</p> <p>2. The public art projects and activities that I see are humanizing and inspiring and I encourage Minneapolis to continue and also expand this support. I particularly encourage public art projects in the neighborhoods that lack resources and need help finding places and spaces to perform, paint, build or complete public art projects.</p> <p>3. The Minneapolis theaters, art galleries, music schools and performances, dance centers, etc. continue to thrive and grow -- in diversity, in vision and in professionalism.</p> <p>4. Minneapolis needs to get the word out and in big ways that:</p> <p>"The 2015 Minneapolis Creative Index report noted that creative sales contributed \$4.5 Billion into Minneapolis's economy--nearly eight times the size of Minneapolis's sports sector revenues. Creative jobs in Minneapolis have grown by 10.4% since 2006 and are represented in 72 different industries." I was in theater for 12 years and a real theater and orchestra and literary arts supporter and audience member and I DIDN'T KNOW THAT FINANCIAL FACT. Publicize that to businesses, employers, theater goers and everyone in city government.</p>	7/23/2018
7549	5	/policies/visual-quality-of-new-development/	<p>The City should dictate architectural styles for new buildings that will go into established, historic neighborhoods. If a new, modern apartment building goes in-between historic homes, it will destroy the character of the area and downgrade visual appeal / interest.</p> <p>This policy contradicts the 2040 goal of preserving the History and Culture of the city.</p>	7/23/2018
7550	33	/policies/affordable-housing-production/	<p>"Produce" Does that mean new construction? Adaptive reuse? Both?</p> <p>How do we ensure there is *quality* affordable housing?</p> <p>Aren't Policies 33 and 32 intrinsically linked? How do we create, preserve, maintain, and improve affordable housing for everyone?</p>	7/23/2018
7551	65	/policies/urban-agriculture-and-food-production/	<p>I would also add supporting urban gardens in schools and daycare centers as well as community centers and places of worship.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7552	1	/policies/access-to-housing/	<p>As a renter in Minneapolis I want to voice that I am in support of the 2040 plan. I currently reside in ward 13, the East Harriet neighborhood. It has become evident to me that MANY of my neighbors are not in support of this plan, and I think it is imperative for folks to fully educate themselves on exactly what the plan entails. The signs that the anti-2040 plan folks have created 'don't bulldoze our neighborhoods' are nothing but inflammatory scare tactics. I have been a renter in Minneapolis for the past 8 years. During those 8 years I have seen rent prices skyrocket and the nature of finding a place turn into an extremely stressful competition. 8 years ago I would see a 'for rent' sign, contact the landlord, set up a showing and submit an application. The last 2 times I have moved it was a completely different experience. Landlords are holding 'open showings' in which tons of potential renters show up to see the property at the same time, everyone fights for applications and races against each other to fill them out and be the first one to hand it to the landlord. This kind of climate is not something that I find appealing nor accessible for most. Currently, in my neighborhood, my city council person, Linea Palmisano, has spoken out against the plan, stating that she backs the home owners of ward 13. She has been quoted as saying that she believes in upholding the 'integrity' of the neighborhood. I want Ms. Palmisano, and the city council members who vote on this plan to understand three very important points. First, I want to focus on the word integrity. According to webster's dictionary, integrity can be defined as adherence to moral and ethical principles; soundness of moral character; honesty. When I look around my neighborhood I see wealthy white individuals who are afraid of more diverse communities coming into the neighborhood. This language is nothing but racially coded language. What Ms. Palmisano and other neighbors are really saying is that they want to stay in their homogenized bubbles. This is not Minneapolis, well at least not the Minneapolis I want to live in and strive for. The second point I want to make is that housing simply isn't affordable for most. Yes there are a lot of homeowners but there are a lot of renters. Individuals in my generation are no longer able to purchase homes like our parents and grandparents used to, and it is far worse for communities of color. I would also be remiss if I didn't mention the ways in which LGBTQ individuals are experiencing extremely high rates of homelessness. I work with LGBTQ individuals experiencing violence as a profession, and many folks are living in homes with 5 + people in order to afford living in the city. Many are also couch hopping and staying in and out of shelters. There is a serious housing crisis in this city. I encourage folks working on the plan to reach out to DV agencies and organizations working homeless individuals to understand just how bad it is. In last month my organization has actually been relocating other individuals to different states because they can't find shelter or housing here at all. The last point I want to make is that this land, is not our land. When we think about what we own, we ought to check ourselves.</p>	7/23/2018
7553	35	/policies/innovative-housing-types/	<p>Yes!! We need to expand our idea of what constitutes acceptable housing. Cooperatives, SROs, "tiny houses", and developments that share common areas all make perfect sense and should not be arbitrarily prohibited.</p>	7/23/2018
7554	0.1	/topics/land-use-built-form/	<p>I support the idea that we should achieve greater housing supply and diversity by allowing small-scale residential structures on traditional size city lots. However, I strongly feel that 4-plexes go too far in this direction. I do not think Interior 1 areas should allow more than a triplex. In my neighborhood (Fulton) these are only 5000 sq.ft. lots.</p> <p>I would prefer to make up the difference by allowing multifamily housing on public transit routes to either include a larger number of transit routes (not just "select" routes as you say elsewhere in the plan) and/or allowing more units per building on these transit routes.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7555	1	/policies/access-to-housing/	<p>I am a resident of Ward 13. I strongly support the 2040 plan unlike a lot of my neighbors in SW Minneapolis. The area of SW Minneapolis I live in (East Harriet) was platted(built) before racist covenants came about, and a lot of my neighbors think this excludes this area as benefiting from a history of racist housing policy. That is not the case, this neighborhood has historically organized to keep out people of color and enforce racial/income based segregation.</p> <p>I'm particularly excited about re-zoning the city to allow for missing middle housing which will help to complete our neighborhoods. SW Minneapolis is incomplete and sparse. The wealth that exists there has been passed down through generations while large populations of people in our cities were denied access to this sort of equity accumulation through exclusionary policies. Refusing to allow for denser neighborhoods is going to exacerbate unaffordable housing which is an increasing problem in Minneapolis.</p> <p>My neighbors believe that density = crime, but this is also incorrect and ignores the complexities of concentrated poverty.</p> <p>A lot of my neighbors believe that large developers will buy up their homes in SW Minneapolis and destroy the integrity of the neighborhood. I believe this is veiled language for entitlement. Fourplexes and Duplexes already exist in these neighborhoods, people are just unaware that they are there because they already fit in nicely with the aesthetic. It is unlikely that a large developer will do this, but I would like to see the city incentivizing/investing in small developers for these projects so this doesn't happen.</p> <p>As for the Built form interior 1 designation, this designation is not applied evenly throughout the city and I'd like to recommend Interior 2 & 3 as the minimum. The city has made their #1 goal to reverse disparities created by racist covenants & housing policy having Interior 2 & 3 as the minimum would make this goal more effective.</p> <p>My city council member, Linea Palmisano owns a house in Linden Hills, and also advocates for continued exclusionary policies. SW Minneapolis has continuously advocated (and won) exclusionary housing policies. I'd like to see the city go forward with re-zoning ward 13. Do not let wealth (un-fairing accumulated) entitle SW Minneapolis residents to live in de-facto gated communities one more time in the history of Minneapolis. Everyone should have access to good neighborhoods independent of wealth, and the Minneapolis 2040 plan is only a tiny step in the right direction.</p>	7/23/2018
7556	72	/policies/sustainable-water-system-management/	<p>Add: Develop and implement a public awareness program to educate people about the need and methods for water conservation.</p> <p>Encourage people to reduce water uses, especially for wasteful uses such as watering lawns.</p>	7/23/2018
7557	14	/policies/tree-canopy-and-urban-forest/	also expand the plant a tree program, and add sliding fee scales for more needed/specific communities	7/23/2018
7558	17	/policies/complete-streets/	I get around Minneapolis primarily by bicycle, sometimes by walking, and drive about once a week. It is very common, while out on foot or bicycle, to encounter situations at intersections where I know I have the right-of-way, but also know if I actually went out into the intersection I would most likely be killed. Some people like to complain about scofflaw cyclists, but really, it seems to be that deadly behavior by motorists is much-more the norm. I hope we'll continue to take steps that calm automobile traffic, especially in the NW quadrant ("North"), which hasn't seen some of the infrastructure investments found elsewhere in the city.	7/23/2018
7559	48	/policies/data-driven-decisions/	Yes! Data-driven decision making leads to the best outcome and should help make arguments less emotional and more civil.	7/23/2018
7560	42	/policies/expand-homeownership/	It isn't just about supporting homeownership, but deterring absentee landlords and nonresident, developer/flippers.	7/23/2018
7561	38	/policies/affordable-housing-near-transit-and-job-	This is a fantastic idea that supports an important goal of making housing accessible and affordable. I completely support policies that aim to achieve this.	7/23/2018
7562	1	/policies/access-to-housing/	I support this policy with a full heart! I own a home in the Corcoran neighborhood and I want a mix of housing, including renters, fourplexes, and higher dense buildings too. This plan is incredibly exciting for the future of Minneapolis. It will bring vibrancy to our city and help reduce the inequities that have hurt Minneapolis. Please be courageous and do what is right for the next generation. -Kevin Kirsch	7/23/2018
7563	0.1	/topics/land-use-built-form/	Significantly dial back transit corridor definitions and zoning uplift. These aren't big streets. Ever watch a city bus have to back up or get all the traffic at the corner to move back just so it can swing a turn? These are not throughfares. Don't treat them as such.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7564	1	/policies/access-to-housing/	<p>The negative effects of redlining are not over and still are imbedded in state, regional and city transportation policy. Increase the transportation investment in North Minneapolis, from developing green space, bikeways, improving sidewalks, updating curb ramps. Seriously commit to clearing sidewalks in winter.</p> <p>Redesign the walk and bike facilities along Hiawatha to be accessible to all people. Hiawatha and Lake are not functional and are substandard for people biking, walking and using transit. Hiawatha and Lake transit station and intersection are not even comparable to the level investment and commitment to the facilities near the US bank stadium.</p>	7/23/2018
7565	0.1	/topics/land-use-built-form/	<p>The north end of Lake of the Isles is bordering downtown as much as its neighbors to the east. Why is that zoned as if it is far out? It troubles me that these maps don't really look much different from the old redlining maps. Proximity to dense spaces also goes for the area with mansions near the Mississippi -- why those aren't zoned Interior 3 as well is beyond me (I mean, it's not beyond me, but I think it's a problem we should remedy).</p> <p>Overall, I think Interior 2 could extend further south. If we want transit/bus lines to be effective, we should add more flexible options to space down there. It could also change the "total jerk" level of discourse. It is not lost on me that I live in an Interior 2 zoned location (used to live in Interior 3 and I notice no real difference in my life) and it's the people in the interior 1 zone who are acting as though the world would end with an apartment building. If people want to live in the suburbs, they exist all around us. Let's be a city.</p>	7/23/2018
7566	1	/policies/access-to-housing/	<p>YES. You nailed this one. The current zoning code is a driver of racial disparities. I would LOVE to see the city reverse these unfair restrictions and bring more housing options to neighborhoods across the city. I think it is VERY APPROPRIATE for every neighborhood to allow up to a fourplex to be built. This is a forward-thinking and truly progressive strategy and I like it a lot.</p>	7/23/2018
7567	43	/policies/housing-displacement/	<p>How about exploring how the city's heritage preservation tools could be used to minimize displacement? Although often seen as a means toward gentrification, preservation can be used to help strengthen existing communities. This would be even more possible with the right financial or regulatory tools tied to districts.</p>	7/23/2018
7568	42	/policies/expand-homeownership/	<p>When the supply of housing is restricted, then people who already own their homes will benefit. While I understand the urge to see that benefit extended to low income residents and people of color, I wonder if a better solution isn't to focus on drastically increasing the supply housing. Some may complain that this would lower their property values, but that really just shows agreement with the point that building more housing lowers the overall cost of housing.</p>	7/23/2018
7569	0.1	/topics/land-use-built-form/	<p>Commenting to express my support for the Minneapolis 2040 plan as written, including the city-wide 4-plex provision. I am a Minneapolis resident of over 10 years, and have been both a renter and a homeowner.</p>	7/23/2018
7570	31	/policies/creative-workers/	<p>These are excellent goals and actions for diversity and equal access to artistic training, casting and working in the arts. I hope Minneapolis is aware of theaters such as Penumbra Theatre, Ten Thousand Things Theater, the Guthrie's "Nine" experimental theater, Illusion Theater when they are looking for arts groups that can effectively train, cast and underwrite projects for artists of color.</p> <p>These are fabulous action plans. I applaud them all!</p> <p>Minneapolis must publicize this fact often and broadly; it is phenomenal and so important for residents to know and participate in: Get the word out!! "The 2015 Minneapolis Creative Index report noted that creative sales contributed \$4.5 Billion into Minneapolis's economy--nearly eight times the size of Minneapolis's sports sector revenues. Creative jobs in Minneapolis have grown by 10.4% since 2006 and are represented in 72 different industries.</p>	7/23/2018
7571	0.1	/topics/land-use-built-form/	<p>I know the Council is already backing away from the fourplex part of the plan in the face of NIMBY outrage, but I just want to add a voice in support of increased density in current single-family-zoned neighborhoods. The goals of making housing affordable and keeping everyone else out of single-family areas are mutually incompatible, and I strongly urge the city to pursue the former, rather than the latter.</p>	7/23/2018
7572	4	/policies/access-to-commercial-goods-and-service	<p>This sounds fabulous. I would love to live in a city with more commercial options throughout. I especially like the idea of requiring retail to be incorporated in new development in areas with high density and pedestrian/transit traffic.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7573	0.1	/topics/land-use-built-form/	<p>I recommend interior 2 and 3 at a minimum, if we want to keep growing our city. Interior 1 does not seem to be in line with the goals of reversing the historical housing disparities through restrictive covenants. As an example, parts of the Seward neighborhood are very close to city job centers, but the proposed build form designation for that neighborhood doesn't match this need.</p> <p>If cities don't grow, they will die. Please be courageous and make Minneapolis a leader in attracting talent, housing our residents, and creating a vibrant, thriving future. - Kevin Kirsch</p>	7/23/2018
7574	76	/policies/new-parks/	<p>Easy access to parks and greenspace is my favorite thing about living in Minneapolis. I think this is a great idea.</p>	7/23/2018
7575	40	/policies/homelessness/	<p>An unfortunate reality of the homeless is that affordable housing would be secure, stable, and permanent for them. Affordable housing is a great way to save families from homelessness and it can make it less expensive to accommodate the homeless! I enthusiastically support policies that support these action steps.</p>	7/23/2018
7576	19	/policies/bicycling/	<p>I love this policy! I think it could be even better.</p> <ol style="list-style-type: none"> 1. Let's embrace a higher minimum standard for bike facilities. We've pretty much moved beyond sharrows by now, but we should recognize that simple painted lanes just don't do it for enough people. The minimum standard should be delineator-protected bike lanes. On streets where buses currently pick up and drop off in bike lanes, we need to quickly find a different solution. We could be painting floating bus stops on these streets (again, at a minimum!) - we don't need major street reconstruction to get this improvement going. 2. Let's add some language about maintenance of bike infrastructure after it's built. Our delineator-protected lanes take a serious beating, especially in winter, and it often takes months to replace that infrastructure. Bikes navigate potholes differently than both cars and pedestrians. More and more people are biking in the winter (and it's going to get even more popular as ebikes enter the market) - how do we make sure bike infrastructure is maintained after snowfall? 3. Extremely crucial point - we need vastly better enforcement to keep bike infrastructure clear of obstacles (primarily cars). Just this morning I watched a woman biking ahead of me have to swerve out of the bike lane to avoid getting doored. A few hours later I had to navigate around a corporate van with an energy drink logo parked in the bike lane on 11th Ave behind the Vikings stadium. Yesterday I had to merge into traffic because a delivery truck was parked in the 28th St protected bike lane. Right now there is a temporary concrete semaphore blocking the 3rd Ave protected lane. Last week I saw a picture of a UPS truck parked in the Washington Ave GRADE-SEPARATED bike lane. A few weeks ago I was physically attacked by a driver parked in the 7th St bike lane next to Target Field when I asked them to please move. Every evening rush hour, Maple Grove Transit buses stage in the 10th St bike lane near Twins Way. Literally more than 50% of the trips I take up and down Nicollet Mall (I keep track), I see someone driving a private car on our one downtown pedestrian mall. Where is the city on this? Why doesn't reporting to 311 ever do anything? What's the plan to fix this? 4. To improve bike access to destinations all over the city, let's set a goal of replacing one parking spot on every block with commercial use and existing street parking with a bike corral! :) 	7/23/2018
7577	2	/policies/access-to-employment/	<p>I especially like D. I work at the University of Minnesota and know we gobble up land. One thing that is beyond the city's purview, but that may support goal D is if the University could get more funding for building renovation (or demolition and on prem rebuilds).</p> <p>I do go between transit, personal bike, Lyft, and personal car for work transit and want to note that express bus timing is spotty at best and the 18 is slow as molasses. I know MPLS doesn't run MTA, but advocating for additional express lines on routes like the 18 or the 21 that only stop every 10 blocks or so would make transit so amazing. This is in practice in other cities. Somehow we have to get the legislature to fund transit so that these plans are tied to transit that works.</p>	7/23/2018
7578	49	/policies/educational-and-economic-access/	<p>The action steps for this policy seem pretty weak, especially considering this is the primary policy for education. There needs to be an effort to create safe schools in here somewhere and there needs to be specific information about access to Pre-K-12, college/university, technical schools, and professional development opportunities. How can the City's planning efforts support education in a more meaningful way?</p>	7/23/2018
7579	0.1	/topics/land-use-built-form/	<p>Stop the McMansions! Allow for different types of housing option so more than just the rich can live in our neighborhoods!</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7580	73	/policies/stormwater-management/	What about incorporating stormwater filtration planters into all street reconstruction projects like what places like New York, DC, Philadelphia, Chicago, Portland, Seattle, and Saint Paul are doing?	7/23/2018
7581	35	/policies/innovative-housing-types/	It's hard to anticipate the future so being responsive towards it is the next best thing. I think this is a fantastic policy for the city!	7/23/2018
7582	53	/policies/quality-of-life/	Action Step C should specifically include historic landmarks and districts.	7/23/2018
7583	1	/policies/access-to-housing/	I really love the idea of allowing 1-4 unit properties throughout the city. I have neighbors that tell me we live in a "single family neighborhood", not realizing that I live in a multi-family building myself! So much of the city already has blocks that benefit from 2-4 unit properties, I think this is something that should be codified as acceptable everywhere. Additionally, I own the multi-family building that I live in. I have encouraged friends who I looking to buy their first home to consider buying a duplex, and they think that's a great idea. However, it seems the only thing harder than buying a single-family home in Minneapolis is buying a duplex. There is significant need for more 2-4 unit properties, and we need to allow them to be built.	7/23/2018
7584	20	/policies/transit/	Bus lanes!!!! Not just transit priority, actual bus lanes! And transit signal priority that works consistently, not just for ABRT and better, but for local routes too. Let's work with Metro Transit, St. Paul, Hennepin and Ramsey Counties, and the state to find a way to vote to tax ourselves to pay for better transit. This is what all our friends in LA, PDX, Seattle, Denver, DFW, etc etc etc are doing. We need to be able to do it too!	7/23/2018
7585	36	/policies/innovative-housing-strategies/	I support this and I especially support high density housing (with market determined parking amounts) in transit corridors and fourplexes generally in the city.	7/23/2018
7586	17	/policies/complete-streets/	I support all measures that make walking, biking, and taking transit easier, more convenient, and safer. If this happens at the expense of the convenience of drivers, this is okay with me. I have a car and sometimes drive. It's often inconvenient, and is probably getting worse, honestly. I understand that this is a natural consequence of living in a vibrant, dense area, and accept it as a trade-off. It encourages me to walk, bike, and take transit more, which is better for the planet and for the city. This is a net win for the common good.	7/23/2018
7587	3	/policies/production-and-processing/	Businesses engaged in manufacturing have often not been great environmental stewards. In looking at this, please engage with environmental health experts to ensure we're not creating problems for residents downwind of/next to industrial buildings. Also, when actually moving this into policy proposals, use plain language so that people understand what the trade-offs are.	7/23/2018
7588	51	/policies/healthy-pre-k-development/	We can't even fully fund the public schools now. This year alone they weren't able to fund \$33 million. How on earth are you going to pay for these wonderful ideas?	7/23/2018
7589	55	/policies/business-innovation-and-expansion/	Action Step "e" needs to include consideration for refinement of the preservation ordinance and careful consideration of how new/revisions to design guidelines can encourage smaller-scale entrepreneurs.	7/23/2018
7590	16	/policies/environmental-impacts-of-transportation/	These are all excellent and I support the plan 100%. I plan to purchase a hybrid car in the next year.	7/23/2018
7591	21	/policies/freight/	Can we make it clear here that semi trucks are not appropriate in places where we want people to be walking and biking? There shouldn't ever be semis downtown, for example - let's find other ways to move freight in busier areas.	7/23/2018
7592	18	/policies/walking/	My neighborhood has many old buildings that appear to once have been stores or shops of some kind, with housing on the second floor. I don't know if they'd be economically viable today, but I'd love it if just one or two were converted back into something like a small cafe. Will there be any allowances for more mixed-use buildings, maybe not at ALL intersections, but at significantly more than I'm currently seeing?	7/23/2018
7593	0.1	/topics/land-use-built-form/	I support larger uses in Corridor 4 Districts both as a way to accommodate population growth and as a way to decrease the max density on Interior 1 Districts from 4-plex down to 3-plex. In particular I support allowing buildings up to 4 stories. I actually do not think developers should be allowed to build 1 story buildings in Corridor 4 Districts - it is a waste of land to have a single story building along what should be a dense corridor.	7/23/2018
7594	15	/policies/transportation-and-equity/	As a senior, age 70, walking and biking, or use of mass transit, are not options. I need and will continue to use a vehicle for shopping and doctor appointments, etc. Vehicles should be a priority in planning. Recent changes to one-way bike traffic on 26th and 28th street should be changed back to multiple vehicle traffic.	7/23/2018
7595	19	/policies/bicycling/	Increasing the number of protected bikeways in the city would be HUGE. Minneapolis is doing a great job but I'd love to see more bikeways protected by concrete barriers, curbs, etc. The bike infrastructure is one of Minneapolis' greatest strengths, but it can always be better and I'd love to see it prioritized!	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7596	4	/policies/access-to-commercial-goods-and-service	<p>One challenge of walking/busing to shopping is that buses are often packed and you may not be able to carry everything. When I lived in NYC, most businesses (like grocery stores) offered delivery of things you bought in-store. Another alternative is education about how to transport things around without a car. To be honest, I'm not wild about shopping for substantial things without a trunk to throw things into. So I guess it is good to consider what businesses would need to do/offer to make this a workable solution. Happy to walk/bus to things!</p> <p>Taking bags of shopping on a bus gets you as many glares as a stroller, to be honest.</p>	7/23/2018
7597	17	/policies/complete-streets/	<p>I am proud of Minneapolis for passing Complete Streets!!!! Walking first, biking or mass transit next and only then, get in the car. If you do, car pool.</p> <p>Bravo on every single action plan.</p>	7/23/2018
7598	18	/policies/walking/	<p>Bravo all the way -- every single action.</p>	7/23/2018
7599	26	/policies/vision-zero/	<p>Focus on design rather than enforcement. Enforcement shouldn't even be necessary with proper design. Enforcement also exacerbates racial disparities.</p>	7/23/2018
7600	80	/policies/development-near-metro-stations/	<p>Yes please SO MUCH in particular to H. It is too deserted around many of the stations and having more activity would make those walks safer. Even the Lake Street station, which has shops by it, has them organized into a strip mall, which helps increase pedestrian foot traffic not at all (and with it, a level of safety). This is an excellent goal.</p>	7/23/2018
7601	0.1	/topics/land-use-built-form/	<p>Two wrongs do not make a right. Although the goal to enhance population density in the Minneapolis metro area is sound, the relaxed approach to removing development restrictions in this reform falls short of its goal and causes several far reaching negatives. My relaxing code restrictions for development, developers will chase profit by destroying neighborhood pockets, not assist in reducing housing costs by targeting early millennial wealth and create a population density that cannot be met by the transportation system.</p> <p>A perfect example is drive through the Excelsior/Calhoun/Lake area at rush hour today. It is nearly gridlock and these proposals introduce sizeable high rise development; which will make that area a nightmare. The proposal is developed by someone focused on profit not someone who lives in these neighborhoods. Brad Farrell (Linden Hills resident for 10+ years)</p>	7/23/2018
7602	16	/policies/environmental-impacts-of-transportation	<p>I live in a 1-car household, and we usually drive about once a week. I know that not everyone can live my lifestyle, but I also know that more can than do, and that some that can would like to, but choose not to because of how unsafe it feels to be around motorists. I appreciate the steps the city has taken to make walking and biking more viable, and I hope we'll continue on that path.</p>	7/23/2018
7603	16	/policies/environmental-impacts-of-transportation	<p>All these action steps require funding. Make sure the budget invests in all these incentives to increase ease and punctuality of public transportation. We will need more routes and more frequent runs of existing routes to improve the attractiveness of public transportation. All buses added to the fleet should be all electric</p> <p>Make sure Action step b includes public transportation.</p> <p>Regarding ActionStep i. buses and trucks idle in the winter to keep their heaters going and in the summer to keep their AC units going. There need to be alternatives for these accessories in buses, trucks and cars - battery operated heaters on the floor near the driver and battery operated fans, for instance.</p>	7/23/2018
7604	19	/policies/bicycling/	<p>You are moving in such a good direction. Bravo again!!!! Secured storage, storage lockers and changing and shower facilities are critical -- especially if more women are going to bike to work.</p> <p>Some bicycle crossing across busy streets are clearly marked, but others are not. I trust the city will make them all consistent.</p>	7/23/2018
7605	33	/policies/affordable-housing-production/	<p>Can you please define "affordable"? It seems like you often switch between Affordable Housing, the subsidized residential homes, and affordable housing that is more accessible perhaps to younger people who have just begun working.</p>	7/23/2018
7606	20	/policies/transit/	<p>I'm frustrated with how transit funding works at the regional and state level, and I'm wondering if there are ways Minneapolis can fund its own transit projects locally (within city limits)? Regional projects are great, but decades pass while we're waiting for all the players to get on the same page and meanwhile, city residents in our increasingly dense, increasingly hard-to-drive-in city still have basically the same so-so transit options they had ten or twenty years ago. How can we do better at providing more options for our own residents while waiting for all the regional drama to play out?</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7607	14	/policies/tree-canopy-and-urban-forest/	Why is our system of planting street trees so different than everywhere else I've lived? In those places, non-profits facilitated volunteer tree plantings to plant street trees. I think this resulted in residents feeling more invested in their trees and it meant there was always capacity to meet 100% of the demand (sometimes the selection was narrowed as the season went on, but you could always get a tree if you wanted one). Our system sounds better on paper, but in reality I see tons of empty street tree spots and most people have no investment in their street trees. People treat them like they are traffic signs"i.e. someone else's responsibility.	7/23/2018
7608	25	/policies/innovations-in-transportation-and-infras	Interesting. I'm glad someone is thinking about this.	7/23/2018
7609	94	/policies/heritage-preservation-regulation/	Heritage Preservation should seek to restore the dense, car-free lifestyle of Minneapolis's golden age. Neighborhoods that were once alive with corner stores are now commercial deserts, largely as a result of later zoning changes, in violation of the neighborhood's historical character. In it's heyday, large families (9-12 children) were common in Minneapolis. To achieve the same historical density with today's smaller family sizes, subdivision of lots or houses must be encouraged. Most zoning restrictions are utterly at odds with MPLS's corner store historical character. Such restrictions should be removed so that MPLS can regain it's historic vitality and walkability.	7/23/2018
7610	1	/policies/access-to-housing/	I do NOT agree with Policy 1 of the 2040 Plan. There is not enough evidence to support the theory that "upzoning" the entire City will result in affordable housing. The character of many of our neighborhoods will be threatened and developers are likely to be the biggest beneficiaries of the plan, when they build larger, more expensive dwellings that are out of reach to lower-income residents. There will be fewer affordable starter homes available for families and individuals whose dream it is to own property. Furthermore, the plan will likely generate traffic, noise, and parking issues in neighborhoods that are not structured to support increased density. I would hope that our City Council could come up with a plan that is more strategic and deliberate in accomplishing sustainable objectives for Minneapolis, instead of backing a one-size-fits-all proposal that may result in devastating consequences for our city.	7/23/2018
7611	17	/policies/complete-streets/	Stormwater green infrastructure should be part of Complete Streets	7/23/2018
7612	1	/policies/access-to-housing/	Fourplexes everywhere is the minimum. This is absolutely necessary to begin to rollback on prior racial covenants that plagued the city. If we were to go forward with this plan by not including multi-family housing to be allowed in primarily residential neighborhoods, our equity issues would only continue to grow. Access to food, services, and quality transit will be just as bad.	7/23/2018
7613	81	/policies/social-connectedness/	I think creative workers in Minneapolis could perhaps help facilitate the communication, engagement and involvement across the barriers of race, ethnicity, and income differences. They could embody the realities as well as voice them and facilitate active participation across cultural and economic divides.	7/23/2018
7614	72	/policies/sustainable-water-system-management/	I am supportive of this policy. I am surprised that this policy does not show up in the Public Health topic, as providing safe and reliable drinking water is one of the most fundamental public health measures. Investing in aging infrastructure, as well as source water protection inside and outside city boundaries, is critical to ensuring that we continue to have a safe supply of drinking water into the future. We must also dedicate resources to moving beyond the Safe Drinking Water Act - ensuring that we test and, when levels warrant it, treat water for new/emerging contaminants that are currently unregulated.	7/23/2018
7615	57	/policies/cluster-strategy/	This entire policy is poorly written for the general public. It makes sense to create geographic areas dedicated to specific industries, but if you want meaningful feedback, you need to put it into general terms and not use nickel phrases like "business cluster." For action step c, consider how historic property redevelopment (and especially historic industrial properties) can factor into concentrating related industries into a specific area.	7/23/2018
7616	20	/policies/transit/	The City should more proactively partner with Metro Transit to design streetscapes and signals in ways that prioritize transit efficiency and reliability. We should have bus bulbs at every bus stop that gets reconstructed so people have more space to wait and buses don't have to pull in and out of traffic.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7617		6 /policies/pedestrian-oriented-building-and-site-de	<p>YES to A & B! YES please! I love to walk places and don't like ghost towns a lot of places turn into because it's dense, but solely residential.</p> <p>Yes to C & D. This would stop fronts like that old Deluxe Spa (brothel) that ran for something like 30 years before the Beauty Room went in on 43/Chicago. I love not giving people an option to be creepy.</p> <p>Yes to the vast majority of this. My only question is about auto repair shops -- I imagine Minneapolis won't be rid of cars, and what "right-sizing" looks like I just can't envision right now.</p>	7/23/2018
7618		1 /policies/access-to-housing/	<p>If every property owner in Minneapolis had been sent a letter detailing the zoning changes allowed for their property, on neighboring properties, those down the block and across the street, you would have a widespread rebellion on your hands. No doubt about it. You are hearing from people who are particularly engaged and news oriented, and from people who were capable of wading through the dense Minneapolis 2040 Plan.</p> <p>However, a good number of property owners (who are tax payers and voters) are not really aware of the details of the plan and the dramatic changes it would introduce into residential neighborhoods throughout the city. Minneapolis homeowners have invested into their properties hundreds of thousands of dollars to more than millions of dollars, in most cases making the biggest and most important investment of their lives.</p> <p>You would turn the city and property values on their heads by allowing fourplexes and even larger structures on any city residential lot, even on narrow streets with historic homes or starter homes attractive to young or lower-income purchasers.</p> <p>If every property owner were aware of these proposed changes and the potential consequences, you would be surrounded by vociferous protests and opposition. There are more direct ways of increasing the number of housing units considered affordable, and in increasing income opportunity, than changing the nature of every neighborhood the city that citizens have been so careful to nurture.</p> <p>Where is the proof this type of scattered approach would achieve affordability and equity? What about adding more density to locations already prepared to accommodate it (e.g. downtown) and filling in multi-family housing along the largest existing transit routes and near commercial districts?</p> <p>Unless the city plans property buybacks and value equalizations for its homeowners, this plan seems nice on paper, but a nightmare in execution. This would easily lead to a lower percentage of home ownership in the city, and discouraging investment into single-home properties.</p> <p>Go back to the drawing board with a much more focused approach. This city belongs to all of us, including very concerned home owners who have a large stake in the city's future livability and success.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7619	0.1	/topics/land-use-built-form/	<p>My husband and I canvased our block this week (where we have proudly owned our home for 15 years): Between 50th and 49th and on Xerxes Ave S, there are 17 single family homes, 5 duplexes, 4 businesses, 1 mixed use (business in the front, house in the back) and then a 3 story multiplex (not sure of the number of residential unitsâ€”4-6 I am guessingâ€”with businesses on the lower level). The 2040 Plan for my neighborhood suggests a Built Form as Corridor 4. There are a grand total of 0 buildings on my block that are 4 stories and there havenâ€™t been any for at minimum 15 years. We seemed to have grown perfectly fine with our current duplex zoned block. Why the radical change? My block looks NOTHING like the proposed look of Corridor 4; I cannot imagine, nor can the neighbors Iâ€™ve taken to, looking forward to a neighborhood like that. I am not exactly sure how a developer is going to buy my or my neighbors land, demo the single family house, and erect affordable housing on that property in lieu of what those houses are commanding in the market right now. The math doesnâ€™t work. So then what is the point?</p> <p>I ask, how can current home owners not look at this plan through a â€œlens of fearâ€”as Worthington so calls it. She is suggesting that we replace our current neighborhoods and existing housing with higher density based on a theory/practice that has never been worked in a real-world situation so others can move in and we can right wrongs of the past. Worthington and staff are asking those of us that have moved to our neighborhoods, put down roots for years, improved our homes/land and connected with the community to allow for bulldozing our homes to make way for greater density all on the premise of solving housing affordability for others? Are you serious? Surely our city planners have better tools in the toolbox than an unproven theory? How about straight rent control, what about investing disproportionately in communities that lacked it in the past, greater access to home loans for those that did not have access to them due to discriminatory polices of yesteryear, or how aboutâ€”as our city council representative (Linnea) suggested alreadyâ€”to up zone in places that are prepared to up zone. Seems reasonable rather than radical.</p> <p>I can get behind policies that help others now have the same opportunity I hadâ€”moving to a location they desire, near their work place at an affordable price. I will not advocate for allowing the city to sign my closing documents. I encourage our elected officials and civil servants to go back to the drawing board to seek a more incremental and practical growth plan rather than one that is reckless and unproven. I do not support this draft/plan.</p>	7/23/2018
7620	5	/policies/visual-quality-of-new-development/	Not really sure what E means. But this sounds totally reasonable overall.	7/23/2018
7621	46	/policies/healthy-housing/	Yes to this policy!	7/23/2018
7622	11	/policies/skyways/	I hate the skyway system, honestly. I grew up in Denver, which has the 16th Street Mall which is very similar to Nicollet Mall. It's ASTOUNDING how different the two malls are, though, in their level of street/pedestrian activity, and my feeling is that the primary difference is that we have all of our businesses up in the skyway, rather than at mall level. So, I definitely support all measures that would help better connect the skyway to the street level and vice-versa, but this doesn't go nearly far enough and I personally feel that we will never have the vibrant downtown we want until we dramatically reduce skyway-level retail.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7623	22	/policies/downtown-transportation/	<p>I'm really glad this policy is here. There's a lot of good stuff - I like the pieces about activating the streetscape.</p> <p>I'd like it to be clearer what "Manage the supply and design of parking downtown in a manner consistent with objectives for walking, bicycling, and transit users" means. There's an enormous overabundance of parking downtown right now. I hope that "managing the supply" means literally reducing the amount available. I'd like to see some examples of parking design that is "consistent with objectives for walking, bicycling, and transit users." That's a hard gap to bridge effectively and I think this policy needs more evidence that we are capable of doing it.</p> <p>We need a plan to keep private cars off of Nicollet Mall. Truthfully, I think Nicollet Mall should be just the beginning - like hell yeah, let's extend Nicollet Mall to Lake St and build another one on Hennepin from Marcy Holmes to 36th St - but we have what we have, and right now there are simply way too many private car drivers barreling down the mall like it's any other street. It's dangerous and it slows down buses. On that same subject, the status quo of bus vs bike mixing on Nicollet is not great. I personally don't think the right solution is taking the buses off the mall, but I'd like to see some creative thought about how the modes we want to encourage share limited space. (Hey let's dream big and build a transit tunnel like lots of our peer cities!)</p> <p>Action step E is confusing to me: "Ensure that downtown streets are urban in nature, and that streets serving freeway connections reflect the multimodal networks that exist downtown." This sounds like an oxymoron. A street that serves a freeway connection is literally definitively not urban in nature and cannot reflect a multimodal transportation network.</p>	7/23/2018
7624	78	/policies/park-design-and-programming/	<p>It is hard to figure out exactly where this comment belongs: I think the City really needs to work toward creation of a greenway like the Midtown Greenway in North Minneapolis. This would serve many different goals and policies. The Midtown Greenway has been an important locus of development, both residential and commercial, and could bring that to North Minneapolis. It would make quality park space available to a part of the city that does not have nearly as much of it as does South Minneapolis. It would facilitate more trips by bicycle and walking. It would contribute to public health.</p>	7/23/2018
7625	0.1	/topics/land-use-built-form/	<p>The terms "single-family" and "multi-family" should be replaced with "single-unit" and "multi-unit", respectively, throughout the document and going forward when referring to built structures. The use of the term "family" in this context is unclear, confusing, and potentially discriminatory.</p>	7/23/2018
7626	4	/policies/access-to-commercial-goods-and-service	<p>Abolish commercial nodes, and rebuild our commercial districts. Downtown shouldn't need a corridor, the entire downtown core should be open for retail and encourage it to be built on every street.</p> <p>Re-establish the former commercial areas of North and Northeast Minneapolis, where former commercial building have been converted to primarily residential.</p>	7/23/2018
7627	42	/policies/expand-homeownership/	<p>It seems blatantly contradictory to claim the city will support wealth-building housing models, of which home ownership is the primary (perhaps only) recognized model, by rezoning the entire city for multiunit dwellings. Multiunit dwellings will transfer wealth to developers and the rentier class, because they will undoubtedly be nearly universally rental properties. If the city planners have any evidence that increased rental properties lead to wealth-building in the target communities and demographics, please show us. I believe it wasn't shown because they know it doesn't exist. That is the antithesis of a planning to deliver the stated objectives.</p>	7/23/2018
7628	38	/policies/affordable-housing-near-transit-and-job	<p>more #fourplexes please</p>	7/23/2018
7629	33	/policies/affordable-housing-production/	<p>more #fourplexes please</p>	7/23/2018
7630	42	/policies/expand-homeownership/	<p>I'm all for homeownership, but its not a right. I would be happy to help assist low income folks have access to rentals.</p>	7/23/2018
7631	35	/policies/innovative-housing-types/	<p>#fourplexes!</p>	7/23/2018
7632	58	/policies/business-districts-and-corridors/	<p>For action step "a," I appreciate the effort to reinvest in existing buildings. Please consider a focus on historic properties.</p> <p>For action step "c," consider urban main streets (https://www.mainstreet.org/)</p>	7/23/2018
7633	0.1	/topics/land-use-built-form/	<p>Uptown's zoning in this policy seems to be lacking the density it requires for a sustainable area. The main transit are only transit 10? That seems to be woefully undersized for the proximity to downtown and should be upsized.</p>	7/23/2018
7634	1	/policies/access-to-housing/	<p>#fourplexes and abolish zoning as your next step. Minneapolis for Paris-style density imho...</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7635	68	/policies/energy-efficient-buildings/	Add an action step that institutes training and employment for youth in low-tech retrofit projects - such as covering windows with plastic and caulking leaks in homes - as a neighborhood project overseen by existing or newly formed community non-profits. This will imbue the young participants with knowledge and intention for their own future homes and help older homeowners reduce their heating costs while helping to reduce carbon emissions. It might also inspire the youth to engage in more sophisticated energy-efficiency training.	7/23/2018
7636	59	/policies/downtown/	For action step "f" is it really just "promote" strategies? Research. Develop. Implement.	7/23/2018
7637	0.1	/topics/land-use-built-form/	<p>This city desperately needs housing, density, and good transit. The proposed 2040 plan is not perfect but makes excellent progress.</p> <p>This city has for too long been unwilling to build the housing we need. We have a considerable deficit in home growth. Our housing is too expensive. The least we can do is set our zoning in a way that makes a dent.</p> <p>As a fifth-generation Minneapolitan, as someone with a master's degree in Public Policy, as a firm believer in equity and community, please do not listen to those who would pull the ladder up after themselves. No one's neighborhoods are being bulldozed, but many people need a home they can afford.</p> <p>I'll leave it there, but I'll end by saying that I support Neighbors for more Neighbors. Please listen to those of us who will inherit this city - not those who have already benefited so much.</p> <p>Sincerely yours,</p> <p>Regal Johnson 1325 W 27th st. #113</p>	7/23/2018
7638	0.1	/topics/land-use-built-form/	<p>This city desperately needs housing, density, and good transit. 7639	6	/policies/pedestrian-oriented-building-and-site-de	I support eliminating off-street parking minimums. There is an inherent trade-off between the benefits/amenities of density and the ability to easily and cheaply store your car. People who want the latter should live in less-dense areas, or be prepared to pay for car storage, rather than expecting to have their cake and eat it too.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7640	7	/policies/public-realm/	<p>One of the things I like most about Minneapolis -- truly, one of the reasons I'm such a rabid fan of this city -- is the amount of public space we have. We must keep this and I am not a fan of what I've seen for public/private partnerships so far. Let's not go down the degraded public space rabbit hole. I'd rather my taxes go to supporting true public spaces and not the stupid US Bank Stadium.</p> <p>There's a missing equity piece here too. My black friends are bothered by police at parks and that is unacceptable. And I am never bothered because I'm a relatively well-off white woman; if I didn't listen to them/they weren't fully honest with me, I'd have no idea how ridiculous MPD is in those public spaces. So can you add a public space goal that makes a priority of making public spaces truly accessible to the public (all members!)? I'm tired of people I care about not feeling safe because of our police. If we can't figure this out, our public spaces are not for all of Minneapolis.</p>	7/23/2018
7641	0.1	/topics/land-use-built-form/	<p>As a Minneapolis resident I strongly oppose the classification of West 21st street through Kenwood as Corridor 4, and the blocks adjacent to that area as Interior 3. Allowing 3 and 4 story multi unit buildings on these small and quiet neighborhood streets will be detrimental to the this neighborhood and likely most others experiencing the same zoning changes. Existing 2,3,& 4 unit buildings in the area already fill the streets with parked cars. The likely outcome will be real estate developers building shoddy complexes to maximize returns followed by inhabitants maintaining current trend levels of public transit usage along the new corridors. As an every day MetroTransit #114 rider from Uptown to the U of M from 2005-2011, I fully support public transit. However a major problem in Minneapolis public transit is frequency and ride duration, not proximity to routes. Very few routes run often and as express routes like the #114. Most people do not have a problem walking 5-10 blocks provided a bus comes often and get's them where they need to be quickly.</p> <p>Thank you,</p> <p>Luke Franklin 2441 W 22nd St. Minneapolis, MN 55405</p>	7/23/2018
