

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

Comment Number	Policy number	Policy	Comment	Timestamp
1	0.2	/small-area-plans/	It would be very useful to have a map-based index of these Small Area Plans instead of just the text list on the right. It would show where they fit into the city, where they overlap in scope, where Small Area Plans may be needed in the future, etc.	3/22/2018
2	14	/policies/tree-canopy-and-urban-forest/	On topic b. Provide education and training on tree care for private landowners.	3/22/2018
3	18	/policies/walking/	ENFORCE TRAFFIC LAWS THAT ALREADY EXIST.	3/22/2018
4	0.1	/topics/land-use-built-form/	I love the fact that there are height minimums in certain corridors, especially high density areas. Too many underdeveloped lots in and around downtown. Great work.	3/22/2018
5	35	/policies/innovative-housing-types/	This is good	3/22/2018
6	76	/policies/new-parks/	I love the idea of expanding parks and green spaces for ALL residents within a 10 minute walk. Yes!	3/22/2018
7	0.1	/topics/land-use-built-form/	This is not transformational or innovative or even interesting, you have just recorded the current uses and called it a plan.	3/22/2018
8	0.1	/topics/land-use-built-form/	You cannot even fill in the gaps in corridors like Franklin or Lake with similar uses, you just kept non-conforming uses as exceptions.	3/22/2018
9	80	/policies/development-near-metro-stations/	This is a great plan, especially like the minimum density requirements.	3/22/2018
10	0.1	/topics/land-use-built-form/	The exemption you've granted the Kenwood area is classist garbage, they should be able to accommodate increased density just like the rest of the city.	3/22/2018
11	1	/policies/access-to-housing/	This is a fantastic idea and will help Minneapolis lead the nation on fighting housing shortages.	3/22/2018
12	10	/policies/street-grid/	The policy should specifically mention freeway caps as a potential way to restore the traditional street grids that were destroyed by the construction of I94 and I35W in Minneapolis	3/22/2018
13	0.1	/topics/land-use-built-form/	Transit 20 is too short. You need to allow taller buildings by right in these areas.	3/22/2018
14	0.1	/topics/land-use-built-form/	Love this! These plans will allow our city to adapt and thrive. I can't wait to see what new housing options will be built in the near future.	3/22/2018
15	16	/policies/environmental-impacts-of-transportation/	The City should dis-invest in parking structures and let the private sector take on that role. In downtown, there should be an effort to make property owners share parking structures rather than each new development having their own ingress and egress.	3/22/2018
16	18	/policies/walking/	What about snow and ice clearance on sidewalks? The City does a terrible job of ensuring that sidewalks are clear.	3/22/2018
17	20	/policies/transit/	Traveling through downtown Minneapolis, especially at rush hour, is painfully slow because of general traffic. The City should be advocating for a transit tunnel to improve capacity and speed in the densest part of the metro.	3/22/2018
18	22	/policies/downtown-transportation/	Transit is painfully slow downtown & a transit tunnel is needed. Plus traffic speeds are too high and streets too wide making them unpleasant.	3/22/2018
19	59	/policies/downtown/	This list is underwhelming. We need to bring back retail somehow, add student/ artist housing in the CBD, attract a museum, local arts groups to Nicollet Mall. Downtown is kind of boring outside of sports and theaters.	3/22/2018
20	80	/policies/development-near-metro-stations/	Hiawatha Ave is an awful highway and needs to be severely calmed to make the Blue line through south Minneapolis a walkable and pleasant place. Transit "plazas" are awful, dead places that should be discouraged.	3/23/2018
21	83	/policies/people-with-disabilities/	The City's current CIP plan looks to replace pedestrian ramps on an 80-year time frame. Just an example of how much priority this is for Public Works staff.	3/23/2018
22	10	/policies/street-grid/	Wonderful idea! Cities are about connection and that starts with the street grid which is the platform for building the wealth of our city.	3/23/2018
23	19	/policies/bicycling/	Can we add something about adding more greenways, and make better greenway connections throughout the city?	3/23/2018
24	19	/policies/bicycling/	Can we add something to support the popular greenway initiatives throughout the city, such as the Min Hi Line, Southside Greenway, Northside Greenway, and the Great Northern Greenway?	3/23/2018
25	76	/policies/new-parks/	Can the city be more proactive about developing and managing greenway connections between parks. For example, there is not entity that can develop and manage the Midtown Greenway properly.	3/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

26	77	/policies/park-access/	How about transit access to parks? Many people with disabilities use transit to get around, and many parks do not have adequate transit access.	3/23/2018
27	7	/policies/public-realm/	Can the city work to improve it own standards for typical items throughout the city? Such as trash cans, streets lights, tree grates, benches. I think working to create a consistent palette through the city would be great!	3/23/2018
28	7	/policies/public-realm/	Can the city work to improve the identity of different neighborhoods through small neighborhood street signs and banners for commercial districts?	3/23/2018
29	14	/policies/tree-canopy-and-urban-forest/	Could the city make better requirements for soil volume for boulevard trees? And also develop more standard to improve the health of boulevard trees?	3/23/2018
30	73	/policies/stormwater-management/	Could the city explore a street edge alternative program, similar to Seattle? Or green streets such as what they are doing in Portland? I think both "blue streets" and "green streets" would be great to introduce in Minneapolis.	3/23/2018
31	73	/policies/stormwater-management/	Metro Blooms, a local landscape firm, has done really interesting work with blooming alleys and blooming boulevards to help reduce stormwater runoff. Implemented citywide, this could make a big different.	3/23/2018
32	73	/policies/stormwater-management/	Can the city work with the school and park systems to implement larger stormwater management projects beneath large parking lots or fields?	3/23/2018
33	17	/policies/complete-streets/	Could we add something about traffic calming on certain streets? I think complete streets are great, but many street could also be further improved by additional traffic calming measures.	3/23/2018
34	20	/policies/transit/	Can we work to create better transit connections between key park destinations?	3/23/2018
35	24	/policies/shared-mobility/	What about Paddle Share?	3/23/2018
36	0.1	/topics/land-use-built-form/	300 Washington Ave S should most definitely not be Corridor 6, it should rather fall under either Core 50, Transit 30, or Transit 20.	3/23/2018
37	20	/policies/transit/	Please also add that the city shall support the placement of transit-only lanes wherever possible to ensure a reliable and frequent transit system.	3/23/2018
38	0.1	/topics/land-use-built-form/	Look up passivehouseminnesota.org and connect with their team. We should implement the Passive House building standard directly into the building energy efficiency policy! New York and Philly have had lots of success with Passive House.	3/23/2018
39	1	/policies/access-to-housing/	I love it. More density is more sustainable and, other things being equal, affordable. This is a great baseline to start from.	3/23/2018
40	19	/policies/bicycling/	Awesome! Thank you for continuing to support bicycling and its infrastructure in this city, especially despite all the many loud, squeaky wheels (no pun intended) trying to divert the conversation away from promoting transportation equity.	3/23/2018
41	15	/policies/transportation-and-equity/	Yes! I love that the City is promoting equity in transportation. Keep up the good work!	3/23/2018
42	17	/policies/complete-streets/	This is a great policy, and I am happy to see the City continuing to work towards equity across all modes of transportation.	3/23/2018
43	19	/policies/bicycling/	I just spent 20 minutes writing a suggestion only to have it disappear as "Oops, something went wrong" you can start this process by making it work!	3/23/2018
44	33	/policies/affordable-housing-production/	Here's an idea. Lower property taxes!! It's already some of the highest in the country and it's been going up 10% each year. This is not sustainable and counter productive for the goals stated here.	3/23/2018
45	11	/policies/skyways/	I love this plan! I wish that it did more to bring people to the street but I think this is a great first step.	3/23/2018
46	60	/policies/intrinsic-value-of-properties/	I think this is a slippery slope for a city to designate "intrinsically" valuable property. If its not quantifiable, then its just a fight about opinions. I do not support this policy.	3/23/2018
47	0.1	/topics/land-use-built-form/	The built form guidance for Lowry Hill is unacceptably low. It should be encouraged to be at least as dense as the Wedge.	3/23/2018
48	6	/policies/pedestrian-oriented-building-and-site-de	Yes! Eliminate off-street parking minimums throughout the city! This is one of the most progressive moves the city can make toward discouraging single occupant vehicle use for the majority of trips. This is great! Please implement.	3/23/2018
49	0.2	/small-area-plans/	It would be nice to see a map of the neighborhoods.	3/23/2018
50	0.1	/topics/land-use-built-form/	There should be more interior 3. It should extend down to at least 38th St.	3/23/2018
51	51	/policies/healthy-pre-k-development/	Please work towards paid family leave as well.	3/23/2018
52	2	/policies/access-to-employment/	Increase access to infant and toddler childcare.	3/23/2018
53	6	/policies/pedestrian-oriented-building-and-site-de	item k. Stupid, absolutely stupid.....	3/23/2018
54	84	/policies/public-safety/	Move to "Civilian Led Policing" by adding the model to the city charter. http://civilianledpolicing.org/plan/	3/23/2018
55	89	/policies/technology-in-the-city-enterprise/	Create a municipal broadband system that connects all homes to a city run, free and open internet system. #NetNeutrality	3/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

56	1	/policies/access-to-housing/	I support the policies that help to remedy the racist housing policies of the past, and I support the inclusion of up to four dwelling units on neighborhood interiors furthest from downtown.	3/23/2018
57	14	/policies/tree-canopy-and-urban-forest/	This is very encouraging! We need to grow our urban forest drastically, and all of these action items are appropriate and meaningful. Love it!	3/23/2018
58	19	/policies/bicycling/	Great! We really need to install physical protections in protected bike lanes, such as planters and concrete barriers. This is a must!	3/23/2018
59	16	/policies/environmental-impacts-of-transportation/	Yes! We must do our best to disincentivize people using cars and other personal automobiles. They are destroying our city and our environment. Aggressively pursue this!	3/23/2018
60	20	/policies/transit/	We need, need, need to have useful aBRT on all the high-frequency routes. Building the streetcar line in the Greenway trench would also be fantastic.	3/23/2018
61	26	/policies/vision-zero/	Reinstate the Traffic Unit! MPD simply no longer enforces traffic laws, and it's making our streets incredibly dangerous. We need to let drivers know that they cannot just tear around town being dangers to society. ENFORCE THE TRAFFIC LAWS!	3/23/2018
62	66	/policies/air-quality/	Plant more trees!!!	3/23/2018
63	12	/policies/lighting/	Please stick to one uniform lighting style for pedestrian lighting in a given area - i.e. there are multiple styles of pedestrian lights in the Mill District and it looks tacky.	3/23/2018
64	1	/policies/access-to-housing/	People are using the 46th street I-35 transit center as housing and a base for pan-handling	3/23/2018
65	15	/policies/transportation-and-equity/	I love that the priority is on sustainable modes: walking, biking and transit. I hope that aspiration is reflected in street design throughout the city, even when street reconfigurations face opposition from people who prefer an auto-oriented environment.	3/24/2018
66	16	/policies/environmental-impacts-of-transportation/	So much of what upholds auto dependency is pricing (or a lack thereof). When roads and parking are free, and gasoline is lightly taxed, people will choose to drive. Please push aggressive pricing schemes to discourage driving--our climate depends it.	3/24/2018
67	18	/policies/walking/	Automated speed and red light enforcement would help hold drivers accountable for unsafe behavior and improve the pedestrian experience in the city.	3/24/2018
68	17	/policies/complete-streets/	Preserving parking should never be a justification for implementing a sub-par (unprotected) bike lane.	3/24/2018
69	19	/policies/bicycling/	Laws barring drivers from stopping/parking in bike lanes need to be enforced. Drivers use bike lanes for pick ups/drop offs, deliveries, parking, etc. and are rarely held accountable.	3/24/2018
70	20	/policies/transit/	The city needs more dedicated bus lanes. These can be implemented on many arterials by removing parking for cars.	3/24/2018
71	10	/policies/street-grid/	Item D is not written in plain language understandable to most people.	3/24/2018
72	22	/policies/downtown-transportation/	More dedicated bus lanes are needed downtown.	3/24/2018
73	6	/policies/pedestrian-oriented-building-and-site-design/	Please no more drive thrus! But also, what can be done to try and get rid of existing drive thrus?	3/24/2018
74	5	/policies/visual-quality-of-new-development/	Taller buildings!	3/24/2018
75	68	/policies/energy-efficient-buildings/	What about requiring buildings to be designed so they are "solar ready". Meaning the electrical system is made to accommodate future solar power and the structure is sized for solar panels.	3/24/2018
76	68	/policies/energy-efficient-buildings/	Why not make the entire city a green zone? Why are only certain areas green zones.	3/24/2018
77	68	/policies/energy-efficient-buildings/	What about encouraging district energy systems or infrastructures, such as what is being explored at Towerside.	3/24/2018
78	84	/policies/public-safety/	By taking a close look at the police station's architectural space of policing the project offers ideas that can help transform urban police stations into neighborhood investments that strengthen their communities in return.	3/24/2018
79	84	/policies/public-safety/	Check out Polis Station by Studio Gang, and rethink the role police stations can play in communities.	3/24/2018
80	0.1	/topics/land-use-built-form/	This is incredible! I am so impressed.	3/24/2018
81	19	/policies/bicycling/	Who will develop and manage greenways? Will the Great Northern Greenway, Min Hi Line, or Midtown Greenway become parks, and if not, who will maintain them?	3/24/2018
82	35	/policies/innovative-housing-types/	ADUs have been great. Removing the owner-occupancy requirement would be even greater. An innovative funding mechanism to encourage ADU development on alleys would be incredible.	3/24/2018
83	1	/policies/access-to-housing/	In regards to multi-dwelling development, there NEEDS to be requirements for offstreet parking required per dwelling. It's irresponsible to do otherwise in these residential areas.	3/24/2018
84	66	/policies/air-quality/	Wood smoke is one of the largest sources of air pollution according to the MPCA. Ban recreational fires in our urban environment.	3/24/2018
85	69	/policies/renewable-and-carbon-free-energy/	The city should establish a citywide bulk purchasing program for rooftop solar to decrease costs.	3/24/2018
86	68	/policies/energy-efficient-buildings/	240 volt wiring conduit should be required for all off-street parking spaces, especially in multi-family developments, to make it easier to adopt electric vehicles.	3/24/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

87	20	/policies/transit/	Nicollet bus tunnel NOW!	3/24/2018
88	1	/policies/access-to-housing/	Hmm.. Apparently cannot respond with full statements. Only one-liners, otherwise this system says "Oops"	3/24/2018
89	1	/policies/access-to-housing/	I REJECT item e. We have a connected neighborhood in Windom. We know our neighbors by name, even their pets. We did not choose to live in high-density Uptown or Downtown.	3/24/2018
90	1	/policies/access-to-housing/	To cram 4-plexes onto single-family lots, must have to ditch any setback requirements, or have any adequate space for yards for children to play in. I absolutely reject item e.	3/24/2018
91	11	/policies/skyways/	The Skyway network is essential and something that makes Minneapolis livable. I support measures that make them safer and more accessible.	3/24/2018
92	19	/policies/bicycling/	I recently converted to bike commuting all year long. I really appreciate this focus on the policy.	3/24/2018
93	5	/policies/visual-quality-of-new-development/	don't restrict design standards and regulations to limit good architect	3/25/2018
94	35	/policies/innovative-housing-types/	They city should hire a chief design officer, like Los Angeles did with Christopher Hawthorne. There needs to be more oversight of design, so that we can ensure high quality design with all this new growth.	3/25/2018
95	20	/policies/transit/	Heavy rail line through city center to core suburbs. Policy should support development along these rail lines. I suggest looking at Copenhagen's Transit oriented development plans.	3/25/2018
96	5	/policies/visual-quality-of-new-development/	OH MY GOD YES YEEEEEEEESSSSSS!!! This is making me very giddy.	3/25/2018
97	0.1	/topics/land-use-built-form/	Looks great. Add more density and mixed use around the 46th Street station to compliment the plans for the Ford Site.	3/25/2018
98	70	/policies/ecology-and-habitat/	What about working to create habitats for other animals besides pollinators?	3/26/2018
99	65	/policies/urban-agriculture-and-food-production/	Can we close the loop on our composting and provide soil for residents to grow food with?	3/26/2018
100	19	/policies/bicycling/	I would like to see the city develop better design standards for bikeways so that bike lanes and bike boulevards work better. This would include signage, traffic calming, delineators, bike racks.	3/26/2018
101	78	/policies/park-design-and-programming/	I think the city should work to implement innovative programming and design into the architecture and landscape architecture at parks. Too many of our park buildings and landscapes are ugly and do not reflect our design culture in Minneapolis.	3/26/2018
102	77	/policies/park-access/	What about transit access to our park system? Why are buses/streetcars not allowed on the parkways?	3/26/2018
103	1	/policies/access-to-housing/	This is an excellent policy, I fully support this.	3/26/2018
104	22	/policies/downtown-transportation/	Policy 22a should be altered to call for encouraging transit-only lanes in downtown. This will make great strides to increase transit ridership and speed up travel times in a very congested area.	3/26/2018
105	6	/policies/pedestrian-oriented-building-and-site-de	Strongly support this policy, especially 6(o) re: banning drive thrus and 6(k) re: eliminating parking minimums. These are tremendous policies which should be adopted into the city's zoning code as soon as possible.	3/26/2018
106	6	/policies/pedestrian-oriented-building-and-site-de	Where financially and legally possible, the City should also explore closing driveways at surface lots with several access points for autos, for even if this triggers a partial taking it will greatly improve the pedestrian environment.	3/26/2018
107	18	/policies/walking/	Support greater enforcement of snow clearing laws for sidewalks, as this is a major mobility issue for walkers. Consider feasibility of city providing sidewalk snow clearing services across city.	3/26/2018
108	10	/policies/street-grid/	When you restore the street grid it should be like it was before, not suburbanized. The new connection between 22nd st and Cedar looks terrible - too wide, large turn radii, and why is it curved? Just put it back like it was before.	3/26/2018
109	5	/policies/visual-quality-of-new-development/	1. Avoid large, feature-less, window-less concrete, cinder block, metal and other street level wall sections. 2. Seek and encourage color, including vibrant and atypical colors, on facades and design elements whenever possible.	3/26/2018
110	13	/policies/landscaping/	For all street-level parking plazas, require high and dense perimeter plant growth to obscure cars and open space (within safety limits).	3/26/2018
111	96	/policies/heritage-preservation-recognition/	The city should be proactive in nominating relevant properties for national level registers.	3/26/2018
112	25	/policies/innovations-in-transportation-and-infras	Look at decking over the freeways, for space for parks and/or housing!	3/26/2018
113	80	/policies/development-near-metro-stations/	Consider parking maximums near light rail stations.	3/26/2018
114	76	/policies/new-parks/	Look at decking over the freeways, for space for parks!	3/26/2018
115	38	/policies/affordable-housing-near-transit-and-job	Look at decking over the freeways, for space for parks and/or housing! This would provide access near, for example, downtown, if between downtown and Cedar/Riverside	3/26/2018
116	16	/policies/environmental-impacts-of-transportation	Consider decking over freeways to both limit exhaust in the areas around the freeway but also provide new green space to act as a carbon sink.	3/26/2018
117	19	/policies/bicycling/	This looks great!!	3/26/2018
118	1	/policies/access-to-housing/	Sounds great! More clarity on how parking requirements for new developments will be reduced would be helpful.	3/27/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

119	2	/policies/access-to-employment/	Sounds good. perhaps clarify point d. to explain what "grow within their existing footprint" means. Upward?	3/27/2018
120	3	/policies/production-and-processing/	Like the idea. The policy does not make it clear what business activities are considered "low-impact" or "environmentally friendly". More clarity on how that will be assessed would be helpful.	3/27/2018
121	4	/policies/access-to-commercial-goods-and-service	great. The policy does not really make clear how parking requirements will be eased to encourage more non-car use of businesses.	3/27/2018
122	5	/policies/visual-quality-of-new-development/	From the perspective of enabling effective renewable energy development in the city, the goal of splitting up buildings within a block is a problem. Maintaining large contiguous roof areas is important for the cost-effective development of solar energy.	3/27/2018
123	6	/policies/pedestrian-oriented-building-and-site-de	The city should consider how the value in point f. can be advanced in combination with design techniques that optimize passive heating and cooling techniques for buildings, which can include design that encourages helpful air flow through a building.	3/27/2018
124	20	/policies/transit/	Expanding the light rail and adding street cars would put Minneapolis' transit up there with the best in the United States.	3/27/2018
125	9	/policies/open-spaces-in-new-development/	Its really important to make sure that these sorts of public spaces feel welcoming for non-commercial use by actively providing clear seating/other amenities. Otherwise they just become well-manicured places to pass through.	3/27/2018
126	11	/policies/skyways/	Its important to think about skyway energy efficiency. Skyways (largely glass, which is great for visibility) are a major site of heat loss.	3/27/2018
127	12	/policies/lighting/	Part a is confusingly worded "but minimize glare and dark sky conditions" - I think this is supposed to be "but minimize glare and ensure dark sky conditions". Also, use of LEDs as a highly efficient and directional lighting source seems worth mentioning.	3/27/2018
128	13	/policies/landscaping/	Species diversity of landscaping is also important. We've had too long a history of planting all the same types of plants in one location.	3/27/2018
129	14	/policies/tree-canopy-and-urban-forest/	Ideally, this policy should address the alignment between tree canopy and solar access. Tree canopy should be maintained and increased, but also roof areas with good solar access currently should be maintained as an energy generating resource.	3/27/2018
130	15	/policies/transportation-and-equity/	Sounds good.	3/27/2018
131	16	/policies/environmental-impacts-of-transportation	In addition to addressing how to increase the convenience of non-car options, it would be helpful to identify the focused city strategies to reduce the convenience of car-based options (parking availability, lane reductions, speed restrictions, etc.)	3/27/2018
132	17	/policies/complete-streets/	great!	3/27/2018
133	18	/policies/walking/	great!	3/27/2018
134	19	/policies/bicycling/	great	3/27/2018
135	20	/policies/transit/	All good. This raises important questions as to how Minneapolis's plan aligns with other cities, because road construction and transit planning will depend highly on how this all fits together.	3/27/2018
136	21	/policies/freight/	Very excited about an increase in freight. One thing the city should be explicit about is its policy around freight carrying explosive hydrocarbons (eg. bitumen from tar sands) through urban neighborhoods (we should oppose it).	3/27/2018
137	25	/policies/innovations-in-transportation-and-infras	The city should definitely be following/thinking proactively about these technologies, but the city should also be cautious about rushing into them. Also, requirements that autonomous vehicles be electric would be helpful.	3/27/2018
138	28	/policies/msp-airport/	As positive as these steps are, extensive air travel is not environmentally sound. Minneapolis should also contribute to reducing volume of air traffic for local noise/pollution as well as climate reasons.	3/27/2018
139	3	/policies/production-and-processing/	The city presently discourages industry through multiple, uncoordinated departments, regulations and inspections and multiple fees not common in other jurisdictions. Some manufacturers within the city think that Mpls wants to drive them out.	3/27/2018
140	1	/policies/access-to-housing/	The expressed housing policies are based upon the false premise that population growth is good. It is not good, but must be accommodated.	3/27/2018
141	36	/policies/innovative-housing-strategies/	Policies should promote owner occupied housing. There is little or nothing in this plan to promote that.	3/27/2018
142	1	/policies/access-to-housing/	All housing should have off-street parking. Even if reduced auto trip goals are net, nearly 60% of trips will be by auto. Further, even those who utilize non-auto for most will want to have an auto for the rest.	3/27/2018
143	33	/policies/affordable-housing-production/	One of the most important factors in housing affordability is ensuring accountability to tenants. What are the city's plans to support cooperative housing and other formats that ensure that affordability over profit-taking through rising housing markets.	3/27/2018
144	34	/policies/affordable-housing-preservation/	Really like this idea. It seems vague as to what is the proposed way to achieve it.	3/27/2018
145	35	/policies/innovative-housing-types/	Very excited about this idea, especially cooperative housing (focusing on larger cooperatives that control multiple properties and allow members to transition between properties). This proposal seems not very specific on how to achieve this.	3/27/2018
146	36	/policies/innovative-housing-strategies/	The goal is great. Not much specificity as to how the city will pursue it.	3/27/2018
147	37	/policies/mixed-income-housing/	This is very important. The strategies are not very specific.	3/27/2018
148	39	/policies/fair-housing/	Sounds good. It would be good to ID how a rigorous evaluation/ licensing process will ensure compliance.	3/27/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

149	40	/policies/homelessness/	This is very important. The City should include as a strategy provisions for providing stable housing for homeless families in city-owned vacant property, preferably through a model that leads to long-term stable occupancy of those homes.	3/27/2018
150	41	/policies/tenant-protections/	Very important. We should add a tenant/ cooperative of tenants right of first refusal to purchase with appropriate time frames whenever a landlord (voluntarily or due to City action due to violations) wishes to transfer ownership of rental property.	3/27/2018
151	42	/policies/expand-homeownership/	This is great. It should align with discussions mentioned in other priorities around cooperative housing to equip groups of low-income families to pool capital and income to qualify for home buying.	3/27/2018
152	43	/policies/housing-displacement/	The City should consider models that provide rent control for the life of the resident, and potentially over a longer/ongoing timeframe. I definitely support legal binding limits on rent increases where needed to avoid displacement.	3/27/2018
153	44	/policies/comprehensive-investments/	Great!	3/27/2018
154	46	/policies/healthy-housing/	Very important. The City should also link home health programs and utility energy efficiency programs and opportunities for weatherization. These actions have impact both directly on human health and household disposable income.	3/27/2018
155	50	/policies/access-to-technology/	I would like to see something in here that identifies the role of advancing universal high-speed internet across the city.	3/27/2018
156	52	/policies/human-capital-and-a-trained-workforce/	Generally, this is very good. I am a bit concerned that the training being considered may include/ prioritize economic sectors that may not be a good fit for the long-term sustainability of Minneapolis.	3/27/2018
157	54	/policies/supporting-economic-growth/	I'd love to see more detail in terms of how the City proposed to support the expansion of the green economy. This is a very important piece of the comprehensive plan, and would be great to have more detail.	3/27/2018
158	56	/policies/supporting-small-businesses/	A stronger focus on cooperative business development, and particularly models that help a broader community benefit from enterprise is important. Minneapolis already has a C-TAP program to support co-ops; how can this be expanded and be more robust?	3/27/2018
159	60	/policies/intrinsic-value-of-properties/	It is very important to preserve these buildings. This should be done in a way that is also flexible for appropriate re-use so that existing buildings can be effectively adapted for new purposes without restrictions that make that unduly costly.	3/27/2018
160	61	/policies/environmental-justice/	This is very important. Given the significance of energy utilities in impacting EJ communities, the comprehensive plan should also address how the Minneapolis Clean Energy Partnership can push energy utilities to advance EJ protections as well.	3/27/2018
161	62	/policies/contaminated-sites/	Great. Also, make sure that industrial polluters continue to pay the full costs of the negative impacts they create to enable effective remediation of these sites.	3/27/2018
162	1	/policies/access-to-housing/	I like the plan. It addresses the issues of housing, transportation, and carbon pollution. It should be stated that the housing should be affordable in whatever percentage matches the need.	3/27/2018
163	0.1	/topics/land-use-built-form/	TEAR DOWN KMART	3/27/2018
164	0.1	/topics/land-use-built-form/	4810 OSSEO RD I believe this address and the one east are Victory Prairie and dog park. https://www.minneapolisparcs.org/parks__destinations/dog_parks/victory_prairie_off-leash_dog_park/	3/27/2018
165	63	/policies/food-access/	Coded incorrectly on map. looks good	3/28/2018
166	65	/policies/urban-agriculture-and-food-production/	Looks good. It would be great to have more clarity about how equity in access and ownership will be ensured, and also how will the city evaluate the balance between self-consumption/ volunteer management urban farming and urban ag businesses.	3/28/2018
167	66	/policies/air-quality/	It would be great to ID how a polluter-pays principle/ the existing PCAB fees tie into these strategies.	3/28/2018
168	67	/policies/climate-resilient-communities/	The City should include electric grid resiliency as a core component of this objective and develop a strategy for encouraging community-scale micro-grids that can provide stable essential islandable power when severe weather disrupts the broader grid.	3/28/2018
169	0.2	/small-area-plans/	How will the city market and sell the vision for different key areas throughout our city?	3/28/2018
170	68	/policies/energy-efficient-buildings/	These are good goals. They are missing some pieces around developing a better system for financing energy retrofits that is not dependent on user debt and an approach at an appropriate scale. Engage EVAC/ clean energy partnership around this.	3/28/2018
171	0.2	/small-area-plans/	For larger parcels (eg. Hi Lake Target), how will the city set the vision for how this large site will be developed?	3/28/2018
172	69	/policies/renewable-and-carbon-free-energy/	This is great. EVAC (Energy Vision Advisory Committee) should be engaged to provide more detail on additional key innovations around shared renewable energy, shifting utility rate structures, and advancing new ways to buy and sell energy.	3/28/2018
173	0.2	/small-area-plans/	How will the city force or pressure development on parcel that are horrible uses of land (eg. Hi Lake Target).	3/28/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

174	70	/policies/ecology-and-habitat/	Very important. This should also address and clarify City regulatory policy around yards. The City currently has somewhat contradictory policies supporting pollinator habitat but still has inspectors enforcing landscaping with lawns in mind.	3/28/2018
175	71	/policies/soil-health/	The City should specify the goals for construction fill more clearly. Depending on the purpose of fill/ depth, more or less organic material may be helpful.	3/28/2018
176	4	/policies/access-to-commercial-goods-and-service	Could the city make provisions for live/work ADUs or other type of home businesses with smaller visitors/customers?	3/28/2018
177	4	/policies/access-to-commercial-goods-and-service	Why not allow more mixed use by right along all transit corridors?	3/28/2018
178	72	/policies/sustainable-water-system-management/	Would like to see policies and practices to advance gray water reuse added. Also appreciate the references to specific linked policies/standards, and would like to see these referred to more widely throughout the plan, not just this section.	3/28/2018
179	73	/policies/stormwater-management/	Looks good	3/28/2018
180	4	/policies/access-to-commercial-goods-and-service	Apparently there is a regulation on the number of liquor stores that a grocery store chain can operate in the city. I think this should be revised.	3/28/2018
181	75	/policies/waste-reduction/	This section should also address the City's approach to the HERC and how this City will pursue developing alternatives and fostering the retirement of HERC. Also a little vague on how the city will encourage several items on this list.	3/28/2018
182	76	/policies/new-parks/	What about greenways? What are they, parks or city streets?	3/28/2018
183	78	/policies/park-design-and-programming/	Really appreciate the references to education around ecology and climate change. In general, I'd like to see more here around the role of parks as ecological spaces that facilitate ecological resilience.	3/28/2018
184	79	/policies/healthy-youth-development/	Sounds really good. Its pretty vague - would like to see in the strategies more about how the city will do these things.	3/28/2018
185	88	/policies/public-services-policy/	What about looking for creative ways to rethink the services our different public buildings can provide? For example, libraries and affordable housing in Chicago.	3/28/2018
186	84	/policies/public-safety/	Would like to see a defined role for restorative justice as a crime prevention/mitigation tool and other community safety strategies.	3/28/2018
187	84	/policies/public-safety/	Many of the city's public buildings are quite ugly. Why not create a program to improve the architecture of the cities public buildings.	3/28/2018
188	6	/policies/pedestrian-oriented-building-and-site-de	What about the cities own streets, and improving their design through neighborhood signs, pedestrian level lighting, pedestrian level directional signs.	3/28/2018
189	93	/policies/stewarding-historic-properties/	Point e. is indicative of a broader integration needed - historic preservation needs to retain the character and history of a place without preventing retrofits/ reuse that allow it to function sustainably as part of the current community.	3/28/2018
190	94	/policies/heritage-preservation-regulation/	Making sure that historic buildings/districts can be creatively repurposed and updated to be sustainable and fit a currently valuable purpose while retaining their historic nature if vital.	3/28/2018
191	58	/policies/business-districts-and-corridors/	What about branding and marketing actual neighborhoods too, through funding metal street signs, street banners, public art, signs at major entrance points.	3/28/2018
192	1	/policies/access-to-housing/	I love it!	3/28/2018
193	1	/policies/access-to-housing/	I support the plan to allow 2-4 units in areas of the city where typically there is just SFH. But this has to be done in a way to insure that owners stay local, either owner occupant or co-op and condo owners.	3/28/2018
194	1	/policies/access-to-housing/	I couldn't agree more with the policy and fully support it! Minneapolis should be accessible to all income-levels in any neighborhood and not segregated. This is smart policy and should proceed as such.	3/29/2018
195	10	/policies/street-grid/	What about freeway lides, more pedestrian bridges, & closing/ downsizing freeways?	3/29/2018
196	15	/policies/transportation-and-equity/	Public Works only looks at the condition of road pavement when determining a street project. By that method, automobiles remain the the top priority- not pedestrians.	3/29/2018
197	16	/policies/environmental-impacts-of-transportation	Don't allow more parking ramps downtown- especially in every development. Count and then make a goal to reduce the number of parking spaces in the City.	3/29/2018
198	17	/policies/complete-streets/	Hennepin County and MNDOT control some of the worst streets in the City like Lake, Franklin, Central, Hiawatha Ave. Something more significant needs to happen to force them to make these roadways humane.	3/29/2018
199	18	/policies/walking/	What about actively widening sidewalks that don't meet current standards? Public Works only does this when a street is fully reconstructed, which takes place every 50-60 years.	3/29/2018
200	18	/policies/walking/	Hennepin County maintains non-compliant sidewalks along their dangerous streets like at Franklin & Portland Ave. Force them to do something about this!	3/29/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

201	17	/policies/complete-streets/	Sidewalk snow & ice clearance is a maintenance issue that needs to be called out in this document. Minneapolis is a winter City, but does a terrible job ensuring sidewalks are clear. This winter has been terrible!	3/29/2018
202	18	/policies/walking/	Will the City allocate more funding to improve the pedestrian network because very little of the resources go to it now. The priority remains moving and storing cars based on the City budget.	3/29/2018
203	20	/policies/transit/	The City already does this stuff, but Metro Transit doesn't have funding to make things better. This "vision" for 2040transit in Minneapolis is underwhelming.	3/29/2018
204	22	/policies/downtown-transportation/	"Encourage" walking, biking, & transit? How? The streets are soul-suckingly bleak, too wide, and dominated by fast moving traffic. Stop allowing curb-cuts downtown and tear down more awful parking ramps.	3/29/2018
205	24	/policies/shared-mobility/	How about ensuring sidewalks are clear of ice and snow in the winter? Why does the City own parking ramps?	3/29/2018
206	25	/policies/innovations-in-transportation-and-infras	What about walking? How about tech that benefits people crossing the street? Cars, cars, cars!!!	3/29/2018
207	27	/policies/transportation-partnerships/	This language says very little. Minneapolis needs to stand up to Hennepin County & MNDOT when they create awful roadways. Metro Transit doesn't have any money, so may be the City could pay for heated shelters and benches?	3/29/2018
208	59	/policies/downtown/	The City and Downtown Council have created a downtown that appeals to office workers and tourists. It isn't a place I want to go unless there is a special event. Shopping is mostly gone.	3/29/2018
209	10	/policies/street-grid/	Put in freeway lids and take back the awful infrastructure around highways. Do something to make Hiawatha Avenue not a freeway through my neighborhood. I'm scared to cross it!	3/29/2018
210	33	/policies/affordable-housing-production/	This is great and will help with the needs of a variety of people	3/29/2018
211	49	/policies/educational-and-economic-access/	I work in employment training, and a significant barrier for job-seekers is child care. There MUST be an increase in affordable childcare options and childcare assistance in Minneapolis.	3/29/2018
212	49	/policies/educational-and-economic-access/	Sounds great! Another significant aspect of this will be encouraging employers to change their hiring practices (through incentives? other means?).	3/29/2018
213	49	/policies/educational-and-economic-access/	Some employers take months to hire, some are unwilling to train on the job (which eliminates many candidates), and some are unwilling to hire people with criminal backgrounds, who need a second chance in order to reintegrate into society.	3/29/2018
214	41	/policies/tenant-protections/	Please ensure emergency rental assistance is easier to access and can be received in a timely manner.	3/29/2018
215	0.1	/topics/land-use-built-form/	We don't need quad housing built in our neighborhood. We are trying to build neighbors who know each other not rentals. I don't believe it is a good idea for ward 13! Gary Dahl, 4825 Zenith Ave South, 612-940-7620	3/29/2018
216	84	/policies/public-safety/	Please mandate that the police force increases the number of hours spent on unconscious bias and de-escalation training. The use of excessive force has drastically reduced trust in first responders.	3/29/2018
217	1	/policies/access-to-housing/	The action is to increase the amount of housing, but the action steps only talk about allowing things. Without incentives, housing development will still follow the money, so what guarantees do we have that anything will change?	3/29/2018
218	33	/policies/affordable-housing-production/	The actions talk about promoting housing and diversity options, but don't talk about how this will be done. The devil is in the details. Something not to be forgotten is that you don't want to destroy the desirable aspects of existing neighborhoods.	3/29/2018
219	20	/policies/transit/	The city should invest in high quality rail lines through the denser parts of the city as they are more efficient at connecting the city and moving people than busses, also people don't like busses so there is that also.	3/31/2018
220	10	/policies/street-grid/	Interstates 94, 394, & 35 create huge barriers and wreck the street grid. Something more proactive needs to be done to fix connections because MNDOT apparently doesn't care about it.	4/2/2018
221	20	/policies/transit/	Riding the bus through downtown Minneapolis, especially at rush hour, is painfully slow. The lights for LRT need to be fixed, and buses should have their own lanes so they can go faster. The long-term goal should be for a transit tunnel like Seattle.	4/2/2018
222	18	/policies/walking/	Sidewalks this winter have been consistently covered in ice and snow making them impassible for months of the year. The City needs to enforce their sidewalk snow & ice clearance ordinance and/or take a more active role in clearing sidewalks.	4/2/2018
223	22	/policies/downtown-transportation/	What about getting rid of traffic lanes for cars, making some streets bike & Pedestrian only, tearing down parking ramps, and/or tearing down the 3rd & 4th St. viaducts?	4/2/2018
224	59	/policies/downtown/	Tear down some of those horrible parking ramps and don't replace them.	4/2/2018
225	80	/policies/development-near-metro-stations/	Hiawatha Avenue is a highway that cuts off my neighborhood adjacent to many LRT stations. No vision to break it up and turn that car sewer into a real street? It's scary and uncomfortable to cross.	4/2/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

226	1	/policies/access-to-housing/	Hi, I support the proposal all action steps in the "Access to Housing" policy section. In particular I believe that action steps 'd' and 'e' are positive and I fully support them! -Jordan	4/2/2018
227	0.1	/topics/land-use-built-form/	This plan puts lots along Corridor 4 routes at risk of being acquired via eminent domain to allow for the streets to widen and make room for parking. I would discourage the widening of any streets in the name of development.	4/2/2018
228	58	/policies/business-districts-and-corridors/	Please add: reinforce local access to business districts and corridors by integrating them into the bicycle plan and ensuring direct bike and walk access to and through them.	4/2/2018
229	9	/policies/open-spaces-in-new-development/	Dont wreck the Post Office building! A lot of jobs would be lost if they moved. Leave as it is, a beautiful art deco example. A concerned citizen.	4/3/2018
230	0.1	/topics/land-use-built-form/	I am 100% in favor of these proposals to increase density throughout the city.	4/3/2018
231	1	/policies/access-to-housing/	Would love to see the city encourage small-scale (i.e. duplex, triplex, fourplex) condos where possible.	4/3/2018
232	33	/policies/affordable-housing-production/	If a household income is 30 percent of area median income, that's going to be based on what? Is area a portion of the city or the city as a whole?	4/3/2018
233	36	/policies/innovative-housing-strategies/	Please identify at least ONE specific new action that the City will undertake.	4/3/2018
234	0.1	/topics/land-use-built-form/	Four-plex zoning is interesting but should be done as a PILOT based on a time period or number of permits per Ward to see effects prior to out-of-control issuance of wrecking/new construction permits. Let's learn from recent history and avoid another screeching-halt moratorium!!	4/3/2018
235	1	/policies/access-to-housing/	provide work/live incentives where the security guard can live at the apartments or the nursing home cohabitating with a daycare or a shelter for women with children. people who work at the nursing home can live there. allowing people to live where they work - using coexisting circumstances to benefit from each other in a symbiotic relationship to create more useful space - 24 hour use of space will equal less space needed overall.	4/3/2018
236	1	/policies/access-to-housing/	provide work/live incentives where the security guard can live at the apartments or the nursing home cohabitating with a daycare or a shelter for women with children. people who work at the nursing home can live there. allowing people to live where they work - using coexisting circumstances to benefit from each other in a symbiotic relationship to create more useful space - 24 hour use of space will equal less space needed overall.	4/3/2018
237	33	/policies/affordable-housing-production/	i like the Hex House idea of a pre-fabricated small house that would last 5-10 years and can being easily combined with others to form a community with minimal environmental impact, especially for homeless population, it would give them an address for other services to contact. Would also be a good idea to have affordable housing that easily separates into two units for either elder care, or renting out a room since more people live single now, could help with cost of rent/mortgage.	4/3/2018
238	35	/policies/innovative-housing-types/	pre fabricated houses that two people can put together with minimal environmental impact. Hex House, A-frame houses, Coodo 64. Get people out of underpasses and into homes, there are 10 vacant homes to every homeless person in america. We need to work with banks and cities to get families in these homes that will improve the neighborhood and be economical over all. Why is habitat building houses when they can renovate existing houses for cheaper. 1) increases neighborhood property values 2) deals with unsightly vacant houses 3) gets people off the street 4) more sober houses, st paul is the sober capital of the US!	4/3/2018
239	49	/policies/educational-and-economic-access/	1) if someone loves wood shop class and wants to maybe spend a couple summers as an intern, they should get a certificate to find a career in wood making 2) how do we get unions and employers to invest in said certificate training to their own vitality and helps their bottom line and future projections? 3) racial disparities in school start at home, why aren't their parents home reading to them starting young? because they're working 3 jobs or have an addiction? don't know that's what they should do because their own upbringing is lacking? if the parents dont care we need to have access to early childhood development for children and parents to learn. education starts at home, how to keep families together, with their kids, creating childhoods that create productive adults.	4/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

240	50	/policies/access-to-technology/	the State of Minnesota needs to stand up for Net Neutrality protections to ensure everyone has equal access to information no matter their income. We need to teach 'adulthood' in high school: here's what your credit score means, here's how loans can screw you, maybe you don't need a 3,000 sf house when you're 30, living within your means sometimes means you can't have a \$5 latte every day, doing your own taxes, etc to get people financially prepared as a defense against the shark of a banking institution looking for their money through fees and selling the 'american dream' to someone who can't afford it. knowing their rights with healthcare and the legal system.	4/3/2018
241	51	/policies/healthy-pre-k-development/	i agree with all of these things, how do we make this a priority for parents? find out what their current priorities are if not their kids.	4/3/2018
242	52	/policies/human-capital-and-a-trained-workforce/	how to get unions to invest in training the next generation? most of labor industry needs workers right now, trades like masons are aging out and need people fast. how to teach kids to take pride in hard work, pays well, don't need to be a basketball superstar to have a place in this world.	4/3/2018
243	68	/policies/energy-efficient-buildings/	changes needed to building codes - potable water usage, WHY WHY WHY do we flush our toilets at 1.3g/flush of drinkable water when other people can't even drink from tap? water should go from sink (potable), to clothes/dish washer, to toilet, to irrigation. that cuts our use 4x right there! i want to see solar panels or solar hot water on every roof in downtown! buildings create so much heat (energy) and we just let it escape through the roof. fines for people who don't upkeep their systems and hence have lights on at 2am or irrigating in the rain.	4/3/2018
244	16	/policies/environmental-impacts-of-transportation/	all of the above, for the commercial industry. i somewhat agree with privatized roads, the big trucks are the ones that destroy them, maybe they should pay to fix them. gas tax will decrease use. self driving taxis or a bus/monorail are the next step. strategic land bridges maybe be useful in preventing animal collisions.	4/3/2018
245	18	/policies/walking/	i take the skyway to work everyday, why don't we have a better mapping system for the skyway, businesses in the skyway, hours of those businesses. if i could know i could get there and the business was open, i'd probably come downtown more on weekends in the winter.	4/3/2018
246	33	/policies/affordable-housing-production/	While I support the goals here, there's very little meat on the bones. I would like the city to make more concrete commitments on supporting affordable housing. Both funding commitments and taking a harder line on not letting communities reject affordable housing developments in their neighborhoods would help. Perhaps relaxed land-use requirements for affordable developments. Give projects a density bonus for being affordable, and other commitments like that. Obviously the current situation is leading to the loss of much of our affordable housing stock, so we need a more concrete plan to address the problem.	4/3/2018
247	20	/policies/transit/	encourage companies to give worker incentives for walking/transit to work. it saves everyone money but it takes a lot of time and sometimes you get soaked on the way home.	4/3/2018
248	69	/policies/renewable-and-carbon-free-energy/	i agree with all of these, solar is the future. power to the people. smart grid technology to cut the power peak, burn our trash! 1 ton of coal to 4 tons of trash for the same amount of energy created, and we have a lot of trash! carbon tax credits to building that have a building automation system to decrease energy use from wasted energy. should not be against the law to be off-grid. Xcel Renewable Connect program is a great start.	4/3/2018
249	72	/policies/sustainable-water-system-management/	water catchment systems for high-use facilities like breweris etc, upgrade cleanup programs for the stormwater grates - clean out trash out of the water ways, filter water through infiltration landscape before it goes to open water sources.	4/3/2018
250	75	/policies/waste-reduction/	we have a trash problem, i pick up trash in my 3 block area just south of 94 and it takes about 4 hours a week if i did the whole area- about 10 plastic bags of trash (reusing) for my Neighborhood Community Organization. how can we incentivize our neighbors to do the same, or encourage the community that leaves the trash to find value it in. I'm proposing a system of 'recycling' where one bag of litter is like \$2 off city parking or something, can be done through 311 app potentially. States that have high recycle rates have less litter and most of what i pick up is 1) cigarettes (all parts) WHY AREN'T THESE BIODEGRADABLE YET 2) fast food plastic and wrappers WHY AREN'T THESE BIODEGRADABLE YET 3) recycleable bottles/cans. having a clean environment brings pride to a diverse neighborhood and decreases crime is what we've found in Steven's Square.	4/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

251	85	/policies/access-to-health-social-and-emergency-s	Look to Higher Ground and The Rose apartments for successful adventures. Giving people a place to be is the first step in creating a relationship between them and social services. Also for addition treatment, MN has basically NO HEROIN out-patient centers and right now the system is basically screwing people who can afford insurance and giving free treatment to those that don't, REGARDLESS IF THEY WANT TO ACTUALLY BE IN TREATMENT. we dont have enough spots or money for people who dont want to be in addiction treatment. we need to DECRIMINALIZE MARIJUANA, it is proven to help people get off opioids, reduce opioid dependence, is safer than alcohol, and keeps kids out of jails that turn them into criminals. Taxes from recreational marijuana have been put to addition treatment successfully in states like Colorado. MN also has basically no place to go if you're a man with children. Just now, we have a couple shelters that take pets since most women know what will happen to Fluffy if they leave the abuser ;(. Pets and children are a reason why women stay and we need to give them every opportunity to leave for a better life.	4/3/2018
252	27	/policies/transportation-partnerships/	some cities in arizona are allow their transit agencies to have a car rental or uber type system. why compete with the taxi/uber system when it needs to be embraced as the way of the future. they basically do it for Metro Mobility, this would just expand to the larger population and make their service more valuable as a part of a complete system. Transit agencies need to embrace the 'first mile, last mile" gap by bike share, uber options, shared riding vans based on consumer demand.	4/3/2018
253	84	/policies/public-safety/	first responders need more mental health training, the police should know before they arrive that someone there has a mental health issue. text to 911 is great and needs to be publicized. we need officers to reflect their communities, live in their communities, and send their kids to the schools in their communities.	4/3/2018
254	14	/policies/tree-canopy-and-urban-forest/	Good Policy. Now, extend the canopy into residential areas like North Loop and Mill District. Just because they are "historic" areas that didn't have tree cover in the past, doesn't mean they shouldn't have trees today. (After all, they weren't residential neighborhoods in the past, either.) Despite the fact that there are a lot of new restaurants and retail, it is a dismal area to walk in, especially during hot days in Summer. More trees would greatly soften the neighborhoods and mitigate the windswept nature of some blocks.	4/3/2018
255	1	/policies/access-to-housing/	Please stop building solely new luxury apartments. Please start building non-luxury apartment building or start to build townhouses in zip codes 55404,55408, 55403, 55405.	4/3/2018
256	35	/policies/innovative-housing-types/	We don't need dorms for adults here. We do need taller apartment buildings (6-10 floors instead of 5-6).	4/3/2018
257	43	/policies/housing-displacement/	Let's hope you actually come through with this, rather than forcing minorities out to the suburbs and letting young white couples buy up all the houses and gain all the equity.	4/3/2018
258	42	/policies/expand-homeownership/	This is great!	4/3/2018
259	42	/policies/expand-homeownership/	The city, will you be sitting next to me when I go in to ask for a mortgage? No, you won't Can you specifically state which banks you plan to broker deals with to ensure this new mindset? No, you can't. Can you offer strategies to new homebuyers on how to review loan types? Is this even possible? Are you planning to introduce expanded homebuying cost share partnerships like you did in the Jordan neighborhood in North Minneapolis is other places?	4/3/2018
260	41	/policies/tenant-protections/	I would like to see increased funding for volunteer legal services to help tenants facing evictions/unlawful detainers	4/3/2018
261	1	/policies/access-to-housing/	This is a wonderful idea, as long as there are strong incentives for owner-occupied multiunit buildings (or a condo model for building such as a fourplex); I don't want to see fourplexes that are managed by absentee landlords; Perhaps there could be incentives for owners of multi-unit buildings to rent out one unit to a low-income family?	4/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

262	33	/policies/affordable-housing-production/	One problem that I have seen as a homeowner advocating for affordable housing rentals in my neighborhood, is that other homeowners associate affordable housing unjustly with crime and they don't want it "in their back yard." Instead, we should look at areas where the affordable housing will create the neighborhood and current neighbors won't oppose it and as more people move in, it will already be affordable housing and there won't be a fight to add it to the neighborhood. In South Minneapolis, the old Sears tower (Midtown Global Market) is an excellent example of a industrial / commercial space turned into multi-economic housing. We should definitely do the same thing in areas of the city where there are vacant industrial / commercial lots that have been vacant for a long time. It has been a very long time that the building 345 Industrial Blvd. NE has been vacant. This would be a perfect location for affordable housing and other rental units. It is near bus lines and across the street from a school and playground and very close to the Quarry. If the concern is to keep that building industrial / commercial, create a building that has commercial on the bottom floor and apartment units on the top floors. As someone who works in a building close to that building, I would 100% support this option.	4/3/2018
263	1	/policies/access-to-housing/	Saving consistently vacant areas in production and distribution areas in the hopes that they will be occupied by industry is not helpful in solving affordable housing. Use consistently vacant land (i.e. 345 Industrial Blvd. NE) and turn it into affordable housing.	4/3/2018
264	0.1	/topics/land-use-built-form/	Regarding the proposal to allow four-plex buildings on any residential lot ... I think it would be wiser to allow duplex buildings, rather than 4s, on any residential lot. They would fit better on the 45 foot lots, particularly in regard to parking, they would be less of an economic detriment to the adjacent single-family houses, and they would be more visually compatible with the singles. I think that this four-plex proposal as it stands is the lazy way to address the need for more housing. Instead, the City ought to set a policy that would allow four-plexes on certain streets, such as bus routes and other selected higher-volume streets, and around designated commercial nodes.	4/3/2018
265	0.1	/topics/land-use-built-form/	Regarding the proposal to allow four-plex buildings on any residential lot ... I think it would be wiser to allow duplex buildings, rather than 4s, on any residential lot. They would fit better on the 45 foot lots, particularly in regard to parking, they would be less of an economic detriment to the adjacent single-family houses, and they would be more visually compatible with the singles. I think that this four-plex proposal as it stands is the lazy way to address the need for more housing. Instead, the City ought to set a policy that would allow four-plexes on certain streets, such as bus routes and other selected higher-volume streets, and around designated commercial nodes.	4/3/2018
266	0.1	/topics/land-use-built-form/	I think that the proposal to allow apartment buildings in the midst of single-family blocks on the Interior 2 land use districts would cause harm to the nearby singles. I think the City should write more nuanced criteria for where and how such buildings will be allowed. Look at the harm that was done in the past when those "garden apartment" buildings were dropped into the middle of detached-housing blocks.	4/3/2018
267	0.1	/topics/land-use-built-form/	HUGE steps forward for the City of Minneapolis. The city must keep up with the rising population and demand, and the only way to do that is to create more housing density, otherwise rental prices will cause many people to leave the city for more affordable ones. Myself and other people in the tech field who prefer renting to buying (for a shorter commute and freedom to move with job changes) will absolutely leave if rental prices become too high, and being a tech worker in Minneapolis will lose one of its main appeals: affordability.	4/3/2018
268	0.1	/topics/land-use-built-form/	I am opposed. Protect the beautiful historic homes of this neighborhood.	4/4/2018
269	0.1	/topics/land-use-built-form/	The land use and built form should respond to more than just transportation routes. What happens when you overlay critical watershed areas? Or how do you plan around different civic assets? How does it respond to greenways and different proposed park connections?	4/4/2018
270	0.1	/topics/land-use-built-form/	Looks at Civic Commons by Studio Gang or Liquid Planning by Made Studio. Why does our land use and built form not respond to other influences beyond transportation.	4/4/2018
271	0.2	/small-area-plans/	We need to find a way to get rid of the massive parking lots around Hiawatha and Lake Street. Particularly the Target and old Rainbow Foods sites.	4/4/2018
272	0.1	/topics/land-use-built-form/	Why doesn't the built form step down or change as it approaches the Mississippi River or Minnehaha Parkway?	4/4/2018
273	6	/policies/pedestrian-oriented-building-and-site-de	Can you add a tax, fee or regulation to encourage businesses to remove existing drive thrus?	4/4/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

274	0.1	/topics/land-use-built-form/	<p>Why doesn't the city create overlay districts for critical watershed areas, parks, and civic institutions and then develop a set of guidelines for developments in each of these overlay districts. For example, the watershed overlay could suggest permeable pavers, rain gardens, bios Wales, "blue streets", and green roofs.</p>	4/4/2018
			<p>http://www.ci.minneapolis.mn.us/cped/planning/cped_industrial-landuse</p> <p>The Industrial Land Use plan for the SEMI (currently BNSF railyard between UMN and Como) had previously centered about a main goal of converting the core of SEMI into park, surrounded by industrial/tech companies incubated and spun-off from the UMN.</p> <p>The plan also involved the rehabilitation of the SEMI superfund site to remove the creosote as well as legacy industrial waste, rehabilitation of the derelict underground stream which empties into the mississippi ('Bridal Veil'), and rehabilitation of the surface area and the creation of surface water also.</p> <p>Furthermore, the creation of this park-surrounded-by-tech/manufacturing-spin-offs would (if I recall correctly) place a large park into an under-parked region of the city (I don't think there's much east of Van Cleve Park) in order to meet long-term Minneapolis/MetCouncil park accessibility goals, as well as fill in the "Missing Link" to the Grand Rounds circuit.</p> <p>This plan (that was on the Minneapolis website) was the reason that Surly chose their destination brewery location (only place in the city with land + (future) water at the right price), and was much of the impetus for the Dinkytown Greenway to connect this future park with West River Parkway.</p> <p>The 2040 Small Area Plan for the area should not simply designate the entire SEMI as an industrial zone with million square foot industrial buildings and service roads, rather it should be designated as a job creation zone in a desirable location [(centrally located, near a large park (with views!), adjacent to the UMN (innovation hub) and transit (existing rail ROWs)] with the potential to create lots of desirable jobs (again, UMN spin-offs). This location is uniquely situated to achieve this in Minneapolis, and the plan should support this vision (high tech hub, job creation zone, park, good future transit potential, on the Grand Rounds for bike commuters, etc).</p>	4/4/2018
275	0.2	/small-area-plans/	<p>I don't see BNSF abandoning the property any time soon, but the small area plan for the SEMI should reflect the sites unique potential.</p>	
276	76	/policies/new-parks/	<p>the SEMI (currently BNSF railyard between UMN to the south, and Como Ave to the north) has been slated for parkland redevelopment by the city of minneapolis in the past, it should continue to be in the conversation for parkland to fill in the Grand Rounds Missing Link, and serve under-parked areas in the surrounding communities.</p>	4/4/2018
277	74	/policies/integration-of-water-management-into-	<p>Add specific language allowing boulevard conversion from sod/grass to rain catchment areas (rain gardens), and other ecologically beneficial habitats (for pollinators, etc). (also, rooftop sod?).</p> <p>My neighborhood (whole city?) implemented an additional storm drain fee for % of building area on the city lot (ie overbuilt lots pay some additional storm/sewer fee due to excess rainwater production). Allow offsets/allowances for rainwater mitigation, if applicable.</p>	4/4/2018
278	34	/policies/affordable-housing-preservation/	<p>Focus more on current residents' needs in affordable housing than enticing new, white, rich money into the city with luxury apartments. Give tax breaks to orgs building affordable housing, and tax spikes on orgs building luxury housing. Make it more enticing to build and renovate affordable housing than luxury housing.</p>	4/4/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

279	0.2	/small-area-plans/	<p>We live in the Midtown Greenway Land Use and Development Plan Small Area Plan on Lake Street and Excelsior Boulevard. There was recently approved a new development on this intersection by Brickstone Development. It was controversial, but with the assistance of Lisa Goodwin, a compromise on the height of the new apartment building was worked out that everyone can live with. It is 8 stories of housing. Your new Comp Plan would allow for buildings up to 30 stories high in this area. That height is in violation of the current Shoreland Overlay Policy. It is also contrary to all of the efforts done over the years, especially most recently by Lisa Goodwin, CIDNA, and others, to work collaboratively with the Developers of new housing projects to build new housing projects that work for all of those stakeholders in the area where new developments are being built.</p> <p>This is a very sensitive area with its location immediately next to Bde Maka Ska (Lake Calhoun). Yes, it is close to the new Lake Street LRT Station that will be built (hopefully). That said, there are already many developments being built and proposed in this immediate area that will add a significant number of new housing units. This area already has significant transportation issues, especially during rush hour. These transportation issues will not go away and will soon get worse with as all of the new developments being planned. There have been studies on how to remedy this problem and there are simply not solutions because of the geography of the area " there is no land to add another east-west street. Funding for major improvements needed, or even funding for small improvements is not available because Hennepin County must buy in to this problem (and help fund it), and from what I was told this fall, they won't even talk to the City about this issue.</p> <p>In conclusion, this small area you are proposing to change to Transit 30 simply cannot accommodate a Transit 30 designation. I strongly oppose your proposed designation of Transit 30 for this area. Mark Beltz.</p>	4/4/2018
280	49	/policies/educational-and-economic-access/	This is KEY to the success of any other goals of Minneapolis.	4/4/2018
281	52	/policies/human-capital-and-a-trained-workforce/	This is an excellent, important policy. Continue investing in nonprofits like PPL, Emerge, Resource, Twin Cities Rise, and Hired!	4/4/2018
282	59	/policies/downtown/	Encourage retail businesses and restaurants to remain open on the weekends to attract tourists. All are going to MOA now with the lack of downtown amenities on the weekends.	4/4/2018
283	1	/policies/access-to-housing/	<p>I am opposed to converting Single-family dwellings into multi-unit housing for two reasons:</p> <ol style="list-style-type: none"> 1. Landlords tend to not support their rental properties as do committed home owners. The risk of degraded and degrading properties (eyesores and safety hazards) grow as a result. 2. Home ownership is a goal to which many should strive as it provides a solid investment in they and their families futures as well as the future of the community. 	4/4/2018
284	1	/policies/access-to-housing/	I think there is a very good reason for zoning areas for single-family housing as opposed to multi-family dwellings, light industrial or commercial development"so that homeowners know what to expect from their surroundings before they buy a home and that the city is following that zoning agreement. Homeowners, all of whom make a huge financial investment in purchasing a property, should not be then subject to changes in zoning or housing that materially change their living experience or negatively impact the value or desirability of their property. Neighborhoods have been planned to accommodate lots, houses, garages, and streets of particular sizes, and a certain number of properties per block. A typical city lot in Minneapolis is not large enough to accommodate a 3- or 4-unit building with a sufficient setback from neighboring houses, nor is there enough street parking to accommodate all of the vehicles that come along with such density. Would homeowners in surrounding properties be able to approve or veto such plans? I assume they would get no say in the matter, and the city has no right to retrofit neighborhoods against the will of the people who live there. By choosing to live in Minneapolis, homeowners already accept higher taxes, more noise, pollution, stress, traffic, wastewater runoff, crime, density, and other annoyances (alongside of perceived upsides). I strongly oppose add tearing down single family houses in neighborhood interiors (e.) to build multi-family dwellings. What's more, if the city of Minneapolis were serious about affordable housing, it would stop allowing teardowns of small, affordable houses which are then replaced with ridiculously expensive houses that loom over neighboring homes, both out of character and out of scale with their neighborhoods.	4/4/2018
285	1	/policies/access-to-housing/	Totally against "small-scale residential structures on traditional size city lots with up to four dwelling units, including single family, duplex, 3-unit, 4-unit, and accessory dwelling unit building types." Minneapolis was built upon "the family neighborhood concept" that has worked very well. Why do you people want to destroy that concept. I love my neighborhood and the families that chose to live here and raise their children. COMMUNITY is why I live in Minneapolis! Do your urban experiments somewhere else! I am regretting voting for Jacob Fry. Is it his goal to turn Minneapolis into an East coast "Ghetto?"	4/4/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

286	1	/policies/access-to-housing/	I am opposed to allowing more than two units (I.e. Duplex) on a single 40 foot city lot. If the single family home is in one of the "farthest from interior" areas, reality is that each unit will have at least one vehicle if transit is more than two blocks away. There will be inadequate garage and/or parking space without eliminating the backyard. To accommodate four families, the footprint and height of the building would have to be increased-at that point, wouldn't it be better to have planned multifamily housing on bigger lots? We have experience in our area with 3 or 4 story apartment buildings built within 15 feet of a single story, single family home that has lost any privacy and sunlight exposure. If the multi unit dwellings are built by investors, I do not have any faith that the good of the people or the neighborhood will be considered.	4/5/2018
287	1	/policies/access-to-housing/	This comment screams eminent domain: ...minimize the displacement of existing residents... You are claiming that your ultimate goal is to provide more affordable housing and yet 'McMansions' for half million dollars are going up in place of those 'affordable homes' that were torn down. Seems there's a problem right there. You are looking to add single family (starter homes) but what's going up isn't affordable to anyone who would be interested in starter homes. Perhaps look internally at what the City is allowing before going after the neighborhoods that are functioning and stable, already (happily) full of diverse members: ages, race, creed, color, gender and income. Finally, I did not work hard over the last 20 years on the betterment of this house and subsequently, the neighborhood, to move out as I age. Stop trying to push the elders out!	4/5/2018
288	81	/policies/social-connectedness/	I know this is referenced in item E - but Please include more funding for community centers. Many existing centers need upgrades and more staffing, especially.	4/5/2018
289	66	/policies/air-quality/	I like the sound of these action steps. As a resident of Bottineau, I need to see actual results in shutting down the Gaff shingle factory. If we are serious about these commitments to clean air, that is the first change that must happen, as it is long overdue. The Riverfront property there could be repurposed for any number of your other forward-looking, sustainable, healthy ideas. Gaff has got to go.	4/5/2018
290	19	/policies/bicycling/	Minneapolis' commitment toward a strong city-wide system of bikeways are a major reason I continue to live in this city. I would, however, like to see it spelled out that protected, above-grade bikeways such as the one on Washington Ave. downtown are priority, with bollard-protected bikeways as second priority. These are necessary to truly keep pace with our reputation as a worldwide-respected biking city.	4/5/2018
291	19	/policies/bicycling/	Minneapolis' commitment toward a strong city-wide system of bikeways are a major reason I continue to live in this city. I would, however, like to see it spelled out that protected, above-grade bikeways such as the one on Washington Ave. downtown are priority, with bollard-protected bikeways as second priority. These are necessary to truly keep pace with our reputation as a worldwide-respected biking city.	4/5/2018
292	6	/policies/pedestrian-oriented-building-and-site-de	Eliminating parking minimums is the most crucially important part of this section. It absolutely MUST be done if our city is going to move forward. In theory I approve of prohibiting new drive-throughs and gas stations, but I wonder if what this does is make existing gas stations in inappropriate places more "treasured" as they cannot be replaced. Gas stations like the three on Hennepin Ave in Uptown or on Lake and Aldrich where transit-oriented development would be more appropriate may be less likely to be replaced. There are much more appropriate spots in our city for gas stations than some of the spots they currently lie. I would worry a bit about this. Definitely no more drive-ins, though.	4/5/2018
293	11	/policies/skyways/	Tear down the skyways.	4/5/2018
294	10	/policies/street-grid/	Cap all trenched freeways and build over them. Until this is done, build pedestrian bridges over 94.	4/5/2018
295	22	/policies/downtown-transportation/	Ban cars downtown.	4/5/2018
296	80	/policies/development-near-metro-stations/	Something feels a little wrong when development is prioritized near BRT stations. This also means you are prioritizing development near freeways, which cut through the city and tear areas of the city apart. Usually historically undesirable places to live. More needs to be done to connect different sides of the freeways apart if development is going to prioritized there.	4/5/2018
297	18	/policies/walking/	In the entire transportation section I do not see the need to prioritize accessibility for people who are disabled explicitly stated anywhere. I would think about winter, especially - what can we do to make our sidewalks and streets accessible?	4/5/2018
298	1	/policies/access-to-housing/	Yes. These are all commonsense statements.	4/5/2018
299	42	/policies/expand-homeownership/	Improving homeownership efforts should be exclusively focused on low-income, POI residents.	4/5/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

300	33	/policies/affordable-housing-production/	It should no longer be legal to convert a duplex into a single family home, and it should be legal throughout the entire city to convert a single family home into a duplex. This is a way to put more NOAH on the market. Make fourplexes legal throughout the entire city.	4/5/2018
301	50	/policies/access-to-technology/	US Internet offers the best and most affordable rates for internet but isn't installed in some of the lower income areas (including powderhorn) where the residents would benefits from greatly.	4/5/2018
302	34	/policies/affordable-housing-preservation/	One way the city and county could make it easier for lower-income people to stay in their homes is by stopping the rapid escalation of assessed values of homes that has taken place in the past few years. When assessed values of homes rise by double digits, far outstripping incomes, people can no longer afford to stay in their homes. This applies both to owner-occupied and rental housing, since higher property taxes lead to higher rents. The increase in assessed valuation of homes should be held down to the rate of inflation.	4/5/2018
303	43	/policies/housing-displacement/	One way to keep housing affordable is to keep taxes from rising faster than incomes. This could be helped by halting the rapid rise in assessed valuation of owner-occupied and rental housing that has occurred the past few years, which is pricing lower and middle income people out of their homes.	4/5/2018
304	19	/policies/bicycling/	The map published at http://www.minneapolismn.gov/www/groups/public/@publicworks/documents/webcontent/wcms1p-081436.pdf should be updated so format, content and web access match other Mpls bike system maps.	4/5/2018
305	0.1	/topics/land-use-built-form/	I greatly support adding density to our city, through mixed use zoning. I am also very supportive of allowing up to 4 dwelling units, like in interior 1 zones! Thank you!	4/6/2018
306	0.1	/topics/land-use-built-form/	Buildings should be required to be taller than 8 stories in the Core 50 districts. Buildings in the CBD should really all be 20+ stories	4/6/2018
307	20	/policies/transit/	In order to keep mass transit effective, all future mass transit needs its own dedicated lanes. Busses may be fine for a city of 300,000 or less, but the city is past that and is growing. Adding more bus service just creates bus bunching which increases traffic and serves no one well, so the city should focus on rail modes of transport that travel in their own dedicated lanes and through high density areas to better connect the city.	4/6/2018
308	15	/policies/transportation-and-equity/	For equitable outcomes the city should reconsider routing rail transit through north Minneapolis because planning a bus route that will not be as fast nor as effective as the planned rail lines to the mostly white burbs is not equal treatment	4/6/2018
309	66	/policies/air-quality/	Adopt policies that encourage less mowing on public and private land. Enforce restrictions on idling. Transition city fleets to electric. Ban gas powered leaf blowers.	4/6/2018
310	13	/policies/landscaping/	Encourage unmowed areas on public and private land.	4/6/2018
311	1	/policies/access-to-housing/	I fully support increasing density in all areas of Minneapolis. This is essential to prevent rising prices from driving all but the wealthiest from the city.	4/6/2018
312	6	/policies/pedestrian-oriented-building-and-site-de	I fully support this goal. I am a disabled user of public transit and believe the city is much too car friendly, to the detriment of other modes of transportation.	4/6/2018
313	8	/policies/public-safety-through-environmental-de	I am concerned that the well intentioned emphasis on clear sight lines has resulted in over-mowed neighbourhood parks. Most neighborhood parks have no natural landscapes at all. I wonder if we could balance the quest for public safety with the inclusion of some more natural, unmowed areas in our neighborhood parks.	4/6/2018
314	18	/policies/walking/	Improved enforcement of sidewalk snow removal is essential. The current system is completely non-functional. Every winter tens of thousands of properties are in violation of the snow removal ordinances with no consequences whatsoever.	4/6/2018
315	1	/policies/access-to-housing/	I am concerned about the proposal to build multi unit dwellings in Mpls. I have lived in Mpls proper for 40+ years. It has been exciting to see the growth of new businesses but the increased traffic and parking issues detract from the excitement. We are all ready experiencing parking issues in much of Mpls. The thought of increasing the population without requiring parking for new units is concerning. I own a car but am an avid walker. I love walking to restaurants, the grocery store, the library, the movies, the parks, etc. When I worked, I often walked over a mile to/from the Light Rail. I don't remember ever walking with a fellow LR rider more than a few blocks. And on most other pedestrian outings I am usually one of the few people walking. I fear Mpls residents are not ready to walk more than a few blocks. If that is true, the traffic and parking problems will continue to accelerate as multi unit dwellings are added.	4/7/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

316	1	/policies/access-to-housing/	I oppose removing zoning limits on multifamily housing in single family neighborhoods. Its not the 1930s and zoning in 2018 isn't about restricting access to one race or another, its about creating neighborhoods of similar types of structures, not similar types of people. Housing choice should be about giving people the option of living in beautiful low density, mid density or high density neighborhoods. Eliminating zoning restrictions could lead to every neighborhood turning into a generic mid-density neighborhood with a Frankenstein mix of structures that don't fit together. We should preserve the character of our individual neighborhoods and let people choose what type of neighborhood they want to live in, rather than letting developers build 4-plexes wherever they want.	4/7/2018
317	80	/policies/development-near-metro-stations/	This is a great policy. Additional density makes sense near transit stations, where it is less likely to have a negative impact on traffic congestion and were new, walkable neighborhoods can be created. This is a much better plan than trying to add density throughout the city by changing zoning restrictions.	4/7/2018
318	16	/policies/environmental-impacts-of-transportation/	I highly support the goal to reduce Minneapolis's impact on climate change and to continue to develop low-cost transit and electric car options. Bike commuting on the other hand is not a reasonable solution for a climate like ours. Spending money on bike lanes that rarely get used is a waste of resources.	4/7/2018
319	17	/policies/complete-streets/	Take a poll, few people want to bike to work in the Minnesota winter. The conversion of vehicle lanes to bike lanes has increased congestion and pollution. This makes the environment worse for people walking and slows our bus transit system down. On-street bike lanes are not the solution.	4/7/2018
320	17	/policies/complete-streets/	Take a poll, few people want to bike to work in the Minnesota winter. The conversion of vehicle lanes to bike lanes has increased congestion and pollution. This makes the environment worse for people walking and slows our bus transit system down. On-street bike lanes are not the solution.	4/7/2018
321	18	/policies/walking/	I strongly oppose "traffic calming" which only causes congestion and pollution. It slows our bus transit systems making the commutes to work longer. While safe sidewalks is a good goal, "traffic calming" is not the right solution.	4/7/2018
322	19	/policies/bicycling/	Building bikeways is fine but adding on-street bike lanes only makes the commute worse for the 95% of us who are using some type of vehicle transit to get to work. Downtown traffic is a mess and those new bike lanes are largely to blame.	4/7/2018
323	7	/policies/public-realm/	This is an important priority.	4/7/2018
324	17	/policies/complete-streets/	While walking and biking are nice alternatives, they shouldn't be the priority over the transportation that the vast majority of the city has chosen. We should look for ways to make vehicle transit faster, more efficient and less carbon intensive not make it worse for everyone so that a small handful of people can bike on every street in the city.	4/7/2018
325	11	/policies/skyways/	Improving skyways makes sense, limiting them does not. Its cold, skyways are great and allow for downtown expansion, don't try to restrict new skyway development.	4/7/2018
326	22	/policies/downtown-transportation/	A walkable downtown is a great goal but if you restrict parking, people that come in from the suburbs to enjoy the city (and spend money at the businesses and restaurants) will stop coming. Stop trying to make life worse for the 95% of the city that uses a car.	4/7/2018
327	26	/policies/vision-zero/	Balance safety with the needs of the 95%+ of people in the city who rely on the transit network to get around. Reducing speed limits to 5mph on every street would probably lower accidents but the city would grind to a halt. Changing the streets to make them safer for pedestrians always comes at a cost, don't forget to consider those costs when making changes to streets.	4/7/2018
328	14	/policies/tree-canopy-and-urban-forest/	Great ideas	4/7/2018
329	32	/policies/arts-in-community-development/	Public spaces should be designed to reflect our shared culture as Minnesotans regardless of race or ethnicity. Creating public spaces that reflect cultures from other parts of the world only reinforces ethnic divisions. We shouldn't be celebrating the places everyone's grandparents are from, we should be celebrating the place that we have all chosen to live together.	4/7/2018
330	48	/policies/data-driven-decisions/	Data should be used to support decisions across the city to a much greater extent. City leaders should be making decisions that help the many over the few. Some decisions like adding bike lanes to downtown streets clearly lacked any kind of analysis to estimate things like cost per biker of establishing and maintaining those lanes or the impact on downtown traffic or pollution.	4/7/2018
331	0.1	/topics/land-use-built-form/	The built form map is almost ridiculously simplistic - applying blanket policies with little regard for historical development patterns or physical realities of the built environment, and seems to give little thought to the impact on existing residents or the qualities that make Minneapolis neighborhoods great places to live in the first place. This is planning for the maximization of developer profits at the expense of communities, pure and simple, with little reflection of citizen feedback. This is no way for a supposedly "progressive" city to plan in the 21st century.	4/7/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

336	15	/policies/transportation-and-equity/	Continue to invest in bicycle infrastructure, possibly even creating a more robust tourism industry centered around biking.	4/8/2018
337	16	/policies/environmental-impacts-of-transportation/	Continue building more public transportation routes and infrastructure! In addition to 30 day bike challenges, have 30 day public transportation challenges (with a celebratory feel to them). Create a culture of cool surrounding use of public transportation. "By taking the bus and light rail you are doing your part in reducing carbon emissions and creating a cleaner, safer world for us all!"	4/8/2018
338	17	/policies/complete-streets/	Fantastic!	4/8/2018
339	19	/policies/bicycling/	Please consider adding better maintenance of bike lanes and other bicycle facilities to your list of action steps. Many of the city's bike lanes and trails are virtually unusable during the winter due to lack of maintenance. Bike facilities should be maintained as well as the streets used by automobiles if you actually want people to use them.	4/8/2018
340	0.1	/topics/land-use-built-form/	This comment relates to the Built Form Corridor 4 and is specific to Southwest Minneapolis. Upton St from 36th South to 44th. 44th Street from Upton west to France; and Xerxes south from 44th to 62d. While the designations of the corridors of the built-forms (for the sake of simplicity) make sense in the when looked it on a map it a a clean picture, the reality is that the designations of the built forms does not align with reality today, the historic nature of neighborhoods and quality of life in terms of the ability to walk, site lines for pedestrians and drivers, adequate on street parking, etc. The reality of the plan makes no sense compared to what I consider is a fairly balanced current set of zoning rules for the area today.	4/8/2018
341	6	/policies/pedestrian-oriented-building-and-site-design/	<p>There is simply far too much of an anti-automobile bias in the goals and action steps. While a world without cars and where everyone walks or takes public transportation sounds excellent, the reality is that we (the United States, State of Minnesota, and the Minneapolis metro area) are simply not built for this and healthy neighborhoods and commercial zones (even neighborhood center commercial zones) will require places for cars to park so that there is access. This access will be important for people when they visit the city or want to come into the city to work or eat.</p> <p>The mandate that new construction has parking needs to stay. Streets simply cannot absorb increased numbers of cars because that in itself creates a safety and quality of life hazard.</p> <p>If you build, you need to include parking either below surface or on the surface or above the surface.</p> <p>Auto repair businesses are important and they are a neighborhood resource. Whether a gas station or a garage, we need not to target them as a bad thing. They simply are a necessity.</p>	4/8/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

343	1	/policies/access-to-housing/	<p>Yes, diversity of housing options is essential. Single family homes are not affordable for many residents who might desire home ownership, but more options to buy a portion of a duplex, triplex or fourplex may provide more access across racial and generational lines.</p>	4/8/2018
344	33	/policies/affordable-housing-production/	<p>I agree with these action steps and would suggest looking at adding a policy for larger scale projects that require a minimum number of affordable units</p>	4/8/2018
345	34	/policies/affordable-housing-preservation/	<p>I agree with these action steps</p>	4/8/2018
346	35	/policies/innovative-housing-types/	<p>Diversity of housing options helps meet the needs of a diverse population; however, market forces may promote certain types of housing over others. Policies need to be adaptable to changes in the market in order to grow types of housing that may not be naturally occurring in the marketplace.</p>	4/8/2018
347	37	/policies/mixed-income-housing/	<p>Mixed income housing needs to be viewed both in medium to large scale developments but also within other contexts like neighborhoods. Our neighborhoods need more diversity of income (affordable housing options need to be throughout the city).</p>	4/8/2018
348	80	/policies/development-near-metro-stations/	<p>Minimum land use requirements is key along with the focus on walkability/biking over car use.</p>	4/8/2018
349	38	/policies/affordable-housing-near-transit-and-job	<p>Many of the parcels targeted by this plan that are close to streets deemed transit centers are stable, primarily single family homes. It is very destabilizing to have the city targeting these areas for forced development with plans that include acquiring and combining parcels to promote the affordable housing push. Why attack stable family neighborhoods with this destabilization when there are undeveloped parts of the city crying out for investment. The idea the city should acquire parcels that are not in need of development, neglected or blighted in a social engineering initiative is completely unacceptable.</p>	4/8/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

352	0.1	/topics/land-use-built-form/	The built form map is very disturbing. the map essentially extends what we think of as uptown-level density today (4+story apartments) down residential streets like Bryant, 50th, 46th street etc... and treats them like west Lake street. It's inappropriate to be pushing massive tall housing buildings down all these streets and then pushing 3+ story to the adjacent blocks. You are proposing to divide and tear up stable single family neighborhoods with these massive arteries of streets that today are just another neighborhood block. The proposal for these so called transit routes far from downtown should be no more aggressive than 3 story multi-family, the type of buildings found today in the city. look at the massive building on 36th and Bryant northeast corner. It casts a shadow that keeps the block in darkness much of the day. You'd propose that Bryant could be lined with such buildings? Because that's what the plan suggests. And of course, all these plans with no parking accommodations is an invitation for uptown like gridlock to be spread all through the city instead of just the really dense neighborhoods.	4/8/2018

354	36	/policies/innovative-housing-strategies/	relax laws and increase incentives for people to invest in sober housing, with transit oriented development. we need more sober housing	4/9/2018
355	79	/policies/healthy-youth-development/	i support high schools integrating tech school certificates into their programs like wood shop, mechanics, agriculture etc to get students lined up with work when they graduate.	4/9/2018
356	85	/policies/access-to-health-social-and-emergency-s	increase mental health advocates support on the police force as first responders to avoid incidents of someone being harmed by an officer in the midst of a mental episode.	4/9/2018
357	46	/policies/healthy-housing/	i know the statistics are greatly improved when a nurse visit to a home after pregnancy is required to ensure a safe space, answer any questions from the family, and provide general support and resources.	4/9/2018
358	85	/policies/access-to-health-social-and-emergency-s	redefine our in-patient addiction treatment guidelines, our mental health and addiction counseling professionals are being made to put any one in treatment even if they dont want to go to treatment. time and again, no space is left for people who want/need emergency placement. to tell a heroin addict they need to wait a month for treatment is like a death sentence. they've even told users they "haven't used heroin long enough" to go to treatment. we need to relook at our guidelines to make sure that there's room in treatment facilities for people who want it. What is the success rate of our current guidelines or are they overkill? painting with a broad brush, when we don't have room for that and can't help people when they've reached their "rock bottom". We need to assess what works with reduced relapses and returning to treatment to ensure we're using our treatment resources responsibly.	4/9/2018
359	0.1	/topics/land-use-built-form/	As a resident of South Minneapolis, I am strongly opposed to this proposed land use plan. The corridors along Bryant Ave. S., 46th, and 50th (Corridor 4, Interior 3) are predominantly residential, single family homes without commercial properties. This was the primary reason many families chose to move there. In addition, Bryant, along with Interior streets are quite small as it is, to make a change like this will not only negatively change the neighborhood, it will create unbearable congestion due to additional residents parking vehicles on the streets. There is no way to widen the streets without removing the tree lined boulevards. Removing trees, some of which are 100 years old, would negatively impact the neighborhood as well as the environment. After thorough review of how this could be done well, there simply isn't a good answer. Therefore, I urge the city leaders to reconsider this plan.	4/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

361	20	/policies/transit/	There is an assumption in this plan that higher densities magically result in better bus service. Uptown and the North Loop have added thousands of residents, but Metro Transit hasn't improved bus service in any meaningful way. Rather, they are putting resources into expensive LRT and BRT to un-walkable places.	4/11/2018
362	18	/policies/walking/	It is April 11 and there are still sidewalks covered in snow and ice. Perhaps, Minneapolis should put as much energy into clearing sidewalks as they do roads?	4/11/2018
363	59	/policies/downtown/	Most of the older, more affordable retail buildings have been torn down, and it appears small businesses cannot afford to go into new buildings replacing them.	4/11/2018
364	65	/policies/urban-agriculture-and-food-production/	Agriculture in the City is a waste of land. Farms should go in rural areas with higher densities in Minneapolis	4/11/2018
365	35	/policies/innovative-housing-types/	We live next to a house owned by The City of Minneapolis. What are you going to do to ensure housing fits the neighborhood? The city told our block that the house they planned to build will fit in architecturally. It does not. Further, the property is not maintained. This decreases our home value. Additionally, whatever process the city uses to screen renters does not work as they have had to evict numerous tenants in the past. Please do not repeat these mistakes!	4/11/2018
366	1	/policies/access-to-housing/	This does not address affordable housing, just more housing which may drive down rental prices a bit but will not help those who make 30% or lower AMI. It will just make developers rich. I support some changes in zoning to increase different housing options but some need to be affordable for the very very low income and supporting NOAH apartments and homes is a helpful way to do so. I also want to preserve small family homes and not see them knocked down to build 4 plexes.	4/12/2018
367	1	/policies/access-to-housing/	This does not address affordable housing, just more housing which may drive down rental prices a bit but will not help those who make 30% or lower AMI. It will just make developers rich. I support some changes in zoning to increase different housing options but some need to be affordable for the very very low income and supporting NOAH apartments and homes is a helpful way to do so. I also want to preserve small family homes and not see them knocked down to build 4 plexes.	4/12/2018
368	89	/policies/technology-in-the-city-enterprise/	Technology: citizens should be able to request a voucher for the South transfer facility by email 24/7, instead of ONLY by phone during limited hours.	4/12/2018
369	3	/policies/production-and-processing/	Distribution: people are not going to make major purchases (new cars, furniture, appliances, etc.) in the city when they can go to a nearby suburb and save a lot of money by not paying the excess Minneapolis sales tax for the damn stadiums.	4/12/2018
370	17	/policies/complete-streets/	As I've gotten older, I can no longer walk any distance unaided. I have had to cease biking and use my car for shopping, going to meetings or entertainment or dining. But the city has been constantly making it harder to drive on city streets. Now in this policy you flatly come out and admit that this neglect is intentional! Looks like you only want young, non-disabled urban professionals in the city, and expect the rest of us to move out.	4/12/2018
371	1	/policies/access-to-housing/	<p>Hello,</p> <p>I live the SE Minneapolis and I do not like POLICY 1. The lots and tear-downs around my house are relatively cheap compared to other great locations in MPLS and developers are buying them before families can and turn them into these 3k-4k sq. ft. houses that don't match the neighborhood around them.</p> <p>If POLICY 1 is passed I believe the city will see more outside developers turning single family neighborhood and turning them into 4-plex neighborhoods. Prices for these apartments will still remain as high as the going rate. Parking isn't necessarily a problem here, but when I lived on 48th Ave with all the condos, apartments, and light rail riders my street was packed. I just don't want my neighborhood to turn into a cheap Uptown. Where you can conveniently park four blocks away from your apartment when the snow emergency is called.</p> <p>I'd send more effort in the areas that already low-income and building those places higher and making them better appealing for single family urban dwellers...Like the Bossen field apartments would be a great start. Or more high raises, condo on the LRT-Blue line where the builder can supply underground parking.</p> <p>I don't think POLICY 1 is solving a problem as it is creating more.</p> <p>Thank you for your time, Anders K.</p>	4/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

372	1	/policies/access-to-housing/	As a resident of South Minneapolis, I am incredibly concerned about the prospect of lifting zoning restrictions to allow the construction of fourplexes in virtually any neighborhood. To suggest that this will somehow "solve the affordable housing problem" is ludicrous. If I wanted to live in an area ripe with apartment complexes, I would move to Uptown. I'm also skeptical that this rezoning will be implemented equally across neighborhoods/wards. The primary beneficiary from this policy change will be investors, not Minneapolis residents.	4/12/2018
373	10	/policies/street-grid/	What is meant by vacations? Consider relinquishing the City's ownership over "vacations" as a last resort, in order to preserve the network of city streets and arterials.	4/12/2018
374	29	/policies/creative-sector-economy/	Need more affordable creation/work space for artists in all neighborhoods - not just NE (which is not all that affordable). All neighborhoods benefit from having artists live and do their creating in the same place. Need more art places in all neighborhoods - farther from downtown, the less arts-related spaces and businesses. Build up arts corridors such as Broadway and Chicago Avenues. In short, more ARTS in Minneapolis.	4/12/2018
375	13	/policies/landscaping/	Landscaping is also an important tool for attracting and supporting native species higher up in the food chain (insects, birds, etc.). The impacts of landscaping on native wildlife should also be a concern/priority. Thanks!	4/13/2018
376	33	/policies/affordable-housing-production/	Zoning to build more 4-plexes must be included (better if this happens immediately rather than 22 years from now). I currently live in Lowry Hill East and formerly lived in South Minneapolis. Brick 4-plexes look great, add character to the city, and are easy to maintain and affordable. The city is growing rapidly. I think of all those homes in South Minneapolis, if just one of those houses could be turned into a 4-plex (which is unintrusive enough that many have expressed that they live in a single-family neighborhood even when there are a lot of duplexes and 4-plexes around) on each street, that is so many more units. 4-plexes are also affordable enough for local community members to afford and manage, rather than passing it off to some company who doesn't care for the neighborhood because they are so detached from this city. My father who is a homeowner in Loring Park, in walking around Lowry Hill East with me, expressed how he would love to buy one of the homes in that neighborhood or really anywhere in the city and turn it into a 4-plex. He could manage and maintain the building himself (after all it would only be 4 units) and be able to create an income for himself. This allows for people to create a job and an income for themselves, pumping that money back into the local community and its members rather than paying some non-local company's bottom line. I'm a homeowner myself, at 24 years old. The only reason I was able to do this was by saving my inheritance of 10k throughout my undergrad in San Diego and keep building on that with my 40k job. If I didn't have that it would take me years to build up a down payment, especially considering that I used to rent an apartment ONE block south from my current home and would pay double the price, draining me into debt and inhibiting my ability to save further... I wanted to save further to afford more than a 450 sq ft home, but my finances could not take it, I had to buy while I could; especially seeing as how within the last two years I have been in MPLS, similar apartments were going for 20-30k less. I couldn't afford to wait another year and I was prepared and blessed with money, I can't say that for anyone else in a similar position (which is common)	4/13/2018
377	17	/policies/complete-streets/	I love seeing the fact that Minneapolis will be prioritizing street use in this way. Thank you! This example of progressive, forward-thinking is a huge reason why I keep my family in Minneapolis. I live in south Minneapolis and ride my bike year-round for 85% or more of my travels. I can tell you as an absolute fact I have found small businesses that I now support only because I was riding by them on my bike. Riding a bike allows one to explore their surroundings more easily. "Cities get the cyclists they deserve. If you have good infrastructure, you will get good cyclists." No one ever looked at a city and its traffic / transportation issues and determined that more cars on the streets will solve their problems.	4/13/2018
378	18	/policies/walking/	I left a similar comment under Policy 17, but this deserves a huge THANK YOU! as well. It is so refreshing to see that Minneapolis is prioritizing walking, biking, and public transit over cars. These decisions exponentially increase livability of our great city!	4/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

379	18	/policies/walking/	My wife and I walk everywhere here, and have lived in a number of truly wonderful walkable cities, and while the action steps above are useful (although very abstract) Minneapolis is very very far from being a pedestrian oriented city. Unlike pedestrian oriented cities like Boston, New York, San Francisco, being a pedestrian here is seen as a third-class citizen and thus pedestrian-friendly policies and designs are not integrated into the overall scheme of the city. For example, sidewalks are allowed to be built of inappropriate materials for rain or snow, building overhangs are not considered, traffic lights are timed for cars, lighting is overlooked, commercial design focuses on parking garages, and street safety is ignored, etc. The first step in trying to improve the situation is to frankly admit how dreadfully poor the current situation is and then begin to tackle the (interrelated) problems head-on instead of all the hand waving.	4/13/2018
380	19	/policies/bicycling/	I have already left comments under Policies 18 and 19, but again, I have to say THANK YOU! here as well. I live in south Minneapolis and ride my bike for a vast majority of my travels. The tipping point for me was realizing how easy it was for me to get to the places I need to go on protected bikeways (Minnehaha Parkway, Hiawatha Ave, the Greenway, etc). Even though I bike a lot I don't consider myself a "hardcore" biker - that is, I don't want to fight and go to war with automobile traffic. I have a family to consider and don't want to die on a street. But building and maintaining bicycle-specific infrastructure including signals, laws, signage, enforcement, and protected paths for both recreation and as "thoroughfares" for bicycle commuters helps me feel safe, engages me with the community in ways not possible in a car, helps me maintain a healthy lifestyle, and fills me with enormous pride for my city. I simply cannot say enough about how much this focus-shift from cars to other forms of transportation, especially bicycles, means to me and my family. In fact, it's a major reason we continue to live in Minneapolis. KEEP IT UP! "Cities get the cyclists they deserve. If you have good infrastructure, you will get good cyclists." -- Reetta Keisanen, cycling coordinator of Helsinki.	4/13/2018
381	1	/policies/access-to-housing/	I think 4 units per lot in all areas is unworkable and will have many adverse effects. It will NOT create affordable housing but will enrich developers. I bought my home with the expectation that my block and area would remain SFHs and this will devalue my home. I already pay very very high taxes and cannot go on with this change.	4/13/2018
382	94	/policies/heritage-preservation-regulation/	Minneapolis often does not honor its own Historic Preservation Commission decisions. I don't understand this. If the city council wants development to increase density they overrule or ignore the HPC's positions. Having moved to Mpls. five years ago and lived in cities which respect their historic heritage and neighborhood guidelines, I feel I have moved to a backward city. Once these historic treasures are lost, they are gone.	4/13/2018
383	20	/policies/transit/	New funding to maintain the transit shelters - need to keep them clean and safe for users of the transit system	4/13/2018
384	20	/policies/transit/	Need more transit police or street outreach workers and more homeless shelters to deal with the problems caused by homeless taking up residence in the bus shelters - transit users should not have to run the gauntlet of beggars etc in order to use the transit system	4/13/2018
385	20	/policies/transit/	Need more transit police or street outreach workers and more homeless shelters to deal with the problems caused by homeless taking up residence in the bus shelters - transit users should not have to run the gauntlet of beggars etc in order to use the transit system	4/13/2018
386	20	/policies/transit/	Need more transit police or street outreach workers and more homeless shelters to deal with the problems caused by homeless taking up residence in the bus shelters - transit users should not have to run the gauntlet of beggars etc in order to use the transit system	4/13/2018
387	20	/policies/transit/	Mass transit needs to run on time and the connections routes need to be better timed so they actually connect as scheduled	4/13/2018
388	57	/policies/cluster-strategy/	Businesses need parking spaces - lots of businesses close because loss of customers who can't find anyplace to park - are you going to have park and ride locations for people to take mass transit to restaurants and other shopping areas that are crammed in already in locations with inadequate parking?	4/13/2018
389	79	/policies/healthy-youth-development/	This site is very aesthetically pleasing; however, I think the text should be added to continuously as conversations develop. These policies are really hard to judge because they're so vague and broad as stated. This applies not just to this category of policies but to most others on the site as well. I'd like to know roughly what a specific piece of policy would actually look like, or at least have some more details in the "action steps" section.	4/14/2018
390	78	/policies/park-design-and-programming/	Have you read the MPRB 2007 community survey results? The results could inform the 2040 plan.	4/14/2018
391	1	/policies/access-to-housing/	Make sure you think about parking policies. When you relax requirements related to off street parking, those of us that live in the neighborhood have difficulties parking in front of our own homes. Eg...Red Cow parking issues in Fulton.	4/14/2018
392	0.1	/topics/land-use-built-form/	By allowing 4 units on city lots, you are getting away from individual ownership. There will be less green (trees, plants) on the blocks. Its sad that you are bowing to developers, instead of preserving individual ownership in the communities.	4/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

393	0.1	/topics/land-use-built-form/	<p>In general, it is a good plan that is long overdue. My comment is: Looking at 12th ave SE between 4th St SE and 6th St SE under Land Use Categories, the east side of 12th ave se is student apartments which will be zoned as Community Mixed Use. On the west side, the buildings on 1127 4th SE and 411 12th ave SE will also be zoned as Community Mixed Use, while 1125 5th st SE will be zoned as Neighborhood mixed Use. I do not know what is the logic to leave the houses (417 12th ave se, 425 12th ave se and 1126 5th st se) to be categorized as Unban Neighborhood? In the future, if the property owners on these buildings which are categorized as Community Mixed Use develop stores, restaurants etc in these building, the activities will greatly affect people's life living in the houses:417 12th ave se; 425 12th ave se; 1126 5th st se; and 1126 6th st se! These houses should also be categorized as Community Mixed Use which is the same as the ones on the east side of 12th ave se.</p>	4/14/2018

395	1	/policies/access-to-housing/	<p>I love the plan that allows 1,2, 3, 4 unit buildings and adding ADU but the ordinance around ADU's needs to be modified to allow non owner occupants to build ADU's. This is a biggest opportunity to add more housing options since landlords of 2-3 unit buildings already own the land and adding an ADU becomes more affordable to build and thus can be rented more affordably.</p>	4/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			<p>I think it would help some advocates get on board to hear specifics here. I love the Comp Plan, and I want to see tenant advocacy concerns addressed from the get-go. Just a few ideas. I am aware that some of these might be underway:</p> <ul style="list-style-type: none"> * Remove occupancy limits from being defined twice by the city: in the zoning code and in the building code * Renters' first right of refusal: in the event that landlords opt to sell the land, renters should be given the opportunity to purchase or lease * Dedicating more funds for preserving naturally occurring affordable housing if a landlord opts to sell the land * Explore local inclusionary zoning policy, with the caveat that inclusionary zoning policies have not had impressive results nationally. We must be careful to do this in a way, possibly incentive-based, that does not counterproductively discourage the creation of more housing. * Guaranteed housing if kicked out for redevelopment * Relocation fee assistance * Stronger regulations & enforcement of building code * "Just Cause" eviction ordinance * Establish a means to ensure landlords engage in equitable renting practices (See: housing discrimination against same-sex couples and trans people) * Removal of cisheteronormative "family" language in occupancy restrictions * Creation of a Renter Advisory Committee to the City Council * Redo processes for involvement: as part of the Neighborhood Revitalization Program, the city has funded a system of neighborhood associations (that primarily function as homeowners associations), many of which presently use city money to organize opposition to new housing. This process is overwhelmingly white, rich, and populated by landowners, leaving out the voices of everyone else. This is a power structure that reinforces the existing inequities in our society, and it must be dismantled. <p>Rent increase caps as an emergency stop-gap measure to protect against displacement (see: Whittier neighborhood & CPM), while recognizing rent increase caps alone are not the solution. If this becomes a primary strategy to prevent displacement and keep rents low: it will stifle housing investment, lead to discrimination against long-term residents, disadvantage new residents or existing residents looking for a shrinking pool of available housing.,. It's also important to note: rent control is prohibited by state law, which requires municipalities to pass rent control by ballot measure.</p>	4/15/2018
396	41	/policies/tenant-protections/		
397	41	/policies/tenant-protections/	How can we guarantee someone free representation in court if they are facing eviction?	4/15/2018
398	18	/policies/walking/	<p>I think it would be in the spirit of the complete streets policy if the city could study the feasibility of some form of municipal snow removal for SIDEWALKS. This winter has been a rough one for snow, and relying on homeowners to clear their sidewalks results in spotty sidewalks. It is rare to find a full block in CARAG that would be accessible to someone who isn't able-bodied. I understand that it is a large ask, but perhaps the city could start by clearing along bus lines during snow emergencies. Encouraging people to take transit and walk and stay off roads makes the city better for everyone. I'm fortunate in that I can just strap on a pair of Sorels and climb over and through snowbanks, but we are trapping the elderly and disabled in their homes, and encouraging people to drive when we prioritize roads over pedestrians.</p>	4/16/2018
399	26	/policies/vision-zero/	<p>I just want to really emphasize letter (i) here. Enforcement of existing traffic laws would really help. I see drivers blow through red lights on a regular basis, which is incredibly dangerous for pedestrians. I understand that there's a state-level issue with using red light cameras, but I would like the city to really crack down on that sort of dangerous behavior from drivers.</p> <p>On another note, I think the city should get a lot more aggressive with using no turn on red at intersections. Drivers turning right on red do not pay attention to pedestrians, and cutting down on the places that this is allowed would improve pedestrian safety.</p>	4/16/2018
400	6	/policies/pedestrian-oriented-building-and-site-de	<p>I love that this is in the plan. I walk a lot in places like Uptown but also Downtown St Paul. The varied storefronts butting up to the sidewalk in Uptown make for great walking. The blank concrete walls in StP are horrible. It really has an effect on how far I'm willing to walk. I would aim for little to no setback along commercial corridors. I've found that setting the building back isolates it from pedestrians in an unfortunate way. Encouraging sidewalk seating is also a great idea, and goes along well with creating nice and wide sidewalks. Also, in so far as there has to be surface parking, trying to tuck it behind buildings really helps. Nobody likes walking past a parking lot.</p>	4/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

401	39	/policies/fair-housing/	I would encourage the city to look at the fair housing guidance from HUD in the waning days of the Obama administration. They consider blanket criminal history screening to be a fair housing issue. I would like the city to look at enforcing a ban on landlords using background checks to screen for tenants. This screening has a disproportionate impact on poor people of color and is a driver of housing instability.	4/16/2018
402	4	/policies/access-to-commercial-goods-and-service	I'm not sure where exactly this fits, but it would be nice if the city were to find a way to allow/encourage smaller commercial spaces as well as bigger ones. It seems like a lot of newer mixed use buildings have really big commercial spaces in them that can be hard for a small business to afford. The most dynamic spaces are often in smaller footprints in older buildings. If we allow older buildings to be redeveloped into large mixed-use buildings, we should try to ensure that these new buildings allow local small business owners a chance to stay in the area.	4/16/2018
403	2	/policies/access-to-employment/	I just want to write in to support this part of the plan. Anything the city can do to discourage employers from locating jobs in far-flung, not-transit-connected suburban spaces seems like a good idea. Obviously this isn't always possible for large-footprint industrial uses, but for offices and services, there's no reason not to be near a transit node in Mpls.	4/16/2018
404	46	/policies/healthy-housing/	I would love to see the city put resources and pursue federal/state money in order to put in place an aggressive lead abatement program in the city. Lead contamination is highest in the poorest areas of the city, and lead abatement is a great bang-for-buck way to reduce disparities.	4/16/2018
405	1	/policies/access-to-housing/	I want to comment in support of these plans. If anything I would have gone farther to upzone deeper into the neighborhoods, particularly near high-frequency transit. Fourplexes are nice, but we are going to need larger buildings, too, and not always on arterials. The rate at which we need to be building housing to keep up with population growth and shrinking household size is considerable, and anything we can do to make sure that we keep up is helpful.	4/16/2018
406	0.1	/topics/land-use-built-form/	It doesn't seem like the built form map meshes with the land use map. For example, on the land use map, E 46st starting west of Hiawatha is an urban neighborhood, but on the built form map it is treated like a goods and services corridor. Similarly, on the land use map, Nicolet Ave has a big break in the goods corridor, but the break is not there in the built form map. In general, the built form map suggests a much more dense Minneapolis than the land use map. Minneapolis should clarify the vision and correct the maps. Personally I think that the solution is somewhere in the middle, skewed towards the land use map. I think 20 years is too short of a timeframe to get to the built form map.	4/16/2018
407	0.1	/topics/land-use-built-form/	It doesn't seem like the built form map meshes with the land use map. 408	0.1	/topics/land-use-built-form/	Tagging streets that are adjacent to transit routes with Interior 3 and Corridor 4 proposals is unfair and should be removed from this plan. This will open up a developer feeding frenzy and significantly degrade the neighborhoods. There is plenty of potential multi-lot development on the transit routes themselves.	4/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

409	34	/policies/affordable-housing-preservation/	<p>No kidding, but your "action steps" are anything but. What does it mean, exactly, to "create and strengthen strategies to retain naturally occurring affordable housing?" In Armatage and its surrounding communities, houses used to be relatively affordable 1.5 stories and ramblers with access to some of the best schools in Mpls. In the 18 years we've live here, more and more houses are being purchased by builders, demolished and rebuilt into huge homes of 3,000 sq. ft, or more. Frankly, living next to a fourplex would be little different to living next door to a 3,000 sq. ft. house. It appears that the Council has preferred milking these properties for the enormous property tax potential rather than focusing on keeping these homes available to families who don't have high incomes. The yearly rise in property taxes truly do price out families on fixed incomes who already live here (so no "minimization of displacement of existing residents") and certainly don't allow for someone living on a minimum wage to move in (you surely haven't help maintain the housing stock here).</p> <p>When we paid thousands of dollars to the city to get a waiver to put on a front porch, we were told to build in our backyard, yet builders have had free rein to build houses that completely overshadow any original housing stock, including filling up entire backyards with house and putting on front porches.</p> <p>Our neighborhood has lost its economic and social diversity due to the council's lack of interest in affordable housing, so some specifics would be appreciated. There's not much to comment on here apart from the complete lack of action over the past 10 years.</p>	4/17/2018
410	20	/policies/transit/	<p>Please do not use Bryant Ave. as a major transportation route, Lyndale is for that. It's a mere 2 blocks away, is already designed to be motorized vehicle friendly. Bryant should be a bike route only.</p>	4/17/2018
411	0.1	/topics/land-use-built-form/	<p>This is Brian Crotteau 4605 Aldrich Av S, owner single family home. I appreciate the work being done to better plan for future development in the city, but have to vigorously object to your plans to turn my block from single family homes into small apartment developments. The 4600 block of Aldrich is single family homes, and your images of zone 3 show it as entirely covered with apartments. This is a direct threat to my property, which I have invested in significantly in over the years and we do not want our block turned into apartments and condos. You should go back to the plans and eliminate changes that would kick residents out of their homes, this is unacceptable.</p>	4/17/2018
412	0.1	/topics/land-use-built-form/	<p>I'm writing in opposition to my block, 4600 Aldrich So., being included as an Interior 3 Built Form area. It is very upsetting that the city would encourage destruction of blocks of single family homes to make way for condos and apartments. This is a threat to the stability of Minneapolis and to the personal investments we on the block have made to our homes and to the health of our neighborhood. I plan to attend the meetings and to persuade you to alter the plans. This is unacceptable.</p>	4/17/2018
413	0.1	/topics/land-use-built-form/	<p>These Interior 3 districts, when used as transition zones as shown here, are the most problematic of all the proposed changes. They turn quiet single family blocks into potential blocks dominated by apartments and condos, wiping out the investment people have made when they purchased and improved homes on these quiet blocks. 3 story, multi-lot apartment buildings are not a transition to smaller single family homes, which people spent more to purchase on these blocks given that they were not on transit routes or commercial streets. Changing the zoning on these streets will cost homeowners hundreds of thousands of dollars in lost value and drive disinvestment. Homeowners have a reasonable assumption that their investment will not be jeopardized by a radical rezoning such as this using the past 100 years as precedent.</p>	4/17/2018
414	0.1	/topics/land-use-built-form/	<p>These Interior 3 districts, when used as transition zones as shown here, are the most problematic of all the proposed changes. Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

415	0.1	/topics/land-use-built-form/	These Interior 3 districts, when used as transition zones as shown here, are the most problematic of all the proposed changes. They turn quiet single family blocks into potential blocks dominated by apartments and condos, wiping out the investment people have made when they purchased and improved homes on these quiet blocks. 3 story, multi-lot apartment buildings are not a transition to smaller single family homes, which people spent more to purchase on these blocks given that they were not on transit routes or commercial streets. Changing the zoning on these streets will cost homeowners hundreds of thousands of dollars in lost value and drive disinvestment. Homeowners have a reasonable assumption that their investment will not be jeopardized by a radical rezoning such as this using the past 100 years as precedent.	4/17/2018
416	0.1	/topics/land-use-built-form/	The interior 3 transition districts are the most damaging part of the plan as they can completely change blocks that are not on existing transit or commercial streets. We never would have purchased and renovated our home had it been on a street with this type of zoning.	4/17/2018
417	20	/policies/transit/	Build out the Rapid Bus system and a streetcar system across the city. Especially the Midtown greenway rail project to connect people fast from the chain of lakes to hiawatha between SWLRT and Hiawatha LRT.	4/17/2018
418	11	/policies/skyways/	Don't let the skyways expand any further! Tweaking what we already know is bad won't bring people back to our bleak, downtown streets.	4/17/2018
419	11	/policies/skyways/	The City doesn't own the vast majority of skyways and cannot force standard signs or hours. Start tearing them down because they've wrecked downtown.	4/17/2018
420	11	/policies/skyways/	Stop wasting tax dollars on skyway expansion to City-owned buildings like the new office building. Don't allow any more retail on skyway level anywhere.	4/17/2018
421	15	/policies/transportation-and-equity/	The City doesn't enforce their own sidewalk clearance ordinance requiring them to be clear of ice and snow within 24 hours of a snowfall. Yet, they declare "Snow Emergencies" to ensure that cars can move and get stored quickly. Is that equitable?	4/17/2018
422	16	/policies/environmental-impacts-of-transportation/	What is the climate impact of the City actually owning and operating thousands of car parking stalls in big, ugly parking maps? Sell them or tear them down and use tax dollars for better places to walk, bike, or take transit.	4/17/2018
423	18	/policies/walking/	Do something about unshoveled sidewalks!!!	4/17/2018
424	20	/policies/transit/	We need transit that is actually faster and more convenient than driving, and Metro Transit only wants to provide that to people in the suburbs. We need subways, bus tunnels, and dedicated transit lanes- not more LRT to un-walkable places in the suburbs.	4/17/2018
425	0.1	/topics/land-use-built-form/	I am horrified at the proposal to turn my house and block into an apartment complex. My house is proposed to be corridor 4. I live on a block of 1920's craftsman bungalow or 2 story homes. An apartment building would ruin my home's access to sun as the lots are small and I appreciate having homes similar size to mine. We bought our home in this area to have a single family home close to the city, but quiet neighborhoods. Please do not endorse this plan. I'm at 4605 Aldrich Ave S. Please.	4/18/2018
426	16	/policies/environmental-impacts-of-transportation/	A quick question on letter "E" above - just wondering if there is more information on what type of fee or incentive would induce more people to use public transit and zero-emissions vehicles. Is there some type of policy in the works regarding this?	4/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

427	16 /policies/environmental-impacts-of-transportation/	<p>Please remember issues of equity and safety when disincentivizing driving and driving alone, especially for women with children, and use a less punitive word/approach. Development intensity needs to come first, before there's an emphasis on punishing people who already struggle with mobility. Job hours and day care/school hours don't align, and the burden of transporting children to school, doctor appointments, and to places that meet other needs (grocery stores, pharmacies, etc.) falls disproportionately on women. For women who need to do all of this, and work, and be at work for specific amounts of time, pick children up at different times at different schools and daycares, and don't want to be waiting at multiple bus stops with unpredictable children after dark or during winter months, driving can help them be successful, get better jobs, and be independent (if they have access to driving in the first place, which is a big assumption). Lugging groceries and multiple children and strollers on buses or via bikes is also difficult, especially during winter months, in a medium-to-low-density winter city like ours. Planners are informed people, and I am sure you know success and mobility are intertwined, and that mobility using a car cannot be dismissed completely. But the way this is phrased suggests making life harder for people who already struggle. I hope you will think of using words that represent the real needs people have, that balancing--or whatever word or approach fits--instead of disincentivizing, could be a more inclusive and equitable way to address the need to rely less on autos. Maybe people should buy less so there are fewer large polluting trucks on the road instead? I know it's outside the purview of the comp plan, but my point is there are so many other ways.</p> <p>For context, I am a privileged woman with children who lives near my workplace and uses alternative transportation for much of the year. Without access to a car I would lose my job, and I actually have options that so many people, especially women with children, don't. Thank you for considering a broader perspective on your word choice and approach.</p>	4/18/2018

431	47 /policies/housing-maintenance/	This policy is linked under the Heritage Preservation section but none of the action items directly relate to preservation. Recommend adding an action item or a more detailed explanation in the narrative about how this directly relates to heritage preservation policies.	4/18/2018
432	6 /policies/pedestrian-oriented-building-and-site-design/	There should be a more nuanced means of dealing with off-street parking minimums (k). Maybe some neighborhoods can handle the street-parking demand that can create, but not all of them.	4/18/2018
433	0.1 /topics/land-use-built-form/	A look at the built form map makes it look like the neighborhoods on Lowry Hill and west of Hennepin are getting special treatment relative to the east side of the street. Why doesn't the route 25 bus merit Corridor treatment? I think it's less frequent service, but nonetheless, the expensive, exclusive neighborhoods are exactly where adding unit to share land costs can increase accessibility.	4/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

434	0.1	/topics/land-use-built-form/	Further guidance on the massing of buildings allowed in the residential categories could help reduce concerns. I see lots of people jumping to conclusions about building size based on the allowed number of units. "Small-scale residential structure" sounds like buildings in keeping with existing structures to me, but it seems not to be enough to reassure people they aren't getting something massive next door to their house just because it would now be allowed to be more than one unit.	4/18/2018
435	36	/policies/innovative-housing-strategies/	What kind of tools are you talking about? some examples? How would regional dialogue and collaboration help expand affordable housing?	4/18/2018
436	1	/policies/access-to-housing/	What areas of the city is housing not allowed? What is a traditional sized" lot? What should parking requirements be? How big is a fourplex? What percentage of a lot can it take? Is that percentage one of the zoning laws that would be changed, but that would be allowed under a new plan?What would a typical unit in a fourplex sell for? Would it be cheaper than an old single family house?	4/18/2018
437	0.1	/topics/land-use-built-form/	While I support the idea of density, there needs to be a deeper assessment about the houses that could be torn down in support of this. I would be interested in a larger question about the value of in-tact neighborhoods, and neighborhoods are usually built block by block. I live at 46th and Aldrich and my block could be completely torn apart by this. The value of our property would make it impossible for the apartments built to be affordable and would not address the issue of racial and economic disparity at all. Rather, it would destroy beautiful homes and tight-knit blocks. I have just moved my parents across the street because of how incredible our neighborhood and the neighbors are. I think that the housing stock and the investment in these homes is worth a larger conversation about the quality of Minneapolis. Finally, with school cuts, the idea of driving more density and cutting public school budgets is not understandable at all.	4/18/2018
438	18	/policies/walking/	1) Would like to see equity called out more specifically to ensure that policies/activities occur in north Minneapolis with the greatest health disparities and walking amenities compared to other parts of the City. 2) Need more walking amenities and "destinations" in north Minneapolis. 3) Support more buffers and curb extensions in Minneapolis. 4) Would like policy/activity that addresses the pedestrian challenge caused by tree roots that upend sidewalks making travel difficult for pedestrians and people with disabilities. 5) Would like specific policies/activities related to increasing non-motorized greenways in Minneapolis such as a north Minneapolis greenway and others in NE and north-south greenway(s) in south Minneapolis.	4/18/2018
439	19	/policies/bicycling/	Enough with the bike lanes!!! Every time the city adds more bike lanes it creates a traffic nightmare. This can easily be seen near Childrens hospital. This new traffic disaster seriously impacts families trying to get care for their sick children, it seems like a terrible policy, and ignores the fact that the greenway is only 2 blocks from those bike lanes. If the city really wants to take action on climate change I would suggest installing EV chargers in more areas.	4/19/2018
440	20	/policies/transit/	What about winter? Minneapolis does almost nothing now to ensure sidewalks and bus stops are shoveled. It is April 19, and I can hardly walk to my bus stop or climb over 3-foot snow mounds to get on the bus. Roads are clear, though.	4/19/2018
441	20	/policies/transit/	Metro Transit apparently doesn't have \$ to increase frequencies, improve bus stops, or remove snow at bus stops. Until that service gets upgraded, riding buses will remain undesirable.	4/19/2018
442	17	/policies/complete-streets/	During a Minneapolis Snow Emergency, the first priority is clearing streets to move and store cars. The lowest priority appears to be ensuring that sidewalks, pedestrian ramps, and bus stops are clear of snow. In fact plows make the corners and bus stops worse after they go by creating giant mounds.	4/19/2018
443	38	/policies/affordable-housing-near-transit-and-job-	The plan to increase density along high traffic corridors is much too aggressive. These are often single family areas with small multi-family buildings scattered between. To upend this with 4+ story buildings (up and down the stree per the illustrations) is very disruptive to the current residents who have already chosen to live in these convenient transit friendly areas. The city should not be picking winners and losers in this way. Also the threat of eminent domain to take property against the will of the owners for large scale development is very concerning.	4/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

444	43	/policies/housing-displacement/	It's very telling that this policy explicitly excludes communities that the city doesn't care about - specifically those boring, white, middle class single family homes who would be disrupted by the aggressive upzoning to large multi-family buildings against their neighborhoods. The city leaders makes it clear in what they say verbally and in this document that disrupting these neighborhoods, these families, is a "feature, not a bug" of the plan, and their discomfort or disadvantage is of no consequence. I find that very offensive. I find it offensive how the city thinks their concerns don't matter and and if they complain they should be criticized for racial bias, or anti density, or something. Yet, when the North side neighbors raise these concern they get the following 6 points above.	4/19/2018
445	23	/policies/coordinated-development-strategy/	Focus on North Minneapolis. You have a large swath of the city with many vacant lots, empty homes - fill them! City seems so focused on pushing high density into stable parts of the city instead of fixing the unstable parts of the city.	4/19/2018
446	70	/policies/ecology-and-habitat/	These policies sound like great efforts to start taking the protection of our environment and natural resources more seriously. But the phrasing of the introductory paragraph here mistakenly makes it seem as if the protection of biodiversity in Minneapolis is a goal separate and apart from improving the city "from a human perspective." Language and presentation matters, and even if the policies here are sound it's CRITICAL that residents reading this page understand that supporting biodiversity is not just about being kind to other species for their sake and as an afterthought...The health of every human being in the city is thoroughly intertwined with the health of the city's plants and animal life. Trees, plants, birds, insects, etc. support US in so many ways that we are only just starting to understand as these species are becoming endangered. Every patch of grass helps collect storm water and prevent runoff. Trees on the street cool our houses down in the summer and save us money. The list goes on. Both our actions AND our words should reflect how central our natural resources are in our lives as urban residents. Educating people about this should be a priority, starting with how we frame and write about our ecology and habitat. Thank you for reading.	4/19/2018
447	0.1	/topics/land-use-built-form/	<p>The treatment of what the city considers "transit corridors" is way too aggressive. This is in two dimensions. Firstly these streets today mostly have single family, small multi-family, and 3 story buildings with some commercial. Going taller than that is not compatible with the neighborhoods away from downtown (e.g. south of 36th). So 3 story multi-family fine, but the 4+ with a wink to even taller is very concerning.</p> <p>secondly, these streets are going through neighborhoods. they have healthy corner intersections, where development should be prioritized. For example 50th street has a density bump at Bryant, Penn, Xerxes - but between them mostly not. Treat those intersections differently than the in-betweens, where your 4-plex zoning would be fine.</p> <p>thirdly, these corner nodes as drawn out are too big, For example 50th and Bryant, the plan threatens the livability of Aldrich, Colfax, south to 51st and north to 49th. This should be a much more localized impact, so limited to 1 side of the block facing the corner...</p> <p>lastly - where is the retail? It's not clear at all you have thought about the critical commercial role of these nodes - we need grocery stores, hardware stores, coffee shops, restaurants, dentists, hair salons - I don't see any recognition of that along these streets.</p>	4/19/2018
448	0.1	/topics/land-use-built-form/	<p>The treatment of what the city considers "transit corridors" is way too aggressive. This is in two dimensions. 450	68	/policies/energy-efficient-buildings/	<p>1. Action-step 68-d could go much further in codifying environmental stewardship of the built environment. Buildings receiving city financing should be *required* (rather than encouraged) to meet energy efficiency standards exceeding those of privately-financed projects (akin to what is already being done in Saint Paul with B3 and SB2030).</p> <p>2. In addition to the existing goal of 80% CO2 reduction by 2050 - the City should establish a goal for complete carbon-neutrality (net zero). This cannot be achieved by energy efficient design alone, and would accelerate the implementation of on-site renewable energy production in order to meet reduction milestones.</p>	4/19/2018
451	1	/policies/access-to-housing/	<p>Do not support e. Single family homes and neighborhoods are very important. This is so in terms of investment in property, maintaining value, neighborhood character and safety. I have owned homes in both areas allowing multi-family units and that don't. In 11 years owning a home next to and near multi-family dwellings, I suffered two robberies, one involving a gun. I sold the home and made absolutely no money. In 25 years in a neighborhood allowing only single family homes I have had 0 incidents. The platitudes for this concept are different from what the reality is. I know from personal experience. I am absolutely against this part of the plan.</p>	4/20/2018
452	1	/policies/access-to-housing/	<p>In order to create more affordable housing, care needs to be taken that higher density is not just a goal in itself, but that specific measures are taken to keep that housing affordable, especially when the free market is involved.</p>	4/20/2018
453	33	/policies/affordable-housing-production/	<p>I would like to see more specifics regarding steps d. and e.</p>	4/20/2018
454	0.1	/topics/land-use-built-form/	<p>The idea of having combined lot apartment buildings on Interior 3 transitional streets is a terrible one. These are quiet, small, non-transit or commercial streets and should remain zoned Interior 1. Multi-lot apartment buildings on the streets would completely change the character of block after block, and even the potential to build them would drastically lower property values and discourage additional investment.</p>	4/20/2018
455	0.1	/topics/land-use-built-form/	<p>The idea of having combined lot apartment buildings on Interior 3 transitional streets is a terrible one. These are quiet, small, non-transit or commercial streets and should remain zoned Interior 1. Multi-lot apartment buildings on the streets would completely change the character of block after block, and even the potential to build them would drastically lower property values and discourage additional investment.</p>	4/20/2018
456	33	/policies/affordable-housing-production/	<p>When fancy new apartments were built near an older apartment it's rent went up \$100 in one year without any improvements to the building. Building luxury apartments decreases the availability of affordable housing. I propose that all new apartment buildings include 25% affordable units. Another idea is the creation of affordable condos so people have a reasonable mortgage that won't go up. Turning renters into owners gives them some housing stability.</p>	4/21/2018
457	37	/policies/mixed-income-housing/	<p>Yes, build more affordable housing throughout the city, and integrate affordable units into all new apartment and condo buildings. If lower income people can buy their units it gives them more sustainable housing security. There are a lot of people who eventually want their own home where they can garden or raise kids or feel a part of a community. Given the shortage of starter homes, I suggest that the city buy up some rental houses and convert them back into owner-occupied houses and duplexes. That would stabilize neighborhoods that were hurt by the recession.</p>	4/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

458	4	/policies/access-to-commercial-goods-and-service	Everyone needs a full service grocery and hardware store nearby. However it is not possible for everyone to walk or take public transportation to work. My daughter used to walk to work, but her company merged and moved out beyond the suburbs, while her husbands work was in the other direction. The other daughter takes public transportation to multiple jobs while her husband commutes to another town.	4/21/2018
459	5	/policies/visual-quality-of-new-development/	Include and require green space setback and storm water management in the form of rain gardens. Trees and native plants are better than just grass. Encourage the inclusion of coffee shops or retail at the front of the bottom floor or a common space with large windows to make the building feel like a part of the community and increase safety.	4/21/2018
460	77	/policies/park-access/	Another important way to improve access to parks is to use a "built form" category that is one more populous than the surrounding neighborhood, allowing in-demand park-facing locations to have space for more families and people. This is also an important equity opportunity, because apartment-building dwellers have less access to green space, they tend to be lower-income, and they tend to be people of color and indigenous people. Suggestion: allow more housing on parcels facing neighborhood and regional parks throughout the city.	4/21/2018
461	82	/policies/aging/	e. Expand innovative housing options that provide in-home living support and add housing space for people who are happy to rent a room or access low-cost housing in exchange for assisting older individuals. This also provides income for "house rich, cash poor" seniors.	4/21/2018
462	6	/policies/pedestrian-oriented-building-and-site-de	K: Do not eliminate minimal requirements for off street parking. I do prefer to walk or take public transportation, but it is not always possible. Daughter works in Minneapolis and takes public transportation to three jobs, but her husband commutes to Rodgers MN. Other daughter used to walk to work till her company merged with one in Lakeville while her husbands work is in the other direction. When I was young you could buy furniture, fabric, hardware and books downtown. Now you need to travel to the burbs for them. We no longer have a nearby grocery and the corner store sells only snacks and grab-and-go.	4/21/2018
463	7	/policies/public-realm/	Add more boulevards with trees and native plantings along sidewalks and developed areas. These create a buffer from the street and make areas more inviting.	4/21/2018
464	8	/policies/public-safety-through-environmental-de	Good.	4/21/2018
465	9	/policies/open-spaces-in-new-development/	Yes, please include these amenities. Adding rain gardens and trees is better for the environment too. Whenever you add hard surfaces you need to consider storm water management. Native plants and pollinator gardens help.	4/21/2018
466	11	/policies/skyways/	Skyways are an amenity in downtown. They allow comfortable navigation from store to store in winter and a view of the street during events like parades or other downtown events.	4/21/2018
467	13	/policies/landscaping/	Yes, please. We need rain gardens and native plants and trees along with organic practices.	4/21/2018
468	14	/policies/tree-canopy-and-urban-forest/	Yes, but also consider plant diversity. Then whole blocks of trees were lost to Dutch Elm and later Ash Borers. We should plant a diversity of trees along with gently scooped out boulevards for rain gardens or native plants.	4/21/2018
469	17	/policies/complete-streets/	I prefer to walk, but most of us need cars. Please do not cut off street parking. When one spouse works in the city and can walk to work, but the other needs to commute a long distance out of town where there is no public transportation it is not practical to not have a car. There is stress in long commutes across town too. A lot of things that used to be a few blocks away or downtown are now located in the suburbs.	4/21/2018
470	19	/policies/bicycling/	Offer free bike lessons for children starting in school along with bike safety and helmets.	4/21/2018
471	20	/policies/transit/	I use public transportation, but stopped going to Rosedale when I had to transfer in a area with very little foot traffic and evening service was cut. The more I have to transfer, the less I want to go. Please minimize transfers on by highway ramps and extend hours.	4/21/2018
472	21	/policies/freight/	Safety is very important. Keep speeds to a limit through our neighborhoods, and provide safety fences and no trespassing signs to keep people off tracks except at official safety crossings.	4/21/2018
473	22	/policies/downtown-transportation/	Urban should not mean no trees or plants. There is too much concrete. Yet people going to a show downtown or having dinner may need to park. WE like Theatre in the Round and used to park in the nearby ramp. When I volunteer there I take the bus, but not at night. Because the adjacent new housing didn't include enough additional off street parking, people attending a show at TRP or the Southern are often out of luck.	4/21/2018
474	23	/policies/coordinated-development-strategy/	f? Ask neighborhoods before you decide to destroy them. Better to transform an unused or decrepit problem area into an amenity for the community. A full service grocery? A cultural museum? A nature preserve with an educational element? Library? CoOp? A public magnet school? Try a better bus route before tearing down housing. Give amenities the Community would like an incentive.	4/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

475	24	/policies/shared-mobility/	We like to bike and walk, but still need to drive. Do not assume everyone can get around without a car. Some people have limited mobility, need to travel longer distances to work or carry more than they could on public transportation. All through grades 1-12 my Mom got up at 4:00 am to catch a bus to work and returned tired for dinner time. So I was on my own, made my own breakfast and walked to school. Forget any homework help or school conferences. She fell asleep.	4/21/2018
476	26	/policies/vision-zero/	More cross walks and pedestrian crossing signs. When people renew their drivers licenses educate them on new rules or give them a refresher. No driving while using medical pot. Limit alcohol consumption for drivers.	4/21/2018
477	31	/policies/creative-workers/	h. We can ALL benefit from more diverse teachers and master crafters of all kinds. However it is important to integrate such programs. How can anyone thrive in a multicultural society if they only know people just like them? We all need to learn about all cultures to foster understanding.	4/21/2018
478	32	/policies/arts-in-community-development/	Yes, but make them accessible to all people. Let us get to know each other and appreciate all the cultures here. Integrate.	4/21/2018
479	41	/policies/tenant-protections/	Limit the amount a landlord can raise rent in one year. Require affordable units in developments with increases only as much as inflation of wages. Help low income people buy an apartment or part of a duplex for housing and community stability.	4/21/2018
480	46	/policies/healthy-housing/	Educate on pollution concerns like radon and other vapors. Discourage use of scented products. Encourage use of house plants for air quality.	4/21/2018
481	47	/policies/housing-maintenance/	Convert rentals to owner occupied houses and duplexes.	4/21/2018
482	49	/policies/educational-and-economic-access/	Expand free public school preschool. Use public magnet schools to help integrate communities. Free two year college or trade schools	4/21/2018
483	51	/policies/healthy-pre-k-development/	Teach new parents how to encourage learning and creativity in their little ones. If parents cannot read they can tell stories and talk to babies about the world around them.	4/21/2018
484	53	/policies/quality-of-life/	Add nature parks and trails to neglected industrial areas.	4/21/2018
485	59	/policies/downtown/	Bring back book stores and shopping destinations. Make the new YMCA also YWCA a healthy hub. How about a healthy family food establishment with a daytime dance floor for all ages?	4/21/2018
486	61	/policies/environmental-justice/	Do this in schools too. When kids have a conflict have a class meeting to discuss what they could have done different to avoid conflict. If someone destroys property they have to clean it up.	4/21/2018
487	67	/policies/climate-resilient-communities/	rain gardens for pollinators too	4/22/2018
488	70	/policies/ecology-and-habitat/	Reduce the area of lawns in public parks and boulevards by encouraging the use of native plants and rain gardens. A park that is mostly ball fields could have a nature path around it with native plants.	4/22/2018
489	73	/policies/stormwater-management/	Convert lawns and cement areas to natural areas wherever possible with rain gardens, pollinator gardens and native plants.	4/22/2018
490	76	/policies/new-parks/	Yes, please! Nature is renewing and would take the edge off our industrial stress.	4/22/2018
491	77	/policies/park-access/	Need Nature trails.	4/22/2018
492	78	/policies/park-design-and-programming/	I would love the addition of Nature Play areas and nature trails to parks that are only ball parks. We like circular seating for gathering as a community or for cultural events. I'd like to see more all-ages programing like dance or creative collaborations.	4/22/2018
493	82	/policies/aging/	Make it possible for residents who want to stay in their homes and/or communities to do so. Everyone needs to shovel their walks and corners so the elderly can get out.	4/22/2018
494	83	/policies/people-with-disabilities/	ADA compliance. No exceptions. I saw a new caf�� put in a new floor that required a step up instead of a ramp. I hate this new fad of tall tables which discriminates against people in wheelchairs. All new busses should accommodate walkers and wheelchairs.	4/22/2018
495	84	/policies/public-safety/	Ban bump stocks and assault style weapons. Universal background checks with wait times. People who have been violent or abusive should lose the right to guns. Gun registry. Ask why if the want to buy a lot of guns. Guns for hunting only. Use of stun guns rather than bullets if possible.	4/22/2018
496	85	/policies/access-to-health-social-and-emergency-s	Study how the narrowing of streets effects emergency response.	4/22/2018
497	1	/policies/access-to-housing/	I would like to strongly support this policy. I live in an area where very large single-family homes are being built, a 3- or even 4-unit building would not actually be out of scale with the buildings being built, often on speculation, and sometimes sitting empty for long periods of time. This would allow us to redevelop our lot to provide us an income stream, and/or to have our parents live close enough to help them while still maintaining some privacy.	4/22/2018
498	83	/policies/people-with-disabilities/	Reducing parking has a negative impact on our disabled neighbors. Please make sure future greenways plans still provide people with access to their homes.	4/22/2018
499	51	/policies/healthy-pre-k-development/	Please spend wisely. Some places like WI have had 4 year K for 34 years. There is no data I am aware of that it has had any positive impact vs MN that did not have a similar program in place. That is we are not looking at MKE has a economic success story.	4/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

500	46	/policies/healthy-housing/	Again how is the paid for? I like having bike storage onsite. Maybe help with ordinance waivers for bike storage areas.	4/22/2018
501	64	/policies/food-businesses/	This makes a lot of sense! Financing programs should be taxpayer neutral. I would add had odor control may be necessary as neighbors may not want to live near a sauerkraut facility.	4/22/2018
502	65	/policies/urban-agriculture-and-food-production/	Odor control may be important for livability for neighbors depending what is make. no to H- develop the land for tax base. Use schools parks libraries and backyards for community gardens. We have public space already.	4/22/2018
503	84	/policies/public-safety/	We need to do something different, no violence is acceptable.	4/22/2018
504	9	/policies/open-spaces-in-new-development/	They have to be safe and designed to reduce crime.	4/22/2018
505	6	/policies/pedestrian-oriented-building-and-site-de	k) Keep parking at least one space per unit n) so little parking at grocery stores? o) for sick people, drive thru pharmacy help us all. When I had the flu, I wished one was nearby as there were babies in line with me. gas stations should not be signaled out. P/Q) is this legal? Why does the city hate cars? For families with multiple daycare drop offs, people who work on homes and need tools, they need cars. Please do not make it harder to work and pay taxes.	4/22/2018
506	12	/policies/lighting/	make sure safety is first, good goals.	4/22/2018
507	26	/policies/vision-zero/	Never want to see anyone hurt. Please make sure only accidents are counted in the statistics, suicides should be separate. I think they are lumped together now (There should be another goal to have suicides zero in Mpls also.) g. People in vehicles are dying more than other groups so having them last via Complete streets policies is strange-more lives can be saved if that group safety is worked on first.	4/22/2018
508	19	/policies/bicycling/	Please consider the implementation of the bike lanes on 26th and 28th Streets when planning future bike transit planning. These bike lanes are a disaster. I drive or bike to work (depending on the weather and my schedule) using this corridor. When biking, I find the Midtown Greenway to be a much safer and calmer route vs 26th or 28th Streets. Traffic has become much more congested and confusing for drivers with the bike lanes making it much less safe for bikers. A better alternative would have been to make a less traveled street such as 27th Street a bikeway or just use the current Midtown Greenway.	4/22/2018
509	19	/policies/bicycling/	Please consider the implementation of the bike lanes on 26th and 28th Streets when planning future bike transit planning. These bike lanes are a disaster. I drive or bike to work (depending on the weather and my schedule) using this corridor. When biking, I find the Midtown Greenway to be a much safer and calmer route vs 26th or 28th Streets. Traffic has become much more congested and confusing for drivers with the bike lanes making it much less safe for bikers. A better alternative would have been to make a less traveled street such as 27th Street a bikeway or just use the current Midtown Greenway.	4/22/2018
510	19	/policies/bicycling/	Please consider the implementation of the bike lanes on 26th and 28th Streets when planning future bike transit planning. These bike lanes are a disaster. I drive or bike to work (depending on the weather and my schedule) using this corridor. When biking, I find the Midtown Greenway to be a much safer and calmer route vs 26th or 28th Streets. Traffic has become much more congested and confusing for drivers with the bike lanes making it much less safe for bikers. A better alternative would have been to make a less traveled street such as 27th Street a bikeway or just use the current Midtown Greenway.	4/22/2018
511	17	/policies/complete-streets/	I am strongly in favor of this policy!	4/23/2018
512	20	/policies/transit/	Public transit is the future. However, if we want people to move from their cars and start using buses and light rail, we must make sure that the public transit is reliable, fast and safe.	4/23/2018
513	0.1	/topics/land-use-built-form/	We purchased a home and invested substantially in a large renovation specifically because the home was not on a transit route or near larger multi-family dwellings. To now change zoning on a small side street such as Aldrich and jeopardize our investment is unconscionable. Interior 3 zoning has no place 47 blocks away from downtown on quiet residential streets.	4/23/2018
514	0.1	/topics/land-use-built-form/	The building size and style for the roads south of 36th st that the city considers transit ways are much too aggressive. Linden hills Parkwaay for example has a long stately procession of beautiful single family homes reminiscent of Summit avenue or other notable residential streets - and the plan calls for 1 side of the street to be taken over by 3 story apartment buildings! The plan should not be pushing taller than 3 story buildings that far from downtown and not outside very tightly defined corridors and intersections where we have a bit of commerce and multi-family development now. Leave the uptown sized buildings in uptown.	4/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

515	1	/policies/access-to-housing/	Offer surplus property that is ideal for housing development for free to those developing a building that is used for affordable housing creation. (The city shouldn't charge fair market value for affordable housing only to have the developer come back and ask for that same amount in subsidy from the city's affordable housing funds)	4/24/2018
516	1	/policies/access-to-housing/	Offer surplus property that is ideal for housing development for free to those developing a building that is used for affordable housing creation. (The city shouldn't charge fair market value for affordable housing only to have the developer come back and ask for that same amount in subsidy from the city's affordable housing funds)	4/24/2018
517	0.1	/topics/land-use-built-form/	Interior 2 should support small infill housing off of the alley but with more square footage than currently allowed. Should allow home owners to subdivide their lot to allow an ADU type of unit to be owned by someone else. Look at Seattle. The small ADUs and townhouses are almost all individually owned units.	4/24/2018
518	0.1	/topics/land-use-built-form/	Allow for more density near 50th and France. East side of Ewing should be Interior 2 or 3.	4/24/2018
519	0.1	/topics/land-use-built-form/	Interior 2 in CARAG and ECCO seems too low. It's so close to major urban nodes with groceries, restaurants, etc. Also, allow lots to be subdivided into townhouses or rear ADUs without having to condo the site. Townhouses = easier.	4/24/2018
520	17	/policies/complete-streets/	I love the idea of a Complete Streets policy, but it will need a huge mind-shift to really make this happen. Parks and Public Works prioritize clearing streets for cars, not pedestrians, when the snow falls. Green Line stops are inaccessible from the sidewalks, cars park in the bike lanes. Almost every action belies this heirarchy.	4/24/2018
521	48	/policies/data-driven-decisions/	I support this policy and action items. The discourse and policy proposals around housing are very often driven by how they make us feel, not how much positive impact they are likely to have. Inclusionary Zoning makes activists and electeds feel better, but has proven to ultimately slow the pace of new housing construction. Insisting on Mixed income projects (50/50) would be logical if the city had a monopoly on buildable lots, but in reality Minneapolis is competing with other, more wealthy cities for projects, especially outside of downtown. Whether it makes us feel good or not, affordable developers know affordable housing (and the 17 funding sources required) and market rate developers know market rate, so forcing one to do the other plays to their weaknesses, is inefficient and not necessarily best for the end user. Lots of people are being shut out of good housing choices, not just poor people, and we need to build all types of housing as fast as we can.	4/24/2018
522	80	/policies/development-near-metro-stations/	(sorry just testing: my Dad is having trouble commenting and I'm trying to reproduce his problem.)	4/24/2018
523	17	/policies/complete-streets/	Complete streets need to include things like marked crosswalks. Bumpouts without crosswalks are a waste of money and cement. They may get cars to slow down slightly but they don't tell them that they need to let pedestrians cross the street. This is especially important on busy streets like 38th or Bloomington/Chicago/Nicollet.	4/25/2018
524	20	/policies/transit/	City should work more with Metro Transit on basic stuff like bus stop design (making sure no parking zones are big enough, there are signs and trash cans and benches at stops, making sure sidewalks are wide enough). This basic stuff makes the difference in whether or not a bus system is usable day to day.	4/25/2018
525	18	/policies/walking/	Winter sidewalk maintenance needs to be a city priority. We don't expect individual property owners to plow the streets. If we want Minneapolis to be a walkable city we need to make sure that sidewalks are usable during the winter too.	4/25/2018
526	22	/policies/downtown-transportation/	Narrowing streets and improving the public realm/sidewalks would go a long way towards making downtown more walkable. As is, it feels like you're supposed to drive there. More cross-downtown protected bike lanes are needed too.	4/25/2018
527	63	/policies/food-access/	Minneapolis is the center of the food coop movement in the United States. These stores are community owned and build wealth here in Minneapolis. The city should build on this knowledge and energy to support start up food coops in low-income communities instead of attracting big chains to them that are less economically sustainable. Food coops traditionally focus on expensive organic food but they can just as easily stock cheaper staples for lower-income communities.	4/25/2018
528	1	/policies/access-to-housing/	No R 4 zoning where it is now R1 or R2. High density will ruin Mpls single home neighborhoods!	4/25/2018
529	79	/policies/healthy-youth-development/	Much of this work is being done in neighborhoods and communities across Minneapolis with little acknowledgement and funding opportunities. This policy area should incorporate the voice of youth development program leaders to develop collaborative strategies that promote positive and healthy development for youth, young, adults, and their families. Furthermore many of the programs that support this work across Minneapolis have been experiencing increased financial hardship due to the changing landscape of philanthropy in the non-profit sector and limited funding provided through government grants which is a barrier to providing safe and stable opportunities for youth, their families, and support systems across Minneapolis. It is time that the City create a financial agenda to support out-of-school time programs with demonstrated success on achieving the goals outlined in this policy. This work cannot solely be left to the Youth Coordinating Board, Ignite After school, and the many partners they collaborate with. Funding is key!	4/25/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

530	14	/policies/tree-canopy-and-urban-forest/	e. Encourage downtown businesses to "adopt a sidewalk" and plant and nurture trees throughout downtown.	4/25/2018
531	59	/policies/downtown/	j. Encourage the planting and nurturing of trees along streets in the downtown corridor.	4/25/2018
532	7	/policies/public-realm/	Public Works relies on Special Services Districts (SSD) to maintain upgraded public realm improvements. However, SSD are viable only in areas with lots of commercial properties. So, there is not a way to implement streetscape improvements elsewhere in the city including benches, trash cans, banners, sidewalk snow clearance, etc.	4/26/2018
533	53	/policies/quality-of-life/	My neighborhood association is the reason my community has lots of events and interesting place-making improvements. The City currently funds these organizations and should continue to do so in the future.	4/26/2018
534	56	/policies/supporting-small-businesses/	Elsewhere in this document there is a focus on creating new development incentivizing replacing older buildings with larger, denser structures. However, small business owners generally don't appear able to afford locating in brand new buildings.	4/26/2018
535	59	/policies/downtown/	Downtown streets are generally awful places to spend time because traffic moves very quickly, there's almost no retail anymore, and the City keeps promoting expansion of the skyway system. Stop allowing the Downtown Council & BOMA to perpetuate that situation. Narrow streets, plant some trees, and tear down skyways and parking ramps.	4/26/2018
536	59	/policies/downtown/	The areas around MCTC and St. Thomas are deserted and bleak outside of daytiem hours. Promote the construction of student housing to liven it up and keep people downtown.	4/26/2018
537	77	/policies/park-access/	Fantastic!	4/26/2018
538	80	/policies/development-near-metro-stations/	The existing Blue Line is adjacent to an awful, divided highway- Hiawatha Avenue. It is designed solely to move lots of cars at high speeds and needs to be completely rebuilt to make stations comfortable for human beings. The Blue Line extension continues this awful situation by locating LRT down the middle of Olson Highway. There is a complete disconnect from this policy and reality on the ground.	4/26/2018
539	80	/policies/development-near-metro-stations/	The proposed Blue and Green Line extensions literally run through parkland serving few Minneapolis citizens on their way to un-walkable places in the suburbs. Perhaps, we should locate Metro lines where people already live rather than places they might go to in the future?	4/26/2018
540	82	/policies/aging/	The VOA Southwest Senior Center used to provide senior services in my neighborhood, but closed due to lack of support. Perhaps, the City and County need to look into becoming more involved considering that our population is aging fast and services are disappearing?	4/26/2018
541	83	/policies/people-with-disabilities/	The City needs to ensure sidewalks are clear of ice and snow in the winter if people with disabilities are going to live independently.	4/26/2018
542	33	/policies/affordable-housing-production/	My neighborhood of Central and the Hiawatha-Lake street light rail station (which used to be a major park and ride hub until the parking lot was closed to commuters) has seen an increase in the numbers of vehicles trying to park there and in traffic congestion around these areas. Although it can be good to encourage more biking, walking, and public transportation, please recognize that many of us are aging, and we cannot bike or walk to where we need to go. Some of us still need our cars, so when buildings are added to neighborhoods that are already becoming congested, please adhere to the requirements for off street parking that are currently in place.	4/26/2018
543	17	/policies/complete-streets/	Please consider that not everyone feels comfortable biking in the city. Also, as a 62 year old woman with arthritis in my knees, I am just not able to walk or bike all the time (I do try to sometimes, but as I get older, I think that will become less and less possible.) For many elderly residents, a car represents freedom and independence for as long as we can safely drive. Please do not take away our parking places. Also, my experience is that the park and rides have parking that is really far away from where you need to get to get on the train.	4/26/2018
544	1	/policies/access-to-housing/	Upzoning to allow fourplexes will be great! We own a triplex that was originally built as a single family home (plus servants quarters) in 1893. We want to protect the unique aspects of that home, while also being able to build a one or two unit structure behind it that is energy efficient and allows us to spread out fixed costs to more tenants. Upzoning is a critical step to making that a reality and allowing us to bridge the historic with the new!	4/26/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

545	19	/policies/bicycling/	<p>I'm sure that there are regulations about how wide bike lanes need to be, but I am honestly fine just having a 4-6' lane without needing the extra bollards and buffer. I do understand the intent that biking should be safe for everyone (and not just someone who is quite comfortable biking, like myself). At a minimum, though, there has to be some way to roll these projects out without pissing off the driving community. I enjoy 26th and 28th street, but the animosity that I have endured when discussing it with friends who drive has not been great for my cause of trying to encourage them to bike more. They take it personally.</p> <p>As a year round biker, the bollards also cause problems because the City then needs to send special plows for the bikeways. This often leads to just awkward piling in the lanes because car lanes are plowed more frequently. Maybe the compromise is actually to have city plows just plow closer to the curb so the bike lane is also covered by that plowing pass? Aside: the off street bike path plowing has been amazing for the past few years!!! A lot of compliments to the City for that. That would be my main plug for more off-street bike routes - not having to worry about cars tramping down the snow and driving all over the place makes bike trails like the Greenway lovely to ride on in the winter.</p> <p>That was a lot of rambling. Overall, I like bikes and I bike year round. I just wish there was a better way to share the existing structure. Have a bike lane but also somehow keep the driving lanes and parking. Maybe just have narrower lanes like in Europe? Or have the City annex more of the boulevard so we could widen everything? That seems costly and long-term, but I wanted to spit ball.</p>	4/26/2018
546	20	/policies/transit/	<p>No on-street parking should be free unless all transit service is comprehensive and free. Our transit system needs a lot more investment and there isn't any incentive to do that as long as driving is easy and (perceived as) cheap. If you have to pay to park everywhere, driving becomes less attractive and more pressure is put on improving the transit system. Let's make that happen. It's a travesty that we didn't get rail to run through Uptown. We can't change that now, but we can still make the most of our transit system everywhere in Minneapolis and help move towards our climate goals by not making driving an attractive option. Part of me wants to have a car fee to enter the city, similar to London. Another big picture goal would be that I would love to have Minneapolis somehow annex the first tier suburbs (St Louis Park, Plymouth, Hopkins, Edina, Minnetonka). The tax incentives that they can offer to lure business out of the city just continues to cause sprawl and regional planning issues. Bring them under the Minneapolis umbrella and we can actually have a solid regional planning group that isn't hamstrung.</p>	4/26/2018
547	0.1	/topics/land-use-built-form/	<p>PLEASE convert these maps to PDF so we can download and/or print them. They are impossible to use for group discussion and good analysis. NOT good citizen access.</p>	4/26/2018
548	1	/policies/access-to-housing/	<p>I am absolutely against higher density housing zoning to replace residential or 2-family housing. The parking and traffic congestion is already an unpleasant problem in my neighborhood (57th and Nicollet, with trips to 54th and Lyndale to library and Walgreens). I am a senior citizen and must drive to most destinations. Your proposed policy is agism! You want to eliminate cars! Who says Minneapolis has to supply more housing, there are plenty of suburbs where housing is available. Sally DuFour, 5655 Nicollet</p>	4/27/2018
549	0.1	/topics/land-use-built-form/	<p>I am concerned about the urban neighborhood zoning. I'm mostly concerned because the definition does not really sound urban to me, but more suburban. I would like to see more mixed used zoning throughout the city, at the very least 50% of the city should be zoned for mixed use. This would create walkable neighborhoods and a city that everyone can enjoy. Limiting mixed use to certain areas of the city will hurt the city and our ability to meet our equity, environment, and transit goals because so many people in the city will be unable to walk or bike to work, the grocery store, or to just get a coffee or something. In the final form of this plan, I would like to see much more mixed use in the city. I too would like to see more zoning for 10-20 story buildings. We often, as a species, cannot contextualize the future very well, nor do we like to think of negative things. This combined really limits our view of climate change as a serious matter, even though I know the city views it as such. Anyway, climate change is about 150 years ahead of schedule as the ocean current that creates our weather is slowing down and may even stop before 2040. This would be disastrous and cause rapid arctic melt, increasing sea levels and creating even more climate refugees. This is the reason I want to see more 10-20 story zoning because I fear that the 4plex proposal (which is great!) is not going to be enough in the future as people flee the coats as the sea rises.</p>	4/28/2018
550	9	/policies/open-spaces-in-new-development/	<p>The relationship of these publicly accessible private spaces to the larger street, sidewalk, and alley system is important - where these spaces are and where they are not. The connectively of these spaces (eg the Midtown Greenway Promenade) are maybe the most import aspect of these spaces. Plaza for plaza sake should be avoided. Should also look into requiring public easements for these spaces depending on development details, maybe through PUD - Kronzer</p>	4/28/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

551	13	/policies/landscaping/	Developments should get some level of credit to Site Plan review standards for plantings (trees) in the public realm. Policy should allow for using trees in stormwater control - Evapotranspiration. Green walls have not lived up their promise, only a few successful examples in the last 8 years - Kronzer	4/28/2018
552	1	/policies/access-to-housing/	Sorry cut off. I strongly oppose building in single family neighborhoods four plexes The four plexes will add parking problems where none exist now. We should protect our neighborhoods farthest from Downtown. Currently my neighborhood is Diverse and is replacing housing with single family homes. We should attract more diversity by providing homeownership help to low income and middle class residents.	4/29/2018
553	66	/policies/air-quality/	Fire Pits. Eliminate them. NOW. They have no place in a dense city and are currently one of the most easily eliminated pollution sources. Fine them heavily enough to fund other initiatives and keep property taxes down.	4/29/2018
554	43	/policies/housing-displacement/	Please remember that homeowners have sacrificed to be able to get their homes, and continue to sacrifice in order to keep them. Many homeowners' incomes have decreased in recent years and property taxes have not decreased, but instead have increased dramatically. Relief is needed or residents who are homeowners at this time will be displaced.	4/29/2018
555	0.1	/topics/land-use-built-form/	Neighbors have told me that our area along Bryant Ave by 50th street is targeted for high density apartment buildings. If I wanted to live in Uptown, I'd move there. Bryant Ave, despite having a bus, is not a high transit street, it's where we live.	4/30/2018
556	0.1	/topics/land-use-built-form/	<p>This is overall great. A few spot concerns:</p> <ol style="list-style-type: none"> 1) The transit corridor districting doesn't look to the future where the blue and green lines will be extended. Probably that also applies to the BRT lines, but I haven't looked. 2) You're asking for buildings to have smaller upper floors than lower ones and discouraging overhanging balconies. I disagree with both of these, they are part of vibrant cities. 3) Interior 2 doesn't really have a reason to exist. it's basically interior 1, as written. 4) Corridor 6 should be at least 2.5 stories. 5) Urban Neighborhood should welcome small mixed use options. 6) Production and Processing neighborhoods should allow housing, targeted to workers of those fields. Why prohibit housing? 7) Kenwood needs to be interior 3 at the very least, given transit access on Hennepin, amenities on Hennepin, and access to the lakes. This should be an neighborhood for car-free or car-light, and more people should be able to enjoy. 8) Even in Interior 1 areas in the far north or south, there need to be places where large multifamily buildings can be built to house people, particularly seniors, who want to leave their single family homes but still live in their familiar neighborhood. Corridor 4 could extend a block further into the neighborhoods. Accessibility may be an issue with triplexes and fourplexes. <p>* My biggest dream: replace the 4 square blocks of highway from 16th st to 10th st in the heart of the city with housing, allowing Elliot Park to be reconnected.</p> <p>I do like wording of the guidance for increasing height limit. Overall this is a good plan and don't let the people who oppose everything get you down.</p>	4/30/2018
557	7	/policies/public-realm/	This is really vague! I want that framework in part a. to exist already!	4/30/2018
558	37	/policies/mixed-income-housing/	Just as the city must have tools to promote affordable housing in amenity-rich areas, the city must also have tools to incentivize the creation of market-rate housing in areas of concentrated poverty and low-income housing, so as to not further concentrate poverty.	5/1/2018
559	43	/policies/housing-displacement/	The city is home to a great many vacant lots, unused former industrial land, parking lots, crumbling single-story storefronts, and other underutilized space that currently has no residential use. One way to preclude housing displacement is to allow and incentive the building of new housing where no housing currently exists.	5/1/2018
560	5	/policies/visual-quality-of-new-development/	Point g (apply design standards...consistently across city) is very important, as we want all areas of the city to be build in a way that demonstrates pride in the community. Too many homes and buildings in areas of town with less income are built with shoddy design and materials.	5/1/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

561	5	/policies/visual-quality-of-new-development/	Related to point c. (durable materials), in addition to durability, the city should promote materials that are sustainably manufactured and/or harvested. Both ensure our city is built in a way that reduces our impact on our earth's resources.	5/1/2018
562	0.1	/topics/land-use-built-form/	I am very enthusiastic about the change of zoning that will allow greater density on most residential parcels by right. Yes, our city will look different in 2040 than it does now, but it MUST look different in order for it to be a city full of diversity. Fears of full street parking must be addressed with better transit, biking and walking infrastructure. No homeowners will/should be forced to sell their homes, fears of large developers Manhattanizing the city can be addressed with programs that allow individual homeowners to consider opportunities to add units to their properties.	5/1/2018
563	0.1	/topics/land-use-built-form/	I own a single family home in the Seward neighborhood. Next door is a duplex built in the 1800s, and it is much smaller than many single family homes now being built throughout the city. Several doors down the other direction is an apartment building built in the 60s or 70s. I LOVE the diversity of the built form on my street, and throughout the neighborhood. Old houses mingle with homes built in the 1970s, with some new modern style homes in the mix. Duplexes, triplexes, single family homes, old storefronts that are now homes, etc. I am completely for a built form that allows for greater density, and which allows for a diversity of types of buildings throughout our neighborhoods.	5/1/2018
564	28	/policies/msp-airport/	I support the Minneapolis Airport Policy for 2040 and will make my comments at one of the May Open Houses planned for the neighborhoods.	5/1/2018
565	1	/policies/access-to-housing/	Thanks for bringing light to the connection between historic redlining and modern exclusionary zoning. We can only move forward and make positive change when we recognize that current policy restricts access to safe and stable housing for more people. I am excited to see movement beyond "high density on frequent transit lines" (which are often in areas of higher pollution, fewer parks, etc.) to allow a diversity of housing structure types across the city. I am excited to support this!	5/1/2018
566	80	/policies/development-near-metro-stations/	This is great. We should promote the most dense development next to our greatest transit investments. We should also restrict parking by limiting the number of spaces allowed so that our transit stations are welcoming to people more than to cars.	5/1/2018
567	42	/policies/expand-homeownership/	What can the city do to increase the supply of condo and multi-family ownership options? Despite demand, regulations and laws have limited new options from being built. How can we help meet the demand for condos?	5/1/2018
568	0.1	/topics/land-use-built-form/	Love this. Our zoning is in real need of simplification, and more people must be allowed to call Minneapolis home. By increasing use and the number of neighbors, our city will become more walkable and livable for everyone. This is great!	5/1/2018
569	6	/policies/pedestrian-oriented-building-and-site-de	Please also work to reduce the number of curb cuts as sites are redeveloped and/or set maximum number of cuts per block (or standards accord to land use, zoning, etc.). A maximum of 2 cuts per block, in the spirit of alleyways, is appropriate and could even be marketed as historic for the NIMBY crowd. I am EXTREMELY excited to see a plan to eliminate off-street parking requirements city-wide. This is the #1 best thing we can do to help make our city more people friendly and to encourage walking, bicycling, and transit use. This can also make our land use more efficient and our new buildings more affordable. Eliminate parking requirements now!! Prioritize people!!!	5/2/2018
570	20	/policies/transit/	Please work to give transit vehicles priority over private autos. A bus with 50 people should never be delayed by a car with only 1 or 2 people. I envision buses skipping traffic at intersections via a priority signaling system and transit only lanes on main corridors (like Hennepin Ave from Douglas to Lake, please). Transit only lanes should be 24 hours so as to lessen speeding and reckless driving during non-rush periods and reduce confusion.	5/2/2018
571	18	/policies/walking/	We need municipal snow removal for pedestrian routes! Snow removed at the same time as streets are plowed with attention to all crossings! Let's work on this - involve all parties like residents who want to be part of the solution, property management companies, city public works, businesses and local organizations, etc. As ride services continue to grow and people choose multiple modes over individual ownership, there should be a greater focus on safe and legal drop-off and pick-up zones. Such zones should be considered and possibly required for new developments over a certain size.	5/2/2018
572	25	/policies/innovations-in-transportation-and-infras	Use technology to get rid of "beg buttons" where pedestrians have to ask permission to cross the street.	5/3/2018
573	18	/policies/walking/	Make walking comfortable and desirable. It generally sin't now because Minneapolis streets are awful places with fast-moving cars, boring street frontages, and left up to property owners to maintain. Cars remain the top priority.	5/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

574	19	/policies/bicycling/	Bikeways are great, but are not useful during the winter, when they continue to block traffic without use; redundant bikeway (such as 26/28, 1-3 blocks from the greenway) remain unused as commute options. As the working mother of 3 small children, I cannot bring my kids to school or daycare only by biking- I must have a reasonable alternative.	5/3/2018
575	17	/policies/complete-streets/	if biking and transit are "second," it appears they are listed as equal priorities. However, public transit is clearly not a priority for the city, despite being a more feasible year-round option than biking.	5/3/2018
576	33	/policies/affordable-housing-production/	simply increasing density does not increase affordability, as evidenced by the uptown area, a dense but extremely expensive area of the city. It is not clear how you will increase diversity of housing, at a time when all new construction appears homogenous and there is very little incentive to provide adequate affordable housing.	5/3/2018
577	68	/policies/energy-efficient-buildings/	rather than "encouraging" sustainable design (which, if not cost effective or profitable, will not be used) it should be a requirement of new construction. formal regulations without variances should be enacted.	5/3/2018
578	1	/policies/access-to-housing/	As to e), I'm a resident home-owner in one of these areas (Waite Park). I fully support the proposal. It's becoming clear that the meager supply of starter-homes is not enough to meet the demand for living in the outer neighborhoods of Minneapolis. More people should be able to live in all neighborhoods of the city. 3 and 4 unit building don't really deviate a great deal from some of the large single-family homes being built throughout the city. Much like the ADU ordinance, this policy change would likely be barely noticeable to existing residents once enacted. There are already thousands of non-conforming duplexes, triplexes and fourplexes that blend in seamlessly with rows of single-family homes. Let's simply legalize what we basically already have.	5/3/2018
579	5	/policies/visual-quality-of-new-development/	So far the city has done an awful job with their building requirements. Everything is the same boring box clad in multiple sidings, which makes them all look the same and all look awful. Get your fingers out of the design process! Also, almost all of these horrible structures have windows that don't open at all, or only a very small portion opens. Way to add to climate change by requiring everyone to use air conditioning when it's warm.	5/4/2018
580	18	/policies/walking/	The city should consider clearing public sidewalks, just like it clears streets for cars. Too many residents do not clear snow from public sidewalks and the city is not doing enough to punish them. Higher, faster fines if you aren't going to do it.	5/4/2018
581	34	/policies/affordable-housing-preservation/	The city has been ripping down 'naturally affordable housing' for well over a decade. I see absolutely no change in direction here. Our leaders keep offering variances for the condo monstrosities, but they are not affordable for most people. QUIT RIPPING DOWN OUR NEIGHBORHOODS!! Not only do they not make housing more affordable, they make those neighborhoods worse for those still living there.	5/4/2018
582	42	/policies/expand-homeownership/	What are these "current racially restrictive housing policies"? You say it like there's still something out there on the books - what is it? The barriers are not racial, they are financial. Quit pretending they are the same thing. Policies should not be specific to different races; that's the very definition of racism.	5/4/2018
583	47	/policies/housing-maintenance/	Your action steps sound like code for even more housing regulation. We are so ridiculously over-regulated as it is. Feel like a permit is required to do anything. Pretty soon we'll need one to wash our windows or paint. Your permit requirements and their costs drive homeowners to do work under the table. Your goal of safety (or is it really about more money?) is backfiring.	5/4/2018
584	78	/policies/park-design-and-programming/	Don't ruin our parks. They are meant to be a respite from urban living. Don't ruin them under the guise of 'being inclusive'. It's a green space; there's nothing biased about nature. Have already been disappointed by the allowance of amplified music outside of bandstand areas. It's not peaceful and has driven me away on more than one account.	5/4/2018
585	14	/policies/tree-canopy-and-urban-forest/	You should start by discontinuing the plan to wipe out every ash tree in the city, regardless of whether or not it has EAB. Parks should do their homework on what happened with the American chestnut and not follow the exact same plan, which was realized to be a huge mistake. And why waste money on downtown trees? Where is there even a mature boulevard downtown tree? Practically no where because they will all die or get ripped out for the next new construction. Quit deluding and patting yourselves on the back for planting new trees there.	5/4/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

586	20	/policies/transit/	<p>You need to create good public transportation BEFORE you restrict cars. Your current plan (thanks lisa fender bender)of choking cars out of streets by creating dead lanes and bike lanes is asinine. Making our commutes miserable is not going to change my use of a car. Why you ask? Because of the following:</p> <p>Public transit is currently not very reliable, fast or safe. I am not going anywhere remote or sketchy via rail or bus because I don't want to put my safety at risk, especially at night.</p> <p>Despite traffic congestion, it is still easily 2-3 times faster to go by car. And, there are many places the bus doesn't even get close enough to. As it is now, I've already curbed a fair amount of activities due to the headache of parking and unwillingness to use public transport. That won't change with more restrictions; I'll just do less in Minneapolis.</p> <p>And just remind yourself of how much more smog is now being produced by all those cars that sit idling on one lane streets because they have been reduced by an entire lane for a handful of bikers. These stupid protected lanes are way wider than necessary and create problems for: people trying to parallel park on one lane roads (but you don't care about drivers at all, I forgot), delivery drivers trying to park briefly, pedestrians crossing the street over the newly created snow hump where the sticks are, and emergency vehicles who are now trapped by all that traffic.</p>	5/4/2018
587	70	/policies/ecology-and-habitat/	<p>Sorry, but you just cannot have a healthy ecosystem in an overly populated, dense environment. There is nothing healthy about increasing the density of Minneapolis. I already notice the serious degradation of natural areas due to the sheer amount of people using them. People are deleterious and adding more of them automatically increases: foot traffic, disturbance via presence and noise, light pollution, smog (via transit, stupid bonfires, smoking) lees permeable space due to all the buildings and pavement, dirtier water, loss of light due to the ridiculous heights and density of new buildings. What's going to grow when all our neighborhoods are dominated by 6+ story buildings that also crowd the entire lot alley to sidewalk?</p> <p>Wild areas need to be left wild, not 'managed' by some expert.</p>	5/4/2018
588	42	/policies/expand-homeownership/	<p>Home ownership is suffering due to ever increasing property taxes and home prices. Add to that how Minneapolis is making it less attractive to buy here. I already my suburban flight because I am afraid to buy a home that will lose its zoning protection. By that, I mean, I am now afraid of what the city will allow to be built next to me. Not sure what is safe from high rise buildings with multiple units any more.</p> <p>Apparently nothing, as the city consistently disregards its own zoning laws and is now looking to loosen it legally. I am not going to invest in a property that is later going to lose its value (both monetarily and personally) due to the later addition of tall buildings, renters, density/crowding, noise, lack of parking.</p> <p>And again, quit playing the politically correct race card. Home ownership among non-whites is about income. You aren't going to solve it by treating symptoms, you need to address the cause, which is low income.</p>	5/4/2018
589	12	/policies/lighting/	<p>While LED's may be efficient, they are also very harmful to nature because of the light spectrum. I am dismayed that they are being used more for street lighting. They are also very harsh and increase night blindness. The new ones I've seen at south Minneapolis intersections are way too bright! They need to be considerably dimmer. This is very rude and unnecessary to all the homes they shine into.</p>	5/4/2018
590	18	/policies/walking/	<p>You need to do something about the overall poor clearing of public sidewalks. Too many residents and businesses do not do a timely or complete clearing (some nothing at all). Either the city needs to take care of it like they do streets, or much swifter and stiffer penalties/enforcement need to be enacted. I continue to be disgusted by the city's ability to troll around dolling out citations for unmowed grass, peeling paint, broken windows, junk cars and other cosmetic issues; but to get a sidewalk cleared, some citizen needs to report it. None of the first infractions are in any way a safety or mobility issue, but snow is. That is ridiculous and I think it's because it's easy to generate money via the previous infractions, but the city actually spends money clearing snow.</p>	5/4/2018
591	19	/policies/bicycling/	<p>Protected bike lanes are a bad idea. I am a biker; I don't like them. Too many bike lanes are inordinately wide.</p>	5/4/2018
592	83	/policies/people-with-disabilities/	<p>Get rid of those awful talking street crossing things. They are way too loud. No one should be able to hear that in their yard, and currently I can hear some of them half a block away. More noise pollution for the city. They are obnoxious and talk whether someone is even there, let alone a blind person.</p>	5/4/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

593	20	/policies/transit/	Ditch all ideas about adding street cars. If they had been left in place that would be one thing, but they are gone. Don't get on the nostalgia trend train. I've sat in on the committees trying to bring them back. It's a stupid idea. Street cars are completely inflexible. When an accident happens they cannot go around. The tracks are a safety hazard for bikers and walkers. They are ludicrously expensive. Their required platform for loading is invasive. It would wipe out a lot of boulevard space (ie, personal landowner property) just to meet ADA requirements. They will be louder than rubber on asphalt. This city doesn't need any more noise.	5/4/2018
594	53	/policies/quality-of-life/	Minneapolis is ruining its quality of life aspect with its determination to increase density exponentially. Years ago I visited Chicago and thought it was a fun city - to visit. I recognized right away what made me never want to live there: It was way too crowded and congested. Congested with people and buildings. All buildings that, even in residential areas, were too crowded and close to each other and the streets. The whole place seemed dark and cavernous. Minneapolis is hell bent on becoming a big, cosmopolitan city. Always trying to be like the cool cities. That line of thinking is embarrassing and immature. We have a special city that has done an excellent job of balancing big city life with nature and feeling personable. Why is the city council trying so hard to ruin a good thing?	5/4/2018
595	29	/policies/creative-sector-economy/	It is not the city's job to make sure that a set quota of non-whites become creative people. Enough with race being mentioned in every policy that spews from the council's mouth.	5/4/2018
596	15	/policies/transportation-and-equity/	This online format of the comp plan is innovative yet incomprehensible. A for effort, but I can't tell what's even happening without seeing a good old-fashioned PDF.	5/4/2018
597	1	/policies/access-to-housing/	How does this approach tie back to or relate to Equity?	5/5/2018
598	33	/policies/affordable-housing-production/	<p>I am Leon Wallace, a resident in St. Annes. My efficiency Apt is all I can afford without Sec. #8 & I demand more Affordable Hsg Choices for Seniors like me (62+). I am 76 Yrs of age & single.</p> <p>Welcome to the Cora McCorvey Community Center for older adults, located at 1015 4th Ave N, Mpls. 55405. I am Leon Wallace, a retired real estate broker with over 30 years of real estate experience serving North Mpls. I am retire & 76 years of age. I am currently a member of Redeemer Lutheran Church on 1800 Glenwood Ave N, Mpls. I accepted the Lord Jesus Christ as a member of the old Zion Baptist Church, before the current church was constructed. I was a teenager, when the current church was constructed.</p> <p>I am extending the invitation for a representative of your church to assist me in organizing a non profit Senior Housing Developer of Affordable Housing.</p> <p>It is my intention to organize a community based non profit organization to represent seniors in contacting our Minneapolis City Leaders to designate a Senior Retirement Community @ the South end of the Heritage Park Community between Olson Hwy, Van White Blvd & Glenwood Ave N.</p> <p>I would propose that we seniors (62+ & our representatives organize a non profit development Corp. to develop affordable senior Hsg in the proposed Heritage Park Senior Community. It is my belief that a cooperative ownership of senior housing would provide for the most affordable housing for seniors in North Mpls. This is not about profit or capitalization, this would be a ministry of providing desirable housing choices for seniors in North Mpls.</p> <p>I have presented the concept to Council Person Ellison & to our Mayor Frey. They have expressed their interest, but not offered any assistance. I would suggest that we seniors need to advocate for our own housing needs. The only two residential senior housing in the proposed Heritage Park Community is the Commons & the Feeney Manor (independent living & assisted living owned by Mpls. Public Hsg.) Both units have over 5 years waiting lists for seniors who need immediate housing. This is totally unacceptable, since our seniors are forced to seek housing in other surrounding cities away from their community. Providing affordable housing choices for our seniors must become a priority.</p>	5/5/2018
			I welcome your response & communications. God Bless you, Leon Wallace (leon01@q.com) 612-521-5581

604	0.2	/small-area-plans/	<p>Why is Heritage Park, south of Olson Hwy to Glenwood Ave N, not included in your small area plans? We seniors need an affordable senior housing retirement community to added to your small area plans. There are 4+ blocks of vacant land & this area must be set aside to provide affordable senior housing choices, for the transition that most seniors experienced during our latter years of life. I welcome your response. Thanks, Leon Wallace (leon01@q.com) 612-521-5581/2323 26th Ave N,#318/Mpls, MN 55411</p>	5/5/2018
605	49	/policies/educational-and-economic-access/	<p>I have heard these strategies for the past 40 years and the results remain the same. What will be different this time to obtain the outcome you desire?</p>	5/6/2018
606	36	/policies/innovative-housing-strategies/	<p>These are just words that have been stated before with no changes. How will this be different this time? I do not see any substantial action in the above strategies.</p>	5/6/2018
607	61	/policies/environmental-justice/	<p>What is the timeline to start the cleanup in the known contaminated sites? Is there a list of organizations who will a part of this strategies? Is this list diverse with various ethnic and age groups? Are the various trade organizations involved in this strategy? They are needed for mentoring and informing students of job opportunities. This can be initiated in elementary school. Reinstate trade information for students in middle as well as high school. Advertisement on the television during the day and not just late at night.</p>	5/6/2018
608	50	/policies/access-to-technology/	<p>Will you be using the local libraries to teach this technology?</p>	5/7/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