7642	5	/policies/visual-quality-of-new-development/	<p>Encourage buildings to be as close in proximity to each other. Infill development should not create a large gap between previous buildings. This breaks up the continued visuals of the street.</p>	7/23/2018
7643	0.1	/topics/land-use-built-form/	<p>As a Minneapolis resident I strongly oppose the classification of West 21st street through Kenwood as Corridor 4, and the blocks adjacent to that area as Interior 3. 7644	58	/policies/business-districts-and-corridors/	<p>On point F: maintaining affordable commercial rent should be focused specifically on areas where commercial activity is insufficient to activate the street (especially in areas that could bridge corridors) and "commercial deserts" (areas with no commerce within walking distance).</p> <p>This is especially important for elderly people, who rely on occasional storefronts for basic restroom needs.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7645	60	/policies/intrinsic-value-of-properties/	<p>Archaeology must be brought into this. Sometimes the properties are not visible, but they still have intrinsic value.</p> <p>How do we recognize and promote (and thereby protect) properties that do not look historic? In other words, those that are significant for the people who lived/worked there or where an important event happened. That intrinsic value is not well understood by HPC members, much less the general public.</p>	7/23/2018
7646	34	/policies/affordable-housing-preservation/	<p>"Affordable" is a poor term to use in an era of a seller's market, sellers receiving bids exceeding the asking and at record prices and a tight rental market for units priced \$1500 to \$3,500 per month. A better description would be " a percentage of individuals cannot afford current price/rental levels." But this has always been the case. While exceptions for the elderly and disabled may be appropriate, others need to get the education and jobs, a separate program, to support the price/rental cost of the housing they seek in Minneapolis.</p>	7/23/2018
7647	23	/policies/coordinated-development-strategy/	<p>Okay this is a really great policy, but it's not specific enough. We need to name this: white neighborhoods are doing great, and neighborhoods with prominent populations of color are much more likely to not be doing great. We have to be explicit and honest if we want to fix it. It's not subjective to say in no uncertain terms that white people have a very different experience of Minneapolis than people of color.</p>	7/23/2018
7648	4	/policies/access-to-commercial-goods-and-service	<p>I can imagine this is an important issue in lower income areas. I read and see that minority neighborhoods have a food desert, i.e., they have no large and inexpensive grocery stores. Therefore, I think your ideas apply to some parts of the city. I live in a more affluent neighborhood where I think your approach will have a very limited impact or success. In terms of groceries I will always use a car to drive several miles to a food coop (Linden Hills in Mpls or Lakewinds in Richfield) as a local grocery is not going to have the organic produce and selection that I desire. Furthermore, I just can't imagine that people are going to give up using cars to do their shopping when the winters are too dangerous to walk or bike to the store because of ice and snow on the sidewalks. Furthermore, women are not going to feel safe walking to a local shop at night. Many people are going to insist on driving to the big box stores outside the city to save money. Each household is going to always have one or two cars even if they often use public transportation and their feet. Therefore, there is no way of getting around the parking problem associated with increasing the population density in Minneapolis. Maybe some sort of technology will solve the problem. Maybe we can subsidize something like Uber so everyone has access to individualized "public transportation" and thus give up one of their cars.</p>	7/23/2018
7649	6	/policies/pedestrian-oriented-building-and-site-de	<p>Ensure that benches, recycling bins, trash bins, bike racks, drinking fountains and public restrooms throughout our activity districts.</p>	7/23/2018
7650	61	/policies/environmental-justice/	<p>Where is an action step about helping the entire community understand these disparities exist and must end?</p>	7/23/2018
7651	63	/policies/food-access/	<p>None of the action steps address access to culturally appropriate food.</p>	7/23/2018
7652	24	/policies/shared-mobility/	<p>Yes girl!!!! I love this! Let's have a public fleet of shared dockless bikes, e-bikes, and e-scooters! Soon!</p>	7/23/2018
7653	0.1	/topics/land-use-built-form/	<p>As a Minneapolis resident I strongly oppose the classification of West 21st street through Kenwood as Corridor 4, and the blocks adjacent to that area as Interior 3. Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7655	8	/policies/public-safety-through-environmental-de	As long as the sight lines don't mean getting rid of the awesome tree canopies over the streets, this is fine. The streetlights never work enough on my block and I often have to use my phone's flashlight to get to my house without tripping at night. I'd be happy to have more light.	7/23/2018
7656	1	/policies/access-to-housing/	-the drive to increase housing supply is noble but contributing to real estate bubble that when it corrects will worsen housing inequality - growth should be *sustainable*, not just so focused on increasing supply to meet the projected population increase	7/23/2018
7657	1	/policies/access-to-housing/	Strongly oppose zoning changes to allow multi-unit apartment buildings in neighborhoods zoned R-1 single-family homes. Such a policy is ill-conceived and poorly researched that only weakens the city's strongest neighborhoods. Would open the door for continual litigation among residents, developers, and city government. Land availability is not the main issue; there are many available lots and potential "tear-downs" along major transit corridors, near the Mississippi River, and former parcels zoned light industrial that could host apartment buildings. Density can also be achieved by building in areas already designated zoned for multi-unit dwellings. Introducing apartment buildings in Minneapolis' single-family neighborhoods will drive out many of the city's long-term residents who invested in good faith in their homes and neighborhoods and will ultimately reduce property values (tax base). Strongly oppose zoning change to allow six-story apartment buildings along minor bus routes. Most of these routes currently have single-family homes and some two story duplexes and apartments. Six-story apartment buildings would adversely affect these neighborhoods. Say yes to residents, no to greedy developers.	7/23/2018
7658	7	/policies/public-realm/	Ensure that new trees that are durable and strong enough to withstand our elements are apart of all new developments. Renovation or new construction.	7/23/2018
7659	68	/policies/energy-efficient-buildings/	I wish I understood this better. It's really hard as a homeowner to figure out what I can do on this -- I tried looking at solar panels on the roof, but apparently my roof is too shaded. I guess just make sure to let people know what our options are and what we can do to help lessen our footprints in any way possible.	7/23/2018
7660	9	/policies/open-spaces-in-new-development/	Yes, please!	7/23/2018
7661	1	/policies/access-to-housing/	I think it is a great goal that people should be able to live without a car, however our transit system is SO FAR from being able to support this that increasing the density without FIRST improving the transit system will result in even worse gridlock than we currently experience. The first priority focus should be on improving transit.	7/23/2018
7662	1	/policies/access-to-housing/	I am so ashamed that my neighbors have hijacked this topic to preserve an historically racist and abusive tradition of making BIPOCs and the poor bear most all the brunt of housing problems while locking them out of white, single family neighborhoods. The recent city council release only shows that white homeowners expect their interests to be served to the detriment of all others, which they will be unless the plan is kept ambitious. Please do not let our darkest corners of history rule the future, I beg for equitable housing development to be pushed for in all areas, including our redlined sfh wards. We need to stop this insanity before it causes any more harm.	7/23/2018
7663	1	/policies/access-to-housing/	My wife and I are 35 years old, live in the Armatage neighborhood, and own a home. We love it here, and welcome change to allow more diversity. However, we also are skeptical that blanket upzoning across all of our neighborhood (we also hate the mcmansions) without limitations or requirements will not be the right step. We want anyone living in the neighborhood to be vested in where they live, so if you want to own a triplex or fourplex, you need to also live in the home. We have both been renters, and its no surprise that we cared less for the place when we lived there. We are also very concerned about parking in newly created fourplexes or larger. Its irresponsible not to require additional parking with the long winters we have. Its hard enough moving cars around every other day when there is a snow emergency. We are also concerned that there is not a main bullet point or topic related to transportation. You will reduce cars by allowing for more transportation options, ie. light rail, subway, etc. We were generally for the whole goal of the 2040 plan, but there is way too much ambiguity and vagueness. You can't come out and state that the largest cities in the country haven't figured this out, but you then come back and state so much guesswork about the success of this.	7/23/2018
7664	25	/policies/innovations-in-transportation-and-infras	This is good, we need to be seriously thoughtful about this and adopt a healthy skepticism of autonomous and electric car technology. I really don't like the action step H. I don't want my city government promoting itself to tech CEOs who don't actually have any transportation planning experience when we already have transportation solutions we know work (i.e. bus lanes, rail bias, protected bike infrastructure, wide sidewalks, dense housing, and attractive streetscapes).	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7665	0.1	/topics/land-use-built-form/	Signs are going up. Both Democrats, Republicans and Bernie supporters are mad. If you make the single family neighborhoods less desirable, people will leave and others won't come. Minneapolis will be degentrified and become unrecognizable. As soon as you start building, existing homes are worth less. Today's battle over taxes will get much worse People have already started talking to about voting with their feet. Is this your objective, creating more opportunities for developers and multi-family housing?	7/23/2018
7666	76	/policies/new-parks/	Please make sure to plant large shade trees as soon as possible in these new parks - they take a long time to grow, and are wonderful things to have in our more established parks!	7/23/2018
7667	10	/policies/street-grid/	Yes to all of this and please keep working on the Kmart site!!! (There aren't enough exclamation points for my feelings about that). Related: the greenway exit at Nicollet is terrifying. Dead end, no people, slow climb up the hill. At night, I go way past my exit (and house) to Bryant so at least there are people and bikes and cars around.	7/23/2018
7668	6	/policies/pedestrian-oriented-building-and-site-de	Eliminate off-street parking minimums throughout the City & Discourage the establishment of and minimize the size of surface parking lots. These are absolutely the right policies we need for our city. I believe though that they need to go a step further - please eliminate off-street parking minimums and institute parking maximums citywide. If we are serious about addressing climate change and reducing our emissions we need to slash emissions related to transportation. Fewer Parking Space means less cars which leads to less air pollution. Additionally, the Comp Plan should ban the construction of new surface parking lots in the city. They negatively contribute to the urban heat island and issues with stormwater runoff. They negatively impact our tax base as well. There is plenty of on-street parking currently and parking meter zones and prices should be expanded accordingly. I also highly recommend instituting a maximum number of curb cuts allowed city-wide. They negatively impact the pedestrian environment and create more conflict points. Property owners should have to pay an annual fee for their curb cut which should then be used to fund improvements in pedestrian safety - Leading Pedestrian Intervals citywide, eliminate the sidewalk gaps, improve ADA access, expand sidewalks in overcrowded areas, install permeable surfaces to control stormwater runoff.	7/23/2018
7669	64	/policies/food-businesses/	Where do community support agriculture business fit?	7/23/2018
7670	33	/policies/affordable-housing-production/	Everyone is for more affordable housing but I don't see anything in the 2040 plan that lays out a path for more affordable housing. Leaving it up to the developers we'll only get apartment towers for the wealthy like I see in downtown near the waterfront and football stadium. I think this plan's call for rezoning and calling for more multi-family dwellings is just a green light for developers to go wild and build lots of units that no one can afford. Single family homes will be shaded out by apartment towers in neighborhoods where 6 story apartments are totally inappropriate, destroying the appearance of the neighborhood, the neighborhood environment and lower property values.	7/23/2018
7671	11	/policies/skyways/	Get better signage (I know this is on there, but It can't be reiterated enough). It is so easy to get lost in the skyways.	7/23/2018
7672	66	/policies/air-quality/	How about working with state and federal representatives to affect positive change in Washington?	7/23/2018
7673	1	/policies/access-to-housing/	We need more homes, all shapes and sizes, for all our neighbors. Make those "all are welcome" signs real by welcoming more neighbors. The opportunity and amenities that I have, I want them for other people, too, and want to share. However, racist redlining policies of the past are still a major barrier to folks looking to access some of our amazing neighborhoods. I FULLY support fourplexes in all neighborhoods as their height, and massing are frequently comparable to luxury mansions except they provide more opportunity for more people. We have duplexes, triplexes and 6-plexes all over the city and it works just fine occurring in some of the more exclusive areas of the city.	7/23/2018
7674	20	/policies/transit/	Action: Partner with Metro Transit and other transit providers to provide reliable service in Minneapolis through transit advantages, including priority transit lanes. The plan needs to go further and codify that bus and transit only lanes will be a priority. In many corridors (Hennepin, Frankling, Cedar, etc.) buses are a very small percentage of vehicles but carry 50% if not more of the number of people traveling in the corridor. Bus-only lanes speed things up and get people out of their cars. This reduces congestion, air pollution and helps support a vibrant mass transit system.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7675	40	/policies/homelessness/	Add "e": Support and financially assist in relocation of those seeking housing, such as with family and friends who may not live either in Minneapolis or Minnesota.	7/23/2018
7676	67	/policies/climate-resilient-communities/	Action step "b" collaborating to do what?	7/23/2018
7677	80	/policies/development-near-metro-stations/	Demonizing automobiles is counter-productive and divisive and feels politically motivated. Instead, expand parking opportunities downtown, neighborhood business nodes and near parks, lakes, and parkways. Reduce number of unused on-street bicycle paths that cause traffic back-ups. Support extension of light-rail Metro line to North and NE Minneapolis. Support pedestrian improvements and safety.	7/23/2018
7678	10	/policies/street-grid/	Ensure that freeways are starting to be capped or removed by 2040	7/23/2018
7679	26	/policies/vision-zero/	I'm so thankful to see this in the plan. I like that you highlight design speed, perceived safety, and enforcement. I'd appreciate including some of the language in here we have in other policies about the need to disincentivize private car use. Additionally, what can we do to coordinate with other regional cities on this? Our own efforts are good, but it needs to be regionwide ultimately.	7/23/2018
7680	12	/policies/lighting/	It gets really dark in South Minneapolis. Lighting could definitely be improved and I still frequently run into what I jokingly call "safety lights" - lights that turn off when you get close to them. No idea why this happens, but it does with frequency!	7/23/2018
7681	77	/policies/park-access/	I'd love to see more projects like the North Minneapolis Greenway demonstration project implemented. It showcased some great designs that made it much easier for people to get to the parks that it was meant to connect. In addition, I'd like to see an increased focus on clearing sidewalks and paths within park in the winter. Without this, those parks are not accessible for 3 - 5 months per year. There should be an Action Step that describes this.	7/23/2018
7682	14	/policies/tree-canopy-and-urban-forest/	I am 100% in agreement that we need to preserve and increase the number of trees in the city. I am very concerned that the recommended zoning changes encouraging larger multi-unit dwellings will be at cross purposes as developers use every square foot of the lot possible for building. This reduces the area for trees and other green space within the community.	7/23/2018
7683	38	/policies/affordable-housing-near-transit-and-job	Support additional affordable housing near transit stations within existing zoning laws.	7/23/2018
7684	26	/policies/vision-zero/	I'm so thankful to see this in the plan. I like that you highlight design speed, perceived safety, and enforcement. I'd appreciate including some of the language in here we have in other policies about the need to disincentivize private car use. Additionally, what can we do to coordinate with other regional cities on this? Our own efforts are good, but it needs to be regionwide ultimately. Let's talk about removing freeways, for example. That's something other American cities are doing. We can do that. That would help.	7/23/2018
7685	1	/policies/access-to-housing/	I have seen this plan of allowing 3-unit to 6-unit apartments mixed into single family areas and it was a disaster for the neighborhood. I moved to Los Angeles in the early 80's where this zoning plan was instituted. I lived in an area of single family, affordable, small homes and when the zoning changed, developers tore down these charming homes at an alarming rate. At times, 2-3 homes were torn town a week in the same block. Developers built these apartments, with no off-street parking and they were all done with profit in mind, meaning they were done cheaply and with zero aesthetic. People began selling their homes because the new neighborhood was untenable and others who stayed found their homes sandwiched between two apartment buildings. This did not create affordable housing. Sure it increased the density but it became a nightmare for families and as property values plummeted, it altered the tax base for the city. In addition, I have attended city council planning and building meetings for various building & permitting requests and have been shocked by the lack of due diligence exhibited by the city council members on those committees. If they can't be bothered to research or know the facts of issues they are responsible for in their committee, I have absolutely no faith they will do it for something as long lasting as this plan. Finally, to actually think eliminating parking will force people to use public transportation, walk or bike is absurd. All it does is force people to use Uber and Lyft to avoid parking challenges, yet this increases the carbon footprint of an area. The transit being planned like the SWLRT is going to run through the Kenwood corridor where there are no people! Our transit infrastructure and plan is woefully inadequate and not designed to be sustainable, affordable to build or use.	7/23/2018
7686	27	/policies/transportation-partnerships/	This is a really important and good policy, but it's complicated to understand!! How can this be revised so that a regular resident would know what it means?	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7687	53	/policies/quality-of-life/	I think quality of life and high density populations are generally incompatible. You can get away with high density living and still have a high quality of life in cities like New York with all its cultural amenities or San Francisco with its natural beauty but Minneapolis doesn't have those advantages.	7/23/2018
7688	5	/policies/visual-quality-of-new-development/	consider adding the following action step: require architectural design cohesion in new structures when over 90% of buildings on block were built within 10 years of each other or if in historic district.	7/23/2018
7689	13	/policies/landscaping/	I'm not sure if the freeway soundwalls are included in this, but the ones by us (35/36th street exit) are utter trash in terms of looks. It's full of garbage, but why wouldn't it be? Its landscaping goal is "weeds." I'm not sure what is sustainable, but it would be nice to figure out a way for these areas to not look horrible.	7/23/2018
7690	0.1	/topics/land-use-built-form/	I live on a block of 13 residential buildings near the freeway wall in Prospect Park. Duplexes, 4plex, a small apartment building, and single family houses comprise the housing stock. The character and scale of housing makes the block livable. I have concerns about allowing 4plexes on every city lot. I also have concerns about high-rise and high density on University Avenue at the 'top' of the historic core of the neighborhood, between Malcolm and Bedford streets. The high density housing that's been built on the North side of University is an architectural blight so far, and it appears it's about to spread to the South side as well. I think neighbors need to be informed and heard before more hideous, generic high rises create an ugly urban canyon on University Ave. Height of buildings is an issue impacting the charm and character of the Prospect Park section of University Ave.	7/23/2018
7691	20	/policies/transit/	In Action Step d. what does "reliable" service mean? The nicest part of riding light rail is that you don't have to wait very long for the next train. If this could be accomplished with buses, more people would ride the bus. Frequency is key.	7/23/2018
7692	11	/policies/skyways/	Could less-used routes increase the frequency of the buses by using smaller buses running more frequently? Jitneys have been popular in a lot of smaller cities and I have always felt they have a place in a bigger system, too.	7/23/2018
7693	0.1	/topics/land-use-built-form/	Don't allow skyways to cross over Hennepin Ave to attempt to restore the historical views	7/23/2018
7694	2	/policies/access-to-employment/	I understand that these zones were intended as a step up to more equitable land use, but in so many places the choice to do so only reinforces our redlining history. Corridor zoning only a single block's distance from major streets and no gradation? No pressure on rich neighborhoods while poorer and predominantly colored neighborhoods continue to be crowded? We can do better than this, even if that means dragging a bunch of racists into the future kicking and screaming with us. Because they're our neighbors too, and they keep complaining about how their property taxes are too high. You know what helps with that? More housing EVERYWHERE.	7/23/2018
7695	17	/policies/complete-streets/	Worthy goal, though restricting large medical, educational and cultural institutions to current footprint is unrealistic and may in fact be outside city jurisdiction. Opens door for continual litigation.	7/23/2018
7696	14	/policies/tree-canopy-and-urban-forest/	Guys, we are a winter state. How do you prioritize walking and biking as Option A and B? I actually run and bike a lot, but the winter is totally brutal, and I work 20 minutes away by car. Give me a lightrail or subway to the western part of the city and I'm in. I don't have time for bus changes on my way to work. If you can give me those things, I'm all for more density.	7/23/2018
7697	88	/policies/public-services-policy/	Yes. Maintain the tree canopy! And education / training for people like me that own a house and know nothing about anything!	7/23/2018
7698	91	/policies/heritage-preservation-outreach/	However, it would be nice if our sewer lines weren't from the stone age. My healthy tree roots healthily block my sewer line every 10 months. But that comment probably belongs in a different infrastructure category.	7/23/2018
7699	70	/policies/ecology-and-habitat/	I'd like to see the city utilize technology more heavily in order to engage residents. Most of the community engagement events that I have been to have skewed heavily towards people that are 55+, presumably because they don't have small children at home that they have to take care of, and because they work 9-5 jobs. This sort of engagement process is undemocratic. The city should meet people where they are at as much as possible in order to engage with them. One efficient way of doing so might be through the increased use of technology.	7/23/2018
7700	14	/policies/tree-canopy-and-urban-forest/	Action Step c: can this also be used to expand designations or create a new preservation program for intangible heritage?	7/23/2018
7701	92	/policies/identify-and-evaluate-historic-resources/	I agree with this policy, but if you implement all the up zoning that you hope to implement, we won't have a natural habitat left. This plan endangers the nature that we are so lucky to have in our city.	7/23/2018
7702	19	/policies/bicycling/	More fruit trees!	7/23/2018
			I wholeheartedly support a strategic work plan for the HPC.	7/23/2018
			How do you plan to encourage this in the winter?	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7703	89	/policies/technology-in-the-city-enterprise/	I'd like to see the city utilize technology more heavily in order to engage residents. Most of the community engagement events that I have been to have skewed heavily towards people that are 55+, presumably because they don't have small children at home that they have to take care of, and because they work 9-5 jobs. This sort of engagement process is undemocratic. The city should meet people where they are at as much as possible in order to engage with them. One efficient way of doing so might be through the increased use of technology.	7/23/2018
7704	28	/policies/msp-airport/	There's no such thing as an environmentally sound airport! "Nation's greenest airport" is about as helpful a distinction as "ocean's driest whale." The only way to actually accomplish this in a way that makes any real difference would be to replace nearly every flight out of MSP with a passenger rail trip.	7/23/2018
7705	74	/policies/integration-of-water-management-into-	If salt (for sidewalks and whatnot) is a variable in this, homeowner/land owner education would be helpful. I hate using salt, but I also don't want people to sue me for slipping on ice.	7/23/2018
7706	54	/policies/supporting-economic-growth/	At some point in our future we're going to have to accept that the planet can not sustain having more people. When that time comes we're going to have to give up on this corporate need for more consumers and employees in order to have growth to make investors happy. Why can't we consider ways to have a sustainable population rather than always think about growth. Do we have to wait until we nearly walk of the cliff in terms of environmental degradation.	7/23/2018
7707	19	/policies/bicycling/	I wish Protected Bike Lanes were Curb-Protected, and not Sidewalk level. I find The Washington Avenue "PBL" very distracting, and frankly, more unsafe than it was before. Pedestrians are frequently wandering around it, and if they wander into me, I could fall off the curb, into the street, and then be killed by a vehicle. I do not find that to be acceptable.	7/23/2018
7708	93	/policies/stewarding-historic-properties/	The city has a responsibility to steward the historic properties it owns as well.	7/23/2018
7709	72	/policies/sustainable-water-system-management/	Great policy. The up zoning on steroids puts our water systems at risk. The 2 goals seem to be at odds.	7/23/2018
7710	95	/policies/heritage-preservation-financial-incentive	What does action step "b" mean?	7/23/2018
7711	1	/policies/access-to-housing/	There will undoubtedly be debate on the density question. I would like to raise the issue of senior living - affordable, flexible to meet varying needs including Alzheimer's.	7/23/2018
7712	33	/policies/affordable-housing-production/	How will more density make housing more affordable? Why will mixing rental and owner occupied housing do anything but lower property value and decrease area quality. Some renters seem to have little regard for taking care of rentals and maintaining the areas where they live. Will taxes be raised to build housing? Should lower income people move to suburbs with lower cost housing?	7/23/2018
7713	59	/policies/downtown/	a. Disagree 100%. What downtown needs most is additional residential real estate (town houses and condos). Downtown still has a day-time/evening population imbalance that creates huge traffic and results in most restaurants shuttering at 5pm. Focusing on the growth of office space downtown will only make this imbalance worse. b. This sounds like pork-barrel spending. Retailers cannot operate profitably when they only have customers during lunch hour. They need a distribution of customers throughout the day. One thing and one thing only will draw retailers to downtown: a larger residential population. d. Downtown has great green spaces in Loring Park, the river, and the Cedar Lake Trail. The focus should be on making them feel safe later into the day by allowing food & wine concessions. There are currently no food/drink vendors operating in any of them. As a result, Loring Park and the Cedar Lake Trail both feel deserted & dangerous after dark. f. Too vague. Traffic is the number one killer in downtown Minneapolis. Promoting public safety means eliminating lanes and reducing lane width. h. Public signage is super-important, as it is currently VERY difficult for tourists to find entrances to the skyway system. Entrances to Cedar Lake Trail are also very difficult to find.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7714	11	/policies/skyways/	i love the skyways and feel they are unfairly blamed for "lack of street-level vibrancy" downtown	7/23/2018
7715	4	/policies/access-to-commercial-goods-and-service	Bricks-and-mortar commercial properties will decline in future years due to ever increasing online shopping and same-day delivery of goods and services. This proposal is outdated thinking. Instead, encourage grocery store delivery services and encourage development only in food deserts. Let the market determine what is a viable business within existing commercially zoned properties. The ongoing Lake Street K-Mart debacle is strong evidence for keeping government out of business development.	7/23/2018
7716	97	/policies/heritage-preservation-legislative-advoca	I'm thinking you all ran out of steam on this one. :-) What does it mean? Should it be incorporated into another policy instead of having one incomprehensible action step?	7/23/2018
7717	74	/policies/integration-of-water-management-into-	If you have a way of managing storm water run off with all the additional hardscape this "plan" will add to our city, kudos to you. But by your own admission, this is a bit of an experiment and I don't trust that you can pull it off.	7/23/2018
7718	58	/policies/business-districts-and-corridors/	Worthy goals, but not really the role of city government.	7/23/2018
7719	59	/policies/downtown/	Disallow offices and coworking spaces, these are not active uses. Retail should be encouraged or required in the entire downtown core. We have enough transportation and activity on every street to allow this to flourish.	7/23/2018
7720	0.1	/topics/land-use-built-form/	In general, the map for build form is good. I would like to see more density in west and north Minneapolis. The proposed build form still looks a little too like the redlining of the past, and to finally eradicate that from our zoning history southwest Minneapolis is going to have to be zoned for at least interior two if not interior three to allow for more housing options in an area historically zoned only for white people. The land use map is a hot mess though. Far too much of the city is proposed to be zoned urban neighborhood, which does not seem very urban from its definition. We need to completely abandon the idea of "commercial corridors" as they only allow a very small amount of commercial activity and limits commercial space resulting in higher commercial rents. These higher rents make it difficult for small businesses to get developed in the city, more so ones created by people of color or other minorities, because they often have other barriers to entry into the commercial market be it having to overcome racism in the loans industry for the businesses or really just life in general. If the city is serious about looking at this plan through a racial lens, then most of the city needs to be zoned for mixed use. I would suggest either corridor or community mixed use. This would help the city meet its racial equity, walkability, transit, climate, and other goals at the city has in this plan.	7/23/2018
7721	1	/policies/access-to-housing/	I live in East Harriet where I see a variety of apartment buildings and duplexes mixed with single family homes. I think this mix works well, but I have a suggestion for spreading this type of mixed multifamily housing - I believe it should be close to amenities - commercial areas and transit lines. I base this on having lived in a European city for 10 years where I could walk 3 blocks to a commercial node and conduct all my business there and see my neighbors regularly. My kids walked or biked on a protected bike path approximately 5 blocks to their school. I had elderly neighbors in that neighborhood who could get their exercise and socialize by heading out the local shops every day. As for allowing the spread of multi-family house, I believe it makes sense to let it spread slowly. So instead of allowing it anywhere in the city immediately, for the first decade allow it to spread one block from transit lines or existing commercial nodes. The next decade let it spread one more block radius, etc. That gives people time to adjust and will allow the city to see what happens with developers reacting to the new regulations. Another thing I am concerned about going forward is the ability of younger people to afford to buy in the city. I am a renter, but I also owned for 12 years and I felt more invested in the area where I owned. As a renter, I don't feel like I belong on city advisory panels, etc. I would like the city to promote ownership of duplexes, etc. I am afraid that given concentrations of wealth, that we could end up with developers owning blocks of duplexes, etc. and young people never being able to save enough to purchase a home, be it a single family house, a condo, a duplex, or an apartment. I would like the city to adopt policies that favor owner occupancy over developer owned properties.	7/23/2018
7722	33	/policies/affordable-housing-production/	New construction is never going to be affordable to low-income people unless subsidized. Even subsidized new construction "low income housing" rents for more money than perfectly nice older market rate apartments and houses. Rather than subsidizing new construction (which will never have enough funding to meet the need) the city should focus its efforts on preserving the existing naturally occurring affordable housing by encouraging (possibly incentivizing) landlords to keep their units well maintained but still affordable - this means performing proper maintenance, but not doing upgrades to try to transform their buildings into "luxury" housing. The city should also continue to encourage construction of market rate (not "luxury") new construction to relieve pressure in the overall rental housing market.	7/23/2018
7723	19	/policies/bicycling/	We need to be building way more protected bike lanes. They're the best option to make people of all ages feel safe. I recently wrote about this here: https://thefrugalengineer.com/2018/07/10/bike-commuting-in-the-twin-cities/	7/23/2018
7724	74	/policies/integration-of-water-management-into-	where does "use less/no roadway salt" show up? it needs to be in there	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7725	68	/policies/energy-efficient-buildings/	I am thrilled at the addition of these elements. If you don't plan for it - it just won't happen nor will we be ready for disaster.	7/23/2018
7726	0.1	/topics/land-use-built-form/	<p>Even your own administrator, Heather Worthington, admits that this plan will do nothing to help affordable housing.</p> <p>Don't kill off the only form of wealth creation (investing in a single family home) that most citizens have.</p> <p>How very shortsighted you all are.</p> <p>Create good schools. Educated people create jobs. Not city governments. Creative class and STEM jobs create income that allows people to afford housing.</p> <p>You have it all backwards and your flawed plan is going to have many unintended consequences.</p>	7/23/2018
7727	75	/policies/waste-reduction/	<p>Please, please, please think about this and scrap this plan or at least greatly amend this. Listen to your citizens. Listen to your voters. Please.</p> <p>Great policy. How about discouraging tenants from dumping their waste off of the balconies of new development as we have seen happen in our neighborhood. Better yet, how about no balconies on new developments. Better yet, how about scale back this ridiculous "plan" of yours.</p>	7/23/2018
7728	0.1	/topics/land-use-built-form/	<p>Even your own administrator, Heather Worthington, admits that this plan will do nothing to help affordable housing.</p> <p>Don't kill off the only form of wealth creation (investing in a single family home) that most citizens have.</p> <p>How very shortsighted you all are.</p> <p>Create good schools. Educated people create jobs. Not city governments. Creative class and STEM jobs create income that allows people to afford housing.</p> <p>You have it all backwards and your flawed plan is going to have many unintended consequences.</p>	7/23/2018
7729	15	/policies/transportation-and-equity/	<p>Please, please, please think about this and scrap this plan or at least greatly amend this. Listen to your citizens. Listen to your voters. Please.</p> <p>MTA should consider adding express buses to busy routes (21, 16, 18, 5, etc.).</p> <p>The North side is NOT AT ALL adequately served by transit. The buses are constantly full and not frequent enough. On the south side, I'm astounded by how crammed the 5 is every time I've had to take that. Our transit doesn't meet our current needs, much less future ones. I know this is a state legislature / MTA funding issue, but it is insane that they want to starve the system.</p> <p>Getting around in Minneapolis by transit is not easy. It's not the worst, but we do struggle at times as a one car family. It's usually way simpler to get a Lyft, because of how long it takes on the buses.</p>	7/23/2018
7730	0.1	/topics/land-use-built-form/	<p>While growth appears inevitable and we laud our city's goals to plan for increased urban density, the current citywide blanket rezoning with no regulation on developers seems likely to result in an influx of developers who will take advantage of the current zoning in ways that will threaten our unique environmental assets, will likely not address our affordable housing goals, and does NOT focus increased housing where it is most beneficial for citizens. This zoning seems to advantage developers over the interests of our citizens and the overall goals of the 2040 plan.</p> <p>Mark and Colleen Dhennin (residents of Ward 7)</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7731	33	/policies/affordable-housing-production/	Very concerned that the policy you are looking at will actually move people of color and low income people out of the city by making it even more unaffordable. We welcome change by an increase in diversity, however, very skeptical that this will happen. Also, you've stated yourselves that no one has gotten this right in the other big cities yet you also have no data to back up what you are proposing besides "supply and demand" and "market forces." Who is going to develop and supply the affordable housing? Market forces aim for maximum profit, and unfortunately that leaves out our most vulnerable citizens.	7/23/2018
7732	76	/policies/new-parks/	I am all for more parks. But here is a thought. Why don't you engage the community when you think about what kind of amenities they would like to have in their new parks. No more top down decisions. More transparency, more small area/neighborhood engagement. Yes to more parks. More parks, less development.	7/23/2018
7733	34	/policies/affordable-housing-preservation/	<p>You need a strong action step that reads something like this: "Create and enforce policies that require landlords to meet a high standard of building maintenance at all times." No family should have to worry about lead contamination in their housing. The landlord should be required to prevent lead exposure to residents, not just respond when it's documented! Affordable housing should be supported by a community that respects and cares for the people who live there - not exploited by uncaring absent landlords.</p> <p>The City needs to confront the problem of lead contamination much more aggressively, and housing policy is a good place to start. Invest in it and require building owners and managers to do the same.</p>	7/23/2018
7734	63	/policies/food-access/	As long as food is safe, deciding what constitutes "healthy" and "unhealthy" food choices is not the role of government. Opens the door for continual litigation.	7/23/2018
7735	77	/policies/park-access/	<p>--Maintenance funding of parks is not adequate, for example Tower Hill Park is overgrown in Buckthorn and invasive Honeysuckle and it obscures views from Tower Hill even in Winter without leaves on the trees to all directions except straight West.</p> <p>-Trai</p>	7/23/2018
7736	34	/policies/affordable-housing-preservation/	We have some ugly large apartment buildings that I would not miss - Cedar Riverside for instance. But we also have many beautifully made older brick apartment buildings that I would like to see preserved. I think many of the new buildings going up are not very attractive externally and I am concerned that we will find out that new materials contain toxins. Like all the new homes built with sheetrock that contained mold a few years ago. And the offgassing of new carpets. I would like the city to promote maintenance of well made older apartment buildings and to not just let developers rip everything down and build something less well made instead.	7/23/2018
7737	16	/policies/environmental-impacts-of-transportation/	<p>Is "Enforce full compliance with the City's idling ordinance." going to be enforced for police?</p> <p>Also, I really do miss car2go. I know they were pulling some nonsense, but that was amazing.</p> <p>If electric vehicles/no emission vehicles are not affordable to most MPLS residents by 2040 (I imagine they won't be), I hesitate to explore fees that would fall to the lower end of the pay scale here. Tech is not moving fast enough that there will be access to old/used vehicles -- even in 2040 -- with that tech.</p>	7/23/2018
7738	1	/policies/access-to-housing/	I worry about parking on residential streets. Every neighborhood will be like Uptown where residents have to park 2 blocks away from their own homes. Is the solution to mandate buildings to provide off street parking? Will the Twin Cities require permits for residents like on the East Coast?	7/23/2018
7739	76	/policies/new-parks/	Worthy goal, but not the role of city government. By law, this falls under the sole jurisdiction of the Parks and Recreation Board.	7/23/2018
7740	77	/policies/park-access/	Give it a rest with the biking and walking. Of course the parks are accessible by walking and biking. Because the original city planners, the kind of people who actually were truly thoughtful about this city (unlike this bunch), put parks in every neighborhood. Some are larger than others. This is just a waste of space to push Bender's biking bug.	7/23/2018
7741	1	/policies/access-to-housing/	I worry about parking on residential streets. Every neighborhood will be like Uptown where residents have to park 2 blocks away from their own homes. Is the solution to mandate buildings to provide off street parking? Will the Twin Cities require permits for residents like on the East Coast?	7/23/2018
7742	17	/policies/complete-streets/	Yes, and can we ban right turns on red? I'm going to get killed just trying to walk one of these days.	7/23/2018
7743	33	/policies/affordable-housing-production/	As we've seen with the explosion of condominiums in the area, more units does not equal affordable units. What stipulations are in place to "guarantee" builders and landlords offer rents and mortgages that are in range for average families?	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7744	0.1	/topics/land-use-built-form/	One of the many concerns citizens have had is with the up zoning contemplated throughout the city. Affordable housing can be more directly achieved through urban homesteading. If a lot is owned by a governmental unit sell it cheaply for a dollar and give a homesteader two to three years to build a home on the site using ngos such as habitat for humanity. The Minnesota Housing Finance Corp. could lend the money for materials and provide financial guidance through the process. In the end we would have more affordable housing, built wealth in communities that have little and provided local workers with employment during some of the stages of construction. The NRP associations all set up revolving loan programs many still have these revolving funds that could also be used in such a program. It has been done in the past successfully in Irvine Park in St. Paul and other places.	7/23/2018
7745	77	/policies/park-access/	Worthy goals, but again, not the role of city government. This falls under the sole jurisdiction of the Parks and Recreation Board.	7/23/2018
7746	43	/policies/housing-displacement/	There needs to be a LOT of expansion of these programs. The budget/efforts for this should be higher than the efforts to add more units.	7/23/2018
7747	1	/policies/access-to-housing/	I support building fourplexes in neighborhoods where density is low. I also support the building of - and inclusion of - public housing for consideration in the comprehensive plan. Additionally, housing shouldn't be subject to the open market; everyone should be able to have a place to live.	7/23/2018
7748	65	/policies/urban-agriculture-and-food-production/	Urban agricultural and higher density housing are going to often be incompatible. My family grows lots of vegetables in our yard in order to get healthy organic food for ourselves and neighbors. For some vegetables like potatoes, it's hard to find good quality organic produce in stores. So we grow potatoes. We also work hard at trying to create a poly-culture of plants in our yard to support various native bees. However, in my case urban agriculture has a good chance of being incompatible with your plan for the growth of housing. Your plan calls for a 6 story apartment behind my yard which will shade out my garden. Are developers going to have the last word in what's built or will people in the neighborhood going to be able to ask for developer's to compromise where 3 or more stories has an adverse affect on urban agriculture and other neighborhood activities?	7/23/2018
7749	48	/policies/data-driven-decisions/	We presume the zoning density maps were drawn from decisions driven by data predicting needs of affordable housing for the next generation. Care needs to be taken against driving the data towards conclusions relevant to history but unsupported by the future. Affordability like diversity always changes relative to a common denominator. Anticipating where the increased population will come from may drive decisions where the people will want to live and what they will pay. One can imagine a worst case scenario of unintended consequences for just about anything related to real estate.	7/23/2018
7750	89	/policies/technology-in-the-city-enterprise/	Comment on (d.): make vendor bid submissions public. Create a technology etocs oversight mechanism to ensure that data that is collected and/or retained is only used for the purposes stated.	7/23/2018
7751	74	/policies/integration-of-water-management-into-	Eliminate the restrictions on Boulevard Plantings. Allow and encourage Native Plants on all boulevards for better rainwater management, regardless of how tall they get. Instead of limiting green space, install speed bumps at intersections to slow cars, which are the biggest safety concern. Also allow Boulevards and public spaces to be used for public food production.	7/23/2018
7752	82	/policies/aging/	No easy solution but striving for a multi-generation solution helps everyone	7/23/2018
7753	18	/policies/walking/	I also encourage you to not forget that winter exists. What can we do to make it easier to get around in winter/or just plain doable? It's freezing and takes forever to get anywhere on foot due to built up ice/snow. I feel like that's a gaping hole in this plan, which I otherwise love. Winter. It's real. Also, what about alleys? People drive like maniacs. Is there a way to make alley entrances safer or are we just stuck with the old design forever?	7/23/2018
7754	41	/policies/tenant-protections/	I appreciate these goals. I have both owned a home for 12 years and rented for 5 in one location and 1 in another. I feel like I cannot complain about problems in my apartment for fear that my landlord will raise my rent. I also do not feel like I have the same claim to the city as an owner and I feel like I should not serve on community boards because I don't know the neighborhood as well as longer term owners, etc. I think it would be beneficial for renters to know their rights and be encouraged to feel like they have rights.	7/23/2018
7755	2	/policies/access-to-employment/	Demolition of housing stock should be strongly discouraged in the Comp Plan, especially if office space is being proposed. I encourage the city to concentrate and consolidate its office development to areas accessible to transit, like closer to Downtown.	7/23/2018
7756	17	/policies/complete-streets/	Stop demonizing automobiles. Support increasing transit options and pedestrian safety. Reduce number of underused (many) on-street bicycle paths.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7757	78	/policies/park-design-and-programming/	<p>I'm not sure why the city is planning for the park system. Last I checked, we had a park board that was independent from the city council. Is this another power grab?</p> <p>"Prioritize park facility and programming improvements that will have the most positive impact on equity outcomes."</p> <p>How about prioritize facility improvements when and where they are needed regardless of where they occur. Of course you should make sure that the parks in lower income areas are well maintained. But from I understand, the parks in lower income areas are being maintained more often than needed versus in other areas where they are seeing neglect. If a park facility does not need improvements, improve the ones that do.</p>	7/23/2018
7758	53	/policies/quality-of-life/	<p>You base this whole plan on a flawed assumption--that redlining 50+ years ago requires the city to make single family homeowners (many of whom are of color and most of whom were born long after these egregious codes were passed) pay reparations because why again? Because they invested in housing stock and made their neighborhoods nicer? Because they pay the bulk of taxes? Because they are supporting an otherwise failing school district?</p> <p>Well never mind. They just should because "they" are all white and have privilege (even though many are of color and LGBTQ etc).</p> <p>So let's wreck everything that is good about the city. Try to sneak this around them and hold no meetings anywhere near the areas that pay the taxes. Cozy up to developers. Build our tax base for short term gain and short-term redistribution. Ignore our schools. Ignore our roads. (Should be biking anyway.)</p> <p>Please listen to your constituents. Please scrap this plan and start over. There are some good ideas, but get rid of the false premise and the ignorant conclusions that result from it. Save our great city!!!!!!!!!!!!!!</p>	7/23/2018
7759	14	/policies/tree-canopy-and-urban-forest/	<p>I like the focus on the tree canopy. It is important for both aesthetic and sustainability and environmental reasons. I'd love to see more trees planted in our park system. For example, numerous trees were planted in MLK Park this year however the park could have many many more to have more of a forest type feel in the city. It would also be great to see more natural landscapes in our city rather than grass lawn.</p>	7/23/2018
7760	52	/policies/human-capital-and-a-trained-workforce/	<p>What are the specifics of this programming? Short-term job training for adults for entry-level jobs only? Registered apprenticeships with employers that include college credit and union membership? Career and technical education in high schools for young adults to enter the workforce and college and continue to gain skills to move up in a career pathway? Who is spearheading and/or delivering this programming - community based organizations, the school district, Minneapolis College, WorkForce Centers? How will this initiative connect with statewide WIOA efforts and other workforce development initiatives?</p>	7/23/2018
7761	33	/policies/affordable-housing-production/	<p>If increase height allowance on buildings please make sure there is green space - not buildings right up to sidewalk except perhaps if there are front porches and other ways for community building. I meet my neighbors when I am out gardening. Important to get to know neighbors.</p>	7/23/2018
7762	54	/policies/supporting-economic-growth/	<p>It would be useful to summarize how the City currently supports economic growth. Action steps b-d seem like some sort of task force is needed to determine the next steps, this could be a way to involve business leaders and entrepreneurs in planning for the future. I think action step e could be tied back to policies 52 and 44 more directly.</p>	7/23/2018
7763	19	/policies/bicycling/	<p>I think bikes should be licensed to bring in some revenue to help off-set the cost of maintaining all of the bike ways.</p>	7/23/2018
7764	18	/policies/walking/	<p>Worthy goals. Very expensive.</p>	7/23/2018
7765	29	/policies/creative-sector-economy/	<p>This is really important but it's not written in a way that's legible to someone who doesn't work in municipal politics.</p>	7/23/2018
7766	74	/policies/integration-of-water-management-into-	<p>Encourage flat roof construction. Subsidize green roofs on new developments.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7767	19	/policies/bicycling/	<p>Love this! I appreciate the open streets times too. I wonder what we can do for driver education, because, frankly, I've been nearly killed a few times on Bryant in particular (bike boulevard, naturally).</p> <p>I know some complain, but I LOVE THE BLAISDELL PROTECTED LANE! It had the side effect of slowing traffic, which was great because people would get into such serious crashes at 35/36 streets. Though about half of them are knocked down at this point and people still drive in it, they do help.</p>	7/23/2018
7768	33	/policies/affordable-housing-production/	<p>Yes, we should promote a diversity of housing options however it is reckless and irresponsible to open up all single family residences to multi-family housing. What the city is proposing is untested and unproven to accomplish the desired outcome. It would be more responsible to test the hypothesis in a controlled setting before unleashing this policy city-wide.</p>	7/23/2018
7769	31	/policies/creative-workers/	<p>Basic income!!!</p>	7/23/2018
7770	10	/policies/street-grid/	<p>This is a short sighted goal and should be changed to creation of super blocks that have pedestrian and emergency vehicle access only on the interior street and the grid surrounding the aggregation of the four block super block for traffic. This would provide an alternative to the car street sidewalk mix as currently in place and would reduce impervious surfaces and lower cost for public works repaving projects. The example of this in Minneapolis is Milwaukee Avenue.</p>	7/23/2018
7771	0.1	/topics/land-use-built-form/	<p>I am strongly opposed to many of the areas slotted for corridor 4. It shows significant discrimination against those who were not wealthy enough to afford a house on a quieter street but live on a bus route. Putting 4-story buildings in these neighborhoods will destroy the look and adding that kind of density will destroy the community of the block. 4-stories is too tall!!</p>	7/23/2018
7772	1	/policies/access-to-housing/	<p>Re-zoning areas in those neighborhoods furthest from downtown to allow 2-4 unit structures is a boon for developers. If there is no control over the end product, affordable housing being one of the goals, this is not the path to take. I do not see a correlation between multifamily buildings and affordability. The developers and builders are in it for a profit pure and simple. This zoning change has to narrowed down with strict guidelines with what can be built and where.</p>	7/23/2018
7773	0.1	/topics/land-use-built-form/	<p>I am strongly opposed to many of the areas slotted for corridor 4. It shows significant discrimination against those who were not wealthy enough to afford a house on a quieter street but live on a bus route. Putting 4-story buildings in these neighborhoods will destroy the look and adding that kind of density will destroy the community of the block. 4-stories is too tall!!</p>	7/23/2018
7774	43	/policies/housing-displacement/	<p>If the city is serious a about letter B, Develop and implement policies and programs that support the preservation and rehabilitation of naturally occurring affordable housing to prevent the displacement of existing residents.</p> <p>then please provide action steps over how this would be done and what types of policies and programs would preserve naturally occurring affordable housing to keep people in their homes. With all the up-zoning and large scale development this plan welcomes, how pray tell, would people already in affordable housing be prioritized and kept in those homes when the rents/property taxes all around them are increased?</p>	7/23/2018
7775	33	/policies/affordable-housing-production/	<p>Keeping people from being displaced ought to be a non-negotiable, overarching goal that tremendous resources are afforded to.</p>	7/23/2018
7776	19	/policies/bicycling/	<p>Yes! Great! Half the problem is that renters don't have MONEY! Let's figure out how to get more literal MONEY to RENTERS</p>	7/23/2018
7777	61	/policies/environmental-justice/	<p>Completely unrealistic given six months of cold and snow. Reduce number of underused (many) on-street bicycle paths. Enforce traffic laws to ALL users of public streets and paths. Enlarge traffic control signs on bicycle paths.</p>	7/23/2018
7778	0.1	/topics/land-use-built-form/	<p>Should begin phasing out major industry along the Mississippi River through North Minneapolis. It has negative effects on the infrastructure and air quality of the area. The space could be better utilized for homes or parks.</p>	7/23/2018
7779	20	/policies/transit/	<p>I am strongly opposed to many of the areas slotted for corridor 4. It shows significant discrimination against those who were not wealthy enough to afford a house on a quieter street but live on a bus route. Putting 4-story buildings in these neighborhoods will destroy the look and adding that kind of density will destroy the community of the block. 4-stories is too tall!!</p>	7/23/2018
			<p>Support expansion of light-rail Metro lines to North and NE Minneapolis.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7780	1	/policies/access-to-housing/	<p>I have lived in, next to, and near multifamily housing for my entire adult life in Minneapolis, in several different neighborhoods (including Linden Hills, despite the, let's call it "motivated reasoning" of some residents there who like to believe that such housing does not exist). It is simply untrue that residents of multifamily housing are different or worse than single family home residents. Please do not believe the hype.</p> <p>Separately: the draft plan makes a serious contribution to environmental sustainability in lots of ways, not least permitting more density throughout the city. The environmental benefits have been lost in the shouting, but they will be perhaps the plan's most important contribution. We will owe a great many apologies to the next generations for our carelessness and negligence regarding the environment. Please do not be cowed into backing down by those who prefer to think only of themselves.</p>	7/23/2018
7781	34	/policies/affordable-housing-preservation/	This does not go nearly far enough, we need much more robust protections.	7/23/2018
7782	20	/policies/transit/	<p>YES please to bus shelter, heating, lights. Though also consider making it easy to get out of a bus shelter (more than one entrance/exit). I had a friend get trapped in and assaulted at one near Lake/Nicollet because he got cornered and couldn't flee.</p> <p>I'd also add that what is missing here is equity. How can bus service be more equitable.</p> <p>I don't understand G. How does MnPASS help anything?</p>	7/23/2018
7783	61	/policies/environmental-justice/	Establish a mechanism to ensure that costs of cleanup are not borne by those living in contaminated areas--renters usually bear the costs through increased rent when landlords are compelled to improve conditions, whether by being directly instructed to clean up or by being forced to pay higher property tax base rates or levies.	7/23/2018
7784	42	/policies/expand-homeownership/	This plan is anti-renter and should do more to support renters increasing their stake in the community by having the opportunity to own their home. Action Step f. all leases should be required to include an option to purchase the apartment/house/property if desired. At the very least, apartment ownership should be heavily incentivized. Action Step g. all property owners leasing apartments in the city will be required to occupy a physical location within the city limits. (stop the money being sucked out of the city! at least hang on to some property tax even if all the rent is being sent elsewhere!) Action Step h. all leases will be required to follow Honest and Fair Disclosure policies, including, similar to credit card statements, how many years it would take to purchase a similar value property if rent was building toward equity.	7/23/2018
7785	35	/policies/innovative-housing-types/	More more more of this, more specific, more robust, more broad. This is a crisis, we need immediate and massive intervention!	7/23/2018
7786	75	/policies/waste-reduction/	I'm not sure how you'll get to zero waste but I'm glad the city is trying. I'm grateful for the city's current recycling and composting program. It seems like our family hardly has anything in our black waste bin on pick up day. Maybe it's only a matter of getting a greater participation rate in recycling and composting.	7/23/2018
7787	80	/policies/development-near-metro-stations/	<p>This policy makes sense, but I disagree with a few things.</p> <p>"Require a minimum level of development near METRO stations to ensure that land is used efficiently near major transit investments". Nope. You have stated that you can not dictate where development occurs, and this will hold true of this as well. Also, to over develop any area is not healthy for that area. It is like too many rats in a small cage. They may start eating each other.</p> <p>"Minimize the impact of automobiles near METRO stations by tucking parking behind and under buildings, by sharing parking among area uses, by prohibiting the establishment of auto-oriented uses, and by prohibiting the establishment of park-and-ride facilities." Prohibit park and ride facilities? That is crazy making. You want people to carpool, but you don't want them to have a place to meet up? What about people coming into the city from disparate locations, but wanting to carpool into the downtown area. Fool hardy and excessive.</p>	7/23/2018
7788	18	/policies/walking/	Prompt removal of snow and ice from sidewalks citywide is essential for pedestrian safety.	7/23/2018
7789	24	/policies/shared-mobility/	Support as long as the city stops demonizing the automobile. Ban electric scooters on city streets and sidewalks.	7/23/2018
7790	37	/policies/mixed-income-housing/	Yes!!!!!!!!!!!!!! End single family zoning!!!! Make it illegal to ever ever ever build anything like Ward 13 ever again!!!!!!!!!!!!!!	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7791	76	/policies/new-parks/	What I want is a city with more density, but also increased green space to keep livable. No one wants to live in a hot sink of impermeable concrete. The economic incentives for developers are substantial and will drive conversion of single family homes into multiple family properties. Without a similar incentive for parks, we will end up with too many people overusing resources. Developers need to contribute a fixed percentage of the price of new construction into a city wide fund, because that's the only way to take back single family lots to add greenspace to a neighborhood which will be all paved up. (speaking as someone who lived in a 4-plex in Seattle).	7/23/2018
7792	38	/policies/affordable-housing-near-transit-and-job	Add entertainment centers to this mix IMO	7/23/2018
7793	60	/policies/intrinsic-value-of-properties/	There should also be something about the Intrinsic Value of Hills and Steps. Minneapolis has very few hills, and none of them have any steps, which is a real waste. From Rome's Spanish Steps to SF's 16th Ave Tiled Steps to LA's Bunker Hill Steps, hills and steps go together for great _placemaking_	7/23/2018
7794	3	/policies/production-and-processing/	Our residents will be inclined toward residential uses without realizing the many problems with exiling industry to the hinterlands. It is critical to retain jobs of many pay scales in the city in order to sustain a diverse demographic. I don't believe the 2040 plan incorporates enough production zones and unfortunately there is a limited constituency for this use. It is up to the council to fight to preserve them.	7/23/2018
7795	40	/policies/homelessness/	Not just affordable housing, SOCIAL housing!	7/23/2018
7796	15	/policies/transportation-and-equity/	We support Minneapolis working to ensure that we have a transportation network that is equitable and functional, including through the winter, for all its residents, in particular those who are car-free, transit-dependent, and/or disabled. We strongly recommend that winter be included as an integral part of understanding transportation equity and implementing any strategy. We support an equity-based transportation funding algorithm, with prioritization and increased funding to historically unfunded and underfunded modes that serve low income communities, communities of color, and disabled residents. c. We support tracking these measurements, and hope that they are robust enough to include modeshare among those who are wealthy or have multiple transportation options as a measure of the fitness of our transportation network. We encourage the city to develop metrics to make sure that community members can easily and safely access any part of the city without car-dependency, regardless of time of day or season/weather; we believe that this needs to include access to/from/between racially concentrated areas of wealth as well as racially concentrated areas of poverty. Additionally, we request that the city explore and analyze how current and historic transportation choices and networks influence transportation choices and equity. For example, where are there "pinch points" between parts of the city for different modes and how do these impact mode choice and/or cross-community access? How do highways or arterials serve as functional barriers between areas and how does the status quo replicate the segregation impacts of these barriers? ~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee	7/23/2018
7797	21	/policies/freight/	Freight rail infrastructure seems in really poor condition in at least some parts of Minneapolis. The bridge over 15th Street near Van Cleve Park is atrocious and seems to get hit by semis at least once per year. Can we look at safety? And yes to not expanding freight.	7/23/2018
7798	55	/policies/business-innovation-and-expansion/	Action step d seems like it is out of the scope of typical city services, how would this be achieved. Would the City host some sort of annual forum for entrepreneurs and investors? Maybe there is a non-profit that could be partnered with in this area.	7/23/2018
7799	0.1	/topics/land-use-built-form/	My neighbors don't want our 'hood bulldozed. I understand. The built form maps and land use maps were poorly framed and rolled out. I won't pile on to that argument. However, I will say I'm extremely disappointed to see the entire Wedge turned into multifamily housing and competing built forms on facing blocks (see Holmes, Garfield, Colfax, Girard, and others south of Lake). Transitions are great, but need to consider what's happening on both sides of the parcel. I hope my neighbors in their single-family residence will enjoy looking at a 3-story apartment building when our little foursquare disappears.	7/23/2018
7800	25	/policies/innovations-in-transportation-and-infras	Ban drone deliveries.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7801	1	/policies/access-to-housing/	With no caveats that all this explosion of housing be affordable housing, this will be a real race to the bottom. Shame on you, Mayor Frey. You ran SPECIFICALLY on affordable housing and campaigned at my apartment stating that you will stop at nothing until we can get after the issue of un-affordable housing and getting people into stable housing and then you back a plan that completely bends over to accommodate developers of large scale housing. You know when they are given free reign develop consistently develop "luxury apartments" and other buildings that present serious barriers for poor or moderate-income people to reside in.	7/23/2018
7802	1	/policies/access-to-housing/	I wholeheartedly disagree with the idea of allowing multi-unit dwellings in neighborhoods that are predominantly single family homes. It's a blank check for developers to buy up homes in established neighborhoods and fill every inch of them with a fourplex in order to maximize their profit margin. I bought a home in a neighborhood of single family homes because that is the type of neighborhood I desire. If I wanted to live in an area of fourplexes, I would have looked for one. When every decision of the city council seems to favor the profit margin of developers, it makes people question what the motivations of the council. I am only one homeowner who loves her home and neighborhood but I believe that my concerns are representative of many who will be	7/23/2018
7803	0.1	/topics/land-use-built-form/	affected by the density portions of the Plan. More careful consideration of homeowners and their input would help the Plan be successful. We have lived in our 47th St and Bryant Ave S home for 44 years. We moved to the city because we found a home that was AFFORDABLE, it was close to my husband's teaching job and convenient to my job. Even then it was a little community within the city with a small grocery store, hardware store, coffee shop, bakery and restaurant " coming from a small town, we loved it. We are the "oldest" residents on our block. Our home is 100 years young, we have lovingly cared for it, always considering its character when making renovations for our family's comfort. We have never made renovations for the purpose of selling our home. Our plan is to grow old here, in the comfortable home we've created, near the lake we love to walk and run around and in the little community we love. We have no interest in selling our home to a developer! Our neighborhood has NATURALLY gone through many changes. When we moved in there were many elderly neighbors, and a few young families, then it changed to more young families and fewer elderly. Currently, it is a mix of young, old, married, single, multiple races, straight and gay " this has happened without any help from the city! We've always been a bus (and airplane) route which made our street too busy for our children to cross. They played with the children across the alley and were able to run back and forth without fear of traffic. Where will children play on densely populated streets filled with apartment buildings with NO yards? How many FAMILIES will WANT to live in apartments buildings? I cannot imagine our street as the 2040 Plan proposes! Bryant has always been a busy street. It is UNSAFE now when there are cars parked on both sides and busses, bicycles and cars flying down the hill headed north. I can't imagine what the density of the 2040 Plan will change it into. Where would tenants in these multifamily buildings PARK? I do not believe that people will abandon their cars. What studies confirm that idea? WHAT INFRASTRUCTURE CHANGES ARE PLANNED TO ACCOMMODATE THE ISSUES THAT INCREASED DENSITY WILL DEMAND: PARKING, SCHOOLS, GREEN SPACES, WALKABILITY, POLLUTION? Lastly, who's doing the math? A developer will not be able to purchase homes in my neighborhood, tear them down and build apartment buildings that will charge affordable rental rates. DEVELOPERS ARE IN BUSINESS TO MAKE MONEY! WILL THE CITY OF MINNEAPOLIS SUBSIDIZE THESE DEVELOPERS OR TENANTS? WHO WILL PAY FOR IT? HOW IS THAT GOOD FOR OUR CITY? When visitors come to Minneapolis, they are surprised that we have a beautiful, green, vibrant city. Mostly they are impressed with our neighborhoods! OUR NEIGHBORHOODS ARE THE REASON WHY PEOPLE MOVE TO THE CITY INSTEAD OF THE SUBURBS. NOT EVERYONE WANTS TO LIVE IN AN APARTMENT. NOT EVERYONE WANTS TO BE WITHOUT A CAR. BUT, EVERYONE WANTS TO LIVE IN A CITY THAT THEY ARE PROUD TO CALL HOME! PLEASE RECONSIDER AND REWORK THIS PLAN FOR THE GOOD OF OUR NEIGHBORHOODS.	7/23/2018
7804	1	/policies/access-to-housing/	I am strongly opposed to many of the areas slotted for corridor 4. It shows significant discrimination against those who were not wealthy enough to afford a house on a quieter street but live on a bus route. Putting 4-story buildings in these neighborhoods will destroy the look and adding that kind of density will destroy the community of the block. 4-stories is too tall!!	7/23/2018
7805	15	/policies/transportation-and-equity/	I fully support his policy. I am very pleased by steps the City has made in the last few years to begin realizing the vision presented in this policy, and look forward to continued progress on this front.	7/23/2018
7806	11	/policies/skyways/	Skyways are an architectural and social scourge. Ban all new skyways and eliminate existing skyways by 2040.	7/23/2018
7807	18	/policies/walking/	I like the idea of encouraging walking and the improvements listed in this policy 18.	7/23/2018
7808	51	/policies/healthy-pre-k-development/	UNIVERSAL PRE-K. IT IS TIME IN MPLS!	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			Honestly, I'm really unclear on what A-F are saying here.	
7809	23	/policies/coordinated-development-strategy/	It sounds like you want to look at what's happening across the city and make sure investment is going to where it's needed and not just to squeaky wheels? If so, that makes sense.	7/23/2018
7810	41	/policies/tenant-protections/	If F includes moving the Kmart to one side of the street so Nicollet can open again, I say Hallelujah.	7/23/2018
7811	0.1	/topics/land-use-built-form/	Put Stephen Frenz in fucking prison	7/23/2018
7812	42	/policies/expand-homeownership/	I am strongly opposed to many of the areas slotted for corridor 4. It shows significant discrimination against those who were not wealthy enough to afford a house on a quieter street but live on a bus route. Putting 4-story buildings in these neighborhoods will destroy the look and adding that kind of density will destroy the community of the block. 4-stories is too tall!!	7/23/2018
7813	1	/policies/access-to-housing/	I seriously question our emphasis on land ownership as a measure of success. It isn't a good metric! We need social housing!	7/23/2018
7814	37	/policies/mixed-income-housing/	I support the plan for more housing. I support allowing 4-plexes through all residential areas and building more density along major transit lines. But there should also be efforts to improve air quality along these transit routes by limiting access of personal vehicles, prioritizing public transit and biking. Compromises with commercial shipping/business will need to be made.	7/23/2018
7815	43	/policies/housing-displacement/	Some neighborhood interiors should be able to handle larger unites than 4-plexes.	7/23/2018
7816	37	/policies/mixed-income-housing/	I see this as essential to building strong communities. It defeats the purpose for allowing a developer to promise this, but then have that developer only build the expensive housing and sell the contract to a secondary, sometimes insolvent developer and then the affordable housing never gets built.	7/23/2018
7817	1	/policies/access-to-housing/	In North Minneapolis, there are lots of unoccupied homes and empty lots. Figure out a way to encourage the development of these unoccupied lots into additional housing (both rental or home ownership) instead of raising rent on current residents.	7/23/2018
7818	1	/policies/access-to-housing/	At the same time, acknowledge that as neighborhoods improve, all rents will go up - it is a natural side effect of making a neighborhood more desirable. Making the neighborhood more desirable will improve quality of life for current residents. Many of the things that they desire - better parks, better access to grocery stores, better access to transit, better jobs, less crime - will improve as more people want to live there, but will also cause more people to want to live there, raising the rent for everyone. Don't limit progress in North Minneapolis just to keep rents artificially low.	7/23/2018
			In parts of South and Southwest Minneapolis, some smaller, lower cost houses are being replaced by large, multi-million dollar houses. While the houses being torn down don't qualify as "affordable" as defined by these policies, it still should be a concern for the city that houses once affordable for middle class working families are being torn down and replaced with houses only affordable to the upper-class. Edina could be looked to as an example of what's to come if the city doesn't do anything. The city should discourage the tear-down trend, possibly by charging significantly larger permit fees for tearing down an livable house instead of building on an empty lot.	7/23/2018
			I see this as essential to building strong communities. It defeats the purpose for allowing a developer to promise this, but then have that developer only build the expensive housing and sell the contract to a secondary, sometimes insolvent developer and then the affordable housing never gets built.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7819	6	/policies/pedestrian-oriented-building-and-site-de	San Francisco allows and encourages developers to build tall ceilings in their storefronts so as to create an inviting and lofty atmosphere that will activate and encourage street life.	7/23/2018
7820	1	/policies/access-to-housing/	I support the push to increase housing supply by allowing more than single family in much of the city. In addition, I'd like to see that higher density development is allowed on more than just the street that the high frequency transit routes run on. Adjacent streets should also be given the ability to build more units. The vision being that the neighborhood grows dense enough that most of the residents' needs can be economically provided within walking distance.	7/23/2018
7821	89	/policies/technology-in-the-city-enterprise/	The city infrastructure needs constant upgrading the plan fails to suggest how the greater storm water surges and sanitary sewer upgrades will occur within the plan. The city's current capacity for physical and services ranging from parks to water is underfunded and greatly deferred. Until we have greater civic capacity we cannot build or suggest greater density through policies that cannot be maintained.	7/23/2018
7822	1	/policies/access-to-housing/	When adding units/density to the streetscape, consider how the street will look. For example, Old Highland with large late 1800s, early 1900s houses didn't mix well with 1960s split level ramblers.	7/23/2018
7823	19	/policies/bicycling/	As a regular bike commuter, I really appreciate the steps that have been taken in a few areas of the city to create truly protected bicycle lanes, which are shielded from traffic by a physical barrier. This type of infrastructure really helps people feel safer on their bicycles. One problem with the current set-up (which seems to be plastic posts) is that vehicles do sometimes pull in between them and stop (or even park). A shorter spacing between posts would prevent this. In most other cities I have seen these in the barriers are more substantial, ranging from a curb to a large concrete slab, making it impossible for cars to enter.	7/23/2018
7824	52	/policies/human-capital-and-a-trained-workforce/	This all sounds like good ideas to get to living wages for all. But the devil is in the details. How can the city influence business and economics to attain living wages for all? I'm all for investing in human capital but this sounds like programs that cost money - taxes.	7/23/2018
7825	24	/policies/shared-mobility/	When I think about mobility and aging, I don't think we have a great plan. In my wishing place, I wish bike shares included recumbents, which are way easier for aging people (or people with back/neck injuries). I love what we have, but a lot of it does require a base level of "health" and a base level of savviness with technology (NiceRide, for example; or Hour Car). I love these things, but they do seem to disproportionately benefit people just like me -- I have a bike, just use Nice Ride in a pinch or on campus; I am super adept with tech and have no problem figuring things out.	7/23/2018
7826	76	/policies/new-parks/	But in 2040, my body is going to be aging and I'm not so sure that our current model of targeting 18-50 year olds is going to hack it. city should purchase remainder of private property adjacent to Mueller park in lowry hill east and make entire block a park	7/23/2018
7827	0.1	/topics/land-use-built-form/	Thank you for making a long term plan. The Land Use seems fine. The policy for allowing multi story buildings needs work. Too high for residential areas. I was told that zoning is a distant step, that I shouldn't worry about it. But it makes all of the difference: much of the new multi story buildings are built to the sidewalk, almost zero set backs, cheap and ugly construction. I'm concerned about neighborhood livability, environmental considerations, and I don't believe that the current plan will result in more affordable housing.	7/23/2018
7828	88	/policies/public-services-policy/	Give less decision making abilities/powers to neighborhood associations. City must make more of an effort to reach out to citizens throughout each neighborhood.	7/23/2018
7829	1	/policies/access-to-housing/	The proposal to allow small scale residential properties that allow up to for residential units is not doing neighborhoods with one unit dwellings any kind of a favor. That will pull down the value of existing housing and that will damage the residents living there now. This is a bad plan. I am a homeowner in North Minneapolis and strenuously object to this proposal regarding housing mix. Discard this plan and start over. The notion that millennials aren't interested in home ownership is a fallacy. Our milkenial daughter and 5 friends of hers (that I can think of offhand) have purchased houses in Minneapolis over the last 10 years, most of them within the last 5 years. This plan is built on false assumptions, thus lacks validity and should not be carried forward with hopes for meting the stated goals. Again, please abandon the plan and start over.	7/23/2018
7830	50	/policies/access-to-technology/	A key way to access technology is for the technology in question to be FLOSS, Free/Libre Open Source Software: so that every resident of Minneapolis has the freedom to view, change, and share the software powering the technology around them. This is also key to innovation so that new things can be built on existing technology. Minneapolis city government should have a commitment to prefer Free/Libre Open Source Software in purchasing and to require all software development it funds to be released with a Free/Libre Open Source Software license.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7831	19	/policies/bicycling/	Please don't sacrifice maintenance of the critical existing corridors (greenway, kenilworth, victory memorial, etc.) to the benefit of new partitioned lanes on existing roadways. The heart of biking in our city are these dedicated paths and without them ridership will decline.	7/23/2018
7832	57	/policies/cluster-strategy/	Wow this is just a jumble of words like 2% of people will understand I gotta say. The extremely complex language used in a lot of this draft plan is seriously an accessibility issue.	7/23/2018
7833	38	/policies/affordable-housing-near-transit-and-job	I think affordability will be an important part of the mix, acknowledging that all price points should be available along high-frequency corridors. I would hate to see only expensive, market rate options at these locations, which are ideal for people without a car.	7/23/2018
7834	81	/policies/social-connectedness/	<p>Okay, this is a great policy. But when you mention Open Streets Minneapolis? That is exclusionary to people who are older or who have physical limitations. It is geared toward young, able bodied people. Just like the majority of this plan. And when you want to expand the use of social media? Again, excludes people who can not afford to be connected, older people who are not well versed in the new technology. You are don't even know that you are missing these groups.</p> <p>Also, if you have as much development as you hope to in the plan, people will be more isolated, and less engaged. There will be less green space, fewer leisurely walks in neighborhoods. So you must scale it back and preserve neighborhoods.</p> <p>An older woman (in her 60's) lives in the mosaic building, but doesn't engage with any of the others in her building as they are all younger than her and many of them transient. Is this what you want?</p>	7/23/2018
7835	58	/policies/business-districts-and-corridors/	Continue to fully fund neighborhood organizations. Continue with small area plans and adhere to them. Engage locals in local decisions.	7/23/2018
7836	40	/policies/homelessness/	We need commercial to be allowed by right in neighborhood interiors!	7/23/2018
7837	61	/policies/environmental-justice/	How does this differ in any way from what you have been saying you have been doing for the last 20 years? How about the millions of dollars spent by Heading Home Hennepin for 10 years, while homelessness actually increased? Most of that money was spent on the administrators, of course. Very little money goes directly to the actual homeless population. I guess they need better, more expensive, lobbyists.	7/23/2018
7838	0.1	/topics/land-use-built-form/	Move HERC out of the city!	7/23/2018
7839	63	/policies/food-access/	I don't think that four units on a residential lot should be allowed as specified for Interior 2. There need to be restrictions.	7/23/2018
7840	28	/policies/msp-airport/	Thank you for this! I live in Stevens Square, which is a food desert. I'm so glad to see the city taking action on this.	7/23/2018
7841	25	/policies/innovations-in-transportation-and-infras	<p>Due to the proximity of the airport to the city, airplane noise is a real issue in many parts of Minneapolis. But there are huge differences between the noise created by louder (and also older and more polluting) planes and quieter (newer and more fuel efficient) planes. I would love to see the city work with MAC to create incentives for airlines to use quieter cleaner planes.</p> <p>E is terrifying. But moving on--</p> <p>I strongly disagree with H unless heavily regulated. The SV tech industry is reckless and while I get the whole "wanting to be an innovation hub" thing, I don't think we should make ourselves suckers. Whether it's driverless cars or surveillance technology, we need to think critically about whatever novel activities we allow and when.</p> <p>I look forward to getting ahead of the ball on regulations/policies around automation/drones/etc. But until someone can automatically haul my bikes up to the North Shore or my kayak to the lake, I'm dubious that we're going to be living in a Jetsons-style future.</p>	7/23/2018
7842	56	/policies/supporting-small-businesses/	There should be additional support for the launch and growth of worker cooperatives. Worker-cooperatives have a better survival rate than other businesses of similar size and moreover keep good jobs in Minneapolis.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7843	94	/policies/heritage-preservation-regulation/	I am perplexed why this is even a policy based on the actions of the current council. The St. Anthony Main area is one of the most historic areas of Minneapolis and you have bent over backwards to grant variances in this neighborhood to the benefit of developers and their shareholders. The Alatus building at 200 Central is a prime example of granting a variance not for an extra 30 feet of height, but an extra 400 feet of height. I am confused about the investment of time by the city on the comprehensive plan. In 2016, the city drastically amended the 2009 plan to allow for much greater densities to allow for development such as the Alatus building at 200 Central and then the council granted a huge variance. Why even waste the time of drafting the 2040 plan when your successors will likely grant a variance exceeding whatever recommendations you agree on, as you have done with the prior work of others?	7/23/2018
7844	80	/policies/development-near-metro-stations/	Yeah! No more cars near transit!!	7/23/2018
7845	0.1	/topics/land-use-built-form/	Encourage high density development on streets in a linear fashion, instead of following just transit corridors. That way, the transit system will be easier to navigate.	7/23/2018
7846	49	/policies/educational-and-economic-access/	Ensure access to high quality public education in safe, healthy schools easily accessible by walking biking and public transit	7/23/2018
7847	56	/policies/supporting-small-businesses/	I think the idea of increasing participation of small businesses in City procurement is a great idea. For action step b would those priorities be in the procurement process, like an adjusted criteria system to provide increased opportunities to businesses of certain demographics. As someone who works at a small business in the creative sector I find the idea of niche-based programs interesting but I'm not sure what that would look like. Perhaps the city could partner with professional organizations from different industries to develop programming. I think this could be more directly tied into the idea of job training and mentorship discussed in policies 31, 40, and 44. The hardest thing about this plan is how ideas are scattered throughout it.	7/23/2018
7848	40	/policies/homelessness/	Worthy goals, but most homelessness is the result of mental illness and substance abuse and addiction. With a booming economy, joblessness is not the primary cause of homelessness. The city should focus on addressing the underlying causes. Joblessness is a choice for many. Ban curbside panhandling and direct individuals to treatment centers.	7/23/2018
7849	82	/policies/aging/	Safe housing for seniors is often the houses they have spent their lives in. You need to make sure that you don't tax them out of their homes. You also have to make sure that we have a work force that can go into their homes and work with them. Create senior centers for day activities. This can be done in the parks, this can be done in separate senior centers. Transportation for seniors will include the use of personal vehicles. If you continue to wage war on cars, you are waging war on seniors who are unable to walk, bike and have difficulty with public transportation.	7/23/2018
7850	0.1	/topics/land-use-built-form/	Eliminate the Interior 1 category. Allow 3-story construction by right everywhere across the City, and eliminate all setback requirements. If it is privately owned land, allow the owners to do what ever they want, since they are the ones responsible for paying property taxes. There is no reason the only density should be on and near heavily polluted corridors, when there are still acre-sized lots throughout the city.	7/23/2018
7851	1	/policies/access-to-housing/	The proposal to allow small scale residential properties that allow up to for residential units is not doing neighborhoods with one unit dwellings any kind of a favor. That will pull down the value of existing housing and that will damage the residents living there now. This is a bad plan. I am a homeowner in North Minneapolis and strenuously object to this proposal regarding housing mix. Discard this plan and start over. The notion that millennials aren't interested in home ownership is a fallacy. Our milkenial daughter and 5 friends of hers (that I can think of offhand) have purchased houses in Minneapolis over the last 10 years, most of them within the last 5 years. This plan is built on false assumptions, thus lacks validity and should not be carried forward with hopes for meting the stated goals. Again, please abandon the plan and start over.	7/23/2018
7852	28	/policies/msp-airport/	I know people in my area are freaking out about the efficient takeoff/landing stuff as it would (or they say it would) more heavily concentrate air transit routes. So maybe we need education for that? Or a broader MAC area for window replacements?	7/23/2018
7853	10	/policies/street-grid/	Most of the gaps in the streetgrid are caused by the highways that actually "bulldozed our neighborhoods." If we want to rebuild the streetgrid then highway removal must be part of that strategy. I'd like to see a clearly outlined plan to promote interstate removal and narrowing of major traffic corridors so that people can navigate the city on many different modes. For example, removing the 3rd/4th st viaduct through the north loop would be a good start, removing the lyndale/crosstown off-ramp, or Cedar Avenue bridge over Lake Nokomis. This would be a good way to reduce the cost of highway infrastructure - reduce air, noise and water pollution. I'd also like to see the Lyndale or Hennepin 94 off-ramps removed - we can tackle the bottleneck by restoring the original street grid.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7854	1	/policies/access-to-housing/	These action steps only work if the City adopts strong oversight over developers. The City needs to be in charge of the plans, not developers. Zoning ordinances were made for a reason, and residents I know understand their value and support the concept of livability on which the ordinances are based. So far the City has failed time and time again to enforce the ordinances that exist, allowing developers all kinds of variances so that the developer can make a larger profit on the development. That is a corruption of the original intent of zoning ordinances. It has to stop. A mix of housing is fine, if the sizes and numbers of units meets already existing codes. But the Planning Commission and City Council need to respect the neighbors enough to stay within the required restrictions.	7/23/2018
7855	1	/policies/access-to-housing/	It makes no sense to take away our single family neighborhoods. I for one would end up moving out of the city because I want to raise my family in this type of setting. Increasing the density in our neighborhood would make parking even worse. Currently our emergency vehicles have problems getting through in the winter time as it is now. I worry that the neighborhoods would decline with more rental properties. People seem to have more pride in taking care of their property when they own. You would need to increase police, park facilities, schools, etc.	7/23/2018
7856	84	/policies/public-safety/	This is important and there are suggestions other people will be better at making than I am, but I want to emphasize that living around cars is a public safety issue.	7/23/2018
7857	43	/policies/housing-displacement/	Stopping or slowing gentrification is unrealistic and not the role of city government. Instead, embrace gentrification as civic improvement and expand job/housing opportunities for all income levels.	7/23/2018
7858	84	/policies/public-safety/	Excessive and deadly force seems to be a strategy amongst our police force. We must employ restorative practices and utilize non-violent strategies. I agree that first responders need to reflect the diversity of the city's residents. They need to be residents themselves and utilize their knowledge of the community and connections within the community to build trust and employ non violent methods.	7/23/2018
7859	38	/policies/affordable-housing-near-transit-and-job	Really stress the affordable in this. And pair with the first floor shopping / restaurant / etc. style use.	7/23/2018
7860	33	/policies/affordable-housing-production/	Consider a variety of affordability and market rate units in one building, rather than a whole building of one economic type of housing, such as luxury. When designing all housing, particularly affordable housing, use feng shui to help design places that will work optimally for residents. Consider a variety of configurations, locations and use universal design so resident(s) can age in place, rather than have to move as health status changes.	7/23/2018
7861	49	/policies/educational-and-economic-access/	Increasing educational access means allowing more families to liver near good schools. Increased densities in all neighborhoods would help this.	7/23/2018
7862	85	/policies/access-to-health-social-and-emergency-s	--Expand public health services and public owned hospitals --Back all efforts to get a Minnesota Single Payer health system --Back all efforts to get a Federal Single Payer health system like Medicare for all. --Review all health studies that affect c	7/23/2018
7863	0.1	/topics/land-use-built-form/	I live on a block with a very tight community, we socialize regularly, watch each kids, look out for each other. In the new plan, we would have 4-story buildings on our block. Adding this kind of density would completely change the character of our neighborhood. Mixed housing with small units is what we have now and that provides options for rental and apartment dwelling and keeps a community feel intact. However 4-story buildings is too much! If you are lucky the building may develop a community feel but the rest of neighborhood looses.	7/23/2018
7864	0.1	/topics/land-use-built-form/	I live on a block with a very tight community, we socialize regularly, watch each kids, look out for each other. In the new plan, we would have 4-story buildings on our block. Adding this kind of density would completely change the character of our neighborhood. Mixed housing with small units is what we have now and that provides options for rental and apartment dwelling and keeps a community feel intact. However 4-story buildings is too much! If you are lucky the building may develop a community feel but the rest of neighborhood looses.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7865	83	/policies/people-with-disabilities/	<p>I can only say that your emphasis on walking, biking and use of public transportation EXCLUDES people with disabilities. I should know. I have physical limitations. Walking more than a few blocks is too painful, I am unable to bike and I can't do the stairs onto the bus. So I drive.</p> <p>Also, you need to make sure that you clear snow from curb cuts so people who are on wheels or who have trouble walking can go from one block to the next safely. This MUST be done before you plow bike lanes. And it MUST be done at every corner in the city. Maybe you can assign a snow blower to every block and give them a tax credit for clearing the corners. Or maybe you allocate your money to support walking FIRST as stated in your own policies.</p>	7/23/2018
7866	8	/policies/public-safety-through-environmental-de	Sounds great!	7/23/2018
7867	0.1	/topics/land-use-built-form/	<p>I am only one homeowner who loves her home and neighborhood but I believe that my concerns are representative of many who will be affected by the density portions of the Plan. More careful consideration of homeowners and their input would help the Plan be successful. We have lived in our 47th St and Bryant Ave S home for 44 years. We moved to the city because we found a home that was AFFORDABLE, it was close to my husband's teaching job and convenient to my job. Even then it was a little community within the city with a small grocery store, hardware store, coffee shop, bakery and restaurant - coming from a small town, we loved it. We are the "oldest" residents on our block. Our home is 100 years young, we have lovingly cared for it, always considering its character when making renovations for our family's comfort. We have never made renovations for the purpose of selling our home. Our plan is to grow old here, in the comfortable home we've created, near the lake we love to walk and run around and in the little community we love. We have no interest in selling our home to a developer!</p> <p>Our neighborhood has NATURALLY gone through many changes. When we moved in there were many elderly neighbors, and a few young families, then it changed to more young families and fewer elderly. Currently, it is a mix of young, old, married, single, multiple races, straight and gay - this has happened without any help from the city!</p> <p>We've always been a bus (and airplane) route which made our street too busy for our children to cross. They played with the children across the alley and were able to run back and forth without fear of traffic. Where will children play on densely populated streets filled with apartment buildings with NO yards? How many FAMILIES will WANT to live in apartments buildings?</p> <p>I cannot imagine our street as the 2040 Plan proposes! Bryant has always been a busy street. It is UNSAFE now when there are cars parked on both sides and busses, bicycles and cars flying down the hill headed north. I can't imagine what the density of the 2040 Plan will change it into. Where would tenants in these multifamily buildings PARK? I do not believe that people will abandon their cars. What studies confirm that idea?</p> <p>WHAT INFRASTRUCTURE CHANGES ARE PLANNED TO ACCOMMODATE THE ISSUES THAT INCREASED DENSITY WILL DEMAND: PARKING, SCHOOLS, GREEN SPACES, WALKABILITY, POLLUTION?</p> <p>Lastly, who's doing the math? A developer will not be able to purchase homes in my neighborhood, tear them down and build apartment buildings that will charge affordable rental rates. DEVELOPERS ARE IN BUSINESS TO MAKE MONEY! WILL THE CITY OF MINNEAPOLIS SUBSIDIZE THESE DEVELOPERS OR TENANTS? WHO WILL PAY FOR IT? HOW IS THAT GOOD FOR OUR CITY?</p> <p>When visitors come to Minneapolis, they are surprised that we have a beautiful, green, vibrant city. Mostly they are impressed with our neighborhoods! OUR NEIGHBORHOODS ARE THE REASON WHY PEOPLE MOVE TO THE CITY INSTEAD OF THE SUBURBS. NOT EVERYONE WANTS TO LIVE IN AN APARTMENT. NOT EVERYONE WANTS TO BE WITHOUT A CAR. BUT, EVERYONE WANTS TO LIVE IN A CITY THAT THEY ARE PROUD TO CALL HOME!</p> <p>PLEASE RECONSIDER AND REWORK THIS PLAN FOR THE GOOD OF OUR NEIGHBORHOODS.</p>	7/23/2018
7868	0.1	/topics/land-use-built-form/	Fourplexes will not successfully fit on a standard lot without impacting the adjacent neighbors negatively due to the larger mass of the fourplexes, the enlarged footprints, the loss of green space and the increased amount of impervious hard surfaces. The City should have tried to show how they could have worked under various scenarios and lot sizes.	7/23/2018
7869	1	/policies/access-to-housing/	Access to housing is the most important piece of the Minneapolis 2040. Vacancy rates in Minneapolis are lower than a healthy housing market should have. Every neighborhood in the city - particularly those in South Minneapolis and around the lakes - need to accommodate more housing.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			I am for all of this, but want to note that a lot of the SW rich, white homeowners really don't get that B is critical for everyone, including us!	7/23/2018
7870	33	/policies/affordable-housing-production/	Please don't listen to the "you're going to demolish my house" people. Affordable housing! Yay!	