609	1	/policies/access-to-housing/	<p>This is the most exciting thing in the 2040 plan that could transform the city. We are lagging behind other cities in growth due to being land locked in and almost every city lot currently utilized (with the exception of lots on the Northside).</p> <p>This will allow greater density in all areas of the city which will make our streets more vibrant, our sidewalks more filled with pedestrians and kids playing, and our restaurants and other establishments in business due to the increased local population that adds to additional customers.</p> <p>Plus, it increases the tax base, keeping property taxes in line.</p>	5/7/2018
610	35	/policies/innovative-housing-types/	<p>The City currently has rules that require a basement on new housing. This greatly increases the cost of housing. I personally don't like having a basement and they typically have issues: Flooding, mold, etc....</p> <p>The City also requires an off street parking spot on the property for single family housing. They should get rid of this requirements since this also adds to the cost of housing and not everybody drives a car.</p>	5/7/2018
611	42	/policies/expand-homeownership/	<p>Removing some hurdles such as minimum square footage of housing, requiring single family housing (R1 zoned) as opposed to multi-family housing, only allowing one structure on a single lot unless there is an unit owner occupied with an ADU, and requiring basements all greatly increase the cost of housing.</p> <p>Detroit, Denver, and Portland have tiny house villages. Cost per unit is much less when you share city resources such a lot, water, and sewer.</p> <p>The city can decrease the cost of housing by getting rid of this laws.</p>	5/7/2018
612	19	/policies/bicycling/	<p>I also recommend that the City improves connections between neighboring suburbs. Nicollet Ave. and Portland Ave. at the Richfield border are good examples where a bike lane just ends and starts again 8 blocks down. It is a frustratingly bad design that suggests that people will just stop biking once they get close to city borders.</p>	5/7/2018
613	17	/policies/complete-streets/	<p>I have spoken with my counsel member, Ms. Palmisano about reducing all city street speed limits.</p> <p>People drive too fast adjacent to where pedestrians and bikers are. If somebody drives 30mph, the chances of them killing somebody much greater than at 20mph. There is no reason somebody needs to drive 30mph on the 5200 block of Girard Ave S., let alone on W. 54th St. or Penn Ave S or Xerxes Ave S even if they are feeder streets.</p> <p>A maximum speed limit of 25mph please, other streets should be 20mph or less.</p> <p>I'd like to live to see another day if an inattentive driver hits me.</p>	5/7/2018
614	4	/policies/access-to-commercial-goods-and-service	<p>More density and more amenities please. This looks great! Let's become a real city, not what a Minnpost author stated in the past, Minneapolis reminds me of a 100 year old suburb in New Jersey.</p> <p>Let's be the new Denver, the new Portland, the new Austin. Someplace where people are like, gosh, I should live in Minneapolis. That is is so cool!</p>	5/7/2018
615	14	/policies/tree-canopy-and-urban-forest/	<p>I'd recommend that the city is faster to replant boulevard trees that are taken out.</p> <p>It takes a long time for a boulevard tree to get big and provide a benefit to the neighborhood, so replanting within a year should be the goal.</p>	5/7/2018
616	0.1	/topics/land-use-built-form/	<p>I think increasing density on these major feeder road, W 50th St, W 46th St., Lyndale Ave S, Bryant Ave. S, Penn Ave. S, Xerxes Ave S. makes a lot of sense. And the step down in density makes sense on the adjacent blocks on either side. I'm excited to have more neighbors in the Lynnhurst neighborhood.</p>	5/7/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

617	1	/policies/access-to-housing/	I live in one of those "farthest from downtown" neighborhood interiors in a single-family home. I would love to see multi-unit buildings on our block! There's plenty of available street parking in our neighborhood (just like there is most single-family-home neighborhoods), and the lot sizes are enormous. Let's not hog our most desirable neighborhoods for the benefit of the few.	5/8/2018
618	0.1	/topics/land-use-built-form/	With regard to 1800 Fremont Avenue North... Why has the North High School Football Field been added to the proposed "Corridor 6" whereas North High School stays at "Corridor 2"? It does not seem logical to encourage future development on a community asset " that asset being the North High School Football Field. " Ian Alexander (1601 Irving Ave N.)	5/8/2018
619	0.1	/topics/land-use-built-form/	Please consider changing Irving to incorporate the North Minneapolis Greenway into this proposal: https://www.google.com/search?q=city+of+minneapolis+north+greenway&rlz=1C9BKJA_enUS731US731&hl=en-US&prmd=nmiv&source=lnms&tbn=isch&sa=X&ved=0ahUKEwj187SQufbaAhVEyYMKHQaHBigQ_AUIEygD&biw=1366&bih=909#imgrc=tA7ZVPjwzzlbkM :	5/8/2018
620	1	/policies/access-to-housing/	I live in Howe and I do agree with the overall goal of increasing housing density to address the supply issue. I live in an area that would be impacted by allowing small-scale residential structures to be converted into 4 unit dwelling units. I disagree with allowing unlimited multiunit housing in my neighborhood. Perhaps allowing up to 2-4 units per block would be a good compromise. Additionally, any new construction should blend in with the unique neighborhood we live in. I do not want to live next to a cheaply built new construction building that looks like it should be in the suburbs. In conclusion, I think the number of allowed multi-dwelling units in single family neighborhoods be limited per block. Additionally, the building code for these new construction units should insure they blend into the neighborhood.	5/8/2018
621	51	/policies/healthy-pre-k-development/	I encourage grand parents and other support persons be involved in these strategies.	5/8/2018
622	91	/policies/heritage-preservation-outreach/	Have specific ethnic groups, owners of designated historic properties notified of this policy? How will this goal be evaluated? Counting numbers of persons? Action results of preserved historical information?	5/8/2018
623	33	/policies/affordable-housing-production/	We need to prioritize housing for those at 30, 50 and 80% of median income with priority for those at 30%!	5/8/2018
624	34	/policies/affordable-housing-preservation/	We should establish a rule that a landlord selling an affordable building, especially multi-family, needs to inform the city before selling so that it does not go to a developer who refurbishes and then leaves the tenants out in the cold since they cannot afford the new rent!	5/8/2018
625	30	/policies/arts-and-cultural-assets/	(re: f) The city planning department's current RFP process and structural biases results in bland, risk-adverse public art. Because the planning department is staffed by folks with a background in planning and architecture, they see proposals that look like the work they've done or seen from architects as more polished and professional than submissions from artists, who might not have the same academic background or ability to make a highly polished proposal. It would be far better to get some bad results, potentially divisive messages, and poor performance from actual artists than to get standardized, dull, design-blog-ready tripe from like-minded "creatives." Art is more than an instagramable experience. That's why public art is so hard to do, and the city isn't doing a very good job.	5/8/2018
626	18	/policies/walking/	POLICY 18: Walking NRRC's proposed action steps: 1.Enforce development standards that encourage walking such as curbside store fronts. Minimize or eliminate development policies and proposals that encourage driving and parking, and parking lots.	5/8/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

627	43	/policies/housing-displacement/	<p>POLICY 43: Housing Displacement</p> <p>NRRC's proposed action steps:</p> <ol style="list-style-type: none"> 1.The City will increase available down payment assistance for home purchasers of low-and-moderate-income home buyers. 2.The City will increase available down payment assistance for home purchasers of peoples of color, indigenous people, vulnerable populations, the elderly and people with disabilities. 3.The City will collaborate with legal services to pass stricter rule to protect vulnerable home purchasers from toxic contract for deed contracts. 4.The City will improve the housing standards of new builds to promote longer quality and sustainability. 5.The City will use State emergency assistance funding to help residents pay delinquent property taxes. 6.The City will provide legal resource materials to residents receiving code violations from the City of Minneapolis to protect against excessive violations and fees. 7.The City will provide rehab resources, available with neighborhood organizations, to residents receiving code violations. 	5/8/2018
628	49	/policies/educational-and-economic-access/	<p>POLICY 49: Educational and Economic Access</p> <p>NRRC's proposed action steps:</p> <ol style="list-style-type: none"> 1.City will develop and engage with a support group that will engage and foster dialogue with the school board and the schools. 2.The City will repurpose or reopen closed schools. 3.The City will repurpose the 44th precinct to a community space. 	5/8/2018
629	56	/policies/supporting-small-businesses/	<p>POLICY 56: Supporting Small Businesses</p> <p>NRRC's proposed action steps:</p> <ol style="list-style-type: none"> 1.The City will research and evaluate the availability of land and unused buildings in North Minneapolis that could be developed into a boutique commercial corridor for businesses such as coffee shops, flower shops, small grocery stores, and book stores. 2.The City will evaluate current zoning policies and design standards that make redevelopment in North Minneapolis overly burdensome. 3.The City will evaluate current zoning and design standards that support boutique commercial corridors and encourages walking. 4.The City will provide technical assistance to neighborhood organizations to help said organization balance costs and benefits of development policies and proposals. 5.The City enhances funding to support redevelopment and repurposing abandoned buildings and industrial sites; and blighted buildings for economic development. 	5/8/2018
630	1	/policies/access-to-housing/	Thank you for allowing greater housing supply and diversity to be built in Minneapolis. Without more options, I would not be able to afford to live in Minneapolis as costs continue to rise.	5/8/2018
631	29	/policies/creative-sector-economy/	Help Maintain affordable studio arts space by creating a Land Trust (low property tax advantage) for arts buildings.	5/8/2018
632	30	/policies/arts-and-cultural-assets/	Use Art programming to help begin dialouge between communities. Police and Black folks. Immigrant and established communities. Native Peoples and everyone.	5/8/2018
633	1	/policies/access-to-housing/	What is going on now is very sickening in terms of options for affordable housing. I am a Millennial and a county worker and I can barely afford a one bedroom apartment in/near downtown Minneapolis. I currently live in a studio and honestly I was disgusted that "luxury" efficiencies are being built in the neighborhood I live in (Elliot). I am glad there is a plan that will address these housing problems I just honestly hope I don't have to wait until I am 51 years old (my age in 2040). I know these things take time but can there be a push for these so-called luxury apartments to set aside affordable one bedroom apartments/housing for folks like myself and more? I mean seriously, I don't need extra costly maid services (one of the unnecessary services those luxury apartments offer) I can wash and take care of my home myself and I'm trying to rent an affordable one bedroom NOT a hotel room.	5/9/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

634	80	/policies/development-near-metro-stations/	Please don't ruin our beautiful city this way. This is so short sighted. Our lakes and parks will not be able to sustain the pollution and water use that these buildings will produce. We already have issues with a building polluting the Isles canal. This makes me want to run back to the suburbs.	5/9/2018
635	5	/policies/visual-quality-of-new-development/	Much of the new development in Minneapolis is quite ugly and often looks the same. These "Action Steps" are already in place and don't seem to have much effect. Design standards need to be put in place.	5/9/2018
636	22	/policies/downtown-transportation/	Downtown streets are awful places to walk and bike because the streets are mostly one ways and very wide, which promotes fast moving and noisy traffic. Outside of Nicollet Mall, the streets lack boulevards trees and streetscape to make them interesting. Narrow streets and convert them to two-ways, and work towards a bus tunnel to get buses out of traffic.	5/9/2018
637	23	/policies/coordinated-development-strategy/	This is a bunch of Planning jargon that means little. Not clear what this means.	5/9/2018
638	26	/policies/vision-zero/	Motor vehicles are the only mode killing and inuring people, and this Policy should state that obvious fact. People walking don't hurt any other road users.	5/9/2018
639	27	/policies/transportation-partnerships/	Hennepin County controls the most dangerous streets in Minneapolis for walkers and bikers, but the City allows them to design awful roadways. Forget about the funding and decommission Hiawatha Avenue as a ineffective freeway. Get MNDOT out of having control over awful streets like Central and University Avenues NE. Cover the freeways.	5/9/2018
640	49	/policies/educational-and-economic-access/	Since the transit system in Minneapolis is so mediocre, people are disadvantaged by not having access to jobs if they can't drive or cannot afford a car. People are forced to have cars at a cost of thousands of dollars a year. The City's existing policies continue this situation.	5/9/2018
641	53	/policies/quality-of-life/	This policy seems to ignore the fact that Minneapolis has 70+ neighborhood associations, which are heavily responsible for making the quality of life better through events, art activities, and community-based improvements.	5/9/2018
642	32	/policies/arts-in-community-development/	Thanks for sharing these policies. Together they present an exciting road map. I would offer a suggestion for consideration that we substitute the term "creative placekeeping" for "creative placemaking". While creative placemaking is certainly widely understood and has entered the parlance of city planners, people in the creative sector and general audiences more widely, it can suggest a sort of "layering on" of culture- making something where perhaps there already are assets. Sarah Bellamy of Penumbra Theatre has suggested "creative placekeeping" points to the strengths already inherent in a place, and invites us to think of those assets as meriting protection, nurturing and investment. For your consideration- thank you. Nina Clark, Minneapolis, ninaclark.mn@gmail.com	5/9/2018
643	66	/policies/air-quality/	Why does the City own parking ramps, which provides cheap parking and promotes driving? Sell and/or tear down those awful structures and stop building more parking facilities. Air quality won't improve unless walking, biking, and transit become more convenient and efficient.	5/9/2018
644	67	/policies/climate-resilient-communities/	Minneapolis has a winter climate. Why doesn't the City then make sure it is safe, convenient, and desirable to walk in the winter? The sidewalk network remains covered in snow, ice, and water for months out of the year, while every effort is made to clear streets for motorists. There is a huge gap in logic with this Policy.	5/9/2018
645	80	/policies/development-near-metro-stations/	There are no "strengths" to having Blue Line stations next to Hiawatha Avenue. Traffic moves fast creating a noisy and polluted environment, as well as makes it unsafe and undesirable to cross the highway. Add an Action Step where the City will look into de-commissioning Hiawatha as a highway making it a place for people. Plus, Hiawatha doesn't even function well for motorists because of all the traffic lights.	5/9/2018
646	83	/policies/people-with-disabilities/	Currently, Public Works does the bare minimum to ensure public facilities like streets are accessible for people with disabilities. For example, it will take 80 years for Minneapolis to replace pedestrian ramps, and there is little effort made to remove barriers in the sidewalk, widen non-compliant sidewalks, or ensure sidewalks are clear of ice and snow.	5/9/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

647	35	/policies/innovative-housing-types/	<p>Right now the city require surveys and variances just to do replacement work on my street Up to \$4000 to get a no. I hope the new policies revise most of this. New buildings should not dump water on their neighbors (from drains etc) and should have parking or a pledge that they not drive a car. A fourplex, like a large single family home, should be designed to be an asset to the block, and respect surrounding buildings. Have the city remove barriers for all landowners and not just fourplex owners.</p> <p>Here a way to increase affordability-lower property taxes! This whole city plan did not take into account cost. My big problem with this plan, thoughts were good but process very flawed. Ask people what they want, they give you a dream list. Then ask what they will trade for it or pay it- you get a different answer. You did not ask the payers in the system. Property tax, state and sales tax are already high enough. I know retiring here will be impossible. It would be nice to have affordable housing set up with a priority for people who paid in the system and can no longer afford their Mpls homes. Sign me up.</p>	5/9/2018
648	0.1	/topics/land-use-built-form/	<p>One thing that keeps coming up in conversations I'm having around land use is the loss of neighborhood retail over the past several decades, and potential for displacement of small neighborhood businesses and services. It would be good to see more land use of the type of "Neighborhood Mixed Use" to account for this: providing places for businesses to move around in neighborhoods, and allow new businesses for vital services to move in.</p> <p>In Prospect Park I can think of a couple examples: we didn't have a grocery store for the longest time, and we do now. A local daycare agency moved out of the building that was reconstructed for that, and was fortunate to find a place in the area. There aren't many spaces for them if they need to move again (fortunately for them, future land use designations include mixed use in the area).</p> <p>In CARAG, I'm aware of an instance where something is designated with "Interior 2", but there is a small convenience store in the basement of an apartment building: when I lived in the area I went there all the time when I needed miscellaneous small things. It would be great if more neighborhoods like this had that opportunity, and I think a way toward this is maybe allowing some types of businesses by right in Interior 2.</p>	5/9/2018
649	0.1	/topics/land-use-built-form/	<p>The 2040 plan would call for some rather dramatic zoning changes on my block and the surrounding area -- potentially dramatically changing the character of my residential block by allowing large 3-story multifamily complexes on the 4500 block of Aldrich, and 4 stories to the west on Bryant. This kind of density just isn't appropriate for this neighborhood.</p> <p>The single family homes and duplexes on my block come alive each spring with beautiful gardens and trees and kids playing in front and back yards. I can't imagine a sprawling condo or apartment complex next door. It doesn't make sense. I'm concerned this zoning change to Interior 3 could damage what people love most about our quiet, family-oriented neighborhood. I believe it should be zoned Interior 1 to maintain the assets that drew my family and my neighbors to this (terrific!) block.</p> <p>Sincerely, Erin Burns</p>	5/10/2018
650	38	/policies/affordable-housing-near-transit-and-job-	<p>This is very good. Anything the city can do to promote and develop affordable housing in dense, desirable areas is great. A percentage of affordable units per project could allow developers to waive any needed variances or increase height and floor area ratio even more than is currently permitted.</p>	5/10/2018
651	2	/policies/access-to-employment/	<p>We need to give local transit routes that serve job centers, especially downtown, more priority and greater frequency on our city streets. We should have more bus-only lanes (both 24 hour bus-only and peak-time bus-only) on streets like Hennepin and Central. For transit to be a viable option for more people, buses cannot be held up by single-occupancy (or possible future zero occupancy) vehicles.</p>	5/10/2018
652	17	/policies/complete-streets/	<p>I am very proud of the city's Complete Streets policy and am excited to see it implemented. All street projects throughout our city must consider optimal use for future generations. I love the prioritization triangle - and I hope it is upheld in the redesign of Hennepin Ave through South Minneapolis by giving Hennepin 24 hour bus-only lanes and protected bicycle facilities with a strong connection between downtown and uptown.</p>	5/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

653	20	/policies/transit/	We need to give local transit routes more priority and greater frequency on our city streets. We should have more bus-only lanes (both 24 hour bus-only and peak-time bus-only) on streets like Hennepin and Central. For transit to be a viable option for more people, buses cannot be held up by single-occupancy (or possible future zero-occupancy) vehicles. Give transit full priority! The city should lobby the Met Council for streetcar on the Midtown Greenway and really start to think big picture by planning a transit tunnel through downtown (eventually rerouting downtown LRT through the CBD at least). Multiple lanes on both 94 and 35W should convert to full-time MNPass lanes, and revenue should be used to help mitigate freeway impacts on the neighborhoods it cuts through.	5/10/2018
654	19	/policies/bicycling/	Bicycling is the most efficient way to move the greatest number of people through our city and it must be a greater focus going forward. Bicycle storage facilities in new housing should be required to be easily accessible from street level (not in the center of an underground car parking garage), and short-term parking near all sorts of business entrances must be increased. The easier bicycling becomes, the greater the mode share we will see.	5/10/2018
655	11	/policies/skyways/	No new skyways. No skyway expansion. No new connections except from existing skyways to the street level. Prioritize directions to street level over directions through skyway system. No new commercial spaces at skyway level. Make the streets great by moving retail and people to the street level!	5/10/2018
656	10	/policies/street-grid/	Why do all streets, especially in lower-density residential areas need to be built exactly the same way with room for parking on both sides of the street + two driving lanes? They could be narrower, have parking bump outs with rain gardens, and more space for boulevard trees... They could also curve or angle to make them less square and perhaps slow traffic.	5/10/2018
657	1	/policies/access-to-housing/	I support these policies in general and in particular as a resident of SW Minneapolis on a block affected by proposed policy 5, I would comment that I would welcome thoughtful additional housing up to 4 units in residential neighborhoods, particularly as planned near such commercial nodes as 50th and Bryant, 50th and Penn and 46th and Bryant. Not only do I believe this is sensible change from a density, diversity and economic development perspective, but as I age out of my single family home I would appreciate more rental/condo options in my existing neighborhood. Wood Kidner 4926 Colfax Ave S	5/10/2018
658	81	/policies/social-connectedness/	I like the idea of physical innovative art events to bring diverse people together to experience the city. open streets minnesota, minnesota lights (the one that creates art exhibits with light and new technology and goes from 9 p to sunrise. I think we are missing thinking about cross generational activities, supported (i\$) mentoring relationships between adults and teens, even something along the lines of a street doing boulevard free gardens for harvest by everyone on the street or lasting art projects (stepping stones, handprints of neighbors, story telling booths). Also new media connections in addition to actual physical connections	5/10/2018
659	82	/policies/aging/	I think finding ways to help elders stay in their homes with support services facilitating their needs and home maintenance is essential.	5/10/2018
660	1	/policies/access-to-housing/	What about co-housing designed area that access green space and elder services, potentially schools and daycare..what about creating a model co-housing design in a large currently under resourced area and creating a beautiful model or hub for a new housing kind of thinking. But it has to be beautiful and not just another high rise badly maintained with a common space.	5/10/2018
661	81	/policies/social-connectedness/	D, E, and F actions steps seem the most important to me. Creating green spaces for people to congregate, community centers for teenagers especially, and community events like Open Streets or in Seward the King's Fair where people get out and meet each other.	5/11/2018
662	20	/policies/transit/	Policies and action steps need to be more explicit that the city will play a role in financially supporting transit capital investment and operations. The city currently spends in excess of \$100 million every year in capital and operating budgets maintaining streets, traffic lights, police operations, plowing, and more - the vast majority of which benefits drivers in personal vehicles. This amount includes spending on projects where ownership and finances are spread across multiple jurisdictions (ex Hennepin County, MnDOT) - proving we can partner with larger government entities from a management and budget perspective. The city should spend a justifiable amount on transit as well.	5/11/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

663	0.1	/topics/land-use-built-form/	<p>General comments on both the land use and built form map proposals:</p> <p>Built form guidelines for neighborhood interiors (1 & 2 - the vast majority of the city still in this proposal) speak of 1-4 units structures, but typically only on a standard lots (or a small number of combined lots), and only up to 2.5 stories. While this is a broad policy and built form proposal, it is still very limiting. 4 units on a standard lot, given our standard narrow/deep format, very much limits housing typologies. Row houses, townhomes (of varying styles, including - yes - Seattle's four- and six-pack style, Houston styles, and more), small buildings with 5-12 units of smaller size (ex. micro-units, studios, and small 1BR units) all are ruled out by this definition, as is anything larger than 2.5 stories. The Comprehensive Plan Draft does nothing to justify why 4 units or 2.5 stories is acceptable whereas 5 is not backed by research, data, national and international peer-reviews, economics, or otherwise. We can do better.</p> <p>The Interior 1 & 2 designation also pays no attention to economic feasibility of different lot types in different parts of the city. By nature this proposal picks easily-drawn lines (ex. A block off a transit corridor, south or north of a given street, etc) to designate different intensity levels. But existing structures, conditions, uses, and demand (given proximity to anything but a transit corridor) all factor into what is possible for a lot's redevelopment. In many parts of the city, even Interior 1 & 2 will still guarantee that most lots only option for redevelopment is a larger, more expensive single family home.</p> <p>Intensity "transition" is still a wrongheaded goal in this Comprehensive Plan draft as it was in the last one. A person in a single family home is no more deserving of the light and air provided by a more "compatible" (or similar) structure than a person on the ground level of an apartment building. By intentionally choosing to designate larger structures to go next to larger structures, we guarantee people in multi-family housing have worse views, less sunlight, and less air than people who can already afford to have 4 detached walls with windows, a backyard, and more interior space per resident. That's wrong.</p> <p>Land use separation and segregation continues to be a struggle in the proposal. While it is true that demand for retail or other commercial uses may not exceed current commercial structure capacity in many parts of town, it is also true that small, locally-owned businesses are being priced out of many nodes and corridors. This proposal should be at least as bold regarding commercial uses as it is regarding residential intensity expansion: allow more types of low-impact commercial uses in every district in the city. Germany and Japan have excellent models - limiting the allowed commercial gross floor area in residential zones, as well as putting limits around use based on daily needs of residents, which can still include restaurants, shops, and small offices.</p>	5/11/2018
664	1	/policies/access-to-housing/	<p>- Multi-family housing of densities discussed along transit routes should not be limited only to those transit routes. Whether this is closer to the core where densities/heights are 4-6+ stories or a little further out where built form along transit route</p>	5/11/2018
665	0.1	/topics/land-use-built-form/	<p>WE DO NOT WANT FOURPLEXES IN OUR NEIGHBORHOOD!</p> <p>As homeowners that have paid their taxes on time for nearly two decades and have spent time and money to improve our house and to keep up the neighborhood, we feel under siege and unfairly treated by this self judging tone about our city's past and know-it all plan for the city's future. Since when has it become a bad thing to own a single family home in Minneapolis? We have lived for the last eight years next to a rental property, which was rented mostly by young,often low income people (the folks you so desperately want to have more of) , which more often than not did not respect their neighbors and did not help the quality of life. We could hardly stand it, living next to a house with four renters and we fail to see how a multi family dwelling is supposed to improve the situation. And if your plan is just to create more living space, there is no guarantee that it will be more affordable. All it would do would be to degrade the quality of life for everybody but not make things more affordable. Maybe you should stop feeling guilty about the past and start caring about the people that already live here and that pay your bills through their taxes. Keep up the roads, parks, schools, fire and police and don't spent all your time dreaming up ideas how to make life more complicated for everybody else. This plan will ultimately hurt the low to middle income homeowners, as their houses will become targets for speculators to buy up and replace with your multi family dwellings! STOP IT!</p>	5/11/2018
666	0.2	/small-area-plans/	<p>Where is the Shoreland Overlay District included? Seems like who ever wrote this plan has decided to eliminate what is a major environmental protection and State Law from this Comp Plan.</p>	5/11/2018
667	0.1	/topics/land-use-built-form/	<p>The purposeful elimination of single family housing will be destructive to raising families in Minneapolis. 4 family units on one 40 foot wide lot is not a better quality of life. The illustration provided looks much worse then what exists on the blocks they want to upzone.</p>	5/11/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

668	1	/policies/access-to-housing/	I strongly disagree with allowing multi family housing to be interspersed, ad how, in single family neighborhoods. We bought our home in the neighborhood because it was single family and we pay a tremendous amount in taxes to do so. This should not be able to be changed without a vote by those of us who have made an investment in the neighborhoods and pay the taxes associated with that. Increased density, along with the decrease of single family neighborhoods, will only force people to the suburbs, thus reducing your tax base and reducing diversity.	5/11/2018
669	0.1	/topics/land-use-built-form/	<p>It is absurd that the 49th block of Aldrich Ave S. is considered for Corridor 6, this is a very quiet street with no mass transit. Dropping 6 story apartment buildings on this block will destroy the community on this block. The minute this street is rezoned there will be developers building high end condos that will increase traffic along this street while still out-pricing any other people who could not afford to live in the area anyway.</p> <p>There are already high density housing along 50th street in the form of apartments above ground shops. If anything there should be more of this built around the high capacity streets of 50th, Bryant and Lyndale.</p> <p>Bus stops are easily accessible from any spot on Bryant and Lyndale via 50th street. Residents of rental properties above retail will be within several stops for a minutes walk.</p> <p>Adding Aldrich to become high density is beyond incompetent planning.</p>	5/11/2018
670	91	/policies/heritage-preservation-outreach/	This is nice, but you haven't been able to handle what you've already got! Deal with what's on your table already before you spread yourselves even thinner. The city is a prime partner (could even consider it criminally negligent) with multi-national corporate scammers Canadian Pacific Railway in the planned neglect of the city-designated Historic Shoreham Roundhouse. Also (and this applies to many portions of this draft and to city activities): Stop dividing people by calling out certain groups for special attention at the exclusion of others. Bring us together, don't keep separating us! (For this policy, the history lies in the history, not in the person who happens to notice it and talk about it in 2018. Tell people: "It's not all about ME ME ME.") We have lost sight of the civic good, the over-all wellbeing of everyone (not just certain "group-thinks") in Mpls as we rush to make amends for past mistakes. In this rush, the city has become racist in its efforts to be anti-racist. The city has become exclusionary in its efforts to become non-exclusive. The city is divisive in its efforts instead of understanding what One Minneapolis really means! We've swung around so far we have come full circle in being divisive, racist, and unfair. Just replaced one target with another.	5/11/2018
671	92	/policies/identify-and-evaluate-historic-resources/	This is half right. But the other half, for many historic resources, is to work to make them viable in some way, if not already so, not to just study/evaluate, identify them. For instance, you've studied the city-designated and federally eligible Historic Shoreham Roundhouse. Then you dropped the ball by not being more proactive and assertive here in bringing about much-needed community revitalization on a key corridor where the collateral blight is a true growing embarrassment to the city of Mpls. Worse every year. Instead, this could be historic preservation AND economic revitalization on 18 acres - many jobs could be created here. Where is CPED?? But you have neglected this for decades and missed many opportunities. Talk about an underrepresented community!	5/11/2018
672	93	/policies/stewarding-historic-properties/	This is so important and so correct! Do it! Break the city staff's (and city council's) habit of neglecting historic properties, allowing too much demolition, having low-brow visions for certain communities like Northeast, and being the weakling pasty for large multi-national corporations like Canadian Pacific Railway. Wise up, city of Mpls -- CP Rail does us no favors and brings no benefit to the city -- no employment at Shoreham, no property taxes, nothing but blight, haz-mat danger, noise, decreased property values, and arrogance. This policy needs to be strong enough to "encourage" (require!) CPED to grow a pair. Before it's too late.	5/11/2018
673	94	/policies/heritage-preservation-regulation/	A through E are too vague to know what you are trying to get at here. Need clearer language. This current verbage could be weaseled around. Revise guidelines HOW? Modify zoning HOW? Make them easier to ignore by bad owners/developers? Stronger? Shouldn't you be following the fed guidelines ... or even stronger? This almost reads as anti-preservation. Fix this.	5/11/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

674	95	/policies/heritage-preservation-financial-incentive/	This is a good start. How about adding financial assistance to community members/groups too small to tackle the onerous federal process of historic designation when a bad property owner stands in the way and bring about demolition by neglect? This ultimately would be a carrot at the end of a stick for a potential redeveloper, too (having federal designation, that is). Also, there should be consequences for companies that purposely work towards demolition of their historically designated buildings by neglecting them. For example, fine Company X for failure to maintain their buildings much as you do with homeowners. You are NOT doing this now, and you know where. (Learn that you too, Mpls, can stand up to a railroad -- other cities are doing it in certain circumstances. Join us in the 21st century.)	5/11/2018
675	96	/policies/heritage-preservation-recognition/	OK	5/11/2018
676	97	/policies/heritage-preservation-legislative-advoca	ok	5/11/2018
677	58	/policies/business-districts-and-corridors/	Add G: Support Mpls' existing neighborhood organizations and fully fund them, since they have been key partners in this sort of work, including allocating funds to such projects. The city fails to recognize the importance of its neighborhood organizations on many front, such as this one.	5/11/2018
678	7	/policies/public-realm/	But don't forget public safety while doing so. Some of these "public realm enhancements" are dangerous to peds and drivers alike -- i.e., seating boxes in the street out of the blue, or blocking sidewalks so people can't get by. Maybe it will require additional staff to actual patrol and enforce. Right now seems sort of willy-nilly, and you can't tell is the "enhancement" is legal or just someone feeling "it ain't illegal unless you get caught."	5/11/2018
679	16	/policies/environmental-impacts-of-transportation	I don't have car - I use mass transit - but I am surrounded by homes where residents in one house own 3 or 4 vehicles per household and they are not going to give up their vehicles! Is mayor and city council members going to give up their vehicles?	5/11/2018
680	53	/policies/quality-of-life/	Delete "D". That's already done by many other private entities; taxpayers don't need to pay the city to do it too. Also, it's very cheesy, boring and "junior high school-ish." Grow up, Mpls. And stop trying to be Portland or Seattle. Be Minneapolis. Also, so far I see a theme in this draft: The city neglects an aging population. Age-ist policies on no parking, cutting down on cars, etc. Being told to ride your bike or take transit when you are an elder or taking care of elders is unrealistic and age-ist. This is driving people out of Mpls to suburbs that are now cashing in on Mpls' anti-car tunnel vision. Look around! They are more welcoming to certain groups, such as elders. I am one now -- I notice this issue daily and will need to make decisions soon on whether I really want to remain in an unwelcoming, unbalanced city that is too gritty and difficult to be in. Mpls does not respect its elders at all!	5/11/2018
681	1	/policies/access-to-housing/	Neighborhoods away from downtown that consist almost entirely of single family housing should remain that way! Multifamily structures will create instability in the neighborhoods by creating more renters and absentee owners who have less stake in the neighborhood. At this point, it doesn't matter if there were restrictive covenants in the beginning. Don't destroy the things that make it a great city!!!!	5/12/2018
682	4	/policies/access-to-commercial-goods-and-service	Don't understand exactly what is being proposed here	5/12/2018
683	6	/policies/pedestrian-oriented-building-and-site-de	"prioritizes walking first, followed by bicycling and transit use, and lastly motor vehicle use". This is an unrealistic policy and should be removed from the city's priority completely. This is Minnesota, with bad weather for over half the year! Pretending that cars are not the dominant form of transportation is just plain ignorant. Making it more difficult to get around in a car will force everyone but young, single people out of the city! This is from someone who used to bike over 5 miles to work downtown when I was younger.	5/12/2018
684	8	/policies/public-safety-through-environmental-de	I like it	5/12/2018
685	10	/policies/street-grid/	I like it!	5/12/2018
686	12	/policies/lighting/	I like it!	5/12/2018
687	15	/policies/transportation-and-equity/	Not sure what these action items entail.	5/12/2018
688	16	/policies/environmental-impacts-of-transportation	It's OK to try to encourage people to use public transit or non-motorized means of getting around, but you should not be penalized for using a car. Seniors and family's need to use cars. Almost EVERYONE needs to use cars in bad weather, which in Minnesota means most of the time!	5/12/2018
689	17	/policies/complete-streets/	This is Minnesota. We have a winter. We have newborns and senior citizens, families and disabled people. It is not realistic to think that people are going to walk or bike everywhere. Get real.	5/12/2018
690	17	/policies/complete-streets/	"Complete Streets" should NEVER have become city policy. If put to a vote, I'm sure it would never pass.	5/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

691	18	/policies/walking/	It's fine to enhance safety for pedestrians, but don't do it in ways that make it more dangerous for cars, like narrowing traffic lanes and creating more traffic jams by eliminating traffic lanes.	5/12/2018
692	19	/policies/bicycling/	Create more bicycle boulevards and remove as many bike lanes from busy streets as possible. Bicycle boulevards would be designated on residential streets that do not normally have through traffic. Parking could remain on both sides of the street. Bicycles would share space with cars. Through traffic for cars could further be discouraged by reducing speed limit to 20 or 25, mini traffic circles place in intersections, etc. Bike travel could be improved by allowing bicycles to yield at stop signs, rather than stop. Streets could be plowed along with snow emergency routes. With this plan, residents on the street would probably request their street be made into a bicycle boulevard, rather than fight against it!	5/12/2018
693	26	/policies/vision-zero/	Pedestrians should be encouraged to use common sense before attempting to cross the street with a lot of vehicles coming.	5/12/2018
694	41	/policies/tenant-protections/	Do not force landlords to accept Section 8 or you will have nothing but large corporate landlords.	5/12/2018
695	35	/policies/innovative-housing-types/	I recommend looking into the Nightingale model of innovative housing development. http://nightingalehousing.org/ . It would also be a good to explicitly promote (and perhaps subsidize) edible landscapes and edible rooftop gardens to be included in development projects with food deserts - like North Minneapolis.	5/12/2018
696	12	/policies/lighting/	I live across the street from Lake Harriet upper campus public school. The security lighting at night is over the top. There are way too many high intensity lights on, and the school could cut those in half and still have adequate lighting. Plus they could save money. There are also classroom lights on all night which seems so wasteful. In my home I have all the shades pulled and still wear eyeshades. I would love the city to work with all schools and businesses to reduce night lighting. Everything doesn't have to look like a car dealership. Night lights also upset biological rhythms of animals. I raise Monarchs and bring them inside and make sure that they have a dark place to sleep.	5/12/2018
697	1	/policies/access-to-housing/	Please stop using historic discrimination and other injustices as a justification for selling out our City's neighborhoods to real estate developers, this is offensive.	5/12/2018
698	15	/policies/transportation-and-equity/	There is virtually NO effective Mass Transit options in Minneapolis. Besides the light rail lines (just 2) the bus options are horrible. There is no effective way to get from a home in Southwest Minneapolis to anywhere in the metro area. We are almost seniors. It is absurd to think that we should WALK downtown, or BIKE downtown (this is MINNEAPOLIS, NOT MIAMI). So, at least in Southwest Minneapolis, we do not have any REAL access to transit.	5/12/2018
699	17	/policies/complete-streets/	As someone approaching being a Senior, I find this policy discriminatory. Living in Southwest Minneapolis, WALKING to downtown is not an option. Walking virtually ANYWHERE isn't possible for half the year. Bicycling? Absurd. How are 60 year olds supposed to bicycle downtown or to Uptown or ANYWHERE in the winter? And we have NO REAL MASS TRANSIT. To go to anywhere to appreciate what Minneapolis has to offer, there is no way to do that without a car. Oh, you can take the bus downtown to dinner and a show but by the time it's over, it would take 1-2 transfers and 1-2 hours (minimum) to get back home. This whole policy should be geared to ALL residents, not the younger, urban professionals willing to live in box-like apartments around town. This policy CLEARLY DEMONSTRATES contempt for people who have lived their lives in the city.	5/12/2018
700	18	/policies/walking/	Your policies can sometimes be mutually exclusive. On the one hand you are proposing to increase density of housing along 50th St and the Avenues along it. That increases the need for MORE street width and MORE lanes for traffic. However, in this policy you call for narrowing of streets to slow traffic. How in the world to you propose for us to get out of our houses? Traffic on 50th already seems at capacity, especially during morning and afternoon rush hours. What in the world will you do if multiple family homes start popping up, increasing density even more? Sidewalks along 50th are horrible and are one step from traffic in the street. The city has not shown it is capable of keeping what we currently have up to the standards it should be. I can only imagine how bad it will become with more and more people living along the route.	5/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

701	20	/policies/transit/	<p>Minneapolis needs to get this right before anything else. And the city is NOT on the right track. Mass transit is virtually non-existent in most of the city.</p> <p>The "Action Steps" listed above do not constitute a "plan." A "plan" would have concrete actions. Not "partner with," "Actively Shape and Define," "Support." These are NOT real plans. They are "feel good" verbs that provide NO REAL plan on how to move forward.</p> <p>The current bus system is unusable for residents in Southwest Minneapolis outside of daytime work hours. It doesn't go where we need it to go, WHEN we need to get there. Going to downtown isn't bad during the day, but to go anywhere else in the city is impossible. And coming back from downtown after work hours, or any activity in the evening is almost impossible. It requires hours on buses, switching buses, etc. Late at night. That is nuts.</p> <p>A large part of the Southwest Minneapolis is a mile or more from either Crosstown, Hwy 100, or 35W. Walking to those major thoroughfares is not viable. It's too far and you may have heard there is the winter season here.</p> <p>The metro area can't even get it together to get a light rail built in the Southwest Metro. The lawsuits are ridiculous. So, hopes of light rail around the city are 30-50 years away at the rate this is going.</p> <p>NONE of your other housing or transportation plans will work until you implement a better mass transit system.</p> <p>There are NO real plans to improve the system. You say "it's prioritized." What does that mean? That is not a PLAN. "Build more shelters by bus stops." Really? That's the answer? SMH.</p> <p>You just seem to want to shove more people on buses, spending hours and hours getting to and from destinations. That is not a great plan.</p>	5/12/2018
-----	----	--------------------	--	-----------

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

702	1	/policies/access-to-housing/	<p>I live on Oliver Ave. S., and the thought that you would allow a 4-plex to go up next to me is absolutely crazy. Not just because I wouldn't like it, but because the city does NOT have the infrastructure in place to be able to handle something like that. The city needs to PREPARE for something like this, not just start ALLOWING it.</p> <p>Here's a simple example: the city has no regulations on trash and recycling bins. They litter the alleys. Now you want to add MORE units? There is no room for more bins.</p> <p>The city sanitary sewers will NOT be able to handle the increased run off from the elimination of grass and yards.</p> <p>There is no parking NOW for vehicles of residents and visitors to local restaurants and there is no parking plan to address that.</p> <p>The city is not currently able to keep sidewalks clear in the winter and keep access open to bus stops year-round. The city also doesn't enforce snow removal within 24 hours. If you can't keep access to transit stops open NOW, it will even be worse if more and more people need to use that transit stop.</p> <p>Speaking of transit, there is no effective mass transit to handle moving people around outside of the 10-12 hours during the day, and only to downtown.</p> <p>You say that 50th St is where more people should be able to travel. The street is already at capacity. The streets, such as 50th St., are clogged with traffic NOW, with no solution on the horizon.</p> <p>But, the city council and Mayor are ready NOW to put multiplexes next door to me? Without having thought through and having any plan TO PAY FOR the improvements that are necessary before you allow such building? The cart is in front of the horse...</p> <p>I bought my home 28 years ago and have seen prices for homes like mine go up and up. The city even increased the assessed value of home on my block an average of 16% this year. So THIS TYPE OF HOUSING is CLEARLY desired by people in Minneapolis. Your plans will drive home prices DOWN.</p>	5/12/2018
703	45	/policies/leverage-housing-programs-to-benefit-c	The intent here is good. I think that these "priorities" need to have teeth. For example, re: hiring etc. and local businesses owned by people of color - make these requirements to receive the permits and zoning approvals for development projects. Require any development project to have a community benefits agreement attached to its applications.	5/13/2018
704	23	/policies/coordinated-development-strategy/	Include community residents in any planning and development strategy by generating a community benefits agreement.	5/13/2018
705	44	/policies/comprehensive-investments/	The voice of residents needs to drive this comprehensive approach. Enlist neighborhood organizations to poll residents and generate a specific set of goals and actions that they see will benefit them.	5/13/2018
706	14	/policies/tree-canopy-and-urban-forest/	e. Ensure that city tree-trimmers are professionally trained and sensitive to aesthetic issues. For instance, tree-trimmers should avoid "lolly-popping" trees. f. When maintaining sidewalks in older neighborhoods such as South Mpls, care will be taken to minimize cutting of major tree roots. If needed, side walks will be routed around major tree roots rather than endangering the tree itself.	5/13/2018
707	5	/policies/visual-quality-of-new-development/	Rear and side wall consistententry is counter to the more impactful goal of housing affordability. Please remove.	5/13/2018
708	19	/policies/bicycling/	Consider bike lane removal during the winter when there is 1% use. Stop Æ if they build it, they will comeÆ bike lane policies. Re-examine vehicle traffic impacts and bike lane usage- what is an appropriate impact to remove a bike lane?	5/13/2018
709	0.1	/topics/land-use-built-form/	Having very clear well enforced policy will be key to success. I agree will creating and maintaining affordable housing in sw Mpls but I fear that more of the same monster housing will be the end result. Builders in Fulton will be looking for profit so will tear down a home that maybe small but affordable. Replacing it with a four plea of luxury rentals. This is just another way to redline and create disparities. The inspector of plans and building donÆ™t seem to be able to keep up with the building currently so policy isnÆ™t enforced. I am not in favor of the current plans for density building and land use due to the disparities they will create.	5/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

710	43	/policies/housing-displacement/	<p>In my community, gentrification is the single biggest concern. The "action steps" need concrete behaviors attached to them. These concrete behaviors begin and are centered around the current residents and their involvement with development and investment decisions. To me, the way to ensure residents' involvement is through a door knocking campaign and community meetings. Neighborhood organizations can do this. CANDO did an excellent resident campaign which led to a community benefits agreement that was directed at the Seward Coop. This process should be required for any development and enforced through permitting and zoning processes.</p>	5/13/2018
711	13	/policies/landscaping/	<p>The raw data of comments collected so far include many references to green spaces. Citizens clearly see the need for them, not just in parks and at the lakes but on individual properties. This is important, in light of the new zoning proposals for increased high rises near and around downtown and activity centers as well as for the ability to build fourplexes on every block in the city. I am happy to report that the plan includes policies for preserving old and planting new trees as well as for creating attractive, larger and environmentally sound landscapes (Policy #13). The accompanying pictures for this policy, however, show buildings with only a few feet of landscaping and no boulevard. To date, my observation of new structures that have gone up around the city in general and in my neighborhood in particular, the developers are granted any possible variance from the current regulations for set backs, allowing them to use pretty much the entire plot of land for their structures. Should the policies listed in this plan be adopted, I expect to see an end to the current tendency of both the Planning Commission and the City Council to grant variances that significantly reduce setbacks. (I witnessed one meeting in which setbacks for a structure were reduced from several feet to 6 inches). Furthermore, in a recent interview with Kerry Miller, Lisa Bender specifically mentioned that she thinks current setbacks are too big, thus indicating that , whereas this policy seems to support setbacks, the goal, or at least CM Bender's goal, appears to be to reduce them. How will the City be accountable to this ideal when our CM President seems to object to it and when faced with pressures from developers to use every space for their structures?</p>	5/13/2018
712	6	/policies/pedestrian-oriented-building-and-site-de	<p>I like the fact that plan includes several policies related to architecture, that would create regulations and requirements designed to lead to a variety of architectural styles, interesting structures, attractive use of materials. Most of this is all positive, at least in theory. I am concerned, however, about the implications of strategy #G: "apply design standards" regardless of market conditions and community characteristics. I like the idea of holding builders to a high standard in spite of market demand. This policy, as well as policy #13 on landscaping, would appear to be different from the way things seem to operate currently, in that developers are given leeway to do what works for them financially in spite of its potential negative impact, both visual and otherwise, on the community. So I wonder about whether the City will hold itself to this standard. And I worry about a policy that will ignore community characteristics. Currently, a large portion of the many many new buildings already created, for example, on Lake Street and Excelsior Boulevard, look very similar and have drastically changed the look of the area, often, if not usually, for the worse.</p> <p>To my eye, most of the new and planned structures are very unattractive. Beauty, of course, is in the eye of the beholder (though I've never met a single architect who actually thinks blocky buildings with a cheap looking variety of materials that don't really go together is attractive), but I think one would have difficulty debunking the idea that having a city filled with buildings all with the same general look built around the same general time is not as compelling as buildings that vary in both period and style and that reflect the unique character of a city. One way to mitigate this, mentioned in the plan (Policy #95), is to preserve beautiful old structures and use them to meet current needs. As with the policy regarding green spaces, implementing this policy would require a huge change from current and past practices in Minneapolis. One group works tirelessly to preserve some of the old, historical and often beautiful buildings from being destroyed in the name of progress. And often they lose that battle, in one case because the City Council knowingly allowed the developers to lie about the condition of the building in order to get permission to destroy it. Here are two links to articles describing this situation: http://healyproject.org/the-truth-will-out-ii-more-lies-that-brought-down-2320-colfax-avenue-south. https://healyproject.org/an-open-letter-to-minneapolis-city-council-regarding-the-orth-house-demolition/</p>	5/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

713	1 /policies/access-to-housing/	<p>The stated purpose of the new zoning proposals is to try to help correct the negative effects of the history of racist practices such as redlining and federal regulations that contributed to the poverty that keeps many areas in the city segregated by race and class even today. This is a valid concern and efforts should of course be made to level the playing field regarding who can live where in the city. The related concern is the decreasing availability of affordable housing in the city, both for the very needy and, I would add, for those who are not wealthy enough to live in the more expensive new buildings that are currently being built. I am concerned that the City is moving more and more to a place that caters to primarily young people, who are happy to live in 400 square foot spaces and wealthy people who can afford these rising prices and that gives lip service to catering to the very poor. No concern is expressed, and, as far as I can tell, no policy developed, to ensure that those who are not poor enough to apply for assistance and not wealthy enough to buy mega mansions and ritzy new apartments and condos will still be able to live in Minneapolis and raise their families here.</p> <p>Along Lake Street, small "micro" apartments (aka "studios") are being rented to the tune of \$1200 for a 375-400 square foot space. This article: https://www.rentcafe.com/average-rent-market-trends/us/mn/minneapolis/ shows that the current average rental rate in Minneapolis is \$957 for 508 ft.² or \$1.88 Per square foot. These new rates are 37% higher than current ECCO rates (which consists of over 70% renters and where the argument for new development is to give more people the ability to afford to live in the neighborhood) and 42% higher than elsewhere in Minneapolis.</p> <p>In a recent program on MPR with Kerry Miller, CM Bender stated that, whereas people assume that the new buildings themselves are the reason for the currently rising rents, there are other factors at play and that we need even MORE buildings to address the problem. Another expert on the show did mention that it is cheaper for developers to build smaller structures, such as fourplexes rather than tall buildings and that this should mean rents can be lower. This sounds reasonable to me. However, this plan also assumes a lot of tall buildings in various parts of the city, so what about the influence there?</p> <p>In addition, WE CANNOT IGNORE THE INFLUENCE OF NATIONAL AND INTERNATIONAL SPECULATION. Although the standard argument is that more places to live will inevitably lead to lower prices, the evidence shows otherwise. This article, http://livableballard.org/density-debate/ is an informative report about what has happened in Seattle due to a push for density and concurrent construction. Extremely dense cities, such as New York and Hong Cong have prohibitively high rents, except in segregated slum areas—a condition we at least say we do not want in Minneapolis. An article in Colliers Magazine, a publication for real estate investors, considers the Twin Cities an area that is ripe for speculation. It shows that the cost of housing in Minneapolis (income to housing cost ratio) is identical to the national average and significantly lower than large cities such as Denver, San Fransisco, Phoenix and Seattle, indicating that there is room to come in and buy and</p>	5/13/2018
-----	--------------------------------	--	-----------

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

714	45 /policies/leverage-housing-programs-to-benefit-c	<p>An article in <i>Comers Magazine</i>, a publication for real estate investors, considers Minneapolis an area that is ripe for speculation. It shows that the cost of housing in Minneapolis (income to housing cost ratio) is identical to the national average and significantly lower than large cities such as Denver, San Francisco, Phoenix and Seattle, indicating that there is room to come in and buy and flip properties to raise rents. https://www2.colliers.com/-/media/Files/UnitedStates/Markets/Minnesota/Minneapolis-St-Paul/Research/2017-Year-End-Apartment-Minneapolis-St-Paul-Market-Report-Colliers.ashx?la=en&hash=3246F8973FDB1FB91567AC9DE56A1A12B24C9563&la=en&hash=3246F8973FDB1FB91567AC9DE56A1A12B24C9563</p> <p>See below a direct quote from the article:</p> <p>“As the market continues to mature into a more desirable and monitored national investment buyer marketplace, we will likely see sales volume remaining high in coming years, irrespective of macro market conditions. This will likely partially be a result of shorter hold periods for many national buyers, versus the long-term buy and hold strategy of local buyers.</p> <p>Because of the increase in shorter hold periods, product will have a faster turn-over rate, which will keep market prices competitive and investment bidding active. The overall surge in demand for all classes of multifamily product in the Twin Cities market should continue to drive an increasing volume of sales.”</p> <p>These people do not have our city’s best interest in mind. Not only does this speculative activity make housing more expensive, it also goes against the desires expressed on the 2040 site by many who complained about having outsiders making decisions about the character of the city and, in particular, absentee landlords who have no investment in his or her own building, much less in the larger community. As an example of very current practice, whereas the Sons of Norway Development was designed by a local firm (Ryan), the project is financially backed by Weidner Apartment Homes, a national and international speculator that often buys up properties before they even go on the market, squeezing out local developers who might be interested.</p>	5/13/2018
-----	---	--	-----------

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

715	45	/policies/leverage-housing-programs-to-benefit-c	<p>This policy refers to City-funded housing programs but I haven't found a policy that states that the City should in fact fund some. The idea of expanding affordable housing by granting tax subsidies and other benefits to developers who devote 20% of their structures to affordable housing is being proposed by CM Cam Gordon's affordable housing committee https://lms.minneapolismn.gov/RCA/2301. Whereas this idea could be quite beneficial, it also has some problems. First, building owners are only required to keep those prices low for 10 years. What happens after that? Why not make it permanent? Second, given that speculators are targeting these same properties, it's hard to know whether this gift from the City is enough of an incentive, compared to the high prices the developers currently can charge for rent, especially in desirable areas of town. Finally, I object to the City using taxpayers' money to encourage big money developers, many of whom are both national and international speculators, to build in our city. If these benefits are to be granted, there should be a way to make sure those who get them are local and committed to the community.</p> <p>Some have mentioned the idea of introducing something like the old Urban Homestead program, where the City sold homes for \$1 to people who can then get help and resources to renovate them. When the City did this before, back in the 70's, those who bought the houses were required to live in them for 10 years. This ensures a commitment to the community and to the wellbeing of the house they were fixing up. It also gave new owners support to learn skills that could benefit them and the community over the long haul. I saw comments on the 2040 site about helping the people in the neighborhood develop their own communities, helping people with access to jobs (skills in renovation are transferable), and not giving the city's resources to corporate interests. Such a program would meet all of those goals. And with regard to mitigating against the effects of the racist policies listed above, it would give people who otherwise would have no ability to own a house and begin to accumulate wealth that way to do so.</p>	5/13/2018
716	82	/policies/aging/	<p>One comment I have on this is the literal ageism I've seen among members of the City Council and their supporters in the sense that, when a long time resident expresses concern about the impacts of the changes in the city, they are dismissed as irrelevant, old and probably racist people. There seems to be contempt, rather than respect, for the wisdom they may have developed that could benefit their communities. Therefore, I question whether action step #c reflects a genuine desire.</p>	5/13/2018
717	56	/policies/supporting-small-businesses/	<p>I couldn't agree more with the sentiment behind this goal. However. I notice that what's REALLY happening is a proliferation of big-chain stores and restaurants in place of local ones. Uptown is a case in point. where density is currently (not including buildings now or soon to be under construction) at 12000 people per square mile http://www.southwestjournal.com/news/biz-buzz/2018/02/victorias-secret-closes-landlord-seeks-unique-retail/. This should be good for business. However, the same article states that small businesses can no longer afford to stay there due to the fact that the rent is \$2 more per square foot than elsewhere in the city. A visual analysis of the area will tell you that the businesses that are benefitting from all this density are the large corporate chains. Who's to say that those same chains won't move into other more dense areas, pushing out local businesses? Nothing in the plan speaks to actively prioritizing small business over corporations. What will the City do to actually protect small businesses?</p>	5/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

718	17	/policies/complete-streets/	<p>CM Lisa Bender has explicitly stated that the goal is to make the congestion so bad that people will finally give up and stop driving. Another theory is that by building density next to public transit, more people will start using it. The Council is certainly reaching its goal of creating enormous unpleasant and unhealthy congestion. Whether a significant number of people will be able to now start walking, biking or busing instead remains to be seen. A University of Minnesota study that found that making even dramatic changes in land use, such as density actually doesn't affect peoples' transit decisions http://www.cts.umn.edu/Publications/ResearchReports/reportdetail.html?id=627. So, as laudable as the attempt might be, I'm afraid that cars are far from going the way of the Dodo Bird in a 3000 square mile metro area, where people often commute a long way to work, where the weather is extremely cold and icy several months of the year, where we have disabled and elderly who can't use other forms of transportation effectively, where young families may have to transport kids to daycare and schools that are not conveniently located next to either work or home. A more practical goal than that of eliminating cars would be to encourage the development and widespread use of electric cars and to bring back the car-sharing program that we briefly enjoyed in the city.</p> <p>It's worth noting, with not a little bit of irony, that CM Bender recently confessed that, now that she has the job of City Council President, she had to "reluctantly" buy a car because she needs to travel around for her job! One might ask why her situation is suddenly important enough to warrant the need for a car while so many others' transportation needs are scorned and dismissed by her and her supporters.</p>	5/13/2018
719	20	/policies/transit/	<p>This all sounds great I really like the idea of making more dedicated bus lanes BUT. But my observation to date is that, in the effort to make the city better for bikers, it has made it much much worse for those who take mass transit. A major reason that people resort to using their cars is the lack of a functional mass transit system. The inclusion of bike lanes on major arteries make the already inadequate system far worse. There's no way a bus, stuck in the now single lanes of traffic on major arteries, due to the existence of bike lanes, can go fast, in spite of goals, listed above, to create high frequency bus routes. I see action step #d calls for dedicated bus lanes, which I wholly support. But the current practice and, as far as I know, the future plan, is to continue to build bus lanes along major arteries rather than creating bus lanes for those streets and putting the bus lanes on side streets.</p> <p>Changing this plan would have several advantages. First, the bikers could have safer, quieter, less polluted, and more pleasant routes. Second, the buses could actually move faster, again, a major source of concern for those who commented on the site. And third, by giving the cars a space to go, albeit a more limited one than they previously enjoyed, without the buses stopping traffic every few blocks, things will be a bit easier for those who need to use them and pollution from idling might be reduced at least somewhat.</p>	5/13/2018
720	20	/policies/transit/	<p>I'm not sure where I saw this--it doesn't seem to be listed here, but somewhere I heard that actions to discourage car use include such things as eliminating the requirement for on-site parking on new buildings, prohibitions against building new gas stations, auto repair businesses and park and ride lots. I applaud the effort to move the culture of the city away from over dependence on cars, given their contribution to pollution. I do, however, find it baffling that one would prohibit ways for people to park and ride. If the goal is to get people onto transit, isn't it better to make the transit easier to get to for all commuters, especially those who would otherwise drive their cars further??</p>	5/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

721	17	<p>/policies/complete-streets/</p>	<p>What, exactly, is the goal here? To make functional, environmentally friendly forms of transportation available to the greatest number of people or to make a politically charged, ideologically-based decision that satisfies a small section of the population while (seemingly purposefully) causing the majority to suffer unnecessary consequences? There are ways to accommodate all of these forms of transportation without pitting bikers and walkers against those who must take their cars and those who use mass transit.</p> <p>CM Lisa Bender has explicitly stated that the goal is to make the congestion so bad that people will finally give up and stop driving. Another theory is that by building density next to public transit, more people will start using it. The Council is certainly reaching its goal of creating enormous unpleasant and unhealthy congestion. Whether a significant number of people will be able to now start walking, biking or busing instead remains to be seen. A University of Minnesota study that found that making even dramatic changes in land use, such as density actually doesn't affect peoples' transit decisions http://www.cts.umn.edu/Publications/ResearchReports/reportdetail.html?id=627. So, as laudable as the attempt might be, I'm afraid that cars are far from going the way of the Dodo Bird in a 3000 square mile metro area, where people often commute a long way to work, where the weather is extremely cold and icy several months of the year, where we have disabled and elderly who can't use other forms of transportation effectively, where young families may have to transport kids to daycare and schools that are not conveniently located next to either work or home. A more practical goal than that of eliminating cars would be to encourage the development and widespread use of electric cars and to bring back the car-sharing program that we briefly enjoyed in the city.</p> <p>It's worth noting, with not a little bit of irony, that CM Bender recently confessed that, now that she has the job of City Council President, she had to "reluctantly" buy a car because she needs to travel around for her job! One might ask why her situation is suddenly important enough to warrant the need for a car while so many others' transportation needs are scorned and dismissed by her and her supporters.</p>	5/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

722	19 /policies/bicycling/	<p>...an for bike lanes. They make it safer for everyone. But putting those lanes on main arteries rather than side streets appears to be counter productive in every way. For starters, there's no way a bus, stuck in the now single lanes of traffic on major arteries, due to the existence of bike lanes, can go fast, even if it's an express bus of some type, as proposed in Policy #20. Not only that, but also in order to let passengers on and off at the curb, buses are forced to either cross the bike lanes or stop in the middle of traffic so passengers can walk across the bike lanes. This creates a danger for both those who bus and those who bike.</p> <p>I propose making the dedicated lanes on major arteries for buses, rather than bikes and building the bike lanes on side streets rather than main arteries whenever possible. A significant case in point is the creation of bike lanes on 26/28th Streets given the well traveled dedicated bike path on the Greenway, a mere block and a half away. When CM Bender justified this decision by stating that the Greenway was "too far away" I was hard pressed to see the logic, given the fact that we're talking about able bodied people who are encouraged to use biking as their major form of transportation and that, certainly for some large portion of the bikers, the Greenway would actually be closer. Furthermore, the resulting congestion on 26th and 28th Streets have caused significant problems for the emergency vehicles that use these straight shot routes to and from the hospital.</p> <p>My proposed change in the plan would have several advantages. First, the bikers could have safer, quieter, less polluted, and more pleasant routes. So they might actually use them. Furthermore, a look at the effect of the current bike lanes is informative. As one who travels many of the corridors that have bike lanes (26/28 Streets, Portland, 36th Street to name a few) I can safely report, as can every other person I have spoken to, that there is rarely a bike in these lanes, even in the warm months of the year. And bikers to whom I've asked the question consistently report that they would prefer to ride their bikes on side streets. Nonetheless, the current plan "starting this summer" is to add two 6 foot bike lanes to Hennepin Avenue and, as I understand it, ultimately to extend these lanes for the length of the avenue. I hear that there is ALSO going to be an experiment to have dedicated bus lanes during rush hour. Great plan, but would you then also have bike lanes that--as in many areas--are blocked in such a way that neither cars nor buses can use them at any time?</p> <p>Second, the buses could actually move faster, again, a major source of concern for those who commented on the site.</p> <p>And third, by giving the cars a space to go, albeit a more limited one than they previously enjoyed, without the buses stopping traffic every few blocks, things will be a bit easier for those who need to use them and pollution from idling might be reduced at least somewhat.</p>	5/13/2018
723	0.1 /topics/land-use-built-form/	<p>This is ridiculous. I live on a street of all single family homes. You're going to rezone my street so you can build a bunch of 4 story buildings? This is total and complete BS. I will be attending the open houses and doing everything I can to ensure that this plan is defeated.</p>	5/13/2018
724	15 /policies/transportation-and-equity/	<p>The city needs to guard against becoming "family unfriendly" by over-emphasizing transportation (and zoning/land use) policies that are disproportionately based on accommodating the desires of some outspoken healthy younger people--e.g.s. bicycle riders, those realistically able to conveniently access and rely on mass transit for all their transportation needs, et al--at the expense of the needs of families with children with far-flung activities, seniors, those with health-related mobility limitations and others who, realistically, will be highly dependent on private cars for the foreseeable future. Among other things, this means requirements for adequate off-street parking for all new buildings--and multiple occupancies--should be retained, particularly in view of the amount of snow and the 5-month duration of winter here, something inescapably without parallel in Seattle, Portland or Denver. Policies to encourage greater use of mass transit and other car alternatives--particularly while the current very limited mass transit system is improved and expanded-- should be based solely on the "carrot" of low-pricing, convenient schedules, attractive facilities, etc., rather than the "stick" of increasing the inconvenience of those reliant on cars.</p>	5/14/2018

737	17	/policies/complete-streets/	IS it possible to identify where a complete streets policy is already in effect. While I understand what is being said, I am having a difficult time visualizing it.	5/14/2018
738	66	/policies/air-quality/	One way to reduce emissions is to educate people o discourage car idling. Minneapolis has an ordinance that most people either don't know about or is ignored. I live near a school. 30 minutes before school lets out, people start parking on several blocks around the school and sit in their cars with the engine running. Multiply this by the number of schools. I have addressed this with the school principal and have gotten nowhere. He said they can't afford signage. I would like the city to address the problem through education: neighborhood publication, television, school parent awareness. I would like to see signs in school areas. That could make a huge difference	5/14/2018
739	82	/policies/aging/	I am retired. The biggest threat to my livability is the rise in property taxes. My neighborhood in SW was a nice mix of older homes. Now my bungalow is the smallest house on the block. Yet my value was raised \$30,000 this year. I have lived here for 33 years and love my neighborhood. But how long can I afford it? How can the city help us stay in our homes? I volunteer with homeless people, belong to an environmental committee, educate the community on pollinators and gardens, teach how to raise Monarchs, volunteer with schools, play concerts at the VA home,etc. I can go on and on about how important seniors are to their communities. We don't want to be priced out of our neighborhoods but I see more and more retirees fleeing to Florida.	5/14/2018
740	20	/policies/transit/	I was recently travelling in Ieland. As I was waiting for a bus, I could see on a monitor exactly which bus was coming, where it was going, and what time it will arrive. Minneapolis needs to help people navigate the bus system.	5/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

741	19	/policies/bicycling/	Biking is a great idea, but it's not a major mode of transportation for most people. I am retired and in good physical health, but I need my car to get groceries, run errands and get just about anywhere. Biking for me is strictly recreational. The bike lane situation is overkill. The car culture is not going away but is more encouraged by our lifestyles and car technology. I was driving along Blaisdell from downtown yesterday. The street was congested with traffic, there is limited parking, and I saw exactly 2 people using the bike lane. Minneapolis needs to work with the majority. We enjoy getting out to restaurants, shopping, etc. but I won't be biking to go out for dinner. I think this is just another way to chase seniors out of the city.	5/14/2018
742	2	/policies/access-to-employment/	Why is the focus outside of the downtown area only applicable to "non-production" jobs currently served by public transportation since MN is primarily an agriculture state with limited transit options in those ag areas.	5/14/2018
743	5	/policies/visual-quality-of-new-development/	Although some items already exist as standards, I'd like to see more emphasis on the types of building materials used, especially in areas where people of color live and that the materials are ecologically and environmentally safe	5/14/2018
744	12	/policies/lighting/	Require lighting on private land (existing strip and shopping malls) to upgrade their lighting while providing them with financial assistance	5/14/2018
745	26	/policies/vision-zero/	Create "no parking" areas near street corners where vision is limited i.e. the corner of 14th Ave and Fremont Ave N. If you're traveling west on 14th Ave N and come to the Fremont intersection and cars are parked up to the corner on Fremont Ave N, your vision to bus and other traffic on Fremont Ave N (it goes south) is impaired and there are many other corners that have the same challenge.	5/14/2018
746	33	/policies/affordable-housing-production/	It all sounds great, but how will you accomplish these lofty goals	5/14/2018
747	0.1	/topics/land-use-built-form/	I love the idea of allowing 4 Unit infill housing development in residential areas.	5/14/2018
748	62	/policies/contaminated-sites/	Sites should be identified and remediated immediately with no need to wait for a development opportunity	5/14/2018
749	1	/policies/access-to-housing/	How am I supposed to know if a duplex, 3-unit or 4-unit structure is something allowable on my street? I am generally not opposed to multi unit structures on main thoroughfares, in business nodes, but I don't know if I want to live right next to one any more than I want to live next to a garish mcmansion that blocks sunlight, adds to congestion, etc...	5/14/2018
750	1	/policies/access-to-housing/	I fully support more density in all neighborhoods in Minneapolis. I live in two blocks from high rise apartment buildings and I see the vitality and importance of having lots of people living close together. Our neighborhood, Seward, is consistently rated as one of the best neighborhoods to live in across the city, and across the country. Our density along transit allows for businesses to thrive and people from all walks of life to live near one another.	5/14/2018
751	33	/policies/affordable-housing-production/	I applaud the city's focus on households with incomes at or below 30% of AMI and who are at greatest risk of homelessness.	5/14/2018
752	49	/policies/educational-and-economic-access/	Is this anything new or different from past policy? I believe that the Minneapolis Schools have been working on "c" for many, many years.	5/14/2018
753	50	/policies/access-to-technology/	How will you pay for fiber and high speed internet for low income families?	5/14/2018
754	16	/policies/environmental-impacts-of-transportation/	Looking at the chart provided, natural gas and electricity made up 70% of greenhouse gas emissions citywide in 2015. If we want to reduce emissions, this seems like the ideal target. The city should encourage energy-efficient buildings that retain heat (natural gas) and prioritize eco-friendly electricity generation. The hydro plant at St. Anthony Falls should be expanded to power more of our city, and solar should be encouraged when roofing is replaced.	5/14/2018
755	10	/policies/street-grid/	The biggest detractor from the street grid is the freeway systems that have divided our city. Minneapolis should deprioritize interstates and improve connections between neighborhoods that have previously been divided.	5/14/2018
756	51	/policies/healthy-pre-k-development/	The Perry School Project has been known for many years. Who will pay for and implement quality preK and day care?	5/14/2018
757	3	/policies/production-and-processing/	Good ideas	5/14/2018
758	0.2	/small-area-plans/	I would like to see NACDI development plan for franklin ave featured and used for comp plan. thanks	5/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

759	1	/policies/access-to-housing/	<p>Thus plan makes the assumption that most of our citizens agree with the plan. I am against it and from what I;ve read less than half of the city agrees with it. I do not want 4 plexs built on present single family lots in my neighborhood. I moved here 40 years ago to be in a great part of the city. The basis of this plan is full of errors. We in Minneapolis will drive our cars. Most, (96%0 will not ride bikes or use public transportation. Most in Minneapolis, want our neighborhoods to stay the same. A minority is trying to shove a plan down our throats. Michael Hanson 4001 Ewing Ave. S.</p>	5/14/2018
760	4	/policies/access-to-commercial-goods-and-service	<p>How will you ensure that rent for commercial spaces in areas with high densities will remain low enough to support small businesses (most of which may be specialty businesses) so that they are able to stay in business?</p>	5/14/2018
761	1	/policies/access-to-housing/	<p>I oppose allowing 4-story buildings along all public transit routes. Many of these streets/neighborhoods, including many on and near transit routes, are predominantly traditional single unit family housing and this change will destroy the fabric of several of these strong historic neighborhoods that make Mpls a great city. Further, the notion of not requiring new units to provide parking will create an added strain on neighbors, neighborhoods and livability, especially in winter months.</p>	5/14/2018
762	42	/policies/expand-homeownership/	<p>For me the issue is moving people of color and low income households into housing that is affordable and they can remain in the house over time. Action steps need to describe solutions. One solution is to support land trusts. Another solution is to monitor and evaluate bank performance on home loans. My experience and the experience of others shows that discriminatory lending still occurs. The city, through ordinances and financial leverage can influence banks to do better.</p>	5/14/2018
763	41	/policies/tenant-protections/	<p>The city can and should be the most powerful advocate for tenants' rights. The city, therefore, needs a vehicle that keeps its fingers on the pulse of tenants' issues. This means stepped up house inspections and quick response to tenant generated complaints. The city can actively solicit these issues and then work to resolve them.</p>	5/14/2018
764	40	/policies/homelessness/	<p>Homelessness is a direct measure of systems failures for the individuals and families affected. The demographic composition of people who are homeless is a measure of racism. The proportion of households with children where the parents work is a measure of how the minimum wage and entry level jobs cannot cover the cost of staying alive. The number of mentally ill individuals is a measure of failure in that system. If we want to have an impact on homelessness, we need to fix all the systems that impact families and individuals.</p>	5/14/2018
765	39	/policies/fair-housing/	<p>The Federal Fair Housing Act is over 50 years old and this is still a critical issue. Since developers and landlords practices will necessarily exclude people of color and low income families, the city must create a culture of vigilance and be prepared to aggressively enforce the law. To do this, the city needs to be actively engaged with this process and reinforce actions for affordable housing, Land Trusts and nondiscriminatory lending.</p>	5/14/2018
766	38	/policies/affordable-housing-near-transit-and-job-	<p>This is a nice idea as long as the high density does not sacrifice amenities, healthy living design and existing community culture. The danger is that this strategy is used to displace residents from other locations, promote concentration of poverty and encourage gentrification in non-transit corridors of the city. This could be mixed income housing.</p>	5/14/2018
767	49	/policies/educational-and-economic-access/	<p>It isn't enough to "Recruit and retain a diverse City workforce that reflects the demographics of the city." You have to tie that to the qualifications required for the job, and make it a requirement that the best skilled are hired. This policy doesn't address competency for the job.</p>	5/14/2018
768	60	/policies/intrinsic-value-of-properties/	<p>Make sure this policy includes residential houses. I live in a house built in 1909. We are an undeclared heritage site!</p>	5/14/2018
769	7	/policies/public-realm/	<p>An active, interesting, programmed, accessible and safe public realm is one of the things that will set us apart from other cities - if designed, protected, nurtured it will draw tourism, attract and retain businesses, increase civic pride, stimulate the economy, and engage citizens to walk, amble, connect, gossip, enjoy each other's company and the great outdoors, and look out for each other. These all lead to better economic, personal and mental health. The public realm RULES and must be prioritized in our city's goals and programming.</p>	5/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

770	78	/policies/park-design-and-programming/	The Commons so far is a bust. The fact that the City chose a night time picture of the park COMPLETELY EMPTY is exactly how it has been conceived and (not) used since its opening in 2016. To revitalize The Commons - our city's shared backyard - we need consistent funding and public/private partnerships to program the daylight hours out of the place: ping pong tables, chess tables, dancing, music, a restaurant, a snack bar, BATHROOMS with running water, better, pollinator-friendly gardens, MORE CHAIRS and TABLES, jugglers, acrobats, indigenous language classes, men's knitting circles, art and story hours, a skating rink with food and hot beverages in the winter, ice sculptures, walking history tours, a pow wow, bird watching, volunteer gardening, a futsal court, a better playground, maker markets, theater, all in the park, all day long, every day. The Commons could be loved and used like NYC's Bryant Park, or London's Gaiety Square, or Houston's Discovery Green, or Chicago's Millennium Park. Secure funding and make it so, Minneapolis! And get the Vikings to pay for their use, engage more partners (HCMC, Hennepin County, MN United, Target, Arctic Cat, Ojibwe and Dakota tribes, veterans, AARP, U of M, etc), and get a GREAT restaurant to set up shop in the park so people come, stay longer, spend their money, and come back, again and again.	5/14/2018
771	51	/policies/healthy-pre-k-development/	MN lacks a comprehensive, compensatory, and consistent evaluation process to determine if children are READY for K. Minneapolis could lobby aggressively on behalf of its citizens, and to mitigate the pernicious achievement gap, to push the state legislature to adopt policies where we can accurately test for readiness, and have data/informational goals to reach for. It is a pell mell mess right now. Use the weight of your population to create change. In the meantime, continue to support Mayor Hodges' language/reading initiatives and support small daycares and businesses that provide quality, early learning to ALL our citizens.	5/14/2018
772	20	/policies/transit/	More light rail (or subway), speed up end-to-end travel time.	5/14/2018
773	19	/policies/bicycling/	keep up the great work on bike lanes. make sure that construction projects consider bikes and have a safe well signed detour as we do for cars	5/14/2018
774	33	/policies/affordable-housing-production/	My growing business is located in NE Minneapolis. We hire a number of recent college graduates every year, in addition to interns. Finding affordable housing in the city is critical to our success, and such places to rent are becoming more difficult to find. Make sure gentrification doesn't erase the inexpensive flats for young people!	5/14/2018
775	1	/policies/access-to-housing/	We need to stop kowtowing to neighborhood NIMBYism. If we let our goals for density be derailed by the folks "who pay a lot of taxes, and who have lived here forever" we will get nowhere. We need density. We need a variety of housing. We need height to support wider set backs, more greening, to facilitate multi-modal transit, and encourage zoning of residential, commercial, art/making, and other enterprises to keep people close to jobs and services. Not everyone wants to, or should, live in a house. Let's create apartments or co/ops that are affordable and flexible - so they may accommodate singles, families, or elders depending on layout/amenities. Multi-generational neighborhoods are preferred. WE need to stop concentrating poverty. We need walkability, architectural integrity, beauty, greening, and joy. Housing needs to be safe - it is the cornerstone of how we live, and how we live well.	5/14/2018
776	6	/policies/pedestrian-oriented-building-and-site-design/	Pedestrian experience, at human scale, should determine and drive ALL design in Minneapolis. We need to STOP designing for and around the automobile. Density, greening, interesting gathering spots, enhancing the public realm, assuring that shop keepers can afford to open shops (shoe stores, catering/incubator kitchens, tutoring services, tax preparers, daycares centers, eyeglass stores, specialty shops, art, etc) and can stay. Gentrification has become a bad word. We need to consider rent control so established commercial and residential owners can afford to stay, even if the neighborhood "improves." This city can and should lead the way nationally for neighborhoods and built environments that support human connectivity, movement, freedom from violence and pollution, add interest and joy, and articulate the value of the human experience. Flowers, trees, public art, access to toilets, water, local food, interesting shops, places to sit down (and lie down if need be), gather and congregate with others will support health, alleviate hostility, highlight difference, generate wealth, nurture civic pride, and encourage all ages, lived experiences, abilities and persuasions to interact. The built environment matters. Let's use it for good, not evil!	5/14/2018
777	15	/policies/transportation-and-equity/	Access to lakes in SW Minneapolis is abysmal, especially to Harriet. This is an equity issue. Cycling is a preferred and economically necessary mode for many low income people. Let's make it safe, accessible, and abundant in the city. Let's support women, young people, elders and people of color to ride and walk. Our public health, and social health, depend on it. Light rail is AWESOME. We need more of it. Be patient and persistent - the new generations demand it, and business is beginning to love it. The old farts who hate anything but their cars will die (probably from heart disease from not enough walking!). We are getting there - steady on, planners, steady on!	5/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

778	52	/policies/human-capital-and-a-trained-workforce/	Early learning will be THE way Minneapolis reduces its opportunity/achievement gap. Let's make it easy for small daycares to operate. Let's partner with agencies like Minneminds and Think Small to scale what NAZ is doing in more promise neighborhoods across Minneapolis. This is the workforce of the future, and Minneapolis needs a population who has had the benefits of the best early learning experiences possible. That includes safe and affordable housing, clean air and water, access to transit, good schools, food security, plenty of play places and greenspaces, and access to affordable early learning (daycare and preschool) so all our littlest learners are ready for kindergarten, high school, higher ed and beyond.	5/15/2018
779	1	/policies/access-to-housing/	Terrible policy, protect the beautiful old single family homes... promote high density housing only close to Transit corridors, not in the middle of single family housing areas.. you will destroy some of the most beautiful things this city has to offer... terrible policy	5/15/2018
780	1	/policies/access-to-housing/	Zoning is what protects the home owners in a given area from undesirable changes in the residentialcommunity.. like people opening up businesses next to house's, like prevent apartment buildings from going next to your house... people want to know that what they are investing in is protected.. you are creating uncertainty and stress.	5/15/2018
781	0.1	/topics/land-use-built-form/	I own a 2 story town home in an area where you are requiring a minimum of 8 story buildings. My property and quality of life will be severely impacted by the density being proposed. There is already a severe and dangerous shortage of parking in this area around 32nd St W. Even if people do not use theirs cars to get to work, they will still own cars and they must park them. The rents are so high that at 2 or more adults with cars will live in each unit. Developers must be required to provide a minimum of 2 off street parking spots per unit. This is not Manhattan, NY! Furthermore, I worry about my middle and low income neighbors in older buildings that will be displaced by new, high density, and high rent developments.	5/15/2018
782	0.2	/small-area-plans/	People will still own cars, to expect them not to and allow for no off-street parking is just insane....the whole plan is just insane	5/15/2018
783	0.1	/topics/land-use-built-form/	The massive buildup of density so far from downtown because it's on a "transit" line is unacceptable. These changes to 50th, penn, Bryant would devastate desirable neighborhoods for families.	5/15/2018
784	6	/policies/pedestrian-oriented-building-and-site-de	I would like the city to have a non-partisan traffic engineer to oversee, plan and then communicate why to the public. This ensures transparency and choice made that are sustainable and hopefully address everyone.	5/15/2018
785	17	/policies/complete-streets/	I would like the city to have a non-partisan traffic engineer to oversee, plan and then communicate why to the public. This ensures transparency and choice made that are sustainable and hopefully address everyone. Currently it doesn't seem or feel that way	5/15/2018
786	18	/policies/walking/	I would like the city to have a non-partisan traffic engineer to oversee, plan and then communicate why to the public. This ensures transparency and choice made that are sustainable and hopefully address everyone. Additionally, I favor walking then trains as priorities first (trains and walking are partners) then bikes then cars.	5/15/2018
787	0.1	/topics/land-use-built-form/	NO, if the image is anything like you really want NO! the homes in this area are almost 100 years old and are what we moved to on purpose, we didn't move here to have it become another Uptown!	5/15/2018
788	1	/policies/access-to-housing/	There is no way I would support a 4 unit dwelling in linden hills. we are already trying to balance single family homes of normal size to McMansions that push the boundaries of zoning. There are places throughout the city that are more appropriate for multi-family/four dwelling housing.	5/15/2018
789	0.1	/topics/land-use-built-form/	I am opposed to any changes on Franklin or 21st Street west of Fremont. The proposed changes would be detrimental to the character and quality of living of the area thanks Jack Levi 2631 Newton Av S Mpls	5/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

790	80	/policies/development-near-metro-stations/	<p>Why was this picture of the massive development concept near Lake and Excelsior not shown at any of the Open Houses?!? Plenty of pictures of buses and bikes and trees, but the only picture of this towering monstrosity is a tiny thumbnail on Policy 80 on the website.</p> <p>Why are the city planners hiding this from the public??</p> <p>This whole process seems to be full of subterfuge. Why?</p> <p>Why not allow a true open debate?</p> <p>What are you afraid of?</p>	5/15/2018
791	80	/policies/development-near-metro-stations/	<p>The whole concept of concrete towers over our beautiful lakes has not been publicized.</p> <p>Please allow and extension of the deadline before you scar the landscape over our parks.</p>	5/15/2018
792	0.1	/topics/land-use-built-form/	<p>So you want to have a 4 plex on a 5000' lot without off street parking? That is completely stupid. Thanks for clogging our streets even more.</p>	5/15/2018
793	80	/policies/development-near-metro-stations/	<p>The goal of the 2040 zoning plans for the area north of Bde Maka Ska -- "to encourage a dense mix of housing, employment and commercial goods and services" - is unrealistic and irresponsible. The inevitable increased traffic, congestion, overcrowding and unsightliness of numerous large buildings near a relatively small lake - in an area that is ALREADY plagued by traffic and congestion - would be a nightmare for current residents as well as visitors alike. Why would anyone on a "planning" commission take a jewel like the recently renamed Bde Maka Ska, honoring its Native American history, and turn it into an overbuilt, congested area of urban blight?</p>	5/15/2018
794	80	/policies/development-near-metro-stations/	<p>OMG!</p> <p>This area is already gridlock. Thousands of new apartments, thousands of more cars. This plan is supposed to help global warming?</p>	5/15/2018
795	23	/policies/coordinated-development-strategy/	<p>Listen to the citizenry!</p> <p>Time after time, neighborhood councils will oppose a given development or request a change to more appropriate scale.</p> <p>Rubber stamp from the city planning commission! Every time!</p> <p>Where's our democracy?</p>	5/15/2018
796	5	/policies/visual-quality-of-new-development/	<p>It seems like too many high-rise apartments are going up. I think they should be limited to the downtown area.</p>	5/15/2018
797	1	/policies/access-to-housing/	<p>As a landlord in Minneapolis providing affordable housing, I would love to be able to add more units to my existing triplex. I would jump at the chance to add 1-2 accessory dwelling units to my non-owner occupied property. I live in the neighborhood in which my rental resides and would want to maintain the "neighborhood feel" with these additional units. I think allowing 2-4 unit non-owner occupied properties to add additional units with the understanding that they must blend into the existing housing stock, would help deal with the shortage of housing without damaging the "neighborhood feel." If the ADU program was opened to non-owner occupants, I would definitely participate with my triplex.</p>	5/15/2018
798	43	/policies/housing-displacement/	<p>Shouldn't this be spelled out already as opposed to calling it an ACTION STEP for the future....how can anyone be expected to support this is they don't know what the details are....that is where the devil lives after-all</p> <p>d.Expand programs that support existing homeowners in affording and maintaining their home, with a focus on people of color, indigenous people and vulnerable populations, such as low-income households, the elderly and people with disabilities.</p>	5/15/2018
799	0.1	/topics/land-use-built-form/	<p>I am in support of changing our current ADU ordinance as part of the MPLS 2040 comprehensive plan guideline to allow up to 4 plexes throughout the city. It would be beneficial for both owners and renters to allow non owner occupants the ability to add an ADU to their current 1-4 unit properties. I am an owner of a triplex in Hiawatha and if allowed I would build an ADU on my property that would provide affordable rental housing and off street parking.</p>	5/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

800	33	/policies/affordable-housing-production/	How many housing units does Mpls actually need? Based on what stats? Can you specify so we know what there goal is? Otherwise too vague.	5/16/2018
801	35	/policies/innovative-housing-types/	How many units will this create? How many will affordable? How will you measure this?	5/16/2018
802	42	/policies/expand-homeownership/	SW Mpls has lost so many single family homes that were once affordable to developers that are now priced well over \$600000. This also bumps up property taxes for those preserving the original housing stock I see no concrete steps here to preserve and don't understand why more wasn't done previously. All these lots are now lost to folks who would benefit from the great schools in SW Mpls.	5/16/2018
803	15	/policies/transportation-and-equity/	The city has made driving and parking FAR, FAR more difficult! As a result I do not go to Uptown any more. I suggest that if you want businesses to thrive in Minneapolis that you stop making it difficult for people to drive and park. . . .this is aside from the fact that I find the City's recent actions to add bike lanes and eliminate car lanes and park extremely discriminatory!	5/16/2018
804	33	/policies/affordable-housing-production/	Please don't put your trust in developers. They will build their dense projects, but will only attract rich people from other areas, further increasing income disparity. We will be overbuilt, but more stratified than ever. Supply and Demand will work, but on a regional level. The poor will get pushed out to the suburbs.	5/16/2018
805	0.1	/topics/land-use-built-form/	Referring to 19 and 25 E Minnehaha Parkway. These properties are noted to be Corridor 6. Point being made is why not make them Corridor 3. Reason; the property to the immediate East is 35 E Minnehaha Parkway - and that is Corridor 3 and to the west of 19 E is a natural divisor - the alley between 3 East Minnehaha Parkway and the single family homes on the remainder of the block. Especially when viewed in person (or Google maps), it is easy to see the the alley is the obvious break-point for the "Corridor" designations.	5/16/2018
806	0.1	/topics/land-use-built-form/	Referring to Properties 30 - 80 West Minnehaha Parkway. When coloring the map with essentially straight lines it makes sense for these properties to be designated as Interior 3. Practically speaking however, given the one way traffic on that part of Minnehaha Parkway, those properties have NO immediate access to Nicollet Ave. Therefore marking them as Interior 3 rather than Interior 1 makes no sense.	5/16/2018
807	72	/policies/sustainable-water-system-management/	RE: Policy 72, Action Steps i and j.: I suggest dropping "continue" in "i" and making specific reference to at least this key example: "need to remove dead-end water mains" These substandard mains create a water supply that is not currently high quality, that is damaging to home plumbing and laundry, and is less safe. A current remedy of installing automatic hydrant flushers at some dead-ends is costly, wastes water, is only partially effective at best and totally ineffective in the winter. The existing language of i and j is: I Continue providing safe high-quality drinking water while being a steward of public resources and infrastructure. J.Minimize drinking water waste through infrastructure improvements.	5/16/2018
808	5	/policies/visual-quality-of-new-development/	Please, please, please limit the height of development around the Lakes. The Mosaic building in uptown is an eyesore. It looks like a cruise ship looming over Lake of the Isles. Why do you allow such tall buildings and why do you allow them to be lit so brightly at night?	5/16/2018
809	53	/policies/quality-of-life/	What is the value of having our beautiful Chain of Lakes if you line them with development?	5/16/2018
810	0.1	/topics/land-use-built-form/	Hi there, I am one of the homes on the 55xx block of Aldrich Ave. south. My neighbors are very concerned about the proposed changes to our zoning and I have many of the same reservations. However, I am curious to hear someone make a good case for why these changes would accomplish the goals that were presented. Is there anyway to guarantee that residential units built on this stretch will be more affordable than the surrounding single-family homes? If not, then why is this being proposed? I appreciate that density can be a way to accomplish greater accessibility, but that's not necessarily true if luxury condos or apartments are built that block all the sun from my yard, bring more noise, garbage and traffic. Thanks, Ted Duepner 5501 Aldrich Ave. S.	5/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

811	19	/policies/bicycling/	<p>Prioritize grade & concrete protected bike lanes that connect to other protected bikeways to complete the build-out of an entire bike network.</p> <p>Eliminate the use of sharrows and bike lanes wedged between parked cars and vehicular traffic lanes.</p> <p>Add Leading Pedestrian/Biking intervals to all major intersections in which bikeways intersect.</p> <p>Convert existing bike lanes (between parked cars and vehicular lanes) to protected/grade separated bike lanes.</p> <p>Pilot district-bike parking solutions in downtown/uptown and at major transit stations.</p>	5/16/2018
812	11	/policies/skyways/	<p>Ban the expansion of the skyway system rather than simply confining it.</p> <p>Ban new retail space on the skyway level and require it to be at the street level.</p> <p>Mandate expansion of retail space at the street level and elimination of retail space at the skyway level if buildings complete a renovation/reconstruction over a certain dollar amount.</p> <p>If a building is torn down that is skyway connected - ban the reconstruction of the skyway.</p> <p>Identify action strategy to eliminate skyways downtown.</p>	5/16/2018
813	80	/policies/development-near-metro-stations/	<p>I just saw the plans for the SW LRT rail station development over Bde Maka Ska. I am appalled. Imagine how the Dakota descendants must feel with their Lake desecrated by massive development along the shoreline and sightlines of their sacred lake.</p>	5/16/2018
814	0.1	/topics/land-use-built-form/	<p>I am strongly opposed to develop multi family units within our community where they don't currently exist. I am for diversity and inclusion, but building multifamily housing will disrupt the current environment that makes these neighborhoods great to begin with. The city needs to bolster the section 8 single family dwellings vs building multi units in these neighborhoods w this planned development. We live in these areas to avoid the "busy uptown" feel. Keep zoning consistent and make no changes!</p>	5/16/2018
815	1	/policies/access-to-housing/	<p>Disagree with bullet e as 3 and 4-unit dwellings are too large for the current small size city lots. This would further stress parking and likely depreciate current single family and duplex units in those areas.</p>	5/16/2018
816	18	/policies/walking/	<p>Let's make Plymouth Avenue a walk-able commercial corridor where local residents can purchase goods such as groceries, do dry cleaning, buy plants, get coffee or beer and socialize with neighbors. We would like to see decorative storm water capture systems consisting of well designed permeable pavers and rain gardens. Please focus on thoughtful little initiatives like walk-able community-centric historic markers and shaded rest stops with greenery. We really need garbage cans and recycling bins on every corner possible. Drinking fountains where feasible would be nice. Please plant trees along the sidewalk for sidewalk shade. Allow for vendors with vendor carts. Please raise funding for community watch walking patrols.</p>	5/16/2018
817	43	/policies/housing-displacement/	<p>We need more rental inspectors to enforce rental codes to avoid debacles such as what happened with the Mahmoud Kahn properties.</p>	5/16/2018
818	49	/policies/educational-and-economic-access/	<p>We would like to see the reemergence of our local schools that stand vacant turned into community run schools that would not be regulated by the school board. Please embark on initiatives to promote community run schools on the Northside of Minneapolis.</p>	5/16/2018
819	49	/policies/educational-and-economic-access/	<ol style="list-style-type: none"> 1.City will develop and engage with a support group that will engage and foster dialogue with the school board and the schools. 2.The City will repurpose or reopen closed schools. 3.The City will repurpose the 4th precinct to a community space. 	5/16/2018
820	56	/policies/supporting-small-businesses/	<p>The City will research and evaluate the availability of land and unused buildings in North Minneapolis that could be developed into a boutique commercial corridor for businesses such as coffee shops, flower shops, small grocery stores, and book stores. Plymouth Avenue would be ideal for this.</p>	5/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

821	5	/policies/visual-quality-of-new-development/	We support these actions steps and would love to see them implemented on the Northside where many unappealing buildings have gone up in the last few years. Please avoid building new properties too high, as these block out natural light in the community. Along with maintaining the design integrity in a neighborhood, please maintain the quality control for new builds as far as materials so as to make new properties look like other period homes in neighborhoods. We want quality homes built that will stand the test of time.	5/16/2018
822	15	/policies/transportation-and-equity/	Work with transportation officials to work out a light rail plan where the train would go down Broadway in North Minneapolis. Broadway Ave should be a commercially viable high density street that would benefit greatly from these transportation investments. Ideally the redevelopment of this street would decrease slum lord occupants and increase owner occupied businesses and developments.	5/16/2018
823	80	/policies/development-near-metro-stations/	The picture above saddens me.	5/16/2018
824	15	/policies/transportation-and-equity/	Our streets are in horrible shape. I've suffered \$1200 damage from one of your monster potholes. Please fix the streets. I'm too old to bike or walk safely. I need a car. I need to drive to live a useful life.	5/16/2018
825	80	/policies/development-near-metro-stations/	The prohibition of park and ride stations seems unrealistic to the goal of having more blue and green line use. There are many people who wouldn't or don't take the bus but would drive (ex east/West to a blue line stop) and take the train dt or elsewhere. I understand the premise behind the ban, but I believe it's counter productive. Plus an option for park and ride would help eliminate the neighbors near stations having cars parked on their street.	5/17/2018
826	0.1	/topics/land-use-built-form/	Block leaders for 55xx Aldrich Ave S and residents on both sides of the streets are not in favor of 6 stories on Lyndale Ave S on the corridor or connected to this block. Same block residents are not interested in their homes being rezoned on Aldrich Ave South. Max height for Lyndale corridor between 53 and 57 should be 3, in keeping with neighborhood current heights.	5/17/2018
827	0.1	/topics/land-use-built-form/	Superfund cleanup should be considered at 54xx and 55xx Lyndale and Aldrich Ave S needs to be considered when making plans. Both blocks are already being mitigated.	5/17/2018
828	0.1	/topics/land-use-built-form/	Strongly oppose the upper level, 6 story developments noted in the plan.	5/17/2018
829	0.1	/topics/land-use-built-form/	Neighborhoods that have already had traffic calming lane changes are undergoing a siege of drivers using side streets to get to destinations faster and this is causing traffic problems on 1-2 street off traffic calmed streets. This is dangerous for residents in areas. Also, when City is contacted the answer is no changes unless a fatal accident is reported. Totally unacceptable.	5/17/2018
830	0.1	/topics/land-use-built-form/	Disagree with whole plan.	5/17/2018
831	80	/policies/development-near-metro-stations/	I live in the SW Mpls and like to bike to work at North Memorial. But I'm getting older (54 now) and can't bike unless the weather is good. Looking at this picture, I can't imagine trying to drive through all this planned density as shown in the picture. This already one of the busiest intersections in the city with gridlock every rush hour. What is going to happen when you add all of these apartments? These people will still have cars. Not every destination is on the light rail. Not everyone can bike or walk. I think your plan is naive and will have the unintended consequence of extreme gridlock, worse quality of life and increased global warming.	5/17/2018
832	16	/policies/environmental-impacts-of-transportation/	I know this is not the city's jurisdiction, but can we work to get rid of (or to offset) the state's license tab surcharge on electric cars? Also, be sure to consider older people and people with mobility issues who may need to rely on motorized transportation.	5/17/2018
833	80	/policies/development-near-metro-stations/	We don't need a second downtown smack in the middle of our lakes!	5/17/2018
834	80	/policies/development-near-metro-stations/	I don't like the plan in the picture above. It feels oppressive to me.	5/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

835	1	/policies/access-to-housing/	<p>Ward 13 Comment: I DO NOT support introducing 2,3, 4-plexes or above as permitted uses into historically Single Family neighborhoods!!!</p> <p>The snow plowing of our streets is already severely substandard (school was cancelled once this year because of it), our schools are overcrowded (our child at SWHS had to drop a class she needed as the school couldn't fit anymore chairs in the classroom and next year they are cutting even more teachers) and our parks (except for the Regional ones) are run down (the fields are poorly maintained and are a detriment to having active children). This document does not adequately describe the impacts (nor future funding strategies) to address these critical public infrastructure needs that directly relates to these goals.</p> <p>The home values (and thus tax revenues) generated by the neighborhoods in this ward continues to climb, which means that consumers desire these areas for what they are. Randomly scattering 4-plexes is a poorly conceived land use strategy that will not strengthen these neighborhoods, nor will it produce affordable housing. It will produce anger and high-value rentals. To produce high-quality affordable housing in our neighborhoods (which I think most people would support - at least I would) - you need to locate it on high quality sites!</p> <p>This one-size fits all approach to land use is beyond idiotic. The City should identify high-level goals and then work with the neighborhoods within the city to develop specific implementation strategies that work for each of those neighborhoods and then hold everyone accountable - including yourselves!</p>	5/17/2018
836	1	/policies/access-to-housing/	<p>I'm a resident of the Waite Park neighborhood, and I totally welcome the initiatives to make more multi-family housing and improve transit access. I live in a single-family home, and I'm dying for more options for retail and transit so I don't need to use my car as much. We use transit now and walk to the grocery store nearby, but our neighborhood could use more walkable destinations and more frequent buses. And I'm happy to have 4-plexes on my block if it means more people have affordable places to live within the city. This is a city, after all.</p>	5/17/2018
837	25	/policies/innovations-in-transportation-and-infras	<p>How about some longer lasting roads? In Germany, roads are built to last 60 years. Contractors are on the hook to repair them for free if they fall below a standard. Our roads and parkways barely make it 4-5 years before they become pockmarked with potholes. Do it right the first time. Listen to your mother.</p>	5/17/2018
838	1	/policies/access-to-housing/	<p>This is misguided social engineering. Single-family homes build wealth for Minneapolitans. Apartments and fourplexes build wealth for out-of-town developers, investors and REITs. Plus they destroy asset value of the adjacent current homeowners. Everyone in Minneapolis ends up poorer. Or maybe that is the goal.</p> <p>Single-family homes and condominiums have to be built to different standards (10 year builder warranty). Apartments do not.</p>	5/17/2018
839	0.1	/topics/land-use-built-form/	<p>Large parts of the area near the Lake St. - Excelsior Blvd. split are designated Community Mixed Use and Transit 30. Neither description takes into account the geographical uniqueness of that area, as one of the few funnels for east-west traffic into and out of Minneapolis. Unlike downtown, which is the destination of most of the morning traffic there and the source of most of the evening traffic there, the Lake/Excelsior split is jammed mornings and evenings by traffic passing through the area. And unlike downtown, there is no bypass loop that removes the bulk of the through traffic from the interior streets. These facts make the Community Mixed Used description inappropriate for the area, and the considerably greater density advocated in the Transit 30 district an extreme aggravation to already over-congested rush hours.</p> <p>Also, the plan makes no distinction between property facing on major streets and those facing on parkland and parkways, specifically the east and west sides of Dean Green between the east and west branches of Dean Parkway.</p> <p>Rodgers Adams rodgea@comcast.net 2950 Dean Pkwy. #1005</p>	5/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

840	93	/policies/stewarding-historic-properties/	"Require new construction in historic districts to be compatible with the historic fabric," is an existing comprehensive plan policy that has proven ineffective in preventing 26-40 story buildings (grossly exceeding design guideline height maximums) from being recommended for approval by city staff in the St Anthony Falls Historic District. Get more specific. For example, "Strictly require new construction in historic districts to be compatible with the historic fabric, especially in terms of compliance with established height maximums. When demands for density, affordable housing, or other demonstrated community needs increase pressure to ignore this action item in favor of other worthy comprehensive plan action items, facilitate transfers of development rights, rezonings, conditional use permits, and related entitlements to shift incompatible building size, bulk, and scale to parcels outside of historic district and landmark boundaries."	5/17/2018
841	95	/policies/heritage-preservation-financial-incentive	While this policy to establish financial incentives for designated properties is much needed, none of the three action steps do so for designated properties. I suggest a fourth action step that reads like this. "Establish and promote financial incentives for historically designated properties to encourage local designation and to ensure the citizens responsible for maintaining tangible remnants of our city's shared heritage receive assistance to do so."	5/17/2018
842	0.1	/topics/land-use-built-form/	<p>1. The proposed monthly rent of \$1,700 is not affordable for low income families.</p> <p>2. Stating that the rent will go down as the buildings age and become less attractive to the well-off is absurd and offensive.</p> <p>3. Wrecking a nice neighborhood by putting in 6 story buildings that don't fit is also absurd.</p> <p>4. Planning to ruin Minnehaha Creek with more run off is wrong.</p> <p>This looks like a recipe for failure in so many ways.</p>	5/17/2018
843	1	/policies/access-to-housing/	<p>Home ownership is path family wealth for working people. We need more homes and increased density to make housing more affordable but we shouldn't eliminate opportunities for families to buy homes by converting otherwise affordable homes into rental properties.</p> <p>Meanwhile we can't allow the most affordable homes to simply be converted into McMansions. If the choice is between McMansions and multi-unit housing we should favor multi-units.</p>	5/17/2018
844	93	/policies/stewarding-historic-properties/	"Ensure maintenance of properties through regulatory enforcement of City code, specifically as it relates to historic resources," is an existing comprehensive plan policy that has not prevented extreme, human life-threatening deterioration of landmark and historic district properties, like the First Church of Christ Scientist, much less potential historic resources. Focus, and reduce the scope of, this action step until political will and/or regulatory fortitude improve. I suggest this. "Ensure maintenance of properties designated as historic by the city, state, and federal governments through regulatory enforcement of City code requiring maintenance of designated properties immediately upon properties being vacant, boarded, and condemned. Use fines to strongly encourage compliance or change of ownership to a more responsible party. Pause fines when new owners purchase properties. Eliminate fines when new owners abate all issues within three years of the date of purchase, to permit adequate time for utilization of federal and state preservation tax credits, which bring money into Minneapolis's™ economy.	5/17/2018
845	0.1	/topics/land-use-built-form/	This is such an extreme change. It serves only to further segregate the city. There is plenty of affordable housing in Minneapolis. The affordable housing is traditionally located in areas where people of color live. So to keep the city segregated you have released large parcels of land to bring in housing/apartments into the more affluent area. The new dwellings will still be above most people's earnings, which in turn will keep the city separate. We need to encourage people to move to places like Near north Mpls and the likes - not discourage them by putting more slightly less expensive housing in predominantly white neighborhoods.	5/17/2018
846	30	/policies/arts-and-cultural-assets/	I truly believe that creating access to art activities is founded around allowing arts organizations and artist to maintain affordable studios and work space within the city. The rising cost of rent is also pricing out many valuable arts organizations. To keep the access close to wear people are living in working, the space most remain sustainable for these different earning models.	5/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			The City will seek to accomplish the following action steps to promote business clusters using through focusing resources and regulatory policies	5/18/2018
847	57	/policies/cluster-strategy/	Above seems to have a typo, "using through" doesn't make sense	
848	50	/policies/access-to-technology/	Prevent brittle monopolies from taking over ,ensure more than one internet provider per unit is available	5/18/2018
849	0.1	/topics/land-use-built-form/	I'm an East Isles resident and from my perspective, there isn't a tremendous difference between the neighborhoods on the east and west sides of Hennepin in regards to transit access, proximity to Downtown, walkability, etc. I think more of East Isles and Lowry Hill could be zoned as interior 3 and I think there is quite a bit of existing housing that would reflect that zoning already. I'd love a plan that would finally acknowledge that existing housing stock while making it possible for more housing like that to exist in the future.	5/18/2018
850	80	/policies/development-near-metro-stations/	Why even bother with wakes if we are going to surround them with skyscrapers? Just pave them over and build fouxplexes. That will solve our housing shortage. Cheaper too, since no one will want to live in Minneapolis again.	5/18/2018
851	0.1	/topics/land-use-built-form/	I am vigorously opposed to the designation of Bryant Avenue as a Corridor 4 area. The draft allows 4+ story structures on Bryant and 3 story structures on adjacent half blocks (Aldrich/Colfax). Most of the homes in this area are over 100 years old and are well maintained. The character of the area is vibrant and livable precisely because it is not too crowded. The area schools are full. Parking is still manageable. The draft plan envisions a radically different vision of this area which would negatively affect those long term residents who have invested heavily in their homes. Issues such as parking, sunlight, snow removal, noise, underground infrastructure to name just a few will all be negatively impacted. The actual residents in this area are overwhelmingly opposed to this plan as it would alter the very livability we expect. Further, people who want to stay may not be able to afford their taxes once the assessors start assessing based on "highest and best use" for their properties.	5/18/2018
852	14	/policies/tree-canopy-and-urban-forest/	What good is a tree canopy if there is a concrete canopy of apartment towers above it???	5/18/2018
853	17	/policies/complete-streets/	Paving the potholes would be a good start.	5/18/2018
854	16	/policies/environmental-impacts-of-transportation/	I love biking, but cars are still necessary. The city seems to be encouraging gridlock to force people to just give up on driving. Sometimes it may work, but for those who can't bike, they will need to sit in traffic and spew carbon into the air. Minneapolis City Planner-induced global warming. Nice!	5/18/2018
855	1	/policies/access-to-housing/	We already have this. They look terrible and do NOT contribute to the health of the neighborhood! Just look at 50th and 49th and Sheridan Ave S. The properties are not well maintained and the residents come and go without engaging in the community. W 50th Street is already very congested and parking is tight on side streets. It's unrealistic to think more people won't equal more cars. And rental properties never have the same curb appeal or neighborhood engagement of sgl family homes. Why are you putting great city neighborhoods (and your tax base) at risk? I grew up here in the 1970's. We've come a long way. Let's not mess it up!!	5/18/2018
856	33	/policies/affordable-housing-production/	I am especially concerned that we have specific strategies to increase housing for those at or below 30% AMI. One way of doing this is by increasing the Affordable Housing Trust Fund to at least \$50 million per year and to allow subsidies to be used for both rent and operating. I have seen that we have lost some of our lowest cost housing, partly because owners have not invested in these properties that they meet the basic livability standards. We also see properties being sold to investors from other states that are only interested in profits and not in the community or the people in them.	5/18/2018
857	34	/policies/affordable-housing-preservation/	These are nice thoughts but we need more specific strategies as part of this plan. This area has lost about 15,000 NOAH units! How will we meet our goal of providing 3,500 affordable units in the coming decade? One very important strategy would be inclusionary zoning, similar to the Edina policy. What about TIF?	5/18/2018
858	41	/policies/tenant-protections/	A very meaningful policy chance would be to require advance notice of building sales so that nonprofits might be able to have time to put together an offer to purchase units that are going to be sold. I have heard landlords complain about the difficulties of the section 8 voucher program. Perhaps the city could create a new sort of housing coupon that would be simpler to use and attractive to landlords. At the same time, I would like to see greater restriction on abuses by landlords, especially when properties are sold so that fewer tenants are displaced and do not have to face additional screening and/or are eligible for meaningful relocation assistance. Today's Strib had an article about the same tenants being displaced at Normandale Lakes who had already been displaced at Crosstown. We should not allow this to happen in Minneapolis!	5/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

859	80	/policies/development-near-metro-stations/	<p>What are you thinking!?! Stop the development madness! No second downtown in the middle of our lakes!</p>	5/18/2018
860	5	/policies/visual-quality-of-new-development/	<p>How about following the height restrictions that have already been established by the citizenry? No more rubber stamp variances by the city planning commission! They are ruining the character of Minneapolis.</p>	5/18/2018
861	0.1	/topics/land-use-built-form/	<p>I live on Belmont Ave. in Tangletown. This plan could destroy the nature of my neighborhood and my reason for living in the city. We moved here because we like the idea of living in a neighborhood of well-maintained older homes with sunny lots. We enjoy the proximity to cultural events, and we're proud to part of a diverse and open community.</p> <p>It would be a shame to see houses on Belmont razed and replaced with three-story apartment buildings and faced by 6-story buildings to the east. The sunlight, green space and privacy we are accustomed to would no longer be ours. We currently grow a good portion of our food as well as many bee-friendly flowers, and unpaved ground is good for drainage (to prevent flooding). We've considered putting solar panels on our garage to fuel our electric car, but we wouldn't risk it if the plan is approved.</p> <p>The fact that the plan has four Harry Jones houses rezoned for 6 stories leads me to believe that the character of the actual buildings the map represents was not considered, and it seems a pity to subject solid, beautiful structures to the power of developers. Plus, I don't see a plan to make the potential new housing affordable.</p> <p>I wouldn't mind 2- or 3-story structures on Nicollet " not 6-stories, but the rest of the neighborhood should stay small.</p>	5/19/2018

866	80	/policies/development-near-metro-stations/	<p>Huh?!? Are you trying to destroy our lakes?</p>	5/20/2018
867	80	/policies/development-near-metro-stations/	<p>Why wasn't this picture shown at the open house? Why no open house in SW Mpls? Wouldn't you agree that the whole 2040 process is invalid?</p>	5/20/2018
868	80	/policies/development-near-metro-stations/	<p>too much housing in an area that is already over populated.</p>	5/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

869	80	/policies/development-near-metro-stations/	The SW LRT area is already plenty dense and is always full of traffic. Why not limit development to 6 stories and save the views from our lakes?	5/20/2018
870	80	/policies/development-near-metro-stations/	Too much development in any already packed spaceâ€”seems pretty dense already.	5/20/2018
871	1	/policies/access-to-housing/	What guarantees that these multi-unit dwellings will be more affordable than the single family units? In a more affluent area like 50th and France, how much will these rents be? Does the city have any control over that? Because there is a new place going up on 51st and York where the rents will be \$3,500. Is that affordable? Will that increase the diversity of rich people in our neighborhood?	5/20/2018
872	1	/policies/access-to-housing/	The words "affordable housing" are sprinkled in the discussion but what is Minneapolis currently doing to HELP people with affordable housing? Are there programs for rent relief? Rent caps? Plans to build more Section 8 style housing? Maybe subsidies for property owners of affordable multi-unit places to offset utilities? Anything? If you're not already helping low-income people stay in Minneapolis, building fancy new dwellings with high rents is not going to help. Our most vulnerable residents are HURTING for help and the city council won't listen. Please do not be persuaded by sexy high rises. Maintain and improve the current housing stock that we have!!! Help our CURRENT residents before trying to attract new ones.	5/20/2018
873	33	/policies/affordable-housing-production/	<p>Let's talk about HOW the stock of affordable housing decreases. Let's talk about how gentrification of a neighborhood drives prices up and people out. Look at Uptown and all of those high rent places. Sure, you increased housing density but how much does it cost to live there?</p> <p>I see how new development can increase property values and drive rents up. I see it all over the city. The question is, does the CITY see it? And how is the city helping people in the battle against developers? Do ANY of these developments have requirements for affordable units?</p> <p>The term "non-profit" developer is very misleading. The people who run it still need to be paid very big salaries.</p> <p>These developers do not care about the existing residents of Minneapolis. KEEP Minneapolis human-scaled. KEEP Minneapolis green. KEEP Minneapolis affordable by focusing on our current residents. Put money into the pockets of our residents, not developers.</p>	5/20/2018
874	33	/policies/affordable-housing-production/	<p>Let's talk about HOW the stock of affordable housing decreases. Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

875	1	/policies/access-to-housing/	<p>There is nothing in this goal that addresses affordable housing. Adding more housing choices does not address affordable housing. HOW WILL MINNEAPOLIS ENSURE MORE AFFORDABLE HOUSING CHOICES IN ALL NEIGHBORHOODS? If the goal is to reverse some historical wrongs, then HOW HOW HOW are you going to do it? It appears that this only applies to RICH MINORITY PEOPLE... Reverse the wrongs by actually helping people out. Where is the rent relief? Help with utilities? Access to child care?</p> <p>How are we helping our residents out when a neighborhood becomes "gentrified"? Does the city help with displaced residents? Does the city require developers to help the displaced residents? Or provide similar affordable housing options?</p> <p>How about focusing on home ownership for our residents? Make that affordable city-wide for our economically disadvantaged residents. Why tear down homes suitable for families? Do all economically disadvantaged Minneapolis families want to live in apartment buildings?</p> <p>It is very patronizing to tell people how to live. There is nothing wrong with wanting to live in a house with your family and have a little yard. That is why so many of our residents LOVE Minneapolis. But now you're insinuating that we are wasteful and selfish.</p> <p>Has the city even considered the fact that our historically wronged groups might ALSO want to live in single family homes?</p>	5/20/2018
876	1	/policies/access-to-housing/	<p>Reference Goal 9...if there are pockets of the city that are a long distance away from good public transportation and do not have easy access to retail/jobs/parks...why build up more housing along public transportation corridors? Why not develop retail centers and support small businesses willing to set up in these areas? Why MOVE people from existing housing stock?</p> <p>Minneapolis seems hell bent on tearing down existing homes and building new structures (more expensive). Look at the HISTORY of Minneapolis. Let's try to preserve what we have instead of always knocking things down. Help PEOPLE, not developers!</p>	5/20/2018
877	20	/policies/transit/	<p>Before you start laying down railroad tracks in people's back yards, why not offer incentives for people who carpool? Special lanes? Special parking?</p> <p>Public transportation is great, but when it's slower than driving, what is the incentive? Great public transportation is found in the bigger cities of the world, but they are normally in the form of subways and monorails. They are also FAST!</p>	5/20/2018
878	52	/policies/human-capital-and-a-trained-workforce/	<p>As a small business employer, I have never heard about these programs. What kind of skills are being taught and what are the benefits for a small business owner to help out?</p> <p>Also, I have been following the discussions on the \$15 living wage. Sounds great, but honestly, there are some jobs that ARE NOT WORTH \$15. There are some people out there with advanced education and are working in skilled industries for \$15. And I'm supposed to pay somebody \$15 for doing simple work like filing charts or shredding files? It's insulting to those who have real skills that somebody selling popsicles can make the same amount of money.</p>	5/20/2018
879	52	/policies/human-capital-and-a-trained-workforce/	<p>As a small business employer, I have never heard about these programs. What kind of skills are being taught and what are the benefits for a small business owner to help out?</p> <p>Also, I have been following the discussions on the \$15 living wage. And I'm supposed to pay somebody \$15 for doing simple work like filing charts or shredding files? It's insulting to those who have real skills that somebody selling popsicles can make the same amount of money.</p>	5/20/2018
880	0.2	/small-area-plans/	<p>Your ideas are not very clear and lack real life examples. I do not want you to rezone my single home lot into a lot that will have a 40 unit 3 story apartment next to.</p>	5/20/2018
881	1	/policies/access-to-housing/	<p>I support these action steps. I recently purchased a home in Minneapolis after renting here in the past, and the market for housing has become extremely competitive. I am fortunate to have the resources to secure stable housing, but the housing shortage must be inflicting serious stress on low income people. The six-plex across the street from my house is a great feature of the neighborhood, and I hope to see many more in the city in the future.</p>	5/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

882	33	/policies/affordable-housing-production/	While these action steps seem vague to me, I strongly support the goal of increasing legally-binding affordable housing. I would be more than happy to pay higher taxes in pursuit of this goal.	5/20/2018
883	9	/policies/open-spaces-in-new-development/	I am concerned that there is much talk of "improvement" and "encouragement of design" all of which implies man-made "nature", hardscapes with nothing close to natural open spaces but instead manipulated, Bachman-ized plantings. Thousands of mature trees all over the city will be/are being taken down with at best, small starter-trees replacing them along with "designed environments." Minneapolis is revered for its natural, open spaces, Minneapolis 2040 seems to be all about removing or manipulating those spaces.	5/21/2018
884	35	/policies/innovative-housing-types/	Great action steps. Co-ops and other innovative housing types are one of several ways that the city should be helping existing Minneapolis communities remain where they have roots, rather than being displaced.	5/21/2018
885	36	/policies/innovative-housing-strategies/	I support these goals, with a qualification. I have seen proposals to build more and denser housing in Minneapolis opposed on the grounds that they somehow conflict with the goal to preserve affordable housing. This argument is backwards. The steps outlined in Policy 1 would directly and indirectly support the preservation and creation of naturally occurring affordable housing in Minneapolis.	5/21/2018
886	37	/policies/mixed-income-housing/	Action step (c) is the best of the lot, in my opinion. Through CPED and the city's interactions with developers, the city has some ability to push for positive models of housing like this.	5/21/2018
887	38	/policies/affordable-housing-near-transit-and-job-	These ideas are so positive and smart as to be obvious. The only thing to add is that the relationship should also work in the reverse: transit should be planned around where dense housing exists. Spending billions of dollars on trains to non-dense suburbs is not a great use of	5/21/2018
888	80	/policies/development-near-metro-stations/	anyone's money. I live a few blocks from the 38th Street Blue Line station, and I strongly support constructing dense commercial and residential development in this area. The industrial-ish uses there are an unfortunate waste of this valuable transit corridor.	5/21/2018
889	43	/policies/housing-displacement/	These are great ideas. In addition, we should be zoning to permit as much construction of new housing as possible, so as to increase supply, raise the vacancy rate, and lessen landlords' power to raise rent.	5/21/2018
890	2	/policies/access-to-employment/	Action step (a) is particularly important. We are running out of undeveloped land downtown, and we should be requiring new development to be significant in scope. Likewise, new development in areas like Lake Street (near where I live) should be dense, with mixed commercial-residential uses.	5/21/2018
891	6	/policies/pedestrian-oriented-building-and-site-de-	Can't support these action steps strongly enough. Lake Street should be one of the city's prime pedestrian destinations; instead, all the drive-throughs and car entrances/exits make walking on it like playing Frogger, with constantly vigilance required. Eliminate parking minimums! Please! Let developers build parking if they deem it necessary. If they don't, don't force it on us! This would be a huge help to keep housing costs affordable. "Require active uses on the ground floor of new buildings, with direct connections to the sidewalk." Yes! I work in the IDS Center, and I can hardly find a place to eat at street level after 6 pm. A healthy city should have plenty of activity after hours.	5/21/2018
892	80	/policies/development-near-metro-stations/	I'm terribly saddened by this plan. The chain of lakes are becoming more and more important to the health of the people of Minneapolis as urban density increases and multifamily housing becomes the standard. The chain of lakes should be preserved as an oasis of calm where people can reconnect with nature -- this is essential to our health and well being. The lakes should not become a high rise haven...this will increase the traffic substantially and also decrease the feeling of calm that people need to counter urban living. Consider how to keep lakes accessible and relaxed. Not Miami.	5/21/2018
893	5	/policies/visual-quality-of-new-development/	These steps are fine, but if the choice is whether to build new housing that doesn't conform to these aesthetic preferences, these suggestions should yield.	5/21/2018
894	10	/policies/street-grid/	"Improve local transportation across freeways, including improving pedestrian, bicycle and transit accommodations across existing bridges and promoting adequate spacing and connectivity of local streets crossing the freeways." To take this a step further, consider exploring plans to terminate freeway entrances into the city. This is a huge and unnecessary disturbance to the street grid and to the functioning of the city for people who live here, full stop.	5/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

895	11	/policies/skyways/	"Direct newly-established retail uses in buildings connected by skyways to be located primarily on the ground floor with an entrance facing the street." Change this to "exclusively" on the ground floor! Leaving the skyways as is, while moving retail to the ground to facilitate more commercial success and a safer environment is the best solution. "Limit skyway expansion to the downtown core and at other key sites..." Prohibit skyway expansion full stop! The skyways continue to ossify downtown, and we should be done with them.	5/21/2018
896	14	/policies/tree-canopy-and-urban-forest/	This seems like a very cool and good idea.	5/21/2018
897	80	/policies/development-near-metro-stations/	What happened to the Shoreland overlay district building restrictions?? This image shows plenty of buildings in violation of the height restrictions!!	5/21/2018
898	15	/policies/transportation-and-equity/	It is embarrassing to the city that the North Side continues to have no light rail and insufficient aBRT service. I support these equity goals and I believe they should start with a significant investment in transit in North Minneapolis.	5/21/2018
899	16	/policies/environmental-impacts-of-transportation/	Great ideas. I was looking for "eliminate parking minimums" on this list. Like the items listed, that would encourage the adoption of sustainable forms of transit.	5/21/2018
900	17	/policies/complete-streets/	The Complete Streets policy is great. If it is to be taken seriously, the city should plan to vastly improve walkability of sidewalks during the winter. I support exploring whether the city can take responsibility for clearing snow from sidewalks in the winter. I would happily pay more taxes/an assessment for this, and it may be the only way to truly make good on the Complete Streets plan.	5/21/2018
901	18	/policies/walking/	The bumpout that was recently installed on 38th St and 19th Ave S. is fantastic -- I walk across this intersection all the time with my dog and it feels much safer now.	5/21/2018
902	19	/policies/bicycling/	Please continue expanding protected bikeways. I truly appreciate the Greenway and the paths around the lakes, but for biking to work, there's still a paucity of protected avenues for regular commuting. I have talked to friends who are uncomfortable biking regularly without protected lanes -- I believe that more protected lanes would make a huge impact in promoting regular biking in Minneapolis; not just for fun on Saturdays.	5/21/2018
903	20	/policies/transit/	More aBRT! Fund aBRT! It's so cheap compared to light rail, with such good results!	5/21/2018
904	22	/policies/downtown-transportation/	Explore a downtown subway. There will only be more growth and density in the future, and the buses on Nicollet are extremely slow.	5/21/2018
905	26	/policies/vision-zero/	The task force is fine, but this is the key: "Protect pedestrians and bicyclists through speed limits, design decisions, and design speeds that eliminate fatalities and serious injuries." Currently, our speed limits, street widths, and multiple lanes encourage drivers to drive recklessly. The only way to truly address this is by changing the way we design streets.	5/21/2018
906	80	/policies/development-near-metro-stations/	Stop. Listen to your citizens. Not developers. Not city planners who have an agenda. Eventually you will have to listen to the voters.	5/21/2018
907	80	/policies/development-near-metro-stations/	I am afraid that you are wrecking what is good about this city. We don't need a second downtown. Especially not in the middle of the lakes.	5/21/2018
908	80	/policies/development-near-metro-stations/	While presented as a favorable asset to our neighborhoods, this plan would actually do the complete opposite. We are not Chicago, Seattle, New York City etc., not should we be. Don't allow plans that make an already crunched parking area worse, take away tree cover (which is a unique asset that Minneapolis has compared to other similar cities) and destroy the character of the very asset of the lakes that you claim to be utilizing. Plans like this will be devastating to what makes the area great!	5/21/2018
909	1	/policies/access-to-housing/	If your goal is really to remedy problems that originated with discriminatory practices in the past then you should have a policy to increase home ownership in those affected areas. I have lived on the Near northside for more than 40 years and there is a long legacy of housing that is increased in density above the base zoning when it was built and it has a history of being a problem property. You can find this if you look at most buildings with more than 2 units. For one example that has always been a problem despite many attempts to fix with public subsidies look at Plymouth ave townhouse	5/21/2018
910	1	/policies/access-to-housing/	You increase density all along bus routes with out taking in to account that the plan is to convert these to bus rapid transit which will greatly increase the distance between bus stops. If density increases are really needed they should be closely tied to a bus stop and rapidly decrease when you move away from them. You can always expand the area later if increased density is shown to have any value	5/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

911	1	/policies/access-to-housing/	In action step e you refer to density goal in neighborhoods farthest from downtown as getting increased density with 3 and 4 plexus being allowed. Yet your plan would permit these units in all of the city neighborhoods. At least in Near North MPLS these smaller units are the most likely to turn into problem rental properties. If you have had any discussions with police or inspections you should know that they are the hardest to control	5/21/2018
912	0.1	/topics/land-use-built-form/	NO NO NO....You are crazy! I work outside Mpls but live inside. We don't need to develop all this land in one of the biggest giveaways to developers.	5/21/2018
913	1	/policies/access-to-housing/	<p>Allowing 4-unit housing without off-street parking on any lot in South Minneapolis is not a good idea for many reasons. Here's a couple:</p> <p>1) One 4-unit property on a block may cause eight (8) or more vehicles to be parked on the street. The effect of allowing 4-unit housing without off-street parking on any lot in Linden hills will be the lining of both sides of every street with automobiles, as is currently the case in Uptown, resulting in a decrease in home values and a decline in the use and enjoyment of property by owners.</p> <p>Winter narrowing of streets from plowing will exacerbate the problem and cause additional safety hazards. Guests may not be able to park anywhere near the home of their hosts.</p> <p>Linden Hills residents pay a huge property tax premium to enjoy our neighborhood as it is, how many will choose to pay the premium if the aesthetic is taken away?</p> <p>2) 4-unit housing will likely be owned by non-resident, profit driven investors. Linden Hills will become a neighborhood of renters who are not financially and emotionally invested in the health and vitality of the neighborhood. Yards/gardens and renters generally do not mix well.</p> <p>Popular thinking has it that the personal automobile is on the way out in the near future. Think of how many promises for the future have never come to pass. Where's my flying car?</p> <p>Planning is good. Bad planning isn't.</p>	5/21/2018
914	38	/policies/affordable-housing-near-transit-and-job-	Identify & map "high-frequency transit corridors". Define "larger-scale development" in detail.	5/21/2018
915	80	/policies/development-near-metro-stations/	What in the world are you people thinking about putting so many high rises in and around the lakes? I thought the shoreland ordinance prohibited this? On top of that, you think this will decrease traffic?? Are you kidding me? One can barely navigate around uptown now as it is... If this passes - the view will be gone, who knows what the unintended consequences will be to the lakes, the surrounding area and wildlife. These lakes are some of Minneapolis's precious assets. Enough is enough. Please abide by the shoreland ordinance and kill this development - I'd like my kids to be able to enjoy the beauty that is, not the beauty that won't be.	5/21/2018
916	19	/policies/bicycling/	Allow motorized 2 wheel vehicles on bikeways...max speed 15 mph	5/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

917	1	/policies/access-to-housing/	<p>Items d & e are so ridiculous that I can't believe that I'm even reading this. This will do nothing to lower cost of housing. It will enrich developers, destroy single family neighborhoods (which is why I chose my area over an area such as uptown to call home) and drive out stakeholders (homeowners)that pay taxes and care more about their community than the majority of renters.</p> <p>I've lived next door to a duplex for 20 years and there have been good and bad tenants. Very few have stayed for over 2 years and this is a decent affordable property. Few of these tenants have shown pride of ownership that stakeholders (homeowners) in the area do. The landlord is licking his chops in anticipation of squeezing in a few more units into that property. If it turns to a 4-plex that will create up to 8 autos that need to find a place to park. 4 more sets of people and their friends that come home after a night out slamming doors and talk loudly at 2am.</p> <p>This so called plan would allow a developers to purchase the small houses on the street, tear them down and build 4-plexes because it would now be profitable for them to do so. so much for affordable home ownership.</p> <p>Density does not bring affordable housing it only brings density and removes the reason why many have chosen their neighborhoods to live.</p> <p>As I just read in the paper today. If density made cities more affordable NYC and Hong Kong would be a homeowners/renters dream with all the inexpensive housing available.</p> <p>If this passes I can guarantee that myself and the majority of my homeowner neighbors will never vote for a council member that doesn't have the guts to put an end to this.</p>	5/21/2018
918	0.1	/topics/land-use-built-form/	<p>I feel that if 4-plex housing is allowed in the innermost part of our precious neighborhoods, it would take away from the character and Family friendly feel. Adding 4-plex buildings to the main transit routes makes sense, building in the heart of our neighborhoods does not. Put condensed housing closer to the city, not neighborhoods like a Kenny and Armatage, to name a few.</p>	5/21/2018
919	0.1	/topics/land-use-built-form/	<p>I love our city. I was born and raised in Camden, went to the University of Minnesota, worked for the County and now live in Page. Except for a year and a half in graduate school, I have never lived nor wanted to live anywhere else. We have the best parks; empowering schools (I am a proud Patriot and my children are amazing Millers); thriving downtown; and a fabulous art scene. My neighborhood is wonderful for various reasons, but the most important reason is being threatened by Proposal 2040. The quiet peace we find in our little 'hood is a respite from the bustle we know and love in the other parts of the city, only a stone's throw away. The streets of our neighborhood have taught my children how to drive and parallel park, something I think would not be nearly as pleasant with increased traffic and street parking. I also love the stability of our neighborhood. We know every single person on our block and almost everyone on the other eight blocks in our little community. I would love to see more affordable housing. I worked hard to support the building of Creekside Commons just a half mile from my home. It would be wonderful to find more fourplexes along bus routes such as Nicollet (just on the other side of the highway from me) or Portland Ave (just across the park from me) but to have them in amongst the quiet of our neighborhood would just all but ruin it for me. Seriously. Please do not allow these fourplexes to be built within peaceful, quiet neighborhoods. Thank you.</p>	5/21/2018
920	0.1	/topics/land-use-built-form/	<p>HELL NO ARE YOU FUCKING CRAZY!!!!!!</p> <p>Portland, Seattle, San Fran, Chicago, Atlanta all protect their single family establish communities. You want an Uptown in your hood fine.....STAY THE FUCK AWAY FROM MINE!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!</p>	5/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

921	1	/policies/access-to-housing/	<p>As a single-family homeowner in south Minneapolis (Ericsson neighborhood) I am concerned about "allowing small-scale residential structures on traditional size city lots with up to four dwelling units, including single family, duplex, 3-unit, 4-unit, and accessory dwelling unit building types". I'm primarily concerned regarding my investment in my home and how that would be affected (future home value) if a developer buys a house next to mine and puts up a multi-level multi-unit structure. We recently invested in a privacy fence which will be essentially ineffective if the building next door is suddenly 3-4 stories tall. I would like to see strict regulation on the size of these depending on where they are placed in our neighborhoods so a large building can't be built next to my modest 1.5 story house.</p> <p>Will there be a requirement that the owner of the building must live on site? Developers do not invest in neighborhoods and relationships, neighbors do.</p>	5/21/2018
922	36	/policies/innovative-housing-strategies/	<p>I live in the Fulton neighborhood and we worked very hard to get Monster Tear Down houses under control. Now it seems that all of the work is going to be thrown away and allow 4-plexes to be built anywhere. If Monster Homes were found to be incongruous with these established single family neighborhoods, then how do 4-plexes get a pass? Are we going to keep drastically changing the rules every mayoral election?</p> <p>If we wanted to live in Uptown, we would! We want to live in Minneapolis in a Single Family neighborhood! The residential streets in Uptown are a public safety disaster, due to the rampant use of on-street parking. Developers should have been required to pay into a fund for the establishment of off-street parking areas - or heaven forbid, provide it for themselves. Neither of those options have been successfully implemented in Uptown; and so we should expect more of the same - streets that are unpassable to emergency vehicles or the average sedan!!!</p>	5/21/2018
923	0.1	/topics/land-use-built-form/	NO FUCKING WAY!	5/21/2018
924	0.1	/topics/land-use-built-form/	The base parcel maps for Future Land Use and Built Form do not reflect existing conditions in many recently-changed locations, for example Oak/Huron/University, TCF Bank Stadium, US Bank Stadium, etc.	5/21/2018
925	0.1	/topics/land-use-built-form/	<p>I don't Agree with this policy at all. You're turning a single-family home neighborhood into the one that has three and four stories on it where there are none today. It will create congestion disruption decrease the quality of life for the individuals currently living here.</p> <p>Likewise, this policy makes it unaffordable for individuals to purchase property when having to compete with contractors.</p>	5/22/2018
926	1	/policies/access-to-housing/	<p>Allowing 3 and 4 unit housing in current single family home neighborhoods is in conflict with the goal of keeping historic buildings, insuring residents are not financially compromised, reducing traffic, and reducing parking problems. The single family neighborhoods even close to major transportation hubs do not have the parking available for adding multi-family structures. The streets are already getting clogged with increasing traffic. Our culture historically depends on single occupant vehicles and we are not wanting to change. Adding multi-family structures to streets built to serve single family homes will change the historic nature of those neighborhoods. Along with renters who are not invested in these neighborhoods, historical evidence is clear that property values will decline for houses close to the multifamily units causing unintended financial consequences to residents. The reason I purchased the house I did is because it is not in a neighborhood filled with multifamily housing units. Finally this will not add to diversity as families that want to live in a neighborhood will move out of the city or never move in. The recent election showed that those with a pre-ponderance to single family homes often have a different worldview than those who want to live in a neighborhood of apartment buildings. A diverse city will encourage a multitude of worldviews. Increasing multiunit housing structures will discourage single family homeowners and cause a concentration of 3 and 4 unit buildings as single family homeowners move out and sell to developers.</p>	5/22/2018
927	1	/policies/access-to-housing/	I live in the outer city with single family homes and do not want giant four-plexes built next to me. Maybe if you didn't let greedy builders come in and tear down all the affordable single family homes in the city to build mini mansions, there would be more affordable housing.	5/22/2018
928	1	/policies/access-to-housing/	<p>Much of the background here relates to racist policies of the past. These policies ended a few decades ago and the overemphasis of those policies is not helpful. As pointed out, despite the termination of those policies, the racial segregation of neighborhoods is still quite resilient. It would be better to examine why that segregation continues. There may be more innocuous reasons and some that are just personal/cultural preferences. For instance it might be centered around an ethnic church/tabernacle/mosque that keeps some ethnic groups from moving to a different area of the city. The regurgitation of racism at a point begins to sound hollow and even abusive. It is correct to recognize but not to the point of missing other clues.</p>	5/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

929	34	/policies/affordable-housing-preservation/	Strongly in favor of retaining existing small houses that are more likely to be affordable, even if refurbished, than the mega-mansions (or even fourplexes, or larger) that are or will be replacing them. They supply the starter homes for young people and downsized homes for seniors that want to stay in their neighborhood. Density alone will NOT help with affordability. So much new construction is "LUXURY" - hardly affordable!	5/22/2018
930	5	/policies/visual-quality-of-new-development/	Very important when building in primarily single family house neighborhoods. Visual and actual heights and volumes (footprints) should not overwhelm adjacent SF houses. Front and side setbacks should be similar to adjacent SF houses.	5/22/2018
931	9	/policies/open-spaces-in-new-development/	YES! Trees (that can remain healthy!) and green space very important. Indentations, including courtyards, can break up a boxy building as well as creating open natural spaces. I would suggest a requirement of the builder to include some spaces like these on the lot. Setbacks from the street and heights consistent with neighboring houses or buildings is very important to maintain the character of the neighborhood	5/22/2018
932	14	/policies/tree-canopy-and-urban-forest/	YES! Retain healthy old trees and add new trees in places they can have a chance to remain healthy.	5/22/2018
933	6	/policies/pedestrian-oriented-building-and-site-de	After you eliminate on-street parking, flat parking lots, and drive-throughs, how will someone who relies on a car or truck for transportation patronize businesses in Minneapolis.	5/22/2018
934	68	/policies/energy-efficient-buildings/	Policy #6 (c) and (d) require windows instead of blank walls. Windows reduce the R-value of a building, requiring added levels of heating and cooling.	5/22/2018
935	33	/policies/affordable-housing-production/	I find these policy goal statements larded with tedious "expertise" and "corporate sing-song reportage" language that lack specifics. If I am to understand, as reported in local media, that one goal is to allow the construction of rental 4-plexes sans off-street parking absolutely anywhere within the city's residentially zoned districts, including single family districts, count me among those adamantly opposed. Your earnest equity engineering efforts can be seen as running policy decisions off the rails. If greater population density is the desired end then the means to successfully achieve that must be applied discreetly, like concentrating multifamily units along rapid transit corridors and not sprinkled willy-nilly throughout the city.	5/22/2018
936	35	/policies/innovative-housing-types/	Please consider allowing landlords and investors build ADU's but remove the requirement of living in the ADU or in the property.	5/22/2018
937	6	/policies/pedestrian-oriented-building-and-site-de	(p) and (q), what about repair facilities for the electric and autonomous cars of the future? Will owners have to drive to the suburbs to have these vehicles serviced? The existing facilities may not be able to handle the new technology. Tesla has their own service centers, but would be unable to build in Minneapolis.	5/22/2018
938	18	/policies/walking/	No one has ever been run over by a car - in a skyway.	5/22/2018
939	0.1	/topics/land-use-built-form/	NO....I don't want my house to be rezoned for large scale Apartments. Are you Nuts?	5/22/2018
940	0.1	/topics/land-use-built-form/	Your web site here won't allow comments on particular parcels as it says it does. I DO NOT WANT THIS. Rezoning Huge swaths of single family homes and quiet beautiful streets is ridiculous.	5/22/2018
941	80	/policies/development-near-metro-stations/	Walk-able, bike-friendly neighborhoods connected by transit is exactly the kind of development I would like to see over the next 20 years. I do think that Minneapolis needs continue to work to improve that transit system all across the city to make this kind of development possible in many areas.	5/22/2018
942	1	/policies/access-to-housing/	TOTALLY in support of more density! More people, as long as accompanied by investments in public infrastructure, make cities MORE livable, more interesting, more vital. Apartments are less of an environmental drain than suburban sprawl. And more units, all things being equal, could make the Twin Cities more affordable, particularly if the greater metro area could get on board. My suggestion to make this even more attractive: 1. Permit smaller apartments in units. 2. Provide some level of tax relief for landlords that are willing to rent a % of their units at lower rates lower-income households, thus subsidizing their loss of income.	5/22/2018
943	4	/policies/access-to-commercial-goods-and-service	Excellent ideas. I think that the City should work hard to bring a vibrant retail environment into the downtown core. It lacks it now!	5/22/2018
944	5	/policies/visual-quality-of-new-development/	Not bad, but in addition to these "letter of the law" requirements, I suggest you have a design review committee staffed by planners, artists, and architects. Our external facades are too often mediocre, developers are cheap, the Twin Cities sometimes look as if they have a lock on ugly buildings (alas, some other cities are worse ... Denver!) A lively visual environment is essential, and Minneapolis should actively encourage such. Your above suggestions are a minimum, however, they are a good start.	5/22/2018
945	1	/policies/access-to-housing/	Allowing fourplex construction in neighborhoods currently zoned for single family housing is basically stealing money (property value) from current residents and giving it to developers.	5/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

957	81	/policies/social-connectedness/	Great strategy. Also strengthen ways to build neighbor to neighbor connections, with farmers markets, community building spaces in multi family buildings and block clubs strengthened by neighborhood associations and many departments. Thanks Sean gosiewski 612-250-0389 Sean@afors.org	5/23/2018
958	34	/policies/affordable-housing-preservation/	Great! Each Minneapolis neighborhood has its own vibe and character. In 1993, my husband and I were looking at both Minneapolis and St. Paul to call our home. The suburbs were not appealing. We loved the character and thoughtful planning and preservation St. Paul has. Ultimately, Minneapolis made more sense for work and parks. We visited many different neighborhoods and settled on Fulton for its small town feel, small homes and yards, parking and garages. Each neighborhood seems to meet special needs of a growing city. Perhaps this explains why people are coming back to the city. If all the neighborhoods start to feel the same, I think Minneapolis will lose its soul in a way. Prince did not make a song about Fulton, but he made one about Uptown. Please do not change our uniquely designed neighborhoods	5/23/2018
959	79	/policies/healthy-youth-development/	Sexually transmitted infections and unintended pregnancy are listed as negative outcomes in the topic area of healthy youth development, but there isn't an action step listed here. I feel that there should be one, especially related to STI/HIV prevention/reduction as this is an issue faced by many youth in our City, and especially disproportionately by youth of color.	5/23/2018
960	1	/policies/access-to-housing/	Interesting, how what Fulton is today has been viewed in a racial, segregation and anti-climate change. I am very sad and insulted. I think the powers that be really do not understand who lives in Fulton. Shocking.	5/23/2018
961	84	/policies/public-safety/	Does "first responders" include police? It may be helpful to write out police here especially for letter "c" to say something about improving police and community relations. I'm not sure if "f" fits here???	5/23/2018
962	66	/policies/air-quality/	Amazing. No mention of airport noise and fumes with FAA having the ability to completely change the southern neighbors with RNAV.	5/23/2018
963	80	/policies/development-near-metro-stations/	Again, Fulton is amazing we are absorbing so much that the city needs and Minneapolis really does not understand Fulton. Are you kidding..how outrageous to build all this. Cement city..shit..ill be at meeting to oppose this crazy plan 2040	5/23/2018
964	0.2	/small-area-plans/	You should have a tool where someone can put their address in, and a map would show of their area. I have found it hard to find my neighborhood map.	5/23/2018
965	1	/policies/access-to-housing/	I'm not in favor of adding higher density housing to my neighborhood (Armatage.) I'm in favor of adding more high density housing closer to downtown or along critical transit lines where high density housing currently exists. I moved to my Armatage neighborhood because I wanted to live in an area with nicer housing where individuals cared more about their neighborhood and houses (this is one of the few reasons I'm ok with the high property taxes assessed in my area which are significantly higher than my friends in Edina.) If higher density housing is added to my neighborhood, I will likely start looking to the suburbs where I can get more house for the same money and maintain the upscale neighborhood I desire.	5/23/2018
966	41	/policies/tenant-protections/	Collaboration with Hennepin County is KEY. The City of Minneapolis must bring Hennepin County to the table especially Emergency Assistance which is denying close to 2/3 of its applicants a majority of whom are renters seeking rental relief and assistance with damage deposits. In our research we found that very few have anything positive to say about their experiences seeking emergency assistance to the contrary many feel less than human in the process. When most other resources require a denial letter from Hennepin County to receive their services which often takes 30 days or more to receive you have hundreds of disgruntled renters and families in crisis looking for support where none exist.	5/23/2018
967	0.1	/topics/land-use-built-form/	Would like to see the ADU ordinance changed to include owner/landlords in adding ADU's as part of the comprehensive plan	5/23/2018
968	15	/policies/transportation-and-equity/	I assume you are including the needs to people with disabilities as part of your criteria for what is "equitable." I think snow and ice removal from city sidewalks is remarkably inconsistent when put in the hands of citizens and property owners. It seems to me that one way to ensure people using devices to aid mobility are able to get around during snowy/icy months would be to have the city take responsibility for clearing all sidewalks, with particular emphasis on sidewalks that connect major public transportation routes (Chicago Ave sidewalks that would help folks who ride the 5 bus line, for example).	5/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

969	0.1	/topics/land-use-built-form/	<p>The small area plans created by citizens/resident input are not adequately reflected in the proposed Built Form Districts. To override the small area plans is to ignore a broad swath of constituency.</p> <p>Reviewing Tweeter history, it seems that many of the proposed land use ideas have come from progressive tweeter users. That is one valid source of input but is incomplete.</p> <p>The garnering of input from Open Street Festivals is novel, but does not an adequate cross section of priorities and concerns.</p>	5/23/2018
970	36	/policies/innovative-housing-strategies/	<p>Create a STRONG action plan to stop the tear-downs of small more affordable homes so that enormous single family homes (many poorly built boxes) can be built in their place! These smaller homes can be good starter homes for young people who may also be interested in refurbishing them. Also, they provide homes for seniors who are downsizing and would like to stay in their neighborhood.</p>	5/23/2018
971	39	/policies/fair-housing/	<p>I would love to see more diversity in my neighborhood but not at the expense of encouraging cheap multi-unit buildings that destroy the character of the neighborhood. I have observed the older neighborhoods, such as Kingfield, which has a lot of mixture of housing types, and, at least to me, it still has the character of neighborhoods that have all single family homes. If done carefully, this diversity of peoples and housing types can make a more creative community, such as Kingfield. They recently created "Porchfest" where on one spring/summer evening musicians organize to play on their front porches as neighbors come by to listen and visit!</p>	5/23/2018
972	10	/policies/street-grid/	<p>I hope this means that the KMart lot on Nicollet and Lake will be adjusted!</p>	5/23/2018
973	0.1	/topics/land-use-built-form/	<p>I'm concerned that the way feedback works, city staff is going to disproportionately hear complaints and not support, so I wanted to write in support generally.</p> <p>In particular, I'd like to applaud any attempts to leaving how much parking is needed up to the market in most/all of the city. The basic truth is that parking is plentiful across the vast majority of the city, and will be even if we add a few more residents. Off-street parking will still get built, because property owners will want to offer that amenity, and should parking get tight in some neighborhoods, those incentives will just be strengthened. The only thing that parking minimums can do is require more parking be built than the market demands.</p> <p>Next, I'd like to applaud the thoughtful balance that went into how, where and how much density we're going to allow across the city. Small multi-unit buildings in neighborhood interiors in buildings that mimic the existing built form is a great way to gently add density and enhance access to amenity-rich neighborhoods. The concept is the right approach.</p> <p>That said, I'm concerned that we aren't apply the concept correctly on the west side of Hennepin, where we're allowing less density than just on the other side of the street. These high land value neighborhoods are exactly where more units can increase access for people who have traditionally been excluded from them. In particular, I'd like to see corridor treatment along the route of the 25 bus and greater density around the planned 21st stop on the SWLRT. For the latter, it's especially important to leverage the costly investment we're making in high quality and high frequency transit.</p> <p>One of the primary positives I see in the overall plan is that it allows each neighborhood to take the next step up in density and therefore hopefully add more neighbors to support local businesses and retail and allow more people to be able to meet their needs in their neighborhood, perhaps without driving. It makes for more appealing neighborhoods, reduces congestion and, most importantly, makes it easier for those who face challenges that prevent them from driving. In that regard, I'd like to the more commercial land use allowed along 38th Street east of Minnehaha.</p> <p>Overall, I'm very happy with the plan and think it's a step in the right direction toward a city that my 17 month old daughter will be able to afford when she's ready to move out on her own.</p>	5/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

974	38	/policies/affordable-housing-near-transit-and-job-	<p>My concern is the statement that the city will, "Identify and pursue opportunities to acquire and assemble property for larger-scale development near transit stations and along transit corridors."</p> <p>I live in a single family home on Lyndale (surrounded two blocks in every direction by exclusively other single family homes and duplexes). Living on a busy street is the only way I'm able to afford a home in Tangletown. Should the city elect to "acquire" my house through eminent domain or highest and best use taxation, they would force me out of my neighborhood. The city needs to provide definitions and restrictions to the "acquire and assemble" statement. I don't mind having the option to sell my property to a developer, but the thought of being forced into it by the city is heartbreaking.</p>	5/23/2018
975	80	/policies/development-near-metro-stations/	<p>Traffic is horrible without all these additional buildings. The chain of lakes is popular because it is the way it is. Why ruin an asset for all of us. This isn't Lake Michigan! The only people that profit are the developers and the people in their pocket. SWLR route is a bad and expensive money pit.</p>	5/23/2018
976	16	/policies/environmental-impacts-of-transportation	<p>Carbon emissions reductions is a critical goal, but you have completely missed a major local impact of transportation -- airport noise. This affects tens of thousands of Minneapolis residents at levels considered by most of the rest of the world as having a significant impact. Multiple studies show that airport noise can have serious effects on human health and the ability of children to learn. Minneapolis should be taking a strong stand on this and defending its citizens from these health risks, exactly as you do with regulations on chemical air pollution, contaminated water and lead paint. Elsewhere you tout the benefit of having a nearby major airport, but totally ignore the cost for that paid by all the residents who get to hear the commercial jets every day. And your push to increase population density in the city neighborhoods under the flight paths is going to increase the number of people afflicted by this noise pollution.</p> <p>You should have some concrete goals for airplane noise in this vision for Minneapolis in 2040:</p> <ol style="list-style-type: none"> 1 Publish the data showing the 55dB DNL contours and the number of Minneapolis residents subject to it. (MAC collects this data but refuses to publish it.) 2 Reduce MSP airplane noise by 50% by 2025 -- make the Noise Oversight Committee a Noise Reduction Committee 3 Get more Minneapolis citizen representation on the Noise Oversight Committee, which is currently dominated by industry, MAC, FAA and suburban representatives. 	5/23/2018
977	28	/policies/msp-airport/	<p>It's important to make MSP green, but it's also important to make MSP quiet. Tens of thousands of Minneapolis residents are afflicted by excessive noise from MSP operations, which is a health risk and a general quality of life problem. MSP operations are not just an economic issue, and it's insulting to people in the neighborhoods dealing with MSP noise that the only mention of this noise is the rather weak action step in this section (f) and there is no strong set of action steps in Environmental Impacts of Transportation (see comments under that section on this topic) Also please realize that noise mitigation in homes, enabling people who wish to stay inside during the nice weather months as well as the cold months to do so, is a Band Aid program, not a solution at the source of the problem. People affected with MSP airport noise want their backyards, playgrounds, parks and other outdoor amenities to be the pleasant, unpolluted experiences others enjoy. Sound mitigation for homes is equivalent to offering people with polluted water systems a supply of bottled water, or those with severe air pollution some face mask filters.</p>	5/23/2018
978	0.1	/topics/land-use-built-form/	<p>I am appalled by the proposal to decimate the livability and use of the West Lake-Excelsior area by turning it into a highly dense concrete jungle filled with outrageously tall highrises that are totally out of scale with the area, will greatly undermine all Minneapolis residents well-being and enjoyment of the lakes and leisure activities that currently make the area not only beautiful but a highly desirable area to live/visit/work, and that will turn traffic in the area into a constant congested nightmare that will deter people from wanting to live in, make recreational/leisure use of the lakes, and patronize businesses/restaurants in that and the surrounding area. What is proposed is truly an abomination that defeats not only the proposal's professed objectives but shows outright disrespect for those who live in Minneapolis and may otherwise want to bring new business to the Twin Cities. I am outraged and fearful. It certainly seems that the plan is all about greed for money and pandering to big business, and forcing your plans through regardless of how residents feel and their extremely valid objections. I currently live in the area in question though I may flee Minneapolis if this is what the city becomes. Shame on you!</p>	5/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

979	1	/policies/access-to-housing/	<p>I am concerned that if we have 4-plexes popping up on vacant properties, 3 story buildings on the quiet streets like Dupont, and 6 story building on Emerson and Fremont, the character of our neighborhood will change drastically.</p> <p>Our neighborhood is already very "dense" and the reason we purchased our home in North Minneapolis was because it was not a dense neighborhood, not lacking in parking, had homeowners invested in the community and had beautiful character homes. My block alone already has 5 houses that are rental units (and three of them are duplexes). You are crazy to think that dropping more rentals on my block is a good and 'fair' solution to housing needs in the city where I've infested in.</p> <p>1619 Emerson Ave North</p>	5/23/2018
980	56	/policies/supporting-small-businesses/	<p>The city has so far to go to just get out of the way of business owners. You have added navigators to help the people find their way through the systems the city has made so complicated.</p>	5/23/2018
981	52	/policies/human-capital-and-a-trained-workforce/	<p>What does healthy safe and equitable workplaces mean? Is this a way to shoehorn the working families agenda back onto the table where the city tries to take over the operations of businesses within it's limit? Scheduling hiring and the like? Tread carefully here that topic the last time almost accelerated the exodus from Mpls.</p>	5/23/2018
982	76	/policies/new-parks/	<p>Would the city take out badly needed housing stock to achieve this last 3% of the population reaching a park in 10 minutes? This seems like an out of order priority.</p>	5/23/2018
983	73	/policies/stormwater-management/	<p>The goal of reducing impervious surfaces is directly in conflict with the massive density increases proposed for many neighborhoods including those close to the lakes and rivers creeks and streams. If your goal is to remove single family homes, with families in them, and replace them with lot line-to-lot-line high rises you will have less green space and more runoff issues. Couple that with all the cars in the street since no parking is preferred, and now you have the automotive contaminants running into the storm sewers much more than if they were parked in a garage.</p>	5/23/2018
984	78	/policies/park-design-and-programming/	<p>doe the overweight focus on equity outcomes mean that if I live in an area with predominantly white residents, I deserve less programming at my local park? do my kids get less opportunities than a distressed neighborhood would? And isn't it true that the majority of tax revenue come from these boring, predominatly white SF home neighborhoods you are hoping to scale back investment in in the name of equity?</p>	5/23/2018
985	0.1	/topics/land-use-built-form/	<p>Attended the LCC Open House. Heather did an excellent job presenting, explaining and keep the crowd calm.</p> <p>My take away - there is a push by the city to maintain or increase industrial base to create higher paying jobs. Good!</p> <p>But there will be leakage if there are new developers snatching up small properties in the interior of of neighborhoods, building multi-unit buildings and using management companies. Will this income stay in the city?</p> <p>I think companies like CityLine Homes will move into this market, like they have moved into the market of knocking down homes and building much larger single family homes in Longfellow, Standish-Ericsson and Nokomis East. This company, like many other developers in this niche, are not headquartered in Minneapolis.</p> <p>I think multi-unit buildings in the interior of neighborhoods should have an owner occupied condition. Then the rent from the additional units will stay in the city.</p>	5/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

986	0.1	/topics/land-use-built-form/	<p>Attended the LCC Open House. Heather did an excellent job presenting, explaining and keep the crowd calm.</p> <p>My take away - there is a push by the city to maintain or increase industrial base to create higher paying jobs. Good!</p> <p>But there will be leakage if there are new developers snatching up small properties in the interior of neighborhoods, building multi-unit buildings and using management companies. Will this income stay in the city?</p> <p>I think companies like CityLine Homes will move into this market, like they have moved into the market of knocking down homes and building much larger single family homes in Longfellow, Standish-Ericsson and Nokomis East. Then the rent from the additional units will stay in the city.</p>	5/23/2018
987	7	/policies/public-realm/	<p>I'm glad placemaking is a part of this goal and I want to amplify its importance. The nodes of Minneapolis that are emerging are WONDERFUL. Minnehaha Ave being a shopping/antiquing area, Northeast being known for art and breweries, Eat Street, etc. I would love to see efforts to define and enhance neighborhood identities continue. I'd love to see fewer chains and more local businesses filling market needs. I think this is good for local neighbors as well as visitors (including commuters from suburbs, outstate and elsewhere).</p>	5/23/2018
988	51	/policies/healthy-pre-k-development/	<p>This is an excellent priority and should be bundled with a commitment to free birth control for all city residents and a commitment to supporting babies from cradle to grade, and then from grade to graduation through an excellent public education system. There isn't enough focus on putting money into excellence. Less talk about equity and more about excellence across the city. Thank you.</p>	5/23/2018
989	43	/policies/housing-displacement/	<p>I am TOTALLY in favor of this policy. But there needs to be a strong plan of action now, the sooner the better, because the affordable units are going away fast (and not just in "low-income" neighborhoods). Even in my SW neighborhood, there is a form of "gentrification" occurring (that I never new existed!) where seemingly adequate but possibly needing refurbishing small houses, are snarfed up before you know it, torn down, and replaced with a \$ million + poorly built home! Frankly, I've been traumatized by this in the last few years! So while the price is going way up, the quality is going down. I was talking to a neighbor the other day who happens to do tile work, and he said he is replacing a lot of the tile work that was not done correctly in these new poorly built houses! IMO, this needs to stop, and fast!</p> <p>I've also been shocked recently when an investor (often out-of-state) swoops in and buys an apartment complex full of low income renters, often for many years, and including lots of children in schools. Then the occupants get kicked out, the apartments get "re-habed" and the rent gets raised (2 recent examples in Richfield, one successful, one not - which was saved for the current renters).</p>	5/23/2018
990	1	/policies/access-to-housing/	<p>Four unit small-scale housing is a formula for slums. The reason duplexes seem to work is that they are often owned by the resident of one of the two units and that resident is likely to be intimately aware of the condition of the units, heating and maintenance issues generally and the conduct of his or her tenant. A 4-plex is a substantial investment, and less likely to be owned by one of the residents. An absent landlord is more likely to be out of touch and to cut corners.</p>	5/23/2018
991	0.1	/topics/land-use-built-form/	<p>Historic zoning rules post World War II that limit development to single family homes are what have led to the current housing shortage and insanely low vacancy rates. We need to allow for more building, more density, and more people. We live in a city, and this is what we should be focused on. Let the suburbs focus on easy, free, and ample parking.</p>	5/23/2018
992	0.1	/topics/land-use-built-form/	<p>The idea of turning side streets like Aldrich And Colfax into streets with multi-lot, multi-story apartment buildings 40 blocks from downtown is terrible. We moved to a quiet street from Uptown to escape the crush of apartments and invested heavily in our home, which is now jeopardized by this short-sighted idea.</p>	5/23/2018
993	79	/policies/healthy-youth-development/	<p>from Paul Pentel MD, Ward 7 representative to Public Health Advisory Committee. I find no specific mention of family planning or goals related to that. This is a critical factor in the health of youth, with impacts in many other areas singled out in this Plan such as economic development. I do appreciate that this is a controversial topic but so are many others mentioned in this Plan. I think it would be unwise to keep this issue under the radar. That strategy has not protected aggressive challenges to effective public health approaches to family planning at the national or state levels. It is better to take this on and be proactive.</p>	5/23/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