7871	45	/policies/leverage-housing-programs-to-benefit-c	Worthy goals. Incentivize these goals for vetted developers.	7/23/2018
7872	0.1	/topics/land-use-built-form/	Fourplexes will not successfully fit on a standard lot without impacting the adjacent neighbors negatively due to the larger mass of the fourplexes, the enlarged footprints, the loss of green space and the increased amount of impervious hard surfaces. The City should have tried to show how they could have worked under various scenarios and lot sizes.	7/23/2018
7873	2	/policies/access-to-employment/	There is going to need to be a balance between step d and increasing the footprint of Core and Transit built form districts to encourage development from outside institutions. Let's be conscious of this and encourage it.	7/23/2018
7874	86	/policies/healthy-food-in-institutions/	How about more community gardens? We can forego some of the density to have more of these. They would help people have access to healthier food and encourage more interaction among neighbors.	7/23/2018
7875	34	/policies/affordable-housing-preservation/	Configure large family housing so space can be reconfigured as persons leave home or an extended family member moves in, while a person has a health recovery, etc, or could be rented as a separate unit if not needed for extended family.	7/23/2018
7876	6	/policies/pedestrian-oriented-building-and-site-de	Two things about this policy need to be completely re-thought. First, start insisting on setback of buildings. Currently, the sidewalk on Hennepin is being widened in Uptown. However, for every development I see in downtown, every square inch of space is included in the building footprint. It looks terrible and it narrows the sidewalk. In ten years, you'll be eliminating traffic lanes and parking downtown to expand the sidewalks. Why not actually look ten years out now, and tell developers they need to set buildings back from the sidewalk? It seems like a simple answer. Secondly, while ownership of cars may change, don't count on it. 50 years ago, prognosticators predicated that by now, we would all have flying cars. We don't. So don't assume that 20 years from now everyone will be taking uber everywhere. We live in a metro area characterized by urban sprawl. People will continue to have friends and family all over the suburbs and exurbs, and won't spend an hour on the horrifically slow LRT or spend \$40 round trip to go to a friend's BBQ. By having off street parking for new construction based on the market, developers will add zero spaces in order to maximize profits.	7/23/2018
7877	47	/policies/housing-maintenance/	Worthy goals, but start with enforcing current housing codes/regulations in ALL parts of the city. Hire more inspectors if necessary.	7/23/2018
7878	47	/policies/housing-maintenance/	I am in favor of city programs that can help owners maintain the housing stock throughout the city. Funds going to rental properties should include stipulations which will help maintain the affordability of the units.	7/23/2018
7879	57	/policies/cluster-strategy/	This policy seems like it has tangible built-form implications that aren't well laid out. What would action step c look like, is this part of the idea of rezoning in corridors? It appears to be implying the City would support the purchase of adjacent parcels to clear larger areas for redevelopment, which seems to conflict with the idea of preserving existing small commercial spaces for startups and creative sector businesses. I agree that businesses work better in nodes but I think the intent of this policy just needs to be clarified.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7880	43 /policies/housing-displacement/		<p>We should implement a trigger mechanism that once a certain land value/acre is achieved in an area - it is automatically upzoned to the next zoning. This would promote incremental growth in density and help control land prices over the long term. The reason so many neighborhoods are unaffordable is because demand exceeds the existing housing supply which is constrained by the zoning allowed. If we could divide up some of these SFHs and add another unit or (up to a 4-plex) then we can accomodate population growth and reduce the cost of living in high demand neighborhoods.</p> <p>When we prevent new development in rich neighborhoods it gets pushed into poorer neighborhoods that have fewer organized networks to oppose development. Older buildings (NOAHs) gets flipped into luxury development. If we are serious about dismantling exclusionary zoning then we need to dramatically upzone and allow more housing in the very neighborhoods that have benefited from exclusionary zoning - South Minneapolis, Lakes District, etc.</p> <p>Please allow 4-plexes citywide and upzone the entire city. The city, state, and federal gov't will never be able to build enough housing quick enough to meet the demand for the number of people that want to live here. We need public and private sectors working together to dramatically build thousands of new homes to balance the housing market out. Will this solve all our problems? No, but it makes it easier when supply exceeds demand.</p> <p>Do not give into the political pressure of wealthy single family homeowners who are benefitting from exclusionary zoning. This is a majority renter city and many people who live in NOAHs and dense multi-family development haven't had their voices heard. We need more homes quickly because there are no starter homes left in the city and people want to move here.</p>	7/23/2018
7881	43 /policies/housing-displacement/		<p>When we have a housing shortage like we do in Minneapolis (as seen in our low vacancy rate), landlords have even more power over renters than they normally do. The most direct (but not only) way to fix a housing shortage and help rectify that balance of power is to build more housing.</p>	7/23/2018
7882	17 /policies/complete-streets/		<p>Very much in favor of Complete Streets. Priorities please to walk/bike/transit - and single occupancy vehicles LAST. Charge for parking at a level that encourages modes other than single occupancy.</p>	7/23/2018
7883	48 /policies/data-driven-decisions/		<p>Make ALL data housing publicly accessible. To this end, overhaul and redesign the seriously antiquated City of Minneapolis website. Such an embarrassment.</p>	7/23/2018
7884	7 /policies/public-realm/		<p>Develop more car free streets and areas.</p>	7/23/2018
7885	33 /policies/affordable-housing-production/		<p>I have lived in the city for 25 years, 22 of which have been in a house I designed and built. Four years ago, I bought a building on Nicollet for my business - an architecture firm. My investment in the city is both personal and professional. Much of the work in my firm is on buildings in the city, both commercial and residential. In all our work, we consider multiple clients - property owner, neighbors, the city and the environment - as we design solutions. We believe itâ€™s the only way to provide design solutions that are thoughtful, considerate and meaningful for everyone who has a stake in the project.</p> <p>Unfortunately, the same canâ€™t be said for many of the developers who are working in the city these days. The Minneapolis Planning Commission passed a 41 unit apartment building in my neighborhood requiring several variance even though it will negatively impact neighbors to the north in a significant way. The developer (who lives in Edina) doesnâ€™t care about the neighbors and Iâ€™m growing weary that the Planning Commission and City Council donâ€™t either.</p> <p>Two years ago, my wife and I bought the house across the alley from us (zoned R-5) to protect against the 3.5 story 4-plexes that are popping up in our neighborhood. Iâ€™m not against density - have lived in denser Boston - but I am against design solutions that emphasize one parameter heavily over others (I would never do that for my clients). In this case, the form and material quality is defined singularly by maximum profit - largest footprint for the least upfront cost. They are poor quality buildings - bad design and low quality materials - that are degrading neighborhoods.</p> <p>I am highly against the planned rezoning of neighborhoods to include multi-units on properties previously zoned as single family. I believe an organic approach to densification will be better for the city, not the flood-gate approach being presented. As a Minneapolis business owner and long time resident of the City, Iâ€™m losing trust in the the security of my investment here. If the plan goes through as presented, it will be difficult to keep my roots in Minneapolis.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7886	17	/policies/complete-streets/	<p>While I agree that transit is a priority, I urge you to consider where you locate bike lanes. Placing them on busy streets slows automobile traffic and endangers bike riders. More importantly, I would like you to consider how this policy impacts families with children. I cannot walk to my child's school. If I use the bus to take her to school and take the bus on to work, I will spend HOURS on the bus. While I understand that this is reality for some people, it does not mean that it should necessarily become my reality. I have worked hard to own my vehicle and this policy utterly disregards that.</p>	7/23/2018
7887	16	/policies/environmental-impacts-of-transportation/	<p>How is it that my water, electricity, and natural gas are all metered and I pay a usage fee, but I can park my car on a public street without paying for it? This is a huge subsidy, and I'd rather drink free water and pay for parking.</p> <p>It makes sense that I'd be incentivized to be careful in my use of water, electricity, and gas. But why is that same logic not applied to car driving? Through my property taxes and assessments, I pay the same amount for City streets whether I drive on them every day and store my car on them, or not.</p> <p>Also, I think any street with more than 75% parking usage should be metered, starting tomorrow. By neglecting to do this, the City is giving away both precious public space, and losing out on an obvious revenue stream. We could use the additional revenue to lower property taxes or support parks & trails.</p> <p>I would MUCH rather people (who chose to drive) pay for parking as we park, rather than having everybody cover that cost through property taxes and assessments, totally detached from any decisions related to parking or driving.</p> <p>It's like we have capitalism for people, but socialism for cars.</p>	7/23/2018
7888	35	/policies/innovative-housing-types/	<p>I have lived in the city for 25 years, 22 of which have been in a house I designed and built. Four years ago, I bought a building on Nicollet for my business - an architecture firm. My investment in the city is both personal and professional. If the plan goes through as presented, it will be difficult to keep my roots in Minneapolis.</p>	7/23/2018
7889	20	/policies/transit/	<p>In many parts of the city, currently the best transit option for commuters remains express busses. However, often these are very infrequent (for example, there are only two express busses along cedar avenue to the University of Minnesota each morning, and two each evening). This makes this transportation option significantly less appealing, since one is held to a very rigid schedule, and can be a reason to drive rather than use transit. Certainly to and from the U of M these express buses are very heavily used, and that increasing their frequency would be a good thing to consider.</p> <p>The city should also consider ways to effectively promote (meaning advertise) transit use, as many people are not aware of what the bus options are and whether or not these would be convenient for them.</p> <p>Finally, bus only lanes in areas with congestion issues are a very effective way to incentivize transit use; most people will use whatever transportation option is fastest, provided it is reasonably convenient. Minneapolis has many areas that do suffer from traffic, and very few bus-only corridors; this is a great way to increase the appeal of using public transit, without having to invest in the infrastructure required for light rail.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7890	10	/policies/street-grid/	Develop car free areas and streets.	7/23/2018
7891	54	/policies/supporting-economic-growth/	To me "economic growth" is a code word for a ponzi-like scheme fostered by corporations and other commercial interests. Corporations want more people and higher population densities so that they can have more consumers and more potential employees to keep wages and benefits down. This in turn makes upper management and investors happy and contributes to an economically inequitable society. When is the Met Council and the city going to discuss and think about a sustainable economy based on zero population growth.	7/23/2018
7892	37	/policies/mixed-income-housing/	<p>I have lived in the city for 25 years, 22 of which have been in a house I designed and built. Four years ago, I bought a building on Nicollet for my business - an architecture firm. My investment in the city is both personal and professional. 7893	19	/policies/bicycling/	I fully support the action steps	7/23/2018
7894	88	/policies/public-services-policy/	<p>"Engage the public when making decisions that create, remove, or change a city service, project, or policy." You mean like you did with this plan? You did not engage the public at large on this project until the bitter end. And then, only because people found out about your shenanigans and forced you to have meetings. This is the worst kind of government. Feels like it you are taking a card from Trump's deck. All smoke and mirrors.</p> <p>Of course you need to engage the public. And by engagement, you can not hand select groups to participate while neglecting others. You can not notify by social media excluding those who do not use it. You need to notify and engage in many languages, with every tool that you have.</p>	7/23/2018
7895	48	/policies/data-driven-decisions/	Please utilize quantitative data, peer-reviewed studies, and the history of zoning & racial/class discrimination when crafting public policy and the zoning/land use code. I'd really hate to see the city give into fear-mongering and lies being spewed about how this plan will destroy the city. We need more homes now! We need 4-plexes if not a greater density allowed city-wide. If we do not accommodate the growth that is happening then the housing crisis will continue. No research points to any neighborhood that has been downzoned and remained affordable.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7896	0.1	/topics/land-use-built-form/	<p>(1) I live on France Ave S and it we see a couple buses an hour...not high frequency.</p> <p>(2) So far no one has explained how replacing small home such as those on my block and up and down France Ave, will create affordable housing. There is one new apartment building (Elements at 4525 France Ave S.) that rents 700 sq ft 1 bedrooms for upwards of \$1500. Zillow informs me I might be able to get \$1800/mo for my 3 bdr home. So where is the value to renters, particular families?</p> <p>(3) On the corner of 41st and France is a duplex that is part of the MPH scattered site plan. Tenants on both units are around the 30% income level and both families absolutely do DEPEND on their cars. While there are walkable places to get groceries, hardware, clothing, and other various necessities, those stores are way out of these families budgets and don't carry the products they want to buy. (One family is Somali and typically drives to the Karmel Mall to shop.)</p> <p>Bottom line: This is a shallow plan. It doesn't reflect the desires of anyone in this city except a certain set of housing ideologues and a group of developers. Nothing wrong with developers, but their mandate is to make money and they do that by building high rent buildings--they have to cover costs of land acquisition, land prep, labor, materials, and financing and after all that they still need a reasonable profit margin. This yields expensive housing. If you want to build affordable housing do that. Work with land trusts, and developers who specialize in affordable housing and do it, but don't confuse affordable housing with market housing.</p>	7/23/2018
7897	1	/policies/access-to-housing/	Our map of residential densities is too similar to the City's historic redlining maps. There's no reason why the wealthy neighborhoods in South Minneapolis can't include their fair share of new density.	7/23/2018
7898	1	/policies/access-to-housing/	<p>There needs to be the equivalent of a sin tax applied to properties in privileged areas. If you want your street to stay single-family, then you should have to pay more to counterbalance the imposition this places on the rest of the city.</p> <p>Upzoning the entire city is the fairest thing to do--but already there is resistance from the districts that perceive they have the most to lose. The worst case scenario is that the economically well-to-do neighborhoods are allowed to keep some sort of privileged zoning status. I think any such specially entitled neighborhood be subject to a substantial increase in property taxes. The increased revenue would help fund affordable housing in other areas of the city.</p>	7/23/2018
7899	80	/policies/development-near-metro-stations/	Adding more detail/concrete numbers or policy to "affordable housing" is the only way to make sure we achieve that goal, otherwise development will occur mainly in line with the goal of large profit margins. People will want to develop, there need to be requirements (such as minimum affordable units, not defined using AMI or market value), including incentives and subsidies to create and maintain affordable units and affordable retail space for small locally owned businesses (especially run by women, immigrants, and people of color). Transit oriented development will happen no matter what, and the city needs to pledge to invest money (not just a request to developers) in ensuring that development is equitable	7/23/2018
7900	10	/policies/street-grid/	<p>What I would most like to see is the city seriously investigate and consider opportunities to cap freeways or do away with freeways that run through our city. Freeways running through our city have had devastating effects. For example, 35W cuts through our city and cuts neighborhoods off from one another. These freeways create air and noise pollution and create hostile environments for people walking and biking over the freeways. The on and off ramps provide scary situations with speeding cars. Walking or biking over the bridges is an unpleasant experience. The freeways also severely limit our ability to freely move about our city. we have limited options for walking, biking, or driving from one side of the city to the other and that is compounded when there is construction. It would be so wonderful to be able to have a complete street grid. I believe this would create a more pleasant, safe, enticing, environment for everyone to move about the city.</p> <p>Furthermore, capping freeways could add to our land mass. We could develop more housing, parks, urban forests, edible forests, businesses, trails, etc on this land. We could increase our tax revenue by developing these areas.</p>	7/23/2018
7901	35	/policies/innovative-housing-types/	Reconsider minimum square foot requirements so smaller units allowed. Smaller units may cost less, thereby maintaining affordability.	7/23/2018
7902	93	/policies/stewarding-historic-properties/	Strongly support, though the city has been a poor steward of cultural heritage, losing many of its irreplaceable architectural treasures to unregulated development.	7/23/2018
7903	4	/policies/access-to-commercial-goods-and-service	Point E is probably the most important part here. Encouraging density draws in retail if allowed. Both increasing residential density and access retailers have to the area is important.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7904	40	/policies/homelessness/	<p>The area I live in has a pretty solid and consistent presence of homeless folks. They stand at the freeway entrances/exits (35/36th street), the Nicollet/35th Street intersection, and there's an encampment at 38th/Stevens. Many of them have clear substance abuse/mental illness challenges and I don't know what help is available for them. I'd really like to know as a city that there are things in place to get them the resources they need.</p> <p>And of course that doesn't include hidden homelessness -- couch hopping and shelters. Please also consider the needs of women/families, and LGBTQ people very explicitly in the plan.</p>	7/23/2018
7905	0.1	/topics/land-use-built-form/	<p>I am concerned about the 3 and 4 unit duplex allowed on all lots of interior 1. As a resident of one of these neighborhoods, I'm concerned about the fact that it is unlimited per block. It seems prudent to slowly allow this project type and only allow only so many per block to start and evaluate the policy after 5 years. There needs to be restrictions on this project type if it is to maintain the character of the neighborhoods (parking, setbacks,)</p>	7/23/2018
7906	1	/policies/access-to-housing/	<p>This is VERY vague. How will allowing multiple-unit buildings equate to affordable housing???? Developers will buy the lower-end, single-family homes as they become available ("starter homes" built of sturdy materials, some woods that can't be had anymore) and build these cheaply-constructed, higher-density buildings for \$275,000/unit (based on current prices). My house would sell for less than one of these units. How is this affordable?? What low-income family is going to purchase or rent in a unit that was built today?? Do you really think developers are going to build "affordable housing" (which isn't really possible with today's prices anyway) or can you see that they are businessmen, building for a profit, and will NEVER build affordable housing??</p>	7/23/2018
7907	46	/policies/healthy-housing/	<p>Good action steps! The city should also look into inspecting some of the buildings in Minneapolis that were built before 1960. These buildings are probably grandfathered into a lot of the regulations in the city and should be inspected for lead paint, lead pipes, and other carcinogens that are harmful to people. This city should create some sort of trust fund to refurbish these buildings as they may be useful but still need to be refurbished to ensue the health of the people working and living in them.</p>	7/23/2018
7908	0.1	/topics/land-use-built-form/	<p>Interior 2 should be the minimum citywide. Interior 1 does not address housing scarcity aggressively enough.</p>	7/23/2018
7909	94	/policies/heritage-preservation-regulation/	<p>Strongly support. Long overdue, but the horse has left the barn.</p>	7/23/2018
7910	17	/policies/complete-streets/	<p>Biking should be encouraged, but shouldn't be prioritized over cars. There are many times when biking or transit isn't practical and car travel is necessary. Limiting car travel in a way that impedes the flow of traffic only creates more pollution (from idling) and discourages non-residents from coming to Minneapolis to patronize our businesses. Bike lanes should be added in places where the number of car traffic lanes can be reduced with better engineering so that the level of service is maintained or improved. Minor streets adjacent to major streets should also be designated as bike streets (while maintaining car access), which feel more comfortable to many bikers anyway. This could be achieved by adding/changing signals so that bikes are able to cross the major streets and possible by forced turns or switching the street direction (for cars only) to limit car traffic.</p> <p>Similarly, transit should be prioritized, but not at the expense of cars. For example, buses stopping on single lane streets can back up the car traffic, which also affects the other buses. Adding bumpouts for the bus to pull into may add a few seconds to the bus's stop, but it keeps traffic flowing better which is also better for the buses overall. It is important to keep the effects on all forms of transportation (car, bike, transit, and walking) in mind when making changes.</p>	7/23/2018
7911	96	/policies/heritage-preservation-recognition/	<p>Strongly support.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7912	84	/policies/public-safety/	<p>Paragraphs a and b are nice.</p> <p>But building trust (paragraph c)? How do you plan to do that? Hold community meetings to placate us? Engage in more public relations? NO. Trust is built by being trust-worthy. That takes real work, not just pretty words (and giving money to sycophants in the "community" who can be relied on to calm us down when you kill someone).</p> <p>The police are out of control. We need real civilian review and discipline, not the fake OPCR, where civilian complaints go to die. We need better policies - but more importantly, actual enforcement of the policies that exist. We need consistent discipline, so arbitrators do not overturn the few attempts to discipline or even fire officers. We need an end to racial profiling and over-prosecution of people of color.</p> <p>And we need professional liability insurance for police officers, so they bear some responsibility for their actions. It is outrageous that settlements come from the general fund (taxpayers), while the officers involved are almost never disciplined.</p>	7/23/2018
7913	16	/policies/environmental-impacts-of-transportation/	<p>I fully support this policy. Absent a wholistic, forward-thinking, and aggressive approach to transportation -- specifically reducing single-occupant vehicle (SOV) trips -- Minneapolis will never reach its climate goals.</p> <p>However, contrary to this policy, I believe many functions of the City Public Works department continues to work in favor of maintaining the status quo and prioritizing level of service for SOVs.</p> <p>I would like to see an Action Step forcefully directing staff to more holistically consider the impacts of furthering mobility for SOVs in the name of congestion management; such is often done at the expense of other modes, specifically public transit. Where applicable, staff should embrace NACTO, not AASHTO.</p>	7/23/2018
7914	5	/policies/visual-quality-of-new-development/	Limit large block development by one developer. Split large projects into parts and have many different architects and developers create buildings instead of "fake" skins for the same large building or group of buildings especially multiblock developments.	7/23/2018
7915	17	/policies/complete-streets/	I fully support this policy.	7/23/2018
7916	78	/policies/park-design-and-programming/	Maintain and add to wild areas of parkland, such as can be found at Eloise Butler wildflower meadow, along the Mississippi River gorge in the are of the Newton Horace Winchell trail, and Theodore Wirth Park. These areas provide a way of escaping the crowds of the city and will be especially important as the city grows and increases density.	7/23/2018
7917	18	/policies/walking/	I fully support this policy.	7/23/2018
7918	97	/policies/heritage-preservation-legislative-advocacy/	Strongly support. Declare neighborhoods such as Kenwood and the Chain of Lakes as historic districts.	7/23/2018
7919	0.1	/topics/land-use-built-form/	More neighborhood mixed use is needed on minor thoroughfares to increase access to amenities and jobs.	7/23/2018
7920	77	/policies/park-access/	This plan includes upgrading numerous properties that are currently zoned SH (shoreland overlay). Why hasn't that been addressed? SH requirements are part of state law but the zoning board repeatedly ignores it. There will be lawsuits if this continues.	7/23/2018
7921	91	/policies/heritage-preservation-outreach/	I agree with all of this. Minneapolis has always been a city quick to tear down and rebuild. That has happened in downtown and in neighborhoods. Sadly, the density proposed in this plan will encourage more rather than less of that. Every older home is part of the heritage of this city. And yet the older, starter homes that are in areas that you propose to up zone will be in danger of being torn down so developers can build taller and make more money. If this plan were a person, it would be talking out of two sides of its mouth.	7/23/2018
7922	36	/policies/innovative-housing-strategies/	Reconsider minimum requirements, such as square footage and parking places per unit, to contribute to housing affordability.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7923	11	/policies/skyways/	<p>"Limit skyway expansion to the downtown core and at other key sites with high-intensity uses in order to minimize low-usage skyways and maximize street-level pedestrian activity in growing downtown neighborhoods and historic areas."</p> <p>This is pure ableism. This is the viewpoint of a healthy person who has never feared the cold.</p> <p>Last winter, there were many days when it was too cold for my retired old dad to set foot outside. We drove downtown, parked in the underground ramp at Target, and walked all over in the skyway system. Not only was he never at risk of frostbite, but we never encountered any tripping hazards.</p> <p>My DREAM is for the skyway system to expand to our doorstep, so my dad can have total freedom of motion anytime of year.</p> <p>Those concerns about street-level pedestrian activity are going to look ridiculous in the very near future, as downtown's residential population grows. Let's make it a future where the elderly are welcome too.</p> <p>Furthermore, the skyway system has just reached the point where the next expansion will be over the freeways. Any skyway that bridges the painful chasm of our freeways should be welcomed by everybody.</p>	7/23/2018
7924	1	/policies/access-to-housing/	<p>While more housing alone will not ensure affordable housing for everyone, we cannot achieve more affordable housing and less displacement of low-income people without allowing more homes in all neighborhoods. This must remain in the policy, and in every corner of Minneapolis. I request it go further, with eliminating Interior 1 and just moving to Interior 2.</p>	7/23/2018
7925	7	/policies/public-realm/	<p>The #1 way to improve the public realm would be to eliminate cars. Streets that are highways or parking lots are always going to be substandard places for people to be. Nobody builds cabins next to parking lots. People with money and options don't live next to highways. The State Fair is just a giant patch of land where the streets have no cars, and it's lovely and popular. Create more car-free places, and we'll have much better neighborhoods and a much better City.</p>	7/23/2018
7926	0.1	/topics/land-use-built-form/	<p>Stop allowing developers to put density in all the wrong places. Obviously, the highest density should be in the downtown core. However, the majority of development over the last decade has been 4-6 story buildings with a few in the 12 story range and a couple in the 30 story range. When you cross the river into St Anthony, a historic district is being destroyed by buildings that are out of character in terms of height and architectural style. Start creating density downtown! If the urban core of Minneapolis continues to grow, every 4 story residential building that has been constructed in the last decade will need to be torn down and a high rise put in its place. Stop putting 30 and 40 story buildings in St Anthony. Stop putting 6 and 8 story buildings throughout Northeast, especially buildings that don't require adequate off street parking. I live in Northeast. Traffic and parking are already bad. Having 6 story apartment buildings in areas such as the ones near the old Grainbelt brewery are entirely out of place. There isn't adequate public transit to these neighborhoods. This isn't NYC where we have a subway system to get people to and from the downtown core. We can travel by bus and car. By creating density where it belongs - downtown - people can walk to work in 15 minutes without creating additional traffic. By adding 200 residents in Northeast and far fewer parking spaces than that, you're adding to number of people needing to travel miles to get to and from work, and not providing any place for them to park their car.</p>	7/23/2018
7927	92	/policies/identify-and-evaluate-historic-resources/	<p>I hope you can do this. I'm afraid the density this plan is shooting for will but our historic places at risk.</p>	7/23/2018
7928	80	/policies/development-near-metro-stations/	<p>Access to METRO stations requiring crossing major roads should be considered and avoided. Systems that minimize pedestrian-vehicle interactions, like the Government Plaza Station, should be upheld and replicated.</p>	7/23/2018
7929	43	/policies/housing-displacement/	<p>The displacement policies in this document are not strong enough, nor are they specific enough. We must ensure people can stay in their neighborhoods! Please consider some of the recommendations in this blog post: https://medium.com/neighbors-for-more-neighbors/minneapolis-comp-plan-review-housing-displacement-f7c37c9a5e6c</p>	7/23/2018
7930	0.1	/topics/land-use-built-form/	<p>Interior 2 or 3 should be the minimum throughout the city. Interior 1 is clearly not applied evenly in the current draft. In certain neighborhoods, it continues a long history of housing restrictions applied to those neighborhoods by redlining and racially restrictive covenants. The city has made its #1 goal reversing disparities created by these types of restrictions. The application of Interior 1 is not in line with these goals. This is especially obvious because neighborhoods east of Hennepin and parts of Seward are very near to city job centers, yet their proposed built form designation doesn't match this need.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7931	19	/policies/bicycling/	I fully support this policy. Bicycle facilities should not be stunted simply because of inconvenience to single-occupant vehicles.	7/23/2018
7932	37	/policies/mixed-income-housing/	Mixed income housing options in a neighborhood, whether multi-family or single family, with a variety of housing types/sizes allow a person to move through stages of life in the same neighborhood, if desired, thus promoting the most important determinant of longevity, social-connectedness.	7/23/2018
7933	73	/policies/stormwater-management/	Add: Require all new development to result in no net increase in stormwater runoff for the site.	7/23/2018
7934	33	/policies/affordable-housing-production/	I like the "aging in place" concept. "Prioritize the needs of those who have the greatest need for housing stability â€” households with incomes at or below 30 percent of area median income." What does this mean??? Prioritize what needs? How? Like you've done with public housing development? Why not use the \$43 million that MPHA has been sitting on to address housing disparity? What is Greg Russ's role in this? "Expand tools and resources to produce new housing affordable to those at or below 30, 50 and 80 percent of area median income." This is very strange language. What is special about 30, 50, & 80%? Isn't this everyone? This language is very vague. Does "targeted interventions" mean eminent domain?	7/23/2018
7935	16	/policies/environmental-impacts-of-transportation/	Consider closing certain streets to cars completely and transforming them into bicycle-pedestrian only streets. Cars would still be able to use alleys and adjacent streets to get to where they need to go.	7/23/2018
7936	94	/policies/heritage-preservation-regulation/	The city should not be in the business of historic preservation. Too often "history" is used to stop developments. There needs to be clear definitions of what makes a sight historic, and it should not just be a site's age. Just because something is old does not mean it is historic. Furthermore, things that are not even 100 years old are not historic. The best way to preserve history is to have little pocket museums like the ones around the University of Minnesota, Uptown, Washington Ave, and the Mill district. These signs that tell the history of the area are an excellent way to show how the city has grown over the years and documents what use to be there. We do not need to keep useless buildings in our 65 square mile city in order to preserve history, we just need to document it accordingly.	7/23/2018
7937	93	/policies/stewarding-historic-properties/	Yes to this policy. And "Require new construction in historic districts to be compatible with the historic fabric." This statement needs to be true throughout the city. The new construction that I have seen sticks out like a sore thumb. It is no way compatible with the existing homes or apartments and it is an eyesore.	7/23/2018
7938	35	/policies/innovative-housing-types/	Instead of being innovative, why not just build more housing now, and then work out the kinks later.	7/23/2018
7939	6	/policies/pedestrian-oriented-building-and-site-design/	Remove existing impediments to pedestrian walking by: --adding curb cuts where non exist --removing impeding street furniture like bus advertising benches that block side walks and move existing utility poles etc that block pedestrian access. --cutting lanes on streets over 3 lanes like Lake Ave by Bde Maka Ska	7/23/2018
7940	42	/policies/expand-homeownership/	More can be done than the non-specific policies here. I especially hope you'll combine fourplexes and homeownership programs for people of color (esp. black people) who have been excluded from homeownership systematically -- addressing racial income disparities by providing the new owners with income, racial ownership disparities, and creating additional owner-occupied fourplexes (or triplexes) in historically underinvested neighborhoods. Please also consider what is recommended here: https://medium.com/neighbors-for-more-neighbors/minneapolis-comp-plan-review-expanding-ownership-7d382a2be093	7/23/2018
7941	34	/policies/affordable-housing-preservation/	"Create and strengthen strategies to retain naturally occurring affordable housing." This is at odds with the rest of the plan. You can't encourage the razing of single-family homes and at the same time strengthen to retain them.	7/23/2018
7942	20	/policies/transit/	I fully support this policy. Specifically, increasing frequency is the key to increased convenience for existing and would-be transit riders.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7943	1	/policies/access-to-housing/	I am generally very much in favor of multi-family housing throughout the city, with at least some emphasis paid to retaining sun space for neighbors and scale/setbacks. This applies not just to multi-family housing but also to tear-downs and remodel projects to build single family housing.	7/23/2018
7944	7	/policies/public-realm/	If more walking is a goal, start enforcing sidewalk clearing during the six-month snow season. Too many sidewalks are not accessible due to ice and snow buildup. Especially difficult for physically-impaired. Build sidewalks on streets that inexplicably have none. Encourage Parks and Recreation Board to expand walking paths in all parks and parkways; design them to be ADA compliant.	7/23/2018
7945	82	/policies/aging/	<p>We support this policy overall. In particular, we support encouraging walking (including using any mobility aids or devices), biking (including as a mobility device), and transit as vibrant ways for people to maintain healthy independence and contribute to/be supported by their communities.</p> <p>a. We support allowing for a greater intensity of land use in the city, particularly in low-intensity areas, in order to increase the housing options for all residents, especially seniors, who wish to stay in the same area but in a different or smaller home. We support higher intensity of commercial uses as well to allow for robust and diverse ways for all residents, especially seniors with limited or slowing mobility to experience Complete Neighborhoods within a short-duration walk in any season or weather.</p> <p>c. We support the integration and importance of seniors to our communities and their contributions through volunteering, working, learning, and engaging intergenerationally. In particular, we support designing streets and public spaces that support aging populations and independence, from helping to reduce the cognitive load of crossing streets for those who might suffer from dementia or alzheimers to reducing crossing distances and signal cycle lengths and including longer crossings to decrease anxiety about crossing dangerous streets. We support working directly with car-free and transit-dependent seniors to understand how our community corridors can better their needs. We support more and better designed amenities, like heated bus shelters (with heat that can be turned on when seniors might feel the need for it) with ample seating, like benches where residents can rest on a walk home, like lights that cycle quickly to avoid long waits during frostbite weather or heat.</p> <p>We also support robust policies that help seniors age in place, whether providing support for renting out rooms or adding ADUs or subdividing a larger home or building a multifamily home. We believe the presence and inclusion of seniors is vital to the success, connectivity, health, and continuity of our communities. We value seniors for the ways in which their perspectives and experiences so often augment and ground our public spaces and we hold space for their contributions as well. We express grave concerns over the degree to which car-dependency is tied to perceptions and experiences of independence for many as they age, as well as for the disproportionate rate of injuries and fatalities suffered by seniors in our city on our streets and sidewalks, whether hit by drivers or at risk of falling. We support a city where seniors do not fear leaving their homes in the winter, where seniors have choices of places to live within the neighborhoods they know or ones they want to move to, and where being car-free provides an equal or greater quality of life to having a car, whether 70, 80, 90, or 100.</p> <p>Also, at busy intersections near senior facilities, put in place longer pedestrian crossing times, and consider pedestrian scramble, so peds can cross first</p> <p>~ Julia Curran and Neal Baxter, in discussion with other members of the Pedestrian Advisory Committee</p>	7/23/2018
7946	36	/policies/innovative-housing-strategies/	I'm for affordable housing. I also firmly believe the population segment who is to benefit from this policy should determine what "home" means to them. For most, especially those who are busting their butts to make ends meet, don't necessary want to live in a 30 story tall building. They want a small rental home, or duplex, a triplex or most a fourplex. Many with whom I spoke shared the stigma of the high rise buildings and not being able to have grass for themselves for their kids. Paying Developers to come in a "build for growth" is not the solution. Preserve and restore neighborhoods where people want to live. 12, 16 and 30 story buildings are people storage, not living an equitable life for all. IF you need evidence of this you only need to look at the high rise towers at Cedar Ave S and Riverside in our fair city-- hugely failed multi income level housing. People storage until then can find something that resembles a home.	7/23/2018
7947	41	/policies/tenant-protections/	<p>These policies need to be stronger and more specific. As a starting point, please consider the policies listed here:</p> <p>https://medium.com/neighbors-for-more-neighbors/minneapolis-2040-tenant-protections-6206723176ab</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7948	49	/policies/educational-and-economic-access/	Economic and employment disparities in Minneapolis are prevalent not only because of limited access to entry-level, livable wage positions, but also because people of color qualified for mid- and high-level positions are not getting hired. Where is the plan for cultural competency training for hiring representatives and for small business owners? Minneapolis is full of educated, qualified adults who do not get interviews, don't get hired, or do not stay in a job long because "traditional Minnesotans" are not able to/do not want to create a welcoming workplace where diversity of thought can flourish and where all Minnesotans can feel like they contribute and are a part of the workplace.	7/23/2018
7949	20	/policies/transit/	<p>I think that ensuring that there is safe, reliable, frequent and inexpensive transit is a major, major need for the city to meet its environmental and growth goals. This is an equity issue. It is also basic nuts and bolts. Currently our bus system is particularly inadequate on all levels. when developing transit plans I think that it would be important to plan supplemental transportation beyond train and current bus routes.</p> <p>As much as I personally love to bike and walk over using my car or public transit, I think that it is extremely naive and unrealistic to imagine that the majority of residents will switch to people powered movement to reach their jobs, get their educations, do their shopping and socializing on a daily year round basis. Consider the old, the handicapped, parents traveling with preschoolers, fitness levels in general and our climate when evaluating the likelihood of wholesale by-in to non-motorized transportation. Incredible tranist will help wean people from their individual vehicles faster than forced reliance on bikes and walking.</p> <p>Even as we turn to more automated shopping, delivery vehicles of some sort will need space to move, pause and ultimately rest. New construction of buildings and roadways will still need to provide room for individual vehicles to move, park, be repaired and refueled in someway. It seems that public recharging stations should be planned for.</p>	7/23/2018
7950	6	/policies/pedestrian-oriented-building-and-site-de	Yes, thank you!	7/23/2018
7951	20	/policies/transit/	<p>I think that ensuring that there is safe, reliable, frequent and inexpensive transit is a major, major need for the city to meet its environmental and growth goals. This is an equity issue. It is also basic nuts and bolts. Currently our bus system is particularly inadequate on all levels. when developing transit plans I think that it would be important to plan supplemental transportation beyond train and current bus routes.</p> <p>As much as I personally love to bike and walk over using my car or public transit, I think that it is extremely naive and unrealistic to imagine that the majority of residents will switch to people powered movement to reach their jobs, get their educations, do their shopping and socializing on a daily year round basis. It seems that public recharging stations should be planned for.</p>	7/23/2018
7952	95	/policies/heritage-preservation-financial-incentive	Great policy. Apply it to the city at large and base it on need of the owner. (counterpoint to a.)	7/23/2018
7953	82	/policies/aging/	5G (internet of things) networks will be debuting in the next 18 to 24 months. 5G will revolutionize many things but certainly it will increase the options elderly have to live out their lives in their own homes if they chose. Elderly (and I am in that demographic) don't necessarily want to sell their homes and move into whatever utopian vision city planners have for their dotage living arrangements. Where and at what point did city planners seek the opinions of older people when conceiving this plan? I can tell you I won't be moving out of my house. You'll be carrying me out feet first when I leave.	7/23/2018
7954	11	/policies/skyways/	I do not support this policy. The City should not be promoting tools that reduce the vibrancy at the street level.	7/23/2018
7955	38	/policies/affordable-housing-near-transit-and-job	With more options to work from home, location near transit to and from work may not be such a high priority for some persons. Rather, the person working from home may seek coffee shops or other places to meet near home.	7/23/2018
7956	7	/policies/public-realm/	Protect pedestrians and public from cars and trucks running down side walks or crashing into buildings like more bollards or pedestrian protection in pedestrian areas.	7/23/2018
7957	14	/policies/tree-canopy-and-urban-forest/	Yes to all action steps, particularly letter "d".	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7958	0.1	/topics/land-use-built-form/	What are you trying to do to Uptown? It is already becoming impossible to drive there, and has long been impossible to park! Rumor has it that a hotel is going up on the site of the BP on Lake Street. That intersection CANNOT handle more traffic, especially as it has an emergency response station there. Please remember that people who enjoy living in Minneapolis enjoy it because it is beautiful, not because it is crowded and has terrible traffic!	7/23/2018
7959	0.1	/topics/land-use-built-form/	<p>In theory, I support the idea of 4-plexes being allowed in residential neighborhoods, however I think it is important to prevent existing housing that isn't in poor condition to be torn down to build the 4-plexes. Because new construction costs so much, each unit in a new 4-plex would probably cost more than the original house to rent or own, which doesn't help the city's goal of creating more affordable housing (either by the city's definition of affordable, or just affordable to the current residents of the neighborhood).</p> <p>At the same time, while I understand and support the need to create more housing, I probably wouldn't want to buy a house on a block with several 4-plexes. I grew up in a single family home on a block in Minneapolis that is probably majority rentals (ranging from duplexes to small apartment buildings). I think the lack of long term residents really limited the community feel of the block compared to what I see both on adjacent blocks without as many rentals and in other neighborhoods that are majority single family, owner occupied houses. I think the city needs to find a way to increase the housing stock without harming the community feel of blocks and neighborhoods that are mainly single family homes.</p>	7/23/2018
7960	0.1	/topics/land-use-built-form/	I am glad that the city is moving towards a "built-form" code instead of just a "land-use" code. I do wish the city was more progressive in terms of the built forms allowed. Our city has been held back for the last 70 years based on zoning codes that were written and enforced by an entrenched and powerful minority of mostly white and mostly wealthy landowners. Allowing more multi-family housing and more small commercial businesses into all parts of the city (even more than this map shows) would be one step towards greater equity in our city.	7/23/2018
7961	8	/policies/public-safety-through-environmental-de	Protect pedestrians from car traffic with bollards or other protection.	7/23/2018
7962	58	/policies/business-districts-and-corridors/	I live in a neighborhood with some great commercial corridors which was one of the big draws to living there, so I think this policy is very important. I'm not clear on how reinvesting in existing commercial venues will work with the increased height allowed in the built-form proposal. I wonder if there is a way the City could encourage the preservation of the small one to two story businesses that give character to the historic commercial nodes by assisting owners in creating additions on the existing buildings instead of demolishing them for new construction. There are many creative ways to preserve the existing street facade and still allow the density to be generated through additions stepped back from the street. I think if there were images of that sort of development in this plan it would make people less nervous about how their neighborhood would change. For example, 520 W 20th Street in NY is a really cool way to do an addition but keep the character at street level. A deconstruction ordinance like in Milwaukee or Portland would be a way to incentivize this sort of preservation, plus it would create a lot of jobs in the construction industry. I think the type of support in action step c should be clarified, is it just City recognition of districts or is there a financial incentive. Action step d should be tied back to the complete streets policies and the desire to increase the tree canopy.	7/23/2018
7963	26	/policies/vision-zero/	I support including Vision Zero in the plan and recommend that enforcement be removed. Enforcement amplifies racial disparities, and there are plenty of other proven safety strategies to implement.	7/23/2018
7964	14	/policies/tree-canopy-and-urban-forest/	Minneapolis is going backwards in its tree canopy. Stop cutting mature healthy ash trees and leaving stumps lingering for years. Require immediate replacement of removed trees. No replacement tree ready, no removal.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7965	6	/policies/pedestrian-oriented-building-and-site-design/	<p>We strongly support the prioritization of pedestrians and the pedestrian experience in consideration and planning of building and site design.</p> <p>a. We support orienting buildings and building entrances to the street. We encourage the city to explore frequent entrances to all buildings, not just multi-family residential.</p> <p>b. We enthusiastically support active ground floor uses in new buildings with direct sidewalk connections and we encourage city policies that help guide existing buildings towards this outcome as well.</p> <p>c. We support clear and low windows at street level.</p> <p>d. We support engaging building faces with varied interest that shifts at a human pace, rather than blank and inactive walls and consistent large setbacks.</p> <p>e. We strongly support buildings that integrate pedestrian protection and comfort, including awnings and canopies. We request that awning depths take into consideration sidewalk widths, so that they do not drop snow/ice/water in the middle of the sidewalk. We ask the city to explore additional features such as low walls and stoops that function as quasi public seating or a place to rearrange bags for those who need to rest, angled reflective windows, and small alcoves that offer wind breaks.</p> <p>f. We support building design that minimizes venturi winds and similar generation of wind currents.</p> <p>g. We disagree with the blanket distaste for buildings shading public right of way. We instead request that the city encourage buildings and massings that are dynamic in their understanding and design for shadows, recognizing that the extreme seasons here make shaded areas alternately desirable and to be avoided depending on weather conditions.</p> <p>h. We support ensuring that sidewalk space is sufficient to allow for lively and robust public space uses while still allowing free flow of pedestrian traffic</p> <p>i. Support</p> <p>j. We support zoning regulations and incentives that promote bicycling and request that the same options and incentives be extended to walking as well.</p> <p>k. We strongly support elimination of off-street parking minimums through the city. We request that where off-street parking continues to occur, much stronger consideration is given to how this use impacts pedestrians, from creating additional conflict points to increasing runoff onto sidewalks to creating unpleasant walking environments and inactive uses.</p> <p>l. We support reducing access to/egress from parking lots. We request that the city create a plan to phase out parking ramps in areas with high pedestrian traffic. We request that, in the interim, the city develop clearer guidelines to communicate to drivers using ramps that they are crossing over pedestrian space without right of way. We strong urge the city to ban and remove the noxious, monolingual robotic voices announcing the possible presence of cars on sidewalks, as it violates Complete Streets policy and gives drivers a false sense of safety.</p>	7/23/2018
7966	69	/policies/renewable-and-carbon-free-energy/	Renewable energy is critical to a more stable future. Use all flexibility available to move away from fossil fuels/non-renewable sources.	7/23/2018
7967	1	/policies/access-to-housing/	I fully support this policy. Increasing housing and its diversity of locations and types is crucial to the equitable, healthful future of Minneapolis.	7/23/2018
7968	16	/policies/environmental-impacts-of-transportation/	The loss of so many mature trees won't help the air quality. But electric cars, coupled with greater developments in renewable energy and a support grid of charging stations, would help reduce CO2 emissions. The next car I buy will be an ev. Why aren't we investing in that reality since it is more realistic? People are going to drive, so lets try to make it as clean as possible.	7/23/2018
7969	70	/policies/ecology-and-habitat/	BAN PLASTIC LAWNS! Such a desecration.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7970	6	/policies/pedestrian-oriented-building-and-site-de	<p>n. We strong support the city in discouraging the establishment and size of surface parking lots. In addition, we urge the city to more tightly restrict and enforce winter sidewalk clearance at all parking structures and parking lots, addressing run-off that pools and refreezes on sidewalks and snow dropped and slopped on sidewalk right of way from vehicle tires. We strongly encourage the city to explore ways to encourage redevelopment of surface parking lots. When a sidewalk is necessary, we urge that it be placed behind the building, rather than adjacent to the sidewalk.</p> <p>o. We support the restrictions on new auto-oriented uses, particularly as these uses are harmful to nearby pedestrian experiences (beyond air quality and noise pollution concerns) and, when part of "successful" businesses, mean that sidewalks are nearly constantly blocked, their driveways/curbcuts functioning as intersections/conflict points where pedestrians face harassment and injury from drivers. We encourage the city to explore ways to phase out these uses, or at minimum restrict the number and width of curb cuts to reduce conflict points.</p> <p>p. We support the restriction of auto-oriented uses in all areas near multi-family residential and along commercial corridors.</p> <p>q. We support mitigation of the impacts of commercial auto repair and other auto-oriented uses on the pedestrian environment. We encourage particular attention be paid to run-off, snow deposits, winter maintenance, sidewalk activation, conflict points, reduction/elimination/narrowing of curbcuts, constant vehicle use creating sloped sidewalks, and air and noise pollution. We encourage the city to robustly support independently owned existing auto-oriented businesses in transitioning away from fossil fuel industries, and to work towards being partners with local communities, focusing on the positive aspects of these businesses, including providing a wide range of open hours and affordable packaged or prepared food options for those on foot/waiting at nearby transit, as well as quasi-public restrooms.</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee (part 2)</p>	7/23/2018
7971	93	/policies/stewarding-historic-properties/	<p>The city should not create more historic districts and should abolish the ones it already has. The city is not very old and has almost no historic relevance to the country or state as the first city in Minnesota was Stillwater. A city is an every growing and evolving entity and should not be confided to what the achitectue style was in the 1930s or 1880s, more so because it makes constructing new housing and commercial space more expensive which drives up rents for residential and commercial spaces. Enforcing these districts and creating more would be in a direct contrast to Minneapolis' goals of affordable housing and racial equity because of how difficult it is to build and maintain affordable housing and commercial spaces while having to maintain historical "character " Also historic districts are not ADA compliant, another of the thousands of reasons to not create any more historic districts.</p>	7/23/2018
7972	96	/policies/heritage-preservation-recognition/	<p>Great! Let's do this in all of our neighborhoods, because they are all historic. That is until you decimate them with the massive amounts of development this plan calls for.</p>	7/23/2018
7973	71	/policies/soil-health/	<p>Ban plastic, artificial, and AstroTurf lawns! An environmental scourge.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7974	84	/policies/public-safety/	<p>For a comprehensive plan, there is remarkably little about policing in general. And as far as I can see, there is nothing about police accountability or police misconduct. That's for a department which receives, I believe, 40% of the city budget! It is also a department which accounts for a disproportionate amount of city legal liability.</p> <p>Is this really that unimportant to the city leadership? Probably so, especially the accountability part, based on what I see from the mayor and city council.</p> <p>While the mayor and city council argue over who should have more influence over the police department, I see neither of them actually DOING anything with the power they currently have. Based on what I see in this supposedly "comprehensive" plan, that is the intent for the next 20 years.</p> <p>Policing has an incredible influence on racial disparities. Arrest records lead to difficulties in obtaining employment or housing. Over-prosecution and over-incarceration of people of color mean that fathers are removed from the community and from support and participation with their children. That has a profound effect on early childhood development and later education.</p> <p>In fact, disparities in policing impact nearly all the subjects addressed in the comprehensive plan! It MUST be addressed.</p> <p>If you can't challenge your own police department, how will you confront any of the disparities which you talk about with such feigned concern?</p>	7/23/2018
7975	50	/policies/access-to-technology/	<p>Equitable access to internet is essential for the city going into the future. Disparities in access to low cost broadband internet along racial and socioeconomic lines continues to be a major problem. Job applications, school work, city calendars, and even the website to comment on the 2040 plan are often only accessible online. Without affordable access to these resources, people will continue to fall behind and will be less able to be active in their community. If the City of Minneapolis does not invest in affordable internet, this will only serve to further exacerbate existing inequalities in the city.</p> <p>One step that can be taken to pursue this goal is to bring back the Community Technology Survey that was discontinued after 2014. This information can be used to better target resources and as an important measurement tool as Minneapolis strives to reach the goals stated in Policy 50. I would also like to see those goals fleshed out more so that Minneapolis can create concrete steps the city will take to ensure equitable access to broadband internet for all citizens.</p>	7/23/2018
7976	37	/policies/mixed-income-housing/	<p>This language is vague. "City intervention" sounds like eminent domain.</p>	7/23/2018
7977	33	/policies/affordable-housing-production/	<p>HOmes need to be homes, with ample green space, close to real jobs(not forecast) and not 12, 16 or 30 story tall high rises that are not home, but people storage. That is not an equitable life. Take a harder look at how to preserve and rehab neighborhoods were people have created "community" and where they want to live. Also, don't get stuck on this false pretense of creating all sorts of new affordable housing that is not a home, rather a high rise that has the stigma of being for the "poor." Since Mpls raised its minimum wage to \$15/hour, I have heard many small and medium business owners discuss their Minneapolis exit strategy and larger employers have attrition to deal with the increased labor costs for unskilled workers. Therefore, any projections done in 2016 and prior on the jobs front is inaccurate due to macro economic forces. Again, look were the jobs are for the segment this policy is to "benefit" and determine how to improve the existing neighborhoods instead of tearing them down--displacing families who willnot return-- for a large developer to reap the benefits of this poor policy.</p>	7/23/2018
7978	0.1	/topics/land-use-built-form/	<p>I fully support the Land Use and Built Form policies and maps in Minneapolis 2040. They provide a reasonable and achievable outline for the future form and function of our city in the coming decades.</p>	7/23/2018
7979	50	/policies/access-to-technology/	<p>Everyone should have access to fiber. I'd pay higher taxes for this to be a municipal service that everyone could access free of charge.</p>	7/23/2018
7980	17	/policies/complete-streets/	<p>I support this policy but would like to see more specific plans for things like greenways that make our streets safe and accessible for people.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7981	84	/policies/public-safety/	<p>Paragraphs a and b are nice.</p> <p>But building trust (paragraph c)? How do you plan to do that? Hold community meetings to placate us? Engage in more public relations? NO. Trust is built by being trust-worthy. That takes real work, not just pretty words (and giving money to sycophants in the "community" who can be relied on to calm us down when you kill someone).</p> <p>The police are out of control. We need real civilian review and discipline, not the fake OPCR, where civilian complaints go to die. We need better policies - but more importantly, actual enforcement of the policies that exist. We need consistent discipline, so arbitrators do not overturn the few attempts to discipline or even fire officers. We need an end to racial profiling and over-prosecution of people of color.</p> <p>And we need professional liability insurance for police officers, so they bear some responsibility for their actions. It is outrageous that settlements come from the general fund (taxpayers), while the officers involved are almost never disciplined.</p>	7/23/2018
7982	12	/policies/lighting/	<p>We support the city's attention to lighting, particularly as a mode of transportation that does not provide its own lighting.</p> <p>a. We support the provision of pedestrian-friendly lighting that minimizes light pollution and glare. We request that the city explore innovative lighting that might better illuminate sidewalks and sidewalk conditions.</p> <p>b. We support pedestrian scale lighting throughout the city. We encourage the city to explore introducing this scale lighting particularly in areas where drivers behave recklessly, including multi-lane one-ways and near freeway on/off ramps. We support lighting pedestrian routes through Minneapolis Parks.</p> <p>c. We strongly support directional and wayfinding signs with illumination, that are scaled for and legible to those on foot.</p> <p>d. Support</p> <p>e. Support</p> <p>f. Support</p> <p>g. We strongly support dark sky efforts and innovative approaches to managing light.</p> <p>We recognize the importance of pedestrian scale lighting for safely navigating our city, particularly for those unfamiliar with our streets, with impaired vision, or who are at greater risk of falling. We also recognize that not all pedestrians feels safe or most comfortable with high levels of illumination and that in some cases, lights can feel like spotlights putting them at risk. We request that the city develop more nuanced and robust positions on lighting, and explore the placemaking and experiential value in having darkness within our city, especially when northern lights may be visible.</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/23/2018
7983	97	/policies/heritage-preservation-legislative-advoca	<p>Partnerships MUST include the neighborhoods. Partnerships with developers flies in the face of these goals. Keep it clean. Work with integrity.</p>	7/23/2018
7984	6	/policies/pedestrian-oriented-building-and-site-de	<p>Thank you for including this critical policy. I love that auto-oriented uses (drive throughs, gas stations) are prohibited and discouraged. Eliminating car parking requirements is also a good step - developers and business owners can determine what is needed, making housing (and other things) more affordable if less is needed.</p> <p>Please add more specifics about how surface parking lots will be discouraged. They make walking unpleasant and feel long, even when it's not. Require surface parking lots be located behind buildings, and accessed off alleys. Expand and increase stormwater or other fees so that they are expensive to retain, even for non-profit and public entities.</p>	7/23/2018
7985	50	/policies/access-to-technology/	<p>You should inform the Park Board about these goals. They have actually created legal blockades to getting fiber into parts of SW. However I believe the rollout is proceeding nicely throughout the city.</p> <p>How many people aren't digitally literate? Really...the percentage is pretty low.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7986	0.1	/topics/land-use-built-form/	<p>I live, work and play in Minneapolis and am concerned by the re-zoning proposed in the Minneapolis 2040 draft. My husband and I consciously chose South Minneapolis as a place to call home and grow our family; valuing the unique and eclectic historic neighborhood, walkable access to various amenities and close proximity to my job downtown. While I'm in full support of the sustainable evolution and innovation of our city making it more accessible to more people, I don't agree with the drastic re-zoning proposed in the plan nor do I feel that it adequately addresses traffic and transit realities. Many of the streets affected by the re-zoning are in the heart of historic neighborhoods where I fear that developers will destroy the aesthetic, culture and historic preservation that makes our city so charming.</p> <p>My recommendation would be to focus on existing major transit routes and commercial areas that would benefit from increased density, greater access to parking and enhanced innovation/evolution. These areas have the infrastructure to support this type of growth without threatening historical single-family neighborhoods.</p> <p>Lastly, I would like to note how disappointed I am by how poorly this plan was socialized in the community (I learned of it only weeks ago from a neighbor). The lack of marketing feels purposeful in a concerning way. I would have appreciated being made aware earlier and invited to the conversation.</p> <p>Thank you, Jessica Raasch</p>	7/23/2018
7987	15	/policies/transportation-and-equity/	We will mostly be driving ev in next decade. What is the plan to create ev economy with quality charging stations with coffee shop + wifi?	7/23/2018
7988	1	/policies/access-to-housing/	As a Minneapolis property owner, I am not in favor of this policy.	7/23/2018
7989	40	/policies/homelessness/	Studies show that where there are more homeless shelters, homelessness increases. This is more bureaucracy to "solve" a problem that the governments create.	7/23/2018
7990	1	/policies/access-to-housing/	<p>We strongly support allowing more housing in all areas of the city, to increase walkability and the presence of amenities</p> <p>a. We strongly support allowing more housing everywhere, by right. We request the city explore means by which to allow housing in Production and Distribution areas, within other city goals, as a way to provide varied and steady foot traffic and increase walkability in these areas as well.</p> <p>b. Nope, density everywhere!</p> <p>c. We support allowing multi-family housing in all parts of the city, including along transit routes of all types. We do not support restricting the provision of multi-family housing only to narrow corridors; we support policies that address and seek to undo historical redlining, therefore we encourage allowing more multi-family housing in areas where low density zoning and racial covenants have restricted or eliminated transit access and viability.</p> <p>d. We request a diversity of housing and building types in all parts of the city; we encourage visual complexity and diversity as part of a vibrant built environment. For vulnerable and marginalized pedestrians in particular, increased density can increase a perception of safety by increasing the "eyes on the street" as well as increasing the amenities and transit an area can support; we encourage housing density and diversity in order to increase walkability, particularly for those who are more vulnerable to deserted areas.</p> <p>e. We support increasing housing throughout Minneapolis, through robust and diverse means, including ADUs, returning single family homes/mansions to historical use housing multiple households, and allowing subdivision of lots for innovative tiny infill. Given the base costs of designing and building ADA accessible housing, we urge the city to set as its baseline land use intensity for every lot the kind of housing that makes these units feasible and/or triggers ADA requirements at that size threshold. Given Minneapolis' historic redlining and continued racial inequity, which is directly intersectional with walkability, we urge that the city adopt higher intensity, rather than lower intensity, land uses through all areas, blocks, and neighborhoods where redlining was prevalent and where its impact can still be seen in their demographics compared to the city as a whole. We strongly urge the city to also consider the deleterious internal impacts of homogenous areas of wealth on walkability, from loss of transit to high rents to low foot traffic and patterns of deserted streets as residents leave for their other homes. We request that the city raise the cap on households in this to encourage more residents and increase walkability in and transit access to these areas.</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

7991	80	/policies/development-near-metro-stations/	The images with high rises between Cedar Lake and Bde Maka Ska are much higher than desirable to maintain the park-like feeling. The Kajima building on the northwest corner of Bde Maka Ska changed the wind patterns on the lake so the wind surfers mostly went elsewhere. More tall buildings could add more problems for sailors. Having lower rise (up to six stories) would be less of an intrusion on our crown jewels, the lakes, creeks, and river, giving the impression of a more park-like city than a built environment.	7/23/2018
7992	1	/policies/access-to-housing/	I strongly support this policy, and would love to see more density and diversity of housing types in my neighborhood. I am concerned about the ride of homelessness and housing displacement in our city and support the city acting proactively to prevent this from becoming more of a problem. It makes a lot of sense to focus multi-family housing on Transit corridors - I would like to see more done to encourage that.	7/23/2018
7993	78	/policies/park-design-and-programming/	More off-leash areas for dogs and their owners. Boom Island, Powderhorn Park, plenty of space for off-leash areas in those and many other parks. A lot of people are choosing to have children later in life or not at all and dogs are the new children for many city residents. There's lots and lots of park space committed to other recreational activities. More off-leash areas please!	7/23/2018
7994	39	/policies/fair-housing/	Sounds like more government jobs to push more paper.....	7/23/2018
7995	59	/policies/downtown/	I would like to see more tangible steps supporting action steps b and d, these are vital to keeping the downtown area vibrant. It seems pretty strange that transportation isn't mentioned in any of these steps, it should be more clearly tied in. As someone who commutes by bicycle into downtown I would like to see something here about making the city center more friendly through the complete the streets policies. Also I think the parking issue has to be mentioned, the car situation in town has gotten crazy and it seems like it will eventually be a problem with keeping downtown viable. Is the strategy just to make driving there so terrible that everyone uses public transportation or bicycles? It seems like it at least needs to be mentioned in this section. I think the policy on preservation of historic/cultural assets should also be mentioned, it is an important link to the tourism industry discussed.	7/23/2018
7996	0.1	/topics/land-use-built-form/	I believe equity should be our goal, and this plan does not go far enough. Interior 2 should be the minimum designation, and should be applied evenly as the minimum across the city, including in wealthy neighborhoods of primarily single family homes.	7/23/2018
7997	0.1	/topics/land-use-built-form/	I'm the owner of a single family home. I'd love a quadplex next door- there's one just down the block! We choose to live and raise our child in Minneapolis because we want him to grow up in a diverse environment. That means diverse housing.	7/23/2018
7997	0.1	/topics/land-use-built-form/	I fully support the Built Form Districts outlined in this draft version of Minneapolis 2040, including Interior 1, 2, and 3.	7/23/2018
7998	77	/policies/park-access/	Baby boomers are all getting to be elderly now. Put more seating along the walking paths so people can sit and rest during their walks and hikes.	7/23/2018
7999	33	/policies/affordable-housing-production/	--Develop more public owned housing that is not concentrated in high rise ghettos or large concentrations of over 100 units.	7/23/2018
7999	33	/policies/affordable-housing-production/	--Develop new public owned housing in ALL sections of the city especially where there is not public housing, especially in form	7/23/2018
8000	75	/policies/waste-reduction/	Deliver an organics cart to every single property, no matter what. For apartments, coordinate more frequent pickups.	7/23/2018
8001	1	/policies/access-to-housing/	Interior 1 and 2 are fine. Do away with interior 3. My single family home exists with duplexes, fourplexes, simplexes and apartment buildings quite nicely. Why? Because they are all limited to 2.5 stories. Also, they all have the same amount of setback between houses. None are built right up to the property line. Corridor 4 needs to be lowered to 3 stories in areas where it is currently mostly residential. 4 stories is too high and will over run an area with traffic and overuse. Corridor 6 needs to be strictly adhered to. NO conditional use permits that allow for more than 6 and 6 should include the mechanicals. Transit corridors do not need to be as high as you are proposing. Near any lakes, shoreline overlay districts must be honored and respected. Do not make the citizens of this city sue the city because of your negligence to this matter. Lake street is far too dense.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8002	18 /policies/walking/		<p>We strongly support a walking first city policy and improvements to the pedestrian environment as part of what is necessary to make walking a safer, more comfortable, more convenient, and more desirable mode of transportation; we urge the city to plan for a 2040 where walking is the default mode of transportation.</p> <p>a. We support a focus on pedestrian safety at all conflict points with drivers, including intersections. We request that this policy include other conflict points where pedestrian right of way is often ignored or challenged, such as in and crossing perpendicular to/across alleys, and on sidewalks/surface parking lots where drivers cross and block sidewalks.</p> <p>b. We strongly support vibrant public spaces oriented towards human scale uses, including our public right of way.</p> <p>c. We offer conditional support for expanding clearly-designated pedestrian areas; we support infrastructure that is designed to prioritize pedestrian usage, including expanded pedestrian space, but moreover support the growth of people-oriented and shared streets that reflect the prioritization of Complete Streets. We express concern that pedestrian oriented infrastructure alone is insufficient to make up for roadways that center and prioritize car infrastructure and vehicle lanes/speeds.</p> <p>d. We support a reduction in the number of curb cuts and a narrowing of those that exist, as well as other design treatments to keep motor vehicles out of pedestrian-only spaces.</p> <p>e. We support measures to reduce motorized vehicle traffic speeds and reduce driver antagonism, including but not limited to narrowed road widths and lane reductions.</p> <p>f. We strongly support pedestrian connections across existing barriers, including railways, freeways, and waterways. We request that in the case of busy streets, the city prioritize reducing motorized vehicle volumes and maintaining throughput capacity in conjunction with MetroTransit and via non-motorized transportation means. We encourage the city to reevaluate pedestrian barriers that exist as a function of City choices, such as busy streets, particularly when these streets are higher intensity commercial, residential, and transit corridors. We encourage the city to place explicit value on pedestrian- and community-oriented street design options before making choices, including the value of reduced lanes for private vehicles, reduced vehicle speeds, dedicated transit lanes, increased porosity, bike lanes, and shared streets. Additionally, we request particular attention be paid to the pedestrian experience in the design of any such street crossing connections, to reduce driver speeds (if applicable) across these stretches, to offer options for those on foot, to provide visual interest, to provide places to pause/sit, to mark them as gateways between communities and neighborhoods through placemaking and art, and to encourage robust use. We emphatically oppose using motorized vehicle volumes or throughput as a reason to limit pedestrian crossings or to choose multiple lanes or higher speeds, particularly as these choices put pedestrians at greatly increased and unnecessary risk of grievous injury and death.</p> <p>g. We fully support wider sidewalks/walking paths by default throughout the city, as well as substantially wider sidewalks by default in areas with higher potential pedestrian traffic, and designed to accommodate peak pedestrian travel volumes.</p>	7/23/2018
8003	84 /policies/public-safety/		<p>This is going to be a tough one. We live in a very liberal society, so you can't stop people from engaging activities that lead to dangerous situations. But if you could, maybe you could help people stop drinking to excess...maybe you could help them stop using drugs...maybe you could help them build stronger and healthier family structures...maybe you could teach them that working hard in school and in their career is the path toward a better life.</p>	7/23/2018
8004	7 /policies/public-realm/		<p>The city should have plans that incorporate the complete streets priorities for every planned construction or re-construction before it is presented to the public. The city should follow the complete streets priority plan unless it can't because of very specific reasons. There is no reason to sacrifice the safety of pedestrians, the handicapped or other people not in a car. This is especially true on busy roads with lots of destinations.</p>	7/23/2018
8005	0.1 /topics/land-use-built-form/		<p>With the affordability of Minneapolis at stake for average folks of average means, I encourage the city to look at the proposed zoning and land use categories as MINIMUMS. We need significantly more housing, and watering down the plan to appease wealthy, SFH owners is 1) a mistake, because they don't want any change, so they'll be angry anyway, 2) wrong. If we are a city that embraces equity and fairness, every neighborhood needs to be willing to take on more housing.</p>	7/23/2018
8006	7 /policies/public-realm/		<p>Add more sheltered spaces! Remember how cold it gets here in winter.</p>	7/23/2018
8007	80 /policies/development-near-metro-stations/		<p>"Line main pedestrian routes leading to METRO stations with active uses on the ground floor of buildings." What does this mean?? This doesn't make sense.</p> <p>"Break up large blocks into small, walkable blocks.." Love the idea--let's build a Blue City. But I wonder how this happens. Which blocks are broken up and how? This will disrupt neighborhoods.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8008	18	/policies/walking/	<p>Additionally, we urge the city to include the following considerations in its Walking policy:</p> <p>a. We request the city address the impact of winter on walking, including both infrastructure and prioritizing maintenance of all pedestrian infrastructure,</p> <p>b. We request the city evaluate, plan, design, and build for year-round drainage with its design, installation, and maintenance of sidewalks, particularly in light of our climate crisis and shifting freeze-thaw cycles, with current building drainage generally leading directly onto sidewalks, and understanding that current intersection design puts curb ramps and storm sewers together.</p> <p>c. We request the city implement and expand zoning regulations and incentives that promote walking, such as the provision of secured storage for transportation carts near building entrances, storage lockers, and changing and shower facilities.</p> <p>d. We strongly urge the city to allow and encourage street porosity (unmarked midblock crossings) in all commercial and destination areas, as a sign of and contributor to vibrant community spaces</p> <p>Lastly, we appreciate the attention to walking in this Policy, but we urge the city to be much more aspirational in this policy guiding street design, to shift towards a Complete Streets framework that puts walking and people first, rather than thinking of walking defensively and secondarily, after streets have already been conceptually ceded to automobile primacy in both speeds and allotment of physical area.</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/23/2018
8009	17	/policies/complete-streets/	<p>I appreciate the modal priority you list here -- and yet this plan does NOT suggest that you are following this priority. Instead, you are squeezing space for the supposedly highest priorities in around a car-centered transportation system.</p> <p>I ask you implement this policy as described, and prioritize people walking and rolling, biking, and taking transit first. This is critical for addressing our big - and proportionally growing - transportation wedge of our climate emissions. This is critical for achieving Vision Zero. This is the only way we can ensure low-income people who have less access to cars true equitable transportation options.</p>	7/23/2018
8010	1	/policies/access-to-housing/	<p>Portions "d" and "e" are alarming to me. While attempting to take the long view, it is actually incredibly short-sighted. An open invitation to developers does not create the kind of equity this plan seeks. Part of what makes the city appealing to a wide variety of people is the variety of neighborhoods. While some love a densely populated area with walkability, some prefer a more suburban-like area with single family homes. This plan is basically an invitation to developers to take what they can get and make more money, add traffic to quieter streets and push many people out of the city to the suburbs. It's very disappointing and Mpls will lose alot of it's charm.</p>	7/23/2018
8011	27	/policies/transportation-partnerships/	<p>We support strengthening transportation partnerships, wherein the city's commitment to Complete Streets and Vision Zero is the baseline for these partnerships.</p> <p>We urge the city to encourage other entities to defer to city policies along commercial corridors.</p> <p>We urge the city to explore the connection between public transportation and walkability, including city-led funding to fill transportation gaps or provide more targeted service in lieu of other road improvements.</p> <p>We strongly urge the city to consider the impact of its projects and partnerships on walking. We urge the city to push for streets that are safe and comfortable for its most vulnerable users and to reject projects and stand up to partners, if necessary, when the road types, traffic volumes, and design speeds proposed are known to be dangerous to human life and detrimental to connected, vibrant, and street-oriented communities, particularly along our community corridors and in areas where street design has been used to reduce community power/cohesion/wealth.</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/23/2018
8012	41	/policies/tenant-protections/	<p>I want all Minneapolis residents to have access to affordable, safe, and decent housing. The city's lack of enforcement of the existing housing codes has been terrible in my neighborhood, and has allowed slum lords like Steve Frenz to flourish. Protect renters. The city's allegiance should be to the renters.</p>	7/23/2018
8013	19	/policies/bicycling/	<p>No, No and No. Enough with the bike lanes. Only physically able bodied folks can bike and then, only 7 months of the year. This is a waste of tax payer dollars. It serves an elite few.</p>	7/23/2018
8014	38	/policies/affordable-housing-near-transit-and-job-	<p>So.....how do you coordinate housing, urban development, and transit without having a transit plan???? To develop the housing and development then add the transit on as an afterthought is irresponsible.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8015	56	/policies/supporting-small-businesses/	As a small business owner, I have talked to many other small business owners - one to four employees. Everyone agrees that the city HATES small businesses. We feel persecuted by unaccountable inspectors. No one complains, though, because we don't want to draw attention to ourselves - the fear of retaliation is very real. (I hope this is anonymous.)	7/23/2018
8016	1	/policies/access-to-housing/	This policy needs to recognize the reality that the "Social Engineers" refuse to acknowledge: single family neighborhoods are prevalent for a reason--people want their own space, their lawn, and the ability to be treated fairly for achieving these things. They also need to be treated fairly for the excessive property taxed paid for single family neighborhoods. Taking away single family neighborhoods will be the economic demise of Minneapolis--change their landscape too much and they will vote with their pocket book, sell and move to a city that respects their rights for single family neighborhoods. Noting the numerous neighborhoods that do include single and multifamily and then the few high rise people storage towers, it will be economically stupid to cut off that funding source. Can you image the deeper hurt Minneapolis PUblic Schools is going to feel when you kill the neighbors that pay for the city to operate and also give substantial dollars to MPS to try to keep the equity balanced? Shame on you for letting the social engineers to create a policy that is not respectful of all, just pushing their agenda and are not mindful of the severely damaging economic damage it will do to this city and its public school system. Shame on you!!	7/23/2018
8017	1	/policies/access-to-housing/	Focus on preserving stock of smaller single family homes furthest from the city as a means to achieve affordability. Zone in such a way to prevent them being purchased by developers, torn down and rebuilt As something so large that it is no longer at starter home.	7/23/2018
8018	14	/policies/tree-canopy-and-urban-forest/	We strongly support city efforts to protect, improve, and maintain our urban tree canopy; those who walk benefit most from the shade of deciduous trees in summer and the warmth of sun through their bare branches in winter. a. We request the city explore how an increase in tree canopy can most benefit and enhance walkability, by exploring how pedestrians use and relate to our tree canopy. b. We support efforts to provide education and training on tree care for private landowners and urge the city to consider similar measures aimed at the general walking public, those of us whose familiarity with the streets we walk over and over--and their trees--often turns into curiosity and affection for these dynamic and changing parts of our streetscape. c. We support increasing growing space dedicated to trees. We encourage the city to explore road designs that prioritizes pedestrians in the experience of walking through the center of an arching tree canopy. We encourage the city to track boulevard trees lost to dangerous driving, as proxy data for places where pedestrians are at risk from drivers due to road design. We urge the city to consider the ways in which trees benefit walkability. In particular, we request the city: Plant and maintain a diversity of species with care, to protect us from the brutal sidewalks where monocultures have been lost to invasive species (a risk that increases with climate change), and to provide us with interest and shifting streetscapes as we navigate the city. Explore less wasteful and destructive means of sidewalk construction and replacement, including more patching and repair rather than full panel replacement, more permeability, and other measures that provide us with infrastructure at less cost/risk to our tree canopy. Work with the Park Board to balance the need for sidewalk clearance for even the tallest pedestrians with the benefits of trees off the right of way that have lower branching to foster engagement, pausing, climbing/sitting, and overall appreciation of trees. Additionally, work with the Park Board to determine whether some tree stumps can be left as habitat and pedestrian-scale interest as they allow micro-ecosystems and fungi to flourish, and provide human-level interest/connections with nature to pedestrians, including children. Pay attention to the many ways in which trees interact with and enhance the pedestrian environment, including seasonal shifts of colors and smells and light. We appreciate the growing inclusion of food-bearing landscapes and trees. ~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee	7/23/2018
8019	31	/policies/creative-workers/	The city has a lot of potential with creative workers. To make real progress the city needs to engage with the art students at each university and college within and around the city to see what they need, from studio space to even housing. The best way to engage with the creative class is to meet them where they are, and ask them what they need. There should also be talks with the park board to get more public art in parks made by local artists. This combined with the proposed action steps would be a good direction to go into.	7/23/2018
8020	55	/policies/business-innovation-and-expansion/	Add preserving existing uses, assets and Art Districts.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8021	19	/policies/bicycling/	<p>This policy needs to include more specifics on building out the most comfortable transportation spaces for people bicycling. They are currently missing. We need to build out a city-wide network of greenways (like the Midtown Greenway, and the Northside Greenway that is partially completed, and others, too). We need to build out our city-wide network of protected bikeways, giving people safe, comfortable access to destinations on busy streets like Lowry Avenue, Hennepin Avenue/Uptown, and all along Lake Street and Broadway (and others). This is especially true throughout downtown! If there's a neighborhood that should be full of every-street comfortable bikeways, it's downtown with destinations everywhere!</p> <p>Until my 75-year-old mother feels safe riding a bike on streets, until I feel safe riding a bike with my sister's 9-year-old on our streets, we do not have safe enough streets for people bicycling.</p>	7/23/2018
8022	0.1	/topics/land-use-built-form/	<p>Commercial uses should be allowed in more places: corner stores or bodegas can be great neighborhood assets and would help with all sorts of things including access to food. Zoning should enable a corner store to be within walking distance of every home in the city.</p>	7/23/2018
8023	74	/policies/integration-of-water-management-into-	<p>We support better stormwater management, including reducing impervious cover and amount of city/roads We have very significant concerns about how the current stormwater management system affects pedestrian access and walkability/accessibility</p> <p>~ Julia Curran, in discussion with other members of the Pedestrian Advisory Committee</p>	7/23/2018
8024	0.1	/topics/land-use-built-form/	<p>Interior 1 should all be replaced with at least Interior 2 or 3. Interior 1 seems to be applied less based on distance from downtown and more based on where affluent majority white people are located.</p>	7/23/2018
8025	18	/policies/walking/	<p>Walking should be a viable transportation choice in every corner of the city, not just the most amenity-rich south and southwest neighborhoods of Minneapolis. Pedestrians know best that the proximity found in a complete neighborhood matters.</p>	7/23/2018
8026	42	/policies/expand-homeownership/	<p>This is at odds with your mulit-unit buildings that will be replacing the affordable single-family homes.</p>	7/23/2018
8027	0.1	/topics/land-use-built-form/	<p>Minneapolis 2040 has some serious holes in it. I feel the real catalyst behind this proposal comes from the racial disparity issue in this state. While, I understand change needs to occur to help close the gap, I am seriously confused as to how you think by offering subsidized housing will solve the issue. Furthermore, who do you plan to offer subsidized housing to? My father immigrated to this country with \$10 in his pocket. He had to borrow some money along the way but eventually became self-sufficient to stand on his own and paid back all of his loans. With tremendous hard work, working 2 jobs, he put himself through college and found a job. It would only makes sense to me that a thorough interview process is conducted so that subsidized housing can only be provided to families who are working hard and who believe in education and betterment for their children.</p>	7/23/2018
8028	60	/policies/intrinsic-value-of-properties/	<p>This policy is so important as the City moves forward if we want to maintain the character of the area. I think a recognition program would be a really interesting idea to explores. Something like 100-year homes could be tied back to preserving housing stock and maintaining affordability. For example, a homeowner could enroll and get a plaque to put on their house recognizing its age maybe they also get information on maintenance programs or have to complete a maintenance plan and in exchange they get a reduction in property taxes. It could be a combination of recognition and incentive for keeping affordable homes in areas where tear-downs are increasing. In response to action step e I think the City should partner with neighborhood organizations to promote heritage assets.</p>	7/23/2018
8029	54	/policies/supporting-economic-growth/	<p>Improve existing properties and infrastructure. Preserve current commercial areas.</p>	7/23/2018
8030	1	/policies/access-to-housing/	<p>This type of plan has NOT worked in other cities, do you want to prove to them you can do better? If you're smart you might want to call those city officials and find out why it was a poor plan.</p> <p>In New York they could house all of the homeless in all of the vacant "subsidized overpriced apartments". I've seen it first hand living in both Minneapolis and New York. I grew up in Minneapolis, have been in NYC for 5 years for my work. My family is still in the city, Northeast and SW. My parents families have deep routes in the city going back to 1875. All of them worked very hard started with nothing and were able to provide for each generation. The idea that this plan will fix disparity is unfounded.</p> <p>Start with the schools and create trade schools providing job skills, preparing people for work. Partner with small to mid-sized businesses to hire trainees. None of this is rocket science! You seem to be forcing your agenda versus listening to your constituents, or as I like to say your bosses.</p> <p>They can fire you, be prepared because if you continue down this route you'll be looking for work!</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8031	53	/policies/quality-of-life/	You can not maintain quality of life and add this much density to the city. Keep heights lower, keep rents lower, maintain our green spaces and waterways. Which means, dump this plan. It is HUGE over reach and it threatens the nature of our city and all that we love about it. If this plan would have addressed the areas of our city that have been begging to be addressed (ward 5), great. But it does not. When you have ward 5 asking to be exempt from this plan, that should tell you something.	7/23/2018
8032	75	/policies/waste-reduction/	Something being illegal ought to be discouraged as it is. Instead of further "Discouraging Dumping" (action step c), increase enforcement.	7/23/2018
8033	33	/policies/affordable-housing-production/	I support creating affordable housing throughout the city and including higher priced neighborhoods, but I do not support the broad stroke rezoning of this plan. We've been told that 100-unit apartment complexes could go up in our backyard with only a small percentage of units designated affordable. This is a neighborhood where young kids play and run freely through the streets and everyone knows each other. That type of community would disappear. There are many opportunities for growth, but lets be thoughtful about it. No single family home should be next door to a six-story apartment building. Growth in these neighborhoods should be limited to two-story apartments with four to no more than six units. And if the goal is truly creating affordable housing, each apartment in the complex should be affordable. Build six-story apartments where it makes most sense (e.g., commercial areas or rental areas with high turnover) and use the tax dollars collected to further subsidize affordable housing (single family homes, duplexes, four-flexes) in wealthier neighborhoods, with a focus on providing affordable homes for families that could benefit from strong communities and good schools. The goals are good, but they will not be reached with the current rezoning plan and neighborhoods will be destroyed in the process.	7/23/2018
8034	5	/policies/visual-quality-of-new-development/	Pedestrian Advisory Committee members support this policy!	7/23/2018
8035	40	/policies/homelessness/	<p>Address universal health insurance. Medical bankruptcy is a leading cause of homelessness. If health insurance is tied to employment and the person is unable to work for a health reason, loses the job, and has high out-of-pocket medical costs, and has financial problems, housing may become an issue.</p> <p>Consider assessing for Fetal Alcohol Spectrum Disorder as a factor in a person's ability to have and maintain housing.</p> <p>Consider trauma-informed care and Adverse Childhood Experiences (ACES) when working with persons experiencing homelessness.</p> <p>Consider more options and supports for youth aging out of foster care.</p> <p>Consider where housing with supports may help maintain housing.</p>	7/23/2018
8036	74	/policies/integration-of-water-management-into-	We greatly appreciate that water quality is being taken into consideration. There is still a long way to go. Homeowners and apartments and businesses are still allowed to recklessly utilize harsh lawn chemicals in the interest of vanity. Many of these properties drain directly into our lakes and creeks with devastating consequences. I challenge the city to implement more stringent regulations on these chemicals, as is already the case in Canada and Europe. If lawmakers and private citizens continue to disregard this, maybe the fact that property values will undoubtedly decrease - with the destruction of our greatest natural assets - might be enough of a motivator.	7/23/2018
8037	40	/policies/homelessness/	<p>Address universal health insurance. Medical bankruptcy is a leading cause of homelessness. If health insurance is tied to employment and the person is unable to work for a health reason, loses the job, and has high out-of-pocket medical costs, and has financial problems, housing may become an issue.</p> <p>Consider assessing for Fetal Alcohol Spectrum Disorder as a factor in a person's ability to have and maintain housing.</p> <p>Consider trauma-informed care and Adverse Childhood Experiences (ACES) when working with persons experiencing homelessness.</p> <p>Consider more options and supports for youth aging out of foster care.</p> <p>Consider where housing with supports may help maintain housing.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8038	1	/policies/access-to-housing/	Glenwood Avenue west of Penn Avenue is a (very) limited public transit route and any high(er) density residential development west of Bassett Creek will not result in affordable housing units without great public subsidy or an inclusionary zoning ordinance. Higher densities housing permitted in this area, with close proximity to downtown Minneapolis and adjacent to a vast area of open space (Wirth Park), may likely command premium rental rates, not affordable dwelling units and irrevocably alter a unique single family area of Minneapolis.	7/23/2018
8039	49	/policies/educational-and-economic-access/	I don't see anything about disability in this policy. The MN State Demographer's office says that indigenous and African American people have higher rates of disability and that the intersection of both leads to higher rates of poverty and lack of access to job training and a bridge out of poverty. The plan needs to include training that plans for the cost of accessibility, including interpreters and CART, Support Service Providers for people who are deafblind, accessible housing, and transit that is accessible and flexible enough to get people with disabilities to and from their job site on time.	7/23/2018
8040	18	/policies/walking/	Winter maintenance is a critical issue for people walking in our city nearly half of the year. We currently succeed (largely) at addressing winter maintenance on streets for drivers, but we fail abjectly at addressing winter maintenance on our streets for people walking. This is critical to being a city friendly to older people, and to people with disabilities, and to people riding transit, and to anyone who wants to choose walking instead of something else. Add an action step to have municipal sidewalk clearance for a critical high-priority sidewalk network, and to consider extending that beyond the high-priority network to include high-density residential neighborhoods. I suggest tying it to people/acre or zoning classifications, such that higher "built form" intensities have access to municipal clearance and Interior 1 and Interior 2 areas have no access to municipal clearance such that the largest number of people are being served by such a program.	7/23/2018
8041	38	/policies/affordable-housing-near-transit-and-job-	Except in existing industrial production areas. Existing commercial and industrial areas need to be maintained as job creators.	7/23/2018
8042	0.1	/topics/land-use-built-form/	High capacity transit stations like light rail need higher zoning that spreads farther out. While almost the entirety of the East side of Hiawatha Ave is zoned for high density, very few spots west of Hiawatha (the side of Hiawatha where the transit stations actually are) are zoned even Transit 10. High capacity transit demands high capacity housing, we should put as many people as possible close to our transit stations. Interior zoning is not appropriate for any place that is less than a 15 minute walk to a transit station. In many cases Interior zones are as few as 2 blocks away from light rail stations.	7/23/2018
8043	33	/policies/affordable-housing-production/	So far most of the new housing I've seen being built is serving either very-low income renters or very high income renters. There are thousands of renters whose incomes are above \$39k, but not high enough to afford the many "luxury" apt buildings being planned.	7/23/2018
8044	47	/policies/housing-maintenance/	Please implement policy that prevents developers from buying a perfectly functional and safe old building, and renovating into a shiny new building and pricing out the current tenants in the process. This is a perfectly reasonable and viable way to make money, but it would be better to direct development dollars into building new housing instead of destroying affordable housing.	7/23/2018
8045	2	/policies/access-to-employment/	Job growth for downtown by 10% in 20 years. That is hoping Target can rebound and be relevant in 20 years so all of the supporting agencies, vendors, suppliers, and creative agencies will be able to continue to employ people. There is also a massive and misleading assumption that all work must happen in a historical office location. Using that working assumption is dangerous as more and more companies are reducing their footprint and allowing more and more employees to work from home. Assuming the working population that actually travels to downtown Minneapolis increase is risky. I encourage your team to expand your vision on this matter and how it relates to housing near job needs.	7/23/2018
8046	31	/policies/creative-workers/	Provide Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of space forcing artists out of the City.	7/23/2018
8047	0.1	/topics/land-use-built-form/	There is no way Washburn Ave should look like this! We don't have any buildings higher than 2 stories and it most definitely isn't a transit street.	7/23/2018
8048	7	/policies/public-realm/	Members of the Pedestrian Advisory Committee support this policy, but would prefer to see firmer, more concrete specifics. It all sounds good, but I'm not totally sure what it's actually saying.	7/23/2018
8049	30	/policies/arts-and-cultural-assets/	Protect the existing infrastructure of production space within the Northeast Minneapolis Arts District.	7/23/2018
8050	80	/policies/development-near-metro-stations/	--High rise buildings have a detrimental effect on pedestrians and children going outside. Limit height of buildings near metro stations to 6 floors outside of the downtown area to increase resident walking, livability, cost of development and cost of hou	7/23/2018
8051	29	/policies/creative-sector-economy/	Protect existing Arts Districts.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8052	81	/policies/social-connectedness/	The process for the 2040 plan, in which our elected council members are not engaged in drafting the plan, defies this goal. According to the process described, elected officials are only able to vote on the second draft of the plan, which is i democratic. Our elected council members should be engaged in drafting the second draft.	7/23/2018
8053	22	/policies/downtown-transportation/	Some of these action steps are good, while others are not. There should be no interstates entering downtown, and the city should be actively finding a way to remove the one there is now and the one that cuts off downtown from the rest of the city. As it stands now, downtown is its own little island cut off from the rest of the city by river and interstate. The city should be working to get rid of these interstates to connect the city again so our transit can work faster and our people can walk/bike to downtown jobs in a way that is impossible now. The city should also be working with other agencies to create a better commuter rail network for the workers who live out of the city and work either in downtown or around it. To make transit better downtown bus transit needs its own dedicated lanes. The green and blue lines need signaling priority over vehicle cross traffic so they can run faster and don't get stuck in traffic. There needs to be a train from uptown/ loring park/ downtown/ northeast that has its own dedicated lane and signaling priority. Not only would this help downtown transit it would be a great asset to the city. All in all, some of these action steps are fine, but the city needs to be thinking of a future without interstates and almost no cars to meet its climate, walking, transit,and racial equity goals.	7/23/2018
8054	3	/policies/production-and-processing/	Please keep Action Steps "k" & "l" in mind for the greater good of the health of us all. I hope these are not just talking points, but truly variables that will be considered when weighing both the short and long term goals of our great city.	7/23/2018
8055	1	/policies/access-to-housing/	The only new multi family housing in my neighborhood are expensive condos that take the place of small family homes. I would support a plan that allowed more multi family housing to be built gradually, spread out to allow the new tenants to live everywhere in a neighborhood and with requirements that unit prices would be below the neighborhood average in areas affectes by new zoning.	7/23/2018
8056	92	/policies/identify-and-evaluate-historic-resources/	Historic Preservation Districts have been used as an informal method of exclusionary zoning. Particularly when the district is created to protect rich white people's homes and the justification is based on white nostalgia for 19th century white American architecture. Please continue to expand the lens in which we evaluate what is historic and worthy of preservation.	7/23/2018
8057	43	/policies/housing-displacement/	This sounds like more bureaucracy and more paper pushing. "Prioritizing" is vague and abstract. "Programs" don't address the problem's roots, they're a bandaid. Nothing in this vague language addresses the roots of poverty. Gentrification is when existing affordable housing is replaced by new buildings that are necessarily more expensive and rents/mortgages increase causing people to leave the City because they can't afford it anymore. We've seen this happen in Uptown and Dinkytown. New buildings are never affordable.	7/23/2018
8058	0.1	/topics/land-use-built-form/	I hope you'll eliminate Interior 1, and that the least intense built form will be Interior 2. This is in part because there few places where Interior 2 is out of place in the existing neighborhoods, and in part because Interior 1 is applied more often in places that were redlined and that had racial covenants excluding people of color. (Please see this analysis that Interior 1 is applied in racially concentrated areas of wealth https://twitter.com/divergentdave/status/1019991723114745857).	7/23/2018
8059	6	/policies/pedestrian-oriented-building-and-site-de	Limit number of stories of residential buildings to 6 floors encourage going outside. Studies show that children in high rise building go outside less, walk less, less livability.	7/23/2018
8060	33	/policies/affordable-housing-production/	I fully support this policy. All types of housing, affordable at all income levels, should be available in EVERY neighborhood through Minneapolis. The City should be promoting this policy through the limited tools it does have, including zoning and land use controls. This policy must be enacted despite opposition from a vocal but powerful minority. The City works in the public interest. Policy makers must not cater to the racist and classist cries, borne of unfounded fears, from those with the greatest power in our society to the detriment of the larger public. Doing so would be a less visible but no less harmful means of promoting the inequities of the past that plague too many in our community today.	7/23/2018
8061	43	/policies/housing-displacement/	I appreciate the conscious focus on people with disabilities as members of vulnerable populations. Thanks.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8062	23	/policies/coordinated-development-strategy/	<p>I feel the plan needs to be significantly reworked especially regarding zoning and housing density.</p> <p>I'm afraid that developers may be the only "winners" with respect to the housing goals.</p> <p>If the city mandates higher density "affordable" housing in generally single family home neighborhoods, Developers would build buildings of as high of density as permitted by new zoning laws constructed at the cheapest possible cost so a developer could maximize their profit. These type of structures would detract from the neighborhoods where they are built and may even occupy land where a more affordable home once stood.</p> <p>Even in the case of an expensive "high end" building - better guidelines would be needed as to how many of these and where they could be built in neighborhoods affected by rezoning. More "High-end" buildings would not add to the affordable housing stock.</p>	7/23/2018
8063	42	/policies/expand-homeownership/	<p>You don't expand homeownership by giving developers every that they want, which has been the practice of this city council. Developers are in it to make as much money as they can and get out. Home owners are in it to live here, invest in their community and they build stability. You need to promote home ownership in every area of the city. That means scaling back the height and density proposed in the overly zealous plan.</p>	7/23/2018
8064	22	/policies/downtown-transportation/	<p>Start looking at pedestrianizing more streets downtown. Nicollet is a good start, but isn't enough.</p>	7/23/2018
8065	6	/policies/pedestrian-oriented-building-and-site-de	<p>Covering an impermeable building in street-facing windows is only marginally better than a blank wall. Frequency of entrances and overall building width are more critical. With the elimination of parking minimums we should be able to have more buildings that are orientated perpendicular to the street rather than running along it.</p>	7/23/2018
8066	0.1	/topics/land-use-built-form/	<p>Thank you for accepting comments and taking the time to review them all. I would like to submit my comment for OPPOSITION of the rezoning plan. I live in south Bryn Mawr and moved here specifically for the unique small town feel only three minutes from the city, the biking/walking/commuter paths, the beautiful trees/park land in our neighborhood and around the lakes, and the lakes themselves. All of these things are now in jeopardy of disappearing forever with the current Minneapolis2040 rezoning plan.</p> <p>Minneapolis is an awesome city with so many different and unique neighborhoods -- something for everyone. We move into the neighborhood that speaks to our hearts and that fits our lifestyle, wants and needs. This plan will make every neighborhood basically the same. This has to be revisited and stopped!! Everything that drew me to my home and my neighborhood will be completely destroyed with this plan. I knew Bryn Mawr didn't have apartment buildings, high density, tall buildings and high walkability. That is why I moved here! That is likely why everyone in Bryn Mawr moved here! For those people that want high density and walkability, there are many neighborhoods that would fit that need -- downtown, uptown, northeast, etc. Do not destroy our rare and beautiful neighborhood when these high density neighborhoods already exist. Allow our city to have different neighborhoods, diversity and something for everyone. THE CURRENT REZONING PLAN IS UNACCEPTABLE!!</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8067	1 /policies/access-to-housing/	<p>I've been skipping around making comments on various perceived possible policy implementations, but due to this 11th hour time limit.....my ability to advance my thoughts concerning so many areas will not be complete.</p> <p>The immensity of this draft use as a potential template may appear as a do good proposition for a communities future.....transparency and the like, but as all the category wide policy goals over lap.....one common denominator is persistent : EQUITABLE BALANCE OF EDUCATION for every child from day one.</p> <p>Sorry.....this may not be correct place for comment.</p> <p>Today's born will be 22 years old in 2040.....will we as a people honestly be able to say that they all had an equal share of the pie, acknowledging every possible investment was made to ensure happiness in health, family and housing. Besides the fact that unknown populations shift in the future due to several factors.....painting a BROAD BRUSH of permanent zoning changes in future neighborhood housing may totally back fire. Taking things as they come.....with consistent city resident input as an ongoing engagement of policy making would render more continuity in my book.</p> <p>Investing in ourselves as human beings on all levels equitably will be our strongest city asset. If we put it FIRST.....much greater chance all would fall into place. We as the gardener must pay attention to every seed planted in order to bare fruit.....if attention is unequal, fruit % will decrease exponentially. At that point, our attention to quality growth is distractedhaving to change strategy. Our children need the greatest attention if we truly care about the bounty or a model of decency in our society for one another. Let's raise this human investment bar.</p> <p>It comes to mind that the huge number of multi unit dwellings we have recently seen go up.....appears to be accessibly fast. Who will get stuck with this new breeding of units across downtown and now growing nearer neighborhoods if or when they become unprofitable/empty for what ever the reason in 10-20 years?</p> <p>For certain.....if I am notified that an extension for this comment period has been granted.....I will continue to address more policy goals beyond only a few so far. Simply need more time.....only learned about this two weeks ago. thank you from a 72 year mpls resident.</p>	7/23/2018
8068	13 /policies/landscaping/	<p>Confused generally here about why this is specifically "in conjunction with new development." Doesn't landscaping change over time? Couldn't they change it all immediately to no longer meet guidelines? Why would new developments be subject to things that existing properties aren't?</p>	7/23/2018
8069	1 /policies/access-to-housing/	<p>Yes, yes yes! My only concern about this is the city needs to carefully maintain some green spaces, still. We need parks - both fields for sports and wild spaces, and community gardens to make up for lost lawn space.</p>	7/23/2018
8070	88 /policies/public-services-policy/	<p>311 is a joke. The people that I talk to are rarely adequately trained on the ordinances. I can call 3x on the same issue and get 3 different answers. It keeps citizens from having direct access to the departments they need to reach.</p>	7/23/2018
8071	1 /policies/access-to-housing/	<p>I support the plan to upzone all of Minneapolis. Our city is facing a severe housing shortage and we need more homes. I'm concerned that most of this upzoning is occurring in only a few places, mostly along transit routes and polluted unsafe streets. We should be upzoning neighborhood interiors and allowing more people to live in neighborhood interiors which often makes it more accessible to multiple transit routes.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			Not just equal but equitable. We need to provide more and easier technology access and literacy to those who struggle to get it, and make sure city services are provided through means that don't require access to advanced technology.	7/23/2018
8083	50	/policies/access-to-technology/	I don't know what (b) means. If it's about building access a la USI Wireless, then it's a good idea but not as important as equitable access.	