994	1	/policies/access-to-housing/	<p>I live in Near North. There is already a lot of affordable housing here both owner occupied and rental. The newspaper today just had an article about the shortage of for sale house in the starter home category. Most of what is available in this category is in North Minneapolis. If you permit higher density buildings and developers start buying up the cheaper land in Near North, the opportunities for ownership will be lost and the rental housing that replaces it will be more expensive than current rental here.</p> <p>This is not like the areas in South Minneapolis where the Mayor justifies building fourplexes by saying that people are tearing down starter home to build huge houses so why not allow competitive use of the land to create more rental. I think this logic is faulty because there is no shortage of large expensive homes in the for sale market and they are still doing teardowns so any building of fourplexes will likely result in the loss of more starter homes.</p> <p>Near North is never going to change into what neighborhoods are like in SW and around the lakes. Houses here (if not replaced by rental) will for a long time be the most affordable for starting home ownership.</p> <p>For diversity Near North is very diverse now if you replace the housing here with the large rental buildings now being built on all the available sites in North loop you will end up with less diversity.</p> <p>The shortage of affordable for sale housing has increased home ownership in Near North, driven problem properties to be fixed up, and significantly lowered the crime rate.</p> <p>BOTTOM LINE: THE CHANGES WE HAVE SEEN FROM MORE HOME OWNERSHIP SHOULD BE NURTURED, NOT REPLACED BY HIGHER DENSITY HOUSING.</p>	5/23/2018
995	33	/policies/affordable-housing-production/	<p>I live in Near North. We already have a great deal of low-income housing. We don't need more low-income housing; we need low-income house equitably distributed throughout the city, NOT concentrated in poverty pockets!</p>	5/23/2018
996	33	/policies/affordable-housing-production/	<p>I can't find it here, but have read in the paper about changing zoning to allow small apt. Bldings in all mpls neighborhoods. This is a terrible idea and will ruin some of the most lovely neighborhoods in the city. Do not let developers run amok with this silly idea. I live in a very dense neighborhood with many apts and condos so this doesn't personally effect me, but I moved from a pretty area with single family homes all built in the same era. These older neighborhoods pull people to the city with their beauty and architectural continuity. Loosening zoning in these areas will be a disaster and destroy the allure of these neighborhoods. Please extend the study and feedback period for Minneapolis' 2040 plan. I think this requires a lot more listening, research and wise planning. Do not quickly enact something that will result in actions you can never undo.</p>	5/23/2018
997	17	/policies/complete-streets/	<p>A thousand times yes.</p>	5/23/2018
998	17	/policies/complete-streets/	<p>Please more clearly explain what this means: "Develop strong curbside management policies to take full advantage of a dynamic urban environment." Sounds like an internal memo explaining Applebee's To Go parking.</p>	5/23/2018
999	64	/policies/food-businesses/	<p>Let's explore additional food hubs, food processing and freezing capacity (metro wide) for small growers can supply for institutions? Build upon past food hub studies and the Good Acre. Thanks Sean gosiewski 612-250-0389 Sean@afors.org</p>	5/24/2018
1000	0.1	/topics/land-use-built-form/	<p>I believe Corridor 4 should be completely eliminated and Corridor 6 be the primary "By-Right" for any parcel in this proximity to local bus transit. This is a matter of Allowing development vs Restricting development city-wide, and eliminating the historic redlining that was rampant throughout Minneapolis.</p>	5/24/2018
1001	0.2	/small-area-plans/	<p>Small area plans don't seem to be effective tools for a number of reasons: the plans are formed without some of the expertise of city staff, they are not updated as frequently as the comp plan, and are not created based on the shared goals of this comp plan. While I believe visions for neighborhoods and small areas are important, they need to be revisited just as often as the comp plan and perhaps in conjunction with or after the city wide plan is adopted in order to work within the framework of the city plan to develop the neighborhood vision for the next decade. Small area plans should have an expiration date, requiring regular updates to adapt to changing city policies and demographics,</p>	5/24/2018
1002	16	/policies/environmental-impacts-of-transportation/	<p>All of this! Along with these steps there needs to be more education and outreach about the city's adopted climate change goals and why these steps are needed to meet the goals. I think more people will agree with these changes when they understand WHY the changes are needed.</p>	5/24/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1003	38	/policies/affordable-housing-near-transit-and-job-	As a homeowner, I am absolutely thrilled about this policy. It's high time the city put a history of housing discrimination behind it. As a young professional, I decided to move here because it was so easy to bike! My affordable apartment was next to major bus routes, the light rail, single family homes, other apartment buildings, shops, grocery stores, everything I needed within easy walking and biking distance. If the city wants to retain a vibrant workforce, we need to take action to make the city more livable. Creating a denser, friendlier space with easy access to biking and transit is best way to secure a solid future for a growing population. We can't keep assuming that every individual needs to drive everywhere. Honestly, I wish my current neighborhood had more walkable and bikeable development. I chose to buy a house close to the lightrail, so that I can bike and ride the train to work each day. However, there simply isn't enough housing near transit lines for everyone to have the same option. If the city is going to grow and retain a young, talented workforce, we have to embrace a dynamic city and not rely on stereotypes about life from 50 years ago - car traffic destroys roads & the environment, widens waistlines and decreases our sense of community. Housing prices are out of control, and seriously limiting people's access to transit - people I know can't afford to live near transit, or even in the city. It only makes sense to encourage transit use, walking and biking for a safer and healthier city!	5/24/2018
1004	17	/policies/complete-streets/	Complete Streets is a great policy! Keep working to build streets that prioritize people over cars.	5/24/2018
1005	18	/policies/walking/	As part of Complete Streets, the city needs to look at clearing sidewalks in winter or enforcing existing ordinances more aggressively. It's an able bodied person and just one home or business that hasn't adequately (or even attempted) to remove snow makes for a dangerous situation. I can't imagine that elderly persons, people with strollers, or people who have more limited mobility or use a device to assist their mobility would be inclined to use sidewalks in winter without more consistent clearing, especially in the winter months.	5/24/2018
1006	19	/policies/bicycling/	Protected bikeways are key. Either concrete barriers to separate cars from bicycles or elevating the bike lanes to the same level as the pedestrian paths are good options. Barriers between cars and bikes can provide opportunities for adding greenery to the street scapes as well.	5/24/2018
1007	19	/policies/bicycling/	Bike lanes make the city more accessible and friendlier. I decided to move here for work after visiting and seeing just how easy it was to commute by bike. Great work, keep it up and keep expanding and adding more bikeways!	5/24/2018
1008	10	/policies/street-grid/	Yes - the grid provides predictability for all modes of transportation. I like the idea of when restoring portions of the grid only allowing access by walking, biking or transit.	5/24/2018
1009	11	/policies/skyways/	I understand why we have skyways, but the impact on the street level is unfortunate. More access points to the skyways from the street are a good start, and ensuring that skyways connect to open spaces that encourage transitions from skyway to street level and vice versa	5/24/2018
1010	20	/policies/transit/	More dedicated bus lanes please!	5/24/2018
1011	1	/policies/access-to-housing/	Do not like	5/24/2018
1012	76	/policies/new-parks/	Unstructured , chaotic wild spaces are more important to me than groomed parks. Mowed grass and manicured fields cannot fulfill the human need to be part of nature on a regular basis. Structured playgrounds, and organized activities simply bring inside outside, they do not provide the freedom to experience and discover nature. Please leave some spaces alone and unplanned.	5/24/2018
1013	1	/policies/access-to-housing/	It seems like developers have the upper hand and will push the middle class and low income out completely. Also don't understand how tearing down housing left and right, where those materials will forever sit in a landfill is environmentally friendly in MPLS's eyes.....but driving cars is not?	5/24/2018
1014	0.1	/topics/land-use-built-form/	The color coded legend is difficult to track on the maps as some of the shades are very close to each other (i.e., Interior 1 and Interior 2 look very similar on the maps; Transit 10 and Transit 5 are also similar colors) which obfuscates the future use intended.	5/24/2018
1015	76	/policies/new-parks/	Stop mowing significant portions of Minneapolis public spaces and use planned burns to control boundaries. For example, Bancroft Meadows, not currently controlled by the Park Board, should be. And half should be allowed to go wild. Connect to Sibley and Powderhorn by strategically acquiring current vacant and underutilized lots. Allow wild public spaces to connect neighborhoods using bridges and underpasses.	5/24/2018
1016	0.1	/topics/land-use-built-form/	I know you will get a lot of comments about how density will ruin neighborhood character. I disagree but I am sympathetic to a concern that the massing of new multi family buildings might not "blend in" with surrounding houses in the interior 1-3 forms. But, I think the descriptions of the built forms is the right guidance to address that issue. New multi-family buildings in these areas need to have reasonable lot size restrictions so we don't end up with bulky, wall-like buildings. I encourage the City to set reasonable lot size restrictions for these built forms.	5/24/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1017	0.1	/topics/land-use-built-form/	<p>The 4500 and 4600 South blocks of Aldrich need to be designated Interior 1. These are NOT commercial streets. The currently are made up of entirely single-family homes with 1-2 duplex buildings. The rendering for Interior 3 imagines a street that bares no resemblance to the one we all chose to purchase and build lives on.</p> <p>Thanks, Clark Starr 4628 Aldrich Ave. S. Minneapolis MN</p>	5/24/2018
1018	0.1	/topics/land-use-built-form/	<p>The Corridor 6 designation for S Lyndale Ave. from south of Minnehaha Creek to MN62 does not appear to meet the intent of a Corridor 6 designation i.e. "applied along high frequency transit routes as well as in areas near METRO stations." Due to its proximity to the Crosstown, the area does see traffic but no more so than the areas north of Minnehaha Creek on Lyndale where R1 designation shows until Lyndale/50th crossing. Bus routes (currently) are limited in this area. The resulting Corridor 6 "œcul-de-sac" on S. Lyndale in both Kenny and Windom neighborhoods with the impinging Interior 3 designation on Aldrich and Garfield Avenues are not consistent with neighborhood character/historical use, traffic patterns/flow. The Lyndale Ave Corridor 6 designation in neighborhoods not dissimilar to those along Penn, Xerxes or France Avenues appears tone-deaf to the extant predominantly historical R1 nature of the neighborhoods. "œUpsizing" of S. Lyndale to Corridor 6 from its current zoning (which has resulted in no development south of 56th Street) would appear to be an effort to make the area more commercially enticing at the expense of the character of the neighborhoods involved. However, until the Lyndale/121/Lyndale Connector mess of oddly shaped lots abutting a freeway/highway access with no access is resolved, any commercial development will likely occur north of 56th St., which, if done to the full extent allowed by a Corridor 6 designation, would result in an odd "œurban island" in a sea of R1.</p> <p>Recommend changing the Corridor 6 designation for S Lyndale Ave. from south of Minnehaha Creek to MN62 and the impinging Interior 3 designation on Aldrich and Garfield Avenues to Interior 3 and Interior 2 respectively (consistent with those designations on those along Penn, Xerxes or France Avenues south of Minnehaha Creek.</p>	5/24/2018
1019	0.1	/topics/land-use-built-form/	<p>We need to add housing in the neighborhoods west of Hennepin and in southwest in general to take displacement pressure off neighborhoods further east.</p>	5/24/2018
1020	1	/policies/access-to-housing/	<p>Density on transit corridors makes a great deal of sense. Adding 3-unit, 4-unit, and accessory dwelling unit building types in the neighborhoods farthest from downtown will not alleviate the problem of access to affordable housing. In many of these neighborhoods like Fulton where I live, the cost of homes plus land exceeds \$350,000. That cost plus the cost of demolition and construction will make any necessary rent above anything that would be considered affordable. Moreover, adding density to these neighborhoods will impact the desirability of the neighborhood. If a 4-plex was approved and built on the lot next to mine, we would move out of the City.</p>	5/24/2018
1021	80	/policies/development-near-metro-stations/	<p>It seems there should be an action step about public safety/social wellbeing since these areas will have increased activity, population, etc.</p>	5/24/2018
1022	0.1	/topics/land-use-built-form/	<p>I don't disagree with the corridor linear concept, but would also consider "hot spot" or more circular concepts to compliment the corridors. Specifically in the neighborhoods further away from downtown.</p>	5/24/2018
1023	15	/policies/transportation-and-equity/	<p>These "Action Steps" are too vague. What specifically will you do to make transportation more equitable? I think a solid first step would be funding the proposed streetcar or BRT servicing North Minneapolis and Downtown.</p>	5/24/2018
1024	1	/policies/access-to-housing/	<p>While I'm sure the Council feels that they have adequate public notice, I do not believe this is the case based on discussions w/ neighbors. This is too complex an issue, with too many significant policy changes, to limit discussion - we need more time. I can hardly find the information I need on this website and it isn't clear about the specific actions and impact. I can tell you this - I am not supportive of these recommendations though I do appreciate the issue. I think assumptions on impact are not valid and some of these recommendations (because I certainly can't find a clear document outlining them all with easy to navigate specifics) for change will adversely damage our neighborhoods for the future. Be very careful about how dramatically you are recommending change because there will always be unintended consequences and these will be difficult if not impossible to reverse once implemented.</p>	5/24/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1025	19	/policies/bicycling/	I support continued improvements to bikeways that would make them visible and safer. However, I believe the city has done a lot with adding bike lanes in the past years and should consider it mission accomplished. Therefore, less focus on expansion and more focus on the many other important goals of the city. Also, due to the added bike lanes on 26th and 28th street, I no longer consider visiting uptown businesses from my residence in Longfellow due to the traffic congestion.	5/24/2018
1026	0.1	/topics/land-use-built-form/	Please consider limiting this to prevent a scenario with 2.5 floor dwellings on both sides of a 1 or 1.5 story single family home.	5/24/2018
1027	56	/policies/supporting-small-businesses/	This policy is extremely important and probably needs more than 5 action steps. Consider reducing regulation burden, reducing barriers to entry for small business entrepreneurs. Also, consider the city's competitive environment with other cities to make Minneapolis a preferred city to open a small business.	5/24/2018
1028	6	/policies/pedestrian-oriented-building-and-site-de	Good ideas! Encourage street retail also, please.	5/24/2018
1029	0.1	/topics/land-use-built-form/	Allowing small multifamily buildings in most of the city is great! Fourplexes are an elegant way to increase density in interior neighborhoods and help ameliorate a city-wide housing shortage. The lakes areas in southwest Minneapolis are especially important to accommodate more units because the existing exclusionary single-family zoning is designed specifically to separate Minneapolis by class. A very small increase in housing availability in this area is an important and necessary first step to begin undoing that segregation.	5/24/2018
1030	0.2	/small-area-plans/	Small area plans, like neighborhood groups, tend to be directed by a small group of wealthy homeowners who are not representative of the small area they serve. It would be better for land use decisions to be made at the City level and do away with small area plans as guiding documents for land use decisions.	5/24/2018
1031	1	/policies/access-to-housing/	This is an extremely well-crafted policy. Increasing the number of homes in Minneapolis is crucial. A home in Minneapolis is more environmentally efficient and more economically efficient than a home in the suburbs, where the losers of the housing shortage will be pushed to. In a housing shortage, landlords win while renters lose - and the easiest way to remedy a shortage is to acquire (or build) the thing that you're short of. Minneapolis should make it easy to build housing.	5/24/2018
1032	31	/policies/creative-workers/	The City of Minneapolis should discourage the use of affordable housing funding to subsidize artist housing. If the City decides that artist housing is an important public goal, then it should establish a separate fund, rather than directing money from housing that would otherwise be more likely to serve people of color, families, and those living in poverty.	5/24/2018
1033	80	/policies/development-near-metro-stations/	Housing near light rail is probably the most environmentally efficient location for housing in the entire state. The draft policy is great - we should discourage auto uses and permit significant density near all light rail stations.	5/24/2018
1034	37	/policies/mixed-income-housing/	The City should continue to study inclusionary zoning, but be careful in its implementation. Putting the full burden to provide affordable housing on new residents (by increasing the cost of new housing) is not an equitable way to provide affordable housing. Funding affordable housing with increased property taxes would be more equitable.	5/24/2018
1035	39	/policies/fair-housing/	The City should continue to further fair housing by incentivizing (not penalizing) proposals from developers who add affordable units in unaffordable areas.	5/24/2018
1036	41	/policies/tenant-protections/	The City should fund additional inspectors to investigate slumlords. It should adopt just cause eviction laws and be more aggressive about revoking rental licenses from landlords who fail to meet the criteria laid out by the City.	5/24/2018
1037	6	/policies/pedestrian-oriented-building-and-site-de	good	5/24/2018
1038	34	/policies/affordable-housing-preservation/	On the one hand the plan suggests creating and strengthening strategies to preserve naturally occurring affordable housing. And then on the other, it puts forth a Built Form Plan that that would encourage the destruction of large portions of this same housing in Downtown's edge neighborhoods. This makes no sense. This is NOT equity.	5/24/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			<p>The writing of this Plan is disingenuous and written in such a way to not communicate what is true in simple terms, but to hide the true agenda of CPED by twisting language into statements that do not accurately reflect what is actually going to be realized by the committees that follow and the new zoning which will be based on it.</p> <p>For example:</p> <p>"How Minneapolis 2040 updates Small Area Plans in general:</p> <p>Future land use and built form guidance: Minneapolis 2040 updates this guidance for the entire city in service to the Minneapolis 2040 goals."</p> <p>What this means: The Small Area Plans are being removed and will not be attached to the 2040 Comp Plan.</p> <p>"This new guidance is informed by the guidance of the small area plans, and updated where necessary to be consistent with the application of Minneapolis 2040 goals and policies citywide."</p> <p>The word "Informed" is of no distinct character in terms of what the result will actually be positive or negative or substantive relationship to the content of the Small Area Plan guidance. It says nothing concrete. "Inform" does not mean follow, is based on or is supported by.</p> <p>" Minneapolis 2040 will be used to guide future land use and built form guidance in areas covered by past small area plans."</p> <p>What this actually means: The Minneapolis 2040 Plan will totally replace and govern where in the past the Small Area Plans guided development in the areas they were designed to cover.</p> <p>"Urban design policies: Minneapolis 2040 includes urban design policies intended to shape the design of new buildings. This guidance is informed by the design guidance of small area plans, and applies to all new development in the city."</p> <p>This again has the meaningless word "informed" which means nothing substantive or factual.</p>	5/24/2018
1039	0.2	/small-area-plans/		
1040	0.1	/topics/land-use-built-form/	I would like to know more than what is listed here	5/24/2018
1041	0.1	/topics/land-use-built-form/	The East and West sides of Hennepin should both be interior 3. The west side of Hennepin according to the draft plan is interior 2, which continues to reflect the redlining and racial covenants that still contribute to the disparities between neighboring neighborhoods. The areas a long the future SWLRT should also be much denser, and give access to what will be an important transit line. There is no reason why areas along the green line in Kenwood should be treated differently than Longfellow.	5/24/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1042	0.2 /small-area-plans/	<p>The language used to communicate what the policy does with to the guidance of the Linden Hills Small Area Plan is disingenuous and makes blatantly incorrect statements to create a false impression that the LHSAP is being included and its guidance followed - Neither which is true.</p> <p>"The Linden Hills Neighborhood Council and the Community Development and Economic Development Department of the City of Minneapolis collaborated on the development of a small area plan for a portion of Linden Hills."</p> <p>This idea that the creation of the final plan was a "collaboration" is FALSE statement. It was not a collaborative process in that the final result was mandated and executed solely by CPED in opposition to the, the LHINC board and the LHSAP steering committee which participated in good faith, but was ultimately ignored. This final and total control was inputted into the contracts by CPED staff that they had the Neighborhood Council's Board chairs sign, without representation of council, and had them transfer 60,000 community dollars to CEPD's control. CPED solely controlled the writing and adoption of the LHSAP in spite of the neighborhood, steering committee, and neighborhood council's opposition to the disingenuous "3 or 4" story addition to the plan and the elimination of preferred heights in terms of feet.</p> <p>"A consulting team led by (SEH) Inc. led a broadly inclusive community engagement process to develop the small area plan, which creates a shared longrange vision for portions of Linden Hills."</p> <p>CPED staff Brian Schaffer and Jack Byers led, wrote and manipulated the outcome of the Linden Hills Small Area Plan from its inception to its finalization and City Council vote on the crucial changes on an amendment put forth by Council Member Goodman from a completely different Ward. The behind closed doors agreements, non specific but damaging language and vilification of neighbor participants by these particular CPED representatives clearly violated open and transparent community engagement in favor of CPED control. I just saw a video where these two players ran a community meeting using the same tactics of misinformation, which this 2040 plan is replete with. I expect the same outcome, from the same process, by the same individuals.</p> <p>"The land use recommendations from the Linden Hills Small Area Plan are kept almost entirely intact in Minneapolis 2040."</p> <p>This is a Lie. The C-4 and Interior 3 up zone the guidance of the LHSAP and as well the specific direction that its guidance is for the commercial Nodes and NOT the surrounding area of influence. A total reversal by the major change that this area of influence IS included and changed to be called a URBAN NEIGHBORHOOD. Already this week developers with projects in Linden Hills are citing that Linden Hills and properties within the Shoreland Overlay are in a defined area of Urban Neighborhood and should be allowed variance to supercede the</p>	5/24/2018
1043	0.1 /topics/land-use-built-form/	<p>I am deeply concerned to the proposed rezoning of Nicollet Avenue and adjacent streets around 50th Street. This is a historic neighborhood with some of the oldest and most unique homes in the city. As a resident of this neighborhood, I would be absolutely devastated to see this area redeveloped as proposed by this plan. Many of the neighbors in this area have had their homes over many generations. Losing these homes or adjacent lots to developers for 6 story residential and commercial spaces would be a terrible mistake. In addition, this is a unique neighborhood in terms of its topography and proximity to the creek - it is extremely hilly and lots are irregular. It was designed and built around the creek, a critical part of our city's natural beauty. Construction projects like those proposed of this area could do serious damage to surrounding historic homes in this neighborhood as well as the creek and parkway. Please - those of us who live in this neighborhood have invested so much in it financially by purchasing and restoring these historic homes, as well as raising our families in the city, supporting local schools, parks and businesses. We are valuable contributors to the Minneapolis community. Please do not force us out of our neighborhood because of this plan. I strongly urge you to reconsider this proposed rezoning. Please omit this stretch of Nicollet (48th -54th) from the Corridor 6 rezoning.</p>	5/25/2018
1044	1 /policies/access-to-housing/	<p>I love the idea of more duplexes, fourplexes, and ADUS. As a renter though, I am concerned about these being owned by absentee landlords and large management companies, because this can lead to inflated rent and a lack of responsiveness. It's essential to require or strongly encourage owner-occupancy. My fianc� and I would love to buy in the city at some point, but we can't afford a single family house- a fourplex or duplex unit would be a really nice option; for fourplexes where the units are rented out, it would be nice to see something like down payment assistance to make it feasible for local people to be the owner-landlords.</p>	5/25/2018
1045	1 /policies/access-to-housing/	<p>This is a joke!</p>	5/25/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1046	0.1	/topics/land-use-built-form/	Area between 53rd and 57th streets on Lyndale should not be 6 or more stories. This does not fit with the neighborhood. This will also destroy home values on Aldrich.	5/25/2018
1047	0.1	/topics/land-use-built-form/	This designation should only be used for full block areas, corridor 6. Using this abutting corridor 3 destroys neighborhoods. It will cause people to leave and home values to decrease.	5/25/2018
1048	56	/policies/supporting-small-businesses/	It would be nice to see a plan that is more pro-business and innovation. North Minneapolis has a lot of potential in terms of growth. Why not lower business taxes in the 4th Precinct and revitalize the area with new businesses, job opportunities and money pouring into the community? Small businesses city wide have been inundated with high taxes, high minimum wage and regulations. Your ideas are heavily focused on improving the lives of your residents, while lending no relief to small business. On the one hand you mention how important small businesses are, yet offer no suggestions of enabling innovation or growth through private investment. How are you going to create opportunities? Let people create their own opportunities - using their own capital and ability, and having a bit of relief from regulation and high taxes. It appears your plan favors certain chosen individuals - who receive subsidies and government "help", while the rest of the business owners shell out more and more to barely make it. How is that helping all residents?	5/25/2018
1049	33	/policies/affordable-housing-production/	"Create housing for residents of all income levels across the entire city." It is not the cities job to "create housing." The city is not a builder or a developer. Instead, the city should focus on smarter regulation to decrease costs for landlords and builders so that additional affordable housing is generated organically, rather than through subsidy or city building projects. I personally worked on a city housing project in North Minneapolis, on Emerson Ave, several years ago, and several of those homes are still unoccupied, which is amazing to me. I would like my city government to "stay in its lane" and foster an environment where affordable homes are built, rather than being directly involved.	5/25/2018
1050	1	/policies/access-to-housing/	Do not eliminate single family housing stock in exchange for multi-"family" housing stock.	5/25/2018
1051	16	/policies/environmental-impacts-of-transportation/	I think it's great that more light rail lines are being added to the public transportation network. Some considerations: lines need to become more interwoven or it does not make sense to use this mode for most trips. As it is now, and as it will be with the expansion of blue and green line, if I want to take the light rail to work, there is no convenient route. If I want to take the light rail to work and then to get groceries, and then back home, this is impossible to do. The light rail needs to be a way I can get all over town, even if I have to walk for a few minutes to/from a stop. People don't want to have to walk a long ways, then take a bus, then hop on the light rail, etc. Public transportation needs to become the most convenient option, and we are nowhere near that goal. Additionally, light rail and bus stops, as well as the actual trains and bused themselves need to be places people feel safe. There needs to be a way for patrons to receive quick help if an issue arises. I live in North Minneapolis and am excited about the updates to Penn and the future light rail expansion into north, but I've had so many issues on bused that I am extremely hesitant to utilize public transportation, especially in areas with higher crime, because I can not guarantee my safety	5/25/2018
1052	1	/policies/access-to-housing/	I firmly support allowing up to four dwelling units on all properties. We absolutely need to increase our housing capacity.	5/25/2018
1053	1	/policies/access-to-housing/	Cui bono? Developers! Why are there 96 other policies when this one pretty much sums up the plan? I am against Freyplexing single family neighborhoods. Maybe ADUs, ie granny flats, that are not developer owned would be ok if tested in a small area, but as for the rest of it the single family zoned neighborhoods are dense enough in the SW. Respectfully submitted.	5/25/2018
1054	1	/policies/access-to-housing/	I am for zoning to allow multi-family dwellings throughout the city. I currently live in an area where single-family homes, duplexes, and quad-plexes are all part of the housing mix. That being said, with the increase in density we will need more neighborhood resources, including retail, public services, etc. We will also need an increased commitment to neighborhood safety. In my experience, those who own their homes are invested in the neighborhood in a way renters are not. This makes sense to me, as someone who has been both a renter and a homeowner. We definitely need more affordable housing. I just want to make sure that as we incorporate more of this throughout neighborhoods, the city is matching that growth with a commitment to public safety, preservation of neighborhoods for families, and an appropriate ratio of population density to goods/services available. I love my neighborhood because most people in it care about its well-being. It's worth noting that will be diminished to some degree with an influx of renters	5/25/2018
1055	1	/policies/access-to-housing/	We should all have free housing provided by the city! And we should be able to pick where in the city we want to live! Anything less is racist!	5/25/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1056	1	/policies/access-to-housing/	Single family homes help people build wealth. Hence, they are, by their nature, racist.	5/25/2018
1057	1	/policies/access-to-housing/	If we can just lower the quality of life in SW Mpls, we will have made things more equal.	5/25/2018
1058	1	/policies/access-to-housing/	Name a city that is more dense than Minneapolis and is also more affordable? Boston? NYC? Seattle? SF? Hong Kong? Singapore? Oh, wait...	5/25/2018
1059	1	/policies/access-to-housing/	Name a city that has looser zoning than Minneapolis and is also more beautiful or has a better quality of life. Dallas? Houston? KC? Phoenix? Vegas? Oh, wait...	5/25/2018
1060	20	/policies/transit/	Make bus only lanes permanent, like the Hennepin trial. More trials on more streets too!	5/25/2018
1061	19	/policies/bicycling/	Increasing numbers of bikes on our roads fosters heated dialogue. I agree with this goal and the action steps; that said, I think you should reframe the argument slightly. Most residents do not ride (much, if at all), so they see this issue as us vs. them - the tortured and shamed majority who are not being consulted about changes to their city streets vs. the entitled few on bikes. I saw a statement on a recently-created webpage (minneapolisforeveryone.org) that read, "In practical terms, the City has been making it harder to drive." This is typical me-centric thinking. I think the best way to achieve your goal is to tell people how their children will benefit. Ask them how they want the city streets to look in 2040, when their children and grandchildren live, work and commute in Minneapolis. Present a chart (if one exists) "a visual" that shows how traffic has increased, and if no changes are made, how it will look in 2040. Same with air quality, etc. Reimagined as, "what do you want for your kids, and how do we get there?" will shift thinking from "me, today" to "grandson, tomorrow." This is also an honest approach, as the plan is long-term; Dave Moore	5/25/2018
1062	86	/policies/healthy-food-in-institutions/	Encourage local restaurant to be near the park, so that we can enjoy park and have breakfast or evening dinner next to the park. For example, in Powderhorn we have Out in the Backyard every Monday and Wednesday evening. Many of us, want to have healthy dinner sometime after our class or just like to hang out near the park and have some food...just like Lake Harriet or Calhoun or Minnehaha falls.	5/25/2018
1063	64	/policies/food-businesses/	reduce fees so that local people could sell healthy food at lower rate and also make some money during local events like porchfest or powderhorn art fair or may day. encourage different ethnic food stools	5/25/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1064	65	/policies/urban-agriculture-and-food-production/	provide big freezer or refrigerator to Urban gardens, support organizations like (seed savers, plant-grow- share), organize events to provide free community meal through organization like Out in the Backyard and donate some fresh farm vegetables. Collaborate different organization who produce lots of vegetables to organization who provide free events to the community, so that they could provide more free meals to the community	5/25/2018
1065	0.1	/topics/land-use-built-form/	I am against the upzoning across the city and the push for higher density. I believe the development that has happened so far in Uptown has made the whole area much too congested. Not every neighborhood needs to be dense especially since we don't have the transportation funding to support density. I don't believe Minnesotans will give up cars in winter unless there is light rail and that's years away at best.	5/25/2018
1066	0.1	/topics/land-use-built-form/	There should be a clear Orange Line station area at 46th & 35W. This area has major transit service, and should allow at least Corridor 6 density.	5/25/2018
1067	19	/policies/bicycling/	These are just general statements and do not create a plan. Where are the actual measures of success? That is, what specific things will you measure and what goals will be set for each one? We are paying for a plan not some pedestrian list wonderful thoughts - get to work and give us a real plan!	5/25/2018
1068	80	/policies/development-near-metro-stations/	Please, please, please, please, don't screw up our lakes.	5/25/2018
1069	80	/policies/development-near-metro-stations/	Saws this plan on TV news, Kare 11 it think. Hate it!!!!	5/25/2018
1070	80	/policies/development-near-metro-stations/	I saw Kare 11 news last night. What an eye opener!! Why didn't we see this earlier. Horrible. What are you people thinking! Please don't wreck the best part of the city. Use some common sense.	5/25/2018
1071	80	/policies/development-near-metro-stations/	Regarding the tall concrete jungle at Lake and Excelsior: No. Just No.	5/25/2018
1072	1	/policies/access-to-housing/	Creating additional housing options in our city is critical. I am in the process of buying a single family home. The house inventory is at an all-time low. It's only because we lucked out that my partner and I are able to buy a house in our neighborhood. I want housing options for everyone on my new block. I don't want the neighborhood to keep getting more expensive so that only wealthy people can afford to live there. I want a mix of housing types so I can have a wide range of neighbors with different cultural, racial, and economic backgrounds. This is even more important as my new block is very walkable. We need more people to live in walkable and bikeable areas of the city to reduce our carbon footprint. I have been to some comp plan open houses and I understand that people are scared of this policy in particular. However, many of them are older, white homeowners. These folks already have their assets and their stable housing. These folks aren't experiencing skyrocketing rents. These are not the folks who will suffer the most if we don't build more housing in this city. Please do not think that they speak for all of us. All of my 20- and 30-something friends are 100% behind the housing policies in the plan. I really hope they get adopted.	5/26/2018
1073	19	/policies/bicycling/	As someone who gets around mainly by biking and walking, I could not agree more with these policies. I know there is opposition to investing in active transportation, but it's so important. It helps everyone become more active and more connected with their communities. Driving is dangerous and expensive, many folks can't afford to maintain a car. Biking and walking are the great equalizers, and we need to invest in those modes much more than we are now. Combined with the increased density in our city, I see an encouraging future. A future where we all have safe, affordable housing. A future where we can easily get from our home to our workplace and errands without getting in a car. A future where I don't get almost run over or yelled at for biking or walking. A better future.	5/26/2018
1074	11	/policies/skyways/	We need retail on the ground floor downtown. I have no problem with skyways connecting buildings as long as all new retail is on the ground floor. Our downtown streetscape is dead. It's very depressing.	5/26/2018
1075	20	/policies/transit/	We need better transit! I support all these policies and more to make our transit more reliable, affordable, and accessible.	5/26/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1076	18	/policies/walking/	These policies are a good start, but here's another policy that needs to be seriously considered: "Shorten traffic signal cycles to create a better walking environment citywide." Minneapolis has very long wait times for pedestrians at crosswalks. NACTO recommends signal lengths of 60-90 seconds as preferred to enhance the vibrancy of urban environments. Signal cycles at typical Minneapolis intersections are easily double that recommended time, which makes walking frustrating and makes it take longer than it should.	5/26/2018
1077	38	/policies/affordable-housing-near-transit-and-job-	I live in a beautiful neighborhood and am committed to ensuring that Washburn high school continues to improve. We have just moved our parents in across the street because our community and our block is tightly connected. This plan would allow our block to be completed overrun by multiplex housing units-destroy our neighborhood. I am not opposed to 4-plexes but beyond that I wonder about the importance of community in neighborhoods. I wonder about the character of the neighborhood. Our neighborhood is not like uptown was 20 years ago. It is a block of well maintained homes from the 1920s-these would/could be torn down in support of this plan. I wonder how the parking situation will be managed and who will fund the school systems since this year created an incredible amount of chaos. I wish the city would consider existing housing stock as an asset, not something to be acquired and assembled. I also wonder how affordable the housing can be in our neighborhood if you have to purchase something at \$500K and tear it down. This does not seem to be a part of the solution. Finally, we were going to invest in our property to improve it. If this plan passes, we will no longer do so. We know our neighborhood will be erased, houses will be bought and multiunit plexes put up in their place and our neighborhood school would not be funded to support the influx. I fundamentally believe that the city needs to consider the value of communities within neighborhoods as part of the strength of Minneapolis.	5/26/2018
1078	1	/policies/access-to-housing/	So we are blaming policies from 84 years ago for creating lovely single family neighborhoods in Minneapolis? These plans will distroy the neighborhoods. Stop making this a race issue-it is an issue that impacts all humans. If a human earns an income that affords them a house within their means they may choose to buy in Minneapolis or a suburb. These humans currently have no discrimination against them EXCEPT what their budget is. This is how the free market works. Minneapolis provides plenty of affordable housing and there is more in the suburbs. There are numerous jobs in the suburbs and Due to Minneapolis driving businesses out by legislating policies that make it hard to do business in the city more businesses will move out. Target, Medtronic, Best Buy,Amazon. Stop socially engineering my city. I oppose this plan.	5/26/2018
1079	2	/policies/access-to-employment/	Minimum wage laws, insane regulations and high taxes continue to drive business out of Minneapolis. Your projections seem unlikely. More than likely you will need to convert office space downtown to housing.	5/26/2018
1080	5	/policies/visual-quality-of-new-development/	Please require aesthetic standards on new buildings that coordinate with neighboring buildings. Require adequate building size to space ratios. The multi material boxes of buildings going up all over are ugly. Will quickly be dated and do not coordinate with existing neighborhood buildings.	5/26/2018
1081	6	/policies/pedestrian-oriented-building-and-site-de	Stop discrimination against cars. We need them to get to our jobs in the burbs. To get around in winter. To safely travel with out fear of vagrants, thugs and pan handlers violating us. Add parking to ALL developments for Cars. Reduce bike lanes. Use gas tax funds ONLY on gas powered transportation. Kill the SW light rail plans.	5/26/2018
1082	7	/policies/public-realm/	If you're gonna spend more of our tax \$\$ on public spaces can you please implement some kind of safety measures. Walking the new Nicollet mall after dark is scary because of the unseamly people hanging around, begging and pan handling.	5/26/2018
1083	8	/policies/public-safety-through-environmental-de	Keeping neighborhoods owner occupied provides the safety features of pride and vilagance in ownership. Throwing rentals in between reduces that.	5/26/2018
1084	10	/policies/street-grid/	Tear down Kmart and reopen Nicollet.	5/26/2018
1085	11	/policies/skyways/	Keep the skyways. Put a bike lane in them.	5/26/2018
1086	11	/policies/skyways/	Make skyways homeless shelters after 9 pm to 6am.	5/26/2018
1087	13	/policies/landscaping/	Grow vegetables for food shelves in these spaces.	5/26/2018
1088	14	/policies/tree-canopy-and-urban-forest/	Less side walks and plazas. More trees.	5/26/2018
1089	1	/policies/access-to-housing/	It's essential that new housing option developments include mixed-use spaces - commercial, retail, etc. transit is great but realize that it's freezing for the vast majority of the year and people need fresh grocery corner store options - please look at Montreal for direction. Is this provision part of the plan?	5/26/2018
1090	15	/policies/transportation-and-equity/	Are you incentivizing homeowners Put efforts into improving roads for cars and buses. Stop building trains.	5/26/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1091	19	/policies/bicycling/	Too many bike lanes with no bicycles. 28th St to Hiawatha. And Blaisdell from Lake to 36th for several years, hardly ever see any bicycles, at most one, over several years. A waste of scarce resources. How about doing need studies before setting up these lanes.	5/26/2018
1092	16	/policies/environmental-impacts-of-transportation/	The majority of the people use cars. Aren't you supposed to help the majority? Our cars are idling because the city continues to reduce road capacity for cars. This is DISCRIMINATION against the majority of people who need to get to work or school or else	5/26/2018
1093	17	/policies/complete-streets/	This is insane. It's cold in winter and we can't be out very much. Did you forget about that?	5/26/2018
1094	18	/policies/walking/	Less sidewalks. More streets.	5/26/2018
1095	23	/policies/coordinated-development-strategy/	You've been throwing money at these areas for decades. Is this something new? Continue to help revitalize north. But don't destroy the neighborhoods that don't need revitalization by putting up a bunch of government housing.	5/26/2018
1096	11	/policies/skyways/	The number and variety of independent small businesses in the skyway system is impressive and will never be replicated on the street. A vibrant street life is not possible for some months in the winter. Consider the skyway system an asset to be developed, not an enemy of a dreamed for street life.	5/26/2018
1097	26	/policies/vision-zero/	Don't put bike lanes on streets with parking and high car usage. Build bike ways with bike money. Not gas tax money-that money should be used for roads.	5/26/2018
1098	29	/policies/creative-sector-economy/	This is already happening. You do not need another policy for this.	5/26/2018
1099	30	/policies/arts-and-cultural-assets/	This is already happening. People will do what they are interested in. You can force people to do creative jobs if it's not their passion.	5/26/2018
1100	33	/policies/affordable-housing-production/	Add a few high rises like Cedar Riverside with small affordable units close to down town. Oh wait the property is too expensive. Tell the to find affordable housing in the burbs.	5/26/2018
1101	34	/policies/affordable-housing-preservation/	Bring back dorms and rooming houses. Or micro apartments. Also find opportunities to increase people's wages so they can afford more. Reducing regulation and taxes will put more money in people's pockets and they can afford more.	5/26/2018
1102	35	/policies/innovative-housing-types/	There are already departments of Minneapolis government that should be able to do this along with hud.	5/26/2018
1103	36	/policies/innovative-housing-strategies/	This is the same as point 34 and 35. Redundant.	5/26/2018
1104	20	/policies/transit/	The substantial buildup of apartments and condominiums in and around the downtown area suggests that the transit of choice for those reside in these buildings is none of the above. They prefer to walk.	5/26/2018
1105	38	/policies/affordable-housing-near-transit-and-job/	Affordable housing near the downtown area should be the highest priority for the city.	5/26/2018
1106	39	/policies/fair-housing/	This should already be happening. We have a number of departments that do this. Including hud. How about putting timeline on how long able bodied people can live for free and on government assistance. We have created generations of people who live for free. Move them off welfare and put them to work so they have money to pay fair rent.	5/26/2018
1107	40	/policies/homelessness/	Create group home options for mentally ill and chronically chemically dependent people. Get them off the streets and into institutions to provide help and safety to them.	5/26/2018
1108	41	/policies/tenant-protections/	Implement protection for landlords that have their property destroyed by renters and from renter abuse.	5/26/2018
1109	42	/policies/expand-homeownership/	The habitat for humanity program works well. Continue supporting that. Also condos or town houses which will require less investment.	5/26/2018
1110	45	/policies/leverage-housing-programs-to-benefit-c/	This already exists.	5/26/2018
1111	73	/policies/stormwater-management/	There is no reference to cost or sources of funding.	5/26/2018
1112	61	/policies/environmental-justice/	Environmental injustice? WTF?	5/26/2018
1113	76	/policies/new-parks/	Don't close Hiawatha Golf course.	5/26/2018
1114	92	/policies/identify-and-evaluate-historic-resources/	Do not rename schools and lakes that have historical references. By removing history we will not learn from it.	5/26/2018
1115	80	/policies/development-near-metro-stations/	I think this is a good plan for developing and managing density. I particularly like the Wall ability and bike focuses.	5/26/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1116	1	/policies/access-to-housing/	<p>I am commenting on the inclusion of 4600 Aldrich Avenue in this plan.</p> <p>My husband and I have chosen our retirement home to be a home we recently purchased on the 4600 block of Aldrich. We paid a substantial sum of money for the house because of its location and have put additional money into remodeling three levels.</p> <p>We are moving in next week.</p> <p>We chose this block specifically because we already knew that it was a wonderfully cohesive group of neighbors who take great interest in their homes and each other. Mixed age residents, organic gardens, pollinator gardens, neighbors who keep leaves and grasses out of the street, composters, friends who shovel for others, bi-yearly gatherings; these are just some of the wonderful parts of this neighborhood. It will disappear if this zoning law is allowed to exist.</p> <p>Imagine our disappointment that the city of Minneapolis would actually consider destroying a neighborhood like this! Isn't this a neighborhood the city should be proud of and want to nurture? Imagine our financial dismay at the prospect of being surrounded by multi-story buildings!</p> <p>DO NOT LET THIS LEGISLATION BE PASSED!</p> <p>Thank you,</p> <p>Jude and John Reiling 4632 Aldrich Avenue</p>	5/26/2018
1117	0.1	/topics/land-use-built-form/	<p>This is absolutely devastating. You can be sure I will do everything I can to vote off every city council member possible. I have lived at 46th and Aldrich for almost 30 years. I have finished my upstairs and basement, redone the kitchen, landscaped my yard, added a porch, waterfall and privacy fence. Now, you've slated my house to be replaced by apartments with barely any tree cover. This block is a nice residential block and this plan destroys that. You were happy to jack up my property value earlier this year, now you've made my house unsellable. I am furious.</p>	5/26/2018
1118	1	/policies/access-to-housing/	<p>I am a single family home owner in Waite Park and I fully support this policy. I recognize it means our neighborhoods will look different over time, but change is constant, and it is most important to me that we make policy through an equity lens and address our city's housing crisis.</p>	5/27/2018
1119	36	/policies/innovative-housing-strategies/	<p>Allow ADU's to be built by both owner occupied and non owner occupied landlord/owners. This will lower the cost of ADU's which allows for more affordable rents and is a strategy to put housing in desired areas on an infill basis without tearing down current housing.</p>	5/27/2018
1120	1	/policies/access-to-housing/	<p>Allow non owner occupant landlords to add ADU to 2-4 unit rentals to increase housing in areas that are close to amenities</p>	5/27/2018
1121	35	/policies/innovative-housing-types/	<p>Expand who can build an ADU to include non owner occupied rentals like Portland. They are building over 600 ADU/year now, we permitted about 35/year. Take away the owner/occupy restriction and hundreds of ADU's would be built</p>	5/27/2018
1122	1	/policies/access-to-housing/	<p>As a lifetime Minneapolis resident and current North Minneapolis homeowner (Victory Neighborhood) I strongly support this vision our city. I appreciate its attention to creating equity and sustainability and applaud this forward-thinking plan.</p> <p>Johanna Miller Victory Neighborhood</p>	5/27/2018
1123	18	/policies/walking/	<p>Ensuring safety for pedestrians has to include protection from bikers not giving the right-of-way at street crossings and bikers using the sidewalks instead of the streets.</p>	5/27/2018
1124	18	/policies/walking/	<p>In regard to policy 18 a, serious consideration should be given to eliminating right turns at red lights throughout the city. Drivers paying attention to only cross traffic, very frequently turn directly in front of pedestrians trying to cross the street.</p>	5/27/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1125	0.1	/topics/land-use-built-form/	Given virtually no involvement by the residents has been encouraged or enabled thus far, please postpone plans for this for a 12 month period to allow residents of Minneapolis (those for whom the city works for) to understand and involve themselves in the plans. My husband I and are highly considering leaving Minneapolis (which we love) because of the city, taxes and mismanagement of the authority with which we've entrusted in the leadership. If this goes through, it will make our decision that much easier.	5/27/2018
1126	33	/policies/affordable-housing-production/	<p>Ms Palmisano, Thank you for hosting the May 23 ward 13 meeting at Southwest High School last week. I have a few questions from that meeting which I'm hoping you can clarify:</p> <ol style="list-style-type: none"> 1. At the front of the room where the meeting was held there were several charts, one depicting current streets and neighborhoods that are impacted by this draft plan. I can not find this chart on the 2040 website. This chart more clearly lays out the projected areas affected (ours is one), as opposed to the website in which I can't find these specifics. How can I get a copy of this? 2. In the planning process for this draft the website states that many art and cultural fairs were visited to gain attending peoples' views on Mpls' needs for the future. I don't recall it stating input to this initial draft was drawn from an event in ward 13. This is the first many of us are hearing about this plan which will have a huge impact on this area. Why does it feel like so much leg work was done secretly without the input of residents in areas to be affected? 3. What contractors have already approached or been approached by the city to create multi use homes in ward 13 areas? 4. You state that eminent domain is no longer a policy in Mpls. That is not a reassuringly strong statement. We envision it not mattering that it hasn't been used as a policy; there will be ways the city and contractors will get around this should they want to purchase and rip down our home, when we are the only one on the street refusing to sell(example). 5. Little consideration is given in this plan to historical homes in this neighborhood and the families that have lived in them for years. The plan focuses on racial equity by stating increased affordable housing will be built. I guarantee you that if any multi-use housing is created on our street to replace existing single family homes, those units will not be affordable. (Based on previous projects done by city). Is this being studied? 6. Your colleague and "owner of this draft" quoted many statistics at the May 23rd meeting, with no information on where these stats come from, from which study, by whom, where and when such studies were done. 7. Will the next draft actually have clearly laid out information about how specific streets are to be affected? <p>Thank you in advance for your response.</p>	5/27/2018
1127	0.1	/topics/land-use-built-form/	I'm very happy there is increased density around the lakes. Hopefully this will lead to housing that is more affordable. Living near a great park shouldn't be reserved for the wealthy and white. Hopefully denser uses will also mean less traffic. More people could walk or bike to the lakes instead of driving.	5/27/2018
1128	1	/policies/access-to-housing/	I feel strongly that off street parking MUST be provided for new duplexes, triplexes and four-plexes. Street parking is already at a premium. On my street, Sheridan Ave So, there is only street parking allowed on one side of the street already due to buses and it is filled completely. More density would require off street parking to make the density tolerable.	5/28/2018
1129	80	/policies/development-near-metro-stations/	This is the right thing to do. Add density near transit stations, support modes of transportation other than car, and increase the stock of housing to drive down costs.	5/28/2018
1130	1	/policies/access-to-housing/	Off site parking must be a requirement for multiple dwelling buildings. There is not enough street parking available currently on the transit route I live on.	5/28/2018
1131	30	/policies/arts-and-cultural-assets/	<p>There is one major component missing in Minneapolis that would greatly improve the arts community and the prospect for artists living and working in the Twin Cities. We need an arts newspaper. The reason the 1980's were considered the high point for arts in the city; the reason we had 33 galleries all within 5 blocks of each other; the reason the nation referred to the Twin Cities as the fourth largest art market behind NYC, LA and Chicago, WE HAD ARTPAPER.</p> <p>The internet does not unify a community like a physical publication does. ARTPAPER gave the arts a voice and a sense of place. Put money behind print publishing efforts. They work.</p> <p>Talk to Jennifer Young, Springboard for the Arts, or Neil Cuthbert. They will know how to make this happen.</p>	5/28/2018
1132	20	/policies/transit/	My family very much supports bringing back a large modern streetcar grid to connect the city, in place of buses.	5/29/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1133	76	/policies/new-parks/	The existing greenways/linear parks in Minneapolis provide incredible recreational opportunities as well as particularly safe and pleasant bicycle commuting routes. The newer Midtown Greenway has demonstrated what an incredible amenity and development focus a greenway can provide. I would like to see items (a) and (b) above specifically include greenways/trails as well as parks per se, so that opportunities to create new greenways in parts of the City that do not have them are actively pursued.	5/29/2018
1134	9	/policies/open-spaces-in-new-development/	I do not know what laws or ordinances govern public access to what are apparently privately owned plazas. However, given the disparate treatment of people of color, people with disabilities and people with mental health problems in public, it seems that if Minneapolis is to count on privately owned plazas to function as non-park open spaces, it may be important to include policies regarding non-discriminatory access in agreements with property owners.	5/29/2018
1135	38	/policies/affordable-housing-near-transit-and-job-	There are no details in this plan. I want to know what type of housing will be built along Bryant Ave S	5/29/2018
1136	35	/policies/innovative-housing-types/	If i sell my house, and it is on a double corner lot, what type of housing could be built there?	5/29/2018
1137	0.1	/topics/land-use-built-form/	I believe that ADUs should be able to be built on any city lot. Changes should be made so that they don't have to be owner-occupied to be built. This would be an easy way to add more housing without tearing anything down.	5/29/2018
1138	78	/policies/park-design-and-programming/	As an older adult, one thing I have found limiting in taking winter walks in the park system is that some park buildings don't open til 3 pm. That seems to focus on children, which as you say are decreasing in number, and not retirees, who are increasing in numbers. At a minimum having the bathrooms open (or having portable toilets), and ideally having someplace warm to sit for a break, would help to encourage winter walking.	5/29/2018
1139	49	/policies/educational-and-economic-access/	All 4 action plans are good. b. I think the challenge with b. is to figure out how to communicate with young people, young adults and the under employed about the programs that are available and help them with transportation to get there. c. This is the critical focus point in Minneapolis for sure. Getting enough programs, support staff and resources on site and in the hands of African American, Hispanic, Asian and Somali students is very important. I think recruiting and hiring multicultural teachers and staff is essential; it is still very white overall. The behavioral issues are becoming more visible and beginning to be addressed. I'd suggest teacher workshops on minority communication styles, cultural issues and learning styles would be important. African American students are more verbal and emotive in their faces, bodies and energy. The white culture is much more reserved within the general teenage verbal social context. Find white teachers and teachers of color who can talk about behavior in the classroom, the variety of norms within the main norm. This might be difficult at first, but it is essential.	5/29/2018
1140	50	/policies/access-to-technology/	We need the technology in hand, trainers and mentors in local libraries and community centers. The issue of security and proper care of technology must be taught as well. It seems essential to get the computers and iPad iPhones, etc in the hands of people of all ages in the minority communities.....with some skilled oversight and mentoring. What city departments can get involved in helping residents hook up, troubleshoot and ask for help with technology. Connectivity, trouble-shooting, training videos, and resources nearby.	5/29/2018
1141	14	/policies/tree-canopy-and-urban-forest/	Strengthen the Citizen Pruner program. The MPRB Forestry Dept started a Citizen Pruner program to take some of the burden of easy pruning off the foresters. Such programs have been widely used elsewhere. I was in the initial group of trainees. From my perspective this program has not been achieving its potential. The volunteers are very interested and many are quite knowledgeable, but the program is run by interns who are not there long term and have competing priorities. Not enough work days are scheduled to accommodate volunteers' busy schedules. Last year they started allowing people to do work on their own but have not provided a map of areas that need pruning. This program could be much more successful if it had better staff support.	5/29/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1142	51	/policies/healthy-pre-k-development/	<p>Singing, talking, and reading to toddlers is so important. Could the city sponsor tutoring programs from the public school students into homes or community centers. Additional support to library programs and resources for early childhood and mother groups.</p> <p>More openings in high-quality child care in low-income neighborhoods -- grants from business and corporate giving.</p> <p>I'd love to see Minneapolis rent billboard space right along I35 on those boards that change frequently and have some of the powerful statistics about reading aloud to children and success in school, on the job and in life. What ever happened to colorful, creative Public Service Announcements?</p> <p>Organize Neighborhood reading aloud and talking about books -- with perhaps a Library Truck that comes along like the Ice Cream Truck....gather 4 or 5 kids and read aloud to them.....</p> <p>Access....accesss. Of course, needs money and resources</p>	5/29/2018
1143	14	/policies/tree-canopy-and-urban-forest/	<p>Infill houses in SW Minneapolis are drastically reducing mature trees on city lots. Retaining mature trees is a great action step on paper, but current incentives are decidedly insufficient. Builders plunk a standard design on the lot and if a tree is in the footprint, it gets cut. Trees on boundary lines between properties die when half of their roots are cut out. Given that we're simultaneously losing a lot of mature ash trees, this is making 100 year old neighborhoods look more like new subdivisions in terms of tree cover.</p>	5/29/2018
1144	52	/policies/human-capital-and-a-trained-workforce/	<p>What do you mean by "creative sector workers"? theater, music, art, dance, visual arts, graphic design? Just curious</p> <p>How can we get skilled craftsmen and craftswomen to get the training and apprenticeships that are needed and crying for new employees and skilled apprentices? They are all over Minnesota, and certainly her in the TC. Every contractor we've worked with in the last 3 years says that the shortages of men and women going into the trades is a real problem right now.</p> <p>How do we get the Community Colleges to increase these apprenticeships, mentoring and training in all of the trades?</p> <p>Incentive for private contractors and designers to put video recruiting films together and get copies to all community colleges and private institutions and again...into libraries and community centers. Job Night, Skilled Trades Night, Practical Nurses Jobs night...etc.</p>	5/29/2018
1145	58	/policies/business-districts-and-corridors/	<p>Can we get a North Minneapolis Greenway Corridor like the Midtown Greenway. It would do much to increase housing, business and small business construction and investment, community building and interaction between more communities across cultural, racial and economic divides.</p> <p>Produce a video of the history of, development of and the success of the Midtown Greenway and make it accessible to everyone in Minneapolis. Schools, doctors' offices, malls, parks, at the Airport, everywhere.</p> <p>Encourage farmer's markets in North Minneapolis, Cedar-Riverside, NE Minneapolis and all areas along the new Greenways.</p>	5/29/2018
1146	78	/policies/park-design-and-programming/	<p>Given that there are an increasing number of one person households, and that social isolation is a major cultural phenomenon (see, for example, "Bowling Alone"), I think it would be important to have an action step that encourages programming aimed at reducing social isolation. This could be programming that simply allows people to engage in open-ended socializing/networking. It would be great if this could also facilitate socializing among people from diverse communities.</p>	5/29/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1147	73	/policies/stormwater-management/	To improve the water quality of the chain of lakes, The City needs to discourage pesticides, herbicides, excessive fertilization, and leaf litter raked into streets from private property MUCH more aggressively. I have lived in SW Minneapolis for 26 years. I don't recall ever receiving anything from the City about herbicides, pesticides and fertilizers. We don't choose to use ChemLawn or similar products, and there are literally one or two others on our block who don't but it is clear that a key cultural value among people who live in this area is to have an immaculate monoculture lawn. Ironically that is not true in other parts of the city that don't drain to the lakes. The City needs to work to change the cultural value system, much as it did with recycling, to get people to feel more embarrassed about using these chemicals than they are about having weeds in their lawn. Similarly, although people are not supposed to rake leaves into the street and (I think) are supposed to rake up the leaves that do fall in the street in front of their houses, in practice many tons of leaves get run over in the parking area of streets, pulverized, and introduced into the storm sewer system and thereby into the lakes. I think people who live in this part of the City care enough about lake water quality that they could gradually be persuaded to think differently about which yard maintenance practices are "culturally approved of," but it will take a lot more interaction than anything I've seen so far, and sustained over a long period of time.	5/29/2018
1148	17	/policies/complete-streets/	The priority accorded to bicycle transportation is foolish and short-sighted. As a walking commuter, coming from Southeast Minneapolis across the 3rd Avenue bridge to downtown, I can attest that there are very few bicyclists using the bike lanes in clement weather and none in the snow months. The doctrinaire notion that bike lanes are good and necessary is simply ill-suited to Minneapolis.	5/29/2018
1149	26	/policies/vision-zero/	The data you cite for traffic accidents and injuries in recent years is surprisingly heartening. Enforcing the laws relative to speeding could probably reduce injuries and death, but we are doing pretty well already. With all the other items you want to work on, I'd counsel you not to waste a lot of time on this one.	5/29/2018
1150	28	/policies/msp-airport/	The airport is a good asset, ably managed. It is much better-run than Minneapolis, so keep the local pols out of the airport.	5/29/2018
1151	3	/policies/production-and-processing/	The policy seems to start from the notion that production and processing jobs would be readily available to citizens without academic credentials, if only there were suitable locations for entities that make or distribute something. In fact, the reason those jobs pay more is that they require skills learned in schools or on the job. The persons holding those jobs have put in the effort to gain those skills. I would counsel you to talk to employers in those entities already doing business in the city to see what they think the city can do to help educate or train the workforce. Merely making land available for the construction of a new factory or warehouse will not cause high wage jobs to bloom there.	5/29/2018
1152	59	/policies/downtown/	Downtown's biggest problem is that the entertainment district becomes dangerous as the evening wears on. A more obvious police presence is needed to assure the law-abiding that they will not become victims or observers of urban mayhem. An earlier closing time for the bars wouldn't hurt either. Is the final hour for a bar really profitable?	5/29/2018
1153	1	/policies/access-to-housing/	This is great!!! As the co-owner of a single-family house in CIDNA, I welcome the thoughtful development of fourplexes on quiet streets and larger developments on main thoroughfares such as Lake and excelsior. Part and parcel of that is we'd LOVE to see more commercial development on those strips too. We can only walk to one or two restaurants from our house and would RELISH the opportunity to walk to local shops, restaurants and bars in our neighborhood. I come from the East Coast originally (Boston, Philly, DC) and miss having local commerce that doesn't require PARKING.	5/29/2018
1154	54	/policies/supporting-economic-growth/	As an abashed capitalist and a Wharton MBA, I worry about the economic future of Minneapolis. Many of our areas largest employers face tenuous futures (chief among them Best Buy, Target, General Mills). I was appalled by our noncompetitive response to the Amazon bid. We need to work harder to attract growing businesses to the CITY itself (including TAX ABATEMENTS and a willingness to overcome NIMBY-like neighbors whining about congestion). We need tech incubators, major companies, access to capital etc. I would very much like to avoid us becoming a 'cold Omaha' as Hubert Humphrey said and our continued dependence on failing corporations (including my employer) could lead to just that.	5/29/2018
1155	52	/policies/human-capital-and-a-trained-workforce/	Equity is great but equity in a world without growth is.....Vermont. We can't lose sight of the fundamental economic competitiveness of the region as we pursue equitable outcomes. (SHIT...i sound like a Republican) but we need GROWTH-FOCUSED Policies as well as access to high quality jobs for people of color and others who face economic exclusion.	5/29/2018
1156	55	/policies/business-innovation-and-expansion/	Yes AND....let's do this in a focused manner. We don't need tiny businesses like little shops etc. etc. We need to foster small and mid-sized companies that will become our region's future economic engines. We sit on a few tremendous economic clusters in food/ag and medical devices. Let's foster those-If SF is the center of all things technology, why can't we lead the charge nationally in changing our nation's food supply (profitably)? Get entrepreneurs and companies from outside (AHEM THE COASTS) to set up shop here.	5/29/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1157	57	/policies/cluster-strategy/	<p>YES. and please hire a legit consulting firm for this! McKinsey can help you do this. (I don't work for them btw)</p> <p>As proposed the 2040 Mpls Plan is the very opposite of what should be used to guide the city towards a livable & sustainable future. The simplistic notion that higher density built along virtually any bus route combined with new forced "zoning codes by right" is clearly a marriage of convenience between city planners and developers. This would eliminate the voices of neighborhood associations which have kept MPLS such a livable city. The use of the affordable housing crisis as leverage for driving support for this misguided new policy is specious. The current MPLS City Comprehensive Plan does create a struggle back and forth between all concerned in the process of development but that is what an active citizenry polis is supposed to be about. Better to be a bit messy and have all voices heard in the process than to have a smooth autocratic process rammed down the Cities neighborhoods.</p> <p>Encouraging more concentrated nodes of development (Built Forms) with enhanced walkability and modes of transport other than automobiles could better lead to more affordable housing stock mixed within the midst of such developed built up nodes. On the other hand the 2040 PLAN as written is a non-organic forced grid like development pattern which will likely lead to steep loss in property values of properties lying just adjacent to the newly granted zoning rights to develop four-plexes and higher density buildings "By Right of Ownership". Of course one might even wonder whether granting property developers such rights is by deign intended to have such an effect on single family dwellings.</p> <p>The proposed 2040 PLAN also makes no accommodation for limiting or encouraging more creative and healthier "Built Forms" in areas that are already overbuilt in terms of Building Structures & Traffic. The area around the Northwest Corner of Lake Bde Maka Ska and the intersection of HWY 7 and Excelsior Blvd already has too much traffic volume, dangerous pedestrian crossings and unhealthy air quality. Location of a future LRT Transit station nearby this area will not by itself relieve these problems, and certainly will not have the desired positive effects on traffic mitigation if the area becomes zoned for even taller high rise buildings. Note if you will that this is the very same area that the City of MPLS and the MPLS Park Board have been trying to come up with a total redesign to mitigate these negative factors. The current draft CITY 2040 proposal would end up obliterating any future planned Park improvements.</p> <p>There are many areas in Minneapolis that lend themselves to further density but these require thoughtful guidance and planning that goes through a organic democratic process. large swaths of the city has absentee landowners that do little more than extract rents on decaying properties perhaps in hopes of future profits from sale of same property. Development of modern trolley lines strategically through parts of south Minneapolis for example could stimulate investment in new four-plexes and apartment buildings. More readily accessible mass transit and better neighborhood schools would help attract more families to whole areas of the city currently located near enough to downtown, the Mississippi river, or parks and lakes to be very attractive for mixed use housing, office and retail spaces. But this potential just sits there</p>	5/29/2018
1158	0.1	/topics/land-use-built-form/		5/29/2018
1159	38	/policies/affordable-housing-near-transit-and-job-	<p>You need to be equally responsible to those already in neighborhoods. To ensure good neighborhoods are preserved you should require new housing more than duplex size to be owner occupied. That way you preserve the accountability of neighborhoods and safeguard against builders creating housing that makes them money and the city taxes but at the expense of current neighborhoods</p>	5/30/2018
1160	38	/policies/affordable-housing-near-transit-and-job-	<p>Don't be naive. Just because someone lives near public transportation doesn't mean they won't own a car. Any new housing should be required to provide off street parking - if not used it can be common area for the residents and protects very small mpls lots from becoming all building and no place for water runoff and for snow to be piled. We already have parking congestion, don't make the problem worse while fooling yourself into thinking you're solving it by adding housing near public transportation.</p>	5/30/2018
1161	34	/policies/affordable-housing-preservation/	<p>Affordable housing isn't just about buying the home or paying the rent. The ridiculous spending of Mpls and the favors done to shield businesses from paying their share of property taxes has made it unaffordable to stay in the home you bought. High Property taxes cause unaffordable housing - all of our neighborhood went up \$75-100,000 in value in one year. The methodology needs to be fair. You exclude houses that sell for less, calling them distressed but when they get overhauled and sold for a premium you include them in the comp pool. How about excluding homes that have sold for ridiculously high prices - or at least be consistent and include the 'distressed' properties</p>	5/30/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1162	0.1	/topics/land-use-built-form/	Eliminate Interior 3 Transition Zones on Non-Transit Route Streets The most objections to the zoning proposal relate to the upzoning of adjacent blocks near transit routes. If a reasonably-scaled building (3-4 stories) is built on Bryant Avenue south of 38th Street, there should be no transition needed to the properties behind the new building. Alleys, yards, garages and trees act as a buffer. There are many buildings of this size on Bryant currently, and they work fine with the adjacent homes on Aldrich and Colfax Avenues. Zoning these quiet, non-transit side streets for 3-story, multi-lot developments actually erases the natural buffer that would exist and destroys the stability and character on hundreds of these quiet blocks throughout the city. Eliminate this and much opposition goes away.	5/30/2018
1163	23	/policies/coordinated-development-strategy/	Mpls is not a bubble, existing without influence from suburbs. Ensure builders are either mpls incorporated and/or hire a majority of mpls residents - these policies are a windfall for builders and they take their earnings back out to the suburbs or rural.	5/30/2018
1164	42	/policies/expand-homeownership/	Create owner occupied housing rather than facilitating rich builders creating housing	5/30/2018
1165	1	/policies/access-to-housing/	Don't overbuild like the hospitals did. Require vacancy rates to reach a threshold before more units are created.	5/30/2018
1166	1	/policies/access-to-housing/	I FULLY support this draft. We live in southwest Minneapolis in Ward 13 in a single family home. I applaud the forward thinking in this draft. This bold plan seeks to make housing more equitable across the city. To fully redress past exclusive and racist policies we cannot allow exemptions for certain wards especially those wards where there is bound to be opposition (Ward 13 among them). We welcome housing more people in our great city and putting a fourplex, triplex or duplex next to our single family home would only allow us to connect to more people and build a city that is equitable for ALL.	5/30/2018
1167	0.1	/topics/land-use-built-form/	The 1st and 2nd maps on this page do not line up. Why?	5/30/2018
1168	0.1	/topics/land-use-built-form/	53xx through 57xx Aldrich Ave South needs to be urban housing, not neighborhood mixed use. WHY! We do not want mixed use on these blocks.	5/30/2018
1169	0.1	/topics/land-use-built-form/	No place to comment on individual properties.	5/30/2018
1170	0.1	/topics/land-use-built-form/	Mixed information between maps and a lack of understanding of the corridor areas. I realize you talked to people but obviously not the area businesses and the residents to see what is wanted or needed.	5/30/2018
1171	0.1	/topics/land-use-built-form/	How can you explain areas designated as "urban neighborhood" in land use having "Interior 3" for an allowable building form? These seem to be in direct opposition to each other? This is wide spread on the suggested maps.	5/30/2018
1172	19	/policies/bicycling/	As a homeowner, I'm really excited about having more bike lanes! It's such a great way to run errands and commute. It really makes me feel more a part of my community. Having such a great bike system has made it a lot easier for my family to minimize our use of cars. Fewer cars, less traffic makes my family feel safer out in our yard, and more connected to our neighbors. Keep it up!	5/30/2018
1173	20	/policies/transit/	I'd like to see the City advocate for more secure transit funding at the County and State level. Transit is essential to 15%+ of the city's population and could be a significant tool in the battle against climate change. We need to make sure transit is available in the future!	5/30/2018
1174	14	/policies/tree-canopy-and-urban-forest/	I'm glad the city is taking this into consideration. Having an urban canopy makes the city more welcoming and more liveable. I hope they work in partnership with the "Plant for the Future" campaign by Mississippi Park Connection, which advocates for healthy, climate-conscious tree diversity. Diversifying tree species in anticipation of changing climate and on-coming invasive pests like Emerald Ash Borer is so important - otherwise the city will sink money into tree planting and maintenance and just see trees die.	5/30/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			<p>Current historic preservation policies are a tool that some private property owners are able to use to control the city at the expense of the greater good. Most historic preservation efforts that I am aware of are residential and focus less on historic importance and more on preserving in situ the built landscape of wealthy white property owners of Minneapolis' past.</p> <p>I would like to see the city include public good as a marker of historic designation--if a property or a street is worthy of the city enshrining it legally, it should provide a public benefit and a public use. Ideally, any structure designated "historic" should be open to the public for a minimum number of hours each week. When a structure is declared "historic," it generally denies that parcel the potential to contribute to the public good in the future; therefore, historic designation should be applied sparingly, and keeping in mind whose history is being preserved, in what context, what the impacts will be on increasing racial and economic equity in a given area, and who has access to benefit from what the city has determined is a resource worth protecting.</p> <p>There is a need locally to highlight and educate white Minneapolitans in particular about the long presence of people of color in our communities. As a POC whose family has been in the city for over a century, I/my family are constantly "welcomed" by white Minneapolitans. We have a dismal record of providing active and engaging historic preservation outside of whiteness.</p> <p>Additionally, I see historic preservation used as a crude tool to try to reduce construction waste and encourage material reuse. We need a different way to encourage reuse and reclaiming materials without limiting our urban landscape to unsustainable and unaffordable low-density mansions in a housing and climate crisis. We need to do this in a way that doesn't place the burden on those individuals and associations who are trying to increase housing and retail in our city, but instead figure out how to incentivize reuse/reduce waste city-wide.</p> <p>One related trend I see in the wealthy neighborhoods I have lived on the margins of is that remodels of mansions are frequent, with a lot of waste. I've been at neighborhood association meetings where members who are also real estate agents have talked strategically about avoiding historic designations for their mansions and the properties they flip because it would reduce their ability to gut/remodel/build large additions.</p> <p>In my observation, some exclusionary property owners fight for historic preservation as a means of keeping out renters (who're more likely POC) in areas that are zoned to allow higher density housing, and co-opt these tools and this language for personal goals that are at odds with the city's efforts. Other exclusionary property owners who are in areas where housing has already been reduced (like Lowry Hill) fight these designations because they don't need them to keep lower-income renters out.</p>	5/30/2018
1175	97	/policies/heritage-preservation-legislative-advoca		
1176	15	/policies/transportation-and-equity/	We need to invest in more rapid buses with DEDICATED lanes throughout the city!	5/30/2018
1177	15	/policies/transportation-and-equity/	We need to invest in Midtown Green-way rail project to connect the Blue Line and future SWLRT project to provide better mobility to uptown.	5/30/2018
1178	15	/policies/transportation-and-equity/	Do not prioritize cars and parking over transit, take risks, people will take transit to businesses. Or can park on a side street, our major arterial streets should prioritize transit.	5/30/2018
1179	1	/policies/access-to-housing/	Allow 4-plexes in all neighborhoods, build up our downtown. We need the housing!	5/30/2018
1180	11	/policies/skyways/	Love the idea of street level retail with connections to the sky-way, it provides better access and pedestrian street activity.	5/30/2018
1181	80	/policies/development-near-metro-stations/	We need a big focus on affordable housing near lightrail and rapid bus stations	5/30/2018
1182	51	/policies/healthy-pre-k-development/	This sounds good, but what is the vision for public education beyond preschool? Where do neighborhood schools fit in? I don't see anything beyond birth-age 5.	5/30/2018
1183	59	/policies/downtown/	Make sure we are holding on to retail in downtown, and not letting it flock to downtown.	5/30/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1184	96	/policies/heritage-preservation-recognition/	<p>I'd like to see less of a focus on preserving the private built environment of wealthy white Minneapolitans and more efforts and attention towards sharing and amplifying the history of BIPOC in our city.</p> <p>I'm interested in seeing this play out in public spaces and in broader spaces. For example, in the course of ten years, we are redoing Hennepin Avenue basically from the Falls to Cloud Man Village, yet there is no active engagement of our Native communities to share how they have used and continue to use these places and the route connecting them.</p> <p>As far as I know, there are only a handful of landmarks recognizing the history of BIPOC in Minneapolis. Additionally, when private residences receive historic designation either individually or as part of a corridor, it seems to primarily serve to lift up the choices and structures of the wealthy white people whose faces and names are already common in our city, but without giving context or access to these private residences.</p> <p>I'd like to see historic preservation efforts working in tandem with our city's goals, rather than working against/undermining them. If historic designation is a tool for the public good, we need to make sure these designations support our city, rather than undermine its tax base (by locking in lower density, single use structures) for private "benefit" (reducing housing stock available and decreasing affordability) and without public access.</p> <p>In my view, as a POC, racial equity needs to be a focus of historic preservation. We need to publicly acknowledge and talk about Minneapolis' Native communities and history. We need to educate people on Minneapolis' history as a center of anti-semitism. We need to look at the historical figures we laud and who we erase--why we still have a "West Calhoun Parkway" and a "Patrick Henry" school and streets named after eugenicists.</p> <p>Right now, historic preservation in Minneapolis often seems like a way to replicate and reinforce white privilege and white supremacy without being explicit about it. It seems a response to an increasingly diverse population.</p> <p>The city needs to be actively seeking out BIPOC history to highlight, and limiting the use of historic preservation as a tool of exclusion. And the city needs to be part of the push-back to the assumption of BPOC residents as newcomers and Indigenous residents as historic relics, not focusing just on the "changing" city but on its historical diversity and the lived experiences of BIPOC here for decades and centuries.</p>	5/30/2018
1185	1	/policies/access-to-housing/	<p>Are there examples of other cities who have made these plans work? And what are the problems they have encountered? And what are the plans to deal with the increased density? Cutting back on school funds seems like a short sighted plan if we are increasing population density.</p>	5/30/2018
1186	18	/policies/walking/	<p>provide maps for various city trails</p>	5/30/2018
1187	19	/policies/bicycling/	<p>Support existing organization like Cycle for change, Grease Rags who provide Free workshop for community (specially women and trans) to work on their cycles</p>	5/30/2018
1188	61	/policies/environmental-justice/	<p>Education about environment (hands-on) in primary and high schools</p>	5/30/2018
1189	67	/policies/climate-resilient-communities/	<p>provide incentive so that each household has solar panels</p>	5/30/2018
1190	1	/policies/access-to-housing/	<p>I am opposed to Policy 1, Goal 3 in the Minneapolis 2040 plan because it identifies an entire transit corridor as eligible for multi-family, multi-story structures. This suggests that every block through a neighborhood gets the same approach to potential development and that's not smart planning. Allowing an individual or a developer to purchase one lot or many along and adjacent to transit corridors for 3 and 4-unit structures would be disruptive in sections of those transit corridors with small, story-and-a-half homes. A better option is to concentrate multi-story dwellings around the intersections of major arteriole streets in neighborhoods along a transit corridor. There should be clear requirements for height, setback and overall footprint of any new construction that conforms to the proportions of existing dwellings on the block.</p> <p>In addition, the Minneapolis 2040 plan includes no requirement for additional off-street parking for the density it strives to create. The plan should require a minimum of ONE off-street parking space for each new housing unit created. We do not need to spread Uptown's parking woes citywide.</p>	5/30/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1191	49	/policies/educational-and-economic-access/	I appreciate this work, this is something that my family has discussed. We are concerned about our youth who are not within the Pre-K educational system. The children who are in the 6th to 12th grade have no educational support, or and no resources that allow them to extend their education after school and on weekends.	5/30/2018
1192	80	/policies/development-near-metro-stations/	As a resident of 3200 West Calhoun Pkwy, I am VERY concerned about the congestion that will result from increasing the high rises planned for the areas surrounding the proposed metro stop. Lake Street is a major east- west through fare. Traffic is heavy at all times of the day but especially during rush hour. Pedestrians trying to cross Lake at Market Plaza face fast moving and turning cars. Adding high rise apartments will make things even worse. People living there will have cars and not all will be able to use light rail transit. I urge you to consider the impact on traffic and pedestrian walk ability.	5/31/2018
1193	34	/policies/affordable-housing-preservation/	How about addressing unreasonably high PROPERTY TAXES that burden home owners? Ours have gone from \$1200 per year in 1994 to \$4379 in 2018!!!	5/31/2018
1194	0.1	/topics/land-use-built-form/	There are duplexes in the area of 54th and 43rd Ave S. They are not as well kept as the single family homes. There are a few four plexes also in the area. Again these are certainly not as well kept in terms outside appearances and off street parking areas. I would be very concerned if a single family home was torn down in favor of these types of multiple dwelling units owned by an investor. If they were owner occupied, I would be more willing to accept them.	5/31/2018
1195	49	/policies/educational-and-economic-access/	Work with Minneapolis Public Schools to make sure that the district offerings reflect the needs of the residents and are held in some way accountable for retaining students in the district. Encourage the district to be original in programming to retain and attract families who continue to stay in the city. Work with the district to prevent the continued departure of families to other districts.	5/31/2018
1196	1	/policies/access-to-housing/	I really like this idea of mixing up the housing options in neighborhoods. Diversity is our strength. Make sure our neighborhoods are welcoming to all who want to live there.	5/31/2018
1197	71	/policies/soil-health/	Work with residents to educate and encourage the use of sustainable, non-chemical options to maintain healthy soils, gardens, and minimize run-off.	5/31/2018
1198	75	/policies/waste-reduction/	I like this a lot. I particularly like the L to encourage innovation and use of recycled materials. Make MPLS a recycling mecca, supporting inventive ideas to take care of our own trash. Require all businesses to recycle and provide organic recycling too.	5/31/2018
1199	80	/policies/development-near-metro-stations/	Regarding the tall concrete jungle at Lake and Excelsior: No. Just No.	5/31/2018
1200	80	/policies/development-near-metro-stations/	I look at this picture and just cry. Save our lakes!!	5/31/2018
1201	80	/policies/development-near-metro-stations/	No concrete jungles near our best natural resources! Stop going after bigger tax base at the expense of the citizenry!	5/31/2018
1202	65	/policies/urban-agriculture-and-food-production/	Support urban agriculture and healthy food incentive and innovation zones.	5/31/2018
1203	80	/policies/development-near-metro-stations/	I'm extremely disappointed to see plans for such a high density area near the lakes. This is the last thing this area needs. It cannot absorb any more traffic and the lakes should be an area of peace and nature, not ridiculous high rise buildings. It is already unsafe to walk in this area due to the number of cars speeding through with no regards for pedestrians. This plan needs to be changed for the sake of all Minneapolis residents.	5/31/2018
1204	4	/policies/access-to-commercial-goods-and-services/	There needs to be credits and or incentives for locally owned and small businesses to be installed in new commercial developments. Many times the rent from large property management companies is exorbitantly high as to be cost prohibitive except for large chain businesses.	5/31/2018
1205	80	/policies/development-near-metro-stations/	I don't like the buildings on the photograph near the lakes	5/31/2018
1206	0.1	/topics/land-use-built-form/	I would prefer that Lowry Hill have denser uses given the proximity to downtown. I am heartened by the emphasis in the comp plan of creating walkable areas with good transit. Parking is already limited in the neighborhood, and making it easier for residents to get around without driving will reduce the number parked cars as well as the amount of traffic. Good ideas!	5/31/2018
1207	0.2	/small-area-plans/	Small area plans represent privilege and wealth and were developed by a very small subset of (privileged and wealthy) Minneapolis residents. The city should be clear in stating this. Small area plans, and the people who shout about them being ruined, are not interested in eliminating disparities or ensuring that arbitrary rules do not prevent enough housing from being built in all neighborhoods.	5/31/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1208	0.1	/topics/land-use-built-form/	The city should really considering upping most of interior 2 to interior 3. The vacancy rate is around 2.5% now, and with projected population growth, the "upzoning" in the plan is probably not enough. If the population keeps increasing, which it will, and density is allowed as proposed, rents may not increase faster than they are now, but the also won't stabilize.	5/31/2018
1209	0.1	/topics/land-use-built-form/	There's been a lot of concern about teardowns of smaller homes that are replaced with McMansions, to the extent that some are concerned that we will allow larger structures to accommodate 2-4 unit structures and inadvertently just get much bigger single family homes. As a means of both addressing both concerns, what if in codifying the new zoning, there are stricter height, FAR, etc. restrictions for single family homes with bonuses allowing larger structures as units are added (up to the height and other limits in the proposed built form guidance)? I think we do that with our existing zoning, but it's a feature we should roll forward.	5/31/2018
1210	49	/policies/educational-and-economic-access/	a. How will you do this? What does supporting businesses in providing fair wages and worker protections mean? b. How about increase long term employment opportunities. How about making a municipal fair employment policy. This issue is lack of access to good employment and honest careers for POCI. c. How about supporting MPLS public schools by pushing back against the defunding of these schools? d. It is more important to recruit and retain a diverse population to the various boards and committees inside city government. There are basically no POCI currently on the land use committee--a place where POCI as well as artists and business professionals such as architects should be serving. The city is continuing to socially and economically (racially) red-line POC and Indigenous out of Minneapolis. This comp plan does not address the real issues at all.	5/31/2018
1211	55	/policies/business-innovation-and-expansion/	EVERYONE knows that Minneapolis does not support small business, let alone small businesses of color. This comp plan does not change this. At the pending 1400 Nicollet Ave. development alone, we see the city negating everything this policy and it's action steps state. In one development alone, the city is allowing for the displacement of at least 7 businesses all of which employ a large number of people. Of these seven businesses, 4 are POC, 4 are Immigrant owned, one is a Somali daycare servicing numerous families, and one is a 35 year old Minneapolis theater institution. The economic and or cultural significance/viability of these businesses is great and their connection to the community obvious. The actions of the city in real life completely contradict the words laid out in this developer driven plan.	5/31/2018
1212	35	/policies/innovative-housing-types/	As a homeowner, I think it's great that the city wants to expand options for housing. I'd love to have more rental units in my South Minneapolis neighborhood. I know that I'm incredibly privileged to be able to have bought a home - there just isn't enough affordable housing for working families! Frankly, we need to get rid of our racist housing policy past and move forward. More density means a more livable city for everyone!	5/31/2018
1213	34	/policies/affordable-housing-preservation/	This is a joke. We are aware that you are not protecting NOAH. This comp plan is an advertisement stating that Minneapolis is a developer free-for-all.	5/31/2018
1214	36	/policies/innovative-housing-strategies/	This is great! I own a home in Minneapolis, but that's just not an option for so many working families. I'd love to have more dense housing in my area. Everyone should have the option for safe, affordable housing - and there just isn't enough space for a single family home for every 2 people! I think we should incorporate more dense housing options in our neighborhoods, make the city more walkable, safer and more livable.	5/31/2018
1215	33	/policies/affordable-housing-production/	In Loring Park alone we are only seeing market rate or luxury developments with ONE 60% AMI development. This Is Not Affordable Housing! Nor, does what we are currently seeing display any true commitment to creating affordable housing. This comp plan is nothing more than platitudes and lies.	5/31/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1216	38	/policies/affordable-housing-near-transit-and-job-	At the proposed 1400 Nicollet development alone, we are seeing the city negate what this policy action states. Please, respect your constituents and stop lying to us.	5/31/2018
1217	40	/policies/homelessness/	Studios for \$1100 along a transit corridor is 1) not affordable and 2) contradictory to what you are saying.	5/31/2018
1218	42	/policies/expand-homeownership/	We are in the middle of a homelessness crisis assisted by the affordable housing crisis. What are you really going to do? If POI and Indigenous can hardly find work, and hardly afford rent (which your graphs so colorfully demonstrate) how the hell are POI and I going to be able to afford buying a home?	5/31/2018
1219	43	/policies/housing-displacement/	Honestly! How? Why is this not already happening and, if it is why is it not successful. Also, what we are witnessing in real time, is a city that appears interested in displacement ie: removal of persons that do not fit the "market".	5/31/2018
1220	92	/policies/identify-and-evaluate-historic-resources	There a number of small stone, brick and sometimes wood homes in south Minneapolis between Cedar and Bloomington Avenues south of Lake Street. They are largely identical and were all built in the late 1800s for the mill workers who worked at the flour mills along Hiawatha Avenue. I live in one of them (1705 East 31st Street, Mpls.) and think some consideration should be given to their historic significance. Many of these homes have been largely upgraded over the decades while many others are in very dilapidated condition.	5/31/2018
1221	16	/policies/environmental-impacts-of-transportation	Let's make public transit free! And much more plentiful. I agree with disincentivizing single occupancy vehicles- they make our city dangerous and ugly!	5/31/2018
1222	49	/policies/educational-and-economic-access/	Mentorship starting early in Elementary School in Mpls Public Schools is an important needed program to encourage children of all races to envision themselves in successful careers Submitted by a Vocational Technical Instructor also a Tutor in Minneapolis Public Schools We have great kids	5/31/2018
1223	0.1	/topics/land-use-built-form/	34th Avenue between 46th Street and 42nd Street is both only a few blocks from the 46th Street Station and served by the 46 bus. It should be designated as Corridor 4. The block bounded by 44/45th Streets and 40th/41st Avenues is only a few block from the 46th Street Station and 46th Street, which carries the A line. That level of proximity to high quality transit should be designated for greater density than Interior 3. Perhaps Interior 3 would be more appropriate. Similarly, the northern half of the blocks of 42nd, 43rd, 44th and 45th Avenue between 46th and 45th Streets should also be Interior 3, being less than a block from the A line, 46 and 74.	6/1/2018
1224	50	/policies/access-to-technology/	The city of Minneapolis is going to need to consider developing Municipally controlled broadband internet if we want to be able to ensure equitable access to the internet which provides access to technology, job training, and employment in general. Municipal Broadband is going to be critical in keeping Minneapolis an equitable place for all, and keeping Minneapolis a city at the cutting edge of technological advancements.	6/1/2018
1225	0.1	/topics/land-use-built-form/	You are going to create a Hodge podge of Housing that is poorly planned out. You are way too loose on the rules and giving the city keys to the developer. FIRE HEATHER WORTHINGTON!!!!!! or you're fired FREY	6/1/2018
1226	0.1	/topics/land-use-built-form/	The height of housing in historic districts, like the Longfellow Community in South Minneapolis (especially near Minnehaha Falls Park) should be limited to 1.5 stories. The giant construction going up in our neighborhood is diminishing our character and draining the grid. Thanks. Annie Welch anniemwelch@gmail.com	6/1/2018
1227	43	/policies/housing-displacement/	It's interesting but not surprising the plan does not worry at all about displacing anyone else. How about the families who's homes may be surrounded by 6 story apartment buildings due to transit corridor massing if large scale housing projects?	6/1/2018
1228	81	/policies/social-connectedness/	a. How will you facilitate engagement and input? b. What new avenues do you have in mind? c. Mentoring will require a staff person to facilitate/coordinate.	6/1/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1229	88	/policies/public-services-policy/	Mpls. has traditionally provided responsive public services. Hooray!	6/1/2018
1230	76	/policies/new-parks/	Theodore Wirth never advocated this.	6/1/2018
1231	78	/policies/park-design-and-programming/	There is no mention of the Park Board in this policy, therefore it is pointless. This is not the City Council's domain and I hope it never is. Manage well what you are supposed to manage, which does NOT include parks. If parks had been left up to the City Council and Mayor, Minneapolis would have no parks. Back off.	6/1/2018
1232	1	/policies/access-to-housing/	We are already a densely-packed area of multi-unit dwellings in the Calhoun Isles area (towards Bde Make Ska Parkway and Calhoun Boulevard). Over the 30+ years that I've lived here, I've seen upward growth in condo and apartment-style buildings. The shared or common roads, streets, pathways and parking areas have noticeably retreated to the uncontrolled onslaught of humanity. Human beings are essential to the makeup of a city. But there is already an increase in density here. This has brought about an unsustainable, environmentally unsafe, resource-challenging situation. Please consider this when allowing plans for more multi-unit dwellings to receive permits to build in this area.	6/1/2018
1233	34	/policies/affordable-housing-preservation/	Define: legally binding affordable housing. This is used often but it's not clear what the definition is and defined by whom? City planners? Mayor's office? A particular statue...?	6/2/2018
1234	34	/policies/affordable-housing-preservation/	Of the 15,000 housing units (apartments? houses?) how many were lost from being razed to build a \$500,000+ home in it's place? How many were lost as the result of some many monster homes raising the value of those surrounding homes? Seems that this is a crisis allowed by the city in an effort to create and increase tax values. Now you are looking to the home owners whose taxes are higher to again bear the burden of these actions.	6/2/2018
1235	34	/policies/affordable-housing-preservation/	Your comments on wages having "slightly decreased" since 2000, bears more explanation. I imagine just about anywhere you check, you'll find similar. And if you parse this out over years it will show that this stems from the 2008, 2009 crash. Recovery in many fields are only now -- tens years after -- appreciating a recovery. Further, that there is a wage 'decrease' simply cannot be assigned to Minneapolis. On my block alone, there are 5 people who work in Minneapolis -- everyone else works in other cities. This decrease is not a MPLS problem but a Minnesota problem. Residents cannot be held accountable for their neighbors' salaries. Additionally, your choice of verbiage when presenting a breakdown by percentage by race, using numeric (visually strong) for people of color but spelling out "one in three" for Caucasians is a shameful manipulation.	6/2/2018
1236	1	/policies/access-to-housing/	"The people of Minneapolis...are becoming older... aging single-family home dwellers do not have the option to move ... This further restricts access to single-family homes for households with growing families who desire that housing type ..." This concept that I must/should move out of my home that I have lived in for nearly 2 decades -- that I have loved, that I have enhanced, that I have paid taxes on, that has allowed me to be a neighbor in this city that I love, is insulting. This tells me that it is my fault that there are 'no homes'. If you insist on 'encouraging' the elders out you won't have anyone around to teach of to be a neighbor, a home owner, a citizen. Shame on you all.	6/2/2018
1237	19	/policies/bicycling/	I applaud the cities efforts so far. Going forward I recommend a focus on a smaller amount of more protected bike ways vs lots of unprotected bike lanes with simple sharrows. This will promote use by less experienced riders and families. Think Copenhagen!	6/2/2018
1238	35	/policies/innovative-housing-types/	An emerging trend we keep hearing about is ADU's in Portland where they have hundreds of them being built where the city co-op's costs and both home owners and landlords can build them.	6/2/2018
1239	0.1	/topics/land-use-built-form/	Before the city spends one penny of my tax money on new "affordable" housing (at \$1,700 a month?! - what a joke.), it should spend whatever it takes to bring all of the housing run by slum landlords (i.e. Mahmood Khan and his ilk - why are they so untouchable?@!)into compliance with city codes and/or sue the pants off those slum landlords, confiscate their properties, and fix them up so that they are safe, secure, and livable to those families already living there. Stop forcing low income tenants to move from one awful place to another. It's disruptive to their lives and too expensive for them to bear. In this, the greatest nation on earth (ha!), why can't we make housing safe and secure for everyone without making it a money-maker for the already rich? http://www.startribune.com/minneapolis-mayor-meets-with-angry-tenants-facing-eviction/484364061/ I'm angry as hell and I'm not even a tenant. City Council, enforce housing codes and repair housing for those families who work so hard to stay in our city.	6/2/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1240	3	/policies/production-and-processing/	Production and Processing zoning can not be isolated single use zoned areas. Many of the currently areas are VERY auto dependent since many uses are not allowed. I'd like to explore Com. Rockwell's and Com Lupke Pier's ideas about allowing other uses along corridors through these areas or by req. a min FAR for P and P uses and allowing other uses in addition. P and P area also need a stronger connect to transit, today half of these areas are not near existing transit -Kronzer	6/2/2018
1241	80	/policies/development-near-metro-stations/	The city has failed to rezone the Blue and Green Line extension areas and we have been forced to approve storage facilities that don't support the transit investment because the land is zoned Industrial. This must stop. Land around all future and current METRO LRT stations needs to be guided for 10 + stories. The current Build Form Map does NOT represent this, esp. west of Hiawatha Ave at the current Blue Line stations. We must take advantage of the large public investment in LRT, - Kronzer	6/2/2018
1242	80	/policies/development-near-metro-stations/	<p>We live in this area right by Cedar Lake. I do not support this plan AT ALL. It does nothing to respect the current residents who live here specifically because it IS a walkable, drivable (yes, we do own cars because we cannot walk or bike everywhere in Minneapolis towing our kids with us to soccer practices scattered all over the city). We like the look and feel of this part of the city the way it is. I feel like this plan is completely serving the developers who want to build these monstrously tall buildings, it does nothing to alleviate the already horrendous traffic congestion (there is ONLY ONE road along the north side of Lake Calhoun/BdeMakaSKa) and provides housing that is NOT affordable for the vast majority of people.</p> <p>The rest of Uptown, i.e. the Hennepin/Lake area, has changed dramatically, and not in a good way. We never go to Uptown anymore because it is full of living and eating establishments that cater only to single people or young couples without kids. We feel excluded by that development that has occurred and have thanked our stars that it hasn't encroached to where we live. I will do everything I can to block this.</p>	6/2/2018
1243	80	/policies/development-near-metro-stations/	<p>We live in this area right by Cedar Lake. I do not support this plan AT ALL. 1244	0.1	/topics/land-use-built-form/	I live in south Minneapolis right now, and my friend lives on 52nd and Penn, not far from my house. At this point, the area around my friends house is a very peaceful neighborhood with interior 1 low density housing mainly. His house is also very close to the famous newton ave sledding hill. On snow days, this hill/park is filled with people coming from as many as 10 blocks away! If the proposed built form guidelines as they are now were put into place, eventually this area would have dense apartment buildings, and many people. The newton hill park would be crazy! This would not be fun for anybody, as the crowds already make you wait to sled down the hill, with so many kids at the bottom, in fear of colliding with someone. Along this area of the Penn ave transit route, it would be much more ideal to have interior 2 or 3 buildings along Penn ave (interior 2 being far preferred), instead of the corridor 4 that is being proposed now. Corridor 4 would make this area far too populated. Thank you for considering my (and others) opinion.	6/3/2018
1245	1	/policies/access-to-housing/	I believe the city mandating off-street parking is still crazy and we should stop that and let the private citizen decide that. However, we should be more accepting of transit routes that are not "high-frequency" by current standards. A big portion of riders, especially riders who have been riding since before LRT, use regular ass busses and they don't see any of the benefits that come from TOD as we define it today. We should expand our definition to allow more bus routes to qualify as sufficient to justify reducing off-street parking requirements AND OTHER COOL BENEFITS. We all want busses with benefits.	6/3/2018
1246	11	/policies/skyways/	I think we could be much more strict with building owners who want a skyway. If these are for people then they should be just as easy to navigate, access and hang out in as streets. Require them to prioritize ground floor and for christ's sake, eliminate off-street parking requirements!	6/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1247	14	/policies/tree-canopy-and-urban-forest/	<p>1. We need to plant extensively on our heaviest car use corridors. Do you want to slow down cars on Lake street? Fill that bitch with trees. I notice this all the time. Our side streets are cute and full of trees but then you get to a 4-lane road and all the trees disappear. 31st ave is my favorite examples.</p> <p>2. Trees are great, but they are far from the most effective things at managing stormwater runoff, reducing the heat island effect or providing habitat for creatures. They are just a really easy thing to "measure" because they are simple to count. Why not eliminate the "lawn restrictions" we have that pretty much mandate grass or full landscaping. Lets require each new property to handle its stormwater on site! Even those pesky single family homes.</p>	6/3/2018
1248	35	/policies/innovative-housing-types/	<p>This sounds like the "To-do" list you made that you never got around to doing. So when it came time to hand in your paper, you just submitted your plans to write the paper. Give me a break!</p> <p>Do some fucking research, promote innovative housing type right now! Put in a provision that allows for exceptions to every rule we have ever made so people with "innovative" ideas can stand in front of your podium and beg for forgiveness.</p>	6/3/2018
1249	80	/policies/development-near-metro-stations/	<p>I believe we should start to require "liner apartments" for every new development that wants setback variances. People build really large buildings and then they orient all the apartments to exit into a central hallway and funnel them into their cars or out one door in the building (or whatever is required by fire code). This results in diminished public realm because people rarely get to leave out their front door, they don't have the ability to use patio space in front of their apartment and their windows literally create the barrier between public and private.. who the fuck wants that? I'd close my blinds too. Lets move beyond liner apartments for parking structures and put them on every massive new development!</p>	6/3/2018
1250	1	/policies/access-to-housing/	<p>As a future resident of Minneapolis, I am delighted to see an option to build fourplexes throughout the city. I am concerned about the rising cost of rent in our country and within the city of Minneapolis, and I believe the land use map as it currently stands will start a long process of making affordable housing easier to build in Minneapolis.</p>	6/3/2018
1251	0.1	/topics/land-use-built-form/	<p>This area on James Avenue between Lake of The Isles Parkway and "Mall" is currently zoned R1. It should not be changed to Urban 3. It is one of the few remaining neighborhoods that represent "old uptown," or the way most of uptown looked prior to 2000. Many of the homes were built at the turn of the century and are currently still well maintained. This short street is also an important part of the park system. Pedestrians love to walk down it and see old uptown's classic homes. Please do not change this character. Also, consider making it a historic district or just vacate the street entirely and give it to the park board.</p>	6/3/2018
1252	19	/policies/bicycling/	<p>in my neighborhood there were no measurements taken before putting in bike lanes . any measures after do not tell you about change, just a point in time. the numbers and discussion on this topic are cooked up - fake news. most under utilized infrastructure in town. did number of cars in Minneapolis decrease because of bike lanes? rhetorical. guess were not a numbers based government after all.</p>	6/3/2018
1253	15	/policies/transportation-and-equity/	<p>please have a non partisan traffic engineer review these plan and advise. make the recommendations public. We also need to have a clear timeline for evaluating success and failure and how to change course if things are having unintended effects. (less equity/less fair/less affordable)</p>	6/3/2018
1254	17	/policies/complete-streets/	<p>please have a non partisan traffic engineer review these plan and advise. make the recommendations public. We also need to have a clear timeline for evaluating success and failure and how to change course if things are having unintended effects. As in we cannot get around of the city- we have made things worse.</p>	6/3/2018
1255	19	/policies/bicycling/	<p>I do not think the current biking approach is equitable or good. I would like to see us prioritize protected lanes (as in raised to sidewalk height) and going to and from every K-12 school and park. This allows for the framework to really change culture and lifelong transit habits.</p>	6/3/2018
1256	18	/policies/walking/	<p>I think we need to prioritize making walking beautiful. Landscape architects can help with that. this policy feels like that will be pushed off to make private enterprise do that and we as a city should be leading that charge. also we need to support and encourage small business so we have places to walk to</p>	6/3/2018
1257	20	/policies/transit/	<p>what does focus on outcomes mean? please clearly define both he focus and the outcomes and what will be done, in response, with information</p>	6/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1258	48	/policies/data-driven-decisions/	How about you use the DATA that this document sights several times that the majority of residents are using cars for transport. Let that sink in. If that's the DATA why are you not looking for ways to better accommodate cars? By 2040 driver less vehicles and lower polluting cars will be the norm. But all resolutions are to increase biking and trains. We need streets for Cars and Buses. You Can't socially engineer transport. Use data and recognize that automobile transport is the Norm and Majority. Now channel efforts and monies to the norm and majority.	6/3/2018
1259	6	/policies/pedestrian-oriented-building-and-site-de	While this plan sounds fantastic for a more temperate climate we Minnesotans deal with ice, snow and below zero temperatures which makes biking and walking unappealing for most of the winter. Our public transportation is also limited and for those of us who work nights not very safe. Additionally for those of us in our 60's, the idea of walking, biking or taking public transportation to the grocery store or doctors office, etc is incredibly unappealing. This plan is not taking our extreme winter climate or aging population into consideration. It will be equally challenging for parents with young children.	6/3/2018
1260	33	/policies/affordable-housing-production/	The need is going up because of decreasing wages? We are in the process of increasing minimum wages. The wages go up! The need is going up because our government leadership has embraced and enabled the out of control growth of people living entirely on government aid. Because of this taxes continue to go up to fund all the aid. We have reached the tipping point where the demand has out paced the tax funds. The solution is to Decrease government aid to able bodied recipients. Make people work for their food and housing and medical needs. The measurement of success of an aid program is how many people get off of it! Make the affordable housing affordable by being small and utilitarian. Not a place people want to stay for ever. This gives them incentive to move out to better housing. This is the reality in the real world that needs to be taught. I started in a shared apartment in a less than ideal suburban neighborhood, worked until I could move to a better apartment in a better community and finally buy a starter home. Then a better home in a better neighborhood. We can't give the luxury of great homes in great neighborhoods away. It must be earned.	6/3/2018
1261	10	/policies/street-grid/	Why in a climate that regularly gets to below zero and can get major snows and ice would we think it's a good idea to promote so much biking and walking? Are you considering people's safety, or only envisioning a city filled with athletic 20 and 30 year olds?	6/3/2018
1262	4	/policies/access-to-commercial-goods-and-service	Mixed commercial is a great idea however don't underestimate the need for a car in extreme cold with snow and ice. Plans to simply not allow access for cars, parking and repair shops is shortsighted.	6/3/2018
1263	0.1	/topics/land-use-built-form/	I live at Emerson Ave South and 59th and am totally opposed to building large buildings with more than 3 stories especially if they are not required to have off street parking for each unit built. Creating high density shopping and housing along Lyndale will create the type of congestion and crime that uptown is now experiencing rather than the quiet, homey residential neighborhood that we purchased our homes to enjoy. Small three story building with shops and parking would be fine, large, tall buildings would ruin the neighborhood.	6/3/2018
1264	1	/policies/access-to-housing/	A thousand times yes! I want to be able to live on a quiet block in Fulton and walk to 50th and France without having to own a single-family home.	6/4/2018
1265	33	/policies/affordable-housing-production/	I think an effective way for the city to provide more affordable housing is to loosen the restrictions on and incentive the development of accessory dwelling units. Removing the requirement for a property with and ADU to be owner-occupied is vital. This requirement severely limits the potential buyers pool for a property and is the reason I will not build an ADU. I want to build and owner-occupy an ADU on my property at 211 17th Ave NE. I also never plan on selling my property and would like to continue to live there for the foreseeable future. The future is unknown though and circumstances change. Other incentives the city could provide for ADUs include lower permitting fees and pre-approved building designs and contractors. ADUs are a great tool to help relieve the affordable housing issue while maintaining neighborhood character. It would greatly benefit the city if the requirements(owner occupancy) were relieved and the development was incentivized.	6/4/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1266	1	/policies/access-to-housing/	<p>I think an effective way for the city to provide more affordable housing is to loosen the restrictions on and incentive the development of accessory dwelling units. Removing the requirement for a property with an ADU to be owner-occupied is vital. This requirement severely limits the potential buyers pool for a property and is the reason I will not build an ADU. I want to build and owner-occupy an ADU on my property at 211 17th Ave NE. I also never plan on selling my property and would like to continue to live there for the foreseeable future. The future is unknown though and circumstances change. Other incentives the city could provide for ADUs include lower permitting fees and pre-approved building designs and contractors. It would greatly benefit the city if the requirements(owner occupancy) were relieved and the development was incentivized.</p>	6/4/2018
1267	0.1	/topics/land-use-built-form/	<p>It is not clear to me how affordable housing will be accomplished. New construction is generally more expensive. Most increased density in other cities has not resulted in lower rents - show data that supports this plan.</p>	6/4/2018
1268	63	/policies/food-access/	<p>The Minneapolis Healthy Living Community Leadership Team (an advisory group of community-based organizations working together with Minneapolis Health Department staff to reduce obesity and tobacco use) strongly supports the inclusion of policy language that increases access to healthy foods for all Minneapolis residents, especially those in low-income areas and communities of color. Access to healthy foods not only impacts individual nutrition and health outcomes, but also intersects with climate change, transportation, and many other areas included in the comprehensive plan. Where there is a role for the City, the CLT would like to see Comp Plan language that supports nutrition education and skill-building opportunities (such as a policy statement encouraging Minneapolis Public Schools to offer basic nutrition education and food skills starting from an early age). In addition, the City should look for ways to incentivize healthy food purchases such as through financial incentives for customers who purchase fruits and vegetables at corner stores (similar to the successful model of Market Bucks incentives at farmers markets). Finally, the CLT would like the Food Access policy (and other related policies) to require or strongly encourage connections to local growers in order to strengthen the local food economy and improve healthy food access.</p>	6/4/2018
1269	0.1	/topics/land-use-built-form/	<p>West Side of Nicollet Ave. between Valleyview Place and Minnehaha Parkway: Allowing higher density housing in this area would strain existing roads. Minnehaha Parkway is single lane with no direct access to main routes such as Nicollet Ave. Present day traffic must wind through the neighborhood in order to enter or exit. This would make a usable situation today into a traffic congested mess. Bigger questions: Do we really want the character of our neighborhood ruined by a high density land use plan? Who really benefits from such a situation? Land developers or residents?</p>	6/4/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1270	0.1	/topics/land-use-built-form/	<p>On the built-form map my 4600 block of Aldrich Av S is proposed to get rezoned to Interior 3 and Corridor 4. Currently my block of 4600 Aldrich Av S is composed of all single family homes. We do not approve of or agree with this block being rezoned to Interior 3 and Corridor 4. We would prefer to keep this block Interior 1 and or Interior 2.</p> <p>In the drawings for Interior 3 and Corridor 4, all of the buildings are built right up to the edge of the lot line. We request and require more green space mandated in Interior 2 - Corridor 4.</p> <p>There needs to be language in the plan that protects home owners from eminent domain, i.e. my single family home being taken from me by eminent domain for re-development purposes.</p> <p>For overall comments on the 2040 Plan, we would prefer to see major changes to currently single family home blocks delayed or phased in over time. Start re-development in areas of the city with abandoned or run down housing first and make those areas successful. In addition, concentrate the high density apartment buildings in areas that already have that kind of development potential. For example, do a more complete job of re-developing Nicollet Av S from Eat Street get rid of k_mart eye sore, re-open Nicollet and fully develop the potential along the Greenway, and along Nicollett, Blaisdell, Lyndale, Lake St. etc. before radically altering single family home blocks which are already in good shape and fully occupied by taxpaying owners.</p> <p>In addition, there are parts of the city in which land use is already terrible and wasted. Box box stores and businesses, single story suburban type development that should be changed to business on the ground floor and housing above. 56th and Lyndale is one example, the space could be better built and used. Walgreens operates a 1 story building that looks like it should be in Ham Lake.</p> <p>Lastly, I am highly concerned with loss of green space and lack of environmental standards in the new building and zoning proposal. Not enough green space, not enough mitigation for rainwater runoff. the plan should ensure green building including green rooftops, spaces for pollinators and wildlife and setbacks for green boulevards as well as some requirements for solar and renewable energy.</p>	6/4/2018
1271	19	/policies/bicycling/	<p>Brian Crotteau 4605 Aldrich Av S. Minneapolis MN 55419 612-703-2375</p> <p>Biking lanes do not belong on city streets! If bikers want their own lanes their should be bike taxes to pay for the lanes</p>	6/5/2018
1272	1	/policies/access-to-housing/	<p>I fail to see how building fourplexes randomly all over will correct historical problems like redlining and segregation. I've heard it proposed by some as a way to accommodate low-income residents and correct for historical injustices due to housing discrimination and red-lining. These are primarily going to be absentee owned and operated apartments renting-- not selling-- to low income clients on sites already located in low income areas on the North Side. These areas already have more than their share of this kind of activity. The city, county, state, and federal government can promote property ownership and real wealth accumulation in other ways. If anything, I fear that this kind of investment property activity will only exacerbate income inequality between large corporate (often national) landlord holding companies and tenants.</p>	6/5/2018
1273	0.1	/topics/land-use-built-form/	<p>Hi. The Proposed Built Form Corridor 4 running up Grand Street NE from Lowry is a bit of a dead end. This is a quiet neighborhood that happens to have a bus route on it (and maybe the bus route should be on Marshall Street NE anyway). It should not be a corridor similar to the illustration you have shown for Corridor 4. 4 stories is two stories higher than anything there now. Leave this type of building height for Lowry and Marshall Street, not in a small neighborhood with 40-foot lot widths. Please plan higher density projects in areas that are not already quite two story neighborhoods, just because there happens to be a bus route on it. thanks!</p>	6/5/2018
1274	26	/policies/vision-zero/	<p>Any Vision Zero Task Force should INCLUDE members from Minneapolis communities, especially those communities most impacted by traffic fatalities and those communities in which our lack of investment in infrastructure leads to dangerous intersections and accidents. Or there should be a community advisory board with CONCRETE power on Vision Zero action plans.</p> <p>Also - ENFORCEMENT should not be a part of any Vision Zero plan. Police enforcement has a demonstrated history of unfairly policing Black and indigenous residents. We need to acknowledge that even with best intentions, white supremacy is institutionalized within the Minneapolis police force with the deadly results that it inequitably serves some people more than others.</p>	6/5/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1275	0.1	/topics/land-use-built-form/	Connectivity! Create functional ecological networks that conserve biodiversity and provide for sustainable use of natural resources. Enhance ecological habitat connectivity by creating a network of wildlife corridors, connected natural areas, resilient to environmental challenges. Wildlife need to move. They need to access resources, ensure gene flow, shift their ranges, and establish new territories, among other things. Connected landscapes allow for the movement of plants and wildlife and facilitate ecological processes. As climate change and other stressors act on the landscape, connectivity is critical to allowing wildlife to adapt to changing conditions.	6/5/2018
1276	52	/policies/human-capital-and-a-trained-workforce/	Should add Design workforce development programs and create partnerships that work to eliminate GENDER based disparities. Support trans youth and educate city, state employees and all employers about how to deal with trans people.	6/5/2018
1277	67	/policies/climate-resilient-communities/	Connectivity! Create functional ecological networks that conserve biodiversity and provide for sustainable use of natural resources. Enhance ecological habitat connectivity by creating a network of wildlife corridors, connected natural areas, resilient to environmental challenges. Wildlife need to move. They need to access resources, ensure gene flow, shift their ranges, and establish new territories, among other things. Connected landscapes allow for the movement of plants and wildlife and facilitate ecological processes. As climate change and other stressors act on the landscape, connectivity is critical to allowing wildlife to adapt to changing conditions.	6/5/2018
1278	14	/policies/tree-canopy-and-urban-forest/	Connectivity! Create functional ecological networks that conserve biodiversity and provide for sustainable use of natural resources. Enhance ecological habitat connectivity by creating a network of wildlife corridors, connected natural areas, resilient to environmental challenges. Wildlife need to move. They need to access resources, ensure gene flow, shift their ranges, and establish new territories, among other things. Connected landscapes allow for the movement of plants and wildlife and facilitate ecological processes. As climate change and other stressors act on the landscape, connectivity is critical to allowing wildlife to adapt to changing conditions.	6/5/2018
1279	68	/policies/energy-efficient-buildings/	Please include policy and financing to make sure that apartment buildings and other multi-family housing units have equitable access to energy efficiency improvements.	6/5/2018
1280	73	/policies/stormwater-management/	Include comprehensive hands on education that results in knowledge and awareness of the impacts of litter, lawn chemicals, and road runoff on our lakes and rivers. Use amounts of trash in water bodies as a part of lake health and include it in the TDML profile of pollutants. This will entail going to higher levels of government, I assume, but should be done.	6/5/2018
1281	1	/policies/access-to-housing/	This is awesome! This kind of plan makes me proud to call Minneapolis home. It's time to move past our history of racist housing policies and make the city more livable for everyone. As a homeowner who lives near the light rail, I'd welcome more multi-unit housing in my neighborhood.	6/5/2018
1282	0.2	/small-area-plans/	The purpose of a small area plan is to supplement the overall comp plan with a finer level of detail on a particular part of the City. The above statements say that the urban design policies of the City's small area plans have been incorporated into updated comp plan, AND, that the Comp Plan will be used for this guidance. It does not however, confirm the role of small area plans, which is to provide greater detail. This section needs to explicitly say that small area plans will continue to be used by City staff and developers for any development process. John VH	6/5/2018
1283	88	/policies/public-services-policy/	In regards to the goal of increasing our city's population, the action step of streamlining development review should not involve shutting neighborhoods out of the review process. When planning for close proximities and high densities, the need for coordination and cooperation increases significantly. I can accept greater heights and densities, but only if I as resident can have a place in the planning and review process. I've seen it time and again - community input makes for better development projects. John VH	6/5/2018
1284	23	/policies/coordinated-development-strategy/	We need a LGBTQ center and we need a center for trans people.	6/5/2018
1285	1	/policies/access-to-housing/	It is so important that we allow more density in all neighborhoods in Minneapolis, from smaller "missing middle" projects on up. This is perhaps the most important issue of all these, because many of the other topics here depend on first having good places to live for more people. Things like infrastructure maintenance, public transportation, supporting small businesses, it all will be easier to accomplish with a higher population density to provide a larger tax base, and large local customer base, so we can all have nice things. We can also start to de-gentrify places like my neighborhood of Longfellow by adding more housing options for all income levels. Lessening restrictions for what kind of residential structures can be built where will also help there be more naturally occurring affordable housing someday, even if that construction is expensive at first. Local businesses that thrive off of foot traffic would benefit so much from added local density, and having a variety of small local businesses in turn are what help make neighborhoods walkable, and also give cities a great unique character. So my answer here is a huge, resounding YES PLEASE let's allow more kinds multi family of housing everywhere in Minneapolis, as soon as possible!!!	6/6/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1286	1	/policies/access-to-housing/	I 100% support this policy. As a resident and homeowner in southwest Mpls, we need to harness the energy and desirability of our fine city by allowing and approving as many housing units as possible. The demand will not last forever, so let's take advantage of growth and all it has to offer (opportunities for more people to patronize local business, start businesses, enjoy parks, trails, and other infrastructure, invest their time and money in the community, and create and enhance a sense of community.	6/6/2018
1287	35	/policies/innovative-housing-types/	I support this policy. We need innovative models for seniors!	6/6/2018
1288	37	/policies/mixed-income-housing/	Please do not do anything that further restricts supply of any type of housing. Market rate or affordable. Take care in adopting policies that add regulation without also incentives.	6/6/2018
1289	80	/policies/development-near-metro-stations/	I agree with all the points in this policy. Our built environment should support transit and transit users as much as possible, to make life as a transit user as easy and attractive as possible. Having a minimum height for buildings near main transit stops to maximise the amount of people who can benefit from car-free transportation, and also having businesses at the sidewalk level nearby so people going to and from transit stops can take care of daily needs on the way home. I also really agree with no more park and rides. We need homes for people, and shops and other things to do to service those people living there, not storage for a few people's cars! And having small blocks is really great for walkability, and should be a thing in more places than just near transit stops.	6/6/2018
1290	23	/policies/coordinated-development-strategy/	I dont understand what the term "coordinated district wide development plans" exactly means. Could you dumb down the language?	6/6/2018
1291	76	/policies/new-parks/	I'm unsure we need new parks. Can we enhance the parks we have. Especially in underserved areas rather than looking at new parks.	6/6/2018
1292	2	/policies/access-to-employment/	I definitely agree with having minimum development densitites downtown, where land needs to be utilized as efficiently as possible. As far as outside downtown, I would love to see more opportunities for small businesses and offices to find a place in our neighborhoods. We have lots of lovely nodes in our city, that used to be streetcar stations, and now the few remaining brick commercial buildings still offer great spaces for small local businesses. We should absolutely follow that pattern, and allow new construction by current transit stops. In interior neighborhoods, where many of those older brick buildings are, small two story live/work buildings would be a great addition, and along corridors, following a traditional "main street" model of development, with rows of mixed use buildings of two or more stories, with no off street parking, or parking hidden behind the buildings, would be amazing	6/6/2018
1293	80	/policies/development-near-metro-stations/	I support this policy. We need density to have an effective transit system, and we need it in areas where there are the highest number of transit dependent people.	6/6/2018
1294	24	/policies/shared-mobility/	This is the future. I support this policy. Let's be leaders in the nation on this issue.	6/6/2018
1295	11	/policies/skyways/	This policy does not appear to be properly labeled. Consider revising to say something like "support street level retail?"	6/6/2018
1296	82	/policies/aging/	This is critical, given the changing demographics. I think we could expand on this even more and be thinking about how technology(and closing the digital divide) can help seniors and our community.	6/6/2018
1297	81	/policies/social-connectedness/	Technology should be mentioned (and harnessed) for social interaction. Seniors need to be better connected with technology (sharing economy) and how much it can benefit them	6/6/2018
1298	26	/policies/vision-zero/	This is very important work. I support this policy!	6/6/2018
1299	4	/policies/access-to-commercial-goods-and-service	I agree with everything in this policy. Higher density all around, to actually provide enough people within walking distance of local businesses to support them staying open, is key. Having small-scale mixed-use buildings would work great in neighborhood interiors at transit stops, and mid-rise mixed-use along corridors. Buildings should be oriented to the sidewalk, and either have no off-street parking, or have parking tucked behind the building. I think it's very important to have a variety of small businesses inside neighborhoods, so enable car-free living. You can paint as many bike lanes as you want, you're only going to be able to get so many people biking, unless you allow useful destinations within a short, practical distance to where people live. Same goes for walking. We have sidewalks, but most people can't use them to get groceries, simply because the nearest grocery store is just too far away to walk easily.	6/6/2018
1300	33	/policies/affordable-housing-production/	Create separate old age homes for LGBTQ people or trans people	6/6/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1301	17	/policies/complete-streets/	<p>I am in total support of prioritizing pedestrians first, and cars last.</p> <p>If you are serious about this, than slowing down cars should be a priority. Traffic calming measures such as narrow lanes, curb extensions, (single lane) roundabouts, chicanes, and street trees should all become commonplace.</p> <p>This goes hand-in-hand with complete neighborhoods, and having local inner-neighborhood businesses, and enough density to support those businesses. One reason people feel the need to go so fast in their cars, is because they have such a long distance to travel from where they live to get anywhere useful.</p>	6/6/2018
1302	34	/policies/affordable-housing-preservation/	Create housing for LGBTQ community	6/6/2018
1303	40	/policies/homelessness/	provide separate safe shelter for LGBTQ youth	6/6/2018
1304	18	/policies/walking/	<p>Yes yes yes! Plenty of people I know say Minneapolis is very "walkable" but what they mean is "nice for a pleasant afternoon stroll." But "pretty to take a stroll along" is not the same thing as being able to get to practical destinations on foot. In many neighborhoods, you can walk for a mile and only get to more single-family-housing.</p> <p>We need for our zoning to allow for practical destinations within walking distance to where people live. And it needs to be safe for people to get there, meaning cars definitely need to be slowed down, using traffic calming measures like narrow lanes, single lane roundabouts, street trees, chicanes, and curb extensions.</p> <p>We need more multi family housing options in all neighborhoods, to have more people around to support a variety of small local businesses, and to provide a tax base to be able to collectively afford things like having the city plow sidewalks in the winter.</p> <p>Community gathering spaces, like small squares lined with mixed-use live/work development, to create a magnet to draw locals to the spot, would be an amazing addition, to encourage community networking.</p> <p>Making it easier for businesses to have sidewalk seating would be great for street life, too.</p> <p>Parklets are a great way to take back street space for people, without going through the expense of redoing a street and curb line as well, so making it easier for parklets to appear more places would be excellent as well. Also bike parking corals taking up one or two street parking spaces, in places where the sidewalk is too narrow for good bicycle parking.</p>	6/6/2018
1305	42	/policies/expand-homeownership/	provide financial counseling and homebuyer education to LGBTQ community..	6/6/2018
1306	45	/policies/leverage-housing-programs-to-benefit-c	Prioritize local businesses owned by LGBTQ community	6/6/2018
1307	48	/policies/data-driven-decisions/	Reach out to trans community while doing data analysis and housing research	6/6/2018
1308	19	/policies/bicycling/	<p>You can paint all the bike lanes you want, you'll only be able to get so many people biking if you don't open up zoning to allow more practical destinations within short, easy biking distance to where people live.</p> <p>That being said, yeah, go ahead with the biking infrastructure, because even if there is a limit to how many new people you'll get on bikes that way, you'll still be able to get more people on bikes.</p> <p>I do have a comments on what kind of infrastructure gets built though.</p> <p>"Parking protected" bike lanes hide cyclists from view of motorists, making intersections dangerous.</p> <p>Cycle tracks that put both directions of bike traffic over on the same side of the street is dangerous, because motorists won't think to look out for cyclists coming from the wrong direction to what they'd expect.</p> <p>Protected bike kanes that have a continuous, unbroken wall of protection, like a curb, or a concrete wall (like the Franklin ave bridge) remove freedom of choice to cycist making a left turn, who'd prefer to make a left merge and then turn left, rather than take more time waiting for two lights to make a box turn. A protection with breaks in it provides that "feel safe" quality, without removing options from more confident cyclists.</p> <p>"Door zone" bike lanes should never even be considered, and existing ones should perhaps even be removed, as biking in the door zone is really unsafe.</p>	6/6/2018
1309	55	/policies/business-innovation-and-expansion/	Connect entrepreneurs, with a focus on LGBTQ youth and trans youth	6/6/2018
1310	56	/policies/supporting-small-businesses/	Please prioritize businesses owned by trans people	6/6/2018
1311	57	/policies/cluster-strategy/	Focus one area in Minneapolis for LGBTQ community's need..Like Castro in San Fran, Powderhorn or Loring park could be a area for LGBTQ community	6/6/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1312	20	/policies/transit/	<p>While more light rail would be really awesome, I understand that's a huge expense. But one faster, cheaper way to increase bus reliability, especially in and near downtown, and along busier corridors, would be to have bus-only lanes.</p> <p>Also, having more transit oriented development, that puts more homes near transit, and allows businesses at the sidewalk level surrounding transit stops, would make mass transit more practical, because after stepping off the bus or train, there could be a small grocery store, or bank, or post office, or whatever, where people could take care of their practical daily needs on the way between home and work. There should be things to do near transit stops.</p> <p>Higher frequency, real-time information at major stops, and priority lanes would all be welcome improvements.</p> <p>I am an all year around cyclist, but when I can't, or just don't feel like biking, I always take the bus instead, but I'm never happy about it, because most routes are just plain unreliable. And that's mostly just because they just get stuck behind cars. Arterials like Lake st, Franklin, Hennepin, etc, would be served wonderfully by bus-only lanes now, and maybe light rail or modern streetcar in the future.</p>	6/6/2018
1313	11	/policies/skyways/	<p>The skyway are too confusing to use for anyone who doesn't use them everyday. And they take foot traffic off the street, so businesses in street level don't survive well. Together, this makes downtown a completely boring place to be.</p> <p>I would prefer that they be closed, but the people who use them everyday love them, so who am I to try and take that away from them? To make them work well, I think there needs to be stairs and or elevators to get to them on the edge of the buildings, where people can see them from the sidewalk.</p> <p>Also, I think that any new buildings constructed that want to be connected to the skyway, should have the skyway level retail wrap around the outside edge of the builing, facing outward, with the foot path in between the storefront and the outter glass of the building, mimicking the sidewalk, to be more intuitive to visitors. People in the skyway could look out the glass and easily be able to tell where they are, and people on the street would be able to look up through the glass to see what businesses are up there. Perhaps skyway bridges also ought to be near street corners, also to better mimic sidewalk travel, so as to be more intuitive.</p>	6/6/2018
1314	72	/policies/sustainable-water-system-management/	encourage people to have rain gardens and rain harvesting	6/6/2018
1315	75	/policies/waste-reduction/	Ban onetime use plastic and styrofoam products like spoons, straws or plastic bags.	6/6/2018
1316	91	/policies/heritage-preservation-outreach/	Expand outreach around heritage preservation activities and resources on trans community of Minnesota	6/6/2018
1317	92	/policies/identify-and-evaluate-historic-resources/	Expand outreach around heritage preservation activities and resources on trans community of Minnesota	6/6/2018
1318	1	/policies/access-to-housing/	Force, require, legislate that at least half of the units in EVERY building be rent controlled/affordable to a single person making the legal minimum wage. Require all buildings to accept section 8 vouchers for any unit. Require all the downtown zone multi family buildings to create affordable spaces within every building by 2040. We seriously do not need more luxury housing downtown. We need more affordable housing and we need it sooner rather than 20 years from now.	6/6/2018
1319	1	/policies/access-to-housing/	Looks like you want to destroy nice neighborhoods to generate more tax revenue.	6/6/2018
1320	54	/policies/supporting-economic-growth/	Obviously, the wealth of a community depends on its economy. While M2040 gets down into nitty-gritty details of housing, its plan for economic development is virtually non-existent except to mouthe a few truisms about making it easier to do business in Minneapolis. That in no way constitutes a plan. If we had a successful path to economic development, then more residents people would have money to spend on housing. Why is there no real economic development plan in M2040?	6/6/2018
1321	49	/policies/educational-and-economic-access/	Everybody knows the Minneapolis Public School system is in trouble. It is losing students, facilities are closing, and too many students are failing. But " aside from health " there is no more fundamental component to community success than education, because both address the capacity of the people to be healthy and productive. Still, the plan gives short shrift " that is to say, almost no attention at all to education. The Twin Cities are rich with higher education institutions that could help. Why is there no real plan? Saying it is the responsibility of the School Board is NOT a responsible answer.	6/6/2018
1322	89	/policies/technology-in-the-city-enterprise/	Collect and use data for trans community needs; gather, generate, analyze, interpret, visualize and distribute data across jurisdictions for use in decision-making by policymakers and the public including but not limited to interactive maps of trans businesses and resources, and ability to publicly display trans community data online for use by members of the public.	6/6/2018
1323	0.1	/topics/land-use-built-form/	Corridor 4 - way too built up for neighborhoods. Totally inappropriate density. No limit on building height? Why is interior 3 protected at 3 stories but corridor 4 across the street could soar to 2 times that height? These are neighborhoods not warehouses to stack people like pallets.	6/6/2018
1324	1	/policies/access-to-housing/	There is inappropriate density planned for residential neighborhoods far from downtown. 4 plex is ok but the 3 4 and higher story apartment buildings are not appropriate.	6/6/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1325	38	/policies/affordable-housing-near-transit-and-job-	The city should not be considering eminent domain to take property along bus lines to give to developers to build affordable housing. The policy to acquire and assemble parcels is very concerning on top of the huge density increase for these same neighborhoods. It feels like people who live near bus lines are under attack in this plan with huge buildings possible and now the potential for the city to get involved to accelerate this build-out.	6/6/2018
1326	12	/policies/lighting/	there should be no city facility that is replacing or creating new light fixtures that are not highly energy efficient.	6/6/2018
1327	16	/policies/environmental-impacts-of-transportation-	create "no car zones" in downtown create fees for the freeways for non-HOV, return fees to Green Zones communities and communities displaced by the original freeway construction. include police vehicles in the City's idling ordinance and prioritize their switch to electric vehicles. They idle most in highly-policed neighborhoods, including during youth outdoor sports games. Possibility of creating signs about Green Zones that inform commuters to consider walking, rolling, bicycling, bussing, or a minimum carpooling when traveling through these neighborhoods lower bus fare for Green Zones communities	6/6/2018
1328	15	/policies/transportation-and-equity/	Prioritize walking, biking. Expand sidewalks, plazas, gardens, parks, no-car zones. Cars should not define our communities in 2040 as they do now.	6/6/2018
1329	17	/policies/complete-streets/	permeable sidewalk for rainwater management and it is easier on joints for people who walk/bus a lot. yes! I love the order walking/rolling, then biking, then bussing, then cars.	6/6/2018
1330	18	/policies/walking/	permeable asphalt, short prairie grass, or other walkable surface that is easier on joints, catches rainfall, etc. encourage artists/community orgs/ to set up and influence the space on sidewalks. create no-car zones in the city to make breathing easier, less concern for safety.	6/6/2018
1331	19	/policies/bicycling/	imagine one lane of traffic for busses and the few cars that are still used, and wide sidewalks like on milwaukee ave... encourage bikers to bike to the airport! to union depot! to major hubs like that so that it is EASIEST to bike or lightrail there.	6/6/2018
1332	20	/policies/transit/	protected bikeways are okay but I think park/portland style bikelanes work really well and are much cheaper/easier to plow. no more freeway expansion. full stop. only maintenance of existing roads (including returning them to surface streets when politically possible), and ramping up carpool incentives, bussing, etc. We cannot afford (in any sense of the word) more traffic lanes of cars. Electric vehicles are not a cure all - batteries have a lifespan, batteries require precious minerals that come out of places that undisturbed protect groundwater and maintain native nations' access to treaty rights (like wild ricing, fishing, drinking water, etc). EVs, again, should not be viewed as a net zero impact nor something to continually expand use of instead of combustion engine vehicles.	6/6/2018
1333	22	/policies/downtown-transportation/	create downtown as no-car zone. reduce the overall parking space city-wide and in downtown.	6/6/2018
1334	26	/policies/vision-zero/	prioritize pedestrians through seeking to shrink overall landuse dedicated to cars. Road traffic accidents are the Ranked 3rd in top causes of death for Minnesotans between the ages of 15 and 44. The only reason we are still using them is because we've wrapped our whole way of life around them. Between now and 2040 we have to make some serious steps towards changing that. People > cars. And driving in cars when you look at the numbers is one of the most dangerous things we do. http://www.worldlifeexpectancy.com/minnesota-cause-of-death-by-age-and-gender	6/6/2018

1335	28	/policies/msp-airport/	<p>if the city has authority OR push Hennepin County and utility relationships to remove all language related the trash incinerator being a "green initiative." This is green-washing, certainly, but is no better for people or the environment.</p> <p>encourage/promote partnerships with amtrak to encourage city residents to use rail and bus transportation in place of air travel.</p> <p>do not actively promote/encourage MSP to expand its operations. In fact do everything you can to keep it as is or reduce its size.</p>	6/6/2018
1336	34	/policies/affordable-housing-preservation/	<p>discourage housing "flippers"</p> <p>cap the number of properties that international and out-state investors can purchase</p> <p>adopt "Right of First Refusal" to allow tenants to form housing co-operatives within aging buildings and access settlement money (for the really bad cases) and city affordable housing dollars to make improvements to properties that were not maintained by landlords.</p> <p>require all cost-effective energy efficiency improvements to be made by landlords along with timely repairs and maintenance of building.</p>	6/6/2018
1337	33	/policies/affordable-housing-production/	<p>-cap # of luxury condos/apts allowed total within city. There is only so much space for all of our needs together and attracting more and more wealthy apt-dwellers (when the are 1-15% of the population)is not a wise or planful use of space.</p> <p>-require rig</p>	6/6/2018
1338	35	/policies/innovative-housing-types/	<p>adopt right of first refusal to allow residents who are currently renters to implement some of these innovative housing strategies through the purchase of their home from the property manager.</p>	6/6/2018
1339	67	/policies/climate-resilient-communities/	<p>-move rapidly toward distributed energy generation (rather than large-scale, central power plant model that is currently used by utility companies across the country). These are very vulnerable to disasters of the environmental and political sort.</p> <p>-look</p>	6/6/2018
1340	67	/policies/climate-resilient-communities/	<p>allow for permanent, secure spaces for community gardening that is not threatened by development or fluctuating taxation status.</p>	6/6/2018
1341	75	/policies/waste-reduction/	<p>Begin Minneapolis Fix-It Clinic like Hennepin county does that also trains young people and possibly adults to fix, repair, or in the worse case scenario dispose of well this time and buy smart for the long haul next time.</p> <p>education on the "refuse" part of refuse, reduce, reuse, recycle is not taking, needing, using as much as we currently do.</p>	6/6/2018
1342	68	/policies/energy-efficient-buildings/	<p>-Adopt Inclusive Financing mechanisms to ensure equitable access to utilities' CIP dollars</p> <p>-Require all new buildings to have efficient buildings with passive solar design, which saves the cost of retrofitting AFTER the building is built</p> <p>-Multi-family e</p>	6/6/2018
1343	71	/policies/soil-health/	<p>ban pesticides in park spaces, and fine residents who use them. and educate them of course about why!</p>	6/6/2018
1344	61	/policies/environmental-justice/	<p>Work with native leaders and communities to determine which portion of city lands Minneapolis will return to indigenous people and/or put all of Minneapolis into a land trust that is directed by a board of directors that consists of a majority of native members, with representation by multi-generational black american, hmong, latino, east african members.</p> <p>If this is not politically feasible by 2040, find (in partnership) another way to meaningfully return significant decision-making power to native tribes around land use.</p>	6/6/2018
1345	90	/policies/technology-in-the-economy/	<p>Under this plan tech investment should never be groveled to, or sought after at the cost of affordable housing, existing resident retention, city culture and connectedness, and equity .</p> <p>Tech should not be used as a panacea, but be engaged with and used in a thoughtful manner. More is not always better, and just because tech makes something "possible" does not mean it should be done. Tech requires a significant amount of energy use, precious minerals (which are extracted from somewhere and if we're not willing or able to extract it from our backyard we should reconsider how much of that tech we actually NEED), and as an increasing amount of studies show increase anxiety/isolation.</p>	6/6/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1346	74	/policies/integration-of-water-management-into-	<p>where possible return land that was previously wetland to wetland - this eliminates cost of ground-waterpumping, damage done during significant rain events, and restores the soils ability to catch rainfall. These areas can be returned to foraging space for community members, trails, and meaningful natural stormwater areas.</p> <p>Ban pesticide use within the city, but especially in parks and at schools</p> <p>All new plantings should match this ecosystem - prairie. Meaning naturally drought-tolerant. There are many beautiful flowers that grow in prairie.</p> <p>Reduce non-permeable land coverings (roadways, parking, etc)</p> <p>encourage and facilitate grey water use</p> <p>follow the advice of this expert and bill "distributed water infrastructure" improvements (e.g. low-flow toilets, green roofs, rain gardens, permeable pavement, smart meters, etc) as CAPITAL not operating expenses. This will open up capital access to do these improvements en masse without having to significantly raise municipal water rates. You can also use tools like on-bill repayment (Inclusive financing) for water-related improvements that are cost effective to further reduce barriers to making these improvements: https://waternow.org/financing-the-future-of-water-infrastructure-just-got-a-whole-lot-easier-part-2-what-is-distributed-infrastructure-and-why-should-you-care-about-it/</p>	6/6/2018
1347	81	/policies/social-connectedness/	<p>make permanent open streets through "no-car" zones in several parts of the city.</p> <p>national night out 2x per year?</p> <p>create neighbor challenges (do X things with your neighbor this month and get a prize! etc).</p> <p>support orgs like PPNA who are providing equipment libraries, and hosmer library that has a seed library, and the Hack Factory that provides access to tools. These are social spaces!</p> <p>Biggest isolators: cars, phones/computers (depending on their use).</p> <p>encourage people to get off phones/computers and have real conversations. Approach tech-based solutions to community building with caution - tech addiction is a growing field of study. Tech should be a tool not a given or a requirement.</p>	6/6/2018
1348	54	/policies/supporting-economic-growth/	<p>I am hoping that the minimum wage law does not detract large businesses from coming to Minneapolis. I worry they may be concerned about an anti-business climate. Let's get as many jobs as possible in the city!</p>	6/6/2018
1349	21	/policies/freight/	<p>This whole section flies in the face of the Rail Safety Resolution passed by the city council in November 2015. You need to get that out, read it, and incorporate the language and intent of that resolution into the comp plan. The language here in this draft actually serves to negate that entire resolution. So you are wanting to go on record of doing that?</p>	6/6/2018
1350	21	/policies/freight/	<p>Add similar efforts you are undertaking for airport noise (per other language in this comp plan) and other negative impacts on the surrounding community to this section regarding rail and rail yards. See: Shoreham Yards, Northtown Yards, NE Minneapolis. Address the impacts of air, land, soil and noise pollution stemming from rail and railyards. Why only do so for airport communities? Ensure equity, don't just mouth it.</p>	6/6/2018
1351	1	/policies/access-to-housing/	<p>The principle is admirable. But there is no detail on execution. How will you prevent the construction of luxury condos in large single family homes that are still too expensive for moderate and low income families? How will you prevent the construction of low quality, cheap rentals that deteriorate? How will you ensure there is enough parking without clogging up streets and alleys? It's all in the execution.</p>	6/7/2018
1352	0.1	/topics/land-use-built-form/	<p>As a lifelong Minneapolis resident I oppose the plan to rezone my neighborhood. I can easily see large buildings built that are financially inaccessible to residents of this area, and I can't support a plan that doesn't guarantee the land will be used for the benefit of the people living here.</p>	6/7/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1353	0.1	/topics/land-use-built-form/	Why would you zone Justice Page middle school to be a Corridor 6 parcel? This suggests that a developer could purchase this property and turn it into an Apartment complex. On paper, this piece of land looks very appealing to a developer. Please remove the school from your plan. This does not align with the understanding that the school board and the city are two different entities, and suggests that everyone is OK with this. I live around the corner and expect my daughter to go to school here one day. NOT OK.	6/7/2018
1354	1	/policies/access-to-housing/	<p>I am so excited about this policy. This gives us the chance to make Minneapolis the national leader in keeping housing affordable to all residents. It will ensure our city remains a vibrant place where immigrants, older folks, working families, recent grads, and creative people can enjoy all the things that give Minneapolis such a high quality of life. I am a renter two years out of college. Because rent here is affordable, I can work a job that I like, live in a safe and clean place, and save money for grad school. For people at my stage in life, Minneapolis is almost perfect. It has good jobs, decent transit, access to higher ed, and decent parks and amenities - all for a cost of living that is economically accessible. It is really important to me that we keep it that way.</p> <p>As you consider this plan, know that there are plenty of people like me who care about affordable housing Their voices may not be the loudest, but they are paying attention. They know that this plan means to them. And there are plenty of people besides them who care that our city continues to be an inclusive in deed as well as in word.</p>	6/7/2018
1355	1	/policies/access-to-housing/	<p>Instead of promoting a stable, working, middle class that contributes to the community, the City is inviting large amounts of unstable, under employed, publicly funded lower class residents which will destabilize the City. The concept that the City is deploying will drive out the productive residents and leave Minneapolis to struggle as a welfare city with lower tax collection, fewer profitable businesses, uncared for properties and growing crime. It is not a City's role to be a Charity. That is the role of State govt. As Minneapolis expands this concept, the problems that it is trying to resolve will only create bigger problems and destroy the foundation it needs to thrive. Learn from other Cities that are making the same mistakes.</p> <p>Stop attracting and inviting the unproductive and out source some of the needy to other Cities and the problems you are addressing will go away without creating bigger problems.</p> <p>I know my concerns will be ignored by the City and that is why I, and a large percentage of the quiet majority are planning to leave Minneapolis as it continues to destroy its productive middle class.</p>	6/7/2018
1356	33	/policies/affordable-housing-production/	The definition of "affordable housing" has to be changed to include ownership. If we don't, whatever housing it is, wherever it is, does not build equity (and I mean that in the financial as well as the social justice definition) nor does it remain affordable.	6/7/2018
1357	39	/policies/fair-housing/	Definition of "affordable housing" has to be changed to include ownership. If we don't, whatever housing it is, wherever it is, does not build equity (and I mean that in the financial as well as the social justice definition) nor does it remain affordable.	6/7/2018
1358	71	/policies/soil-health/	Make Minneapolis permeable! Also, restore and mitigate damaged soil microbiome with compost/mycorrhizal fungi. And leave the leaves.	6/7/2018
1359	77	/policies/park-access/	Great ideas for parks. Let's do artist and community lead wayfinding all over the city. Starting with making it easier for people to paint the pavement to encourage neighborhood culturally relevant community painted crosswalks on heavily traveled streets. Open Streets removes traffic from these streets for a day that would give time to safely paint the crosswalks. Designs could be worked out and approved ahead of each event.	6/7/2018
1360	66	/policies/air-quality/	Some blocks of the city have multiple emitters such as gas stations, auto repair and car washes within a few hundred feet of residential housing. For instance, there is an auto repair place, a body shop and a car wash within a few hundred feet of my house which is just a few blocks from the freeway. The air quality testers are not positioned here, yet obviously that's a lot of concentrated emissions. There is also a daycare - right next to the body shop - who thought that was a good idea for kids? We need policy to change this and move these business types away from residential areas and especially away from daycares and schools. No housing should be exposed to emissions from three emitters like this and my block is not the only one concentrated like this. In the short term, move some of them and in the long term (but ASAP) eliminate these types of businesses in residential areas.	6/7/2018
1361	66	/policies/air-quality/	Do people report air quality issues to 311? Does 311 do anything about those reports now? If the city is going to use that data to inform policy according to the 2040 Comp Plan, then people need to know to report and have some confidence 311 will do something - that confidence is already low on a variety of issues that are typically reported. I don't think 311 is the first place people think of to report air quality issues. If the city is going to use that data, then it also needs to ensure that it is quality, useful data.	6/7/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1362	19	/policies/bicycling/	<p>Hello, My name is Katherine and I've been living and biking in Minneapolis since 2013. Recently I've become a full time bike commuter since we have so many wonderful bike lines and greenways in Minneapolis. However with the advancement of the physical infrastructure, I continue to notice drivers completely oblivious to the threat they pose to bikers and pedestrians alike. Is there a way we can help to shift the driving culture of Minneapolis to be more embracing of this alternative transportation? I know you can find information on how bikes operate on the road if you look for it, but can we make it DEFAULT that drivers learn how to navigate bicycle traffic in Drivers Exams. Even a quick informational pamphlet/ quiz when renewing drivers licences. If knowledge is power, I think an explanation of how we can successfully co habitat is key. How can we expect bicyclists to increase to 15% if the vehicles we share the road with continue to respond aggressively to this alternative transportation? Let's educate our citizens so we can keep leading the nation in bicycling as a progressive alternative transportation method.</p>	6/7/2018
1363	16	/policies/environmental-impacts-of-transportation/	No mention of parking.	6/7/2018
1364	10	/policies/street-grid/	No mention of parking.	6/7/2018
1365	17	/policies/complete-streets/	No mention of parking.	6/7/2018
1366	1	/policies/access-to-housing/	I'm sure I've commented before but I'm very excited about this policy. There's been very little new construction in my neighborhood (East Isles) and what has been built seems limited to extremely large single family houses. I'd love for the zoning code to reflect the diversity of housing we already have here and allow for different housing options in the future.	6/7/2018
1367	33	/policies/affordable-housing-production/	This is a necessary policy and I definitely hope it leads to further leadership and planning when it comes to new affordable housing construction. More details would be great, but I understand that isn't the purpose of this document.	6/7/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1368	80	/policies/development-near-metro-stations/	<p>I currently live in a high rise near the Lake Street/Excelsior Blvd split just north of Lake Calhoun. I am not opposed to increased density. I am in favor of walking, biking, and mass transit. However, the drawing that shows multiple high rise buildings intended to house thousands of more residents around the Lake/Excelsior Blvd scares me. There does not seem to be any additional infrastructure (besides the potential for SWLRT) to accommodate this level of density. The SWLRT (if it is ever completed) will only relieve certain commuters and residents who are going to either downtown Mpls. or towards the SW suburbs.</p> <p>Without additional plans to manage commuter and new resident vehicles, I am opposed to the build-up envisioned in the plan for this area for the following reasons:</p> <ol style="list-style-type: none"> 1. CURRENT traffic congestion along these corridors between Hennepin and France Avenue is problematic because of the limited number of East-West transportation options caused by the Chain of Lakes. Right now, between 50th Street South and 394 there are only a few East-West options available for cars: 50th St. S. is narrow and can't handle more than 1 lane of traffic in either direction in most areas. Lake St./Excelsior Blvd is already jam-packed with cars with long back-ups during Rush Hours. Then 394 is also very backed up during many hours of the day. Frustrated commuters will end up clogging residential streets in their attempts to avoid long delays in the arterial streets. 2. The need for cars as a transportation option will not disappear even with SWLRT. Most residents need cars because their workplace and homes do not conveniently line up with mass transit. Cars are needed by most people to shop for bulky, heavy groceries. Families need cars to get kids to daycare, schools (if bus service is not available), after hours sports and activities, etc... Minneapolis MUST continue to plan for increased vehicle traffic associated with thousands of new city residents. Wishful thinking that everybody will work and live and shop and go to school within walking/biking distance all 12 months of the year would be foolish and a disservice to the reality most residents experience. 3. Thousands of new residents and cars along already overcrowded streets will frustrate commuters and residents alike. Frustrated and delayed drivers run red lights, make dangerous turns, and do not yield to pedestrians or bikes. The future safety issues caused by overloading already congested roadways with thousands of new cars, pedestrians, and bikers around the Lakes is frightful and dangerous. <p>Thank you, Maria Henly 3151 Dean Court #304 Minneapolis, MN 55416</p>	6/7/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1372	17 /policies/complete-streets/	<p>I currently live in a high rise near the Lake Street/Excelsior Blvd split just north of Lake Calhoun. I am not opposed to increased density. I am in favor of walking, biking, and mass transit. However, the drawing that shows multiple high rise buildings intended to house thousands of more residents around the Lake/Excelsior Blvd scares me. There does not seem to be any additional infrastructure (besides the potential for SWLRT) to accommodate this level of density. The SWLRT (if it is ever completed) will only relieve certain commuters and residents who are going to either downtown Mpls. or towards the SW suburbs.</p> <p>Without additional plans to manage commuter and new resident vehicles, I am opposed to the build-up envisioned in the plan for this area for the following reasons:</p> <ol style="list-style-type: none"> 1. CURRENT traffic congestion along these corridors between Hennepin and France Avenue is problematic because of the limited number of East-West transportation options caused by the Chain of Lakes. Right now, between 50th Street South and 394 there are only a few East-West options available for cars: 50th St. S. is narrow and can't handle more than 1 lane of traffic in either direction in most areas. Lake St./Excelsior Blvd is already jam-packed with cars with long back-ups during Rush Hours. Then 394 is also very backed up during many hours of the day. Frustrated commuters will end up clogging residential streets in their attempts to avoid long delays in the arterial streets. 2. The need for cars as a transportation option will not disappear even with SWLRT. Most residents need cars because their workplace and homes do not conveniently line up with mass transit. Cars are needed by most people to shop for bulky, heavy groceries. Families need cars to get kids to daycare, schools (if bus service is not available), after hours sports and activities, etc... Minneapolis MUST continue to plan for increased vehicle traffic associated with thousands of new city residents. Wishful thinking that everybody will work and live and shop and go to school within walking/biking distance all 12 months of the year would be foolish and a disservice to the reality most residents experience. 3. Thousands of new residents and cars along already overcrowded streets will frustrate commuters and residents alike. Frustrated and delayed drivers run red lights, make dangerous turns, and do not yield to pedestrians or bikes. The future safety issues caused by overloading already congested roadways with thousands of new cars, pedestrians, and bikers around the Lakes is frightful and dangerous. <p>Maria Henly 3151 Dean Court #304 Minneapolis, MN 55416 mariahenly@gmail.com</p>	6/7/2018

1379	34	/policies/affordable-housing-preservation/	I'd love to know more about the strategies to retain affordable housing and promote naturally occurring housing, but I'm still glad this statement is in the plan.	6/7/2018
1380	37	/policies/mixed-income-housing/	I'm honestly unsure what mixed income housing even looks like, but I like the idea of it and look forward to learning more.	6/7/2018
1381	1	/policies/access-to-housing/	As a homeowner in South Minneapolis, I think it's great that the city will expand the types of housing available in my neighborhood. Not every family is lucky enough to be able to afford a single family home! Plus, there's just not enough space in Minneapolis for everyone to have a single family home with a yard, detached garage, etc.	6/7/2018
1382	35	/policies/innovative-housing-types/	This is awesome! As a homeowner, I love the plan's flexibility to adapt to changing demographics. Not everyone needs, wants or can afford a single family home. Removing barriers to create more housing is a great idea.	6/7/2018
1383	33	/policies/affordable-housing-production/	I am very happy about all of the goals around housing affordability. My husband and I bought our home in Powderhorn two years ago, and while we are very happy to live here it was also one of the only neighborhoods where we could find a house that was in our budget and also fit all of our needs. And we could not have afforded to buy this house without having affordable rental housing beforehand...and since we have moved I have seen that those options are rapidly disappearing as have smaller single-family homes.	6/7/2018
1384	13	/policies/landscaping/	While larger, more contiguous planting areas are valuable, it should be remembered that much of the environmental benefits of vegetation - for example on urban heat-island effects or air-quality are highly localized. There is a risk to concentrating benefits in a few places, and leaving many areas without them	6/8/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1385	26	/policies/vision-zero/	<p>One simple solution that addresses all of the Vision Zero areas of interest is the elimination (or near elimination) of stop signs and stop lights in neighborhoods. Everything from public safety to criminal justice equity to environmental concerns would be addressed by doing this. See the following article for supporting notes:</p> <p>https://www.psychologytoday.com/us/blog/adaptive-behavior/201605/death-stop-sign</p> <p>Replacing stop signs with yield signs and stop lights with roundabouts will reduce driver error, reduce carbon emissions wasted on unnecessary braking and shorten travel times, and reduce traffic citations which unfairly penalize the poor. Pedestrians and cyclists would be better protected because there is a no incentive to race lights or to take your eyes off the road looking for instructions from stop signs with additional information, rather than a simple warning sign that lets you know an intersection is ahead and to plan accordingly. Countries that follow this road design plan have half the fatality rate of the United States. If you're serious about planning for the future you should initiate this plan immediately across the city rather than roll it out slowly over the coming many years. It will save lives and comports with the 2040 plan.</p> <p>Thanks, fgj</p>	6/8/2018
1386	1	/policies/access-to-housing/	<p>I do believe that building more housing is necessary, but we cannot claim to fix a racial inequity problem with a supply solution. If we want to alleviate the housing cost-burden for American Indian and African-American families, we need policies targeted towards building and preserving the housing they need - aka subsidized. The policies that discriminated against communities of color were not race neutral, therefore our solutions cannot be either.</p>	6/8/2018
1387	33	/policies/affordable-housing-production/	<p>Private developers often receive financial incentives to build 80% AMI affordable units. I believe that any developer who receives financial incentives should be held accountable to keep those units affordable for at least 30 years, if not permanently affordable. Currently, developers like Dominion keep their buildings affordable for 15 years and then flip it to market-rate. 15 years is not even long enough for a child to go through the K-12 education system. We need stability for all people, not just those who own homes.</p>	6/8/2018
1388	34	/policies/affordable-housing-preservation/	<p>Thank you for considering multigenerational housing! As someone who grew up in a large home with my whole extended family, I believe it was critical to our mental and financial stability. I would go home and spend time with my grandparents, and my parents wouldn't have to worry about after-school daycare. We were all able to support one another under the same roof.</p>	6/8/2018
1389	34	/policies/affordable-housing-preservation/	<p>I think some of the strategies associated with preserving NOAH can come from tenant protections. For example, if the city passed a 90-day notice of sale ordinance, right of first refusal ordinance, and had funds available to help tenants form cooperatives to purchase their buildings, we would be empowering renters to build equity. If the renters did not want to purchase, they could transfer their rights to a non-profit developer who would keep the building permanently affordable.</p>	6/8/2018
1390	35	/policies/innovative-housing-types/	<p>Many of the barriers to innovative housing solutions are related to the speculative market making land/housing impossibly expensive to buy and preserve. Land trusts should be a key piece of removing land from the speculative market.</p>	6/8/2018
1391	36	/policies/innovative-housing-strategies/	<p>Possible affordable housing revenue sources: construction excise tax (see Portland), linkage fees (see Denver), AirBnb tax (see Portland). The money is there, we just need political will. If we want to increase property taxes, we should only do so for the top 20% of house values. According to this report, while property taxes are fairly progressive, the top 20% income-wise still pay a bit less than everyone else:</p> <p>https://itep.org/whopays/</p>	6/8/2018
1392	37	/policies/mixed-income-housing/	<p>If private developers do create mixed-income housing, we should make sure that they do not have different screening practices for residents at different income levels.</p>	6/8/2018
1393	38	/policies/affordable-housing-near-transit-and-job-	<p>The city should have first priority in purchasing land along transit lines and preserve it in land trust.</p>	6/8/2018
1394	80	/policies/development-near-metro-stations/	<p>Yes to small blocks, plazas and open spaces!</p>	6/8/2018
1395	40	/policies/homelessness/	<p>There needs to be some kind of funding source connected to all of this.</p>	6/8/2018
1396	41	/policies/tenant-protections/	<p>We need just cause evictions, 60-day notice of rent increase, 90-day advance notice of sale, right of first refusal, and rent relocation assistance in the case of no cause or economic evictions. Tenant protections go a long way in protecting our most vulnerable populations.</p>	6/8/2018
1397	42	/policies/expand-homeownership/	<p>Thank you for specifically addressing the racial wealth gap through (b).</p>	6/8/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1398	44	/policies/comprehensive-investments/	The city's dollars can only go so far, and we need to pressure Hennepin County to put in their fair share towards alleviating this housing crisis.	6/8/2018
1399	23	/policies/coordinated-development-strategy/	If the city levied a 2% construction excise tax on all development permits (exempting non-profits, public investment, schools/universities, churches, etc.), we could collect \$20 million a year in funding to invest in affordable housing.	6/8/2018
1400	0.1	/topics/land-use-built-form/	Regarding the Kenilworth Corridor adjacent to Cedar Lake Park on the east side between the Kenilworth Channel and West Franklin Avenue: When the Met Council decided to locate electrified LRT within feet of ethanol-carrying freight rail, the City of Minneapolis negotiated a Memorandum of Understanding that requires any land not directly needed for the SWLRT project to remain in public ownership. Further, a Kenilworth Station Area Art and Landscape Committee -- part of the SWLRT project -- has invested many, many hours and thousands of dollars into designing the corridor with environmental protection (to the extent possible) and aesthetics in mind. My understanding is that this plan was approved by the City of Minneapolis and the Met Council. This plan does not include housing on the small bit of land that will be left when freight rail, passenger rail, and bicycle and pedestrian paths are built. I would refer you to the SWLRT design plans to understand how the Southwest Project Office expects the space to work.	6/8/2018
1401	0.1	/topics/land-use-built-form/	Franklin Avenue West of Hennepin is not a bus route. I don't believe it ever has been a bus route. During the many hours I spent in SWLRT committee meetings of various types, I asked the question, "What will future transit connections look like?" I was told that the only bus route would be a continuation of the #25 bus that currently runs along 21st to Penn then up to Douglas Ave. I have a traffic study memo from the SWLRT Section 106 committee to this effect if you're interested in seeing it. - Jeanette Colby	6/8/2018
1402	0.1	/topics/land-use-built-form/	Kenwood Parkway is a historic district, and part of the Historic Grand Rounds. It would be inappropriate, and conflict with your policies relating to Historic Preservation, to designate any part of the Parkway as Interior 3 or 4.	6/8/2018
1403	1	/policies/access-to-housing/	I have spent most of my life's work serving and supporting families living in poverty. While I support much of this plan my fear is that new multi family housing will be purchased and erected by landlords who all ready own much property and therefore have no true understanding of the issues facing the poor. Look at Ben Johnson recent solution to homelessness, to raise the rent on HUD housing by 20% . I think the answer is to make purchasing g housing more accessible. and to look at land use differently, why not break up City lots and let folks build Tiny housed on them, ownership encourages community investment and builds strong neighborhoods. Or make multi unit/ 4=plexes only accessible to folks who do not already own tenant housing. Lets put a stop to the greed in multi unit housing!!	6/8/2018
1404	33	/policies/affordable-housing-production/	While I agree with the philosophical impulse of these action steps, they seem vague and ambiguous to me. Poor people, single women, single mothers, families, aging community members live in fear that their landlord will raise the rent and toss them out, leaving g them with no place to go. These are urgent matters, what are we going to do today? Why not look at some form of rent control that hold greedy landlords accountable for their behavior.	6/8/2018
1405	41	/policies/tenant-protections/	I worked the majority of my life serving g and supporting families living in poverty, from all my experience I have rarely seen Tennant get the support they need to stand up to sub standard housing issues. Many times when they take the brave step to report health and safety issues they loose their housing and the unit is condemned. Let make sure that theses issues are dealt with my upping inspections, training inspectors and holding g slum landlords account table for their egregious lack of humanity!!! Barbara Olson	6/8/2018
1406	80	/policies/development-near-metro-stations/	Please consider the facts about SWLRT: It was routed through a unique urban green space in order to save time for suburban commuters. This is baked into the cost-effectiveness formula used to select the route (please refer to SWLRT documents from 2008-10 for details). This routing means that development opportunities in Minneapolis are very limited. The Penn Ave/Bryn Mawr station is in a valley, accessible by a very long skyway and elevator, with limited access for emergency vehicles. The 21st Street station is adjacent to a park and in a neighborhood of historic homes. Development here would come at the cost of green space used daily by hundreds of people, as well as and historic preservation. The West Lake area already has terrible traffic congestion and people absolutely will continue to need these streets to get from St. Louis Park and points west to many parts of Minneapolis. Please proceed with great caution in considering development around the proposed SWLRT stations.	6/8/2018
1407	24	/policies/shared-mobility/	Please bring back Car-To-Go!!! Unlike other vehicle sharing services, cars were available in many more locations throughout the city, meaning that many more people could take advantage of this transportation option. This was a fantastic model. The company said that it discontinued because of an inappropriate tax structure. Maybe that's not the whole story, but if it is, that should be an easy fix!	6/8/2018
1408	25	/policies/innovations-in-transportation-and-infras	Use technology to improve traffic light coordination and to reduce vehicle idling in internal combustion engines. This technology exists now.	6/8/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1409	20	/policies/transit/	this all sounds great but the devil is in the details. without a commitment to estimate the real-life routing needs of mass transit passengers, and then fund the needed transit, how can we achieve these goals? Resident, Mpls. 55416	6/8/2018
1410	80	/policies/development-near-metro-stations/	Without taking immediate steps to better connect metro stations to other forms of mass transit this will not work. some proposed metro stations are already situated in extremely congested areas. Increasing the housing density, e.g., by the SWLRT Lake Street station, will be disastrous unless the housing deliberately provides absolutely minimal parking spots, *and* unless mass transit along Lake Street is dramatically increased. I live in CIDNA and the congestion by Lake St., Exc. Blvd., Dean Parkway is becoming horrendous not to mention dangerous. Density is good. Density without specific plans for reducing car ownership and increasing mass transit is stupid. Mpls. Resident of 55416	6/8/2018
1411	88	/policies/public-services-policy/	Streamlined development review should not be understood to involve shrinking the role of neighborhood organizations in the City's development review process.	6/8/2018
1412	10	/policies/street-grid/	This policy seems very weak when referring to freeways. I94, I394, I35W, Hiawatha Avenue, Olson Highway, and countless freeway access ramps and viaducts make Minneapolis disconnected and create barriers for people walking and biking. freeway lids and de-commissioning of these roadways should be on the table.	6/9/2018
1413	49	/policies/educational-and-economic-access/	Every item in the Living-wage jobs portion of the comprehensive plan is a platitude with absolutely no substance. While many of the goals may be laudable, the means to get their are very important, and I'm concerned many with think the end will justify any means. There is no talk of funding, no talk of actual laws and regulations, and so on. Much is made of race; little is made of poverty, those with disabilities, or veterans. The plan seems bent on making it clear trucks, roads, blue collar work, and freedom from regulation are unwanted in the Minneapolis of the future. I'm for many progressive goals, but there must be moderation and a centric view so everyone feels welcome and supported and free to pursue goals.	6/9/2018
1414	80	/policies/development-near-metro-stations/	I generally agree with the policy, however, i do not agree with the introduction of high-rise buildings to increase housing density near all metro stops. i live near Lake of the Isles/Lake Calhoun --- and the plan seems to create a wall of high rise development that changes the character of the neighborhood. I do not support such development	6/9/2018
1415	5	/policies/visual-quality-of-new-development/	Development around metro stops seems to rely on the introduction of high rise buildings that can block the views and the value of surrounding properties. i believe more consideration and limitation should be practiced to identify areas for high rise development	6/9/2018
1416	80	/policies/development-near-metro-stations/	Development near the Lake Str/Calhoun metro station includes the introduction of several high rise buildings that are not in the character of the area. 20 to 30 story buildings dramatically change density of the area and the character of the area -- traffic, views, property value --- do not surround the lakes with high rise buildings	6/9/2018
1417	53	/policies/quality-of-life/	Protecting and ensuring public green space should be part of the very FIRST steps in any planning process. Current Green space should be protected and nurtured; and green space should be expanded in proportion to increased density. Definition of green space should be clearly articulated.	6/9/2018
1418	0.1	/topics/land-use-built-form/	â€œWe all want progress, but if you're on the wrong road, progress means doing an about-turn and walking back to the right road; in that case, the man who turns back soonest is the most progressive.â€ C. S. Lewis You need to go back to the drawing board on this inequitable built form plan	6/10/2018
1419	0.1	/topics/land-use-built-form/	â€œWe all want progress, but if you're on the wrong road, progress means doing an about-turn and walking back to the right road; in that case, the man who turns back soonest is the most progressive.â€ C. S. Lewis You need to go back to the drawing board on this inequitable built form plan	6/10/2018
1420	55	/policies/business-innovation-and-expansion/	How about stopping over regulation, where it makes it harder to established business to survive & thrive! And makes it impossible to new business to start.	6/10/2018
1421	56	/policies/supporting-small-businesses/	SO basically, if youâ€™re not a black owned business or a woman. Youâ€™re on your own. Time to get out of Minneapolis	6/10/2018
1422	3	/policies/production-and-processing/	We should rename this comprehensive plan to BLACK only 2040.	6/10/2018
1423	58	/policies/business-districts-and-corridors/	How about creating flexibility when it comes to current Available commercial buildings to allow for a different use & To adapt to different demands	6/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1424	63	/policies/food-access/	How are suggest building constrave relationship with current store owners when the city is constantly target these establishment with over regulation, annual increase of license fees, adoption ordinance that takes away available products for sale, restricting some esblesmet & from the sale of products with creating unrealistic requirements whether in building, proximity requirements, crazy zoning requirements???	6/10/2018
1425	49	/policies/educational-and-economic-access/	Provide channels to build awareness on the programme, support and training available to the community. Also provide specific demographic targeting to make sure that the ones that need helps get the needed support and opportunities available to them.	6/10/2018
1426	20	/policies/transit/	The city needs to build and maintain more rail based transit with dedicated lanes. It is proven through studies that Americans hate buses (including me, a lover of transit!), so the best way to get people to use transit it to build the type they are willing to use. The system the city uses should shy away from a hub and spoke system and more of a integrated system that doesn't make people go out of their way to ensure people can get around the city in an efficient manner. It is imperative that the city gets this system its own right of way to increase frequency and to ensure that there aren't any unnecessary delays due to freight or car traffic.	6/10/2018
1427	20	/policies/transit/	The city needs to get Metro Transit on board with more frequency of our transit system at night. In order for the city to be more lively and livable, our transit systems shouldn't become unusable after 9pm. Busses and trains should remain on their 10-15 minute schedule until two hours after bar close to ensure that our city can become more of a world class city. This would also take cars off the road so we could reach our climate goals.	6/10/2018
1428	22	/policies/downtown-transportation/	The city should be thinking of added taxes and fees for personal automobiles in downtown and other dense areas such as uptown and others. This could follow other cities such as London that is trying to reduce the amount of cars on its roads. This policy could do that while getting more people to walk, bike, or use other means of transit getting us closer to our climate goals and making our streets more lively and friendly to cyclist and pedestrians	6/10/2018
1429	35	/policies/innovative-housing-types/	In other cities around the world, there is system in which one can buy ones apartment. This may sound like a condo type thing, but it's not. The city should see if this is replicable in the states and attempt to do it to expand housing types.	6/10/2018
1430	69	/policies/renewable-and-carbon-free-energy/	Closing of HERC should be embedded into the Comp Plan. Over half of what we burn could be recycled or composted, and its location within the city has glaring environmental justice implications for the neighborhoods of Glenwood and Near North. A truly sustainable Zero Waste Policy cannon include garbage burning - and we need to think of better solutions for municipal waste.	6/11/2018
1431	3	/policies/production-and-processing/	The Plan for 2040 seems to accept that educational attainment for minorities will remain static for the next 20 years, concluding that "setting aside space for production and processing businesses will help ensure that living-wage jobs in industries with minimal environmental impacts will be available to Minneapolis residents, especially people of color and those without a college degree." If the Plan assumes that the educational attainment of minorities will remain static over time and that there will be satisfaction in "living wages", then the economic gap at the regional, national, and international levels will widen, with Minneapolis tethered to manufacturing, while the rest of the world migrates to the knowledge economy. Twenty years offers an opportunity to inspire loftier goals than production and processing. How about re-calibrating the strategy, so that the 20 year goal is to have a highly-educated, HIGH wage knowledge workforce?	6/11/2018
1432	0.1	/topics/land-use-built-form/	I support the use of land-use and built form maps in tandem. I think the urban neighborhood land use should be more accomodating to different types of uses. There are many great corner stores in these areas already, including in my neighborhood. The land use map seems to imply that those types of stores would no longer be allowed. These are great community assets and we need to be more flexible about where retail and services are located. Don't specify what uses are allowed where, the planning commission shouldn't waste their time reviewing whether or not a barber shop can open on my neighborhood corner. let the market decide!	6/12/2018
1433	0.1	/topics/land-use-built-form/	We have many 80s buildings that have a long building face on the block, and half the lot is surface parking behind. Especially when these are on the end of a block, it creates a jarring gap in the building fabric. Allow infill housing on those rear surface parking lots that match the surrounding built form heights and massing. This mirrors the original built form of neighborhoods, where end-of-block lots were subdivided into thirds and 3 homes were built (instead of 1 as they were along the rest of the block). This essentially ensures ADUs-type infill is allowed on any site throughout the city.	6/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1434	4	/policies/access-to-commercial-goods-and-service	<p>I like the idea of complete neighborhoods with walkability. Where I see a huge opportunity for completing neighborhoods and growth is over in the Northside. I live in Folwell neighborhood (near Humboldt and Dowling.) From what I can see, the availability of business to walk/bike to, as well as proper/safer pedestrian and biking spaces are far lacking compared to other places in the city. North is a beautiful area with historic homes, many large parks and a population eager for the same amenities and opportunities provided on South Mpls or other neighborhoods that seem to have historically received more attention and/or funding.</p> <p>Thank you.</p>	6/12/2018
1435	10	/policies/street-grid/	<p>Consider our urban wildlife. Squirrels, birds, rabbits, bats etc. make a home in mpls as well. They are part of the urban ecosystem. They don't just live in parks. They live on boulevards in trees and in back yards. Make budget for grass, trees. Minneapolis city planning has a rich history of making our city feel like a giant park. More trees on streets. Don't cut the big trees down, work with them. More beds for flowers and safe spaces for our urban wildlife to thrive.</p>	6/12/2018
1436	11	/policies/skyways/	<p>The skyways need to be safer. Consider this in your redesign. There are long corridors where vagrants linger, also homeless and gangs. I suggest more interactivity with the street below. Windows, exits, entrances, was to communicate if being attacked in the skyway. There are sections which are very isolated and unsafe. Add intercoms and security to ensure this wonderful skyway system is welcoming to all. Design with less crime in mind.</p>	6/12/2018
1437	84	/policies/public-safety/	<p>3 places I feel most unsafe in the cities:</p> <ol style="list-style-type: none"> 1. The skyway. 2. Alleys 3. The lakes after dark (surrounding sidewalks etc) <p>All 3 are places I've personally been harrassed, followed, or threatened at one time over 30 years of life in Minneapolis. Make the secluded public areas more protected. Integrate planning, technology, and police presence.</p>	6/12/2018
1438	5	/policies/visual-quality-of-new-development/	<p>Offer grants or tax rebates for new buildings that incorporate public art. Large scale sculpture, gallery spaces, murals etc. should be incorporated to these new spaces. Minneapolis is known nationwide as a city of the arts. We mustn't let greedy developers take that away from our architectural landscape. Let's ensure mpls is still a national Arts City in 2040</p>	6/12/2018
1439	30	/policies/arts-and-cultural-assets/	<p>More artists are moving to Minneapolis because of its diversity and music scene. Remember Minneapolis is known as a Music City. Create more programs that facilitate music. More concert series in public places. How about hiring live music in the skyways? Also offering permits for musicians to busk in skyways much like subway systems in NYC. Musicians also need more respect from police. They can really make it difficult for us to load our instruments into performance space because of dress or hairstyle. Mean cops are a huge problem in Minneapolis.</p> <p>Create public rehearsal spaces for musicians. A single empty warehouse could easily be converted into a wonderful arts rehearsal space as well as public dance studio. The city needs more public creation areas where artists can meet and create.</p>	6/12/2018
1440	0.1	/topics/land-use-built-form/	<p>This is WAY TOO MUCH Re Zoning in SW Mpls. This is a plan for a million plus people. Give me a break don't give the keys to the developers.</p>	6/12/2018
1441	33	/policies/affordable-housing-production/	<p>From what I see, the zoning changes and drive towards density described in this plan do nothing to support the goal of affordable housing. Just like we are seeing now, it will promote construction of expensive apartments in desirable neighborhoods.</p>	6/12/2018
1442	1	/policies/access-to-housing/	<p>It might be true that outdated policies have shaped the neighborhoods in Minneapolis, but now they are vibrant communities that make this city unique and livable. I think it is a huge mistake to drive multi story apartments and condos through the center of healthy neighborhoods in an experiment to reverse policies of the past. It makes much more sense to allow ADUs and see how these areas grow organically</p>	6/12/2018
1443	53	/policies/quality-of-life/	<p>The density you are promoting will erode the natural amenities the city boast. We already do not maintain the parks and lakes that make the city distinctive and livable. Adding high rise apartments along the lake will just add more stress to an already heavily used park system</p>	6/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1444	19	/policies/bicycling/	I am a regular cyclist, but I think you need to better balance the needs of cyclists and other types of transportation. At 62 I imply cannot ride in the winter or for long distances. There is only one bus route through my neighborhood. So a car is still necessary, and will probably be more so as I age (Do any of the policies take seniors into account). It does not make sense to me to take out lanes of heavily traveled roads to create bike lanes, particularly where other bike routes are available (like 28th street, which is 2 blocks from the greenway). It also seems all of the money is going into new bike routes and none toward maintaining existing routes that actually get heavy use.	6/12/2018
1445	20	/policies/transit/	Transit has seen a steady decline since I moved to my current home 15 years ago, and there is now only one bus route with limited service. Why not work towards improving transit and see how development occurs organically rather than imposing zoning changes and hope that transit partners will come along.	6/12/2018
1446	9	/policies/open-spaces-in-new-development/	You say this principle contributes to meeting the goal on climate resilience yet you show a picture of a plaza that is adding impermeable surface to the city. To the extent possible, we need to increase permeable surface to prevent the 500-year floods that result from the 500-year rains and snowfalls that are now occurring with much greater frequency.	6/12/2018
1447	14	/policies/tree-canopy-and-urban-forest/	Good action steps! We should be doing these well before 2040!	6/12/2018
1448	46	/policies/healthy-housing/	For healthier living spaces, the public spaces need to be green spaces -- exposure to nature (trees, plants, etc.) is increasingly proving to be key to mental and physical health, so every new housing development or improvement should be guided by a policy to INCREASE, and never decrease, green space.	6/12/2018
1449	70	/policies/ecology-and-habitat/	Any reason why we can't be doing all of these things now?! If we're not, we should be!	6/12/2018
1450	69	/policies/renewable-and-carbon-free-energy/	These are good, but 10% renewables by 2025 is too low, and I don't see a number mentioned at all for 2040. If it's not 100%, we need to work out a better plan. There are entire countries in Europe that are there already!	6/12/2018
1451	0.1	/topics/land-use-built-form/	In the industrial area south of 24th street between Minnehaha and the LRT line, land use is production and processing but built form is Ransit 10 that doesn't allow single story. In Minneapolis, there is not going to be any production or warehouse facilities built that are more than one story. The economics just doesn't work.	6/12/2018
1452	33	/policies/affordable-housing-production/	Great goals, but no answers! At this point developers are allowed to build what ever they want at the market rate for both rentals and condo buildings. Developers should not be allowed to build more luxury apartments without adding a certain percentage of low income and moderate income units. (20% low, 40% moderate, %40 market rate). Increased density does not mean affordability. Restrictions need to be placed on developers.	6/12/2018
1453	1	/policies/access-to-housing/	I see increased density in the Uptown area. All luxury apartments; none affordable! The businesses are closing all around these apartments. There are many empty storefronts. So far I see nothing positive about this development in Uptown.	6/12/2018
1454	6	/policies/pedestrian-oriented-building-and-site-de	The public transit in Minneapolis needs massive improvements. In order to support all those that will live in a dense city, the public transit system needs to be more efficient! to take a bus from the lakes region to downtown can take an hour! Not all of us can physically walk and ride a bike downtown. There needs to be more express buses. The subway above ground!	6/12/2018
1455	0.1	/topics/land-use-built-form/	In the industrial area south of 24th street between Minnehaha and the LRT line, land use is production and processing but built form is Ransit 10 that doesn't allow single story. In Minneapolis, there is not going to be any production or warehouse facilities built that are more than one story. The economics just doesn't work.	6/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1456	0.1	/topics/land-use-built-form/	<p>Increasing density and destroying green spaces, the main goals of the 2040 proposal, along already housing-dense and traffic-jammed neighborhoods such as Nicollet Avenue are threats to the public health because they will damage the already fragile environment permanently. 2040 is in direct conflict with the 2013 "Minneapolis Climate Action Plan" to "Promote and strengthen green infrastructure and natural systems that can build resilience, sequester or reduce emissions, and improve our neighborhoods." (Page 23)</p> <p>The mayor and city council back then understood the facts that:</p> <ol style="list-style-type: none"> 1. Global warming "will have catastrophic impacts" on Minneapolis residents. (Page 1) 2. That those impacts include "intense heat waves, increasingly common more prevalent water-and-insect-borne diseases and a greater number of days with low air quality." (Page 5) 3. That these intense heat waves will result "in an increase in heat-related deaths and heat related illnesses" (Page 5) including asthma which, by the way is more common among children living in poverty. 4. And, that all these public health catastrophes are made worse or caused by an increase in pavement and buildings in a neighborhood and a corresponding decrease in green spaces. (page 5) <p>So, one of my questions to the writers and promoters of the 2040 proposal is who is supposed to benefit from this proposal? It certainly is not the current and future residents of already housing-dense and traffic-jammed neighborhoods like Nicollet Avenue unless those residents include property developers. It certainly is not those of us who live in these neighborhoods who care about the environment in which our children and grandchildren will live. It is not those of us who want to stop the effects of global warming on Minneapolis.</p> <p>So, ditch this plan and start again with real residents and the fragile environment as top priorities so that Minneapolis will remain a city we can breath in.</p>	6/13/2018
1457	66	/policies/air-quality/	Penn ave has two lanes for traffic, not enough to support 4 story apartments along it!	6/13/2018
1458	69	/policies/renewable-and-carbon-free-energy/	Density is only going to bring more people in, then more cars. Even on transit routes, still very few will use transit	6/13/2018
1459	14	/policies/tree-canopy-and-urban-forest/	Density where I live in south Minneapolis would make many residents, myself included, very unhappy, as there is not enough parking for dense neighborhoods, and density and apartments would ruin the neighborhood feel that draws so many people here.	6/13/2018
1460	13	/policies/landscaping/	<p>More housing = more people</p> <p>More people = more pollution and more cars</p> <p>...</p> <p>How is this going to work?</p>	6/13/2018
1461	75	/policies/waste-reduction/	We should turn our task into energy in a clean way, then nothing is wasted	6/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1462	17	/policies/complete-streets/	<p>I believe it is important to keep in mind walking, biking and transit during this planning phase but let's be realistic here - streets are designed and built for the purpose of automobile usage. I love to bike, and do so whenever it is possible. I also would take public transportation more often if it was efficient, but I live in Minneapolis and work east of St. Paul so there really isn't a possibility to either bike or ride public transit to work. I am not alone based on how many people there are on the on-ramp every day. Additionally, we need to keep in mind that we live in Minnesota and it gets brutally cold out for multiple months. Riding a bike just isn't practical for most. Nor is sitting out on a bench waiting for a bus. Let's not go crazy with our desire to make everything bike-friendly at the expense of being able to quickly get through town. A perfect example is what has been done on 26th and 28th avenues. I believe these streets were designed to: first, funnel drivers onto certain main streets and get them off neighborhood streets, second, enable drivers to quickly and efficiently get from point a to point b, and third, provide a corridor for emergency vehicles to quickly get where they need to go. With the recent change, all of these things are now gone. Additionally, the very few bikers that take advantage of these streets are now less safe than if they were to ride on the greenway - which is right there! Example, if I am traveling in a car eastbound on 28th street and approach Lyndale Avenue and need to turn right there is a turn-lane for the car that crosses over the bike lane (danger #1). Most drivers will look left to see if there are cars going south on Lyndale and if there is space they will turn right on red (legally). If a bike approaches behind the car and slides in on the right side (which I have repeatedly seen happen) and out of the drivers vision it will only be a matter of time before a biker is hit by a right-turning vehicle (danger #2). The greenway is a car-free zone and very safe because of that. We should be encouraging bikers to use that rather than mingle in with cars on busy streets.</p> <p>I have heard there is a plan to make Hennepin into a two lane road while replacing a lane and parking with a bike lane and rapid transit. I could not be more opposed to this idea. First, it will severely impact businesses on the street in a negative way. They rely on their customers being able to park in front, and removing parking will drive down business. Second, with the increased density into Uptown, more and more cars need to come in and out of this area, whether we want this or not. Creating a bottle-neck on one of the busiest roads will only drive cars onto the neighborhood streets, resulting in less-safe neighborhoods (and driving down property values and tax revenue). Despite some people's best efforts to force cars off the road, many people NEED to drive. Making it harder for them will only have negative impacts. The freeways were created years ago to help people get from one point to another efficiently. This same thought needs to be kept in mind regarding city streets. We need ways to efficiently move through the city, don't take away streets that were designed specifically for that purpose.</p>	6/13/2018
1463	80	/policies/development-near-metro-stations/	<p>prohibiting the establishment of park-and-ride facilities.</p> <p>How do you expect people to get to the nearest METRO station when it is raining/snowing or over 1 mile away? If you prohibit park ride facilities you will encourage single occupancy trips.</p>	6/13/2018
1464	34	/policies/affordable-housing-preservation/	<p>Create and strengthen strategies to retain naturally occurring affordable housing</p> <p>In the Near North side of Minneapolis which has the majority of Minneapolis's affordable housing this policy is in conflict with other policies that recommend an increase in density as the solution. Any removal of lower density housing to build higher density housing on the Near Northside will result in more expensive housing. Much of the increase in density proposed for the near Northside would allow densities similar to the warehouse district and that housing is way more expensive than most of the current housing</p>	6/13/2018
1465	42	/policies/expand-homeownership/	<p>The city should create some intensives to revive the building of for sale condominiums. Like making it a priority to lobby at the legislature to remove barriers for this type of construction and subsidizing builder warranty insurance</p>	6/13/2018
1466	0.2	/small-area-plans/	<p>I am commenting on the Seward Longfellow Greenway area plan. I am a resident of the 2600 block of 34th ave S. Specifically a homeowner and I am in strong opposition of any buildings going up around my home over 2 to 3 stories. Specifically apartment buildings or condos. Driving businesses out of the neighborhood seems like really bad idea. Also the thought of a towering 6 story building in my back yard is something me or my neighbors do not want to see. Seward is one of the oldest neighborhoods in the city, it has great charm and is a great place to live with a great sense of community. This would change dramatically with this plan. Not to mention affect mine and my neighbors property values immensely. I am sensitive to the need for housing in the city but I don't think 6 story downtown style buildings is the neighborhood. I have yet to talk to one of my neighbors who thinks this is a good idea. Single family homes or duplex's sure. NOT 6 STORY Buildings.....</p>	6/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1467	34	/policies/affordable-housing-preservation/	Create and strengthen strategies to retain naturally occurring affordable housing In the Near North side of Minneapolis which has the majority of Minneapolis's affordable housing this policy is in conflict with other policies that recommend an increase in density as the solution. Any removal of lower density housing to build higher density housing on the Near Northside will result in more expensive housing. Much of the increase in density proposed for the near Northside would allow densities similar to the warehouse district and that housing is way more expensive than most of the current housing	6/13/2018
1468	33	/policies/affordable-housing-production/	Affordable housing is a big priority, but there's another issue with housing that must be addressed when it comes to "affordable housing." We have a plethora of market-based "luxury" rentals popping up all over driving up the price of housing in this area. My fear is that people who are not considered low income, like myself, are going to be priced out of the heart of the city. Ten years ago I chose to abandon my car and commit myself to a true urban lifestyle. Two years ago I moved out of the luxury apartment I shared with an ex, and I decided to downsize to a studio in a small century old building with basically no amenities. My location is fantastic, but I'm paying \$745 per month for a 300 sq foot studio in the Stevens Park neighborhood. When I moved in my rent was \$665. I have no "luxury amenities" such as in-unit laundry and I barely have a kitchen. I can afford to upgrade to a nicer/newer apartment, but why should I, on a \$50K annual salary, have to spend half my check on rent just to live in a nice place?	6/13/2018
1469	1	/policies/access-to-housing/	will there be size restrictions for building on traditional city size lots?	6/14/2018
1470	33	/policies/affordable-housing-production/	How do we entice builders to build low income properties?	6/14/2018
1471	34	/policies/affordable-housing-preservation/	great idea for multigenerational housing	6/14/2018
1472	82	/policies/aging/	As many baby boomers will not have adequate family support, could we examine the opportunity to provide adult day programs in much the same way we provide childcare now? Could rec centers be redesigned for this purpose? Allow adult children the opportunity to work while their aging parents are cared for?	6/14/2018
1473	19	/policies/bicycling/	I would really like to see the bicycle trail extended from columbia park at Central avenue, along the tracks all the way to 37th Ave at the border of the city limits included.	6/14/2018
1474	20	/policies/transit/	I would love an increased investment in transit! I would use it more often.	6/14/2018
1475	1	/policies/access-to-housing/	Policy or action steps should expressly include proactively mitigating historic redlining.	6/14/2018
1476	19	/policies/bicycling/	I feel like I'm getting bicycled right out of my home in Uptown. I love to bike and do so regularly, but I also need to drive for work, school and more and with the changes to 28th and 26th streets and proposals to make Hennepin more narrow, I am incredibly frustrated at how difficult is getting to get in and out of our neighborhood. This should be a place for everyone - not just young people who bus and bike, but families, older people and others who also use personal vehicles for transportation.	6/14/2018
1477	1	/policies/access-to-housing/	You seem to be trying to force us out of our cars without anywhere near adequate transit. And biking and walking do not work when it is 30 below and 2 new feet of snow, not to mention the elderly and moderately disabled. As well as transporting young children, trunkloads of groceries and sundries, getting to work outside of the city or to employment not located along our limited transit. Considering the initiative of allowing mixed use housing "everywhere", already the variances granted to developers pushes the above outlined policies well past the parameters presented.	6/14/2018
1478	1	/policies/access-to-housing/	I don't see how any of this supports affordable housing. Developers are building amenity filled units that attract high rents, high profits.	6/14/2018
1479	33	/policies/affordable-housing-production/	Where is the HOW of this policy? I only see dreams.	6/14/2018
1480	34	/policies/affordable-housing-preservation/	Again, shouldn't these strategies already be outlined to move forward with any kind of plan? The plan is not fleshed out here at all.	6/14/2018
1481	35	/policies/innovative-housing-types/	What exactly are the policies that pose barriers? Changes need to be proposed in a plan in order to support the plan. As an important and workable policy I would have expected to see definitive action steps.	6/14/2018
1482	36	/policies/innovative-housing-strategies/	Absolutely, now again the how? What kind of strategies, tools and opportunities have been discussed. Many of us would like to support initiatives to increase affordable housing but we do want to see what your actual ideas are first. Dreaming is easy, putting together workable plans should already be here.	6/14/2018
1483	31	/policies/creative-workers/	Mpls needs to address affordable art studio space. Once the artists move in an area it becomes attractive to development and building owners are driven to converting affordable art space to profit. The city could help the owners by providing property tax breaks, low cost redevelopment loans / grants, forgoing permit fees, etc.	6/14/2018
1484	23	/policies/coordinated-development-strategy/	This feels like it is paternalistic, a top-down, city-driven process to reinvest in communities that have historically been harmed by those kinds of planning processes. Whether that is the intent is irrelevant; how can this be rearticulated to clarify that it's a community-driven partnership with the City to chart those historically disinvested neighborhoods' futures?	6/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1485	0.1	/topics/land-use-built-form/	I wish I could state more eloquently...This is an awful plan! We currently live 2 doors in from 50th Street and can hardly drive down our street in the winter! We have a few rental properties on our street which adds to the congestion: 6 tenants - 6 cars, etc. Add to that our street is used for parking for the businesses on 50th. We would really like to have more time to be convinced that this plan is a livable one. Also would like to see some data that supports the assertion that more affordable housing would become available.	6/14/2018
1486	37	/policies/mixed-income-housing/	Again, I think we are back to how and where to develop and support affordable housing. I can't see that it is possible to put lower income housing in high property tax areas. Those who have worked and scraped and saved and renovated and sold to buy up and did it again to buy up and can FINALLY afford the property tax to live in certain areas are ALL welcome to live where they wish. But how does one who has not been through all that, improved financially through hard work and sweat equity afford the property tax? So what exactly is being proposed here? Again, slim on the details which makes it hard to support the proposal.	6/14/2018
1487	1	/policies/access-to-housing/	I live in south Minneapolis in a small house on a small lot. I paid a premium for this privilege and continue to pay very high taxes, as well. I worked hard for 40 years to afford this. I oppose this measure, as it will change the look and feel of my little neighborhood, making it much less desirable.	6/14/2018
1488	38	/policies/affordable-housing-near-transit-and-job-	This makes perfect sense as a starting point, and in fact has begun but for a high rent market. Identifying properties is one thing, how will you recruit and select developers? It seems to me it is to their benefit to build high end and charge premium rents. Lets put an end to granted those developers nearly every variance they request and save those approvals for affordable housing developers. I also like a proposal I have heard that awards property tax rebates for multi unit housing with less than 10 units that hold rents to affordable limits. I understand this is already approved for Larger units? I would MUCH rather see it for smaller units to preserve the quaint but well built older units with character that suits the community. As this initiative develops it is imperative that transit continue to improve. Currently transit options are far to limited to think we can reduce the use of cars.	6/14/2018
1489	80	/policies/development-near-metro-stations/	Some good ideas here and I am glad to see actionable steps.	6/14/2018
1490	39	/policies/fair-housing/	I would really like to see exactly what has been identified as CURRENT barriers, we are well aware of research into previous barriers. I believe I have also seen that inroads have been made with lenders/banks to locate strategically in our city to make progress on that specific barrier. But I do think most of us need clear and transparent information on these barriers and proposed actions in order to lend more support to this initiative specifically.	6/14/2018
1491	40	/policies/homelessness/	Clearly funding will be required, what is the proposed source? I personally monetarily support youth facilities but of course the need is great. Employment and training efforts are critical as a long term solution for the able bodied.	6/14/2018
1492	35	/policies/innovative-housing-types/	Please do not allow a blanket multi-plex zoning all over the city. please please please. i love our quiet neighborhood. i understand the need for more housing but do we have to ruin quiet areas? there are plenty of areas that are already bustling. keep the multi-plexes to those areas and allow the quiet SINGLE FAMILY HOME areas to STAY single family home. It would keep DIVERSITY of housing throughout the city. People would be able to have a CHOICE of how they want to live. Making the blanket zoning would, in my opinion, ruin it. please don't.	6/14/2018
1493	33	/policies/affordable-housing-production/	I love our city. I was born and raised in the Camden neighborhood, went to the U, worked in downtown and now live in Page. Except for a year and a half in graduate school, I have never lived nor wanted to live anywhere else. We have the best parks; empowering schools (I am a proud Henry grad and my children are amazing Millers); thriving downtown; and a fabulous art scene. My neighborhood is wonderful for various reasons, but the most important reason is being threatened by Proposal 2040. The quiet peace we find in our little 'hood is a respite from the bustle we know and love in the other parts of the city, only a stone's throw away. The streets of our neighborhood have taught my children how to drive and parallel park, something I think would not be nearly as pleasant with increased traffic and street parking. I also love the stability of our neighborhood. We know every single person on our block and almost everyone on the other handful of blocks in our little community. I would love to see more affordable housing. I worked hard to support the building of Creekside Commons just a half mile from my home. It would be wonderful to find more fourplexes along bus routes such as Nicollet or Portland Ave, both shouting distance from me, but to have them in amongst the quiet of our neighborhood would just all but ruin it for me. Seriously. Please do not allow these fourplexes to be built within peaceful, quiet neighborhoods. Thank you.	6/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1494	42	/policies/expand-homeownership/	<p>Good ideas, exactly how can they be implemented? What specifically are the current barriers? What specifically are the plans to overcome those barriers? The intro states: " These actions are not just investments in filling the financial gap between the cost of a home and what buyer can afford". Sorry, cash handouts are not acceptable. Education and counseling and removal of identifiable barriers are important. Sweat equity and personal financial equity is critical to long term wealth building. Handouts solve nothing long term.</p>	6/14/2018
1495	1	/policies/access-to-housing/	<p>I believe the lack of affordable housing is a huge concern. When we moved to the city, we had to pay \$840 for a tiny one-bedroom in an area where we had to rent parking and pay for storage, resulting in a monthly bill over \$1,000! (From a well-known slumlord, by the way). I fully support the idea of higher density housing near and around downtown, and more density along major transit lines. I think housing should be built all over the city.</p> <p>I think the proposal to allow four-plex units to be built on single-family lots in low-density neighborhoods is a foolish solution, though. Single family homes are going for shockingly high rates right now. For a developer to buy and demolish a single-family home and turn it into a four-plex would be cost-prohibitive. The only way to recoup that money would be to turn the apartments into luxury apartments and charge a ton of money. That won't boost affordable housing a bit. Subsidizing the building or rental of a single building into a four-plex is cost prohibitive, too -- very little bang for a lot of buck.</p> <p>The unintended consequences are great, too. Allowing four-plexes to be built on any city lot will change the quality of life in neighborhoods where people have saved their whole lives to have a home. It will mean more noise, more traffic, more parking messes, more congestion, more wear and tear on streets and other infrastructure and more pollution.</p> <p>It could mean a building towering over the garden I've saved 49 years for, blocking all my light. This is deeply personal to people. My husband and I are really worried about this. We finally were able to afford and buy our first home two years ago (in our late 40s!). We moved back home to Minneapolis from Chicago a few years ago due to all the issues above. The congestion, noise and traffic got so stressful, it felt like we were living a reduced quality of life. (I didn't appreciate the comment from the city council member about how Minneapolis could be just like Chicago. Why would that ever be a goal? Chicago doesn't have Minneapolis' energy, vibrancy, focus on environmentalism, excellent bike paths, investment in infrastructure, etc. etc. It does have a lot of debt and a lot of corruption.) I think there are smarter solutions that won't change the nature of our neighborhoods while still meeting a crucial need:</p> <ol style="list-style-type: none"> 1) Require more density along transit routes and major streets (nicolett, lake, etc.) 2) Allow more four-plexes on corners or busy streets 3) MAKE builders set aside a certain percentage of affordable housing in each new development (apartment/condo). 4) Hold builders accountable to make sure they're providing the agreed-upon percentage of affordable housing by asking them to provide income verification and do "sting" operations to make sure they're not steering away renters/buyers. 5) Work with builders to turn vacant lots into nice, size-appropriate complexes. 6) Make sure Section 8 vouchers are being honored! 	6/14/2018
1496	1	/policies/access-to-housing/	<p>I have concern about accessory building use as a dwelling space. We have tiny, tiny lots in the city, especially in the less affluent neighborhoods. Dwelling spaces in accessory buildings would work around lot line restrictions and put us into very close contact with neighbors, increasing noise.</p>	6/14/2018
1497	36	/policies/innovative-housing-strategies/	<p>I love our city. I was born and raised in _____ neighborhood, went to the U, worked in downtown and now live in Page. Except for a year and a half in graduate school, I have never lived nor wanted to live anywhere else. We have the best parks; empowering schools (I am a proud MPS grad and my children are amazing Millers); thriving downtown; and a fabulous art scene. My neighborhood is wonderful for various reasons, but the most important reason is being threatened by Proposal 2040. The quiet peace we find in our little 'hood is a respite from the bustle we know and love in the other parts of the city, only a stone's throw away. The streets of our neighborhood have taught my children how to drive and parallel park, something I think would not be nearly as pleasant with increased traffic and street parking. I also love the stability of our neighborhood. We know every single person on our block and almost everyone on the other handful of blocks in our little community. It would be wonderful to find more fourplexes along bus routes such as Nicollet or Portland Ave, both shouting distance from me, but to have them in amongst the quiet of our neighborhood would just all but ruin it for me. Seriously. Please do not allow these fourplexes to be built within peaceful, quiet neighborhoods. Thank you.</p>	6/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1498	41	/policies/tenant-protections/	I lived in Chicago a number of years, and while there is not much I'd suggest we look to as a model, the tenant rights policy is MUCH stronger than in Minneapolis. We rented from a terrible slumlord and were shocked to find out how poor our options were.	6/14/2018
1499	42	/policies/expand-homeownership/	please make info about home buyer classes and low-income housing programs more widely available. there is no central place we could find while buying a home.	6/14/2018
1500	43	/policies/housing-displacement/	I think we should sever the homestead exemption from rising property taxes. it is ridiculous we're paying more in property taxes and getting a lesser homestead exemption simply because home values are hyper inflated beyond common sense right now. it's not like we bought a fancier home. the homestead exemption should stay the same.	6/14/2018
1501	23	/policies/coordinated-development-strategy/	we live in powderhorn, certainly one of the areas you talk about. please make sure you consider resident input, and hold meetings that are well-publicized. when we moved into our home, i called the planning department to find what was planned for our area. they sent me to a guy who never got back to me, and in this market, there was no time to make a trip downtown to city hall. please provide info about development plans, including zoning, online!	6/14/2018
1502	46	/policies/healthy-housing/	consider programs to help remediate radon	6/14/2018
1503	47	/policies/housing-maintenance/	please do c. city classes on home maintenance would be excellent.	6/14/2018
1504	78	/policies/park-design-and-programming/	Please add an equity category. We live in Powderhorn, and I'm always shocked by the disparities between our city parks. Have you seen the water quality in the pond there? We don't have working drinking fountains on the path around the pond in mid-June. Compare that to Lake Harriet, which has a bird sanctuary, a real warming house, and a snack shop/beer shop, and a full stage. Our walking paths aren't maintained like those around Nokomis in the winter. The staff and programs are excellent, but people in more affluent areas of the city should not have more resources in their parks!	6/14/2018
1505	84	/policies/public-safety/	MPD policies are missing here. Highlight deescalation training, requirements and accountability for failing to use deescalation techniques. Name reducing racial disparities in MPD interactions, whether it's quality of life crimes or traffic stops or anything else. Also, this policy should be listed as supporting the "reduce disparities" goal.	6/14/2018
1506	26	/policies/vision-zero/	Eliminate all references to enforcement until the MPD has eliminated all racial disparities in their data.	6/14/2018
1507	19	/policies/bicycling/	We need more protected bikeways to encourage less courageous cyclists to use their bicycle as a mode of transportation.	6/14/2018
1508	1	/policies/access-to-housing/	Homes closer to public transportation should be given to lower income family or they should have the priority because many of these families do not owe a car or share their transportation. This will give this families more disposable incomes.	6/15/2018
1509	2	/policies/access-to-employment/	Allow for entrepreneurs and minority business owners greater access to affordable office spaces. Subsidize office spaces or shared equipments.	6/15/2018
1510	2	/policies/access-to-employment/	Encourage all typea of businesses rather than large ones.	6/15/2018
1511	57	/policies/cluster-strategy/	The above doesn't make sense to me: "Promote business clusters using through focusing resources and regulatory policies toward developing and retaining businesses in a number of discrete sectors that demonstrate opportunity to advance City goals and enhance the region's economic strength." What is through focusing? I don't understand what the goal is. Please explain.	6/15/2018
1512	55	/policies/business-innovation-and-expansion/	The line: "Explore zoning modifications that reduce or eliminate barriers to innovative and alternative uses of space, especially for smaller-scale entrepreneurs" concerns me. I am wary of the 2040 plan that seems to want to rezone the whole city for business and multi-family dwellings. Is this the end of peaceful single-family home neighborhoods in our city?	6/15/2018
1513	25	/policies/innovations-in-transportation-and-infras	I am happy to have a city that is more bike friendly. Whole lanes, not just bike lanes, reserved for bikes would be great.	6/15/2018
1514	23	/policies/coordinated-development-strategy/	This is a vague description to me. It is unclear what "district-wide development plan" is. Is this another point in 2040 to say that there should be a city wide re-zoning? If so, why? Why the rush to push out single family home neighborhoods that are within walking distance of apartments, multi-plexes, and businesses? Why does EVERY neighborhood have to be zoned for business and multi-family structures?!!!!!!	6/15/2018
1515	17	/policies/complete-streets/	I am very happy to see that bicycles are a priority to the city.	6/15/2018
1516	76	/policies/new-parks/	Being within a 10 minute walk of a park is a huge asset. Another huge asset is being a 10 minute bike ride from a park. With safe infrastructure a bicycle significantly increases your range. Consider making safer off-street riding options for youth and adults to gain confidence on their bike so they can gain independence and reduce their dependence on their car.	6/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1517	78	/policies/park-design-and-programming/	It's time we start treating the bicycle like the powerful tool it is. If we create space for people to learn and explore on their bikes we create opportunities for programming to occur and we bring bicycle advocacy to the forefront and to the residents who don't currently think bicycling impacts them. Bike parks equal improved opportunities and access for all walks of life.	6/15/2018
1518	77	/policies/park-access/	You are correct, improving on street and bike path infrastructure are very important, but something that is equally important and often overlooked is the places the youth in Mpls learn to ride their bikes. They have the street, sidewalks and an occasional empty parking lot to ride. That isn't nearly enough space and it definitely isn't safe or exciting. We need to create a network of off-road trails and bike parks throughout our city to give the 70,000 kids under the age of 14 places to learn and explore on their bikes. If we do that we engage that population and their parents to become bike advocates. We also promote active transportation and provide exciting outlets for kids to connect with nature.	6/15/2018
1519	53	/policies/quality-of-life/	Mpls needs to embrace a quality of life similar to Bentonville Arkansas. If we are able to blend the arts with cycling and the other amazing parts of our city we will be able to attract and maintain a talented workforce for years to come. Take a look at this site, it will give you an idea of what Mpls should do to follow their lead. https://becausebentonville.com/	6/15/2018
1520	76	/policies/new-parks/	I love this, everyone should be 10 minutes from a park no matter what part of town they live. Better yet 10 minute walk or bike to a bike park or bike playground. We should embrace our image as a top bike community and begin to use our bikeable city to access bike parks, which teach young riders valuable skills and build confident riders who in turn become drivers who think and see commuters.	6/15/2018
1521	31	/policies/creative-workers/	Provide support/guidance/funding for apprenticeship programs for all people. Jewelry, painting, sculpture, fiber, metalsmithing, glasswork, all of these need assistants, but artists find it hard to pay them. A great way to learn trades/crafts and build a resume in the arts and crafts!	6/15/2018
1522	8	/policies/public-safety-through-environmental-de	It's wonderful to have a sense of what you can do for future designs, which is always sexy for urban designers. However, please don't lose sight of the existing infrastructure of public spaces that are NOT conforming to CPTED guidelines. Simply lightening and placing cameras, which no one's watching until after ~ post hoc ~ a crime is committed, in hopes of finding the perpetrator. Please consider some of the techniques employed in Europe to slow streets down, such as: https://www.pps.org/article/livememtraffic . These can be implemented in existing streets, particularly those in residential neighborhoods. Transportation planners used to be praised for the volume of traffic they could get through the transportation arteries; today they would be scorned for driving so much traffic through residential neighborhoods where children play, the elderly use crosswalks, and parallel parking unfortunately transforms halcyon neighborhood streets into gauntlets for escaping car thieves, drug dealers, and burglars trying to get to the Interstates, where they can escape apprehension.	6/15/2018
1523	7	/policies/public-realm/	Please think more human-scale (rather than as watercolor street art projects) and focus on "activity spaces". The current concept lacks an understanding of how social interactions are what drives the creation of common spaces; they are not simply meant to be pretty renderings.	6/15/2018
1524	6	/policies/pedestrian-oriented-building-and-site-de	I love this. So important to encourage development that values walkability, bike and transit, as well as channels a welcoming spirit.	6/15/2018
1525	11	/policies/skyways/	Sensible plan, especially regarding the retail use being on ground level. Skyways may make sense for transportation, not for retail and community building.	6/15/2018
1526	10	/policies/street-grid/	Does this mean the street grid will be restored in places like the Lyndale and Linden Hills neighborhoods where diverters were put in to cut off traffic?	6/15/2018
1527	59	/policies/downtown/	The intro to this section exaggerates the success of Minneapolis' downtown. It had the same (or more) workers and far more retail when I moved to the city in 1992. This Policy ignores that street frontages downtown are bleak and dominated by empty retail, blank walls, and/or parking lots/ parking ramp entrances. Unlike other major cities, there are no museums, movie theaters, or student housing bringing in younger residents. It's all about sports ball facilities, bars,/strip clubs, and office towers. All the new residents don't seem to make the CBD any more interesting. I find downtown pretty depressing.	6/15/2018
1528	19	/policies/bicycling/	Please connect existing bike networks that abruptly start/end at dangerous intersections such as the intersection of Broadway Ave and Johnson Street.	6/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1529	22	/policies/downtown-transportation/	The \$50 million reconstruction of Nicollet Mall is a huge disappointment. Public Works and the Downtown Council mismanaged the project resulting in an underwhelming and bleak street, while managing to kill off the Barnes & Noble, Macy's, and other retailers. All this plus the street remains painfully slow for local buses. Yet, we need to reserve both Marquette and 2nd Avenues for suburban people riding coach buses into downtown? The old, white men making these decisions should be fired.	6/15/2018
1530	22	/policies/downtown-transportation/	The Action Steps above are more of the same stuff that isn't working now. The only way to make downtown streets comfortable for people walking is to reduce the amount of space dedicated to moving cars. The streets/ crossings are too wide, traffic moves too fast, and there is hardly retail left at street level. If retail does exist, it gets located on the skyway level and closes by 5pm. Parking facilities and entrances are located on nearly every block face, which makes for a poor pedestrian experience. This Plan should propose more bold things like eliminating new parking in the CBD, creating pedestrian or bus-only streets, and removing the one-way street pattern. This vision for 2040 is underwhelming.	6/15/2018
1531	11	/policies/skyways/	Either downtown will be lively and walkable at street level or we'll continue to promote and expand the skyway system. Stop pretending that both can exist with positive results. Also, whoever wrote Action Steps C-E has no idea how the skyway system works now. They are mostly owned and maintained by PRIVATE property owners who do not have to open their skyways, put in standard signage, or rebuild their lobbies to make skyway access visible from the street. Stop allowing more skyways and start tearing others down. Finally, the City allows the Downtown Council to coordinate the skyway system including by staffing and influencing the Skyway Advisory Committee. Every other City commission or advisory committee has City staff coordinating their work not a business organization.	6/15/2018
1532	1	/policies/access-to-housing/	I support all of the points above, but I want to add that the housing added must be affordable. Nearly, or perhaps all of the condos recently built in Uptown have been luxury condos. This gentrification is awful.	6/15/2018
1533	14	/policies/tree-canopy-and-urban-forest/	I agree with the above points, but wanted to add a note regarding retaining mature trees: There needs to be some sort of tree treating program where if a homeowner gets a tree treated by a contracted-with-the-city arborist at a discounted rate, it will prevent that tree from being cut down just for disease prevention.	6/15/2018
1534	5	/policies/visual-quality-of-new-development/	love it	6/15/2018
1535	19	/policies/bicycling/	The City is going in the right direction with its bike infrastructure plan! The implementation of "emerging best practices" is encouraging. I would like to see more curb- or grade-separated bikeways such as what is found on Washington Ave and what is standard in modern infrastructure-leading Copenhagen.	6/15/2018
1536	10	/policies/street-grid/	What is meant by "relinquishing the City's ownership over vacations as a last resort, in order to preserve the network of city streets and arterials?" Is there a typo here? I can't understand the sentence at all.	6/15/2018
1537	17	/policies/complete-streets/	It's wrong to squeeze out cars. Parking is still needed and will still be needed. People over 56 start to feel muscles aging and riding a bike becomes more difficult. Hey a healthy minded 70 year old is NOT able to ride a bike 10 miles in the city. Our bus system doesn't serve Northeast and North the way it works in South Minneapolis. Long walks to catch a bus and irregular service! Baby boomers still live and will need to use their cars to get around.	6/15/2018
1538	11	/policies/skyways/	I fully support this policy. The skyways are really beneficial when working downtown. I especially agree we need new signage and maps so I'm excited to see that include in point D. I even have an idea to use subway style maps for the skyway. Those thoughts are outlined here: http://www.citypages.com/news/minneapolis-lovehate-relationship-with-the-skyway-and-how-to-make-it-suck-a-lot-less/414065113	6/15/2018
1539	33	/policies/affordable-housing-production/	Thank you!	6/15/2018
1540	34	/policies/affordable-housing-preservation/	Start by holding back "luxury condo units" or "luxury" anything. Simple, safe and clean materials should be doable. WHO is able to afford those luxury units???	6/15/2018
1541	1	/policies/access-to-housing/	Yes, on the multi generational housing.	6/15/2018
1542	29	/policies/creative-sector-economy/	Yes allow denser housing along Metro transit sites.	6/15/2018
1543	30	/policies/arts-and-cultural-assets/	Yes, I like these goals. Someone needs to make the connections to the philanthropic community. The built environment needs to be planned with the real estate sector.	6/15/2018
1544	31	/policies/creative-workers/	The long term vision of the arts program should focus on ART AS A THINKING tool. Movement of any type helps put ideas into place. Drawing of any type, scribbling even helps to get ideas out of the brain and into the world.	6/15/2018
			I like all of these action steps. We need to provide a paycheck for artists doing this work. Too much of it is now volunteer.	6/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1545	32	/policies/arts-in-community-development/	I like all of these action steps too. Great work!	6/15/2018
1546	33	/policies/affordable-housing-production/	In the NE Arts District we should see more artists offered the opportunity to purchase houses there. Artists can get the money for this purchase. What happens now is that realtors don't give artists first choice or even any choice. It's a bidding war! Living beside your work area or near the work area is best. It should be planned for all housing. Houses should be planned around the manufacture areas.	6/15/2018
1547	0.1	/topics/land-use-built-form/	I live on the 3000 block of Colfax Ave S, a residential block that is all houses and this built form map calls for the unacceptable consolidation of lots to build larger buildings (interior 3). Did city staff visit each block before creating this map - seems unlikely. Also, this built form map is not in alignment with the Uptown Small Area plan that many neighbors spent over a year on. This has the potential to make my block an unpleasant place to live. This must change.	6/15/2018
1548	34	/policies/affordable-housing-preservation/	I have lived in my home in Longfellow since 1992. When I moved in, it was still an affordable working-class to middle-income neighborhood. Several of my neighbors grew up in the neighborhood and now own homes. It suffered from the racial segregation typical in the city (very white..), but that was slowly changing. Now, with the advent of developers, this neighborhood is losing its character and affordability. Small, very affordable homes are bought up, torn down, and replaced by single-family homes that cover as much of a given lot as they legally can. Most of the existing vegetation on the lot, including mature trees, is destroyed. The little bit of land left not filled by a Mc-mansion has bits of grass, and maybe a little new tree (I have noticed that those people who do not value mature trees are always willing to plant a little one..). The new house is generally more than a story higher than the houses on either side. This means that the house on the north side of one of these houses will never see the sun	6/15/2018
1549	34	/policies/affordable-housing-preservation/	I was in the middle of a comment when mine was submitted (too verbose, I guess). Big new houses in Longfellow 1.block the natural light to the neighboring houses. 2.Destroy existing affordable housing 3.increase the amount of paved/developed land. (This is a problem because many of my neighbors have problems with water in their basements. There are undiagnosed ground water issues here) 3.Increase the market value of existing homes. Some of my neighbors think that this is good. I am not happy that my home value jumped \$100,000 in the past ten years. This raises my taxes and makes my neighborhood un-affordable, even for people like my neighbors or me. Not good. Andrew Johnson once explained to me that this area doesn't have tighter development controls because it isn't considered to be architecturally significant. I'm sure that Mr. Johnson isn't responsible for this view, it is simply the discriminatory view of those more upper-class folks who do not value affordable neighborhoods. I think that NE Mpls may be suffering a similar fate. It seems that in this situation, we do not need more funding so much as we need MUCH tighter regulations about what can be built, and where. Developers who object, claiming that this is an assault on their rights, do not acknowledge the effect that their development has on the neighborhoods they choose to target. I get solicitations every day from people looking for desperate homeowners (we will pay you cash! you don't have to even clean the place!). After the last real-estate bubble burst, I saw several families having to move out of their affordable homes which were subsequently sold off and torn down, replaced by houses that none of their neighbors could afford. The neighborhood could certainly use more high-density affordable housing. That's not what we are getting. It seems to me that this plan says nice things while at the same time simply allowing "market forces" (bullying by people with money, really) to plunder the existing neighborhood. Please, tighten-up the redevelopment regulations now. We have already lost too much. Sincerely, Gretchen Harry 4209 45th Ave S Mpls	6/16/2018
1550	70	/policies/ecology-and-habitat/	You build too much, love concrete (gross) and destroy natural areas, and then beg for money saying you don't have money to do maintenance on parks and trails. People go to parks to feel that they are away from the city and not in a parking lot. You've totally destroyed Wirth Park, taken a peaceful natural area and turned it into a four season race track and then put an extremely noisy volleyball court across from beautiful pond setting. You should really call yourselves the "Park Destruction Board".	6/16/2018
1551	0.1	/topics/land-use-built-form/	We all tried this before, we built these terrible homes with the help of the city in the 70's and allowed whatever cheap design the developer wanted and put these right in the middle of bungalow's with out regards to neighborhood design or the style of the surrounding homes..we still live with these eye sores today... thanks for destorying our beautiful bungalow community... I hope the first high density home goes next to yours...	6/16/2018
1552	0.1	/topics/land-use-built-form/	There is a need for housing at all levels of income, why are we picking winners and losers, I know a couple who lost their prospective home to a developer because the developer was assured they could build a building that would not adhere to the the current zoning laws. This young couple were going to invest and fix up the house, now values of homes around going down all around this property, instead of increasing which would have been the case with a couple willing to fix it up....	6/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1553	0.1	/topics/land-use-built-form/	What is the plan to help the people who have been great citizens of this community and now looking at a huge reduction in the value of their property when these huge terrible looking homes go next to them? Who are protesting these people?	6/16/2018
1554	0.1	/topics/land-use-built-form/	Why are you having public input to this? You have already implemented it...we have seen the counsel zoning meetings and the always side with the development of these new high density houses..	6/16/2018
1555	0.1	/topics/land-use-built-form/	What's the plan to help reduce the property taxes for the great citizens who are now being forced to live next to these huge high density houses? We have seen it happen already, values are going down... don't kid yourself...	6/16/2018
1556	1	/policies/access-to-housing/	Sounds good.	6/16/2018
1557	0.1	/topics/land-use-built-form/	<p>"Excessive Heat Wave Warning Triple Digit Heat Indices June 15- June 16, 8PM, 2018" Kare 11 Meteorologist Laura Betker</p> <p>"Heat Indices 95-100 degrees until tomorrow" NPR's Ron Trenda, June 16, 2018</p> <p>"Heat Index of 95-100 degrees until tomorrow" KSTP's meteorologist Sam Ryan, June 16, 2018</p> <p>Summer hasn't even officially begun.</p> <p>Why are the City Council and the Mayor proposing an increase in the density of crowded neighborhoods like Nicollet Ave and a corresponding destruction of green space when we are already suffering the effects of global warming in Minneapolis caused, in great part, by those two things??? It seems that you are either ignorant of the catastrophic public health impacts of the destruction of green space and the environment or you don't care.</p> <p style="text-align: center;">STOP NOW!</p> <p>Begin Again and put the residents first in your proposal. Ignore the property developers or we will be another Los Angeles or just as bad, another Uptown.</p>	6/16/2018
1558	11	/policies/skyways/	You need to include improved provisions for public toilets. Accessibility Trying to find public toilets is a nightmare downtown and almost impossible on the skyway. Stop for food and you can't even wash your hands. Ask where a toilet can be found and the staff will give you vague directions with little hope of finding one. Toilet locations need to be on every skyway map and signage should be uniform.	6/16/2018
1559	74	/policies/integration-of-water-management-into-	Bioswales that are required on private development need to have signage indicating what they are, and posted prohibition the use of pesticides, weed killers, and fertilizers. The average Joe hired to maintain these areas immediately sees weeds and douses them with chemicals to kill the very vegetation installed to stop the chemicals from reaching the river or groundwater. This scenario eventually plays out in every Bioswale in the city.	6/16/2018
1560	11	/policies/skyways/	Get rid of them. They contribute to the lifelessness of your downtowns. I was astounded by the lack of people on the streets on coming here; I knew nothing of the skyways. A few weeks after disembarking on the SS Minneapolis, I happened to look up - naked mole rats! That's what one sees, rather than a vibrant, engaged life on the streets.	6/16/2018
1561	14	/policies/tree-canopy-and-urban-forest/	Sounds good. I also strongly suggest you support the planting of prairie plants and native forbs in public places; get rid of the boring monoculture that is Kentucky Blue Grass! Birds and bugs would thank you, that's fore sure.	6/16/2018
1562	18	/policies/walking/	Conflicts with your policy on skyways, right?	6/16/2018
1563	13	/policies/landscaping/	Take a serious look at irrigation systems - don't they just waste water? Or could their use be permitted only if they use grey water or redistribute rain water? Plant species used should be the type that don't require watering. Also, herbicides and pesticides harmful to pollinators should be banned. Go door to door collecting up all the bad stuff, replace with organics that are acceptable. Like a one-time amnesty with lots of education.	6/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1564	74	/policies/integration-of-water-management-into-	We are seeing lots of variances for setbacks around the city. This is clearly bad for water and air quality as well as for the human environment. We really, really need to enforce setbacks, require that developments include greenspace, and maximize permeable surfaces.	6/17/2018
1565	0.1	/topics/land-use-built-form/	Building monstrous fourplexes on single family home lots in the interior streets will not only take away from the neighborhood and destroy the most affordable single family homes in the city, it will also create a traffic nightmare during the winter. Why can't we discuss building more affordable housing on transit routes where it makes sense for people to not require cars, they can literally walk out the front door and step on the bus. We don't want to see the integrity of our neighborhood demolished along with the homes that are by far the most affordable for growing families, only to have a large apartment building which will inevitably charge rent that is not affordable.	6/17/2018
1566	19	/policies/bicycling/	The bike lanes are causing problems with traffic flow through out the city. We don't need a bike lane on every street. Keep in mind - there are a large number of commuters that need to drive in the city to get to work, etc. and that won't change.	6/17/2018
1567	11	/policies/skyways/	I think skyways have actually contributed to the deterioration of downtown. There is a lack of foot traffic on the street level which contributes to an increase in crime on the streets. Businesses in the skyway are also only open for a few hours over the lunch hour which makes it hard for restaurants to be successful in downtown. There isn't much of a draw to bring people into downtown and our downtown lacks vibrance like other major cities as a result of having all business on 2nd floor skyway level and not having street level access.	6/17/2018
1568	1	/policies/access-to-housing/	Please spread low income housing across the whole city!!!! Not just in North Minneapolis. Concentrated poverty is not good for communities, we need diversity of income in our communities for them to survive and be safe. Please listen to the voices in North Minneapolis, we are important. North needs to thrive and violent crimes needs to decrease!	6/17/2018
1569	14	/policies/tree-canopy-and-urban-forest/	Make sure you diversify tree species, especially given the damage done to Ash trees and others....	6/17/2018
1570	13	/policies/landscaping/	All fine to expect landscaping with new developments but history has proven that landscaping needs constant attention and that is NOT required. Not only is it not required it is often forgotten or ripped out.	6/17/2018
1571	25	/policies/innovations-in-transportation-and-infras	Nice ideas, but for the drones. The cost complications to using them in an urban setting do not justify the advantages. And in fact, having skimmed through the previous 24 policies, I have seen marked departure from realities from many of them. These are aspirational. But which is more important, which less, and on which axis of comparison? You're using birdshot, and aiming at far too many birds. We'd be better off with greater concentration, accompanied by some analysis, on fewer subjects,	6/17/2018
1572	6	/policies/pedestrian-oriented-building-and-site-de	Please develop programs to encourage safe bicycling by following existing traffic laws. Bicyclists who disregard and disrespect traffic laws are delaying the acceptance of bicycles as a legitimate form of transportation.	6/17/2018
1573	14	/policies/tree-canopy-and-urban-forest/	Having lived in Mpls long enough to see the Dutch Elm Blight, the Gypsy Moths, and now the Emerald Ash Borer, has Mpls Forestry finally figured it out? Do not plant an entire block or neighborhood with the same species!! In fact, there should be a very large portfolio of good urban trees that can be planted so that there are never large groups vulnerable again. And if one single tree gets sick and must be removed, isn't one better than the entire block?	6/17/2018
1574	15	/policies/transportation-and-equity/	I don't understand how eliminating driving and/or parking lanes (Emerson N, Fremont N, etc) in residential areas improves "equity" for anyone. Especially when the new, seldom used bicycle lanes are used as passing lanes by cars!	6/17/2018
1575	21	/policies/freight/	Step up the enforcement of illegal parking of semi trucks and other large commercial vehicles in North Mpls. Parking enforcement should automatically tag those vehicles rather than waiting for a 311 complaint.	6/17/2018
1576	25	/policies/innovations-in-transportation-and-infras	How about giving incentives for developers to install EV charging systems in the garages or parking areas?	6/17/2018
1577	34	/policies/affordable-housing-preservation/	These policies are in direct contradiction of recommendations to increase density. Those areas with the greatest proposed increases in density are also areas that have the largest stock of affordable housing. By making the land those housing units are on move valuable all you will accomplish is to replace them with more expensive units	6/17/2018
1578	14	/policies/tree-canopy-and-urban-forest/	The connection between carbon emissions (the cause of environmental degradation) and tree planting (a remedy for environmental degradation) should be identified and built into public policy. As a source seeks to emit more pollution, they should be willing to contribute to an offset program of tree plantings. Similarly, when anyone chooses to cover absorbent ground with concrete or asphalt, they should be contributing to an offset program that remediates the pollution of water that results from excessive runoff. When the connection between cause and effect is so easily quantified, public policy should make sure that those who pollute, give a hoot.	6/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1579	60	/policies/intrinsic-value-of-properties/	These are good steps to take but actions to increase density proposed as solutions for other goals will negatively impact historic housing stock in neighborhoods close to downtown	6/17/2018
1580	41	/policies/tenant-protections/	Please understand that rent control has never worked in American cities and will, over time, actually decrease the amount of affordable housing. Learn from other cities mistakes.	6/17/2018
1581	13	/policies/landscaping/	Establish direct connections between those who pollute and the remediation that can be accomplished through environmentally beneficial landscaping. This can be accomplished by having the polluters fund urban landscaping initiatives and giving tradable credits to landscapers, who can sell those credits to builders, homeowners, etc., who would like to increase the pollution load on our environment.	6/17/2018
1582	38	/policies/affordable-housing-near-transit-and-job-	In many areas especially those on the Northside close to downtown these policies will remove current affordable housing and even if replaced by new affordable housing that new housing will be less affordable than what it replaces	6/17/2018
1583	12	/policies/lighting/	Don't forget the effects of light pollution. More is not necessarily better. https://www.globeatnight.org/light-pollution.php . Light pollution affects the migratory patterns of birds, circadian rhythmic cycles, and even affects the quality of the air that we breathe. It would be helpful to recognize that there is a cost, as well as a benefit, to lighting up the skies.	6/17/2018
1584	10	/policies/street-grid/	Please explore the benefits of slowing traffic down and using more natural curvilinear forms when laying out transportation lines. Just as rip-rap is oftentimes prescribed to solve problems when water moves too quickly through linear passages, find ways to avoid straight lines for streets. They will reduce the creation of wind tunnels, slow traffic down, reduce straightaways for speeders and escaping criminals, and reduce vistas to more human scales.	6/17/2018
1585	81	/policies/social-connectedness/	Action step "a" needs to include voices other than residents, business owners and property owners; for example, renters, unions, youth and youth program workers, persons with disabilities, teachers, churches, persons who are formerly incarcerated, etc. Also, this action step needs to facilitate democratic processes of participation among the citizen stakeholders in a neighborhood. ie neighborhood associations including voices of teachers, nurses, youth program leaders, social service providers, etc. This would provide a way for people to share their ideas about what they need in their communities for affordability and livability, and would inspire them to believe in the democratic process and to participate in it.	6/17/2018
1586	30	/policies/arts-and-cultural-assets/	Instead of using the language "...global competitiveness..." to define a major component of this goal, the city should seek to foster "global solidarity" and should model this by fostering stronger relationships between its 12 sister cities and local public schools and city youth programs. The city should also add more global cities to its sister cities list to reflect the growing and diverse immigrant population in Minneapolis. For example, there is only one Latin American sister city. There should be more. The city should create summer learning abroad programs in collaboration with local public high schools so that students can visit sister cities and learn how art and governance interact in other communities. This would benefit high school students when they apply to college, as admissions officers value students who spend summer months engaged in cultural activities that show a sense of international awareness and maturity.	6/17/2018
1587	43	/policies/housing-displacement/	I think this is a narrow view if who all will be impacted by this plan. People will loose their homes because of this plan.	6/18/2018
1588	16	/policies/environmental-impacts-of-transportation-	I believe we are at the point of sub-optimization when it comes to concentrating human activity in Minneapolis; time to use transportation to move people to the exurbs. By 2040, the build out of satellite communities, as they did all over California, Seattle, Washington, DC, Philadelphia, Atlanta, etc. will undoubtedly accelerate. Containing all this population in such close proximity (by going up and stuffing more people into single family lots) brings social ills, which regional transportation systems to the exurbs can solve. High concentrations of people result in high concentrations of byproducts (such as pollution), crime, economic disparity, etc... Time for the transportation plan to create arteries for people to live beyond the exurbs, and not be so close to each other.	6/18/2018
1589	26	/policies/vision-zero/	I would like to see more responsive traffic signals and enforcement of stopping for pedestrians at crosswalks. The walk signal across Lyndale Ave S at 48th St W is so brief I can barely get across before it changes (and I'm a fast walker!) - even after pressing the walk button, it takes a couple of minutes for the light to change.	6/18/2018
1590	82	/policies/aging/	This policy should be listed as supporting the affordable and accessible housing goal.	6/18/2018
1591	53	/policies/quality-of-life/	I do not see anything on this plan that addresses safety in the downtown districts? With all the shootings and other things happening, I will not, nor will a lot of people I know visit after dark.	6/18/2018
1592	34	/policies/affordable-housing-preservation/	I agree wholeheartedly with those two policies in general, but they need to add more specific information. Those policies are directly tied to certain parts of the 2040 plan to increase density, which I agree to in principle, but disagree with the unnecessary adding fourplexes where they disrupt the neighborhood charter. And I am not a nimby!	6/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1593	0.1	/topics/land-use-built-form/	Land Use: Need to allow commercial! All residents including those who move more slowly deserve at least the chance to live within a 5 minute walk of a cafe, bar, or other gathering space open most of the day.	6/18/2018
1594	0.1	/topics/land-use-built-form/	LANDUSE: Our parks are our public backyards -- we need to encourage higher density housing and mixed use spaces in & around them, rather than limiting them to the wealthiest Minneapolitians. Beyond the racial & economical equity implications allowing more people reasons to be in & near our parks helps increase eyes on the parks & public safety! And cafes adjacent can help bring more quasi-public restroom to the parks so that they are more accessible to the elderly, those with children, etc.	6/18/2018
1595	7	/policies/public-realm/	Greenspace should be included in the understanding of public realm and "placemaking." The City Planning Commission has been allowing reduced setbacks (though variances) that all but eliminate permeable surfaces and space for plants and trees.	6/18/2018
1596	0.1	/topics/land-use-built-form/	6/18/2018
1597	0.1	/topics/land-use-built-form/	LAND USE: Climate change is real! We need to build for resiliency by reducing care dependence & the burden of maintaining roads for heavy vehicles that damage them exponentially more than bikes and walking. This zoning as proposed fails to allow us the flexibility we need to welcome displaced people, to keep gas price hikes from being a regressive tax on the already poor.	6/18/2018
1598	17	/policies/complete-streets/	Please consider dropping the word "walking", which people in wheelchairs cannot do. The word pedestrian is inclusive and does not discriminate.	6/18/2018
1599	1	/policies/access-to-housing/	œIn neighborhood interiors farthest from downtown that today contain primarily single-family homes, achieve greater housing supply and diversity by allowing small-scale residential structures on traditional size city lots with up to four dwelling units, including single family, duplex, 3-unit, 4-unit, and accessory dwelling unit building types.œ NO! This will change the character and livability of these single-family neighborhoods too much. I object. They were zoned originally the way they are for a reason. The scale of single family is what makes these neighborhoods attractive to live in in the first place. You will ruin the character of these neighborhoods. Also, I know that adequate parking is not being planned for these multi-unit buildings. It is folly to think that everyone will want to, or be physically able to, use mass transit, in place of owning an automobile.	6/19/2018
1600	19	/policies/bicycling/	I think that the choice of routes for some of the bike lanes added has not been well thought out. For example, 28th street. There have been many letters to the editor regarding congestion in that area as a result. Also I don't think that automobile use should be de-emphasized as much as it seems to have been in this plan, but rather, included as necessary for many people as one of the options. Not eliminated as an option.	6/19/2018
1601	1	/policies/access-to-housing/	Single family means less transient. Less transient means more stability. This should be a goal, too. I do not support putting multi-family housing in areas farthest from downtown that are currently primarily single family. I think this is extremely short sighted.	6/19/2018
1602	49	/policies/educational-and-economic-access/	The City needs to facilitate in collaboration with county and state offices, an educational center/program specifically designed for people who are formerly incarcerated to learn about entrepreneurship, cooperative economics and cooperative housing models. This could be offered through the City's already existing B-TAP and C-TAP programs: http://www.minneapolismn.gov/business/C-TAP?utm_content=&utm_medium=email&utm_name=&utm_source=govdelivery&utm_term=	6/19/2018
1603	49	/policies/educational-and-economic-access/	The City should work with the Minneapolis Public School System to enhance global interconnectedness through technology that enables Minneapolis students and teachers to be in communication with students and teachers in other sister cities. Also, the City should work with Minneapolis Public schools to create/enhance a curriculum that enables schools to be model green schools devoted to sustainable development. The City needs to work with Minneapolis Public Schools to supplement this hands-on curriculum with a historical curriculum that illustrates the contributions that communities of color and indigenous communities have made to environmental awareness and sustainable development.	6/19/2018
1604	80	/policies/development-near-metro-stations/	Until we have an integrated transit system that has busses connected to neighborhoods serving stops as frequently as the light rail serves stations, people will continue to drive to a stop to access the light rail. Note how popular the Fort Snelling park and ride lot is. There would be less impact on neighborhoods if park and ride lots were planned near certain key stations. I live close to two stations but they are both a 20 minute walk away if there is no snow and in my current health situation. Bus service is only every 30 minutes and is ill-timed with train service. It just doesn't work. I drive to a neighborhood and park on the street if I can't walk to the station. As I age that walk will become more of an issue. We live in Minnesota and walking/biking isn't always an option. A few park and rides will help neighborhoods with transit parkers.	6/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1605	18	/policies/walking/	<p>My main issue with this policy, and the Comp. plan in general, is it is looking 20 years in the future but many of the policies focus on things the city is implementing right now, particularly when it comes to pedestrian improvements.</p> <p>This policy goes into crosswalks, lighting, and visibility, buffers from the street, amenity zones, bump outs, narrowing street widths etc. but doesn't go beyond that for improvements. The city is already making these improvements now and maintaining them will be important but this document should reflect the future and improvements that go past the reactive pedestrian safety things we've been doing for 20+ years already.</p> <p>Policy 18 is still centered around a car-centered city which supposedly from the Complete Streets policy (adopted in 2016) pedestrians should be the first mode of transit addressed when adopting a new plan. Policy 18 focuses on reactive measures to protect pedestrians from cars which would be unnecessary if roads were built as they are supposed to be in the Complete Streets policy with pedestrians first.</p> <p>Things to add to Policy 18: -Mention of WINTER and winter sidewalk maintenance - Not sure why I haven't seen winter, ice, and snow mentioned at all in the comp. plan when we live in Minnesota. -Leading pedestrian intervals -Longer pedestrian cycles -Eliminating beg buttons -Eliminating lanes rather than just narrowing street widths -Repairing sidewalks based on the condition of the sidewalk rather than the condition of the road it is adjacent to -Reduce car speed to reduce pedestrian death</p>	6/19/2018
1606	1	/policies/access-to-housing/	<p>My biggest objection to the housing policy is the part of e) allowing 3 and 4 unit housing on "traditional size" (40'x110') residential lots. There is nothing "small scale" about a 4-plex, which would drastically degrade the character of neighborhoods for existing residents. Duplexes would be far more acceptable. -Dan Burbank, 3940 41st Av S</p>	6/19/2018
1607	6	/policies/pedestrian-oriented-building-and-site-de	<p>Relating "e)", the Fairview Hiawatha Clinic building at 38th St and 42nd Ave was required to remove a rather nice awning because of a complaint of ice falling on pedestrians from the awning. The policy will have to address this issue. -Dan Burbank, 3940 41st Av S</p>	6/19/2018
1608	8	/policies/public-safety-through-environmental-de	<p>I am concerned about light pollution and excess lighting. Most people seem to FEEL they are safer from property crimes and assault in brilliantly lit areas. In reality, over-illumination offers very little security. -Dan Burbank, 3940 41st Av S</p>	6/19/2018
1609	12	/policies/lighting/	<p>I am all for elimination of wasteful light and light pollution. The transition to LED lighting should be used to both reduce lighting energy consumption, improve lighting effectiveness, and reducing night sky light pollution. -Dan Burbank, 3940 41st Ave S</p>	6/19/2018
1610	0.1	/topics/land-use-built-form/	<p>I like that the Destination Mixed Use corridor designation extends down Nicollet and Chicago Avenues into the Loring and Elliot Park neighborhoods - n.hood resident</p>	6/19/2018
1611	1	/policies/access-to-housing/	<p>I do not believe expanding corridors and up zoning across the city will make healthy communities. I believe it will open the door to speculation, raising prices of rentals and homes.</p>	6/19/2018
1612	1	/policies/access-to-housing/	<p>I believe we are developing along critical corridors near the lakes before we have the light rail paid for. This is very dangerous. Many of us cannot bike to work.</p>	6/19/2018
1613	1	/policies/access-to-housing/	<p>Upzoning across the city will create more noise issues. It will also reduce the sense of community in neighborhoods.</p>	6/19/2018
1614	1	/policies/access-to-housing/	<p>I believe we should not expand commercial corridors along all transit routes. We have too many empty businesses already along Lake and Hennepin. Gentrification has driven out small businesses. This plan will not work. We'll turn the whole city into Nicollet Mall.</p>	6/19/2018
1615	1	/policies/access-to-housing/	<p>The developers have ruined Uptown. We have ugly architecture and terrible traffic. Now this plan proposes to do that to the whole city? This is terrible.</p>	6/19/2018
1616	1	/policies/access-to-housing/	<p>I believe the development intended for Lake Bde Maka Ska will ruin the lakes. They are already overwhelmed by cars. People will not bike in winter!</p>	6/19/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1617	0.1	/topics/land-use-built-form/	<p>In the Built Form District descriptions all of the districts from Transit 4 to Transit 30 include a final sentence that says "Requests to exceed x stories will be evaluated on the basis of whether or not a taller building is a reasonable means for further achieving Comprehensive Plan goals." This to me suggests that Conditional Use can be a valuable tool for the City to encourage things like affordable housing and active ground floor space, etc.</p> <p>The draft Built Form Plan appears like it will reduce the use/need for Conditional Use permits by significantly increasing heights. Perhaps a different approach would be to keep allowable heights lower, and instead more clearly define for both developers and residents what the expectations of conditional use are. This way you might achieve both higher density and higher pay back to the community.</p>	6/19/2018
1618	33	/policies/affordable-housing-production/	<p>This is a very important goal and I applaud the city for working to reach it. We definitely need to address and repair access to affordable housing for everyone.</p> <p>Jan Kleinman</p>	6/19/2018
1619	79	/policies/healthy-youth-development/	<p>There needs to be increased support for out of school time programming that addresses a range of issues and needs young people have. The policy mentions sexually transmitted infections, there is limited funding right now for programming that supports young people's ability to make informed decisions about their sexual health.</p>	6/19/2018
1620	81	/policies/social-connectedness/	<p>I like point "e", I think integrated spaces that are multifunctional are helpful in increasing access. I'd recommend bringing in community partners to provide services, so people increase their awareness of different organizations and connectedness to community resources.</p>	6/19/2018
1621	63	/policies/food-access/	<p>It's a good idea to work to increase mobile food markets/pantries, folks that are under-resourced may be busy and have transportation issues so bringing it to them seems like it would be helpful.</p>	6/19/2018
1622	1	/policies/access-to-housing/	<p>While I agree with the need to consider density, especially around transit hubs, it should be handled in a planful manner. In neighborhoods that are primarily single-family homes, perhaps there should be a limit on how many multi-family units can be added to each block to ensure parking and other infrastructure can handle the increase in population.</p>	6/19/2018
1623	19	/policies/bicycling/	<p>Be sure that when expanding bikeway access - which is important and good - you remember that not all residents are able to bike or use transit, due to age, family size or physical ability. Ensuring equal access to multiple modes (bike, walk, transit and car) will mean people from all backgrounds can use the mode that works for them. For example, a family with small children may need to use a car, a person with a broken arm or leg may need to use a car, an elderly person may need to use a car. Others can access the more environmentally friendly options.</p>	6/19/2018
1624	0.1	/topics/land-use-built-form/	<p>I am very concerned that this plan will lead to the wholesale demolition of single family homes to construct duplexes and 4-plexes in their place. This will destroy the fabric of our neighborhood and put untold numbers of houses in the shade of their giant new neighbors. People choose to live in a neighborhood for a reason, to change the nature of a neighborhood is to rob residents of their choice.</p>	6/20/2018
1625	0.2	/small-area-plans/	<p>First of all, I don't even know where half these areas are. How are we supposed to comment on these? Here's what I do know.</p> <p>UPTOWN AREA. This area is very congested and difficult to drive through. I live 3 miles from this area, but never go there because there's NO PLACE TO PARK! Parking ramps are a MUST because driving around trying to find a place to park creates a lot of excess carbon emissions in the air. Businesses are losing money. No parking ramps keep people out of the Uptown area. Look to 50th and France in Edina. They have parking ramps and surface parking to accommodate all the businesses in their area. So guess what? My business goes to Edina NOT Mpls.</p>	6/20/2018
1626	30	/policies/arts-and-cultural-assets/	<p>City support for studios... somehow. We are getting priced out.</p>	6/20/2018
1627	33	/policies/affordable-housing-production/	<p>Excellent ideas. Further suggestions/questions:</p> <ol style="list-style-type: none"> 1. HIGHLY support the "little house" movement. No need for thousands of feet per inhabitant - a couple can happily live in 450 Sq Ft, even a family - average living area for a family in Tokyo is under 1,000 Sq Ft. 2. How to combat NIMBYism? More people makes a better city, more apartments drives rent down. But it's up to you to open up the hearts of these others. Long time dwellers think that they own neighborhoods. But who does? It's a delicate dance. <p>Good luck.</p>	6/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1628	0.1	/topics/land-use-built-form/	I am a 30 year old woman currently living in the Stevens Square neighborhood and have lived in Minneapolis my entire life. Stevens Square is a dense neighborhood of condominiums and apartment buildings and it is an overcrowded, loud, incredibly stressful environment severely lacking in green space that I one day wish to escape. I grew up in a beautiful stucco single family home, with a yard, on a quiet tree lined street in Southwest Minneapolis and plan to one day move back to that peaceful environment. Minneapolis 2040 and the rezoning plans will destroy that. It will destroy our neighborhoods and their beauty that is so attractive to people. More density brings more noise, more stress, a destruction of green space. Bigger is NOT better. Most people do not want to live in an apartment their entire lives. Nobody wants to raise kids in an apartment, they want a house with a yard. This will NOT bring down housing costs, with the addition of all the housing in recent years housing costs have continued to rise. You are making this city unaffordable. If I wanted to live in an overpriced apartment in an overcrowded, loud, dirty city I would move to New York. You would sell our homes and our neighborhoods to developers in the name of human greed. Minneapolis 2040 will be the end of Minneapolis and must be changed.	6/20/2018
1629	17	/policies/complete-streets/	I am against this policy as stated. In this time of equity, this policy is inequitable. The vast majority of transportation is by motor vehicle. Rewrite the policy to take into account ALL modes of transportation equally rather than allowing the minority to dictate how the majority live. This simply causes more congestion and frustration for the majority. Put bike paths on secondary roads, not primary, with a change of signing to make them a thruway. Give back the lanes removed on main roads to the vehicles to alleviate the congestion caused. The walkers already have sidewalks and walking paths so they are unaffected.	6/20/2018
1630	0.1	/topics/land-use-built-form/	The specific plan to add 3-6 story zoning in Tangletown (and other single family home neighborhoods) is a disaster. As life long residents of Mpls and graduates of Washburn High School, we are growing increasingly tiresome of the city's apparent disregard (or lack of priority) in creating a family-friendly city. We have spent years advocating for our neighborhood schools, parks, and associations. It is becoming increasingly clear families are not the primary concern of either The Minneapolis School District, the Park Board, or the city at large. Unfortunately, it seems like The City would prefer we move to the suburbs, which is frustrating to Mpls-lifers like us. We're not LA or New York or Chicago; that's what is unique and great about Minneapolis, so don't make them your role model for urban development. Do we really need to have high rise condos and commercial space the entire Nicollet corridor? If this bulldozing of single family homes in our neighborhood is approved, we'll do all we can to un-elect the current mayor and our city representatives; then move to the 'burbs (but again, that's probably what you all want anyways).	6/20/2018
1631	1	/policies/access-to-housing/	Dear City, Allow people to use their land however they wish, to build what they wish, and you will see more opportunity in housing and business. Reduce personal freedom and rights and you will see limitations on housing and business. Don't be a barrier, get out of the way of the people. If you want to help, facilitate how people may better achieve their business and property goals.	6/20/2018
1632	2	/policies/access-to-employment/	Dear Minneapolis, Get out of the way of local businesses and you'll see an increase in opportunity. People in society are no worse than government employees. In fact, many may be smarter, more successful, so why is it the city feels the need to dictate what business owners and property owners do with their own labors, their own fruits? Creating opportunity should not come at the price of freedom. Want opportunity? Get out of the way or support the efforts of local businesses to do as they wish. If their ideas are not good, they will not succeed in business. That's their risk to take. Not yours.	6/20/2018
1633	4	/policies/access-to-commercial-goods-and-service	Dear City, Get out of the way of business. Trade should be as free as people demanding a product and someone providing it at a price the consumers will agree to pay. The city doesn't need to step in unless an act of fraud, force, or coercion occurs. Get out of the way. Don't be a barrier to economic improvement and trade.	6/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1634	42	/policies/expand-homeownership/	<p>by support for financial counseling and pre-purchase education are critical but must be paired with reliable DPA and affordability assistance along with an inventory of starter homes. Too often, counseling and education succeeds in getting households of color mortgage ready only to have consumers thwarted by a lack of inventory or the unavailability of DPA.</p> <p>b) Particularly in low-income, community of color neighborhoods, the emphasis ought to be on asset building (income gets you out of poverty but assets are what keeps you out). To the extent that shared equity models are used in these communities, they should be done so to 1) assist a homebuyer who could not own but for the added assistance, and 2) to ensure the future availability of affordable, entry level homes. The critical question here is "who benefits"? Any strategies employed in this effort should provide asset building opportunities for existing residents rather than relying on in-migration.</p> <p>c) This has been a significant source of frustration for the non-profit housing counseling and development community. For example, Minneapolis DPA has consistently served low numbers of households of color, despite the non-profits advice to the city as how to effectively reach households of color while still meeting fair housing requirements. Similarly, the non-profit development community outperforms the private market by seven times in selling homes to households of color, yet the city opened up its development subsidy programs a few years ago to private developers, and without any transparency on how they are performing on equity measures (contracting and sales), and has continued to do so. This is an area where we know what works and just need to invest more into the work to bring it to scale.</p> <p>d) Despite the fact that we are reaching historic low levels of default and foreclosure, capacity needs to be maintained as low-income and communities of color are often the victims of predatory practices and employment instability and as a result have higher rates than the population as whole.</p> <p>e) . A distinction between what is referred to in the draft comprehensive plan as "market failure" versus "affordable housing need" and policy makers need to support the appropriate tools to address these two important issues. And, while there may be some overlap in appropriate strategies, these are complex problems that require multi-faceted solutions. To the degree that the city is investing in its affordable housing need, there absolutely should be an emphasis on shared equity models (placed-based long-term affordability) and recapture models (recycling of assistance to buyers). I would argue the shared-equity models should be located primarily, though not exclusively, in what is referred to as "high-opportunity" areas.</p> <p>Finally, inventory needs to be addressed. The city has an estimated 500 vacant lots, mostly in areas experiencing "market failure" i.e. the cost to develop the lots exceeds the fair market value upon redevelopment, resulting in a development/appraisal gap. Current strategies to address this inventory optimistically project addressing up to 35 properties a year. Correcting "market failure" should be a priority of city government and there are tools in the municipal toolbox to do so. These include bonding (using newly generated property</p>	6/20/2018
1635	45	/policies/leverage-housing-programs-to-benefit-c	<p>a) Of the CPED-funded projects undertaken during the foreclosure crisis, the non-profit development community awarded construction contracts to minority owned and operated firms six times more often than the City's single family homes compliance requires. Further, Section 3 businesses were awarded 60% of these contracts and people of color comprised 66% of the workforce on these jobs (more than double the lauded participation on the Viking's Stadium).</p> <p>b) 1. Outreach to contractors to promote benefits of certification programs; ensure compliance requirements are commensurate with the size of the organization; provide incentives to entities that demonstrate exemplary performance contracting with companies of color.</p> <p>c) resident councils, nonprofit boards and advisory groups, incentivize neighborhood associations who increase under-represented population's participation, etc.</p>	6/20/2018
1636	0.1	/topics/land-use-built-form/	<p>600 block of Queen Ave South, East side is proposed Corridor 4. This block is better suited for interior 2, because it is separated from Penn ave by a large vacant lot. The west side of 600 blk Queen ave south should be Interior 2 as well. Due to the surrounding mndot right of way, the proposed corridor 4 block would be too far from Penn to have the desired effect. I think if you view the site in person, you would see what i mean, I dont have the expertise to properly describe the issue correctly.</p>	6/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1637	21	/policies/freight/	<p>Regarding (C) Crossing improvements along active corridors - There is plenty of opportunity at the Humboldt Crossing in Webber-Camden for improvement. Since this is not only an active corridor, but an active railyard, activity is extremely high, with trains coming to actual halts almost daily. At these times, trains can sit idle anywhere from 2-20 minutes. I live at the intersection of Humboldt and Victory, and my alley/garage faces this intersection. Cars often race through our alley out of frustration, in order to get to Irving, and back on the parkway. I've counted an average of about 25 trains a day that cross Humboldt. That averages to at least one train every hour, although truth be told its more active in the late evenings and weekends.</p> <p>I94 and Osseo Road are the only two arteries in North MPLS that can cross the railroad track unimpeded, thanks to bridges. Humboldt, Fremont, and Lyndale are all crossings with arms.</p> <p>Due to the proximity of the railcrossing on Humboldt with the 4-way stop at Victory, this intersection can get backed up in all four directions when the train is idle. I have witnessed people illegally pass other cars on the drive when this happens, and seen several near accidents caused by frustrated drivers.</p> <p>Unfortunately I don't have any solutions, but this seemed like the proper forum to call attention to it at the very least. I don't know if its as simple a fix as beginning to document when it happens and fine the railroad when they block traffic for extended periods of time, or if it can be solved by making the crossing at Fremont a bridge, allowing a smaller side street to connect Webber and Bohanan neighborhoods without the need for cross-arms, allowing traffic to flow better in the neighborhood.</p>	6/20/2018
1638	15	/policies/transportation-and-equity/	<p>I think it is time we consider a subway system in addition to our commitment to light rail expansion. We have the Sky Way for pedestrian traffic, the greenway for cycling, but a truly great and connected city should commit to rapid, clean, and reliable transportation. Subterranean rail transit has proven to connect people to their metros. The Twin Cities have a good start but are far behind Cities like Seattle, LA, Chicago, San Francisco, andnNew York. While we may not be as populous now, I can imagine 700,000 more cars throughout our metro!</p>	6/20/2018
1639	18	/policies/walking/	<p>These things are already being done by the City, but at a slow pace and in an unorganized manner.</p> <p>A. What about focusing on what makes streets dangerous- cars? Start reducing the number of lanes and space dedicated to them.</p> <p>B. This step sounds like jargon and lacks meaning and detail.</p> <p>C. How about comfortable places to walk where people do interact with the street rather than being protected from it?</p> <p>D. Why not eliminate curb cuts- especially in high-pedestrian corridors like downtown, Uptown, etc.? Make cars park on the street or use an alley.</p> <p>E. There have got to be other traffic calming methods that can be implemented like speed bumps, bump-outs, and speed tables.</p> <p>F. Cover the freeways with lids and de-commission awful highways like Hiawatha Ave. No one wants to walk across them.</p> <p>G. The City doesn't count pedestrians unless they are going to reconstruct a street. There is little useful data to make this step logical or useful. Why not make sidewalks wide enough to feel comfortable?</p> <p>H. This means that streetscape improvements are only possible on roads where there is a high concentration of commercial property and a Special Services District can be established. The City should also put this stuff in in other places with lots of pedestrians, high transit use, etc.</p> <p>I. Where are "appropriate" places to add sidewalks? The City only budgets \$150,000 per year in the CIP to fill gaps, which means it will take one million years to fill all the sidewalk gaps.</p> <p>It snows in Minneapolis and sidewalks are nearly impassible for months at a time and construction cloeses sidewalks al the time.</p> <p>Why not make the CBD "pedestrian, bike, and transit only?"</p>	6/20/2018
1640	0.1	/topics/land-use-built-form/	<p>Zoning lots at 47th and Aldrich the same as those on the edge of downtown for multi-lot apartment buildings is ridiculous. Destabilizing a great neighborhood, devaluing homes and driving people who want single family areas to the suburbs will be the net result. Cities should have areas for all types of homes - jamming apartments everywhere accomplishes nothing positive. Please listen to the people who have invested their life savings in their homes and place our wants above those of a potential renter in 2030 who needs a place to rent until he/she moves to the suburbs to start their family, since they want a house versus any apartment.</p>	6/20/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1641	29	/policies/creative-sector-economy/	Performance houses and restaurants and bars that offer live music need to be named. Our part time/on-the-side gigging community makes up a great deal of our amazing city. Having incentives for businesses to have stages, book performances, and share the arts is vital. It can't just be about the business owner being an artist or creative, it has to be about encouraging and supporting the owner in bringing in the arts as well.	6/20/2018
1642	54	/policies/supporting-economic-growth/	You can make it better for business in the city by not sticking your fingers unnecessarily in all aspects of a business. For example, what legal items a business can sell, who they can sell them to, what they must pay their employees, how much sick time and vacation time they must give, how they schedule them, etc, etc. These things are not for the city to control. There are state and federal laws covering this. Not to mention all the money it will cost for the city to monitor and enforce all these ordinances.	6/21/2018
1643	59	/policies/downtown/	Enforce laws and ordinances, don't eliminate them because too many minorities are disproportionately affected.	6/21/2018
1644	63	/policies/food-access/	Offer incentives, not regulations, for stores to offer healthy items over unhealthy items.	6/21/2018
1645	80	/policies/development-near-metro-stations/	DO NOT prohibit park and ride facilities!!!	6/21/2018
1646	1	/policies/access-to-housing/	I am concerned about meeting the needs of people, but am concerned that developers not be allowed to take advantage of policy changes. Will they put pressure on residents to sell, walk off with \$\$\$ without producing the needed affordable housing? As this is getting off the ground, how do we handle the resentments I hear (and occasionally feel) about a significant influx of new residents. How comfortable will the new residents be with their new neighbors? From what I read on Nextdoor and some of my own reservations about property values, it seems there's an incredible amount of work to do to arrive at an implementation that will make such a transition smooth.	6/21/2018
1647	84	/policies/public-safety/	Enforce the existing laws, don't eliminate them!	6/21/2018
1648	17	/policies/complete-streets/	By prioritizing walkers have you analyzed the impact on commuter traffic, particularly with regard to extra carbon emissions from standing traffic? Will this be a result? I am in favor of a plan that recognizes just how weak your public transit is and doesn't attempt to use its weakness as its advantage by touting room for growth. If you want public transit build it! You can't regulate your way to clean travel. cj	6/21/2018
1649	18	/policies/walking/	As to 18b. There should be more pedestrian and cyclist only malls and promenades in the city. This entails closing some streets and possibly creating some permanent street bazaars.	6/21/2018
1650	19	/policies/bicycling/	19a. Build bicycle highways and make them physically separated and partitioned from car traffic. The rule should be to make the routes 30 minute nodal points if possible, where you can get from one congested hub to another in no more than 30 minutes on a bike. It will connect communities and release cars from some of the burdens of bicycle share stress. It's a real thing. Driving next to bicycles is stressful. https://www.citylab.com/transportation/2016/01/germany-launches-its-national-bike-autobahn-cycle-network/422451/	6/21/2018
1651	21	/policies/freight/	47d. One thing you can do is ban tractor trailers within 10 miles of the city center. Save our roads, prevent traffic and encourage rail use by mandating train or small truck transport of goods into town. Large trucks destroy our roads which then have to be repaired which has an enormous economic and environmental and stress impact on residents.	6/21/2018
1652	22	/policies/downtown-transportation/	Encourage use of a heavy downtown parking tax. This only works if paired with adequate public transportation. Congestion fees and pricing are good for the air and environment and promote use of public transportation.	6/21/2018
1653	4	/policies/access-to-commercial-goods-and-service	This is perhaps my favorite policy on this plan. It is fantastic! Increasing walk-ability/bike-ability throughout the city will make this city such an amazing place to live!	6/21/2018
1654	0.1	/topics/land-use-built-form/	The Nicollet Island Inn should be historically protected if it isn't already.	6/21/2018
1655	0.1	/topics/land-use-built-form/	The Nicollet Island Inn property should be historically protected if it isn't already.	6/21/2018
1656	0.1	/topics/land-use-built-form/	I would like to see this plot become an extension of Gateway Park to support plans for the renovation of the Post Office.	6/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1657	0.1	/topics/land-use-built-form/	<p>50th Street South. This plan will wipe out entire tree lined neighborhoods that today are vibrant and wonderful to live in. The 50th street development built maps show 3 and 4 story building being built well into what are now wonderful neighborhood streets. The maps must be amended to only allow 2 story buildings along 50th to one lot size into the neighborhood streets. To allow 3 and 4 story (or more if approved) halfway down the current side streets on 50th would produce a crisis in traffic, overshadow single family homes with commercial and apt buildings is not the way to help our city grow. We want to grow and provide affordable housing but we must maintain our wonderful neighborhoods. There needs to be a more thoughtful approach to existing residents and homes. I am angry that you are so cavalier with people's homes and lives that you do not see the impact to those of us living on or close to the transit corridors.</p> <p>The residential 1 built map must also be amended to only include single family or at most, a duplex style home. Allowing a 4 plex to be built anywhere in the interior will lessen surrounding property values.</p> <p>Is there going to be a building code ensuring that any new buildings keep the historical look of the neighborhoods? If not, tall cheap modern boxes will be built alongside wonderful old single family homes.</p> <p>Allowing this plan to go forward as written is a terrible travesty and the people who will be hurt are the existing residents in the affected neighborhoods and the beneficiaries will be corporations who buy up old homes and turn them into 3 and 4 story ugly modern cheap looking boxes. The corporations have no stake in the community or neighborhoods thus higher rents will be demanded and affordable housing goals will not be met. People who live here have a stake and ensure a wonderful vibrant neighborhood. Please do not tear our neighborhoods apart. Existing residents deserve better than this.</p>	6/21/2018
1658	1	/policies/access-to-housing/	<p>I'm writing specifically with objection to the plan in zoning changes from Lyndale to Bryant along 50th. Specifically for this area, allowing developers to build four-plexes would do nothing but destroy the character of the neighborhood and allow developers to exploit the zoning for a high return. This change in zoning for these blocks would not create affordable housing in the slightest and would increase the seriousness of off-street parking, which is already an issue specifically for the areas highlighted for a change in zoning. Would parking be taken into consideration at all? Would developers be required to provide off-street parking? Would they be required to build to reflect the history and aesthetics of the area? This change in zoning creates an opportunity for developers and nothing more. It would have a serious, negative impact on the neighborhood itself and the community surrounding it. Please consider duplexes and two stories as a revision to this policy.</p>	6/21/2018
1659	23	/policies/coordinated-development-strategy/	<p>You're missing the workforce in this coordination, which includes labor and education. Between today and 2040, an entire generation of workers will have passed into retirement and those who are yet to be born will be just entering that workforce. Those two decades of opportunity will be lost if there is no coordination. It would be truly disastrous if the workforce created does not complement the needs of the labor market. A vision ~ beyond 20th century impulses to aim low with manufacturing and production to bridge the gap between races and economic strata ~ is required that inspires people with a 2040 that has prosperity and a quality of life that everyone enjoys. Not simply something "affordable"...</p>	6/21/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1660	0.1	/topics/land-use-built-form/	<p>Councilmember Schroeder, Are you seriously thinking about the closing of Justice Page Middle School? Education should be the priority here, not dense, low"er" income housing! You are doing a disservice to the beautiful, historical areas of Minneapolis and should be ashamed of yourself for being a sheep! Education is the answer to get rid of the need for more low"er" income housing (disguised in this plan as "Population Shifts").</p> <p>I am 100% opposed to this 2040 plan as the future of Minneapolis. This will force out people who are proud of Minneapolis, and are willing to put up with the insane taxation for very few city services to begin with. I grew up here and have lived here for the majority of my life. With this sort of "threat" in the name of progress, I can say...the suburbs are looking better and better! I hope there is a plan to double the budget for the Police and Fire Departments as well.</p> <p>Sir, Please reconsider this plan.</p> <p>Michael P. Kuehn W. Minnehaha Pkwy</p>	6/21/2018
1661	20	/policies/transit/	<p>Transit: I love this. Thank you for putting such an emphasis on this in the plan. My only concern is that there isn't enough emphasis on this! If we want more density in our city (I do!!!) this must be a priority. I worry that we will promote density as a city (because we can) and we won't have the control we need to create better transit. These run hand in glove and must be promoted together. Thanks!!!</p>	6/22/2018
1662	1	/policies/access-to-housing/	<p>I love this plan. It is a great step toward creating (maintaining) diversity and preventing gentrification. Density is great.</p> <p>I would like to see a commitment to improving the infrastructure required to service the concentrated density. If a current northside city block were to be replaced with 4 plexes, the city must take action to improve sewer and water supply. The hidden services that people neglect to consider (most people don't know the required sizing of drain lines needed to service a given area) can be ignored by developers who build these units. That neglect then is put back on the people renting or owning there. This to me has potential to create a new form of disparity or inequality.</p> <p>Create requirements for developers who buy bungalows and replace with multi-unit housing. The burden to improve the infrastructure in the area should be on them.</p>	6/22/2018
1663	0.1	/topics/land-use-built-form/	<p>Can I just say what a relief to seek out someone who actually knows what theyre talking about on the internet. You undoubtedly know how one can bring a problem to mild and make it important. More people have to read this and perceive this aspect of the story. I cant believe youre no more common because you undoubtedly have the gift.</p> <p>Fitflops Sale http://www.fitflopssaleclearanceuk.com</p>	6/22/2018
1664	14	/policies/tree-canopy-and-urban-forest/	<p>If, when time for reconstruction, a street does not have a boulevard with trees- make sure that is priority #1 when evaluating the new layout, even if it means removing street parking.</p> <p>Free storage of Private Property on Public Ways should not be more important than the ecosystems which we all directly and indirectly depend on.</p> <p>Also, consider bulb-outs with trees planted in commercial areas that do not have trees already. The "bulb-outs" could be spaced to allow 2 parallel parked cars with a tree planted between them along the whole block. Perhaps stagger the bulbs for aesthetic purposes.</p>	6/22/2018

1666	14	/policies/tree-canopy-and-urban-forest/	Fulfill a survey of trees through out the City, and write an ordinance to penalize the destruction and removals of trees, in order to discourage "willy-nilly" tree chopping, and to encourage more unique building design.	6/22/2018
1667	14	/policies/tree-canopy-and-urban-forest/	Fulfill a survey of trees through out the City, and write an ordinance to penalize the destruction and removals of trees, in order to discourage "willy-nilly" tree chopping, and to encourage more unique building design.	6/22/2018
1668	1	/policies/access-to-housing/	I absolutely love this idea! I currently rent in the Fulton area, but even finding an affordable spot to rent was extremely difficult. We're hoping to buy a home within the next few years, and would much prefer to stay in Minneapolis, but housing prices right now are making us also think about St Louis Park or Hopkins. With this idea, housing can be more accessible for all! What drew me to Minneapolis was the large mix of people I interact with on a daily basis: rich, poor, black, white, everything in between. That being said, my neighborhood is not nearly diverse as I think it could/should be, and I am excited to see change being implemented.	6/22/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1703	0.1	/topics/land-use-built-form/	It is interesting that in a neighborhood that already has parking problems and highly active commercial establishments that plans would be to convert the existing single family and duplex dwelling into apartment buildings. I am just glad to have had the opportunity to live in the 50th and Aldrich neighborhood when it was a desirable and neighborly place to live. On our block, everybody knows everybody and the community spirit makes it an excellent environment for both young and old. When the changes to bring in less affluent tenants to buildings being built to replace the current dwellings, I fear the community spirit will be lost and both parking availability and property values will lessen. Again, I feel privileged to have had the experience of this Lynnhurst neighborhood and will be looking to find another similar one - perhaps in St. Paul.	6/23/2018
1704	76	/policies/new-parks/	Yes. Building parks in underserved areas can increase the number of popular living areas, as people will want to live there, invest in existing homes, etc. Then, we might not have to to overbuild (& ruin) the few "ideal" neighborhoods.	6/23/2018
1705	60	/policies/intrinsic-value-of-properties/	I would contend that our neighborhoods contribute greatly to the value of this city. Re-habbing run-down properties can make neighborhoods unique, livable, & attractive more so than razing and building new structures that serve developers over community. I love my 100-year old home & will do all I can to maintain it. Who will maintain multi-unit buildings?	6/23/2018
1706	47	/policies/housing-maintenance/	We are so close to our neighborhood stewardship when people can no longer afford to live here. They will sell to builders to add density, and then who will 'love' & maintain these structures and landscapes?	6/23/2018
1707	13	/policies/landscaping/	Can we require developers/builders to meet strict environmental city policies so that we can continue to be a very livable place? What about all these variances they are allowed??	6/23/2018
1708	5	/policies/visual-quality-of-new-development/	What about all the variances developers are allowed?? Neighbors voices should be listened to as they are the current stewards	6/23/2018
1709	23	/policies/coordinated-development-strategy/	Are we paying attention to areas where density increases work for the people that live there, not just the developers? If we want to add density, people have to continue to want to live here. https://www.strongtowns.org/journal/2018/1/3/comparing-approaches-to-achieving-density	6/23/2018
1710	0.1	/topics/land-use-built-form/	I live in the Tangletown neighborhood. I'm very close to 45th and Bryant, where you're proposing to build. I think it's a terrible idea. Let our neighborhood stay the quiet and peaceful area that it is. Why would you want to change that? How is that improvement? Why is more better?	6/23/2018
1711	0.1	/topics/land-use-built-form/	I OPPOSE the lack of effective consideration for true AFFORDABLE HOUSING and accessible TRANSPORTATION for all residents of Minneapolis: young, old, rich, poor and the many in between. I DO NOT approve of the unilateral upzoning of our city. As a renter/resident of Uptown, I see the first signs of this oppressive level of density in the Sons of Norway after Ryan Co. received carte blanche to go big and bigger from Lisa Bender's City Council, with no respect for the voices of her constituents and the residents of this city. The same seems to be happening with the 2040 proposal and the brutally unilateral 4-plex upzoning. Aside from obliterating the character of Minneapolis Neighborhoods and doing NOTHING to actually provide AFFORDABLE housing for the many in need, I see NO EFFORT TO ADDRESS PUBLIC TRANSPORTATION as a key component of adding so many people to the city. I am perfectly happy to do away with cars if there is adequate and convenient public transportation, but there IS NOT, so this is a recipe for gridlock, congestion and stress. I grieve for my city, and at this rate will eventually take my diversity, creativity, education and income level out of this town to find a more receptive community.	6/23/2018
1712	0.1	/topics/land-use-built-form/	You say the plan is for racial equality but all you are doing is making developers pockets bigger and creating 2-3-4 plexes that will be too expensive for most people of color. (oh, I'm sure you'll put a few affordable housing units in, just so you can check it off the list.) Please, just add some density to the Corridors and don't mess with the mpls charming neighborhoods. Add apartments to the north side too, so they have nice places to live, shop, etc. PLEASE ADD THIS TO THE PUBLIC RECORD	6/24/2018
1713	0.1	/topics/land-use-built-form/	Mayor Frey and david frank do not represent the entire city. They are very pro north loop, but are against SW mpls. I wish I had a mayor and head city planner that represented all neighborhoods and understood that different city residents want different types of neighborhoods. I for one would never want to live in north loop, but I understand that some folks love it. I love SW mpls, because I feel luke I live in a small town with all the charming homes, gardens, trees, sidewalks and community. Please don't take our neighborhood away and make it just like yours.	6/24/2018
1714	0.1	/topics/land-use-built-form/	I'm saddened that Heather Worthington that has a degree in historic preservation from the university of Michigan, is ok with all the developers plowing down beautiful old early 1900 homes/neighborhoods to build gigantic 2-3-4 plexes. Not only would the beautiful Gomes be gone, but there would be no more back and front yards. It will just be a plethora of building material to the sky. Not green to me. Please don't add a provision for all homes to be zoned for 2-3-4 plexes. Add density to the Corridors.	6/24/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1715	0.1	/topics/land-use-built-form/	Leave the interior corridors alone.	6/24/2018
1716	0.1	/topics/land-use-built-form/	Leave the interior 1 corridors alone.	6/24/2018
1717	1	/policies/access-to-housing/	I moved into Minneapolis for a smaller footprint single family home, WITH CHARACTER. What you are proposing is shameful and makes me unhappy now and as a future resident.	6/24/2018
1718	0.1	/topics/land-use-built-form/	Hell no! You want to take the character out of the neighborhoods, and turn SE Minneapolis into a suburban vanilla town with Walmarts and faux finishes! NO NO NO NO NO NO	6/24/2018
1719	0.1	/topics/land-use-built-form/	Leave the city alone! Why are you trying to ruin this beautiful city for the people who live here? I'm against this, and I plan on fighting it.	6/24/2018
1720	1	/policies/access-to-housing/	We love Minneapolis. We love it so much that we are in the process of investing nearly one million dollars into building a new home in the Fulton neighborhood. After breaking ground we heard about Minneapolis 2040 and are regretting our choice. While we don't question that need for increased housing density, we do question the approach that is being taken. I grew up in a rural area in an area that is impoverished. Neither of my parents went to college, and they certainly didn't have the money to send me. I paid and worked my way through college and started out in a job that paid well below a living wage. I don't doubt for one second however that I still had privilege given the fact that I am not a part of a minority group. I worked hard to get where I am and realize that my hard work was accompanied by doors opening for me that do not open for others. Having said that, I have lived all over this city based on what I could afford. I didn't expect the government to magically make space for me in whatever neighborhood I choose to live in. I have lived in apartments, starter single family homes, and now am lucky to have been able to work and save for our dream home. A dream that the city of Minneapolis now says that they can stomp all over because someone decided that the way to fix "racist federal housing policies" is to build multi-unit housing wherever they want so that whoever wants to live there can do so. I do not dispute that we all benefit when EVERYONE has a chance, and everyone is able to find affordable housing. I would rather make investments that create opportunities for everyone that lift people out of poverty and turn Camden and Phillips into Fulton, not the other way around which is what this policy aims to do. For a lesson in the aftermath visit Detroit - it didn't work there and it won't work here. Houses that are small and affordable now will be the first to be purchased by speculators and converted to multi-unit housing. Having been a renter myself for many years I can guarantee you that the pride of ownership in property and community that a renter has compared to someone that owns their own home is night and day. The livability of our neighborhood will erode, and people like us that have the means to leave will do so and take our tax dollars with us. This may not be the goal of Minneapolis 2040 but it will be the outcome. I would urge our city leaders to think long and hard before approving this plan. While the goal of increasing density and creating opportunity for people is right, there are ways to do this that lift both the people of Minneapolis and the city up. Let's figure out a way to encourage investment in neighborhoods that will benefit and make us all better - destroying and radically altering the composition of neighborhoods that are thriving benefits no one and does nothing to make Minneapolis a better place to live.	6/24/2018
1721	0.1	/topics/land-use-built-form/	Interesting	6/24/2018
1722	0.1	/topics/land-use-built-form/	Who are these changes for? Everyone who lives in these houses will leave the city. This is communism.	6/24/2018
1723	0.1	/topics/land-use-built-form/	The people who live here have worked hard to have our little houses and yards in such a wonderful area. DO NOT take his away from us!	6/24/2018
1724	1	/policies/access-to-housing/	I am against the use of eminent domain in order for a government body to strong-arm their agenda.	6/24/2018
1725	0.1	/topics/land-use-built-form/	This is a terrible idea. Those that will benefit most will not be residents, but land developers. I will not vote for any representatives that support this initiative in the coming elections.	6/24/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1726	0.2	/small-area-plans/	<p>We live in the Midtown Greenway Land Use and Development Plan Small Area Plan on Lake Street and Excelsior Boulevard. There was recently approved a new development on this intersection by Brickstone Development. It was controversial, but with the assistance of Lisa Goodwin, a compromise on the height of the new apartment building was worked out that everyone can live with. It is 8 stories of housing. Your new Comp Plan would allow for buildings up to 30 stories high in this area. That height is in violation of the current Shoreland Overlay Policy. It is also contrary to all of the efforts done over the years, especially most recently by Lisa Goodwin, CIDNA, and others, to work collaboratively with the Developers of new housing projects to build new housing projects that work for all of those stakeholders in the area where new developments are being built.</p> <p>This is a very sensitive area with its location immediately next to Bde Maka Ska (Lake Calhoun). Yes, it is close to the new Lake Street LRT Station that will be built (hopefully). That said, there are already many developments being built and proposed in this immediate area that will add a significant number of new housing units. This area already has significant transportation issues, especially during rush hour. These transportation issues will not go away and will soon get worse with as all of the new developments being planned. There have been studies on how to remedy this problem and there are simply not solutions because of the geography of the area " there is no land to add another east-west street. Funding for major improvements needed, or even funding for small improvements is not available because Hennepin County must buy in to this problem (and help fund it), and from what I was told this fall, they won't even talk to the City about this issue.</p> <p>In conclusion, this small area you are proposing to change to Transit 30 simply cannot accommodate a Transit 30 designation. I strongly oppose your proposed designation of Transit 30 for this area. Julie Obermiller.</p>	6/24/2018
1727	0.1	/topics/land-use-built-form/	<p>So, assuming I understand this correctly, your plan is to "remove" us from the house we've lived in for over 60 years - the house my in-laws purchased in 1954 and my children hope to own some day. You intend to destroy everything that makes this city lovely and liveable and turn it into concrete corridors packed with people.</p> <p>I don't see anything about this policy that I can even begin to support. You want to replace people who love this city and BUILT these neighborhoods into the desirable areas they are with darkness and noise and misery.</p>	6/24/2018
1728	1	/policies/access-to-housing/	<p>Allow 6-story housing on Nicollet only at commercial hubs (46th street, Diamond Lake Road). Such housing is too tall to exist on the other side of the alley from century-old, architect-designed single family houses. Require off-street parking. Elderly and single people are not going to take public transportation at night and in the winter out of safety concerns. Require outlets for electric cars in parking stalls, and do not to consider an increase in electric vehicle use when thinking about air quality.</p>	6/24/2018
1729	0.1	/topics/land-use-built-form/	<p>These zones seem to be located in areas where production and processing would fit in. Is the public transportation adequate?</p>	6/24/2018
1730	3	/policies/production-and-processing/	<p>These zones seem to be located in areas where production and processing would fit in. Is the public transportation adequate?</p>	6/24/2018
1731	1	/policies/access-to-housing/	<p>Minneapolis is a city of charm and history. That is what draws people here. To tear down the beautiful unique houses to make way for cookie box dwellings will make our city look like every other. There were duplexes built back in the day that look like the other houses in the neighborhoods. Most of the time you aren't even aware they are duplexes until you see 2 house numbers. That was good planning on the part of the city back in the 30s to make housing affordable to all yet have the houses look like all the others on the block.</p> <p>Now developers are buying up the small affordable square foot houses and putting in mansions which price out the people who could have bought the smaller square foot homes. That is what is pushing up the price of the homes. Put in new laws about ripping down the smaller affordable homes. That would help solve our problem.</p> <p>Keep the charm of Minneapolis and the beauty of our neighborhoods. Make new construction blend in with the houses on the block and the neighborhood. We don't need modern homes in historic neighborhoods</p>	6/24/2018
1732	0.1	/topics/land-use-built-form/	<p>100% against having multiple family unit in some of our beautiful quiet neighborhood</p>	6/24/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1733	29	/policies/creative-sector-economy/	The economy is a lattice of related suppliers, producers, and consumers. The relationships among the players need to be more clearly defined (upstream, downstream, etc...) to ensure that the hand-offs are seamless and efficient. "Supporting" the creative sector is a free-market approach, which doesn't work where there is no effort to integrate them/us into the economic fabric of Minneapolis. It is far more than contributing funds to help the creative sector to survive; they must flourish and become economic multipliers. There are successful models for integration of sectors in NYC, SF, LA, Philadelphia, Seattle and Atlanta. Washington DC, Chicago, and Denver, not so much...	6/24/2018
1734	42	/policies/expand-homeownership/	Not sure who wrote these goals and related "policy statements," but the document could benefit from integration of current federal, state and local concrete initiatives that support the goal. Residents might be able to better support any/all of these types of goals in knowing that these goals are not "a bridge too far."	6/25/2018
1735	30	/policies/arts-and-cultural-assets/	We need people who are talented in explaining what all that noise is, coming from cars driving by and our neighbors. With the arts, we shouldn't be preaching "tolerance", as though being annoying is multiculturalism. Until someone explains how certain social and economic strata identify with certain types of arts, most of us will simply dismiss the other cultural efforts at creative arts ~ and consider them offensive or lowbrow. How about Minneapolis start promoting more public education about the origins, meaning, context, and appreciation of some of these "new sights and sounds" that other cultures are introducing. We don't have to like it or appreciate it; unfortunately, much of it carries stigma, like "gangsta rap", which is associated with gangster and Al Capone and the mob and crime syndicates and etc... I'm SURE that's not the culture being promoted by those sounds. So someone needs to explain to the rest of us...	6/25/2018
1736	1	/policies/access-to-housing/	I am opposed to the idea of increasing density in single-family neighborhoods. In particular, I am strongly opposed to allow the construction of fourplexes.	6/25/2018
1737	0.1	/topics/land-use-built-form/	The proposed changes to the areas between Chicago and Portland and 57th Street to HWY 62 is not in line with the expectations of homeowners that live in that area. For example, 59th Street to 61st street (between Portland and Chicago) is a single family residential area. The homes are nice - they are well taken care of - and there are several children that live in the area. There are also homes in a variety of price ranges. I do not believe it is realistic to characterize 60th street as a high speed frequency transit area because the number 5 bus travels four blocks on 60th. I understand that the city is changing the name of the 5 to the D-Line, but it is still the same bus route. This area should remain small scale residential. This is not an area for high density and/or transition from lower density to residential. It is single family residential and should remain that way.	6/25/2018
1738	1	/policies/access-to-housing/	Please don't destroy the character and historical architecture of the city. I for one bought a house so I didn't have to deal with apartment dwellers. This is a no vote for me. You're turning Democrats into Republicans with these ideas.	6/25/2018
1739	33	/policies/affordable-housing-production/	I feel this is the most important issue on the agenda.	6/25/2018
1740	19	/policies/bicycling/	I am absolutely disgusted by the plan to discriminate against families and the disabled by prioritizing bikes over cars. Already areas where car lanes were replaced with bike lanes, roads are choked with traffic, spewing pollution and leading to aggressive driving, putting children (often minorities) safety at risk. The city should be ashamed such an idiotic and discriminatory policy has made it this far in to the planning stage.	6/25/2018
1741	92	/policies/identify-and-evaluate-historic-resources/	preserving historic buildings should not be a priority. they are often unsightly and poorly kept up. The city would be better served by replacing these structures with something more modern.	6/25/2018
1742	16	/policies/environmental-impacts-of-transportation/	Deployment of Electric Vehicle chargers should be given the highest priority. The most recent Xcel Energy target is 85% carbon free electricity by 2030. Encouraging electric vehicles would reduce roadside pollution as well as carbon emissions with the current Xcel strategy.	6/25/2018
1743	19	/policies/bicycling/	Enough is enough with the bike lanes! Bike lanes have been a disaster and not only should we NOT add more anywhere in the city, but should eliminate the bike lanes recently installed on 26th and 28th street.	6/25/2018
1744	1	/policies/access-to-housing/	I worry that the proposal to allow fourplexes on MPLS properties currently zoned for single-family homes will negatively impact many neighborhoods in terms of neighborhood identity, cohesiveness, and charm. I hope the City and Council can consider a more measured approach to increasing population density, such as relaxing restrictions in specific areas where it makes sense and not in other areas where neighborhoods don't want it. Thank you for considering my comments.	6/25/2018
1745	54	/policies/supporting-economic-growth/	The city needs to be more supportive of companies which call Minneapolis home, and should actively encourage more companies to move here. Please do not follow the example of cities such as Seattle by trying to extort money out of companies and encouraging companies to leave and take their good paying jobs with them.	6/25/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1746	1	/policies/access-to-housing/	I live in North Minneapolis and DO NOT WANT any more four-plex buildings here. No need for off street parking?! WHAT?? That is exactly what the northside DOESN'T NEED, more renters who don't care about their neighborhoods, more cars racing down the streets, and more gang violence because of all the renters. WE NEED HOME OWNERSHIP NOW!!!! SINGLE FAMILY HOMES ONLY FOR THE NORTH SIDE. Get more first time home buyers here and more home owners, NO MORE RENTERS IN THE NORTHSIDE.	6/25/2018
1747	19	/policies/bicycling/	This looks excellent, as a basic policy concept. I hope it will also encourage the provision of additional bike racks in popular destination areas. For example, at the downtown Target store on the Nicollet Mall, there are currently only 3 bike racks nearby - all almost always filled during the day.	6/25/2018
1748	35	/policies/innovative-housing-types/	I like the idea of building more 3 and 4 unit apartment buildings around the City.	6/25/2018
1749	0.2	/small-area-plans/	The small area plans should not over ride CITY policy. The small area plans should only be a guide. MOST neighborhood planning processes are flawed in most neighborhoods because it excludes too many people. Usually renters are excluded from the process.	6/25/2018
1750	0.1	/topics/land-use-built-form/	St Anthony East should be Interior 2.	6/25/2018
1751	35	/policies/innovative-housing-types/	How about policies to encourage more net-zero housing construction? Houses that produce as much energy as they use are a major way to cut carbon emissions. I should know because I built and live in one. Also, such houses--built at a premium of 15% over normal cost--are free of drafts, cold spots, moisture build up. They lose heat less rapidly if the power goes off (only 1/2 degree per hour at -20F outside). They have minimal utility bills. They might be especially suited to seniors who need energy security in their houses as they 'age in place'	6/25/2018
1752	0.1	/topics/land-use-built-form/	<p>Overall the Plan goals are admirable but we need to see it modified from its current draft form.</p> <p>Under the new zoning plan there are too many multi-lot, multi-level apartments on single family home blocks. Zoning a currently single family home block into the new Interior 3 and Corridor 4 will ruin these neighborhoods and will destroy homeowners' property values.</p> <p>The height and size limits of Interior 3 and Corridor 4 should be reduced and limited.</p> <p>We want to see less radical zoning changes in the draft along so-called transitways.</p> <p>We want to see explicit preservation of single family blocks that are historic and well kept.</p> <p>The plan should include green, ecological standards for apartments such as tree, green space, green rooftop and storm water runoff requirements.</p> <p>The plan should specifically include discussion about impact to water quality and runoff.</p> <p>The plan needs to address of the Plan on parks and wildlife spaces? Specifically green space, wildlife space and pollinator habitat needs to be protected as well as water quality of the lakes and creeks.</p> <p>The plan does not address impacts on schools and this must be included.</p> <p>Neighborhoods should be able to be more involved in creating the next version of the plan vs a dictated blanket approach across the city.</p> <p>Instead of spreading Interior 3, Interior 3 and Corridor 4 across so-called transitways, we prefer that the plan be altered to concentrate new upzoned development around areas of the city that are already business nodes. For example in Southwest 56th and Diamond Lake Road, Hennepin between Lyndale and 35W, removal of the Nicollet Kmart by eminent domain if needed to open up Nicollet again.</p>	6/25/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1753	0.1	/topics/land-use-built-form/	<p>Brian Crotteau 6/25/208 Overall the Plan goals are admirable but we need to see it modified from its current draft form.</p> <p>Under the new zoning plan there are too many multi-lot, multi-level apartments on single family home blocks. Zoning a currently single family home block into the new Interior 3 and Corridor 4 will ruin these neighborhoods and will destroy homeowners' property values.</p> <p>The height and size limits of Interior 3 and Corridor 4 should be reduced and limited.</p> <p>We want to see less radical zoning changes in the draft along so-called transitways.</p> <p>We want to see explicit preservation of single family blocks that are historic and well kept.</p> <p>The plan should include green, ecological standards for apartments such as tree, green space, green rooftop and storm water runoff requirements.</p> <p>The plan should specifically include discussion about impact to water quality and runoff.</p> <p>The plan needs to address of the Plan on parks and wildlife spaces? 1754	41	/policies/tenant-protections/	<p>For my job, I work with Minneapolis low income, IP&POC renters who live in run down places owned by property owners trying to squeeze every last cent out of the buildings. The vast majority of the renters are on a month to month lease and have NO protections against a "silent" eviction. The landlord simply does not renew the monthly lease and tenants are out in 30 days.</p> <p>Implement a "Just Cause" eviction policy. This provides landlords with a list of valid reasons to end a rental agreement, and prevents leases from being ended "at will". Include protections for month to month renters.</p>	6/25/2018
1755	41	/policies/tenant-protections/	<p>More funding and stable funding for Inquilinx Unidxs, HomeLine and Housing Link. Add to Neighborhoods 2020 funding structure. They do amazing work with a select population in Minneapolis that neighborhood orgs cannot support well (ie advocacy, direction action and legal). Neighborhoods orgs refer renters to these partner orgs. It is a win win!</p>	6/25/2018
1756	84	/policies/public-safety/	<p>Stop MPD from shooting people.</p>	6/25/2018
1757	0.1	/topics/land-use-built-form/	<p>This is not about SUPPLY. You still have a "Cost to Build" and just because you rezone a massive amount of land and create a free for all, that doesn't mean that you will increase your supply.</p>	6/25/2018
1758	0.1	/topics/land-use-built-form/	<p>Huge chunks of single family homes should not be rezoned. This will create a Hodgepodge of building structures. The growth we face is SMALL less than 2% a year when you compound out the 40K more residents in 2030.</p>	6/25/2018
1759	0.1	/topics/land-use-built-form/	<p>SW Mpls has the most to lose. This is obscenely unfair what you are doing. It isn't about four plexes, its about putting huge apartment complexes on streets like Zenith or York. Those are all single family home and then you decide to change it from that to 100 unit apartment complex....Get some balance!!!!</p>	6/25/2018
1760	41	/policies/tenant-protections/	<p>Along with part b, the city of Minneapolis should make tenant rights even more accessible through: more widespread tenant resources in multiple languages, and a media campaign to promote specific tenant rights.</p>	6/25/2018
1761	41	/policies/tenant-protections/	<p>In regards to part A, the city should be strong advocates and stand up for LGBT and Trans folks, and their civil rights as tenants.</p>	6/25/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1762	67	/policies/climate-resilient-communities/	These seem like reasonable actions that would have an impact on climate change impact. I especially like the goal of establishing an urban tree canopy to manage the heat island effect. I'm not sure how exactly they'll decrease the demand for energy and strengthen connections between individuals and networks though.	6/25/2018
1763	0.1	/topics/land-use-built-form/	The Birchwood Cafe at 3311 E 25th St and 2501 33rd Ave S is listed as Urban Neighborhood and should be Neighborhood Mixed Use. Same for the 3330 25th St E parcel, which is also active commercial.	6/25/2018
1764	51	/policies/healthy-pre-k-development/	Targeted home visiting services are effective, and I think important for supporting families and the well-being of young children. I do not have a child, but from friends that do, I think it is very necessary to increase access to high-quality child care. Parents and caregivers are put in very difficult situations when they do not have access to childcare support.	6/25/2018
1765	79	/policies/healthy-youth-development/	I see eliminating barriers to engaging in civic opportunities, but I do not see youth leadership opportunities which are very important. Young people should explicitly be in leadership roles and able to share their experience, voice, and strengths in their communities, especially in matters that impact their lives and futures.	6/25/2018
1766	0.1	/topics/land-use-built-form/	<p>Tying these zoning changes so tightly to transit routes seems short-sighted. Don't transit routes often change? In this plan, Bryant Ave S becomes Corridor 4, while Lyndale S of 42nd Street is Interior 1? Bus routes should really be going down Lyndale instead of Bryant anyway as Lyndale is the higher traffic road and Bryant should be left to be the bike route that it claims to be (which is unusable as a bike route now due to buses with no room to give space to bikes). It is ridiculous that Colfax, Aldrich and Garfield are zoned higher than Lyndale (S of 42nd) at Interior 3.</p> <p>Also, why is it only one side of the avenues bordering Bryant are zoned higher when really it's the same distance to walk to bus stops from either side of the street. This zoning is unfair. It makes sense to zone transit lines themselves and busy streets higher. People get discounts when they buy houses on these busier streets and they know what they're doing when they make their purchases. Adding this intermediate level to bordering streets is not obvious and unnecessary. Please keep the higher zoning to the busier streets where it can be expected.</p>	6/25/2018
1767	35	/policies/innovative-housing-types/	I'm a homeowner in South Minneapolis and I love this goal! I'm excited the city is moving to expand beyond just single-family homes. Homes with multiple units can fit into existing neighborhoods just fine - I should know, I used to live in one! Now that I own my own home, I would welcome that kind of development in my neighborhood.	6/25/2018
1768	1	/policies/access-to-housing/	C and D. I am concerned that too much density in areas currently zoned for single family homes will overwhelm our infrastructure. We need to build the infrastructure before we can build the structures. Our streets are nearly impassible in winter due to difficulty in snow removal. Too much density before we build out our transit system (and there is no new money for this from the state), is putting the cart before the horse.	6/26/2018
1769	31	/policies/creative-workers/	Artists, no matter what their attributes might be, respond to market forces, unless there is venture capital or patronages that are willing to support those creative workers. Some of the creative work is simply identified with less prestigious or wealthy segments of our economy; other creative arts are associated with wealthier patrons. This goal seeks to get patrons to invest in things that they don't like or in which they fail to see merit. Perhaps creative artists need to check the marketplace before trying to market their wares?	6/26/2018
1770	33	/policies/affordable-housing-production/	33 A. Creating density does not create affordable housing. We need to have assurances that any new development will not tear down what is currently affordable to be replaced with new, high end apartments. This is what we are seeing now. Perhaps we need to incentivize developers to have a certain number of units that are affordable (highly affordable) in order to be able to get permits to build.	6/26/2018
1771	35	/policies/innovative-housing-types/	35 A. I live on a block with single family homes, duplexes, a fourplex and apartment buildings. These structures are all to scale with the surrounding neighborhoods and all blend well. We need to restrict height to the height that areas are currently zoned so as not to infringe on people's access to light and air.	6/26/2018
1772	0.1	/topics/land-use-built-form/	Do NOT ruin our neighborhoods. Allowing larger multiple unit buildings will only encourage teardowns in a beautiful historic neighborhood. Minneapolis will become a city of cheap developer owned complexes, that already seem to be taking over the Wedge neighborhood and Uptown.	6/26/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1773	49	/policies/educational-and-economic-access/	Policy 49.c. Minneapolis Public Schools has not had good outcomes in terms of educational outcome gaps. I think the City should consider, as feasible based on levers the City has at its disposal: supporting intensive teacher and administrator training in cultural fluency/intercultural development; teacher and administrator outcomes; parent-teacher and parent-administrator relationships as an effectiveness outcome; parent/community-teacher/administrator informal but structured conversations to undo the tensions between the mostly white, female teacher base and the large student and parent of color residents of the City (e.g. Living Room Conversations on Status and Privilege). A significant change in mindset among WHITE RESIDENTS is needed to change outcomes in the City. Intentional, ongoing, positive interactions among people across race and class is needed.	6/26/2018
1774	11	/policies/skyways/	I don't see anything about making sure that any new or renovated skyways use bird friendly glass. Why not when that is a simple thing with little financial impact at the time of design or renovation.	6/26/2018
1775	32	/policies/arts-in-community-development/	There are three categories of art and culture for most people: That which they like; that which they tolerate; that which they find offensive. Until the form is "liked", there will be no investment in that form. Moreover, if there is polarity in the modes of appreciation, you can expect social and cultural groups to disengage with each other. One group will require plush concert halls with ideal acoustics; another might need a large stadium with huge speakers and strobe lights dancing towards the stars. The two groups will not very often meet, except through exceptional efforts. Spending more money on one does not imply that it will ever be woven into the fabric of society or become widely appreciated. It'll be present, yet disenfranchised.	6/26/2018
1776	93	/policies/stewarding-historic-properties/	I am thrilled that this specific policy as well as the others focusing on History and Culture are a significant part of Minneapolis 2040. It is important that these policies are carried out in commercial and public areas but also in residential areas. Neighborhoods are being decimated with "tear-downs" and "over-builds" - demolishing a home and building a large and architecturally obtrusive home in place. Often these are older homes adding character, integrity and history to a block. Please add policies for historic preservation in residential neighborhoods. Thank you.	6/26/2018
1777	38	/policies/affordable-housing-near-transit-and-job-	While I support increased community diversity, I DO NOT SUPPORT Proposal 2014 as it aims to destroy historic homes and neighborhoods and the plans look awful in their design and outlook.	6/26/2018
1778	33	/policies/affordable-housing-production/	Firmly opposed to Prop 2040.	6/26/2018
1779	1	/policies/access-to-housing/	NO to prop 2040. No new housing in historic neighborhoods. No destruction of architecturally significant home. No increased density in these areas. Have a heart and respect for historic Minneapolis. NO TO 2040.	6/26/2018
1780	1	/policies/access-to-housing/	1 C and D: I live on a block with single family homes, duplexes, fourplexes and apartments. It is lovely. It is lovely because the multifamily houses blend in with the surrounding homes. No structures above the current height limit and the designs need to blend with the surrounding community.	6/26/2018
1781	34	/policies/affordable-housing-preservation/	NO to Prop 2040. Bad planning, poor design and destroys historic areas.	6/26/2018
1782	35	/policies/innovative-housing-types/	NO to PROP 2040.	6/26/2018
1783	36	/policies/innovative-housing-strategies/	NO TO PROP 2040.	6/26/2018
1784	37	/policies/mixed-income-housing/	NO TO PROP 2040. No to tearing down good quality historic homes. Think of something a bit more interesting and sophisticated before you do this.	6/26/2018
1785	43	/policies/housing-displacement/	NO TO PROP 2040.	6/26/2018
1786	23	/policies/coordinated-development-strategy/	NO TO PROP 2040.	6/26/2018
1787	49	/policies/educational-and-economic-access/	The good news is that all racial groups are trending up in getting more than a high school diploma. The bad news is that home ownership is trending down. Home ownership is one of the safest ways for people to gain wealth and have stability in housing. Added bonus, it keeps our neighborhoods more stable as people are invested in their neighborhoods long term. This plan needs to find ways to encourage people to BUY in to their homes.	6/26/2018
1788	44	/policies/comprehensive-investments/	NO TO PROP 2040 AND ALL YOUR DEVELOPERS AND THEIR MONEY. I see what you're doing in the name of affordable housing - you're trying to make a lot of money while recklessly destroying historic homes. No way.	6/26/2018
1789	56	/policies/supporting-small-businesses/	56 E. We have already seen the impact of increased density on small businesses in our city. Many have been displaced when developers buy the buildings where they are housed and are forced out, others have lost parking so patrons have a harder time stopping at their places of business easily. I am not sure how to solve this, but having bike lanes on so many streets, taking away parking (yeh, people still drive cars because our transit system is not that well developed for them not to), allowing developers to come in a giving them anything they ask for in terms of CUP's and variances is NOT helping small businesses. You need to have small businesses involved in all of these decisions.	6/26/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1790	57	/policies/cluster-strategy/	57C. We need to invest in ALL of our small area business nodes and keep this model. This would support small businesses, keep things local so people are more apt to walk or bike and help to disperse opportunities throughout the city.	6/26/2018
1791	53	/policies/quality-of-life/	53C. You need to have language that you will respect the shoreland overlay districts. You also need to make sure that you have proper setbacks and that new development has the same amount of green space that current structures have. We have lovely parks, peoples' yards, boulevards. Overdevelopment puts all of this at risk.	6/26/2018
1792	1	/policies/access-to-housing/	"In neighborhood interiors farthest from downtown that today contain primarily single-family homes, achieve greater housing supply and diversity by allowing small-scale residential structures on traditional size city lots with up to four dwelling units, including single family, duplex, 3-unit, 4-unit, and accessory dwelling unit building types." Yes, yes, a thousand times yes.	6/26/2018
1793	53	/policies/quality-of-life/	Minneapolis will never be a city truly open to all until exclusionary, single family home zoning is eliminated. https://www.ted.com/talks/vishaan_chakrabarti_how_we_can_design_timeless_cities_for_our_collective_future?utm_source=facebook.com&utm_medium=social&utm_campaign=tedsread#t-303311	6/26/2018
1794	0.1	/topics/land-use-built-form/	The proposed built form map will destroy the character of residential areas of Minneapolis and decrease the already tight supply of affordable single-family homes. The Corridor 4 and Interior 3 designations will allow commercial 4 and 3 story buildings in areas that are historically and currently single-family homes. The proposed plan for 50th street, 46th street, Xerxes, Bryant, Colfax etc. will sacrifice affordable single-family homes for commercial development. Who will lose? Families as the supply of single-family homes decreases and prices shoot up. Who will win? Developers. Likewise, opening up all areas of the city to development of fourplex apartment buildings will sacrifice the supply of affordable single-family homes. The Star Tribune has run very good series explaining that the high cost of new construction means no new construction can be affordable. So how does destroying affordable single-family homes and replacing them with fourplex apartment buildings increase the supply of affordable housing? It doesn't. Just another give away to developers.	6/26/2018
1795	1	/policies/access-to-housing/	This is not the solution. Money should be used to beautify existing affordable areas. This is the opposite of Reduce, Reuse, Recycle.	6/26/2018
1796	33	/policies/affordable-housing-production/	Minneapolis is a metropolitan area that must see housing as a regional problem that cannot be solved within city boundaries as we already know the impacts of higher densities in populations. It is time to re-imagine the Twin Cities as an urban core with easily accessible satellite communities that are planned and built for livability and quality of life. Aging in place is a socially and economically unfeasible option, particularly as older people will become more and more isolated from peers and cohorts, alienating them from services most needed by that strata. As the American family structure has changed over the past 50 years, with fewer and fewer close families geographically collocated, cohorts need to create new social structures that continue to provide the care and emotional support that is needed in our twilight years. Aging in place is equal to putting a car in a parking lot, where it is out of sight and out of mind. We can feel that we are doing what families did in the early 20th century; however, this is the 21st century. I am glad that access to housing is no longer focused entirely on home ownership, which is also a post World War II goal, and captured under the Veterans Home loan programs. For many Americans, based on lifestyles and choices on quality of life, home ownership is a folly. A more productive life might be experienced with more spending on education, travel, entertainment, and so on... This is a great strength in this part of the Minneapolis 2040 plan, i.e., respecting people's life choices, which may not include home ownership.	6/26/2018
1797	32	/policies/arts-in-community-development/	Creative placemaking has always been a convenient way for me to know if I want to be part of and support a community or neighborhood ~ or not. If I see spray-painted walls or overpasses, I know that I should roll up my windows, drive without stopping, and find an escape route. If I hear loud noises and boom boxes, I have ventured into an area I don't belong. If I see a Calder mobile with water fountains and artistically landscaped grounds, I would find that inviting and find a parking space. How a community creates its identity through the sights and sounds of its inhabitants is a useful tool for "outsiders" to know if that is where they want to be and neighbors with whom they would like to interact. Creative expressions is cultural expression and a mark of socio-economic identity; they are also convenient indications of whether you will feel at home in a neighborhood.	6/26/2018
1798	1	/policies/access-to-housing/	I am firmly against this item. We thoughtfully choose our neighborhood and bought our house where the majority of the homes are single family houses. It's not ok to change the zoning laws and that will change the look and feel of our neighborhood.	6/26/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1799	20	/policies/transit/	Please bring back a robust streetcar system!	6/26/2018
1800	1	/policies/access-to-housing/	1e. DO NOT allow small-scale residential structures on traditional size city lots with up to four dwelling units, including duplex, 3-unit, 4-unit, and accessory dwelling unit building types in neighborhood interiors farthest from downtown that today contain primarily single-family homes. Instead, stop the teardowns and major remodels in these areas. If we keep the smaller homes, people who can afford less will still be able to live in these neighborhoods.	6/27/2018
1801	1	/policies/access-to-housing/	1e. DO NOT allow small-scale residential structures on traditional size city lots with up to four dwelling units, including duplex, 3-unit, 4-unit, and accessory dwelling unit building types in neighborhood interiors farthest from downtown that today contain primarily single-family homes. When I bought my home 18 years ago, I did not plan on living in a neighborhood of multifamily homes. I am tired of developers and city officials that think they can do whatever they want with complete disregard for their constituents.	6/27/2018
1802	0.1	/topics/land-use-built-form/	I love it. Now we need the development to keep coming in and filling up all of the ugly and wasteful parking lots. This is especially the case downtown.	6/27/2018
1803	0.1	/topics/land-use-built-form/	34th Avenue S is a transit corridor between 42nd and 46th Street (I ride this bus regularly and pass the old streetcar nodes along this stretch). This segment should be zoned for Corridor 4, not interior.	6/27/2018
1804	0.1	/topics/land-use-built-form/	54th Street is a transit corridor east of 34th Avenue. Please upzone this segment to Corridor 4 between 34th Avenue and Minnehaha Avenue.	6/27/2018
1805	1	/policies/access-to-housing/	1e. DO NOT allow small-scale residential structures on traditional size city lots with up to four dwelling units, including duplex, 3-unit, 4-unit, and accessory dwelling unit building types in neighborhood interiors farthest from downtown that today contain primarily single-family homes. This policy will accelerate the destruction of affordable starter single family homes. Teardowns of starter homes have been happening in the Linden Hills, Fulton and Lynnhurst neighborhoods of Minneapolis for over 7 years..	6/27/2018
1806	1	/policies/access-to-housing/	1e. Allowing small-scale residential structures on traditional size city lots with up to four dwelling units, including duplex, 3-unit, 4-unit, and accessory dwelling unit building types in neighborhood interiors farthest from downtown that today contain primarily single-family homes is VERY BAD policy. This policy will accelerate the destruction of affordable starter homes. Less people will be living in single family homes and more people will be living in apartments. How does this achieve more prosperity for any Mpls resident?	6/27/2018
1807	1	/policies/access-to-housing/	1e. Allowing small-scale residential structures on traditional size city lots with up to four dwelling units, including duplex, 3-unit, 4-unit, and accessory dwelling unit building types in neighborhood interiors farthest from downtown that today contain primarily single-family homes is VERY BAD policy. A better solution is to stop all teardowns and major remodels of single family homes. Developers are tearing down houses in many Minneapolis neighborhoods for their own opportunistic profits. They are building McMansions. The McMansions are making it difficult to live in our current single family homes because they cause our property taxes to keep going up. Many people are on fixed incomes. Instead stop the teardowns and major remodels, and keep the smaller more affordable homes.	6/27/2018
1808	1	/policies/access-to-housing/	1e. Don't allow small-scale residential structures on traditional size city lots with up to four dwelling units, including duplex, 3-unit, 4-unit, and accessory dwelling unit building types in neighborhood interiors farthest from downtown that today contain primarily single-family homes. A better policy is to stop all teardowns and major remodels of homes. Very few people can afford these McMansions. It is making it difficult to live in my area for all homeowners because our property taxes are too high! Instead keep the smaller more affordable single family homes.	6/27/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1809	51	/policies/healthy-pre-k-development/	<p>These are all great goals, but HOW are they to be accomplished? To address these goals, tax structure must be changed, and this actually should be metro-wide, and eventually, nation-wide. Minneapolis itself cannot accomplish these goals, with its real estate taxes alone. Increased income taxes across Minnesota probably won't "fly" politically.</p> <p>I agree strongly that we need much better mental health services, including funding for Hennepin County Medical Center, funding for inpatient psychiatric care and aftercare programs, etc. These goals actually point to a need for a national health care system, woefully lacking in the U.S. And for a social safety net that would include good child care, support for families living in poverty, etc. I honestly don't see how Minneapolis can hope to accomplish this on its own, so listing these as goals without the means to accomplish these goals seems disingenuous.</p>	6/27/2018
1810	0.1	/topics/land-use-built-form/	<p>This plan is top-down, sweeping and unwise. The citizens of Minneapolis have NOT been given enough time to know about the plan, understand it thoroughly and truly have a voice in the management of their own city. Why has no written information been distributed to the residents of Minneapolis? We routinely receive information about garbage disposal, instructions on composting, snow removal, etc. Not everyone has a computer, and not everyone can possibly navigate a complex website like this one.</p> <p>Minneapolis does not have a great history when it comes to city planning, and we have had plenty of examples of failures in city planning (City Center, Block E, K Mart in the middle of Nicollet Ave., teardowns of historic buildings.) St. Paul has preserved a gorgeous historic downtown, while Minneapolis keeps replacing its mistakes. I think that this plan is an epic example of over-reach in city planning.</p> <p>Why do people want to move to Minneapolis? One reason is its lakes with public access all around, its nationally-awarded system of parks, walking and biking paths, public beaches, trails along Minnehaha Creek and the Mississippi River. We have wonderful access to nature because of the wisdom of city fathers and mothers, and because of Henry Wirth and colleagues who created and preserved a natural environment for all of us. We owe it to future generations to preserve access to parks and historic neighborhoods. This plan would drastically increase traffic and increase parking problems. We already see this in areas around Lake Bde Maka Ska, and in Uptown. If traffic and parking problems increase around Lake Bde Maka Ska, due to large residential towers in a area already glutted with traffic, access to the lakes will be available only to nearby residents and to young people who can bike there. Families, people with disabilities and seniors will not have access to our lakes.</p> <p>Visitors to Minneapolis remark on our wonderful, diverse neighborhoods with housing and small businesses unique often to these neighborhoods. Typically, neighbors know one another and help one another out. This sort of easy familiarity is typical of areas of single-family homes, where residents have a stake in their own property and in the welfare of their neighborhoods. Introduction of apartment houses that are not owner-occupied will most certainly change the feel of the neighborhoods and cohesiveness. Our SW Mpls neighborhood is diverse from a racial, ethnic and gender-identity perspective, and we value all of our neighbors. Our diverse neighborhoods deserve to be preserved.</p> <p>There is affordable housing in our neighborhoods, in the form of smaller, "starter"- homes. It might be that millenias are not yet buying homes, but the likelihood is that as they grow older and many have families, they too will want houses with yards and places for their children to run about.</p> <p>We in SW Minneapolis already are experiencing parking problems because developers have not been required to provide parking spots. Not all of us have two-car garages; some of us don't have usable garages at all, and must park on the street. Most families and elderly people do still need cars in Minneapolis -- because of our climate and because of the need to get to church, work, childcare, sporting and musical activities for children, and to see family and friends throughout the metro area. I'm all for making biking safer in Minneapolis so that more residents will be biking instead of driving -- but most Minneapolis residents will not be able to rely on biking, because of family needs,</p>	6/27/2018
1811	82	/policies/aging/	82. Provide services for seniors to remain in their single family homes.	6/27/2018
1812	33	/policies/affordable-housing-production/	All housing is affordable. Otherwise, nobody would be buying houses. Enough with social engineering already. Enough with propping up those who have no business buying a house they can't afford in the first place.	6/27/2018
1813	1	/policies/access-to-housing/	This is just another form of block-busting and will cause white flight just like in the 1960s. When will liberals learn from the past?	6/27/2018
1814	33	/policies/affordable-housing-production/	The government has no business engaging in social engineering. Please respect the existing residents' freedom to association.	6/27/2018
1815	37	/policies/mixed-income-housing/	Why do you think anybody who pays 100% of the rent would want to live next door to the affordable housing crowd? You need to start respecting people's freedom of association.	6/27/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1816	1	/policies/access-to-housing/	I live in Lowry Hill, on the border of Lowry Hill and Kenwood. I strongly object to the plan to allow multi-family units and apartments in this already dense neighborhood. I know *many* of my neighbors feel the same way. My neighbors and I have invested heavily in our homes and in the city because of the character of this neighborhood with the belief that it can be preserved. Allowing multi-family units and additional apartment buildings in this area would violate the trust we have put in city government to help preserve older historic neighborhoods. We pay substantially higher property taxes and spend proportionally more per household than any other area in the city. I want to register my objection to these housing plans.	6/27/2018
1817	0.1	/topics/land-use-built-form/	We live in Lynnhurst and oppose the idea of including four-plexes within the future plan. The addition of McMansions has already taken away much of the character and green space that attracted us (a family of four) to live in the City. Allowing four-plexes (particularly without any restriction on number of tenants or animals) will further erode the neighborhood feel that initially attracted us to this area.	6/27/2018
1818	40	/policies/homelessness/	Have you considered Homeless Navigation Centers? They are about twice the price of emergency shelters but it appears they actually help solve homelessness rather than continue the cycle, by offering support services packages with temporary shelter. There is an article in the San Francisco Chronicle on the topic. https://www.facebook.com/307851324523/posts/10156635765244524/	6/27/2018
1819	15	/policies/transportation-and-equity/	Since building the LRT, bus transportation has gone steadily down hill. I am 85 years old. I cannot walk 1/2 mile and up a smelly staircase (when the elevator is out of order) in order to take the LRT. No busses go downtown now, so I MUST change on the LRT to use public transportation. I have seen several comments about increasing the budget for public transportation, and so far I have not seen anything in the 2040 plan indicating that this is a priority if the 2040 plan is to work.	6/27/2018
1820	18	/policies/walking/	VIBRANT, WALKABLE streets are nice things to have in downtown or the Uptown area, where healthy, youngish people can inhabit their own Little Walking Village. This vision of everyone walking or riding bikes, or taking public transportation-if-they-can-find-it, is totally impossible for the elderly, handicapped, health impaired, parents with young children, people with heavy grocery bags, business people with large parcels, etc. etc. This idea, along with the ridiculous bicycle lanes, is the most self-centered and unrealistic idea of them all.	6/27/2018
1821	58	/policies/business-districts-and-corridors/	One of the things that has been an issue with new development, leading to commercial displacement, is the new commercial spaces being built are large and expensive. I understand that there are financial reasons that developers build this way, but it leads to lengthy vacancies and makes it harder for small-businesses to find space in new developments. It would be helpful if the city could encourage developers to include a mix of sizes of commercial space, perhaps by offering height/density bonuses for including smaller commercial spaces in new mixed-use buildings. The solution to ensuring affordable space for small businesses isn't to merely rely on aging commercial stock that will require expensive renovation to stay safe, but to ensure that new development can serve those purposes as well. It seems like offering bonuses for small spaces could be an effective way to do that.	6/27/2018
1822	1	/policies/access-to-housing/	I am supportive of the above proposals and especially the increased density in all neighborhoods of Minneapolis, as called out in #e. The City has to do something different than the status quo if it is to address the current housing crisis and our history of racial disparities in housing.	6/27/2018
1823	27	/policies/transportation-partnerships/	I would support the jurisdictional transfers of roadways from Hennepin County to the City, such as East 2nd St from Cedar Ave to Hiawatha Ave, as coordinated with major construction projects. Hennepin County wants to move traffic as fast as possible on their roads, and only sees these corridors are thoroughfares. Roads like 42nd St are designed for higher speeds than the posted speed and are dangerous and create barriers for people who live in our neighborhoods to get to schools, parks, and commercial areas.	6/27/2018
1824	28	/policies/msp-airport/	Walking and riding a bicycle to the airport? TELL ME THIS IS A JOKE! TELL ME YOU'RE KIDDING! Where is the action strategy about public transportation to the airport. Have you actually taken the LRT to the airport? With a broken leg and a big suitcase?	6/27/2018
1825	28	/policies/msp-airport/	Walking and riding a bicycle to the airport? TELL ME THIS IS A JOKE! TELL ME YOU'RE KIDDING! Where is the action strategy about public transportation to the airport. Have you actually taken the LRT to the airport? With a broken leg and a big suitcase?	6/27/2018
1826	26	/policies/vision-zero/	The City should take back all County roads like Lowry, E 42nd St, Lyndale Ave S...no need for high speeds through neighborhoods!	6/27/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1827	28	/policies/msp-airport/	Walking and riding a bicycle to the airport? TELL ME THIS IS A JOKE! TELL ME YOU'RE KIDDING! Where is the action strategy about public transportation to the airport. Have you actually taken the LRT to the airport? With a broken leg and a big suitcase?	6/27/2018
1828	1	/policies/access-to-housing/	If fourplexes are approved throughout the City, the City of Minneapolis should team up with the University of Minnesota School of Architecture to design a half dozen or more fourplex designs that meet the setback requirements for the city, have enough drainage, on-property parking, and other city-mandated restrictions as well as generally fitting the ascetics of existing neighborhoods in Minneapolis. These several blueprints/site plans could then be "pre-approved" by zoning/building planning/permitting to receive expedited approval at the city level. Having pre-approved building plans and expedited means to get through the city approval process the costs to build before the first shovel is turned will be greatly reduced. Reducing these costs will give housing a greater opportunity to be affordable. In exchange for this expedited review and cutting out the cost of hiring an architect there could be some sort of use restriction for rent control for a period of time (say 5 years) on two or all of the units of the fourplex. Additionally, because the same plans would be used repeatedly, it would be easy to create a baseline for how costs to build housing are increasing in Minneapolis since the building costs limit affordability.	6/27/2018
1829	27	/policies/transportation-partnerships/	LRT is, without question, the MOST expensive and LEAST flexible mode of transportation. \$2 billion dollars to transport affluent white people from Eden Prairie to downtown is totally unfair, unjust, uneconomical, and ineffective. OK, it IS nice. Nice nice nice. For a few. Why not build up the fleet of busses with different sized busses for different times of the day and different demands of neighborhood routes. Why not have electronic scheduling at each bus stop, in effect in Europe for 30 years??? Why not use Social Media or Next Door communication to put together a little bus load of riders? People can tell when a store or service doesn't want them. Why not make public transportation as nice nice nice as the LRT cars are, so that all (most) riders will feel recognized and valued and responsible? Hybrid busses may be a good thing for the environment, but I stopped riding the busses when I was thrown forward several seats by the bus accelerating. Slowing down was equally frightening, and stepping up the bus stairs was very painful for my arthritic legs. It's not worth it. Also, I have NO idea how to purchase a bus card -- another best kept secret. More arguments for making public transportation accessible and valuable to the PUBLIC.	6/27/2018
1830	82	/policies/aging/	Aha! The Geezers have been acknowledged! In all the photos on the Goals section there is 1 white haired woman. ALL the other photos show children or young (no doubt hip and well employed) people. A picture is worth 1000 words. I might have a small meeting of elderly people to talk about these action strategies, and will forward anything useful that comes out such a meeting. But ONLY if there is EVIDENCE that anyone connected with this project is SERIOUSLY LISTENING. We don't have a lot of time to waste on "citizen participation" that is required by law or instinct, but is merely an annoying hoop to be jumped through. We have been around a few barns on this issue, as you can see.	6/27/2018
1831	1	/policies/access-to-housing/	This is vital and very good. We MUST allow more housing to be built by right in all neighborhoods! Especially in wealthy neighborhoods that have historically shut people out! We cannot continue the status quo of allowing small groups of wealthy, white people claiming to speak for the city to hold and delay new housing. Allow more homes everywhere!	6/27/2018
1832	34	/policies/affordable-housing-preservation/	Of course, the number one way to preserve existing affordable housing is to build more housing at all levels - luxury, market-rate and workforce, subsidized, and public. There is little incentive to maintain NOAH when there are dozens of applicants for each available unit - landlords can make minimal improvements and charge much more. We must build to relieve pressure! It is extremely inequity when a person's options are to either spend more than 50% of their income on housing or spend an excessive amount of time competing against dozens of other people for a single, affordable home.	6/27/2018
1833	33	/policies/affordable-housing-production/	I agree with this as long as we do not concentrate low income housing in one area. This has shown not to work well.	6/27/2018
1834	40	/policies/homelessness/	As a city I would like to see us end homelessness starting with children	6/27/2018
1835	49	/policies/educational-and-economic-access/	Would like to see a police department where the officers lived in the city where they work so the investment is personal and they are our neighbors.	6/27/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1836	5	/policies/visual-quality-of-new-development/	I would add that developers and the City should partner with neighborhood and district leaders to consider small area plans and master plans that indicate desires for new architecture to contribute to an area or neighborhood's sense of place and character. Also engage the local creative community early in design process to contribute additional ideas and approaches.	6/27/2018
1837	54	/policies/supporting-economic-growth/	The city has done a poor job when it comes to expectations of developers when they apply for permits. Developers have maximized profits while we as a city are left with buildings that do not fit in to the community and look terrible. There has been an issue with quality of some of the buildings being built also.	6/27/2018
1838	14	/policies/tree-canopy-and-urban-forest/	Given the public response to the horrendous trimming of existing trees this spring, I believe a plan/policy for care of old growth should be considered that either removes them rather than butchering them or relocate or bury utilities.	6/27/2018
1839	7	/policies/public-realm/	I would include: engage with neighborhood and area leaders to explore art and culture in the public realm that is meaningful to that neighborhood and area.	6/27/2018
1840	16	/policies/environmental-impacts-of-transportation/	I think the city has gone to far with the bike lanes in the city. I feel the designs put forth in some cases are more dangerous. Also the parking that has been taken off the streets does not support those that need and want a car for transportation. The reduced parking has also affected small businesses around the city in a negative way.	6/27/2018
1841	49	/policies/educational-and-economic-access/	Minneapolis schools are segregated and have racial disparities because our neighborhoods are segregated by race and class, especially in areas of SW Minneapolis. Allowing new, dense housing in the neighborhoods of the Southwest and Washburn High School attendance area in Ward 13.	6/27/2018
1842	73	/policies/stormwater-management/	Working with the Park Board and watershed districts to incorporate trash containment systems for street runoff that is directly to local lakes, streams, and rivers. Some of the lakes in Mpls have these systems, but not all like Lake Hiawatha. The amount of storm water drains that empty into Lake Hiawatha and the Mississippi River add not only toxic chemicals, but also everyday trash that is being littered throughout the city.	6/27/2018
1843	80	/policies/development-near-metro-stations/	I support the minimum level of development near Metro stations! Need to make sure sidewalks near station areas get adequately cleared of snow as soon as possible.	6/27/2018
1844	18	/policies/walking/	I support prioritizing walking over other modes of transportation. I also would support a more aggressive snow clearing policy and for the city to explore ways to clear sidewalks of snow in areas around transit stations and other areas with high pedestrian activity.	6/27/2018
1845	0.1	/topics/land-use-built-form/	Corridor 4 seems like a cop-out for "protecting" certain areas of the city from practices of Highest and Best use for land development. All blocks adjacent to buses should be Corridor 6, and Corridor 4 should be eliminated.	6/27/2018
1846	19	/policies/bicycling/	People riding bikes should be able to safely use any road and have access to all businesses, schools, and housing that people driving vehicles do.	6/27/2018
1847	0.1	/topics/land-use-built-form/	I can support some components of the plan to increase density along corridors in South Minneapolis (where we currently own a house and are looking to transition from that entry level house to a "move up" level house). However, I think some pieces are not fully thought out, or explained. Increasing density on the busier corridors (Chicago, Nicollet, Lyndale, Cedar) makes sense, there are already many duplexes, they are busy and they aren't exactly a coveted location for families. However, I think extending increased density beyond the lots directly along these lines ignores the actual context of these neighborhoods. The idea in the plan seems to be a "transition" zone, fading from higher density to medium density to low density, but that just isn't how the neighborhoods operate. In our neighborhood, and in others, the lots that share an alley with a busier street are all or mostly single family homes on very quiet streets. There just isn't an existing transition zone in many places, so your plan seems to either not be aware of that or is forcing it to exist so the maps and plan look like "textbook" planning. I really like the zoning changes to blocks not immediately adjacent to these busy corridors should be reconsidered. I understand the need for more density, more housing options, more transit options is growing, but we can't ignore the existing context either. Many of these are very old neighborhoods, where the streets and homes have a lot of character. That adds value to the property, but also to the community and to the social structure of the neighborhoods. We bought in this are because of the old character it has, there are plenty of other places that offer new construction, but so few that have homes like South Minneapolis.	6/27/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1848	0.1	/topics/land-use-built-form/	I understand the push for greater variety of housing types and more affordable housing options. However, I do not think your plan addresses, or will result in, more affordable housing. Just allowing increased density and more multifamily housing does not mean that the housing will be more affordable. In Downtown and the North Loop, tens of thousands of apartments units have been built or are under construction right now, and very few would meet any affordability definition. In fact, most advertise rents that are more than our mortgage payment (including insurance and property taxes)! The city needs to establish some type of affordability requirement for a portion of the units. And really, you should have been doing it all along with the new downtown developments, especially considering the walkability and transit connectedness that exists downtown as compared to areas in South Minneapolis. Further, because the sale prices are so high in South Minneapolis, and new construction will involve buying an existing structure and tearing it down. Those added costs are likely to result in a unit that is as expensive, or more expensive, than what existed on that property before (especially since developers will be targeting the lower cost properties).	6/27/2018
1849	0.1	/topics/land-use-built-form/	Do not do this to our neighborhoods! The only people who benefit from this policy are the developers. Tear-downs, re-zoning, and re-developments decimate residential blocks. They take away the character, history, and stability.	6/27/2018
1850	0.1	/topics/land-use-built-form/	Rezoning is a bait and switch for the residents. I bought in my neighbor specifically because there wasn't a bunch of apartments, and street parking was a problem for guests. The city needs to stop trying to cram their agenda down our throats.	6/27/2018
1851	14	/policies/tree-canopy-and-urban-forest/	There were landscapes here that had no trees, but prairies. Why not plant prairie in some places? trees area great, but a prairie has LOTS of diversity in plant materials. And you don't have to worry about utilities as much. I hope you are consulting with the MPRB foresters, they have full control over the entire city's trees in public spaces.	6/27/2018
1852	65	/policies/urban-agriculture-and-food-production/	Do you want to have farms on public land or on private land? Check with the Park Board. They have been working on this one.	6/27/2018
1853	35	/policies/innovative-housing-types/	This is a rather self-serving statement regarding deregulation of the housing industry. Calling inferior housing stock "creative" is not a solution. The industry should be driven by consumer requirements (including continuously improving quality of life), rather than trying to drive the consumer to whatever the industry finds most profitable.	6/27/2018
1854	5	/policies/visual-quality-of-new-development/	I do not believe the buildings being built are adding anything to our city. The above examples are cookie cutter type buildings like the kind that fill Marcy and Uptown. They lack architectural integrity. I believe neighborhoods should have input on architecture in their zip code.	6/28/2018
1855	5	/policies/visual-quality-of-new-development/	Who decides what looks good? The city has stopped listening to neighborhoods, hence we have the hideous Sons of Norway going into Uptown. This is a great goal, but there's nothing about how it will be implemented.	6/28/2018
1856	5	/policies/visual-quality-of-new-development/	Too many old buildings have been torn down. The new towers and developments are ugly. You need to have developers work with neighborhoods.	6/28/2018
1857	17	/policies/complete-streets/	This is the most ridiculous prioritizing scheme I have ever seen. They have to all work together, and so far the city planners have done a terrible job. I have never seen traffic like this summer, and all winter there were no bikes on the trails. This doesn't work, especially when development precedes traffic infrastructure.	6/28/2018
1858	17	/policies/complete-streets/	This doesn't work. I live near a bike lane that is hardly used on 36th street. People ride along the lake to the greenway. But traffic is terrible.	6/28/2018
1859	17	/policies/complete-streets/	I'm as worried about climate change as anyone, but idling cars backed up because of oversized bike lanes with no one on them, is not the answer.	6/28/2018
1860	17	/policies/complete-streets/	Who decided to prioritize bikes and pedestrians? Families sometimes have to drive. Old people have to drive. We don't have enough mass transit for real options, and driverless cars and light rail are years away. Get realistic....Please!	6/28/2018
1861	17	/policies/complete-streets/	What about winter? Ice? This winter was long and there were no pedestrians or bikes on the bike trail. You have to take cars into consideration. When driverless cars come, they will still be cars and they will still cause traffic.	6/28/2018
1862	19	/policies/bicycling/	Do not expand. We have enough bike lanes, and they are so confusing. No one uses them in winter.	6/28/2018
1863	19	/policies/bicycling/	Not everyone can bike. Most people can't bike. We are a winter city. This idea works in cities where winter isn't long, cold, and icy. But that's not our reality.	6/28/2018
1864	23	/policies/coordinated-development-strategy/	We have already sold too much of the city to the highest bidders -- developers. Thus far, I have no faith in city planners. They take their mandate from elected officials at a 90 million a year cost to tax payers, and they are beholden to the very people who hire them.	6/28/2018
1865	43	/policies/housing-displacement/	This plan will not help displaced people. And the plan shows no real way toward affordable housing except trickle down economics. From my experience, up zoning a whole city increases displacement. Read Gary Cunningham's article.	6/28/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1866	58	/policies/business-districts-and-corridors/	The development in Uptown has decreased parking and has led to many of the best businesses closing. This plan does nothing to support small businesses. So far the recent development has brought in chains and killed once-thriving neighborhoods such as Uptown and Marcy.	6/28/2018
1867	58	/policies/business-districts-and-corridors/	I like the idea of community led efforts, but that isn't what I've seen from this city council. Development without parking is a dead end for most commercial zones.	6/28/2018
1868	58	/policies/business-districts-and-corridors/	Do not increase commercial corridors on all transit lines. Many transit lines have houses and small businesses. Let's leave what's working alone.	6/28/2018
1869	6	/policies/pedestrian-oriented-building-and-site-de	Encourage, reward, or demand high Gehl Door Averages.	6/28/2018
1870	20	/policies/transit/	In support of better public transit, the city should add sidewalks to all streets, especially any with bus routes or leading to bus stops. The bus stops should be made wheelchair accessible (currently quite a few are not). Whenever a signalized intersection runs better than Level of Service E, the majority of green time should be given to the bus route. Often this can be done in off-peak hours, if not during rush hours. At intersections where buses make right turns, the intersection should be configured to ease the turn movement for buses.	6/28/2018
1871	6	/policies/pedestrian-oriented-building-and-site-de	Use all opportunities to move away from back-of-curb sidewalks, creating snow storage and amenity space between the curb and the main pedestrianway.	6/28/2018
1872	25	/policies/innovations-in-transportation-and-infras	Looking forward to using the space taken up by private vehicles	6/28/2018
1873	48	/policies/data-driven-decisions/	We went to data based decisions at my work. We have never been as effective as we are at achieving results. Less emotional decisions.	6/28/2018
1874	1	/policies/access-to-housing/	I'm looking forward to the multifamily housing on public transit routes. It makes sense!	6/28/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1875	0.1	/topics/land-use-built-form/	<p>I have been in Minneapolis resident since 1988. I view with alarm the far-reaching and radical overhaul of the existing zoning infrastructure. The zoning code has its flaws, but it has worked well to balance competing issues and separate parts of the city for different uses. I feel like every time there is a bubble in the housing market there was a rush to throw up a lot of poorly thought through developments that forever alter the built environment of the city usually detracting from the qualities that have made the city such a livable place in the past. while I am not opposed to new development or increase density especially in areas served by transit, I feel like the current plan is driven more by the agenda of developers who want to create more high-end housing Uptown and in The Lakes area than it is to serve the residents of the city. Rather than shoehorning more luxury apartments in to the Uptown Lakes area I think the city should focus on creating affordable housing and developing areas of the city that have been traditionally neglected to help fight homelessness and the legacy of discrimination. I am especially concerned about the toll that unchecked for-profit development will take on the city's historic housing infrastructure the fine stock of early 20th century homes especially in The Lakes area is one of the city's greatest assets and something that draws people from all over the country to want to live here. With no formula for design review Overhauling the zoning code would mean destroying the historic character of countless neighborhoods that are not designated historic districts. It would also forever alter the scale streetscape and livability of some of Minneapolis is greatest assets. When friends of mine come to visit from out of town they always ask what there is to see and do here. I tell them that we don't have an Eiffel Tower or Empire State Building, but we do have are many Charming neighborhoods located near amenities such as lakes and Parks. to my mind these should be preserved as they have served the city well for over a hundred years. The place for new development is on vacant and underutilized land especially around Transit stations, the Glenwood area seems like a great place to develop, also along Hiawatha, and they're still vast tracts of North Minneapolis that suffer from massive underinvestment. Furthermore, the city is attempting to redevelop neighborhoods around a transit system that is mediocre at best. There needs to be much greater investment in transit the for transit-oriented development to be realized. In my personal opinion, the real crisis in Minneapolis is with the school system and the police department not the zoning situation. Addressing the systemic racism in education and closing the achievement Gap and relieving the pressure of the police on minorities would do a lot more to address inequality and make Minneapolis a better place to live then serving up corporate development interests and investors their wishlist on a platter.</p> <p>I have few illusions that anyone will read these comments or that they will influence the development as big money interests have probably made this overhaul of the zoning code a foregone conclusion. However, I feel it is incumbent upon me as a longtime resident to say that I oppose the changes to the zoning code in the 2040 plan.</p>	6/28/2018
1876	18	/policies/walking/	Please address winter snow removal on sidewalks, especially at corners, alleys, and other areas where the snow piles up. Need to do better about snow-removal enforcement and be consistent with proper sidewalk snow and ice removal.	6/28/2018
1877	84	/policies/public-safety/	This sounds great. Please don't forget the 4th ward and the lind-bohanon neighborhood as this is implemented.	6/28/2018
1878	11	/policies/skyways/	Creating more businesses with street facing entrances would make Downtown Minneapolis feel more inviting. Skyways should be seen a public spaces and have rules and policing similar to sidewalks and other public spaces downtown.	6/28/2018
1879	0.1	/topics/land-use-built-form/	N Dowling Ave in North Minneapolis is a major corridor for the neighborhood and should allow for larger built forms to increase the density of the neighborhood and allow for more mixed use projects. It should be Corridor 4 or at least Interior 3.	6/28/2018
1880	10	/policies/street-grid/	Prioritize non-motor vehicle connections when restoring the grid. These spaces are not used by cars now, and do not need to be filled with cars once new street space is opened up.	6/28/2018
1881	80	/policies/development-near-metro-stations/	It is essential to maintain affordable housing near new and existing METRO stations. Luxury developments use transit as a building amenity. Those using affordable housing can benefit from not needing to own a second car, or any car at all.	6/28/2018
1882	0.1	/topics/land-use-built-form/	Dowling Ave N should be Neighborhood Mixed use for the entire corridor. The area desperately needs more commercial activity.	6/28/2018
1883	28	/policies/msp-airport/	Important to prioritize pedestrian and bicycling access to the airport including transportation options.	6/28/2018
1884	38	/policies/affordable-housing-near-transit-and-job-	Affordable housing and jobs near transit is essential in creating a city where all can afford to live in.	6/28/2018
1885	36	/policies/innovative-housing-strategies/	Affordable housing needs to happen or salaries need to increase across the board.	6/28/2018
1886	10	/policies/street-grid/	These five action steps are very weak and are likely to lead to little improvement. The City needs to take bold action like creating freeway lids, tearing down the 3rd & 4th Ave N. freeway viaducts, filling in the Washington Ave freeway trench on the West Bank, and getting rid of Hiawatha Avenue as a highway. "As opportunities arise" is a passive phrasing and communicates that the City isn't going to spend much effort implementing this Policy.	6/28/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1887	6	/policies/pedestrian-oriented-building-and-site-de	In downtown why does absolutely every development need its own parking facility, which means driveways crossing the sidewalk? A person can barely walk along any block face downtown without seeing at least one parking ramp entrance, usually barking "Car approaching!". Make developers share parking facilities and driveways. Better yet, why not restrict any new parking spaces within the CBD? Everything is connected by skyway, so people are connected to parking nearby anyway.	6/28/2018
1888	15	/policies/transportation-and-equity/	The intent of this Policy is great, but the content is terrible. It basically says very little. Public Works ONLY considers the condition of the street when determining priorities. They do not consider whether the sidewalk is too narrow, filled with obstacles, or lacks space for streetscape elements. This lens means they are still focused on cars and not equitable outcomes.	6/28/2018
1889	16	/policies/environmental-impacts-of-transportation	The City is already doing these action steps, which are pretty weak and unlikely to make much difference. Why doesn't the City sell or demolish their parking ramps that host thousands of parking stalls and encourage driveing- especially downtown? Why not stop allowing more parking spaces in the downtown? How about spending City funds to improve the pedestrian network and transit?	6/28/2018
1890	17	/policies/complete-streets/	The City currently spends \$150,000 per year filling sidewalk gaps, which means it will take decades start making an impact because it costs way more than that to address the gaps. This is just one example of how Public Works only does the bare minimum to try to improve the pedestrian network. They only widen sidewalks when a street is reconstructed, not based on whether the sidewalk needs to be widened. So far, the Complete Streets policy is a bunch of words. How about clearing sidewalks of snow and ice? They clear roadways and alleys? Not complete!	6/28/2018
1891	20	/policies/transit/	The goal of this policy is great, but these action steps are quite weak and are unlikely to make much improvement. Why doesn't the City put funding into upgraded transit service and better bus stops? Buses are currently very slow and infrequent and more density isn't magically going to fix that. Metro Transit apparently doesn't have enough money, so maybe the City needs to kick in to make transit actually functional?	6/28/2018
1892	22	/policies/downtown-transportation/	"Efficient for all modes"? I thought pedestrians were supposed to be prioritized in the Complete Streets policy. This Policy implies that moving cars is on an equal level. Get rid of the awful one-way streets, make bus-only lanes, remove traffic lanes, widen sidewalks, create streets for pedestrians and bikes only, stop allowing more parking in the CBD, tear down parking ramps, take the buses off of Nicllet. The 2040 Plan is supposed to be a vision for 2040 years out, but this draft Policy reads like the Minneapolis 1990 plan.	6/28/2018
1893	14	/policies/tree-canopy-and-urban-forest/	Residents should not be allowed to opt out of having a boulevard tree. Any boulevard tree removed or those currently missing should be replaced. Often a whole block is planted with one species of tree. Diversity within a block should be the norm.	6/28/2018
1894	35	/policies/innovative-housing-types/	Will part of this plan include zoning laws to allow tiny homes?	6/28/2018
1895	34	/policies/affordable-housing-preservation/	I fully support this goal	6/28/2018
1896	32	/policies/arts-in-community-development/	I support this policy. Arts have such a positive effect on communities, the 4th ward could use a more intense focus on this area	6/28/2018
1897	0.1	/topics/land-use-built-form/	It is not clear how the zoning laws will be changed for any of the categories. Will our 2 level commercial areas...e.g. 34th Ave. S. and 50th St. have 3-5 stories or high rises? I oppose the idea and wording: "multi-story development is required" regarding commercial mixed use. Missing: impact on the environment, light/noise pollution, parking, referrals to other cities who've had success with this plan.	6/28/2018
1898	0.1	/topics/land-use-built-form/	Yesterday 6/28/18 a child getting dropped off for soccer practice in Kenwood Park was hit by a car driving on Franklin. I think the child was dropped off in the middle of the block and was not crossing in the marked crosswalk by the Rec Center. I think the driver who hit him probably couldn't see the child and therefore was not doing anything wrong. This is just one example of why it is a terrible idea to have density - four story plus buildings - in this area on Franklin Avenue by the Kenwood school and rec center. This accident didn't even happen at rush hour when there is much more traffic. Density may be appropriate near Hennepin on Franklin but not by Lake of the Isles, Kenwood Park and the Kenwood Rec Center, where increased traffic would jeopardize the many pedestrians, bikers and children in the area.	6/28/2018
1899	1	/policies/access-to-housing/	Hi, I live in the Seward Neighborhood. I support the idea of infilling with tri-plexes and 4-plexes on lots thru out the city but I think that 6 story buildings along the Greenway in Seward are way too high. It would also go against the Safe Routes to school plan that we have worked very hard to create from the Midtown Greenway to Seward Montessori School on 29th Ave.	6/28/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1900	37	/policies/mixed-income-housing/	Ensure that Minneapolis is not conducting social experiments and has a Plan B (exit strategy) should the mixed-income housing strategy not work. There need to be metrics and continuous checks on the pulse of this strategy, as it could either be fruitful, rewarding, and many steps forward for equity among our various social strata; or, it could be utterly disastrous and virtually dystopian. Important to define goals and milestones early, and not leave this to sink or swim.	6/28/2018
1901	0.1	/topics/land-use-built-form/	Please pass the Land use and Built Form portion of the Comprehensive Plan as it is currently written. It is ambitious, forward thinking, and absolutely necessary to keep Minneapolis an affordable place. Please do not send to the will of wealthy home owners who selfishly want to see their property values increase, nor to the xenophobic rhetoric coming from those who speak of "neighborhood character" as coded language for low and working class people, POC, immigrants, and young people. This is absolutely crucial, and I will fight to unseat any council member who votes to water down the plan as it currently reads. Thank you.	6/28/2018
1902	0.1	/topics/land-use-built-form/	Yesterday 6/28/18 a child getting dropped off for soccer practice in Kenwood Park was hit by a car driving on Franklin. Ambulance and police came. (It appeared that the child was dropped off in the middle of the block and was not crossing in the marked crosswalk by the Rec Center. I think the driver who hit him probably couldn't see the child and hadn't done anything wrong.) This is just one example of why it is a terrible idea to have density - four story plus buildings - in this area on Franklin Avenue by the Kenwood school and rec center. This accident didn't even happen at rush hour when there is much more traffic. Density may be appropriate near Hennepin on Franklin but not by Lake of the Isles, Kenwood Park and the Kenwood Rec Center, where increased traffic would jeopardize the many pedestrians, bikers and children in the area. (I also saw a bike accident at the intersection of Lake of the Isles and Franklin Avenue today; I didn't see what happened but someone had gotten out of their car and a bicyclist was lying on the ground.)	6/28/2018
1903	1	/policies/access-to-housing/	I disagree with allowing multi family units anywhere in the city. Residents in single-family housing have made a financial commitment to living in Minneapolis DESPITE its high taxes. Now with this policy of allowing the single-family housing to be disrupted - and devalued - by random two-, three-, and four-plexes Minneapolis will be taking away many people's only savings - the values of their homes. How about a certain number of neighbors getting to okay such a use, at a minimum, since they and their property values will be directly affected? (At the very least!) You will find that this will result in flight from the city, causing devalued properties, which will cause less taxes paid to Minneapolis.	6/28/2018
1904	33	/policies/affordable-housing-production/	After reading the data on income and attending the meeting on June 28th, 2018. It was stated "The median income is \$90,000." People in the meeting and in this neighborhood income is 40,000 and less. You are using general data given and not based on area in neighborhoods in the city limits. Please look at local data.	6/29/2018
1905	0.1	/topics/land-use-built-form/	I am a resident of Seward. I'm very concerned about the addition of large apartments along the Midtown Greenway. I would like to see smaller apartments (3 stories or less) and possibly some single family and town homes. I do not want Seward to look like Uptown. Keep things small please. And please consider adding a lot of green space around buildings. Thank you, Kim Hoffmann	6/29/2018
1906	49	/policies/educational-and-economic-access/	I feel the draft lacks explicitly stated plans to maintain Minneapolis Public School sites as such, and has no eye toward building more schools for all the housing that is being projected. I note a public land use at the Webster school site, but not at the current Pillsbury or Waite Park schools sites, nor at Edison HS. How will the city work with MPS to protect their current holdings and address the need for future school sites?	6/29/2018
1907	20	/policies/transit/	Need to increase frequency of buses along the routes that are being highlighted for "higher density". A good example is along 38th Street. Bus service is very infrequent, 30 minutes apart during non-rush hours. More density will only encourage more cars if transit options are not appealing. Walking is an option, but again - people will choose to drive if it's more convenient and faster.	6/29/2018
1908	38	/policies/affordable-housing-near-transit-and-job-	We need to consider more options to speed up the bus service.	6/29/2018
1909	18	/policies/walking/	Affordable housing is key.	6/29/2018
1910	15	/policies/transportation-and-equity/	Pedestrian priority at traffic signals including lead time and no right turn on red. Reduce speed limits!	6/29/2018
1911	20	/policies/transit/	If there's something that this summer of construction has made clear, it's the need for dedicated transit lanes. The detour of generally wealthier and less environmentally friendly drivers onto city streets from the interstate has led to significant delays for those doing the right thing and taking the bus. We should be prioritizing the more sustainable and efficient forms of transportation instead of sacrificing them at the alter of making driving trips easier.	6/29/2018
			I want bus only lanes and other ways of prioritizing buses on high traffic routes and during construction season. The busiest routes deserve higher frequency, better buses, and amenities. When I'm on a packed route 21 bus I am mindful of all the times I've been alone on a route 113, 156, and 558. The challenge, I realize is getting more ridership from areas like SW Mpls.	6/29/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1912	18	/policies/walking/	<p>Please add a point calling for cutting speed limits on main thoroughfares, which would save pedestrian lives. And there's no need for "where appropriate" in Point 9, as the City will of course avoid filling gaps where they are inappropriate (a small number, no doubt).</p>	6/29/2018
			<p>This plan is a giveaway to developers. Every time they sell a piece of property the price goes up making housing unaffordable. The plan will fail as it does not address this.</p> <p>Randomly increasing density throughout the city with apartments will destroy current home values. Again, great for developers, not citizens. The developers will tear down houses, build the maximum size apartment building possible, wait for adjacent property value to drop, buy those then repeat.</p> <p>Increasing density and crowding does not improve citizens lives. It creates more noise, less privacy, fewer trees, and less green space as lots will be stuffed. Increasing the downtown density is the only place that makes sense as there are multiple ways to get around, jobs, and services.</p> <p>The plan does not serve the elderly or families with children. It is not practical for them to walk or bike or lose hours and hours on public transit. The plan also ignores winter weather that would these options impossible during much of the year. And does the plan expect everyone to go grocery shopping every day so they do not have to haul multiple bags of groceries?</p> <p>Eliminating parking space requirements is another give away to developers. I lived in Chicago for many years in areas like the plan proposes. Setting up permit parking everywhere is a misery. Moving your car for street cleaning and snow removal is a misery. When you go on vacation you get towed or ticketed. Driving around for 20 minutes looking for a parking space is a misery.</p>	6/29/2018
1913	1	/policies/access-to-housing/	<p>Using greenhouse gasses as a reason to eliminate car use is a sham. As more cars are becoming electric, this issue will fade away.</p>