8084	48	/policies/data-driven-decisions/	Will there be a collaboration with Housing Link's existing efforts on c. Create a database?	7/23/2018
8085	39	/policies/fair-housing/	If we fail to extend access to every neighborhood throughout the city, buckling to resistance to more neighbors in racially concentrated areas of wealth, I fear that Minneapolis may be subject to disparate impact lawsuits. You have clearly made the case that zoning and racial covenants and redlining created segregation and racial disparities in our city today, and that the proposal is intended to dismantle those underlying, systemic policies for our future. If we do not implement those, are we as a city subject to a lawsuit that we caved to the politically powerful people who like their still-racially-exclusive neighborhoods at the expense of people who seek the same opportunities.	7/23/2018
8086	33	/policies/affordable-housing-production/	Aging in place or the community is of interest to my family. My father recently died. He and my mother shared the house for close to 60 years near Hiawatha. She is staying in the house for now. It would be nice if she could stay in the city. Lots of change has happened over the years.....	7/23/2018
8087	22	/policies/downtown-transportation/	Members of the Pedestrian Advisory Committee generally support this policy; please see relevant comments on other related policies. I might make point b. stronger -- minimize parking downtown, or reduce, or (ideally) eliminate. Also consider converting downtown one-ways to two-way streets.	7/23/2018
8088	90	/policies/technology-in-the-economy/	This is fine but let's not go the tax-breaks-to-compete-for-Amazon-HQ route. Draw tech companies in by making this a good place to be and continue to foster local talent first.	7/23/2018
8089	44	/policies/comprehensive-investments/	"elimination of criminal and credit report barriers" YES!! But must be paired with protections for landlords so that they don't lose their property while trying to evict tenants who are not paying rent. "Expand coordination within the City enterprise including the Police, Regulatory Services, Health, Public Works and community organizations to address crime and safety issues" If you truly understand the politics of Race and Poverty then you know that these agencies have no positive role to play in working with these communities. So if you're saying here that you want to decrease the size and scope of these agencies, then I agree.	7/23/2018
8090	1	/policies/access-to-housing/	It's great that this plan allows more housing be built in all parts of the city. That's part of creating complete neighborhoods, where everyone can meet their basic needs in their own neighborhoods without driving. We must ensure more people have places to live close to the things we want to walk to. We must also build the things we want to walk to in more neighborhoods across the city. Walking shouldn't be a viable way to get around only in the most amenity-rich south and southwest neighborhoods of Minneapolis; it must be possible in every corner of the city. The draft 2040 plan still greatly limits housing in most areas and could go farther to support walkable communities, but it's a good step forward. At the same time, I'd love to see more policies to combat residential displacement of low-income people and hope City of Minneapolis staff will explore more options there.	7/23/2018
8091	69	/policies/renewable-and-carbon-free-energy/	No. Do not protect solar access on commercial or residential buildings. While local, distributed generation is going to be a crucial component of decarbonizing the power grid, continuing densification of the city is even more important, and preventing an apartment building from being built on a given lot and thus making the several families that could have lived there find housing out in the exurbs instead to prevent shading of one 25kW solar array is counterproductive.	7/23/2018
8092	5	/policies/visual-quality-of-new-development/	For policy 5 (d) there should be some reasonable allowance for sides and backs of buildings to deviate from their fronts. Requiring them to be similar may add expense where there's limited benefit. Maybe remove "similar to and"	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8093	1 /policies/access-to-housing/	<p>I am opposed to the ubiquitous upzoning of the city. Being a white homeowner, vocal proponents would portray that as racism, classism and selfishness. I propose it's three other reasons: First, I don't think it will accomplish the purported objectives. Second, I think it treats housing as a commodity, and thereby misses deleterious unintended consequences. Third, there is a way to meet the objectives without the negatives.</p> <p>QUESTIONING THE EFFECTIVENESS</p> <p>A) The plan implies a supply and demand argument for increasing housing units. That would work in a closed system, but probably not an open one. If Minneapolis stays great and becomes more affordable, that will increase the number of people wanting to live here, driving up the prices. My block just had people move here from California and Colorado, because it IS more affordable.</p> <p>B) The cheapest properties are already more profitable as tear-downs. Allowing multi-unit will accelerate that trend and remove them from the market. There is information that the wealth gap between whites and people of color is significantly driven by home ownership. I guess removing the cheapest homes may help by making whites less wealthy. I hear proponents say that people who cannot afford a single family home can afford a property with rental income. It's a nice idea, but the developers are going to price accordingly. You've got the same number of property owners (or less, as multi-units will be purchased by business owners) and prices will respond.</p> <p>C) As a bus rider and bicyclist I think increasing density along transit corridors and in large buildings makes sense. Increasing density away from transit seems disadvantageous in that it increases the number of people likely to drive and therefore increases traffic.</p> <p>HOUSING AS A COMMODITY</p> <p>Proponents of upzoning seem to think that the key factors in housing are cost and distance to destinations. That's fair for people who cannot readily afford housing, but it really doesn't fit human nature.</p> <p>A) Some people want a busy urban environment right next to a coffee shop and entertainment. Some people want quiet streets where their children can play safely. Some people want something in the middle. To mix multi-unit housing throughout neighborhoods - as opposed to a gradient with swaths of quiet blocks - means fewer can get exactly what they want. People often make the mistake of thinking that diversity comes from homogeneous mixing (in this case of housing types), when really it is the opposite. You wouldn't increase the diversity of Lake Nokomis park by spreading the water out and creating a giant mud pit to increase diversity, would you? You need deep water and shallow water and land to create different habitats.</p> <p>B) The "preserve character" argument is currently weak, since houses are being torn down and rebuilt with houses nearly as large as a multi-unit. That happened next door to me, and I feel like it looms over with windows looking down on my back yard. When I think of having twice as many people there I think it would really change the feel. I don't think that's fair to someone who made the biggest purchase of their life</p>	7/23/2018
8094	1 /policies/access-to-housing/	<p>Lots that have been zoned as single family should not be changed in a blanket policy. Development needs to occur as demand for multifamily in a particular neighborhood dictates. Requirements for height, lot % coverage, and distance from lot lines need to be maintained unless an area has been rezoned.</p>	7/23/2018
8095	1 /policies/access-to-housing/	<p>We are strongly opposed to allowing developers to tear down the old single family homes in our Lowry Hill neighborhood and put up new, four-plexes. There are other places in the city that are accessible to downtown and could accommodate new multi-family development--such as along the Greenway corridor.</p> <p>Don't ruin the historic charm of our neighborhood--one of the most appealing areas of our city.</p>	7/23/2018
8096	1 /policies/access-to-housing/	<p>Lots that have been zoned as single family should not be changed in a blanket policy. Development needs to occur as demand for multifamily in a particular neighborhood dictates. Requirements for height, lot % coverage, and distance from lot lines need to be maintained unless an area has been rezoned.</p>	7/23/2018
8097	6 /policies/pedestrian-oriented-building-and-site-de	<p>I am supportive of this policy. It prioritizes people walking in the way we design buildings. I support orienting new buildings to the sidewalk, eliminating car parking requirements citywide, and not allowing new drive-throughs or gas stations. It would be great to see more policy detail to discourage new surface parking lots and limit their negative impact on how walking feels.</p>	7/23/2018
8098	0.1 /topics/land-use-built-form/	<p>I live in an "Interior 3" area, and I am not afraid of fourplexes! I would welcome having more neighbors to support our local businesses and provide more "eyes on the street." I am skeptical, though, that more housing alone will provide more *affordable* housing, so I support the City's efforts to ensure that some housing being constructed will be affordable.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8099	1	/policies/access-to-housing/	I generally agree with this policy, but I believe it needs to consider phasing in a bit more deal to get public acceptance. I think starting with empty, vacant, or abandoned lots would be a good start. There should be some consideration of protecting valuable natural resources that's at least referenced in this policy as well. While density near Minnehaha Falls is a good thing because of light rail, it wouldn't be a good thing to allow density to overtake the area around the falls. Perhaps certain natural resources are called out as protected and the density is mitigated around these resources.	7/23/2018
8100	1	/policies/access-to-housing/	<p>... Continued from previous comment...</p> <p>AN ALTERNATIVE My house costs almost half my take home pay. I can afford it because having a house is a priority for me. It is a 3 bedroom, so I decided to get a roommate and am considering a second. She gets extremely affordable rent, my costs are lower, and the energy costs are roughly the same as for one person. A neighbor across the street who is having health problems has done the same. If all of the people who claim to be pro-density would take a roommate into their homes I think it would have a tremendous effect on housing affordability, allow seniors to stay in their homes longer and preserve the wonderful housing stock with minimal environmental cost. This is idealistic, and I don't have a magic policy for the city to achieve this. It's easier to pass a construction policy than to figure out how to change culture. But sometimes people need to change their behavior to fit the environment instead of changing the environment to fit their behavior, or we're all in trouble.</p> <p>I'm not wholeheartedly opposed to the upzoning of the city. There is room for it. To meet immediate needs some larger developments are needed. But I strongly believe it should be implemented in a way that minimizes the negative consequences for current residents and that preserves what made Minneapolis the extraordinary city it is today. And that precludes opening up every property to larger dwellings.</p>	7/23/2018
8101	6	/policies/pedestrian-oriented-building-and-site-de	<p>If parking minimums cannot be eliminated, reduction in the number per building/unit/customer/etc. is still a significant achievement. Especially for residential buildings, as parking minimums add to building costs, suppressing affordability. To go further, parking minimums should be lowered for a building if the addition of that parking interferes with the development of ground floor retail for mixed use neighborhoods.</p> <p>Action Step f should also encourage plants for their function as windbreaks.</p> <p>Action Step o should clarify the city's goals on electric vehicle infrastructure. (My goal would be to discourage dedicated charging facilities, but encourage it at existing and whatever new parking comes about)</p> <p>Action Step e would be better if it encouraged (but don't push it too hard) design considerations that were continuous. Anyone who has forgotten their umbrella appreciates small overhangs to walk under during a rainstorm.</p>	7/23/2018
8102	73	/policies/stormwater-management/	You must adhere to the state statutes regarding SH zoning if you want to control stormwater. This more the case because we will be seeing more violent storms that will dump larger amounts of water in shorter timeframes. Keep as much open land as possible. Maintain setbacks between houses. Do not allow more land to be covered with impervious surface. We need the earth to absorb the water. We also need to keep as many trees to absorb the water once it's in the ground (also to absorb co2).	7/23/2018
8103	91	/policies/heritage-preservation-outreach/	I would love to see a partnership between the City and neighborhood organizations to engage residents in selecting sites that they consider historic. The music study being completed seems to have gone more in this direction, which I really appreciate. Maybe the City could join in the partnership recently formed between the AIA and MNHS to promote architectural history in the state. The City could assist on a more localized level. I like the idea of empowerment through preservation.	7/23/2018
8104	25	/policies/innovations-in-transportation-and-infras	Safety and environmental concerns are paramount here. Autonomous vehicles should not be prioritized over pedestrian and bicycle safety. And roving empty vehicles sound like a terrible idea for carbon emissions " even if they're electric, they're getting their power from somewhere.	7/23/2018
8105	0.1	/topics/land-use-built-form/	<p>REVISING MY PREVIOUS COMMENT to add that I am a homeowner!</p> <p>I live in an "Interior 3" area, and I am not afraid of fourplexes! I would welcome having more neighbors to support our local businesses and provide more "eyes on the street." I am skeptical, though, that more housing alone will provide more *affordable* housing, so I support the City's efforts to ensure that some housing being constructed will be affordable.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8106	35	/policies/innovative-housing-types/	<p>I think that duplexes offer a nice option in my current neighborhood near Pearl Park and Chicago Ave. Could some of the affordable housing be duplexes or townhomes? Maybe the bungalow courts is what you are thinking of. I think some of the changes with multi unit buildings is that it might change the appearance of the neighborhood.</p> <p>I love how green this city is. When we lost all those trees to dutch elm disease it changed the feel of the city. While some green is okay to give up, I think it is one of the things that makes Minneapolis what it is.</p>	7/23/2018
8107	0.1	/topics/land-use-built-form/	<p>Production and Packaging should allow housing. Production has changed in the past 100 years, and while not all industrial uses are compatible with residential, many are. Many types of food production, for example, could be just fine mixed with residential. The Production and Packaging area in South Minneapolis in particular is also coded for Transit 10 built form. The age of 10 story warehouses and factories has passed, significant global changes would be needed for 10 story industrial uses in the heart of the city. The proposed built form is good, and the general proposed land use is good, but we can mix residential and certain kinds of industrial in buildings.</p>	7/23/2018
8108	41	/policies/tenant-protections/	<p>When I bought a duplex, I called about accepting Section 8. The amount was much lower than the cost to cover operations, let alone bring the building up to code and make needed repairs, so I decided not to accept Section 8. "Market rate" rent was not enough to break even while bringing the building up to code and make needed repairs. I never broke even on the rental unit and was limited to the amount I could claim as a loss on my income taxes. I did not have enough income to need the loss from the unit or finances to have losses for another twenty years before I calculated I would break even. After bringing the duplex up to code and making needed repairs, I sold the duplex at a huge loss. My experience showed me the challenges of trying to maintain an older housing stock in the face of prospective tenants who do not believe the high cost of repairs and maintenance. Tenants may not understand all the aspects of maintaining housing.</p> <p>I never had a rental license inspection, though I paid annually for over a decade. Perhaps all the building permits showed licensed, bonded, and insured contractors were doing needed work.</p>	7/23/2018
8109	26	/policies/vision-zero/	<p>"I believe we should have as a GOAL: Vision Zero, Vision ZeroBlue: Eliminate fatalities and serious injuries caused by police that are a result of shootings, force, and abuse on City streets by 2027". L</p>	7/23/2018
8110	49	/policies/educational-and-economic-access/	<p>A strong public school system should be seen as instrumental to the future of our city, democracy and economy. Strengthening the support of Minneapolis Public Schools should be high priority in 2040 plan. The City of Minneapolis should provide financial and professional support to Minneapolis Public Schools. If we can fund pro stadiums we should be fund school science labs and school sports facilities. The City should see police student relationship as community building and investment in future and not simply "discipline". If police/SROs are going to continue to be in schools it should be seen as mutually beneficial and the City should cover half at least half if not all the cost. While the Health Department and Public Works are two good examples of providing financial and professional support to MPS (i.e. Safe Routes to School) city should help lead in other areas. School integration should be priority. If we are to truly achieve "One Minneapolis" we must end racial and economic isolation in our public schools.</p>	7/23/2018
8111	80	/policies/development-near-metro-stations/	<p>Development should not just be limited near metro stations. This creates a topsy turvy city where only certain segments of the city are reaping the benefits of economic development. If the city wants to actually have an equitable city, the city first needs to build a rapid, metro system that connects all points of the city and then allow for development in every neighborhood. This is the only way to create a complete city. I agree with all these actions steps, but disagree that development should only happen around metro stations for the reasons I have stated above. So the city REALLY needs to start moving on its street car plan is passed and provided funding for a decade ago to make these action steps a reality.</p>	7/23/2018
8112	84	/policies/public-safety/	<p>"I believe we should have as a GOAL: Vision Zero, Vision ZeroBlue: Eliminate fatalities and serious injuries caused by police that are a result of shootings, force, and abuse on City streets by 2027". L</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8113	1	/policies/access-to-housing/	<p>From Lisa MacMartin, President of the Linden Hills Business Owners Association</p> <p>On behalf of our membership, I offer the following comments:</p> <ol style="list-style-type: none"> 1. Affordable housing has not been shown to be an outcome of rezoning policies that allow for increased densities; in fact, quite the opposite effect is likely. 2. Zoning changes to France, Xerxes, 50th, 44th, and 46th Streets would most likely drive up housing costs in our area, and increase demand upon already strained infrastructure and parking. Parking is a particularly notable concern; without parking, our businesses cannot survive. 3. An increase in the median price of housing in an area ultimately drives an increase in the cost to rent commercial space, such as the C-1 spaces we're currently occupying as business owners. It's highly probable that current property owners would be motivated and incentivized under the 2040 plan to develop this commercial property and raise rents to small business owners. 4. A scenario like this could likely dissolve availability in small business areas currently occupied by one-off small businesses, in unique and quaint buildings, instead making this area attractive to franchisees and big box stores and fast food chains. 5. Any scenario that makes it impossible for the current businesses to survive and thrive, including the increased residential density proposed for our area by the 2040 plan, is opposed by our Association. 	7/23/2018
8114	17	/policies/complete-streets/	We need to consider shared-space streets in busy commercial areas. These are common in Europe and there's no reason they couldn't work here.	7/23/2018
8115	38	/policies/affordable-housing-near-transit-and-job-	While I like this idea on paper, some of the comments I read have made me think. So will people outside of Mpls and the state be the builders of these big areas. Will that truly benefit us in the long run, or are we just lining the pockets of big companies.	7/23/2018
8116	12	/policies/lighting/	What about pedestrian level lighting along light rail/brt routes and streets that lead to them? How do you make this happen along highways, like highway 55?	7/23/2018
8117	2	/policies/access-to-employment/	This policy seems to ignore the emerging concept of communal work space and the ability to use space adaptively in the city to support a variety of job types. Distributing jobs throughout the city, especially to freeway corridors like Hwy 62, might be a better strategy than distributing housing.	7/23/2018
8118	23	/policies/coordinated-development-strategy/	<p>"Use data and objective criteria to identify geographic areas most in need of reinvestment and where a coordinated approach would result in achieving Minneapolis 2040 goal" Shouldn't demographics and statistics been used to come up with this vague "plan" to begin with? I've been aghast at the generalities accepted as foundational "facts" for this plan that lack any real statistical verification. No one has any numbers, no one can say what databases they've been using, it's a "plan" based on assumptions.</p> <p>"minimize the displacement of nearby residents and businesses." Displacement of ANY residents and businesses is NOT acceptable.</p> <p>This sounds like a lot of bureaucratic jobs opening up...</p>	7/23/2018
8119	33	/policies/affordable-housing-production/	The biggest impediment to new housing affordability is new housing building codes. The city should try creative solutions, but should not be in the business of building new affordable housing units. That is not the role of city government.	7/23/2018
8120	40	/policies/homelessness/	yes	7/23/2018
8121	92	/policies/identify-and-evaluate-historic-resources/	Historic preservation should be proactive, not reactive. Too often claims of historicness are used to delay or derail proposed projects. Decisions as to whether or not these properties are historic should be made well in advance based on the significance of the structure, not based on how many cranky old white people can get mad about a building being torn down	7/23/2018
8122	70	/policies/ecology-and-habitat/	Remove lock and dam no 1!	7/23/2018
8123	5	/policies/visual-quality-of-new-development/	All of this sounds great, but at what cost to development in the concept of affordable housing? If density is expected, and the quality is mandated, will any developers actually produce realistic affordable housing? It's difficult to see how this will be applied.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8124	23	/policies/coordinated-development-strategy/	"Prioritize use of City dollars, as well as resources from other jurisdictions, on implementing coordinated district-wide development plans in these areas." I am fundamentally opposed to corporate/developer welfare. This pulls money from the bottom and gives to those at the top--gentrification, widening the gap.	7/23/2018
8125	91	/policies/heritage-preservation-outreach/	The Heritage we choose to protect is too often that of the wealthy white colonizers of the city, more expansive types of outreach should be done to identify and recognize heritage that speaks to all residents, not just the most privileged.	7/23/2018
8126	92	/policies/identify-and-evaluate-historic-resources/	This policy seems very important to the future of heritage preservation in Minneapolis. I wonder if the City could require the historic consultants who complete the context studies to partner with representatives of different local cultural groups in the areas of study. I think the idea of conservation districts should be addressed in this policy and how neighborhoods could be engaged around concerns with developmental pressures and wanting to maintain existing housing stock.	7/23/2018
8127	0.1	/topics/land-use-built-form/	It's supremely important to leverage the enormous level of political effort and investment that is going into the Green and Blue line extensions by allowing actual investment to go near the stations. Transit 10 should be the bare minimum land use, if not Transit 20. Corridor 4 zoning, as proposed for the 21st St station area, is totally unacceptable. The wealthy white people of Kenwood have had their desires enshrined in law for the better part of a century - it's time to end that.	7/23/2018
8128	92	/policies/identify-and-evaluate-historic-resources/	What about along the Minnehaha Hiawatha Corridor where there are tons of historic grain silos and buildings?	7/23/2018
8129	7	/policies/public-realm/	Some of the worst areas of public realm are around infrastructure that is not developed by the city. If you are willing to put requirements on the quality of design of buildings, how about also requiring the County, MnDOT, DNR, and other agencies to develop good quality public infrastructure projects?	7/23/2018
8130	2	/policies/access-to-employment/	Downtown is only a square mile and is rapidly losing its surface lots that can be infilled with housing/ mixed use. We should be creating minimal density requirements throughout most of the city as people want to move here and as climate change gets worse, there will be more people wanting to move here as we shall only get a little warmer and wetter while vast parts of the country will have to deal with sea level rise and horrible heat. Action step C and D is fine, but I think we should allow offices is most of the city as to not cluster all of our areas with one use. Single use zoning is not good for cities and would make reaching our walking goal very difficult.	7/23/2018
8131	42	/policies/expand-homeownership/	Educate prospective homebuyers about maintenance and working with contractors, as City of Lakes Community Land Trust does. New homebuyers may not understand the potential for a small problem, such as a plumbing or roof leak, becoming a major expense, as a person who does not address a dental cavity and ends up with w larger expense if the tooth needs to be crowned or replaced.	7/23/2018
8132	19	/policies/bicycling/	Make the Min Hi Line along the Minnehaha Hiawatha Corridor. Also make the southside Greenway, northside greenway, and great northern Greenway!	7/23/2018
8133	48	/policies/data-driven-decisions/	So.....where's the data?? Where are all these people coming from? We have the baby boomers dying off. We have people exiting the City because it's already too expensive to live here. We have generation Z which is smaller than previous generations. Where is all the growth coming from? No one has answered that question at your meetings.	7/23/2018
8134	86	/policies/healthy-food-in-institutions/	Why not preserve setbacks and height restrictions, so private homeowners and renters can grow their own gardens? Gardening is a healthy activity. It gives people a sense of accomplishment and pride when they pick a tomato from their own garden. They also get exercise and learn to appreciate the nature. Gardening also supports local based businesses. But people need light and air and land space to have a garden. Getting rid of setbacks and allowing tall buildings deprives them from all the benefits of gardening and means they need to buy their food from the grocery store.	7/23/2018
8135	41	/policies/tenant-protections/	are their rebates or rewards for those landlords who maintain their properties? What carrot vs stick option is there for landlords in order to help them do the right thing by their tenants. I think this may be hard to structure so landlords don't take advantage. My concern is what happened in Richfield that displaced a lot of people. My understanding is they remodeled the apartments, then raised rents to recoup costs and put a lot of people out.	7/23/2018
8136	11	/policies/skyways/	Require skyway entrances to have consistent, visible signage on the street, similar to Des Moines' system.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8137	5	/policies/visual-quality-of-new-development/	<p>Hmmm! I'm why you wondering why are asking when that train has already left the station! I was at a Planning Commission Meeting regarding the Doran project on the river at St. Anthony Main. You were giddy about a "glass box" and thought going higher would be "cool". The Historic Preservation people looked totally deflated, in-fact said why does our opinion matter, last time the City Council overturned our recommendation.</p> <p>The proposed project on West 44th Street is horrible in everyway. Talk about opposite architecture of the surrounding area, it is terrible in that neighborhood. There was one wise commissioner who walked the site and the neighborhood and voted it down vs Nick Magrino who was insulting and rude.</p> <p>I've run two businesses and he would be fired for his comments. In case you missed it take a look! https://www.youtube.com/watch?v=_vZHwSdLNNo My assumption is that he does not have a single family home. He's certainly not at a point in his life like we are where our years of hard work allowed us to buy a home in a neighborhood away from high density. I grew up by Lake Harriet, my Dad was born a few blocks away and sadly a number of commissioners and planners are clueless about our history in the city. To basically call us elitists that we do this for a social activity is beyond pale.</p>	7/23/2018
8138	12	/policies/lighting/	<p>Pedestrian-scale lighting should also be an emphasis on major barrier crossing, like bridges over freeways and railroad tracks. These areas are often the most unpleasant areas to walk, particularly in winter, and lighting provides some sense of personal value to the pedestrian as well as providing a more confident and positive walking environment.</p>	7/23/2018
8139	93	/policies/stewarding-historic-properties/	<p>Historic properties should be open to the public in some way, be it as a public institution or some kind of business open to the public. Private residences should not be historic resources if they can't be shared with the population somehow. If historic preservation is used as a way to block much needed housing, the very least the city can do is ensure that historic resource is available to all.</p>	7/23/2018
8140	47	/policies/housing-maintenance/	<p>yes how to do C as more carrot than stick.</p>	7/23/2018
8141	25	/policies/innovations-in-transportation-and-infras	<p>Work towards the downtown core and all activity centers being car-free zones.</p>	7/23/2018
8142	43	/policies/housing-displacement/	<p>Consider development incentives, such as more units and smaller units, for building affordable housing within a development.</p>	7/23/2018
8143	0.1	/topics/land-use-built-form/	<p>Corridors 4 and 6 need to be reduced in height. They are too much development in neighborhoods and we do not need this much density. Lower corridor 4 to 3 stories and corridor 6 to 5 stories. Then you can do away with interior 3 and leave areas that are currently limited to 2.5 stories intact.</p>	7/23/2018
8144	55	/policies/business-innovation-and-expansion/	<p>It would be great to see additional mention of businesses that not only provide jobs but are also good for people, the community and the environment. It would be great to see further details that encourage Certified B Corporations, Employment Co-ops, Credit-Unions, etc.</p>	7/23/2018
8145	3	/policies/production-and-processing/	<p>All of these action steps are great! I would add that the city should not hand out tax give aways to production companies to get them to move here. That would be a bad policy.</p>	7/23/2018
8146	45	/policies/leverage-housing-programs-to-benefit-c	<p>"Explore and implement options for amplifying community voices in housing policy and program development, including those of non-English speakers and those from communities with strong oral traditions." Inviting the residents of public housing to the meetings that were taking place to privatize their housing would have been a good start. But we should just trust you, right?</p>	7/23/2018
8147	26	/policies/vision-zero/	<p>20 MPH speed limits on residential blocks. No turn on red for the full city. Narrower streets wherever possibleâ€”when two cars approach each other from opposite directions, one should have to pull over for them to pass.</p> <p>Consider formal mid-block crosswalks for busy streets, particularly for long â€œstreetcar suburbâ€ blocks.</p> <p>Consider removing stop signs for residential intersections and leaving the intersections uncontrolled. In our part of south Minneapolis the new stop signs have been taken as permission from motorists to blow through any intersection without a stop sign.</p>	7/23/2018
8148	15	/policies/transportation-and-equity/	<p>The city should continue and expand it work around walking (higher priority) and bicycling.</p>	7/23/2018
8149	69	/policies/renewable-and-carbon-free-energy/	<p>Solar access should not be used as a tool to stop nearby development of much needed housing: a homeowner shouldn't be able to buy a \$1500 solar panel to block development to their south. Large Scale solar on larger buildings or in solar farms outside the city is a much more efficient way to provide renewable energy to city residents while still allowing the city to grow.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8150	93	/policies/stewarding-historic-properties/	I really appreciate action step k, adding this as a consideration earlier in the process seems like it could really help property owners and city staff as the review continues. I think a deconstruction ordinance would be a significant step in protecting historic resources, creating jobs, and creating a greener economy. Action step b will be difficult if the city council continues to overturn HPC findings of non-compliance with historic district guidelines because they care more about having the density and development. The guidelines or the maps in this plan will need to change for many districts once this plan is realized. In response to action step e, perhaps a grant could be created or a loan for retrofits which may cost more up front but have a short payback period.	7/23/2018
8151	4	/policies/access-to-commercial-goods-and-services/	There need to be more commercial spaces in the Longfellow neighborhood. I don't think they all need to be cluster together either. Just allow it on more corners on main streets throughout the neighborhood.	7/23/2018
8152	14	/policies/tree-canopy-and-urban-forest/	I think this is especially important as some things change on these main corridors.	7/23/2018
8153	44	/policies/comprehensive-investments/	e.Ensure that housing investments in areas with concentrated poverty are part of a comprehensive community investment strategy to benefit existing residents and improve opportunity.	7/23/2018
8154	69	/policies/renewable-and-carbon-free-energy/	Will "ensure" include goals and evaluation metrics?	7/23/2018
8155	0.1	/topics/land-use-built-form/	Solar shouldn't be used as a tool to stop development or hinder it.	7/23/2018
8156	68	/policies/energy-efficient-buildings/	We need to avoid more high rise building in the Lake-Dean Parkway- Excelsior area as it will only exacerbate congestion. Need input from communities affected by the anticipated changes.	7/23/2018
8157	1	/policies/access-to-housing/	Include looking to the St. Paul Ecodistrict for inspiration regarding increasing the efficiency of heating with non-fossil fuel energy sources. Alternative energy systems are continuously improving, so try to implement a system to regularly verify existing programs are producing the greatest effects.	7/23/2018
8158	63	/policies/food-access/	For this policy there should be more definitive guidelines describing not only the type of housing that can be placed at these different locations (ie. a 4-unit building doesn't describe what the overall height of the building could be which allows for blocking sunlight and negatively affecting immediate neighbors). Note that this is one concern that we've already been seeing with new very large single family homes (located on very small lots "tear downs) and it would be great for this policy to address solar studies and height regardless of the number of units within the building. Only calling out the number of stories is not an adequate method since there is too much interpretation (such as the height of the first floor, the height of each individual story, etc.).	7/23/2018
8159	18	/policies/walking/	Learning from trusted experts in communities such as Tamales Y Bicicletas, Britt's Indigenous Health, Wellness and Cultural Arts and IPOC leadership. There are community powered solutions that are offering teachings and strengthening underrepresented and under resourced communities. Fostering connectivity and engagement adds value to all of Minneapolis.	7/23/2018
8160	1	/policies/access-to-housing/	There is no mention of auto enforcement here. As a person that regularly walks around the city, there are two main sources of stress from drivers: speeds and lack of awareness at intersections with pedestrians. Particularly, vehicles that are stopping rarely stop behind the stop bars, let alone behind the crosswalk. A rapidly approaching vehicle is one of the most terrorizing sights as a pedestrian in a legal crosswalk. More signage for no-turn-on-reds and enforcement of stop zones would good a long way to making pedestrians feel equal in the eyes of the city.	7/23/2018
8161	1	/policies/access-to-housing/	I strongly disagree with allowing duplex, 3 unit and 4 unit buildings to be built on traditional single family dwellings. This can affect property value and cause parking congestion. People are still going to have cars. Kelly M. Windom	7/23/2018
8162	93	/policies/stewarding-historic-properties/	My block is mixed use and zoned for 2.5 stories. I bought it know this zoning. This plan puts us at 3 stories, which would limit the light and radically change my block. In addition, the transit corridor, currently lined with building that are mostly 2.5 story homes or businesses, with a few apartment buildings at 3 levels, is planned to have 4 stories allowed. This is a neighborhood that can not sustain that amount of density without making getting around impossible, overuse and ensuing damage to our neighborhood parks, air quality, water... Scale it back.	7/23/2018
8163	10	/policies/street-grid/	Could some of these historic places be used for housing stock? Multiunit? What about parking and transport that supports some of these areas?	7/23/2018
			I think the city needs to be more specific about this, and actually show in plans and maps where they would like the street grid to go. That way developers and the community have something to start with right away.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8164	94	/policies/heritage-preservation-regulation/	What types of changes to the guidelines are being discussed? Would things like height allowances be brought to the same place as this plan? I agree with action step d, the ordinance should have more guidance in regards to mitigation, perhaps set paths a developer could select. I also think a deconstruction ordinance could really help in those cases.	7/23/2018
8165	23	/policies/coordinated-development-strategy/	Consider adaptive reuse of buildings to maintain the city's fabric/history.	7/23/2018
8166	39	/policies/fair-housing/	I have neighbors (in SW) who are housed through MPS scattered site housing program. Both families are mostly interested in living in a crime free area with decent schools. They don't particularly aspire to live in SW. The city needs to find ways to rehabilitate the northside as well as parts of south Minneapolis, from crime and improve the quality of the schools in these areas. That is what people really want. My Somali neighbors actually prefer to shop in Somali businesses and associate with Somali community. I can understand and respect that. Why doesn't the city do something about the crime????!!!	7/23/2018
8167	1	/policies/access-to-housing/	We love our single family housing neighborhood with a variety of age groups and ethnicities in sw minneapolis. Dense housing with multiple units and big footprints of major housing buildings are not beneficial to neighbors who know each other and work together to promote a safe and friendly neighborhood within a major city. Children thrive in a neighborhood where people meet and welcome each other and go to neighborhood schools. High density housing is not our goal. No to this plan. Benefits property developers, not families living in the city and paying property taxes. Keep our neighborhoods and city livable.	7/23/2018
8168	30	/policies/arts-and-cultural-assets/	NE has a thriving art community. Please continue to support those artists that are currently supporting NE Minneapolis!	7/23/2018
8169	1	/policies/access-to-housing/	I generally agree with this policy. I strongly agree with the action steps a, b, and c. However, I would replace steps d and e with the action of "allowing new multi-family housing city-wide." Including up to 4-unit dwelling building types is not a crime and would increase the options for people in different parts of the city. Single family zoning creates de facto segregation and Minneapolis has a long history of redlining. If one of the goals is to reduce disparities for people of color and indigenous people, compared to white people, access to housing must be improved. Density is not a dirty word!	7/23/2018
8170	1	/policies/access-to-housing/	Increasing affordable housing is a laudable goal, but there does not seem to be a mechanism in the plan to ensure that new housing will be affordable. Simply increasing supply does not guarantee a lower price. I live in an interior 1 neighborhood. Many lots simply could not handle a fourplex reasonably. Also, the complete elimination of single family home zoning is causing significant concern from residents that have invested in their homes in the belief that the neighborhood would stay essentially the same. Allowing such buildings as a conditional use would work better and would allow case by case evaluation of each proposal.	7/23/2018
8171	1	/policies/access-to-housing/	Increasing affordable housing is a laudable goal, but there does not seem to be a mechanism in the plan to ensure that new housing will be affordable. Simply increasing supply does not guarantee a lower price. I live in an interior 1 neighborhood. Many lots simply could not handle a fourplex reasonably. Also, the complete elimination of single family home zoning is causing significant concern from residents that have invested in their homes in the belief that the neighborhood would stay essentially the same. Allowing such buildings as a conditional use would work better and would allow case by case evaluation of each proposal.	7/23/2018
8172	33	/policies/affordable-housing-production/	Though I agree with the overall goal of this policy it seems to be lacking in specifics. It would be great to see concrete ways that this could be achieved such as tax cuts for those developing affordably priced accessory dwelling units, advantages for those developing tiny homes that could be more affordable to rent or buy, etc.	7/23/2018
8173	80	/policies/development-near-metro-stations/	This is a pretty sounding goal, but the land use map doesn't reflect it. Maximizing the value of the Blue Line investment is not building towers on that strip between Hiawatha and Minnehaha and leaving the area to the west of Hiawatha (where you don't need to cross a freeway to get to the train) as SFHs forever. The minimum required development intensity anywhere within a half mile of any METRO station should be four stories, scaling up as you get closer, even and especially where the previous decades of zoning regulation were horrifyingly exclusive.	7/23/2018
8174	9	/policies/open-spaces-in-new-development/	Promote low impact landscaping, like permeable surfaces or low water requirements for plants. These spaces might make good places to increase the absorption of water into the ground, reducing flood risks.	7/23/2018
8175	6	/policies/pedestrian-oriented-building-and-site-de	Eliminating requirements for off-street parking is not a sound policy. It allows developers to skirt concerns of residents by eliminating congestion of traffic flow and parking access as real concerns a new build must address. Off-street parking requirements have in some neighborhoods forced developers to reconsider simply massing their build size and listening to how their build will interact with neighborhood parking and traffic patterns, resulting in an improved development product for all residents, new and old. The off-street requirement should not be removed; it has been a responsible requirement that helps integrate new developments into established neighborhoods.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8176	56	/policies/supporting-small-businesses/	Current Small Business Development Centers are not prepared, nor have the capacity to engage, educate, and inspire new Small Business entrepreneur's. We should have deeper conversations with community who have found gaining information difficult.	7/23/2018
8177	46	/policies/healthy-housing/	There are already great tools that exist to address health hazards in housing such as the building standards FitWel and WELL. Both of these address a wide range of design components that affect physical and mental health and have been used throughout the world.	7/23/2018
8178	1	/policies/access-to-housing/	This is such a critical priority and policy. Housing density needs to be spread out across the city, not just concentrated in areas that are already dense because of a history of redlining and restricting zoning. All neighborhoods should be welcoming to more neighbors and share the burden and opportunity of expanded housing across the city. Please do not let wealthy neighborhoods water this policy down for everyone elseâ€”everyone in Minneapolis deserves options for where to live. Getting ahead of the curve on density will prevent massive displacement and gentrification in the future. It would be great to see specific incentives for locally owned small scale residential structures, perhaps with support and incentives for coop options and/or subsidies for new local landlords.	7/23/2018
8179	4	/policies/access-to-commercial-goods-and-service	As listed above most errands are a long distance and personal automobiles are used causing more economical issues in the city. I feel that the light rail systems need to be more extensive and accessible in order for more people to use them in their everyday routines. Reaching out to near by cities with clean accessible stations with nearby parking . This would significantly reduce the amount of emissions produced and increase the amount of light rail use for every day things such as grocery run, sports event, or everyday office job	7/23/2018
8180	81	/policies/social-connectedness/	Stop funding unrepresentative neighborhood organizations. Make them reflect their community if they don't pull findings. Organize through other ways. These groups rarely reflect the overall neighborhood.	7/23/2018
8181	12	/policies/lighting/	Add something about lighted signs too. Done right, they can really add a nice element to buildings.	7/23/2018
8182	2	/policies/access-to-employment/	Without a plan to add transit to suburban job destinations from all areas of the city, without having to go downtown, you havenâ€™t helped this problem. There are many large corporations, e.g United Health, General Mills, etc. that are in the suburbs. More direct lines to employment nodes would be helpful.	7/23/2018
8183	1	/policies/access-to-housing/	As a renter in a fourplex in the CARAG neighborhood, I see the value that increased density and diversity of housing will bring. Without the availability of apartments, I would not otherwise be able to afford living in this neighborhood, and with rents rising around me, Iâ€™m grateful to have a landlord that does not insist upon consistently raising rent. Iâ€™m strongly in support of these policies and believe they will be a good start towards slowing the rising cost of housing, hopefully allowing others to access housing affordably in the way Iâ€™ve been able to.	7/23/2018
8184	19	/policies/bicycling/	More???? I love to get on my bike but we don't need more lanes! As it is I don't see them using them as often as one would think. We are already the number one city for biking, paths etc. God forbid those of us that drive are getting scrunched in on the roads. Park, Portland, and the worst Bryant Av. because it is two way. I cannot pass a car because the bike lanes are to wide. We live very close to the Parkway, there are tons of bike trails but the bikers would prefer to be on the road. What's that about and they drive on even busier roads ignoring the places they are supposed to use. That causes more congestion!	7/23/2018
8185	4	/policies/access-to-commercial-goods-and-service	This policy discriminates against people with physical disabilities. We need to be able to drive as well as those who can, use public transportation.	7/23/2018
8186	95	/policies/heritage-preservation-financial-incentive	I think financial incentives would be a great step, especially for homeowners in historic districts. Architectural assistance is an interesting idea. A program that provided owners and their architect one day of consultation with a historic architect who meets the Secretary of the Interiorâ€™s Standards towards the beginning of the process could really smooth things out later on. Financial assistance could make a big difference in gaining additional historic properties, especially in areas of lower income. I think a property tax reduction for well maintained buildings of a certain age, like 100 years should be considered.	7/23/2018
8187	49	/policies/educational-and-economic-access/	Yet it was so hard to get Mpls to agree to \$15/hour, which is NOT a living wage. An economic forum at the U of MN 8 years ago determined that a living wage in this city, at that time, was \$20/hour. You can't claim to be aiding the working poor if you're not willing to pay them. This language is so vague.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8188	37	/policies/mixed-income-housing/	I realize this plan would do less to loosen building restrictions in fancy neighborhoods than people think. I think it should actually do more. I would like to see a greater quantity of housing in high-price neighborhoods. Existing homeowners should not be allowed to maintain an unfair monopoly on convenient access to amenities and fancy lakes. I want zoning policy to work toward the goal of affordable housing in every neighborhood, not against, the way it does now.	7/23/2018
8189	81	/policies/social-connectedness/	Abolish city recognition of neighborhood organizations #ACRONO	7/23/2018
8190	0.1	/topics/land-use-built-form/	Please let more housing be built everywhere!	7/23/2018
8191	33	/policies/affordable-housing-production/	This policy needs to get more specific with implementation tools, for ensuring equity in affordable housing production and access, and protection for those in affordable housing.	7/23/2018
8192	5	/policies/visual-quality-of-new-development/	Any new construction needs to match the existing height in neighborhoods and also needs to blend in to maintain the aesthetic integrity of our neighborhoods.	7/23/2018
8193	81	/policies/social-connectedness/	As a DMNA board member, neighborhood associations are nothing but a tool to amplify the voices of the already privileged. We don't need a stronger voice than we already have. Abolish City Recognition Of Neighborhood Associations.	7/23/2018
8194	60	/policies/intrinsic-value-of-properties/	<p>Variences such as Vermillion Development on University Ave. like 2.5 stories to a variance of 14 stories and setbacks of 37 feet changed to 10 feet next to historic properties and blocking views from Tower Hill Park and homes put the lie to your "zoning" and fake planning rules that the rich ignore and the rest pay for with degraded properties while throwing away community identity and preservation of historic areas.</p> <p>Your rules are used as a legal cudgel to regular citizens while banks and finance companies and politically favored developers suck up TIF subsidies, externally costed variances and make an ugly unlivable environment because they have no rules, only money rules, masked by the phoney "2040 Plan".</p>	7/23/2018
8195	1	/policies/access-to-housing/	One size does not fit all. Minneapolis has been unique among large U.S. cities in its extent of single-family residential areas. Not opposed to 4-family dwelling units on existing single family lots provided the area of the lot is sufficient to accommodate dwelling unit, accessory structures, including off street parking and green spaces for dwelling units. In areas of Minneapolis with 5,000 square-foot single-family lots, 4-plexes--if allowed to be constructed without further restrictions--could result in residential area with densities approaching units/acre. If that's the intent, guide areas appropriately for this density and develop land use regulations that appropriately address higher density residential uses. We'll end up with fewer accidental landlords and better developments. Higher density does not address affordability.	7/23/2018
8196	15	/policies/transportation-and-equity/	BRT need to be a major priority. They cost way less than other transit systems and would significantly improve transportation for the most residents of minneapolis.	7/23/2018
8197	60	/policies/intrinsic-value-of-properties/	What are the processes you use to determine what buildings and landscapes are important to the cities heritage? Aren't these decisions fairly fluid and based in community context? Maybe we should go back to the old ways, where each community could determine it's own values and goals and get NRP money to support those same.	7/23/2018
8198	9	/policies/open-spaces-in-new-development/	In addition to the open park-type space, enforcing building set backs to allow for full sidewalk use and access will be crucial to creating a truly pedestrian-friendly city. Too often in developments, builds have been permitted to encroach on setbacks, to the visual/aesthetic and physical safety of pedestrians.	7/23/2018
8199	10	/policies/street-grid/	Step e holds a lot of potential for shaping how our city moves in the future. Make sure it is a priority of city planners to consider if adding lanes for cars is really the best option.	7/23/2018
8200	50	/policies/access-to-technology/	<p>We were promised FREE internet when USI Internet partnered with the City. We didn't get it. But we should just trust you, right?</p> <p>What did you do for net neutrality??</p>	7/23/2018
8201	4	/policies/access-to-commercial-goods-and-service	Doing what you can to get a real grocery store (or more than one) to locate on the North Side would be great. Not sure that rezoning will accomplish that.	7/23/2018
8202	81	/policies/social-connectedness/	Abolish city recognition of neighborhood organizations. Neighborhood organizations are exclusionary and often uplift the voices of people who are already connected to power. The city should expand their outreach and empower the Ward offices to work at the neighborhood level, rather than handing over money to rich white people pretending to represent the entire neighborhood, while actually giving themselves loans to renovate their kitchens and using their perceived authority to block new development for selfish reasons. Abolish city recognition of neighborhood organizations.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8203	45	/policies/leverage-housing-programs-to-benefit-c	Tie some development dollars/incentives to trades training for city/community residents who are women or persons of color.	7/23/2018
			<p>Minneapolis Policy of Social Connectedness</p> <p>Actively build the community's capacity to strengthen authentic engagement through neighborhood associations and City advisory committees and to facilitate meaningful resident, business owner and property owner input into City policies, programs and procedures. 8207	81 /policies/social-connectedness/	<p>Neighborhood Organizations do not represent the demographics of the city, and should not be taken as representatives of the community. They can be one part of engagement but not all of the engagement, or even a large portion of it. Many NOs feel like they are the be all end all of community engagement when in fact they are very bad at it. Attitudes need to be adjusted so they understand they are at best a small piece of a large puzzle.</p> <p>Neighborhood organizations should be monitored to ensure they are working to be representative of their communities, and funding and recognition should be based on this monitoring. If they are not able to represent their community, they should not receive funding and they should not be formally recognized by city departments.</p>	7/23/2018
8208	49 /policies/educational-and-economic-access/	<p>Schools need to be a bigger part of 2040 planning. If we want to preserve and protect public education the City has to work together with the School Board, Met Council, Hennepin County, Ed Graff and MPS, and the State. We can't plan for schools without coordinating it with our area development plan. The Plan is too focused on job training. Minneapolis needs strong public schools.</p>	7/23/2018
8209	96 /policies/heritage-preservation-recognition/	<p>I think interpretive signs could be really cool. I know that people in the historic district near where I live were pretty excited about their new street signs. I think the big factor would be who pays for the signs. Perhaps large developers should be required to do some public interpretation signage as part of their COA. It could be a cool way to link in policies on the creative sector job creation and public art. Some explanation of how the city currently recognizes properties should be included in the summary.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8210	6	/policies/pedestrian-oriented-building-and-site-de	<p>Maybe encouraging garage use vs parking on the street would help...LOL Though in theory I am happy with the bike lanes, in some areas I think it has been a bit excessive and inhibited traffic flow. Bicyclists should also follow the same rules of the roads as cars and other vehicles. I see many bicyclist run through stop signs, stop lights. Who does this help? Also people should be required to wear a helmet. Traumatic brain injuries (TBI) are a very real thing and end up costing everyone!</p>	7/23/2018
8211	1	/policies/access-to-housing/	<p>We are already building many units. The vast majority of those are luxury apartments. This plan does not do anything to meet the needs of people in search of affordable housing. It does, however, fulfill the dreams of developers. Citizens before developers.</p>	7/23/2018
8212	1	/policies/access-to-housing/	<p>No consideration has been given to school capacity in this topic. In the SW part of the City, schools such as Lake Harriet and SW High School area already at or beyond capacity with limited physical plant for expansion. Where will all of these new residents be educated? It lacks vision to simply say that the plan "doesn't address schools."</p>	7/23/2018
8213	1	/policies/access-to-housing/	<p>This all sounds good, especially higher density on transit routes, allowing new housing consistent with existing housing, and allowing multi-unit housing in residential areas. More density allows for more complete neighborhoods and less driving, which is great.</p>	7/23/2018
8214	97	/policies/heritage-preservation-legislative-advoca	<p>I'm not sure what this would look like but it is an interesting idea, I don't really think of the City as an advocate.</p>	7/23/2018
8215	18	/policies/walking/	<p>Walking needs to be central to the plan, not an after-thought with cars and other motorized vehicles at the center. For example, the number of stop signs along Dupont Ave South from 42nd to 46th streets ALONG WITH the grassy boulevard significantly increases comfort for pedestrian crossing of Dupont. An extremely POOR example is being a pedestrian on the east side of Hiawatha at 43rd Street trying to get to the light rail station at 46th.</p>	7/23/2018
8216	51	/policies/healthy-pre-k-development/	<p>At the community meetings, we were told that the City has no educational plan, that it's a separate plan made by the Dept of Education. Who is this for?? Minneapolis laid off 20 teachers at South High last year. We keep paying more for education as the number of drop outs increases, class sizes increase and graduation rates decrease.</p>	7/23/2018
8217	17	/policies/complete-streets/	<p>Great, but work with public work to make sure this fits into how projects are funded. Too often they are only "resurfacing" and they don't do anything for signage, benches, bike racks, more crosswalks, etc. Also, please coordinate efforts with the park board so trails and streets are better connected.</p>	7/23/2018
8218	17	/policies/complete-streets/	<p>Great, but work with public work to make sure this fits into how projects are funded. Too often they are only "resurfacing" and they don't do anything for signage, benches, bike racks, more crosswalks, etc. Also, please coordinate efforts with the park board so trails and streets are better connected.</p>	7/23/2018
8219	35	/policies/innovative-housing-types/	<p>Yes" more opportunities for housing coops! Please expand options for those who can't afford a house or who don't need a house to still build equity within their community. This needs to be easier to do and more supported by the city. The Tenderloin district in San Francisco has done amazing work on SRO protection and making SROs a part of the neighborhood pride (and countering stigma of sros being a blight in ge community). They would be a good resource for consultation.</p>	7/23/2018
8220	34	/policies/affordable-housing-preservation/	<p>Yes! Yes! Yes! No to developers tearing down existing affordable housing so they can maximize profits by building taller building that are not affordable to current residents. YES to current residents being able to stay in their communities, where density is not so dense as to make the city unlivable.</p>	7/23/2018
8221	53	/policies/quality-of-life/	<p>I think action step c should also mention cultural and historical assets.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8222	1	/policies/access-to-housing/	The goals behind this policy maybe well intended however there is a lot of unintended consequences. This is a very complex issue and needs further review to ensure the related goals are maintained, city needs to keep the character of the neighborhoods and housing needs to be affordable to low and middle class families. This policy promotes development. Somehow we need to ensure that the development does not replace older houses with new new development that may provide more units that are smaller and more expensive. An effort needs to be found to provide housing for families at prices that people can afford. I am a single middle aged individual with an income level that is slightly greater than the medium income. I am currently renting and would love to stay in Minneapolis however that might not be possible as the rents are increasing and entry level homes are not available for sale as developers/homeowners are holding them for rental. The city needs to find a way to allow for development but the city must find a way to maintain character and diversity of the city. It is not an easy issue but further thought is needed so that we build a community that will work. In many neighborhoods in and near downtown, parking is an issue for business and housing a policy is needed to ensure this does not continue to be an issue and lack of parking spread to other neighborhoods and lack of a consistent development policy will cause the lack of parking to spread.	7/23/2018
8223	14	/policies/tree-canopy-and-urban-forest/	This goal is direct conflict with increasing density. Trees need land, space, light, and water to grow. In return they absorb water from the ground (using excessive rainfall) and absorb co2 from the air. But none of this happens if the city promotes high density throughout the city. In the current plan high density is the first and only real policy, and trees and the environment aren't even really on the list.	7/23/2018
8224	19	/policies/bicycling/	Very positive improvements have been made to biking in Minneapolis compared to 20 years ago. Keep up the good work. Specifically, complete the Grand Round with PROTECTED bikeways.	7/23/2018
8225	4	/policies/access-to-commercial-goods-and-service	Allow small commercial uses in every district, even Interior 1. There's no reason a small coffee shop or convenience store shouldn't be allowed to exist on every block in the city.	7/23/2018
8226	34	/policies/affordable-housing-preservation/	Your high rise density will have the same effect on affordable housing as it has in Manhattan, San Francisco, Chicago Lake Districts, Portland and Seattle. It will price out the poor. It is the same stupid plan and it is already making more ugly urban space that we thought we stopped in the 1970s.	7/23/2018
8227	49	/policies/educational-and-economic-access/	<p>On (c.) If schools are not part of 2040 planning and if in fact we want to preserve and protect that asset we have to make Met Council, Hennepin County, Ed Graff and MPS, and the mayor and city council all work together. We can't plan for schools without coordinating it with our area development plan. Thanks! Also, our goal shouldn't simply be to eliminate racial disparities it should be for excellence across the board! Neighborhood schools, walkable schools, excellence in all schools.</p> <p>On (d.) One way to get a diverse city workforce is to offer incentives get first responders including police, fire, EMTs, teachers and social workers, by giving them free homes in crisis areas and if they stay and raise families they get further economic incentives for putting down roots. Rather than the viral overload of market-rate gentrification this would be an inoculation of limited positive antibodies that bolster the immune system of the community for lack of a better metaphor.</p> <p>Also, it stops the spread of our blue tax dollars into red country. We shouldn't have police living in hunting and fishing territory and then coming into town with that mentality to patrol our streets. We may not be able to force them to live in the city in crisis neighborhoods but we can incentivize them and the people who will accept those incentives will often be from the communities themselves.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8228	1	/policies/access-to-housing/	<p>My issue is with "Neighborhoods farthest from downtown". My wife and I moved here 10 years ago. We lived downtown MSP and after getting married decided we wanted a home with a yard (even if tiny). Southwest Minneapolis is where we decided to reside after finding a single family home with its own yard within a reasonable budget. We have thankfully seen the neighborhood turnover the last 3 years with MANY young families moving in. Since we purchased just above the BUILDER THRESHOLD of a tear down we can live in a single family house. It's smaller then the new homes but it's ours and it has a lawn in Minneapolis...which is important to us because we love this city. To change the zoning laws means we probably would have had to move into a duplex or fourplex in this area as the market would dictate the rising costs, NOT THE TYPE OF HOUSING. We thus would have moved away from Minneapolis as the smaller homes would be replaced with duplex's, instead of larger homes, in which we didn't want to live. Affordability isn't a function of the type of housing.....Ask people who pay millions of dollars to live in tiny condos in New York. It's a function of demand. The southwest corridor commands a lot of money because its SUCH A GREAT PLACE TO LIVE FOR FAMILIES THAT WANT A HOUSE WITH A YARD FOR CHILDREN IN A NEIGHBORHOOD WITHIN THE CITY. We don't want to live Downtown and we don't want to live in Uptown. We've done that. Great places but not where you want to raise a family!!!!!!!!!! Turn the neighborhood into 4 plexs and single families will move out and dual income households with no kids or other high end money earners will move in. Look at Downtown or Uptown. It's high density housing and new condos go for more than most surgeons I talk to want to pay.</p> <p>Please add more public transportation. That is great. But what percentage of households will use it? 25% conversion rate by 2025? Probably ambitious. To accomplish that you'd have to add more jobs and change the types of jobs within the city. To do this where would you build these structures for jobs? Would you have to take away from current green space or rezone housing? I don't know the answer but adding 2,3,4 times the amount of people for a 25% (ambitious) conversion rate on household greenhouse gas emissions seems pretty far fetched. The jobs within the city are the jobs within the city. So to reduce that driving rate you need to create better public transit for people that already live in the city and commute WITHIN there. You can't help the people that move outside of the city. Change the zoning laws and more people will move outside of the city and thus "commute" to the existing jobs they have.</p> <p>I could write for hours on this and I hope that intelligent people actually read this!!!!!!!!!!</p>	7/23/2018
8229	52	/policies/human-capital-and-a-trained-workforce/	<p>Action step e would benefit from partnerships with professional organizations. I also think this should tie into the policy on homelessness.</p> <p>Action step g could be tied into the green technology industry.</p>	7/23/2018
8230	19	/policies/bicycling/	<p>Make a better, and re-evaluated, bike map. Add connections indemnified by the park board and coordinate with their plans.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			<p>As an executive in strategic planning for the past 20 years supporting Fortune 50 companies, I am disappointed with multiple facets of your Land Use plan. I do not see any feasible positive outcomes with this plan and do not support this plan nor its implementation.</p> <p>Lack of Data/Analytics: Many decisions lack logical, fact-based data/analytics to support the ideal stated outcome - affordable housing. While the ideal is admirable, there is no data showing that your intentions will be realized with the rezoning actions you have planned. Specifically, in the Interior 1 areas, there is no feasible way affordable housing can be created by forcing multi-family plexes, using market based pricing in the Uptown area. Additionally, the plan is aggressive in its reach at the outset. Based on my experience, when aggressive change is put forward, without pilots/testing and/or changing of the 'hearts and minds' of the people, it is doomed to fail. Why not take a slower approach, learn from the experience, build on successes vs such a radical dive into the deep end without adequate data/analytics to prove a) it's a good idea; b) if it is even tenable?</p> <p>Voting Rights: The proposal you put forward is a RADICAL change from where we are today, that according to your materials could begin as early as 2020. This proposal is very far reaching and life changing for many and as such I believe the public should have the right to vote on whether this, or some version of this, is passed or not.</p> <p>Parking: Lisa Bender stated that the traffic control agency was not consulted in the drafting of this land use plan. For our Uptown area, the proposed integration of multifamily homes/plexes would make parking in an already overcrowded area even more of a nightmare. Appropriate and efficient traffic control and adequate parking needs to be considered. If the ultimate goal is to get rid of vehicles in the area, it is unrealistic when 6 months out of the year the weather can be treacherous. Will the bike/bus get my child to the hospital? How to take two kids to two different schools in the area or out? Will Uber have carseats? What if you have a critically ill loved one? Or will we all just call for an ambulance? This is completely inefficient if you want people to be on time for jobs and have a family life as well. We are not New York City, Chicago, or any other major metropolis that is boxed in geographically (e.g. an island) or with a very large population.</p> <p>Historic Homes & Communities: Another part of your policies indicate a consideration for Minneapolis history. Uptown, East Isles, Lowry Hill and many other South Minneapolis areas have historic homes that have been lovingly cared for since the early 1900s. Communities have been built and families have lived connected here over the years against this historical backdrop. This is part of what makes living in Minneapolis so special. Tearing these historic homes down and building multiplexes ruins communities and favors the developers. If your plan achieves stated goals, every existing homeowner would be incentivized to sell at the highest price to a developer and move to the suburbs, thus ruining this vital historical space in the name of densification of high priced condos, townhomes, apartments, boxes. (we</p>	7/23/2018
8231	0.1	/topics/land-use-built-form/	increase fines for illegal dumping and enforce them.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8234	25	/policies/innovations-in-transportation-and-infras	Elon musk.	7/23/2018
8235	69	/policies/renewable-and-carbon-free-energy/	Investing in renewable energy infra is great! Unfortunately, most of the time it does not make sense for urban homeowners to own and operate solar panels. Solar energy should be farmed in rural areas. When urban homeowners attach solar panels to their roof, they use it as an excuse to block development which might shade their panels. Most of the time it doesn't actually shade their panels. But even if it did, the benefits of having a dense walkable urban environment outweigh the wants of one homeowner to have solar panels on their own roof when it makes more sense to farm this energy in rural areas.	7/23/2018
8236	0.1	/topics/land-use-built-form/	Good evening, I live in a residential single-family house at the intersection of Emerson Ave S and Summit Ave. The majority of our neighborhood is comprised of residential single-family homes, with very few multi unit buildings. Your draft plan would zone my neighbors' parcels for construction of up to 4 stories along the Franklin Ave bus route. That is not an appropriate scale of development for this residential neighborhood. The draft designation ignores the scale of development that city residents have followed for more than 100 years at this location. Please revise the designation in the final plan from Corridor 4 to a less-dense designation. Thank you. Sincerely, Marstal Aamodt	7/23/2018
8237	2	/policies/access-to-employment/	How can you do this without a transit plan??	7/23/2018
8238	81	/policies/social-connectedness/	Stop funding organizations that use funds to block much needed housing or as tool to organize against specific council members. These groups have no oversight as NCR is unwilling to hold them accountable. Some of them are glorified homeowner's associations they don't care about renters or POCI	7/23/2018
8239	81	/policies/social-connectedness/	Abolish City Recognition of Neighborhood Organizations	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8240	68	/policies/energy-efficient-buildings/	The most energy-efficient housing unit is the one that only has one exterior wall. We should be allowing at least small apartment buildings throughout the city.	7/23/2018
8241	51	/policies/healthy-pre-k-development/	How would the city increase the high-quality child care slots? Would the City create its own child care facilities with subsidized slots? I'm not clear on how the City can complete most of these action steps.	7/23/2018
8242	14	/policies/tree-canopy-and-urban-forest/	Develop long term management plans, like how to deal with the inevitable event that a group of trees planted at the same time die of old age, leaving a hole in the canopy.	7/23/2018
8243	2	/policies/access-to-employment/	Don't forget telecommuting and "coworking" alongside traditional office and institutional spaces.	7/23/2018
8244	46	/policies/healthy-housing/	Consider social determinants of health when siting and planning housing.	7/23/2018
8245	37	/policies/mixed-income-housing/	I highly support mixed income housing and inclusionary housing policies. Please make sure this policy gets more specific to ensure that all neighborhoods in Minneapolis share in this work— inclusionary and mixed income housing should not just be pushed off on a few wards, but spread across the city as a whole.	7/23/2018
8246	17	/policies/complete-streets/	To underscore the importance of this policy, I ask that Bicycles receive priority when traffic must be diverted to allow for road repairs or construction zones. Cars should be rerouted OFF any street where there is a marked bike route -- such as Bryant Avenue South -- so that Safe, Well-Signed Bike Routes are Maintained, NOT right-of-way for cars.	7/23/2018
8247	3	/policies/production-and-processing/	"Identify and limit new heavy industrial uses that harm human health throughout the city." YES!!	7/23/2018
8248	41	/policies/tenant-protections/	Increased tenant protections are critical. This is an important policy.	7/23/2018
8249	6	/policies/pedestrian-oriented-building-and-site-design/	Yes, yes, yes. Human-centered design.	7/23/2018
8250	0.1	/topics/land-use-built-form/	Zoning and building codes should enable the creation of row homes. Row homes are a great way to increase density while still allowing many of the benefits of single family homes	7/23/2018
8251	28	/policies/msp-airport/	I would also support more development in close proximity to the airport. Especially at Fort Snelling, the VA, and the Ford Site.	7/23/2018
8252	40	/policies/homelessness/	More public restrooms and provide more services for them. Give people dignity and help. A place to go and all the assistance to get back on track.	7/23/2018
8253	50	/policies/access-to-technology/	I live in an apartment building that is on the only street in my neighborhood without fiber-optic internet. That is because the park doesn't allow it to be carried down the street because of how easements are done. I think this is a barrier the City could easily overcome.	7/23/2018
8254	80	/policies/development-near-metro-stations/	I think that Minneapolis could use many more light rail systems because they are very efficient and quick. The only problem is that there is only a limited amount of them and most have to find a place to park before riding the light rail. And sometimes it is just a hassle to use them. So expanding the station numbers into highly populated areas would significantly decrease the use of personal automobiles and carbon emissions	7/23/2018
8255	0.1	/topics/land-use-built-form/	This proposed built form district approach is inane. Consider an approach that actually considers the unique characteristics of existing Minneapolis neighborhoods.	7/23/2018
8256	2	/policies/access-to-employment/	http://tcbmag.com/news/articles/2018/april/office-vacancies-on-the-rise Maybe to staunch that potential tsunami of vacant commercial real estate we look to creative solutions, eh? What if there were room in existing commercial real estate stock to make affordable housing that is walkable to work downtown and doesn't require environmentally unsound tear downs of existing homes to build that new housing stock, eh? Maybe let working class people live where they work, eh? That's true walkability. And if some of these people can live in the Skyway buildings they work as retail clerks and building engineers in they'll be sheltered in the worst weather. Maybe house some homeless there. I'm not kidding. The people who wear suits and make highfalutin decisions about how our city is developed should have to share elevators with regular ordinary people and look them in the eye and see up close in person whose lives it is they are affecting.	7/23/2018
8257	74	/policies/integration-of-water-management-into-development/	Encourage adding rain gardens to increase absorption of rainwater.	7/23/2018
8258	27	/policies/transportation-partnerships/	Create an agreement with Metro Transit to allow free transit to all residents of Minneapolis. This could be achieved by levying Transit into property taxes, or simply consolidated as a separate utility bill. Increasing access to electrified public transit is a very significant way to decrease emissions.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8259	35	/policies/innovative-housing-types/	<p>I'm a Realtor please explain what you mean by emerging housing trends? If you mean that people want to live in single family homes as they have for a very long time that is not a trend. There will ALWAYS be people that will want that whether single, a couple or family with kids. They of course have choices, some prefer Condo living or maybe rental. Historically people want to build equity and buying a home is the best way. I work with many first time home buyers that don't have a lot of money, but there are options. One is good old sweat equity! Many get fixer uppers and over time improve the condition and value.</p> <p>To assume that young people no longer want to buy, is just not true! Realtors are organizing and meeting to cut through this very lengthy plan!! We will be in touch to sit down to explain the market trends, demographics and data that supports our beliefs.</p> <p>We are very concerned that you will endanger the housing market, drive down costs and push buyers out of the city. Already buyers have seen the signs around and calling asking what this is all about. Many don't want to risk buying a single family home and all of a sudden there is a multi-housing property next door. This is insanity!</p>	7/23/2018
8260	33	/policies/affordable-housing-production/	<p>I support this plans in this topic and believe we can do better. The adopted comp plan should clearly state that dense multi-family affordable housing should be made available throughout the city, including neighborhood interiors and including traditionally rich white neighborhoods like Linden Hills, and East Isles which have benefited from a legacy of redlining and racist zoning. Ending the housing shortage in an equitable way will involve a one-two punch of upzoning the city to allow more homes and pushing for more subsidized units throughout the city. Please do not compromise to those who seek to exclude people from their neighborhood.</p>	7/23/2018
8261	38	/policies/affordable-housing-near-transit-and-job-	<p>This is a critical policy. If land near transit is developed as non-housing or as housing that is not affordable, that is a lost opportunity. Affordable housing is sorely needed. However, the definition of affordable needs to be developed. Working class people should be able to afford decent and clean housing.</p>	7/23/2018
8262	19	/policies/bicycling/	<p>how about more programs to educate both bike riders and cars on the proper way to bike and drive. do not keep taking car lanes from them for bikes. i feel it only creates more car bottlenecks then cars speedup trying to get to their destination.</p>	7/23/2018
8263	31	/policies/creative-workers/	<p>"Cultivate places where young people of color can engage in hands-on learning from people who look like them." YES!!</p>	7/23/2018
8264	49	/policies/educational-and-economic-access/	<p>How exactly would the City support businesses in the fair wage debate? I think creating more apprenticeship/mentoring opportunities in a variety of fields could be completed in partnership with professional organizations as well as the public schools.</p>	7/23/2018
8265	42	/policies/expand-homeownership/	<p>The best way to promote homeownership is to accept that single family neighborhoods offer something special to many people (especially families with kids) and promoting density in these neighborhoods drives up the cost of housing and reduces the quality of life in these neighborhoods. When density is the goal the cheapest houses inevitably get redeveloped into larger and far more expensive housing. Also, most families, especially those with kids, do want a yard, a little grass, a few trees.</p>	7/23/2018
8266	61	/policies/environmental-justice/	<p>This is crucial. Parts of Minneapolis are beautiful, green, and healthy environments for human life. Everywhere Minneapolitans live should be like that.</p>	7/23/2018
8267	68	/policies/energy-efficient-buildings/	<p>The most energy efficient buildings are those housing the most productive uses. Let's convert vacant commercial building units into mixed use so people can live in offices. It's not that hard to do. Hotels essentially do this. It's how they're built. Office buildings with showers and beds. We have a high Class B vacancy rate. These are old buildings.</p>	7/23/2018
8268	40	/policies/homelessness/	<p>LGBTQIA individuals face higher rates of homelessness, especially among youth. Homeless policies must take this into account and ensure that city and County housing programs and emergency shelters actively promote a safe and inclusive space for all folks regardless of sexual orientation and gender identity. Homelessness response cannot be discriminatory.</p>	7/23/2018
8269	20	/policies/transit/	<p>How do you do all of this without a transit plan coordinated with the housing & urban development plan??</p>	7/23/2018
8270	30	/policies/arts-and-cultural-assets/	<p>Work with the park board to get more public art into all our parks. We have a great park system, and great art should not only reside in the Minneapolis sculpture garden. This will make art much more accessible to so many people. Look at what the Atlanta BeltLine is doing with art.</p>	7/23/2018
8271	33	/policies/affordable-housing-production/	<p>Yes this is an important policy. Good level of detail for actions e and f.</p>	7/23/2018
8272	33	/policies/affordable-housing-production/	<p>It's clear that there isn't enough room in Minneapolis for every family that wants to live here to have their own 5000 square foot lot. Fourplexes should be allowed on any and every lot in Minneapolis.</p>	7/23/2018
8273	48	/policies/data-driven-decisions/	<p>It doesn't seem like any data was used to produce the 2040 plan.....why start now?</p>	7/23/2018
8274	33	/policies/affordable-housing-production/	<p>It's clear that there isn't enough room in Minneapolis for every family that wants to live here to have their own 5000 square foot lot. Fourplexes are a good start, but 6-10 unit apartment buildings should be allowed on any and every lot in Minneapolis, and bigger buildings in most places.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8275	48	/policies/data-driven-decisions/	Is action step f stating that areas of concentrated poverty would be prioritized or that the priority would be to equally spread it across the City so there is affordable housing everywhere? This statement needs to be clarified.	7/23/2018
8276	33	/policies/affordable-housing-production/	It's clear that there isn't enough room in Minneapolis for every family that wants to live here to have their own 5000 square foot lot. Fourplexes are a good start, but 6-10 unit apartment buildings should be allowed on any and every lot in Minneapolis, and bigger buildings in most places.	7/23/2018
8277	0.1	/topics/land-use-built-form/	I support the idea of allowing up to 4-unit buildings in all areas of the city. While built form would prevent 4-unit buildings in many areas, the flexibility of allowing multi-family housing in all areas of the city would help a lot in providing more affordable housing and making all parts of the city accessible to all. In most parts of the city these duplexes, triplexes, and fourplexes already exist and blend seamlessly into the neighborhood, so much so that neighbors think of them as single family homes. We can increase the density of neighborhoods while preserving their overall form.	7/23/2018
8278	67	/policies/climate-resilient-communities/	The alternative is not cheap starter homes, but cheap homes being torn down and replaced by half million and up mcmansions.	7/23/2018
8279	35	/policies/innovative-housing-types/	This is the existential threat of our time. Thank you for understanding that social connectedness is part of it.	7/23/2018
8280	95	/policies/heritage-preservation-financial-incentive	This is a good start, but more detail should be included here. Cooperative housing and ADU housing and other more non-traditional options should be listed here by name as specific areas of research.	7/23/2018
8281	0.1	/topics/land-use-built-form/	If the city is going to increase regulation of historic zones or properties the city should also increase financial and other assistance to homeowners. The city shouldn't increase the burden of owning and maintaining an historic property by micromanaging home ownership.	7/23/2018
8282	42	/policies/expand-homeownership/	Instead of the Built Form Interior 1 designation as the default, I recommend Interior 2 and 3 as the minimum. This designation is clearly not applied evenly. In certain neighborhoods, it continues a long history of housing restrictions applied to those neighborhoods by redlining and racially restrictive covenants. The City has made its #1 goal reversing disparities created by these types of restrictions. The application of Interior 1 is not in line with these goals. This is especially obvious because neighborhoods east of Hennepin and parts of Seward are very near to city job centers, yet their proposed built form designation doesn't match this need. The pattern also shows up beyond a mere visual inspection of these maps. Thank you.	7/23/2018
8283	16	/policies/environmental-impacts-of-transportation/	Didn't you forget Hmong, Laos and Vietnamese and impoverished white people? What are those statistics?	7/23/2018
8284	41	/policies/tenant-protections/	Collect data on emissions produced in the city	7/23/2018
8285	33	/policies/affordable-housing-production/	This section needs to be stronger. We can't just identify resources around tenant protection. Strong rent control, eviction protection, and tenant rights policies need to be passed by the council. In the meantime, these should be worked into requirements for new buildings. Expand as well and promote tenant rights!	7/23/2018
8286	77	/policies/park-access/	I would find a way to provide more incentives or requirements to make developers create affordable housing.	7/23/2018
8287	51	/policies/healthy-pre-k-development/	I support this 2040 Comp Plan and this policy sections. We should expand access to the parks for all by making streets and parks safer. Another important part of this is by changing who is allowed to live near parks, particularly our regional parks. Many of our regional parks are surrounded by areas of exclusionary zoning and rich white neighborhoods. We need to upzone the neighborhoods near lakes and desirable park amenities to ensure that more people have access to them and to make them more accessible via viable transit options.	7/23/2018
8288	42	/policies/expand-homeownership/	Yes and resources and support for low-income families means not just resources for education, but resources to give parents the money and time they need in order to take advantage of those educational resources for their children.	7/23/2018
8289	65	/policies/urban-agriculture-and-food-production/	Yes to all of this!!	7/23/2018
8290	42	/policies/expand-homeownership/	Community gardens are all well and good, but Minneapolis is a city. Urban agriculture should always be seen as a temporary use, and never block proposals for a higher and better use on a given plot of land.	7/23/2018
8291	17	/policies/complete-streets/	I firmly disagree with an emphasis on home-ownership in Minneapolis. Emphasizing wealth-building for a few homeowners whose rising property values raise the rents of many nearby renters is not an equitable policy.	7/23/2018
			Complete Streets is the only way people will want to live in the center of the city as opposed to in low-density areas.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8292	42	/policies/expand-homeownership/	Provide incentives to local neighborhood hardware stores because they are absolutely necessary to support home-ownership. There are many many skills required to care for a home, and hardware stores within walking distance in neighborhoods -- with trained, helpful, knowledgeable clerks, is essential to assisting home owners care for their properties. The story of the senior Mr. Welna (recently deceased at age 90) provides true inspiration (I do not know the family, I was inspired by the Star Trib obituary and by my decades of relying on local hardware stores in Minneapolis).	7/23/2018
8293	96	/policies/heritage-preservation-recognition/	More markers highlighting our history would be an asset.	7/23/2018
8294	81	/policies/social-connectedness/	Not just "meaningful engagement with underrepresented and vulnerable communities" but engagement between communities. Bring our overrepresented and underrepresented people together.	7/23/2018
8295	20	/policies/transit/	Improve and invest in transit in our city. Frequent service, dedicated bus lanes, and faster service.	7/23/2018
8296	47	/policies/housing-maintenance/	Some sort of property tax break in exchange for maintaining existing housing stock should be explored. It could have a cut-off age like houses 50 years or older to help with the preservation of small older "starter" homes. I also wonder if the City could create a developable rights "bank" like a property owner of a small home that could now be a fourplex could sell those additional units to the City so the property would always stay a single family home and then a developer could buy those credits to do a higher building nearby.	7/23/2018
8297	27	/policies/transportation-partnerships/	Do not instate more impact fees on any new developments!	7/23/2018
8298	18	/policies/walking/	Remember that people like to walk with trees, which also slow vehicles.	7/23/2018
8299	40	/policies/homelessness/	The police also play a major role in working with the homeless. I would utilize their resource to also help them homeless out in different ways.	7/23/2018
8300	20	/policies/transit/	We need to bring streetcars back into the mix. This isn't about commuting--it's about knitting neighborhoods together and "accelerating walking." Nicollet, Central, Lake--there are many streets within Minneapolis that would be great for such a form of transit.	7/23/2018
8301	72	/policies/sustainable-water-system-management/	One water quality aspect that should be addressed is around new builds and wastewater dumping into the public system. There have been numerous examples of builders pumping out water from basements where the water table was not adequately factored in to the construction process, resulting in weeks of untested, untreated water being flooded in to the neighborhood streets and the stormwater system. Builders may pay for a permit to do this dumping, but in cases where the volume is massive, there should also be required testing of the water before being allowed to flood it into the streets, especially in areas that should have tighter restrictions due to being in a watershed district.	7/23/2018
8302	46	/policies/healthy-housing/	For action step e it would be important to gather and react to community input on what types of public spaces are desired.	7/23/2018
8303	43	/policies/housing-displacement/	This is so important. Minneapolis has to get out in front of and actively prevent displacement" once it is identified as happening, it's so hard to turn that boat. Please keep this policy strong. The city had an opportunity to avoid becoming the next San Francisco or Portland, but only if we are proactive and act with urgency in a way that is equitable and shares the solutions (and burdens) across the entire city.	7/23/2018
8304	51	/policies/healthy-pre-k-development/	Continue to focus in these areas and continue throughout school. Set up FREE mentorship programs or volunteers to come in and help students. That was so common years back, now it seems easier to hire more people. If it can't be one on one, small groups. Reading, math homework etc. Tap into this Baby Boom population, we're a lot younger today then our parents were at 65!!	7/23/2018
8305	17	/policies/complete-streets/	Move away from a car focused system with their needs taking priority over other users.	7/23/2018
8306	41	/policies/tenant-protections/	Stronger policies to protect tenants from unjust evictions and fixing rent increases to a percentage of base rent within a fixed period of time (6, 12 months) are needed to preserve an affordable housing market in Minneapolis.	7/23/2018
8307	18	/policies/walking/	This is an important policy. Walking is critical in our city. Construction projects often impede pedestrian access, even ignoring existing laws regarding pedestrian signage and detours. Language around construction projects should be added as an action step for this policy.	7/23/2018
8308	84	/policies/public-safety/	This is very important. We need better police, but we also need alternatives to police, and solutions that reduce the need (and perceived need) for police by improving safety before the police are called.	7/23/2018
8309	45	/policies/leverage-housing-programs-to-benefit-c	Action step c is very important. I think there needs to be more education about how commissions and the public process works.	7/23/2018
8310	18	/policies/walking/	Yes please.	7/23/2018
8311	97	/policies/heritage-preservation-legislative-advoca	Only if you can remove them being used as a tool to block development and change.	7/23/2018
8312	20	/policies/transit/	Embrace bus lanes as a method to speed bus service.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8313	1	/policies/access-to-housing/	We strongly oppose this plan. It has badly missed the mark. This plan that does not take into account the unique differences and circumstances associated with different neighborhoods and constituencies. It is a free-for-all that leaves every resident who has invested in their neighborhood's current character at threat of waking up to a vastly different reality in their small corner of the city. The 2040 Plan is grounded in social goals that people support. But your policies will cause a host of undesirable consequences that we outright reject. This plan must be put aside and reworked. In its place a plan must be developed with strong, localized, community input that recognizes and respects the unique and multi-faceted nature of each neighborhood within our great city. Our neighborhoods should be cherished - not threatened with destruction. Meredith Ross	7/23/2018
8314	50	/policies/access-to-technology/	What about working with hennepin county library to provide more access to technology in the libraries. Or could our park centers also become place where people can access technology. Look at the work studio gang did for Philadelphia to reimagine their civic assets.	7/23/2018
8315	80	/policies/development-near-metro-stations/	Very supportive of this policy. Must ensure that all development occurring around METRO stations adheres to good TOD principles.	7/23/2018
8316	24	/policies/shared-mobility/	The city should prioritize high-efficiency vehicles, hybrids, and electric vehicles with parking. Incentivizing people to utilize high efficiency vehicles through designated parking or other means should be a priority, not just different ownership models for cars.	7/23/2018
8317	46	/policies/healthy-housing/	I'm really interested in how resources will be focused in areas that have been historically underinvested in. Developing a formula like what the Minneapolis parks and rec board is using for parks investments over the next 20 years would be really powerful. Make it clear who is getting resources when and why.	7/23/2018
8318	19	/policies/bicycling/	If we are feeling daring, mandate bike storage like we do car storage with parking minimums. Also, I would like to see if there is a way to promote the addition of bike storage for locations that have reached their existing bike storage capacity. The closest store to me always has their bike rack full, meaning I need to find somewhere else to park my bike before I can go in.	7/23/2018
8319	44	/policies/comprehensive-investments/	This seems like an area of work that neighborhood organizations could be partnered with and encouraged with grants to complete.	7/23/2018
8320	6	/policies/pedestrian-oriented-building-and-site-de	The ideas about transportation do not take into account the needs of senior citizens for whom walking and biking may be impossible. The current availability and safety issues with public transportation are also not appropriate for the needs of seniors with a degree of mobility impairment. Winter conditions are a huge impediment as walking on ice is a major risk factor for serious falls happening to seniors.	7/23/2018
8321	35	/policies/innovative-housing-types/	I strongly support "innovative" housing types such as cooperative housing, 2-4 unit homes, and granny flats. I am glad to see this plan note models from other countries--I hope that this plan will include a study of housing models in some of the countries that our neighbors come from and consulting with diverse residents to learn about their preferences for household size, home features, shared amenities, etc. I would also like to see more innovative options for people who are aging and/or with disabilities--for example, housing that allows seniors to transition from independent living to assisted living to nursing home care without having to move.	7/23/2018
8322	57	/policies/cluster-strategy/	Love the lingo you all use!! Say what it really means vs this doubletalk. I understand what it is and it's ridiculous! But I bet when you actually try to explain it none of it will make any sense to the public.	7/23/2018
8323	1	/policies/access-to-housing/	I like all the actions steps for this policy. I think point C is the most important.	7/23/2018
8324	81	/policies/social-connectedness/	Neighborhood associations need to be held accountable to make sure they are actually representing the neighborhoods, instead of the interests of homeowners who typically make up the boards of neighborhood associations.	7/23/2018
8325	82	/policies/aging/	Very supportive of this policy.	7/23/2018
8326	83	/policies/people-with-disabilities/	Very supportive of this policy.	7/23/2018
8327	1	/policies/access-to-housing/	We strongly oppose this plan. It has badly missed the mark. This plan that does not take into account the unique differences and circumstances associated with different neighborhoods and constituencies. It is a free-for-all that leaves every resident who has invested in their neighborhood's current character at threat of waking up to a vastly different reality in their small corner of the city. The 2040 Plan is grounded in social goals that people support. But your policies will cause a host of undesirable consequences that we outright reject. This plan must be put aside and reworked. In its place a plan must be developed with strong, localized, community input that recognizes and respects the unique and multi-faceted nature of each neighborhood within our great city. Our neighborhoods should be cherished - not threatened with destruction. Kenneth Mark Heithoff	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8328	0.1	/topics/land-use-built-form/	<p>I can't believe you are even talking about this! My parents moved to Minneapolis in 1930 when I was two years old. I lived on Ewing Avenue until I got married to my husband. My husband and I were lucky enough to find a house on Ewing Avenue. We bought it and have lived on Ewing for 64 years and are still lucky enough to be here. We always have said how lucky we are to find a place as wonderful as this neighborhood and have enjoyed many special friendships with my neighbors, my Ewing community for 64 years. It has been a major part of my life. All my friends that have moved to the suburbs have always been so envious of my neighborhood even though my house and houses on my block are much smaller than theirs are.</p> <p>I just celebrated my 90th birthday and I don't want fourplexes or duplexes next to me as my present. I love my house and all my neighbors!</p> <p>Sincerely, Marilynn Krekelberg</p>	7/23/2018
8329	84	/policies/public-safety/	Very supportive of this policy.	7/23/2018
8330	27	/policies/transportation-partnerships/	Find a way to get a pot of money in order to fill in for funding transit improvements when the financing fails at the state or national level.	7/23/2018
8331	1	/policies/access-to-housing/	<p>We strongly oppose this plan. It has badly missed the mark. This plan that does not take into account the unique differences and circumstances associated with different neighborhoods and constituencies. It is a free-for-all that leaves every resident who has invested in their neighborhood's current character at threat of waking up to a vastly different reality in their small corner of the city. The 2040 Plan is grounded in social goals that people support. But your policies will cause a host of undesirable consequences that we outright reject. This plan must be put aside and reworked. In its place a plan must be developed with strong, localized, community input that recognizes and respects the unique and multi-faceted nature of each neighborhood within our great city. Our neighborhoods should be cherished - not threatened with destruction.</p> <p>Nathaniel Ross Heithoff</p>	7/23/2018
8332	1	/policies/access-to-housing/	<p>I strongly disagree with the 2040 plan regarding zoning.</p> <p>We live in a single family home that would be rezoned as part of this plan. We do not want large density housing to replace our house or to be next to our house. If this plan goes through we will leave the city as will many others. All you will be left with is lower income residents. One suggestion is to make only half of the affected roads high density. In the case of 44th St. S. the North side already has high density where as the south side does not.</p>	7/23/2018
8333	85	/policies/access-to-health-social-and-emergency-s	Very supportive of this policy.	7/23/2018
8334	58	/policies/business-districts-and-corridors/	The Minnehaha mile is a great example.	7/23/2018
8335	1	/policies/access-to-housing/	<p>We strongly oppose this plan. It has badly missed the mark. This plan that does not take into account the unique differences and circumstances associated with different neighborhoods and constituencies. It is a free-for-all that leaves every resident who has invested in their neighborhood's current character at threat of waking up to a vastly different reality in their small corner of the city. The 2040 Plan is grounded in social goals that people support. But your policies will cause a host of undesirable consequences that we outright reject. This plan must be put aside and reworked. In its place a plan must be developed with strong, localized, community input that recognizes and respects the unique and multi-faceted nature of each neighborhood within our great city. Our neighborhoods should be cherished - not threatened with destruction.</p> <p>Rowan Heithoff</p>	7/23/2018
8336	2	/policies/access-to-employment/	I think its important to encourage density and growth in areas served by transit, especially the METRO routes, and the High Frequency bus routes.	7/23/2018
8337	47	/policies/housing-maintenance/	Maintaining an older home, particularly one with deferred maintenance, may not result in a sales price to cover the cost of repairs, so may not be something some homeowners would undertake. Deferred maintenance may result in tear-downs as a cheaper alternative to repairs.	7/23/2018
8338	86	/policies/healthy-food-in-institutions/	Very supportive of this policy.	7/23/2018
8339	65	/policies/urban-agriculture-and-food-production/	Community gardens are not a good use of space for a city in a housing crisis. Indoor year round agriculture can be a good way to provide jobs and access to food, but land in Minneapolis is too valuable for farming. Policy should not artificially limit the value of land to keep it as a garden.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8340	1	/policies/access-to-housing/	explore using ADUs, possibly by allowing non-owner occupancy, to fill most of the gap in density by strongly building the woonerf concept. bringing alleys alive. https://www.minnpost.com/politics-policy/2017/04/minneapolis-first-woonerf-really-just-nice-looking-parking-lot http://www.sightline.org/2013/03/15/adus-and-donts/	7/23/2018
8341	1	/policies/access-to-housing/	We strongly oppose this plan. It has badly missed the mark. This plan that does not take into account the unique differences and circumstances associated with different neighborhoods and constituencies. It is a free-for-all that leaves every resident who has invested in their neighborhood's current character at threat of waking up to a vastly different reality in their small corner of the city. The 2040 Plan is grounded in social goals that people support. But your policies will cause a host of undesirable consequences that we outright reject. This plan must be put aside and reworked. In its place a plan must be developed with strong, localized, community input that recognizes and respects the unique and multi-faceted nature of each neighborhood within our great city. Our neighborhoods should be cherished - not threatened with destruction. Finlay Heithoff	7/23/2018
8342	43	/policies/housing-displacement/	I'm not clear on how action step b is going to work with the rezoning implied in the land-use/built-form maps. Maybe there could be a tax break for maintaining buildings or a loan program. There could also be disincentives like a deconstruction ordinance that would help make maintenance the more affordable option for landowners.	7/23/2018
8343	17	/policies/complete-streets/	This is a good policy and already existing City policy. However, walking and biking and public transit really should be central to our city. The City needs to be prioritizing walking and biking and public transit, more than it already does. Space for cars should be decreasing, not increasing. This includes lane widths for cars, number of lanes for cars, and the amount of space dedicated to on-street car parking. Recently the City downgraded the bicycle lanes on Park and Portland leading into Downtown. Despite the Complete Streets policy, travel is much less comfortable and safe for both pedestrians (faster car speeds) and bicyclists (much worse bike lane).	7/23/2018
8344	15	/policies/transportation-and-equity/	Thank you for prioritizing equity in transportation. The time spent in transit, and the accessibility of transit, are huge barriers to many people in our communities. Transportation can be a huge leveling factor, if equity is considered and all modes of transit (not just cars) are enhanced.	7/23/2018
8345	88	/policies/public-services-policy/	Very supportive of this policy.	7/23/2018
8346	47	/policies/housing-maintenance/	Receiving a combined mortgage and rehabilitation loan through our local neighborhood organization in Minneapolis was essential to our ability to purchase and fix-up a duplex in 1992. We still own the property and it is an unending source of pride for us to care for it and we provide affordable high quality housing. Support today's prospective homeowners with well designed and affordable combined mortgage/rehab loans	7/23/2018
8347	89	/policies/technology-in-the-city-enterprise/	Very supportive of this policy.	7/23/2018
8348	16	/policies/environmental-impacts-of-transportation/	Another part of reducing the impact of transportation is reducing the need for it. Creating complete neighborhoods, so people don't have to drive or even bike to run errands. Supporting telecommuting and distributed offices, so people don't need to drive or even bike to work.	7/23/2018
8349	97	/policies/heritage-preservation-legislative-advocacy/	Only if you can remove them being used as a tool to block development and change.	7/23/2018
8350	1	/policies/access-to-housing/	Prioritizing single family housing is exclusionary and divides the population, creating a culture that is fractured in its communication and resentful among sub-communities. Improving access to public transit could eliminate at least one expense from cost-burdened families.	7/23/2018
8351	90	/policies/technology-in-the-economy/	Very supportive of this policy.	7/23/2018
8352	59	/policies/downtown/	Nicollet mall needs to become a premier shopping district. Work to get more flagship stores into this area.	7/23/2018
8353	25	/policies/innovations-in-transportation-and-infrastruc/	Adding more parking in the near future would be an incredible improvement for congestion and people just wondering around the city just trying to find a parking space and when the time comes for autonomous vehicles we will be ready for parking situations	7/23/2018
8354	71	/policies/soil-health/	We need to reduce car dependence and fossil fuel/oil run-off, particularly near waterways, including limiting private vehicle access on parkways. We need up explore penalizing /disincentivizing those who maintain turf lawns with chemical and microbe-killing inputs.	7/23/2018
8355	63	/policies/food-access/	Allow food carts and more food halls.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8356	18	/policies/walking/	As an avid walker, the best thing that has promoted pedestrian safety is timing the walk signs to flash on some seconds before the green light signal comes on. Curb bump outs and other odd constructions are unnecessary and can actually be confusing for all on the streets, including bikers. Please focus efforts for pedestrians on educating bikers about safe, predictable riding and deferring to pedestrians and utilizing crossing light timings that get pedestrians into the crosswalk before bike and auto green lights.	7/23/2018
8357	91	/policies/heritage-preservation-outreach/	We need to make sure heritage preservation is not a tool to be abused by people who are only interested in stopping new development, regardless of the actual historic significance of the building in question.	7/23/2018
8358	95	/policies/heritage-preservation-financial-incentive/	Allowing higher density in all neighborhoods may result in the historic property's neighbors being replaced, thus altering the streetscape and the desirability of the historic property.	7/23/2018
8359	3	/policies/production-and-processing/	I like the stress on smaller format production, such as neighborhood breweries and distilleries.	7/23/2018
8360	20	/policies/transit/	The addition of transit 'amenities', like shelters heating and lights, need to be checked for impartiality. Seek a data driven solution to where more 'amenities' are needed. View enough transit funding as essential to everyday life as funding to maintain roads. Continue to promote talent development for operating the transit system.	7/23/2018
8361	73	/policies/stormwater-management/	don't overbuild and don't pave everything. look at ellicott city, md. what density figures work best for the water shed?	7/23/2018