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1916	1	/policies/access-to-housing/	<p>I write to give my feedback on your 2040 plan. I was born and raised in Minneapolis and have been a life-long resident. I have lived in the Lyndale neighborhood for over 34 years where I am proud of the work of our neighborhood association (LNA). We, home owners, renters and business owners, have worked to improve the quality of life for all with NRP resources and the sweat equity and creativity of residents. Minneapolis is known for its beautiful neighborhoods, lush parks, chain of lakes, vibrant downtown, exciting arts and cultural venues, thriving colleges and University, and burgeoning transit system. Much of that is the result of thoughtful city planning and zoning. Yes, as your plan points out, there were also tragic applications of redlining by banks and restrictive covenants in neighborhoods. I understand and support the desire to improve conditions for people of color, people with low income, and the homeless. And I strongly question your plan to alleviate the wrongs of the past with an unbridled push for density.</p> <p>Your plan is not "our Plan." You are not considering the needs of families with children, people who desire to "age in place," people with disabilities, people who drive cars, people who wish to own homes in single family neighborhoods. Your plan to "upzone" the city would increase property values, making the city more unaffordable overall. No one would win except developers. Your plan is promoting "inclusionary zoning." Inclusionary zoning is code for little or no zoning. Virtually every city in North America has some form of exclusionary zoning that excludes certain uses by district, not by people.</p> <p>According to Tim Keane in a Star Tribune Commentary: "For example, the addition of fourplexes in single-family neighborhoods (with no off-street parking) will first push out the most affordable owner-occupied single-family houses. The cookie-cutter fourplexes owned by real estate investment trusts will replace affordable homeownership. Additionally, the role of speculators will invariably overshadow house investment by single-family homeowners. The Star Tribune recently chronicled hundreds of vacant and boarded houses in the city. One speculator alone owned 87 vacant residential properties on the North Side. The YIMBY solution suffers from a failure to confront these realities. This pattern of speculation is an early stage of gentrification."</p> <p>As former City Council member, Lisa McDonald, writes: "We need to continue the successful path we have been on" concentrating growth in our existing walkable, transit-accessible neighborhoods; continuing to build housing at high-frequency transit nodes; and focusing growth where it makes sense. (The Plan) has proposed upzoning the entire city. This would make it possible to bulldoze any single-family house and replace it with a fourplex. It has also proposed allowing 15- to 20-story towers in most parts of the city. Uptown and our signature Chain of Lakes would become ringed with tower after tower, as in Manhattan. None of this housing would be required to have parking. Much of the density is dependent upon a dramatic expansion of the bus system that is not planned for or funded by the Metropolitan Council.</p> <p>None of these changes will create new affordable housing. Construction costs are too high for affordable housing to be built without government intervention. Moreover, the plan will demolish existing affordable homes and replace them with market-rate housing. None of</p>	6/29/2018
1917	10	/policies/street-grid/	<p>Please focus on enhancing access, comfort, and permeability of our street grid based on our adopted modal priority framework. Sometimes minor disconnections of the grid for motor vehicle traffic allow significant improvements in the grid (especially permeability) for pedestrians, bicyclists, transit users, etc. An example is the K-Mart block on Nicollet, where reopening Nicollet for pedestrians/bikes/transit/viewshed makes sense but reopening to motor vehicles is concerning and could threaten the relatively calm traffic that allows Eat Street to thrive. Also, additional freeway bridges/caps could be bike/ped/transit first, and many new refuge islands would be a welcome addition at many intersections to help bicyclists and pedestrians cross the street even if they mean right-in-right-out access for motor vehicles.</p>	6/29/2018
1918	39	/policies/fair-housing/	<p>One of the largest barriers for many in Minneapolis is of course affordable housing. However, a growing number of families are not able to find housing because of their family dog being restricted. Out of 243 dog friendly apartments in the Twin Cities only 13 of them accept all dogs. This means that families with dogs of at least 25 types are not welcome in rental units.</p>	6/29/2018
1919	1	/policies/access-to-housing/	<p>I have owned in Mpls for 10 years. First 7 years were in a townhome surrounded by apartment buildings, close neighbors, etc. I decided I wanted a quieter place to live with fewer neighbors, less cars, etc. so I chose a single family home. I feel like allowing multi unit dwellings anywhere disrupts the choice I made to live in an area where I thought I wouldn't have to worry about neighbors living on top of each other. In addition, we are trying to invest in our home long term by installing solar panels, but wonder about that as an investment if someone is allowed to build a 4 unit building next door that blocks all of our sun. I understand the need for density, but I think there are places in the city where it makes sense and places where it doesn't.</p>	6/29/2018
1920	9	/policies/open-spaces-in-new-development/	<p>Promote the planting of trees and retention and/or creation of unpaved, planted areas to promote clean air and good drainage. Paved plazas don't help the environment.</p>	6/29/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1921	7	/policies/public-realm/	Colorful murals and sculpture work all year round.	6/29/2018
1922	1	/policies/access-to-housing/	Three- and four-unit buildings in primarily single-family neighborhoods will increase density and traffic in those neighborhoods. Even if there is access to alternative transportation, we all know that most Americans drive cars if they can. Minneapolis will start to look like many other much larger cities and will probably start to attract many of the same problems.	6/29/2018
1923	39	/policies/fair-housing/	Fair housing should be a part of a broader effort of access to opportunities, like employment, capital, housing, culture and "the" arts, recreation, education, and so on. "Fair" housing is unachievable, without making access to capital and/or employment possible, without making access to education possible, and so on... There is a chain of opportunities that lead to access to housing and fairness is increased when you have the resources to compete for housing. We simply to have make sure that certain characteristics are protected based on fundamental civil rights. The root cause of not having access to housing opportunities is not government or market intervention; it is by giving people opportunities to build the capital to compete effectively for housing, which is not a limitless commodity.	6/29/2018
1924	35	/policies/innovative-housing-types/	Revise city regulations regarding cohousing, allowing people who want to establish cohousing buildings greater control over the decision-making involved in their own housing. The city has inappropriately micromanaged in its regulations.	6/29/2018
1925	36	/policies/innovative-housing-strategies/	Maximize innovative additions to existing housing stock to improve affordability and flexibility in meeting housing needs. I fail to see any solutions here. This looks like just words. Identify/create funding sources to BUILD more affordable housing. Encourage neighborhoods, residents, businesses, churches - everyone - to support our existing land trust organizations, which promote ongoing affordability. Set higher requirements for developers creating "market rate" (highly unaffordable) housing to add more affordable units into their buildings. Create regulatory disincentives for investors buying up multiple low-income properties that are then turned into unaffordable rental properties.	6/29/2018
1926	34	/policies/affordable-housing-preservation/	These "action steps" are so vague that they are meaningless! What are the strategies? How about - Create or encourage the creation of a home-sharing model that would allow seniors to age in place by connecting them with a younger renter who can handle household tasks for them (like college students). Offer free workshops on how to successfully rent rooms or floors of your home, how to be a good landlord, how to find good tenants? Offer workshops on how people can buy homes together - creating duplexes. Partner with - or become - a bank that makes loans to non-traditional housing buyers (unrelated people buying together). Allow garages to be converted into housing units.	6/29/2018
1927	1	/policies/access-to-housing/	Increase in housing height and density can negatively effect homeowners who have made a substantial investment in their property through the addition of solar water and solar electric. The city should protect the "right to light" for people with solar systems. It is extremely important that we do everything we can to electrify our energy supply and with the federal government and fossil fuel industry putting up barriers to clean energy, citizens need to act. Don't make it impossible for us to act. It needs to be made harder for investors to buy up properties to flip, which removes affordable housing and replaces it with unaffordable housing.	6/30/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1928	47	/policies/housing-maintenance/	<p>Force neighborhood associations to use a portion of their funds to provide financial support and other incentives to homeowners whose homes are identified as substandard.</p> <p>Create funding opportunities for seniors and disabled homeowners to repair and maintain their homes, with loans that do not need to be paid back until the home is sold.</p>	6/30/2018
1929	1	/policies/access-to-housing/	<p>We need housing options for people with disabilities -- especially for people with Multiple Chemical Sensitivity. I have 2 friends who are HOMELESS because they CANNOT live in apartments or other "shared" housing. One lives in her car. THIS IS UNSAFE.</p> <p>They are excluded from participating in Section 8 housing -- since most is for apartment living. And of course "Public Housing" is all shared housing.</p> <p>If you want "diversity of housing," you have to start building some without toxins, low VOCs.</p> <p>I don't see any "tiny homes" in the mix.</p> <p>The cost of housing either one of my friends in a "tiny home" would pay itself off in about 17 years assuming \$15,000 build cost and \$900/mo in rent.</p> <p>Minneapolis wiped out all of the affordable war homes on Humbolt Ave N to instate homes that cost \$250K!. This is not diverse....</p> <p>Minneapolis can do better!!!</p>	6/30/2018
1930	1	/policies/access-to-housing/	Victory Neighborhood does not have many section 8 opportunities -- or many apartment rental opportunities at all.	6/30/2018
1931	11	/policies/skyways/	Would love to see more businesses open after hours and weekend hours on the skyway system.	6/30/2018
1932	15	/policies/transportation-and-equity/	Please support Metro Mobility subsidies to be used with rideshare (Uber/Lyft) programs. Please hold taxi cabs accountable; they are still discriminatory.	6/30/2018
1933	0.1	/topics/land-use-built-form/	<p>In reviewing the overall plan and the specifics for the Lynnhurst neighborhood (Bryant Avenue from 44th to 50th St), I am concerned about the effect of additional dwelling units on the already crowded Bryant Avenue corridor. Have you tried driving down that street in winter with cars parked on both sides with both bus AND bike traffic? A nightmare in the winter and challenging under the best weather conditions! The proposal to ADD multi-family dwellings on an already stressed corridor makes little sense unless off-street parking is a requirement to alleviate the corridor congestion. Sight lines on this avenue are very challenging with the current level of parking, as the near-hits we frequently encounter on Bryant attest.</p> <p>I read that the Plan is to encourage pedestrian traffic - the current lack of parking around the 46th and Bryant business district already makes it a necessity, which is not always convenient if you have a large load to carry!</p>	6/30/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1934	1	/policies/access-to-housing/	<p>I grew up in Houston and the middle class block I grew up on about a mile from downtown is a series of discordant condo and apartment buildings surrounding lone houses that haven't yet been bought up and converted into condos. The remaining residents are called "canyon dwellers" and have no power over who will buy out the property next door and remove all vegetation from the lot next door and block their natural light. Furthermore the streets are full of cars from the condos, and there is still only a feeble busline offered for transit. The streets are full of cars and there is no master plan, just individual builders trying to make a buck. Meanwhile, the section 8 housing that was one block away from my house has also been taken out and replaced by townhomes. Lovely, yes, but where did all the Section 8 apartment residents go? The current version of your plan is very pie in the sky and missing very important collaborative planning efforts with other entities who would affect the success or failure of this plan, namely, the state of MN, Hennepin County and the Metropolitan Council -- what are their transit, transportation, and affordable housing plans? I escaped from a nightmare of a city with no zoning, and I can tell you that the people who struggle to afford housing have in no way benefitted from loose reins. Their housing is terrible in Houston.</p> <p>A City Council can dream, yeah, but you are not an island unto yourselves. Go back to the drawing board and go have meetings with the Met Council and Hennepin County Commissioners.</p>	6/30/2018
1935	39	/policies/fair-housing/	I own a home in the 4th ward and am landlord for another. I fully support this policy.	6/30/2018
1936	38	/policies/affordable-housing-near-transit-and-job-	As a resident of Minneapolis, I agree we should make it a priority to zone for appropriate building types along transit routes. We should maximize our transit infrastructure by allowing multi-level buildings along transit routes. Ideally, these buildings should also include commercial businesses to increase the livability of our neighborhoods.	6/30/2018
1937	11	/policies/skyways/	Do not limit expansion of skyway. Add access to Guthrie. Encourage new buildings to include sky access, such as Wells Fargo- US Bank Stadium. As big walker, I feel much safer walking in skyway so I do not worry about crossing streets and getting hit by cars, trucks or bikes.	6/30/2018
1938	33	/policies/affordable-housing-production/	And one more thing: accessory housing (which I'm assuming is garage apartments/mother-in-law apartments and the like). I'm a former Houstonian and my parents' house, over the years, had two garage apartments and an additional apartment building (2 apartments) in the back yards of the two neighboring houses, as well as a home tailoring business. When I would visit, it was like living in New York City with constant noise and comings and goings. My sleep was often disrupted. Nobody had parking and there were tons of cars about. Some of the neighbors were very nice, but my parents' modest back yard with their garden was no longer a refuge. It felt like a public park. Fast forward one decade and my parents house and several around had been leveled. One massive luxury home replaced the home with the garage apartment and tailoring business. My parent's lot (which had housed a 1400 sq. ft home) will either be another luxury home or fancy condos. Affordable housing that actually added to the character of the city (built 75 years ago) has been decimated and my grade school classmate who is a real estate developer (massive corporation now) is a multi-gazillionaire. The 2040 "Plan" has a great set of ideals, but its execution is feeble. Yes, Minneapolis zoning laws are overly restrictive, but you don't need to throw the baby out with the bath water. I moved out of Houston for a reason.	6/30/2018
1939	1	/policies/access-to-housing/	<p>Proposals (d) and (e) are both troubling.</p> <p>While I appreciate the goals of planning for a vibrant and strong Minneapolis for decades to come, I strongly object to the proposal that single family dwellings could be replaced by up to 4-unit structures. East Isles has tremendous diversity of resident age, income, household size, and housing types, however, the distribution of housing type is not homogenous, but rather exists as a gradient with apartment and multi-unit housing along Hennepin and predominantly single-family houses further west. I chose to live where I do because I prefer to be around other family homeowners who have similar values and make similar investments in their properties. This proposal would actively erode that character of the neighborhood.</p> <p>More concerning to me than that is the proposal that any structure could be replaced by a 4-unit structure, the Proposed Land Use and Built Form maps suggest that because East Isles is a neighborhood "close" to downtown, any structure could be replaced by any housing within the current range in the neighborhood. Thus, the currently zoned R1 property next to my house could become up to a 6-story apartment, as these already exist in other parts of the neighborhood. Please do not allow this to happen.</p>	6/30/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1940	0.1	/topics/land-use-built-form/	<p>I'm completely opposed to transitioning West Franklin Ave and West 21st (from Hennepin to Hidden Beach) into Corridor 4 and Interior 3 zoning. The plan appears to lack a serious review of economic and transit impacts. As a 23 year resident of Uptown, I enjoy living in a higher density area adjacent to green space and lower density neighborhoods. West Franklin and West 21st offer those of us in higher density areas an easily accessible respite from more active areas of Uptown. I'm in favor of higher density, but this change in particular encroaches on and negatively impacts livability. This specific transition is too dramatic and will make the entire area (not just those directly impacted) less desirable. Property values and tax revenue will be negatively impacted as people find other areas of the city and other cities to live.</p> <p>It's the planning team's responsibility to guard citizens from uncontrolled development projects. Developers focus on short-term financial gain; planners should focus on controlling this shortsightedness. The current 2040 plan appears to lack appropriate controls to guard us against this inevitability. The current plan for West Franklin and West 21st is a direct, egregious example how poor planning could let shortsighted development run amok. We may be approaching an era of re-zoning and related development that destroys what makes the Minneapolis lakes area unique and livable.</p>	6/30/2018
1941	40	/policies/homelessness/	<p>Shelters are not safe for people with Multiple Chemical Sensitivity. http://womenspress.com/Content/ReadersWrite/Readers-Write/Article/My-car-my-home/124/684/4767</p> <p>Forget shelters. Give people vouchers for hotel rooms and demand that all hotels and motels licensed in the city of Minneapolis have a minimum number of rooms available per night for the homeless population. Hotels and motels already have the structure, staff and business model to support temporary lodging. WHY recreate the wheel by building shelters? It costs more than a high end hotel room! Hotels/motels often have a hot meal or continental breakfast available too thrown in. Some of the luxury hotels could have a small luxury tax on their most expensive rooms (presidential suites, etc) to help cover some of the costs.</p> <p>Create affordable housing and so many people and families will not be homeless. Tiny homes. Minneapolis has been tearing down the smaller, more affordable war homes and replacing them more expensive housing.</p> <p>Also, create ordinance to say that every apartment building with 10 or more units must have 1 unit of every 10 of a certain kind discounted for those that are low income. (or some such ratio). This will diversify people in different economic classes and not centralize poverty in our city.</p> <p>Rebecca St. Martin</p>	6/30/2018
1942	40	/policies/homelessness/	<p>This amounts to just continuing what we've been doing - which isn't working well enough. This section needs more attention and some actual concrete steps to end homelessness - especially toward keeping people in housing. The current county structure won't help people until they've entered the county homeless shelters. It is also discriminatory to people with disabilities, in particular, those with allergies and food sensitivities and special diets - not allowed to bring or prepare your own food even if the food the shelter prepares will make you sick - even with a doctor's prescription for special food. We know people struggling with health issues are at higher risk for homelessness. We cannot ignore their health needs when they enter shelter! And should provide supports to keep people housed first rather than forcing entering shelter before we help.</p>	6/30/2018
1943	36	/policies/innovative-housing-strategies/	<p>Don't assume everyone wants to or can handle being a landlord to improve housing affordability. In the early 2000s duplexes in Hawthorne were restored and sold to owner occupants with the idea the rental income would make the property more affordable and help people build wealth. Every one of those duplex owners gave up! They could not manage or control their properties. Being a landlord is being a business. It's a second job. It's not easy, and it can be overwhelming.</p>	6/30/2018
1944	68	/policies/energy-efficient-buildings/	<p>I'd like to see the city encourage building to the Passive House standard: http://www.phius.org.</p> <p>The marginal cost of building to this standard in new construction has been dropping rapidly recently, and is now below six percent of the total project cost: https://www.nytimes.com/2015/03/29/realestate/the-passive-house-in-new-york-city.html</p> <p>These standards have been widely adopted in Europe, even in countries with more moderate temperatures than we have.</p>	6/30/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1945	41	/policies/tenant-protections/	There needs to be a mirror program for property owners, so that there is equity in the relationship. It is becoming increasingly evident that parity is being lost in a contractual situation, as the government continues to assume the tenant IS right, rather than HAS rights.	6/30/2018
1946	89	/policies/technology-in-the-city-enterprise/	Every city meeting, from zoning and planning to estimation and taxation should be filmed or at the very least be transcribed so those unable to attend know what occurred	7/1/2018
1947	16	/policies/environmental-impacts-of-transportation/	In addition to the above action steps, I'd also like to see the city: <ul style="list-style-type: none"> - prioritize mass transit on the streets with dedicated bus lanes - provide mass transit with increased signal priority on more routes - provide better facilities at transit stops - namely more shelters, and better heating and cooling of those shelters. <p>I think that these things would provide for a more reliable and comfortable mass transit experience which would incentivize people to utilize our existing "shared mobility options".</p>	7/1/2018
1948	18	/policies/walking/	I think that Action Step E should be much higher in priority. We have too many streets where it is easy for cars to exceed 30 mph, and those speeds are particularly dangerous for pedestrians and cyclists. Especially so for small children. <p>The North Side Greenway demonstration project had a number of interesting ideas, and I would like to see those ideas implemented on many of our streets.</p> <p>Also, please turn Nicollet Mall in to a pedestrian / bicycle only space. Buses don't belong on the mall.</p>	7/1/2018
1949	54	/policies/supporting-economic-growth/	Make free internet available to everyone in the city. This is residents, workers and visitors.	7/1/2018
1950	84	/policies/public-safety/	Make sure everyone in the city has a place to live, health care and available education.	7/1/2018
1951	88	/policies/public-services-policy/	Make internet available free to everyone. <p>Create a situation where neighborhood organizations actually represent the neighborhoods.</p>	7/1/2018
1952	68	/policies/energy-efficient-buildings/	Don't just try to make buildings more efficient. Change to municipal power and give real incentives to residents to convert to solar.	7/1/2018
1953	16	/policies/environmental-impacts-of-transportation/	We had Car to Go but it wasn't profitable for someone. Reinstate that kind of service. See that there are more Hour Car sites available. One issue is providing parking for the car when not in use. That is something the city can do. <p>When creating the additional public transit we need, take care not to demolish existing housing, or get rid of existing green space.</p>	7/1/2018
1954	16	/policies/environmental-impacts-of-transportation/	You will not decrease air pollution if you continue to allow high density building along corridors that are already overburdened with traffic. For example, the Lake street corridor that abuts Lake Calhoun and the lagoon, already has too much traffic, and no way to expand the road. When you suggest building 30 story buildings by Calhoun village, especially high cost apartments, and condos, you are naive to think that many of the occupants will not want to use cars. This corridor can not absorb either the traffic or the air pollution.	7/1/2018
1955	17	/policies/complete-streets/	The complete streets policy is no better than the various food pyramids that have been inflicted on us. Develop a plan that reflects the needs of the people in Minneapolis. There should be bicycle ways that protect the cyclists and at the same time create a predictable transportation environment. The "rules" should be consistent throughout the city, well thought out and keep safety in mind for all.	7/1/2018
1956	3	/policies/production-and-processing/	There is a large vacant piece of property in North Minneapolis that used to be the port authority. There is a proposal to build an amphitheater on the site. I think since it's already zoned commercial why not use it for some type of manufacturing it's on a major thoroughfare and bus route and easy to get to especially for Northside residents.	7/1/2018
1957	18	/policies/walking/	As a pedestrian I do not find bump outs or curb extensions to be particularly helpful. I do think the city should educate the drivers about the right of way for pedestrians at all intersections. More activity on and around sidewalks is beneficial to the life of the city.	7/1/2018
1958	19	/policies/bicycling/	There must be a reasonable balance between the needs of bicyclists and the needs of automobile drivers. It is good to have a large number of on and off street bike paths. However, the placement of these paths should not impede the major traffic routes in the city. <p>The 28th street bike path is an example of a poor choice for bike path location. 28th street was a major eastbound automobile route through the city. The midtown greenway is only a block away from 28th street. Therefore the 28th street bike path was unnecessary. In addition, 28th is a major path for ambulances going to Abbott hospital. This ambulance route is now impeded.</p>	7/1/2018
1959	20	/policies/transit/	Keep in mind that bus routes can be changed and adjusted as needed. This is a benefit but also makes it difficult to plan high density housing along those routes. Housing and green space should be preserved when planning transit.	7/1/2018
1960	11	/policies/skyways/	Connect the library to the skyway system now.	7/1/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1961	21	/policies/freight/	Require that all companies using freight trains provide police and fire departments with a complete list of chemicals that they transport in box cars. This is essential for our safety in the event of a spill. Evacuation plans must be periodically updated and the public informed of potential evacuation routes and emergency shelters.	7/1/2018
1962	28	/policies/msp-airport/	Pedestrian access is not a major priority for the vast majority of people who go to the airport. The terminals are too far from any major housing developments. More practical is a shuttle system that connects these nearby communities to the terminals.	7/1/2018
1963	2	/policies/access-to-employment/	This policy lacks focus on encouraging and developing small businesses.	7/1/2018
1964	5	/policies/visual-quality-of-new-development/	Regarding policy 5, sections "B" through "G": dont regulate aesthetics. It limits creativity and the government has no place in dictating expression	7/1/2018
1965	6	/policies/pedestrian-oriented-building-and-site-de	More focus on bus stops and ride sharing, less focus on bike paths. The state has 6 months of winter and thus 6 months of unutilized bike infrastructure.	7/1/2018
1966	40	/policies/homelessness/	I'm glad to see this on here as one of the policies. I hope that this means that a comprehensive approach will be used including investment in mental health services, chemical dependency counseling, medical cost assistance, affordable child care, and alternative housing models.	7/1/2018
1967	54	/policies/supporting-economic-growth/	I don't see how you are actually going to achieve these particular goals, but hoorah for you if you finally can. f and g are particularly important and I think should be higher in the list. b and c can't happen without f and g.	7/1/2018
1968	7	/policies/public-realm/	This policy has a lot of planning jargon- not plain language. Sidewalks are often cluttered with too much stuff making it difficult to navigate. Signs, benches, sidewalk cafes, etc. often block a clear path to walk. Snow & Ice on the sidewalk makes it difficult, inconvenient, or unpleasant to walk in the winter. Is there any evidence that the Downtown Public Realm Framework has made any improvement whatsoever on the bleak streets there? The "Art in Public Places" makes simple projects too expensive, time-consuming, and cumbersome. Not everything painted on a street or sidewalk needs to be considered art and designed by an artist.	7/1/2018
1969	15	/policies/transportation-and-equity/	The actions steps are unclear and vague. What about putting more money into improving sidewalks, bike lanes, and better transit service, while spending less on streets and parking facilities for cars? There's a division of Public Works called "Traffic & Parking Services", but no equivalent for walking and biking.	7/1/2018
1970	1	/policies/access-to-housing/	A lot of information is given about redlining and racial discrimination and how it has suppressed home ownership for people of color. This prevents these communities from building up home equity and using it as a springboard into the middle class. What I don't see in your plan is any attempt to increase home ownership among those who have been affected by this. More rental units don't help victims of redlining get into their own homes. In fact it works against it by reducing the already limited amount of affordable homes and replacing them with rental units. Affordable, entry level houses are already very hard to find, do we really want to shrink the number further by knocking them down for apartments? My son has a great job and still can't afford to buy a house in the no-frills neighborhood he grew up in. Reducing the number of single family houses will just drive the price up further and force more families out to the suburbs. I don't see much detail about how just building more apartments will result in more affordable units if that is not specifically set up in the zoning. If a building is luxury apartments, it's going to stay luxury apartments for a long time and still be out of reach for those who need affordable housing most. Are we just hoping for an eventual glut of apartment units to drive the price down? This sounds like I am against anything but single family homes; I'm not, I know we need affordable rental units and I'm not against them in my neighborhood. I just want something on a smaller, better targeted scale than opening up the entire city to denser zoning. A sweeping, dramatic city-wide plan may sound like the way to get things done but I urge a smaller, more carefully thought out approach. Spend more time listening and working with the neighborhoods. We aren't against change or affordable places for everyone in our communities to live, we just want to make sure that what makes this city such a popular place to live doesn't get destroyed in the process. After all, somebody thought plunking a Kmart in the middle of one of the city's busiest streets was a great idea and we all know how well that turned out.	7/1/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1971	41	/policies/tenant-protections/	<p>You need a way to be strict about enforcement especially when it comes to a lot of sketchy stuff that background check agencies will do when they're researching a rental application.</p> <p>I worked for one recently where it was common for the company to call landlords off the record and tell them that a rental applicant had criminal cases or evictions that had been expunged or had been dismissed long enough ago that they couldn't legally be reported. This kind of behavior needs to be strongly investigated and punished because from what I saw these companies didn't really take any punishment seriously</p>	7/1/2018
1972	46	/policies/healthy-housing/	<p>I would like there to be less luxury apartments and more coop community owned properties that give equity to those who may not be able to otherwise afford a single family home. Also housing with more bedrooms for large families, as families live together longer. And mother in law suites for those who care for their aging parents.</p>	7/1/2018
1973	15	/policies/transportation-and-equity/	<p>The City of Minneapolis snow emergency and snow removal policies; executed under three separate city departments ticketing, towing and plowing have made snow emergencies an even greater emergency that what they should be.</p> <ol style="list-style-type: none"> 1. Ticketing is not followed up by prompt towing creating: 2. Inadequate plowing which creating city-generated: 3. Windrows throughout city alleys, curbcuts & sidewalk access creating: 4. Dangerous inaccessibility for emergency vehicles; plowed in fire hydrants and greater hazards posed for disabled and mobility challenged people. 	7/1/2018
1974	17	/policies/complete-streets/	<p>Several years ago Dean Zimmerman developed a plan that took bicycles out of the automobile traffic, allowed them to avoid intersections and just generally created safe ways for bicycle transit. What ever happened to that plan? We continue to lose when we continue to allow the conflict between bicyclists and automobile drivers. Which is "better", more worthy is not the issue. The issue is how to make sure everyone can get from place to place.</p>	7/1/2018
1975	83	/policies/people-with-disabilities/	<p>Since people with disabilities and mobility challenges are even more greatly impacted by the six months of winter and inclement weather that Minneapolis has please address the city of Minneapolis complicity in creating an even greater hazard and burden when a snow emergency is declared. Lack of adequate towing creates a domino effect for the Public Works department attempting to execute timely snow plowing and the disabled, mobility challenged and able bodied public are faced with negotiating the windrows creating by snowplows attempting to "remove" snow. It is the cities responsibility to make the roads safe; not create another emergency for those least able to move about in the six months of winter.</p>	7/1/2018
1976	84	/policies/public-safety/	<p>What is the City's Emergency Operations Plan and when does it come into effect. Does the City's Emergency Operations Plan have jurisdiction over Snow Emergencies? If not, why not? What civil rights are suspended when the City's Emergency Operations Plan is in effect? Public safety concerns should be pre-eminent during the cities many snow emergencies. When the public is not able to access city services; i.e. fire, police and ambulance services because access to alley ways, fire hydrants and sidewalks are obstructed due to inefficient snow-plowing and windrows created after property owners have fulfilled their snow clearing responsibilities then the city needs to re-examine it's Snow Emergency policies in view of the City's Emergency Operations Plan.</p>	7/1/2018
1977	85	/policies/access-to-health-social-and-emergency-s	<p>What areas of public health and public mobility are not being addressed in the several areas of emergency readiness being addressed. The city has Snow Emergencies; a City Emergency Plan and Emergency Preparedness. What, if any is the value in cross-jurisdictional emergency services delivered under three different action steps. It's confusing, redundant and creates a situation where no one department has oversight therefore nothing will get done when the city has a serious emergency. Where in the 2040 plan is evacuation discussed.</p>	7/1/2018
1978	67	/policies/climate-resilient-communities/	<p>The city of Minneapolis is in a northern-climate. Are city planners and elected officials in denial? Where in the 2040 plan is there one mention of snow; snow removal, and the impact of sub-zero temperatures on the poor, elderly, disabled and mobility challenged. Could the authors of the 2040 plan have found at least one photograph of Minneapolis during the six months of winter? The 2040 plan does not in any way adequately reflect how it's citizens exist in the winter months. City planners are doing a huge disservice to it's future by refusing to acknowledge the reality of a cold winter climate.</p>	7/1/2018
1979	7	/policies/public-realm/	<p>All summer or fair weather-related images. How can the city of Minneapolis promote the city as a winter destination for tourists when it refuses to portray or address the cities northern climate. Why are city planners and elected officials putting their heads in a snowbank?</p>	7/1/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1980	53	/policies/quality-of-life/	Until Minneapolis city planners and elected public officials acknowledge in the 2040 document that the city of Minneapolis is in a northern climate zone the 2040 document is just another "puff piece" which will collect dust on a shelf. The city of Minneapolis cannot tout it's quality of life if it cannot acknowledge and celebrate our four seasons; winter, spring, summer and fall. Winter has it's challenges but should be acknowledged and celebrated. Otherwise, all of the challenges of each climate cannot be addressed.	7/1/2018
1981	49	/policies/educational-and-economic-access/	This is a good goal. However, you have only increased racial disparities over the years. This is in part because, in order to appear to succeed, the schools have lowered the bar for success. Discipline, expectations have been lowered which has the opposite of the desired effect. As a former teacher, I can assure you that expectations of success achieve it much more readily than lowered standards. They serve no one!	7/1/2018
1982	43	/policies/housing-displacement/	The problem, as I see it, is that density will NEVER automatically create affordable housing and is just as likely to do the opposite. Developers are catered to over POC who have been redlined and closed out of ownership for generations. We HAVE to be intentional about affordable - about what it means, about who it's for AND most especially that strategies used build equity for people who have not been allowed to before. Subsidizing the building of high density rentals is not a strategy that will meet any of those and doesn't actually intend to - it will expedite gentrification. Something that could work better would be to make it super easy to own cooperatively multi-unit buildings. Certainly there are other ways, but I don't see in what they've said so far anything that is attempting to address the real problems - it looks like just more of what's been done.	7/1/2018
1983	42	/policies/expand-homeownership/	Yes!	7/1/2018
1984	83	/policies/people-with-disabilities/	This fails to recognize that most of Minneapolis is not ADA compliant or MN building code compliant in regards to people with disabilities (and there is no enforcement mechanism). How will we audit non-compliance, help all parties reach compliance, and ensure that people with disabilities have fair and equitable access to government, businesses, residency, and social lives?	7/2/2018
1985	84	/policies/public-safety/	I would like to see something in the school about applying resources where they're needed according to level of crime. Currently the 4th precinct appears to not spend money north of Dowling despite the fact that violent crimes especially gunfire has risen over the last 10 years in the sector	7/2/2018
1986	1	/policies/access-to-housing/	<p>I'm excited about the 2040 plan and encouraged that the city is thinking about the long term health of the city and prosperity of its residents. It is a true public service and too often the short term politics of anxiety about rapid change prevent it. Minneapolis is capable of absorbing significantly more residents, as it had in the past, and will benefit from the additional local business and tax base, and improved public services those residents drive.</p> <p>That is what I encourage the city to focus on - in simple terms, how will additional revenue be used to improve the lives of residents through even better public services?</p> <p>I also encourage the city to help residents understand the expected pace of change in different parts of the city. If the policies are enacted, what would each neighborhood expect in 5, 10 and 20 years (given a few different potential paths for the economy). My guess is that no neighborhoods should expect to be bulldozed any time soon, but some objective analysis and forecasting may help us understand what to expect.</p> <p>Thank you again - I believe this city has the potential to be world class, and needs to let itself grow to realize it's potential.</p> <p>- Jeff Dehn 4524 Aldrich Ave S</p>	7/2/2018
1987	43	/policies/housing-displacement/	Succession is a natural process, whereby people need to learn early in life that their needs will change (a single elderly person does not need to three bedroom suburban home with a swimming pool, three-car garage, and five acres to mow). In helping people to navigate through this succession, government should ensure that there are suitable elder-care communities for people to move to, when the time is right ~ so that various cohorts can find appropriate housing for where they are in life. Gentrification is a natural and good process, whereby much needed capital is brought to the table to keep housing rehabilitated for the next generation. People who live with more than they need, and expect government to protect them from the marketplace and the pressures of not having the services they need, are selfish.	7/2/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1988	41	/policies/tenant-protections/	Current "renters rights" do not do enough to protect renters from predatory landlords. I agree with most of the plan, however this is one area I believe needs to be expanded upon greatly, primarily by giving renters a "right of first refusal" and requiring landlords to offer them a chance to buy their unit before the landlord is allowed to sell the property or redevelop it.	7/2/2018
1989	36	/policies/innovative-housing-strategies/	While it would require a municipal bank to do so, I believe the city should look into providing loans to renters whose building is being sold to buy out their building and form cooperative housing. This would slow down the process of gentrification, allowing renters to stay in their homes, and also increase the amount of commitment those renters have to their community by giving them true ownership of a part of it. The city missed a great chance to protect a shrinking stock of affordable housing by not turning seized properties into public housing or cooperative housing when a slum lords rental license was revoked recently, I would like to see steps included in the plan to see that we don't miss opportunities for similar easy wins in the future.	7/2/2018
1990	36	/policies/innovative-housing-strategies/	Admit up front, with data, that as housing density of housing goes up, quality of life goes down. Attempting to offset that decline with amenities does not suffice, since the social fabric that balances distance and intimacy is corroded. Antisocial behavior increases and, despite being physically closer to each other, people alienate themselves by barricading, whether with privacy fences, earphones, dark shades and blinds (so you don't have to see into your neighbors bathroom. More people = more space; more space = annex areas beyond Minneapolis. Concentrating poor segments in areas to protect the interests of the wealthy is not equitable; it ensures that the poor cannot aspire. Sprinkling the poor into wealthier neighborhoods results in the poor becoming scapegoats for the ills of society. Spread people out...	7/2/2018
1991	85	/policies/access-to-health-social-and-emergency-s	Policy 85 is a step in the right direction to bring health and wellness equity to all. Are these new positions, or will existing staff expand their roles?	7/2/2018
1992	0.1	/topics/land-use-built-form/	I have several concerns about developers. 1) developers should use materials that will last an extended period of time. Several new building seem to be built with cheap materials that will only last a generation. 2) developers should be forced to compensate property owners that are negatively impacted by the new construction (e.g. Loss of sunlight or damage to trees or damage to a neighbors foundation).	7/2/2018
1993	34	/policies/affordable-housing-preservation/	I am curious what these "strategies" are. Currently the only develop I see in my uptown neighborhood will promote housing inequity and further gentrify the neighborhood, as huge corporate companies take over for profit development here	7/2/2018
1994	20	/policies/transit/	The action steps above are pretty weak and unlikely to make much improvement to the region's mediocre transit system. Minneapolis or Hennepin County should consider "opting out" of the Metro Transit system like suburban providers to focus better transit in the densest part of the region. Charge fees for parking and use the funding to increase bus service/ bus stops. Negotiate with Metro Transit to reduce the cost of bus fares for Minneapolis residents or subsidize transit service. Close some downtown streets to single occupancy drivers and let buses have the right of way. Build a transit tunnel through downtown to get buses out of car traffic. By 2040, there have got to be more bold things the City can do than the list above.	7/2/2018
1995	15	/policies/transportation-and-equity/	With autonomous vehicles just around the corner, it is impossible to predict what transportation needs we will have. They will certainly make high density traffic a possibility. They will make individualized transport much more affordable. They will remove the need for dedicated mass transit routes such as light rail etc. as the autonomous mass transit vehicles will be able to utilize common routes, roads etc. As such any plans for dedicated mass transit should be put on hold until the autonomous vehicle revolution plays out.	7/2/2018
1996	1	/policies/access-to-housing/	This policy needs attention as it's execution and rezoning solutions don't necessarily result in meeting the goal of accessibility to housing. As well, increased density on the small city lots that are currently single family homes with up to 4-unit structures introduce a host of issues such as existing home property devaluation and stress on the area's resources. Please remove/rewrite sections c thru d to be more specific in meeting goals while maintaining asset levels of current residents.	7/2/2018
1997	16	/policies/environmental-impacts-of-transportation	Please look at the real science not the politicized nonsense behind the CO2 warming scare mongering. Read the IPCC reports not the Summaries for policy makers which have been distorted beyond belief by the government (not scientist) authors. There is nothing which the city can do to effect whatever "harm" will be done by global warming. All you are doing is virtue signaling and wasting huge amounts of societies capitol (both in taxes and requirements that increase the cost of energy and hence everything else).	7/2/2018
1998	1	/policies/access-to-housing/	I'm opposed to this radical zoning change. Families need single-family homes. This plan will make Minneapolis inhospitable to families. It harms homeowners in favor of developers and renters.	7/2/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

1999	0.2	/small-area-plans/	I strongly disapprove of the concept of bringing larger complexes in and around the areas of 50th and France, Fulton, Linden Hills, Calhoun. These areas are known for their charm and neighborhood appeal. Bringing in larger complexes will destroy this and urbanize it. I think you will see significant decreases in land value as the current tenants, who reside here specifically for its neighborhood charms, relocate even further out into true suburbs. I'm an ER physician with a young family who just bought a house at 47th and Zenith and would absolutely leave the area if these changes are implemented.	7/2/2018
2000	19	/policies/bicycling/	When developing bikeways, take into accounts what will happen to traffic. These bike routes will not make cars go away. If as has been happening they result in traffic jams, any gain from more bicyclists will be offset by the pollution from stopped traffic. Bicycle routes should be designed the same all over the city. Safety lies in predictability.	7/2/2018
2001	4	/policies/access-to-commercial-goods-and-service/	Yes, it is a great idea to encourage small, localized businesses. But also, think about years ago, before the freeway system. It was common to do the family shopping downtown. We could take the bus and the stores would deliver what we purchased.	7/2/2018
2002	0.1	/topics/land-use-built-form/	Adequate residential parking needs to be part of any residential development plan for high-traffic neighborhoods.	7/2/2018
2003	22	/policies/downtown-transportation/	What does it mean to Manage the supply and design of parking downtown in a manner consistent with objectives for walking, bicycling, and transit users ? Parking will be needed less as transit improves. Until that happens, parking is a necessity. Have information in parking areas that encourages people to take transit. "...including promoting incentives to make transit more convenient for users traveling through and within Downtown " discourage auto transit through downtown. If drivers are not going downtown, there should be other routes. What does this mean? "...and that streets serving freeway connections reflect the multimodal networks that exist downtown." Jargon is not helpful here. "multimodal" sounds like you propose that streets serving freeway connections reflect things like bicycling and pedestrians. That can't be right.	7/2/2018
2004	80	/policies/development-near-metro-stations/	Publish a survey showing how many blocks people are willing to walk to get to transit. This should be broken down by characteristics of potential user. Remember that bus routes can be changed. In addition to the above, look at sites for potential new multi family housing that do not disrupt neighborhoods and work on plans to take transportation to them. Always, with every policy, increase green space.	7/2/2018
2005	0.1	/topics/land-use-built-form/	I live in a single-family home on 50th (a "Corridor 4" block). We owned and lived in this house for 12 years. Please keep in the forefront of your minds that these color-coded blocks are not just empty plots of land, but homes where families are living and raising children right now and are planning to stay for years to come. We care for our homes. We walk and forth to school every day. We play in the park. We walk to the lake to fish and go to the beach. We support our local businesses. We ride our bikes to the library. We do not want to move or sell our house. My neighbors and I are very concerned about what will happen to all of the families in all of these homes on all of these blocks. This plan has the potential to destroy much of what makes Minneapolis a great place to live.	7/2/2018
2006	33	/policies/affordable-housing-production/	How does a blanket zoning change on its own create affordable housing? Hint: it doesn't and won't. This plan is a shameless giveaway to developers. You should all be ashamed of trying to pull this scam on the residents of Minneapolis.	7/2/2018
2007	0.1	/topics/land-use-built-form/	I am appalled and shocked at the 2040 Plan. I bought a home in SW Minneapolis because of its charm and neighborhood feel. I am investing in an addition and i want to stay here. Now I find out your plan is destroying my neighborhood by tearing down more 100 year old homes. Streets like Xerxes Ave S, France Ave S, Upton Ave S, Sheridan Ave S, W44th St, W 46th st all are great neighborhoods. This is a terrible plan and must be stopped. I saved for years to be invested in this neighborhood and would hate to have to move.	7/2/2018
2008	1	/policies/access-to-housing/	This is great! I want Minneapolis to be a more integrated, diverse city with mixed income neighborhoods. I think there should be some specifications on the appearance of these units to ensure they fit in with the look of the neighborhood. Overall, I think every block in the city should be home to a 4-plex or duplex.	7/2/2018
2009	28	/policies/msp-airport/	The best way to modernize the airport would be to move it to an appropriate location. Planes are now constantly flying over densely populated neighborhoods. The recent 10-fold increase in air traffic in my neighborhood has made my home virtually uninhabitable. Though I love my house, I feel I must relocate in order to avoid the constant onslaught of noise and pollution. The airport is ruining residential SW Minneapolis!	7/2/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2010	0.1	/topics/land-use-built-form/	You have to consider the growing families already in the area and how it might affect them.	7/2/2018
2011	28	/policies/msp-airport/	The airport should relocate. It is the single biggest detriment to living in SW Minneapolis. The continuous and intolerable air assault on residential Minneapolis is appalling!	7/2/2018
2012	0.1	/topics/land-use-built-form/	I strongly object to the designation of all blocks adjacent to the identified transit corridors as Interior 3. Many neighborhoods along 50th street are made up of single family homes from 50th Street in both directions. These are wonderful single family home neighborhoods and this will be very detrimental to the property values, culture, and neighborhood personality of these neighborhoods. I am in favor of the re-designation of blocks adjacent to major intersections of the identified transit corridors, but not all along the length of the identified transit corridors. I believe that more care should be taken in evaluating where the proposed zoning changes should be made.	7/3/2018
2013	0.1	/topics/land-use-built-form/	Dear City Council, Planning Commission and Metropolitan Council - As a resident of the 13th Ward, I am firmly opposed to the Minneapolis 2040 Comprehensive Plan. I hope that my Councilwoman advocates for her constituents and voices our collective concerns. Of particular concern to me is the "Interior 3" adjacent blocks to transit corridors. These blocks are primarily single family homes and the people who live there bought and invested in these homes because they WERE NOT ON A TRANSIT CORRIDOR. I implore you to abandon the "Interior 3" designation for adjacent blocks to transit corridors. It will ruin the both the character and property values of the residents who live there, and these areas are not equipped to handle the additional traffic, parking demand and congestion of so much density. I also seriously question that the 2040 Plan will encourage the availability of affordable housing. If that is the goal, there needs to be other plans to achieve that, and limits of developers pricing structure. The 2040 Plan creates incentives for developers to take a single family home, tear it down, and build a fourplex on any block in the City. I can promise you that a fourplex in my neighborhood would be far from affordable - the developers would put a top tier price tag on the 4 units to realize as much profit as possible. The only ones who win are the developers. The 2040 Plan must LIMIT THE BLOCKS that get density to blocks that already have significant density before going and ruining the fabric of this city that makes it livable. The priorities to cut density? First - remove the possibility of fourplexes on any residential block - these should only be on transit corridors. Second - adjacent blocks to transit corridors should REMAIN AS IS - no zoning changes - and preserve the single family neighborhood feel that attracted these homeowners in the first place. As the plan stands now, I am motivated to sell my house before my property value declines and move to Edina where I don't have to deal with this threat to my investment. I am not alone in that opinion. Please give this plan an overhaul and listen to the taxpayers that have largely been left out of the discussion to date. Best Regards - Colleen Kepler 5329 Washburn Ave South	7/3/2018
2014	0.1	/topics/land-use-built-form/	This city needs more homes! Great job on the density increases	7/3/2018
2015	0.1	/topics/land-use-built-form/	Southwest/ north Minneapolis is not pulling its weight in the draft when it comes to the housing crisis. Southwest itself is really exclusionary right now, and in order for people of any income to live there needs to be zoned for at least interior four to become affordable to many people.	7/3/2018
2016	0.1	/topics/land-use-built-form/	The city should look into the city's approved street car plan for the final 2040 plan and zone for transit 30 along and four blocks around the proposed lines.	7/3/2018
2017	0.1	/topics/land-use-built-form/	The concept of commercial corridors is very lame. In order to have a city that feels like an actual city and feel cohesive commercial, office, retail, and light industrial zoning must be permitted throughout most if not all the city. This would create a bustling, lively city and help us meet our walking goals as well as transit goals.	7/3/2018
2018	45	/policies/leverage-housing-programs-to-benefit-c	Someone needs to look up the difference between "wealth" and "prosperity". Those with "wealth" seek prosperity. Those with "prosperity" have no need to seek "wealth". "Wealth" is what you accumulate; "prosperity" is how you dispose of wealth. Important distinction, if you're going to develop causal models and metrics.	7/3/2018
2019	0.1	/topics/land-use-built-form/	Why can't the city incrementally build up the zoning codes more slowly? This is too much all at once.	7/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2020	0.1	/topics/land-use-built-form/	<p>I appreciate Linea Palmisano sending out mailers to our ward. This really was the city's responsibility and it was their 2040 plan to strategically leave out people that don't have access to computers or internet and would not be able to navigate the internet at the library, etc. We have at least 2 people like this on our block. Many of us have given ideas to the city such as sending out mailers in the water bills, making robo calls like they do for street cleaning, or just plain send out mailers like we get for recycling, but the city continues to refuse to do this. Because if this, the city is discriminating against mainly many retired folks that are in this category. How convenient for the city, as these will be the people that will be selling the soonest, and the city will get a bump in their tax base when the greedy developer upzones their house to a 4 plex that takes most the entire property (more property than the current McMansions take up on a lot) most likely without a garage, or worse yet, build an apartment across two properties. Two homes have been sold in a 2 block radius in my neighborhood with the buyer stating to both sellers the same sweet story, "My wife just loves this charming home; we mainly live in Switzerland year round now, so we will rent the house for now, but soon we will retire, and my wife wants to live in this darling house." It is a trust that owns the homes now (which could be an investor group), so most likely they are sitting on them until the new zoning takes place (which I hope doesn't!) Please beware of greedy developers disguising themselves as caring folks eager to buy your beautiful home. Most people bought in these neighborhoods for a reason, and many on my block have added additions and upgrades instead of moving out to the burbs. We love our community with green lawns, gardens and mature trees (just what Theodore Wirth envisioned for us to have as a retreat from the bustling city), and we don't want this green space taken away by huge tall building materials. Now the city wants all the unique MPLS neighborhoods to be North loop type neighborhoods where Mayor Jacob Frey and David Frank (head city economic director/2040 director's boss) live. These two have not shown support, understanding or representation of our neighborhoods, only support to make them look like their neighborhoods and in turn bring in a higher tax break for them with very little affordable housing provided.</p>	7/3/2018
2021	0.1	/topics/land-use-built-form/	<p>I want to say that I strongly disagree with this proposed plan! I do not think this is the right direction to go for our city. This plan is very aggressive and I do not feel the residents of Minneapolis were provided the information nor time to learn about the proposed plan. I have spoken to a number of residents who only heard about it this week. This seems to lack transparency.</p> <p>The real winners in this plan appear to be the developers not the homeowners whose property values and standard of living will be greatly affected by the increased density in areas currently zoned as single family homes.</p> <p>I am not happy about this at all!</p> <p>There are plenty of areas in the city which have higher vacancy rates. Why not put a focus on cleaning up those areas and making them desirable to live in rather than forcing tremendous density to the rest of the city.</p> <p>Please do not allow this plan to move forward as it is!</p>	7/3/2018
2022	17	/policies/complete-streets/	<p>You are wanting to prioritize walking and biking for street planning in a state where it's negative wind chill for almost 2 solid months?</p>	7/3/2018
2023	1	/policies/access-to-housing/	<p>By doing this you lose the feel of small neighborhoods. The city already has spaces (uptown, downtown, north loop etc) for multi unit buildings. These areas are fine but don't promote a neighborhood block community. If I wanted to live in a less neighbor focused area I would have chosen my area of town differently</p>	7/3/2018
2024	15	/policies/transportation-and-equity/	<p>Sounds good</p>	7/3/2018
2025	19	/policies/bicycling/	<p>Continued focus on cycling and dedicated cycling corridors can have huge positive impacts on the city. Keep up the good work.</p>	7/3/2018
2026	18	/policies/walking/	<p>Yes! I've seen improvements in pedestrian features, especially in downtown, to continue and build a strong and vibrant walking culture out from the central core is vital.</p>	7/3/2018
2027	17	/policies/complete-streets/	<p>Yes! I drive a car, as infrequently as possible, it is a necessity, but in our current environment and in the urban core, I attempt to walk, bike, or transit for at least 50% of my trips, a goal that shouldn't be outside of the realm of easy possibility for most Mpls residents, especially with these types of policies going forward.</p>	7/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2028	0.1	/topics/land-use-built-form/	<p>We have such a beautiful city. Universities study the Minneapolis city neighborhoods/parks at many top universities in the country for city planning majors. These old historic homes should NOT be torn down to bring in your Ikea type cheap housing. My favorite part about the city is how each SFH has a plot of grass and everyone does something different with their yard. When I walk my dog, I love seeing all the old trees and views of the sky. Why oh why would you take these out for cheap tall duplexes and fourplexes that will take all the green away and have no place for the rain/melted snow to go.</p> <p>Just add density to the corridors and specifically where there is light rail. Please leave our SFH neighborhoods alone! There is no way they will offer affordable housing with what the developer needs to pay for the house in the first place. This has been our city long before NEWBIE Frey came into office and decided he wasn't happy with his city and wined and wanted it more like Manhattan. YUCK!!! Please listen to your constituents in ALL your neighborhoods you represent!!! We don't feel listened to by any of the city planners or the Mayor, but we are name called by your council members in other wards. Please make this 2040 plan a voice for all instead of a voice of our 30 city planners/city council.t</p>	7/3/2018
2029	0.1	/topics/land-use-built-form/	<p>These built form maps are not to size-the streets are way too wide. It sure looks like a suburb, not the green, earthy city we have all grown to love, oh, except for the city planners. Please keep our corridor 3 streets the same as they are now. Only do density near the transit corridors or light rail. You are taking the city we love away from us.</p>	7/3/2018
2030	0.1	/topics/land-use-built-form/	<p>When you have a 3 story apartment that extends the full side of each block and you only have a few cars on the block, that is not realistic. Whoever made this map, if I was your mom, I would take YOUR car away as a consequence. You need to be realistic here, the streets will be lined with cars just like in uptown.</p>	7/3/2018
2031	76	/policies/new-parks/	<p>Regarding Action Step c: Do not take the park dedication fees away from neighborhoods who are experiencing major development. If anything, expand the usage of those fees to include repair and upgrade to existing parks in impacted areas, thereby freeing up Park Board funds to create new parks in priority areas. The dedication fees are critical to accounting for the impact of new residents in an area and creating new green space.</p>	7/3/2018
2032	80	/policies/development-near-metro-stations/	<p>Why would you "prohibit the establishment of park and ride facilities"? Have you been to Denver? How do you expect people to get to stations, if walking is not convenient?</p>	7/3/2018
2033	1	/policies/access-to-housing/	<p>I strongly agree with this policy. Minneapolis needs more room for more people and housing should be inclusive and affordable for all. Anything we can do to address historic housing discrimination and make Minneapolis a more diverse place will make us stronger in 2040.</p>	7/3/2018
2034	1	/policies/access-to-housing/	<p>Are you going to do anything to make sure that the city is an attractive destination for middle class and wealthy people? Do you have any plans to preserve the beauty and attractiveness of the City's signature Lakes neighborhoods? Do you intend to do anything about airplane noise, which devastates the property values and quality of life in south Minneapolis? This document shows zero concern for the poor schlubs who have to drive to work, no plan to improve street maintenance, plowing and traffic ciruculation. Essentially, you plan to put more people in the city and make it harder for them to use cars to get around.</p>	7/3/2018
2035	19	/policies/bicycling/	<p>What will happen to seniors or those with physical disabilities, who cannot ride anymore or cannot walk in the winter to a bus stop?</p> <p>Current infrastructure and lack of public transportation is an issue</p>	7/3/2018
2036	5	/policies/visual-quality-of-new-development/	<p>How does a 39 story building in west Bde Makk Ska help build a beautiful physical environment? It blocks out the sun for one, and has anyone thought about what it will be doing to the environment to have so much population close to the lakes? Our lakes are something millions of people come to visit every year. We will be destroying them and a source of tourism</p>	7/3/2018
2037	15	/policies/transportation-and-equity/	<p>So will you fix this "disparity" before you build? Or is this new highly populated area supposed to just hang in there while the city comes up with how to provide transportation? Right now, public transportation is a disaster. How will it support thousands more people?</p>	7/3/2018
2038	25	/policies/innovations-in-transportation-and-infras	<p>These automated vehicles....you are worried about people being able to afford housing, but you suggest they can afford automated vehicles?</p>	7/3/2018
2039	20	/policies/transit/	<p>Cedar Avenue south of 35th Street has no regular bus service. The #14 barely runs south of 38th St., and there is a UofM bus. This is a significant gap in service along one of the City's major streets.</p>	7/3/2018
2040	60	/policies/intrinsic-value-of-properties/	<p>You are forgettin* the intrinsic value of the lakes and how subjecting them to high density population will Ron them.</p>	7/3/2018
2041	33	/policies/affordable-housing-production/	<p>This policy is in *direct* conflict with the "historic preservation" policy. Razing 100-year-old houses to build 4-story apartments and condominiums is NOT preserving historic neighborhoods.</p>	7/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2042	0.1	/topics/land-use-built-form/	No to 4 story apartments on Xerxes and 3 story apartments on Washburn, this would radically change the look and feel of our neighborhoods. Terri Richards	7/3/2018
2043	20	/policies/transit/	I've traveled to Europe, and even small cities like Oslo and Stockholm have subways and above ground rail that serves the central city. Minneapolis should have a subway/ rail to Uptown, down Chicago/ Nicollet Avenue, up W. Broadway, and into Northeast connecting dense nodes. Rather, all the transit \$ goes to LRT through industrial sites/ parks with no people just to serve suburban commuters. This section doesn't mention streetcars, rail to Duluth,/ St. Cloud/ Chicago, and it isn't clear whether the transit system will be any better in Minneapolis by 2040.	7/3/2018
2044	0.2	/small-area-plans/	While the growth and health of Minneapolis is vital to our future, I continue to have concerns. Plans for construction of both apartment buildings and four-plexes need to include off-street parking. In much of less-dense Minneapolis (e.g., Kenny and Armatage neighborhoods), if people don't work downtown or at Southdale, public transportation is quite limited. People often need to use private transport, especially in similar neighborhoods to drop children off at daycare or school and go on to work. The likely issue of absentee landlords has not been addressed for the four-plex plans. Thank you for listening. I'm sure I'm not the only resident who has similar concerns.	7/3/2018
2045	7	/policies/public-realm/	The reason the public realm/ our streets are so bleak is that Public Works has no mechanism to make streetscape improvements outside of a Special Services District (SSD). SSDs are only possible in areas with a high concentration of commercial properties because they assess those owners for upgraded services. Most Minneapolis corridors don't have enough businesses to make a SSD viable. So, the City won't put in nice benches, trash cans, plantings, banners, snow removal, etc. in most places. A funding mechanism is needed to implement a City-Wide Public Realm Framework and then to maintain any public realm improvements. What about sidewalk cafes, which often clutter the sidewalk? Restaurants only are required to leave 4' clearance on a sidewalks, which is the absolute bare minimum according to the ADA.	7/3/2018
2046	59	/policies/downtown/	The intro to this policy should identify what is meant by downtown Minneapolis. The North Loop and Mill District appear to be doing well, but the CBD has lost a lot of retail- especially on the ground level. Nicollet Mall is pretty depressing, and Hennepin remains seedy. Compared to other places of similar size like Denver, Portland, Seattle our downtown is pretty sad. There are lots of bars, restaurants, and strip clubs, but very few places to shop. The City needs to take a more active role and stop relying on the Downtown Council. That organization has demonstrated their ineptitude over and over.	7/3/2018
2047	66	/policies/air-quality/	The City of Minneapolis owns thousands of parking spaces in municipal parking ramps like Lemington, A B & C, and the Hawthorne. Providing publically-subsidized parking doesn't help the air quality. The interstate highways run through mostly places with high concentrations of poverty and people of color. Why don't we close freeways and invest in better transit?	7/3/2018
2048	59	/policies/downtown/	Significant amounts of City funding is directed towards the convention center, the Vikings Stadium, and Target Center including a "entertainment tax" that is collected downtown. These buildings appear to be the City's highest priority for downtown based on the resources spent on them. Yet, they don't get mentioned in this Policy. Could the City direct such taxes to things that make the downtown more livable like transit, streetscape, a senior center, a park, etc.? The action steps, as written, are a bunch of fluff and are unlikely to transform downtown into a place I want to be by 2040.	7/3/2018
2049	77	/policies/park-access/	Provide adequate bus routes to major parks	7/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2050	1	/policies/access-to-housing/	<p>I am opposed to the proposed plan of re-zoning in order to accommodate multiple family housing in SW Minneapolis. We have vibrant neighborhoods of residents who care about where they live. They know their neighbors. In other words, this is a success story. Why change it? I have lived a LONG time, and have watched politicians (who may be well intentioned) want to change things THAT WORK. I worry about my property values if a 4 plex goes up next door. With no off-street parking requirements, where will the cars go? It is naïve to believe these folks will turn into bicyclists. We have the freedom to work, play, shop and worship where we choose. I used to bicycle, but gave it up last year due to problems with balance. My mode of transportation is a CAR.</p> <p>I am quite familiar with the housing stock in North Minneapolis. LOTS of good affordable homes. Why not direct your efforts to enhancing playgrounds, upgrading security, planting more trees (some areas still suffering from a tornado's effects years ago), and giving REAL incentives to first time buyers?</p> <p>Please do not compare our lack of density to San Francisco and NYC. That is why people choose to live here.</p>	7/3/2018
2051	72	/policies/sustainable-water-system-management/	<p>Water treatment facilities must greatly increase the number of chemicals and pharmaceuticals that are tested. These must be removed from the drinking water supply.</p> <p>Nanoparticles and micro-particles may present an increasing risk to the health of humans and animals. The public must be educated about these risks, and the use of products that contain or break down to these particles should be limited</p>	7/3/2018
2052	25	/policies/innovations-in-transportation-and-infras	<p>Narrowing travel lanes only increases the chance that accidents will occur. Unless people are successfully encouraged to buy narrower cars, travel lanes should be widened, not narrowed</p>	7/3/2018
2053	33	/policies/affordable-housing-production/	<p>any new housing development, including condo and apartments, MUST have mixed use and truly affordable units. i have lived in uptown since 1978 and the increase of building density is fine, but it's all of a type, near-luxury and far too expensive.</p>	7/3/2018
2054	35	/policies/innovative-housing-types/	<p>the city should encourage "eco-housing". as the population ages, many wish to live in community with same-age peers to avoid nursing homes or assisted living. this includes a single house or a cluster of units.</p>	7/3/2018
2055	89	/policies/technology-in-the-city-enterprise/	<p>1. Constantly improve methods to secure the private data that is collected.</p> <p>2. Create multiple ways of backing up the data (possibly with local storage facilities) in the event that data is malevolently removed, or cloud services are disrupted for extended periods.</p>	7/3/2018
2056	50	/policies/access-to-technology/	<p>Ensure that all residents not only have access to information, but that the access is RAPID.</p>	7/3/2018
2057	47	/policies/housing-maintenance/	<p>frankly the city should discourage non-owner occupied houses altogether. these type of landlords own as an investment, not for the tenants concerns or comforts. recognizing this goes against ingrained capitalist ideology, as the very least the city should not allow out-of-city hedgefund-like ownership of housing stock. this drives down neighborhood unity and drives up rents as owners are only concerned with short term profits and flipping, which creates a cycle of rising rents.</p>	7/3/2018
2058	17	/policies/complete-streets/	<p>i am not in favor of decreasing street driving lanes for bicycle lanes. non-major streets should be used for bike lanes/boulevards. with more people in the city, there will be more cars. we cannot and should not discourage all people from driving-many of us need to drive, to work, with parents/children, with cargo and bikes will not work. (i am a biker myself). we need driving lanes to facilitate movement through and around the city. put bike lanes on auxiliary streets as with bryant in uptown.</p>	7/3/2018
2059	32	/policies/arts-in-community-development/	<p>The Art in Public Places program makes it too expensive, time-consuming, and complicated to complete simple place-making projects like paint the pavement or utility box wraps. Of course there needs to be standards, but the City requires that an artist is hired, community outreach efforts are conducted, and that the Arts Commission approve any design. It should be easy to paint a rainbow or happy face on the street especially because the paint wears off within months.</p>	7/3/2018
2060	27	/policies/transportation-partnerships/	<p>Historically, the City has partnered with the other jurisdictions to make Minneapolis streets awful for walkers and bikers and convenient for people driving cars. More bold action is needed to reverse the damage done to Minneapolis- especially freeways, highways like Hiawatha Avenue, and dangerous streets like Franklin and Lake. This Policy says very little and is unlikely to result in better outcomes for people who don't drive.</p>	7/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2061	20	/policies/transit/	<p>Transportation investments should be made from a perspective of improving connections in the system, NOT solely as an economic development vehicle.</p> <p>If Nicollet/Central doesn't need a street car because it's "developing", then neither does Washington/Broadway. Transit built for development reasons results in empty street cars and turns people off from future investments.</p> <p>Make smart choices.</p>	7/3/2018
2062	81	/policies/social-connectedness/	<p>Incorporating awareness programs is critical if communication between and among different racial and cultural groups is critical. In some neighborhoods, you will see one segment that communicates with tremendous agitation, loud screaming and arguing, and use of offensive language and gestures ~ probably not meaning much harm. Then you have another cultural group that learns to wait with respect until your hand is recognized to speak. Yet another group sits in judgment, waiting for the meeting to be over so that they can pull whatever political strings they might have AFTER the meeting is over. The first group walks out frustrated because no one will fight with them, because that is how they resolve differences; the second group leaves quietly, knowing that no one heard them, so they never show up again. The third group (the "dominant culture") smiles and walks out without contributing, knowing they will get what they want in the end because they are the power elite. This dynamic is not new; unfortunately, this is typical and just a spark in the tinderbox.</p>	7/3/2018
2063	22	/policies/downtown-transportation/	<p>Every intersection in downtown Minneapolis has a traffic signal timed to move cars efficiently. Having to wait to cross streets makes it slow to walk anywhere, which is why so many people use skyways. Plus, the streets are barren and boring lacking retail or activity on the ground level. there are too many driveways into parking ramps that cross the sidewalk and streets are too wide. Public Works seems incapable of doing anything else to make streets pleasant for walkers based on the design for 8th, 4th, and Hennepin Ave.</p>	7/3/2018
2064	33	/policies/affordable-housing-production/	<p>I ADMIRE THE ACTION STEPS BUT FIND THE 2040 PLAN TO WORK AGAINST THE STATED GOALS</p>	7/3/2018
2065	49	/policies/educational-and-economic-access/	<p>A JOB AND INCOME STARTS WITH EDUCATION. A JOB LEADS TO INCOME AND THE ABILITY TO BUY HOMES. I THINK THIS PLAN LACKS IDEAS AND SUPPORT FOR IMPROVING AND SUPPORTING MINNEAPOLIS EDUCATIONAL SYSTEM AND IS DOING NOTHING TO RECRUIT LARGE EMPLOYERS BACK TO THE CITY. WE ARE BUILDING A CITY OF LEISURE</p>	7/3/2018
2066	51	/policies/healthy-pre-k-development/	<p>HOW ARE YOU FUNDING IT??</p>	7/3/2018
2067	52	/policies/human-capital-and-a-trained-workforce/	<p>HOW ARE YOU FUNDING THIS? HAVE EMPLOYERS SIGNED ON AND INTERESTED IN FUNDING? HOW?</p>	7/3/2018
2068	55	/policies/business-innovation-and-expansion/	<p>WHILE THE PLAN FOCUSES ON CREATIVITY AND INNOVATION, WHAT ABOUT THE PEOPLE THAT ARE SUPPORTING FAMILY AND NEED THE JOBS NOW WITH LIMITED OR NO ACCESS TO EDUCATION. WHAT TYPE OF SERVICE JOBS ARE YOU BRINGING IN? NOT EVERYONE CAN WORK PHYSICALLY TAXING JOBS WHAT DOES IT LOOK LIKE FOR THEM</p>	7/3/2018
2069	56	/policies/supporting-small-businesses/	<p>GREAT. ASA SMALL BUSINESS PERSON, WE ALL NEEDED CAPITAL TO START. WOULD THE CITY INVEST IN PEOPLE WHO NEED A LITTLE HELP TO GET GOING. WOULD THE CITY NETWORK FOR US?</p>	7/3/2018
2070	1	/policies/access-to-housing/	<p>I support the policy but I do NOT think it is necessary to change the neighborhoods by adding up to six story residential buildings. I oppose Corridor 6 (make it 4). I oppose interior 3's. Make those duplexes to match current street scapes. I oppose Corridor 4 (make those 2 story duplex/fourplexes. I oppose Interior 3's. Make those 2 stories as well. We pay tremendous taxes to live in the city neighborhoods we chose for their character. Don't destroy the city - use common sense!</p>	7/3/2018
2071	0.1	/topics/land-use-built-form/	<p>I'm opposed to the radical zoning changes in the Mpls 2040 plan. I think this will make it impossible for families to stay in the city since houses, especially affordable ones under \$500k, will be torn down for small duplex apartments. My wife and I have two young boys and it's already a struggle to live in East Calhoun due to property crime, heavy traffic, and lack of parking for renters.</p> <p>A radical change to the very nature of a city should be put to a referendum, not managed using an artificial, unaccountable process like this one.</p>	7/3/2018
2072	0.1	/topics/land-use-built-form/	<p>I am concerned about the area around Washburn and 50th, Xerxes and 50th. Adding more multi-story buildings is going to create a huge parking issue. Parking is hard for the shops in the area already. On Washburn parking is restricted during school hours so adding more cars from more residents is going to cause a problem. Also when I bought this was one of the few places I could afford a single family house in the southwest area I wanted to be in. There is a true neighborhood feel currently and I appreciate having the privacy created by having single family homes around me. To have my backyard suddenly be overlooked from a large apt building across the alley on Xerxes is horrible and would make me reconsider living in the neighborhood.</p>	7/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2073	1	/policies/access-to-housing/	<p>Single family homes should not be replaced by multi family homes. Single family home neighborhoods are what gives Minneapolis the favorable character it has. Currently there are many vacant homes such as those in North Minneapolis hit by the tornado 6 years ago. Steps should be taken to get these homes back on the market. I understand higher density will be a need to accommodate additional people wanting to live in Minneapolis. To that end, rather than adding a fourplex here or there, why not replace the storage businesses along Hiawatha with higher density housing? That's just one example and there are certainly other similar areas throughout the city that could address higher density. The fourplex plan does not include parking. Plans for people to use transit are based on a transit system we do not currently have and a system that is not planned for substantial expansion. Until transit adequately addresses people's needs, cars will be used and I say that as someone who used transit for almost 15 years to get to work (although I drove to my bus stop since bus connections were too unreliable to guarantee I'd get to work on time.) To base major housing changes on a transit system that is inadequate is a recipe for disaster. High density proposals, such as but not limited to the fourplexes, push lot limit set backs. Lot line setbacks allow for more neighbor interactions, decrease rain water runoff, and provide a setting that's more human oriented.</p> <p>Kathy Swenson, 3940- 41st Ave. South</p>	7/3/2018
2074	31	/policies/creative-workers/	<p>Partnering with arts organizations is very important- we have a lot of strong organizations that already know how to do many of these things- for instance WARM (Women's Art Resources of MN) has been mentoring for 40 years. I would argue that young people of color do not have to learn only from people that look like them. Established artists that are good at mentoring will know how to direct a young person to follow their passion and help them build their creative business. We need to avoid staying in our silos and create connections across color lines.</p>	7/3/2018
2075	42	/policies/expand-homeownership/	<p>Removing single family homes as detailed in Policy #1 will not help meet the goals of Policy #42. Multi-family homes are not how low income renters will enter the home buying market. Maintaining small, single family homes in all neighborhoods will help accomplish Policy #42. The city should work to make available foreclosed homes, those damaged by storms, and those needing extensive repair. Tearing down existing small single family homes and replacing them with 4plexes and McMansion type new housing will not enable homeownership among those mentioned in this policy goal.</p> <p>Kathy Swenson, 3940-41 Ave S.</p>	7/3/2018
2076	73	/policies/stormwater-management/	<p>Let's use the Target on Lake Street as an example for meeting Policy #73 goals. This lot is never full. There are large areas of impervious surface. Why not include stormwater runoff retention areas- ie large rain gardens planted with native plants? The lot could have a substantial increase in the number of trees without impacting the number of spaces. A gravel bed tree garden could be installed with trees later planted within the neighborhood. I'm using Target only as one example. Grocery store parking lots, strip mall lots, and other small lots could all make proportionate changes that would collectively have a large impact. Requiring setbacks from lot lines in new construction would also aid in less stormwater runoff.</p>	7/3/2018
2077	16	/policies/environmental-impacts-of-transportation/	<p>I was a bicycle and transit commuter until I retired. I am an experienced city bicyclist but I did not feel safe bicycling once it was snowy and icy. Bus transportation did not go directly to a grocery store. I used my car. That's the reality with our current transit system and the climate we have. I actually think having more park and ride stations at light rail stations would help decrease how much people drive. If I have to wait for a transfer bus to get anywhere, I'll just drive. If I can drive a few miles and park to take a train or other bus then I'm more likely to use transit for part of my trip. It's also often much cheaper to drive than take transit.</p>	7/3/2018
2078	1	/policies/access-to-housing/	<p>Forcing multifamily units onto traditional size lots will results in tall buildings with a footprint that takes up most of the lot. The height will shadow neighboring homes and cut off daylight; the large footprint will decrease filtration of water runoff. For multifamily buildings, parcels should be combined so that the building height does not overshadow neighbors and the building footprint is proportional to the size of the lot.</p>	7/3/2018
2079	68	/policies/energy-efficient-buildings/	<p>Allowing tall buildings that shadow their neighbors will reduce options for solar-powered energy.</p>	7/3/2018
2080	74	/policies/integration-of-water-management-into-	<p>Multifamily units on traditional size lots will results in buildings and outbuildings with a footprint that takes up most of the lot. The large footprint will decrease filtration of water runoff. For multifamily buildings, parcels should be combined so that the building footprint is proportional to the size of the lot.</p>	7/3/2018
2081	19	/policies/bicycling/	<p>Safe bicycle riding needs designated bike paths physically separated from motor vehicles. "Sharrows" and bike lanes that are continuous with auto lanes and disappear at street corners are not good enough.</p>	7/3/2018
2082	21	/policies/freight/	<p>I agree with using smaller vehicles to deliver freight in neighborhoods.</p>	7/3/2018
2083	28	/policies/msp-airport/	<p>I agree with mitigating noise at MSP airport.</p>	7/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2084	38	/policies/affordable-housing-near-transit-and-job-	Transportation corridors seem to be the current snow emergency routes. Many of these are in neighborhoods with mostly single-family homes. The plan would allow for multifamily units on the corridors and one street over from the corridors. These neighborhoods would be destroyed.	7/3/2018
2085	16	/policies/environmental-impacts-of-transportation-	Allow greater choice in availability and attractiveness of non-motorized modes Bicycles and walking are not feasible for older people or people with disabilities or people carrying heavy loads; or for anyone during the Minnesota winter! There are people and situations where a private vehicle is necessary.	7/3/2018
2086	20	/policies/transit/	Currently transportation is great if you travel from the neighborhoods into the city center, but not if you travel on a circumferential route. Transportation is also great if you go into the city center in the morning and out in the evening, but not during the day. For example, I live in SW Minneapolis but would have to take 3 different buses (ie, 2 transfers) to get to the VA in SE Mpls. Public transportation needs more routes throughout the day and circumferentially throughout the city.	7/3/2018
2087	1	/policies/access-to-housing/	Forcing multifamily units onto traditional size lots (0.12 acre) will result in tall buildings with a footprint that takes up most of the lot. The height will shadow neighboring homes and cut off daylight. The large footprint will decrease filtration of water runoff. For multifamily buildings, parcels should be combined so that the building footprint is proportional to the size of the lot and the building height does not overshadow neighbors.	7/3/2018
2088	33	/policies/affordable-housing-production/	Affordable housing should not be cheaply constructed. Residents of multifamily housing should not be able to hear other residents' noise; smell their cooking odors; or see their activity; each unit should have cross-ventilation. Minneapolis must develop and enforce building codes so that multifamily housing is a desirable place to live. In addition, multi-unit dwellings should be well-maintained for the benefit of the residents as well as neighbors. This could be done by enforcing regulations on yard upkeep and snow shoveling, or by requiring that multi-unit dwellings have at least one owner-occupant.	7/3/2018
2089	34	/policies/affordable-housing-preservation/	The new housing I see going up now are huge tall single-unit homes, shadowing their neighbors, with a footprint taking up a good percentage of the lot; replacing the smaller homes that were there. My impression is that the city allows this to increase its tax base. Smaller homes should be retained to maintain the livability of the neighborhood and to maintain affordable housing.	7/3/2018
2090	30	/policies/arts-and-cultural-assets/	I hope that there will be a defined structure for engaging artists in all long term visioning. It needs to be a public process that all artists can be involved in if they want- they need to know about it- reach out to arts organizations to get the word out. Artists should also be paid for helping with this process- don't just use them as free volunteers.	7/3/2018
2091	80	/policies/development-near-metro-stations/	Re "Minimize the impact of automobiles near METRO stations..." Park and ride facilities encourage people to use public transportation. Develop the transportation system before making driving inconvenient.	7/3/2018
2092	68	/policies/energy-efficient-buildings/	Incentivize solar energy production on individual homes. Protect installed solar panels from being shadowed by renovations in neighboring buildings.	7/3/2018
2093	71	/policies/soil-health/	Require adequate ground area around each site's impervious cover (including the building footprint). Multifamily units on traditional size lots will result in buildings with a footprint that takes up most of the lot, reducing filtration of rainfall and runoff.	7/3/2018
2094	46	/policies/healthy-housing/	Minneapolis must develop and enforce building codes requiring solid construction so that multifamily housing maintains health. Much of the problem with living in multifamily housing is that it has been shoddily constructed, so that residents have to tolerate noise, cooking odors, and activity of other residents; and have no access to cross-ventilation with fresh outdoor air.	7/3/2018
2095	83	/policies/people-with-disabilities/	All people (including those with disabilities) need well-maintained side walks and crosswalks in the winter needs. The current maintenance is not adequate. Sidewalks cannot just be shoveled, but also treated so they are not slippery; and corners must be dug out. The city must force property owners to maintain walks, or take over the task.	7/3/2018
2096	47	/policies/housing-maintenance/	Many of the single family homes in south Minneapolis were built in the early 1900s in the Arts and Crafts style. Their preservation should be supported as much as prominent landmarks. This will also enhance the availability of affordable housing.	7/3/2018
2097	9	/policies/open-spaces-in-new-development/	Require adequate open space around housing. Allowing multiunit housing on standard city lots (0.12 acres) will encourage large footprints and minimize green space.	7/3/2018
2098	73	/policies/stormwater-management/	Use of the ground as natural filtration assumes adequate ground area around building footprints. This should be considered when determining size of building footprints relative to the lot size. Putting multiplexes on standard city lots will be detrimental.	7/3/2018
2099	1	/policies/access-to-housing/	I am concerned that the character and history of neighborhoods will be preserved. How can the city prevent builders from buying houses in neighborhoods and building fourplexes all over the place. What happens to citizens in the neighborhood that object? Will they be listened to? You need to develop a process for this.	7/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2100	0.1	/topics/land-use-built-form/	I am not convinced that zoning for more denser housing development will be sufficient to create more affordable housing. I believe developers will make housing they can sell for top dollar - not affordable housing. I believe the market will pay top dollar for that housing. I believe there is evidence for this in other US cities. Please take this into account when planning these policies.	7/3/2018
2101	19	/policies/bicycling/	I am a cyclist and try to do as much of my transit via bike as possible. That said, I believe the city is developing a number of bikeways that have a significant negative impact on driving without improving the cycling experience much. That is creating significant ill will among a big swath of the city population. I also think the city needs to focus on maintaining current bike paths that see heavy usage and are falling into disrepair.	7/3/2018
2102	17	/policies/complete-streets/	All of these transit plans seem to leave out senior citizens. I am getting older, and increasingly cannot make all of my transit work via bike and bus. Please do not make life miserable for us who need to depend on cars for a big piece of our transit.	7/3/2018
2103	20	/policies/transit/	It is clear that the state government will not find metro transit to even fulfill its current mission, let alone fill in the gap from increased density and decreased parking and roads for cars. I am deeply worried this plans adds significant density with the assumption that mass transit options will increase significantly, where the current reality is that it only adds to more traffic congestion and no increase in transit.	7/3/2018
2104	0.1	/topics/land-use-built-form/	I have concerns about the development of the transit corridor along Penn Avenue, specifically the transition from Interior 1 to Corridor 4 along Russell Avenue S. There is no stepped change, as you see in other areas along transit corridors. Instead, the existing residents on the 60/61 blocks of Russell will have to endure massive changes in zoning, and likely form & function. What used to be the back side of Wagner's and a semi quiet street has the potential to become the backside of a FOUR story multi-use building/condo/parking lot/business. The Land Use & Built Form maps contradict one another so there is no clear picture what the existing residents might be left with. The plan is short sighted and doesn't include feedback or input from any of the current residents. Disappointed Neighbor.	7/3/2018
2105	47	/policies/housing-maintenance/	I think we need to be realistic that some of the housing stock are on life support. At some point, the bandaids must be replaced by sutures; if the sutures don't contain the problem, then one needs to consider amputation; if amputation doesn't solve the problem, then it is time to consider last rites for some of these structures.	7/3/2018
2106	1	/policies/access-to-housing/	I agree that some additional duplexes and 4 plexes in the single-family neighborhoods are justified. However, there would need to be a process to make sure that each neighborhood only has a few of them. Otherwise they will be concentrated where the real estate values are currently the lowest, which would mean the loss of the current most affordable single family homes. The law of unintended consequences needs to be carefully considered before expanding the zoning in the neighborhoods.	7/3/2018
2107	43	/policies/housing-displacement/	Please look at restricting AirBNB rentals. This is should be reviewed first before considering blanket upzoning to fourplexes in S/SW Mpls. Many duplexes and SFH have been converted to AirBNB rentals, thus displacing many residents and lining the pockets of investors who do not live in the city.	7/3/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2108	1	/policies/access-to-housing/	<p>I am opposed to the proposed policy.</p> <p>As a Near Northside resident for over 30 years, I have first hand experience with witnessing the benefits of less rental and increased home ownership in the neighborhoods between Plymouth and Broadway, Lyndale and Penn.</p> <p>Increasing housing density in low income neighbors will only increase the difficulty families have with overcoming generational poverty. Building new housing is unaffordable for most of our residents.</p> <p>With the 100's of vacant homes on the Northside, City Hall needs to learn from the policies in the 70's that made home ownership available to families. Dollar homes helped many residents purchase their homes as well as stabilize the neighborhood from outside speculators.</p> <p>I would love to see "Adopt a new homeowner on your block". Existing families could mentor new homeowners. This is what I experienced when I first bought my home in '85.</p> <p>Northside Housing Services help me connect with local neighbor support groups that assisted me with learning how to take care of a home!</p> <p>With increased density, our neighborhoods will lose that feeling of "A small town in a big city:."</p>	7/4/2018
2109	76	/policies/new-parks/	<p>This policy should say somewhere that new parks can be built in any Future Land Use category. There is a category called Parks and Open Space, but of course it isn't possible to designate now properties that may later be chosen for parks. To make that possible, please assure readers that those new parks can go anywhere.</p>	7/4/2018
2110	1	/policies/access-to-housing/	<p>My husband and I are Fulton residents, who are raising 6 children in our single family home. We have sent all of our children to Minneapolis Public Schools. We believe in our city, our schools, and enjoy raising our family in a city that allows us to do that relatively easily. We are however, against opening up the interior of our neighborhood for developers to come in, knock down and crowd. We already have a lot of construction happening. More young families moving in, which is great. As a result, the schools are already at maximum capacity. If you change the integrity of the neighborhoods and what they offer to families, you will lose. Our children play ball in the street, walk to schools, parks and jobs. Crowding our streets and already cramped lots will force young new families, as well as established residents, out. Growth on main areas seems to be a better option. I just do not understand why it seems like a good idea to open it wide up to change? I feel like starting with some, and see how it goes, is more logical. We did not move to uptown for a reason. If the entire city ends up crowded like that, the shift unfortunately will be to move out. So sad.</p>	7/4/2018
2111	0.1	/topics/land-use-built-form/	<p>I am against building density on the west side of Lake Bde Make Ska. The traffic around the lake is already terrible, and I think it is a huge mistake to keep developing a hotel and towers and more density. Nobody wants it but the city council.</p>	7/4/2018
2112	0.1	/topics/land-use-built-form/	<p>I am against density on the north end of Lake Calhoun and through Uptown. Too many people will kill the lakes.</p>	7/4/2018
2113	0.1	/topics/land-use-built-form/	<p>The current plan to increase density on the west side of Lake Calhoun will only create an unsustainable amount of traffic. Most of us can't bike and walk to work!</p>	7/4/2018
2114	0.1	/topics/land-use-built-form/	<p>The current push toward density in Uptown is unsustainable. We need parking infrastructure or businesses will close. The current council is turning Uptown into another Nicollet Mall, no small businesses, empty spaces, and a soulless avenue.</p>	7/4/2018
2115	0.1	/topics/land-use-built-form/	<p>The lakes cannot support the kind of density proposed. Density is not green. It pushes out small businesses because of a lack of parking. We live in a winter climate. This plan is terrible.</p>	7/4/2018
2116	0.1	/topics/land-use-built-form/	<p>Against density. I like the city the way it is. Why should Minneapolis absorb all the density. Do not keep building in Uptown and west calhoun. The light rail may not happen, and if it doesn't, the traffic is going to kill the whole area.</p>	7/4/2018
2117	0.1	/topics/land-use-built-form/	<p>I strongly disagree with the rezoning of single family home neighborhoods to allow for quadplexes. Not only will this negatively affect housing prices it will not aid in increasing home ownership. furthermore without significant improvement in road infrastructure and parking many of the neighborhoods will become unnavigable.</p>	7/4/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2118	1	/policies/access-to-housing/	this seems like quick plan for the city council to look like they're making decisions that are in the best interest of "low Income" or people that cannot afford single family dwellings but in reality it is just that, a quick plan for the city council to try an make them selves look like they're doing something for the people they supposedly represent. This looks and smells like a relaxing of rules to plopp multi family dwellings in single family areas under the guise of "helping" those who need housing as well as trying to tie the environment into it. this is beyond silly, use Chicago as a perfect example of what not to do.	7/4/2018
2119	0.1	/topics/land-use-built-form/	I DO NOT AGREE with this policy. I do NOT want to have my block of Washburn zoned for 3 story buildings, as well as the other changes. I want to STOP this plan and keep zoning the way it is. I am vigorously protesting this entire plan.	7/4/2018
2120	0.1	/topics/land-use-built-form/	I am extremely opposed to this plan, and the zoning changes to 3 & 4 story buildings in South Minneapolis along Xerxes, 50th, Penn, etc. I am VERY opposed to these zoning changes.	7/4/2018
2121	0.1	/topics/land-use-built-form/	I live at 4600 43rd Ave South along 46th Street. My lot is proposed to be zoned corridor 6 from it's current single family zoning status. Allowing up to a 6 story building on my lot will increase the potential use and subsequently the value of my lot solely through zoning. I am concerned that those of us in single fmaily homes along these busy corridors will be taxed out of our homes by this zoning plan. I recommend that part of the Minneapolis 2040 plan icnclude tax mitigation plans for single fmaily homes that get rezoned into higher density zones. For exmample, our home values should only increase the average of the city wide increases instead of corridor specific. Please think about this and develop a draft plan to mitigate the potential difficulty you will force many families into solely by rezoning their current residential homes into higher density lots. Thank you!	7/4/2018
2122	15	/policies/transportation-and-equity/	I do not see an increase in public transportation but instead street maintenance when I go to your link of 20 year plan. There are so many areas in Minneapolis that do NOT have adequate public transportation, the number one priority should be North Minneapolis. As a resident of South Minneapolis who has done research on mass transit on the North Side, it is quite evident how underserved this community has been. I am also concerned with aging population and increased development in housing on South Side as it pertains to transportation and congestion. City believes bike lanes are the answer to car infestation. And increased parking fees punish those who have no alternative because bus routes are pretty limited. It still takes over an hour to get to St. Paul from S. Minneapolis.	7/4/2018
2123	47	/policies/housing-maintenance/	Yes!	7/4/2018
2124	48	/policies/data-driven-decisions/	Remember that data without a transparent filter of values and cultural context, is more often than not internally biased, giving the analysts tremendous power over inputs and outcomes. Data is evidence that affirms or disaffirms beliefs; data is neither truth nor fact, just supporting documentation that must be carefully scrutinized.	7/4/2018
2125	48	/policies/data-driven-decisions/	From a formal data request, I understand that Minneapolis does not have any data about people with disabilities and how various parts of of the population are currently excluded from access to business, events, programs, housing and other public facing spaces and activity. Rebecca St. Martin	7/4/2018
2126	19	/policies/bicycling/	We need dont need bike paths on streets and take away from traffic flow. Those bike paths arw not used during winter months and it could be used by vehicles to avoid congestion.	7/4/2018
2127	66	/policies/air-quality/	You need to stress legal enforcement of air quality standards. Encouragement is good, but some businesses will only respond if there is strong enforcement.	7/4/2018
2128	84	/policies/public-safety/	Not every police response requires maximum force. Teach police how to modulate their response to match different situations. Provide police with better training on how to de-escalate situations. Provide police with special training on how to interact with mentally ill individuals.	7/4/2018
2129	22	/policies/downtown-transportation/	Downtown streets are currently designed to make driving a car as convenient as possible including one-way pairs, light timing focused on moving cars, three lanes of car traffic + parking lanes, access to parking ramp entrances on every block, and freeway access from nearly every street. The action steps above seem unlikely to change that in any meaningful way. By 2040, couldn't we have pedestrian and/or transit only streets? How about converting some streets to two-way traffic and removing lanes? I don't think 5th St. along the LRT has one tree planted because the City determined it is more important to preserve a one-lane, one-direction traffic lane to access parking ramps and the freeway. Close the access to I-394 directly from Washinton Ave N and make motorists use 3rd Ave N. to get to the freeway near Target Field. Tear down those 3rd and 4th Ave freeway viaducts through the North Loop. Whomever, wrote this Policy appears to have never traveled to a downtown where it is actually desirable to walk.	7/4/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2130	26	/policies/vision-zero/	Create and enforce laws with large penalties for distracted driving, especially from cell phone use. Create laws that anticipate use of semiautonomous and autonomous vehicles.	7/4/2018
2131	7	/policies/public-realm/	This Policy ignores the fact that the City doesn't have a good mechanism for maintaining streetscape improvements on sidewalks or their plazas. In a few places, Special Services Districts (SSD) do some of this work, but most of the City doesn't get that level of service. Developing a "Public Realm Framework" seems like a 3-5 year thing rather than something to do over the next 20+ years. What about clearing snow and ice from sidewalks? I hope this Policy gets rewritten to be more clear about the topic, the vision for 2040, and/ or get combined with another Policy like "Street Grid" so it makes more sense.	7/4/2018
2132	20	/policies/transit/	WE need more transit options. How about a train on hwy 62 to the airport. Elevated tracks near Lake Street and other key corridors. Invest in transit now and as we plan for a better future!	7/4/2018
2133	0.1	/topics/land-use-built-form/	I have lived happily on 41st and Bryant Ave S for 24 years. I co-exist with single family homes, condominiums and apartment buildings on my block. What I would like to see is a promise that building heights do not exceed 3 stories--my home is only two, the apartments on our our block are four to six high. I also would like to see the city commit to a maximum of multi family dwellings per block in areas that are currently zoned or will be changed. Parking becomes a burden in the winter, especially on snow emergencies. Currently my block has four apartment buildings and I believe this is a decent balance that I would not like to see upset by adding more multifamily or apartment buildings.	7/4/2018
2134	19	/policies/bicycling/	I live on Bryant Ave S. I am a cyclist and bike commuter as are two others in my family/household. I LOVE that Bryant is a bikeway. PLEASE never let this go away. I will say that choosing to create bikeways on bus routes is rather bone-headed and this should be seriously considered when creating new bikeways. Aldrich and Colfax would have been much better choices back when we got our bike lanes painted on Bryant. I DO NOT like to compete for bike lane space with buses and I DO NOT like to breathe their exhaust. More and eventually ALL hybrid buses needed! PLEASE consider. I am proud to live in Minneapolis, I am happy to bike safely everywhere I need to go, I fully support more bikeways and encourage other residents to get out from behind their steering wheels and try handlebars instead! This is how we will reduce carbon emissions, fight obesity and reduce stress in our city.	7/4/2018
2135	49	/policies/educational-and-economic-access/	There must be a constant reminder that having access to opportunities does not equate to being successful. Providing access is something that society can do; being successful is something that the individual can achieve by rising to challenges and being accountable for his/her own destiny. There should be no disparities in access; however, there will be disparities in achievement, since you can only get as much out of an education as you are willing to put into it. Teachers provide opportunities; students (and their families) can be beneficiaries, if they so choose.	7/4/2018
2136	0.1	/topics/land-use-built-form/	Nicollet Ave between 48th and Minnehaha Pkwy would be adversely affected by Corridor 6 zoning. The scale is out of sync with the neighborhood and will strip the area of smaller & moderately priced homes and depress the value of larger single family homes nearby. It also would place architecturally significant buildings such as the Lustron homes and at least 3 Harry Wild Jones houses at risk of destruction. Corridor 4 with Interior 1 is better fit.	7/4/2018
2137	1	/policies/access-to-housing/	Changing single family zoning to multi family for whole areas of the city is more than offensive and a slap in the face, it's a reason to move out. It's unthinkable. We're already under siege by developers removing the affordable smaller homes in Linden Hills, maxing out the residential lots to the disbenefit of existing residents, erecting large homes with no aesthetic guidelines. Really? How many of the planning staff, planning commission members, city council members live - with their families - on single family blocks that will now allow 4 units? We know the mayor is comfortably tucked away in his historic preserve on Nicollet Island with no kids so how could he begin to feel this pain. Instead, let all these developers and approvers of the plan be the guinea pigs for their ideas - and let the rest of us get back to our lives rather than living now with the every day stress that the cute little house next store just became a developers next profit generator while the streets where we pay taxes turn into places we would never have chosen to buy.	7/4/2018
2138	1	/policies/access-to-housing/	We've lived in SW Minneapolis for 30 years -- raised our family here and plan to stay as long as we are able because we love the neighborhood. I feel the value of our home will be driven down if the plan to allow four-plexes on small city lots is permitted. Along main thoroughfares is fine, such as Lyndale, Nicollet, Penn as long as sufficient parking is baked in to the plan. Right now I can't help but think that developers are the ones who stand to gain the most and that they are pushing this through. The intangible qualities of interior neighborhoods are the very thing that speculators will ruin by exploiting it for financial gain.	7/5/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2139	10	/policies/street-grid/	Please define vacations - "Consider relinquishing the City's ownership over vacations..." Also, what are the specific grid gaps you are hoping to fix - the Kmart on Nicollet? Others?	7/5/2018
2140	0.1	/topics/land-use-built-form/	I am very much opposed to the new zoning scheme. In particular I am shocked and dismayed at how the City of Minneapolis would so blithely risk destroying the character of our Lynnhurst Neighborhood by adding fourplex rental units anywhere and everywhere. If we wanted to live in a neighborhood with transient renters, excessive traffic, and lack of safety for children, then we would have stayed in Uptown where we lived when we were young. We didn't spend a half a million dollars buying into this neighborhood to have the city come along and destroy the value. The city has its goals and objectives, but we already disproportionately pay for those goals and objectives through our high property taxes; we should not now have to pay for those goals and objectives by having the fabric of our neighborhood torn apart. Do not impose this radical change on the residents of our neighborhood because some urban planner wrote their dissertation on the benefits of population density. The most I am willing to consider is expanding the current R2. No fourplexes in Lynnhurst interior, period.	7/5/2018
2141	13	/policies/landscaping/	I would like to see justification for planting large trees with aggressive roots, like elms, in boulevards that are less than 3 feet wide. My neighborhood is paying thousands of dollars to fix sidewalks that have been heaved up by elm trees, and it seems like these trees should never have been planted in such narrow boulevards.	7/5/2018
2142	78	/policies/park-design-and-programming/	Is there a plan to outfit all rec centers with air conditioning? As the climate changes we are seeing more and more days with a heat index of 105 degrees or more. That means that parents that have paid for child care at rec centers without AC must pick up their children early. This is a huge burden on working families who paid for and expect reliable child care during the summer months.	7/5/2018
2143	80	/policies/development-near-metro-stations/	Prohibiting park-and-ride facilities is not going to deter people from driving to and parking near METRO stations. Unless you designate surrounding blocks as 2-hour parking zones (and aggressively enforce that) or require permits to park on streets near the METRO stations, people are going to park and ride regardless of whether the city provides a park-and-ride lot.	7/5/2018
2144	33	/policies/affordable-housing-production/	This is a terrible idea bound to have significant negative effects on homeowners property values - I'd expect many to monitor this and eventually sell their property	7/5/2018
2145	1	/policies/access-to-housing/	I do not support any general Zone for roads to allow for apartments (i.e. more dense house) in out parts of Minneapolis. This will hurt the existing neighborhood that we NOT designed to accommodate this type of house. Additionally, I do not support idea of growing residents that live in Minneapolis, this will hurt city by over populating it, you are trying to bring lower income resident to cite and that will bring its own set of problems!!. What are you trying to do turn Minneapolis in to a city like Chicago which is a crime ridden dump!!! Focus on Maintaining current single family home with families that own homes.	7/5/2018
2146	2	/policies/access-to-employment/	Before the City of Minneapolis can grow employment opportunities it needs to address cost for rent/properties. This lower cost rent/taxes for business should not cost taxpayer more money!!!! Sorry, to say most people in Minneapolis do not work in Minneapolis. In fact I believe most business are moving out of Minneapolis due to low quality work force, high costs, crime. Additionally, Most people like me DO NOT want to work in Down Town Minneapolis!!!! Time for the city to stop focus on growing Job in just down town Minneapolis!!!	7/5/2018
2147	3	/policies/production-and-processing/	I disagree with this IDEA for 2040!!! Cost for improvement should be funded by local resident in that part of Minneapolis. This should NOT be fund by more financial affluent parts of Minneapolis where tax dollars from South west Minneapolis fund activities in North Minneapolis. Our tax are already to high and I do not want to see my tax dollars funding other parts of Minneapolis that have significant problems!! City of Minneapolis needs to recognize significant difference from one part of town to another financial and accept those difference!!! Our tax dollars should be targeted to local neighborhoods.	7/5/2018
2148	4	/policies/access-to-commercial-goods-and-service	City should not focus on this it is a waist of taxpayer dollars. If neighborhood has a need/demand for business/goods/Services then local business will spring up to meet the demand and if the business cannot make enough income then it should go away. This is just another one of those Liberal Idea's that is a waist our taxpayer dollars please remove this from Minneapolis 204 list of items and focus on Basic service (i.e. this is not one of them)!!!	7/5/2018
2149	6	/policies/pedestrian-oriented-building-and-site-de	I do not agree with this as item for Minneapolis 204 goals. Majority of people in Minneapolis drive to business and this should be priority #1. Walking would be 2nd priority. Bike is a distant 3rd, especially with MN winters. This is one of those liberal idea's that is a waist of tax dollars and should be stopped. Please remove this from Minneapolis 204 goals list!!!	7/5/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2150	38	/policies/affordable-housing-near-transit-and-job-	So if you build it they will come? "Households that can reduce their number of automobiles can save that money or use it for other living costs." Right....let's replace affordable single family homes with cheap fourplexes and HOPE that people will give up their cars to live there. 76% of pollution comes from commercial buildings (your facts) and you want to reshape all of residential Mpls to tackle the other 24% from cars? This is madness, magical thinking and illogical. Bigger development means more concrete, less grass and trees and more shade that will make it hard for what's left to grow What about THAT impact on the environment?	7/5/2018
2151	8	/policies/public-safety-through-environmental-de	This should be removed from the Minneapolis 2040 goal. This forces a significant extra financial burden on new development. Business are already not build in Minneapolis because it is already too costly. This should be removed from the Minneapolis 204 goal list!!!	7/5/2018
2152	9	/policies/open-spaces-in-new-development/	This should be limited so it does not put a extra burden on new business development. Minneapolis is already too expensive for New development/business!!!	7/5/2018
2153	10	/policies/street-grid/	Agree.	7/5/2018
2154	11	/policies/skyways/	This should only be funded by resident/businesses in Down Town area. This should not be funded in any way by residents that live out side of the Downtown area!!!	7/5/2018
2155	14	/policies/tree-canopy-and-urban-forest/	Pursue this only if it does not create added financial cost burden to support more government jobs for City to maintain trees. Minneapolis City employee count/costs are already to high for tax payer and this just increases governments employees. Residential tax payers are already over burden with City of Minneapolis costs to support government employee base and this MUST not grow government jobs which increase our taxes!!!	7/5/2018
2156	16	/policies/environmental-impacts-of-transportation	This needs to be balance with cost/benefit for project to add Rail type transportation is expensive and is difficult to change. In most cases at this point and time this does not make sense. In many cases bus type public transit is a more reasonable approach!! Perfect example is South west train way to Eden Prairie is a significant waist of our tax dollars. People are NOT going from Minneapolis to Jobs in Eden Prairie since business are not next to train station and Eden prairie does not have 2nd transportation to business (i.e. people drive cars/other to these job location). The few people coming into Minneapolis for Jobs would be better severed with Bus type transportation!!! Lines I could support is MPLS to Burnsville, Mpls to Northern cities (Blaine), MPLS through to St Paul/Stillwater WI. Mpls West to buffalo. MPLS to Eden Praire is a waist of tax dollars and city should not support and/or waist tax payer dollars on this project!!!	7/5/2018
2157	23	/policies/coordinated-development-strategy/	This should be removed as a 2040 MPLS goal and/or moved significantly down in the list. This should also only be application when and where it makes sense. This is just a liberal idea to waist tax dollars!!!	7/5/2018
2158	24	/policies/shared-mobility/	This should not negatively on establish road ways. I seen to may waist cases of bike ways put in that have significant negative impact on roads/autos. Sorry to say level of bike traffic does not justify this type of road way change in most cases!!! This is just BAD for Minneapolis. Please remove this as a goal for Minneapolis!!!	7/5/2018
2159	25	/policies/innovations-in-transportation-and-infras	This should be removed for list. Already have to many like ideas in 204 goal list. This will just create another financial cost burden to resident of Minneapolis to support this goal. Eliminate this from mpls 204 goal list!!!	7/5/2018
2160	28	/policies/msp-airport/	This is a waist of Minneapolis tax payer dollars and should be removed from mpls 204 goal list!!!	7/5/2018
2161	29	/policies/creative-sector-economy/	City should focus more on this and less on Giving our tax dollars a ways to rich professional sport teams / owners for build more waist building for professional sports!!! Majority of resident can not afford to go to professional sporting events since it is too costly and inaccessible in down town areas!!!	7/5/2018
2162	33	/policies/affordable-housing-production/	Affordable house tend to be low income housing which cause more problems in City. This should not be focus for affordable house!!! Affordable house should be focus more on how to provide spaces to people who have lived in Minneapolis most of their lives and now need a different type of space. What I see is City of Minneapolis making City affordable house to be so it is becoming next Chicago Ghetto and this must stop. Their is nothing wrong with building more up scale housing in Minneapolis. Also, affordable house should NOT change local road zoning to allow Apartments in neighborhood/residential areas that were not designed and/or built to accommodate this type of housing!! If anything I would say the city should handle these on a case by case basis and this should include and significantly factor in local residents input!!	7/5/2018
2163	35	/policies/innovative-housing-types/	Remove this from mpls 2040 goals this is just a waist of tax payer dollars!!!	7/5/2018
2164	36	/policies/innovative-housing-strategies/	Remove from MPLS 2040 goal list, this is just a waist of tax payer dollars and duplicate several other like goals!!	7/5/2018
2165	39	/policies/fair-housing/	Remove this as a 2040 mpls goal this is a waist of taxer dollars and this add no value to city of minneapolis!!! :(7/5/2018
2166	39	/policies/fair-housing/	Remove from Minneapolis 2040 goal list!!! City already has to many items for House!! This is is a waist of tax payer dollars and will just increase Minneapolis city government jobs which is NOT needed!!! Again, Remove from Minneapolis 2040 goal list!!!	7/5/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2167	40	/policies/homelessness/	This should be covered by social services and / or local charities and as a norm is not something the city should fund. City should support Charities. Exception to this is City should help provide home to children in unsafe home environment and/or short term temporary housing for domestic abuse situation, assuming individual is working to get out of domestic abuse situation!!!	7/5/2018
2168	41	/policies/tenant-protections/	This only applies if are rent are paid on time and housing provided is up to acceptable level. In Many case housing is below an acceptable level and landlord is not working to get it at the required level. These type of bad and loads need to be eliminated city from being able to have rental housing!!! This is especially true down by the University of MN.	7/5/2018
2169	44	/policies/comprehensive-investments/	Remove from 2040 Minneapolis goal list. City of Minneapolis should have not business in Comprehensive Investments!!!	7/5/2018
2170	45	/policies/leverage-housing-programs-to-benefit-c	City of Minneapolis already has to many housing item on list remove from Minneapolis 2040 goal list!!!!	7/5/2018
2171	47	/policies/housing-maintenance/	This should not include extensive replacement of house with Mini-mansions!!! This is especially common and a problem in South West Minneapolis and does not support idea for affordable housing!!!	7/5/2018
2172	48	/policies/data-driven-decisions/	City of Minneapolis already has to many housing items on list remove from Minneapolis 2040 goal list!!!!	7/5/2018
2173	49	/policies/educational-and-economic-access/	City of Minneapolis need to remove this from 2040 goal list. City should not be in the business of educating people!!!!	7/5/2018
2174	50	/policies/access-to-technology/	City of Minneapolis should support idea of enabling building/install/creating of digital infrastructure as long as it does not impact city resident and/or cost tax payer dollars. City Should not Fund this with tax payer dollars!!!	7/5/2018
2175	51	/policies/healthy-pre-k-development/	This is problem for Minneapolis education/schools and they should handle this item and is not item city of Minneapolis should focus on for 2040 goal. This should be removed from Minneapolis 2040 goals.	7/5/2018
2176	52	/policies/human-capital-and-a-trained-workforce/	City on Minneapolis should remove this from 2040 goals!!! City of Minneapolis should not be providing tax dollars to support individual adult education activities this is their responsibilities!!!	7/5/2018
2177	53	/policies/quality-of-life/	Remove fro Minneapolis 2040 goal list, this is the individuals responsibility not the City of Minneapolis!!!	7/5/2018
2178	54	/policies/supporting-economic-growth/	This should not put an excessive financial burden on resident for extra taxes. Cost for this must be limited to a minimal amount to tax payer dollars, otherwise this should be removed from Minneapolis 204 goal list.	7/5/2018
2179	56	/policies/supporting-small-businesses/	City of Minneapolis should not be focus on ethnic type business group, this is discrimination!!!! City job is to provide service to tax paying residents. City should be providing tax payer dollars to start up business which frequently fail!!! This is a bad usage of tax payer dollars!!	7/5/2018
2180	57	/policies/cluster-strategy/	cost to support this need to be limited since tax payers should not be funding this type of activity!!!	7/5/2018
2181	58	/policies/business-districts-and-corridors/	This should NOT impend on established residential areas!!! The city should NOT be changing existing road/area zone to accommodate this type of change. I most cased if something different is desired it should be handle on one of exception and must significantly include local resident input and/or veto rights!!	7/5/2018
2182	59	/policies/downtown/	City of Minneapolis is to focusing to much on down town areas!!!. City needs focus more on non down town areas!!! This should be removed from Minneapolis 2040 goal list!!!	7/5/2018
2183	60	/policies/intrinsic-value-of-properties/	City of Minneapolis should not be funding these Intrinsic Value of Properties activities, the developer should. This should be handle via zoning for not allowing for new replacement development verse refurbishing existing.	7/5/2018
2184	61	/policies/environmental-justice/	Remove from Minneapolis 2040 goal list this is just a waist of tax payer dollars!!!	7/5/2018
2185	62	/policies/contaminated-sites/	Business need to be accountable for their action and containment of properties, which include full cleanup and/or financial restitution to impacts to neighboring properties. Cities need to stop this type of contamination as some as possible. and hold contaminator accountable for actions.	7/5/2018
2186	63	/policies/food-access/	City of Minneapolis has not business in having this as 2040 goal for Minneapolis. This must be removed as a 2040 goal for Minneapolis!!!!	7/5/2018
2187	65	/policies/urban-agriculture-and-food-production/	City of Minneapolis has not business in having this as 2040 goal for Minneapolis. Only thing Minneapolis should provide is space for farmer food markets and/or ability to rent individual garden space if acceptable areas which need to be open up each year for other to utilize.	7/5/2018
2188	66	/policies/air-quality/	agree, city should help reduce these type of air pollution.	7/5/2018
2189	67	/policies/climate-resilient-communities/	This should be removed as 2040 Minneapolis goal. This add not value/benefit to city!!!	7/5/2018
2190	68	/policies/energy-efficient-buildings/	This should be removed as 2040 Minneapolis goal. This add not value/benefit to city!!!	7/5/2018
2191	71	/policies/soil-health/	This should be removed as 2040 Minneapolis goal. This adds no value/benefit to city!!!	7/5/2018
2192	72	/policies/sustainable-water-system-management/	This should be an increased for focus for City Clean water is a must in city!!!	7/5/2018
2193	73	/policies/stormwater-management/	This should be a focus for City. Also elimination of contamination in city sew should be priority. Clean water is a must have for city!!!	7/5/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2194	76	/policies/new-parks/	This should be common goal for all of Minneapolis and should not be just for underserved areas. Also, I do not agree with idea for 10 minute walk to park space!!!	7/5/2018
2195	77	/policies/park-access/	Eliminate this from Minneapolis 2040 goal list. Combine all park item into one park goal set of activities!!	7/5/2018
2196	78	/policies/park-design-and-programming/	This should not have a negative impact on Neighborhoods. Example, when Penn Ave was redone it grossly was undersized and bad layout. this was especially true by Armitage park area in South west Minneapolis. WE need to maintain acceptable access in/out of neighborhoods and this is an example this was not done and a common sense factor was not applied to road design and now it is hurting neighborhood for access in/out of neighborhood!!!	7/5/2018
2197	79	/policies/healthy-youth-development/	Minneapolis 2040 goal should reduce scope of this item to focus just on healthy physical development and education (i.e. parks). scope has to many BS items and they need to be removed!!! for this should be eliminate as a Minneapolis 2040 goal!!!	7/5/2018
2198	80	/policies/development-near-metro-stations/	Remove from the Minneapolis 204 goals. This is just a BS item that is already covered in sidewalk goal. This is a duplicate goal and waist of tax payer dollars!!!	7/5/2018
2199	81	/policies/social-connectedness/	This is NOT the responsibility of the City of Minneapolis and this should be removed as a 2040 goal for the city of Minneapolis!!!	7/5/2018
2200	82	/policies/aging/	This is not the responsibility of Minneapolis and this should be removed as a 204 goal for Minneapolis!!!	7/5/2018
2201	83	/policies/people-with-disabilities/	Remove "Require City staff to produce accessible documents and presentations." this is not the City of Minneapolis responsibility and should not be included as 2040 goal for City of Minneapolis!!!	7/5/2018
2202	84	/policies/public-safety/	This must be expanded to include hold Police accountable to bad actions. Also, laws for police shooting need to be at the same level as local resident. Today police a grant a special class/level for shooting and they should be the same as any other person!!!	7/5/2018
2203	86	/policies/healthy-food-in-institutions/	City should support but not legislate health food to these groups / activity. As a norm this is not an activity the City of Minneapolis should be involved in and I would suggest this be removed as a goal for the city of Minneapolis!!!	7/5/2018
2204	88	/policies/public-services-policy/	This needs to be expanded to include Basic city service like snow removal and garbage removal service!!! The snow removal has significantly declined over past years and this basic service by city must be improved!!!!	7/5/2018
2205	89	/policies/technology-in-the-city-enterprise/	The city must not make it so technology is the only way to access city items. I seen to many cases where "technology" must be utilized and this negatively impacts people without technology and/or skills to utilize technology. Perfect Example of this is city console people using only of email news letters, and unofficial community groups (i.e. groups that leadership is not elected via normal city elections) for working with the residents they represent.	7/5/2018
2206	91	/policies/heritage-preservation-outreach/	This should not change from what is in place today!!! No more and/or no less.	7/5/2018
2207	93	/policies/stewarding-historic-properties/	This should not change from what is in place today, no more/ no less!!!	7/5/2018
2208	95	/policies/heritage-preservation-financial-incentive/	This should not change from what is in place today no more / no less!!!	7/5/2018
2209	97	/policies/heritage-preservation-legislative-advocacy/	Why is this needed ? This should be eliminated as a 204 goal for the city of Minneapolis!!!	7/5/2018
2210	1	/policies/access-to-housing/	I totally agree and cheer for city 2040 development plan. I have a proposal for a multifamily development near Lake st. transit. I need to talk to a city planer about it. My name is Raymond He. My number is 612-408-1299. Please have the responsible person give me a call. I like to meet him or her to have a discussion. Thank you.	7/5/2018
2211	1	/policies/access-to-housing/	I am totally opposed to this section as it would totally disrupt the quaint neighborhood feel. There is not enough room in the single small lots to allow a 3 or 4 plex and for the amount of residents added to a multi unit structure and there is not adequate parking on the streets.	7/5/2018
2212	1	/policies/access-to-housing/	I think there are enough boomers leaving the neighborhoods to allow for housing demands. What needs to be fixed is making our housing more affordable.	7/5/2018
2213	0.1	/topics/land-use-built-form/	forcing multi-family housing in neighborhoods that are largely established as single family will be catastrophic (ie: Linden Hills). Those with expensive properties will flee, and values will go down which will erode the tax base. Once this happens the resulting "gap" will need to be filled (lest MPLS reign in spending...) which will actually hurt those this program is designed to help. This is a perfect example of a situation where the unintended consequences will far outweigh the intended ones.	7/5/2018
2214	0.1	/topics/land-use-built-form/	Core 50 - There should be a public observation deck requirement for any building taller than 50 stories. Locking off the view from the tallest buildings in Minneapolis, like the IDS did, is a huge missed opportunity for tourism.	7/5/2018
2215	41	/policies/tenant-protections/	I would like to see a requirement that landlords provide more than 60 days notice of rent increases - for low-income households, 60 days is not always enough time to come up with the money required for moving expenses, security deposit on a new place, and first & last months rent. There should also be much stronger protections for individuals facing eviction, IE legal representation, potential wage reimbursement and child care for individuals who have to miss work to go to court regarding a potential eviction.	7/5/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2216	41	/policies/tenant-protections/	I would like to see a publicly accessible database of slumlords/problematic management companies that includes a list of all properties under their control- there is no excuse for the ongoing management of dozens of properties by the likes of Stephen Frenz and Mahmoud Khan, who prey on the most vulnerable renters with impunity.	7/5/2018
2217	1	/policies/access-to-housing/	I agree with duplex zoning in neighborhood interiors . I DO NOT agree with 3,4 and 3 story units being built. I DO NOT agree with new apartment buildings in neighborhood interiors	7/5/2018
2218	0.1	/topics/land-use-built-form/	I am incredibly disappointed to see the area along 60th St between Chicago and 5th Ave is being designated as Corridor 6. I live on 59th and Park Ave, with my two small children. My husband and I moved into this area 6 years ago because of the neighborhood feel, and mix of both longtime residents and new families. By changing the zoning to allow 6 story buildings that could potentially be built on lots 3 deep on our block, you take away our neighborhood. I'm not opposed to change, but I have no desire to live in the next North Loop or Uptown. I highly oppose the plan to try and turn South Minneapolis into this.	7/5/2018
2219	1	/policies/access-to-housing/	I live in CARAG and I approve of this plan. Especially want to see non-driving options, bike routes and mass transit options expand throughout the city. Currently it is very difficult to bike or walk from South Minneapolis to North. The bridge across Glenwood/394/Farmers Market is not safe or friendly for bikers or walkers. Please restitch the neighborhoods that were torn apart by highways in the 1960s.	7/5/2018
2220	29	/policies/creative-sector-economy/	Sounds good!	7/5/2018
2221	30	/policies/arts-and-cultural-assets/	Focus on highlighting local talent. I am extremely disappointed that the Walker Sculpture Garden does not show more of our talented artists. Ditto the disappointment that the airport brought in an East Coast artist for their new public large installation art. Local artists should be given first consideration. The talent is here, but it isn't nurtured or supported enough.	7/5/2018
2222	31	/policies/creative-workers/	Great to focus on artists of color, but women of color and all women are particularly underrepresented in getting good, paid, gigs.	7/5/2018
2223	0.1	/topics/land-use-built-form/	Allowing 10-4 story buildings to surround and infiltrate the historic Prospect Park Neighborhood is outrageous and destructive to the families and individuals that call this neighborhood home. Also the flagrant disregard for current building standards is incomprehensible. The city has already approved a building at the edge of Tower Park to be 17 stories high. Seven stories higher than the proposed 2040 plan and 14.5 stories higher than the current zoning requirements. We have to work together to grow Minneapolis is way that is green, livable and desirable for all. Your 2040 plan falls far short of that ideal and I urge you to reconsider this destructive community destroying plan.	7/5/2018
2224	32	/policies/arts-in-community-development/	Right now the visual arts community only thrives in the NE area around Northrop King and other arts buildings. It is nearly impossible to find affordable studio space/community in other neighborhoods. Even areas with high densities of creative residents like 55408 zip code have virtually no studio space available. Not having work space within a reasonable distance of residence is a huge inhibitor to creative work, especially for people relying on biking, walking, or public transportation.	7/5/2018
2225	18	/policies/walking/	How about providing some sort of funding or tax write-off to small retail businesses, in high rent areas (downtown) to help create vibrant street life and encourage walkers. People don't leave the skyways downtown in part because nothing is happening to look at/shop at on street level, except bars/restaurants thank you sidewalk cafes and food trucks. Good strolling areas have new things to delight and view as do good shopping areas. Right now most all shopping in Mpls is destination shopping, but the best cities you can just walking Cities you can just wander and shop.	7/5/2018
2226	35	/policies/innovative-housing-types/	I am absolutely in favor of more creative housing types. Upzoning to allow for more duplexes, triplexes, and fourplexes is a great start. Allowing more Accessory Dwelling Units/Cluster Developments will also be a great way to bridge historic properties with increased density. Intentional communities allowing more than 6 unrelated people will give more potential to older, currently single family homes with more than 6 bedrooms. More density is great! This City already does a good job of being walkable/bikable, but there is so much more that we can do!	7/5/2018
2227	36	/policies/innovative-housing-strategies/	I would be interested in seeing a ballot initiative to create a fund to help cover the cost of underground parking in new developments. People keep complaining about parking and demanding the City provide them free space to park their private possessions (which is entirely BS). If there is such a demand for parking while wanting to keep housing affordable, see the if the City really wants more parking by putting a ballot initiative out there to pay for it. Or make all street parking paid (either via permit or meter). A ballot initiative for more funding for transit would also be great.	7/5/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2228	80	/policies/development-near-metro-stations/	<p>I would love to see a continual narrowing of streets to promote slower driving and provide more room for sidewalks, bike lanes, and areas for outdoor seating. This would apply for me both around METRO areas and elsewhere in the City. Unless you are on a freeway, why is anybody driving that fast? Keep things safe for everyone.</p> <p>Side comment: please please please put a light rail (or, preferably, a subway) through Uptown. The buses are ok, but the connections could be so much better. Also, by using either Hennepin or Lyndale for those tracks/station, it could eliminate one of the worst and dumbest bottlenecks in the City when heading towards downtown (where Hennepin and Lyndale come together at a free exit ramp).</p>	7/5/2018
2229	42	/policies/expand-homeownership/	<p>Long-shot idea: either the City or a nonprofit (would likely have to start as a City initiative and spin-off into a nonprofit) owns a lot of housing stock and creates a database of low-income renters. This pool of renters essentially pays rent under a "rent to own" system. As long as they only move between properties that are owned by the City, they continue accruing equity in an eventual future home. Once they have gained enough equity (maybe 5-10 years?), they are given a City-backed loan on one of the properties. The City essentially serves as a back-stop for the low-income community. If members of the pool choose to move outside of City-owned property, the rental money gained simply goes to operations, maintenance, and the acquisition of new properties. Owners that sell property to this City program could be given a tax break of some kind. I get that there is a lot of complexity to this idea/somebody else probably thought of something similar, but I wanted to spit-ball it.</p>	7/5/2018
2230	47	/policies/housing-maintenance/	<p>One of the biggest hurdles to housing maintenance is the interest on loans. If the City could provide loans specific to maintenance activities at 2-3% (or 18 month, 0% interest for emergency work), it would make it a much easier financial decision to do that kind of work.</p>	7/5/2018
2231	66	/policies/air-quality/	<p>Why are motorcycles seemingly exempt from noise standards? I understand that their fuel efficiency is better because of their weight, but they are also absolute noise pollutants. I don't care how big people think their genitals are, I don't need to hear the revving.</p>	7/5/2018
2232	16	/policies/environmental-impacts-of-transportation/	<p>It would be wildly unpopular for some, but annexing the first ring suburbs to the north, west, and south would go a long way towards comprehensive regional planning. If CTIB isn't going to work, the City needs to work on ways to make everything, even beyond current City limits, denser to support more biking and mass transit. Annexing those suburbs would take away tax havens for corporations and allow everything to be more concentrated. It would also bring in more funding for transit projects. It is a travesty that the City has to suffer the effects of suburbanites' pollution from commuting into the City. Annex and bring everything under one jurisdiction to help the overall process.</p>	7/5/2018
2233	68	/policies/energy-efficient-buildings/	<p>Work with the State to make it a mandate to track energy usage. St Paul's attorney is trying to ruin a good thing and energy efficiency wonks need some help. It is hard to become more energy efficient if nobody knows how much energy they use or what it means.</p>	7/5/2018
2234	69	/policies/renewable-and-carbon-free-energy/	<p>Use the City's authority to put more pressure on Xcel to work with private developers. Xcel does an ok job of promoting renewables on its own, but it is stymying adoption by blocking private developers at every turn. If the City wants to get serious about its 100% renewable pledge, it is going to need all the help that it can get, which includes more than the current efforts that Xcel is putting forth. We need to free up that market and the City's leverage can help with that.</p>	7/5/2018
2235	1	/policies/access-to-housing/	<p>1e. In the early 1990s, I lived in a starter home on the 53rd block of Chowen Ave S. Now 15 of the 30 homes on that block have been torn down and replaced or major remodeled. The home price went from around \$90,000 to \$850,000. How is that meeting the goals of the mpls2040 plan? I say stop all teardowns and major remodels in Interior 1. By the way, the house right next to me was a section 8 City of Minneapolis owned home.</p>	7/5/2018
2236	14	/policies/tree-canopy-and-urban-forest/	<p>Give property tax breaks to owners that plant and maintain City-provided trees in their boulevards. Similarly, get rid of the arcane requirements around lawn maintenance. Monoculture grass, at any height, is not beneficial for the environment. Allow residents to have longer grasses, mixed grasses, or anything else. Who cares if it looks like a golf green? Sure, make the parks nice to play in, but residents should be able to leave their grass at whatever length and mix that they want!</p>	7/5/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2237	78	/policies/park-design-and-programming/	<p>Two points:</p> <p>1) Put more full-court basketball courts in parks. Put several next to each other that can then be used for ice rinks in the winter (this will help mitigate the inevitable compression problems when rinks are put on grass). Build the courts to a high enough quality to support the weight and freezing of a rink.</p> <p>2) Much longer shot: legalize alcoholic consumption in parks. The current alcohol bans seem more like a means to harassing homeless individuals as opposed to a legitimate public health problem. In experiencing the Super Bowl festivities, it was an incredible joy to be able to walk down Nicollet Ave with a beer in hand and no reservations about being caught. Similarly, the beer dabbler in Loring Park is an absolute joy. We need to stop being so prude about our alcohol rules. Our parks are already great - yes. They could be made better by allowing fun barbecues with beer, beer olympics, and picnics with a glass of wine.</p>	7/5/2018
2238	51	/policies/healthy-pre-k-development/	<p>I can't believe that "parents" are mentioned but ONCE in the action steps. Unless the children become full wards of the State (in this case, the City), none of this can be successful without parents (which it appears the City assumes must be specifically called out...) leading the effort.</p> <p>Frankly, with the horizon being 2040, other models (such as the Tiger mom households, where children begin learning math, music, and foreign languages when they are 3) should be explored. These action steps appear to set a very low bar for low-income children, rather than the higher, more audacious targets that will pull these children to higher levels of achievement. Particularly with what we can anticipate the Supreme Court doing with Affirmative Action in education, these kids need to be bootstrapped to rise significantly, just to survive over the next 20 years.</p>	7/5/2018
2239	0.1	/topics/land-use-built-form/	<p>Very concerned about the impacts this plan will have, a plan based on simplistic assumptions as to what drives housing costs. While it's convenient to argue affordable housing is the impetus, building more units does nothing to ensure affordable housing. Would appreciate a thoughtful and inclusive approach to addressing this issue rather than this "plan" which appears to be half baked and being driven unnecessarily by near term deadlines. Whose deadlines - where did they come from?</p>	7/5/2018
2240	0.1	/topics/land-use-built-form/	<p>Very concerned about the impacts this plan will have, a plan based on simplistic assumptions as to what drives housing costs. While it's convenient to argue affordable housing is the impetus, building more units does nothing to ensure affordable housing. Would appreciate a thoughtful and inclusive approach to addressing this issue rather than this "plan" which appears to be half baked and being driven unnecessarily by near term deadlines. Whose deadlines - where did they come from?</p>	7/5/2018
2241	0.2	/small-area-plans/	<p>I prefer the small area plan we have now for east calhoun. I was part of the planning process, and I like that the commercial corridors were apart from the residential corridors. I think the new plan has way too many commercial and density corridors.</p>	7/6/2018
2242	0.2	/small-area-plans/	<p>Keep the good of the current small plans. You're throwing out the baby with the bathwater. This new plan gives the city to the highest bidder.</p>	7/6/2018
2243	0.1	/topics/land-use-built-form/	<p>I dislike the focus on density especially because we have long winters and inadequate funding for mass transit. Driverless cars and light rail are not yet here or funded, but the city council is approving a plan that lets developers assume we will have transportation infrastructure. This plan is unrealistic and caters to the young and able.</p>	7/6/2018
2244	23	/policies/coordinated-development-strategy/	<p>First of all this interactive site is impossible. Half the time I go on the screen freezes. This is the most exclusive, off putting method for feedback I have ever seen in any public forum. Whoever developed it should lose her/his job!</p>	7/6/2018
2245	36	/policies/innovative-housing-strategies/	<p>Stick to the current small area plans. This whole interactive process is meant to keep most of us silent. Post-its and little boxes? Really? Shame on you, city planners. You've sold your souls, and you're selling our city.</p>	7/6/2018
2246	1	/policies/access-to-housing/	<p>I have lived in Minneapolis for all of my 70 years. I own my home and also two rental homes in the city.</p> <p>Regarding part C above, "public transit routes" include many quiet residential streets that are not appropriate for multiple family dwellings. A few examples, among many, are west 54th street, Cedar Lake Road in Bryn Mawr, Xerxes Avenue South, and France Avenue South.</p> <p>Regarding part E above, allowing fourplexes willy nilly in existing single family neighborhoods, whether closer or farther from downtown, would destroy the quality and character of those neighborhoods: the best way to preserve the beauty of our single family neighborhoods is to keep them as they are- we have a uniquely beautiful city and should not "mess with success". Also, the city is already growing at a healthy rate after years of declining population, and we do not want to encourage a faster rate of growth. Our schools, parks, and roads are crowded as it is.</p>	7/6/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2247	0.1	/topics/land-use-built-form/	I support fourplexes, but do not support rezoning residential neighborhoods as Interior 3 and Corridor 4. A house on York for example would possibly face the situation where it would be in a shadowy canyon surrounded on either side by 3 story apartment complexes, and behind by 4 story apartment complexes. This is quite clearly not what people had in mind when they moved to that street. Increasing density through allowing fourplexes that maintain similar setback requirements and maintain the feel of the neighborhood is a preferable approach to increase the opportunities people have for living in a particular area, while not devaluing existing property and pushing others out.	7/6/2018
2248	19	/policies/bicycling/	<p>The idea of getting to a bicycle mode share of 15% by 2025 is absurd and misdirects needed plan energy. Minneapolis does not have the climate (see: http://www.cityclock.org/urban-cycling-mode-share/#.Wz7mkNJKhEb) nor the correct layout to achieve that mode share and it will waste resources that could be spent improving roads to make driving safer. Use of roundabouts, traffic circles, etc and replacing stop signs with yield/warning signs at all intersections will improve bicycling safety at the same time as improving driving and walking safety.</p> <p>As far as bikeway design the absolute best design is the separated path. You should concentrate on making a connected highway of separated bikeways that reaches as much of surrounding communities as possible and encourages city riders to stay off streets and on separated paths which should be well-maintained and wide enough for year round use by multi-directional traffic.</p>	7/6/2018
2249	10	/policies/street-grid/	<p>Keep the grid intact please but do so by doing these two things:</p> <ol style="list-style-type: none"> 1. Roundabouts everywhere but in particular to replace traffic lights and in any intersections of a certain traffic load that can accomodate even a mini-circle. They save time, Earth, and lives, AND it's about social justice. Poor people aren't getting those photo tickets from lights, and young black men aren't getting pulled over and hassled. 2. Remove most stop signs and replace with Yield or special intersection warning signs almost across the board. The new signage will save lives on foot, pedal and wheel. 	7/6/2018
2250	30	/policies/arts-and-cultural-assets/	It is important that the city harness the Northeast Minneapolis Arts District as the hub of arts culture. Density of artists and their resources is a necessity for to ensure the growth of the arts and cultural assets. More focus and specific zoning to enhance the Arts District is important for it to not only survive but thrive. In the 1950s, 25 percent of the land use was in industrial, now it's 5 percent." Production Mixed Use and Production and Distribution land uses need protective language, or it'll all become housing if market dynamics are allowed to take over. Artist need the land and building that was zoned industrial to be used as production space. Once industrial spaces are gone the city will set up the scenario of artist not having affordable work space that fits their needs close to where they live.	7/6/2018
2251	0.1	/topics/land-use-built-form/	Hello, We bought our home on the 5700 block of 1st Ave S with the intention of staying many years in our quiet neighborhood. The thought of numerous tall apartment buildings, 4-plexes or even duplexes towering over our modest home is awful. I understand the need for more housing, but I do not think our quiet neighborhood should be ruined.	7/6/2018
2252	52	/policies/human-capital-and-a-trained-workforce/	Zero mention of people with disabilities (who can work gainfully) or disabled people (who cannot work gainfully but would still like to earn some money or contribute) in the idea of a diverse workforce. Rebecca St. Martin	7/6/2018
2253	65	/policies/urban-agriculture-and-food-production/	Turn US Bank Stadium into US Food Bank Stadium, the world's largest greenhouse and vertical urban farm. Break the contract with the Wilfs and send the Vikings outdoors again like real men.	7/6/2018
2254	19	/policies/bicycling/	It is unrealistic and prejudicial to project a very high proportion of trips taken by bike in this climate and for all age groups. I am 68 years old, I want to stay in Minneapolis, and there is no way I will use my bike other than for occasional recreation. I am part of the vibrant diversity in this city too. Keep the streets safe for ALL vehicles, amd make sure there continue to be sufficient lanes for car transport and to keep traffic moving smoothly.	7/6/2018
2255	1	/policies/access-to-housing/	Walkbilty and bikability are key to achieving low carbon goals. Incorporate these concerns into housing planning. Currently, I am not in walking distance from a grocery store; planning for mixed-use densities can cut carbon by limiting car trips for frequent needs. Pay attention to food access when planning housing.	7/6/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2256	2	/policies/access-to-employment/	Action step D is important; expanding institutions often have the resources to displace housing unless these housing sites are protected by the city. Encourage is not a strong action verb - how will this be enforced? Please consider phrasing this action step in a way that ensures city residents will not be displaced.	7/6/2018
2257	0.1	/topics/land-use-built-form/	the blocks next to the Basilica of Saint Mary are coded Transit 30, which would call for 8 to 30 story buildings. Part of the beauty of the the Loring Park neighborhood includes the Basilica and the pastoral setting adjacent to the Park. I object to the Transit 30 designation next to the Basilica and so close to the Park. Please change the Transit 30 designation to buldings with lower heights appropriate to the proximity of the park and the Basilica.	7/6/2018
2258	3	/policies/production-and-processing/	For action step m, I would prefer to see a more engaged action verb than explore. Once the city has explored proactive enforcement, what will be done? Will that enforcement be implemented? I would like to see proactive enforcement of pollution regulations implemented well before 2040.	7/6/2018
2259	4	/policies/access-to-commercial-goods-and-service	Action step h is an excellent way to progress goals. University researchers know a lot about city planning and the future of cities. Plan to incorporate not only bikability, walkability, but also electric and autonomous vehicles.	7/6/2018
2260	5	/policies/visual-quality-of-new-development/	Looks are important, but so is the physical make-up of the building. Building efficiency can greatly reduce carbon emissions - especially in Minnesota's climate. Consider requiring energy efficiency in buildings and planning for low-carbon buildings.	7/6/2018
2261	0.1	/topics/land-use-built-form/	<p>I fully support allowing up to 4 residential units to be built in lots everywhere in the city. As a young owner-occupier of a triplex, owning multi-family property was one of the few ways that I could own and live near the heart of the city. My house is the same size and volume as my my southern neighbor's single family home and my northern neighbor's quadplex. We have a thriving, walkable neighborhood precisely because of the density. I fully believe that other neighborhoods will cope, no thrive with this gentle density.</p> <p>My family's motivation for living near the heart of the city was to design our lifestyles around sustainable transportation. My partner and I bike, walk, and take transit for the majority of our trips. If Minneapolis is serious about reducing our city's carbon footprint, we have to make it easier for others to utilize these transportation modes. Bringing destinations closer in a way to where people live (allowing for greater density mixed use of commercial and residential) can be a key component to encourage that.</p> <p>P.S. I thoroughly appreciate the well-thought design of this comp plan information. It's a lot of data, and the data nerd in my has really enjoyed the colorful maps - it really makes the information easy to understand.</p>	7/6/2018
2262	1	/policies/access-to-housing/	Please no four plexes on any forty foot wide lot. If you want to remove entire blocks and start over like Humboldt Greenway in north Minneapolis that would maybe be doable. I'm a homeowner in north Minneapolis and already have to put up with livability issues with single family renters, I can only imagine how miserable it would be with four times as many people crowded together on a tiny lot. Please NO.	7/6/2018
2263	41	/policies/tenant-protections/	Housing security is the absolute best way to protect tenants and the best way for tenants in jeopardy of eviction or living in unsafe conditions is to have a right to counsel.	7/6/2018
2264	1	/policies/access-to-housing/	I am curious how having more housing will increase affordable housing. Are there subsidies for low income families? Rent control? Thanks!	7/6/2018
2265	13	/policies/landscaping/	Anything we can do to make climate-first policies the cultural norm around here would be much appreciated! For example, I read in the New York times that disposing properly of refrigerators is the #1 thing we can do! Essentially, I love this and would like to help with community communication efforts however possible.	7/6/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2266	19	/policies/bicycling/	<p>While I understand the desire for bike lanes, we need to be realistic on their actual use. The new lanes on 26th, 28th, Blaisdale and other streets in South Minneapolis have resulted in miles of backups for vehicles. I once sat in traffic on 26th for 45 minutes to go a single mile(no accident in sight) and during that time(prime commute hours)I saw a total of 4 bicycles actually using the bike lane. On aveager it's about 6 bikers on my commute home when i come up 26th. In addition, the work in changing Lyndale to 2 lanes, changing 46th at Lyndale and at 35W, and the change downtown that eliminated the one ways on 1st have made our city a ridiculous mess at best.</p> <p>I do not have a job that allows me to bike to work and my health would not allow it anyway, but now I have 1.5 hours of commute time if I go in to my office downtown, and I live in South Minneapolis!</p> <p>I'm spending my discretionary money South of the city going forward. At least I can get home and back in a reasonable amount of time.</p> <p>Good luck to the businesses who have to support that minimum wage on less income. Restaurant and retail will be the ones taking the hit.</p>	7/6/2018
2267	17	/policies/complete-streets/	<p>Most people in Minneapolis use their personal car to get to and from work. Especially on the very cold days. I don't think you will find too many people biking or walking to and from work when it's minus 15 degrees Fahrenheit. This is just the reality we live in. People are simply not going to give up their cars. However if you do not have the infrastructure for more automobiles things will just get much worse in terms of traffic and road congestion. All of what I just should really be taken into consideration.</p>	7/6/2018
2268	66	/policies/air-quality/	<p>Easy ways to improve city air quality:</p> <ul style="list-style-type: none"> - Stop recreational burning within city limits - Outlaw smoking (cigarettes/ecigarettes/etc) in the city - Require vehicle emissions tests - Ensure wide sidewalks and boulevards that have space for snow to be cleared and piled and still allow space for pedestrian and bicycles to safely pass - Ensure buses and other vehicles do not idle with engines running, especially not in bike lanes (as I just saw the other day-- city bus idling in bike lane) 	7/6/2018
2269	61	/policies/environmental-justice/	<p>airplane traffic. not just noise pollution but also health issues related to the release of particulate matter.</p>	7/6/2018
2270	9	/policies/open-spaces-in-new-development/	<p>Discourage removal of current trees and other plants that already contribute</p>	7/6/2018
2271	13	/policies/landscaping/	<p>Parking should be required for housing and for commercial spaces. This should include green spaces as well as built solar.</p>	7/6/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2272	53	/policies/quality-of-life/	<p>I am a 3rd generation Northsider. Both sets of my grandparents lived here for most of their lives. 2 aunts on one side and aunt and uncle on another bought their homes here and lived many decades. And now me. This is my home, and I don't want to live anywhere else. I love my neighborhood, but I find that non-Northsiders own the land and have the best opportunity to develop on it and those that are are not terribly responsible with it. (Northern Metals comes to mind). On a cursory analysis of Penn Ave from the property tax database, most DO NOT also live in North Minneapolis. In my view, this is an imbalance of power.</p> <p>I am also disabled. I am a Medicaid beneficiary and require PCA assistance to stay in the community. I have had a VERY hard time not only finding staff who want to work in North Minneapolis, my PCA agency is letting me go because they can't find staff willing to work here - even after offering them 1/3 more money for an hourly rate! I reached out to some old friends for help, and one wrote to me: "So, I've been thinking about you a lot. Thinking about my own fears. Thinking about the paranoia...resulting in being afraid to go to the part of town where you live. If it hadn't been for that, and I feel stupid about it, I would be coming your way weekly to help you get out of your house and help me get out of my house."</p> <p>I am grateful for the chemical free pool in Webber Park. This is now 1 of 2 pools I can access healthfully anywhere, and I am looking forward to trying it out once I can get fully staffed with PCA care.</p> <p>I have to leave my community to buy clothing, shoes, to seek medical and dental care, to find gardening, arts and office supply. I have to leave my community to meet with others outside my home, because the spaces for communing are not accessible.</p> <p>It is difficult to find commercial vendors to offer lawn care and snow removal services.</p> <p>This summer, Victory Memorial Parkway was sprayed with a chemical that caused negative health and safety consequences for me. I have proposed a non-toxic solution to the Park Board but have not yet been given a response.</p> <p>I wish there were more opportunities for me as a disabled person in North Minneapolis.</p> <p>I wish there were opportunities for North Minneapolis residents to start their own enterprises. I wish there were more section 8/affordable housing options. I have a friend who would like to move with her 3 children, but she doesn't have much choice at all - and she too would like to stay on the Northside.</p>	7/6/2018
2273	14	/policies/tree-canopy-and-urban-forest/	<p>Require that wires and cables be buried. With municipal power, solar and wind can be utilized and the city can be removed from a larger grid.</p> <p>Competent foresters should be retained who will plant trees appropriate to the surroundings. If there are overhead wires, shorter trees should be planted. Trees that harbor ants that harvest aphids for the sap they create should not be planted.</p>	7/6/2018
2274	19	/policies/bicycling/	<p>mpls bike system is built for recreational riders. if you are trying to actually bike to work, to a drs appt, to get groceries, you find yourself on mpls streets where - with only a very exceptions - are built for cars to get to their destinations FAST. every time i return to mpls from abroad i am struck by the ugliness & lack of consideration given to pedestrians & bikeriders & find myself sadly wondering, "does EVERY street in DT mpls need to be a 3 or 4 lane one-way freeway?"</p>	7/6/2018
2275	66	/policies/air-quality/	<p>Examine the pollution produced by the garbage burner. Eliminate that.</p> <p>Be sure that poor neighborhoods are not faced with most of the pollution.</p>	7/6/2018
2276	67	/policies/climate-resilient-communities/	<p>Increase rewards for individuals who help. I.e.creating permeable surfaces on property.</p> <p>Increase tree canopy by planting more trees in parks, surface parking lots, etc.</p>	7/6/2018
2277	66	/policies/air-quality/	<p>Require very effective measures in new construction to reduce pollution.</p> <p>Encourage electric vehicles both in mass transit and personal use. Support Solar collectors for the electric vehicles.</p>	7/6/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2278	3	/policies/production-and-processing/	3.c. This needs to be defined. What is low impact, who decides and how do we know the people who decide have accurate information. 3.k. Also need actual definition. 3.m. What is proactive mean here? I didn't realize minneapolis government was the primary regulatory agency, does MPCA not handle this? Do we need to duplicate resources or can we defer? 3.n. Don't know what this means either, geographically, hiring process? Does improved transit help to resolve this on it's own. Clarify	7/7/2018
2279	4	/policies/access-to-commercial-goods-and-service	Like it	7/7/2018
2280	6	/policies/pedestrian-oriented-building-and-site-de	6.o. / 6.p. Both of these action steps may result in disparate impact on urban residents by driving up costs and limiting options.	7/7/2018
2281	15	/policies/transportation-and-equity/	First step is to develop a definition of what success would be here. Equitable is undefined, without concrete goal it will be difficult to determine progress or achieve success.	7/7/2018
2282	33	/policies/affordable-housing-production/	This should take example from 34. Foster environment that allows private affordable housing to exist.	7/7/2018
2283	35	/policies/innovative-housing-types/	Yes, the University of Minnesota has many resources here that could be leveraged for the benefit of the city/community.	7/7/2018
2284	1	/policies/access-to-housing/	I am writing because I am concerned about the plan to allow three-story residential buildings in blocks adjacent to transit corridors ("Interior 3"). I am a resident of such a block, and I am concerned that such a major redevelopment of a neighborhood of single-family homes will significantly alter the neighborhood. First, it will change the look and feel, making the streets feel more crowded, fewer trees, less light. And of course it really will increase the density, causing more cars on residential streets (and less parking). I understand the need for affordable housing, and until a year ago I had lived in apartment buildings myself. I bought a house here because I wanted a less dense neighborhood of single-family homes. Ultimately, I think allowing 3-story buildings on any block adjacent to a transit corridor is simply too broad a policy, and should be replaced with a more limited plan. Sincerely, Lisa McKay	7/7/2018
2285	33	/policies/affordable-housing-production/	This is a disastrous plan for high end neighborhoods and those residents will move out when adversely affected	7/7/2018
2286	0.1	/topics/land-use-built-form/	This plan goes way to far! I am opposed to these changes for Minneapolis. It will destroy the character of a strong, family friendly urban neighborhood. What a terrible waste of money and resources. Why can't we be focused on improving schools and transportation to benefit everyone?	7/7/2018
2287	17	/policies/complete-streets/	Be more specific about what streets could be transformed into green, beautiful boulevards. Examine past plans and incorporate aspects of them into the design of streets throughout the city. For instance, 34th Street was suppose to be a green boulevard that connected multiple parks.	7/7/2018
2288	19	/policies/bicycling/	Be more specific about implementing greenways throughout the city. Make the northside Greenway, southside Greenway, Min hi Line, river lake Greenway. 34th Street Greenway, great northern Greenway.	7/7/2018
2289	55	/policies/business-innovation-and-expansion/	Minneapolis has to step up to the plate, pay attention to international trends, and move our economy away from production and manufacturing; that is not where the future economy is located. The technology sector continues to take over the engine of wealth in the world and Minneapolis can either be on the leading edge (through investments in education, infrastructure, middle to upper income housing, transportation, culture and the arts) where prosperity will reside, or it can continue on the path of finding new minimum wages. As Michelle Obama would say: When they go low (the production and manufacturing sectors), we go high (with technology and financial services sectors). Believing that we should focus on building the lowest paid sectors, rather than focusing on growing the higher paying sectors, is condemning Minneapolis' residents to continuing disparities in prosperity and quality of life. Everyone must rise.	7/7/2018
2290	54	/policies/supporting-economic-growth/	What sectors create wealth? https://www.huffingtonpost.com/entry/facebooks-mark-zuckerberg-third-richest-on-earth_us_5b404c93e4b09e4a8b2d0e6f	7/7/2018
2291	38	/policies/affordable-housing-near-transit-and-job	When considering housing units near transit stations for families with small children, please include environments where kids can safely play without intense amounts of noise and chaos.	7/7/2018
2292	40	/policies/homelessness/	We strongly support the city's collaboration with Youthlink and would like to see more safe emergency shelters available for our youth.	7/7/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2293	0.1	/topics/land-use-built-form/	<p>Hi,</p> <p>I live in the Northrup neighborhood and see that there are two corridors planned for heavy transit with the potential to redevelop into more dense residential. We love our neighborhood and have two main concerns based on this plan:</p> <ol style="list-style-type: none"> 1. It does not seem necessary to carry two transit corridors within 4 blocks of each other (Bloomington and Cedar). I am not suggesting there shouldn't be bus transit on each, but designating heavy transit corridors on each seems like a stretch. The spacing is far tighter than all other similar areas in south Minneapolis with no obvious reasoning based on land use or population. Given the fact that the Bloomington corridor appears to have potential for a longer designation, perhaps that makes sense to do alone versus having Cedar in the mix as well. 2. Even if a significant amount of property is redeveloped along these transit corridors, which I find highly unlikely in the next 20 years, I don't see the purpose in rezoning the interior portion of these corridors to Interior 3. Alleys separate all blocks in this part of the city, and are able to create a buffer between built forms without the need for a transition area of property. Allowing multifamily residential on that side of a transit corridor has the potential to disrupt the look and feel of that entire street - in my view ultimately negatively impacting property values for single family homes across from it. Containing the multifamily residential immediately adjacent to each transit corridor would help minimize this effect. 	7/7/2018
2294	20	/policies/transit/	<p>Minneapolis citizens would probably buy into the idea of more density and mixed land uses if they had more confidence that the transit system was going to get better. Metro Transit's regional scope and unpredictable state funding source gives me little confidence that transit in Minneapolis will be meaningfully better by 2040 even with a larger population. The action steps above are too vague and lack detail about where transit investments should take place by 2040. Minneapolis 2040 is supposed to be a land use plan for the coming two decades, so there should be more specificity about transit corridors and destinations in Minneapolis that need better service. Parts of Minneapolis currently has densities to support better transit like Uptown, Chicago Avenue, Nicollet, Central, the Midtown Greenway/ Lake St., etc. Is there enough density in those locations now, or if x# of people were added to an area, to justify streetcar or subway routes? Currently riding the bus and LRT through downtown is painfully slow because they are stuck in traffic/ at traffic lights. Taking a bus down Lake St. is painfully slow because of the the same problem. Finally, there apparently isn't enough funding to make transit work well in the City, so pretending that it isn't a problem in 2018 isn't going to help fix the situation by 2040. Please call out that Metro Transit is underfunded and that the regional transit improvement plan focuses huge resources out to low-density suburbs with car-oriented corporate campuses.</p>	7/7/2018
2295	1	/policies/access-to-housing/	<p>said the actual policies coming from the city seem designed more to grow the population, increase property values and increase incomes. Those aren't bad goals, he said, but they won't do much to ease the affordable-housing crunch for north side residents. N</p> <p>Ward 13 resident Adding 2,3,4 plexus on current single family lots will NOT ease the affordable housing crunch for north side residents nor will it increase property values and incomes.</p>	7/7/2018
2296	0.1	/topics/land-use-built-form/	<p>This plan is ABSURD and does not reflect the wishes of Fulton residents. Let's think of a better way to equalize housing opportunities.</p>	7/7/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2297	0.1	/topics/land-use-built-form/	<p>The built form concept is all good and well, but it does not sufficiently address adjacent properties' building mass, which includes solar shading. I just installed \$23,000 worth of solar panels, I am not enthusiastic about a decrease in my solar energy production due to a "corridor 6" being built next door. Should I have skipped the solar panels and just stuck with coal-fired electricity generation?</p> <p>With other regards to building mass such as sight lines, setbacks, footprints, and total heights, the city has not even done an adequate job of establishing good policy for teardowns and mega mansion rebuilds in interior neighborhoods, how can I expect the city to sufficiently address the issue after zoning enables increased built density?</p> <p>Suggestion: establish limits for individual properties' building mass on the basis of the built form, but for all individual properties include a "not to exceed" on the basis of building mass on adjacent properties. E.G., cannot be more than XX% larger than adjacent property buildings. Limits could be established for footprint, setback, and height. This would improve the transitions of building mass from one property to the next, and could help ease communities from one type of built form to the next.</p>	7/8/2018
2298	5	/policies/visual-quality-of-new-development/	<p>As an action step, make Snout Houses (garage forward houses) a conditional use within traditional single family neighborhoods. I suggest this step to discourage the cancer of suburban style homes infiltrating and destroying the character of traditional single family neighborhoods where the garages are set back of the front of the house and often in the back off an alley. The conditions could include several architectural treatments to minimize the visual impact of a garage in the front yard. Preferably snout houses would prohibited altogether as in Portland.</p>	7/8/2018
2299	1	/policies/access-to-housing/	<p>City of Minneapolis - I do not support policy #1 and specifically part E.</p> <p>Concerns come with changes to neighborhoods that affect the value of a key investment tool as well as additional parking challenges due to the new 4-unit options. Now we will have potentially 4X the vehicles parked in the street that will cause traffic and safety concerns.</p> <p>Efforts of the city should be focused on driving increased wages and new and growing businesses that support those higher wages. If we can attract more and the right businesses, the entire city and its workers should benefit.</p>	7/8/2018
2300	1	/policies/access-to-housing/	<p>I think allowing four plexes in the middle of single-family housing is a mistake. Agree that more are needed, but would like to see that development carefully zoned. Add four plexes to the edges of single-family housing for example.</p>	7/8/2018
2301	1	/policies/access-to-housing/	<p>Your plan will bring equal wages to the city , all low wages as the people with means run to the burb's</p>	7/8/2018
2302	33	/policies/affordable-housing-production/	<p>Great plan should lower all property values in the City , turn it all into slums</p>	7/8/2018
2303	52	/policies/human-capital-and-a-trained-workforce/	<p>Lot's of opportunity out there now, people just need to show up for work. After their training is done</p>	7/8/2018
2304	81	/policies/social-connectedness/	<p>Your kidding right? City can't even plow snow or fix pot holes, How can it build all these social programs?</p>	7/8/2018
2305	61	/policies/environmental-justice/	<p>Here's a hint the poor don't live in the nicests areas.Clean up the aeras for everyone's good. Then maybe it will grow.Then land value will go up and drive them out anyway.</p>	7/8/2018
2306	63	/policies/food-access/	<p>Grocery store's sell what sell's not what you think is a good idea.</p>	7/8/2018
2307	65	/policies/urban-agriculture-and-food-production/	<p>I say no to selling city property for gardens , knock down private homes by the chain of lakes so they have a source of water to irrigate.</p>	7/8/2018
2308	9	/policies/open-spaces-in-new-development/	<p>How do you create green space with larger 4 plexes and mansion's in every neighborhood?</p>	7/8/2018
2309	19	/policies/bicycling/	<p>Were back to maintaining the roads we have now and snow plowing that the city can barley do now , where does the money come from to add new bike trails?</p>	7/8/2018
2310	66	/policies/air-quality/	<p>More people = more pollution, try to figure that out then get back to me.</p>	7/8/2018
2311	1	/policies/access-to-housing/	<p>If there is going to be high density housing along transit lines, what will happen to the bike routes that are also on those streets? More buildings will mean more traffic and more danger to pedestrians and bikers. I know the thinking is that people will use the mass transit these areas provide but people will not give up their cars easily. Minneapolis has put in a lot of work making this a bikable city. Seems like bikers will be pushed off the roads again by the addition of high density housing on bike routes.</p>	7/8/2018
2312	7	/policies/public-realm/	<p>Waste of money ,no one looks out side for 7 months a year. We call it winter.</p>	7/8/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2316	47	/policies/housing-maintenance/	Your plan calls for higher density housing which cause's a higher turn over in ownership, and renters. Did not think this out to well did you.	7/8/2018
2317	91	/policies/heritage-preservation-outreach/	I call this B.S you all ready changed the name of Lake Calhoun to fit your social engineering plan.	7/8/2018
2318	96	/policies/heritage-preservation-recognition/	Why are changing the name's of lakes now then. now then	7/8/2018
2319	53	/policies/quality-of-life/	Get the light rail off grade so it quit's screwing up traffic and killing people!	7/8/2018
2320	58	/policies/business-districts-and-corridors/	More business welfare?	7/8/2018
2321	76	/policies/new-parks/	How do you fit a park and 4 plex in the same spot?	7/8/2018
2322	7	/policies/public-realm/	Make sure the snow gets shoveled first, then worry about the nice 4 months of the year.	7/8/2018
2323	4	/policies/access-to-commercial-goods-and-service	Did anyone really read this ,you can't have it both ways. Business need room for trucks and parking year round , how does this work with less room ,	7/8/2018
2324	17	/policies/complete-streets/	So your going to widen all the streets to handle traffic ,walkers and bikers , when we can't fix the pot holes now?	7/8/2018
2325	3	/policies/production-and-processing/	Why does the city try to drive away business with a phony minimum wage then?	7/8/2018
2326	56	/policies/supporting-small-businesses/	How by raising their labor cost.	7/8/2018
2327	59	/policies/downtown/	Not working to well so far is it.	7/8/2018
2328	28	/policies/msp-airport/	City can't do a thing about the air travel industry, already showed it with the air traffic noise problem.	7/8/2018
2329	31	/policies/creative-workers/	Sounds racist to me. You can't learn from anyone that doesn't look like you ?	7/8/2018
2330	48	/policies/data-driven-decisions/	Sounds like a new way to raise property taxes, after the rich leave town.	7/8/2018
2331	81	/policies/social-connectedness/	Thought we had this already at the parks and social centers	7/8/2018
2332	52	/policies/human-capital-and-a-trained-workforce/	Get training and get a job , not the city's job to tell employers who to hire	7/8/2018
2333	33	/policies/affordable-housing-production/	THE CITY IS NOT IN THE LANDLORD BUSINESS!Builders will build what sells not what the city gov. wants.	7/8/2018
2334	35	/policies/innovative-housing-types/	Decoded how to under cut building codes that work to maintain a homes value	7/8/2018
2335	37	/policies/mixed-income-housing/	Way to make more low income housing in the city , to lower its tax revenue. You need high income people to buy homes and pay high taxes not low income people to create more low priced housing.	7/8/2018
2336	25	/policies/innovations-in-transportation-and-infras	Minneapolis should, and can be a leader on implementing Electric Vehicles in the Midwest Region. The City should have more aggressive goals to fully transition it's fleet to EVs, and work closely with Metro Transit to transition it's dirty polluting diesel bus fleet to full zero emission electric busses.	7/8/2018
2337	33	/policies/affordable-housing-production/	It's all affordable if you can pay for it. If not no matter how cheap it is you can't afford it.Unless this is going to be one large welfare city	7/8/2018
2338	0.2	/small-area-plans/	Please add the Bryn Mawr small area plan approved by the City Council 2005. Thank you!	7/8/2018
2339	57	/policies/cluster-strategy/	I would suggest not thinking in terms of "discrete sectors". Rather, these sectors should be viewed as integrated and interfacing, so that you understand the economy as supply chains. Much easier to create efficiencies and to find roles for small businesses, which generally are overlooked in regional business clusters.	7/9/2018
2340	0.2	/small-area-plans/	In the past, I have served on the Longfellow Community Council (including as president) and was on the citizen advisory committee for the 46th Street Station Area planning process. I also attended all of the very detailed public plans that created both the 46th Street Area Plan and the 38th Street Area Plan. My concern is that citizens and neighborhoods spent a long time preparing the small area plans. Now, those will be subservient to the minneapolis plan. In addition, those plans are being changed in this plan. The minneapolis plan makes changes that are outside of the neighborhood planning process. Commenting on this plan (which is massive and difficult to negotiate) is not an adequate substitute for the small area planning process. I recommend that the small area plans/neighborhood plans continue to exist and not be subservient to the minneapolis plan (and now and into the future). In addition, any changes to those originally adopted plans should go through the same citizen engagement process as for the original plans.	7/9/2018
2341	58	/policies/business-districts-and-corridors/	Beverly Conerton, 3644 46th Avenue South, Minneapolis, MN 55406. Business districts and corridors are also effective economic development tools for depressed areas, creating employment, infusing capital, and breathing life into community cohesion.	7/9/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2342	0.1	/topics/land-use-built-form/	I am Bryant Avenue which is rated Corridor 4. I do not see how changing the zoning for this corridor will maintain housing stock or contribute to the health of Lake Harriet. The individual lots have less run off than placing up to 4 story buildings in their place. This certainly does not preserve housing stock which is stated in Policy 47. Our home is over 100 years old and has many years of useful life left. We have been living here for more than 44 years, continually improving it. A zoning change will destroy the neighborhood and home values. I do not know how parking will be available for multi-family and trying to keep businesses in the neighborhood. I believe the land use plan needs further work.	7/9/2018
2343	1	/policies/access-to-housing/	My comment relates to the policy (and subsequent zoning change) that would allow 4-plexes anywhere in residential neighborhoods. This policy does not take into consideration the size of the lot, especially in neighborhoods that have small 1.5 story houses as the predominate housing types (including many areas of the Longfellow neighborhood where I live). A 2.5 story building (the average height of a 4-plex) sitting next to a 1.5 story house will dwarf the house, and affect light. Such a building my work on a corner or where lot size is larger and able to accommodate a larger structure. Although 4-plexes are a valuable addition to neighborhoods, they should be considered on an individual basis, rather than a permissible use that requires no approval by the city (and no public notice and comment), including consideration of location and size and suitability for the location. This same comment applies to auxiliary structures. The plan has no guidelines on such structures, and location and size are key considerations. Thus, I recommend that the city not adopt the policy of allowing 4-plexes and auxiliary structures as an allowed use without prior city approval and public notice and comment.	7/9/2018
2344	42	/policies/expand-homeownership/	How about we stop drastically raising property taxes every single year, and encourage long term home ownership?	7/9/2018
2345	17	/policies/complete-streets/	What self righteous ass really thinks it's a good idea to make the city undriveable? To tell people to walk or take the bus or ride a bike is incredibly naive and downright insulting. The majority of Minneapolis residents have neither the time to spend hours commuting, nor the physical ability for this horrible plan, especially in winter. I work for a living, and the last thing I want to do after working all day is to work even more on my way home, on the heat or freezing cold. Please stop making this city unnavigable!	7/9/2018
2346	15	/policies/transportation-and-equity/	Enough with the "bike lanes" they are making the city impossible to get around!	7/9/2018
2347	16	/policies/environmental-impacts-of-transportation/	So the plan is for my 73 year old father to ride a bike or spend hours on end to try and get around this city? How rude!	7/9/2018
2348	1	/policies/access-to-housing/	Great to see a plan that sets Minneapolis up to grow in an equitable way. To thrive, we must accommodate more, as well as diverse, housing types that support people and families throughout their lives.	7/9/2018
2349	19	/policies/bicycling/	So a tiny fraction of city residents who are able and willing to ride a damn bike all year take priority over the majority of Minneapolis citizens who don't? Not all of us have a high horse to ride around on, quit ruining our streets!	7/9/2018
2350	18	/policies/walking/	Works great as long as we get rid of old people, and don't get old ourselves. Or sick, or injured, our excessively hot, our excessively cold. Because that never happens in Minneapolis.	7/9/2018
2351	59	/policies/downtown/	The notion of competing with other areas in the region is rather sad. As the urban core, downtown should seek to partner and build regional capacity. Moreover, this strategy would suggest that downtown is not willing to shoulder the burden of supporting those who have historically borne the burden, but not shared in the benefits, of urbanity. The cheap labor provided by those not having the resources (or luxury) to live in the urban core will heighten Minneapolis' greatest challenge: inequity.	7/9/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2352	0.1 /topics/land-use-built-form/	<p>I do NOT support the Minneapolis 2040 Plan. This is the City Council and Mayor's ham-handed and blunt-fisted attempt to artificially engineer social change and force what should be organic city growth with absolutely no research behind their ideas, and all of this is at the expense of EVERY Minneapolis resident. The ONLY people who stand to benefit from the 2040 Plan are the developers. I have lived in the Fulton neighborhood since 1996 and invested hundreds of thousands of dollars in my home. I stand to lose a chunk of all I have worked for because the people who have been elected to work FOR us think it would be an interesting experiment to allow people whose sole purpose is to make money build giant buildings in the midst of our homes and neighborhoods.</p> <p>I find it particularly offensive that many of these council members are the same people who, in 2014, couldn't figure out how to enforce laws already in place concerning developers overbuilding in our neighborhoods. Their ingenious solution? While preaching "we need to preserve the character of our neighborhoods and what makes Minneapolis so special" they rammed a construction moratorium through and stopped all building in Southwest Minneapolis while they took a few months to figure out what to do. Every homeowner who was working on a project had their work stalled and their lives put on hold. Now four years later, the Minneapolis City Council has done a complete 180 on this policy (why this is should be the subject of some serious investigative reporting, as there has to be more to the story here), but they are still sticking to the same "shoot first" modus operandi. The 2040 Plan is lawsuit- and recall-worthy on so many levels if the Council and Mayor don't come to their senses and scrap this Colossus of government overreach and malfeasance.</p>	7/9/2018
2353	0.1 /topics/land-use-built-form/	<p>This plan is terrible. Current residents have NOT been notified. I strongly oppose ALL of the upzoning contained in this plan. It will completely destroy my neighborhood that has homes, grass, trees, families. Southwest Minneapolis is popular for a reason, it is nice the way it is. This plan completely changes it and destroys it.</p>	7/9/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2354	1	/policies/access-to-housing/	<p>merciful. There's window dressing about affordable housing, but this plan is absolutely useless. All you are doing is turning housing over entirely to the free market. Trump would love this plan. He'd be more excited about this than a date with Stormy Daniels. And here I thought the DFL was dead set against completely unregulated naked capitalism. Developers aren't dumb. They're in the game for one reason. To maximize their profits. That's not an indictment. It's just their job. You've literally written a policy designed to destroy available single family home housing stock over time. So good bye young families. Hello old people and transient renters who will eventually just move to the burbs. And you literally believe millenials will want to forever remain renters. They're young and dumb right now. But they'll eventually understand the concept of equity. And even if a larger percentage of them remain dumb to that idea than prior gens, they're such a huge generation that enough of them will eventually cut their man buns and stop wearing ridiculous beards and grow up to realize home ownership is smart in numbers that still dwarf the gens that came before them.</p> <p>Get a clue. Here's the inevitable result. Developers will target housing stocks in areas close to some decent ammenities that are more on the cheaper end. Gentrification via apartments will happen. Housing stock that is reasonably affordable for the middle class and those looking to enter the city market will be reduced. Prices will rise. Rents will rise. Rinse, wash repeat up the market. What a joke. You literally could not create a plan longer on completely hollow rhetoric and shorter on ideas that will help those needing affordable housing than this plan. And most amazing are the number of young and well meaning people in this world who suddenly are embracing supply side economics because their feckless DFL leaders have said if we build it they will come. Only they didn't tell you who would come. Either those leaders are in bed with the developers or they're just delusional.</p> <p>So, to summarize:</p> <ul style="list-style-type: none"> 1 - Fewer single family homes -> 2 - Higher home prices -> 3 - Higher taxes on homes that remain -> 4 - More and more higher end rental units -> 5 - More transient residents who will eventually invest in the suburbs -> 	7/9/2018
2355	1	/policies/access-to-housing/	<p>This seems like pretty straightforward and reasonable policy. It's a shame there's so much hysteria about it. As a resident of SW Minneapolis, I welcome more multifamily buildings in my neighborhood. There are already plenty of large two story single family homes that take up the same space as a fourplex would. I don't think building more fourplexes would adversely affect neighborhood character (it would actually improve neighborhood character).</p>	7/9/2018
2356	0.1	/topics/land-use-built-form/	<p>I support increasing diversity and density in the city and neighborhoods. However, I don't support a land use plan that will alter established neighborhoods and drive out existing families. We have made significant investments in our immediate neighborhoods and this plan will change the ultimate character of that neighborhood. The magnitude of this plan is enormous and far reaching. I cannot support it in its current state as it is unproven in its ultimate impact and not fully embraced by the families whose neighborhoods will change.</p>	7/9/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2357	1	/policies/access-to-housing/	<p>One of the wonderful things about South Minneapolis has been the ability to live within the city limits, but feel like you are in a neighborhood that you feel comfortable raising your kids. The school systems are strong (in some areas good and others great), many of the homes are owned by residents (not rented) which fosters an environment of pride and care for homes/lawns/etc. Crime is low since most people own their homes and are invested in improving the quality of life within those neighborhoods. The zoning plan to incorporate "multi-family dwellings" will be altering the whole neighborhood feel of the area (especially in internal streets vs. public routes), which will ultimately drive down overall house values and the demand for housing in the area. Understanding that zoning laws may have been initially developed during times of racial injustice, the fact of the matter is that housing prices are driven by supply, demand, and ultimately school ratings. By littering in large, multi-family structures within small, residential, family neighborhoods, current houses will reduce in value and many families will move out of minneapolis to more residential neighborhoods. Currently the trend has been the move out of the suburbs into cities, but this will likely shift the trend out of the city. I know that I for one searched for neighborhoods that had smaller, family homes where I would know my neighbors, feel comfortable with my kids playing outside, and know that they would be attending strong school systems.</p> <p>While the idea that the older generations would move out of their houses and still be able to live locally sounds wonderful in theory, I think we all know that will not be the reality of the housing shift. It will likely lead to</p> <ol style="list-style-type: none"> 1) Increase in crime 2) decrease in house values, resulting in a reduction in taxes 3) exodus of families to suburbs 4) reduction in neighborhood feel of south minneapolis 	7/9/2018
2358	0.1	/topics/land-use-built-form/	<p>I support increasing diversity and density in the city and neighborhoods. However, I don't support a land use plan that will alter established neighborhoods and drive out existing families. We have made significant investments in our immediate neighborhoods and this plan will change the ultimate character of that neighborhood. The magnitude of this plan is enormous and far reaching. I cannot support it in its current state as it is unproven in its ultimate impact and not fully embraced by the families whose neighborhoods will change.</p>	7/9/2018
2359	1	/policies/access-to-housing/	<p>I support increasing diversity and density in the city and neighborhoods. However, I don't support a land use plan that will alter established neighborhoods and drive out existing families. We have made significant investments in our immediate neighborhoods and this plan will change the ultimate character of that neighborhood. The magnitude of this plan is enormous and far reaching. 2360	0.2	/small-area-plans/	<p>The website is horrible and unworkable, confusing, and non Minneapolis Constituents can make recommendations who don't even live here, how does 2040 differentiate between constituent feedback and non constituent feedback? What checks and balances are in place to assure that people who say they are Minneapolis residents are?</p>	7/9/2018
2361	46	/policies/healthy-housing/	<p>People with chemical sensitivities are currently excluded from existing housing designs. What is needed are structures with no common ventilation systems, no common spaces -- or otherwise completely independent structures (houses) that are built with the chemically sensitive person in mind:</p> <p>http://www.eiwellspring.org/multiunit/BuildingMCSMultiUnitHousing.htm</p> <p>Rebecca St. Martin</p>	7/9/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2362	43	/policies/housing-displacement/	<p>People with chemical sensitives are currently displaces AND excluded from housing programs and housing itself. (I've issued/submitted statement about this in other categories, but will repeat -- and add new information).</p> <p>A community member also made this statement and she said I could quote her:</p> <p>Sammy Plenskie "If you have anything on your criminal record, NHHI will apparently deny you. A family friend who is an amputee and needs wheelchair accessibility in his home applied to a property in Stillwater and despite not even asking if he had a criminal record on his application, they pulled his and denied him.</p> <p>Seems fairly standard quo except for the fact they denied him on a 38 year old car theft conviction that happened when he was 18 despite having nothing else of note. Heâ€™s pushing 60 now!</p> <p>Commonbond and Accessible Spaces are much more generous, thank god. Itâ€™s hard enough to get accessible housing as it is. Iâ€™d understand 10-15 years, but nearly 40?"</p>	7/9/2018
2363	37	/policies/mixed-income-housing/	I believe that the mixed income housing makes more sense than the rezoning and building. In Boston there is a housing lottery where all the buildings have a % of lower income spaces allocated. This allows all income levels access to affordable housing in all areas.	7/9/2018
2364	0.1	/topics/land-use-built-form/	I live in Fulton 55410 and I know you are probably hearing a lot of opposition from this neighborhood but I support this plan! My only concerns are lack of associated parking plans for the new developments, and concern about variances - want to make sure there are rules that restrict this practice. If you say 4 stories is the limit, that needs to be the limit! Thanks and keep up the good work for our city. Clair Daley	7/9/2018
2365	1	/policies/access-to-housing/	This policy has received a lot of criticism for advocating small scale structures on small city lots; this is exactly what is needed. The fear of four-plexes is way overblown, please do not allow the NIMBYs to dictate policy.	7/9/2018
2366	6	/policies/pedestrian-oriented-building-and-site-de	This policy is very important; please do not let cars overcome walking, bikes, and transit.	7/9/2018
2367	97	/policies/heritage-preservation-legislative-advoca	Wow, you really put a lot of time and effort into this one.... How do you intend to expand the capacity of Minneapolis to "effect positive change" through strategic partnerships? With whom? For what purpose?	7/9/2018
2368	74	/policies/integration-of-water-management-into-c	Minneapolis needs stricter stormwater management requirements for large houses built on teardown lots, as well as future 4-plexes. If possible, it should be even more stringent in flood-prone areas near the Minnehaha Creek watershed.	7/9/2018
2369	80	/policies/development-near-metro-stations/	Dense housing near transit is what will make Minneapolis a truly great city, do not let this policy be watered down by anti-development zealots.	7/9/2018
2370	14	/policies/tree-canopy-and-urban-forest/	I like living in a city that has a tree canopy/urban forest policy - thank you.	7/9/2018
2371	97	/policies/heritage-preservation-legislative-advoca	Does the city have a lobbyist in the capitol? Probably add this to their list of things to do?	7/9/2018
2372	0.1	/topics/land-use-built-form/	The transit corridors are one thing, and many are already very commercial. That said, Southwest Minneapolis in ward 13 is very residential in the internal corridors. These corridors should not be rezoned from single family residences. WE should maintain the community and family oriented nature of SW minneapolis. Otherwise, you will see an exodus of the families that build this community and make it the great place to live that it is today. It is the single family home owners that are typically the most involved in the community and work to better the area, schools, and programs that exist today. Renters are less invested in the safety, care, and maintenance of neighborhoods and should be limited to high traffic areas, not small residential streets.	7/9/2018
2373	83	/policies/people-with-disabilities/	Improved snow removal enforcement/services is critical for improving quality of life for people with mobility issues.	7/9/2018
2374	97	/policies/heritage-preservation-legislative-advoca	Maybe get a board member appointed to this group in DC? http://preservationaction.org/preservationaction/boardandstaff/	7/9/2018
2375	96	/policies/heritage-preservation-recognition/	Do it! Although maybe get the people actually contributing through ownership of these projects to pony up the cash.	7/9/2018
2376	35	/policies/innovative-housing-types/	The city should consider allowing for tiny house developments.	7/9/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2377	16	/policies/environmental-impacts-of-transportation/	<p>More and better bike infrastructure is needed. Bike lanes are great but drivers regularly use them for loading and unloading zones and temporary parking, and routinely ignore the fact that there is a cyclist in the lane. Drivers need to be better educated regarding sharing the road.</p> <p>Also, as someone who uses public transportation, if you want more people to use it, you need more routes, and buses need to be more reliable/on time. I have spent half an hour waiting for a bus in excessive heat and cold and torrential downpours. Also, there need to be a few shorter, more direct routes. For instance, Southdale Mall where my spouse works is a 10-15 minute drive but it is an hour or more bus ride with multiple transfers. There is no incentive for him to take public transit and he would really like to.</p>	7/9/2018
2378	6	/policies/pedestrian-oriented-building-and-site-design/	<p>What are the negative impacts of eliminating off street parking requirements? Can existing businesses take out parking lots? Any studies done to understand the impact? If there is not enough parking, people will not go due to the parking hassle or the extra time public transit takes. Great for young urbanites that live a few blocks away. Bad for the elderly or families with young kids. Will also reduce businesses customers in winter.</p>	7/9/2018
2379	33	/policies/affordable-housing-production/	<p>I recently moved to Minneapolis (I grew up here and graduated from Washburn High School) after living 20 years in Edina. If you would like to have a personal guided tour of what happens to neighborhoods after the developers are set loose to tinker with a city's housing stock, I would be happy to oblige. There is NO WAY the city of Minneapolis can retrofit new, affordable housing into existing neighborhoods without destroying the character of a neighborhood FOREVER. This is what happened in Edina, where housing affordability was not an issue. Big, ugly cheap looking housing in an upscale suburb that spread like a cancer through is being built in every part of Edina - it is awful. With respect to housing that will be affordable to people making 30% of median income, are you talking about places like Cabrini Green or Pruitt-Igou? I remember those places from my sociology classes in the 1970's, they didn't work. The City of Minneapolis should work with employers to create better paying jobs and focus on education. And finally, I hate to say this but maybe not everybody that wants to live in a given place will be able to.</p>	7/9/2018
2380	1	/policies/access-to-housing/	<p>I strongly oppose the zoning changes in Southwest Minneapolis in regards to apartments being allowed in neighborhoods that are predominantly single-family homes. These zoning changes will NOT bring about more affordable housing. The changes, however, will destroy wonderful, vibrant neighborhoods in Southwest Minneapolis. Southwest Minneapolis is a gem and a treasure for the city. This plan will wipe out these neighborhoods and bring about a lot of expensive apartment buildings and greatly increased traffic. Please change the plan by taking out the zoning changes in Southwest Minneapolis. They are too drastic. They will destroy Southwest Minneapolis neighborhoods by allowing for too many apartment buildings and too much traffic.</p>	7/9/2018
2381	95	/policies/heritage-preservation-financial-incentives/	<p>Excellent and maybe promote hiring of residents local to the restoration sites.</p>	7/9/2018
2382	1	/policies/access-to-housing/	<p>In my neighborhood, Longfellow, most lots are 40 - 50' wide and 120-130' deep. Putting a 3 or 4 unit home on a lot that size would eliminate yard and probably garage. 3 or 4 unit homes might draw 6-8 additional cars with mostly street parking.</p> <p>Also, how can you control the rent? Because it's a desirable neighborhood (at the moment, anyway), the rents could be so high as to make it unaffordable to the population you want to help!</p> <p>One more thing..... have you seen the ugly and cheap multi-family homes that are going up already a block or two north of Lake Street? The developers are in it to make a buck, not to have the new housing have a similar look and quality to the norm in the neighborhood.</p> <p>Lastly, this speaks to transportation, if the train stations actually had PARKING a lot more people from my neighborhood would use the train!! As it is you have to walk to the bus stop and take the bus to the train station. Not fun with luggage or in the winter.</p>	7/9/2018
2383	16	/policies/environmental-impacts-of-transportation/	<p>Encouraging people to buy electric cars is a better solution than trying to eliminate trips in cars and parking.</p>	7/9/2018
2384	94	/policies/heritage-preservation-regulation/	<p>Maybe retain historic zoning for as much of the city as possible and only allow development in nodes where travel AND business intersect rather than creating wide and long corridors.</p>	7/9/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2385	33	/policies/affordable-housing-production/	<p>Would love to see some of your ideas about how to ensure that the housing that is built is and stays affordable. If private owners or corps. own the units, how do you keep the market from determining the price? I'm worried that one of two things will happen:</p> <p>1) rents or home prices will be so high that your targets won't be able to afford them.</p> <p>2) the quality of the materials and density you are proposing will reduce the appeal of the neighborhood, people with means will move out and prices will drop. Is that your goal?</p> <p>3) hope there is a third option...</p>	7/9/2018
2386	1	/policies/access-to-housing/	<p>Love the 4-plex (4-unit) proposal under policy 1. As a homeowner in Seward thinking about renting/owning a small unit in the future, I think this broadening of housing options will result in slow, publicly acceptable and beneficial change. Seward has 4-plexes and nobody ever complains about them. The city especially needs more rental supply to slow rent increases by better balancing the power of renters and landlords.</p>	7/9/2018
2387	22	/policies/downtown-transportation/	<p>Action step says "Encourage walking, bicycling, and transit use Downtown." This should be "prioritize" rather than "encourage." Even our existing Modal Priority Framework goes beyond this weak "encourage" wording.</p>	7/9/2018
2388	22	/policies/downtown-transportation/	<p>Policy should include: 1. Prohibiting expansion of the skyway network. 2. Removing approximately one skyway per year.</p>	7/9/2018
2389	22	/policies/downtown-transportation/	<p>The plan shall pursue connections between downtown and adjacent neighborhoods via 1. freeway caps (such as over 35W or 94) or 2. freeway removal (such as the Washington Ave trench in East Town or the I-94 viaduct in the North Loop)</p>	7/9/2018
2390	22	/policies/downtown-transportation/	<p>The plan shall prioritize smaller alleys that are for service access only. We've recently seen projects (Kraus Anderson block, Thrivent block, Nic on 5th and Xcel block) which feature extremely large alleys or midblock courtyard areas. These are bad for the public realm, create wind tunnels, and encourage access to these buildings via the interior of the blocks rather than access via the street wall.</p>	7/9/2018
2391	22	/policies/downtown-transportation/	<p>The city needs to divest and get out of the parking business, since it creates perverse incentives that run counter to the Complete Streets Plan or other best practices.</p>	7/9/2018
2392	22	/policies/downtown-transportation/	<p>Downtown MUST prioritize bus/transit-only lanes that are not encumbered by general auto traffic. The current plans for Hennepin, 4th, 8th St, etc do not go far enough to prioritize space-efficient uses of scarce public rights-of-way in our downtown, nor do they comply with the spirit of our Complete Streets framework.</p>	7/9/2018
2393	22	/policies/downtown-transportation/	<p>Pursue tighter turn radii at corners whenever drivers of large vehicles would be able to turn into a non-adjacent lane. There's no reason for a right turn from a two or three lane one way to another two or three lane one way (let alone a left turn across oncoming traffic) to have speed-inducing wide radii.</p>	7/9/2018
2394	22	/policies/downtown-transportation/	<p>Create a "cap and trade" tax for downtown parking.</p>	7/9/2018
2395	22	/policies/downtown-transportation/	<p>Consider incentives and/or requirements for property owners/managers to develop or build out smaller storefront spaces, and to actually pursue occupancy of these spaces.</p>	7/9/2018
2396	83	/policies/people-with-disabilities/	<p>Significantly accelerate work towards non-motorized transportation and implementation of our Complete Streets policy. Many people with disabilities are unable to drive cars, and therefore depend on walking, transit, paratransit, or assistive mobility devices (including bicycles or tricycles) for mobility in our city.</p>	7/9/2018
2397	22	/policies/downtown-transportation/	<p>Consider congestion pricing and/or banning cars downtown.</p>	7/9/2018
2398	22	/policies/downtown-transportation/	<p>Formally adopt a policy pursuing a return of downtown streets to calmer two-way traffic configuration.</p>	7/9/2018
2399	22	/policies/downtown-transportation/	<p>We must not assume families get downtown via car. Over half of Minneapolis households have zero or one car.</p>	7/9/2018
2400	0.1	/topics/land-use-built-form/	<p>The land use and built form must recognize the unique characteristics of each neighborhood. Simply upzoning, will not increase access to housing especially in areas where naturally occurring affordable housing will be leveled and replaced by new, high density, high price units</p>	7/9/2018
2401	1	/policies/access-to-housing/	<p>The past racism cited in this 2040 plan--exemplified in the federal government's earlier housing policies--is not in question. But this current 2040 plan will not address or even begin to correct that terrible legacy and, furthermore, says nothing about the obstacle today for people of color and most working people in general: large developers who treat housing like a commodity. What will the mayor and the council do to fight the businesses and developers who are the basis of the current crisis?</p>	7/9/2018
2402	11	/policies/skyways/	<p>I feel skyways are one of the things that make Minneapolis unique and interesting. We should be working to make them function better. Clearly marking skyway entrances, a better app for navigation, and uniform business hours would all help. Let's celebrate and promote the skyways... In the winter have festivals with late night dining options and family activities throughout the skyways. Encourage building managers to rent 2 story spaces so that a business could have a street and skyway presence.</p>	7/9/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2403	74	/policies/integration-of-water-management-into-	When visiting Portland, Oregon, I was impressed by the number of swales they have added to buffer storm water drains. I would like these to be added to streets as we rebuild them. The designs being used in Portland would be a good example to follow.	7/9/2018
2404	12	/policies/lighting/	I appreciate the streetlights that were added to Nicollet Mall. They add enough light without overwhelming or disrupting the area.	7/9/2018
2405	33	/policies/affordable-housing-production/	It's not enough to hope and wish that enough affordable housing is created. We need policies to ENSURE that new development creates and maintains adequate levels of affordable housing in all parts of our city.	7/9/2018
2406	1	/policies/access-to-housing/	How does this policy increase affordability? It looks to increase supply without guaranteeing these new fourplex developments will be affordable. Many naturally occurring affordable houses will be leveled in favor of fourplexes that maximize profit on a given lot	7/9/2018
2407	9	/policies/open-spaces-in-new-development/	Incentives should only be given to open spaces that will be used by the public. Open Spaces can be designed to deter public use, while still accepting whatever incentives the city is willing to offer. On maps, they should be marked as public space and easy to find. 1200 on the mall has put "keep off the grass" signs on their corner, their space seems to be a buffer against the public rather than something the public can enjoy.	7/9/2018
2408	0.1	/topics/land-use-built-form/	In Southwest Mpls - We don't need such ridiculous huge re zoning changes. You are re zoning hundred of parcels in a continuous row from single family to Large scale 3 to 4 story huge apartment complexes. This is not Planning this is being lazy. We need less sledge hammer and more scalpel.	7/9/2018
2409	0.1	/topics/land-use-built-form/	WE AREN'T GROWING THAT MUCH!!!! LESS THAN 1% A YEAR AND YOU WANT TO REZONE THE ENTIRE CITY. ARE YOU LOCO?	7/9/2018
2410	3	/policies/production-and-processing/	Continue to develop in the research sector. High paying jobs with relatively little waste. Partner with University of Minnesota to build research industry around the university. Ensure all new production jobs are safe for the environment and employees	7/9/2018
2411	12	/policies/lighting/	Directional LEDs are needed to reduce light pollution and increase safety for pedestrians	7/9/2018
2412	13	/policies/landscaping/	Build landscapes that support pollinators and other wildlife	7/9/2018
2413	15	/policies/transportation-and-equity/	Improve safety in transportation by building more well lit and camera monitored bus stops with emergency call buttons	7/9/2018
2414	0.1	/topics/land-use-built-form/	This plan makes no sense for those of us in SW mpls	7/9/2018
2415	18	/policies/walking/	Provide more connections across major freeways for both bikes and pedestrians. Ensure these are well lit and safe for children	7/9/2018
2416	19	/policies/bicycling/	Expand protected bikeways and marked bike paths on roadways	7/9/2018
2417	21	/policies/freight/	Convert at grade rail crossings to above grade so pedestrians and cars are protected	7/9/2018
2418	60	/policies/intrinsic-value-of-properties/	Develop methods ~ such as tax abatements, low interest loans, accelerated building permitting processes, structural and landscape architecture expertise, and public recognition programs ~ to incentivize preservation of historically significant places to encourage owners and potential owners to acquire, invest in, and maintain these assets.	7/9/2018
2419	30	/policies/arts-and-cultural-assets/	Focus on the arts and culture of each neighborhoods. Build on that diversity in these communities	7/9/2018
2420	33	/policies/affordable-housing-production/	Ensure there is a "next step" for renters who want to transition into home ownership. Home ownership can create generations of death. Encourage renters to own	7/9/2018
2421	34	/policies/affordable-housing-preservation/	Ensure all fourplexes are owner occupied. Do not allow developers to level naturally occurring affordable housing to maximize profits on highly sought after lots. Protect vulnerable neighborhoods from developers	7/9/2018
2422	36	/policies/innovative-housing-strategies/	Preserve these houses for people transitioning from renting to owning. Ensure developers do not level these naturally occurring affordable houses for fourplexes that maximize their profits	7/9/2018
2423	40	/policies/homelessness/	Build a program with stakeholders that transitions people from emergency shelters to permanent housing solutions. Pursue policies that encourage permanent housing opportunities	7/9/2018
2424	41	/policies/tenant-protections/	Enforce existing laws. Too many houses and apartments are failing to meet city code. This is disproportionately affecting poor minority populations. Improve outreach so renters are aware of common violations	7/9/2018
2425	42	/policies/expand-homeownership/	Preserve NOAH so renters have an affordable stepping stone to ownership.	7/9/2018
2426	47	/policies/housing-maintenance/	Improve outreach to renters about code compliance. Let renters know what is required of their landlords	7/9/2018
2427	52	/policies/human-capital-and-a-trained-workforce/	Create education programs that educate the student for their lives as well as the workforce. They should know best practices for personal finance, child care, mental health etc	7/9/2018
2428	62	/policies/contaminated-sites/	Increase outreach around contaminated sites to all residents impacted. Engage in discussions on human health effects.	7/9/2018
2429	64	/policies/food-businesses/	Ensure every neighborhood has access to quality and healthy foods	7/9/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2430	0.1	/topics/land-use-built-form/	<p>I am totally against the up zoning plan. It will decimate our neighborhoods and not achieve the goals that it is designed for. It will lower our property values because the aesthetics and environmental impacts are negative. Crowding people onto 40 foot lots without places to park their cars and for their children to play or to grow food or ornamentals will destroy people's quality of living. It will not provide marginalized people affordable housing. Speculators will build ugly boxes and people who want the safety of our neighborhood will rent these substandard places for ridiculous prices and watch them deteriorate because of poor construction practices. The infrastructure of the city will be taxed and the streets will be crowded with parked cars preventing easy access by residents and emergency vehicles. People are not going to give up their cars because this transportation system in this city will not take them to the places they need to go. How do they do a Costco run on a bus, for example? How do they bring home the goods? We are not a city that has made small businesses in our neighborhoods viable for routine needs, except for a few exceptions. People still need their cars to get to their doctors and hospitals, etc. We have spread out all of our necessary services since we have had the automobile and they can't be compacted that easily.</p> <p>I am against this plan because it won't work for so many reasons. I hope you will look at all of the commentaries on NextDoor to get feedback from the people who will be affected by this plan. It's a pie in the sky plan purported to help the marginalized and it can't succeed. It will succeed in destroying the livability of our neighborhoods. There is so much information available about how introducing rental housing into predominately single family home neighborhoods decreases property values, increases crime, and causes the neighborhood to deteriorate aesthetically because of failed upkeep in the rental properties that I can't understand why the writers of this plan choose to ignore the facts.</p>	7/9/2018
2431	1	/policies/access-to-housing/	How to avoid multifamily dwellings that are only for small families or singles (condos, apartments) Otherwise good. How incent developers to have inclusionary zoning.	7/9/2018
2432	35	/policies/innovative-housing-types/	great. Look to the Netherlands and Scandinavia for models of mixed income housing, coops and socially oriented designs.	7/9/2018
2433	71	/policies/soil-health/	Require contractors to fill out an erosion control plan while building to reduce soil erosion during the construction process	7/9/2018
2434	76	/policies/new-parks/	Complete the grand round missing link. Provide green space for this underserved area of the city	7/9/2018
2435	81	/policies/social-connectedness/	Expand tools and outreach for the formation of block groups	7/9/2018
2436	84	/policies/public-safety/	Increase the use of public safety through lighting and neighborhood watches. Develop unarmed community resource officers trained in conflict management to respond to nonviolent crimes. Expand mental health coresponder program city-wide	7/9/2018
2437	85	/policies/access-to-health-social-and-emergency-s	Ensure emergency services are keeping up with population growth	7/9/2018
2438	33	/policies/affordable-housing-production/	If we prioritize most needy, we alienate the lower middle class, spend all our resources for less impact. Ex. of what happened to #East Chicago Hts. A working class Black community of basic single to 4 plex houses south of Chicago. In came high rise public housing. Drugs and gangs. Nobody working. Older substandard but working class housing gone. Now it's a shell. (Plus deindustrialization of Gary)	7/9/2018
2439	34	/policies/affordable-housing-preservation/	Example of Holman decree to encourage scattered site and desegregation. But Hmong families wanted to stay where family clans could be close by. Differing cultural needs, with the scattered theory formulated by white intellectuals based on data. Did they ask the Hmong what they thought?	7/9/2018
2440	37	/policies/mixed-income-housing/	Very important! Look at the Netherlands model (U of M school of architecture did an exhibit this past year).	7/9/2018
2441	80	/policies/development-near-metro-stations/	Penn station nearby properties. Do they have to be high rises? Young families and seniors like townhomes. There are many in near suburbs and they are very diverse. I have walked them for elections. Less parking issues and more diversity than condos.	7/9/2018
2442	4	/policies/access-to-commercial-goods-and-service	I live downtown and am in favor of requiring retail to be incorporated into new buildings. However, in my neighborhood (Loring Park), a number of first floor retail locations have remained empty for over two years. I think it would be important to determine why these locations have not been rented and make sure that these mistakes are not repeated. Perhaps they need adequate room for trash handling or, a way to partner with parking ramps to provide parking or, smaller square footage available for lease. Sometimes, a buildings residents are against renting out retail space. Simply requiring new buildings to include retail space does not mean they will be rented, empty store fronts are not good for the neighborhood.	7/9/2018
2443	38	/policies/affordable-housing-near-transit-and-job	Is Uptown your model for high density near future transit? Isn't it all higher income young people--not families, not diverse. Bar-oriented housing! Tell me I am wrong.	7/9/2018
2444	6	/policies/pedestrian-oriented-building-and-site-de	Do not eliminate off street parking minimums, especially connected to new large scale development. There is not enough off street parking for residents at present, let alone a new influx of residents with cars. Not everybody can function without a car. It puts a burden on families, the elderly, people who have to drive long distances to their jobs, medical appointments and more.	7/9/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2445	1	/policies/access-to-housing/	I believe that allowing multi-family housing will create a denser city resulting in many desirable outcomes. These outcomes include, walkable neighborhoods, less driving and more frequent public transportation schedules. I support all of the action steps suggested for this policy.	7/9/2018
2446	80	/policies/development-near-metro-stations/	The illustration showing the destruction of a charming neighborhood of smaller homes for crowded high rise development is an offensive presumption!! This small west Make Ska neighborhood is not a high end lakeshore neighborhood. It does however fit within the established character of Minneapolis as "the city of lakes". Bde Make Ska should conform to the Shoreland Overlay District regulations that are in effect.	7/9/2018
2447	5	/policies/visual-quality-of-new-development/	The photo examples included here are not high quality design. They are mundane, without character or charm. This sort of design will look old and tired in a few short years.	7/9/2018
2448	6	/policies/pedestrian-oriented-building-and-site-de	Elimination of off street parking is fine but the city needs to preserve space on streets, not just move parked cars to the streets. The owners of houses on residential streets need to have reasonable access to their homes for visitors, deliveries, their own vehicle. It is fine to have the reduction/elimination of cars as a goal but there needs to be a transportation system. The addition of ride share and autonomous cars will not fix the lack of a system that reaches all areas.	7/9/2018
2449	22	/policies/downtown-transportation/	I support all of these action steps, especially anything that encourages a more vibrant and active streetscape. I moved here, 25 years ago, after having lived in D.C., New York and Toronto. My first Minneapolis commute, from Franklin & Lyndale to Lyndale & Glenwood, was probably the ugliest, most barren commute I've ever experienced. After walking or bicycling that route for 3 months, I bought a car and started driving for the first time in 5 years. I appreciate how Minneapolis has filled in and become more walkable but, feel we have a long way to go. Zoning should be used to encourage a walkable city by requiring things like active first floors, parking to be hidden from sidewalks, smaller set-backs and making skyway level businesses visible / accessible from the sidewalk.	7/9/2018
2450	60	/policies/intrinsic-value-of-properties/	Neighborhoods of single family homes with some duplex and four flex buildings are an essential part of the value of the city. These neighborhoods draw families and give Minneapolis the reputation of a great lace to live and raise a family.	7/9/2018
2451	92	/policies/identify-and-evaluate-historic-resources,	Neighborhoods are historically valuable as well as individual landmark buildings.	7/9/2018
2452	14	/policies/tree-canopy-and-urban-forest/	Hig density tall closely spaced buildings too not promote tree canopy or the positive appearance of the photos of streets above.	7/9/2018
2453	11	/policies/skyways/	The city wants more pedestrians on the streets but now the city says forget the streets downtown.	7/9/2018
2454	47	/policies/housing-maintenance/	The city wants to preserve it's housing stock but this plan includes a proposed illustration that eradicates an entire neighborhood on the west side of Bde Make Ska to make way for very tall, closely spaced apartment buildings. Not right!	7/9/2018
2455	19	/policies/bicycling/	For ten years, I commuted, by bicycle, along the Greenway. I am in favor of a rapid expansion of the protected bike lane network. The bicycle network needs to be built across the city rather than neighborhood by neighborhood. It is difficult to build a comprehensive system if individual blocks can stand in the way of implementation. This is a case of making a small sacrifice for the good of all. I would encourage implementing the designs used in other countries, such as, The Netherlands and Denmark. They have been shown to work; why reinvent bicycle infrastructure if there are already great examples we could follow? I believe we need increased incentives to encourage business and building managers to include bike parking. The Nicollet Mall renovation is an example of recent construction that did not include adequate bike parking and discourages riders from visiting the business located there.	7/9/2018
2456	38	/policies/affordable-housing-near-transit-and-job-	I don't agree with this policy. I do not see examples of this realizing the intent of the changes, and in fact, developers use uncontrolled density goals to maximize profits, build poor quality housing and decrease live-ability of communities (quality of life, establishment of neighborly bonds across race and economic strata). What successful models can the City point to that have shown that this works? In the short term or in the long term? We should not be an experiment. Can we look at other ways that are evidence-based to have an impact on accessibility and affordability?	7/9/2018
2457	80	/policies/development-near-metro-stations/	I would very much like more information about where this is being proposed, as well as to see studies of how this approach has worked and has been successful long-term in creating diverse economic business districts.	7/9/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2458	37	/policies/mixed-income-housing/	How will this be done in a way that is fiscally responsible, I would like more details? My taxes have risen steadily in my neighborhood due to developers squeezing in expensive homes, yet my home has not been updated nor can I afford to do that, nor stay in Minneapolis much longer at this rate. My sewer and water bill ranges \$85 month and I live alone...minimal garbage and water usage...until these costs of living are lowered, they will still be a struggle for folks on a mixed income regardless of what neighborhood we all live in. How is excess revenue being returned to Minneapolis citizens? Who will make those decisions and are they evidence-based??	7/9/2018
2459	16	/policies/environmental-impacts-of-transportation/	I am so glad to see these action steps but I would like to see more. Like: Stop building more roads and use that money to build more (a lot more!) convenient and regular public transport and safe, protected bike thoroughfares. Thank you! Katie Ibes, South Minneapolis	7/9/2018
2460	17	/policies/complete-streets/	Love it!!	7/9/2018
2461	42	/policies/expand-homeownership/	How will you address e (above)? The costs for living in the city rise exponentially each year (property taxes, energy, sewer, garbage, water) how will those fixed costs be addressed to make the City affordable for everyone?	7/9/2018
2462	13	/policies/landscaping/	Incentivize homeowners to include raingardens into their landscape design, as well as minimizing grass areas that add pollution to our rivers and use small motor engines to mow - a huge impact could be had if we changed these practices!	7/9/2018
2463	23	/policies/coordinated-development-strategy/	How will middle income residents be able to avoid being grossly over-taxed (more than willing to support those in need, but how will that be determined?) for services not realized in their area? I am at the average income for Minneapolis resident and can no longer afford to live here! Property taxes rising every year, etc..	7/9/2018
2464	59	/policies/downtown/	As someone who works and lives downtown, I feel that having more people living downtown contributes to the vibrancy. I believe we could easily accommodate a doubling of the number of downtown residents. I also enjoy seeing tourist making use of the amenities and would like to see a growth in their numbers. I would also like to make sure that all people, of all incomes, feel welcome and have reasons to live or visit downtown.	7/9/2018
2465	47	/policies/housing-maintenance/	Acknowledging this need is greatly appreciated, thank you for addressing the needs of those who have been tax paying residents for years, and are being taxed out of our homes due to too big for lot developers and sub-standard quality of new homes manufactured to make a buck.	7/9/2018
2466	20	/policies/transit/	Where is expanded light rail? Where is more high capacity rail? Stop focusing on buses and MnPass! It is winter here 7 months out of the year. Minneapolis will not become a major city until it has a comprehensive subway/light rail system that gets citizens around Minneapolis, including the neighborhoods. Buses are the past. We need future-focused transportation options in 2040. The current 35W disaster of building a bus stop in at 35W and Lake is an example of this short-sighted old-fashioned thinking. Stop it with the buses.	7/9/2018
2467	20	/policies/transit/	We need more trains! Buses add to street congestion. They're useful for routes that trains can't address but should not be the only choice.	7/9/2018
2468	7	/policies/public-realm/	Make sure "walking" includes people in wheelchairs and with service animals. Wider sidewalks dedicated to pedestrians, without allowing narrowing for outdoor restaurant seating.	7/9/2018
2469	61	/policies/environmental-justice/	Gentrification is a natural process of urban succession that brings in new capital to either renew or replace existing infrastructure which is always in a state of decline or decay. The solution is not to stop urban succession; rather, the solution is to create infrastructure and processes that allow people and businesses to move from stage to stage in the process. In the case of housing, it might be to build retirement communities that can support the lifestyle and needs of people in the twilight of their lives, including healthcare (gerontology rather than prenatal care), community dining and social activities, and other eldercare programs, which diverse communities cannot afford to provide.	7/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2470	1	/policies/access-to-housing/	<p>Policy 1's "new housing," and its Action Steps' "Allow housing to be built" suggest land purchase and construction by commercial developers with access to favorable financing. Please revise Policy 1 to describe "new, converted, or renovated housing" so that, for example, a mansion could more easily be converted to condos or multiple rental units, without disruptive new construction or radical changes in neighborhood character.</p> <p>A conversion or renovation, like a commercial project, must comply with the Building Code, waste and water management rules, etc. To improve small project viability, as an alternative to commercial high rises, public sector lenders (the City or other public bodies) should offer neighborhood cooperatives/LLPs/LLCs/public benefit corporations, etc., financial incentives such as loan guarantees or reasonable financial and repayment terms for direct loans. A publicly supported plan should require part of such new housing to be "affordable housing."</p> <p>Although conversion or renovation is more complicated than a homeowner's outright sale, publicity about such options could encourage the owner of a mansion to make planned moves known. Neighbors could choose to compete with commercial developers and take charge of their neighborhood's housing expansion.</p> <p>This Policy 1 adjustment would equally facilitate</p> <p>Policy 3: Affordable and accessible housing, "allowing more housing options" and "expanding resources and tools to create and preserve affordable housing and minimize the displacement of existing residents[;]"</p> <p>Policy 35: Innovative Housing Types, to "[p]ursue innovative housing types and creative housing programs[]" in neighborhoods historically limited to large, single-family homes;</p> <p>Policy 36: Innovative Housing Strategies, and its Action Steps to "[e]xplore new strategies and tools to create affordable housing, and to explore opportunities to expand and maximize affordable housing resources, partnerships and tools[;]"</p> <p>Policy 37: Mixed Income Housing, to "[p]romote mixed-income development" by "support[ing] mixed-income housing, including both market rate and affordable housing[;]"</p> <p>Policy 39: Fair Housing, to "[e]xpand fair housing choice and access throughout the city[]" by "City decisions regarding housing policy, investment, land use and zoning[;]"</p> <p>Policy 41: Tenant Protections, and its Action Steps to "[i]dentify incentives and disincentives that reduce evictions," and help the Minneapolis Public Housing Authority "expand landlord participation in the Section 8 Housing Choice Voucher Program[;]"</p> <p>Policy 42: Expand Home Ownership, to "[i]mprove access to homeownership[;]"</p>	7/10/2018
2471	68	/policies/energy-efficient-buildings/	Making buildings more energy efficient conflicts with the goal of making them more affordable.	7/10/2018
2472	0.1	/topics/land-use-built-form/	My entire family since the early 1900's were born, raised and stayed in south Mpls, no one moved away. The tradition continued, my son is a few miles away and my daughter and her family live four blocks away on a street slated for buildings 2 to 6 stories! She is in a single family home with young kids. We always thought we too would stay in our beloved Mpls our entire lives but with your plan to ruin Mpls our thinking has changed. This has opened the dreaded discussion, it is time to move! After seeing your map, the decision has become clearer to move out of Mpls. Very sad, time to look at other cities to call home. Mpls is a great and lovely city, please don't ruin it by making it a crowded, awful big city like Chicago. It is ironic that the new mayor fell in love with Minneapolis, moved here and now wants to change it!!!	7/10/2018
2473	19	/policies/bicycling/	Be it resolved: well before 2040, we will get rid of the ill-planned bikeways on 26th and 28th Streets that reduce the number of car lanes needed for ambulances and other emergency vehicles, as well as other regular traffic, while duplicating bike lanes where there is already an excellent bikeway called the Greenway JUST ONE BLOCK AWAY!	7/10/2018
2474	17	/policies/complete-streets/	Please be mindful of the needs of the elderly when you devise these "complete streets." I am delighted to have more transit, pedestrian and bikeways, but my mother with Parkinson's cannot walk up the steps of a bus and even struggles to move fast enough to board a train, nor can she walk a block to a train station. People who cannot access the modes of transportation that you favor in your plan will still need ways to get around.	7/10/2018
2475	16	/policies/environmental-impacts-of-transportation/	I have a positive attitude for most of the 2040 plan as it stands today. My one concern I'd like to express is the cost and location of the SW Light rail. I'm opposed to the 2+ Billion cost and the plan to run between Cedar Lake and Lake of the Isles. I was hoping to use the tracks in St Louis Park.	7/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2476	0.1 /topics/land-use-built-form/	<p>My name is Steve Grove, and my wife Mary and I moved to Linden Hills from California three months ago. We live at 3725 Glendale Terrace with our 18-month old twins. I work at Google, where I lead our News Lab division, and Mary works as a partner at a venture capital firm called "Rise of the Rest" focused on investing in startups outside of Silicon Valley. We're thrilled to have moved to Minneapolis and are excited to contribute to the community and economy here.</p> <p>However, we have concerns about the plans laid out for our neighborhood in the Minneapolis 2040 plan. According to the plan, our section of Glendale Terrace will be zoned on one side as Corridor 4, and the other side as Interior 3. As you know, that means if the plan passes in its current form, developers will be allowed to build 3 and 4-story apartment buildings our our residential, single-family home street.</p> <p>The plan concerns us greatly.</p> <p>We chose Linden Hills, and our specific home, precisely because it was the type of single-family home neighborhood that we were searching for. We wanted to provide our kids with a neighborhood with long-term families where they could make friends, and to live in an urban environment with a density that allowed for easy parking, safe traffic, and a neighborhood feel.</p> <p>The home we purchased was rebuilt on a lot that had previous held a condemned home, and we paid \$1.05M for it - a fair market value for our square footage. We felt good about moving into a neighborhood in transition, and were happy to be part of a revitalization of our block. There are other homes on our block that have deferred maintenance for several years, and are strong candidates for redevelopment, too.</p> <p>But if the 2040 plan goes into affect, a developer could buy up several of the older homes on our block and create an apartment complex right next door to us - fundamentally altering the dynamic of our street and seriously decreasing the value of our brand new home. We're particularly concerned because the houses on either side of us, and a house two doors down, are older homes owned by people who are either renting them out right now or are motivated to sell.</p> <p>We both believe in the importance of affordable housing and smart growth. But it's unclear to us how zoning our neighborhood block for mid-sized apartments is going to solve Minneapolis' housing challenges. The corridors in our neighborhood all cut through established neighborhoods with a history and culture of single-family homes - and we don't see how the costs of these changes to current residents is even close to worth the benefit of a few extra residents per block.</p>	7/10/2018
2477	1 /policies/access-to-housing/	<p>Allowing more multi unit housing certainly increases the wealth of developers but does not have long term benefits for the people of Mpls. Owning a home is an important way for people to build wealth. This plan would encourage those smaller homes to be demolished and developed for rental properties, which do not solve any affordable housing problems and does not promote wealth development. Our schools in south Mpls are incredibly crowded right now. This plan does not seem to address how increased density would affect educational resources. I do not support more multi dwelling units in interior areas furthest from downtown.</p>	7/10/2018
2478	1 /policies/access-to-housing/	<p>I am not in favor of allowing fourplexes with no parking requirements in any neighborhood. I do not believe that rezoning will encourage anyone to build "affordable housing" options, but rather encourage developers to swoop in and outbid legitimate home-buyers in an effort to build the largest, cheapest option that will generate the most profits for THEM. Affordable housing options will be the last thing on their mind. They will need to recoup their costs, and the resulting rents will skyrocket to ensure that.</p>	7/10/2018
2479	16 /policies/environmental-impacts-of-transportation/	<p>The largest barrier to zero emission vehicle (electrical vehicle) use in the city of Minneapolis is the lack of charging infrastructure for residents who lack off street parking. The city should adopt policies that enable curb side charging and promote the installation of DC (direct current) rapid charging stations.</p>	7/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2480	0.1	/topics/land-use-built-form/	<p>Minneapolis has been an enviable city of neighborhoods, parks, lakes, the river and creek. It has been this organization of engaged neighborhoods and a beautiful environment that has kept Minneapolis an attractive city. The foresight of the early park board to keep the shorelines of the lakes and creek public and the establishment of parks within every neighborhood has been the defining, egalitarian feature. No city that I know of that has great density has maintained such a high quality of life and preserved a middle class. New York, Chicago, San Francisco....all with great density have very the wealthy and the poor.</p> <p>This proposal for greater density is not called for by the Met Council. We are on track to meet our share of housing by 2040. A thoughtful approach of identifying with each of the 70 neighborhoods where more dense housing could be built would take time and honest, real citizen engagement, not the flyers at cultural events approach.</p> <p>Lining Penn and 50th streets with 4 -story or higher apartment buildings and then up to 3 stories just behind them reduces the number of affordable, single-family homes, overwhelms the streets, and destroys the unique character of our city.</p> <p>I don't believe Minneapolis has the capacity to service the roads, maintain old water and sewer lines, and handle the transportation issues. Eighty-four percent of our citizens rely on cars for transportation. Few can walk or bike to work. By removing the parking requirements, this plan is totally unrealistic, fantastical. It's an example of magical thinking.</p> <p>The density planned for here was nothing that the neighborhood councils were involved in. It seems this centralized plan, written by the staff and council members, denigrates decentralized, neighborhood planning. I question the logic and the abilities of both. I see no data to support the proposition.</p> <p>The buildings will not be "affordable." You will remove throughout the city the affordable single homes and line the pockets of developers. To say that increasing the housing in this way will bring down the prices of rents and cost ownership has no basis in fact in the USA. Your plan is based on unsubstantiated premises. I deem it dishonest.</p>	7/10/2018
2481	1	/policies/access-to-housing/	I thought we were working against a long history of redlining, yet I see an old redlining boundary preserved along Hennepin. Why is the west of Hennepin planned to be lower intensity zoning than the east of Hennepin, apart from wealthier residents west of Hennepin could not bear the thought of sharing their neighborhood with more people?	7/10/2018
2482	0.1	/topics/land-use-built-form/	In South Minneapolis, the built form map calls for lower density to the west of Hennepin than to the east. Please extend Interior 3 zoning to both sides of Hennepin Avenue. Lower density zoning to the west of Hennepin serves no purpose other than to perpetuate the disparities and exclusionary zoning that's a legacy of redlining.	7/10/2018
2483	1	/policies/access-to-housing/	Completely against this policy. Sounds altruistic but developers will get rich and Minneapolis will get more tax revenue. Current homeowners lose so much in terms of safety in neighborhoods from increased density. Neighborhood camaraderie will be destroyed. Minneapolis will lose its soul.	7/10/2018
2484	0.1	/topics/land-use-built-form/	Do not support.	7/10/2018
2485	33	/policies/affordable-housing-production/	In the action steps, they forgot to mention "make the city unliveable, thereby driving out long term homeowners and lowering property values"	7/10/2018
2486	0.1	/topics/land-use-built-form/	Why is the proposed built form for the Lowry Hill neighborhood west of Hennepin Interior 2 while the built form east of Hennepin in the Wedge Interior 3? These areas are literally a single block apart, they have no difference in transit access or distance from downtown. It's unacceptable to limit the density of Lowry Hill and perpetuate its exclusivity simply because the current inhabitants are richer and more likely to kick up a fuss when more people want to live near them.	7/10/2018
2487	1	/policies/access-to-housing/	I support higher density throughout the city, and the re-legalizing of much of the housing types that make neighborhoods affordable. My fiancÃ© and I are both young and hope that this will help bring the absurd cost of housing down for people our age.	7/10/2018
2488	1	/policies/access-to-housing/	Love the fourplex everywhere idea! It's such a reasonable way to add density and make neighborhoods more walkable.	7/10/2018
2489	19	/policies/bicycling/	Yes! These are all great! Thank you, and continue to do the work you do to promote & include ALL modes of transportation in our city.	7/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2490	0.1	/topics/land-use-built-form/	<p>I disagree with putting 3-4 story apartment buildings on Penn and Oliver Ave S. The existing houses on these streets are usually 1 story and will be dwarfed by new construction, parking is a problem, and there has already been a pedestrian death near Penn and 54th this year. A lot of infrastructure work will need to be done to support high-density housing - the surrounding neighborhood schools are full, buses are full, roads are full of potholes. Crossing highway 62 on a bike or as a pedestrian, especially with kids, is REALLY unpleasant - making car-free trips for families a huge burden in this neighborhood.</p> <p>What's the timeline for rezoning and redeveloping these neighborhoods? Will neighbors have any say in what sort of new development takes place? Will eminent domain be invoked, forcing property owners to see? I strongly oppose the use of eminent domain. I think rezoning will hurt already established communities and divide neighbors. I don't think this is going to have the community-building effect you are hoping for.</p>	7/10/2018
2491	1	/policies/access-to-housing/	<p>I am very concerned about stated goals for neighborhood interiors. In 2016, I purchased a home in the 54th and Dupont area of South Minneapolis for \$475K. I was a first time home owner at age 41. For most of my adult life, I have pursued higher education and saved money to make a down payment on my single family home. I would not have made this investment of finances and emotion if I knew that my block might be changed to allow for 3-story residential buildings or multiplexes, similar to the Uptown neighborhood interior. This area of Minneapolis has its own unique energy and charm. However, it is not fair to owners of single family homes in other areas to implement zoning policies that can lead to such a radical transformation of the neighborhood. Prior to my recent purchase, I enjoyed living in apartment buildings on transit corridors in Pittsburgh, Chicago, San Francisco, and Minneapolis. For 10 years prior to my recent purchase, I enjoyed leasing a condominium on West Lake Street, a large transit corridor. This is where more dense types of housing belong - on the transit corridors and close to amenities such as parks, grocery stores, restaurants, and public transportation. I have loved my experiences as a renter during my adult life. I purchased my single family home in Minneapolis with the intent of entering a new phase of my life, and a new type of living experience. I imagined that my street would remain the same with respect to the structure of residences, and that I would live here until I retired. When more dense types of housing are mixed with single family homes, the quality of living in the single family home changes for the worse and the value of the home decreases. I made a deliberate choice to live on a quiet (disregarding the airplanes), low traffic, neighborhood street. Please develop the transit corridors with more dense housing before changing the zoning of neighborhood interiors.</p>	7/10/2018
2492	62	/policies/contaminated-sites/	<p>Each effort should begin with a benefit/cost analysis (both short-term and longer-term) to see if abandonment is not the best option. Remediation is but one of the options that policy makers should consider. The first step is, of course, transparency. Concealment of contamination should be subject to heavy penalties, which includes contributions to a post-closure liability fund to begin clean-up of brownfields that may be worthy of remediation. If people knowingly purchase properties that are contaminated, they should assume all the liabilities that come with those heavily discounted properties and not get the taxpayers to bail them with public dollars for cleanups.</p>	7/10/2018
2493	1	/policies/access-to-housing/	<p>You talk about a variety of housing options but have not adequately protected what is so wonderful about what we have today that horrible cities like Chicago and NY don't have...single family housing for the middle class. Why would you ruin something so valuable? Do you think this makes you a more successful city planner and you hope for career advancement at the expense of the residents currently in the city?</p>	7/10/2018
2494	34	/policies/affordable-housing-preservation/	<p>If your goal is to preserve affordable housing options for all people, including the working middle class, why have you abused your rights to taxation and are driving out good citizens? You have increased taxes to the point that they become the problem with affordable housing. How about you fix the problem you created with making housing affordable? People are having to leave the homes they saved to buy because you cannot seem to control your spending or figure out how to create a tax base that doesn't rely on gauging property owners?</p>	7/10/2018
2495	33	/policies/affordable-housing-production/	<p>all multi-family housing should be required to abide by set back rules and provide for adequate off street parking for all residents. We have a parking problem now and a snow removal problem now. Don't make it worse.</p>	7/10/2018
2496	1	/policies/access-to-housing/	<p>What a joke. You are not creating a diverse housing options...you are creating an overly dense, one size fits all approach by removing single family zoning that exists today. filling blocks along 50th with multi-family are not going to be affordable and they will ruin our neighborhoods. Any multi-family should be owner occupied to protect what we have.</p>	7/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2497	37	/policies/mixed-income-housing/	To make more affordable options, stop taxing the homeowners inequitably. There was a law change that put the burden for taxes on homeowners vs. commercial. Then you cut deals to more businesses and sports arenas. You obviously don't work on behalf of the citizens of mpls. You need to fix your own problem first before you start ruining neighborhoods.	7/10/2018
2498	43	/policies/housing-displacement/	why do you only work to protect the poorest people? What about the middle class citizens that have paid outrageous taxes for years and are now at the point they can't afford those tax rates and are forced to leave their homes at retirement? Affordable also means affordable tax rates. Take some accountability!	7/10/2018
2499	23	/policies/coordinated-development-strategy/	Minneapolis is part of a metro area that includes close in suburbs. Before making Mpls more dense, you should require a metro-wide vacancy rate threshold.	7/10/2018
2500	47	/policies/housing-maintenance/	Yes, the city wants to promote the upkeep of homes only so they can tax the heck out of those that do and all the neighbors. The tax value of homes in SW went up by \$75-\$100k per home last year because of the flawed formula. Any home with less than a certain cost per square foot is deemed distressed and excluded from the comp pool. But a year later when it's torn down and resold, that prime value is included in the comp pool. Totally unfair to the neighbors. You should exclude those flipped homes for a period of time.	7/10/2018
2501	1	/policies/access-to-housing/	I support this essential goal of increasing access to housing. More density and both public housing and private housing should be used aggressively to increase availability of quality affordable housing.	7/10/2018
2502	37	/policies/mixed-income-housing/	The most segregated parts of the city are the wealthy, mostly white neighborhoods of the Southwest! We need more housing diversity in ALL parts of the city, and that includes these neighborhoods	7/10/2018
2503	1	/policies/access-to-housing/	I welcome this type of housing in my neighborhood (Longfellow). Please, let this kind of development happen. We need to replace the missing middle of housing options; not just single family homes and large apartment buildings. Duplexes and fourplexes will increase the density in a stable and helpful way, supporting businesses that our neighborhoods need.	7/10/2018
2504	50	/policies/access-to-technology/	Yes! Take down the barriers for companies like USI to get fiber everywhere! More transportation for people to libraries and libraries with longer hours please!	7/10/2018
2505	48	/policies/data-driven-decisions/	Leveraging data and models for making decisions is the most prudent and effective way to ensure we are doing the best we can to improve our city. This is an absolute must and I really appreciate this being present.	7/10/2018
2506	56	/policies/supporting-small-businesses/	On October 10, 2017, Core Findings Research Group presented information about the North Minneapolis economy as it relates to consumer food dollars. They reported that northsiders spend \$41.5 million on food they eat at home, and \$25.2 million on food eaten away from home but that these dollars are not necessarily spent in the community. Core Findings reports \$18.7 million leaves the northside for food people buy to eat in the home and \$2.6 million is spent outside of north Minneapolis on meals out of the home. It's my opinion that more can be done to encourage people to patronize and buy local. The City might consider aiming to stimulate economic growth through local purchasing by making it first about the people: getting to know what's important to them about shopping and finding services; inviting them to invest in themselves and their business-owning neighbors; and rewarding them for enhancing the neighborhood in which they live by purchasing local. Studies show, too, that the more people know one another and spend time in community-building activities, the less crime there is along those streets and corridors. There are Great Streets Business District Support Grants that are designed and expected to roll out soon that might model some good options.	7/10/2018
2507	25	/policies/innovations-in-transportation-and-infras	I'm glad the city is proactively thinking about these things, but I'd like to make sure we focus on things proven to benefit communities now (like light rail, street cars, busses, etc.) until more data and information can be gathered how to effectively plan a city for these things.	7/10/2018
2508	15	/policies/transportation-and-equity/	It is very positive to see our city recognizing the inequality in our community and is taking steps to try and address these issues. Access to transportation is so critical to improving the lives of people too.	7/10/2018
2509	16	/policies/environmental-impacts-of-transportation	Don't forget other alternatives to walking/cycling/car like electric powered scooters/skateboards/bikes. Getting infrastructure in place that supports things like storing and/or charging while at a station or on the bus would increase the effective range that people would travel to the public transport station and not use a car.	7/10/2018
2510	17	/policies/complete-streets/	Yes please! This is so important and critical! Increase mixed-use buildings! More walkways! More bike paths! All the things!	7/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2511	1	/policies/access-to-housing/	Higher density, and hopefully, affordable housing will be built in areas of the city where lots are not prohibitively expensive, which is in poorer neighborhoods. If these new structures are indeed affordable for low income residents then this new permissive zoning plan would in fact promote further concentration of poverty these parts of the city. I guess a the city wide proposal to allow multi-unit housing everywhere is politically the only way to give this plan a chance. But, there needs to be some type of provision included that allows for a moratorium of construction in a specific area of the city if this foreseen increase in concentration of housing for lower income person in already impoverished neighborhood occurs.	7/10/2018
2512	18	/policies/walking/	Walk-ability is the reason I moved to Uptown. I haven't had to drive my car in months (even in the winter) because nearly everything I need, groceries/convenience store/restaurants/bike paths/buses/parks, are all in walking range. I can't and won't go back to needing a car, it is amazing. How walk-able a neighborhood is will absolutely inform where I choose to live in Minneapolis so having more places where this is possible is exciting and awesome!	7/10/2018
2513	19	/policies/bicycling/	Also make sure to embrace and encourage mixed use of transportation! Things like biking and catching a bus or a light rail can really make public transport shine!	7/10/2018
2514	20	/policies/transit/	I read the overall plan to prioritize walking and biking above transit. From a purely numbers perspective, I expect walking and biking to benefit fewer people than transit. From a purely human perspective, this type of priority lessens impact to the disabled, elderly and poverty level individuals.	7/10/2018
2515	20	/policies/transit/	It'd be nice to also make sure we continue to improve the fantastic web API that Metro Transit already offers. If we can improve things like where a bus currently is on it's route, more accurate ETA, and other data points, we can improve rider's confidence in the system as a whole and help more people take our transportation network!	7/10/2018
2516	20	/policies/transit/	I read the overall plan to prioritize walking and biking above transit. From a purely numbers perspective, I expect walking and biking to benefit fewer people than transit. From a purely human perspective, this type of priority lessens impact to the disabled, elderly and poverty level individuals.	7/10/2018
2517	82	/policies/aging/	Policy 82: Aging, would "[e]xpand resources and opportunities" for "independent living, assisted living, and long-term care housing" to help elders stay active, but its Action Step a, "Ensure access to safe, affordable and accessible housing options" is vague. Please revise Action Step a. to "Ensure access to safe, affordable and accessible housing options including co-housing." Minneapolis downtown high rises currently pose 2 problems: either they are unaffordable, or they pose severe maintenance problems for the City or private landlords while often increasing feelings of isolation, especially among elders used to ground level living. Low-rise co-housing, especially by adaptation of existing homes, could better increase density in single-family-home areas, retain neighborhood character, and reduce perceived "warehousing" of elders by making easier the human contact and self-help which data show prolongs active life.	7/10/2018
2518	7	/policies/public-realm/	I love this, making it more pleasant to be on the street will help walk ability so much!	7/10/2018
2519	6	/policies/pedestrian-oriented-building-and-site-de	Encouraging vestibules at any metro stop would be a nice step!	7/10/2018
2520	33	/policies/affordable-housing-production/	"c. Promote a diversity of housing options throughout the city through ongoing analysis and targeted interventions." What are targets for increased density? What types of intervention are planned? This level of planning at this stage may seem a bit premature, but, to prevent increased concentration of poverty this should be addressed now, probably as its on Proposal.	7/10/2018
2521	11	/policies/skyways/	I consider skyways to be privately owned and operated. Why spend time and (taxpayer) money regulating this feature of downtown? Let the consumers direct the value and usage of skyways instead. Also, why prioritize "street level vibrancy" above "skyway level vibrancy"? There is a healthy economy one floor up from the street... why does the location matter?	7/10/2018
2522	11	/policies/skyways/	It'd be worth trying to work with companies like Google/Apple to get the skyway integrated into their map applications. If I can type in the name of a company I want and it gives me instructions to the door, I'd be a lot less scared when traveling downtown.	7/10/2018
2523	10	/policies/street-grid/	This is great. I'd also be ok with bigger blocks being broken up with pedestrian/bike paths instead of roads too!	7/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2524	6	/policies/pedestrian-oriented-building-and-site-de	I totally support the proposed action step to eliminate off-street parking minimums throughout the City. Decoupling residential and commercial development from mandated parking development allows the fine-tuning of parking amounts and locations to be done by those most knowledgeable and financially on-the-line: building developers. I am not concerned that a developer will build a building and fail to make provisions for some off-street parking as needed. Developers are smart and will build/contract for the least parking needed to allow their buildings to be economical. I also think that in 50 years Minneapolis will be more like every other 'big city' where more and more people will get around without using a car every day, to individual's financial benefit.	7/10/2018
2525	0.1	/topics/land-use-built-form/	2603 21ST ST W identifies the land that was negotiated with the neighborhood to remain as green space -- we spent many hours with many neighborhood representatives and SWLRT project people working on this. It also should be subject to the City's intention, expressed through the MOU with Hennepin County and the Met Council, that it remain publicly-owned green space.	7/10/2018
2526	0.1	/topics/land-use-built-form/	The 21st St. Franklin Avenue corridor should be upzoned to at least Transit 10 like other neighborhoods around existing and planned METRO stations. We are making a significant (once-in-a-generation) investment to improve our transportation system and it will only work if we can build the transit-supportive communities. The current and proposed built form will not sufficiently support / warrant the ridership a light rail line offers.	7/10/2018
2527	0.1	/topics/land-use-built-form/	The MPLS2040 site seems to have the southern part of the Kenilworth Corridor listed as: 2820 26TH ST W. This doesn't make sense to Google Maps. In any case, it's shown as Corridor 4, as is 2603 21ST ST W, which identifies the land that was negotiated with the neighborhood to remain as green space -- we spent many hours with many neighborhood representatives and SWLRT project people working on this. It also should be subject to the City's intention, expressed through the MOU with Hennepin County and the Met Council, that it remain publicly-owned green space.	7/10/2018
2528	21	/policies/freight/	Raised/Sunken tracks would be great to help prevent traffic congestion and safety for residents.	7/10/2018
2529	22	/policies/downtown-transportation/	Repaint the bike lane on Hennepin!	7/10/2018
2530	56	/policies/supporting-small-businesses/	I am a small business owner in North and it is difficult to survive. What specifically do these action steps mean? We could use help with advertising and marketing support. Our small budgets does not leave much room for marketing or advertising. City officials supporting and patronizing the businesses would be great, grants etc	7/10/2018
2531	28	/policies/msp-airport/	Stop building more parking at the airport - its super expensive and inefficient. Its more environmentally friendly to have people take transit or shared mobility options.	7/10/2018
2532	34	/policies/affordable-housing-preservation/	We definitely need to preserve the affordable owner housing we have. We also need more SROs, not all supportive housing. Seward has 1,000+ subsidized units within 2 or 3 blocks of our house. I would like to see larger than 1 br or 2 br rental units encouraged. I also would like some kind of serious punishment (\$\$\$ etc.) against property owners who leave buildings empty and let them deteriorate. Tear downs are not necessarily the answer. It is unbelievable to me that a building on our block could stay empty for 5 years, never have sidewalks shoveled, never had the lawn mowed except for by the city. It is a blight and could house several households. The city could act as an intermediary to encourage a sale to a responsible landlord.	7/10/2018
2533	11	/policies/skyways/	Change official city policy to support the dismantling of the skyway system but banning its expansion and addition of retail usage on the 2nd floor.	7/10/2018
2534	11	/policies/skyways/	Remove the skyway crossings over Washington Avenue and continue promoting the vibrant street life there.	7/10/2018
2535	66	/policies/air-quality/	As a resident of East Phillips living by the asphalt plant I find this all very laughable. I am sick of hearing upper class liberals in this city talk about bikes, global warming, air quality, and renewable or green this or that. The asphalt plant is literally belching black poison in the air and you all don't seem to care. You talk about social justice and environmental justice but with the Hiawatha public works depot off 28th you are NOW building more polluting industry in BROWN neighborhoods. Instead of just buying the asphalt plant for like 6 million (pocket change for MPLS) you bought KMART ????. Your all racist idiots.	7/10/2018
2536	66	/policies/air-quality/	Make it official policy to teardown portions of the freeway system that aren't highly used (4th street viaduct) - Crosstown Lyndale exit	7/10/2018
2537	66	/policies/air-quality/	Eliminate parking minimums city-wide and institute parking maximums to curtail GHG emissions and pollution for automobiles.	7/10/2018
2538	1	/policies/access-to-housing/	The goal of reducing car use is great. I am not optimistic. The Coop, the gym generate the demand for more parking than those businesses provide for staff and customers. As far as I can tell, only Perkins has enough parking for its staff and customer use.	7/10/2018
2539	66	/policies/air-quality/	Raise on-street and off-street parking fees to fund air quality improvement projects - transportation-related GHG emissions must be curtailed to achieve climate goals.	7/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2540	66	/policies/air-quality/	Implement taxes on gas lawn mowers (or ban them)	7/10/2018
2541	18	/policies/walking/	Add Leading Pedestrian Intervals citywide. And also increased pedestrian crossing times for older and mobility limited residents.	7/10/2018
2542	0.1	/topics/land-use-built-form/	<p>Overall this plan is a step in the right direction for our city and its needs for housing and growth. One suggestion / comment regards the transition from Corridor 4 districts to lower intensity residential areas (Interior 1). Obviously it is a good idea to have a transition buffer zone between these corridors and districts.</p> <p>Currently, the transition in the plan from Corridor 4 to Interior 1 is Interior 3 (see, e.g., 4620 WASHBURN AVE S). However, in the transition between Corridor 4 and Interior 1, the appropriate transition would be interior 2, which still allows for multifamily buildings, but is less drastic than the juxtaposition between interior 1 and interior 3.</p> <p>it seems appropriate that draft plan calls for the the transition zone from Corridor 6 to less intense areas is Interior 3. After all, Corridor 6 is much more dense than Corridor 4, so the transition zone density coming down from Corridor 6 should be higher (see, e.g., 5635 BLAISDELL AVE S). However, this same logic would favor a slightly less dense transaction from corridor 4 to residential - i.e., interior 2.</p> <p>Thank you for your consideration.</p> <p>Erik Ruda SW Minneapolis erik.ruda@gmail.com</p>	7/10/2018
2543	1	/policies/access-to-housing/	I disagree with "action step e" above, i.e. allowing up to four dwelling structures on what is currently a single-home lot. The photo, elsewhere, of what my neighborhood would look like if this were allowed to happen looks like Woodbury. I don't want to live in Woodbury. The zoning in residential neighborhoods should remain as it is.	7/10/2018
2544	1	/policies/access-to-housing/	I Live in North Minneapolis and do not want 4 plexus every where, the city does not enforce basic housing codes in North Minneapolis especially with slumlords. I would like to see more affordable housing in Southwest Minneapolis, no more in north. The concentration of poverty in north is criminal and we are returning to a time of the housing projects that were deemed illegal. If you do go ahead with the heavy zoning with more crappy land lords do something about the up keep and safety of all residents.	7/10/2018
2545	84	/policies/public-safety/	How about traffic enforcement? All traffic and parking laws in Minneapolis are just optional, this is sad.	7/10/2018
2546	0.1	/topics/land-use-built-form/	I love that we are opening up density close to transit corridors! It is one of the most important ways for us to fight climate change. I think, however that two big opportunities are lost on the current built-form map: (1) There are a few areas very close to downtown that should be Interior 3 - Lowry Hill, East Isles, and Near North. (2) Overall, I think Interior 3 is too conservative. I think new construction in Interior 3 should at least be 2 stories, with incentives given for 3-4 stories.	7/10/2018
2547	4	/policies/access-to-commercial-goods-and-service	I have 6-7 full service grocery stores within 3 miles. As a senior I need a car to get groceries home even if it is two blocks away. Do I go to the market every day as my German friend does?	7/10/2018
2548	19	/policies/bicycling/	Bicycling as a means of transportation should be one of the lower priority items for the city. Weather conditions from Nov to March prevent cycling from a reliable mode of transportation for those other than the most fit and committed. Please consider the impact of devoting significant areas of transit corridors to an activity that will have highly variable usage based on the weather. If we are talking about how to improve moving about as density increases, it might not make sense to devote a disproportionate amount of space/resources to an activity that isn't feasible for many residents during extended periods of the year, and is therefore underused for extended periods. Reliable, well networked public transportation and pedestrian friendly design should be top priorities.	7/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2549	82	/policies/aging/	<p>Policy 82: Aging, would "[e]xpand resources and opportunities" for "independent living, assisted living, and long-term care housing" to help elders stay active, but its Action Step a, "Ensure access to safe, affordable and accessible housing options" is vague. Please revise Action Step a. to "Ensure access to safe, affordable and accessible housing options including co-housing."</p> <p>As of 2018, Minneapolis downtown high rises pose 2 problems: either they are unaffordable, or they pose severe maintenance problems for the City or private landlords while increasing feelings of isolation among elders used to ground level living. Low-rise co-housing, especially by adapting existing homes, see Policy 35, Innovative Housing Types, could increase density in single-family-home areas, retain neighborhood character, and reduce perceived "warehousing" of elders by making easier human contact and self-help that prolong active life.</p>	7/10/2018
2550	82	/policies/aging/	<p>Many citizens, especially elders and the disabled, see Policy 83, lack adequate access to public transport. Policy 66: Air Quality, and its Action Step a, would "[r]educe vehicle-related emissions through transportation and land use policies" See also Policy 24, Shared Mobility. Yet Policy 6, Pedestrian-Oriented Building and Site Design, Action Step k, would "[e]liminate off-street parking minimums" i.e., required resident-to-parking-space ratios.</p> <p>Eliminating off-street parking minimums reduces developers' costs but contradicts Policies 82 and 83, promoting elders' and disabled persons' independence. Fix the contradictions: make Policy 6 depend on development of, and developers' contributions to, adequate alternatives.</p>	7/10/2018
2551	6	/policies/pedestrian-oriented-building-and-site-design/	<p>Many citizens, especially elders and the disabled, see Policies 82, 83, lack adequate access to public transport. Policy 66: Air Quality, and its Action Step a, would "[r]educe vehicle-related emissions through transportation and land use policies" See also Policy 24, Shared Mobility. Yet Policy 6, Pedestrian-Oriented Building and Site Design, Action Step k, would "[e]liminate off-street parking minimums" i.e., required resident-to-parking-space ratios.</p> <p>Eliminating off-street parking minimums reduces developers' costs but contradicts Policies 82 and 83, which promote elders' and disabled persons' independence. Fix the contradictions: make Policy 6 depend on development of, and developers' contributions to, adequate alternatives.</p>	7/10/2018
2552	34	/policies/affordable-housing-preservation/	<p>Preservation of the thousands of existing affordable housing units located in the historic neighborhoods around the south side of Downtown will be threatened by the extreme upzoning proposed in the Built Form Plan. Speculative development is one thing when it happens in the near green field type locations found along the river. It is something very different when it comes to neighborhoods full of students, downtown workers, the elderly and people of color. Equity? I don't believe you.</p>	7/10/2018
2553	1	/policies/access-to-housing/	<p>Re. 2901 Wayzata Blvd: Nothing should be built that is 15 stories at this location. 2800 OK</p> <p>The number of multiple buildings such as four-plexes needs to be controlled in any area. Small houses on one street should not be demolished for a string of four-plexes anywhere. I agree they should be scattered and available throughout the city--just not in clusters. We should consider one unit be owner-occupied for licensing.</p>	7/10/2018
2554	1	/policies/access-to-housing/	<p>I live in a largely single family dwelling area of SW Minneapolis. I support rezoning to increase density as proposed as long as there are concurrent policies that make sure there is a major increase in affordable housing throughout the city. Higher density that is just luxury condos or apartments is a terrible idea and we need policies in place that specifically increase housing affordability. The market is failing us already and won't fix the problem by relying solely on market forces and increased density.</p>	7/10/2018
2555	0.1	/topics/land-use-built-form/	<p>I am confused why the wedge neighborhood is interior 3, but Lowry Hill and East Isles on the other side of Hennepin are only Interior 2. It seems to me that areas that near a future aBRT line on Hennepin should be Interior 3 at the VERY least, and probably allow even denser development. Lowry Hill and East Isles shouldn't get a pass because they are wealthy. We should not be exempting wealthy neighborhoods from good planning and land use just because they're likely to throw a fit.</p> <p>On a similar note, it seems like dropping down to interior 2 south of 31st in CARAG and ECCO is way too steep a drop. I live in a fourplex on the 3100 block of Bryant, and I am confident that the block could handle 3 story development. Lake will also be getting aBRT and we need to allow people to live close to our transit investments.</p>	7/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2556	33	/policies/affordable-housing-production/	I would like to see a concrete statement about how the city will actually enforce this policy. I keep hearing about affordable housing, but in my neighborhood (Stadium Village region of the University of Minnesota) I've seen building after building go up without any affordable options, which is particularly criminal given that the majority of occupants are students who are forced to take out outrageous student loans just to live near their school. Even though I'm no longer a student and have a full-time job, even I can't afford the prices these place charge. On top of that, I rely on the Green Line because it's the only transport that is affordable to me right now. Naturally, all the new apartments going up along the Green Line are out of the price range of those who need it the most. I won't believe that the city prioritizes people over construction companies until I see rules in place that force them to include affordable and safe units in their apartments. Companies will never do what is in the best interest of the people when there are profits to be had -- it is up to our representatives to make those changes happen. For just one example of the madness our neighborhood has had to put up with, see the drama surrounding Prime Place, now renamed The Arrow in the hopes that future tenants won't know the history of the building and its management.	7/10/2018
2557	16	/policies/environmental-impacts-of-transportation/	Yes, cars are a scourge and must be fought against. The amount of pollution they produce is shocking, so I'm glad to see the City's idling ordinance being stressed. We must also design our streets in order to calm car traffic and make it safer to ride a bike or cross the street as a pedestrian.	7/10/2018
2558	1	/policies/access-to-housing/	Yes! Fourplexes allowed everywhere! Same footprint as McMansion's, but for more people! So great!	7/10/2018
2559	33	/policies/affordable-housing-production/	To maintain 30% housing cost for a retail employee (service employee) a one bedroom rental unit needs a rent cap of \$384. A majority of service employee's work for publicly traded corporations that are paying out dividends to stakeholders. The majority of the money travels past front-line (service) workers toward the top executives of those corporations.	7/10/2018
2560	69	/policies/renewable-and-carbon-free-energy/	Develop Municipal Power. Disconnect from Excel and CenterPoint. Make use of locally generated power to reduce dependence on the grid.	7/10/2018
2561	0.1	/topics/land-use-built-form/	I can't believe how the city leaders are attempting to sell out homeowners in order to allow developers to profit. This scheme will wreck the neighborhoods of South Minneapolis if passed in its current state. It is ridiculous to encourage up to six story buildings down Chicago all the way until 60th street and then continue on to Portland. Why is Portland not included north of 60th, it is much more of a "transit corridor" than the neighborhoods along Chicago. The ability for developers to buy and combine multiple lots for 3 story development in Interior 3 zoned areas will kill the charm of the city. Is that your goal? Also, why is the southernmost area between the 35W and Lyndale zoned Corridor 6. That area already struggles, why are you attempting to further its decline?	7/10/2018
2562	19	/policies/bicycling/	Thus far the expanded emphasis on biking seems to have been done without any prior study or any concern for the way the vast majority of people still travel in MPLS, i.e., automobiles. The protected bike path on Blaisdell from 31st to 40th street is a prime example. I drive this route at rush hour almost every day. I never - never - see more than one or two bikes on the protected path. Most of the time I see none. What I do see is greatly increased automobile delays, congestion, and noise on a residential street as a result of compressing two lanes of automobile traffic into one lane. The dramatic decrease in the quality of this roadway through the addition of a massive -- and virtually unused -- protected bike path is astounding. And it gives me great concern that the expansion of bike paths is being done without real study or understanding of where such paths might draw the most traffic and how to minimize the impact on most MPLS residents who use automobiles every single day.	7/10/2018
2563	36	/policies/innovative-housing-strategies/	I wish I could ban the city's use of the word "explore" unless it's immediately followed by "and implement solutions and policy to establish". Commit to something other than researching problems -- commit to providing policy or funding to change something.	7/10/2018
2564	1	/policies/access-to-housing/	How do these prevent gentrification and the movement of tearing down reasonably sized single-family houses and putting houses with double the square feet down in the lot. If a 800 or 1200 square foot house is torn down I don't think we should be allowing a 2,000+ square foot home to replace it unless it houses more than one family. That's environmentally responsible action. Overall I like this strategy, although a 4 unit on some of those inner city blocks might get a little tough.	7/10/2018
2565	63	/policies/food-access/	Expand taxation on unhealthy foods that lead to impacts on public health and the overall of healthcare for the public. Unhealthy nutritional habits result in higher healthcare cost, including rising premiums for healthy people simply because the liability of poor eaters is spread through insurance.	7/10/2018
2566	19	/policies/bicycling/	Cyclists suck! They do not follow the traffic rules. Why waste money in the far reaches of the city with less traffic and place bike lane? It only makes sense in denser areas. The Mpls Bike Coalition or whatever they are called now are obnoxious too.	7/10/2018
2567	24	/policies/shared-mobility/	Bring on the electric scooters!	7/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2568	38	/policies/affordable-housing-near-transit-and-job-	<p>Hope this does not mean that affordable housing will NOT be placed in areas not well covered by transit. Low income people have the right to live in nice, not-busy places too. Plus all the cookie cutter retail on the bottom and apt on top are ugly as sin. Low income people have the right to live in quality places too. And let's face it 80% AMI housing is not really housing for low income folks. Or 60% for that matter.</p> <p>Come on Minneapolis - You need to do better!</p>	7/10/2018
2569	11	/policies/skyways/	<p>It'd be a good idea to also remove any requirements we have around providing seating for customers at restaurants in the skyway. This can help reduce the amount of space required for a store to open in the skyway and encourage smaller businesses to move in (like many food trucks have). Seating for customers can move to shared/common spaces through out the skyway system. More variety in the skyway gives people more of a reason to come downtown and spend time and money here!</p>	7/10/2018
2570	91	/policies/heritage-preservation-outreach/	<p>Give funding to the Hennepin History Museum. Most of their collection is Minneapolis related anyways.</p>	7/10/2018
2571	6	/policies/pedestrian-oriented-building-and-site-de	<p>DO NOT eliminate off street parking minimums.</p> <p>"The City of Minneapolis Complete Streets policy prioritizes walking first, followed by bicycling and transit use, and lastly motor vehicle use. " This was developed by staff "Staff developed a Complete Streets policy to inform decision-making throughout all phases of transportation projects and initiatives." What input did the residents of the city have to this?</p> <p>"Require windows on buildings to allow clear views into and out of the building." This implies control of what is built next to existing buildings. The city will have to make sure new developments don't interfere with those clear views.</p> <p>"Implement and expand zoning regulations and incentives that promote bicycling, such as the provision of secured storage for bikes near building entrances, storage lockers, and changing and shower facilities." So we are not going to do away with zoning? How will this work?</p> <p>Surface parking lots are an ideal place to implement solar collection. Also to create greenspace surrounding them.</p>	7/10/2018
2572	96	/policies/heritage-preservation-recognition/	<p>Don't prohibit new gas stations. Control by zoning etc.</p>	7/10/2018
2573	53	/policies/quality-of-life/	<p>Don't become like crazy St Paul's commission. These houses are expensive to maintain - too many regulations prevent it.</p>	7/10/2018
2574	58	/policies/business-districts-and-corridors/	<p>Prevent the massive displacement of people currently living in North and Philips over the next 20 years. Stop gentrification. Allow low income folks to continue to live in the city.</p>	7/10/2018
2575	58	/policies/business-districts-and-corridors/	<p>Expand the Great Streets Service Areas to additional smaller nodes.</p>	7/10/2018
2576	78	/policies/park-design-and-programming/	<p>All funding goes to Lake, Broadway and Central. Spread the wealth of Great Street and CPED programming.</p>	7/10/2018
2577	40	/policies/homelessness/	<p>The Park Board's decision making process and funding of the new sexual violence survivors memorial is wrong. The new board did not follow its own rules. I want \$160k for all four parks surrounding me. I want art in all of them. The new board blows. Bourn and his tight knit crew.</p>	7/10/2018
2578	0.1	/topics/land-use-built-form/	<p>Supportive Housing and especially Housing first models are a proven way to reduce homelessness and should be included.</p> <p>I love the upzoning in this plan, but I have one reservation. I currently live in 423 W 31st st, which is a 3 story, 6 unit building. The proposed zoning for this lot will be interior 2, which only allows for up to 4 units at 2.5 stories. I would like the proposed zoning to at least reflect the current use of the lot, so it should be upzoned to interior 3. I believe there are many more buildings like mine on Garfield, Grand and Harriet that should also be made at least interior 3.</p> <p>Thank you for all of your work! I'm a big fan of the plan.</p>	7/10/2018
2579	19	/policies/bicycling/	<p>Bravo! Keep focusing on this necessary transition to alternative modes of local transit, like biking and walking. But also understand that the needs of visitors and irregular travelers need to understand the culture of bicycling, including flexibility on transit times and weather allowances.</p>	7/10/2018
2580	33	/policies/affordable-housing-production/	<p>I am looking for ways you expect to carry out these actions for affordable housing. I am skeptical. Developers want to build luxury units. In the past some units in a building were reserved for affordable housing. I recommend this again as one option.</p>	7/10/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2581	28	/policies/msp-airport/	Noise mitigation must be a priority, especially since Minneapolis bears the brunt of airport noise issues. Technology exists to make airliners quieter without compromising safety. But this technology is more expensive. So airlines need to be required to make these upgrades by communities, such as ours. It is not sufficient to simply solve the problem by installing windows and air-conditioning in people's homes to "solve" the noise problem— all usage of the city, from outdoor spaces to working spaces, to homes with the windows open, to backyard gatherings must be able to live in an environment free of excessive noise. If you must pause a conversation because of an airliner passing overhead every 90 seconds, that is not an environment which is conducive to any activity, business or personal.	7/10/2018
2582	80	/policies/development-near-metro-stations/	This is a cart-and-horse problem: the cultural shift necessary to encourage all residents to embrace transit requires that transit be convenient, economical, and culturally and socially accepted. But the funding to do those things, traditionally, comes only based on ridership numbers—that is, you must first have the riders before you can offer the amenities. This is logical, but ultimately doomed to failure. This plan must encourage a action forward approach to developing regular, reliable, and fast transit combined with a information and public awareness campaigning to encourage ridership. And this must necessarily include the majority of city residents and visitors who are not already located close to the train lines—with rapid, reliable and regular links to those services. Case in point: to get from my neighborhood in near south Minneapolis to a client in east St. Paul takes 22 minutes by car, or 90 minutes by transit. Even during the worst of rush hour traffic, the drive time is still a fraction of the transit time. This must change if you expect people to adopt transit options—and it must change by improving transit times, not worsening driving times.	7/10/2018
2583	21	/policies/freight/	It is very good that you acknowledge this vital part of the business culture. However, it is ridiculous that rail and truck freight which is not originating or terminating in the cities must still use transit corridors through the city. This traffic should be preferentially routed around the dense urban areas—including rail lines! By changing the attitude of the 94 & 35 corridors within the cities to "local traffic only," this can be solved. But that requires coordination with the met council—and organization that Minneapolis should continue to actively support!	7/10/2018
2584	11	/policies/skyways/	Skyways should be as public as sidewalks. The ideas presented here certainly look in that direction, but stop short of the notion of "all access, all hours" approach. Skyway design, in addition to more visibility, should better match the grid structure of the city. Instead of relying on building names for way finding (which are cryptic to visitors and infrequent users) use recognizable street names and numbers. Just like we do for streets.	7/10/2018
2585	18	/policies/walking/	Way finding is a sorely overlooked problem in the city as well. Many intersections downtown are not adequately labeled for proper orientation and placement of visitors and infrequent travelers. This is true for pedestrians, and doubly true for bicycles.	7/10/2018
2586	24	/policies/shared-mobility/	And communicate, communicate, communicate! Frequent users and first-adopters are not the challenge: it is visitors and infrequent users who, confused with he wide array of incompatible options, will always revert to the simplest option: just drive. Consider a business traveler here for two days to meet with 4 different clients: how would they get around? Solve that problem, and you've solved it for (nearly) everyone. It can't just be about commuters—especially given the increasing trend toward non-traditional work arrangements, occasional workers, multi-location work, etc. Think outside the traditional commuter box if you want to really solve Minneapolis' transportation problems.	7/10/2018
2587	15	/policies/transportation-and-equity/	Yes! But remember, it cannot be measured only by volume of commuters. Visitors and infrequent users, their ability to understand and easily use the system, in an efficient and cost effective manner should be the true measure of effectiveness; success here will naturally bring the commuters and regular travelers along as well. Make sure you are fighting the right battles!	7/10/2018
2588	76	/policies/new-parks/	I would like to see a focus on areas that completely lack access to public green space and not hold those areas to the 10 minute walk rule.	7/11/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2589	42	/policies/expand-homeownership/	<p>To expand home ownership and promote the improvement of the community for investors there needs to be a significant difference in subsidies or taxes awarded to those who actually live in the city, or even more directly in that ward.</p> <p>With regard to the newly labeled Opportunity Zones throughout our city the tax benefit does not extend itself to the end user at all. Capital gains isn't even a realized notion for the mass majority of first time home buyers let alone renters.</p> <p>The program we have for empty city lots for first responders and teachers is a good start but still quite a stretch when having to build a new home that in today's market far exceeds comparable values in under served neighborhoods.</p> <p>Down payment assistance. Property tax forgiveness on a term basis or at least a deferred option. For those CURRENTLY residing in the city/Ward/neighborhood. It could be on a tiered basis even.</p>	7/11/2018
2590	18	/policies/walking/	I would like to see more investment in signage (paint) on the sidewalk in densely populated areas indicating no bicycle riding on the sidewalks. You could use floor area to land area or some other measure like pedestrian count to determine the boundaries where the sidewalks would have signs painted (like the ones in Uptown).	7/11/2018
2591	49	/policies/educational-and-economic-access/	Is this the only place where education is addressed in the 2040 plan? We seem to be missing a big piece of our city's future!	7/11/2018
2592	19	/policies/bicycling/	This must specifically focus on expanding the accessibility of biking by making a comfortable and safe network of protected bikeways. It's fairly mindboggling that they are not included here when they should be the focus of bikeway investment. The City is making strides, but has much farther to go and must make more bikeways that are friendly for kids to seniors.	7/11/2018
2593	64	/policies/food-businesses/	The food supply chain also includes reducing waste through processing to extend the useful life (hence nutritional value) of produce. Minneapolis should develop and understand the entire food supply chain from production through consumption, and develop interfaces with other sectors, such as service industries (restaurants, schools, prisons, etc...) which can peel off layers of production to ensure that all opportunities to support economic development are employed. There are international experts on food security, supply, production, and delivery located in the Minneapolis area who can assist in understanding and benefiting from this lattice of related sectors.	7/11/2018
2594	0.1	/topics/land-use-built-form/	I am strongly opposed to the Land Use plan! I believe this plan is harmful to the communities it will be impacting!	7/11/2018
2595	0.1	/topics/land-use-built-form/	I strongly oppose the proposed built form district along West 44th Street. The Interior 3 district would allow for multiplexes that could take over half of a block on streets such as Washburn and Vincent Ave, where single family homes currently reside. We moved to this neighborhood because of the charm of the single family homes and character of the area. Please don't change the zoning for these areas as it opens up possibilities for denser development, which is not what we or many others in our neighborhood want or ever anticipated when we chose to live in the area.	7/11/2018
2596	64	/policies/food-businesses/	This city is Anti Small business. Continue to streamline and clarify business licensing processes for food businesses? How about de regulating current unrealistic requirements? You guys should be ashamed of yourselves.	7/11/2018
2597	0.1	/topics/land-use-built-form/	Rezoning is a terrible idea for our citizens. It will site help the pocketbooks of developers but there is NO reason to think it will improve AFFORDABLE housing. The resulting congestion and increased burden on our schools, streets and parks will be awful. Implement this plan as proposed and you will lose many of us who don't want to live in more congestion than we already have.	7/11/2018
2598	84	/policies/public-safety/	Why is there no mention of reforming police training? The mistrust of police is solely the police's fault and their abuse of power and fire arms. They need to readjust their training, perceptions, and prone to violence against people of color. A public health approach that does not treat this disease as it's core is inefficient and a waste of tax payer money.	7/11/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2599	84	/policies/public-safety/	<p>The policy on public safety is incredibly vague unlike the other policies. It does not address the issue of misconduct of those in positions of power.</p> <p>Furthermore, there needs to be a clear statement on police misconduct and brutality. Fear can not be a reason why an office kills residents when they chose this occupation. Have they no training? No one in the army would behave in this manner. There needs to be more effort in recruiting and creating an inviting environment for people of color to join the police force. I also recommend a prohibition of non residents from joining the Minneapolis police force. In addition, there needs to be clear consequences for police who overstep. Inaction on your part is damaging to our community and has become a breeding ground for power hungry, trigger happy, arrogant police. Instead of protecting the public, they are actively killing us with no cause, fabricating information, and knowingly harming residents with the knowledge that there are no consequences for their actions. Silence only supports these officers who continue to terrorize our communities. Do something about and stop being afraid to ruffle their feathers.</p>	7/11/2018
2600	33	/policies/affordable-housing-production/	<p>This sounds like the city wants to manipulate what people do with their property, how they invest, and how much they can charge for their goods and services, it sounds like a desire to increase manipulation of business and housing against the owners and investors. Stop interfering in the market, stop trying to rig the system for yourselves and campaign donors. Leave people the freedom to open businesses as they choose and provide housing as they choose. Allow more than 1 or 2 dwellings on a property. Quit creating barriers. Get out of the way of individual freedom.</p>	7/11/2018
2601	50	/policies/access-to-technology/	<p>Access to technology. Another proposal without clear goals and how we'll get there except through what seems like higher taxes (learn to live within your means city) and with more zoning laws and stupid ordinances reducing the individual, free right of the people. Stop. Just stop interfering in other people's lives. If you want opportunity and access get out of the way of the market and the freedom of the people. These things will come provided there are no barriers via the government. If you want real change, quit catering to your political donors and mob rule "social engineering" tactics.</p>	7/11/2018
2602	36	/policies/innovative-housing-strategies/	<p>We do not need another Detroit or Venezuela. It seems that people do not learn. We do not need another China or Russia, stop trying to socially engineer society at the expense of personal freedom in business and housing.</p>	7/11/2018
2603	89	/policies/technology-in-the-city-enterprise/	<p>Your technology policies need a statement about information security.</p>	7/11/2018
2604	25	/policies/innovations-in-transportation-and-infras	<p>This policy needs an action statement that addresses protection of personal data against cyber thieves and other information security threats.</p>	7/11/2018
2605	0.1	/topics/land-use-built-form/	<p>This is crazy. It is as if you are too lazy to plan out the city. You are going to ruin so many neighborhood needlessly for what little growth we are going to get.</p>	7/11/2018
2606	0.1	/topics/land-use-built-form/	<p>We vote NO! Interior 1 & 2 are where the single family (with some duplexes) homes are, most up-keeping their original stucco, stone or brick exteriors. Multi-lot tear-downs to build 2.5 story multi-family units (builder grade, no doubt) within these tight-knit neighborhoods is inane. It also directly contradicts 2040's opening proposal regarding "keeping Minneapolis beautiful [...] and community friendly." This plan is directly on the road to turning Minneapolis into Detroit. For those that pass this, please promptly relocate to Detroit and enjoy that City's former plans.</p>	7/11/2018
2607	1	/policies/access-to-housing/	<p>This will not address affordability, except in the most general terms of higher supply. As we've seen in desirable Mpls neighborhoods, new multi-unit dwellings are not affordable in the sense that this plan is trying to address. In particular to bullet "e": Re-zoning to allow for new multi-unit dwellings in primarily single-family neighborhoods will not provide affordable housing. But it will decrease the desirability of that neighborhood to those seeking a quieter, non-urban residence, and will have other negative impacts on utilities, city services, and quality of life in general including noise, light pollution, parking, etc.</p>	7/11/2018
2608	38	/policies/affordable-housing-near-transit-and-job	<p>Many transit corridors exist in original-construction, primarily single-family, non-urban types of neighborhoods. Great care must be taken if/when this type of development would take place. The type and size of any new construction must be compatible with its neighborhood. 4-level dwellings should be limited to business corners/corridors rather than placed among 1-2 story homes.</p>	7/11/2018
2609	0.1	/topics/land-use-built-form/	<p>4-story new construction along corridor 4 is acceptable ONLY at existing commercial nodes/corners. I strongly oppose the application of this policy for new construction of this type in and among 1-2 story homes due to the negative impact it would have on existing residences.</p>	7/11/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2610	0.1	/topics/land-use-built-form/	<p>2603 21ST ST W section.</p> <p>This is public land now owned by Hennepin County Regional Rail Authority. This land should remain in public land and should NOT be zoned for development. HCRRA has a Memorandum of Understanding with the city that this should remain public land.</p>	7/11/2018
2611	35	/policies/innovative-housing-types/	<p>I'm glad to see this as a topic being addressed by the plan. When I look around my neighborhood, I see potential for housing that better addresses the needs of seniors who want to stay in the neighborhood but need housing options with less stairs, and/or modern amenities.</p> <p>And, I see an opportunity to provide quality housing to young couples/families who'd like to live in quiet neighborhoods like Longfellow but not be responsible for the costs and maintenance associated with owning a single family home.</p> <p>-Ed Kohler Cooper</p>	7/11/2018
2612	53	/policies/quality-of-life/	<p>The floods and deaths happening now in densely populated and paved-over Japan should serve as a warning to the promoters of 2040 to make sure that the increased density they think is in the best interests of the citizens of Minneapolis will not, instead, result in a poor quality of life or no life at all because of the destruction of our environment. Will 2040 really "maintain and enhance the many built and natural assets" the people of Minneapolis love and need or is Action Step #3 of Policy 53 merely window dressing? Aren't increased density in already densely packed Nicollet, Lyndale, and Penn Avenues and "maintaining natural assets" mutually exclusive goals? I think so.</p>	7/11/2018
2613	18	/policies/walking/	<p>Snow/ice removal is a huge issue for walkability. I don't care about the vague goal of "Fostering vibrant public spaces for street life" half as much as I care about walking being a safe/comfortable option for the 4-6 months of winter in our city. Please do something concrete about addressing walking conditions in the winter. In my vision for 2040, the City of Minneapolis would be responsible for clearing all sidewalks.</p>	7/11/2018
2614	1	/policies/access-to-housing/	<p>Yes! Please allow and encourage more multi-family units within single family neighborhoods. We need more diversity and affordable units in ALL of our neighborhoods, not just "some" or the "other" ones.</p> <p>I would hope that the city works with developers to ensure there is a healthy mix of affordable housing and that we aren't just building 4-plex luxury housing.</p> <p>How amazing would it be to have a 4 plex along Minnehaha Creek! Or other water ways. We should have be able to enjoy our parks. Wasn't that the intention?</p>	7/11/2018
2615	33	/policies/affordable-housing-production/	<ol style="list-style-type: none"> 1. Require all multi-unit rental/condo housing projects over a set number of units to include a mix of low, moderate, and above units. 2. Promote the development of row houses with small yards. 3. Do not promote four-unit housing project on 50-foot lots, without parking spaces, in current single-family area. 4. We live in the Hale area, and there are many (two on our block) mini-houses on small lots, and the houses are set on the back of the lots. These mini-houses are being purchased by builders who are building expensive homes on the lots (this is destroying low-cost single-family units). If you allow four-unit building on these lots, the builders will turn them into four-unit projects. 5. Promote the mass production of SIP-built homes (thereby lowering the unit cost). 	7/11/2018
2616	49	/policies/educational-and-economic-access/	<p>I support increasing diversity of city jobs! We need all voices represented.</p> <p>Please work to support lowering costs of technical colleges and offering more financial assistance.</p>	7/11/2018
2617	1	/policies/access-to-housing/	<p>yes! more density, especially near transit, but also in neighborhoods that now mostly have single family homes. We need more density, but PLEASE mandate /provide incentives for affordable housing. More urban development for the wealthy, who more than working class and underclass, are (unfortunately) going to retain car ownership is counterproductive</p>	7/11/2018
2618	19	/policies/bicycling/	<p>Excellent. My bike is my main source of transportation, followed by transit. I hope more people (including seniors, like me) will make the decision to go without a car through these actions</p>	7/11/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2619	1	/policies/access-to-housing/	I think this is an excellent direction to take. We need more housing diversity in the far north and far south neighborhoods. All of the action steps in this section are much needed.	7/11/2018
2620	35	/policies/innovative-housing-types/	We are already affected by mega houses and tear-downs that we can't do anything about, despite our repeated attempts. Now the city is proposing to do the same thing and further change the homes and neighborhoods many of us bought into. Where do our voices get heard? Where do we get a say on where we live and what we want? Isn't it our money that is paying the ever increasing taxes? Rachel King - rachelhking15@gmail.com	7/11/2018
2621	1	/policies/access-to-housing/	We are already affected by mega houses and tear-downs that we can't do anything about, despite our repeated attempts. Now the city is proposing to do the same thing and further change the homes and neighborhoods many of us bought into. Where do our voices get heard? Where do we get a say on where we live and what we want? Isn't it our money that is paying the ever increasing taxes? Rachel King - rachelhking15@gmail.com	7/11/2018
2622	80	/policies/development-near-metro-stations/	Density does not guarantee affordability. Downtown Minneapolis is densely populated and includes a great deal of public transportation and is the most expensive place to live in the City. Another false assumption is that the Uptown area is or ever will be a thriving financially successful hub. It has been the site of many failed, empty and now low level businesses. The busses that run from the Uptown station are largely empty. And the traffic is so bad along Lake Street that it threatens livability. I also spotted 3 parking places by Lake Bde Maka Ska on a week night. The City "planners" (are these people licensed planners?) propose to eliminate on-site parking from all development. Where will the cars go? This level of density, shown in the drawing of 30 story buildings on the Calhoun Village site will overwhelm the entire neighborhood. The new Mayor from Virginia and the "planner" from Iowa who lives in St. Paul, must not understand the history and culture of Minneapolis: "The biggest small town in America", and the quiet neighborhoods we prize, maintain and live in for decades. Because of the recent rash of condo buildings in the Lakes area, our livability is severely threatened. I went out for a walk at 7:00pm midweek and turned back because of the congestion, exhaust and noise. The nature and livability of the Lakes are threatened by the very poor 2040 Comp Plan which allows no adequate green space to support such development. The greatest problem with the plan is that it breaks the law. Thirty years ago the courts granted the Shoreland Overlay ordinance that prohibits building within 200' of lake shore and restricts buildings there to tree-top level. So, this is a violation of the law. Over 5,600,000 people came to the Lakes for recreation last year. No one will come if the 2040 Plan succeeds. If it is enacted it will destroy Minneapolis. Our Mayor is supposed to be a supporter of the people, not an enemy of the people. He has sold something he does not own to developers, who will be the only winners if the 2040 Comp Plan is enacted.	7/11/2018
2623	0.1	/topics/land-use-built-form/	I am a home owner at 6029 Washburn Ave S, Minneapolis, MN 55410. Although I agree with most of the re-zoning plan, I would like to voice my concern over allowing 4 plex housing on the adjacent side streets like Washburn Ave S. I purchased my home here because of the neighborhood and the single family dwellings. I do not want to live across the street from renters or multi family units. I do not want the increased traffic, increased parking, potential low income. I feel as if it will hurt property values and create a more noisy neighborhood with greater turnover.	7/11/2018
2624	0.1	/topics/land-use-built-form/	I'm for increased public transportation and more pedestrian-oriented spaces. My main, and probably only, concern is that beautiful, tree-lined streets with historic and architecturally amazing single-family homes are gradually replaced by four-plex, multi-dwelling structures that rob the character of the area and that look soulless and empty. Why do that when we have so much green space that is good for the environment and replace it with more concrete which is not good for the environment. Plus people in many of these areas garden and I myself grow an edible garden which is also a positive environmentally situation. Please be careful and don't give it all away to money-focused developers and destroy character and charm in many of these old neighborhoods. Minneapolis has a horrible reputation for doing this, please don't be a part of something that is looked back in horror in the future.	7/11/2018
2625	13	/policies/landscaping/	This is extremely important to livability for everyone.	7/11/2018
2626	51	/policies/healthy-pre-k-development/	We should have early screening for hearing loss too. The level of noise pollution coming from loud vehicles and exploding fireworks have to have an impact.	7/11/2018
2627	4	/policies/access-to-commercial-goods-and-service	Please consider the negative impact of big box stores, on local economy as well as quality of street life	7/11/2018
2628	3	/policies/production-and-processing/	Balance job needs for working class citizens against the environmental concerns of affluent sectors by funding and/or partially subsidizing environmental mitigation technologies for production industry jobs as part of a comprehensive, targeted campaign to attract new businesses, and/or relocating businesses. Utilize local tech education and university resources to establish world-class additive manufacturing hubs that have hitherto gone to suburban communities. Actively compete for emerging production industry businesses in space and exploratory fields.	7/11/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2629	4	/policies/access-to-commercial-goods-and-service	prioritize local businesses for basic goods and services: good for our economy in obvious ways. But also having shopping that is unique to MPLSâ€”clothing housewares gifts etcâ€” is going to be good for generating tourist dollars. you can shop at the GAP in any city in the US and beyond, but shops that highlight local talent creativity generates excitement	7/11/2018
2630	16	/policies/environmental-impacts-of-transportation	Explore adding a Parking Surcharge who's proceeds would go exclusively to funding public transit in Minneapolis.	7/11/2018
2631	35	/policies/innovative-housing-types/	Strongly support! We need more diversity in types of housing available.	7/11/2018
2632	1	/policies/access-to-housing/	I write in support of these policies to increase density in ALL neighborhoods of Minneapolis. Our city has lost a great deal of du/tri/four-plexâ€™s in recent years, this is a trend that must be reversed. These types of dwellings allow density ti be added to neighborhoods in a way that easily allows the maintence of â€œneighborhood character.â€ They can also allow flexibility for potential homeowners, creating a lower cost entry point. Density along transit corridors should be supported, but allowing interior neighborhoods to become exclusively the domain of single family homeowners will not help Minneapolis undue the errors of the past and move the city forward.	7/11/2018
2633	33	/policies/affordable-housing-production/	Yes! We must support affordable housing	7/11/2018
2634	37	/policies/mixed-income-housing/	Segregated enclaves of wealthy single family home owners should not be the norm. Or city needs mixed income neighborhoods	7/11/2018
2635	41	/policies/tenant-protections/	Renters have long been treated as second class citizens in Minneapolis, it is time to step up protections for the majority of our residents.	7/11/2018
2636	15	/policies/transportation-and-equity/	Future transit must work to undue years of disinvestment in areas of the city. Strongly support equitable transit policies	7/11/2018
2637	16	/policies/environmental-impacts-of-transportation	Now is the time to stop prioritizing the automobile. We need strong policies that will help undue years of car-centric development.	7/11/2018
2638	17	/policies/complete-streets/	We need complete streets now with struck adherence to these ideas. No more lip service and concession to the automobile	7/11/2018
2639	18	/policies/walking/	Walking should be easily accessible to all. Sidewalk experience must be improved for people with all levels of mobility	7/11/2018
2640	18	/policies/walking/	Narrower streets!	7/11/2018
2641	19	/policies/bicycling/	Bicycling should be made accessible to as many people as possible. This means creating safe areas to bike that are TRULY protected from cars. Paint and bollards are not enough to make most people feel comfortable. These lanes are continually blocked by cars, filled with snow, become de facto turn lanes, etc etc etc. We donâ€™t need bike lanes on every street, but we do need is a robust system of safe, protected bikeways.	7/11/2018
2642	20	/policies/transit/	I support imroving our transit system	7/11/2018
2643	6	/policies/pedestrian-oriented-building-and-site-de	Pedestrian friendly cities are vibrant and interesting cities. We need policies that make that encourage a pedestrian friendly environment	7/11/2018
2644	47	/policies/housing-maintenance/	I just wanted to add my voice that I think this is a policy that could specifically help the residents in North Minneapolis. Many of these homes are 90+ years old, and in need of proper maintenance. Often residents cannot afford some of these things, due to income disparity. You also have issues with homes that are currently rental units, where properties are falling willfully into ruin. That being said, North MPLS has some of the most beautiful homes in the city, and great people live here. It would be amazing to see what ideas could be generated to save and revitalize many of these structures. And while I don't have specific ideas to that end, I'm hoping attention is placed on this in 2018/19. While its inevitable that the landscape will change, saving some of these gorgeous turn-of-the-century homes should have some value.	7/11/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			<p>This comment refers to the addresses 34, 38, 44, 50, 72, and 80 Minnehaha Parkway West. These currently are single-family dwellings which are proposed to be zoned Interior 3, which would allow 3-story apartment buildings. The description of Interior 3 is "...applied adjacent to a Corridor 6 district serving as a transition to lower intensity residential areas." However, these properties do not abut Corridor 6 buildings. Instead, they face Minnehaha Creek, Minnehaha Creek Park, and the Nicollet Avenue bridge over Minnehaha Creek. This stretch of Nicollet is not proposed to be zoned Corridor 6, because it is a bridge over park land in the valley. There are no buildings along it. It is not colored purple on the map. Therefore, it is inappropriate to zone these properties as Interior 3, because there is no need for a transition. They should be left as Interior 1. I am the homeowner at one of the above addresses. I could not in good conscience sell to a developer who planned to erect 3-story apartment building on the site. It would detract from the beauty of the park (including the creek and hiking trails), and destroy the atmosphere of the neighborhood. I'm becoming elderly and will have to move one of these years, but I could not bring myself to do such a thing to the Park Board or my neighbors.</p> <p>My next comment is about classifying some portions of Belmont Avenue between W. 50th Street and Valley View Place as Interior 3 instead of Interior 1. Belmont is a narrow, winding street: there is space for parking on one side of the street and one lane of traffic. Increasing the residential density along this street does not seem wise. The map seems to make this street appear wider than it actually is. While some of the nearby streets can accommodate parking on both sides and one lane of traffic, Belmont can not.</p> <p>It seems presumptuous to zone Justice Page Middle School as Corridor 6 and leave the adjacent Washburn High School as Interior 1. If this plan succeeds, the school district will need plenty of space. It seems unlikely they would sell the Justice Page site to a developer.</p> <p>I hope your planners actually inspected the areas, especially the areas to be classified as Corridors 4 and 6. It seems as if someone sitting in an office behind a computer simply looked at the #5 and #18 bus routes south of Franklin and colored them purple without giving any consideration to what is there.</p> <p>Thank you for the opportunity to comment. My remarks are about one neighborhood. I'll leave more global comments to others.</p> <p>Steve Tsai tsaisim2002@aol.com 612-827-6737</p>	7/11/2018
2645	0.1	/topics/land-use-built-form/		
2646	1	/policies/access-to-housing/	3 and 4 story buildings should be allowed throughout the city	7/11/2018
2647	1	/policies/access-to-housing/	It seems to me that allowing developers to replace aging, smaller, homes with new fourplexes will result in the opposite affect: reducing the number of housing units accessible to low income renters or buyers. I agree this might be fine on major streets (although I suspect few exist). But making this an option city wide seems counterproductive to the goals of 2040.	7/11/2018
2648	19	/policies/bicycling/	I think you need to be more strategic in the placement of bike lanes. Putting them on busy streets like 26th and 28th St. (when the Greenway is nearby for use) just jams up car traffic for the benefit of a handful of bikers during busy periods and is producing an angry backlash. I'm a lifelong biker and I don't like to ride on streets with heavy car traffic. Be smarter about where you put bike lanes. Remember, 5 months a year most bikers don't ride - its' cold outside.	7/11/2018
2649	15	/policies/transportation-and-equity/	This one is tricky, since the city doesn't control the bus or light rail system. Given the cost and resistance to funding rail small and normal buses are going to be the best way to move people in much of the city. I think the city is going to have to fun some of this to make it happen.	7/11/2018
2650	78	/policies/park-design-and-programming/	I think our parks department does a very good job on most of these goals. But I also suspect the system is overbuilt for the resources available to staff and maintain facilities. I suspect that reducing the number of parks can be done in a way that still allows access for residents. I grew up around Chicago, where the parks were the major source of activity for young people. Programming is more important than number of facilities. Having parks with limited hours and few staff to staff activities is worse than people having to travel a bit to reach a part,	7/11/2018
2651	50	/policies/access-to-technology/	Subsidize access to internet city wide, maybe even build a system. It's integral to life and business today.	7/11/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2652	49	/policies/educational-and-economic-access/	<p>Just be care about assuming that all racial disparities are the result of white racism. Some reflect cultural patterns that work against success in school and today's workplace. Better to create and support opportunities for families to change those patterns than to dictate to teachers and principals how to get the best results with their students.</p>	7/11/2018
2653	1	/policies/access-to-housing/	<p>I am extremely opposed to this plan - especially the explosion of fourplexes and enormous high-rises that are called for in numerous neighborhoods, including mine. I live in ECCO - there is no shortage of apartments in the neighborhood. There is a shortage of affordable apartments in the neighborhood. The problem began, not from a lack of available units, but from the enormous number of high end units that went in. As soon as those units went on the market, all of the lower end units raised their prices to be just under the high end buildings - and all the affordable housing options disappeared. We are continuing to add high end units when there are buildings half vacant all over Uptown.</p> <p>This plan, which is supposed to provide affordable units, does nothing to actually control the cost of building units, or the rental costs. Instead, it's doubling down on the "free-market" nightmare I've been living in for the last 17 years, where the addition of units is driving prices up, not down.</p> <p>An effective solution to create affordable housing requires some combination of subsidies for builders to make affordable housing a reasonable business proposition, subsidies for more renters to make more house affordable to them, and some form of rental regulation to ensure that there rental market stays in line with incomes. This plan has none of the above features.</p> <p>What it does do is add more buildings and development, which make the neighborhoods less attractive as places to live. The result will be overcrowding. The only way this plan will create affordable housing is by driving home values down, when everybody moves out of their neighborhoods and back to the suburbs.</p> <p>I cannot tell you how frustrating it is to discover that this is the best that Minneapolis can do with it's planning. The plan completely ignores the interests of the residents in those neighborhoods affected, and completely fails to provide assurance that affordable housing will be developed.</p> <p>You need to start over and develop policies that actually address the underlying causes of the lack of affordable housing - the city zoning laws aren't the cause of these problems.</p>	7/11/2018
2654	14	/policies/tree-canopy-and-urban-forest/	<p>So many new trees here in Whittier. I wish that there was more outreach to neighbors to water regularly! It would be great to see more flyers on our doors, and also direct outreach to apartment companies or perhaps even a requirement that they water new trees!</p>	7/11/2018
2655	1	/policies/access-to-housing/	<p>I support increasing housing diversity and density as doing so will help us create a more affordable, accessible, and inclusive city.</p> <p>I do not believe neighborhood interiors should be exempt from new housing types that do not fit within the existing range of housing. The types of housing that have been allowed in the past are a remnant of the exclusionary zoning meant to hoard opportunity, especially on racial lines. By restricting denser development to neighborhood exteriors (and on busier roads) we are forcing more people to live on more polluted, more dangerous streets. Given that those people are likely to be lower income the restriction of higher housing density to neighborhood exteriors is an inequitable policy.</p>	7/11/2018
2656	2	/policies/access-to-employment/	<p>We should simplify our zoning code to reduce categories of use zoning. Offices and service industries do not require separate zoning. Allowing the development of mixed use housing and commercial buildings throughout the city would enable shorter (or no) commutes and trips, including more trips via walking, biking, and transit.</p> <p>Development will naturally follow demand, including the demand from transit investments and other infrastructure investments. There is no public purpose served by limiting office and institutional uses to current locations. Truly noxious uses can be treated separately from office and institutional uses.</p> <p>I believe the general goal of this policy will be better served by the City advocating for a land-value tax instead of attempting to regulate via minimums.</p>	7/11/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2657	4	/policies/access-to-commercial-goods-and-service	The success of this policy depends on the City accurately judging where demand is sufficient to support additional commercial properties. Instead, the City should stop regulating uses that don't produce negative externalities. I do support this policy and action steps as a second best proposal.	7/11/2018
2658	81	/policies/social-connectedness/	The Whittier Alliance has never truly represented our neighborhood. Just a handful of white homeowners trying to prevent any new affordable housing and protect their parking. The old strategic plan for the Whittier Alliance called for REDUCING affordable housing by half. Cautiously optimistic about the new plan due to come out soon... So, the point is that the city should make sure neighborhood organizations represent people of color, renters, immigrants, etc... or lose funding!!	7/11/2018
2659	19	/policies/bicycling/	YES! to better bike facilities. The new protected lanes should only be a start! Every street should be a bike streets. Bikes are the solution in so many ways. Let's build more bike infrastructure and celebrate bikes as clean, pro-social transportation!!!!	7/11/2018
2660	17	/policies/complete-streets/	Yes to Complete Streets!!! WE need to charge for parking. We need to build new buildings with NO parking provided. We need more transit, more boulevard trees, more beautiful sidewalks and bike lanes. And then we need education! If people really knew the true costs of their driving habits, they would think twice. All these cars criss-crossing our neighborhoods make kids not want to walk to the park! Stop driving people! Think about how your individual action damages your community!!! So yes, we need carrots and sticks for people to stop mindless driving. Everybody thinks they have some special right to drive from their home to the grocery store, or their kids friends house, or their job - without even thinking how that action makes it harder for kids to walk, requires endless pavement for parking, drives up costs, makes for less space for native habitat. Enough said - I like every part of this plan that reduces car use and increases spaces for kids to play!!!!!!	7/11/2018
2661	6	/policies/pedestrian-oriented-building-and-site-de	I agree with the majority of the action steps for this plan. I disagree with action step g. We should allow and encourage shadows in the public realm. During the hot---and due to climate change, likely to get hotter---summers, people naturally congregate where there is shade. I especially support action step k. We should also require separate leases for parking spaces in buildings, and price all city-owned parking based on demand, either through meters or parking permits. No on-street parking in the City should be free. If we believe climate change is real, as I do, we can't justify providing a subsidy for driving.	7/11/2018
2662	7	/policies/public-realm/	I support this policy, but believe that public investments should be paid for by the public at large, not individual developers. If we're not willing to levy a general tax and pay for improvements out of the general funds, it's likely that the investment doesn't meet standards for true public investment.	7/11/2018
2663	8	/policies/public-safety-through-environmental-de	I'm supportive of this policy, but would add that promoting natural observation is easier with additional eyes, which means greater density. In the diagrams provided, the assumption is that there are three to four story buildings.	7/11/2018
2664	9	/policies/open-spaces-in-new-development/	I support creating open spaces intended for active use. The Central Avenue Small Area Plan includes a proposal for creating an Art Walk along Central. That idea should be included in the Comprehensive Plan.	7/11/2018
2665	10	/policies/street-grid/	I fully support this policy. I would add that we should study freeway caps or the removal of freeways through the City entirely. We will never restore the street grid so long as we prioritize suburban commuters over people who live and work in the City.	7/11/2018
2666	63	/policies/food-access/	Action steps need to include more language that relates to culturally appropriate food. Perhaps under f, d.	7/11/2018
2667	16	/policies/environmental-impacts-of-transportation	We should price all city-owned parking based on demand, either through meters or parking permits. No on-street parking in the City should be free. If we believe climate change is real, as I do, we can't justify providing a subsidy for driving. I fully support a congestion tax.	7/11/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2668	17	/policies/complete-streets/	I agree with the policy, but I would like greater specificity about process and standards given the past failures of the Council to adhere to the principles here.	7/11/2018
2669	18	/policies/walking/	I wholly support this policy. I would like to add that we should consider municipal clearing of sidewalks and eliminating beg buttons. Street crossings should be automatic, and not determined by any level of service standard; we not only want to accommodate existing pedestrians, but encourage more people to walk.	7/11/2018
2670	19	/policies/bicycling/	We need to increase the network of protected bike lanes and be willing to slow traffic. Bikers' lives are more important than drivers' commute times.	7/11/2018
2671	26	/policies/vision-zero/	I support this policy, but disagree with the focus on community engagement for further developing the Vision Zero policy. We know what investments and policies, based on data, reduce crashes and deaths. Don't put public safety up for a vote by people who won't bear the cost of the decision.	7/11/2018
2672	79	/policies/healthy-youth-development/	There needs to be another action item that covers food access.	7/11/2018
2673	29	/policies/creative-sector-economy/	If we want to ensure that children have access to stable housing, it is also extremely important that they have access to healthy food.	7/11/2018
2674	30	/policies/arts-and-cultural-assets/	The City should create a public bank to support small and local businesses and developers.	7/11/2018
2675	0.1	/topics/land-use-built-form/	The Central Avenue Small Area Plan includes a proposal for creating an Art Walk along Central. That idea should be included in the Comprehensive Plan.	7/11/2018
			I strongly disapprove of this policy. I live in the Lindon Hills neighborhood and The last thing we need is packing more residents into this area. The only way into or out of this area from the east and north is along 38th to Richfield road and then along the south west corner of lake Calhoun. Already the traffic backs up badly during rush hour on this route. Putting more people into this area will just exacerbate an already bad traffic situation. Another, and more serious, reservation I have with this plan is that it does nothing to address the issue of "affordable housing" which was the underlying justification behind the proposal. Adding many more living units is no guarantee that they will be affordable. What building is going on in this neighborhood now is extremely high-priced. I can only see two outcomes of adding many more units to the neighborhood: either they end up being high-priced because the neighborhood is popular; or, if they are of a lower quality, they will drive down the property values and hence property tax income to the city. More housing in no way guarantees affordable housing If you are interested in creating affordable housing, some combination of subsidies to builders and low-income renters coupled with a mechanism to tie low-income rents to the cost of living would be much more effective than just blindly flooding our neighborhoods with multiple dwelling structures. What would make more sense than ruining thriving neighborhoods, would be to put money into rehabilitating aging and troubled neighborhoods and providing quality public transportation into and out of those neighborhoods -- BICYCLES WON'T DO IT! (And I am an avid bike rider.)	7/11/2018
2676	33	/policies/affordable-housing-production/	I'm supportive of this policy, but do not support inclusionary zoning as it has a long track record of failure.	7/11/2018
2677	35	/policies/innovative-housing-types/	Make it easier to build rowhouses by right.	7/11/2018
2678	37	/policies/mixed-income-housing/	I disagree with action step b. We should include incentives for affordable housing development, but making inclusionary zoning mandatory, or holding back development of market rate units in order to force developers to build affordable units, is a failed policy everywhere it's been tried and should not be attempted here.	7/12/2018
2679	53	/policies/quality-of-life/	How you we improve quality of life in our city without any actions around investments in food for the citizens. Take Action #1 from Policy #63. Assess and review the spatial distribution...etc	7/12/2018
2680	75	/policies/waste-reduction/	Action item j needs to include priorities other than separating organic waste from the trash. The first priority is to allow for donation of edible organic waste for consumption, then for feed animals, then down the line sending the material to organic waste if that's the last option. Similar to reduce, reuse, recycle. These priorities should be incentivized first with organic recycling as the final option (as opposed to landfill/incineration).	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2681	66	/policies/air-quality/	<p>I'd like to see wood smoke fires no longer permitted. We don't track people with disabilities in Minneapolis, but if we did, I wonder how many people have sensitivities to toxic chemicals -- including wood smoke. The EPA warns us about woodsmoke. I would prefer to see city residents use gas fires for recreation and gas/propane and charcoal grills for cooking outdoors. Burning wood is not necessary. Personally, I'm a prisoner in my own home when a neighbor decides to have a fire that produces wood smoke because of my health condition.</p> <p>Rebecca St. Martin</p>	7/12/2018
2682	69	/policies/renewable-and-carbon-free-energy/	<p>First. CARBON TAX.</p> <p>Then...I'd love to see greater emphasis on rainwater collection and filtration for residents, as well as solar. Discounts or subsidies for solar installations especially for neighborhood groups. Property tax incentives.</p> <p>Deferring upfront costs for one year so users have time to reap its benefits prior to paying off the install.</p> <p>Similar to how the auto industry was bailed out to prop up their survival, the same can be done with renewable energy to spur growth.</p>	7/12/2018
2683	1	/policies/access-to-housing/	<p>I think this is a huge step in the right direction! I'm 33 years old, and I spent much of last year looking for a house to buy near my work in South Minneapolis. There wasn't anything available in my price range. I love the idea of creating opportunities for more multi-family housing, both to help ease demand, and also to create opportunities for home-ownership that aren't only single-family homes (I love the idea of owning or co-owning a fourplex).</p>	7/12/2018
2684	0.1	/topics/land-use-built-form/	<p>I appreciate the way this plan allows for diverse housing throughout much more of the city. A couple of things:</p> <ol style="list-style-type: none"> 1. Why not allow small commercial development in neighborhood interiors? I love love love existing corner stores/coffee shops/bookstores/etc that exist outside of commercial corridors-- they make neighborhoods livelier, more interesting, more communal places. 2. I wish that the plan allowed for more density in some parts of the city, particularly in the area surrounding the lakes. That area is, arguably, the most beautiful part of the city. It's also very near Uptown and lots of transit lines. Why not allow for something more than a 2.5 story building in that area? 	7/12/2018
2685	2	/policies/access-to-employment/	<p>Yeah! More and denser housing near downtown and adjacent to all transit lines, please.</p>	7/12/2018
2686	6	/policies/pedestrian-oriented-building-and-site-de	<p>Yes to Complete Streets! Give pedestrians, bikes, wheelchairs the advantage they need to prevent deadly interactions with cars. Ultimately, we are all pedestrians.</p>	7/12/2018
2687	4	/policies/access-to-commercial-goods-and-service	<p>Yeah! I like this step. And I think it could go farther, and allow for light commercial development in more areas.</p>	7/12/2018
2688	80	/policies/development-near-metro-stations/	<p>Yes! Esp goals f-i: so many transit stations in Minneapolis are very unpleasant to be a pedestrian near. (I'm thinking of Blue Line Midtown and Franklin Avenue stops in particular). I know that the auto-focused environment around these stops makes using transit for me less pleasant and safe-feeling, and I imagine it discourages people from using it period.</p>	7/12/2018
2689	6	/policies/pedestrian-oriented-building-and-site-de	<p>Yeah! Especially goal k: please no more parking minimums. I hate that the city mandates that many new developments still feature off-street parking, which locks us in to an auto-centric development pattern. And goal d is great, too. It's always unsettling (or just depressing) to walk by a giant, blank wall as a pedestrian. So much of downtown is like this. As for goal n: how will the city "discourage" the establishment of surface parking lots?</p>	7/12/2018
2690	1	/policies/access-to-housing/	<p>Downtown does not exactly offer many jobs to low income people. Concentrating low income housing in downtown Mpls will lead to concentrate poverty near downtown Mpls which, it turn, may lead to more social/racial segregation in schools near downtown. Why not spread job opportunities and housing opportunities all over the cities and increase access to public transportation. In that way, a low income person can potentially live in Kenwood, have his/her kid go to the high achieving schools in the area and benefit from the lower crime rate in the area too. Redistribution of resources instead of concentration of disparity is the way to goal.</p>	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2691	0.1	/topics/land-use-built-form/	The land use guidance around some of parks and public spaces, especially around Loring Park, is misguided and counter-productive to the city's future vitality. Around Loring Park, 15th Street and Willow Street should NOT be considered Corridor 6 major transitways and should NOT be deemed suitable for commercial development or dense residential high-rises. The character of the Loring residential neighborhood stems directly from the park at its center. Development around the park borders should not emphasize high-rise, urban density.	7/12/2018
2692	36	/policies/innovative-housing-strategies/	Better addressing affordable housing needs will take an all-of-the-above strategy: New dedicated funding for dedicated very low income housing at local, state, and federal levels; public land disposition at reduced price in exchange for affordability; mixed-income policies that leverage market power to create units serving a broader range of incomes; financing tools and code changes to allow homeowners to better use existing properties as duplexes/triplexes/with ADUs; and, not least of all, support for increased housing supply for both rental and ownership and in all areas of the city, especially those that are in high demand, gradually increasing the density of the whole city without a burden of drastic change in any particular place.	7/12/2018
2693	42	/policies/expand-homeownership/	In addition to the above - all of which require specific funding sources and commitments with teeth: Address supply constraints by adjusting land use/built form guidance and providing financing tools and incentives to support condo, townhome, "bungalow court," and other attached or semi-detached development to provide more homeownership options at lower price points in more neighborhoods throughout the city.	7/12/2018
2694	37	/policies/mixed-income-housing/	As the city develops inclusionary zoning policy, I would urge planners to examine the experience of cities such as Portland, where overly aggressive IZ has led to sharp fall in the number of units being developed and only a small number of affordable units becoming available. If IZ makes projects fail to pencil out, then it doesn't accomplish much.	7/12/2018
2695	0.1	/topics/land-use-built-form/	8 stories needs to be added as a category. This type of construction type will soon be common in Minnesota, which consists of 5 stories of stick frame construction over a 3 story podium. This exact construction type is currently one of the most predominant types underway in California. When this construction type is approved by the state of Minnesota, it will quickly become the go-to construction type due to its cost efficiency.	7/12/2018
2696	20	/policies/transit/	Work with Metro Transit to remove every other stop on all routes. There are numerous studies by Urban Economists that highlight that removing these stops will actually increase ridership since it will allow for faster and more reliable travel.	7/12/2018
2697	41	/policies/tenant-protections/	The Comprehensive Plan should specifically identify tenant protections, including the following: *Funding housing attorneys for everyone in housing court *Right of first refusal to buy converted buildings *A just cause eviction ordinance *Relocation assistance *Tenant emergency fund	7/12/2018
2698	19	/policies/bicycling/	These are great first steps, but I don't believe they are enough. As a parent with young children, I want to feel safe having them with me on my bike and/or biking on their own. Research points to lanes needing to be in a grid (like motor vehicles are provided) and separated from traffic by a physical barrier. Minneapolis is a great city that could set national standards, but being on the top, we may need to look outside of the US to set these goals. www.880cities.org, a non-profit dedicated to liveable cities, suggests that the measure of a good city is if it works well for an eight-year-old and eighty-year-old -- Minneapolis can be this place! Go 2040!	7/12/2018
2699	0.1	/topics/land-use-built-form/	Tonight Lisa bender told me, and other residents, that it's too bad we're going to lose equity in our houses. Her concern is renters and homeowners and their concerns are not a priority. She and Worthington wouldn't recommend an alternative investment vehicle to replace the one they are destroying with indiscriminate massive density increases. It's a disgrace.	7/12/2018
2700	18	/policies/walking/	Living near in the Cedar Isles Dean neighborhood, I have seen a lot of large apartment buildings built without large sidewalks, bike paths or bike storage. The impetus for these improvements should be placed on developers whenever possible rather than being developed by the city itself.	7/12/2018
2701	17	/policies/complete-streets/	This is WONDERFUL! There are so many great ideas worldwide to accomplish this work. The past and cities outside of the US will be our best teachers.	7/12/2018
2702	0.1	/topics/land-use-built-form/	I am very concerned about population density. Is the area's infrastructure able to handle the amount of people expected in these areas. We should be updating our water lines, widening roads adding to the parks etc	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2703	56	/policies/supporting-small-businesses/	This should be more specific. I suggest that that action step (a) should include "by providing dedicated resources in staffing who can focus solely on the needs of small business." My reasoning is that it is very hard for staff to not have their attention drawn to the resources big business has to lobby for their needs. Small business doesn't have those resources and the economic impact of small business merits providing such dedicated resources.	7/12/2018
2704	1	/policies/access-to-housing/	e. I think that such a broad action step belies responsible PLANNING. While we need to be creative about ways to accommodate increased density more broadly, to encourage it such a helter-skelter manner will be counterproductive. Instead, density should be achieved more organically, emanating from the denser corridors, not simply thrown into areas that are currently less dense.	7/12/2018
2705	1	/policies/access-to-housing/	No thank you. As a resident for years along with living in several others major cities; Cincinnati, Charlotte, Denver, Phoenix, and Detroit - this plan screams for overpopulation on an interior structure that will not be able to handle the influx of people. Been to Charlotte lately? If not, go there and drive the interior within the loop. I also have MAJOR concerns over homeowner value as well as how school systems will be impacted or upgraded to handle the influx. What you are proposing does not solve the issue of racial disparity or income inequality you seem to think it will fix. NO TO THIS PLAN.	7/12/2018
2706	15	/policies/transportation-and-equity/	Equity should also specifically ensure to address people with different abilities having adequate access to transportation needs, to include motor vehicles and access to public transportation. I have seen in Amsterdam in particular, where bicycles rule the road, the pedestrian movement can be very dangerous. While bicycles must be an important part of our transportation plan, it should be implemented in a manner that ensures the safety of pedestrians . Additionally, motorized vehicle traffic is entirely necessary for many in our city, for a variety of reasons. If we want to ensure that equity includes equity in age and ability, and in specific needs, not to mention environmental quality, our transportation plan must allow for efficient movement and flow of motorized personal vehicles of all types, as well as non-motorized and mass transportation methods.	7/12/2018
2707	14	/policies/tree-canopy-and-urban-forest/	Love the idea but not sure how this ties in with your housing plan for over development of Interiors and Corridors. 4-6 unit buildings will take up most of the lots and necessitate tree removal.	7/12/2018
2708	4	/policies/access-to-commercial-goods-and-service	With the rise of online purchase behavior, I have serious concerns over creating space for additional retail when local malls are struggling to keep anchor stores in place. While high end boutiques seem to be performing well, the housing plan to benefit lower income families would not support this type of retail. If a consequence of lower income family housing creation is more affluent flight from the city, these commercial locations could fall into disrepair and/or be converted into less than desirable retail fronts.	7/12/2018
2709	37	/policies/mixed-income-housing/	-I support more affordable housing policies, including reducing or getting rid of exclusionary zoning (zoning that only allows for single family homes) -I'm in favor of affordable housing near transit and job centers -I support multifamily housing city-	7/12/2018
2710	1	/policies/access-to-housing/	We chose Minneapolis because we don't want a high density city, similar to NYC or Chicago. We also chose our neighborhood because it is comprised of mainly single family homes or duplexes. We have narrow city streets, already with inadequate parking. This also hampers emergency vehicles from successfully navigating streets. Our schools are filled to the limit or over capacity, with annual proposed budget cuts each year. We simply cannot absorb housing with up to four units and no planned parking. I realize Minneapolis wants the city to move away from cars, but that is unrealistic in a climate that is winter from November through April, and with a transit system that is not very effective. Had Minneapolis chosen to build an underground transit system that was more efficient at reaching all aspects of the city, it might be possible. But a couple light rail lines isn't going to do it. Why is increased density a goal? Or at least a goal for the entire city? We are strongly opposed to a blanket change in zoning laws.	7/12/2018
2711	1	/policies/access-to-housing/	Not in favor of this action.	7/12/2018
2712	1	/policies/access-to-housing/	Parking will be a challenge as I fear most won't adopt the mass transit plan that is part of this proposal. Increased cars will clog street parking and put an additional strain on roadways, especially in the outer areas of the city. Please re-think this plan.	7/12/2018
2713	50	/policies/access-to-technology/	It is very important that any private developers of our city's tech infrastructure must be regulated to ensure the security of citizens' private information and outside party's access to such information limited to only what is absolutely necessary. Clearly this should be true of government access and use as well and the privacy of citizens' data should be paramount in technology decisions.	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2714	1	/policies/access-to-housing/	<p>A neighborhood of 'single family' homes is not, in any negative sense, homogeneous. Those homes may be occupied by people of all ages and races, families with and without children, and individuals who choose to and are able to live in a house rather than an apartment. Increasing the number of fourplexes reduces the investment residents have in their neighborhood and introduces a level of instability (increased noise and less responsible treatment of the physical space being almost universal outcomes). The fourplexes that already exist on our residential streets push the envelope for many, as far as livability goes. Increasing the number of such units in Minneapolis's currently vibrant, diverse, and livable neighborhoods will push middle-class residents into the suburbs (or into St. Paul!).</p>	7/12/2018
2715	0.1	/topics/land-use-built-form/	<p>As a lifelong citizen of Minneapolis (50 years), I oppose this plan. Here is why, I think the city needs to impose STRICT building rules for ALL private citizens and developers.</p> <p>I am fine with multi family units, in fact, most of our neighborhoods have multi family buildings existing in our neighborhoods now. The problem is that the city has been allowing citizens and developers to build to the full extent of the lot size. The new homes are overshadowing their neighbor's homes and are WAY too close to the property lines. It makes for an unpleasant neighborhood existence.</p> <p>Growing up in Linden Hills, our street had a varied landscape of homes. My family of 10, required a large home. However, we were lucky that the city planners had planned a neighborhood that allowed for homes of different sizes to accommodate different families.</p> <p>Next to our large rowdy family was a single senior citizen, an immigrant from Germany during WW2. She was a German Christian, who's family had fled Nazi Germany. Across the street, there was a duplex. In the duplex, lived 2 brothers and their wives. They were German Jews that had also escaped Nazi Germany. There were young families and seniors, immigrants, and families that had turned their family's original lakeside cabin (Lake Harriet) into a home. What a place to grow up! I learned so much about loving my neighbor from each of these people.</p> <p>The best part about this neighborhood was the space between our homes! Corridors of imagination for all the kids in the neighborhood. We would weave our way through these spaces, chasing each other, harvesting dandelions for wreaths, & hunting for bugs.</p> <p>I learned to ride my bike, roller-skate, & skateboard on the sidewalks of my neighborhood. I was always able to collapse on the front hills and yards of my neighbors.</p> <p>Now my old street is changing and not for the better. The neighborhood has been changing because buyers/developers are tearing down small and mid sized homes that fit perfectly in the middle of a city lot and building huge suburban homes that fill the lots. It is terrible. And it is because the city officials is selling our the integrity of the neighborhoods to developers.</p> <p>My Mom came to Mpls. in 1953 to teach kindergarten in our city schools. She never drove. She rode the trolley to work, shopping, to the lakes. As she raised us, she never drove. She rode the MTC and taught all of us to do so. We walked to school, we biked to the parks, and we bussed to the mall or downtown. We had to walk to our bus stop on a major street like Xerxes or 44th. No big deal to have a short walk to transit. I like that the plan is including transit plans.</p>	7/12/2018
2716	0.1	/topics/land-use-built-form/	<p>I support the idea that transit corridors have height intensity use. More apartments, commercial, and community uses in these areas will reinforce the use of public transportation by allowing residents and others to access services without need for more cars. This will reduce costs for potential residents. Developers should be incentivized to to build reasonable cost apartments/condos to enable lower income people to live in these areas.</p>	7/12/2018
2717	1	/policies/access-to-housing/	<p>The policy should NOT LIMIT housing to any area. Excluding Production and Distribution areas is a bad idea. If a low cost apartment can be built and tenants willing to rent in these areas let it happen. The City has no business telling people where they can establish a residence.</p>	7/12/2018
2718	67	/policies/climate-resilient-communities/	<p>Increased green spaces and opportunities for residents to create their own green areas would be great. This could be through partnerships with watershed districts and other entities, but I also don't know if this relationship already exists.</p>	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2719	10	/policies/street-grid/	Can you please get rid of the street diversions in wealthy areas like Southwest (near Lake Harriet) which were put in place because wealthy, connected citizens objected to having public streets in their neighborhoods where "other" people would drive through? It makes it extremely confusing trying to navigate neighborhoods when you can't keep going north on your street because you are forced to turn left and then, then next block up, you are forced to turn left again. I don't see street diversions in North, by the way. I am also troubled by speed bumps near schools in wealthy areas and the lack of speed bumps near poorer schools. If they are needed, then they are needed everywhere. Otherwise, get rid of them, or have very clear guidelines about when they are appropriate. In our neighborhood, people just skirt around the blocks with speed bumps and go faster on other streets because they're annoyed. I'm more annoyed with them because they are a pain for bicyclists.	7/12/2018
2720	1	/policies/access-to-housing/	There is no reason to limit the highest density housing to areas near downtown. If a developer can find a market for a high density development in a desirable area the city has no reason to stop this. Zoning rules are a "status quo" preservation system which is fundamentally unconstitutional save for a misguided court ruling that opened the door to the meddlesome regulation of what can be built on private property. Limiting what can be built is a taking from the owner of the property without due process.	7/12/2018
2721	80	/policies/development-near-metro-stations/	"Prohibiting" the establishment of auto-oriented uses? That sounds pretty strong. In Europe, many of the walk/bikeability features are in place, but cars are still used. Your plan does have to accommodate cars somehow. They will not just disappear in 20 years.	7/12/2018
2722	23	/policies/coordinated-development-strategy/	Where is your coordination with Metropolitan Council, Hennepin County and the State of Minnesota infrastructure plans? You can't just operate in some Minneapolis La-la land.	7/12/2018
2723	17	/policies/complete-streets/	Where does Metro Mobility fit into your vision? Walking and biking are simply not an option for a lot of people, particularly the elderly. Parkinson's and Alzheimer's affected my two parents, both of whom biked and walked -- until disease hit. Then neither of them could manage the two steps it took to get on a bus, much less keep their balance walking down the aisle of a moving train while being shoved around. Metro Mobility is extremely inflexible -- you have to make your arrangements well in advance and there is a lot of waiting around. Getting a ride from a family member is often the best option. You can't just think everyone is 30 and childless when you are creating these plans. You have to put more flexibility into your system.	7/12/2018
2724	35	/policies/innovative-housing-types/	The city has barriers to all kinds of innovation in housing design. This "code" is one of them. Regulations are an anathema to innovation and the committees that enforce the provisions are immune to reason. Designers have come up with many innovative designs that solve real problems only to face intransigence from the code enforcers. Better to drop this entire section than to enshrine doublespeak such as this in an official document.	7/12/2018
2725	36	/policies/innovative-housing-strategies/	One way to add a bit of density without changing the feel of neighborhoods is to allow the construction of apartments above detached garages where the homeowner doesn't live on site. We have a five unit apt in Minneapolis with space above a garage, but cannot get approved to turn it into an apartment because we don't live there. One extra apartment on a block won't create the same parking problems that a 4 unit building would create.	7/12/2018
2726	36	/policies/innovative-housing-strategies/	It's time to update some of your strict zoning laws. We have a duplex with 2 bedrooms on each floor. We would like to convert it to a triplex without adding any bedrooms, and were told we could not. We could make the two apartments much nicer than the one, but archaic laws don't allow for it. How about building a bit of flexibility into your plans so Minneapolis is a better city for people to buy and improve rental properties.	7/12/2018
2727	0.1	/topics/land-use-built-form/	This policy will only fit in certain areas. The street scape shown might be appropriate for downtown and other area such as near the University of Minnesota but would destroy Minneapolis's unique residential neighbor hood. In addition the aesthetics of the buildings are mind-numbing and resemble Soviet style constructions. The neighborhood appears hostile to people and pets. This type of development will kill traditional neighborhoods.	7/12/2018
2728	33	/policies/affordable-housing-production/	How is the city planning to get affordable housing built? The city CANNOT rely on developers to build affordable housing or apartments. They are not in the Business to support diversity or below market rent. So the City's plan to get that do is.....?????	7/12/2018
2729	1	/policies/access-to-housing/	- There are currently vacancies at 1/2 of the apartment complexes in the Hiawatha neighborhood, so I question the reality that increasing housing supply will decrease the cost and make things affordable for the everyday person. It seems like this supply /	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2730	0.1	/topics/land-use-built-form/	I am very much opposed to this type of development on W 50th and Bryant, Aldrich, Colfax and Penn Avenues South. There is already organic development there in tune with the neighborhood character. These businesses fit in and many do contain apartments which could be modernized and made more attractive. Some of these buildings date from the early part of the 20th and are architecturally unique and irreplaceable. Replacing these current developments with higher density options would be a blow from which the neighborhood would not recover. In addition many of the individual businesses would not be able to pay the increased rents which newer structures would require.	7/12/2018
2731	33	/policies/affordable-housing-production/	The info above talks about the lose of affordable housing in the last ten years are those the same tools that are going to be used to "expand" production of new housing??? We need details, not word like promotes and pursue. That sounds like the city is giveing up control. I want to hear my city say if you come to build here this is what we the city AND the Neiborhood want!!!	7/12/2018
2732	0.1	/topics/land-use-built-form/	I am concerned that pricing for small single family homes in the city will further sky rocket with this plan. Investors are already paying up these properties and either flipping them or turning them into SFH rental units at too high of prices. If we rubber stamp these small lots to be purchased by investors and converted into multi family units, the lots will be even that more attractive to outside investors.. and, as we can see by the pricing of rental units in the Uptown, North loop, North east and downtown areas, pricing is not dropping. I feel that it is likely the SFH will be a thing of the past in a lot of neighborhoods. young families that have chosen to stay in the city and purchase a starter SFH will no longer be able to do so and will be forced to move out to the burbs. I am not against adding density and I do believe that adding more multi family units along the transit corridors does make sense, but to open up every SFH lot to the POTENTIAL of becoming a multi family unit up to 2.5 stories tall does not. We can hope that neighborhood voices will be heard as new zoning laws go into effect, but I have had 4 tear downs across my street in the past few years and the variances have all been allowed - despite neighborhood protests and concerns, leading to smaller and smaller green spaces and taller buildings, blocking out sun, and tearing down trees.	7/12/2018
2733	35	/policies/innovative-housing-types/	That's it A and B???? I do not understand. This plan is upzoneing the hole city to "expanded knowledge of emerging housing industry trends" An industry housing magazine would be a good start not rezoneing a city.	7/12/2018
2734	89	/policies/technology-in-the-city-enterprise/	Minneapolis needs information security action statements that protect residentsâ€™ personal data. The City should also affirm that people have the right to possess and control their personal data and be protected from efforts to violate their privacy and exploit their personal information done by either criminal actors or businesses/corporations looking to make a profit.	7/12/2018
2735	10	/policies/street-grid/	Reducing lanes for motor vehicles as on West 28th street is poor policy. Those of us who choose to walk or bicycle during summer will continue driving during inclement weather. Older residents like me avoid walking on slippery sidewalks and park the bicycle soon after Labor Day. Buses in Minneapolis are effective only in traveling to or from downtown, not going from west to eas.	7/12/2018
2736	5	/policies/visual-quality-of-new-development/	I live in the Wedge neighborhood, which has seen the rise of an eight block long phalanx of monolithic six story luxury apartments during the past decade. Taste is subjective, but to me, these new buildings range in appearance from mediocre (Flux, Elan) to hideous (Lime). Filling the city with buildings of this character is creating eyesores that will not age well.	7/12/2018
2737	33	/policies/affordable-housing-production/	While I agree with the need for affordable housing I am concerned about the rezoning of the entire city to allow 4-plexes. I feel this will result in tear downs in houses that are more affordable now, and the 4plexes won't be any more affordable but will change the neighborhood feel. I believe certain areas would benefit from this type of housing, especially very close to light rail, so believe 4plexes should only be allowed in those areas. Thanks	7/12/2018
2738	80	/policies/development-near-metro-stations/	The proposed Lake Street station for the Southwest Light Rail money abyss is in an area where Lake Street and Excelsior Blvd. converge. This is already extremely congested, as it is the only way to travel east and west around Lake Calhoun (or Bidet Bad Heart Bull). Razing existing buildings in favor of 30 story towers in this area is sheer lunacy!	7/12/2018
2739	9	/policies/open-spaces-in-new-development/	If recent development along the Greenway in Uptown is any indication, developers will soon fill all open spaces with more ugly buildings, like the one planned for the Arby's site. The addition of Mosaic building #2 has totally eclipsed the plaza in front of Mosaic #1, and Bar Louie is no more, possibly as a result.	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2740	14	/policies/tree-canopy-and-urban-forest/	The proposed route for the Southwest rail line through the Kenilworth Corridor has great tree canopy and is popular for bicycling, walking, and running. It looks like you plan to replace much of this canopy at the north end with more dense housing! Another gift to developers at the expense of livability.	7/12/2018
2741	36	/policies/innovative-housing-strategies/	I do not believe the plan to up zone and expand corridors will help affordable housing. I think it will do just the opposite, as it has done in other cities. After last night's meeting, I am completely in the dark about your mission here. Lots of vision, so few concrete answers as to consequences of the vision. You could not even say how many new units we need! How do you expect us to trust the plan?	7/12/2018
2742	1	/policies/access-to-housing/	I applaud the goals and first three Action Steps in particular. I'm concerned that Action Steps d. and e. will lead to developer/speculator-driven teardowns and loss of historic neighborhood character, with no guaranteed gain in affordability. Regarding e. in particular, allowing more duplexes via re-model (rather than new construction) and allowing accessory dwelling units makes the most sense.	7/12/2018
2743	33	/policies/affordable-housing-production/	The plan to up zone will not help with affordable housing. It will allow speculators to come in and buy up areas where affordable housing already exists. You have no proof that this will work. Nor do you provide proof that we really need to grow the way you say we do. If you want affordable housing, provide tax credits to buildings that offer it, and read Eviction. It's not about density. It's about helping families stay in homes, many of which are overpriced for their income levels.	7/12/2018
2744	34	/policies/affordable-housing-preservation/	This is important! But it will not happen if you keep building glitzy buildings like the kind in Uptown, micro apartments with no parking, 400 feet for \$1200 dollars. Now CPM is updating the old buildings along the Greenway and raising rents. If you want to maintain affordable housing, mandate it through tax credits for buildings that maintain current rental prices.	7/12/2018
2745	35	/policies/innovative-housing-types/	At last night's meeting, it was made clear that up zoning has not worked anyplace else. Perhaps that's because it relies on trickle down economics. You build enough density, some of it will fall into the hands of the poor. Shame on you. This plan is a progressive version of Trumpism.	7/12/2018
2746	36	/policies/innovative-housing-strategies/	It all sounds good, but I don't believe you are doing enough to work with other communities. This plan assumes all the density has to be put in Minneapolis. If density comes, you will drive out many people, causing more urban sprawl and families fleeing to the suburbs for more parking and less noise. If you want to work with other communities, do it by increasing mass transit and spreading out the growth. We have enough density.	7/12/2018
2747	19	/policies/bicycling/	Great idea but remember these are only viable for most people during certain parts of the year; too hot or too cold limit the usage.	7/12/2018
2748	38	/policies/affordable-housing-near-transit-and-job-	I am against the plan that creates commercial corridors along all transit lines. Many old homes and neighborhoods will be divided up, the way they did when the highway was put in, and the middle and upper class african american neighborhood on the north side was cut in half. People don't want high buildings. They want green space and trees and safe walking in neighborhoods where they know their neighbors. Planners have destroyed downtown's Nicollet Mall. They're in the process of destroying Uptown with all its designer streetscapes and leases too high for small businesses. Stick with the current small area plans! I don't buy the density argument. It's capitalism at its best, urban planning at its worst.	7/12/2018
2749	80	/policies/development-near-metro-stations/	First of all the light rail has ten years at least before it will be built. The lawsuits pending may shut it down, if the lack of funding doesn't do its damage first. We absolutely should not develop near anticipated metro stops until we have the transportation infrastructure. The traffic is already unbearable, especially alone Lake Bde Make Ska.	7/12/2018
2750	40	/policies/homelessness/	This plan will not help homelessness. Seattle's homeless population skyrocketed after upzoning, driving up housing prices, taxes, and causing many shelters to fold. Where is the analysis that connects these dots. This is all at the vision level with totally inadequate analysis.	7/12/2018
2751	42	/policies/expand-homeownership/	AT last night's meeting at the VFW, Heather Worthington stated homeownership isn't a goal of many people anymore. This plan will make it even less of a goal. Nobody wants to invest in a home if we don't know what the future looks like in our city. You have destabilized neighborhoods with this plan.	7/12/2018
2752	1	/policies/access-to-housing/	These are great goals that will help us meet the future housing needs of the city. We love living in Minneapolis, and therefore look forward to sharing our city with more people in the future.	7/12/2018
2753	19	/policies/bicycling/	Keep up the great work on the bicycle network! I'm glad to see the city considering so many options to keep us moving away from inefficient car-centric living.	7/12/2018
2754	19	/policies/bicycling/	I use my bike whenever it makes sense, rather than driving. But nowhere do I see any mention of ensuring that bicycle riders obey traffic laws. Bikes and bike lanes seem to be great for young, and often white, males. Not so much for those of us with families and the elderly, for whom wayward bike riders are a real and present danger	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2755	17	/policies/complete-streets/	My son can't/couldn't walk/bicycle to Middle School/High School in the winter. And what about piano and trumpet lessons, baseball, skiing, and soccer? I'm 66 and ride a bike often, but not in winter when it is nearly impossible to use the sidewalks. So to prioritize other forms of transport over cars would mean eliminating many of those activities that make life worth living. What about a city policy that ensures that one can actually walk on cleared sidewalks all year round, not just the 5-6 non-winter months?	7/12/2018
2756	80	/policies/development-near-metro-stations/	The proposed 21st Street Metro station for the misbegotten Southwest Light Rail boondoggle should not be built. Its proposed location is deep in a residential area, with the only nearby attraction the East Beach of Cedar Lake. This area should be left as is, not urbanized and given over to developers. Leave Franklin Avenue, 21st St. and the Kenilworth Corridor much as they are!	7/12/2018
2757	17	/policies/complete-streets/	My son can't/couldn't walk/bicycle to Middle School/High School in the winter. And what about piano and trumpet lessons, baseball, skiing, and soccer? I'm 66 and ride a bike often, but not in winter when it is nearly impossible to use the sidewalks. So to prioritize other forms of transport over cars would mean eliminating many of those activities that make life worth living. What about a city policy that ensures that one can actually walk on cleared sidewalks all year round, not just the 5-6 non-winter months?	7/12/2018
2758	15	/policies/transportation-and-equity/	I don't see anything about how the City is actually going to ensure that there is an operating transit system that fulfills its goals, ie who is actually going to provide and run the buses and how will they be subsidized? And who will ensure that bus stops are cleared in the winter?	7/12/2018
2759	1	/policies/access-to-housing/	I support 4-unit building city wide! I lived in a triplex a few years ago. It was a home built 120 years ago, subsequently divided by floor. From the outside house was the definition of neighborhood character. Except for two front doors, two garbage/recycling bins in the back, and a slightly larger parking pad in the back, you'd never know it wasn't a single family home. Unsurprisingly this home wouldn't be allowed under current zoning, but it should!	7/12/2018
2760	33	/policies/affordable-housing-production/	I am a retired 70 year old who has lived near Lake and Lyndale for 40plus years, and raised my 3 children here. They all love the city and choose to live in Minneapolis as adults. Part of what has kept us all here is the wonderful parks and especially the neighborhoods around the city. I'm concerned about the proposal to allow 4plexes anywhere in the city and the effect it would have on my (and other's) neighborhood. Personally I don't want a bunch of millennials partying on the rooftop next door to me or looking down on my backyard; there are plenty of other places (like Uptown and along the Greenway)where that population can live. Also, as far as I can tell it would be developers who would profit. They are not going to provide affordable housing or housing for families. Plus you will be decreasing the number of starter homes. Please allow me and many of my fellow Lyndale residents to "age in place" in an area we have worked so hard to care for. Thanks.	7/12/2018
2761	1	/policies/access-to-housing/	I support this 100%. There is a clear difference in density between neighborhoods we deem 'complete' with a full range of amenities and those that are 'incomplete'. 3 and 4 unit projects seem like a good way to increase density incrementally and you don't have to be a big developer with tons of money to build a duplex or fourplex. There are lots of people who have used scare tactics and twisted this policy into something it's not, but it seems like it's coming from a vocal minority of wealthier, whiter homeowners. There are tons of people who support this policy who can't/don't make their voices heard as much, but they are out there.	7/12/2018
2762	49	/policies/educational-and-economic-access/	Re: the "discipline in schools" issue. How is it being addressed? What plans are being implemented? How are the outcomes being evaluated? Who is doing the evaluation? Where can I go for objective information regarding the incidence of school misbehavior according to race? Where can I obtain the statistical evidence that a racial disparity exists in applying disciplinary action, and the rates of occurrence of incidents of student "misbehavior" and disciplinary consequences broken down by race?	7/12/2018
2763	1	/policies/access-to-housing/	No, this is not what is wanted in areas people worked hard to live in.	7/12/2018
2764	0.1	/topics/land-use-built-form/	The proposed density south of Uptown (36th st) from southwest to southeast is too high. Why do so many streets have zoning for buildings with no height limits. They say they are "transit corridors" but they look almost random - there are many other streets with frequent bus service that are not the same. For all of them they are like you are trying to export some of Uptown or North Loop out to the edge of the city - it does not fit.	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2765	28	/policies/msp-airport/	efficient landing procedures using RNAV have greatly increased arrivals using 12L & 12R runways to the point that anyone aligning with these runway coordinates has continuous noise, every 1 to 2 minutes for most of the day, when winds are out of the NE, SE, E, & S directions. It was not like that before RNAV and is intolerable now.	7/12/2018
2766	1	/policies/access-to-housing/	In neighborhood interiors farthest from downtown that today contain primarily single-family homes, achieve greater housing supply and diversity by allowing small-scale residential structures on traditional size city lots with up to four dwelling units, including single family, duplex, and accessory dwelling unit building types; and 3-unit, 4-unit, and other small unit apartment buildings in strategic locations (certain corridors, centers and more intense districts) and in response to the existing built form, character and context	7/12/2018
2767	37	/policies/mixed-income-housing/	We are a gaggle of volunteers and opening a new scheme in our community. Your site offered us with useful information to work on. You've done a formidable process and our whole group will be grateful to you. http://www.Svdp-Sacramento.org/events-details/14-11-11/Top_Hat_Dinner_2014.aspx?Returnurl=http://alternatif188bet.com	7/12/2018
2768	0.1	/topics/land-use-built-form/	The street I live on, 39 th and Sheridan Ave So, and own an owner-occupied duplex, is narrow and winding. It currently has parking on one side of the street only due to the narrowness. It can not handle more density without required parking. It is not realistic to expect that people are no longer going to own cars. Even if they take the bus, bike or walk, they are still going to own a vehicle for other purposes and need someplace to park it.	7/12/2018
2769	1	/policies/access-to-housing/	While I support the goals of increasing affordable accessible housing, I strongly oppose several elements in the Minneapolis 2040 Comprehensive Plan Draft. Zoning changes to Corridor 4 that would permit three-story residential buildings in streets adjacent to Penn, Bryant, Xerxes, France, Upton, Sheridan etc. and thus destroy existing neighborhoods. Far from making housing more affordable, this will drive out residents who currently live there. I do not believe the city should sacrifice our neighborhoods to increase density and boost the property tax base. I am 74-years old and live in a one-and-a-half story home on Queen Ave. S, a street adjacent to Penn. My neighbors tend to be young families in their first home and older folks like me and my husband. This is a lovely neighborhood. Please do not allow it to be destroyed. There are other ways to increase density. Different types of housing on Penn and other similar corridor streets make sense but not on the adjacent streets that make up successful neighborhoods. Our family neighborhoods are an important factor in the Minneapolis quality of life. I believe it is possible to increase affordable, accessible housing without destroying them. I am also concerned about the impact on property taxes. Some people who have had McMansions built in their neighborhoods have found their property taxes on their average-size homes soaring and are forced to think about moving. The current draft of 2040 could make the situation far worse.	7/12/2018
2770	16	/policies/environmental-impacts-of-transportation/	Transit and using automobiles less has to be our primary response to global warming. Strongly support a robust multimodal transit system including Southwest and Bottineau LRT lines, BRT, bike lanes, etc.	7/12/2018
2771	0.1	/topics/land-use-built-form/	Heather Worthington is trying to push a poisonous idea on the city of Minneapolis. She claims that it's just tough that property values will plummet for homeowners due to the change in the proposed zoning laws. To her I say, it's just tough that the majority of Minneapolis homeowners hate her idea and will strike this down before it gets off the ground.	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2772	0.1	/topics/land-use-built-form/	<p>As a long resident of Minneapolis, I am writing to you today to express my deep concern about the Minneapolis 2040 plan.</p> <p>Â</p> <p>Growing up in Minneapolis, I would walk down the streets of residential neighborhoods and wonder why in the world an ugly 1960s style apartment building would be built among such beautiful homes. It appears we are about to make the same mistake again with the 2040 plan. If not administered with thought, foresight and concern for existing homeowners, it will destroy the character of our neighborhoods.</p> <p>Â</p> <p>My wife and I have lived in our home on Colfax Avenue South in East Harriet Neighborhood for 15 years. I bought the house with the expectation that the character and composition of the neighborhood would remain the same, with predominantly single-family homes and duplexes here and there.Â</p> <p>We love living in the this city. And I understand density AND affordable housing is important to a vibrant city, but achieving that goal must be done with care and thought. There are many residents who, like us, have invested heavily in their homes and neighborhoods. We also have paid increasingly high property taxes and have accepted that as the price to live where we do. Allowing four-story and higher apartment buildings adjacent to single family homes is in a word - unacceptable.Â</p> <p>In our particular case, Bryant Avenue is the block immediately east of Colfax. There is no alley bordering our house on the east side of Colfax and the house behind ours on Bryant. A four-story building or row of buildings would dwarf our home and others on our block and destroy the character of the neighborhood, severely impacting our lives, not to mention decrease our property values and max out existing infrastructures for sewer, water, parking, traffic and other necessities. We have worked very hard to create our home. I certainly hope that we, the homeowners in your Ward and those who have invested the most in this area, are not about to become the victims of this plan.</p> <p>Â</p> <p>I respectfully urge you to revise the 2040 plan to reduce the size and height of new structures that can be built in existing single-family home neighborhoods. Itâ€™s not fair to the hard-working people who have invested so much in their homes and communities to have their lives impacted so severely by this plan.</p> <p>Â</p> <p>Thank you for your attention to this very important matter.</p> <p>Â</p> <p>Sincerely, Stephen Mulholland</p>	7/12/2018
2773	1	/policies/access-to-housing/	<p>We live in Bryn Mawr near the proposed housing developments on the former Qwest property on the #9 bus route along Cedar Lake Rd. We strongly support development on this site to include senior housing, mixed market rate/subsidized housing, or other.</p> <p>Same opinion about housing near the SWLRT Bryn Mawr Station at Penn and 394. Our neighborhood can easily absorb more density.</p>	7/12/2018
2774	14	/policies/tree-canopy-and-urban-forest/	<p>My block is currently composed entirely of single family houses, with trees lining the boulevards and also planted in most yards, both front and rear. The 2040 proposal would convert half the block to Interior 1, the rest to Interior 3 or Corridor 4. Even the least dense designation would require a larger footprint for a four-plex; in the most dense, virtually the entire lot would be covered by the building. There would no place for any trees, because trees need unbuilt, unpaved ground to survive, let alone thrive (see dying trees on Nicollet Mall, in this and every previous iteration). And my block is not unique - it is simply not possible to implement the proposed residential re-zoning AND retain the existing trees, let alone "improve" the canopy.</p>	7/12/2018
2775	6	/policies/pedestrian-oriented-building-and-site-de	<p>It's wonderful that the city wants to limit and reduce the amount and size of surface parking lots, I'd like to add that new/updated lots must be made of water permeable materials.</p>	7/12/2018
2776	40	/policies/homelessness/	<p>We need more emergency shelter beds for women who don't have children with them. We also need additional support for agencies that are doing VI-SPDAT assessments that help get individuals experiencing homelessness into the coordinated entry system.</p>	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2777	6	/policies/pedestrian-oriented-building-and-site-de	<p>Although there are many things to comment on the 2040 Comprehensive Plan Draft, we have tried to consolidate our comments.</p> <p>1 - The overall plan seems academic, based on ideals but not vetted on supporting data for the huge increase in density projected in just 20 years.</p> <p>2 - The goal of walking first, bicycling second, transit third and cars not recommended, could be for the city core but not the city as a whole. We have 4-5 months of winter weather, all the images show sunny pedestrian oriented scenes. The distances to travel to in the city as a whole are large and most often trips are not directed downtown, unless you work there. There must be statistics for that.</p> <p>3 - The Built Form density changes, such as Corridor 4 with Interior 3 adjacent, are the same for transit corridors that occur in very different neighborhoods. These neighborhoods need to be vetted to see how increased density would work, Sheridan as Corridor 4 and Linden Hills Blvd. as Interior 3 for example. The Built Form images convey continuous building with wide streets, no vehicular access, sunny weather; therefore residents in these new developments cannot own a car, there would not be room on the streets.</p> <p>4 - Allowing 4-plex units on interior residential streets, without off street parking, would mean any car owned by residents would be on the street or be prohibited. How could that work in snow emergencies or if there were several on a block. Saying that 'people won't own cars' does not seem vetted by current car use for most transit trips. The passive solar atrium on our own house would be shaded by a 4-plex, so the house lot would have to be part of the new development.</p> <p>5 - Corridor 6 is shown continuously on Chicago and Nicollet Avenues from downtown to city limits, it doesn't seem reasonable in just 20 years; and all that increase in density, all 6 stories possible, that no one will own a car because off-street parking will not be required or desired.</p> <p>We hope that this not the final plan version.</p>	7/12/2018
2778	73	/policies/stormwater-management/	Action step c is incompatible with and directly contradicts the built form goal of greatly increasing the amount of land covered by buildings and other impervious structures	7/12/2018
2779	0.1	/topics/land-use-built-form/	<p>I would like to see additional guidance for building in neighborhoods, specifically about corridor 4. I am not opposed to multi-family housing, but there are a lot of single story homes along corridor 4 streets and I believe that allowing 4 story buildings next door is a bit much. I would also like to see guidelines that make sure a small buffer is left on the sides of lots as well. Homes are already very close together, which is fine, but allowing building right to the lot lines would be too much.</p> <p>To keep to the goal of adding affordable housing, I would also like to see some limit on demolishing small affordable homes to build anything that's not affordable. Currently I see small affordable homes being demolished to build big half million dollar single family homes. With this plan, I could envision small affordable homes being demolished to build huge expensive 4-plexes. While I agree that we should alter codes to allow for more multi-family housing to increase housing options, I think we also need to have some protection in place to make sure affordable housing is not getting demolished in favor of unaffordable housing. Similarly, I would hate to see affordable single family homes getting sandwiched in between huge 4plexes with unaffordable rental units. Owning a home is a great way to increase financial security. It's fine to add more rental units (as long as they're affordable) but not at the cost of losing affordable starter homes. The current guidelines seem too broad and are making a lot of people worried about what would happen to their neighborhood.</p>	7/12/2018
2780	48	/policies/data-driven-decisions/	It is unclear where the data is in the report that shows that wholesale changing in the zoning codes will lead to an increase in affordable housing. Where is that? I live across from a new "interior 3". None of your interior 3 photos contain any cars? Do you really believe that the marketplace will dictate the building of garages for multiplexes? No. The marketplace will dictate all parking on the street. I live between Southwest High School and 50th and France. Dense parking already and not having parking requirements for any new multiplexes is not wise. You will clog narrow streets, increase towing and single sided parking in the winter and allow developers to minimize green space. And still - no affordable housing. The latest new build apts. in my neighborhood are \$2300 for a two bedroom. Where is the affordability?	7/12/2018
2781	40	/policies/homelessness/	Timely emergency help is vital. Having to receive an eviction notice before help can be acquired is debilitating and only causes further harm. More prevention is needed. Integrating lower income people into areas that are not cramped, and has affordable food access must be part of the plan.	7/12/2018
2782	43	/policies/housing-displacement/	Additionally, protect poor pet owners. There are not enough low income options or shelters that allow pets. A pet is family and vital to one's mental well-being.	7/12/2018
2783	50	/policies/access-to-technology/	Make Minneapolis Wi-Fi free for people on public assistance.	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2784	47	/policies/housing-maintenance/	Provide financial aid for low income home owners, not only for elderly poor homeowners.	7/12/2018
2785	49	/policies/educational-and-economic-access/	Allow for experience to count when a degree isn't held by a city job applicant.	7/12/2018
2786	51	/policies/healthy-pre-k-development/	Increase education for parents about nonviolent communication and dealing with the stress of raising children.	7/12/2018
2787	63	/policies/food-access/	Get a mini grocery store in every neighborhood. Just the basics, all healthy food.	7/12/2018
2788	67	/policies/climate-resilient-communities/	Create a rapid response plan to distribute emergency water and food supplies.	7/12/2018
2789	70	/policies/ecology-and-habitat/	Ban stores from carrying pesticides and modified soil.	7/12/2018
2790	70	/policies/ecology-and-habitat/	Create animal crossing bridges over highways.	7/12/2018
2791	71	/policies/soil-health/	Ban stores from selling soil that has pesticides and growth inhibitors in it.	7/12/2018
2792	36	/policies/innovative-housing-strategies/	Ban landlords from prohibiting pets. Pets are vital to our family and well-being.	7/12/2018
2793	75	/policies/waste-reduction/	All positive goals - but the elephant in the room is the astronomically increased amount of construction waste that will be generated as a result of the built-form proposed rezoning. Contrary to what many supporters blithely assert, most of the single-family houses targeted for annihilation by MPLS2040 do NOT lend themselves to conversion to three or four units with only minimal effort, and they will therefore be torn down. Where in Minneapolis does this plan propose to locate the huge landfill needed to hold all that demolition and construction waste? Because it would be totally unreasonable to expect another community to accept the waste Minneapolis will have chosen to generate with this plan.	7/12/2018
2794	1	/policies/access-to-housing/	I have several questions: 1. Will 4-plexes contain 4 parking spaces on property? 2. If so, will Mpls. rescind its ban on more than 2 cars per driveway? 3. Has on-street parking been addressed as much is being lost to bike lanes? 4. 2 1/2 story homes with roof = over 30'tall. This will cast unreasonable shade on neighbors' outdoor living areas. Will builders have to get permission from neighbors? I do if I want chickens or over 3 pets. 5. Will four-plexes still have to adhere to the 30' setback rule? Unless the answer to all these questions is yes, I am against this plan.	7/12/2018
2795	75	/policies/waste-reduction/	Create a city run center for used furniture.	7/12/2018
2796	1	/policies/access-to-housing/	As long as the housing especially 4 plexs is of good quality, I support the changes	7/12/2018
2797	97	/policies/heritage-preservation-legislative-advoca	Who would the partners be? Otherwise, good idea	7/12/2018
2798	33	/policies/affordable-housing-production/	Good goal, but the steps are very vague. Where will the money come from?	7/12/2018
2799	34	/policies/affordable-housing-preservation/	Good	7/12/2018
2800	37	/policies/mixed-income-housing/	Not sure I understand (b)	7/12/2018
2801	76	/policies/new-parks/	Good	7/12/2018
2802	39	/policies/fair-housing/	A and D are good ideas	7/12/2018
2803	35	/policies/innovative-housing-types/	Who determines what is a creative housing option? Where is the research to back up this plans intended goals. Nothing is stated in the plan. The only mention of cities doing a similar plan was last night at the Ward 10 meeting. Ms Worthington said San Francisco, Seattle, and two other similarly sized cities have tried this plan and failed, as if that information supports the Minneapolis plan?!	7/12/2018
2804	34	/policies/affordable-housing-preservation/	This will not create affordable housing. I believe it will create money for developers and for the council members and mayor who have received contributions from developers.	7/12/2018
2805	43	/policies/housing-displacement/	Do not eliminate or restrict parking in areas where elderly and young families with children live. These two groups would be sorely affected by this.	7/12/2018
2806	23	/policies/coordinated-development-strategy/	Please create the InFraStrucTure and then consider tearing up the city. This way you're creating a city with fractured neighborhoods and inadequate transit to support it. How this policy creates a healthy economy is beyond me. And nothing in your plan clarifies this.	7/12/2018
2807	48	/policies/data-driven-decisions/	Where is the data!???	7/12/2018
2808	1	/policies/access-to-housing/	(a) build on top of production areas instead of prohibiting housing there - support workers having nice short commutes!	7/12/2018
2809	1	/policies/access-to-housing/	In general, the definition of density along transit lines is quite restrictive. The land use guidelines ramp down density extremely rapidly as you move away from the line. People can walk a couple blocks to a transit line, especially the high frequency ones like upcoming aBRT.	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2810	1	/policies/access-to-housing/	Expand what constitutes a transit corridor people are willing to walk a few blocks to access a bus/lrt. I support housing to be built in all parts of the city. This plan doesn't go far enough, we should allow more housing at a minimum interior 1 should support more density. I do support fourplexes in every neighborhood with no exceptions for richer neighborhoods like Wards 7, 13, 2, etc.	7/12/2018
2811	1	/policies/access-to-housing/	(c) broaden your definition of what a transit corridor is - the same block is much too narrow, walking 3 blocks to a bus is still on a transit corridor! broaden your definitions please.	7/12/2018
2812	1	/policies/access-to-housing/	I fully support fourplexes being the least dense zoning in the city, and I don't want to let wealthy neighborhoods opt out. We need housing across the whole city, including the neighborhoods where existing residents oppose any changes. I believe fourplexes are shooting low, and that interior neighborhoods could easily support 6-8 unit buildings, going higher than 2.5 stories.	7/12/2018
2813	1	/policies/access-to-housing/	Regarding C: the plan should expand what constitutes a transit route - appears a lot of the increased density is only restricted to a block along the designated corridors could go beyond that. Concentrating housing only along the block corridors will concentrate housing only along the most used and potentially comprised areas of air quality impacting community health in these denser areas. Increased density needs to be spread throughout the city, including allowing more units that are allowed in the interior and depending on the size of the lot could be even more than the proposed four units.	7/12/2018
2814	1	/policies/access-to-housing/	Yes, I support allowing more housing in all part of the city. The plan does not go far enough. Capping the number of units at four per parcel is a very low limit for a city, especially given our large parcel size. We need to allow more housing, rather than restrict the number of units allowed. A four unit minimum would serve the city and its residents far better.	7/12/2018
2815	1	/policies/access-to-housing/	(e) Let's allow 4plexes and 6plexes in every single lot. ADUs are great and we need them too. Increase the access to resources for more neighbors - undo the legacy of redlining.	7/12/2018
2816	1	/policies/access-to-housing/	Increase knowledge and access to allow more development of ADUs	7/12/2018
2817	1	/policies/access-to-housing/	a. Yes, absolutely more housing in *all* parts of the city. c. Expand the geographic definition of what constitutes a transit route. People will walk more than just one or two blocks to transit. d. I support more allowed units and height in interior 2 and 3. 2.5 and 3 story buildings are less than what exists in those neighborhoods already. e. I support expanding legal housing types up to 6 units in all neighborhoods. Fourplexes don't go far enough.	7/12/2018
2818	1	/policies/access-to-housing/	I strongly support higher density housing throughout the city. I believe the transit corridors have been too closely mapped. Housing can be two or three blocks from a transit line and the transit will still be very accessible. I also feel that more multi family housing is needed in each neighborhood to accommodate seniors who may wish to leave their single family outing without leaving their neighborhood.	7/12/2018
2819	41	/policies/tenant-protections/	I support all of these action steps. Additionally: Implement a "Right of First Refusal" policy such that when tenants get notice of sale, they have the option to buy the property. The same system could provide the city the option to buy and preserve the properties.	7/12/2018
2820	1	/policies/access-to-housing/	We need to allow more density in all parts of the city--we currently have a housing crisis that will continue to price people out of our city until we have more housing built. There's an inherent legal and physical delay between allowing this to happen and getting new units built. During this delay, we will continue to experience an influx of new residents, particularly as our climate crisis continues to become more severe. We need to be set to allow property owners to respond to this current and escalating housing crisis by legally creating more units through various means, including building new, adding more, and subdividing existing homes. Even then, many Minneapolitans, current and future, will face housing instability as the provision of housing lags behind demand for it.	7/12/2018
2821	41	/policies/tenant-protections/	Rent stabilization to cap extreme year over year increases in rent and avoid evictions. For example 5% per year plus inflation.	7/12/2018
2822	41	/policies/tenant-protections/	More work definitely needs to be done to ensure that tenants are aware of their current rights. Groups like Homeline should not be taking the full burden, the city can help. Perhaps an ordinance ensuring that tenants are given a copy of a Tenant Bill of Rights with their lease. City staff that can help tenants fight for their rights with landlords.	7/12/2018
2823	41	/policies/tenant-protections/	Expand relocation assistance also!	7/12/2018
2824	41	/policies/tenant-protections/	Address the high costs of rental application fees, which can add up when applying for multiple apartments. Either cap the fees, or provide a background check clearinghouse so that renters applying for multiple apartments aren't saddled with multiple fees to find a new home.	7/12/2018
2825	41	/policies/tenant-protections/	Agree - also, a ban on evictions during the school year if a family has children! Keep the students housed and stable.	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2826	41	/policies/tenant-protections/	Better protections for families that have kids to keep the kids to not get evicted during the school year. In addition, more resources for homeless kids at school.	7/12/2018
2827	41	/policies/tenant-protections/	Agree! Also, implement a "Just Cause" eviction policy. This provides landlords with a list of valid reasons to end a rental agreement, and prevents leases from being ended "at will". Seattle has had this since 1980.	7/12/2018
2828	41	/policies/tenant-protections/	Yes, I support these policies! Please ensure tenants know their rights! We need rent stabilization to help protect renters from substantial increases - like a cap of 5% year plus inflation. Expanding relocation fee assistance is key. Families with children need particular attention to ensure children have stability in school when their housing is changing. Owners need to give notice of sale early - maybe even as far as 6 months out, along with First Right of Refusal by current tenants offering them an opportunity to buy.	7/12/2018
2829	41	/policies/tenant-protections/	In case of building sale, provide 6 months advance notice of sale of a building and relocation assistance. Right of first refusal for building purchase. Guaranteed housing of tenant is displaced by development.	7/12/2018
2830	41	/policies/tenant-protections/	I strongly support ensuring that tenants know their rights, particularly low income tenants and those for whom English is a second language. I would also like to see a policy that would end or limit evictions of families with children during the school year so that children's schooling is not interrupted.	7/12/2018
2831	41	/policies/tenant-protections/	If buildings are condemned by the city or a building loses the rental license, the city should be there to help the tenants so that they are not punished for a landlord's malfeasance.	7/12/2018
2832	41	/policies/tenant-protections/	I support all the key action steps. I think we should better inform renters of their rights with mailers, email, a 311 system but for renter issues. Other things I support: Rent stabilization, high costs of rental application fees cap system, city should discourage moving during a school year for people with families. More displacement preventative measures. Expand relocation assistance. Support pro-tenant organization with funding. More enforcement of fair housing laws. Reduce evictions Just Cause eviction, provide free legal aid for renters. Expand section 8 acceptance stream line the process. Safe and healthy housing.	7/12/2018
2833	41	/policies/tenant-protections/	Agree - also, enforce anti-discrimination policies!	7/12/2018
2834	41	/policies/tenant-protections/	Fund or produce publicly accessible, free, plain language and multilingual tenant resources. Promote all rental subsidy programs that exists. Create easy 311 experience for tenant questions.	7/12/2018
2835	40	/policies/homelessness/	Prevent Housing Inspections related vacating during school year for houses with children unless life safety issues are of concern	7/12/2018
2836	41	/policies/tenant-protections/	Read this and implement this: https://medium.com/neighbors-for-more-neighbors/minneapolis-2040-tenant-protections-6206723176ab	7/12/2018
2837	41	/policies/tenant-protections/	Explore options like the St Louis Park ordinance stabilizing rents after a building is sold.	7/12/2018
2838	41	/policies/tenant-protections/	Portal to provide info on problem landlords.	7/12/2018
2839	41	/policies/tenant-protections/	We need to enforce the FHA with stings to see if landlords are discriminating against historically marginalized renters, particularly in RCAW.	7/12/2018
2840	41	/policies/tenant-protections/	Ordinances like the unfortunately challenged Section 8 ordinance are good, and the city should explore more aggressive enforcement of fair housing laws.	7/12/2018
2841	43	/policies/housing-displacement/	More money to preserve the naturally occurring affordable housing that already exists. Easier to preserve than replace.	7/12/2018
2842	43	/policies/housing-displacement/	Explore upzoning of neighborhoods with quickly rising rents. If supply is not meeting demand, more housing must be created.	7/12/2018
2843	43	/policies/housing-displacement/	Upzoning areas of the city experiencing large increases in home prices and rents (as in, Southwest Minneapolis).	7/12/2018
2844	43	/policies/housing-displacement/	(a) fuck yeah. use rising rents to trigger upzoning of neighborhoods based on demand.	7/12/2018
2845	43	/policies/housing-displacement/	A great way to preserve naturally occurring affordable housing is to ensure that enough housing is built that there isn't pressure on NOAH to upscale. My affordable apartment in Uptown that I moved into in 2009 has been completely renovated with fancy counters and appliances and party rooms and rents have nearly doubled. With enough development, those sorts of stories will be less likley.	7/12/2018
2846	43	/policies/housing-displacement/	Program to help senior residents add an accessory dwelling unit or extra unit to help them afford their home, age in place in a home that's too big/difficult to maintain.	7/12/2018
2847	43	/policies/housing-displacement/	If rents are increasing quickly that should trigger upzoning in the desirable neighborhood. Aid for seniors who want to age in place to build ADUs. Or anyone who wants to build a fourplex with funds. Preserve NOAH and build more housing that will be future NOAH. Allow more housing construction.	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2848	43	/policies/housing-displacement/	Support "empty nest" homeowners in subdividing their large homes into triplexes or fourplexes. They stay owners while also providing homes for others.	7/12/2018
2849	43	/policies/housing-displacement/	Step by step guide, financing options, and resources for building ADUs would help older empty nesters stay in their homes by providing additional income streams	7/12/2018
2850	43	/policies/housing-displacement/	Restrict any assistance for homeowners to those who actually need the assistance. Stop sending city money to homeowners just because they're homeowners.	7/12/2018
2851	43	/policies/housing-displacement/	(d) provide resources for elderly folks with larger homes to add ADUs to either move in to those smaller units and allow the next generation to rent/lease the larger home	7/12/2018
2852	43	/policies/housing-displacement/	(b) fuck yeah. also ... build more housing that will be future NOAH.	7/12/2018
2853	43	/policies/housing-displacement/	All of this sounds good, but all focus on RCAP/gentrification needs to also be tied to attention to what's happening in RCAW, where homogeneity of wealth and whiteness are reflective of deep societal imbalances and problems and policies there (like very low ceilings on housing allowed) are likely exacerbating issues in RCAP.	7/12/2018
2854	43	/policies/housing-displacement/	When apartment buildings are flipped and turned into luxury apartments, they should have to follow inclusionary zoning rules and keep some space affordable	7/12/2018
2855	43	/policies/housing-displacement/	I support directing resources to preserving naturally occurring affordable housing; increasing density in other neighborhoods will decrease the pressure to upgrade housing that is affordable now into no longer affordable housing. I would also support assisting homeowners to add units to their homes.	7/12/2018
2856	43	/policies/housing-displacement/	Regarding D - focusing resources on at risk and vulnerable populations is key, both with regard to assistance with property tax increases and costly maintenance Regarding B - property owners need to give renters notice when the building is going up for sale, give renters an option to buy the building first	7/12/2018
2857	43	/policies/housing-displacement/	a) sounds like a good way to use rising rents as a catalyst for up-zoning b) allowing for auxiliary housing units and helping provide financing options for homeowners c) yes do this d) yes to the supporting marginalized identities. e) yes do this	7/12/2018
2858	43	/policies/housing-displacement/	Offer city funds for rehab that are predicated on the rents of the units rehabbed staying relatively stable or only increasing by a capped amount. That way NOAH tenants don't have to live in a dump but don't get priced out.	7/12/2018
2859	44	/policies/comprehensive-investments/	(e) FUCK YEAH. sure would like to see this happen	7/12/2018
2860	44	/policies/comprehensive-investments/	e. Yes to investments that benefit existing low-income residents.	7/12/2018
2861	44	/policies/comprehensive-investments/	(e) FUCK YEAH. In all seriousness, the city should take seriously ways to ensure that investment doesn't displace.	7/12/2018
2862	44	/policies/comprehensive-investments/	(a) prohibit landlords from asking about evictions and felonies. and gross misdemeanors, while we're at it. across the city.	7/12/2018
2863	44	/policies/comprehensive-investments/	a) ensure evictions are also eliminated as a barrier to housing, as well as credit and criminal reports.	7/12/2018
2864	44	/policies/comprehensive-investments/	Increase housing inspections. YES to all of these! Dismantle barriers to housing for people with issues in their rental history.	7/12/2018
2865	44	/policies/comprehensive-investments/	Regarding A - I agree strongly! Evictions, gross misdemeanors, and felonies on the record are huge barrier to stable housing	7/12/2018
2866	44	/policies/comprehensive-investments/	e) ensure that parallel policy fixes for areas with concentrated poverty are tied to changes for areas of concentrated wealth, which are also indicative of deep problems in the city.	7/12/2018
2867	44	/policies/comprehensive-investments/	In particular, many small businesses are in small, affordable commercial spaces, and new construction rarely has those. It would be great to find a way to encourage more small affordable commercial space in new construction.	7/12/2018
2868	16	/policies/environmental-impacts-of-transportation/	Ban cars!	7/12/2018
2869	16	/policies/environmental-impacts-of-transportation/	CONGESTION PRICING.	7/12/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2870	1	/policies/access-to-housing/	I strongly support all of the above five listed strategies to increase the housing supply in Minneapolis. As a millennial renter with a modest income, it has been increasingly difficult to find affordable rental housing. We went on more than a dozen showings in spring of 2018, only to have the unit rented before we even had a chance to discuss and submit an application. We had even more showings scheduled that were canceled before the showing date because it had already been rented. It got to the point where we were genuinely scared we would not be able to find a place to live before our current lease was up. We are both white young people with stable employment, good income and perfect rental history. I can't even imagine what it must be like for someone with less privilege, much less any kind of criminal record. Housing is a crisis in this city and I am glad to see our planners and policymakers taking smart, bold, innovative and commonsense action to address it.	7/12/2018
2871	16	/policies/environmental-impacts-of-transportation/	Allow people to get around safely no matter what mode they choose. Walkable neighborhoods year-round during all types of weather even winter. Climate change is real we need to adjust and encourage other modes and make space for all users.	7/12/2018
2872	16	/policies/environmental-impacts-of-transportation/	Buy electric buses! Lots of electric buses.	7/12/2018
2873	16	/policies/environmental-impacts-of-transportation/	Let's get real about our climate-obliterating dependence on cars. More bike lanes, more transit, more pedestrian friendly streets. Buildings with amenities that support those lifestyles. Eliminate parking minimums. It's time to shift our transportation system.	7/12/2018
2874	44	/policies/comprehensive-investments/	a) remove evictions, felonies, and misdemeanors from people's records b) yes c) work to decriminalize. strategic partnerships that minimizes police on the streets d) and even where it is not. e) making sure that the comprehensive investment includes things like parks, public transit, libraries, and more	7/12/2018
2875	16	/policies/environmental-impacts-of-transportation/	Close more streets to car traffic, both major thoroughfares and side streets, to create pedestrian oriented spaces	7/12/2018
2876	16	/policies/environmental-impacts-of-transportation/	Autonomous vehicles won't solve our problems! In some ways they may make things worse. We should be planning for mass transit over AVs.	7/12/2018
2877	16	/policies/environmental-impacts-of-transportation/	(i) also definitely needs to happen especially on city vehicles, also private garbage trucks	7/12/2018
2878	16	/policies/environmental-impacts-of-transportation/	(e) congestion pricing	7/12/2018
2879	16	/policies/environmental-impacts-of-transportation/	Implement congestion pricing. Increase the cost of parking.	7/12/2018
2880	16	/policies/environmental-impacts-of-transportation/	Make parking cost what it should cost. Meters on Eat Street!	7/12/2018
2881	16	/policies/environmental-impacts-of-transportation/	open more streets to pedestrian and non-car uses	7/12/2018
2882	16	/policies/environmental-impacts-of-transportation/	Make good investments. AV's wont solve all our problems. Congestion pricing. More pedestrian only streets. Reclaim the city for people. Charge the true cost of driving. It damages our environment and pollutes our air.	7/13/2018
2883	16	/policies/environmental-impacts-of-transportation/	All bikeways in destination rich areas must be two way.	7/13/2018
2884	16	/policies/environmental-impacts-of-transportation/	Reduce length of signal cycles.	7/13/2018
2885	16	/policies/environmental-impacts-of-transportation/	- Minimize car usage within core areas of the city to eventually banning all cars - Close more streets from all car activities - More dedicated bikeways	7/13/2018
2886	16	/policies/environmental-impacts-of-transportation/	(a) no street parking anywhere in the city should be free	7/13/2018
2887	16	/policies/environmental-impacts-of-transportation/	Transit only lanes, please. Buses should not be held hostage to car traffic.	7/13/2018
2888	16	/policies/environmental-impacts-of-transportation/	Ban Cars.	7/13/2018
2889	16	/policies/environmental-impacts-of-transportation/	Please ban cars, thank you.	7/13/2018
2890	16	/policies/environmental-impacts-of-transportation/	* We need to open more streets to pedestrians and close them to cars; downtown might be a good example, it appears that late at night hennepin does this already on weekends. Might be good to have one east/west street where there's a prioritization of small storefronts, combined with a pedestrian/bike only road, this could make a nice experience. * Congestion pricing!!	7/13/2018
2891	16	/policies/environmental-impacts-of-transportation/	* Organize a few days a year where downtown is closed to cars, Paris has done this. Show people how it works.	7/13/2018
2892	16	/policies/environmental-impacts-of-transportation/	Ban cars	7/13/2018
2893	16	/policies/environmental-impacts-of-transportation/	No parking requirements on any building.	7/13/2018
2893	16	/policies/environmental-impacts-of-transportation/	Do away with minimum parking requirements.	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2894	16	/policies/environmental-impacts-of-transportation/	transit should be free during snow emergencies	7/13/2018
2895	16	/policies/environmental-impacts-of-transportation/	Consider congestion pricing and more pedestrian only spaces.	7/13/2018
2896	16	/policies/environmental-impacts-of-transportation/	Free transit for all city residents	7/13/2018
2897	16	/policies/environmental-impacts-of-transportation/	We need electric buses now! We should establish some car free zones - expand the space around Nicollet Mall for example. Or Hennepin between Lake and Franklin - these should be focused on buses, bikes, and most importantly pedestrians! The city should look at ways to improve transit beyond what Metro Transit/Met Council is capable of doing. Charging market rate parking will help people realize the true cost of parking and why it is not a great use of land	7/13/2018
2898	16	/policies/environmental-impacts-of-transportation/	Free transit for all city residents.	7/13/2018
2899	16	/policies/environmental-impacts-of-transportation/	a) figure out a way to incentivize existing structures to also have better facilities for non-cars	7/13/2018
2900	16	/policies/environmental-impacts-of-transportation/	* Free public transit for all city residents	7/13/2018
2901	16	/policies/environmental-impacts-of-transportation/	Lower transit fares. Free if possible.	7/13/2018
2902	66	/policies/air-quality/	(a) FUCK YEAH	7/13/2018
2903	66	/policies/air-quality/	Don't put trash incinerators in communities of color.	7/13/2018
2904	66	/policies/air-quality/	treat vehicle emissions like smoking - it's a health and safety issue for people who work outside	7/13/2018
2905	66	/policies/air-quality/	don't put trash incinerators in communities of color	7/13/2018
2906	66	/policies/air-quality/	move vehicle traffic to less densely populated streets where possible	7/13/2018
2907	66	/policies/air-quality/	* we need to distribute traffic across streets more evenly, currently we're moving lots of vehicle traffic along arterials. can road diets of bigger streets help spread this out?	7/13/2018
2908	66	/policies/air-quality/	Stop funneling polluting vehicles down dense streets where disproportionately poor people live.	7/13/2018
2909	66	/policies/air-quality/	Treat vehicle emissions like indoor smoking. I am pedicab driver, and my workplace (Downtown Minneapolis during busy times) is very harsh. It feels like I'm sucking on a tailpipe. Just like bars banned smoking to promote the health of their employees, downtown streets should restrict traffic to promote health of those enjoying the city.	7/13/2018
2910	66	/policies/air-quality/	Yes, we need to reduce emissions by reducing single occupant vehicles. These emissions have a similar impact to cigarette smoke and takes a toll on community health. If we are increasing density on transit corridors, then we need to look at reducing or even eliminating single occupant vehicles on the right of way in those areas both to improve health and ensure better area quality for people living and traveling in the corridors.	7/13/2018
2911	66	/policies/air-quality/	Follow the Mpls complete streets policy and put cars last on the list of priorities.	7/13/2018
2912	66	/policies/air-quality/	More bike lanes. Eliminate parking minimums.	7/13/2018
2913	66	/policies/air-quality/	Addressing A spread density so we're not concentrating people along the most polluted corridors. It's a health issue for workers who are downtown all the emissions. Reduce it asap. Be more proactive don't rely solely on reporting problems. Take climate change and pollution seriously. Encourage energy efficient appliances and require solar panels on new construction.	7/13/2018
2914	66	/policies/air-quality/	Go carbon neutral in the short to medium future.	7/13/2018
2915	66	/policies/air-quality/	Ban diesel vehicles downtown.	7/13/2018
2916	66	/policies/air-quality/	More zoning actions like pedestrian oriented overlay to eliminate car-oriented uses and make neighborhoods more livable.	7/13/2018
2917	66	/policies/air-quality/	(d) solar panels on every roof, especially apartment buildings! let tenants co-op own the solar hitting their roofs.	7/13/2018
2918	66	/policies/air-quality/	a) apply a lens of racial and economic equity to vehicle related emissions by removing private vehicles from our most densely populated corridors and instead diverting them to nearby lower-density, lower intensity land use corridors.	7/13/2018
2919	66	/policies/air-quality/	The city needs to increase education and outreach out the climate change goals adopted and how best to acheive these goals. Many citizens don't know the commitment that has been made. And consequently, people are not as aware of ways to modify behaviors of energy use, including how they choose to travel	7/13/2018
2920	66	/policies/air-quality/	Ban diesel vehicles from non industrial parts city. Local deliveries should be done by smaller more efficient vehicles.	7/13/2018
2921	66	/policies/air-quality/	- don't put trash incinerators in communities of color - aggressive neutral planning. ideally carbon negative by 2040 a) invest in all electric public vehicles b) make major thoroughfares into public transit and pedestrian only	7/13/2018
2922	68	/policies/energy-efficient-buildings/	Ban single family homes	7/13/2018
2923	66	/policies/air-quality/	* encourage solar!	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2924	68	/policies/energy-efficient-buildings/	Ban SFH	7/13/2018
2925	66	/policies/air-quality/	Consider supporting geothermal heating and cooling as a carbon reducing strategy.	7/13/2018
2926	68	/policies/energy-efficient-buildings/	End single-family zoning, and allow up to 6-unit buildings all across the city. Single-family homes are incredibly energy inefficient and expensive.	7/13/2018
2927	68	/policies/energy-efficient-buildings/	City support for energy efficientizing old buildings.	7/13/2018
2928	68	/policies/energy-efficient-buildings/	Build up and more units to maximize energy efficiencies.	7/13/2018
2929	68	/policies/energy-efficient-buildings/	when we redevelop entire blocks, we could use a ground cooling/heating system like they do in sweden	7/13/2018
2930	68	/policies/energy-efficient-buildings/	Build smartly to maximize breeze and lower energy use like older buildings were constructed to maximize air flow.	7/13/2018
2931	66	/policies/air-quality/	Go carbon negative at a timeline that is in line with science, looking at best practices from other cities and learn in tandem with other places that realize climate change is real. I.e. carbon neutral by 2030, carbon negative by 2040.	7/13/2018
2932	68	/policies/energy-efficient-buildings/	City incentive for switching to electric heat.	7/13/2018
2933	68	/policies/energy-efficient-buildings/	Seek larger scale efficiency projects (not building by building, but full blocks, for example)	7/13/2018
2934	68	/policies/energy-efficient-buildings/	what does "deep carbon building retrofit" mean more in detail? let's talk about that in detail	7/13/2018
2935	68	/policies/energy-efficient-buildings/	would (a) be a citywide public works act? that'd be cool, let's do that.	7/13/2018
2936	68	/policies/energy-efficient-buildings/	- advocating for innovative ideas for multi-building (block scale) energy use projects - create a city jobs guarantee program that goes and retrofits entire city blocks with energy efficient programs - do bigger projects	7/13/2018
2937	69	/policies/renewable-and-carbon-free-energy/	City should work with Xcel and centerpoint to ensure that all residents have affordable carbon-free power and heat.	7/13/2018
2938	69	/policies/renewable-and-carbon-free-energy/	Don't let (g) get in the way of more homes.	7/13/2018
2939	69	/policies/renewable-and-carbon-free-energy/	Don't let G get in the way of providing more homes	7/13/2018
2940	69	/policies/renewable-and-carbon-free-energy/	Work with Xcel to ensure that residential solar can connect to the grid efficiently.	7/13/2018
2941	69	/policies/renewable-and-carbon-free-energy/	Don't allow g. protect solar access on commercial and residential buildings to to stop more growth and housing. We can do both, build up and be inventive.	7/13/2018
2942	69	/policies/renewable-and-carbon-free-energy/	g. concerns about solar access should not be used to limit the creation of more housing.	7/13/2018
2943	69	/policies/renewable-and-carbon-free-energy/	does (g) get in the way of (a) and in the way of building more housing? i don't want to get bogged down in 75 million shadow studies.	7/13/2018
2944	69	/policies/renewable-and-carbon-free-energy/	Grid modernization is critical for resilience, particularly with the weather extremes that we encounter - ensuring people have access to heat and electricity are necessary.	7/13/2018
2945	69	/policies/renewable-and-carbon-free-energy/	explore district energy powered by carbon free sources like something like geothermal.	7/13/2018
2946	69	/policies/renewable-and-carbon-free-energy/	pursue / endorse district heat where feasible, see also my other comments about whole-block redevelopment	7/13/2018
2947	69	/policies/renewable-and-carbon-free-energy/	Protecting solar access sounds like a good idea but could impact the ability to create more housing. Perhaps a mitigation strategy that would ensure any solar lost is at minimum replaced - whether at the existing site or another site in the city so there no loss of overall solar access in the city.	7/13/2018
2948	69	/policies/renewable-and-carbon-free-energy/	The details are important on (g). There are times when new buildings will shadow existing solar, but nevertheless the net environmental benefits would be positive. Protection should not be absolute, but taken into account. District heating and cooling systems should be encouraged.	7/13/2018
2949	9	/policies/open-spaces-in-new-development/	Ban hostile architecture	7/13/2018
2950	9	/policies/open-spaces-in-new-development/	Ban skate stoppers	7/13/2018
2951	69	/policies/renewable-and-carbon-free-energy/	- Build programs like St.Paul has in their downtown district for district energy - Solar farms	7/13/2018
2952	2	/policies/access-to-employment/	Ensure that transit serves employment nodes so that nobody is forced to drive to get to work.	7/13/2018
2953	2	/policies/access-to-employment/	More jobs on transit yes!	7/13/2018
2954	2	/policies/access-to-employment/	Make a serious transit/transportation investment plan. Jobs shouldn't be concentrated in one location. Allow people to work close to where they live.	7/13/2018
2955	69	/policies/renewable-and-carbon-free-energy/	Work to make sure that renewable energy is not prioritized over energy reduction, particularly until environmental consequences of producing solar are mitigated. Focus on circular economy and low-tech green solutions for renewable energy, using the city's purchasing power to push for clean green energy so lower emissions and better AQI here isn't on the backs of other places.	7/13/2018
2956	2	/policies/access-to-employment/	Make sure that reverse commutes aren't penalized.	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2957	2	/policies/access-to-employment/	Action step to add: Enhance transit frequency and speed to job centers.	7/13/2018
2958	2	/policies/access-to-employment/	Improve transit experience for city riders to the level of suburban express riders. More bus lanes, faster, more frequent service.	7/13/2018
2959	2	/policies/access-to-employment/	We have express buses from the suburbs to the city, should work the other way as well. Allow affordable easy transit for all users no matter where they work.	7/13/2018
2960	2	/policies/access-to-employment/	make sure that employment is developed where there is good transit and good transit connects us to existing work hubs. give the suburbs two way transportation!!	7/13/2018
2961	2	/policies/access-to-employment/	Additional action step: add fast, reliable transit between residential clusters and job clusters where they are missing, for example between the Uptown Station and Downtown St. Paul. (Model: 114 U of M express bus)	7/13/2018
2962	69	/policies/renewable-and-carbon-free-energy/	Make sure G doesn't impede higher density and more intense land use development.	7/13/2018
2963	1	/policies/access-to-housing/	Good Day! Not in favor of allowing three or four dwelling units on traditional size city lots, especially in neighborhoods that are farthest from downtown. Some double bungalows acceptable. When we purchased our home, we wanted to be a quiet neighborhood containing only houses with no commercial businesses. Thank you!	7/13/2018
2964	2	/policies/access-to-employment/	Allow commercial uses throughout residential areas, so that people can live near their work.	7/13/2018
2965	2	/policies/access-to-employment/	City should lead by example in ensuring that their buildings are in areas served by transit.	7/13/2018
2966	2	/policies/access-to-employment/	Put all new city/government employment centers/offices on transit and encourage them to use transit rather than drive to work.	7/13/2018
2967	2	/policies/access-to-employment/	We need to ensure transit is available for all income levels. Ensuring transit near employment centers is critical to reducing emissions and giving both workers and potential employers options. New office space should be served by transit options.	7/13/2018
2968	2	/policies/access-to-employment/	No more massive parking ramps private or city owned buildings. Transit accessible city buildings.	7/13/2018
2969	2	/policies/access-to-employment/	make sure new city office buildings/leases are transit accessible, and that all city employees are able to commute without a car	7/13/2018
2970	2	/policies/access-to-employment/	Additional action step: adopt policies that employers unbundle parking costs from compensation to encourage people to make transportation choices other than driving to work.	7/13/2018
2971	2	/policies/access-to-employment/	Additional action step: dedicated transit lanes and protected bikeways in areas that are employment centers.	7/13/2018
2972	2	/policies/access-to-employment/	- Create an environment for jobs up and down the education spectrum - More affordable mixed use so that people can live and work in the same area	7/13/2018
2973	2	/policies/access-to-employment/	City buildings should be located in transit friendly areas. Housing Inspections, Construction Code Services, Public Works, and other divisions are very remotely located, forcing most employees to drive to work.	7/13/2018
2974	2	/policies/access-to-employment/	* mixed use and office space where there is transit, and more housing connected to jobs via transit. we shouldn't distinguish between high frequency transit and normal service busses; many people rely on those as well, each should have equal zoning to account for the need for jobs and housing. * new city office buildings should be on high frequency transit.	7/13/2018
2975	2	/policies/access-to-employment/	Allowing greater mixing of commercial and light industrial uses with residential would also address this aim. A dense downtown is desirable, but allowing office and small business employment in more residential areas puts more people within walking distance of jobs. These types of employment would have little conflict with residential uses.	7/13/2018
2976	3	/policies/production-and-processing/	utilize parking areas in those areas for infill/brownfield development.	7/13/2018
2977	3	/policies/production-and-processing/	Discourage or prohibit non-profit services and charter schools in industrial zoning areas.	7/13/2018
2978	3	/policies/production-and-processing/	Yes! It's awesome to have areas where people can walk to work! Please keep those areas and look for opportunities for infill development in the area to increase housing without pushing the production out.	7/13/2018
2979	3	/policies/production-and-processing/	make nonprofits pay property taxes	7/13/2018
2980	3	/policies/production-and-processing/	Encourage industrial development infill on large industrial surface parking lots, so that more jobs fit in the same space.	7/13/2018
2981	54	/policies/supporting-economic-growth/	Explore property taxes for non-profits above a certain size. Non-profits use roads, too.	7/13/2018
2982	3	/policies/production-and-processing/	Stop using industrial land for charter school/non-profit use. Only have land uses that contribute to the tax base.	7/13/2018
2983	3	/policies/production-and-processing/	Direct businesses that require industrial uses into these areas while banning businesses that can outbid them and aren't necessarily dependent on industrial land. (Charter schools can be located in neighborhoods, and shouldn't eat up our limited industrial land.)	7/13/2018
2984	3	/policies/production-and-processing/	get creative with infill on empty lots in production areas??	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