8362	12	/policies/lighting/	Reduce or stop the wide-deployment daylight-temperature streetlamps. Streetlamps should be below 3500K, particularly in residential areas. Energy savings is important, but light temperature is also a public health issue. This is not appear to be well-considered at this point.	7/23/2018
8363	74	/policies/integration-of-water-management-into-	protect the water shed.	7/23/2018
8364	64	/policies/food-businesses/	Make more farmers market in all neighborhoods. Don't let all the vendors just go to the rich neighborhoods.	7/23/2018
8365	77	/policies/park-access/	Increase accessibility to parks by greatly increasing housing and retail allowed directly adjacent.	7/23/2018
8366	39	/policies/fair-housing/	Beyond preventing fair housing violations, how can we give reparations or otherwise correct past fair housing violations that have resulted in significant wealth disparities? How will fair housing assessments examine implicit bias in the type of housing that is available to residents?	7/23/2018
8367	42	/policies/expand-homeownership/	The push for increased density often seems to implied increased rentals, which works against this policy. I think the City should explore incentives for developers to create condominium associations in their multifamily buildings, especially for the areas with fourplexes. This would counter the concerns about people not taking ownership of the appearance of the property and provide greater community engagement.	7/23/2018
8368	6	/policies/pedestrian-oriented-building-and-site-de-	This is an important policy. Especially important are action steps k, n, and o. For k and n, dedicating land to car parking is not a good strategy for productive land use. For o, drive-throughs and gas stations increase the number of curb cuts and also prioritize car uses over all other uses.	7/23/2018
8369	33	/policies/affordable-housing-production/	Production of affordable housing by the state, as opposed to 'deluxe' housing options by independent contractors, will stem the ugly and destructive tide of gentrification in Minneapolis. This will make for more balanced communities, more in touch with themselves.	7/23/2018
8370	67	/policies/climate-resilient-communities/	A thorough plan should include scientific data regarding the hydrology and geology of the metro and how it is interrelated to other communities and their management of resources. Working communication really just began with an agreement in March of 2017 to share information across different entities including the Minnehaha Creek Watershed, Metropolitan Airports Commission, Park Board etc. Each contributes to the Minneapolis watershed and we are often reminded that many neighborhoods are built on wetlands. Aging infrastructure is adversely affected by fluctuating groundwater levels causing expensive repairs to homeowners. How does the plan address this without a full understanding of water flows? Also, Minnehaha creek is at its max. Where will surface water be drained to after large rain occurrences due to climate change? What responsibility do communities upstream have to find alternatives to current watershed management that is not handling current water levels. We are already seeing large amounts of erosion to creek and lake banks, backups of water into neighborhoods as well as into basements. We are losing trees because of water saturation. How will this be solved and at what cost to taxpayers?	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8371	17	/policies/complete-streets/	Yes, love this complete streets policy! All streets should be accessible to all people. I very much hope that this policy stays strong and the complete streets policy is a requirement for al future projects. Cars have dominated transit funding and decisions for too long. Though I am privileged enough to own a car to use when needed, I want to fee just as safe and have just as many options when I take transit or ride my bike or walk.	7/23/2018
8372	31	/policies/creative-workers/	As an artist with significant racial and other privilege, I'm 100% for this.	7/23/2018
8373	65	/policies/urban-agriculture-and-food-production/	What about working with the park board to identify food production in neighborhood parks? Check out dowling gardens.	7/23/2018
8374	14	/policies/tree-canopy-and-urban-forest/	Where trees and power lines conflict, rather than "butcher" the trees by extreme trimming, consider burying the lines or replanting with more compatible (smaller) trees.	7/23/2018
8375	92	/policies/identify-and-evaluate-historic-resources/	The money and staff time needs to be committed so that historic resources can be identified and then studied to see if they actually do qualify for designation status. Right now, historic resources are identified, but no time is put into actually determining their eligibility for designation until a demolition application comes in, which can unnecessarily delay development projects.	7/23/2018
8376	1	/policies/access-to-housing/	Eliminate rental licenses for Single Family houses. Allow current tenants to stay, until they choose to leave, and then mandate the house be for sale, or owner occupied. This would help open SFHs for purchase.	7/23/2018
8377	75	/policies/waste-reduction/	don't be so picayune about recycling. just take everything. what's the carbon cost to leaving paper tags every time you put a plastic bag in the blue bin. stop it! learn from dc. they take everything and then sort it later. no judgment if you mess up. frankly it's a jobs program. have sorters look for batteries and electronics. just dump it all in. better you sort it than we hide it in the trash, right?	7/23/2018
8378	84	/policies/public-safety/	Better trained officers and support other technique to handle mental health issues/calls. Have officers live in Minneapolis.	7/23/2018
8379	4	/policies/access-to-commercial-goods-and-service/	Is their any way to the city could encourage development of specific commercial uses when the market is not doing so? For example, could the city help fun grocery stores, hardware store, or similar day-to-day requirement commercial establishments in areas where such establishments don't exist?	7/23/2018
8380	19	/policies/bicycling/	This is an important policy. Often construction impedes bicycle facilities, with obstructions in the bike lane, lack of detour, and lack of signage. Also, see the recent Park and Portland bicycle lane downgrade as an example of what not to do. Despite the City's Complete Streets policy the bike lanes are much worse now. Communication of this change was also sorely lacking.	7/23/2018
8381	41	/policies/tenant-protections/	In response to action step b I think this is an area where partnerships with neighborhood organizations could be very beneficial. Iâ€™m not sure what ways there are to reduce evictions and some of these loftier goals. Are there other cities that staff are looking at for a direction in this? Iâ€™m also not sure how all of this could be enforced.	7/23/2018
8382	93	/policies/stewarding-historic-properties/	Good policy for already existing historic landmarks and districts.	7/23/2018
8383	34	/policies/affordable-housing-preservation/	This is incredibly important in protecting lower-income residents who live in communities where they are threatened to be priced out of their neighborhoods by gentrifying entities.	7/23/2018
8384	82	/policies/aging/	I doubt that many of us will want to be part of the changes you are going to make to our city. Why would we stay, the apartments that have been affordable are being snatched up by developers that support Frye's campaign. Look down the list! Oh surprise Doran and Bader are right on the top! All of you are hired by the current administration, now you are the developers puppets. Get your resumes ready because in a couple years we will have honest seasoned candidates to get your boss out of office. And, as many council people that go along with this ludicrous plan! I'm not leaving my families city going back three generations without a fight!	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8385	1 /policies/access-to-housing/		<p>The radical reconfiguration of the land use patterns in Minneapolis to include districts with extremely high densities leveraging moderate density apartments (fourplexes) in virtually all single-family neighborhoods IS A PLAN THAT BENEFITS ONLY DEVELOPERS AND NOT THE RESIDENTS OF MPLS. Those of us that bought houses in single family neighborhoods did so INTENTIONALLY. The plan to change these over to FOURPLEXES will only benefit developers. This will NOT provide increased affordable housing. In addition, it is going to DEVALUE all the single family homes in these areas, which by the way decreases the MPLS tax base, is a HUGE CONCERN that is BASED IN DATA not unproven theories. These neighbors are neighborhoods because of the fact there has been clear delineation of where single family homes go and where high density housing goes. When I bought my house 14 years ago I intentionally bought it in an area surrounded by single family homes, not apartments and fourplexes. It does not seem like a well thought out plan, where the idea of changing the densities of different neighborhoods without any thought or consideration on the impact to the neighbor is COMPLETELY UNACCEPTABLE.</p> <p>Changing the zoning on an UNPROVEN THEORY is ridiculous and seems to be trying to do a superficial fix that doesn't really address the issue. The evidence from every other North American city shows the opposite: that density is associated with less affordability, in part because building bigger and higher costs more per unit. I AM COMPLETELY OUTRAGED THAT MPLS is TESTING OUT A UNPROVEN THEORY THAT IS GOING TO IMPACT THE RESIDENTS IN A SIGNIFANTLY</p> <p>This part of the plan makes me really question the intention of those who are in charge and responsible for writing it. Are you being subsidized and funded by larger developers? Is your campaigns being funded by developers? This plan is not about trying to fix affordable housing in a proven methodology that And, it is even more disturbing that single family home residents were not even asked about their input before this plan was in place.</p> <p>In addition, the other SIGNIFICANT PROBELM with the Minneapolis 2040 plan is it fails to take into account the fact that every critical element of our city's infrastructure is broken or underfunded. Planners refer to the "carrying capacity" of infrastructure. Pick an essential municipal function " parks, public safety, transportation, schools, transit, stormwater management " all challenged, underfunded and in need of improvement.</p> <p>Seriously, what are you people thinkings? Yes, there needs to be more affordable housing in Minneapolis. Can't you take the time to research proven methods? And can't you figure out solutions that leverage the existing zoning areas for high density? Minneapolis is a large city with already tons of high density zoning areas. The problem is those areas are not being leverage properly to create more affordable housing in those existing high density areas. MY REQUEST AS AN ACTIVE VOTING CITIZEN OF MPLS, DO NOT INCREASE THE HIGH DENSITY</p>	7/23/2018
8386	7 /policies/public-realm/		<p>Love his idea" and an important way to showcase neighborhoods and what's important to them, and collaborate with local artists as well!</p>	7/23/2018
8387	1 /policies/access-to-housing/		<p>Abolish the notion of "Existing Neighborhoods".</p> <p>The white man has been pillaging america ever since he arrived.</p> <p>Give this land back to the native people</p>	7/23/2018
8388	76 /policies/new-parks/		<p>is theodore wirth's original vision still in place? I thought everyone in the city got a park within 1/4 mile. stick to that plan and then make sure the parks are great in underserved areas so we can get people moving in and rebuild but NOT DISPLACE! housing security is key!</p>	7/23/2018
8389	6 /policies/pedestrian-oriented-building-and-site-de		<p>I am very happy to see no parking minimums, no new drive throughs, no new gas stations, and requirements that buildings be oriented to the sidewalk. These are really important!</p>	7/23/2018
8390	21 /policies/freight/		<p>The production of high power charging stations at some delivery points is essential to the electrification of freight. Consult with businesses about what they need from the city to enable electrification.</p> <p>Work with electricity providers to ensure both the electrical and economic systems are prepared to support transportation levels of energy.</p>	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8391	0.1	/topics/land-use-built-form/	While I appreciate the steps towards liberalizing land use shown in these maps, I think further changes should be made to undo the effects of past exclusionary and racially discriminatory policy. To the extent that we determine future zoning based on the status-quo zoning, we are (more or less) perpetuating a history of land use and housing policy that were used to keep people out of certain neighborhoods. I think small-scale apartment buildings should allowed throughout more of the city where past policy has kept neighborhoods unaffordable and segregated. (for example, in much of Southwest)	7/23/2018
8392	91	/policies/heritage-preservation-outreach/	Any designation of lhistoric value should require a minimum # of hours per week of public access to the site, to make sure the designation is for the public, not a form of locking in exclusionary housing forms	7/23/2018
8393	0.1	/topics/land-use-built-form/	I'm concerned about height, aesthetics and density allowed for new buildings on University Ave. between Malcolm and Bedford, which impacts the historic core of the Prospect Park neighborhood. I'm also concerned that building 4- plexes and new multiple unit dwellings on residential lots throughout the Prospect Park neighborhood will erode the character of the neighborhood, while benefitting developers and landlords.	7/23/2018
8394	53	/policies/quality-of-life/	You know what would make the quality of life better paying people a living wage and building enough homes so they can afford to live and stay in the city.	7/23/2018
8395	10	/policies/street-grid/	Not sure where to put this comment. So here it is. Please limit the amount of density along major thoroughfares. Hennepin, Glendale, Central, Lyndale, Nicolett, Broadway. Too much density will make it very challenging for people to get around, busses, emergency vehicles and cars alike. All of which will make it less safe for pedestrians.	7/23/2018
8396	80	/policies/development-near-metro-stations/	I support all of this! Please do it!	7/23/2018
8397	19	/policies/bicycling/	Where are protected bikeways and greenways? This is a big oversight. This section needs to focus on serving people interested in biking, but worried about safety.	7/23/2018
8398	84	/policies/public-safety/	Incentivize or require police officers to live in the city. They cannot protect and serve this community if they see its citizens as 'The Other'.	7/23/2018
8399	35	/policies/innovative-housing-types/	In addition to preserving equality and diversity in our communities (by thwarting gentrification), this one just sounds exciting. There are some new creative housing options that are just really super neat.	7/23/2018
8400	94	/policies/heritage-preservation-regulation/	Supportive of action step D. Right now, our current ordinance regarding the demolition of historic resources is too complicated and unnecessarily delays development for historic resources that are ultimately determined not to be eligible for designation.	7/23/2018
8401	6	/policies/pedestrian-oriented-building-and-site-de	Point K is very important to me. Please do it!	7/23/2018
8402	84	/policies/public-safety/	Police are asked to do too much, many "public safety" issues are better handled by a well resourced social worker than a police officer. Even police officers are needed to deal with actual violence or immediately imminent violence, the causes of that violence most likely need someone like a social worker to get to the bottom of and help people grow and develop the skills needed to avoid these confrontations.	7/23/2018
8403	95	/policies/heritage-preservation-financial-incentive	I shouldn't be afraid of calling the police for fear that the people I'm trying to help will actually be harmed by actions of police officers	7/23/2018
8404	96	/policies/heritage-preservation-recognition/	Supportive of this policy.	7/23/2018
8405	19	/policies/bicycling/	Supportive of this policy.	7/23/2018
			The bicycle lanes have been overbuilt in some areas and poorly considered in some aspects (e.g., having bicycle boulevards on bus routes). One-way streets, created years ago to improve traffic flow, have been reduced too often to one-lane to accommodate bike lanes and large buffer areas. This is frustrating and makes navigating the city overly difficult. The design of bike lanes should follow actual traffic patterns and usage, not the "if you build it they will come" philosophy, which is wasteful of public dollars and inefficient in helping the city be a navigable and welcoming place to all.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8406	97	/policies/heritage-preservation-legislative-advoca	<p>Technical assistance and design guidelines can help a property owner make sympathetic additions to a building or restore or renovate the property, such as with energy retrofits.</p> <p>Funding is always an issue.</p> <p>Contractors may need training to do some work.</p> <p>The Minnesota Historical Society had a list of contractors I found useful when seeking contractors who could do desired repairs/restorations. Many property owners may not know where to find resources.</p>	7/23/2018
8407	0.1	/topics/land-use-built-form/	<p>*****</p> <p>COMMENT: Putting up to four dwelling units on a traditional size city lot in a residential area, is a RADICAL, unnecessarily dense and impractical proposal. When combined with other proposals to reduce of the number of required off-street parking spaces, developers are likely to build as many units as possible on small city lots with as little off-street parking as possible. City planners need to try driving in the uptown area, especially during the winter with a lot of snow on the ground. Current residents often have to park 3-4 blocks away from their apartment or home if they don't have off-street parking. Why would we want to create those conditions in many more areas across the entire city?</p> <p>Why would the city consider giving developers such a huge blank check to fit in multi-unit structures wherever they please, anywhere in the city? The city can make fairly minor changes to current zoning regulation maps in the areas closest to downtown and near downtown, and near major transportation routes and still achieve the necessary increase in dwelling units needed in future years.</p> <p>A lot of housing is already being built in the city, but these new radical 2040 proposals go way, way beyond and reasonable changes to inc toThe city needs to focus on facts, not theory in producing additional housing units in the city.The city does not need to make such radical density proposals to To city council members and city staff and fellow city residents:</p> <p>I agree with many of my neighbors and those who follow city and neighborhood issues closely:</p> <p>The Met Council is not asking for the kind of massive, quickly implemented goals and physical changes being proposed by an elite, top-down visible and invisible force that's pushing and rushing 2040 toward approval before city residents are fully informed and can discuss and debate alternative approaches.</p> <p>The Met Council planning process does not require the City to throw our hard-won, healthy, award-winning "city-baby" out with the bath water! We can refresh the bath water by fine tuning the carefully developed processes we already have!</p> <p>Where's the city's and the developer's evidence that 2040 will actually increase affordable housing? Has any major city ever done this kind of massive up-zoning across their entire city and what were the measurable results, other than happy developers?</p>	7/23/2018
8408	73	/policies/stormwater-management/	We need to design for winter and for a changing climate, particularly sidewalks which currently do not drain	7/23/2018
8409	97	/policies/heritage-preservation-legislative-advoca	Supportive of this policy.	7/23/2018
8410	18	/policies/walking/	We need lower speed limits and slower speeds throughout the city. We need stop lights that don't leave people walking as an after thought. We need freeway entrances and exits that are death traps for people walking. Please add these in the next draft.	7/23/2018
8411	1	/policies/access-to-housing/	Lower the height in all the areas that are higher than 2.5 stories. You don't have to limit everything to 2.5, but all the other categories need to come down, from 4 to 3, from 6 to 5, from 10 to 8, from 15 to 13, etc. you get the idea. This level of density could be the ruination of our fare city.	7/23/2018
8412	40	/policies/homelessness/	More support for transitional and supportive housing options--I'm concerned about the supportive housing facilities that have been threatened with closure recently due to lack of funds.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8413	24	/policies/shared-mobility/	I think by adding for public use automobiles similar to the "nice ride" bicycles would eliminate the use of parking garages and facilities and would easily allow people to not own a vehicle and just use one or both of the city owned services to get too and from work and errands every day	7/23/2018
8414	7	/policies/public-realm/	Please remember to include low sensory places in public areas for people who struggle with sensory overload ex. people with ADHD, People on the Autism Spectrum. etc	7/23/2018
8415	36	/policies/innovative-housing-strategies/	This presents an opportunity to develop the city in beautiful new ways. It could both preserve the identities of neighborhoods (by stemming gentrification and pricing-out), and expand on their identities as well (as the landscape physically changes and new architecture is created).	7/23/2018
8416	0.1	/topics/land-use-built-form/	I'd like to express my concern for allowing buildings with up to 4-unit dwellings in Interior 1 and 2 Built Form areas. I'm not an economist, but it seems like this policy would encourage developers to purchase our City's smallest, least expensive homes, and turn them into less affordable apartment and condo units. Perhaps if the goal is higher density, 4-unit dwellings should only be allowed to replace buildings of equal or greater size/square footage, i.e. allow the removal of some of the City's larger single-family homes in order to build 4-unit dwellings. Neighborhoods with these larger homes could more easily accommodate larger 4-unit dwellings without interrupting the character of the neighborhood.	7/23/2018
8417	61	/policies/environmental-justice/	Highly support this policy. It would be great to get more specific with some pieces of implementation like have an environmental justice screening tool used for new developments (related to point d) to ensure that the impact is considered ahead of time.	7/23/2018
8418	63	/policies/food-access/	This is a good idea.	7/23/2018
8419	9	/policies/open-spaces-in-new-development/	This is a great idea!	7/23/2018
8420	77	/policies/park-access/	actually your main problem is making the park bike/walk trails safer. you need to use "shared spaces" model where rather than putting people on segregated purpose trails you make the trails wider and make the rule that we all share. and teach people how to pass on their bikes. you inform and slow down as needed. stop with all the rules separating this from that. same on the roads. lower speed limit and remove bike lines!	7/23/2018
8421	65	/policies/urban-agriculture-and-food-production/	Policy 65 conflicts with the overall nature of the city. The future of the city depends on increasing density. Setting aside space for farming runs counter to that.	7/23/2018
8422	28	/policies/msp-airport/	Consider what will happen next if MSP reaches full capacity and needs expansion to serve increasing demand.	7/23/2018
8423	1	/policies/access-to-housing/	Action Step C: Change "Allow" to "Mandate". If we don't mandate Multi-family construction on transit routes, and still allow Single Family Homes to be built so close to a tremendous asset that is Public Transit, It creates a clear contradiction of policy, the Minneapolis has been working on for decades.	7/23/2018
8424	40	/policies/homelessness/	This policy and action steps do not do justice to the importance of this issue. These steps don't give real solutions to the problem which needs to be addressed through new innovative ideas instead of just solidifying the existing infrastructure which isn't working for people. Support of shelters should come with requirements to do more than feed and house people, there should be a requirement to take the time to build connections with people and come up with individualized solutions. Perhaps one action step could be develop a framework for supporting individual paths out of homelessness. This policy also barely touches on the issue of homeless youth who might be with a parent or on their own.	7/23/2018
8425	67	/policies/climate-resilient-communities/	Neighborhood organizations should be included in helping with a. and b.	7/23/2018
8426	17	/policies/complete-streets/	Complete Streets requires we phase out cars as a major or common form of transportation	7/23/2018
8427	0.1	/topics/land-use-built-form/	I fully support the inclusion of duplexes, triplexes, and fourplexes in Interior 1. Minneapolis is at a critical moment for housing affordability for the coming decades. Spreading a baseline of density increase throughout the neighborhoods of the city ensures that growth impacts will be dispersed, and that the greatest increases in density can be concentrated along transit corridors. I think it would be worthwhile to allow rowhouses in this built form district as well. It is crucial that housing supply meets growing demand, and that Minneapolis can allow the gradual changes needed to adapt to the future based on rational analysis.	7/23/2018
8428	81	/policies/social-connectedness/	Highly support all of these goals!	7/23/2018
8429	69	/policies/renewable-and-carbon-free-energy/	Necessary. We can't afford, as a species, to keep using carbon-based energy.	7/23/2018
8430	0.1	/topics/land-use-built-form/	I strongly support the fourplex proposal. Greater density is needed to lower housing costs and support mass transit. However, I don't think it goes far enough. 8 or 10 unit buildings add more housing with minimal neighborhood impact.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8431	11	/policies/skyways/	Please add greenery to the skyways. It would be wonderful to great something like the Hanging Gardens of Babylon in our skyway system. Also, please increase the number, and visibility, of street-skyway connection points.	7/23/2018
8432	37	/policies/mixed-income-housing/	The idea of mixed income housing is incredibly exciting and important in subtle ways. Instead of isolating our population based on wealth, people of different incomes will be neighbors, creating a greater sense of empathy and fostering a stronger community.	7/23/2018
8433	1	/policies/access-to-housing/	We need more housing allowed, especially in historically redlines areas.	7/23/2018
8434	26	/policies/vision-zero/	Recognize that vehicle users may want to use their vehicle less if they felt safe outside of it.	7/23/2018
8435	53	/policies/quality-of-life/	Rein in the police, such that citizens of color can interact with them without fear of getting murdered.	7/23/2018
8436	72	/policies/sustainable-water-system-management/	High quality municipal drinking water is one of the most important things the city can do to promote equity. We can see what happens when the drinking water system fails in a place like Flint, we can't let that happen to us (and I don't think it will, but we should always be aware of how important water is) Minneapolis tap water is some of the best in the country, and incredibly safe. Many newcomers to this country may come from places where the water is not safe to drink and are used to buying bottled water. The city should do its best to educate the population about our high quality drinking water.	7/23/2018
8437	1	/policies/access-to-housing/	Allow 8+ units all over, especially around lakes/parks	7/23/2018
8438	38	/policies/affordable-housing-near-transit-and-job-	Eliminating the need for a vehicle (and all the attached expenses) could help move families out of a cost-burdened position, and break generations-long poverty cycles.	7/23/2018
8439	78	/policies/park-design-and-programming/	Equity is important, but not not every park decision should be about "equity", especially as the city and park board seem to define it. While North Minneapolis has historically been neglected, the parks there currently receive a lot of funding. Parks in the rest of the city should be funded at adequate levels too.	7/23/2018
8440	17	/policies/complete-streets/	I support prioritizing walking, biking, and transit. I do think the policies offered here fall short of doing that though and I think we need more aggressive policies to support these modes after decades of only investing in cars.	7/23/2018
8441	38	/policies/affordable-housing-near-transit-and-job-	Identify parts of regulations that can be safely relaxed in exchange for affordable units. I'm thinking parking minimums, height limits, maybe design requirements.	7/23/2018
8442	26	/policies/vision-zero/	Vision Zero should not include enforcement of any kind. Police are literally killing people of color, especially black men. If one of the Draft Plan goals is to reduce racial disparities, then you should not have police be involved with Vision Zero. Vision Zero was developed in Sweden and has 3 components: engineering, education, and enforcement. In Sweden the police force very rarely use their firearms and hardly ever kill people. In the U.S. the police kill people every week. This is an article about this issue: https://www.citylab.com/transportation/2016/09/black-lives-matter-and-vision-zero/497495/	7/23/2018
8443	1	/policies/access-to-housing/	Townhomes and rowhouses should also be in the mix for some neighborhoods. This includes multi-family units.	7/23/2018
8444	1	/policies/access-to-housing/	Do not up-zone the city in a one-size-fits-all manner. The current zoning is flexible enough to allow for appropriate development, including along major transit. Allowing -- and incentivizing -- developers to tear down single family homes gives no advantage to the citizens of our city. Increased density does not equal lower housing costs. Rather tearing down modestly priced homes increases housing costs and makes it harder for first-time buyers to find a home to buy. The city should place sensible constraints on developers in order to serve the needs of the residents of the city.	7/23/2018
8445	66	/policies/air-quality/	The city should consider incentivizing use of cars that are high efficiency, hybrids, and electric plug in vehicles to improve air quality. Designated parking for these vehicles, as is currently available at some retail outlets, would be one concrete step that can be easily implemented now.	7/23/2018
8446	6	/policies/pedestrian-oriented-building-and-site-de	I strongly support eliminating parking minimums city-wide. Far too much land in the city is dedicated to auto storage and it is costly for renters.	7/23/2018
8447	80	/policies/development-near-metro-stations/	YES. Cars are the worst and I just want less traffic.	7/23/2018
8448	91	/policies/heritage-preservation-outreach/	What a joke!! Look at what you want to do all in the name of high density!! Preserving? The building that gets torn down might not be the best or an easy build on a parking lot. It's the surrounding area of homes and businesses that you don't care about. Go to 50th and Bryant, it's a thriving little corner with stores, restaurants and walkable. Great homes and some are duplexes with a lot of character, it works!! Don't fix it because you'll screw it up! How many of you grew up here? How many live in Minneapolis? How many homeowners? What is the average age of your team? Think about the people you work for, the citizens of Minneapolis versus trying to make a mark for yourself!	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8449	20	/policies/transit/	Set specific desired transit investments in the 2040 plan, so there's a base from which to advocate with the county, Met Council, and state. Midtown Greenway LRT is an obvious first step.	7/23/2018
8450	14	/policies/tree-canopy-and-urban-forest/	Please increase the downtown urban canopy. There are areas with zero trees on it. Ex, S 5th Street	7/23/2018
8451	28	/policies/msp-airport/	I'd like to see fees for airlines that are unwilling to switch to quieter technology. I think there should also be higher limits for how close to the ground the planes can be over Minneapolis when landing or taking off. I understand it is a complicated issue, but they are sometimes so close to the ground over South Minneapolis that it shakes everything in my house.	7/23/2018
8452	20	/policies/transit/	The City should invest in improving transit. We pay for roads, why not transit? We should also do more to provide transit advantages. And build out the arterial bus rapid transit network now!	7/23/2018
8453	19	/policies/bicycling/	we should use the "shared spaces" model europe uses and put people on par with cars on par with bikes. lower speed limit to 20 mph on most roads, get rid of most stop signs, use roundabouts and traffic circles, get rid of bicycle lane signage except for a few protected bicycle highways. this includes bicycle lanes in parks!!!! widen those park lanes and allow people and bikes and remind everyone that it's shared spaces.	7/23/2018
8454	22	/policies/downtown-transportation/	Point d is major. Please do it	7/23/2018
8455	20	/policies/transit/	By 2040, Minneapolis should be planning, if not already building, a north-south and east-west transit tunnel through downtown.	7/23/2018
8456	83	/policies/people-with-disabilities/	We need to allow higher density housing everywhere to make wheelchair accessibility more common and reduce disparities	7/23/2018
8457	40	/policies/homelessness/	The solution to homelessness is providing home, this policy has a good soul.	7/23/2018
8458	38	/policies/affordable-housing-near-transit-and-job	I think all the points are great!	7/23/2018
8459	81	/policies/social-connectedness/	Writing this here since I'm not sure where else to put it"how is this plan going to address how policing impacts communities? Feeling safe on the streets is critical for public health and social connectedness. Having a nonpolice response unit for certain neighborhood issues, like mental health needs, would be a critical way to enhance this policy. Having community oversight in policing would also be important for this policy and overall goal. Development planning without considering the police context is incomplete. I know this plan does not have any control over police policies, but finding ways to tie these goals and comp plan policies for the need for more community oriented policing is an important opportunity.	7/23/2018
8460	42	/policies/expand-homeownership/	Support multi-unit cooperative housing, granny flats, etc. that would allow people to build equity with a smaller investment. I am seeing a lot of single-family homes and duplexes being purchased as rental property investments rather than owner-occupied homes. Is there a way to establish preference for buyers who intend to live in homes vs. rent out? (Particularly when many of the people buying for investments are white and out-bidding people of color who have had less access to homeownership) Expand number of land trust properties to control increases in housing costs--I would be interested in investing in a city land trust to keep housing costs affordable.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8461	1	/policies/access-to-housing/	<p>Presently Minneapolis offers a diverse style of neighborhoods. Eliminating single family dwelling neighborhoods will have significant negative impact to the city. Single family rentals will likely be the first to be changed into multi-family units. The affordable "starter homes" that we have in our area will likely be bought and converted. The most desirable single family areas will bring the best rents to investors. It could happen faster than people think in certain neighborhoods.</p> <p>Will these units produce affordable rentals? That is at the prices needed to meet the need? Not likely. They will be listed at what the "market will bear". Investors need to make a profit. Unsubsidized, only excess availability will move the price down. Now price can go down with a decrease in desirability. And that may occur in a more accelerated manner than expected as Single-Family dwelling buyers will look outside of Minneapolis to put their housing investment. Knowing how difficult it is to reverse zoning laws, buyers would be prudently shy about buying into Mpls. Renters don't share this risk. Mpls could quickly become a "Rental City". The current level of rental in my zone surprised me when I learned of it.</p> <p>We recently had the opportunity to learn about how a multi-unit occupancy looks with regard to on street parking over a 2 year period when a home owner rented his dwelling to someone who rented out the rooms and basement. 5 to 7 extra cars on our relatively narrow street definitely changed the look/feel and function of our neighborhood. There were so many undesirable aspects to the experience we wondered why we put with it so long. Not having a rental license and claiming homestead status the owner (nice folks otherwise -who moved on to a better neighborhood) finally sold the house to a nice couple with their first child. Looks like a good starter home experience like we had in the 80's when we moved here. Both they and their next door neighbors are doing serious landscaping investments. Not something we usually see with rental property houses in our neighborhood.</p> <p>Please take the neighborhood look/feel character aspect of people's comments seriously. Do not eliminate the diverse range of neighborhood offerings in Minneapolis as you address the affordable housing issue that of course needs to be addressed. Keep Single Family (R1) zoning where it makes sense in Minneapolis.</p>	7/23/2018
8462	26	/policies/vision-zero/	I'd like to see more action steps surrounding the assessment of intersections, which feel like the area of greatest concern.	7/23/2018
8463	10	/policies/street-grid/	This policy needs to accommodate street to greenway conversions like the Northside Greenway idea. Greenways should exist in many parts of the city in a place where walking and biking are prioritized.	7/23/2018
8464	82	/policies/aging/	We need commercial everywhere by right, to encourage walkability for slowing seniors	7/23/2018
8465	45	/policies/leverage-housing-programs-to-benefit-c	inclusionary housing isn't enough. we need social housing. minneapolis needs to issue bonds and start building and getting its people housed! also, convert existing commercial vacancies to mixed use and let people live in commercial centers. walkability! housing security!	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8466	1	/policies/access-to-housing/	<p>Presently Minneapolis offers a diverse style of neighborhoods. Eliminating single family dwelling neighborhoods will have significant negative impact to the city. Single family rentals will likely be the first to be changed into multi-family units. The affordable "starter homes" that we have in our area will likely be bought and converted. The most desirable single family areas will bring the best rents to investors. Do not eliminate the diverse range of neighborhood offerings in Minneapolis as you address the affordable housing issue that of course needs to be addressed. Keep Single Family (R1) zoning where it makes sense in Minneapolis.</p>	7/23/2018
8467	26	/policies/vision-zero/	I support Vision Zero. Let's also focus on design and education, not enforcement	7/23/2018
8468	52	/policies/human-capital-and-a-trained-workforce/	Recognize that college education is not appropriate for everyone and emphasize alternative education paths, such as apprenticeships. Convey this message to schools.	7/23/2018
8469	41	/policies/tenant-protections/	Protecting low-income/cost-burdened tenants and holding property managers accountable is a no-brainer, do this one for sure.	7/23/2018
8470	1	/policies/access-to-housing/	The plan does not adequately maintain the character of the residential street. Narrow streets, such as Bryant Ave. south of 38th street should NOT have additional density beyond the brick 4-plex and 6-plex that are on Larger-than-single family home lots. Nothing larger than the current buildings south of 38th street should be allowed, and NO larger higher density on Aldrich, where the houses are already very close together and ADU's provide enough options already for limited increases in density.	7/23/2018
8471	23	/policies/coordinated-development-strategy/	I support the Mpls 2040 Plan in its entirety!	7/23/2018
8472	47	/policies/housing-maintenance/	ADUs over teardowns to make duplexes!!!!	7/23/2018
8473	42	/policies/expand-homeownership/	Yes this will break poverty cycles that have lasted generations.	7/23/2018
8474	1	/policies/access-to-housing/	More housing in both neighborhood interiors and corridors. Fourplexes at a minimum or more (6,8,10).	7/23/2018
8475	84	/policies/public-safety/	This policy needs more specifics. What does build trust with first responders mean? How can communities support their own public safety and have non police options for things like mental health issues?	7/23/2018
8476	1	/policies/access-to-housing/	Building fourplexes on 40 x 160 ft. lots is too much density! Unacceptable!	7/23/2018
8477	96	/policies/heritage-preservation-recognition/	I'd be happy to teach a class on Minneapolis History to the Commission, Mayor and Council. There are a number of us that have been active in educating people about our city. Reach out to people via the Heritage Preservation, I will contact them directly.	7/23/2018
8478	1	/policies/access-to-housing/	Magical thinking in the name of development. That's what I see.	7/23/2018
8479	1	/policies/access-to-housing/	More housing everywhere. Abolish ALL Zoning	7/23/2018
8480	48	/policies/data-driven-decisions/	release data in searchable way on property transactions including corporate purchasers and make data aggregable!	7/23/2018
8481	43	/policies/housing-displacement/	Gentrification obliterates communication and breeds ugly resentment. It only benefits those who need no benefits.	7/23/2018
8482	75	/policies/waste-reduction/	Work to support zero waste efforts, including eliminating car dependency	7/23/2018
8483	14	/policies/tree-canopy-and-urban-forest/	What if developers doing new construction had to determine how many trees could fit on a site based on a healthy tree canopy, they could then either plant those trees or pay the City for them into a fund that went to plant the trees elsewhere in the City. It would need to be something rigorous if we really want to maximize our tree canopy.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8484	63	/policies/food-access/	This is important! But Food Justice is not just about identifying and mitigating food deserts. How can neighborhoods be supported in their own food sovereignty? How can we support more community gardens, or provide funding or starter packs for people to turn parts of their front lawns into edible landscapes?	7/23/2018
8485	1	/policies/access-to-housing/	Transit is Transit. Frequency can easily be adjusted. Housing, however, takes a lot more time to build, and furnish, and occupy. Allow 3-story 80% lot coverage everywhere.	7/23/2018
8486	97	/policies/heritage-preservation-legislative-advoca	Our community is very interested in this and would like more information on the process of making our neighborhood a historic site. We have American Native Burial Grounds but nothing has ever been done. Who do you contact?	7/23/2018
8487	1	/policies/access-to-housing/	Build highrises by Lake of the isles.	7/23/2018
8488	43	/policies/housing-displacement/	This is one of my top concerns for both residential and commercial properties. (For example, on Nicollet Ave., I've noticed a turnover in immigrant-owned businesses closing and being replaced by upscale, white-owned businesses. We're also seeing a lot of long-term renters who are people of color being displaced due to rising rent costs.) In addition to prioritizing affordable housing in redevelopment, prioritize development that meets the cultural needs of the communities at risk of being displaced. (For example, I read about efforts in the Rondo area of St. Paul to build residential and commercial buildings that fit the needs of African American residents and business owners.)	7/23/2018
8489	18	/policies/walking/	Consider snow placement/removal when siting street crossing buttons mounted on stop light poles. Put street crossing buttons on paved area for street crossing so persons can access the street crossing button easily, especially if using a wheelchair or walker.	7/23/2018
8490	60	/policies/intrinsic-value-of-properties/	Grain elevators should be considered for this--let's find ways to reuse them. The slow disappearance of them from our skyline is a tragedy.	7/23/2018
8491	19	/policies/bicycling/	Bike lanes have been overbuilt and are underused, while dedicated bike paths and the Greenway have been tremendous successes. Keep the focus on maintaining those assets rather than harvesting multiple traffic lanes on one-way streets for overbuilt bike lanes that confuse riders and drivers alike (26th St. So. is a prime example of poor design for all).	7/23/2018
8492	5	/policies/visual-quality-of-new-development/	This is of low importance to me, and I have already seen this become a stumbling block in community members for neighbors who oppose new development to nitpick on superficial design elements.	7/23/2018
8493	20	/policies/transit/	Enforce Hennepin downtown lane for bus, bike, and right turn at the next intersection. Many private vehicle/taxi drivers do not turn right and do not allow bicyclists to have adequate space. Terrifying. I've been almost hit numerable times in a few blocks.	7/23/2018
8494	88	/policies/public-services-policy/	These are laudable action steps but without more details it is hard to envision how they will really lead to excellence in city services.	7/23/2018
8495	2	/policies/access-to-employment/	These are great goals for people who live and work in Minneapolis, but we need to recognize that a lot of people who live in Minneapolis work outside of the city. I know from my work in employment services that transportation to suburban work sites is a huge barrier to employment for low-income individuals. We should encourage more employer-sponsored busing/van pools to help employers meet workforce needs and employees have stable transportation to and from work.	7/23/2018
8496	19	/policies/bicycling/	As a commuter bicyclist, carless senior, I appreciate the bicycle infrastructure. Unfortunately, many vehicle drivers and some bicyclists do not know or follow the rules, resulting in unsafe situations. I do appreciate and use the Midtown Greenway and other off-road options, dedicated lanes, and shared areas, though I am afraid to use off-road areas much after dusk or before dawn due to reports of assault or being personally assaulted.	7/23/2018
8497	14	/policies/tree-canopy-and-urban-forest/	Adding to the urban tree canopy can have broad impact on a number of key policies, from improved air quality and visual appeal to lower cooling expenditures for homes and businesses. One need that is not currently being met in this area is adequate inspectors and crews to identify and remove diseased trees so they do not spread to healthy trees. This has been a problem with both Dutch Elm and Emerald Ash infested trees. Staffing the urban forestry team adequately and better managing responses to diseased trees and planting of new ones will have far-reaching beneficial effects.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8498	84	/policies/public-safety/	I am highly concerned about the actions of the Minneapolis Police Department and current proposals to increase the police force, which I believe run counter to this plan's goal of expanding the use of non-enforcement strategies. I would like to see funding from law enforcement redirected to public health and community-driven public safety initiatives that focus on violence prevention and restorative justice. I especially want people in mental health crisis to be able to get crisis intervention from qualified mental health professionals rather than expecting law enforcement to act outside their area of expertise. All public safety initiatives must be trauma-informed.	7/23/2018
8499	65	/policies/urban-agriculture-and-food-production/	Continue the City's policy of not collaborating with ICE to ensure safety for undocumented immigrants.	7/23/2018
8500	49	/policies/educational-and-economic-access/	Illustrate urban agriculture with images of locally-grown food, rather than citrus, pineapples, and bananas. Promote multiple career pathways for high school students, including vocational training and apprenticeships. Support career pathways for people with limited English skills.	7/23/2018
8501	65	/policies/urban-agriculture-and-food-production/	Enact/enforce regulations for temp employment to avoid taking advantage of workers.	7/23/2018
8502	81	/policies/social-connectedness/	Add language to promote pollinators. For example, pesticide-free areas, native plants, and types of flowering plants pollinators can use (some flowers do not permit pollinator access).	7/23/2018
8503	69	/policies/renewable-and-carbon-free-energy/	Support culturally-specific events and spaces Ensure community events are accessible to people with disabilities and language barriers Support community outreach efforts that address social isolation/reach people less likely to come out of their homes or attend public events Continue funding for neighborhood associations	7/23/2018
8504	65	/policies/urban-agriculture-and-food-production/	I disagree with action step g. Protect solar access. Property owners should not be able to prevent development of adjacent properties. If this was allowed, people who could afford to would put solar panels on their roof to ensure that the adjacent properties didn't build higher them. This goal could also be used to justify cutting down (or not planting) large trees which would have a net negative environmental effect. Solar energy is a great alternative energy source, but it is more efficient in large solar farms than small quantities of panels on individual buildings, which in Minneapolis are typically somewhat shaded anyway.	7/23/2018
8505	75	/policies/waste-reduction/	Continue to plant edible landscaping, such as June/Serviceberry, nut trees.	7/23/2018
8506	18	/policies/walking/	I haven't been able to find one, so I would like to see support for stores (especially grocery stores) that prioritize zero waste. Eg. selling ugly food, selling primarily bulk items	7/23/2018
8507	18	/policies/walking/	Do we want both sides of all residential and commercial streets to have sidewalks? For example, some residential areas in the city do not have sidewalks. Some sidewalks are wide enough, though the placement of a utility or other pole may make the sidewalk space too narrow for someone in a wheelchair.	7/23/2018
8508	85	/policies/access-to-health-social-and-emergency-s	Support culturally-based ways of healing outside of clinical settings Support culturally-specific social services and health organizations	7/23/2018
8509	48	/policies/data-driven-decisions/	Expand home visits by CHWs	7/23/2018
8510	18	/policies/walking/	The city needs to collect lots of good data, then connect it to a professional data scientist. Also, we need to know the security of this data is good.	7/23/2018
8511	63	/policies/food-access/	Consider adding more places to sit down, whether a bench or planter edge, so persons with limited endurance may sit down during a walk.	7/23/2018
			Support culturally-specific grocers that reflect the diversity of the neighborhood	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8512	26	/policies/vision-zero/	Work to change state laws so using a cell phone while driving is an offense. As a commuter bicyclist, the number of near misses I have had have made me even more cautious when entering an intersection, changing lanes, turning, etc. As a pedestrian, I have had to wait for distracted motorists using a cell phone to turn so as not to be hit while entering a marked crosswalk with a walk sign.	7/23/2018
8513	14	/policies/tree-canopy-and-urban-forest/	We need more tree coverage.	7/23/2018
8514	18	/policies/walking/	<p>Enforce no bicycling, skateboarding, scooter on special services area, such as in designated areas in Uptown.</p> <p>Repaint "No bicycling on sidewalk" in Uptown designated area.</p> <p>Paint "No bicycling on sidewalk" by Nice Ride stations in Uptown and other designated areas. Add "No bicycling on sidewalk" areas to Nice Ride map at Nice Ride stations.</p> <p>Republicize and enforce the no branches encroaching on sidewalk on sides and lower than seven feet. I saw a man with limited or no vision using a cane to find the sidewalk walk into an evergreen branch at eye level and become disoriented by the encounter.</p> <p>Widen distance between curb and sidewalk so tree roots less likely to displace sidewalk.</p>	7/23/2018
8515	18	/policies/walking/	<p>Publicize and enforce where vehicle drivers are to stop before a marked crosswalk.</p> <p>Ensure crosswalks have white line for vehicle to stop in front of the marked crosswalk. Some drivers have stopped past the crosswalk, causing pedestrians to walk into the cross traffic lane to cross the street.</p>	7/23/2018
8516	82	/policies/aging/	For work, consider full-time, part-time, seasonal, and contingent employment options.	7/23/2018
8517	1	/policies/access-to-housing/	This policy has been used to justify the massive up zoning that is proposed throughout the city. It has been used to call people who opposed the plan racist. The worst part of all is that the language in the policy makes it seem like what the plan is proposing is a Nobel thing, when in reality it gives the power and land to people who do not live here and will build even more un-affordable units.	7/23/2018
8518	1	/policies/access-to-housing/	Lower the height in all categories, except where the height allowance is 2.5 stories. In neighborhoods that are mostly 2.5 stories homes (from single family to small apartments), the height zoning should stay the same. Along corridors, you don't need to have them be more than 3 stories. Along major corridors (like Broadway), buildings should not be more than 5 stories. This is how you make a city more livable. Look at Paris. With 2 exceptions, nothing is more than 5 stories and it is a highly livable city.	7/23/2018
8519	4	/policies/access-to-commercial-goods-and-service	You can not do away with parking and expect that small businesses will be able to thrive. The majority of their customers come to them in cars. Also, by limiting parking, you limit the ability of people with mobility issues to access the goods and services they need to get to.	7/23/2018
8520	1	/policies/access-to-housing/	NO interior 3!	7/23/2018
8521	1	/policies/access-to-housing/	People want to live in Minneapolis Because of how it is now. This policy would severely and irreversibly change the very character and nature of the city to be one that is very much less desirable. Why is this being done? The policy is used as cover to benefit one or two groups, the developers and foreign investment groups, young single people. Do not sugar coat the policy by selling it as racial equity when it is really about money and power. If this city cared so much about affordable housing it would not be working so hard to privatize the only affordable housing left in the city, Glendale.	7/23/2018
8522	42	/policies/expand-homeownership/	Home ownership is key to keeping our neighborhoods stable. And this plan, with its hyper density, will make it even harder for people to get in to starter homes. You are giving developers the opening to buy up houses, raze them, and put in multifamily housing, which they will either have to rent or they will have to buy at market rate, which will be at a premium, not to mention the condo fees they will have to pay. You can not allow multifamily units to dominate the city, height allowances in excess as proposed in this plan and expect to increase home ownership. That is still the best way to build wealth for middle and lower class people, and the best way to fight crime, build community and keep our city livable.	7/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

8523	0.1	/topics/land-use-built-form/	Buildings in these corridors should not exceed three stories. Care should be taken to integrate the building into current housing stock. Corridors should be more commercial in nature with a focus on LOCAL businesses. The plan now will turn all of our local run businesses into Starbucks and juice bars. One of the best parts about Minneapolis is the locally run businesses in commercial nodes. I love going to one of these nodes and obtaining everything I need from hardware to a cup of coffee or breakfast to hair cuts and pet food. These businesses are what make the Twin Cities a unique and desirable place to live. Do not corporatize our local business by making it unaffordable for them to stay in place. Minneapolis should not desire to be another city as it is already one of the best in the country. Local small business is a large reason for that.	7/23/2018
8524	28	/policies/msp-airport/	Build a subway system downtown for faster transit, and so the trains don't block vehicle traffic. If a train were to break down, then traffic on the street level wouldn't be affected. Almost all major cities have a subway system. While the light rail is nice, the Twin Cities is definitely lagging behind in regards to rail transit.	7/23/2018