2985	3	/policies/production-and-processing/	Use production areas smartly. Maximize the potential.	7/13/2018
2986	3	/policies/production-and-processing/	- create more green space - actively create public transit into these spaces	7/13/2018
2987	3	/policies/production-and-processing/	Increase fees or other costs to large surface parking lots for all property uses so that tax-exempt uses are discouraged from retaining surface parking on valuable land (anywhere, industrial or commercial node or residential n'hood).	7/13/2018
2988	3	/policies/production-and-processing/	Allowing housing development near low-pollution production and processing plants would put people closer to well paid employment. In general, the city should not precisely constrain what types of non-polluting industries locate in particular areas.	7/13/2018
2989	3	/policies/production-and-processing/	- create more green space - actively create public transit into these spaces - promote large scale energy sharing and efficiency programs amongst companies in the areas	7/13/2018
2990	52	/policies/human-capital-and-a-trained-workforce/	Support for trade schools.	7/13/2018
2991	52	/policies/human-capital-and-a-trained-workforce/	Free trade schools	7/13/2018
2992	52	/policies/human-capital-and-a-trained-workforce/	Installers for energy efficient stuff like insulation and solar panels.	7/13/2018
2993	52	/policies/human-capital-and-a-trained-workforce/	Free trade schools and energy efficient installers. Invest in our young people in gaining valuable skills so they're able to thrive.	7/13/2018
2994	52	/policies/human-capital-and-a-trained-workforce/	(g) free trade schools. carpenters, plumbers, electricians! energy efficiency installers!!	7/13/2018
2995	3	/policies/production-and-processing/	Encourage high density industrial uses.	7/13/2018
2996	52	/policies/human-capital-and-a-trained-workforce/	Focus investments on building capacity in the trades (electricians, plumbers, carpenters, etc.) and also in energy efficiency installers. These are jobs that make housing more affordable to build, that pay well, and that can address unemployment disparities.	7/13/2018
2997	52	/policies/human-capital-and-a-trained-workforce/	Find a way to pay home health aids better.	7/13/2018
2998	52	/policies/human-capital-and-a-trained-workforce/	* free trade schools: serious lack of workers right now. including insulation workers and geothermal / clean energy workers	7/13/2018
2999	3	/policies/production-and-processing/	I appreciate the goal of keeping industrial uses within the city, but separating them from other uses, particularly without a specific health reason, creates dead zones that feel unsafe to walk and be in outside work hours and cuts parts of the city off from other parts of the city.	7/13/2018
3000	52	/policies/human-capital-and-a-trained-workforce/	Provide access to education and skill training to provide access to employment, especially for people displaced from industries that are on the decline	7/13/2018
3001	52	/policies/human-capital-and-a-trained-workforce/	- free trade schools - green sector installation trades training - public health and health services trainings	7/13/2018
3002	52	/policies/human-capital-and-a-trained-workforce/	Promote continued learning so that people can move up in their jobs.	7/13/2018
3003	54	/policies/supporting-economic-growth/	Encourage small commercial spaces.	7/13/2018
3004	54	/policies/supporting-economic-growth/	Encourage small/convertible retail in new construction.	7/13/2018
3005	54	/policies/supporting-economic-growth/	Allow more businesses in residential areas. Residents should have more options to own a business in their house/garage	7/13/2018
3006	54	/policies/supporting-economic-growth/	Expand where commercial/retail space are currently allowed in the zoning code. Low-intensity commercial works perfectly well in neighborhood interiors. They should be legal again.	7/13/2018
3007	54	/policies/supporting-economic-growth/	(c) require a minimum number of commercial/active doors per 100 feet to encourage very small commercial spaces that are more affordable to new entrepreneurs and more marginal businesses	7/13/2018
3008	54	/policies/supporting-economic-growth/	Allow people to run a business out of their homes	7/13/2018
3009	54	/policies/supporting-economic-growth/	(c) let/help people turn their garages into businesses, and support similar small scale retail.	7/13/2018
3010	54	/policies/supporting-economic-growth/	Encourage construction of small commercial spaces. Preserve existing small construction spaces. Space is a barrier to some small businesses, new building create large commercial spaces. Make them able to be converted to smaller spaces. Allow residents to run businesses out of the home.	7/13/2018
3011	54	/policies/supporting-economic-growth/	* allow creative zoning for small businesses. garages / ADUs and the like should be able to have a small-scale retail use	7/13/2018
3012	54	/policies/supporting-economic-growth/	c) allow alley-oriented and every home to support commercial development/allow residents to run businesses out of their home.	7/13/2018
3013	54	/policies/supporting-economic-growth/	allow residents to run small commercial out of their home.	7/13/2018
3014	54	/policies/supporting-economic-growth/	In respect of (f) the city should reconsider the number of specialized licenses that are required by businesses. Many of the categories of trade that are regulated have little public policy rationale for continued special licensure.	7/13/2018
3015	54	/policies/supporting-economic-growth/	Ensure there are small scale spaces for new businesses, including allowing residents to run a business out of their home	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3016	54	/policies/supporting-economic-growth/	(c) allow businesses to be run out of homes in every part of the city, no matter the zoning, to ensure affordable space to small business-owners.	7/13/2018
3017	54	/policies/supporting-economic-growth/	Encourage construction of small commercial spaces. Preserve existing small construction spaces. Space is a barrier to some small businesses, new building create large commercial spaces. Make them able to be converted to smaller spaces. Allow residents to run businesses out of the home.	7/13/2018
3018	56	/policies/supporting-small-businesses/	Small cart vendors	7/13/2018
3019	54	/policies/supporting-economic-growth/	Support small cart vendors. Make a 24 hour city!	7/13/2018
3020	56	/policies/supporting-small-businesses/	Allow more cart vendors	7/13/2018
3021	56	/policies/supporting-small-businesses/	make hot dog vendors legal. TACO TRUCKS ON EVERY CORNER	7/13/2018
3022	54	/policies/supporting-economic-growth/	- allow residents to run business in their homes - allow for small cart vendors	7/13/2018
3023	56	/policies/supporting-small-businesses/	Small developers can build if we allow 2-6 unit buildings.	7/13/2018
3024	56	/policies/supporting-small-businesses/	Allowing smaller business/commercial spaces (including tiny!) also helps create jobs for local businesses and keeps wealth local.	7/13/2018
3025	56	/policies/supporting-small-businesses/	allowing 4plexes will allow smaller builders to build, keeping the buildings owned locally as well	7/13/2018
3026	56	/policies/supporting-small-businesses/	Smaller scale buildings like 3-4 unit buildings are more likely to hire local contractors and residents. Allowing for more missing middle will promote this.	7/13/2018
3027	56	/policies/supporting-small-businesses/	Create food pods (like in Portland) that have electricity and water on vacant parking spaces. They create activity where it's needed, are very affordable starting spaces, and deal with the horrible diesel motor noise/pollution/smell.	7/13/2018
3028	56	/policies/supporting-small-businesses/	promote unionization in small businesses	7/13/2018
3029	56	/policies/supporting-small-businesses/	Support hyper local unionization efforts and workers rights efforts	7/13/2018
3030	56	/policies/supporting-small-businesses/	* allowing small multifamily housing means these buildings are more likely to be built by local workers. current small multifamily developers hire locally, while bigger companies can hire from wherever. more housing means more local jobs	7/13/2018
3031	56	/policies/supporting-small-businesses/	Upzone to allow small multi-family homes, built by local builders rather than corporate. Employs more local contractors and keeps more money in the community.	7/13/2018
3032	56	/policies/supporting-small-businesses/	- Promote more unionization and co-op models - Advocating for local hiring and hiring within communities their services	7/13/2018
3033	56	/policies/supporting-small-businesses/	Small businesses are likely to begin as home-based businesses. Loosening land-use restrictions on how people can use the spaces in multi-unit dwellings (office / residential) will make the best use of liberalisation of residential building (fourplexes legalized)	7/13/2018
3034	56	/policies/supporting-small-businesses/	Foster connections between local trades/small scale rental housing owners. Duplexes, triplexes, fourplexes are more likely to hire local labor, and be locally owned.	7/13/2018
3035	56	/policies/supporting-small-businesses/	b) include not just women, but non-binary/third gender and others.	7/13/2018
3036	9	/policies/open-spaces-in-new-development/	Stop hostile design of public spaces targeted against skateboarders.	7/13/2018
3037	9	/policies/open-spaces-in-new-development/	Design to allow for skateboarding in public spaces. Skateboarders have been using public urban spaces for decades, and when designed right, it can work fine. Look to Copenhagen for how to do this!	7/13/2018
3038	9	/policies/open-spaces-in-new-development/	Hostile architecture makes places hostile. Let's not do that to our neighborhoods, and especially not to new developments that will be here for 50-100 years.	7/13/2018
3039	9	/policies/open-spaces-in-new-development/	ban hostile environments. either design to promote skateboard uses or install skate features. stop making it impossible to catch a damn nap in a park!!	7/13/2018
3040	9	/policies/open-spaces-in-new-development/	Reduce large alleyways like the on the Nic on 5th block, or the Uptown Target block	7/13/2018
3041	9	/policies/open-spaces-in-new-development/	Designs that are hostile to people and accessibility. Benches, and skateboard stopper marker. If you're building plazas mandate open to public. Consider the full environment and not just one specific development with more pedestrian connections.	7/13/2018
3042	56	/policies/supporting-small-businesses/	The city definitely needs to use diverse suppliers. Ensuring small scale office and retail spaces that will be affordable to new and small business is critical. Small spaces, small business help ensure local owners with local employees. This works for small housing units as well - local landlords and constructed by local developers and local workers.	7/13/2018
3043	9	/policies/open-spaces-in-new-development/	Do not cede alley ROW in any large-scale development, but do not necessarily use for motorized vehicles. Allow it to function as public spaces/plazas.	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3044	9	/policies/open-spaces-in-new-development/	Prohibit large developments from vacating alleys, as the alleyways are critical to the health and community-connectivity of our neighborhoods. Prohibit alleys from being any wider than is necessary (they should accommodate a car moving slowly, but not a semi-truck).	7/13/2018
3045	9	/policies/open-spaces-in-new-development/	Pedestrian connections should be included in new development. For example the greenway promenade in uptown doesn't have accessible curb cuts where the sidewalk meets the street.	7/13/2018
3046	9	/policies/open-spaces-in-new-development/	- if developers are making plazas make them public access - do not create hostile infrastructure (do not allow of skate spikes and homeless breakers on benches) - make alleys walkable	7/13/2018
3047	9	/policies/open-spaces-in-new-development/	think about connections and plan for how people will actually use the spaces wrt curb cuts.	7/13/2018
3048	9	/policies/open-spaces-in-new-development/	* for plazas - ban hostile/defensive architecture: it's bad for people who need to spend time in public spaces, and bad for homeless people who may need somewhere to sleep. we need to end homelessness, but we should not be actively working against. * need to mandate that right of way remains open to pedestrians and cyclists through construction. often construction projects close roads to everyone except cars. it's easier to navigate around construction for a person in a car than it is for a person walking or biking.	7/13/2018
3049	9	/policies/open-spaces-in-new-development/	Ban hostile architecture and skateboard stoppers.	7/13/2018
3050	9	/policies/open-spaces-in-new-development/	Try to replicate more narrow streets and alleys like the Loring Park alley or European streets.	7/13/2018
3051	9	/policies/open-spaces-in-new-development/	Minneapolis has a lot of poorly designed quasi-public spaces without adequate shade and shelter. In general, we would be better with smaller and fewer high-quality spaces. The city should require that curb cuts prioritize pedestrian crossings, so that the level of the sidewalk doesn't change. It is important that public plazas are engaged by the building behind them. Allow businesses to have entrances on alleys, and for alleys to be sheltered to allow the creation of pedestrian spaces in between buildings.	7/13/2018
3052	6	/policies/pedestrian-oriented-building-and-site-de	make alleys pedestrian friendly	7/13/2018
3053	6	/policies/pedestrian-oriented-building-and-site-de	Make sure that the city is considering alleys in development.	7/13/2018
3054	6	/policies/pedestrian-oriented-building-and-site-de	More places like loring alley.	7/13/2018
3055	6	/policies/pedestrian-oriented-building-and-site-de	why is the word "alley" nowhere in the comp plan?	7/13/2018
3056	6	/policies/pedestrian-oriented-building-and-site-de	We need to make alleyways public spaces and streets; what can we do to allow businesses to open and reclaim alleyways as street fronts? many cities do this, we are not. it doubles street/walkable space, makes blocks shorter, and can provide many more spaces for small businesses to flourish.	7/13/2018
3057	6	/policies/pedestrian-oriented-building-and-site-de	Alleys are important to our pedestrian-friendly environment. They should be narrow to match historic alleys. They should have activity (like businesses, front doors to ADUs, kids playing. (They should be included somewhere in the comp plan!)	7/13/2018
3058	0.1	/topics/land-use-built-form/	Allow up to 3 stories across the city, rather than 2.5.	7/13/2018
3059	0.1	/topics/land-use-built-form/	We should allow small-scale commercial uses even in places currently listed as Urban Neighborhood.	7/13/2018
3060	0.1	/topics/land-use-built-form/	The neighborhoods east of Hennepin (Kenwood area, etc) should match the west side of Hennepin	7/13/2018
3061	0.1	/topics/land-use-built-form/	these historic buildings are cute and adorable but it's REALLY COOL when taller buildings are interspersed with old brownstones and i think this zoning should match the surrounding area	7/13/2018
3062	0.1	/topics/land-use-built-form/	Lakefront property should include more units, be higher intensity so more people can enjoy public amenities.	7/13/2018
3063	0.1	/topics/land-use-built-form/	Allow high densities and mixed use buildings on the lakes. The lakes shouldn't be reserved for the rich to have mansions on.	7/13/2018
3064	0.1	/topics/land-use-built-form/	Property fronting the lakes should be higher intensity to allow more people to enjoy the amenity.	7/13/2018
3065	0.1	/topics/land-use-built-form/	The intensity of the east and west side of Hennepin should match (Ward 7 & 10). Intensify the use. Lake front property should be a higher intensity. I feel like we're following the old pattern of keeping better land use out of all neighborhoods.	7/13/2018
3066	0.1	/topics/land-use-built-form/	Lowry Hill needs to be designated at least as high of intensity of land use as, say, Whittier due to its proximity to downtown, transit, and amenities. Ideally it should be even higher, as part of starting to address redlining/segregation.	7/13/2018
3067	0.1	/topics/land-use-built-form/	No neighborhoods within four blocks of a light rail line should be lower than interior 3	7/13/2018
3068	0.1	/topics/land-use-built-form/	this should match the transit 10 on the other side of the street!	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3069	0.1	/topics/land-use-built-form/	More consistency in the map. Don't allow carve-outs for certain loud residents.	7/13/2018
3070	0.1	/topics/land-use-built-form/	Allow more intense land use along old streetcar line. Everything on this map could be moved up one. No exceptions for richer areas who have benefited from exclusionary zoning.	7/13/2018
			<p>I am encouraged by the general trend towards allowing greater intensity of land use in all areas. However, the proposed built form maps are in general still too tied to the existing land use and do not allow gradual intensification. For example, large areas of the Wedge are zoned Interior 3, because they are close to downtown. However areas a similar distance from downtown (e.g. West of Hennepin to Lake of the Isles, and Seward) are largely zoned Interior 2. It is not clear why areas a similar distance from downtown receive different designations.</p> <p>I also think that the distinction between corridor and interior is incorrect. Allowing taller buildings in neighborhood interiors permits more people to live on streets with light traffic (residential buildings are in general not a large traffic generator). Putting multi-use dwellings largely on corridor streets exposes people in these buildings to greater health hazards from air pollution. Because large areas of the city are already built out, it is unlikely that 2 storey houses near Lake of the Isles will be replaced by 6 storey buildings tomorrow. However, people should at least have the opportunity.</p>	7/13/2018
3071	0.1	/topics/land-use-built-form/	I will sum up by saying that a blanket designation of at least Corridor 6 in all residential areas would be ideal.	
3072	0.1	/topics/land-use-built-form/	Eliminate Interior 1, increase everything up one level.	7/13/2018
3073	0.1	/topics/land-use-built-form/	Great plan! Good job! I like it! Fourplexes EVERYWHERE!!!	7/13/2018
3074	0.1	/topics/land-use-built-form/	How can we eliminate Interior 1? It's not an intense land use at all, and a lot of interior 1 corresponds with high property values and desirable neighborhoods on transit. We need to allow more housing particularly in South Minneapolis, where racial covenants and low zoning have contributed to racial segregation, keeping affluent neighborhoods affluent, and people of color and low-income renters out.	7/13/2018
3075	0.1	/topics/land-use-built-form/	Some of the most in-demand areas of SW Minneapolis are the areas near commercial nodes, so we should allow more commercial nodes in predominantly residential areas.	7/13/2018
3076	0.1	/topics/land-use-built-form/	eliminate interior 1??? ok thanks. it goes against your stated goals and carries through redlined bullshit.	7/13/2018
3077	0.1	/topics/land-use-built-form/	also why are you splitting hairs about 3 vs 4 stories on corridor 4 vs interior 3 - maybe combine those to interrioridor 3.5???	
3077	0.1	/topics/land-use-built-form/	Higher density along all parks!	7/13/2018
3078	0.1	/topics/land-use-built-form/	Interior three should be 4 or at least 3.5 stories! Thanks.	7/13/2018
3079	77	/policies/park-access/	Upzone more near parks. People should be allowed to live close to parks.	7/13/2018
3080	0.1	/topics/land-use-built-form/	Interior two should be 3 or at least stories! Thanks.	7/13/2018
3081	77	/policies/park-access/	To improve access to parks, the perimeter of every park should be zoned one intensity use higher than the surrounding neighborhood. That's critical for renter- and condo-living families to access parks.	7/13/2018
3082	77	/policies/park-access/	Public access to parks in the Twin Cities has historically been structured by race. It is not coincidental that racial covenants were heavily used along the parkways and in streets within one or two blocks of the Grand Rounds. To rectify these historic inequities the zoning along parkways and fronting parks should be significantly higher, ideally Corridor 6. There are currently many park areas that are fronted by 4-6 storey buildings. Curry Park and Loring Park are good examples. We should allow greater construction of higher density buildings near all parks, rather than letting zoning designations reflect historically inequitable practices.	7/13/2018
3083	26	/policies/vision-zero/	Thank you for including vision zero. Please REMOVE all references to enforcement. Enforcement amplifies racial disparities. It would lead to community backlash, and there are plenty of other proven safety strategies to implement.	7/13/2018
3084	33	/policies/affordable-housing-production/	Increasing the amount of affordable housing is a laudable goal. However, the methods to achieve it as outlined here aren't the way to go about it. The market is actively at work providing more housing units in places where only parking lots previously existed. Don't interfere with the market. Instead, actions should be taken to reduce the costs of home ownership. In the 1950s population was about 100,000 greater than it is today, but the amount of city employees was significantly less than today despite the fact that the digital revolution (PCs) hadn't yet happened. A policy should be enacted to lower the number of city employees to reflect the improvements in productivity, lowering the costs of city government, therefore lessening the taxes required to pay for it and creating more affordable housing!	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3085	17	/policies/complete-streets/	Please continue to improve hennepin avenue between uptown and downtown. Prioritize bus lanes for commuters. Remove left turns, or reduce car traffic to 1 lane each for with a center turn lane.	7/13/2018
3086	0.1	/topics/land-use-built-form/	eliminate interior 1??? ok thanks. it goes against your stated goals and carries through redlined bullshit. also why are you splitting hairs about 3 vs 4 stories on corridor 4 vs interior 3 - maybe combine those to interior 3.5??? "corridor" zoning should be minimum 3 blocks instead of 1 parcel	7/13/2018
3087	18	/policies/walking/	F: can we improve even further the pedestrian connection along hennepin and lyndale near the Lowry tunnel. Feels unsafe to walk here as a pedestrian with the traffic speeds/exit designs. And the current area cuts off uptown from downtown	7/13/2018
3088	20	/policies/transit/	F: more high frequency and rapid transit routes are needed, and needs legislative support and funding.	7/13/2018
3089	11	/policies/skyways/	Skyway maps and layout are still few and far between - I work downtown and even I still get disoriented	7/13/2018
3090	0.1	/topics/land-use-built-form/	"Neighborhood Mixed Use" speaks only of commercial property, but Figure T1.1 clearly indicates residential as permissible. The verbiage should be clarified to indicate that residential property is part of the mix, even if the commercial restriction verbiage is still in place to indicate its intent for being neighborhood-oriented. Figure T1.2 shows permissible entrances on the corridor facing street corners. It should indicate if those are required entrances. Additionally, it should indicate that corridor facing entrances are permitted in the spaces not at the corners as well.	7/13/2018
3091	42	/policies/expand-homeownership/	I think that this equity lens is a terrific way to look at this problem and reverse decades of housing discrimination & denied wealth building. I support the draft language of this section. That said: 1. I'd like a more explicit definition of homeownership as including condos, multi-plexes, ADUs, etc. Highlighting the ways these non-SFH ownership options will become increasingly important in the future would be desired 2. In a similar vein, increasingly calling out loan options, counseling, and the like for all types of homes, specifically condos and other non-SFH options is important to expand the scope of discussion beyond SFHs. 3. The plan definitely addresses this already, but showing a commitment to wealth building opportunities not tied to homeownership (city is majority renter, etc.) should be a top City priority.	7/13/2018
3092	38	/policies/affordable-housing-near-transit-and-job-	I very strongly agree with the language here, with a housing shortage and a climate crisis underway, we need strong commitments for dense housing near all transit corridors, with City money or requirements for affordability wherever possible. I have the strong YIMBY belief that any housing is good housing, but the last thing I want is for privileged folks to have near-exclusive access to LRT/BRT stations and marginalized folks forced to less-desirable transit locations. Heavy development along the future LRT extensions (Bryn Mawr & West Lake come to mind) and sustained transit investment in North, Phillips, and the U is also critical. I support any easing of parking requirements, minimum FAR requirements, or other tools to boost density, especially on our heaviest transit corridors.	7/13/2018
3093	1	/policies/access-to-housing/	Higher density along transit routes sounds terrific but it is critical that such density consist of adequate affordable housing units, not just upscale apartments, condos, and single family homes. duplexes, triplexes and fourplexes without appropriate zoning could simply replace existing housing with upscale housing which would not accomodate those unable to afford such housing.	7/13/2018
3094	0.1	/topics/land-use-built-form/	The changes enabled by the built form district guidance will permanently change the city and, unfortunately, not for the better which I hope is one of the goals of this plan. The Built Form Guidance for the Interior 1 which is primarily single family homes will now enable up to 4 units on a property. Have we learned nothing from our mistakes of the past? When single family homes on Pillsbury Avenue were turned into multi-family units the entire neighborhood declined. Additionally, one of the stated goals for the plan is to preserve the historic structures in the city. Our home is over one hundred years old and while it isn't designated as an historic landmark it has been lovingly maintained as have many others in our neighborhood that are also single family homes. I believe if we had desired to live in a more dense neighborhood we would have chosen that. Let's not allow these beautiful historic structures to be bulldozed in favor of multi-family units. If this happens it will enable a new edition of "Lost Twin Cities".	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3095	41	/policies/tenant-protections/	<p>Housing stability for renters is as precarious as it's ever been for renters in Minneapolis. I support strong City policy that can lead to a "tenant bill of rights" that will provide much more stability than currently exists, in boom or bust cycles.</p> <p>The city should consider specific actions, such as:</p> <ul style="list-style-type: none"> -Rent stabilization, capping yearly rent hikes to protect renters from extreme year-to-year increases -Expand relocation fee assistance. -Require property owners to give advance notice of sale; as much as 6 months. -A "Right of First Refusal" policy such that when tenants get notice of sale, they have the option to buy the property. The same system could provide the city the option to buy and preserve the properties. -Provide guaranteed housing if tenants are displaced for redevelopment. <p>Implement a "Just Cause" eviction policy. This provides landlords with a list of valid reasons to end a rental agreement, and prevents leases from being ended "at will". Seattle has had this since 1980.</p> <ul style="list-style-type: none"> -Provide lawyers to tenants facing eviction and other housing court cases, for free. You should have the right to an attorney if you're facing the prospect of losing your home. -City and state labor policies should protect those appearing in housing court and include this in Safe & Sick Time. No one should have to worry about time off work to appear in court. 	7/13/2018
3096	1	/policies/access-to-housing/	<p>your goals are lofty and righteous, but not realistically obtainable.</p> <p>the above points sound good in isolation, but are too vague and lack any clarity as to what restriction need apply.</p>	7/13/2018
3097	2	/policies/access-to-employment/	<p>This is very unclear hyperbole.</p>	7/13/2018
3098	37	/policies/mixed-income-housing/	<p>Wow, fantastic weblog format! How long have you ever been blogging for? you make running a blog look easy. The whole look of your web site is great, let alone the content material! http://www.village-pharmacy.net/index.php/component/k2/itemlist/user/222221</p>	7/13/2018
3099	1	/policies/access-to-housing/	<p>I am very much in support of all four tenets of this section of the plan. I am a downtown resident who supports additional neighbors, as it will make my neighborhood safer, more vibrant, and will hopefully keep my rents affordable (and preserve potential condo options in the future). The other housing proposals are also necessary in a housing crisis to reduce carbon emissions and avoid sprawl.</p>	7/13/2018
3100	31	/policies/creative-workers/	<p>Creative workers typically earn less than traditional full time employees. To allow them to live in the city existing low density housing needs to be retained. To give them space to work existing studio enclaves such as the area north of Broadway and south of 18th Ave NE have to be protected from more profitable real estate development. The future land use plan proposes the area as Production/Mixed Use, long with the Built Form to permit 6 or more story buildings in the same area. Both the housing which serves as live work and the studios will be displaced by developer driven housing.</p>	7/13/2018
3101	29	/policies/creative-sector-economy/	<p>The proposed plan for the NE Arts district permits the construction of 2-6 story buildings as a Corridor 6 built form area. This proposal is in direct contradictions to Item b above. The appropriate built environment already exists and requires protection from over development. By permitting up to 20 story buildings the arts district will be displaced.</p>	7/13/2018
3102	76	/policies/new-parks/	<p>I strongly believe Policy 76 is a high priority and fully support the actions steps.</p>	7/13/2018
3103	49	/policies/educational-and-economic-access/	<p>One worker protection that I feel like desperately needs to be considered is a fair scheduling ordinance. Working hour insecurity makes it difficult for many to plan sustainable economic futures, and the city can act now to fix that problem.</p> <p>Another policy we should be considering long term is that of a municipal basic income - with advances in automation, work will likely look much different 20 years from now. We should be proactive about finding economic models that work for our communities.</p>	7/13/2018
3104	50	/policies/access-to-technology/	<p>Municipal fiber internet around the whole city! The current stranglehold by Comcast in my neighborhood is horrible.</p>	7/13/2018
3105	52	/policies/human-capital-and-a-trained-workforce/	<p>There should be a goal in here to eliminate the disparities in unemployment rates between white people and people of color by 2040.</p>	7/13/2018
3106	55	/policies/business-innovation-and-expansion/	<p>I'm glad the language "low negative community impacts" is in this policy. I was very concerned when Greater MSP was bidding to host a campus of Amazon, a company that has been incredibly harmful to Seattle's community. We shouldn't be encouraging growth for growth's sake, we should focus on building a community our current residents will love to live in, knowing that growth will follow naturally.</p>	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3107	3	/policies/production-and-processing/	Given the city's difficulty in forcing out businesses like Northern Metals, it is incredibly important that new production infrastructure is not just built in "traditional production areas", as many of those areas are contiguous with neighborhoods of color. Rather, we should share the burden and benefit of production infrastructure across the city - including where it makes rich white communities uncomfortable.	7/13/2018
3108	58	/policies/business-districts-and-corridors/	We need to ensure that arts organizations have sustainable, long term funding. I look at the closing of Intermedia Arts and think "what a tragedy." The city should have the resources to step in and preserve that space as an art hub.	7/13/2018
3109	31	/policies/creative-workers/	Ensure that artist housing remains affordable on artist incomes - much of the artist housing that exists now is unaffordable for most artists, and is instead inhabited by artists who are financially supported by family or spouses.	7/13/2018
3110	1	/policies/access-to-housing/	Yes to upzoning - homeowners will have to live with the fact that this isn't the suburbs. My girlfriend searched for an apartment for 6 months before she found something decent - our affordable housing crisis is out of control.	7/13/2018
3111	33	/policies/affordable-housing-production/	Private developers seem uninterested in building affordable housing - and why should they, when they can build luxury condos for Fortune 500 office workers, sell half of them, and pocket the rest? Here are some ideas about how to create more affordable housing: 1. The city should tax extremely large businesses in our boundaries, then use that money to build affordable housing. We can't afford to become a San Francisco or Seattle. 2. The city should require apartment and condo buildings to have a minimum fill rate: if the existing stock isn't being used, prices need to be brought down.	7/13/2018
3112	39	/policies/fair-housing/	Given Minneapolis' past complicity in redlining and other forms of discrimination, we should offer reparations to people of color who are first time homebuyers. Perhaps down payment assistance or subsidized mortgages.	7/13/2018
3113	40	/policies/homelessness/	Tax the rich, build shelter beds.	7/13/2018
3114	41	/policies/tenant-protections/	Require landlords to share information about legal rights of tenants as part of a move in process.	7/13/2018
3115	42	/policies/expand-homeownership/	Reparations for people of color who are first time homebuyers in Minneapolis!	7/13/2018
3116	43	/policies/housing-displacement/	Have affordability requirements for new housing development in communities "at-risk" of gentrification - particularly neighborhoods that are "majority minority"	7/13/2018
3117	44	/policies/comprehensive-investments/	Divest from police, invest in community-led alternatives.	7/13/2018
3118	23	/policies/coordinated-development-strategy/	Use an explicit reparations model when deciding where to invest resources moving forward - marginalized communities weren't marginalized by accident, and they deserve to bear the fruits of the increased wealth and prestige their labor has given to the city.	7/13/2018
3119	15	/policies/transportation-and-equity/	Our transit police (I know, the Met Council) have an enormous effect on people of color's ability to use public transit safely. Limit their presence wherever possible.	7/13/2018
3120	16	/policies/environmental-impacts-of-transportation/	Please god build better east-west bus infrastructure.	7/13/2018
3121	61	/policies/environmental-justice/	Divest fully from fossil fuels.	7/13/2018
3122	81	/policies/social-connectedness/	New Neighborhoods Investment Plan, investing specifically in historic neighborhoods of color. Give us the resources we've been denied and watch us grow!	7/13/2018
3123	85	/policies/access-to-health-social-and-emergency-services/	Move away from using police to solve social problems. Divest from them long term, and develop a more specialized approach to public safety approaches. For example, instead of having MPD respond to mental health crises, build a partnership with the county's COPE program and route 911 calls for mental health to them first.	7/13/2018
3124	1	/policies/access-to-housing/	if each unit has 3 garbage bins (garbage, recycling, organics) that means 12 bins for a 4-plex that takes up the whole lot. or are you just going to plan on a dumpster for each lot?	7/13/2018
3125	84	/policies/public-safety/	I agree with much of what's here - our public safety infrastructure is stuck in the 19th century, and we need to find better, data driven ways of keeping our communities safe. But "building trust" and "reflecting diversity" in our police force and other emergency services won't ultimately make our communities safer sans accountability - for example, we can become a sanctuary city, but as long as we put people in county jails, we can't protect our residents from ICE. Similarly, increasing communities of color's trust in the police without first eliminating racial disparities is an exercise in public relations, not public safety. MPD has shown through 150 years of history (see www.mpd150.com/report) that it can't be accountable to communities of color, even with reformists in charge and the best of intentions. We shouldn't be investing in police reform alongside community-driven alternatives - we should be divesting from police as Boomer officers retire and investing even more fully into alternatives.	7/13/2018
3126	69	/policies/renewable-and-carbon-free-energy/	Put an additional business licensing or property tax on businesses invested in or engaged in environmentally dangerous activities like pipeline construction or fossil fuel power generation.	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3127	37	/policies/mixed-income-housing/	<p>I was just seeking this information for a while. After 6 hours of continuous Googleing, at last I got it in your web site.</p> <p>I wonder what is the lack of Google strategy that do not rank this kind of informative web sites in top of the list.</p> <p>Usually the top sites are full of garbage. http://shahyan.com/wiki/index.php/Say_Goodbye_To_Aging_Skin_By_Increasing_Collagen_The_Natural_Way</p>	7/13/2018
3128	81	/policies/social-connectedness/	<p>The city should start a canvassing team to let residents (especially renters!) know about opportunities for community engagement. That team should be reflective of the neighborhoods it canvasses in (e.g. hire Black folks to canvass the Northside, Somali speakers to canvass the West Bank, etc.)</p>	7/13/2018
3129	19	/policies/bicycling/	<p>How about making all parking meters automatically come with a bike hitches? How about implementing bike signage throughout the city? How can the city encourage existing businesses to add bike parking?</p>	7/13/2018
3130	92	/policies/identify-and-evaluate-historic-resources/	<p>What about the Minnehaha Hiawatha Corridor? It has already has a historical report and needs more resources. Why not help make the Min Hi Line and highlight this history with a destination greenway right by the airport and light rail?</p>	7/13/2018
3131	7	/policies/public-realm/	<p>The city really need to get its act together on the miscellaneous elements in the public realm. There should be stricter design standards for guardrails, street lighting, benches, power poles, and bike racks so that everything is more coordinated.</p>	7/13/2018
3132	76	/policies/new-parks/	<p>What about a policy line about working to build on community led greenways? Make the Min Hi Line!!</p>	7/13/2018
3133	37	/policies/mixed-income-housing/	<p>When someone writes an article he/she keeps the image of a user in his/her mind that how a user can be aware of it. Thus that's why this paragraph is outststanding. Thanks! http://www.thenailshop.ru/bitrix/rk.php?goto=http://www.mbet88vn.com</p>	7/13/2018

Very helpful information specifically the ultimate part :) I handle such information much. I used to be looking for this certain info for a very long time. Thank you and good luck. http://krati.me/link188bet43579</p>	7/13/2018
3135	0.1	/topics/land-use-built-form/	<p>No fourplex expansion!!!!</p>	7/13/2018
3136	37	/policies/mixed-income-housing/	<p>A fascinating discussion is worth comment. I believe that you need to publish more about this subject, it might not be a taboo subject but typically people do not talk about such subjects. To the next! Kind regards!! http://Www.Oxfordeye.Co.uk/redirect.aspx?url=http://alternatif188bet.com</p>	7/13/2018
3137	1	/policies/access-to-housing/	<p>Disability: While reducing car trips is admirable the city does not have an infrastructure to support individuals with disabilities . This change will only make it more difficult for individuals with mobility disability issues to live in the city my husband has a walking disability right now so I know that first hand . While in theory I like many of these concepts- the way they are played out seems to create a city that favors able bodied childless individuals .</p>	7/13/2018
3138	1	/policies/access-to-housing/	<p>Children: where are the schools in all of this? Many of the schools are already struggling and overcrowded how well creating greater density with absolutely no thinking about School's help ?</p>	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3139	33	/policies/affordable-housing-production/	<p>The current Minneapolis2040 proposal appears to be based on the view that the City of Minneapolis is an island unto itself, and that issues of availability and affordability of housing and transportation can be solved by City limits-only approaches which essentially ignore the obvious fact that these are fundamentally metropolitan-wide issues with negative impacts and potential resources for solution which are regional in nature.</p> <p>One would think that recognition of the inter-relatedness of the City and its inner-ring and outer suburbs, surrounding communities and currently ex-urban areas (to say nothing of the major City of St. Paul) would be self-evident, let alone part of City Planning 101. In this regard, the Minneapolis2040 proposal stands, inexplicably, in sharp contrast to other regional planning efforts based largely on thorough, unbiased analysis by independent experts--which have contributed to the continuing health of the Twin Cities metropolitan area. Rather, the Minneapolis2040 proposal seems to proceed from a largely unanalyzed, quasi-mystical belief that the imposition of "density" throughout the area bounded by the city limits alone is the solution to all the City's (and metropolitan area's) current and future housing and transportation needs. Indeed, the current plan is premised on the apparent belief that proven zoning restrictions within the City such as the limitation of multiple-occupancy dwellings to suitable locations must be abandoned, notwithstanding that such a step would result in the dramatic impairment and de-valuing of the single-family character of the City's most stable and healthy neighborhoods (and an unwarranted windfall to the developers who would unquestionably push such an opportunity to its maximum limits).</p> <p>Meanwhile, even within the City limits alone, there are abundant sites available for multiple-occupancy construction: vacant lots, substandard housing and abandoned or marginally economical former industrial and commercial sites.</p> <p>If mere "density" were the magical answer to housing affordability, then New York City would have the most affordable housing in the nation instead of being among the most expensive. Similarly, if rejection of proven zoning restrictions were the answer to suburban sprawl and traffic congestion then Houston would not be notorious for highway gridlock and onerous commuting by the people who have taken refuge from the city for gated communities of single-family homes in the suburbs.</p> <p>The Minneapolis2040 plan should go back to the drawing board where the issues of housing and transportation should be fully studied on a regional basis with the assistance of unbiased independent experts outside of the City's planning staff--willing to consider a range of solutions which preserve the qualities of Minneapolis like its many health, stable single-family neighborhoods which have produced and sustained the City's excellent reputation among people all across the country.</p>	7/13/2018
3140	1	/policies/access-to-housing/	<p>As a lifelong resident of Minneapolis I feel that many of your assumptions are false. The keys to affordable housing are education and marketable skills, not jamming unwanted high rise buildings in residential neighborhoods.</p>	7/13/2018
3141	1	/policies/access-to-housing/	<p>How does increased density lead to affordable housing? Education and REAL job opportunities are the key.</p>	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3142	1 /policies/access-to-housing/	<p>The current Minneapolis2040 proposal appears to be based on the view that the City of Minneapolis is an island unto itself, and that issues of availability and affordability of housing and transportation can be solved by City limits-only approaches which essentially ignore the obvious fact that these are fundamentally metropolitan-wide issues with negative impacts and potential resources for solution which are regional in nature.</p> <p>One would think that recognition of the inter-relatedness of the City and its inner-ring and outer suburbs, surrounding communities and currently ex-urban areas (to say nothing of the major City of St. Paul) would be self-evident, let alone part of City Planning 101. 3144	1	/policies/access-to-housing/	<p>higher density housing does not equal affordable housing. I am very skeptical about replacing sing family homes and duplexes with 4-plexes that would be far to small for families.</p>	7/13/2018
3145	1	/policies/access-to-housing/	<p>The designation of "transit corridor" feels arbitrary and out of touch. Many of these streets are just somewhat "busy" residential streets that happen to have a bus line (usually ones that years ago had a streetcar line). To now make them subject to much higher densities, placing the houses along them in jeopardy. Many, like ours on W. 44th St. street, are lovely old houses that we've worked on and have invested in for years. Now we feel like we're in the crosshairs of the most recent fad in planning. Frankly. if this thing goes through we will feel betrayed by our city.</p>	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3146	1	/policies/access-to-housing/	<p>I live in SW Minneapolis. I endorse this part of the 2040 plan. The 2040 plan seeks to increase density across the city, not just in SW. In fact, the plan calls for higher densities in the core parts of the city than it does in SW and it spares SW from the expectation of creating true density.</p> <p>Minneapolis is the 84th most-dense city in the U.S. There are suburbs all over the country with higher density than we have. And of course our density figure is driven up by all of the new housing in the multifamily buildings that have gone up near downtown and the university in recent years. The prevailing density in SW Mpls is far below the citywide figure and on a par with your average low-density bedroom suburb. We can easily increase density in this part of the city without even approaching what many regard as a medium density environment. And keep in mind that the "density" we are being asked to absorb is the lightest load designated for any area of the city.</p> <p>And there are all sorts of reasons to welcome greater density. Greater density supports transit, making it easier for people to get out of their cars, producing benefits in air quality, fossil fuel consumption, traffic, energy costs, etc. Density supports businesses and business diversity, producing benefits in jobs, incomes, and neighborhood vitality/quality of life. We can't continue to keep forcing population growth outward, building more roads, more schools, more infrastructure, gobbling up productive farmland and natural habitats.</p> <p>The vacancy rate for apartments in the city is below 3% (economists consider 5-7% "healthy"). We have a shortage that needs to be made up and it is not clear to me why this neighborhood should be exempt from that effort.</p> <p>The expectation that 2040 will produce a flood of dodgy fourplexes in SW neighborhoods is also unfounded. First of all, it is unlikely than many will be built at all. There are higher development profits in high-end single family homes than in down-market fourplexes. But, of course, "down-market" fourplexes is not what this neighborhood would get in any case. Land costs in SW are such that new development will be high end and so anything that does come in won't threaten property values or quality of life as people fear. And by the way, the fear that 2040 will reduce the return on investment of property owners in SW doesn't move me much in any case. I don't see people lining up at City Hall to give back their windfall of property value when the city makes an investment that increases values, so it is not clear why our public policy should be driven by the concerns of property owners who worry that their return won't be as great as they hoped.</p> <p>We have less housing diversity in SW Minneapolis than elsewhere and we have less social diversity as well. We could use more of both and we can easily, easily have more of both without damaging the quality of life that all of us enjoy here.</p>	7/13/2018
3147	0.1	/topics/land-use-built-form/	<p>With regard to changing the zoning laws to allow four story residential construction along Bryant Ave So., I strongly oppose this action. There are numerous reasons for keeping things as they are and thus continuing to have a neighborhood that is working very well as is. A mixture of individual houses and multiple person dwellings is what has made this neighborhood such a solid example of people living together harmoniously. The number one problem with changing the zoning laws would be the crushing shortage of parking that would result. Looking at the parking situation in the Uptown area after the explosion of multi-unit development which has happened there, it would be extremely unfortunate to end up with an extreme shortage of on-street parking such as exists in that area. Whatever the developers might say, there is never going to be enough on-site parking to accommodate the new residents. We have barely enough street parking available as it is. Why should apartment renters and condo owners who do not have off-street parking be forced to park blocks away from their place of residence? It is time to slow down this accelerating development which if left unchecked will destroy the quality of life as we know it in the fine city of Minneapolis. Thank You, Allen Gronhovd 4325 Bryant Ave. So. #D101</p>	7/13/2018
3148	0.1	/topics/land-use-built-form/	<p>Too dense of development planned for Penn Ave S (from 54th to Hwy 62). I do not like the re-zoning of adjacent streets (Oliver and Queen AVES SOUTH) to higher density -- please leave them as-is. ALSO -- FAR too dense on Lyndale Ave S (Minnehaha to HWY 62) -- please scale that density back one level. Same comment on adjacent streets to Lyndale AVE S -- leave density as it currently is.</p>	7/13/2018
3149	30	/policies/arts-and-cultural-assets/	<p>While I understand that policies cannot be specific, my continued observation policies like this one is: what will these efforts look like? For example: how will Minneapolis "build on the strength and diversity of Minneapolis' creative sector"? For those of us who have lived in Minneapolis, there's been a great deal of talk with nominal delivery. What will make 2040 look different than 2004?</p>	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3150	1	/policies/access-to-housing/	<p>I want to respond to action step e above: "In neighborhood interiors farthest from downtown that today contain primarily single-family homes, achieve greater housing supply and diversity by allowing small-scale residential structures on traditional size city lots with up to four dwelling units, including single family, duplex, 3-unit, 4-unit, and accessory dwelling unit building types."</p> <p>People choose to live in different areas of the city based on their needs, interests, and financial resources. Neighborhoods that are primarily single family owner occupied are some of the most stable and most desirable areas to live; especially for young middle class families. If you radically change the nature of these neighborhoods by allowing demolition of houses to build 4-plex rental units, you will likely see an exodus of current residents.</p> <p>We live on a block that is a mix of single family, duplex/triplex, and some larger rental buildings nearby. It works for us, but the only sense of community comes from the owner occupied units. Renters tend to turn over every 1-3 years and rarely make an effort to know their neighbors. If even a few more single family houses were converted to multiplexes, we would likely be finding another place to live, and not necessarily within the city.</p> <p>The other big issue with more in-fill development is parking. I would love to be able to take mass transit to work, but I have always worked in the suburbs and there has never been a bus or train route that is at all practical for me. Many people still need a personal vehicle to make their lifestyles workable. I find the city's abandonment of parking requirements to be naïve and short-sighted. Any new buildings should be required to provide at least one off street parking spot per unit unless the owner/occupant signs a binding agreement that they will not lease/own a motor vehicle. Otherwise, you just create parking problems in adjacent areas. I strongly agree that large new housing developments should be directed to transit corridors.</p>	7/13/2018
3151	0.1	/topics/land-use-built-form/	<p>Why does the land use/built form not respond to current or future greenway/bikeways? Such as the river lake greenway or the north side greenway?</p>	7/13/2018
3152	1	/policies/access-to-housing/	<p>I question the wisdom of changing the housing situation before changing the transportation situation. Public transit in Minneapolis is sparse, inconvenient, and expensive. Even if everyone starts taking the bus to work, most people will want to own a car for more extensive travel and occasional convenience. What is the plan for increased parking? Or is the city to become a place only for non-car owners? If your plan includes getting people who want to own a free-standing house or own a car to move to the suburbs, I think you will succeed. Finally, given the cost of land in many neighborhoods, who do you think is going to buy and demolish a house, only to replace it with affordable housing??? Am I missing something? Is there a requirement that the new structures be affordable? Will this be subsidized by the government, so developers can still make the profit they're after?</p>	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3153	31	/policies/creative-workers/	<p>I want to offer several comments here.</p> <p>1) Affordable housing for artists has been more talk than action for the past 20 years. How can artists afford \$1,200/month for live/work space with a salary cap of \$38,500? That's over 1/3 of an artist's salary just going to housing. That's not counting utilities or internet access (neither of which is a luxury these days).</p> <p>2) Development has eliminated much of the available, affordable space for creatives. As a creative, I'm not seeing how more breweries contribute as much to the creative economy as arts and culture.</p> <p>3) While there are buildings in NE Minneapolis for artists studios, the rents have increased to the point where working artists are leaving. Who remains are people who are hobbyists (with a partner/spouse providing support and income) or people for whom the arts is a second career (having made their money in their first, non-arts career). This is a group who don't have the same business perspective as artists for whom this IS their career.</p> <p>4) I agree that artists/creative entrepreneurs need to sell work and engage the community. However, in order to do that there needs to be a community that recognizes and values what artists/entrepreneurs are doing and selling. Returning arts education to public schools would help inform the community about the creative/artistic process, and how that adds livability, empathy, and civility to neighborhoods.</p> <p>5) Adding to #4, there's an unintended consequence of communities who feel that artists can easily get grants to create work that engages or supports community with no input or effort on their part. There's no "skin in the game", resulting in these communities not understanding, seeing or valuing the creative process. There's little or no community investment in a relationship or being engaged with creatives for mutual benefit. Going after grants can be a full-time endeavor, leaving little time for creatives to BE creative, no less engage with community.</p> <p>6) Last, but not least, Minneapolis has a retention issue. Most attention gets paid to the City attracting diversity in the corporate circle, but there's an issue in the creative circle as well. Artists/creatives come, attracted to what looks like an inviting place to be, only to find out that the opportunities are not exactly as broad as advertised. This is from a combination of: grant opportunities (and depending on your creative practice, those may be limited); and not being able to make a living in your practice (some of the reasons I've listed above), which also includes confronting a climate that is superficially welcoming. (Unless you've gone to Kindergarten/University or church here, you do not come to anyone's mind for coffee, no less work opportunities.) This includes some arts organizations that can be more than a little insular.</p>	7/13/2018
3154	1	/policies/access-to-housing/	<p>I am writing to assert my strongest objection to the current 2040 plan. If this plan goes through, you'll have a mass exodus of folks who are otherwise committed to their neighborhood and the city. I am not opposed to the goals of the 2040 plan, however rezoning single-family neighborhoods is NOT the way to accomplish the goals.</p> <p>Thank you for your time and consideration.</p> <p>Sincerely, Dr. Niskode-Dossett</p>	7/13/2018
3155	68	/policies/energy-efficient-buildings/	It should just be required that all buildings must be designed to be "solar ready".	7/13/2018
3156	63	/policies/food-access/	Make sure zoning is in line with the policy. There needs to be large enough areas of mixed use to allow grocery store to build within neighborhoods. I also think the city could do a better jobs a managing the distributing and funding for farmers markets. Like parks, there should be a grocery store and farmers market within a 10-15 minute walk for everyone in the city.	7/13/2018
3157	64	/policies/food-businesses/	What about updating zoning to allow for more food halls throughout out city. They can have stalls, food trucks, carts that sell diverse types of food. Check out Mark's Carts in Ann Arbor for instance.	7/13/2018
3158	76	/policies/new-parks/	Some streets should also be viewed as parks that can connect different parkways, parks, and greenways. The northside greenway is a great example of something that could be replicated along 34th Street, River Lake Greenway, and the Southside Greenway.	7/13/2018
3159	0.1	/topics/land-use-built-form/	Looks good to me and makes sense	7/13/2018
3160	68	/policies/energy-efficient-buildings/	coordination among interested existing/older condo boards led by non-biased (not profiting) organization or city office is needed. opportunities here but hand-holding leadership needed from trusted source rather than benefitting companies.	7/13/2018
3161	14	/policies/tree-canopy-and-urban-forest/	there seems to be an attitude that street trees only live for 30 years. the benefits of a canopy only begin after trees are 30, 50, or 80 years old	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3162	0.1	/topics/land-use-built-form/	city needs to take lead on improving public transportation that actually results in moving more people faster rather than development lead transit projects.	7/13/2018
3163	0.1	/topics/land-use-built-form/	Allowing four-story plus buildings on this street will destroy the neighborhood character and add to our already substantial parking headaches. We do have multi-unit buildings on this street, and architecturally they fit in with the neighborhood. By giving developers free rein we may see building styles and costs that do not welcome or include new residents to our neighborhood. Please make sure developers are held to architectural guidelines that fit with the area. This is important as people who want to live here are drawn by the style and feel of the area, which is not a bunch of glass and metal boxes like you see in Uptown or Downtown. Any new multi-unit buildings should not look like the McMansion look we are already struggling with here.	7/13/2018
3164	1	/policies/access-to-housing/	The only way any plan like this can work is if people are free to do with their land whatever they choose provided it doesn't cause an actual direct harm to others in the way of fraud, force, coercion (criminal harm) or accidental (civil/negligent) upon their physical person or property. Perceived harm, is not an actual harm. Reduce regulation and zoning law, so people may build what they wish, invest how they wish, live where they wish, conduct business as they wish. Get out of the way government. Your only use is to provide defense and justice when an actual harm occurs from one citizen to another. Creating limited freedoms upon people is a harm in itself and should be shunned by all officials (public servants). You're not just there for select demographics, but for everyone.	7/13/2018
3165	4	/policies/access-to-commercial-goods-and-service	<p>It's not your job to provide opportunity. It's your job to defend the city against attack and to ensure people are provided justice when one or more citizen commits an act of fraud, force, or coercion upon another. Your plans will cause these kinds of harms by limiting personal freedom to residents via threats of force and coercion. These plans are not transparent enough. You really have no right to demand people live and work in any way beyond what they wish to do, provided they do not infringe upon another's same right. Dictating what can and cannot be done with personal property is an infringement upon personal right.</p> <p>It's not your job to provide people with anything other than justice and defense. It's your job to get out of the way so the public can provide these things for ourselves. Let our market work for us. Let us compete, invest, build businesses, and homes as we choose. Get out of the way.</p>	7/13/2018
3166	35	/policies/innovative-housing-types/	<p>Changing zoning laws that allow Developers to become richer with out offering cost incentives to community members who would like to purchase and or build such structures is categorically wrong. When we don't encourage community member to purchase or build 4-plexes but offer that building opportunity to developers only whose sole interest is financial. we declare a feeding frenzy on neighborhoods. Offering alternative solutions and truly "Innovative ideas" would include different land use , for example tiny houses, small easier to purchase home ownership. support for community members to purchase and or build 4 plexus with and understanding that they live in the building. Developers don't enforce expectations because they don't live in the community, they have no emotional or physical connection to the structures they build.. Offering innovative mortgage opportunities to those who do reside or will reside in a community for a specific time period would make sense to me, Building managers don't create the same sense of connectedness as do owners who are invested both in. the maintenance of the exterior and interior of said structure but also the quality of life. Furthermore ,What does the city deem to be "Affordable housing" and what are the cities standards for enforcing current of purposed building codes, I don't see them being enforced now and I have no reason to believe they will be enforced in the future. I'd also like a more explicit statement about What Affordable means, There have been multiunit buildings put up a few years ago along Hiawatha, the lowest rent in those structures deemed affordable is \$1,600 per moth for a 600 Sf apt. How are the poor supported in this?? How does a single mother of 2 afford to pay \$1,800 per month for a small two bedroom. She would have to earn over \$64,000 a year before taxes, So say she brings home \$54,000, \$22,000 Of that (almost half, 42%)goes directly to just housing, not telephone Car, insurance payments gasoline food, housing g expenses, medical expenses etc, and if she doesn't have a car and miraculously works on a bus line or downtown and uses mass transit, she has to find childcare on that transit line or she will be gone, getting to and from work and picking her children 10 or more hours a day plus the cost of transportation and childcare. How many single working moms weighed in on this "affordable" standard or How many single dads' of just single people who don't want room mates can "Afford" the Cities standards</p>	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3167	0.1	/topics/land-use-built-form/	Adding the corridor 4 designation to existing residential streets will only compound our existing noise, traffic, and parking problems. We do have existing multi-unit buildings yet allowing developers to build beyond the existing scale will degrade these streets and cause potential residents to steer clear of our neighborhoods. We want more people to live in our neighborhood, and if you allow developers to turn it in to another Uptown they will not move here. How can we attract new neighbors if you destroy the housing stock and neighborhood they desire? No one wants to move to a street where they can't park, where there is constant noise, and where the buildings eat up the entire lot and hang over in to their neighbors lot?	7/13/2018
3168	0.1	/topics/land-use-built-form/	We are already battling McMansions throughout the city, so why would you encourage the building of bulkier, larger structures on residential streets? There are existing multi-unit rentals specifically on this street, and residents move here because the street, and others nearby, offer rental housing that complements the overall feel of the area. Renters will not want to move to a neighborhood that has no charm but instead looks generic like the apartment boxes in Uptown. Bancroft and Powderhorn are unique yet 2040 will give developers free rein to homogenize the area.	7/13/2018
3169	0.1	/topics/land-use-built-form/	Our local businesses and residents are already struggling with parking here. We need critical parking designation and can't get it. To add four to six story multi-family units without any parking requirements will simply compound the issue. We have working families who can't rely on mass transit, as well as elderly and disabled who rely on cars for transportation. Not everyone is physically able to ride a bike. Rather than waive requirements for parking, you need to enforce them for new developments or you will make living in this area untenable. Why is no one listening to the elderly or working families about parking? Or to small business owners?	7/13/2018
3170	73	/policies/stormwater-management/	I think it should be illegal to water your grass, especially if the majority of your water is just landing on the sidewalks. Encourage people to plant drought resistant lawns and low mow lawns instead.	7/13/2018
3171	0.1	/topics/land-use-built-form/	As I am unable to figure out how to use your Minneapolis 2040 Map Comments: let me try and comment via this form - regarding Built Form: please require new development and/or renovations to have one off-street parking space for each bedroom. Most of the houses in these older neighborhoods only have one off-street spot now (and lets just accept the fact that most houses have two cars and that is not going to change) - so adding higher density living to the current neighborhoods and not requiring off-street parking to be included does not make sense.	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3172	33	/policies/affordable-housing-production/	<p>A diversity of housing options throughout the city, and expanding tools and resources to produce new affordable housing are vague statements. The crisis in the cities of affordable housing in the twin cities does not fall in a lack of housing, but in its affordability and livability. Plenty of high-rises have sprouted all over the twin cities recently, in a wide mix of neighborhoods, and have been arguably produced at very affordable rates by their developers. These buildings would be good solutions today to the affordable housing crisis, as they are usually situated on mass-transit lines, and consistently advertise vacancies. Instead, these units, luxuriously equipped with laminate floors, foam-core doors, and faulty ventilation systems (I have a friend who lives in a brand-new student apartment, which features a permanent whirring sound, one tiny window that opens but has no screen, a "vent" (hole) in her bedroom wall, and doors that end 3 inches above the ground) are marked up and sold at outrageous prices to students who use student loans to cover the costs. How are these building projects sustainable? My friend's unit is one example in a sea of many buildings produced for a non-existent, or very niche group of well-to-do young people. These companies, and city planners by approving these projects, are preying on a societal normalization of debt and are in turn continuously driving up the access point to a basic quality of life. Is the city's plan to let these buildings fall apart over the next 20 or 30 years and turn them into affordable housing at the same prices they are rented at today, while average rent prices continue to sky-rocket? Consider the cedar-riverside high-rises, built in the 70s as a cutting-edge, utopian community, now zoned as section-8 housing. What proliferates the affordable housing crisis is the idea that low-income families somehow deserve to live in worse conditions, in more-neglected or unattractive buildings, in neighborhoods with fewer resources. This way of thinking enables landlords to overlook pest problems and maintenance issues and to price out low-income individuals from entire neighborhoods altogether, Thus, the city conveniently and passively displaces low-income families to less "attractive" neighborhoods and to units that are poorly maintained. In the case of someone growing up with only access to this version of "affordable housing", what does that do to someone's idea of themselves and their potential?</p> <p>I hope that some of your solutions to the affordable housing question include the following:</p> <ul style="list-style-type: none"> -Heavily increased monitoring of landlord building maintenance, including fines and loss of rental license for sub-standard care of buildings -Rent-support programs which place low-income families in a variety of neighborhoods -Property tax-reform which considers pooling and evenly distributing property-tax across the city neighborhoods -More homeless outreach and more shelters with better resources -Sliding-scale rent policies -Lastly (and I think this is really important), a requirement or higher tax for local companies at a certain profit level to invest a portion of profits in city-wide public services and infrastructure 	7/13/2018
3173	80	/policies/development-near-metro-stations/	I am concerned about the prohibition of park and ride facilities, as this will negatively impact those who currently live farther from transit stations but wish to use transit for their commute. If Park and Ride locations were to disappear, I fear this may result in more cars on the road and more problems with parking in the city.	7/13/2018
3174	40	/policies/homelessness/	Are there any plans for addiction resources within emergency shelters/housing programs?	7/13/2018
3175	95	/policies/heritage-preservation-financial-incentive/	In theory, this is a great idea. But in practice, our small theaters and art spaces are being decimated by development. The Red Eye Theater, Theater Garage, the original Gremlin, the list goes on and on. Wended here for the culture, including live performance spaces, not the luxury condo market. The City government needs to be paying attention to what we're losing now, not as some mythical point in the future when it's too late. There has to be zoning for something besides condos and fancy apartments.	7/13/2018
3176	33	/policies/affordable-housing-production/	When is this going to happen? I see lots of affordable single family homes being torn down to make way for condos and apartments but I don't see much affordable housing being built or maintained. Why is this City not prioritizing developing empty lots in north Minneapolis, for example? A ton of homes were torn down after the tornado to make way for development that never came or came slowly. Why let developers destroy affordable housing and spaces for small businesses instead of pushing them to develop and repurpose the existing empty lots? Where are people going to live when the luxury condo/apartment boom collapses again?	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3177	1	/policies/access-to-housing/	<p>Re action step c, don't allow drastic changes to housing types on all blocks of public transit routes, not even along high-frequency routes. Select the busiest intersections and focus multi-unit housing developments on those nodes.</p> <p>Re action step e, multifamily housing up to 4 units is too drastic a change from the existing housing types. This is especially worrying in the absence of parking requirements.</p>	7/13/2018
3178	6	/policies/pedestrian-oriented-building-and-site-de	<p>I like this policy, but for drive-thru and gas stations -- please consider the regional impact of these decisions for your neighbors who may not have the political will to pass this bold of policies. The reality is that 70% of Minneapolis drives alone to work. If their need for gas stations are not met in the City of Minneapolis, it will put pressure on your neighbors to allow more of these unattractive uses.</p> <p>Does it really make sense to outright prohibit a new gas station at Industrial Blvd & 35W, when not building it there could just as easily push it to downtown Columbia Heights or Lauderdale?</p> <p>Please consider "highway overlay" districts for commercial areas adjacent to highways, like 35W in Northeast, 94 in North, and Hiawatha (outside of station areas). I believe that drive-thrus and gas stations, under certain conditions, could be acceptable in these locations.</p>	7/13/2018
3179	51	/policies/healthy-pre-k-development/	early childhood education/intervention is key to reducing racial/cultural disparity. invest in babies and young low income families	7/13/2018
3180	39	/policies/fair-housing/	Sounds good.	7/13/2018
3181	34	/policies/affordable-housing-preservation/	A good goal. Now for the "strategy."	7/13/2018
3182	0.1	/topics/land-use-built-form/	<p>South of Lake St. it's crazy to allow up to 6 stories for ALL blocks of Portland and Nicollet (Corridor 6). That's too drastic a change. On those 2 streets choose the intersections that are the busiest and have the most promise and concentrate the build-up in those nodes, along with the Interior 3 category for adjacent blocks. For the blocks of Nicollet and Chicago that now have single-family houses, encourage 3-story housing up to 4 units, and keep the adjacent blocks defined as Interior 1.</p> <p>Similarly the Corridor 4 streets (Bryant S., 50th St W, Penn S., etc.) choose just the most promising nodes for Corridor 4 definition, and for the other blocks encourage 3-story multi-units up to 4 units. Let the adjacent blocks remain as Interior 1.</p>	7/13/2018
3183	15	/policies/transportation-and-equity/	I agree with these action steps.	7/13/2018
3184	0.1	/topics/land-use-built-form/	<p>South of Lake St. it's crazy to allow up to 6 stories for ALL blocks of Portland and Nicollet (Corridor 6). That's too drastic a change. On those 2 streets choose the intersections that are the busiest and have the most promise and concentrate the build-up in those nodes, along with the Interior 3 category for adjacent blocks. For the blocks of Nicollet and Chicago that now have single-family houses, encourage 3-story housing up to 4 units, and keep the adjacent blocks defined as Interior 1.</p> <p>Similarly the Corridor 4 streets (Bryant S., 50th St W, Penn S., etc.) choose just the most promising nodes for Corridor 4 definition, and for the other blocks encourage 3-story multi-units up to 4 units. Let the adjacent blocks remain as Interior 1.</p>	7/13/2018
3185	16	/policies/environmental-impacts-of-transportation	Don't go too far in disincentivizing driving. The plan is not going to succeed by wrenching people into unwelcome change.	7/13/2018
3186	17	/policies/complete-streets/	<p>This is naively idealistic.</p> <p>I see nothing here about a new approach to snow and ice removal, such as city (taxpayer) responsibility for clearing street corners. For 6 months of the year even taking a leisurely neighborhood stroll is only for the fit and sure-footed, much less commuting or shopping by walking or biking. As it is, even when home/business owners clear their sidewalks, the snow plows pile up hard frozen snow at the corners so that crossing streets is hazardous.</p>	7/13/2018
3187	18	/policies/walking/	I agree with these goals and action steps, but (again) there need to be steps to reduce snow and ice hazards.	7/13/2018
3188	1	/policies/access-to-housing/	I live near 36th and Humboldt and I am against higher density along transit corridors. According to this plan, buildings along Hennepin could go up to 7 stories where homes exist now. You will drive out families like ours with this plan. I have studied density issues, and one thing is clear -- higher density means more noise.	7/13/2018
3189	33	/policies/affordable-housing-production/	I do not believe this plan will create affordable housing. I believe it will, in fact, reduce affordable housing by bringing in speculators who will then buy up affordable houses and build up and out. I have seen what the development has done to Uptown and Marcy. Forget affordable housing in those areas and the same thing will happen if this upcoming goes through.	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3190	1	/policies/access-to-housing/	I live near 36th and Humboldt and I am against higher density along transit corridors. According to this plan, buildings along Hennepin could go up to 6 stories where homes exist now. You will drive out families like ours with this plan. I have studied density issues, and one thing is clear -- higher density means more noise.	7/13/2018
3191	33	/policies/affordable-housing-production/	This plan will not provide affordable housing. It will invite in speculators who will buy up existing affordable housing. This plan was constructed so the city can raise its tax base. I believe affordable housing should be done through preservation of existing housing and tax credits for buildings that maintain affordable housing.	7/13/2018
3192	34	/policies/affordable-housing-preservation/	This is the most important part of this plan. But the development you're inviting into this city through up zoning and transit corridor expansion will negate preservation. It is arrogant to think we can do in this city what has failed everywhere else.	7/13/2018
3193	35	/policies/innovative-housing-types/	Leave existing housing alone, and do not go higher along transit corridors. Look at creating more apartments in existing home and along alleys. You could give tax breaks to homeowners that build apartments above garages.	7/13/2018
3194	19	/policies/bicycling/	The current bike lanes are barely used in the winter. I would recommend bike lanes that widen in the summer and are reduced in the winter. You keep saying you want to do things in new ways. Try flexible bike lanes.	7/13/2018
3195	5	/policies/visual-quality-of-new-development/	Although the ideas in this vision are good, I do not trust the current planning commission to ensure that architectural integrity will be maintained. The new apartments around the U. and in Uptown are dull, ugly, and they all look the same. There is no sign that this council and planning commission will do anything to ensure architecture will fit with the surrounding neighborhood. Look what happened to Uptown with Sons of Norway. Mall of America meets historical neighborhood. Ugly, ugly, ugly.	7/13/2018
3196	80	/policies/development-near-metro-stations/	I do not believe we need more density in Uptown. We have more density than any other neighborhood in the Twin Cities. Traffic is terrible, and even if we get driverless cars, we still have traffic. Light rail is years away. The lakes already draw many people from all over the metro area, bringing boats, bikes, waterboards. We need to protect this area.	7/13/2018
3197	0.2	/small-area-plans/	The small area plans in existence now are much better than this plan. Much work went into them, and we are a better city for it. I do not like the way this massive vision for 2040 throws out the baby with the bathwater.	7/13/2018
3198	23	/policies/coordinated-development-strategy/	This is what the comprehensive plan did before. I don't understand why, if we've been growing steadily over the last 20 years, this city council feels they need to invent the wheel. Speaking of coordinated communities, the "engagement" on this plan is a sham. Most of your meetings were at street fairs, not in neighborhoods. Many people cannot navigate interactive sites. And immigrant communities have not had drafts translated. If this is what you call inclusion, you need to look for work in other fields.	7/13/2018
3199	72	/policies/sustainable-water-system-management/	Reduce and restrict the use of non-porous groundcovers, such as concrete and asphalt, to allow water to seep back into groundwater supplies, thus reducing run-off and periodic flooding, which overtax our collapsing sewage treatment and other drainage infrastructure.	7/13/2018
3200	56	/policies/supporting-small-businesses/	There is no clarity on what this policy will actually do. How will the city do this? And what are they measuring to achieve this goal?	7/13/2018
3201	1	/policies/access-to-housing/	I disagree with allowing 3 and 4 plexus where there are currently single family homes. In addition to making more housing, you need to think about the quality of life our neighborhoods will have. What we love about living in the Kenny neighborhood is that there are so many families. If developers come in and put up more 3 and 4 plexes, it will change that dynamic. We would not want to live on a block with that dynamic. We would look to move to Edina or St Louis Park to find a street and neighborhood with single family homes. I think this policy will have significant unintended consequences that will make spurts and Southwest Minneapolis less desirable.	7/13/2018
3202	1	/policies/access-to-housing/	Off-street parking needs to accompany housing unit expansions.	7/13/2018
3203	47	/policies/housing-maintenance/	I can support all of these goals, and know they are needed. But in my mostly-owner-occupied part of the city, houses ARE being maintained voluntarily, and almost entirely without city resources. Why, then, do other parts of this plan mandate (not suggest, not encourage, MANDATE) changes that will almost certainly lead to the replacement of many of these houses with non-owner-occupied housing - this makes no sense!	7/13/2018
3204	33	/policies/affordable-housing-production/	Why isn't maintaining the current affordable housing on this list? Why is affordable housing going away at all? That seems like a better place to start rather than bustling new, which is very expensive. Also, if you are planning to create more housing for everyone, why change our current family-oriented neighborhoods to allow for 3 and 4 plexes? This will drive families out. This is not a policy for all. It forgets current residents and families that live here because we like the neighborhood. Also, slowing developers to buy a single family home and demolish a gorgeous, historic property to put up a crappy 3-4 plex is only going to give developers more money. The residences won't be more affordable - the rest or cost to buy will be high simply because the property values are so high. I oppose this because it is short sighted.	7/13/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3205	0.1	/topics/land-use-built-form/	I am firmly opposed to this plan to destroy the nature of the Lowry Hill neighborhood and I will work tirelessly to ensure that any elected official supporting it will be lose his or her seat. Creating a 4-6 story zone along Franklin between Hennepin and Lake of the Isles is ludicrous. I have long been a resident and fan of the city. If this plan is implemented, you will lose professionals and families like mine.	7/14/2018
3206	0.1	/topics/land-use-built-form/	Also, I hope the city is well funded to address the multitude of lawsuits, of which I will be one, fighting what would effectively be an unlawful taking and the diminution of my property value near Franklin Avenue in Lowry Hill.	7/14/2018
3207	73	/policies/stormwater-management/	Begin budgeting for and replacing the century old public stormwater infrastructure.	7/14/2018
3208	1	/policies/access-to-housing/	I'm not sure I agree with allowing new housing in neighborhoods that already contain a mix of housing types. Seems they're already doing their part. Re: (e.) Does this include tiny homes (doesn't appear to and should) and condos that people can "invest" in in order to build up equity so that, hopefully, one day they could afford to purchase a single-family house? If so, then I'm O.K. with it as long as there is a threshold of 25% and it contains a mix of rental and ownership type properties. In addition, I would suggest it would be best if all new units could be placed along high-frequency routes and near METRO stations - esp. since the plan does nothing to suggest where in the heck all these new people are going to park cars they may own. Which, I would suggest be alleviated with required underground parking for vehicles, bikes, storage, etc.	7/14/2018
3209	5	/policies/visual-quality-of-new-development/	This sounds great on paper, but how, exactly, could these sorts of ideas be enforced? Encouraged, maybe; enforced, no way. I live in South Minneapolis and there are awful examples of buildings--homes and otherwise--constructed with no regard for the site all over the place. I'm sure that's true throughout the city. In my experience, anyone who wants a variance gets a variance. Why would that change?	7/14/2018
3210	11	/policies/skyways/	Skyways are the locus of many small independent businesses, the kind of businesses that progressives like. But there is no appreciation of the life of skyways which serve customers 12 months a year. And there is no appreciation of the likelihood that very few of those businesses can survive financially on the street.	7/14/2018
3211	1	/policies/access-to-housing/	I can't for the life of me figure out how a 4-plex would fit on a standard city lot. Unless, of course, it's a rectangle built out to the lot lines all the way around and towering over its neighbors, without a garage. I can't believe that kind of housing would please anyone. There are plenty of examples of 4-plexes in my larger neighborhood, and they fit in just fine. But they are on double lots, or a lot-and-a-half.	7/14/2018
3212	6	/policies/pedestrian-oriented-building-and-site-de	Anti automobile measures should follow survey of citizens to see how many can depend on walking, bicycles and transit to get to work, vs how many still need their own vehicles.	7/14/2018
3213	33	/policies/affordable-housing-production/	Unless it's subsidized, or some variant on the tiny-house thing, I don't understand how simply building additional housing will result in more that is within reach of lower-income folks. The single-family infill housing that is going up all over the city is certainly not helpful. Builders can't build "affordable" houses that magically cost less than "regular" houses. So then you get back to the ridiculous idea of putting 4-plexes on 40x120 lots, or letting developers build giant, cheapo apartment buildings that have the appeal of Soviet block housing. And it seems critical to me that a part of this plan has to be to limit, or regulate, absentee landlords. They are the bane of renters, and neighborhoods, everywhere.	7/14/2018
3214	76	/policies/new-parks/	YES! More parks, lots of park programming, lots of different kinds of parks offering different kinds of activities. If we want kids (and their parents) to get off their butts, there has to be a clean, safe, well-lighted, modern, well-equipped park within a few blocks.	7/14/2018
3215	56	/policies/supporting-small-businesses/	This is a critical component. People love to work within walking distance from where they live.	7/14/2018
3216	1	/policies/access-to-housing/	I am certainly not in favor of this plan for density in the Kenwood area. The reason why people live in the neighborhood because of it homes and historic character of this neighborhood. You don't see Boston and other cities destroying neighborhoods which have been part of the city for years. There a reason why people move to them. Just look how the city destroyed downtown with taken down many of the old building which once stand. I also wonder why do we need the bike paths during the winter. This would free up parking for people who lives in those areas. I think this was also a poor thought out idea once again by the city.	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3217	36	/policies/innovative-housing-strategies/	<p>36a. The only way you're going to get affordable housing is to place a moratorium on the developers in interior 1 locations which are mostly in Southwest Mpls.</p>	7/14/2018
3218	33	/policies/affordable-housing-production/	<p>Change the zoning codes in North Mpls, and get the developers to work in that area ONLY. Don't build a thing. Get that housing stock to poor people and out of the control of landlords. (Stop the abuse from landlords and management corporations. We don't want or need more high rises here. (Ugly and poorly constructed/erected slop with horribly rated unprofessional HOAs. Nope. We don't want nor need that slop.)</p> <ul style="list-style-type: none"> - Create grant money to supplement home buying programs (ie: Habitat for Humanity, Land Trust Program, etc.) for families/couples/individuals who are poor but have GOOD credit scores, but too poor (a couple hundred dollars too short a month) to qualify for something like Habitat for Humanity. (And provide reputable financial counseling and advising to those whose obstacle is more a matter of a poor credit score. Obviously more help for those who lack any income at all; to help get social services and programs for such individuals - such as a disabled person being just too disabled to navigate the process of applying for help.) - Rather than ugly high rises, buy up some vacant plots and have tiny house on wheels villages. Except make them more possible for FAMILIES instead of only individuals or couples and make them with bathtubs instead of just showers and make them with stairs instead of just ladders. Look to Madison or Detroit for examples of how its been done already or how it could be better. - Allow home owners to have a relative park a tiny house on wheels in their driveway (without being in violation of some code) and likewise, allow home owners the option to convert garages to similar types of spaces. - Figure out a way at some point to lower taxes for homeowners. Unfortunately that might be difficult without federal programs. (For example; property tax rebates for those who install solar panel roofs....except that doesn't seem to be likely with someone like 45 in charge.) <p>BEYOND THAT:</p> <ul style="list-style-type: none"> - Regular people often do still rely on cars. Getting rid of parking spaces isn't helping people or families. I could elaborate on that, but not in this comment. - Breaking up and dispersing populations and forcing such populations to be scattered about does nothing to help such populations rise up and stand up to oppression. <p>-----</p>	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3219	19	/policies/bicycling/	<p>Um.....can you also enforce traffic laws to bicyclists? I am tired of them AGGRESSIVELY biking in a manner that is dangerous to all on the road. One a-hole recently tried to shine some bright light at my rear view mirror as some type of protest against cars perhaps.</p> <p>SOME OF US REQUIRE CARS!</p> <p>- I am disabled for example. I happen to require a Service Animal. Sometimes I need to get somewhere that I can only get to in a car. For a variety of reasons. Beyond that, I have a young child. If my entire family goes somewhere (ie: even just a medical appointment) round trip, it would cost a minimum of \$12-15 or so just in transportation costs if we took a bus. NO I CANNOT BIKE WITH MY MEDICALLY NECESSARY SERVICE ANIMAL!!!!!!</p> <p>- PLENTY of people of color and poor people and marginalized people RELY ON CARS! To pick up our children at schools (since this city FAILS to have ADEQUATE AND SAFE BUSING FOR HIGH SCHOOL STUDENTS IN PARTICULAR), to get to our jobs, to get to our medical appointments, to get to social service agencies, and more.</p> <p>- DO NOT PUNISH THE WORKING CLASS/POOR BY TAKING AWAY PARKING SPACES THAT ALREADY ARE LACKING!</p> <p>- STOP MAKING THIS A WAR ON VEHICLE OWNERS! I BARELY EVEN DRIVE, BUT I DO NEED A PLACE TO PARK!</p>	7/14/2018
3220	67	/policies/climate-resilient-communities/	<p>Great ideas. But here's the thing. If you want us all to "get in touch with nature", how about ALLOW RENTAL TENANTS TO HAVE LARGE PET DOGS OF ALL BREEDS AS WELL AS PET CATS at no additional cost! We already lack AFFORDABLE (to any NORMAL person) HOUSING to begin with. LIVING WITH ANIMALS IS GOOD FOR OUR HEALTH AND GREAT FOR PUBLIC SAFETY! DOG WALKING CREATES SAFER STREETS!!!!!! MORE HOUSING ALLOWING ALL SIZE DOGS AND PETS IN GENERAL!!!!!!!!!!!!!! SAVE THE LIVES OF RESCUE ANIMALS! ADOPT DON'T SHOP!!!!!!!!!!!!!!</p>	7/14/2018
3221	13	/policies/landscaping/	<p>MAKE IT ILLEGAL TO USE CHEMICALS OR LEAF BLOWERS!</p> <p>DUPONT VILLA APARTMENTS SHITTY LANDSCAPING WITH LOTS OF POLLUTION, LAWN CHEMICALS, INSTITUTIONAL LOOK, AND GAS POWERED LEAF BLOWERS COMES TO MIND AS SOMETHING TO AVOID BY THE WAY!!!!!!!!!!!!!!</p> <p>For RENTERS: ALLOW RENTERS TO LANDSCAPE WHERE THEY RENT! PROBLEM SOLVED!</p>	7/14/2018
3222	14	/policies/tree-canopy-and-urban-forest/	<p>YEP!</p> <p>Some a-hole landlord who owns the building next to where I live nonstop used chain saws and inept crew to kill a couple of beautiful trees that DID provide shade for my family. I paid a ton of money on rent to our slumlord while pregnant and hot in the summer to hear chainsaws for 3+ weeks so some a-hole slumlord could chop down his trees to "save money on insurance"....meanwhile it's hotter than hell since then in my apartment. Yuck yuck yuck. I miss those beautiful old trees.</p> <p>MAKE CUTTING DOWN TREES ILLEGAL AND PUT OFFENDERS IN PRISON FOR 10 YEARS!!!!!!!!!!!!!! (Seriously, the tree cutting made me so angry; in particular the nonstop noise, but also the murdering of the trees. It also killed a lot of birds and wildlife. Just gross.)</p>	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3223	7	/policies/public-realm/	<p>Fascinating!</p> <p>Because here's the thing. I AM a public artist. I created something (but in St. Paul FYI) less than a decade ago that was intended to last OVER 50 YEARS! It also happens to be work that reflects the Camanche tribe. It received public funding (and I only received a pathetic \$200 stipend for a month of work by the way which is absolute crap really).</p> <p>Guess what?</p> <p>Boost Mobile (who now owns the building this mosaic mural is on) has threatened to DESTROY it and ALREADY DESTROYED THE MURAL OF PUBLIC ART NEXT TO IT! A better question is, honestly, how do you intend to PRESERVE ALREADY EXISTING PUBLIC ART FROM THE DESTRUCTION OF CORPORATE GREED AND CAPITALISM? (And would an artist like me get an INSULTING paycheck of ONLY \$200 just as I did in St. Paul? Just curious.)</p>	7/14/2018
3224	66	/policies/air-quality/	<p>So.....is this a coded way of saying you want to blame ME for having ONE car that I barely drive and simply require a place to park.....as a disabled person who NEEDS this car in part because at times it is the only realistic mode of transportation for our family (including my Service Animal and infant) to get anywhere at all or on time? Way to punish the WORKING CLASS, the DISABLED, MINORITIES, and the ELDERLY....many of us who RELY on our cars! Not EVERYONE is some yuppie white person with a mountain bike people. Good lord. And guess what? Most of those yuppie whites with their overpriced silly bikes? OWN EFFING CARS!!!!!! Stop pretending to not be aware of these realities. That is NOT urban planning. As for air quality, trust me I care. I care a LOT about the environment (and happen to be a vegetarian) and have asthma (so enjoy clean air). But STOP blaming middle class and in poverty car drivers already. It's WRONG and simple minded.</p>	7/14/2018
3225	1	/policies/access-to-housing/	<p>E. Very concerned with the point that interior neighborhoods we are looking to increase housing supply. Homes are already expensive and close together. People that have bought these home want the small neighborhood feel. Adding the ability to knock over homes and add 4 plexes will drive people out of these neighborhoods and into the suburbs. The city still needs offer neighborhoods that are competitive with the suburbs so there is a reason to stay in Minneapolis. Right now taxes are substantially higher In the city and I'm afraid allowing this will take away one of the reasons people have chosen to live in the city, and people will flee to the burbs. Minneapolis needs homeowners to stay in the city to keep it thriving.</p>	7/14/2018
3226	51	/policies/healthy-pre-k-development/	<p>Affordability of pre-k is critical to making this work. There is currently not equal access to pre-K starting the disparity before kids even get to kindergarten. I am happy to see this on the plan.</p>	7/14/2018
3227	1	/policies/access-to-housing/	<p>Disagree that zoning is bad because it was used in a racist way in the past. That is not a reasoned argument against zoning (that almost every other city uses). Housing is already allowed to be built in all areas of the city, there are just rules governing that building. Disagree that developers will naturally create affordable and non-racist housing if unfettered. Seems highly likely that more building of new housing will be more gentrification of affordable neighborhoods. Certainly in my neighborhood nothing they build will be affordable if not heavily subsidized. The broad goal of affordable housing and fair lending is great but this does not make a case that the planners have any idea how to actually achieve that. If the problem was "lack of investment in areas with greater density and mixed use" maybe pouring investment into those areas is a better idea than trying to force density (really just opening up opportunity to builders to see what they will do, likely luxury buildings) and allowing mixed uses in other areas makes more sense. No case is made for how this will achieve the goal. If only the developer had been allowed to build 6 stories high in Linden Hills some Somali immigrants would have left the neighborhood they've built to move into one of the luxury apartments, the ad for which actually says this "There's a reason Linden Hills is one of the most admired neighborhoods in Minneapolis. Like an oasis at the center of downtown's hustle and bustle, Linden Hills' gorgeous tree-lined sidewalks and tasteful craftsman homes evoke a bygone era of small town elegance." We had perfectly nice, and racially diverse, low-income neighbors living in a post-WWII starter home next door who sold to a developer and left the neighborhood. The site is now a 1.2 million dollar home. If the builder were allowed to make it a fourplex of tiny units those people could never have afforded to move back in there and I'm dubious the developer would see that as a profitable choice. They didn't choose to make it a duplex in any case. Overall I resent that meetings on this issue have implied that to oppose this plan is racist when it's very unclear that this is a good way to achieve the laudable goal of fair housing.</p>	7/14/2018
3228	82	/policies/aging/	<p>Agree with this but it's very non-specific about what might actually be done.</p>	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3229	81	/policies/social-connectedness/	Seems like the new zoning plan is aimed at making sure there is little for communities to have any meaningful input on... OK if we get together for recreation or counseling but not so much if communities have input on local development.	7/14/2018
3230	12	/policies/lighting/	Yes to protecting environment and dark skies with lighting	7/14/2018
3231	33	/policies/affordable-housing-production/	The targeted interventions (c) seem at odds with the plan for blanket upzoning the city which in my upscale neighborhood is likely to just increase the pace of the most affordable housing being razed to create luxury apartments and condos. I agree my area could use more density and more variety but not that developers will create that if only they are unfettered. I think it actually does need targeted plans which are mentioned here but seem at odds with what the city really intends to do.	7/14/2018
3232	34	/policies/affordable-housing-preservation/	Agree with (a) but it seems at odds with plan to just upzone the entire city. Newly built units can't compete for affordability with existing housing without subsidization, even if they are more dense. In my neighborhood encouraging more development deep inside the neighborhood will lead to faster rate of razing the small single family starter homes that are the main affordable housing here. Overall this plan seems to be short on rational plans to achieve it's laudable goals.	7/14/2018
3233	35	/policies/innovative-housing-types/	Yes, like the idea of this but so far plan to just upzone entire city seems at odds. Developers are not chomping at the bit to create these and will just suck up the prime locations for luxury developments in my neighborhood if the city does retain some ability to decide what gets allowed and approve certain specific innovative ideas in the best locations for them.	7/14/2018
3234	38	/policies/affordable-housing-near-transit-and-job-	This sounds good but I'm wary of the fact that the plan seems to consider any street a bus ever travels on a "transit corridor".	7/14/2018
3235	80	/policies/development-near-metro-stations/	Much of this sounds good but I have mixed feelings about prohibiting park and ride. Despite living by what for massive upzoning is called a "transit corridor" it's a very long commute for me to get downtown and I could take a bus to my suburban workplace only once a day at oddball hours (I'd have to leave work at 3pm(?)) and I'm frustrated that I can't drive over to the metro and then use it as it is. Overall the transit has a long way to go before I could remotely be car-free even though I'd prefer using transit to driving. This further makes me dubious about plans to spread high density housing all around the city and all along anyplace one bus goes - some transit corridors (like the stations mentioned here) are much more viable as places from which people could really be car-free and in my mind much more suitable as centers for nice new high density living.	7/14/2018
3236	17	/policies/complete-streets/	Need to find a way to prioritize and enforce the goals on non-City managed streets. Like Hennepin County roads and highways that run through our city. Two examples Are Hiawatha Avenue, which is Highway 55; A state highway. And Cedar Avenue south; Which I think is a county road, but maybe it is also a state highway?	7/14/2018
3237	0.2	/small-area-plans/	This plan will destroy the beauty of our city! Do NOT re-develop Dean Parkway. We don't need more buildings by the lakes. There is plenty of space in the northern parts of Minneapolis (by the MRT) that would benefit greatly from more development. Let's not destroy the lakes. Let's not overcrowd the city. Let's not destroy beautiful homes that are a part of our cities history. We don't have the correct infrastructure to support the number of people this plan proposes making room for. There is not enough parking the way it is. Our public transportation system is laughable. With the current levels of traffic congestion, why would anyone ever want to add to it? SAVE THE LAKES! SAVE THE PARKWAYS!!!! I say NO to the 2040 plan. Try again.	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3238	1 /policies/access-to-housing/	<p>The plan as written is too overarching. Scale it back. As written, the plan and will destroy what makes MPLS unique and livable and will NOT result in lower income housing as is the goal. It includes too many large-scale zoning changes. Zoning changes should not be made on such a massive scale and implemented immediately without specific limits and controls included within the plan.</p> <p>1) INTERIOR ZONE 1: Only permit single family homes and 1-2 additional duplexes per block. The size of a duplex will accommodate enough space for parking in the back along the alley. Adding triplexes or fourplexes will create major parking issues, especially in the winter. 2) INTERIOR ZONE 2: LIMIT the number of fourplexes to 2-3 per block. Think and plan for parking within the plan. 3) INTERIOR ZONE 3, Limit the number (1-3) of 1-3 story buildings permitted per block and require underground parking for each unit. 4) Corridor 4 & 6: Limit how many are permitted per block and require underground parking.</p> <p>The MPLS 2040 Plan as written will destroy the character of our city neighborhoods. Entry level single family homes will be razed haphazardly though out city's neighborhoods to make way for random fourplexes. And the allowance of multiple-story buildings along the entire length of transportation corridors and their adjacent streets is extreme. These changes would have drastic impacts on family neighborhoods that have existed for many generations. The Draft Plan does not account for increased traffic congestion, greater parking needs, greater burden on city infrastructure, parks, and schools. Our city roads are already at capacity and parking is a challenge for almost every neighborhood.</p> <p>The MPLS 2040 Plan should not be implemented as written. The plans for development need scaled back drastically and must be written with greater controls.</p> <p>Sincerely,</p> <p>Mel Kessler 5140 Newton Ave., S.</p>	7/14/2018
3239	6 /policies/pedestrian-oriented-building-and-site-de	<p>Elimination of off-street parking minimums will make the city LESS safe for pedestrians and bicyclists by obstructing site lines at street crossings. This action also unfairly impacts lower income residents that cannot afford to pay extra for parking, but must own a car for work (or life).</p>	7/14/2018
3240	33 /policies/affordable-housing-production/	<p>The city should focus "affordable housing" resources on housing for low-income residents. Efforts to reduce the cost burden of housing on the middle class should be categorized as "anti-gentrification." Affordable housing resources should also be focused on residents at 30% of AMI only, NOT those at 50% or 80% of AMI.</p>	7/14/2018
3241	1 /policies/access-to-housing/	<p>Density must be REQUIRED not just allowed if the city is serious about valuing density. Methods to achieve this include implementing a zone such as Portland's R2.5 that requires 1 dwelling unit per 2,500 square feet of lot on lots that are 5,000 square feet or greater and making areas that are designated 3-4 stories in the plan to be "conditional use" meaning single family home construction in these areas would still be limited to 2.5 stories while multi-unit buildings could take full advantage of new height allowances. In order to avoid displacement we must also preserve existing housing stock and focus new (and more expensive) development to infill sites such as parking lots, odd shaped and small lots, and on top of exiting buildings. The city should also put much stricter regulations on developers who tear down "starter homes" to build large expensive single family homes.</p>	7/14/2018
3242	80 /policies/development-near-metro-stations/	<p>To action step i.: Please open opportunities for food kiosks/vendors (real food, NOT vending machines) at METRO stations at said plazas and open spaces.</p>	7/14/2018
3243	34 /policies/affordable-housing-preservation/	<p>Require new "affordable housing" development to be affordable to low-income people for more than 15 or 20 years. MUCH more.</p>	7/14/2018
3244	1 /policies/access-to-housing/	<p>We live close to Broadway Ave and along Wirth Parkway. I am concerned about the potential of allowing fourplexes in my neighborhood. This would dramatically change the texture of my street, which currently has single family homes and some duplexes. adding larger structures to a beautiful parkway street, with a nice mix of houses would take away from the city street that I know and love.</p> <p>As we are close to the Broadway bus routes, we already have a low income apartment building at 27th and Broadway. I would hope that additional apartment buildings would be spaced out so we won't feel surrounded and blocked in by large structures.</p>	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3245	42	/policies/expand-homeownership/	Perhaps Minneapolis could explore subsidizing projects in the way for example Levittown was, specifically for people of color as a form of reparations a la Richard Rothstein "The Color of Law." The goal would be to subsidize ownership (and equity) for the descendants of those excluded from such wealth building options historically. Must be sure housing is truly good quality and will gain in value, also requires expectation of continually building multiple housing estates.	7/14/2018
3246	43	/policies/housing-displacement/	Tearing down existing housing (whether single family home or apartment building) should be discouraged and penalized by every legal means possible. Given how much of the city is being opened up to such large scale development the city should push developers to infill development where the removal of existing structures is minimal, this will encourage the preservation of "naturally occurring affordable housing."	7/14/2018
3247	44	/policies/comprehensive-investments/	Get the police to stop shooting people. Black lives matter. FIX THIS PROBLEM.	7/14/2018
3248	23	/policies/coordinated-development-strategy/	Minneapolis is a wonderful place to live largely because of the tireless efforts of neighborhood organizers. Neighborhood organizers are able to have more intimate knowledge of community needs and opportunities. For example one of the most desirable areas to live in Minneapolis is Milwaukee Avenue, this would not exist if the city had gotten its way. The same neighborhood organizing structures that were formed to preserve this housing were later used to preserve and later still renovate affordable housing in the same neighborhood. A top down approach to planning and development hurts our communities and will negatively impact the desirability/livability of our city.	7/14/2018
3249	48	/policies/data-driven-decisions/	The city should also study the impact of market pressures such as flipping and turning housing units into vacation rentals on the housing market/affordability and pursue policies to minimize impact.	7/14/2018
3250	15	/policies/transportation-and-equity/	I have the greatest difficulty with the transportation plans. I believe walking is wonderful and biking is good, if somewhat dangerous, for those who enjoy it. Public transportation is viable only if buses are scheduled 10 min apart (they are less frequent in the twin cities area) and if they go where you want to go. The idea of increasing population density without providing parking for cars is madness and ill-conceived. This will lead to bad tempers, fights, and upset. If the new buildings are not made to include parking, then rentable parking ramps should be built. Automobiles are still the most efficient way to get from A to B and may be essential for working class people, older people, disabled people et al. We live in a cold climate for much of the year when walking and biking are available options only for the healthy and daring. Furthermore, it is never a good policy to try to accomplish two incompatible goals at the same time. If the goal is affordable housing and increased diversity, please stick to this and also show how the new apartment buildings, etc. will be more affordable. Aside from siting residential buildings near transportation hubs, do not mix up transportation goals with housing goals. We do want our communities to feel united, rather than divided by mode of transportation.	7/14/2018
3251	60	/policies/intrinsic-value-of-properties/	All existing buildings should be considered "important to the city's heritage" until proven otherwise. We already tear down way too many buildings in Minneapolis. With the changes this plan brings to our zoning we should limit developers in this one way. There are plenty of parking lots they can build on (especially if there is no off-street parking requirement).	7/14/2018
3252	53	/policies/quality-of-life/	First I think that the city of Minneapolis needs to actually HAVE some pride in our cultural identity as a city. Elected officials should stop trying to make us look like other cities by promoting demolition of our existing infrastructure (we're never going to compete with places in nicer climates if we demolish everything that has made us unique and put in new crap that could be anywhere ... and also ... is crap).	7/14/2018
3253	81	/policies/social-connectedness/	This is ironic given how crappy the civic participation on this plan has felt.	7/14/2018
3254	89	/policies/technology-in-the-city-enterprise/	Expand access to online resources such as these to ALL members of our community.	7/14/2018
3255	81	/policies/social-connectedness/	Our communities would feel a lot safer and more inclusive if the police stopped killing people.	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3256	1	/policies/access-to-housing/	<p>I am opposed to the high density suggestions to neighborhoods throughout the city in this 2040 plan.</p> <p>I think that bulldozing single family neighborhoods to accommodate multiple unit structures next to single family homes is a sort sighted plan that will cause the demise of neighborhoods and sadness throughout many communities. Loss of light, trees, community peace and all comfortable movement for residents in developed areas.</p> <p>No parking accommodations are required, I have read elsewhere, which will lead to unsafe streets for everyone as the population is not going to give up their cars - they may use them less but they will still need parking. It will not be safe for anyone, to move about while people search for non existent parking.</p> <p>I disagree with 4 plus story buildings listed on the many corridors and their adjoining streets, in all objecting neighborhoods, as well as my neighborhood. This plan is too much density for our city to start placing in our neighborhoods!</p> <p>In Linden Hills and Fulton, the entire neighborhood proper, will be slated for solid 4plus story buildings and 4 unit buildings without parking from Lake Harriet to France Ave, Lake Maka Ska to Edina. That is the destruction of two neighborhoods.</p> <p>There is also no mention that I see of the bulldozing of solid blocks which will be required to accommodate students as neighborhood schools are to capacity - unless busing out is also part of the plan.</p> <p>The 2040 plan can start immediately after this process which is almost closing - THESE PROPOSED CHANGES ARE LARGELY UNKNOWN TO MOST CITY HOME OWNERS. If it were not for curious yard signs most would know nothing. I THINK YOUR COMMENT PROCESS HAS TO CONTINUE UNTIL YOU ARE SURE EVERY HOME/LAND OWNER KNOWS WHAT IS PROPOSED AND HAS HAS THE OPPORTUNITY TO RESPOND.</p> <p>A far better plan to this land use change plan(2040) would be to develop our failing commercial properties which include in many cases immense open lands right in our city - for example the Kmart on Nicollet. This would be a great place for development and would certainly provide ample area for high rise development. This would have the potential to succeed in the manner with the Greenway high rises have. I think limited higher density -on heavy use corridors, not the massive number of corridor roads listed by the city plan! - could be acceptable, if public transportation suggestions are agreed through our vote as city residents.</p>	7/14/2018
3257	28	/policies/msp-airport/	<p>I think this plan lacks consideration and thoughts about growing more regional airports to take the strain off of Minneapolis air space. There is no mention controlling noise, monitoring noise or protective environmental measures.</p>	7/14/2018
3258	20	/policies/transit/	<p>Priority transit lanes as mentioned in "d" is a fantastic idea. I am a year around cyclist commuter. We are on a grid of streets here, so a cyclist has no problem choosing a route. so, i would stay away from bikelanes which aggravate motorists, but, this aggravation to auto frustration will have a true benefit, and it's usefulness is profound. NOTE; university av light rail and downtown mpls lrt are still functioning like a bus , with no priority over cars. this is a waste of tax money, as you know since lrt is a significant investment</p>	7/14/2018
3259	0.1	/topics/land-use-built-form/	<p>I cannot find the words to tell you how appalled I am by what you are proposing. ALL of what you are proposing. I have lived at 3901 Thomas Avenue South for nearly forty-two years. In a wonderful, tiny, 120-year-old house, in a quiet shady neighborhood. And you will take that away from me. My block will be zoned Interior 3, and a few yards to the east, just across the alley, it will be Interior 4. So, 3 stories on my block and 4 stories across the alley. Across Thomas, it will be Interior 1, four-plexes with no off-street parking. You will have utterly stripped away from me the city that I love.</p> <p>So, I will fight you. And I will fight any elected official that supports this. This isn't a matter of your plan needing small technical changes, little adjustments. I will fight to stop it as I fought in Viet Nam.</p>	7/14/2018
3260	28	/policies/msp-airport/	<p>Move the airport, and reclaim the land for complete neighborhoods.</p>	7/14/2018
3261	48	/policies/data-driven-decisions/	<p>Any data collected should be made publicly available in an easily accessible online database.</p>	7/14/2018
3262	48	/policies/data-driven-decisions/	<p>Public databases should go beyond affordable housing data; maintain a public repository of all planning data, perhaps as an API, to allow everyone to do their own planning research.</p>	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3263	48	/policies/data-driven-decisions/	Any planning data collected in this initiative should be made publicly accessible in a centralized resource for residents to easily access and refer to.	7/14/2018
3264	25	/policies/innovations-in-transportation-and-infras	Rather than continuing to focus on auto dependent development, autonomous or not, the city should use future technology to promote public transit to meet the city's walking, climate, and other goals.	7/14/2018
3265	81	/policies/social-connectedness/	Fund organizations that do quality, fun, and socially-productive outreach work to underrepresented communities in public policy.	7/14/2018
3266	48	/policies/data-driven-decisions/	It would be amazing if MPLS would make sure to publicize the data/organizations it uses to go through these future decision-making processes; the added transparency could have the dual benefit of getting more people interested in learning about their neighborhoods and making sure, if the city were ever to (G-d forbid) have a slip-up in data interpretation, that others outside municipal government but in relevant research/interest groups could more easily give feedback and improve the city's efforts.	7/14/2018
3267	24	/policies/shared-mobility/	The city should continue to be a leader when it comes to shared mobility devices, such as Bird and other devices.	7/14/2018
3268	58	/policies/business-districts-and-corridors/	* Zone for more small business, retail and office space in neighborhood interiors (maybe provided that some of it must be mixed use). Crucial services are not yet present in all neighborhoods, like laundromats, daycares. * Change zoning regulations to allow for smaller business spaces too, ones that are affordable, and have quality pedestrian-friendly street-frontage.	7/14/2018
3269	33	/policies/affordable-housing-production/	As the head of a cost-burdened household, I support intentional efforts to mitigate the effects of historical redlining and creating stable housing availability for all income levels. It's discouraging to hop between neighborhoods and apartments every year while my wealthier neighbors live in now-multimillion dollar properties that were considered "starter homes" 40 years ago!	7/14/2018
3270	25	/policies/innovations-in-transportation-and-infras	Regarding impacts of AV and connected vehicles, especially any car sharing models that may come to Minneapolis, the City needs to clearly designate specific areas along blocks where vehicles are allowed to stop and pick up/drop off passengers so that they are not blocking bus lanes, bus stops, or bike lanes. Better enforcement will also be needed. Transit, walking, and bicycling will always be the most efficient forms of transportation, and the City needs to prioritize them over any new transportation technology that emerges.	7/14/2018
3271	35	/policies/innovative-housing-types/	Alternative housing options are a must, especially for younger residents and families. Many of us want to share a property or raise our children together, but there are no alternatives in between standard apartments and houses that limit the number of unrelated adults under one roof.	7/14/2018
3272	10	/policies/street-grid/	* Turning alleyways into walkable environments would be a good way to double street space and provide more opportunities for business frontage. * Consider looking at megablocks in Barcelona for inspiration: they return streets to pedestrians and make walkable livable environments, reduce traffic and pollution.	7/14/2018
3273	14	/policies/tree-canopy-and-urban-forest/	The city should tell the park board to plant their trees correctly to insure their baby saplings do not fall over due to the wind. I have seen multiple baby tress fall victim to the park board's planting procedures. The city and park board need to collaborate on the planting on trees more to ensure that whole streets are planted at the same time instead of a parcel by parcel basis to ensure that the street is shaded and pedestrian friendly.	7/14/2018
3274	83	/policies/people-with-disabilities/	Construction projects should be required to provide ADA compliant temporary sidewalks. Frequently, they do not, sidewalk detours are not signed long enough in advance for people to navigate around. It's very easy to take a lane from vehicle traffic on many streets;	7/14/2018
3275	38	/policies/affordable-housing-near-transit-and-job	I don't own a car and probably never will afford one! Please expand options near heavy transit corridors so I can use it for getting to work and errands within the city. If Mpls becomes unaffordable, the closest options in suburbs like St Louis Park are completely unsuitable for a car-free lifestyle.	7/14/2018
3276	28	/policies/msp-airport/	The city should suggest to the airport to stop building new parking structures when it is apparent that people are choosing go get to the airport in different ways that do not require them to park. This would help the airport become more green and help the city meet its transit and climate goals.	7/14/2018
3277	50	/policies/access-to-technology/	Points b and c: need a reminder that city-wide infrastructure also means that the city intends to protect the people who use it from potential bad-faith disparities built in to said system. A 5GB broadband system in South tied to a 512MB broadband system in North, with equal access to hookups, is technically a city-wide system, but is by no means equitable. We know you mean the best with this, but please make sure the language better fits that intention.	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3278	6	/policies/pedestrian-oriented-building-and-site-de	For buildings on the corner of any intersection, an entrance oriented towards the corner should be required. Coordinating with Metro Transit on ways to improve transit operations with any new development is very important. Eliminating parking minimums across the city is a good step, but strong consideration should be given to implementing parking maximums in certain parts of the city. To the extent legally possible, the City should work towards reducing the number of curb cuts along arterial streets with heavy pedestrian activity.	7/14/2018
3279	79	/policies/healthy-youth-development/	I am so glad to see that the City recognizes the potential of healthy youth development to reduce STI and unintended pregnancy rates. Comprehensive sexuality education that covers a wide variety of topics including healthy relationships, consent, communication, sexual orientation and gender identity, self esteem, decision making, abstinence, and birth control and condom use skills, should be part of all adolescent programming. This is information that young people are not getting at home from their parents, the schools are not devoting enough time to these topics, and young people are worse off because of it. Despite the fact that we are currently seeing the state teen pregnancy rate at a historic low, STI rates are higher than they have been in over a decade. These are issues that disproportionately burdens young people under the age of 25 and any city programing that aims to promote positive and healthy youth development for children, youth, young adults, and their families and support systems needs to address these topics.	7/14/2018
3280	40	/policies/homelessness/	Proactive measures for emergency sheltering are a must. I live in Uptown, an area with a highly visible homeless population, and I want there there to be more publicly accessible options for contacting emergency shelter services than just having a number on speed dial in case you're the first passerby to care about getting them out of the cold. Especially: there must be a citywide service people are encouraged to call that ISN'T the police!	7/14/2018
3281	10	/policies/street-grid/	I love the idea of restoring the street grid and maintaining connections. Please consider ways to reconnect the street grid but not allow automotive traffic. We have very few and need many more pedestrian-centric plazas and spaces to relax - like NYC has been working on. Activate sidewalk spaces and retail storefronts to make plazas fun places to be.	7/14/2018
3282	89	/policies/technology-in-the-city-enterprise/	YES! Just please remember that it's a terrible idea to run government like a business, and that we're more than customers- we're you're neighbors, and a lot of CS/RM stuff gets really depersonalizing and really off-putting (speaking as someone who's used that kind of programming in employment). That doesn't mean that a good system doesn't exist, but maybe think of shifting a bit more toward engagement or 'being a good neighbor'. Not sure how you'd prefer to phrase that.	7/14/2018
3283	84	/policies/public-safety/	The city should reverse its policy of only adding lighting to city streets when the street is under reconstruction and add lighting to streets that are dark at night to increase safety. Also abolish surface parking lots because they are not safe.	7/14/2018
3284	20	/policies/transit/	The City should work closely with Metro Transit to make sure that transit facilities follow NACTO guidelines as laid out in their Transit Street Design Guide. Addition of bus-only lanes should be a high priority.	7/14/2018
3285	10	/policies/street-grid/	Work to teardown and remove freeways in the center of the city. Remove the 4th st. 94 viaduct - it cuts through the city and should be torn down. Consider removing 35W between 94 and 280 and rebuilding the street grid there.	7/14/2018
3286	92	/policies/identify-and-evaluate-historic-resources	Any analysis of preserving historic properties needs to somehow address the fact that historic preservation districts are connected with increased disparities in access to housing. An analysis of upper west side historic districts (link below) showed that they seem to price out lower-income residents. Any attempt to preserve historic buildings for housing via historic districting should be tied to some inclusionary zoning policy, or not considered at all (see policy goal #1: reducing disparities). Instead of creating new historic districts we should look at creating publicly accessible museums that record the history of these areas, rather than preserving buildings that do not allow public access. https://wagner.nyu.edu/files/faculty/publications/McCabe_Ellen_Does_Preservation_Accelerate_Neighborhood_Change.pdf	7/14/2018
3287	10	/policies/street-grid/	Tear out the 94 loop and remove the Lowry Hill tunnel. It is a waste of space and divides our neighborhoods. It would be so much better and add so much to our quality of life to build parks and housing there like it traditionally was before the freeways were built. The comp plan needs a specific policy outlining the dismantling of the interstate highway system in the city. It harms our city via air pollution, congestion, making it more difficult to get around and car dependent.	7/14/2018
3288	26	/policies/vision-zero/	This city needs to prioritize building curb protected bike lanes throughout the city to ensure that cyclist are safe when they are on the roads. The city also needs to prioritize making their sidewalks wide enough to accommodate all people.	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3289	18	/policies/walking/	Are there underserved neighborhoods in terms of sidewalk repair and maintenance? What winter initiatives can you put into place to make sure ADA-compliant pathways exist after a snow day? If someone neglects to shovel their walk it could curtail the distance a limited-mobility neighbor can travel on sidewalks that should be accessible to all.	7/14/2018
3290	17	/policies/complete-streets/	Strong curbside management is very important. Designated loading/delivery and pickup/drop off zones should be implemented along city blocks so that delivery vehicles, or ride share vehicles such as Uber and Lyft are not blocking bus lanes, bus stops, or bike lanes. Active enforcement is needed.	7/14/2018
3291	41	/policies/tenant-protections/	<p>The city should consider specific actions, such as:</p> <ul style="list-style-type: none"> * Rent stabilization, capping yearly rent hikes to protect renters from extreme year-to-year increases. A UC Berkeley's Turner Center analysis suggests capping at 5% per year plus inflation. The same study also suggested tax breaks to property owners for converting units to be affordable for people with limited incomes. * Address the high costs of rental application fees, which can add up when applying for multiple apartments. Two options include either a cap on rental application fees or setting up an application fee/background check clearinghouse where tenants would pay a one-time fee to be listed while searching for an apartment, and landlords would pay a fee to access the listing for a month. This one-stop clearinghouse would be hosted by a single 3rd party. This idea was originally suggested by Minneapolis Renters Coalition members. Expand relocation fee assistance. * Require property owners to give advance notice of sale; as much as 6 months. <p>A "Right of First Refusal" policy such that when tenants get notice of sale, they have the option to buy the property. The same system could provide the city the option to buy and preserve the properties.</p> <ul style="list-style-type: none"> * Provide guaranteed housing if tenants are displaced for redevelopment. 	7/14/2018
3292	18	/policies/walking/	<p>Install permanent pavement treatments/texture shift for zebra style pedestrian crosswalks. Most of these are painted on and fade away within a few months. Pedestrian crossings need much greater visibility in the city. Elevate the crossings where possible and make leading pedestrian intervals the standard, not the exception.</p> <p>Remove beg buttons - we shouldn't have to push a button to cross a street. A car doesn't and neither should pedestrians.</p> <p>Mandate curb bump outs during any street resurfacing/reconstruction. They have definitively been proven to enhance pedestrian safety, calm traffic, and make it easier to get across the street.</p> <p>Consider creating a Curb Cut Cap & Trade that requires property owners to have licenses for the curb cuts. They could be bought and sold for new development as needed and help fund new pedestrian safety projects.</p>	7/14/2018
3293	41	/policies/tenant-protections/	<ul style="list-style-type: none"> * Fund or produce publicly accessible, free, plain language and multilingual tenant resources. * Create and maintain a publicly accessible, centralized list of services available to tenants (possibly also containing links to county programs). * Promote all rent subsidy programs that exist. * Create a reliable 311 experience for tenant questions. * Fund a city-wide media campaign to inform tenants of rights & services available. 	7/14/2018
3294	41	/policies/tenant-protections/	<ul style="list-style-type: none"> * Implement a "Just Cause" eviction policy. * Provide lawyers to tenants facing eviction and other housing court cases, for free. You should have the right to an attorney if you're facing the prospect of losing your home. * City and state labor policies should protect those appearing in housing court and include this in Safe & Sick Time. No one should have to worry about time off work to appear in court. 	7/14/2018
3295	25	/policies/innovations-in-transportation-and-infras	Include electric-assisted bikes and motorized foot scooters in consideration for electric vehicles- a good deal of our personal transportation future is going to be in much smaller packages than what's conceptualized above, not just AI-guided SUVs. Side note, we need to be thinking also about charging stations- almost certainly they will need multi user-type consideration in placement/accessibility and design.	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3296	41	/policies/tenant-protections/	<ul style="list-style-type: none"> * Support section 8 by funding adequate staff to speed the MPHA inspection and re-inspection process * Streamline the rent disbursement process so that the initial Section 8 rent payment arrives at the start of the month * Create a Minneapolis rental subsidy alternative at the municipal level. <p>Housing maintenance, inspections, and health and safety</p> <ul style="list-style-type: none"> * Provide more transparency about problem landlords by creating a portal to look up citation and inspection records by management companies and property owners. This would be accessible for free online, containing important public data like citations and inspection notes. * Vigorously enforce civil rights ordinances in rental housing. * Fund additional housing inspections staff 	7/14/2018
3297	20	/policies/transit/	<p>E Line please! I was thrilled to hear that the city is considering upgrading the #6 bus line to a rapid transit line, as my experience using the A line and getting more opportunities to navigate the path of the rapid line makes me excited the possibility of another line closer to home. I also encourage a rapid line going into North Mpls for that reason - it is part of the city I have seen the least of because its connection to the rest of the city has less support from a regular, efficient transit line.</p>	7/14/2018
3298	61	/policies/environmental-justice/	<p>Build more affordable housing in interior neighborhoods that are not along highways to ensure people who have historically have had to live along the more polluted highways have a non polluted place to live.</p>	7/14/2018
3299	21	/policies/freight/	<ul style="list-style-type: none"> * Many train freight corridors in the city would make great greenways, make sure that they're also able to function as a link to city neighborhoods for pedestrians and cyclists. * Consider re-evaluating which train corridors are no longer in use, reclaim them for urban uses; build housing and mixed use, build greenways. 	7/14/2018
3300	1	/policies/access-to-housing/	<p>In general, I am very much in support of this policy. We have a housing shortage in Minneapolis and too many neighborhoods are inaccessible to people of moderate to low incomes due to a lack of housing types.</p>	7/14/2018
3301	19	/policies/bicycling/	<p>This goal and action steps need to be stronger and more explicit. We need to majorly expand and upgrade our network of bikeways and greenways and implement the following actions:</p> <ul style="list-style-type: none"> * Parking protected bikeways and curb protected bikeways should be standard. Please stop building bike lanes between automotive travel lanes and parking lanes - this is dangerous for so many drivers and people on bikes. * Build more bike traffic lights (with earlier green light times). * Institute mandatory minimum parking requirements citywide. * Upgrade existing bikeways and greenways with best practices in bikeway design * Set goal of 40% of all trips taken in the city to be by bike * Increase on-street and off-street parking rates to build new bike and pedestrian infrastructure * Support a major expansion of public bike sharing (docked, dockless, e-bike and winter bikes) so that it is accessible to every resident * Prioritize pedestrian, transit and biking modes over automotive travel on all corridors * Levy taxes on car owners to fund multimodal transit construction and maintenance 	7/14/2018
3302	2	/policies/access-to-employment/	<p>Concentrating employment along the entire length of transit corridors, as opposed to primarily downtown, is important to achieve balanced bi-directional flows on transit routes.</p>	7/14/2018
3303	1	/policies/access-to-housing/	<p>If goal #1 is to reduce disparities, we need to stop maintaining redlining based land use decisions. Take a look at Hennepin Ave S, why is there lower intensity zoning west and higher intensity east? Interior 1 should be eliminated, west of Hennepin should be Interior 3.</p>	7/14/2018
3304	11	/policies/skyways/	<p>I'm a fan of the skyways for the accessibility they provide in inclement weather and the uniqueness they provide to the experience of navigating downtown, but I understand the priority of cultivating a better street-level pedestrian experience. Renovating the skyway access points is a good way to make advancements on both levels.</p>	7/14/2018
3305	24	/policies/shared-mobility/	<p>Most importantly- after we get all this experimentation/user data and go into new regulatory and incentive structures, we need to follow through with equitably enforcing the regulation and make sure the stubborn people who refuse to adopt don't keep the rest of us from making climate/technology/social equity/travel/safety progress, especially that first one. We literally cannot afford the hold-up.</p>	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3306	20	/policies/transit/	Please fund transit! MetroTransit needs it.	7/14/2018
3307	24	/policies/shared-mobility/	Carpool and vanpool options please!!! There must be a better option than privatized carshare services for commuters who use public transit service most of the time but need other options on occasion.	7/14/2018
3308	28	/policies/msp-airport/	More late night light rail service from the airport, or alternative safe pubtrans options for travelers coming in on redeye flights.	7/14/2018
3309	1	/policies/access-to-housing/	<p>Housing should be allowed in every area of the city - including Production and Distribution areas. There are many production and distribution oriented businesses that would benefit from having workforce housing nearby - like the Kemps plant in North Minneapolis. Having said that, we must be conscientious of environmental racism and not allowing polluting industries near housing like the concrete plant in Phillips.</p> <p>The highest density housing should be in Downtown. This is a great policy that promote more efficient use of our land, grows our tax base and allows people to live without a car.</p> <p>All METRO transit routes (LRT, ABRT and high frequency route) should have multi-family high density housing along it. Additionally, multi-family housing should be allowed along all metro transit corridors - really the whole city for that matter - but allowing more housing along existing routes will support mass transit ridership, increase route frequency, and help grow the high frequency network.</p>	7/14/2018
3310	37	/policies/mixed-income-housing/	There needs to be a specific goal of reducing the amount of land in this city occupied by homogenized neighborhoods made up almost entirely of white homeowners. These types of neighborhoods do not just happen out of chance. These are inequalities that are a direct result of institutionalized racism in zoning and neighborhood organizations and restricted access to wealth for people of color. Increasing populations of renters, low income individuals, and people of color in these neighborhoods avoids the pitfalls of segregating low income housing to resource poor areas, eases gentrification in other parts of the city and allows these new residents to have access to existing neighborhood amenities.	7/14/2018
3311	3	/policies/production-and-processing/	As we only have a very limited amount of space in the city for production and processing uses, excluding non-production uses is important. Also having good transit access to production and processing areas is important.	7/14/2018
3312	38	/policies/affordable-housing-near-transit-and-job-	The Blue Line corridor seems surprisingly underdeveloped when it comes to affordable housing options. That would be a great place to encourage a broad range of housing developments next to a very reliable transit system.	7/14/2018
3313	19	/policies/bicycling/	<p>1. I use my bike to do so much more than just get to work- I go shopping, to the gym, visit the parks, go to the bank, see shows and such, travel to class. Not even half of my time on my bike is to/from work, and I suspect it's very similar for a lot of other riders. So why do we have a majority system that's only really great for to/from downtown? East/west across the whole city should be a lot higher on the list than it seems like it is...</p> <p>2. If Hennepin Co or MNDOT ever pulls another stunt like Park/Portland, please shout them down as much as you can, or at least get better safety accommodations than we did for these. Biking along those roads now is a nightmare and literally life-threatening with a single foot of buffering against constant traffic going 50mph on one side, and right up against drivers getting out of their vehicles on the other. Yes, I understand these streets are technically not under city jurisdiction, but the safety of your residents IS! Do your darnedest to make them listen.</p>	7/14/2018
3314	30	/policies/arts-and-cultural-assets/	Thanks to multiple factors (such as the presence of graduates from art schools like MCAD and UW Stout) Minneapolis has become a vibrant city for comic artists, game designers, and animators. It would be exciting to see a recognition of these newly prolific creative industries when rolling out these initiatives.	7/14/2018
3315	6	/policies/pedestrian-oriented-building-and-site-de	Good idea with discouraging the building of drive throughs and gas stations!	7/14/2018
3316	4	/policies/access-to-commercial-goods-and-service	Make sure new commercial uses are designed from the pedestrian scale. Increasing housing density adjacent to commercial is vital so that there is enough residential population to support the commercial activity.	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3317	6	/policies/pedestrian-oriented-building-and-site-de	<p>Orient buildings and building entrances to the street. Encourage multiple entrances to multi-family residential buildings. * Yes - more townhomes and multiple entrances on the streets - this helps activate the street. I love this idea and support it!</p> <p>Require windows on buildings to allow clear views into and out of the building. * Yes - more windows on the street/natural light in interiors. Consider how we can promote dismantling weird walls and infills that tore out windows in cute old buildings. Make sure the windows are bird-safe too!</p> <p>Ensure that buildings incorporate design elements that eliminate long stretches of blank, inactive exterior walls through provision of windows, multiple entrance doors, green walls, and architectural details. * Yes - do not allow any sides of buildings to have inactive uses. Ban parking garages and mandate existing ones activate all sides of their first floors to activate the street. There are so many garages downtown that kill the street life. Do not allow parking garage entrances directly from the street.</p>	7/14/2018
3318	66	/policies/air-quality/	<p>How does air quality and the prevalence of pollutants correlate with neighborhoods that were traditionally POC majority? I have heard about these areas suffering from increased health risks like asthma due to their proximity to historically industrial areas - how can we be accountable to these neighborhoods at higher pollution risk?</p>	7/14/2018
3319	17	/policies/complete-streets/	<p>Wider sidewalks need to be a top priority- we should be designing them to accommodate two people using mobility equipment passing each other comfortably, at the very least. This would also allow families with strollers, people walking their bikes, and large groups to pass without fear of having to go into the street. As it stands, there are so many places where a single person using a wheelchair will have to keep one of their wheels off the sidewalk to avoid using the street- which means they use the street instead anyway.</p> <p>Also, snow removal- I know the study just came out, but seriously we need to ensure sweeping and clearing is built into the 'how' of street design and the 'what' of maintenance. Private responsibility just doesn't cut it anymore, especially with the lack of enforcement/remediation options. Let's not keep people trapped in their homes just because it snowed last night.</p>	7/14/2018
3320	14	/policies/tree-canopy-and-urban-forest/	<p>It is important to me that the trees that are planted are native species that work within the urban ecosystem. Along with the tree canopy, landscaping throughout the city needs to be native, pollinator friendly species.</p>	7/14/2018
3321	66	/policies/air-quality/	<p>Polluting industrial uses coincide with historically redlined areas. Goal #1 on reducing disparities says this shouldn't be so.</p>	7/14/2018
3322	6	/policies/pedestrian-oriented-building-and-site-de	<p>* Coordinate site designs and public right-of-way improvements to provide adequate sidewalk space for pedestrian movement, street trees, landscaping, street furniture, sidewalk cafes, and other elements of active pedestrian areas.</p> <p>Yes - I love this! Trees, landscaping (rain gardens and sustainable storm water run off), parklets and converting on-street parking spaces to seating areas, bike parking, bike share stations, etc. should be prioritized. This creates a wonderful urban experience and promotes a healthy pedestrian realm. Many streets currently are kinda boring because the sidewalks aren't prioritized and on-street areas are reserved for automobile parking. We should be expanding parklets, removing on-street spaces to expand the sidewalk for cafe space (add trees, gardens, etc.).</p> <p>We also need better pedestrian signage. Consider the strategy that NYC used with Walk NYC and LinkNYC.</p> <p>* Coordinate with Metro Transit to ensure that the design of new buildings supports transit operations.</p> <p>Absolutely - incorporating shelters, signage, seating, waste disposal is crucial to supporting our transit system and growing transit ridership.</p>	7/14/2018
3323	5	/policies/visual-quality-of-new-development/	<p>Applying high quality design standards is important, but we need to be careful not to make them too onerous that they end up being capitalized into higher housing prices.</p>	7/14/2018
3324	71	/policies/soil-health/	<p>Lots of prospective homeowners are interested in spaces where they can create personal or communal garden space and opportunities to grow their own food. What publicly accessible resources would be available to residents looking to check their property's soil quality and land usage history before starting such projects?</p>	7/14/2018
3325	6	/policies/pedestrian-oriented-building-and-site-de	<p>Ban parking lots near and at transit centers</p>	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3326	84	/policies/public-safety/	First responders and police MUST be trained in making de-escalation their first priority and understand that police are often called as a means to maliciously inflict violence on a fellow resident as opposed to respond to a genuine threat. Contemporary public safety MUST address this abuse of service against marginalized residents and set appropriate punishments for abusers.	7/14/2018
3327	69	/policies/renewable-and-carbon-free-energy/	Encourage Xcel to exelate plans to burry the power lines throughout the city.	7/14/2018
3328	16	/policies/environmental-impacts-of-transportation/	Get rid of parking minimums! The easiest way to get people to stop driving is reduce their ability to store their vehicle away from home, and that space can be used for other (Complete Streets?) uses. We also need to encourage a culture-change away from expecting that everyone drives and that everyone has to. I know, it's a lot of older residents who don't want to change their ways, but this plan is literally not for them, cold as that may sound.	7/14/2018
3329	26	/policies/vision-zero/	Thank you for including Complete Streets within Vision Zero as well. This is exactly what it's partially intended to address. Lower speed limits is crucial to reducing traffic deaths and serious injury; as it has been said, if the speed limit requires all users to act completely predictably, the speed limit is too high. 25mph should really be our goal for the majority of municipal roads.	7/14/2018
3330	78	/policies/park-design-and-programming/	I believe parks are public spaces. Anyone may enjoy a park. Is it really necessary to develop a policy to make parks mor inclusive? Doesn't make sense to me. A all field is just that, playgrounds too. What's the answer? Let people be to either go or stay home. It is not the responsibility of government to design special activities so that the parks are more diverse. Sorry, this makes no sense.	7/14/2018
3331	57	/policies/cluster-strategy/	Do not offer tax subsidies to try to get business to locate here. That's bad for the city and area.	7/14/2018
3332	1	/policies/access-to-housing/	I fully support part E of policy 1. Allowing multiunit housing and ADUs throughout the city is not a radical experiment, most neighborhoods already have them. If a four-unit building were to burn down in some parts of the city, you would have to build a single family home in its place because of the downzoning throughout the city. It is the only way to increase the housing stock to ease the affordable housing crisis.	7/14/2018
3333	18	/policies/walking/	Make the pedestrian crossing signals always turn green even when people do not press the buttons.	7/14/2018
3334	6	/policies/pedestrian-oriented-building-and-site-design/	I 100% support this policy. We should be building our city for people and not cars. Currently people who don't own cars (by choice, ability, or due to its cost) pay so much for car infrastructure in higher prices for goods, higher rents due to structure parking costs, and in air pollution due to idling. In addition to this - we should be instituting off-street parking maximums. We currently have an oversupply of parking. Our parking costs (typically free to the driver) do not come even come close to offsetting the negative externalities from automobile dependence. To achieve multi-modal travel goals and climate goals we need to several curtail transportation related emissions. To do this we need to get people out of cars and onto their feet, bikes, busses and trains. This is also a class and equity issue. The cost of car ownership is thousands of dollars a year. This is simply unattainable for a large amount of Minneapolis residents and workers. Many people (able-bodied or not) do not have a choice when it comes to owning a car. We need to prioritize mobility options for people without cars and for people wanting to give it up so that our city can become more economically, racially, and environmentally just.	7/14/2018
3335	12	/policies/lighting/	Capped streetlights are a yes from me!	7/14/2018
3336	6	/policies/pedestrian-oriented-building-and-site-design/	Prohibit the establishment of new drive-throughs and gas stations. Absolutely - idling cars in drive-thrus and gas station design makes for a horrific pedestrian experience. From large curb cuts to physically blocking sidewalk and transit access - we must stop new gas stations and drive-thrus from being built in the city.	7/14/2018
3337	74	/policies/integration-of-water-management-into-city-design/	Repair/maintenance/replacement of our storm, sanitary, and municipal water systems is going to be costly, time-intensive, and absolutely necessary. We need to be realistic about that. The city could benefit from more intensely show the long-term effects of previous decisions and long-term benefits of best practices, beyond what it's tried in the past. Too many people want the city to always take the cheapest option, even after everything the city has tried to (gently) dissuade them with, and we need it be a bit more vocal/firm about what is really needed.	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3338	4	/policies/access-to-commercial-goods-and-service	To build walkable streets and encourage pedestrians, please require buildings be designed so walkways are free from drainage of snow and rain dripping from cantilevered balconies, eaves, overhanging features. See a negative example at NW corner of 43rd & Upton So., where snow is dumped from balconies onto sidewalks, and quite regular dripping from melting snow, rain, AC condensation, results in very slippery sidewalks.	7/14/2018
3339	18	/policies/walking/	As someone who walks a lot and would like to walk more, I appreciate these action steps. One to add: where walking paths and biking paths coexist, create buffers between the two wherever possible.	7/14/2018
3340	0.1	/topics/land-use-built-form/	I had a hard time finding this build form map. I am stunned to find out that the houses across the street from me can be replaced by apartment buildings, up to 2 1/2 stories tall. And that the houses on the other side of their block (on Sheridan) can be replaced by 4 story buildings. This is going to totally change the character of our charming neighborhood. If I wanted to live in this kind of neighborhood, I would have stayed in Uptown 35 years ago. Now I feel like Uptown is being forced on my neighborhood.	7/14/2018
3341	6	/policies/pedestrian-oriented-building-and-site-de	Bold. I like it.	7/14/2018
3342	1	/policies/access-to-housing/	As an african-american woman who lives in Minneapolis and who recently attended a seminar by the Mapping Prejudice Project about the terrible history of racial covenants, I believe we should be careful about using that particular history as a rationale to end single family home neighborhoods. The goal of those covenants was to block minority groups from moving into those newly built homes. Most middle and upper income african-american families that I know in the Minneapolis metropolitan area WANT to live in single family home neighborhoods, not highly dense neighborhoods. A disproportionate percentage of middle/upper income african-american families in the metro area haven chosen NOT to live in Minneapolis (if you doubt this reality, please ask the Minneapolis Public Schools for their statistics on the percentage of middle/upper income african-american students) and I am concerned that reducing single family home neighborhoods could cause more of these families to chose communities other than Minneapolis. Increased public transit options and more robust investment in high density areas are great goals, but those goals do not mean that we should reduce single family home neighborhoods. Reducing single family home neighborhoods could have the perverse effect of causing financially successful minority families to leave Minneapolis.	7/14/2018
3343	24	/policies/shared-mobility/	I'm glad to see policy work in this area. I was a Car-to-go user and wish we had access to a flexible car sharing program like that. These action steps sound great.	7/14/2018
3344	1	/policies/access-to-housing/	Please include something about the aesthetic appearance of "small scale residential structures" so they are in keeping with the scale, era and architecture of the surrounding neighborhood. Also, please define an "accessory dwelling unit."	7/14/2018
3345	5	/policies/visual-quality-of-new-development/	Please include a requirement to be consistent with the architectural era that most homes in the surrounding neighborhood were constructed.	7/14/2018
3346	33	/policies/affordable-housing-production/	Be careful of policies that are designed to pit the needs of homeowners against the needs of those who have the greatest need for housing stability. This is poor policy making. Both of these groups need to be considered equally. Homeowners are critical to economic stability in the city and maintaining their stability is just as important as creating housing for those who have the greatest need for housing stability. if you prioritize those who have the greatest need by removing stability from homeowners, you will see homeowners vote with their feet by moving to communities where they feel more secure about their investment. And be extremely careful about assuming this is just an issue for white residents who don't want integration. As an african-american woman who lives in Minneapolis, I am aware of the fact that the majority of middle and upper middle income african-american families that I know live OUTSIDE of Minneapolis. If you doubt that fact, ask the Minneapolis Public Schools for their percentages of middle/upper income african-american students. The middle/upper income african-ameriican families that I know WANT to live in single family home neighborhoods.	7/14/2018
3347	34	/policies/affordable-housing-preservation/	This goal should be the city's primary focus, not the false narrative that building new/more housing will lead to affordable housing. It is well documented that due to housing building costs today it is NOT economically feasible to build affordable housing unless it is subsidized in someway. In my Uptown neighborhood, we have seen duplexes and triplexes converted BACK to single family homes as values have risen, and all of the new apartments that have been built are listed at rents that rival my mortgage! This reality is the exact opposite of how the policies stated in this document claim that housing will be affected.	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3348	37	/policies/mixed-income-housing/	Mixed income housing is a fascinating question that will require a lot more detailed information before residents can respond. Is this a reference to rental units or home ownership? Are you talking about different units with different amenities based on what you can afford? Is the goal to diversify the wealthiest neighborhoods, or the neighborhoods with the most jobs and that are best connected? Do we believe that everyone has the right to find housing in every neighborhood, even if their income cannot afford the market rent or mortgage in that neighborhood? For example, do I have a right to move to the Upper West Side of Manhattan even though I cannot afford a place in that neighborhood (which I definitely cannot)? If so, what are the parameters that should allow me to be there, what kind of housing should I expect to be able to move into? We will need more information.	7/14/2018
3349	39	/policies/fair-housing/	This is a wonderful goal. However, as an african-american woman, I encourage the planners to remember that many (but certainly not all) of these issues are tied to the disproportionate poverty/lack of higher education of Minneapolis' residents of color, not just race. Minneapolis has a disproportionately small middle/upper income professional african-american population. Without recognizing the outsized role that poverty and lack of higher education degrees in creating these problems, we will pursue solutions that won't work.	7/14/2018
3350	41	/policies/tenant-protections/	The city needs to advocate at the legislature for a policy of automatically expunging all unlawful detainers/eviction notices from the public record after 1 year from the date of the notice. There is no public policy reason they are relevant when they are more than 1 year old (the important question is whether you are paying your rent currently). This will eliminate a significant barrier to finding better rental housing.	7/14/2018
3351	42	/policies/expand-homeownership/	Totally in favor of all of these policies.	7/14/2018
3352	43	/policies/housing-displacement/	Totally support all of these policies.	7/14/2018
3353	1	/policies/access-to-housing/	This policy is terrible. I paid a lot of money to buy my house in southwest Minneapolis and do not want duplexes near me. As it is, there are already some nearby and the tenant turnover means they have no skin in the game to keep the neighborhood nice. They blast music, sit outside smoking and drinking, and generally creating a nuisance. No more new duplexes! I don't want my young child seeing that behavior. Build an apartment instead.	7/14/2018
3354	0.1	/topics/land-use-built-form/	I cannot get the map comment feature to work, but in the area of 55/56th and Newton, we do not need any more duplexes or worse, quadriplexes. We also don't need more bus traffic. We have enough foot traffic from questionable people from the group homes off Penn. Renters don't care about our neighborhood the way homeowners do. We already have minor issues with the duplexes and tenants on Oliver. We want to preserve the quality and safety of our neighborhood and not have it get worse. Lots of little kids in this area, we do not want the neighborhood to change, please help keep them safe.	7/14/2018
3355	28	/policies/msp-airport/	28b One of the dumbest policies I've ever seen. How many people are going to walk or bike to the airport with their luggage, family, pets, and try to get there on time? The only advantage I see with this policy is that I used to ride my bike on a route around the airport. Now the roads are too busy. That is all I would use this policy for--just a bike ride.	7/14/2018
3356	1	/policies/access-to-housing/	1e In the early 1990's, I lived in a starter home on the 53rd block of Chowen Ave S. There were many starter homes at affordable prices on that block. Now 15 of the 30 homes on that block have been torn down and replaced or major remodeled. It is time to stop the teardowns in our neighborhoods so people of less means can afford to live here. Stop the teardowns and major remodels. Keep these smaller homes!!!	7/14/2018
3357	1	/policies/access-to-housing/	I really oppose allowing more 3 or 4 unit or more housing types in neighborhoods that currently contain predominantly single family homes. People live in these communities because they want single family homes. It also bothers me that we can't even enforce some of the issues that arise today when we get a neighbor that makes livability impossible. Until we enforce these issues, it can only get worse. As an older person, I also worry about being able to park my car in a location near my home or destination. With increases in these multi unit residences, parking will be much worse. I love Minneapolis and want to remain here. My child and grandchild have bought homes in Minneapolis and I want them to enjoy the community as much as I have. Don't turn this into Chicago or Detroit or ? I do not have so many concerns about building on busy thoroughfares where housing currently does not exist. What I would really love to see are programs that help low income people obtain mortgages through credit counseling, budget workshops, house and yard maintenance education, and down payment assistance.	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3358	1	/policies/access-to-housing/	<p>Our neighborhood is crowded and busy enough. We now have single family homes along with some 4-plexes and a few small businesses. We now put up with higher crime and noise in our area than we did when we purchased our property in 1986. The city doesn't have or enforce any noise ordinances. We get stuck with human trash driving up and down the street with their boom boxes blaring, loud and heavy with bass. These scum come through our neighborhood and throw their trash out of their cars and leave it littering our once nice neighborhood. Because of our left leaning liberal mayor Betsy Hodges, there is no enforcement on many members of the so called "minority" in this city to adhere to any form of living in harmony with neighbors. People don't want to listen to a neighbor's loud stereo. They don't want to put money and effort into keeping up their properties only to have rental scum and their landlords leave their properties in dilapidated condition. You may think you can force cooperation and integration down people's throats but you will only succeed in causing people who care about their "quality of life" to evacuate the neighborhoods that allow human trash of questionable quality and irritating habits to invade. The city will continue to go down hill until it is nothing more than an empty shell of a city "rotting" from the inside. I live in the Victory neighborhood. I chose this area because of its relatively peaceful streets with nicely kept homes. Just 2 blocks from my home, there are already several "multiple family complexes" which foster noise, crime, drug dealing, and dilapidated properties. I work very hard to keep my property looking good. I already have seen a huge increase in traffic and noise on my street since I came here in 1986. Since the city does nothing to enforce any noise ordinances and fails to enforce speeders from racing up and down our street, my neighborhood is becoming unpleasant to the point that I am thinking of selling and moving the hell out of here. I'm sure that if allowed to, the police would enforce some of these issues but I'm also quite sure that our bleeding heart liberals on city council and in the mayor's office try to keep the police from doing anything to keep the peace in some of these borderline neighborhoods. Your plans to allow low income housing to be integrated into stable neighborhoods will destroy those neighborhoods and the city will be faced with the same problems it has had for years. People who care will evacuate. People who don't care about their noise, their behavior, or their work ethic will take over and turn good neighborhoods into hell-holes.</p>	7/14/2018
3359	33	/policies/affordable-housing-production/	<p>I applaud the city's prioritizing affordable housing. I don't see any specifics in how it is going to build and pay for, or subsidize affordable housing, but I hope it is truly a goal in this plan. Especially since you highlight the percentage of affordable housing that has disappeared. I'd like to know why this decline happened, and how the city plans to address this in a comprehensive and meaningful way. Also, is the issue the cost of the housing, or the wages earned and work done of the residents, or some other factor. Will Minneapolis' new higher minimum wage help address the cost of housing issue?</p>	7/14/2018
3360	4	/policies/access-to-commercial-goods-and-service	<p>I live in a neighborhood that is a mile from the nearest grocery store. I'd love to see the availability of a market closer, but I don't see the city making this one a priority. Nor do I trust that a small market would be affordable, just convenient. Minneapolis was not built like Chicago with a small market or bar or restaurant or service on the corner of every major street. It will take a major overhaul of each neighbor to make this work. What's to keep delivery services from becoming the neighborhood market? And doesn't all the food and grocery delivery services just add more cars, more emissions?</p>	7/14/2018
3361	6	/policies/pedestrian-oriented-building-and-site-de	<p>How about a pedestrian walkway downtown?</p> <p>How about making the lakes car free on weekends (in summer at least) so more people could bike?</p> <p>How about all the parks having more useful services like restaurants, bathrooms, bike and boat rentals?</p>	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3362	0.1	/topics/land-use-built-form/	<p>The Minneapolis 2040 plan is so insanely out of line with anything reasonable, or necessary, that it is truly a massive overkill. Rezoning any and all blocks that intersect with "transit corridors" to allow 3 and 4 story apartment buildings, and allowing 4-plexes anywhere w/o off-street parking is disturbing. DENSITY does not equal affordability.</p> <p>Look what has happened to Uptown since developers started creating "density". Housing is much MORE expensive, locally owned stores have been forced out and replaced with chains, and diversity/accessibility has greatly diminished! Giving developers the opportunity to buy up small single-family homes anywhere in the city (which they will do by out-bidding regular folks on sales) and replace them with apartment buildings or 4-plexes will diminish the stock of affordable homes for first-time buyers (home-owning is still the most important way for people to build equity, contrary to what Heather Worthington thinks). There is a need to come up with REAL solutions to the problem of affordable housing but the 2040 plan IS NOT the way to do it. We should focus resources toward helping neighborhoods that need help--need more home-owners, better schools and better jobs. Giving developers the keys to the city is not the way to do it!! The 2040 plan needs to be changed so it does not harm current home owners. It also needs to acknowledge that people own cars and are NOT going to give them up. Winter lasts 6 or 7 months here, and the vast majority of us are NOT going to walk or bike through ice and snow in below freezing temps!! And our transit system is also woefully inadequate!</p>	7/14/2018
3363	9	/policies/open-spaces-in-new-development/	<p>The surface lots downtown should be the first things to go. To development or city park space. If we want a thriving downtown, we need to lessen the dead spaces and make traveling through the city on bike or foot easier.</p>	7/14/2018
3364	33	/policies/affordable-housing-production/	<p>Finally! the goals for affordable housing. And no strategies how the city plans to meet them. I agree with the goals and given what neighbors have told me about plans, I'm not sure I agree with the strategies. Let's start with number 1. There is a lot of NEW housing in my neighborhood near the light-rail and I don't know who can afford it with rents topping \$2000 per month for a unit large enough for a family and \$1000 for a single room with kitchenette. What, exactly, are the city's strategies to get these rents down. I've heard that the city plans to build more units and by having more units the price will come down. I do not believe this. Just having more doesn't mean that rents will decrease-</p>	7/14/2018
3365	0.1	/topics/land-use-built-form/	<p>Density around SWLRT stations is seriously complicated by the co-location of SWLRT with high-hazard freight trains. TC&W hauls mile-long ethanol trains in this route on a regular basis, and light rail with overhead wires are known to spark and arc. Recently, the Minnesota Legislature limited railroad liability exposure to \$3 million in the co-location area after heavy lobbying by the industry. If the railroad companies are concerned enough to demand liability limits and crash walls in some parts of the corridor, Minneapolis needs to be concerned about safety and liability as well. Based on 2010 U.S. Census Bureau data 60,000 residents currently live within 1/2-mile of the 7 to 9 miles of freight rail tracks that will be co-located with LRT if the SWLRT is built. Please consider their safety, as well as the safety of possible future residents, and take a deeper look at what co-location means.</p>	7/14/2018
3366	75	/policies/waste-reduction/	<p>How do you propose to discourage illegal dumping? It happens all the time. The city usually makes residents take care of illegally dumped items. How does the City plan to change this?</p>	7/14/2018
3367	75	/policies/waste-reduction/	<p>We need a lot more education on how to do this. Some people try to do as much as possible, but even so, more knowledge would be very helpful to understanding how to recycle, how to re-use, how to reduce. I think I personally have made much progress in the past decade, but I also feel I have miles to go.</p>	7/14/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3368	1	/policies/access-to-housing/	<p>I have several issues with the housing access: The reason that people desire to live in our city is due to the investment in local business, allowing for a very low unemployment and great job market, and the beautiful neighborhoods that have developed all over the metro area to support local nuances. If we suddenly change the nature of the neighborhoods, there is a great risk that these areas are no longer desirable. In my neighborhood, prices have been rising drastically, but it is primarily because of the amazing community & family feeling of being in a "small" area within an enormous city. Changing the housing codes to allow multi-unit dwellings with no allowance for parking (because there is NOT the transportation to facilitate this - we need to walk before we can run) and no thought to the very heart of the "neighborhood" feel is not a good solution, and I believe runs the risk of driving current, long time residents out of their neighborhoods if there are changes.</p> <p>As part of the code addresses, this is not majorly related to race. The statute says: "The more important among the adverse influential factors are the ingress of undesirable racial or nationality groups; infiltration of business or commercial uses of properties; the presence of smoke, odors, fog, heavy trafficked streets and railroads." Taking away race here - I agree with everything else. I don't want smoke, odors and heavy trafficked streets. The change to allow multi-family dwellings in areas that are primarily single family houses right now would increase the traffic because the infrastructure doesn't exist currently to eliminate cars. Even in my neighborhood, which has lots of amenities within walking distance, people will have cars because it is the great American way. We need to majorly overhaul infrastructure FIRST, throughout the city, before we change the housing laws. Please do not make these changes at this time.</p>	7/15/2018
3369	2	/policies/access-to-employment/	<p>The biggest key here is TRANSPORTATION access - in order for this plan to work to drive less individual cars on the road the transportation system needs to be thorough - reaching all areas of the city that would benefit. The current bus routes are slow - trams or trains really should be more widely accessible to the near reaches of the downtown metro area.</p>	7/15/2018
3370	3	/policies/production-and-processing/	<p>Please do not increase heavy manufacturing investment in our city. We do not need the increased smoke & pollution that unduly comes with these expansions. I understand the desire to increase opportunities for all people of the city - in order to better do this while minimizing our environmental impact for future generations is to heavily invest in education and community outreach and support. We need to ensure that all people have access to a strong education system, and the ability to thrive in our city. There are lots of jobs here paying higher than accommodation and food service - we need to give our people the means to decide for themselves where they want to work. Education education education!!! I will pay higher taxes for education!</p>	7/15/2018
3371	4	/policies/access-to-commercial-goods-and-service	<p>Please proceed here with caution. No resident should be displaced from their homes just to increase business revenues. There are options to better utilize small footprints for retailers (build up instead of out) that don't sacrifice residential homes.</p>	7/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3372	33	/policies/affordable-housing-production/	<p>Please do not approve the housing zoning at this time. I have several issues with the housing access policy as proposed: The reason that people desire to live in our city is due to the investment in local business, allowing for a very low unemployment and great job market, and the beautiful neighborhoods that have developed all over the metro area to support local nuances. If we suddenly change the nature of the neighborhoods, there is a great risk that these areas are no longer desirable. In my neighborhood home prices have been rising drastically, but it is primarily because of the amazing community & family feeling of being in a "small" area within an enormous city. Changing the housing codes to allow multi-unit dwellings with no allowance for parking (because there is currently NOT the transportation system to facilitate this - we need to walk before we can run) and no thought to the very heart of the "neighborhood" feel is not a good solution, and I believe runs the risk of driving current, long time residents out of their neighborhoods.</p> <p>As part of the old code addresses, this is not majorly related to race. The statute says: "The more important among the adverse influential factors are the ingress of undesirable racial or nationality groups; infiltration of business or commercial uses of properties; the presence of smoke, odors, fog, heavy trafficked streets and railroads." Taking away race here - I agree with everything else. I don't want smoke, odors and heavy trafficked streets. The change to allow multi-family dwellings in areas that are primarily single family houses right now would increase the traffic on roads because the infrastructure doesn't exist currently to eliminate cars. Even in my neighborhood, which has lots of amenities within walking distance, people will have cars because it is the great American way. We need to majorly overhaul infrastructure FIRST, throughout the city, before we change the housing laws.</p> <p>Owning a house is no longer a "right" to many - due to student loans, fear about the economy, wage disparities - you name it - but this has helped to fuel a desire to live in apartments in the heart of the city. I think it makes more sense to develop in the areas that are sought after for that type of dwelling than to impose it on the neighborhoods that have created a community built around their current structure.</p>	7/15/2018
			Please do not make these changes at this time.	
3373	15	/policies/transportation-and-equity/	<p>More needs to be done to create abundant mass transportation systems. The current bus system is not satisfactory compared with other large cities of Minneapolis's direction - San Francisco, New York, even Portland all have more robust systems. Please consider doing more related to subway or train than just our buses and biking. Not all workers have access to showers after a walking or biking commute, and then run the risk of losing their jobs if they're considered "unfit" for serving customers because of the physical exertion. Mass transit is definitely needed - but significantly more than what the metro currently has plans for.</p>	7/15/2018
3374	1	/policies/access-to-housing/	<p>I am opposed to unilaterally allowing up to 4 dwelling units everywhere in the city. The single family neighborhoods are a critical reason Minneapolis is a wonderful place, and it would be a shame to lose that. I support greater density as suggested in action steps a, b, c, d above, but not as noted in step e.</p>	7/15/2018
3375	2	/policies/access-to-employment/	I support this policy and these action steps.	7/15/2018
3376	3	/policies/production-and-processing/	I support this policy and these action steps.	7/15/2018
3377	76	/policies/new-parks/	The MPRB just went through a multiyear process of park visioning. Why does this need to be part of the City's plan?	7/15/2018
3378	0.1	/topics/land-use-built-form/	<p>I strongly opposed the categorization of the east side of Columbus Avenue as Interior 3. Specifically, I opposed the combining of parcels and the ability to build three story multifamily residences. Permitting these kinds of changes will significantly change the neighborhood.</p> <p>Further, the city should concentrate Corridor 6 (permitting combining of parcels and six story buildings) closer to the downtown areas. Permitting corridor 6 in the far southern reaches of Minneapolis will similarly adversely affect the character of the neighborhood.</p>	7/15/2018
3379	4	/policies/access-to-commercial-goods-and-service/	I support this policy and these action steps.	7/15/2018
3380	5	/policies/visual-quality-of-new-development/	I support this policy and these action steps.	7/15/2018
3381	49	/policies/educational-and-economic-access/	This section seems highly important yet, significantly too vague comparatively. As an MPS employee, that frightens me. Specific engagement should be done with Mps employees related to the policies that will impact us!	7/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3382	6	/policies/pedestrian-oriented-building-and-site-de	The elimination of parking options will just force people to drive to the suburbs for their shopping & service needs. This already happens and is not a good thing. Automobile use in the city must still be accommodated in some way, since the city does not yet fully work as a walking/public transit environment. I support this policy, but am concerned about the action steps that look to eliminate automobiles & parking.	7/15/2018
3383	51	/policies/healthy-pre-k-development/	As someone who studied o-5 neurological development, this section excites me. Please continue to focus on prenatal-5 development opposed to a more narrow focus on universal pre-k, an investment that has a smaller impact on child development and return on investment. Each component identified above is strong, and important. Please ensure the policies are connected - so that the most disatvantaged populations have access to a cohesive network of supports across the developmental period- a city wide approach to wrap-around services!	7/15/2018
3384	7	/policies/public-realm/	I support this policy and these action steps, but these ideas are very general, and it's hard to see how they will be implemented.	7/15/2018
3385	0.1	/topics/land-use-built-form/	I had no idea I live on a "transit corridor". I can't believe my block is supposed to be full of huge apartment buildings. I didn't move to a quiet neighborhood to have it end up looking like the North Loop!	7/15/2018
3386	20	/policies/transit/	Please improve transportation to and around North Minneapolis.	7/15/2018
3387	20	/policies/transit/	These policies seem to ignore the lack of accessibility to transportation faced by people living with special needs. I hope that this can be a four under item œœœœ stated above.	7/15/2018
3388	31	/policies/creative-workers/	This section is notably disconnected from the education and training policies. Given the Current public education deficit- in order to increase access to the arts and the creative economy to people of color- especially youth, investments must be made to support education in these areas!	7/15/2018
3389	83	/policies/people-with-disabilities/	I just left a comment in the transportation section about the lack of language related to access to transportation for people with disabilities- please ensure the policies have language about this topic consistently- even if it makes things slightly duplicative!	7/15/2018
3390	63	/policies/food-access/	How do farmers market fit into this equation? They are a very vibrant aspect of our community and often the most cost effect place to buy fresh, high- quality produce . While markets are popping up in north- the south side has notably more neighborhood markets. Consider adding language to address this in order to address food deserts!	7/15/2018
3391	86	/policies/healthy-food-in-institutions/	Continue to support investments related to feeding students during the summer and other periods when school is not in session. Consider that in the current political climate families may not sign up for resources provided by the city (ie free/ reduced lunch, Wic, etc.). Consider how policies can include language to safe fairs community members who seek out these services!	7/15/2018
3392	85	/policies/access-to-health-social-and-emergency-s	Partner with MPS to invest in full -service community schools!	7/15/2018
3393	0.1	/topics/land-use-built-form/	I just bought my 1937-built home in a quiet neighborhood off Nicollet Ave and put my life savings into redoing electrical, building retaining walls, etc. It is heartbreaking to see that my property value will plummet because it is a proposed zone 3, smack dab next to a 6. Is anyone thinking about the little guy, in the little house, who is going to lose their life investment because of this plan? I feel sick about this. The big developers will move in with the 6 story apartments and I am likely to be in the shade, with a property worth nothing, and be forced out. I am not a racist and am not against moving forward with an integrated Minneapolis, but this plan is bulldozing a lot of people like me. Rethink it.	7/15/2018
3394	1	/policies/access-to-housing/	1e Hereœœœœ's an example of what is happening in our neighborhood. 1. 5251 Humboldt Ave S, purchased by HTI Investments LLC on 7/7/2016 for \$210,000. House was major remodeled. It sold for \$736,000. 2. 5257 Knox Ave S, purchased by Groundup Development LLC on 4/14/17 for \$265,000. House was torn down and a new house was built. It sold for \$726,500. 3. 5300 Knox Ave S, purchased by GP Construction LLC on 6/21/17 for \$240,000. House was major remodeled. It is for sale for \$649,900. 4. 5208 Knox Ave S, purchased by Er Properties LLC on 8/5/2014 for \$228,000. House was torn down and a new house was built. It sold for \$828,000. How does this create more affordable homes??? It doesn't. It's for developer's profits only.	7/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3395	1 /policies/access-to-housing/	<p>The 2040 plan will destroy existing urban forests as well as entire neighborhoods. It is difficult to comprehend how Minneapolis officials can consider it progress to destroy massive trees and call it progress. These old trees cannot simply be replanted - they are huge and working daily to provide clean air, shade and glorious beauty in our neighborhoods. The ridiculous size and scale of these proposals will not only bulldoze neighborhoods but also most every tree in sight. The cities drawings even show all the trees gone and new construction standing on bare ground. Forward thinking you are not - destroyers of old forests for profit, you will be. This plan is not green or sensitive to the existing beauty of our city. Mentioning parks people can go to, is frankly stupid - will you bulldoze more homes and trees to make parks that can never replace the destroyed urban forest. Ps there are very few parks filled with all trees.</p> <p>Garbage will be overwhelming if this short sited plan is approved. Single family lots with oversized 4 unit buildings filling the entire lot(trees gone)and 12 garage dumpsters per city lot, is not a plan. We will all be driven out by the stench of rotting food and garbage. Given the scale of these units, where would they put the garbage cans? in the street, treeless fronts of the building, or filling the alleys? To much Garbage will be a public health problem in neighborhoods where single family lots will be made to accommodate excessive numbers of people! Multiple family dwellings should remain at current levels and as a different zoning in established neighborhoods.</p> <p>No parking is required. What an incredible and self interested change of thinking for the city! Over build the neighborhoods, people will have cars,and then say parking is an optional part for the builder - who will help ruin the neighborhoods for profit, while the city collects taxes/fees. It will not be safe for families to walk, or for anyone to ride a bike in a neighborhood as streets will be filled with drivers looking for someplace to park. Currently most people in my neighborhood have 2 cars per single family home, however a multi generational family on the block has 8 cars. Most of these cars are on the street. Your proposed 4 unit building with no parking on a city lot could have anywhere from 8 to 32 cars with no place to put them but the street. 32 cars would take up the entire side of the block. The no off street parking requirements is just another insane piece of the city plan.</p> <p>The density represented by city maps and and city descriptions will not free Minneapolis it will destroy it. High density 4 unit and 4 or more story buildings do not belong in existing and functioning neighborhoods. Maybe you don't care but people are already talking about getting out of Minneapolis. I have not spoken to anyone who wants to live next to a 4 unit or 4 story building. Families have invested effort, time and money to make our homes places we can feel safe and happy in our neighborhoods. The 2040 plan is going to erase that idea, while calling it forward thinking. Forward thinking would be finding distressed areas and making them wonderful much like the green way projects on Bryant and surrounding streets off Lyndale. There are plenty of other places throughout the city, which could be improved with higher density housing - with appropriate parking included. Leave neighborhoods alone.</p>	7/15/2018
3396	92 /policies/identify-and-evaluate-historic-resources/	<p>The best cities in the world are very strict when it comes to protecting their historic neighborhoods. Please be sure to keep the remaining fragile Victorian homes and neighborhoods from unscrupulous developers and encourage proper maintenance via tax incentives. Please be sure to check out California's "Mills Act". It is very effective. Thank you.</p>	7/15/2018
3397	0.2 /small-area-plans/	<p>The over all look and feel of these small area plans would be greatly enhanced if more design guidelines were utilized. Surrounding buildings should be considered before allowing a new strange, odd or cheap building to go up that does not at all fit the rest of the street scape.</p>	7/15/2018
3398	33 /policies/affordable-housing-production/	<p>Affordable housing is the most important issue facing Minneapolis. You can't gentrify all the neighborhoods and push out all the low income people of color.</p>	7/15/2018
3399	2 /policies/access-to-employment/	<p>Allowing small storefronts in neighborhood interiors would provide the most accessible jobs of all, people could walk to their jobs, or live above them.</p>	7/15/2018
3400	63 /policies/food-access/	<p>Allowing small storefronts in neighborhood interiors would help alleviate food deserts by allowing small neighborhood grocers to serve people without the need for buses or cars.</p>	7/15/2018
3401	18 /policies/walking/	<p>Allowing small storefronts in neighborhood interiors would promote walking over less sustainable forms of transportation.</p>	7/15/2018
3402	19 /policies/bicycling/	<p>Allowing small storefronts in neighborhood interiors would promote bicycling over less sustainable forms of transportation.</p>	7/15/2018
3403	64 /policies/food-businesses/	<p>Allowing small storefronts in neighborhood interiors would promote a broader variety of entrepreneurs and grocer business models in a way that promotes the city's other goals.</p>	7/15/2018
3404	4 /policies/access-to-commercial-goods-and-service/	<p>Allowing small storefronts in neighborhood interiors would improve access to goods and services via walking and biking</p>	7/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3405	82	/policies/aging/	Allowing small storefronts in neighborhood interiors would facilitate aging in place because it would reduce the need to drive to obtain necessities.	7/15/2018
3406	81	/policies/social-connectedness/	Allowing small storefronts in neighborhood interiors would expand and promote opportunities for all residents to connect socially and participate fully in the vitality of their community by reducing the need for them to travel out of their neighborhood or city to obtain necessities, and they would shop with and encounter their neighbors more regularly.	7/15/2018
3407	1	/policies/access-to-housing/	While I support density and affordable housing I do not support the notion to allow 4 plexes to be built in neighborhoods that are primarily single family homes. These traditional neighborhoods are a great asset to our livable city and need to be protected. Do not move ahead with this notion! Multiple family homes need to be built on larger plots of land, not our small 40x140 city lots. Near to transit stations and bus routes yes. Middle block of single family homes, no.	7/15/2018
3408	0.1	/topics/land-use-built-form/	<p>I live in the Seward Neighborhood, a neighborhood that currently has a combination of multi-unit housing and single-family homes. We are being asked to take on an extra level of density that is not being proposed for those people that live in the more affluent South and Southwest areas of town. I think that transportation from those areas of town should be improved and the density there should be increased proportionately. I don't feel that we should increase our density proportionately MORE than those living farther out. We do not have the availability of as much green space as those people who live around the lakes, so we appreciate what we have. I'm especially concerned about the significant increase in density along the greenway, which is part of our greenspace and natural beauty. I agree that there should be more density in our neighborhood and agree that we can absorb 3-4 story apartments, but not 6 story apartments! We are living close to high rises on Franklin and that should give us "points" for density. I feel that the vacant lots should be developed in our area and some of the dilapidated housing should be updated. I also agree in increasing the density along Lake street and Franklin.</p> <p>I appreciate the need to house those residents that are homeless and underhoused. Right now, we have people living in RV's on our streets in Seward and that needs to stop. Do they allow that in SW Minneapolis? I believe we can take our fair share of housing but only our fair share. How does SW Minneapolis do for affordable housing?</p> <p>One big concern for me since I work with the elderly is the lack of thought related to housing the elderly from the city. Are there plans for assisted livings/co-ops for people from the city that don't want to move to the suburbs when they age? Becketwood is in our area but most people can't afford that. Making housing for those people that are aging out of single family homes would help alleviate some of the housing issues in the city.</p> <p>As an aside, we need to get the Semis off our streets in our neighborhood. That is not a proper use of our streets in Seward. If people need a place to park their semi's, it needs to be off street!</p> <p>Thanks for allowing the comments. I appreciate thoughtful planning.</p> <p>Sincerely, Tina Martin 2401 East 32nd Street Seward 612-388-8181</p>	7/15/2018
3409	6	/policies/pedestrian-oriented-building-and-site-de	Do not eliminate off-street parking minimums anywhere in the city. That is a horrible idea. If some developers want to eliminate them for specific projects, and if those developments are in parts of the city where the neighborhood deems that it can absorb more on-street parking, demand concessions from those developers in return.	7/15/2018
3410	78	/policies/park-design-and-programming/	Skateboarding is an equity activity that has a low barrier to entry. Support MPRB partner cityofskate.org efforts to fund and build 20+ quality and unique skateparks, that are site specific areas for recreation and social connecting. The City of Minneapolis should encouraged skateboarding throughout the cities public realm vs. spending on defensive architecture "Skate Stoppers". Skateboarders make public spaces vibrant.	7/15/2018
3411	10	/policies/street-grid/	Embrace skateboarding.	7/15/2018
			What does d. mean, about vacations?	7/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3412	7	/policies/public-realm/	Do not "skate stop" skateboarding in the public realm. Use benches, rails, steps, ramps, and spaces as skateable" skateboard spots. "SkateSpots" would allow for creative objects, some unique and some ordinary to be used by the skateboard community. It's OK if our whole city is a skatepark, it is called "Street Skateboarding and it is a Men's and Women's Olympic sport. Work with Minneapolis own cityofskate.org to make Minneapolis a skateable, active, creative and notable city for skateboarding. We have been lucky enough to host X Games 2017-2020, where are we going with skateboarding and action sports now and after 2020. Seize the opportunity to support the longstanding Minneapolis skateboard scene and culture by investing a skateable city.	7/15/2018
3413	78	/policies/park-design-and-programming/	Support easily accessible sports and activities like soccer, basketball, and skateboarding. These activities also do not require programming costs, they are often self directed activities. Fund, build, and maintain quality facilities.	7/15/2018
3414	1	/policies/access-to-housing/	e. This change is too drastic for the areas farthest from downtown. Even more so given the plan to eliminate requirements for off-street parking. And if a developer voluntarily wants to offer a 4-plex with parking, where would the 4-car garage go on a normal sized neighborhood lot?	7/15/2018
3415	34	/policies/affordable-housing-preservation/	These are not action steps, they are hopes.	7/15/2018
3416	31	/policies/creative-workers/	Noble goals, but I see nothing specific in these "action steps." These are aspirations.	7/15/2018
3417	0.2	/small-area-plans/	I see that there is no small area plan for Kenwood, Lowry Hill, or East Isles. Is that because you what our reaction will be to you plans. Is that because you know what our answer will be and you don't care? We who live here oppose this, especially those of us who have worked and invested in this area for over thirty years.	7/15/2018
3418	0.1	/topics/land-use-built-form/	I recommend not splitting zoning between opposite sides of a street, particularly interior neighborhood streets. For example, Holmes between 31st and 36th is split as Interior 2 on the west side and Interior 3 on the east side. I recommend having both sides as Interior 2, stepping up over the alleys to Corridor 4.	7/15/2018
3419	7	/policies/public-realm/	Expand discussion of integration public art and public realm to include all aspects and features of the public realm, including sidewalks (e.g., sidewalk poetry), street signs, streets themselves, stormwater infrastructure, and much else.	7/15/2018
3420	13	/policies/landscaping/	The plan should encourage the city to develop and adopt a plant palette that can adapt to our change climate. This policy should be aligned with Policies 73/74 about stormwater and encourage the use of landscaping as part of surface stormwater features, to stack the functions of required landscaping and required stormwater management.	7/15/2018
3421	73	/policies/stormwater-management/	Policy 73/74: Stormwater. The City should move to adopt the Minimal Impact Design Standards (MIDS) as formulated by the MPCA and adopted by many jurisdictions, including the Bassett Creek, Minnehaha Creek, and Mississippi watershed organizations. Policy 73/74: Stormwater. The policy should encourage surface stormwater management practices instead of underground stormwater management practices as underground systems are not resilient and are rarely adequately maintained, and do not contribute to the public realm. Policy 73/74: Stormwater. This policy should encourage the dual use of surface stormwater management practices as a way to expand, complement, and enhance the public realm, to effectively create privately-owned public spaces. Policy 73/74: Stormwater. The City should adopt a Green (Living) Streets policy to complement the Complete Streets policy, as the Cities of Edina and Maplewood have.	7/15/2018
3422	18	/policies/walking/	Policy 18/83: These policies should promote enforcement of effective snow removal and the elimination of sidewalk obstructions as a basic disability rights issue.	7/15/2018
3423	83	/policies/people-with-disabilities/	Policy 18/83: These policies should promote enforcement of effective snow removal and the elimination of sidewalk obstructions as a basic disability rights issue.	7/15/2018
3424	0.1	/topics/land-use-built-form/	I very much support (with the minor exception of a separate specific comment I left) the Mpls 2040 proposed zoning plan. We need more flexibility for housing types and more housing in Mpls.	7/15/2018
3425	35	/policies/innovative-housing-types/	The innovative housing plan should be applied to areas that need development, not to historical areas that are currently an important asset of the city. This benefits developers only.	7/15/2018
3426	33	/policies/affordable-housing-production/	We don't need to put multi-unit housing in historical areas that are important to the cities livability. Put them in transitional areas that have the potential to become exciting new centers of activity.	7/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3427	1	/policies/access-to-housing/	We oppose the 2040 plan and the "upzoning" of Mpls. We hope you are truly listening to feedback and not just requesting it and will do what you want in the end. We see this as a deal for the developers and NOT low income people. We do not want fourplexes built on almost any residential lot in the city of Mpls. We do not want higher density all across this city. We have houses in Mpls. that are wonderful homes for many families starting out. A teardown cost money, building new costs money. The investor owned fourplexes will be more expensive than the torn down houses. Most people- 70-80% of "Millenials" say they want to own a home of their own some day. We don't want towers of 15 to 20 story building in many parts of the city like some horrifying science fiction movie. These micro apartment buildings being built with 506-511 sq. ft. studios renting for \$1278 are an example of how it benefits the developer and not the average person or family, and certainly not low or even middle income people. We would like to remind you that in the 1950's some self-serving developers convinced the city leaders to remove or pave over the street car tracks. We are now spending billions attempting to provide more efficient mass transit. City leader were led down a primrose path years ago by these self-serving charlatans. Let's not let it happen again! Dudley Martineau-Mishek and Charlie Mishek, residents of Mpls.	7/15/2018
3428	23	/policies/coordinated-development-strategy/	"Use data and objective criteria to identify geographic areas most in need of reinvestment and where a coordinated approach would result in achieving Minneapolis 2040 goals." This sounds sensible, but seems to be in contrast to the map showing every city block re-zonable to 4-plexes, 6-plexes and beyond. I strongly disagree with the blanket invest-everywhere/develop-anywhere approach that i see elsewhere in this project. I think doing a blanket approach will kill our urban forest, congest our city streets, and harm communities. Do it strategically and make sure the outcome supports the goals.	7/15/2018
3429	0.1	/topics/land-use-built-form/	Eliminate Interior 1, bump everything up one level.	7/15/2018
3430	60	/policies/intrinsic-value-of-properties/	This is an area where I think the plan really falls short. I live in the King's Highway area, and I can't believe you are thinking about allowing multiunit housing in an area that is of historical significance. Our home was designed by Harry Wild Jones and built and lived in by William Hewitt, both important figures in Minneapolis history. These areas are a cultural resource for the community. Many people walk through this area on the way to Lake Harriet, and people drive from all over the city to take advantage of this resource. You have found a perfect way to drive homeowners out to the suburbs. The only people to gain are the housing developers.	7/15/2018
3431	1	/policies/access-to-housing/	"In neighborhood interiors farthest from downtown that today contain primarily single-family homes, achieve greater housing supply and diversity by allowing small-scale residential structures on traditional size city lots with up to four dwelling units, including single family, duplex, 3-unit, 4-unit, and accessory dwelling unit building types." 4 units on traditional size city lots is too much if the goal is to keep the character and community of the neighborhoods far from downtown. Similarly, increasing that density level on transit lines (other than the large current ones of hennepin, lyndale & france) to 6-units and more in those neighborhoods would destroy our urban forest canopy and congest roads and - at least in SW minneapolis - contribute to further gentrification and economic segregation, as the cost of property/development supports expensive rents, not affordable ones. It's counterproductive to your goals and would be terrible for those neighborhoods. Furthermore, Bryant, Xerxes, Penn, 44th street etc are not major arteries- they are small residential streets - and should not be treated as such just because buses conveniently serve them. Thank you for your serious consideration of this comment.	7/15/2018
3432	78	/policies/park-design-and-programming/	There are areas of the city, such as the Kings Highway area, that are important adjuncts to the park system, and you risk permanent damage to these areas by allowing multi-unit housing or allowing 4-story development. This damage cannot be easily undone.	7/15/2018
3433	92	/policies/identify-and-evaluate-historic-resources/	If you are truly interested in historic preservation, you won't allow multi-unit housing and 4 story development in areas with a high concentration of historic homes, such as the King's Highway area.	7/15/2018
3434	35	/policies/innovative-housing-types/	Single room occupancy units and cooperative housing sound like solutions to existing obstacles that I hear about from friends and neighbors. Fabulous idea! Part B acknowledges that barriers have been erected. To avoid creation of new barriers, I would like to see Part A changed to, "Expand knowledge of emerging housing industry trends and conduct community education about those benefits."	7/15/2018
3435	52	/policies/human-capital-and-a-trained-workforce/	I don't see anything which addresses the main driver of many of these issues: the implosion of black families associated with the absence of fathers. Cultural issues have doomed many of these goals. While racism is a factor, black culture is an independent factor. It is important to address this without denigrating individuals.	7/15/2018
3436	93	/policies/stewarding-historic-properties/	Help preserve historic areas by not allowing multi-unit housing in areas that are of historic significance.	7/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3437	1	/policies/access-to-housing/	Perhaps this is addressed elsewhere. The rationale provided here for multi-family housing near public transit is to reduce automobile traffic, so could the city also consider strategies to bring more services to neighborhoods? I'd walk to the grocery store, walk to get my dry cleaning, walk to coffee shops and restaurants if there was more available in my neighborhood (that is primarily single family homes).	7/15/2018
3438	40	/policies/homelessness/	I work for Minneapolis Public Schools and am watching for strategies that promote city/school collaboration with homeless students. MPS currently busses students that are homeless to their last school (to promote consistency.) That is good. Better would be financial and emotional support for families to stay in their homes before they are evicted. This stability would be best. How could we prioritize and specialize support for families with school-age children to avoid evictions?	7/15/2018
3439	41	/policies/tenant-protections/	Action Step F is critical. The livability for all of us in the neighborhood increases when property is well maintained. Tenants need to be able to both ask for what they need and to be held responsible for stewardship of resources. I'd be interested to see the research on how applying incentives for maintaining property decreased costs to landlords.	7/15/2018
3440	47	/policies/housing-maintenance/	Action step D is important. I would be interested if there is research that shows how incentives for maintaining property decreases the costs for landlords. Homeowners maintain their property out of not just pride, but for financial reasons. Shouldn't renters also financially benefit if they help maintain property for landlords?	7/15/2018
3441	49	/policies/educational-and-economic-access/	I work for Minneapolis Public Schools so I'm interested in Action Step c. Collaboration is good, but primarily, I'd like to see the city of Minneapolis focus on services and opportunities for students outside of school. My students need wrap around support that a school district along cannot manage. More access to park and rec for all students. More access to care for children before and after school to support working parents. More access to job training and mentoring for teens. More access to swimming lessons. (as a safety strategy and as a job skill) More services to support GED and English Language Learners in the libraries. More service learning programs in public spaces.	7/15/2018
3442	51	/policies/healthy-pre-k-development/	All fabulous. My sister is a primary care physician in Rochester, NY and creates cohorts of pregnant moms when they first come to her for care. The cohort stays together until their babies are two years old. (And often transition to other programs for toddlers or preschoolers) The families receive great medical care and parenting classes, but more importantly create a village of caregivers for our youngest citizens. The mothers help each other more than the doctor. I'd love to see something similar in Minneapolis.	7/15/2018
3443	86	/policies/healthy-food-in-institutions/	I love Action Steps C & D. Knowing how many young moms in my neighborhood who have school-age children struggle to find jobs that accommodate school schedules, could the City of Minneapolis find ways to support job programs for parents in food production? A partnership or grant to Minneapolis Public Schools to hire more parents to work in school gardens or cafeterias? A partnership with Minneapolis Park Board to hire more parents to feed kids in the park in the summer?	7/15/2018
3444	56	/policies/supporting-small-businesses/	Please allow small store fronts in mostly residential zones so that we can cultivate a small business culture, neighborhood character, and increase walk-ability for residents. It'll be great, trust me. I love you.	7/15/2018
3445	78	/policies/park-design-and-programming/	I love Minneapolis Parks and know the personality of many different parks. What I don't often see in the city, but sometimes experience when I go outside the city, is a multigenerational experience in the parks. Some parks are for teenagers because they have basketball courts. Some parks are more for toddlers because they have wading pools. Some parks are more for the adult set with softball or soccer fields. I'd like to see multi-use spaces with deeper outdoor pools, indoor spaces for adult crafts and classes, etc. Public spaces for people to come together.	7/15/2018
3446	77	/policies/park-access/	I'm bummed that none of the action steps includes safety and security, other than pedestrian crossings. At the very least, sufficient resources should be allocated for policing these spaces.	7/15/2018
3447	82	/policies/aging/	What about lowering property taxes for seniors? That alone would benefit seniors greatly. I suggest cutting current total property taxes in half for seniors living in their own homes, and not raising them as long as the house is owner occupied by the current senior citizens. There is nothing above even MENTIONING the burden of property taxes on senior citizens/retirees. This would make housing way more available for a valued portion of our community. Then, more of us can age in our communities without the necessity of moving.	7/15/2018
3448	1	/policies/access-to-housing/	I am a homeowner in the Lynnhurst neighborhood, and I support the proposed zoning changes. My neighborhood is lovely, but it saddens me how little racial and economic diversity it has. I believe that this is a correct step to work toward making Minneapolis a great place for all. I do worry that there are not clear enough guidelines for how the city will ensure that new development stays affordable--we do not want to tear down mid sized homes just to replace them with luxury condos. Looking forward to hearing more about how you will do this.	7/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3449	18	/policies/walking/	Walking can be an enjoyable pastime, and some members of my household do walk regularly for that reason. But very few city residents live close enough to their place of employment to be able to walk to work. And the nearest destination service area (grocery and pharmacy) to my household is nearly a mile away - OK for the young and/or fit, but most people aren't young/fit enough to carry three bags of groceries that distance. Nor is it reasonable to believe that ensuring no one lives more than a quarter mile from a service business can be accomplished, in large part because that many businesses, located that close to each other, cannot be profitably sustained. Or to expect residents to be willing to shop every day to keep the number and/or size of packages manageable. As positive as these action steps are, the likelihood that they will encourage more people to walk more places is very low; limited resources (and they are always limited) would be better spent on changes with a greater chance of having a significant impact.	7/15/2018
3450	81	/policies/social-connectedness/	The built environment of Minneapolis should be more like Rome than Houston, as it will be more conducive to social connectedness.	7/15/2018
3451	6	/policies/pedestrian-oriented-building-and-site-design/	The built environment of Minneapolis should be more like Rome than Houston, as it will be more conducive to Pedestrian-Oriented Building and Site Design. The city around sites need to be built to prioritize pedestrians and cyclists so there are pedestrians to justify, utilize, and experience these designs.	7/15/2018
3452	7	/policies/public-realm/	The built environment of Minneapolis should be more like Rome than Houston, as it will be more conducive to a public realm that encourages walking and supports a high-quality and distinctive built environment. This means public plazas that contain art, recreation and relaxation opportunities that encourage public recreation, are surrounded by small storefronts and housing, and connected with pedestrian friendly car-restricted/low-traffic woonerfs.	7/15/2018
3453	10	/policies/street-grid/	The built environment of Minneapolis should look more like Rome than Houston. This policy makes this impossible to achieve and should be refined. The commitment to the traditional street grid needs to be overlaid with a stronger effort to connect pedestrian friendly spaces with pedestrian-friendly connections. The city needs to more actively discourage or, ideally, prohibit car use on residential streets, using every tool at its disposal, including reduced speed limits, raised pedestrian crossings that act as natural speed bumps, narrowing streets, replacing street parking with bike infrastructure and wider sidewalks and boulevards, establishing market priced parking throughout the city, providing adequate alternatives to car travel and more.	7/15/2018
3454	19	/policies/bicycling/	Bike lanes don't cause car traffic, cars do. Every comment attributing car traffic to bicycle infrastructure is misdirection. The city needs more separated infrastructure. Separated infrastructure provides a benefit to people driving in cars, whether they realize it or not, because it means fewer cyclists that they need to share the road with. Without separated infrastructure, cyclists have a right to use the road, so they wind up participating in (and adding to) the traffic automobilists claim they want to reduce. Separated infrastructure is the only way to achieve City goals for climate, healthy population, social connectedness, and many others. People's distorted views from behind their windshields are of little value when determining how effective or useful separated infrastructure is.	7/15/2018
3455	35	/policies/innovative-housing-types/	This sounds a great idea. Let's move forward and change our policies to allow the new construction of housing other than single family homes.	7/15/2018
3456	22	/policies/downtown-transportation/	Bury the train.	7/15/2018
3457	21	/policies/freight/	Use of smaller delivery trucks should be required, not just encouraged. The city should require transfer of freight at terminals ringing the city.	7/15/2018
3458	49	/policies/educational-and-economic-access/	This is vague. HOW do you plan to take these action steps? What funding is required? What metrics will be used? What does success look like?	7/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3459	0.1	/topics/land-use-built-form/	<p>I am hopeful that the 2040 plan is more about making our city livable and promoting racial equity, but in addition, I believe the following items should be addressed: I post this in hope to expand the discussion about the Minneapolis 2040 plan; specifically to identify important gaps I see in the plan.</p> <ol style="list-style-type: none"> 1. Infrastructure. Streets, alleys, street trees, and utilities; upgrades to public infrastructure systems necessitated by development should be addressed as part of the cost of development. 2. Innovation. Allowing development at this scale should require innovations such as mini-district energy systems, storm and gray water capture and reuse, architecture that emphasizes low energy building design. 3. Triple bottom line. The calculus must consider the fiscal, social, and environmental implications of each and every development. 4. Governance and neighborhood input. The plan is silent on the role of both municipal and neighborhood input, scrutiny, and oversight. When it comes to development, checks and balances are important and worth mentioning. 	7/15/2018
3460	50	/policies/access-to-technology/	<p>What does "remove barriers" look like? How do we know when the barriers are fully removed? And who is funding this? Is there a budget?</p>	7/15/2018
3461	0.1	/topics/land-use-built-form/	<p>I am hopeful that the 2040 plan is more about making our city livable and promoting racial equity, but in addition, I believe the following items should be addressed: I post this in hope to expand the discussion about the Minneapolis 2040 plan; specifically to identify important gaps I see in the plan.</p> <ol style="list-style-type: none"> 1. 3462	6	/policies/pedestrian-oriented-building-and-site-de	<p>Please do not give much weight to comments that say the city is not currently built for "this," where "this" is one of the policies that promote and benefit sustainable modes of transportation. It's question begging. That's the very purpose of this plan, to scrutinize how the city's land use should change to be the city that *is* built to accommodate a sustainable future. Doing that entails envisioning a different city than we have today, one where those forms of transportation are viable and preferred by the city's residents.</p>	7/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3463	0.1	/topics/land-use-built-form/	<p>My name is Michelle Poeschel. I live at 2549 31st Ave S in Seward neighborhood. I am deeply concerned about having such enormous 6 story apartments potentially right across the street from my house. One problem I have is that the infrastructure here doesn't support such high density housing on these little streets. I have lived here ten years and made many attempts to fix the current traffic problem at my intersection - accidents are routine where I live. I can't hang out in my front yard because I've had cars end up on my front lawn. I can't even imagine the increased traffic and number of accidents that will happen if you put such big buildings in. There are a lot of parks in the neighborhood and kids biking and walking and I can't imagine how the current neighborhood would support such a high density proposal.</p> <p>Your proposal seems to identify the greenway as a high traffic corridor, but that is not the reality. The reality is a lot of people aren't going to be travelling on the greenway. As a single woman who bikes to work and to get around, I can't use the greenway at night because it isn't safe. I use the streets to bike at night because of how unsafe the greenway is. The irony is that you will be making the streets more unsafe by adding so much traffic to them. No single woman is biking down the greenway at night - it is not a viable transit option for many of us so it is crazy to plan for the greenway being a major traffic corridor and using that as your rationale for making such huge developments. It is a real male-centered idea. It's also unrealistic. The main way people get around is by the streets and people will be zipping through to get to the freeway like they do now, but a lot more of them.</p> <p>Further, I and many of my neighbors garden. I have put a lot and time and effort into my garden. Constructing six stories across the street from me will instantly turn my garden into a shade garden and I don't think that it is very respectful of me and my neighbors' use of our property to propose allowing such a large building.</p> <p>I also find it irritating that you don't propose these large scale developments in the wealthier parts of the Seward neighborhood towards the River. I hardly think that's a coincidence.</p> <p>I know that the city needs housing and I am happy to have more housing added to our neighborhood, but let's have it fit in and make sense. I feel like the city is putting developers making money over the people who actually live in this neighborhood.</p>	7/15/2018
3464	1	/policies/access-to-housing/	<p>The underlying premise of a tightened supply of housing is fundamentally incorrect. It isn't solely about an actual number of homes; rather, the supply of housing turnover remains exceedingly tight because of the following issues: 1) lack of eligible millennial buyers owing to too-high student debt levels; and 2) an unwillingness to sell a home (say in the case of an aging Baby Boomer) because comparable housing is not available at affordable rates as they downsize. Our household is adamantly against allowing for the "free-zoning" of fourplexes or multi-family houses on neighborhood interiors currently zoned as single-family homes. Why not "free-zone" under-utilized commercial zones for multi-family homes? People WILL move out of the city, home prices WILL drop, as will property tax values and therefore revenues. This will be the unintended consequence of the Minneapolis 2040 plan.</p>	7/15/2018
3465	20	/policies/transit/	<p>Members of my household were transit commuters (bus was our only option) for more than thirty years. In that time, our options went from express service on one bus to both downtown and to the university, to a required transfer at 35W for trips to the university, to schedule cutbacks on downtown service that eliminated both the earliest and latest runs - in short, a steady erosion in both comfort and convenience. I've also read recently that Metro Transit has been unable to fill more than fifty open positions for bus drivers. Beyond that, the state legislature has become increasingly unwilling to fund any mass transit, and Minneapolis certainly can't fund it alone. By all means, work on several fronts to attempt to improve the situation - but don't pretend that it will be anything but a long, difficult process. And don't attempt to justify immediately rezoning significant parts of the city by claiming increased availability of transit options that don't exist now, and, given the political climate, are unlikely to exist anytime soon.</p>	7/15/2018
3466	15	/policies/transportation-and-equity/	<p>In what ways has the city reached out to the community about this? Today was the first I even HEARD about this...from a neighbor. Not the city. Who is running this??? If you haven't even Followed through with reaching out and communicating with the residents of Minneapolis, how can you be trusted with this vague plan!?</p>	7/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3467	0.1	/topics/land-use-built-form/	<p>I am Kathleen Raynier and I've been the owner of my residence at 2916 E. 25th Street for three years, although I have been a visitor for the last 14 years. I love the mix of people here, and that I can get about on foot to several businesses around here and feel safe doing so.</p> <p>When I arrived here this June, two stilt-walkers were making their way along Matthews Park, with children following: what a welcome! My own grandchildren attended a day camp at Pinwheel, 2731 E. 25th St., and I even volunteered a little time there. These artists add a lot of sparkle to our community. Cafe Racer Kitchen and the Birchwood Cafe are also right on my street, convenient to me and my neighbors and guests. My neighbors and I enjoy Kings' Fair and the local Halloween Parade, which are supported by businesses and residents. I see that some businesses have been able to re-zone and that your plan includes a commercial re-zoning for 2731, the artists' space. That would be most welcome, allowing for full use and continuation of their programs and events that benefit us here in Seward and the city as a whole. As you see, I like the mix of residential and commercial, even some industrial use. But what are you thinking, in your wisdom, to propose buildings as high as six stories alongside our mainly residential neighborhoods? Many cities have allowed high rise luxury housing to tower over their most beautiful neighborhoods. Minneapolis should expand both residential and commercial spaces, but not allow that.</p>	7/15/2018
3468	0.1	/topics/land-use-built-form/	<p>The area of Sheridan Avenue South from 43rd and Upton north to Lake Bde Maka Ska has been designated as Corridor 4 by some planners in this Draft. This is wholly inconsistent with the nature of the area which is now single family housing, and wholly inconsistent with the current nature of the neighborhood and inconsistent with the carefully considered Linden Hills Small Area plan of 2013. It would permit 4-story apartment buildings along this route and do serious harm to the charm and livability of this neighborhood. The 2040 Comprehensive plan needs to remain consistent with the Linden Hills Small Area Plan. This focus growth carefully at the 43rd and Upton, and 44th and France nodes and along 44th. Linden Hills Corridor 4 and Interior 3 areas need to be contained ONLY within the areas defined in the Linden Hills Small Area Plan.</p>	7/15/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3469	0.1 /topics/land-use-built-form/	<p>Regarding the Draft 2040 plan for Minneapolis, there are several issues with the current draft that are concerning. In general, I find the plan without enough detail around how the goals will be accomplished.</p> <ol style="list-style-type: none"> 1. While the goal is to provide affordable housing, there is no clarity around how this will be accomplished with the current plan. Even if requirements are set for builders, it won't likely be equitable competition for families to compete in the purchase process with a developer. An example is the cost of housing in the new building at the corner of Sheridan and 42nd in SW Minneapolis. Definitely higher density. Definitely not affordable. 2. Decrease in owner-occupied homes: The designation of 3-4 story structures along long corridors of Bryant, Xerxes, and York, for example, where single-family housing exists today fails to address the reasons people first purchased in the neighborhood--to live in a community of single family homes or duplexes. The landscape of owner-occupied homes will diminish. Under this plan, there's likely no way a family of moderate means could afford to compete with the deep pockets of a developer when purchasing. Even today, it's there is no home available under \$300,000 in Ward 13. 3. While some may argue that this plan will increase my property value, which is part of the rezoned area, I'm not convinced. First, potential buyers wouldn't likely want to purchase a home knowing that there's potential to have a single family home dwarfed by 3- or 4-story buildings 3 sides. That leaves only developers, who will know they're the only potential buyers in the market. I'm unclear on what kind of dynamic is created should this be the case. 4. As you know, density increases vehicles, road usage, transportation, and the value of nearby properties. In the past 10 years, Uptown has become increasingly difficult to park in due to the lack of off-street parking spaces built with the mid-rise buildings that were added. Because the metropolitan area is far behind in developed public transportation, people need to have cars, so how will the need for off-street parking be addressed? Added transportation isn't going to solve the problem in the short term. The largest employer, Unitedhealthcare, is on a bus line that takes 60+ minutes to get to work vs. a 25 minute drive. Someone working there is not going to opt-into an additional hour of commutation via public transportation. 5. How will you manage the additional stormwater runoff, already a problem today? What about all the currently underfunded infrastructures? The action plans do not have any details outlined of how the goals will be accomplished. 	7/16/2018
3470	1 /policies/access-to-housing/	<p>I am opposed to and reject item e. in this policy. Those of us who have chosen to purchase single family homes in the neighborhood we live in did so for a reason. At different stages in my life I have lived in apartments, duplexes and townhouses. When I made a choice to purchase a single family home it was because I wanted the lifestyle offered by such a neighborhood. Specifically, less congestion, less traffic, less noise, etc. There are now single family homes, duplexes and townhouses in the Bryn Mawr area and it provides a good mix of housing without destroying the "neighborhood feel" (e.g. knowing the names of folks in the area, space for children to play, ability to walk/bike/run, etc in the area without being threatened by traffic). Stuffing 4-plexes into single family lots changes the environment. As a psychologist, I urge you to look at research on the effects of overcrowding - increased anger, increased interpersonal aggression and decreased happiness. In addition, there has been an increase in multi-unit dwellings in Minneapolis and these continue to be built ad nauseum. They all look alike and are creating mini downtown-like areas. None of these have created affordable, accessible housing. In fact, I would not be able to afford to live in the majority of these places - they are more costly than my home. If I or those living in my area wanted to live downtown, we would. Many residents in the areas where these buildings have gone up have been opposed and spoken out; however, city representatives do not appear to be listening.</p>	7/16/2018
3471	0.1 /topics/land-use-built-form/	<p>I live at 1042 Cedar View Drive. The proposed build form for this neighborhood is Build Form Corridor 6 and is directly adjacent to a proposed Build Form Transit 15 area which includes the proposed Bryn Mawr Transit Station. I STRONGLY feel my neighborhood should remain a Build Form Interior 2 areas as the area is so small that anything beyond this would destroy the close knit sense of commitment that the residents have to the health and well-being of the neighborhood, and each other - something that is all too easily lost when the density is increased. I STRONGLY feel the adjacent vacant lot at 1031 Madeira Ave and that area should be (remain?) a Build Form Corridor 4 area for the same reasons stated above. Thank you for your consideration.</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3472	33	/policies/affordable-housing-production/	<p>The proposed changes to the zoning regulations are just a smokescreen for GENTRIFICATION. This blanket upzoning of the entire city does not address affordable housing in a smart way. NEW DEVELOPMENT without any affordable housing provisions will only DISPLACE POOR PEOPLE and drive them out of the city. Increasing housing supply with new luxury condos and apartments will turn this city into a LESS VIBRANT and LESS DIVERSE city. Look how San Francisco and Seattle have become playgrounds for the wealthy. Look at our own city and see how the new housing in UPTOWN is destroying its once quirky individuality. See how the new high rises near St. Anthony Main and Northeast have raised rents for both businesses and residents.</p> <p>STOP DISPLACING POOR PEOPLE BY FEEDING DEVELOPERS! If the city truly wants to help people with affordable housing, then there needs to be more investment in organizations like the City of Lakes Community Land Trust. HELP people buy homes. Don't assume that poor people want to live in some apartment on a busy street. These are people with children! They have a need and a desire for a front yard, back yard, and (shockingly) a CAR to transport themselves and their children. There is a REASON why the US government and tax code promote home ownership. It promotes pride, investment, and stability for communities.</p> <p>BE SMART about the current zoning regulations. If owners of current multi-plexes want to tear down, please let them replace it with another multi-plex. Don't handcuff them into building a single family house. How easy is this?</p> <p>ENCOURAGE and SUPPORT current multi-plex owners by offering property tax abatements for providing low income housing.</p> <p>DO NOT LET THE MARKET solve the problem of affordable housing. Market rates only INCREASE rents and taxes for everybody else. "We're increasing the value of the neighborhood and your property," developers always say. But who's selling their house? I want to stay in my house and not pay increased property taxes for the big McMansion. Whether it is a McMansion or a luxury six-plex, only the developers win.</p> <p>PLEASE LISTEN TO THE PEOPLE OF MINNEAPOLIS! WE ARE PAYING ATTENTION AND WE ARE UPSET. BE SMART ABOUT CHANGES AND IMPLEMENT THEM SLOWLY. REMEMBER HOW WE LOST THE GATEWAY DISTRICT. REMEMBER HOW THE HIGHWAYS DIVIDED NEIGHBORHOODS. KEEP MINNEAPOLIS GREEN.</p>	7/16/2018
3473	1	/policies/access-to-housing/	<p>I have read the Mayor being quoted in the newspaper as saying "you should be able to live in a neighborhood of your choosing." REALLY? What if I can't afford it? Should I still be able to live there? What does this mean? And what are his intentions? When I hear a quote like that, I am very skeptical about the intentions of these policies.</p> <p>Defenders of the 2040 plan cite all of these housing policies of the past as having drawn up the city as it is today...but trying to reverse the results by reversing the current housing policy will not have the same tit-for-tat effect. It is NAIVE to believe that upzoning will create equity throughout our city and release us from our past wrongs.</p> <p>Upzoning in today's era will result in MORE DISPARITY. These new housing units are going to be offered at MARKET RATES and there are no affordable housing provisions in them. This is gentrification and it will push the very same disadvantaged people that these policies purport to help out of the city.</p> <p>The 2040 plan is actually RACIST and its unintended result will be to displace poor people further from the city. Minneapolis will become a playground for the rich. Please go back to the drawing table and re-work the 2040 plan.</p>	7/16/2018
3474	3	/policies/production-and-processing/	<p>Have a regulation the city hire employees that live in the city. Have incentives that private employers hire employees that live in the city.</p>	7/16/2018
3475	1	/policies/access-to-housing/	<p>I'm SO happy that the city is taking steps to increase housing density and create more affordable housing! I love living in the Twin Cities, but the current cost of housing is disproportionately high. The shortage of both rentals and homes for sale really puts renters and buyers in a vulnerable, challenging position. I feel like I've had to scramble for housing multiple times since moving here, and I'm lucky enough to have disposable income. We need more homes! We also need stronger protections for renters, and more protection of naturally-occurring affordable housing.</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3476	88	/policies/public-services-policy/	<p>It is so IRONIC that one of the goals is to increase civic participation. In what way was this 2040 plan communicated to residents? There are some MAJOR changes that affect residents and we have to go on the internet to navigate this octopus of a website? Is it in different languages? NO, then you have not engaged some of our residents. Is there a written format? NO, then you have left out a bunch of people who do not have access to the internet or are not savvy enough to navigate this crockpot of crap website.</p> <p>By the way, I am not a southwest resident who is concerned about my house being bulldozed. I am a southwest resident who is concerned that other more vulnerable areas of Minneapolis will be subject to speculation, development, and gentrification. We have seen it happen before and we are not happy about it, even if it's not in our neighborhood.</p> <p>Also, it is IRONIC that you cite the concerns of Minneapolis' residents by saying about half of them don't think they can influence the decisions at the city level. That's because that is TRUE! Neighbors have invested much time into small area plans and have them ignored by the city. Yes, that happened to Linden Hills. So when it came time for the Fulton neighborhood to create one, the Linden Hills group told Fulton, "Don't waste your time." When the neighbors of 36th and Bryant came together to protest the variances, they were shut out!</p> <p>The 2040 housing plan has very nice and pretty guidelines for this new multi-plex housing, but this does not stop some unelected committee from handing out variances to developers. We residents are not stupid. Developers help your campaigns. Developers are on planning committees. Developers are talking to you during the day. Developers are telling you they want to form a "partnership" to help the city. For once, why won't the city partner up with its own residents? Why not listen to us?</p> <p>Personally, my neighbors and I are deeply pessimistic. This is a done deal. These public comments will not be read. The petitions delivered to City Hall will not be considered. The community meetings were held for residents to vent but Heather Worthington was not open to listening. She was condescending, brushed off valid concerns, and at one point in a recent meeting, refused to answer any more questions about the upzoning rules. In fact, she said rather dismissively that the four-plex thing probably wouldn't go through. And then, no explanation for that. How about some respect for the neighbors? How about understanding the actual rationale for our anger?</p> <p>The truth is, it's not about our property values or more neighbors. We are angry because we know that the city isn't listening to us. We are angry because our voices don't matter. This is true if you are a resident of North Minneapolis or Southwest Minneapolis. OUR MAYOR AND CITY COUNCIL ARE NOT LISTENING TO US!</p>	7/16/2018
3477	2	/policies/access-to-employment/	<p>I support having more offices/workplaces connected to public transit! I consider it a great perk of a potential workplace if it's well-connected to bus/rail lines, and I know a lot of people who feel the same way. Nobody wants to be stuck in their car in traffic every morning and every evening, and you don't have to live that way if you can commute with public transit!</p>	7/16/2018
3478	0.1	/topics/land-use-built-form/	<p>This is too much. The communities of Southwest Minneapolis are attractive because of their relative quiet and unique, classic architecture. The use of major corridors for multi-family housing seems reasonable, but there is no reason to spread that to the surrounding, low-density residential blocks. Also, much of the development that is currently underway is poorly designed, cheap looking, and does not fit with the spirit of the community. Take the new apartment building on the 3500 block of Dupont Avenue as an example. A classic brick apartment building was replaced by a narrow, tall structure with clashing exterior cladding. We see this everywhere around town, and it is a mind-boggling development after all the fights around "monster houses" of a few years ago.</p>	7/16/2018
3479	36	/policies/innovative-housing-strategies/	<p>I'm extremely supportive of efforts to preserve and expand affordable housing! In my neighborhood, small \$200k-\$300k houses are increasingly being replaced by \$500k+ houses. These expensive houses are the same size as a triplex or a fourplex, but they only house one family, and almost no one can afford them. I definitely can't, and I'm worried that I won't be able to ever buy a house here when so much of the affordable housing stock is being replaced by mega-homes. :(</p>	7/16/2018
3480	35	/policies/innovative-housing-types/	<p>I would LOVE to see the city allow and encourage more co-housing options and developments (e.g. baugruppen in Germany). This would be a truly innovative practice, and I think it could be of huge interest to lots of different demographic groups, including young families, single adults, and empty-nesters. As a bonus, that type of housing can foster more social cohesion and civic identity than typical single-family housing. Let's lead the way, Minneapolis!</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3481	37	/policies/mixed-income-housing/	Adding more density to the already congested south Minneapolis areas is not the solution. This is a cop out - that developers will happily exploit, leading to a poorer quality of life and livability for all.	7/16/2018
3482	19	/policies/bicycling/	I'm very supportive of the city improving and expanding bike infrastructure! I love bicycling for commuting and errands, and I think Minneapolis still has so much unrealized potential as a bike-friendly city. Not everyone is able (or will choose) to bike for purpose or pleasure, but many people will if they feel safe doing so, and every car trip that's replaced with a bike trip cuts down on traffic, parking, and greenhouse gases. That's a win for everyone, including drivers.	7/16/2018
3483	0.1	/topics/land-use-built-form/	<p>I am opposed to the plan to reduce zoning restrictions and limits on building along the traffic corridors in the 13th ward. I am very concerned about how this would affect our neighborhood of Lynnhurst. My family and my neighbors selected to live in this neighborhood as it is primarily single family historic homes and we enjoy the character of our current neighborhood. It is also hard to imagine how current streets would handle traffic and other infrastructure necessary for suggested densities of 2-4 fold what is currently residing along these routes.</p> <p>Two of the many audacious policies included in the 2040 plan are to maintain connected people and to maintain the history and culture of our neighborhoods. Our neighborhood is already very connected and content in its being. I cannot see how exposing our neighborhood to desires of developers profit seeking will improve our quality of life.</p>	7/16/2018
3484	19	/policies/bicycling/	The mpls greenway is the most extraordinary asset the city has facilitated in the last 15 years. Revolutionary. Connects neighborhoods and people across the city. Do more!	7/16/2018
3485	4	/policies/access-to-commercial-goods-and-service	It is not reasonable to expect that there will be consistent and economical retail available within walking distance in all high density areas even if space is made available. Small business cannot always compete with large retail and consumers may not afford or utilize small retailers.	7/16/2018
3486	8	/policies/public-safety-through-environmental-de	I'm glad Minneapolis is working to get more "eyes on the street"! I support this. I hate how desolate certain areas of the city (especially downtown) can feel after 5 pm. I'm also really sick of being harassed, threatened and catcalled by random men, which happens frequently	7/16/2018
3487	4	/policies/access-to-commercial-goods-and-service	There is an assumption here that no one uses eco friendly vehicles. That assumption is wrong.	7/16/2018
3488	35	/policies/innovative-housing-types/	The goals are laudable. But some of the proposed policies are misguided. Do not add more density to an insanely crowded south Minneapolis. Facilitate cooperative housing, senior housing and tiny house communities. Create new residential living and amenities along the river in north mpls and along light rail.	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			<p>Fourplexes on every city lot? That is ridiculous. What is the size of a city lot? Well, that depends where you live! Some people talk about how there are these single family homes on HUGE lots. That's true. There are certainly some of those. And then there are many of us who live in small 1200-2000 square foot homes in SMALL city lots. Our windows basically look into our neighbors. So when I express outrage, it is because I live on a small city lot. And I'm sure somebody else on the other side of the fence thinks that I am living on one of those HUGE lots with space for a six-plex. This blanket upzoning doesn't work. The blanket single family home rule doesn't work either. CUSTOMIZE the zoning laws. If there is a current duplex in a neighborhood zoned for single family homes, allow that property to be torn down and re-built as a duplex.</p> <p>I know there are some lovely historic four-plexes and six-plexes that currently exist in harmony with single family homes. Yes, we know. For many of the residents here, we have lived in them when we were younger renters. Those are the older complexes. NEW LUXURY UNITS will never be that small, because everyone wants tall, loft-like ceilings, large kitchens, large bathrooms, large closets, and large living spaces. THAT is the concern! The guidelines for new construction are just a worthless piece of crapadoodle. Have you ever heard about VARIANCES? Developers have. As long as the developers requests are in line with a city's long-range goals, the variance is granted! Push the height up, decrease the setbacks...no problem.</p> <p>Please do not be so disrespectful to the residents of Minneapolis by assuming that we are racist or exclusionary when we voice our objections to the 2040 plan. We see this plan as a smokescreen for developers to make money and to push poor people out of the city. It has happened already in Northeast. We are not obstacles to change or progress. We are just highly skeptical of plans that don't have the community's long-term interest in mind. Minneapolis governance hasn't given residents much to trust (police shootings of its own innocent residents, the use of north Minnapolis as political bait, the persistent divide between the city's black residents and police) and it sure hasn't listened to us.</p>	7/16/2018
3489	0.1	/topics/land-use-built-form/	In fact, I just want to know...will anybody read this at all? Or will the yay or nay votes be calculated by unpaid interns?	
3490	19	/policies/bicycling/	It is time to charge a licensing fee for bikes to pay for the development and maintenance of bikeways and services.	7/16/2018
3491	49	/policies/educational-and-economic-access/	<p>One of the most impactful ways that a city can help a struggling worker is to PROVIDE CHILD CARE. People cannot go to school or work without quality child care.</p> <p>FREE CHILD CARE. FREE CHILD CARE. FREE CHILD CARE.</p> <p>Level the playing field. FREE CHILD CARE.</p>	7/16/2018
3492	18	/policies/walking/	There needs to be something added related to individuals with disabilities and limited mobility. None of the points presented in this plan facilitates individuals with disabilities and their ability or lack of ability to get around the city. How does Metro Mobility fit into this plan?	7/16/2018
3493	51	/policies/healthy-pre-k-development/	<p>FREE CHILD CARE! FREE CHILD CARE! FREE CHILD CARE!</p> <p>Allows parents to pursue educational opportunities and work. Do you know that many people with children cannot work because they have no access to dependable and quality child care?</p> <p>FREE CHILD CARE! FREE CHILD CARE! FREE CHILD CARE!</p> <p>Create a child care co-op! FREE CHILD CARE!</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3494	20	/policies/transit/	<p>It seems that NE Minneapolis, particularly the area between Johnson and Stinson have been left out of any plans to improve transit options. There needs to be some Rapid Transit options that run North/South in this area and then run west into downtown.</p> <p>Another thought is that it would be very advantageous to convert the rail that Crosses 37th at Stinson and heads SW to a light rail line. While Light rail has been extended to all the other major directions of the city, again, NE has been left out of this amazing option.</p> <p>A light rail line along this existing corridor would allow for transit options into the North and Northeast Suburbs, as well as give some options for people of NE Minneapolis. While traffic is not a terrible problem up here, as people age out of this community, it will be the next traffic nightmare if good transit options are not developed.</p> <p>It will not be enough to add a trolley on central as this would not be a helpful option for most of NE. Options further E are necessary.</p>	7/16/2018
3495	63	/policies/food-access/	<p>Serve high quality healthy food in the schools! This is where it begins. Why in the world are we offering chocolate milk to children? Of what benefit is that added sugar?</p> <p>Serve high quality healthy food in government buildings! Remove pop.</p>	7/16/2018
3496	0.1	/topics/land-use-built-form/	<p>More Mixed Use in the Far NE! (Johnson/Stinson North of 30th St NE)</p> <p>Transit stations in this area as well</p>	7/16/2018
3497	70	/policies/ecology-and-habitat/	<p>Remove the locks and dams. This will add park space next to the river and create better habitat for plants and animals.</p>	7/16/2018
3498	70	/policies/ecology-and-habitat/	<p>The army corps is currently looking at removing the locks and dams. Help support the process of removing them and get a plan in place for adaptive reuse.</p>	7/16/2018
3499	34	/policies/affordable-housing-preservation/	<p>A good idea to preserve existing low cost rental units where low income families currently live, the city of Minneapolis has in interest in keeping the tax valuations low enough so that landlords don't increase the rents on these residents.</p>	7/16/2018
3500	17	/policies/complete-streets/	<p>If you are going to prioritize everything but cars, then how are you going to serve those who can't or are not comfortable bicycling, especially in winter or people with children, groceries, or disabilities. Considering how few Rapid Transit lines we have, it seems that a lot more transit would be necessary. With the sprawl that has developed over many years, how do you serve people who don't live downtown and need to get other places than along major routes?</p> <p>I grew up in Brooklyn, NY where the buses and subways work amazingly, in a very high density city, because the transit is so dense. How could you create that here.?</p> <p>I live along W28th Street, which has recently lost one lane to a bus lane. This creates a lot of traffic congestion. Why do that when the greenway is parallel to W28th, has lots of bike traffic, both directions, and I rarely see bikers on 28th?</p>	7/16/2018
3501	0.1	/topics/land-use-built-form/	<p>The city needs to work with the state of Minnesota and Mndot to design better urban highways. Highway 55 has no trees, and is extremely dangerous.</p>	7/16/2018
3502	82	/policies/aging/	<p>I think Minneapolis should also look at supporting aging in place and multigenerational living. To do this, the city needs to support accessory dwelling units, universal design, and public transit.</p>	7/16/2018
3503	0.2	/small-area-plans/	<p>There needs to be more focus on the public space at Hiawatha and lake. The highway, underpass, and target parking lot are absolutely terrible. There is no vision or larger design for the greater area.</p>	7/16/2018
3504	56	/policies/supporting-small-businesses/	<p>Really worried about "prioritizing" the opportunity creation based on people's gender and skin color. I feel very much against institutional racism in all forms. This will not be a good thing for Minneapolis.</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3505	1	/policies/access-to-housing/	<p>I am for smart increasing of density with precise zoning. What you are doing with "upzoning" basically all single-family neighborhoods to quads is creating a disastrous zoning policy that has no significant precedent, no relevant data and no analysis. It is your "hope" that this will work and all you will do is destroy many neighborhoods, especially your biggest economic engine which is southwest Mpls. The economics of this make no sense. There is quite clear data when more density is allowed on a site, it raises it's value thus removing ability for lower priced starter homes, etc. Only subsidized housing has been proven successful. This will also be random spot zoning based on what neighbor wants to "sell out". Single-family homes group together as it is desirable for the families. This has been acknowledged by your planner that this density will not create more accessible housing! Density is not a panacea! You will always be known for destroying the fabric of many neighborhoods in this city. Make decisions on data and analysis not on hope! Good intentions with bad strategy creates huge mistakes! Think of the 60's and 70's and urban renewal.</p>	7/16/2018
3506	6	/policies/pedestrian-oriented-building-and-site-de	<p>I think some of you elected people have lost touch with reality. One example is the so called bicycle initiative. 1-3 years since the costly 36th street, 26th and 28th Street half-baked plan and Surprise hardly anyone is using them!! And you people are still proud of this. We have the most bike lanes in the country but have 5-6 months of winter when only a small percent of people will EVER use them. They do not use them now even on beautiful summer days. I Drive 26th and 28th street all the time and mostly never see one bicycle! As result is car GRIDLOCK already in evenings and weekends when people are off work.</p> <p>This is the build the bike lanes and people will use them way of thinking that has been implemented. You cannot force an aging population or affluent younger folks to ever give up their cars and start walking or riding a bike anywhere if they don't want to. People do drive today and will in 2040 to their favorite restaurants, sport events, day care, and yes work, lake homes and friends and family.</p> <p>This is Minnesota folks with 5-6 months of the year of WINTER, remember 10 -15 degrees temperatures. Just because a few of you are misguided on this way of thinking of a 2040 Minneapolis does not mean it will happen or is the best direction for our city.</p> <p>The City of Minneapolis has already created gentrification by allowing 12,000 high income/rental units in South Minneapolis. Driving up rents 30-40 % in last few years alone. Reality is lower than average income folks can no longer afford to live in Minneapolis because of the 12,000 high end rental units. And you want to build more and without parking provided! Consider to stop building more units! Just maybe increased density is not the answer.</p> <p>ALL you will do with more density is create gridlock and force average Minneapolis residents to leave the city, either because of rents or property taxes they cannot afford. This is the 2040 plan already not working in 2018.</p> <p>Has as there yet been any kind of statistical data researched that tells us how many people will be willing to walk, ride an share a bike or use mass transit to get to where they want to go.</p> <p>The City Council and Mayor should take a giant step back and consider the 2040 plan on the table is maybe just a fantasy that will not work. You are already tearing down neighborhoods, creating gridlock, driving average renters and property owners out of city with this way of reckless thinking.</p> <p>If there is no available room for people to move here they will have to move somewhere else! You all have already created more damage to the residents of Minneapolis that many of you will ever know or be willing to admit. It will take strong thoughtful action to stop the fantasy and do the next right thing for our future.</p>	7/16/2018
3507	18	/policies/walking/	<p>18e. Absolutely NO narrower street widths. In SW Mpls, if cars are parked on both sides of the street, only one car can fit down the middle. It's even worse in NE Mpls. It's next to impossible to have two cars pass down the street if there are cars parked on both sides of the street. This can lead to a lot of property damage if cars hit each other. Remember, if you don't allow cars into your area by eliminating parking, narrowing street widths, etc., local businesses will lose a lot of money because no one will go there.</p>	7/16/2018

3511	88	/policies/public-services-policy/	<p>the city is lax in all areas inspections: of businesses that impact livability for impacted communities. Years of complaints go unanswered. Biz owners allowed to harass and intimidate neighbors without any repercussions from licencing</p>	7/16/2018
3512	17	/policies/complete-streets/	<p>The City will seek to accomplish the following action steps to plan, design, build, maintain, and operate the city's transportation system in a way that prioritizes walking first, followed by bicycling and transit use, and lastly motor vehicle use. (Complete Streets Policy. Adopted May 2016.)</p> <p>THIS IS ONE OF THE DUMBEST POLICIES I'VE EVER SEEN. I'M GUESSING IT CAME FROM LISA BENDER - THE PERSON WHO IS OUT FOR HERSELF AND DEVELOPERS ONLY. No one will go to an area that they can't get to. If parking isn't provided, and there's no way to drive to an area, no one will go there. This policy helps absolutely NO ONE and really HURTS local businesses.</p>	7/16/2018
3513	17	/policies/complete-streets/	<p>UPTOWN AREA. This area is very congested and difficult to drive through. I live 3 miles from this area, but never go there because there's NO PLACE TO PARK! Parking ramps are a MUST because driving around trying to find a place to park creates a lot of excess carbon emissions in the air. Businesses are losing money. No parking ramps keep people out of the Uptown area. Look to 50th and France in Edina for a solution. They have parking ramps and surface parking to accommodate all the businesses in their area. So guess what? My business goes to Edina NOT Mpls.</p> <p>No parking means less business for business.</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3514	17	/policies/complete-streets/	<p>Parking!!!!!! The majority of people who invested. Southwest Minneapolis did so because our JOBS required us to drive, haul and care for families. Southwest has become the bread basket of Minneapolis. Those of us who moved to this not so flashy and smaller square footage-home to one day maybe be lucky enough to raise a family house in 1994, are now called ELITIST!!</p> <p>Southwest neighborhoods made Minneapolis cool again!</p> <p>Our sweat equity. Our children breathed fresh air into a forgotten corner of Minneapolis.</p> <p>We did an amazing job!</p> <p>Developers are now over bidding first time home buyers on a \$350,00 home. Tearing down to build something huge that ups my taxes.</p> <p>The fourplexes can be built on any lot with NO parking. AND! Worthington has zoned our blocks for development without establishing variances!</p> <p>Jeanne, this is not about density, equality, racism. The city of Minneapolis is trying to cash in on tax dollars.</p> <p>Wake up Minneapolis!!</p> <p>Those of us who have invested in our homes.....yes my home may be the most valuable asset in my retirement PortfolioManager.....this is a complete land grab without the transit to support the density .</p> <p>I am insulted offended and angry with the 2040 language!</p> <p>Worthington lives in St. Paul. She must take light rail into Minneapolis? Right? Because a car is so economically wrong and her mortgage so high living in St. Paul? At the very least, she must be taking the city bus.</p> <p>This plan is so offensive on so many levels</p>	7/16/2018
3515	26	/policies/vision-zero/	<p>Local city officials are partly the reason we have increased bike and people accidents with cars. They coddle bicycles and pedestrians with an attitude or privilege that they do not need to follow the rules of the road if they are biking or if they are crossing streets. Bikes and pedestrians would much safer if they understood they are not privileged but are sharing the roads with cars. Retrain these people to make simple eye contact before walking or biking blindly into traffic.</p> <p>I see bicycles running into pedestrians because they ALMOST ALL do not think they need to follow the rules of the road and recklessly weave in and out of traffic.</p> <p>I see grown adults and adults with children walk into traffic because they do not understand the law "within the crosswalk", they are too privileged to be bothered with being responsible for their own actions.</p>	7/16/2018
3516	28	/policies/msp-airport/	<p>You want people to walk or bike to the airport carrying 1-3 suitcases? Have you lost your minds.</p>	7/16/2018
3517	33	/policies/affordable-housing-production/	<p>Some misguided City officials have already created gentrification through its reckless acceptance of density and 12,000 high rental units in S. Minneapolis. Driving up rents 30-40% in a few years.</p> <p>Poor and middle class renters and property owners are/will be driven out of the City.</p> <p>How are you ever going to get private money to invest in construction that does not make them the highest profit? Someone is going to build rentals and offer less than the already out of reach market rents the city has created?</p>	7/16/2018
3518	2	/policies/access-to-employment/	<p>Encourage employers to utilize remote workers, hired at the same pay and with the same benefits as office workers.</p>	7/16/2018
3519	3	/policies/production-and-processing/	<p>Subsidize production and processing companies that pay higher wages to employees. Do not subsidize and charge higher rents and sale prices to retail and hospitality companies, because they pay low wages.</p>	7/16/2018
3520	5	/policies/visual-quality-of-new-development/	<p>Require building features that increase the safety, including from crime, traffic, and other dangers, of residents.</p>	7/16/2018
3521	68	/policies/energy-efficient-buildings/	<p>Subsidize solar and wind energy improvements for all 2+ unit buildings, including, duplexes, 4-plexes, etc.</p>	7/16/2018

3547	61	/policies/environmental-justice/	<ol style="list-style-type: none"> 1. Biochar for contaminated sites whenever possible and effective 2. Support community gardens in parks which give preference to low income and minority groups who have historically been left out of single family home ownership. Help the community gardens be nutritionally successful by supporting onsite composting and other healthy soil practices. 	7/16/2018
3548	70	/policies/ecology-and-habitat/	<p>Please include "Utilize carbon sequestration soil practices whenever practical to contribute to healthy air, soils and water management" as a strategy.</p>	7/16/2018
3549	67	/policies/climate-resilient-communities/	<p>Including carbon sequestration as a strategy is great. It would be helpful if you listed how this can be done:</p> <ol style="list-style-type: none"> 1) Use of composting 2) Mulching 3) No synthetic fertilizer 4) No pesticides or herbicides 5) Biochar 6) Leave leaves on ground 7) Native perennials instead of annuals 8) Encourage fungi in soil <p>ETC.</p>	7/16/2018
3550	1	/policies/access-to-housing/	<p>With respect to this specific policy ambition...</p> <p>"In neighborhood interiors that contain a mix of housing types from single family homes to apartments, allow new housing within that existing range."</p> <p>...I would like to express concern and objection to the idea of allowing zoning changes in neighborhoods that currently feature single family zoned lots, particularly in the Uptown/Lowery Hill/Kenwood neighborhoods. We are already seeing developers enter our neighborhoods seeking to purchase older, smaller single family homes only to raze and replace them with larger homes that have footprints that stretch to the very borders of the lot. Should developers be given the green light to create multi-unit and mid-rise buildings in these neighborhoods, I believe this practice would be weaponized as the economics of buying up single family homes to create more profitable dwellings would utterly change the character and space of our charming neighborhoods.</p> <p>I understand and support the need for more affordable housing and am in favor of density and public transportation (I ride public transport every day). However, I fear that this change would only favor greedy developers with no long-term care for the health of our neighborhoods to sweep in and construct builder-grade dwellings that have one goal in mind: money.</p> <p>I implore the planners to consider the existing qualities of an area with an eye towards preservation of our city neighborhoods where they exist today in favor of seeking more density in areas that already have multi-family dwellings and mid/high-rises.</p>	7/16/2018
3551	1	/policies/access-to-housing/	<p>Protect existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, and especially within the Northeast Minneapolis Arts District.</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3568	0.1	/topics/land-use-built-form/	<p>I think the blanket application of corridor 4 and interior 3 all along streets with bus service is just giving up on actually planning where to target higher density and thinking about what will make attractive neighborhoods. Corridor 4 clashes with the land use map - its picture shows streets solid with buildings to the curb with street level shops while land use shows commercial uses limited to the existing business corners (where I think density projects should be targeted- you want those people to eschew cars? cluster them at attractive corners near parks and practical amenities like parks, libraries, every day stores and coffee shops, don't try to slather them all along the bus route. I'm actually in favor of taller buildings in targeted locations). Interior 3 shows streets solid with buildings, not like the examples we do have in the S and SW of apartment buildings in residential areas, often smaller brick buildings, set back, surrounded by trees and mixed with duplexes and single family homes. You don't project enough growth to fulfill this picture everywhere so instead of painting it all along every street and waiting to see what happens when developers pursue their profit incentive individually, how about actually planning where different levels of density make sense neighborhood by neighborhood? The goal of erasing past injustice against minorities has been used to bludgeon people who oppose this zoning but it's totally unclear how this will help achieve that goal. I live in the SW where any new construction is way outside the bounds of affordable and I own property in the S near Lake Hiawatha where the development and gentrification ship has not yet sailed and there might be more opportunity to guide it into more variety of options, maybe do some affordability with less expensive subsidization yet in an area with attractive parks and lakes (and where minorities were not previously shunted) but this plan seems to be just abdicating any real planning of how to achieve those goals.</p>	7/16/2018
3569	49	/policies/educational-and-economic-access/	<p>You are right! Success starts at birth! Every child deserves Access to Equitable Education. Our public education system is in great need to provide an excellent education preK ~ 12. We have disparities, because our housing is segregated, so in turn our schools are segregated. The greatest need is to provide for our children access to equitable, free, safe public schools that educates the whole child. Budgets in our area, (south Mpls is where I live) Mpls keeps cutting budgets and quality staff therefore crippling our schools to provide for our children. House taxes is not the way to fund our schools. The disparity and inequality happens with trying to fund our school with house taxes that keep going up, however the achievement gap does not close. Businesses need to support our schools and the MN legislature needs to fund our school and raise the per pupil given to \$10,000 dollars. So our household taxes plus, business % support, plus State of MN support can provide the resources children and teaching staff need in our public schools. The biggest problem with budget shortfalls (lack of resources) in our neighborhood schools is class sizes are too large, not enough staff to support large classes which leads to children not getting the support they need to believe in themselves and become successful and that leads to student drop out by high school. In your planning we must look to help our schools to make a better city. Include in your action steps, making sure the resources are available to our public schools. The children will be 22 by 2040!</p>	7/16/2018
3570	18	/policies/walking/	<p>I agree that walkability is a great thing. The challenge is that we live in a climate that does not allow for walking more than a block or two many months of the year. We have a dog that we walk daily and know that this walkability aspect is not realistic in the winter months. Plus any of us with families can attest that this is not realistic.</p> <p>We do need cars to get us to a number of activities. Narrowing the roads in areas that are already heavily traveled will only add to the issue we already have with traffic. Our roads are already in horrible shape and do not get repaired or plowed in a reasonable amount of time.</p>	7/16/2018
3571	35	/policies/innovative-housing-types/	<p>I have been looking for mention of innovative housing for people with disabilities. Not only physical, but intellectual disabilities. People with disabilities have very few, if any, choices. What is available through organizations like Fraser has a waiting list of many months. These people need access to public transportation, community support and affordable housing. They are challenged to find this and this keeps them from finding employment. Please consider this in your planning.</p>	7/16/2018
3572	17	/policies/complete-streets/	<p>This sounds great in draft form but is not realistic in practice for a large portion of the city. Our climate does not allow for this in the winter. Xerxes is already incredibly busy and it There already is not adequate parking for the number of businesses at 50th and Xerxes. To narrow the road even more is not going to work. Then to add the type of density you are looking at will completely exacerbate the issue. When building further away from the city center, we need to have parking available (even if it is underground) for residents and businesses.</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3573	1	/policies/access-to-housing/	<p>This type of Up zoning has not worked in Seattle, Portland, Fresno among others. This is plan to fail, there is nothing here that will insure affordable housing. This plan does allow for developers to com in buy up single family homes and build multifamily homes and charge the going rate. These additional units will be filled by the influx of people and therefore will not impact the rental rates. This is a plan to fail just like it has in other cities. Also this plan does nothing to address how our aging infrastructure (water and sewer) will be able to handle the additional stress these additional housing units will place on them.</p>	7/16/2018
3574	38	/policies/affordable-housing-near-transit-and-job-	<p>We need to relook at the designated transit corridors and the amount of density you are proposing to increase it to. Xerxes and Penn for example, are already busy areas. Plus, there is an elementary school right off of Penn. I think these can increase but not to the scale you are proposing. In addition, the areas they are in are furthest from the city and have a high number of families living there. Families need to have transportation not just public transportation. The current plan does not take this into account. Please rework this issue in the SW neighborhood areas.</p>	7/16/2018
3575	20	/policies/transit/	<p>When Bryant Avenue South is redesigned (Spring 2020), I would like to have buses (#4,#23,#46,#146) removed from it (50th to Lake Street). The street would no longer be a corridor, but would instead resemble neighboring Aldrich and Colfax Avenues, with stop signs every other block (AKA "the basketweave").</p> <p>There are a number of benefits to doing this:</p> <ul style="list-style-type: none"> * improved safety - current level of traffic volume and speed endanger the lives of its residents; removing traffic will decrease accidents and help prevent injuries near Barton elementary school * decreased maintenance costs - shifting traffic away from Bryant will decrease its "wear and tear", thus decreasing its total lifetime cost; given the cost to build and maintain roads, this is a very-compelling argument * decreased enforcement costs - decreased traffic volumes and speed will reduce the need for enforcement activities, allowing the police to focus their efforts on other priorities * increased property values and tax revenue - removing traffic and buses will increase the property value on Bryant, thereby increasing property-tax revenue to the City * increased livability - eliminating the Bryant-Avenue freeway will restore the neighborhood feel <p>Other rationals:</p> <ul style="list-style-type: none"> * Bryant Avenue wasn't built to be a freeway - the average distance from center of Bryant to the front façade of its buildings is much smaller than roads that were built to accommodate higher traffic volumes (e.g. Lyndale) 	7/16/2018
3576	4	/policies/access-to-commercial-goods-and-service	<p>We need more small businesses in Fulton! 50th and Xerxes is half dead, with one entire half block devoted entirely to automotive businesses. Please zone to allow more small commercial.</p>	7/16/2018
3577	1	/policies/access-to-housing/	<p>Some of your transit corridors need to be reworked. I think the amount of density you are proposing in SW is not going to improve the neighborhoods. The majority of residents have families and chose to live here because of the neighborhood feel. Our lots are small so we are already very close in proximity to our neighbors and look out for each other. We have regular neighborhood block parties and truly know one another. To add the type of density you are proposing will erode this neighborhood community. The majority of homes are historic in design and well maintained. To destroy this would be tragic. Minneapolis has a history of tearing down its historic buildings and then laments about it later.</p> <p>I truly believe each individual neighborhood in Minneapolis has its own unique character and I strongly believe that the neighborhoods need to be consulted and part of the plan to determine the density and preserve character going forward.</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3578	20	/policies/transit/	<p>When Bryant Avenue South is redesigned (Spring 2020), I would like to have buses (#4,#23,#46,#146) removed from it (50th to Lake Street). 3579	1	/policies/access-to-housing/	I disagree to changes in zoning allowing larger structures in residential areas	7/16/2018
3580	0.1	/topics/land-use-built-form/	I disagree to changes in zoning allowing multi story dwellings along Xerxes Ave in South Minneapolis	7/16/2018
3581	0.1	/topics/land-use-built-form/	I live at 1033 Thomas Ave S, what is currently a beautiful street of 70 year, meticulously taken care of homes that is being proposed to turn into Corridor 6 zoning. I am heartbroken with this news as are all of my neighbors. We have children in nearly every house on the block and the thought of one of these homes selling to a developer and turned into a 6 story complex makes me so upset. There are currently office buildings nearby (Bolin, Joffe, and Lurie and some apartments on Cedar Lake), but without visiting this street you would never know of the strong neighborhood values we all share- we love Minneapolis, we love our neighborhood, we love our neighbors, and we LOVE where we live. Please don't do this to our block.	7/16/2018
3582	0.1	/topics/land-use-built-form/	I disagree to changes in zoning out variances allowing greater than two story structures along residential streets such as Xerxes Ave in SW Minneapolis.	7/16/2018
3583	29	/policies/creative-sector-economy/	Protect the NE Arts District!	7/16/2018
3584	1	/policies/access-to-housing/	As ambitious as this plan may be, it takes a big leap as to which way the city planners think certain behaviors will be adopted by its citizens. Yes, I do support the idea of housing close to public transportation. Will this change behavior with more use of transit vs single car driving, to be determined. The area of great concern for me is moving multiplex units into well established single family housing areas. Sure, I want my property to be maintained and valued as an investment but honestly the dynamics change radically when mixing rental units with single homes ownership. Parking alone is a big concern as the density climbs. And yes this brings the conversation back to the importance of providing public transportation. The reality is single family ownership collides many times over with dealings of landlords not necessarily readily available and renters not always invested to the particular neighborhood. Obviously this is a broad statement but truthful when the reality kicks in. By definition renters are transient by nature and not invested in the particular neighborhood. This puts the hardship on home owners who must maintain the area involved. What might be a good intention, in reality is a BAD idea. NO to #e under Action Plan. NO to fryplexes.	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3585	80	/policies/development-near-metro-stations/	Create living spaces, including housing, for low-income residents who staff the service and retail industries that are clustered around Metro stations. The cost of commute for these individuals significantly affect their quality of life and will continue to exacerbate the inequities that can result from nodal economic development around transportation hubs. Require developers of housing to set-aside 50% of their units to means-tested affordable housing; require or incentivize businesses to hire large numbers of unskilled and lower paying employees; ensure that food pantries for low income residents are made available so that the urban poor do not go hungry; provide childcare assistance, so that low income parents can afford to assume productive roles in the workforce.	7/16/2018
3586	16	/policies/environmental-impacts-of-transportation/	I try to bike as much as I can for all trips. But thinking about the times I drive, it is often to get groceries because I do not think I can bike with them. However, it isn't difficult to bike with groceries with the proper gear (bike rack, handlebar basket, etc.) The city could consider advertising these forms of biking to get residents biking for trips that they used to think they had to drive.	7/16/2018
3587	0.1	/topics/land-use-built-form/	I live at 1033 Thomas Ave S, what is currently a beautiful street of 70 year, meticulously taken care of homes that is being proposed to turn into Corridor 6 zoning. I am heartbroken with this news as are all of my neighbors. We have children in nearly every house on the block and the thought of one of these homes selling to a developer and turned into a 6 story complex makes me so upset. There are currently office buildings nearby (Bolin, Joffe, and Lurie and some apartments on Cedar Lake), but without visiting this street you would never know of the strong neighborhood values we all share- we love Minneapolis, we love our neighborhood, we love our neighbors, and we LOVE where we live. Please don't do this to our block.	7/16/2018
3588	1	/policies/access-to-housing/	This policy needs to go further to protect the existing art-based buildings, facilities and zonings. Not just the NE MPLS AD, but other areas of Minneapolis where artist communities, creative- and art-based small businesses thrive. It's not just about about housing solutions, it's equally important to support and provide work and studio space for artists and art-based small businesses to develop, grow and become self-sustaining.	7/16/2018
3589	3	/policies/production-and-processing/	This policy needs to include Artistic Production and Services, along with protection of existing older structures in production areas for artistic production and services. It's important to work with building owners/developers to encourage and create "Art Destinations" that include a small percentage of retail businesses (restaurants, coffee shops, breweries, etc) within the complex.	7/16/2018
3590	5	/policies/visual-quality-of-new-development/	City funded projects should include public art and by local artists.	7/16/2018
3591	29	/policies/creative-sector-economy/	Policy needs to protect and support existing art districts, artists and related art-based small businesses.	7/16/2018
3592	30	/policies/arts-and-cultural-assets/	Policy needs to specifically protect all existing art space structures/buildings within the Northeast Minneapolis Arts District.	7/16/2018
3593	31	/policies/creative-workers/	Policy needs to provide tax incentives/abatements to arts production spaces/buildings to protect from the cost of studio/space forcing artists out of the City.	7/16/2018
3594	38	/policies/affordable-housing-near-transit-and-job/	Again, policy needs to protect (exempt) existing art production areas and buildings from such development.	7/16/2018
3595	14	/policies/tree-canopy-and-urban-forest/	Protecting our Lakes and Environment is a KIAA priority. We support reasonable efforts to ensure that the water quality of Cedar Lake and Lake of the Isles is protected and improved. We support the efforts to maintain a tree canopy in existing green spaces, such as the Kenilworth Corridor. We encourage incentives to homeowners and renters to save energy and improve the efficiencies of our existing housing stock, much of which has aged electrical, water, heating/cooling and insulating properties. We have funded and helped build Rain Gardens to prevent water runoff into our lakes as a tangible sign of our support of the environment.	7/16/2018
3596	60	/policies/intrinsic-value-of-properties/	Within Kenwood, there are historic assets listed or eligible for listing on the National Register of Historic Places, including the Historic Water Tower, the Kenilworth Channel, the Old Horse Fountain, at least three individual homes, the Kenwood Parkway Historic District, and the Grand Rounds. And in general, while not designated historic, efforts have been made to ensure that reconstruction within Kenwood fits its historic character. Many homes in Kenwood are 100 years old or more. We will support development that supports the cohesion of the neighborhood, and oppose development that is a detriment to these assets and the cohesion of the historic appearance of the neighborhood.	7/16/2018
3597	54	/policies/supporting-economic-growth/	Policy should also include improving existing properties and infrastructure.	7/16/2018
3598	55	/policies/business-innovation-and-expansion/	Policy should include preserving existing uses, assets and Art Districts.	7/16/2018
3599	53	/policies/quality-of-life/	Parks are an important asset within Kenwood, especially the Grand Rounds/Kenilworth Corridor, Kenwood Park, and the open spaces surrounding Lake of the Isles and Cedar Lake. It is a natural urban forest. Kenwood Parkway itself represents a greenway. We are not actively seeking more parks, but we do not want to see a lessening of green space or infringement on green space by allowing development that has an adverse effect on the green spaces we have. These assets serve not only the neighborhood, but are also regional parks that serve residents of the Greater Twin Cities.	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3600	81	/policies/social-connectedness/	<p>Thank you for reiterating the importance of neighborhood organizations, such as the neighborhood boards. They help improve residents' access to government. Neighborhood organizations such as KIAA are a grassroots way to gain an extra link of connectedness between residents and our elected officials, including our City Council Members, State Representatives, Park Board Commissioners and more. We are also responsible for ensuring that city funds that are directed towards our neighborhoods are used in accordance with established priorities that our constituents have vocalized.</p> <p>Our board has on a regular basis openly welcomed all neighborhood residents to participate fully in our board either as a member, committee leader or as a volunteer.</p> <p>For these reasons, we support continuing to include established neighborhood organizations within the city structure.</p>	7/16/2018
3601	56	/policies/supporting-small-businesses/	Policy should include artists, to support the development and growth of small business and artists.	7/16/2018
3602	1	/policies/access-to-housing/	We welcome additional residents within the Kenwood neighborhood. We are aware of the many multi-plexes that currently exist, and how those structures fit within current housing design and construction. We have supported Additional Dwelling Units. Homes have renovated garages as rental units, and some of the larger homes have been remodeled into multiplexes. These strategies have allowed more residential units while still protecting the overall neighborhood aesthetic.	7/16/2018
3603	38	/policies/affordable-housing-near-transit-and-job-	<p>Minneapolis 2040 draft plan is currently suggesting Corridor 4 development within the Kenilworth Corridor. While we recognize that a blanket approach was taken to all transit corridors, we would like to strongly urge and remind city planners that the 2014 Memorandum of Understanding is in effect as it relates to Southwest Light Rail. In that MOU between the Met Council and the City, it clearly states that any land that is not used for the operation of freight and light rail in that corridor is to be returned to the people as public parkland. We strongly urge that this proposed zoning be removed from the draft plan since it is inconsistent with that agreement.</p>	7/16/2018
3604	91	/policies/heritage-preservation-outreach/	<p>Kenwood Parkway is eligible for designation as a historic district. KIAA would propose that it, the Grand Round and other eligible assets be officially treated as such, and the historic nature of the entire Kenwood neighborhood be recognized as well.</p> <p>Because pending updates made the State's extensive database of studies maintained by the State Historic Preservation Office unavailable, we relied on Phase I/Phase II Architectural History Investigation for the Proposed Southwest Light Rail Transit Project Hennepin County, Minnesota Volume Five Supplemental Report/Number Two: Additional Areas/Properties in the Following Survey Zones: St Louis Park Survey Zone; Minneapolis West Residential Survey Zone. This is part of Appendix C of the Supplemental Draft EIS for SWLRT. There are historic assets within the neighborhood that are not covered within this report.</p> <p>Implementing Corridor 4 anywhere in Kenwood would adversely affect this aspect of the neighborhood, as it would allow for the demolishing or infringement upon our heritage.</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3605	1	/policies/access-to-housing/	<p>KIAA supports access to housing across the city. We do not object to fourplexes and rental properties, and we are welcoming to the renters and multi unit rental owners in our neighborhood. That said, if there should be a situation where there were to be a dramatic uptick of reconstructed properties for the purpose of increasing rental units, we would urge the following be adopted to ensure that current residents' interests are protected:</p> <ol style="list-style-type: none"> 1.Current standards where owners/management reside in the metro are maintained 2.Established setbacks and footprints that are in line with current housing stock 3.Established distances between homes 4.As already mentioned, no density beyond Interior 2, which will keep construction consistent with current housing stock in size and scale. Certainly, street width does not support Corridor 4 designation in Kenwood and 21st St in particular. 5.Streamlined approval processes for ADU in garages and secondary buildings 6.Resident opinion is mixed on allowing 3 and 4 unit buildings where now only 1 and 2 unit buildings are permitted. If 3 and 4 unit buildings are allowed, current preservation guidelines, Shoreland regulations R-1, R1A, R2B, and C1 zoning district standards for setback, height, lot coverage, floor area ratio, etc. should remain in place. These have been carefully developed to ensure that new structures are compatible with the existing stock 7.Kenwood overall does not support 3 zoning designations; we suggest that no zoning area upzone more than one comparable category. 	7/16/2018
3606	20	/policies/transit/	<p>The draft plan calls for increasing the frequency, speed, and reliability of the public transit system. Policy 20 does not call for the addition of routes where they do not currently exist. Therefore, Franklin Avenue east of Penn Avenue is improperly identified for Corridor 4 Development, as it is not currently an active bus route.</p> <p>Corridor designations assume transit so residents need not be automobile dependent. Route 25, the bus route that serves Kenwood, provides weekday rush hour service only. The four AM trips go downtown only; the four PM trips are from downtown only. It connects with no other bus route west of Hennepin Avenue. Appendix C - Bus Operations Plan (part of the SWLRT final EIS) states that if SWLRT is constructed the only changes to this route would be to route the bus on Thomas rather than Sheridan between 22nd and 24th and to eliminate the St. Louis Park portion of the route. This minimal route does not justify a corridor designation. But none of this is considered in the draft.</p> <p>SWLRT will be useful to gain access to transit. However, even with the addition of SWLRT, transit service in Kenwood is scarce and not expected to grow. Most destinations will still require use of an automobile or ride share to cut total transportation time by up to 75%.</p> <p>We suggest that this entire area (Franklin Ave, 21st St, Sheridan Ave) be redrafted at most as Interior 2, which not only would be more consistent with existing multiplexes in Kenwood, but also be more appropriate based on the frequency of bus service.</p> <p>Lastly, as it relates to Franklin Avenue, we do not believe it to be appropriate to zone Corridor 4 in anticipation of increased service, which may or may not happen in the future.</p>	7/16/2018
3607	58	/policies/business-districts-and-corridors/	<p>g. Policy should state the importance of arts and artists as economic drivers for the City by supporting the existing Arts Districts.</p> <p>h. Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement.</p>	7/16/2018
3608	84	/policies/public-safety/	<p>We would like to call attention again to the proposed Corridor 4 development around Kenwood School. We assert it to be inappropriate to dramatically increase housing, bus traffic, and car congestion in this area of the intersection of Penn Avenue and Franklin Avenue. It is already a very congested area with buses, cars, and pedestrians during peak school hours. We oppose increasing Metro Transit buses and density in this area, in order to maintain current levels of safety for school children.</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3609	73	/policies/stormwater-management/	There are many rain gardens in the neighborhood that catch roof runoff. But most stormwater runoff comes from the streets, sidewalks, alleys, and driveways. Nearly all this runoff goes into a storm drain and is piped directly to a lake. It contains sediment, vegetative debris, chemicals, and trash. Twice-yearly street sweepings do not adequately address this problem. KIAA supports additional measures to clean this water. If current housing footprints are expanded, there will be a loss of green space, gardens, and rain gardens that today naturally absorb runoff and this runoff will feed into the Chain of Lakes. The loss of this green and garden space will also impede pollinators, trees, birds, and nature friendly codes. Plantings, rain gardens, and habitat need to be part of a comprehensive plan to protect the environmental ecosystem in the city.	7/16/2018
3610	70	/policies/ecology-and-habitat/	We would also like to call to attention that Corridor 4 development would be in conflict with Ordinance 551.440 Shoreland Overlay District, designed to preserve and enhance the environmental qualities of surface waters and the natural values of shoreline areas, and to protect public health and safety. In this ordinance, the maximum height of all structures within the district is limited to 2.5 stories or 35 feet whichever is less. This height is intended to allow access to light and air of surrounding properties, limit shadowing of public spaces, be in scale and character of surrounding uses, and preserve the views of significant open spaces or water bodies. We urge that there be no Corridor 4 development per ordinance within 1000 feet of the high-water mark of Lake of the Isles, Cedar Lake, and the Kenilworth Channel.	7/16/2018
3611	81	/policies/social-connectedness/	Policy should support existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community and protect and preserve it's existing buildings.	7/16/2018
3612	1	/policies/access-to-housing/	<ol style="list-style-type: none"> 1. A home is typically a person's single largest investment, and provides a greater path to self sufficiency than renting as well as a stake of ownership in a given neighborhood 2. A home is purchased with a certain understanding of the neighboring assets and elements, and that change will be carefully considered 3. Allowing fourplexes and other large development in our neighborhoods shakes the foundation of the covenant between the city and the person wishing to own a piece of the city and brings uncertainty in that investment 4. A comprehensive plan should have an eye on the future, but also respect the past that influenced how people made decisions to acquire property in a certain neighborhood. 	7/16/2018
3613	0.1	/topics/land-use-built-form/	1000 block of Thomas Ave S is almost exclusively 1.5 story cottages and 2 story colonials. There isn't a single 3 story house. To be zoned as 6 stories seems like a mistake.	7/16/2018
3614	1	/policies/access-to-housing/	This is my first read of the plan. Prior to reading this information I have only been hearing about "four-plexes" being allowed in the neighborhood where I spend most my time. (Linden Hills) I find it telling that people refer only to four-plexes when the plan also calls for the option of duplexes and tri-plexes. I think the singular reference to four plexes indicates a level of anxiety and initial opposition. (as do the "don't bulldoze our neighborhood" signs). My question is whether other cities have used this approach, and if so, are there examples of housing designs from these other cities that might show how such housing blends or fits in to neighborhoods that have traditionally been almost exclusively single family homes? I get the feeling people in this area area are conjuring up their worst image of what a four-plex looks like. Thank you for this work you are doing and sharing.	7/16/2018
3615	0.1	/topics/land-use-built-form/	I live at 107 Pratt Street and strongly object to this future land use proposal. The proposed zoning will allow extensive destruction of the current high quality housing stock and potentially ruin the existing neighborhood. The map appears to mindlessly designate a corridor on either side of Nicollet for six and three story structures without regard the current beauty of the homes which were built in the 1920's. These type of neighborhoods anchor people to Minneapolis providing stability and prosperity to the city. It would be bad urban planning to loose them.	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3616	1	/policies/access-to-housing/	<p>Living in and around the lakes is expensive. The land is expensive and many people have built equity in their homes. The homes in many areas have been loving repaired and updated. In order to build affordable housing in these neighborhoods, one would 1. either need to build very, very cheaply thereby downgrading the quality of the housing stock in our neighborhoods or 2. the local government would have to heavily subsidize this housing.</p> <p>Secondly, many residents have lived in their homes for years. They have built up equity and for many people, their home is where most of their wealth is invested. To say that people need to find other ways to build wealth is trite at the least and uninformed as well as heartless. For people who are in the 40's and 50's it is too late to build a decent retirement fund without the money they will get for their homes. Developers will come in and undercut values because they will not be buying the home, but the land the home sits on.</p> <p>Without off street parking, the streets will become more and more crowded, because people will have their cars no matter how much the city wants people to bike or take public transportation. That is unrealistic during the winter and for many who have young children, who work in out of the city or who are elderly and disabled. Streets will become impassable during snow falls and emergency vehicles will have a harder and harder time getting through.</p> <p>In addition, the quality and the look of our neighborhoods will be damaged. More renters will also lower property values. It is a fact that renters just do not care about property they don't own in the same way that owners do.</p> <p>Waste run off into our lakes will also become more of a problem.</p> <p>You will lose a lot of people who pay the major taxes here--home owners. If you jack up property taxes to landlords to full the gap, they will be much less likely or able to offer affordable housing. But they may be the only land owners left except for condo owners in the city.</p>	7/16/2018
3617	35	/policies/innovative-housing-types/	<p>In regards to SRO housing: Cities like Seattle are relying on this type of housing stock to manage affordability. However, these units are not appropriate for most households as they are only intended for 1 occupant (not a couple or family) and, at least in Seattle, are not ADA compliant. Please use caution regarding this housing type so that new affordable housing isn't just for single, able-bodied people.</p>	7/16/2018
3618	1	/policies/access-to-housing/	<p>This is great. It needs to be easier to build new housing without needing to have special hearings to consider whether an additional 7 feet of height will ruin a wealthy, white property owner's life. When a simpler process is allowed and more homes are allowed in more areas, builders will not need to spend tons of money on lawyers or other legal fees. This will help fulfill the need for more housing.</p>	7/16/2018
3619	1	/policies/access-to-housing/	<p>This is a great set of land use goals! I fully support the opportunity to increase density in existing neighborhoods. Allowing landowners and the private market to match housing demand (especially for smaller multi-family buildings) will help to replace Minneapolis' "missing middle".</p>	7/16/2018
3620	80	/policies/development-near-metro-stations/	<p>It's always seemed strange to me that development along the Blue Line has been a small collection of 4-5 story suburban looking buildings. We will have a very limited number of METRO stations in the city proper, and each one should essentially be surrounded by it's own complete neighborhood. There shouldn't be any Interior 1 or Interior 2 zoning within, say, a three block radius of any METRO station. To meet goals of reducing emissions and auto dependency, METRO stations must densify to an even greater extent than this plan calls for.</p>	7/16/2018
3621	42	/policies/expand-homeownership/	<p>I have wanted to buy a home in Minneapolis for a few years now, and it seems like each day the prospect becomes more and more unattainable. While a so-called single family house would be quite a luxury (indeed, the most luxury of any building type), I have wanted a condo or co-op unit in a walkable neighborhood close to parks and other amenities. We need more opportunities like this. City policy that helps establish more co-op buildings and empowers residents to truly take control of their housing would be awesome. Co-op housing is, I have found, one of most affordable and most engaging residency options to both control costs and establish a sense of belonging (wealthy white people often call this 'pride of ownership' and only assign it to luxury single-detached units). An idea to increase opportunities like co-ops would be for the city to work with organizations and companies to help develop special loan programs to start new co-ops.</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3622	43	/policies/housing-displacement/	The city should explore tools like property tax freezes in targeted neighborhoods that are experiencing rapid investment and have concentrated poverty or high populations of people of color (so not southwest Minneapolis) and fund the freezes by adding fees to areas that have historically shut people out (like Linden Hills).	7/16/2018
3623	19	/policies/bicycling/	QUIT BUILDING SO MANY DANG BIKE LANES, IT'S OBNOXIOUS! EXAMPLE, WHY IS THERE A BIKE LANE ON BROADWAY THAT ENDS AT THE UPS WAREHOUSE?!?!?!?	7/16/2018
3624	1	/policies/access-to-housing/	I think this is a great idea! I am so excited that our city is ready to take these steps. Can't wait to make this city more accesible to all.	7/16/2018
3625	19	/policies/bicycling/	I just moved to this city partially because of the care they take to promote bicycle transportation. I love that we are still working to do even more.	7/16/2018
3626	20	/policies/transit/	Are there any more incentives that could be used to encourage carpooling? Or a platform where people could find someone else willing to carpool with them? Love these policies! Especially MNPass rather than building capacity.	7/16/2018
3627	49	/policies/educational-and-economic-access/	There doesn't seem to be much depth to how the city will support and work with Minneapolis Public Schools. So much of the disparities are interconnected with and originate in the education of our youth. Public schools should be an integral part of every neighborhood, and children should have access to a quality education in their neighborhood so that those with the most disparities aren't spending extra time on buses to further away schools. Schools function best when they are built upon and support the immediate community- teachers are able to get to know the community around the school in order to better support the students. I currently teach at Jefferson Community School and yet VERY FEW of my students are from the immediate area around the school, as the line is drawn down Hennepin Avenue. Many of my middle school students who have adults who work all day walk to school if they miss the bus, traveling quite far each day on their own to school. The 2040 plan does not draw enough connections to how it will support the public education of our students.	7/16/2018
3628	51	/policies/healthy-pre-k-development/	Yes- and this policy could be better connected to public schools where these services can be provided. Work with, rather than duplicate the efforts of Minneapolis Public Schools.	7/16/2018
3629	1	/policies/access-to-housing/	The current high density housing I see developed along high frequency routes is not only unaffordable housing, it is rental housing. To help reduce income disparities, more efforts should be made to help people find affordable housing they can own, rather than rent, in order to build their equity. Housing along high frequency routes should be more affordable housing, as high-income housing and rental properties going up often come with residents who can afford vehicles and don't need to be along high frequency transit routes.	7/16/2018
3630	33	/policies/affordable-housing-production/	Affordable housing should include emphasis on increasing the number of owner-occupied houses/condos. Cost of buying a home is on the rise along with increasing rent, making the options available to low income or single/new family households difficult. There seems to be a concentration of similar priced rental properties or condos in neighborhoods, especially downtown and northeast, rather than a diversity of rental rates or house/condo prices to own.	7/16/2018
3631	75	/policies/waste-reduction/	Increased number of recycling and compost stations should be included throughout the city, especially in parks and at major transit spots. Incentive programs should be included for multi-unit housing to participate in recycling and composting. We should also start charging for plastic bags in stores.	7/16/2018
3632	15	/policies/transportation-and-equity/	Increased high frequency routes have been dedicated to connecting suburbs of minneapolis with the city, rather than improving transportation within the city since it is the tax payers of minneapolis who are funding these improvements. Improvements should first be made to high frequency routes within the city instead of to the suburbs.	7/16/2018
3633	1	/policies/access-to-housing/	3- and 4-unit buildings that are small-scale will not be affordable. Multiple-income families will be too large for the units, and units will likely be too expensive for one individual in need of affordable housing. This policy may benefit two-income couples with no kids, and I don't think this is the targeted demographic of this policy.	7/16/2018
3634	50	/policies/access-to-technology/	I would first like to point out the irony of guaging interest in policies that boost access to technology by asking residents to go online and fill out out a form on a website. Those that don't have access to technology don't have a voice in this.... so they are going to be extremely unrepresented in the comments. Access to technology is hugely important, as evidenced by this democratic feedback process. Without access to computers people don't have opportunities to participate in the economy and/or civic life. There are large racial and socioeconomic disparities in access to technology and it impacts the most vulnerable community members the most.	7/16/2018
3635	46	/policies/healthy-housing/	Please add radon testing to rental inspections. Thousands of residents live in garden level homes, and property owners have no reason to ensure that the home is completely safe and radon free.	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3636	38	/policies/affordable-housing-near-transit-and-job-	<p>What are the Cities criteria for Affordable housing? I keep seeing those words but the rental markets pricing keeps going up and while I know we still don't have enough rental housing, all I see even with a substantial increase in available rentals, is rising costs. Ive done some reading on various research projects regarding density and affordability one from the journal of Urban Planning and they ask that question as well, they saw some improvement for middle income citizens but little or none for low income. I believe this city needs to do two main things, Ensure that there isn't an affordability crisis for low income singles and families, many Southeastern states are on the brink of such a crisis according to some articles that Ive read due to many factors one being the cuts in support;ort from the federal government for subsidized housing I don't believe that density alone will manage that. there needs to be programs and policies that specifically focus on those issues. Secondly, they need to offer, mortgages incentives for lower income community members that allow them to buy and or build 4 plexus in their communities. Ownership builds commitment to the community and supports the livability of a community and the money from those rentals stays in the city, instead of flowing out to suburban developers</p>	7/16/2018
3637	1	/policies/access-to-housing/	<p>Large mixed-use buildings with condos and/or apartments on transit routes are a sensible way forward to ensure affordability in all areas of the city. Whether on W 50th Street in Linden Hills or Penn Ave N, 10% of units should be affordable to 60-80% AMI, 10% to 40-60%, and 10% below 40%, either by development requirements or by renter/owner subsidy. Upzoning outlying neighborhoods will drastically change the feel of much of Minneapolis, mainly by adding congestion to already busy side streets and freeways. Transit, and transit corridor development, should be the focus. Too many cars are part of a positive feedback loop with tough winters and construction that is reducing the livability of the city. Get ready for a drop in quality of life AND population 5 years after the proposed upzoning kicks in. Please keep the long-term trajectory of the city in mind, and don't lose the forest of tomorrow for a few money-bearing trees right now!</p>	7/16/2018
3638	47	/policies/housing-maintenance/	<p>This section is strange. The city should recognize the difference in value between single-detached unit houses and larger buildings when it comes to housing preservation. It is more important to retain multi-family buildings than single houses. There are thousands of single-unit houses across our neighborhoods, and "saving them" is not going to help create affordable options for as many people as possible.</p> <p>It is good to see, however, a desire to expand resources for maintaining properties that need improvement. It would be good to tie available resources to income and location so that areas of concentrated poverty and disinvestment can receive needed benefits.</p>	7/16/2018
3639	35	/policies/innovative-housing-types/	<p>It would be awesome to fill empty lots on the Northside with new prefab homes built locally and with innovative and less-costly materials. I would love to see new duplexes that cost less than conventionally built single-unit houses, and new four-plexes that could provide four families with an affordable, new ownership option. We must be innovative!</p>	7/16/2018
3640	39	/policies/fair-housing/	<p>Fair needs to be defined.</p>	7/16/2018
3641	19	/policies/bicycling/	<p>Please try to develop some consistency in bikeway design. The current hodgepodge of designs throughout Mpls is often confusing and sometimes dangerous.</p>	7/16/2018
3642	19	/policies/bicycling/	<p>PLEASE NO MORE BIKE LANES! INVEST IN BRT BUT NO MORE BIKE LANES!!! AND NO MORE BIKE LANES ON MAJOR CAR ARTERIES (HENNEPIN, ETC)</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3643	0.1 /topics/land-use-built-form/		<p>My name is Angie Courchaine. I am the co-owner of Pinwheel Arts and Movement Studio at 2731 25th St E. I am commenting in support of rezoning our studio space as commercial.</p> <p>There are a couple of 2040 policies which relate to Pinwheel: Policy 29 on the Creative Sector Economy: Ensure growth and sustainability in the creative sector economy by providing arts, culture and design organizations, creative entrepreneurs and small businesses with working, material, and physical capital resources.</p> <p>This relates to Pinwheel as our creative business, like many, does not follow a traditional business model. Our zoning makes it much more difficult for us to have a successful and long-lasting creative business in our existing location. It would be helpful for us to have commercial zoning to know the city supports what we've been doing in the neighborhood. It would also help us with permitting for other activities in our studio. Because of our non-conforming commercial use, we are limited to a temporary entertainment license. There is a big gap between the temporary and permanent entertainment license in terms of what studios need to do to be commercially viable. It is not adequate to be able to host only 15 events per year as an artist studio and artistic business. While the 15 events per year allowed under our current license is not ideal, we also aren't planning on having 100 events per year. However, in order for us to succeed we are going to need the commercial zoning which happily is proposed under the comprehensive plan.</p> <p>Policy 30 Arts and Cultural Assets: Support economic development, global competitiveness, and city livability by promoting local arts and cultural assets. This policy relates to Pinwheel due to its focus on building strength of the creative sector. The proposed rezoning to commercial of our studio allows us to stay in the Seward neighborhood and contribute to the arts and vitality of the neighborhood. Our studio is very much a neighborhood asset, we frequently run arts programming in the park and provide our neighbors arts experiences close to where they live. Our camps have largely been attended by children in the neighborhood who sometimes live as close as a block away. We are also a space where artists in the neighborhood have come to rehearse their performance project. Rezoning our space to commercial allows our studio to build upon our current business and continue to be a part of this community.</p>	7/16/2018
3644	0.1 /topics/land-use-built-form/		<p>My name is Ramses Alarcon. I live at 2731 25th St E. Before I lived there, I showed my paintings and drawings at the studio downstairs. It was a wonderful place to show my art and meet people in the neighborhood. It gave me a chance and opportunity to be exposed to a community that I had never been in contact with before. I appreciate the studio as an opportunity to meet different people of different backgrounds, sexual orientation, gender and it's a great community place. I support rezoning the building so these events can continue because it is an inspiration from a lot of parts and it's a platform for up and coming artists. I love hearing and seeing what's going on downstairs from me now. I remember the studio that was there before Pinwheel and that they had problems because they couldn't get a license that would let them dance and play music even in the afternoon because of the zoning. In my culture, dancing and playing music is part of getting together with people and it seems wrong that the group of artists could not play music. It's like eating and drinking in my culture.</p>	7/16/2018
3645	76 /policies/new-parks/		<p>Policy 76: Parks within a 10-minute walk is an admirable policy. However, when looking at the zoning maps, it appears that cemeteries may be zoned as Park spaces. In the case of large cemeteries like Crystal Lake Cemetery and Lakewood Cemetery, these are large spaces that appear to be zoned as parks, but any calculation of this 10-minute walk standard (or similar) should exclude these from the definition of Parks to ensure that actual park spaces are close/accessible to people. Unless you're dancing on someone's grave, they're probably not suitable places for physical activity or playing with your children.</p> <p>Also, with a new vision of people out on foot/biking all day, please consider a standard for public restroom accessibility. Restrooms are accessible at parks, but there are other outdoor spaces that may be lacking these amenities, like a bathroom on the Midtown Greenway path, for example. Even at Bde Maka Ska's Thomas beach, there is a portable toilet. It should be included in the plan to strengthen the city's potty infrastructure to be more robust and further encourage people to use public spaces.</p> <p>Thanks!</p>	7/16/2018
3646	0.1 /topics/land-use-built-form/		<p>My name is Emerald Iris. I have attended several community events at Pinwheel Arts and Movement Studio at 2731 25th Street in Seward neighborhood. Pinwheel has also provided a wonderful day camp that my child attended. Pinwheel is a valuable member of the community and I support their ability to thrive and grow with the increased zoning. Thank you!</p>	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3647	0.1	/topics/land-use-built-form/	My name is Per Hanson. I live next door to Pinwheel Arts and Movement Studio at 2731 25th Street E. I fully support their mission. I also support the city proposal to change their zoning to commercial. They are very good neighbors.	7/16/2018
3648	1	/policies/access-to-housing/	If the new multi-unit structures could be made to include off-street parking, and if there can be some assurances that developers will not start tearing down single-family homes to build nothing but multi-dwelling units in neighborhoods currently composed of single-family homes, I think a lot of people currently worried about this action step might be more open to the idea.	7/16/2018
3649	0.1	/topics/land-use-built-form/	<p>I am a Seward resident. I appreciate the identification of non-conforming uses along 25th street in Seward and the recommendation to make those non-conforming uses conforming by recommending commercial zoning for individual parcels. There are parcel owners on 25th St. E who have sought rezoning for their commercial buildings and failed in the re-zoning process (I believe one such parcel exists at 35th Av and 25th Street). These clearly commercial buildings should also likely be recommended for re-zoning to commercial. It looks like the Birchwood also was missed on this map – they successfully petitioned to be re-zoned commercial in recent years. It is wonderful to have streets like 25th Street nearby – mixed use areas with little studios and restaurants interspersed with houses. The street is highly walkable, bike-able and has a bus line. It makes sense to have some commercial uses along this neat little Seward neighborhood corridor.</p> <p>I also want to write to support in particular the identification of 2731 25th St E as a parcel that should properly be zoned commercial. This is the address of Pinwheel Arts and Movement Studio. This group of artists has been a valuable member of the Seward community. It is odd that the studio currently operates under a non-conforming use while three doors down from Pinwheel there are commercial zoned properties as well as one block away at Café Racer. The building in which it is located is clearly designed for a commercial space and should be allowed to be put to its best and highest use. Pinwheel seems to be its best use. This wonderful community art space should be able to sponsor events and performances, host speakers and community meetings, have art openings, and teach classes. I understand that some of these uses may be difficult under its current zoning. Upzoning Pinwheel, I believe, supports many of the goals of the Comprehensive Plan, in particular : 1) creating a health, safe, and connected people; 2) ensuring Minneapolis has creative, cultural, and natural amenities; that make the city a great place to live; and 3) ensuring and all Minneapolis residents have access to employment, retail services, healthy food, parks, and other daily needs via walking, biking, and public transit. This neighborhood art and community space helps make Seward a complete neighborhood, interconnects its people, and nourishes the creative spirit of its residents. I am excited to see what the studio will do when the restrictive non-conforming use is removed.</p>	7/16/2018
3650	0.1	/topics/land-use-built-form/	I am Barb Combs. I have lived at 2624 29th Ave South for 31 years. I am not happy about having any kind of apartment complex on my block whatsoever. The traffic will be terrible and there will be no parking on our block. I would like it to stay residential like it is. This isn't downtown Minneapolis.	7/16/2018
3651	4	/policies/access-to-commercial-goods-and-service	Development should NOT be along existing transit routes. Development of taller buildings, commercial areas should be along main streets. IE. for south Minneapolis, Lyndale and Nicollet, NOT Bryant.	7/16/2018
3652	80	/policies/development-near-metro-stations/	Yes!! In addition to more multifamily housing along transit lines, I would like to see a lot more plazas/pedestrian-friendly designs near transit stations!	7/16/2018
3653	0.1	/topics/land-use-built-form/	Corridor 4 and Interior 3 along Bryant/Colfax and Aldrich makes no sense. This was done due to EXISTING bus routes. IT SHOULD go along main arterial streets fully - Lyndale and Nicollet. Then you can easily change the bus route to meet the population. Building the population around an existing transit route is backwards.	7/16/2018
3654	0.1	/topics/land-use-built-form/	Corridor 4 next to Cedar Lake is a bad idea. That should be left as is. There is enough traffic there already. The addition does not add to any convenience.	7/16/2018
3655	0.1	/topics/land-use-built-form/	Corridor 4 on France and Xerxes should not be included unless an agreement is made with Edina and both sides of the street can be zoned alike.	7/16/2018
3656	5	/policies/visual-quality-of-new-development/	Let neighborhood association have a voice in to the scale of development while requiring to follow height restrictions that are already in place.	7/16/2018
3657	80	/policies/development-near-metro-stations/	Please figure out a way to implement more efficient construction. The level of road closures in the city this summer, and lack of people working on the projects during regular business hours is jarring and very frustrating. None of these projects make for enjoyable living if we're always under construction during the outdoor months.	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3658	0.1	/topics/land-use-built-form/	Do not allow Interior 1 sections to have 3 and 4 unit structures, that will fundamentally change the dynamics and family oriented culture of the neighborhoods. Streets are already very tight with parking, there is not sufficient room for off street parking if you add 3 and 4 unit complexes. 2 unit can still maintain the neighborhood feel and the reason most choose to live in these neighborhoods.	7/16/2018
3659	0.2	/small-area-plans/	It's so difficult to get to the map and post a comment, I do wonder if the process is as fair as it should be.	7/16/2018
3660	0.1	/topics/land-use-built-form/	<p>I have lived in SE Mpls about 20 years and hate that this little gem in the city may be destroyed with development. I understand the need to accommodate the growing population, but crime such as rape and armed robbery have become more common in recent years near the U of MN. Adding more population density particularly in the area is unsafe and a public nightmare for the U of MN.</p> <p>The Plan removes any remaining attempt at retaining a low-density core</p> <p>The addition of tri-plexes and four-plexes on our traditional small lots encourages the replacement of any existing housing with massive buildings</p> <p>Allowing housing of this scale anywhere, could rapidly overwhelm blocks as neighbors lose greenspace, sunlight and parking as well as dealing with environmental issues such as water run-off from neighboring properties</p> <p>This is being proposed in conjunction with the elimination of any requirement for on-site parking for new developments, thereby exacerbating existing parking issues for residents</p> <p>The Plan encourages existing residential tear-downs in favor of medium/higher density development and encourages developers to buy adjoining properties to build even larger complexes in the middle of residential blocks</p> <p>Given the SE Como is the only neighborhood left in the southeast area with affordable single-family housing, the push to encourage redevelopment is in direct contradiction to the plans stated wish for a variety of housing options</p> <p>The incentive for new developments and lack of parking requirements seem to work against other neighborhood priorities such as; encouraging aging in place. housing for seniors, housing for families, housing for those who don't want to live in apartment towers and other workforce housing options</p> <p>Supports and encourages the mono-culture housing options currently expanding in southeast (student oriented high-rises or boarding houses)</p> <p>The Plan builds in a structural "unfairness" by indicating that only communities furthest from the center "including some very wealthy areas" can retain the lowest density (neighborhoods north of Lowry or south of 38th)</p> <p>Exacerbates the lack of fairness with the Plan's continued emphasis for earmarking the eastside as the area for most of the heavy industry</p>	7/16/2018
3661	18	/policies/walking/	It can be difficult to walk in the winter because many people do not or cannot shovel their sidewalks well. In Montreal, Canada, which is predominantly a pedestrian city, the local city plows all sidewalks with small, drivable machines. Expanding city plowing to more sidewalks would drastically improve walkability. Planting a lot more trees or installing shading devices for the summertime would create a more pleasant walking experience. For example downtown Mpls has a lot of sections of straight concrete that is exposed to a very hot sun.	7/16/2018
3662	0.1	/topics/land-use-built-form/	I have lived in Minneapolis all of my life because of the neighborhoods we now have. While I understand the goals, I don't think forcing a rezoning as you describe is the ultimate answer.	7/16/2018
3663	18	/policies/walking/	Supporting small businesses through financial incentives and tax breaks would create a more walkable city. People like to shop and walk and see community members and feel as if they are a part of something. Having only small pockets of stores is not enough, nor is having big box stores like Walgreens, Cub Foods, Super America and Home Depot enough, corridors of family run shops and restaurants and corner stores and hardware stores creates a neighborhood, Whittier's eat street exists because of small immigrant run businesses, cutting them out to put in a Cricket cell phone store will crush vibrancy.	7/16/2018
3664	49	/policies/educational-and-economic-access/	agree with this policy	7/16/2018
3665	50	/policies/access-to-technology/	agree with this policy	7/16/2018
3666	51	/policies/healthy-pre-k-development/	agree with this policy	7/16/2018
3667	52	/policies/human-capital-and-a-trained-workforce/	agree with this policy but these policies are written in ways that are difficult to DISAGREE with... the devil is in the details, and the policies on this site (in general) are very short on details. Implementation details will be important for public comment and I look forward to getting more information.	7/16/2018
3668	55	/policies/business-innovation-and-expansion/	agree with this policy	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3669	16	/policies/environmental-impacts-of-transportation/	Use less air conditioning on buses!!! It uses so much energy and the buses are often so cold that by the time I get to the other end 45 minutes later, in my shorts and T-shirt, I am absolutely freezing and it makes the ride terribly unpleasant.	7/16/2018
3670	1	/policies/access-to-housing/	Poor people need equity, so a priority for multifamily housing should be condos or townhouses that they are given easy terms to buy. In my experience, renters care less about the neighborhood	7/16/2018
3671	1	/policies/access-to-housing/	agree with this policy, but worry that the real concerns of enough parking and enough good quality schools, etc... all the infrastructure needed for increased population density, is not realistic. We do not yet have good enough public transportation to handle this. How do you prevent 6 cars in a driveway? People will own a car whether you want them to or not. The neighborhoods will fill up with cars, and there won't be enough parking... if you can solve this problem, I totally agree with the policy, but worry about this!!!	7/16/2018
3672	33	/policies/affordable-housing-production/	agree with this policy, but worry that the real concerns of enough parking and enough good quality schools, etc... all the infrastructure needed for increased population density, is not realistic. We do not yet have good enough public transportation to handle this. How do you prevent 6 cars in a driveway? People will own a car whether you want them to or not. The neighborhoods will fill up with cars, and there won't be enough parking... if you can solve this problem, I totally agree with the policy, but worry about this!!!	7/16/2018
3673	34	/policies/affordable-housing-preservation/	if this means restricting what can be done with an existing property (i.e., eliminating tear-downs and requiring existing structures to be maintained at any cost), then I am against it. Property owners should be allowed to build what they want on a property... In many cases, buying a big, old, energy inefficient house, and breaking it into 4 apartments (e.g.,) would be extremely energy inefficient and an eyesore. You must allow people to buy homes and improve them in the way they want, including teardowns, with few restrictions.	7/16/2018
3674	37	/policies/mixed-income-housing/	agree with this policy, but worry that the real concerns of enough parking and enough good quality schools, etc... all the infrastructure needed for increased population density, is not realistic. We do not yet have good enough public transportation to handle this. How do you prevent 6 cars in a driveway? People will own a car whether you want them to or not. The neighborhoods will fill up with cars, and there won't be enough parking... if you can solve this problem, I totally agree with the policy, but worry about this!!!	7/16/2018
3675	38	/policies/affordable-housing-near-transit-and-job/	agree with this policy, but worry that the real concerns of enough parking and enough good quality schools, etc... all the infrastructure needed for increased population density, is not realistic. We do not yet have good enough public transportation to handle this. Need more transit corridors! And more high density housing along these corridors - is this truly realistic?	7/16/2018
3676	39	/policies/fair-housing/	Agree	7/16/2018
3677	40	/policies/homelessness/	agree	7/16/2018
3678	41	/policies/tenant-protections/	agree that tenants need more rights! HOWEVER, my daughter rents in San Francisco and I looked into the laws there - they are MUCH TOO BIASED toward the renters, to the point that discourages landlords from developing more lower-income housing... the policies are so restrictive, having unintended effects - you must BALANCE renter and landlord rights. Now, Minneapolis needs more tenant rights, but don't go TOO FAR like San Francisco, which is actually crazy.	7/16/2018
3679	15	/policies/transportation-and-equity/	Equitable outcomes means having public transportation that serves the rich, the poor and the young and old, this helps everyone feel like they live in a vibrant city. My young teenager feels safer in New York City on public transportation because there is a lot of activity and ranges of people using it. Transportation should come often, be easy to understand and use, and move through mixed neighborhoods for daily life. It should not only support large sports events.	7/16/2018
3680	20	/policies/transit/	f. Ensure that high frequency bus routes serve areas with the highest residential, employment and commercial densities: But this prioritizes residents of neighborhoods with condos which seems to counter equity. Low income communities suffer when buses run infrequently as it's harder to get to and from work. and low income communities are already being pushed further out of the city.	7/16/2018
3681	0.1	/topics/land-use-built-form/	The area surrounding 46th Street South and between Lyndale and Nicollet is an area with established low density homes. No way should this neighborhood be transitioned into a higher density area. This area should remain Interior 1.	7/16/2018
3682	34	/policies/affordable-housing-preservation/	I see nothing in section 3."Affordable and accessible housing: In 2040, all Minneapolis residents will be able to afford and access quality housing throughout the city", regarding people with handicaps or the elderly on fixed incomes (of which I am one). It's as if we don't exist and are being given no consideration at all. Between maximum allowed property tax increases for consecutive years and special assessments for roadways that I don't own, with minimal increases in income benefits, it won't be long before I am taxed out the city I was born and raised in.	7/16/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3683	34	/policies/affordable-housing-preservation/	Regarding Sustaining Affordable Housing. I know someone who is in deep debt (due to property taxes and insurance costing a total of 12K a year.) just from owning a 5 unit rental unit it is a legally converted inherited 5 unit. (unfortunately. It is very close to downtown and they have kept rents very low since 2011 (under 650 and now well under 775! for all 3 1 brms.) But the building needs a lot of help and they can't afford it because they can't get a loan on a "commercial property" to fix it up. Also the trash bills and all utilities are sky high in the "commercial" zone. All because she has one small extra unit over a 4 plex. City of Mpls trash charges them per unit even if they only need 2 trash bins due to keeping green and they live in the largest unit. They only have 5 residents, and are charged for 5 sets of trash bins and recycling. This and the taxes are not fair to keep them poor and unable to fix the roof etc. Please consider bills giving deep tax incentives to those who don't necessarily want to do section 8, but do want to keep rents lower due to age of building. It is very hard for some mom and pop landlords especially on the above mentioned issues for a 5 plex is not fair. They asked me to ask council specifically to allow 5 plex conversions back into a 4 plex category on taxing and utilities. Or even to take it out of "commercial" status if possible. To lessen the bills. Qualify for loans, easier to sell to another mom/pop owner. This owner pays gas on several furnaces too by the way. They are 20K in debt. barely making it. Hard for them to save. Thanks for considering that scenario in your "keeping current affordable housing affordable" ideas to help.	7/16/2018
3684	1	/policies/access-to-housing/	Up to four units on a small city lot is extreme. It will adversely affect the flavor of a neighborhood and the reason people bought a home to live there. There should also be a requirement that lots being changed to multi-unit dwellings be owner occupied.	7/16/2018
3685	19	/policies/bicycling/	I'm very supportive of these efforts to expand and improve biking infrastructure! I think biking has a PR problem here--a vocal minority thinks that spending money on non-car transportation is an affront to cars and drivers, but they're wrong. Better biking infrastructure benefits everyone, even the biggest bike hater! More people on bikes means less traffic, easier parking, and less pollution. We all win!	7/16/2018
3686	41	/policies/tenant-protections/	This plan needs to include more stringent crack down on problem properties and problem landlords. Landlords need to be held accountable for behavior that occurs at a property in addition to providing safe and livable spaces. Landlords allowed to receive hundreds of violations before any action is taken is a slap in the face to residents who continue to put up with these issues. If you poll long-term residents of North Minneapolis, you will hear this time and again.	7/16/2018
3687	0.1	/topics/land-use-built-form/	How much money have we spent so far on this 2040? Would be interested in seeing the "living wage" paid to the participants.	7/16/2018
3688	33	/policies/affordable-housing-production/	This sounds great, but how does it align with higher density zoning referenced elsewhere in the plan? Higher density does not equal affordability. The rezoning sections of this plan, which leans heavily toward high density citywide, does not appear to align with affordability. I'm not finding the connection or controls that will mitigate shortsighted development.	7/17/2018
3689	5	/policies/visual-quality-of-new-development/	I think you're going to need much stronger controls for visual quality if zoning allows for higher density development city wide. Developers focus on short-term financial gain that often results in poor construction. Developers don't have the long-term interest of the community in mind when they buy property and build.	7/17/2018
3690	19	/policies/bicycling/	Love it!	7/17/2018
3691	1	/policies/access-to-housing/	The Loring Park neighborhood is in need of more density - this area is so close to the downtown core - but current height restrictions greatly limit the density that can be developed here unfortunately - there are so many terribly old apartment buildings that could be rebuilt to allow for much greater height and density than is currently allowed - this is a great area that would differentiate itself from north loop which has smaller buildings. 15-25 stories should be allowed in the Loring Park neighborhood.	7/17/2018
3692	80	/policies/development-near-metro-stations/	Please remove/eliminate the "re-zoning" of West Franklin Ave and West 21st (from Hennepin to Hidden Beach) into Corridor 4 and Interior 3. Both are poorly defined in the 2040 plan with no controls, which could result in shortsighted development. I can see trying to connect transit hubs (Hennepin/Franklin) with the SW light rail stop at hidden beach. Unfortunately, the outcome of re-zoning could result in increased congestion, rather than alleviating it, and take away much needed green space. Plus, density does not equal affordability. This is one area where if density increases with new development it will be in the form of expensive apartments ... far from affordable housing. Theo Wirth is rolling over in his grave.	7/17/2018
3693	4	/policies/access-to-commercial-goods-and-service	I love the idea! I just don't see how transportation will change to allow citizens to access goods and services. Currently, our bus system has been cut and most transportation is directed to downtown. I live in S mpls and work in bloomington. It takes me 3x as long to get to work by bus as it does to drive. This is unacceptable for my life. I do not believe this plan demonstrates how transportation will be improved.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3694	0.1	/topics/land-use-built-form/	Please remove/eliminate the "re-zoning" of West Franklin Ave and West 21st (from Hennepin to Hidden Beach) into Corridor 4 and Interior 3. Both are poorly defined in the 2040 plan with no controls, which could result in shortsighted development. I can see trying to connect transit hubs (Hennepin/Franklin) with the SW light rail stop at hidden beach. Unfortunately, the outcome of re-zoning could result in increased congestion, rather than alleviating it, and take away much needed green space. Plus, density does not equal affordability. This is one area where if density increases with new development it will be in the form of expensive apartments ... far from affordable housing.	7/17/2018
3695	1	/policies/access-to-housing/	I think this policy penalizes the people who currently live on a bus route. I also think our public transit system is dysfunctional. Instead of addressing a poor quality transit system that is not helping people leave their cars at home this policy wants to ruin neighborhoods. If the poor quality transit issue is not addressed then letting more people live on the bus line won't solve the problem. Minneapolis will be ruined if established neighborhoods of similar character are forced to allow taller buildings or more square footage on a standard lot. If a size/height cap per lot size was set that prevented ruining the vibe of neighborhoods then it this policy suggestion might make sense. Right now this policy seems to say it is a good idea to cram a lot more people into already dense neighborhood that already suffers significant noise pollution from planes and auto transportation. People won't be happy - the reason people move to these neighborhoods will be gone. Fix the transit issue and leave the neighborhoods alone.	7/17/2018
3696	76	/policies/new-parks/	I live a mile from the nearest park. After several Grand Rounds meetings that threatened the removal of whole blocks of owner occupied homes and starter homes our SE Como Community was promised a regional East Como Park to happen for the next generation. However one of the potential parcels that was a huge parking lot is now being built on and Park People were evasive, saying the eventual park would be further south in a community that already is receiving lots of attention because of having light rail. We feel like the poor step sister. As the city adds density it is important to add more green space and natural areas with native plantings and storm water considerations. A big grassy block isn't enough. We need attractive places to walk, jog and bike.	7/17/2018
3697	1	/policies/access-to-housing/	I'm not comfortable with the idea that an apartment building could be built next to my home that I recently purchased. The value of my home would dramatically decrease in value, traffic would increase to levels even worse than they are today and parking would become unbearable. I moved back to Minneapolis, from a suburb, because I loved the neighborhood I found but this plan seems to disregard what its residents want.	7/17/2018
3698	1	/policies/access-to-housing/	This policy needs more regulation and oversight. Allowing apartments & multifamily housing to be built anywhere within the designated areas on the above map could ruin some areas that are succeeding in this city, areas with strong neighborhoods, significant investments in home maintenance and enhancement, and significant contributions to the tax base. Plus many of our city's old homes give it character which this plan doesn't seem to protect.	7/17/2018
3699	62	/policies/contaminated-sites/	I would like the city to seek out more projects involving brownfields. Action step D is very important to allow to happen for brownfields to be redeveloped. The trend currently is fewer funds are available to clean up contaminated sites, which forces properties around it to have the potential or to already be contaminated. The city needs to be proactive with developers and facilitate easy redevelopment for brown fields.	7/17/2018
3700	1	/policies/access-to-housing/	Our neighborhood values its single family owner occupied homes. Too many were converted to rentals after the recession and it destabilized our community. People who invest in homes and condos become active in the community, but when the majority became rentals with a transient population it hurt our community. We are happy to have some smaller apartment buildings along our two busy streets and larger ones on the edges of our neighborhood, but are alarmed at proposals that would tear down starter homes and build taller apartment buildings where they would overshadow single family homes. We prefer two story mixed use buildings on those busy streets. Why do some neighborhoods far from the core of Minneapolis get exceptions to this density while you propose it for us? They get all the amenities in addition to having lovely lakes to walk around. Don't we deserve beauty and peace too? Lots of tall Luxury Apartment buildings have been built in near-by communities. It didn't make anything more affordable because the old buildings near them decided to raise rents too. Please insist that a certain percentage of any new buildings be affordable in ALL neighborhoods. Consider affordable small condos and duplexes that are owner occupied to give stability to lower income people and their communities.	7/17/2018
3701	55	/policies/business-innovation-and-expansion/	Actively recruit green businesses that will help convert to a sustainable economy.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			<p>The city is abdicateing its responsibility to guide residential development to for-profit developers and speculators, who will snatch up the most affordable single family housing in the most desirable locations, making home ownership in those neighborhoods even further out of reach to minority and lower-income residents, not to mention many of greater but still modest means. With negligible zoning control, there will be even less interest in rebuilding areas where the city would like to encourage new housing development (e.g., North Minneapolis, where, according to a March 2018 StarTribune article, there were 358 vacant city-owned lots and the city's incentive plan to entice development has fallen flat). Developers and speculators will try to assemble contiguous properties for larger multi-unit redevelopment, meanwhile subdividing, renting, and minimally maintaining them, repeating the sad history of the older housing stock devalued in the 1930s and beyond when mortgage redlining blocked would-be owner-occupants from buying. With no investment in maintenance and improvement, the positive trends that have improved many neighborhoods will be reversed. As single-family homes have light, air and views blocked by new 3-6 story buildings allowed within Corridor 4, Corridor 6, and Interior 3, stable affordable neighborhoods (e.g., along Blaisdell, Columbus, Elliott, Bloomington, and much of Northeast Minneapolis) will begin to deteriorate as prospective home buyers steer clear of areas designated for the type of development that may diminish both the value of their homes and their quality of life. Similar downward pressure may undermine more upscale neighborhoods whose fine single family houses may become even more vulnerable to teardown and redevelopment, destroying the character of those neighborhoods by freely allowing multiplexes almost everywhere without any constraint on the extent of redevelopment, but definitely not providing more affordable housing. (There is value in maintaining "aspirational" neighborhoods, for their history, their architecture, and the pride we collectively take in those beautiful areas.) Already it's obvious that the city has no regard for the rights of existing homeowners when developers want to build larger scale buildings next to them (I'd love to see Minneapolis enact a homeowners' "right to light"). Effectively a blanket rezoning, the plan removes the opportunity for citizens to have a voice in how their neighborhoods are transformed. I have no objection to mixing different housing styles and commercial areas, but I think the city should keep control over where redevelopment occurs rather than ceding control to developers. Frankly, I think it's irresponsible and lazy to enact such a wholesale reconfiguration of allowable building types, without regard to the existing fabric of the city. The built-form map does not spare historic districts nor does it show any regard for neighborhoods where characteristic housing types are prized (e.g., Longfellow and its bungalows). Rather than allow perfectly good existing housing to be destroyed, it should be the city's responsibility to guide developers to the many vacant lots in the city and to encourage redevelopment of deteriorated housing stock. The proposed changes in built form maps will exacerbate problems the city already has identified and decried. The city seems to want to preserve existing affordable single-family housing and rentals, yet the new policies probably will accelerate their loss. The availability of affordable starter homes will continue to diminish as national and local renters, developers, and speculators outbid individuals, young couples, and families for those homes. Many voices have pointed out that any new multi-unit developments will have rents higher than those of existing older units, but the city council seems willfully to ignore such evidence in insisting</p>	7/17/2018
3702	0.1	/topics/land-use-built-form/		
3703	0.1	/topics/land-use-built-form/	Why the hell are you shifting all of the burden to Bryant Avenue South? Why is Lyndale getting a pass? It's much bigger street.	7/17/2018
3704	10	/policies/street-grid/	Demolish that blighted K-Mart now!!	7/17/2018
3705	1	/policies/access-to-housing/	I do not support building 4-plexes on any single family home property. This is a policy that highly favors developers. I can support the rest of this plan, but not this provision.	7/17/2018
3706	20	/policies/transit/	Are you proposing to route MORE traffic on Bryant Avenue South? It's way too small to accommodate being a corridor. REMOVE BUSES FROM BRYANT!!	7/17/2018
3707	82	/policies/aging/	Early counseling for all citizens is important, so that they are prepared emotionally, socially, and financially for old age. I certainly don't want to be a burden on the City or my family when I get to that point of maturity. I need to remain in the workforce until I can afford to retire, or become a ward of the City.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3708	73	/policies/stormwater-management/	<p>A) Infiltration is difficult to keep clean, some of your funds should be toward cleaning and maintaining infiltration and bioinfiltration basins. A majority of infiltration basins and BMPs end up clogged around 10 years.</p> <p>B) Is there a goal to fully separate sanitary and storm sewer? If not there should be.</p> <p>C) Why not just set a new standard to reduce impervious?</p> <p>D) No comment.</p> <p>E) Carp management should be a priority, reducing carp in water bodies helps stop invasive species and leads to cleaner water.</p> <p>F) I like this action step.</p> <p>G) it would be wise to try to follow MPCAs standards and seed mixes with this.</p> <p>H) This is a good idea, riparian areas should also include a buffer so include some verbage in with that.</p> <p>I) How are you going to do this?</p> <p>J) How will you do this? Will certain project be aware that more storage needs to be available to mitigate the impact of flooding?</p> <p>K) How will the priority be on water quality? Stormwater is typically the last thing on transportation infrastructure. This should say stormwater being on the foreground of the project, and follow the proper standards.</p> <p>L) Road salt should be reduced, although difficult to implement with MnDOT roads, city roads can use less and having city crews know this will help.</p>	7/17/2018
3709	51	/policies/healthy-pre-k-development/	<p>Recommend the policy objectives focus on integration tactics to expose children and new parents beyond racial and economic lines by strengthening parks programming for early childhood education, supports childcare resources for targeted small-area commercial centers, and supporting integrative housing options.</p>	7/17/2018
3710	1	/policies/access-to-housing/	<p>I am concerned that relaxing the zoning laws to allow developers to replace single family homes with multi-unit dwellings anywhere in Minneapolis will not lead to more affordable housing, but will instead damage existing healthy neighborhoods. I expect developers to try to maximize their profit by replacing existing owner-occupied single family homes with expensive apartments and condos in the cities most desirable neighborhoods instead of building affordable housing where it is needed most. Doing so may damage the financial interests and quality of life of homeowners in those neighborhoods. Please respect the interests of all citizens of Minneapolis.</p>	7/17/2018
3711	1	/policies/access-to-housing/	<p>Encourage filling in all the vacant lots, especially in North Mpls. with single family through at least duplex and maybe fourplex as long as they are fit in with the neighborhood.</p>	7/17/2018
3712	0.1	/topics/land-use-built-form/	<p>I think changing to Interior 3 and 4 along what are now just single/duplex home sites is going too far. Perhaps make the Int 4 areas Int 3 instead and limit the percent of the lot they can cover (for example along Xerxes Ave in SW MPLS).</p> <p>I also worry a lot about how much of the land will be covered by Int 3 & 4 buildings. What will happen to all of the beautiful trees in MPLS? They provide shade, green, stability, etc. The current plan will concretize too much of the land.</p> <p>I doubt that building 4 story buildings in Linden Hills will create affordable housing there. Only the building contractors are going to benefit with this plan, not people who need affordable housing. How will prices be controlled/limited?</p> <p>What will be the impact on people who have invested in their current homes when large apartment buildings start to surround them? They bought their homes in a community of single/duplex homes and would expect the neighborhood to stay that way. Why keep investing when you perceive the quality of life going down?</p> <p>Why not concentrate on raising the incomes of people (\$15 min wage is a good start) so they can afford housing. If you can solve the income disparity problem, the housing problem will take care of itself.</p>	7/17/2018
3713	1	/policies/access-to-housing/	<p>Please consider neighborhood nodes, not just linear transit lines. Nodes should be mixed use and create neighborhood centers, which would decrease the amount of time spent in transit to accomplish every day tasks.</p>	7/17/2018
3714	4	/policies/access-to-commercial-goods-and-service	<p>Yes! Mixed use and commercial lining the street fronts will bring street life, safety and reduce transit time.</p>	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3715	1	/policies/access-to-housing/	I like the goal and action steps. I am concerned about GOOD Housing Stock being torn down to put up multifamily dwellings. There should be a way to discourage buying up good housing stock and tearing it down especially when done by out of town developers who have little interest in anything other than the bottom line. As a retired remodeling contractor who worked on developing green guidelines I learned it is greener to remodel a house that is in good shape. That said there are many houses that were built poorly or have been neglected and the focus should be on these type of buildings. Not sure how to regulate it though.	7/17/2018
3716	5	/policies/visual-quality-of-new-development/	This needs to be further clarified and reviewed on a case by case basis. Variety as visual interest is not always the answer to improve our building environment, it can lead to a visual mess. Some of the best cities are quite cohesive in their overall massing and facade designs. Cities need not be composed of individual collages!	7/17/2018
3717	6	/policies/pedestrian-oriented-building-and-site-de	Can't the market drive some of these things? If our population greatly increases, how are we sure that we won't need a new gas	7/17/2018
3718	7	/policies/public-realm/	station somewhere?	7/17/2018
3719	33	/policies/affordable-housing-production/	Yes! More creative placemaking in our public and leftover places, please!	7/17/2018
3720	1	/policies/access-to-housing/	All are great actions!!!!!! c. is extremely important since healthy neighborhoods should have people from all economic, cultural and ethnic backgrounds.	7/17/2018
3721	35	/policies/innovative-housing-types/	How to achieve this goal is the million dollar question.	7/17/2018
3722	11	/policies/skyways/	I support this policy. I would also like to see the definition of "transit corridors" expanded. I support the creation of four-plexes, and would support an increase in the number of units.	7/17/2018
3723	41	/policies/tenant-protections/	Yes! Very good!	7/17/2018
3724	15	/policies/transportation-and-equity/	No skyway expansion! Skyways ruin our shared public space. If we must have them, please encourage vitality and a porosity between the skyway and the street.	7/17/2018
3725	19	/policies/bicycling/	I support ensuring that tenants are aware of their rights. I would like to see support for organizations that help tenants learn their rights. I would like to see fair housing policies enforced. I support protection from eviction for families with children during the school year.	7/17/2018
3726	43	/policies/housing-displacement/	More frequent buses will get more people riding the bus!	7/17/2018
3727	31	/policies/creative-workers/	Yes! Protected bike lanes are the safest for cyclist and driver. The more predictable we can make cyclists, the more at ease drivers will be with them.	7/17/2018
3728	1	/policies/access-to-housing/	I support the preservation of naturally occurring affordable housing and suggest the building of more now! I support providing info and assistance to people who are interested in subdividing. I suggest using rent increases as an indication that upzoning should occur.	7/17/2018
3729	36	/policies/innovative-housing-strategies/	Great!	7/17/2018
3730	16	/policies/environmental-impacts-of-transportation	Achieving greater housing supply and diversity is an important goal, particularly as the population of the city grows. Greater housing supply and diversity alone, however, is insufficient to solve the city's housing problems. In addition to supply and diversity, the city needs to encourage housing that is affordable for low and middle income households. Allowing developers to build 4-unit dwellings does not address the affordability problem. Instead, it will encourage builders to replace single-family homes with luxury 4-unit dwellings that are just as unaffordable to low and middle income families as the single-family homes being replaced. The plan does not adequately address the affordability component of the city's housing problems.	7/17/2018
3731	40	/policies/homelessness/	Finding action strategies that work is the challenge! Hoping we develop new, improve on some of the existing and end up with an array of effective ones.	7/17/2018
3732	37	/policies/mixed-income-housing/	I support increasing the availability of non-motorized modes of transit. I support prioritizing pedestrian safety. I would like to see more car-sharing services.	7/17/2018
3733	38	/policies/affordable-housing-near-transit-and-job	We have a responsibility to make sure everyone has a safe place to sleep at night.	7/17/2018
3734	66	/policies/air-quality/	Mixed income housing creates mixed economic, cultural, racial and other types of diverse neighborhoods, which is good for all. The social good is the ideal we need to recreate in a new form.	7/17/2018
3735	33	/policies/affordable-housing-production/	Makes all kinds of sense.	7/17/2018
			I support this policy and the action steps. I support putting cars on lower-use streets and making Hennepin Ave. bus-only. We need to start prioritizing the needs of public-transit users.	7/17/2018
			I'm concerned that not enough is being done to provide affordable housing. Providing more housing options is a good start, but how does that work? I wish that there were links to research articles that showed how other cities are working on this problem, since it's a problem across our country.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3736	66	/policies/air-quality/	We need aggressive carbon-neutral planning.	7/17/2018
3737	0.1	/topics/land-use-built-form/	We are a family of four and own a duplex on 34th and Girard Ave So. We oppose the plan for interior 1 development in our neighborhood. We currently have a mix use area of single family homes, duplexes, condos and apartment buildings and tearing down existing well established and unique properties for more rental housing with absentee landlords will not build the character and sustainability of the neighborhood.	7/17/2018
3738	69	/policies/renewable-and-carbon-free-energy/	I support increasing renewable energy. I would also stress that we should not prioritize solar access over affordable housing.	7/17/2018
3739	31	/policies/creative-workers/	Allow for Minneapolis Community and Technical College be free to all residents of Minneapolis, even if it requires to raise the city tax.	7/17/2018
3740	2	/policies/access-to-employment/	I support this policy, but would stress that we also need to prioritize equitable transit options including express buses capable of taking downtown residents to suburban jobs. Many job opportunities exist in the suburbs and low-income residents do not have access to them.	7/17/2018
3741	49	/policies/educational-and-economic-access/	Allow for Minneapolis Community and Technical College be free to all residents of Minneapolis, even if it requires to raise the city tax.	7/17/2018
3742	44	/policies/comprehensive-investments/	Many of these actions and goals need government and community intervention with the market. Otherwise we end up with all the poor being pushed out, which of course is happening in Mpls.	7/17/2018
3743	1	/policies/access-to-housing/	Please do not allow 4 Plex zoning as it will destroy cultural heritage homes and replace it with cheap modern day buildings which have to be torn down 60 years from now.	7/17/2018
3744	19	/policies/bicycling/	Please add more bike lanes and create more bike streets as that will lead to more people biking and make it safer for bikers, cars and pedestrians. I live at 24th x Bryant and we see many accidents every week because parked cars block the view for people on Colfax and at the alley. With the new bike lane coming this summer, people will not be able to park on 24th this making it all safer.	7/17/2018
3745	0.1	/topics/land-use-built-form/	We are a family of four and own a duplex on 34th and Girard Ave So. We oppose the plan for interior 2 development across the street from us given we currently have a mix use area already of single family homes, duplexes, condos and apartment buildings and tearing down existing well established and unique properties for more rental housing which can take more than one lot, increase height, and have absentee landlords will take away the sustainability of the neighborhood. The old single family homes and duplexes in the neighborhood including between 36th and 31st and Hennepin would be torn down for apartments and would not support home ownership. There would be a shortage of homes in the area and the eclectic businesses in homes along Hennepin would be gone that are core to the neighborhood.	7/17/2018
3746	20	/policies/transit/	Increase routes. Don't eliminate or consolidate routes. Decrease wait times across all routes. Free for all students in Mpls schools. Have security on bus routes in evening.	7/17/2018
3747	93	/policies/stewarding-historic-properties/	Yes, please protect historic properties, homes and landmarks as it reflects our culture. Offer programs and subsidies to make old homes more energy efficient.	7/17/2018
3748	0.1	/topics/land-use-built-form/	We are a family of four and own a duplex on 34th and Girard Ave So. We oppose the plan for interior 3 development across the street from us given we currently have a mix use area already of single family homes, duplexes, condos and apartment buildings and tearing down existing well established and unique properties for more rental housing which can take more than one lot, increase height, and have absentee landlords will take away the sustainability of the neighborhood. The old single family homes and duplexes in the neighborhood including between 36th and 31st and Hennepin would be torn down for apartments and would not support home ownership. There would be a shortage of homes in the area and the eclectic businesses in homes along Hennepin would be gone that are core to the neighborhood.	7/17/2018
3749	1	/policies/access-to-housing/	Action step "e" seems unwise and will destroy the character of the current primarily single family neighborhoods which are vital to keeping many families within the confines of the city instead of moving to suburbs. The availability of such family friendly neighborhoods is something that makes Minneapolis the wonderful city that it is, especially when compared to other cities of similar size such as Memphis. In addition, an unintended consequence of this policy will be to price new home buyers out of the market for single family dwellings. It is likely that developers will purchase the least expensive and smallest homes in these neighborhoods for construction of multifamily rental dwellings, leaving only the larger and more expensive homes available for purchase by individuals. In the end this policy could also lead to a decline in property values for these parts of the city, affecting property tax revenues for the city. I strongly oppose this policy proposal and hope that it can be eliminated.	7/17/2018
3750	47	/policies/housing-maintenance/	As a long term resident and homeowner in Minneapolis, one of my biggest concerns as I age is not being taxed out of my house. Based on comments that I have seen on social media, this is a big concern for many long time home owners.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3751	0.1	/topics/land-use-built-form/	We are a family of four and own a duplex on 34th and Girard Ave So. We oppose the plan for corridor 4 development on 36th through 31st and Hennepin as the eclectic businesses in homes along Hennepin would be torn down for large scale rental properties that will take away from the character and diversity That is core to the neighborhood. We do not want to become a downtown Minneapolis where good old and unique buildings are torn down losing the character of the area. Also, stop having rental properties built and provide more condos and homes to be built where people can really own their own home in the neighborhood.	7/17/2018
3752	14	/policies/tree-canopy-and-urban-forest/	Consider trees that will be more resilient to climate impact as part of your planning and avoid monoculture.	7/17/2018
3753	20	/policies/transit/	Section b talks about working with regional partners. Public transportation between the city and its suburbs has not been good historically. This makes it harder for some lower income residents to look for jobs in the suburbs. It would be nice to see improvements in this area as well explore options for people who work non traditional hours.	7/17/2018
3754	19	/policies/bicycling/	Consider safety when designing bikeways. There is one bikeway for example on Dowling near 94 where the bicycle and a driver entering the turn lane would have to cross over each other to the correct lane which is dangerous for the cyclist.	7/17/2018
3755	82	/policies/aging/	Transportation is very important to an aging population. My elderly parents moved to a small town because they did not feel comfortable driving in the city and there were few transportation options for them.	7/17/2018
3756	1	/policies/access-to-housing/	Please. Please. Please. Don't start allowing 3 or 4 unit dwellings to be built on existing residential blocks that only allow single family homes. We have amazing neighborhoods of single family homes that shouldn't be disrupted by multi-unit buildings. Adding a single 4 unit dwelling to any given block will drastically increase the number of vehicles parked on the street, they will need to build up rather than out, creating tunnel vision for existing houses.	7/17/2018
3757	20	/policies/transit/	Other than the fact that you should extend this comment deadline, I don't believe these goals don't say enough about creating more transit infrastructure. Let's right the wrong of removing all the street car lines, and actually create a metro Transit system that can support the true needs of our future. Look into underground subways even. Build more light rail lines. Stop worrying so much about installing heating elements and expand the transit network as fast as possible.	7/17/2018
3758	75	/policies/waste-reduction/	Please find a way to eliminate plastic bags from our city. Also, I've worked downtown for close to ten years, and constantly hear that nothing gets recycled through our buildings recycling program (have worked in three major buildings downtown). Please make sure these buildings are being environmentally responsible. Additionally, our cities recycling education programs are an absolute joke. Please do outreach and education that actually works (a simple mailer isn't going to cut it or make more people care).	7/17/2018
3759	28	/policies/msp-airport/	Take-offs over the city need to be reviewed. Altitudes seem lower over the last 5 to 10 years, and the city is being taken advantage of by the airport. There needs to be a better way to mitigate airport noise and how it's affecting our city. Some flights are as loud as 80+ Db at remote monitoring tower 8, not far from our home. Well out of range of the DNL contours.	7/17/2018
3760	0.1	/topics/land-use-built-form/	I have spent most of my life in this beautiful city. The 2040 Built Form drawings are extremely depressing and even insulting. The buildings are drab and without any character. In very short time they will look unappealing. I understand new trees will be planted but uprooting so many old trees will completely change the look and feel of this city. Minneapolis is defined by many things but one of those things is our incredible canopy--not many major cities compare. The press to to replace single family homes with four-plexes and apartments will only add to suburban sprawl as some, or even many of us, will leave as the city is slowly destroyed. Never thought I would want to live in the suburbs but the 2040 plan is so unappealing that the suburbs are now calling. We won't be the only family to leave. If 2040 comes about as depicted in these Built Forms the city will lose many families and even single people who don't want to live in such high-density. I live on a street with poor and middle-class families in Kingfield. Some people are struggling but the street is still so beautiful. I walk out the door or sit at the kitchen table with the back door open and hear so many birds--but the birds will disappear from neighborhoods. Concrete is not a friendly habitat. This plan is so sad and so destructive. I never, ever imagined this city I grew up in could be so disappointing in it's planning. The lack of communication (I've had 6-7 weeks to digest what has allegedly been in the works for years) is beyond frustrating and has created a deep sense of distrust. I am all for some change to help us grow but completely opposed to this plan in it's current draft state.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3761	0.1	/topics/land-use-built-form/	<p>The most significant part that didn't happen was for the planners to represent ALL of Minneapolis in the initial conversation about the plan in 2016. There were only meetings at the North Commons and the Global Market. You did not have a conversation with southwest minneapolis-now that is a wrong you should right. Mayor Frey received many of his votes from our community and it is important for him to hear our voice. By not hearing our voices and engaging in conversations with us, he is making a BIG divide in the city. I heard he was at an event for Neighbors for more neighbors and he was cheering when Southwest Mpls was stereotyped with prejudiced comments such as elitist, racest..etc, etc. How horrible!! Please spend some time in our neighborhoods, at our block parties and have a conversation with us so you will see that we are loving, compassionate, caring neighbors who stand up against police brutality and for black lives matter. AND YET MAYOR FREY, LIKE THE CURRENT POLITICS OF THE NATION, DIVIDES OUR CITY BY THIS 2040 plan and just telling us what's going to happen to our neighborhoods instead of upfront asking us what do we like about our neighborhoods, what works for us, what do we want changed? Mayor Frey, Lisa Bender and Heather Worthington, why do you think we bought houses in the city and not in the suburbs?? Because we can have COMMUNITY with our neighbors and have our own little gardens and our patios to connect with our wonderful neighbors...but your plan that divides minneapolis will take away so much green space in our yards and will take away old beautiful trees, and take away our SFH communities that we love so much. If we wanted the urban density, we would have moved to Uptown. Lisa Bender reminds me of our current leader of the US that is myopic in his views. Lisa bender said at the Ward 10 meeting that she loves uptown with the 80% renters and 20% SFH and that we will all be OK when our neighborhood turns out like hers. She myopically thinks that just because she likes it, we all will like it, and she would never say to us, "I get how you like one way of living and I like another way of living" so that we would feel listened to about our concerns with the 2040 plan. That is such a one size fits all way of thinking. No we won't, if we are not represented, if you don't have a conversation with us and listen to our comments then MPLS will not be united and you will further the divide us mineapolitins.</p>	7/17/2018
3762	5	/policies/visual-quality-of-new-development/	<p>C. Define durable.100 years? 25?</p> <p>G not regarding physical community characteristics is to possibly ignore what makes each community or neighborhood feel unique. Concerned that there is not much here that encourages reuse and repurpose of existing structures, which would not be affordable to construct today. Lets not repeat the mistakes of the past and fail to see value in some of the unique amd quality built assets that already exist in our city.</p>	7/17/2018
3763	17	/policies/complete-streets/	<p>Most people who have cars are not going to give up their cars. Our current public transportation system is not extensive enough to support a plan that puts so much emphasis on biking and public transport. I have a good job but absolutely need a car. Also, our family went through pediatric cancer and we were constantly driving our child to and from the hospital. These unfortunate things happen and families need cars. If families have children in sports then families need cars. I could write a long, long list of why cars are needed. This is also Minnesota and it's very unrealistic and poor planning to have so much focus on biking. I am very opposed to this policy.</p>	7/17/2018
3764	33	/policies/affordable-housing-production/	<p>Proponents of the plan admit that the affordable housing will not happen right away. One-bedroom units in a four-plex will allegedly run from \$1,200 to \$1,500 for monthly rent. I am an established home-owner with a decent job but could not afford that amount for RENT, no equity building! This plan does not state when the trickle down will actually make affordable housing available. When? 10 years, 20 years? Studies have shown that attempts at high density in other cities actually lead to more displacement of poor people. It seems there really is no concern for affordable housing, it's just a front for a larger tax base for the city. And money for developers, of course. I am opposed to this policy.</p>	7/17/2018
3765	33	/policies/affordable-housing-production/	<p>Adding luxury high-rise apartment buildings will not create affordable units. Please require a certain percentage of affordable and low-income units in these new buildings. When the luxury buildings go in, the rents of adjacent properties get raised too and people are priced out. This housing instability is hard on lower income people. Affordable units should be spread out over all neighborhoods. Please consider affordable condos and affordable small starter houses. With a Mortgage ones rent doesn't rise unpredictably and this also stabilizes the neighborhood.</p>	7/17/2018
3766	34	/policies/affordable-housing-preservation/	<p>During the recession a lot of modest starter homes were converted to rentals and butchered by absentee landlords. How can the city help potential homeowners convert them back? Buy them back and fix them up before they fall apart from neglect. Can we convince people renovating old apartment buildings to retain affordability?</p>	7/17/2018
3767	35	/policies/innovative-housing-types/	<p>Accessory buildings would not fit on the small lots in our neighborhood. Please keep green space around buildings and include storm water management like native rain gardens.</p>	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3768	37	/policies/mixed-income-housing/	Yes, please integrate our housing. Please include affordable and low income housing in all neighborhoods. Affordable row houses that are only 2 stories or small duplexes where each side is owner-occupied make a lot of sense.	7/17/2018
3769	0.1	/topics/land-use-built-form/	I am Barb Combs. I have lived at 2624 29th Ave South for 31 years. I am not happy about having any kind of apartment complex on my block whatsoever. The traffic will be terrible and there will be no parking on our block. I would like it to stay residential like it is. This isn't downtown Minneapolis.	7/17/2018
3770	41	/policies/tenant-protections/	Inspect properties more often. You may need more inspectors.	7/17/2018
3771	74	/policies/integration-of-water-management-into-	Yes! Include the use of rain gardens and native plants and trees to offset the problems created by so many buildings and concrete.	7/17/2018
3772	0.1	/topics/land-use-built-form/	Please work to build a "land bridge" over 94 to reconnect Seward and the West Bank. Imagine how much housing and new business corridor could be created! It would reconnect the neighborhood and make more valuable real estate for the city.	7/17/2018
3773	73	/policies/stormwater-management/	Add more green space with rain gardens and native plants all over the city. Not just near the river, streams and lakes. Use these to filter and absorb rain water and offset the effects of so much concrete. Discourage the use of chemicals and herbicides.	7/17/2018
3774	65	/policies/urban-agriculture-and-food-production/	Include native fruit-bearing trees like Serviceberries in parks and boulevards.	7/17/2018
3775	70	/policies/ecology-and-habitat/	Yes, please! We need more natural areas and pollinator corridors. Please convince the Railroads to allow low-growing native vegetation and stop the use of herbicides.	7/17/2018
3776	13	/policies/landscaping/	Yes, please! Also encourage the use of native plant rain gardens to deal with runoff. Tall grasses are trendy right now, but more variety is better for pollinators and other wildlife. I think using only annuals is wasteful. Please encourage the use of a variety of plants native to our area. How can the city help homeowners with boulevard gardens that filter storm water and create pollinator habitat?	7/17/2018
3777	62	/policies/contaminated-sites/	Please keep neighbors effected by pollution informed of risks and ways to mitigate the problem. It is frustrating to learn way too late.	7/17/2018
3778	71	/policies/soil-health/	Add native plants to hold the soil and filter out contaminates.	7/17/2018
3779	32	/policies/arts-in-community-development/	Lovely! Art and beauty help make it feel like a community and a good place to live. Provide positive artistic outlets for people of all ages. Theater is a great learning tool. Actors learn to understand people of different backgrounds. Useful math helps build sets and costumes. Writers and painters express concerns in positive ways.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

			<p>My name is Kristin. I am a Seward resident. I am also a landlord that has rented multiple homes in Seward and Phillips neighborhoods where I provide very affordable housing to 25 Minneapolitans. Rental prices are out of control and I get that. There is not enough supply and there is a lot of demand. Yet, I feel that the way the Comp Plan is proposing to address this very serious issue is misguided and can potentially take the city in a direction that makes it a less livable place for many of us. I feel that the plan over-reaches in its plans for density in some cases and disregards what many citizens want to see in their neighborhoods.</p> <p>Where I live " along the greenway at 29th Av S " is identified in the plan to allow 6 story residential units. I find it very problematic that the area between 27th Av S and 36th Av S along the greenway has been identified as Corridor 6. The description in the Comprehensive Plan is that this district is "typically applied along high frequency transit routes as well as in areas near METRO stations." That description does not fit this area at all. The bicycle greenway is not a high frequency transit route. The development proposed here is the same development that is proposed along the main commercial corridors of the neighborhood " Lake Street and Franklin Avenues. The neighborhood as it exists today is a sleepy corner of Seward and Longfellow because of sharing the neighborhood with industrial neighbors. Unlike residents who live along Franklin and Lake, residents in this neighborhood are not already living adjacent to a vibrant commercial corridor where one could expect increased density and height of residences. Rather, the opposite is true. This area alongside industrial neighbors actually is in effect less residentially dense than many of the "otypical" neighborhoods in Seward and Longfellow. To go from such low density to the type of density one would normally experience alongside major transit and commercial corridors is shocking to the people who live here.</p> <p>There have been efforts over the last ten years to increase residential density in this neighborhood. Nine years ago, the city attempted to rezone 29th and 30th Avenues along the Greenway to allow four story buildings. That proposal alone disregarded the opposition to high density housing by residents as documented in the Small Area Plan. The neighborhood successfully organized to keep the zoning along the greenway to a reasonable OR1 which was consistent with the small area plan of offering live/work opportunities near the greenway. When my neighbors learned of the current plan to allow six story residential units to be constructed, the reaction was the much the same as it was nine years ago. Although residents differed on what they wanted to see along the greenway (for example some feeling that more housing was necessary, but six stories was too high and others preferring to see no change), there was unanimous concern about the extraordinary height of the proposed buildings. Residents expressed this concern to the Seward Neighborhood Group Community Development Committee in June 2018.</p> <p>Frankly, these types of extreme proposals make residents like me feel that the city does not care what the people most impacted by changes feel. Rather, it feels like the city is hearing what developers want and going for it " the bigger, the better. I understand that the city is facing an affordable housing crisis. However, simply increasing the supply of houses " irregardless of the current uses of parcels and the character of the neighborhood " does not guarantee affordability. I feel it is essential to increase the number of housing units in the city,</p>	7/17/2018
3780	0.1	/topics/land-use-built-form/		
3781	53	/policies/quality-of-life/	Arts and gardens enhance Communities and give them a unique flavor.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3782	0.1	/topics/land-use-built-form/	<p>Continued... Starr page 2</p> <p>This plan seems to rely on developers' ideas of how to make affordable housing. But there are other ideas out there which might be smaller scale on an individual parcel level, but have a broader impact and can also serve to retain the financial benefits of making increased housing to average residents. For example, how can the city make it cheaper and easier to build an ADU behind one's own home? Why not allow ADUs behind rental properties? ADUs keep a cute neighborhood feel while still increasing available housing and letting regular home owners become small scale landlords.</p> <p>The fourplex plan is also potentially an idea that can retain a neighborhood feel while still increasing density. It's too bad that the city has repeatedly downzoned neighborhoods so that fourplexes and triplexes (and sometimes duplexes) were not allowed and forced residents who have "illegal" multifamily housing to re-convert to single family. I think there ought to be assistance to residents who were previously affected by the city's downzoning and had to convert their houses from duplexes and triplexes down to single family home because there was no way to make those additional dwellings legal due to the zoning code. In my experience, there were a lot of regular working class people (many in Phillips neighborhood) who had to, at great expense and with the full might of the city's regulatory authority threatening them, jump through many hoops to unconvert their homes from illegal duplexes and triplexes. If the city is helping developers by providing tax credits, etc., they should also help these homeowners who have worked hard to comply with previous city orders to make their houses less dense, just to have the city change course and basically allow any house to be a fourplex. Allowing more triplexes and fourplexes, with reasonable set back and yard requirements, can be a wonderful way to keep a neighborhood feel and increase density while at the same time keeping the financial benefits of increased density/ more rental units in the community.</p> <p>Let's help residents turn their houses into extra income and make housing at the same time. Let's help elderly folks who want to stay in their own home convert their place into a duplex or triplex, or build an ADU for their adult child or an aide to live in. That keeps our neighborhood elders in place and adds to people to the neighborhood, too. Unfortunately, it is very difficult to do business in Minneapolis for the average person. The number of rules can be mind boggling. It is not an easy process to go downtown and pull a permit. At times, there are so many rules that city staff contradict each other. It's hard to expect an average person to successfully build in the city, which leaves the task to big developers who can jack prices up as high as they want and pocket their profits. Perhaps the city needs to create a small homebuilders office similar to the new the small business office to help people who are not professional home builders convert their homes to multi-unit property. Perhaps the city needs to pair that with financing similar to the 2% loan for businesses or the interest controlled home improvement loans for home owners which many neighborhood organizations offer.</p> <p>Another step in the direction of creating actually affordable housing would be to allow people who purchase registered vacant houses that would otherwise be torn down to pull their own permits to do work on the house when they guarantee they will live in the house for a certain amount of time. The city's rule requiring having a licensed contractor in order to fix these houses up basically results in the house</p>	7/17/2018
3783	0.1	/topics/land-use-built-form/	<p>Continued...Starr page 3</p> <p>These types of policies have greatly contributed to the affordable housing crisis in this city. The city needs to look at these and change them as part of this comp plan, rather than giving carte blanche to developers.</p> <p>The comp plan is filled with laudable goals " including the very important goal of increasing affordable housing. There are ways to increase density that are not so radical and which can also result in wealth building by regular people who own homes here in the city. Let's try to solve the affordable housing crisis by helping families invest in their own communities, build equity, and keep our neighborhoods intact and neighborhood wealth in our neighborhoods.</p>	7/17/2018
3784	47	/policies/housing-maintenance/	Yes. I'm not sure if home owners are aware of the resources available. Are there ways to reach them and offer advice?	7/17/2018
3785	94	/policies/heritage-preservation-regulation/	Will the "Development" enhance the historic nature of the site or destroy it?	7/17/2018
3786	96	/policies/heritage-preservation-recognition/	Please expand Heritage to include areas that have meaning beyond architecture, that have meaning to the community.	7/17/2018
3787	84	/policies/public-safety/	An expanded and modernized 911 Center that is flexible and adaptable to new technologies and practices that isn't hamstrung into a sub basement location would be a good start.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3788	0.1	/topics/land-use-built-form/	<p>Consider reducing setback requirements for Interior 2 vs Interior 1, as Interior 2 already presupposes allowing for combining of parcels.</p> <p>Honestly, one of the BEST neighborhood styles in the US is the historic East Coast brownstone row-houses (boston, balto, philly, NY, DC, etc.) many of which abut the sidewalk more or less directly. They create vibrant and terrific walkable neighborhoods. For example, there are similar builds near the Spyhouse Coffee shop off Nicollete and they are an excellent fit for the city. There needs to be some zoning allowance for this type of urban landscape.</p>	7/17/2018
3789	38	/policies/affordable-housing-near-transit-and-job-	<p>From what it appears the blue line and green line housing developed does not fit the category of affordable, why would this plan be any different</p>	7/17/2018
3790	25	/policies/innovations-in-transportation-and-infras	<p>This focus on implementing equitable transportation innovations is welcome. The city should move aggressively to include equity and a rapid move away from gas engines--and associated environmental injustice in its planning. This can include siting for EV charging, encouraging affordable, accessible and non discriminatory ride shares, support for rapid electrification of the bus system.</p>	7/17/2018
3791	0.1	/topics/land-use-built-form/	<p>This plan will destroy the character of my neighborhood. My street as Interior 3 would be converted to multistory apartment buildings. I strongly oppose this plan.</p>	7/17/2018
3792	15	/policies/transportation-and-equity/	<p>Walking and biking to carry multiple bags of groceries for my family is ridiculous. And in the winter! I strongly oppose this plan. Real people still need to drive.</p>	7/17/2018
3793	82	/policies/aging/	<p>I am excited to see the thoughtful content of this policy. It appears to be far-reaching in looking at the basic needs of older adults and also looking at wellness in its entirety for this population. I have been an advocate for vital aging as a fitness trainer and balance and mobility specialist, working with people over 60 - for the past 35 years. As part of the Vital Aging Network, I work to create grassroots wellness initiatives that the (currently in Phillips) that the residents of the community own and grow. Good job, Minneapolis!</p>	7/17/2018
3794	18	/policies/walking/	<p>Stop narrowing the streets. We need multi lane streets for driving and parking. Provide traffic lights and crosswalks for walkers. Enforce jaywalking laws</p>	7/17/2018
3795	58	/policies/business-districts-and-corridors/	<p>Lake Street needs to be a priority in revitalizing.</p>	7/17/2018
3796	0.1	/topics/land-use-built-form/	<p>Please do NOT move forward with this "one size fits all" plan to re-zone every single lot in the city to allow for multi unit dwellings. It seems like the few in the city Council have decided for the many that live here what is best for everyone. Certainly there is room in our great city for neighborhoods of single family homes and areas where multi unit buildings make sense. There doesn't seem to be any good reason for the entire city to be zoned for multi unit buildings.</p> <p>Bob Wiesner Fulton.</p>	7/17/2018
3797	0.1	/topics/land-use-built-form/	<p>Sadly we are now entering the Hong Kong phase of development on and near the Lakes area and at Lake/Hennepin and the developers will now feast.</p> <p>My BIGGEST question is with the property taxes for the single house we paid through the nose to own here -- will these property taxes still go up?</p> <p>AS WELL AS -- will this new congestion make life unbearable? -- will we be spared the unavoidable increase in crime? -- can we even get around anymore?</p>	7/17/2018
3798	33	/policies/affordable-housing-production/	<p>There needs to be better defined policy language around the economic models of new development and preserving affordability - both at the scale of the 4plex and at the scale of high-rise multifamily. I'm excited about the upzoning proposals in existing single-family neighborhoods - the 4plex model of development lends itself to gradual densification and seems less prone to luxury-based gentrification than larger development. But we still need larger development to meet the spectrum of housing needs - 4plexes alone aren't going to get us there as a city. The common rebuke around the comp plan (mostly coming from white people with housing security) is that this is simply a developer-driven proposal that will result in more luxury housing like that we see going up every day in Uptown. I hope the city can articulate policy measures to rebut this. Will there be inclusionary overlays? Developer mandates? Rent controlled units? There are nuanced discussions to be had around each of those strategies, but let's have the discussion vs talking about "expanding tools and resources"</p>	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3799	20	/policies/transit/	I am concerned that transit includes taking people from Mpls to the suburbs. I work in Bloomington and it takes 3-4 times longer from me to take a bus to my work. Therefore, I drive. Also, we need transit to shopping areas or other venues that are outside of Mpls. It be great to be able to take transit to visit friends or do errands. It's just not possible now. I hope this transit plan will actually work.	7/17/2018
3800	17	/policies/complete-streets/	Minneapolis should inventory all car parking within city limits (public and private) and set a goal to reduce the amount of parking significantly. It should then pursue that goal by reducing on-street parking, further eliminating parking minimums, and by setting prices for parking on public rights-of-way that more closely reflect its cost. Eliminating parking on one side of residential streets for (protected) bike lanes, or for narrower streets and wider boulevards (ideally, a street-network- and neighborhood-friendly combination of these), will promote the city's goals for climate, connected neighborhoods, and increased use of sustainable transportation modes.	7/17/2018
3801	1	/policies/access-to-housing/	I am opposed to allowing small-scale residential structures on traditional size city lots with up to four dwelling units such as 3-4 unit apartments. I think those neighborhoods with primarily single family homes should stay that way. The housing stock should be improved, flipping homes should be controlled, tear-down and rebuild should be monitored. The deteriorating housing stock that is forfeited to the city should be offered as affordable housing to those residents who could put a combination of money and sweat equity to make homes for their families and improve the neighborhoods. Perhaps the dollar house plan from the 70's and 80's should be reworked for today. Also it shouldn't be so hard to get rid of slum landlord's that don't take care of their property, these properties seized from these type of landlords' could be offered to the tenants perhaps as a coop purchase so that they could stay where they are and improve the property instead of moving them on and selling to developers who build cheap construction high rent apartments and then sell them to make a lot of money abandoning the tenants.	7/17/2018
3802	33	/policies/affordable-housing-production/	Families want houses, Minneapolis is not a city where families live out there lives in apartments like NYC. We need to make sure our infra structure can handle this increased population, right now the public transit system is poor at best. People don't want to ride slow, dirty busses with unruly passengers whether they are unmonitored teens, intoxicated or homeless people that have no where to go except riding the bus, especially in the winter. All these things and more need to be solved before the general population is going to ride public transit rather than driving.	7/17/2018
3803	47	/policies/housing-maintenance/	Rent increases need to be tied to code compliance and recurring inspection / enforcement. The ordinances the city passed in the wake of Frenz / Zorbalas were reactionary to their specific abuses, and did not go far enough in keeping slumlords out of the city entirely. As the rental market continues to inflate into objective unaffordability, property owners are able to push "cost of living" increases onto tenants without making any basic improvements to the property. If slumlords were forced to rehab their rental portfolios to meet basic living standards before they were allowed to charge \$1K for a studio, it would help to drive incompetent and abusive property managers out of business.	7/17/2018
3804	1	/policies/access-to-housing/	I disagree that Franklin Ave should be designated as a Corridor 4 from Hennepin to Kenwood Parkway. For most of this section the avenue is lined with single family houses and is surrounded by similar single family neighborhood and redesignation as a Corridor 4 would significantly change the flavor of Kenwood, Lowry Hill, and East Isles neighborhoods. Please consider downgrading Franklin Avenue to Interior 2 in the proposal.	7/17/2018
3805	0.1	/topics/land-use-built-form/	This is not a policy of merit. Basing the cities economic policy entire on idealism that has no real world data supporting the agenda is wildly negligent, and for some, i believe will end political careers.	7/17/2018
3806	1	/policies/access-to-housing/	I fail to see how building multi-family rental units achieves goals of affordability and diversity. Why is not the city encouraging home ownership through equitable mortgage practices and a good look at how the real estate tax system is affecting affordability of small single family dwellings? If the small homes in neighborhoods furthest from downtown were not assessed as high as they are, there would be more on the market and they would be more affordable.	7/17/2018
3807	33	/policies/affordable-housing-production/	I think the new single-family homes (McMansions) being built in Minneapolis are too large for the lots and often look cheap and out of place. We have one partially built home on our block that has sat unfinished and unworked on for at least 3 years. The city hasn't come close to working out all of the issues that have arisen in the last decade of new building, and that leads me to be very skeptical of the city proposing building fourplexes on these same size city lots. It's too big and too much for these very small spaces. Instead, why not provide incentives for folks to turn their garage spaces (or spaces above their garages) into mother-in-law apartments for rental.	7/17/2018
3808	38	/policies/affordable-housing-near-transit-and-job-	Individuals and families need affordable housing. An across the board percentage of their income. Not what building owner decides is affordable (I.E. \$1000 for a one bedroom apt.)	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3809	1	/policies/access-to-housing/	<p>The goal should be to have affordable access to home ownership. This new plan does not accomplish that. It actually makes home ownership more difficult and more expensive. Putting in Fourplexes in single unit dwelling locations will make single unit houses much less prevalent and so in higher demand with even higher prices. Moreover, who will own those fourplexes? Will the people living their own them? Or will rich developers own them? And how are you going to ensure the rent in those fourplexes is reasonable? Look at the rent in all the new apartments in uptown, it's not affordable for most people. That will just happen if you put in fourplexes and apartments in residential neighborhoods. We need plans to help average people achieve home ownership. Programs like Habitat for Humanity are great for example. I don't have all the answers, but this plan is not it. It will actually make home ownership more difficult and more expensive and our goals should be the opposite of that.</p>	7/17/2018
3810	10	/policies/street-grid/	<p>The city needs to reconsider whether and how the designated uses of the street grid advance its other goals. In particular, free on-street parking subsidizes car ownership for people at all income levels. This is inequitable, contrary to climate goals, and promotes car ownership contrary to the City's modal priorities.</p> <p>The city should evaluate methods to reduce or eliminate free on-street parking to encourage other modes of transportation, encourage private property owners to provide parking if they desire it, and make the public right-of-way available for other, superior uses, such as bike infrastructure, or narrower streets that reduce the city's cost of maintenance.</p> <p>One method would be to require an annual parking pass city-wide, setting the fee at an appropriate level to recover costs and fund alternative transportation methods at an appropriate level, with exemptions at low-income levels. This will ensure the burden falls on those who can afford it.</p> <p>End parking subsidies for the wealthy and reclaim the public right-of-way.</p>	7/17/2018
3811	1	/policies/access-to-housing/	<p>Excellent, provided there are mechanisms in place to insure the housing will actually be affordable. What won't be helpful is a glut of luxury fourplexes.</p>	7/17/2018
3812	68	/policies/energy-efficient-buildings/	<p>All new buildings/housing should be required to have solar power and geothermal heating/cooling. Small wind turbine installations should be encouraged.</p>	7/17/2018
3813	17	/policies/complete-streets/	<p>Great start. I love the idea of a more bikable, walkable city.</p> <p>One caveat: for furniture, please don't use things that are antagonistic to homeless folks or folks living in overnight shelters. If someone wants to sleep on a bench, let them.</p>	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3814	0.1 /topics/land-use-built-form/		<p>This is the worst plan Minneapolis has dreamed up yet!! The only people that will truly benefit are the developers, as a Realtor I know how it works and I think people are naïve to believe that this will be for the greater good. I'm a lifelong resident, attended Kenny, Anthony and Washburn graduating in 1971.</p> <p>My parents both worked hard to purchase a very modest home. When I was in high school I would walk through Tangletown, dreaming that if I worked hard I would buy a home in what I believe is the most beautiful neighbor in SW Minneapolis. The unique layout along with each home architecturally different create a beautiful setting. We have worked hard and love our neighborhood, I can't imagine what will happen if this is approved.</p> <p>Historically Minneapolis is known for their poor decisions when it comes to tearing down areas that create a negative impact. Or allow businesses such as KMart to build blocking a main artery to go Downtown, creating urban blight. I find it interesting that you recently raised property taxes which you received a record high number of appeals and now you want to lower the value of our homes. That WILL be the result of this plan. Why would anyone want to live in a neighborhood where there is a multi-plex property next door.</p> <p>I encourage people to think carefully before supporting this plan. If employment is an issue for some, create job training programs and partner with companies to hire trainees. Develop the areas that have suffered! One stretch of land you may want to consider in SW Mpls is the Motels on Lyndale Av. If you could purchase those and create housing it would be create a welcoming appearance to the city. There are so many ways to look at this but not your current plan, it will not work.</p> <p>Mary Belfry</p>	7/17/2018
3815	1 /policies/access-to-housing/		<p>As a renter and a young person, I support the 2040 Comprehensive plan's policies to increase density and R4 zoning because I believe it is the best strategy to accommodate the demand for housing in Minneapolis, and to avoid displacement of low-income families and POC!</p>	7/17/2018
3816	0.1 /topics/land-use-built-form/		<p>This is the worst plan Minneapolis has dreamed up yet!! If employment is an issue for some, create job training programs and partner with companies to hire trainees. Develop the areas that have suffered! One stretch of land you may want to consider in SW Mpls is the Motels on Lyndale Av. If you could purchase those and create housing it would be create a welcoming appearance to the city. There are so many ways to look at this but not your current plan, it will not work.</p> <p>Mary Belfry</p>	7/17/2018
3817	0.1 /topics/land-use-built-form/		<p>This plan is clearly an effort for Minneapolis to sell out its citizens and neighborhoods to developers. The proposed changes completely disrupt established communities, and services ONLY to increase the revenue for the City of Minneapolis. This plan is disgraceful.</p>	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3818	0.1	/topics/land-use-built-form/	I am disappointed by the future land uses around the Prospect Park Metro Station. While I appreciate the built form districts, the production and processing land uses only one block from this metro station is a direct contradiction to policy 80 (Development near METRO Stations). I appreciate the need to preserve this type of land use in the city, however the addition a Metro Station means that this area must evolve. More of this area in Southeast Minneapolis near the Prospect Park Metro Station should have a different land use, even if this use is Production Mixed Use.	7/17/2018
3819	80	/policies/development-near-metro-stations/	As a resident of the Calhoun Isles area, I'm concerned about the proposed building of large apartment buildings, bring even more cars to a congested area. This seems to contradict item J...to minimize the impact of autos. Please reconsider allowing these giant buildings in an already congested area with no space for additional roads or cars. There is no guarantee all those people will only use the light rail.	7/17/2018
3820	0.1	/topics/land-use-built-form/	I don't mind the location of Interior 1 in most of Waite Park, as long as 4-units are actually allowed in Interior 1. Increasing density in Waite Park is crucial to enabling transit options.	7/17/2018
3821	1	/policies/access-to-housing/	This is my first read of the plan. Prior to reading this information I have only been hearing about "four-plexes" being allowed in the neighborhood where I spend most my time. (Linden Hills) I find it telling that people refer only to four-plexes when the plan also calls for the option of duplexes and tri-plexes. I think the singular reference to four plexes indicates a level of anxiety and initial opposition. (as do the "don't bulldoze our neighborhood" signs). My question is whether other cities have used this approach, and if so, are there examples of housing designs from these other cities that might show how such housing blends or fits in to neighborhoods that have traditionally been almost exclusively single family homes? I get the feeling people in this area area are conjuring up their worst image of what a four-plex looks like. Thank you for this work you are doing and sharing.	7/17/2018
3822	14	/policies/tree-canopy-and-urban-forest/	Please review current tree type, 1st it was all the same species, to replace elms, than ash now anythinglike12 species! on block. We should have 3 species diversity per block only	7/17/2018
3823	0.1	/topics/land-use-built-form/	I am strongly in support of the proposed built form districts. So many of the goals and policies in this comprehensive plan will only be achieved by allowing higher densities to be built in the city. With very few exceptions this plan has identified an appropriate level of density and uses for each part of the city. I strongly support the principles of this plan and will be greatly disappointed if the plan in weakened.	7/17/2018
3824	10	/policies/street-grid/	Let's get lake and Nicollet restored first	7/17/2018
3825	83	/policies/people-with-disabilities/	On 38th current development no handicap signs? We're do they park to use the system?	7/17/2018
3826	1	/policies/access-to-housing/	I am in strong support of increasing the density of housing, particularly allowing up to 4 units in neighborhood interiors. We can't increase density substantially without this provision, and more importantly, young professionals can't afford to buy homes on a standard lot. The ability to also have income properties on their lots changes the equation and enables more access to home ownership.	7/17/2018
3827	0.1	/topics/land-use-built-form/	I live in Minneapolis proper- ward 13. I do not like the portion of the plan regarding re-zoning at all. That entire thing you need to go back to the drawing board. First concentrate on improving mass transit, perhaps more light rail lines. Better bus system. Re-zoning to allow for condos, apartments over 3 levels, skyscrapers on Lake Calhoun - all poor ideas.	7/17/2018
3828	1	/policies/access-to-housing/	I live 1/2 block from 38th Longfellow, allowing 4, 4 plexus or 4 4 story buildings with limited parking will turn it into uptown, which everyone doesn't walk. Check the use, actual rented of all that's built along Hiawatha before you change the area. We have people renting on Ceder that have 3-6 cars and they park them in front of single family homes yikes, difficult to change unless all parking is permit. allowed after	7/17/2018
3829	1	/policies/access-to-housing/	This is bad policy. Current residents who'm live in SF zones do not want higher density. None of the 10 people I've talked to in South Minneapolis want a 4-Plex next door or even on the next block.	7/17/2018
3830	13	/policies/landscaping/	I am in favor but monitoring and enforcement, we already have vegetation over growing into sidewalks and in your face! Needs to be monitored by quick drive through. Some have dead and never printed. Ugh thanks	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3831	33	/policies/affordable-housing-production/	I live at 2938 Tyler Street NE. The lot next to our house has been vacant for at least 15 years (2940?). Please add a multi-unit 4 plex to this lot with a landlord that accepts Section 8 vouchers. There is a duplex on the other side and we are on the south side and would love to live next to multiple units that are designated for affordable housing. We reached out to try to buy the lot but never got a response. The push back against affordable housing is usually the neighbors who don't want it. Our block already has some affordable rentals and I don't see any pushback to adding more. I want more affordable housing everywhere including next to where I live and where I work. I work in Mid-City Industrial. I know it is production zoned but there are two vacant buildings the old Xpedx building and the Sears building that are vacant. Please find tenants for these buildings or turn them into affordable housing. Thanks!	7/17/2018
3832	34	/policies/affordable-housing-preservation/	It's important to note that most affordable housing is lost due to prices going up and affordability expiration dates. We need low cost tools to encourage owners to keep prices low while maintaining quality property. We also need to allow more buildings to get built!	7/17/2018
3833	66	/policies/air-quality/	<p>Minneapolis must look at modifying the incentives and market pricing of bringing cars into the city and operating them in the city limits. Where possible, and sliding according ability to pay, historically externalized costs should be imposed directly on those operating a car in the city. Revenues can be used to fund the sustainable transportation modes that will need to be supplied as an alternative to operating a private vehicle.</p> <p>This will send appropriate transportation price signals that will encourage individuals to make more socially beneficial choices.</p>	7/17/2018
3834	26	/policies/vision-zero/	<p>Minneapolis must look at modifying the incentives and market pricing of bringing cars into the city and operating them in the city limits. Where possible, and sliding according ability to pay, historically externalized costs should be imposed directly on those operating a car in the city. Revenues can be used to fund the sustainable transportation modes that will need to be supplied as an alternative to operating a private vehicle.</p> <p>Besides sending appropriate transportation price signals that will encourage individuals to make more socially beneficial choices, this will reduce the primary threat to the safety of cyclists and pedestrians because more vehicle trip miles will be operated by professional drivers.</p>	7/17/2018
3835	0.1	/topics/land-use-built-form/	I have lived on Chowen Avenue off of 50th street for 30 years. I am in my mid-sixties and had planned on remaining in my home for the rest of my life. According to this plan, my property, and those adjacent to it, will be rezoned for multiple family dwellings. I don't want to live next to a 4-plex. The very idea of it destroys the character of the neighborhood that I have enjoyed these 30 years. I feel this plan is forcing me to move during what should be my 'golden years.' The stress I am experiencing over likely having to move before the first 4-plex is built on Chowen, is adversely impacting my health. This is a shameful 'Thank You' from the City of Minneapolis for my having lived here & paying property taxes for 30 years. Frightening that you treat seniors in this way.	7/17/2018
3836	16	/policies/environmental-impacts-of-transportation/	(e) should expressly include consideration of congestion pricing downtown.	7/17/2018
3837	0.1	/topics/land-use-built-form/	<p>I am a resident of Minneapolis, and am completely opposed to this plan.</p> <p>We need to start over, as a city, and have a REAL dialogue about growth. The growth needs to be smaller than this, and we need to look more carefully at how to do it without the incredible waste of bulldozing current housing stock.</p> <p>Residents have some great ideas, such as repurposing the Lake Street KMart for dense housing. This would also address historical issues as it was originally put in to 'block' certain areas of the city from other parts. If redeveloped into attractive multistory rentals, that were affordable, it would do a lot to address affordability issues in a great part of the city with excellent restaurants (walking to Eat Street), very fast access to downtown, and also Greenway transit.</p>	7/17/2018
3838	1	/policies/access-to-housing/	So far, all the new apartments going up in the Uptown area are not affordable to the average income. Please consider ALL neighborhoods when incorporating affordable housing. Many residents have already been pushed out of Uptown due to housing costs going up.	7/17/2018
3839	1	/policies/access-to-housing/	I do not think it is fair that I may be forced to sell my home because I had the foresight to purchase a wonderful home that is near a Metro station. I love my house, and my neighborhood, and do not think we should be forced out by the city or by private companies who are simply trying to make money off of low income individuals. I already have a huge housing/construction project in my backyard, and do not want large fourplexes built next to me on our small lots of land. Single family home owners are a major part of this community, and I feel we are being ignored in these plans. We are the ones paying taxes, fixing streets and striving to make the community a better place, not just trying to make money. I plan on living in my home until I die (I'm 40 years old) and should have that right as a homeowner. Please keep us in mind as you review these plans.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3840	0.1	/topics/land-use-built-form/	You are ruining the historic neighborhoods that are in the heart of Minneapolis by pushing this plan forward. You have no regard for the homes that have been preserved for the last 100+ years by allowing large multi-family units in the Lake of the Isles and Kenwood neighborhoods. I am strongly AGAINST this plan and would be truly disgusted if it got approved. You are doing a major disservice to those who have been supporting this city through paying the most taxes and now we have no other choice but to move out West. Do yourself a favor and drive down Xerxes or France between 39th and 50th Streets to see how many houses are for sale in fear of this plan.	7/17/2018
3841	38	/policies/affordable-housing-near-transit-and-job-	I appreciate the focus on affordability and the specific linkage to transportation access. I am eager to see the specific and tangible steps the city takes to make affordability a reality. Increasing density accounts for some of the solution, but in addition we need active and specific supports for affordability that may include development requirements/quotas, incentives and/or penalties.	7/17/2018
3842	17	/policies/complete-streets/	I strongly support the emphasis on complete streets - thank you! I hope that the examples of other cities, including the "Superblock" concept out of Barcelona, will be used as models.	7/17/2018
3843	19	/policies/bicycling/	protected bike lanes and/or bike-only streets	7/17/2018
3844	10	/policies/street-grid/	I would love to see the city emphasize car-free streets as it explores the expansion or restoration of the street grid. Barcelona's Superblock model can serve as a guide.	7/17/2018
3845	33	/policies/affordable-housing-production/	Yes. Yes. Yes. Please share with the public the specific policy tools you will utilize to ensure that affordable housing is created and maintained. Will there be requirements placed upon developers?	7/17/2018
3846	1	/policies/access-to-housing/	This plan is a good start, but still sets too low a ceiling on the number of housing units allowed by right on most lots in the city. It also does not set minimums, which means the number of residents is functionally capped,artificially limiting access to and frequency/choice of transit and other amenities.	7/17/2018
3847	1	/policies/access-to-housing/	The currently proposed land use maps seem to replicate redlining, particularly west of Hennepin. We need a comp plan that not only stops treating historically redlined areas as different, but had actively redressed that part of our shameful past. We shouldnâ€™t be able to so easily spot the historically redlined parts of the city on the proposed land use map, unless itâ€™s because there is extra attention being given to spur an influx of homes and businesses to these areas.	7/17/2018
3848	1	/policies/access-to-housing/	A) in areas where there is the most antagonism towards more housing from the most privileged and wealthiest Minneapolitans, we need to allow for much more intense land uses, because the people who want to create homes and businesses will likely face a disproportionately costly legal and engagement process. More intense land use possibilities can help make this financial risk easier to take or with a greater possibility of recouping those costs.	7/17/2018
3849	82	/policies/aging/	It would be excellent for those of us who have paid for our homes, that the taxes do not negate our ability to live and keep our homes. I see nothing in this plan with pretty words and stats about keeping seniors in the homes that they have owned for 30+ years as taxes continue to rise exponentially. I see nothing in this plan that addresses the enormous tax levy that currently exists and continues to rise based on absorbent assessments taking homestead credits away. I can't help but wonder how many sat around the table and word smith this plan to death without some real actions steps. I see no "how" for us seniors that are not in assisted living or senior high rises.	7/17/2018
3850	1	/policies/access-to-housing/	B/C) when I read â€œallow multifamily housing [here],â€ what I understand is that weâ€™re banning it elsewhere. Given that we face an affordable housing crisis and climate change, and given how long it takes to build more housing, why are we limiting these more affordable and sustainable housing types to only a few corridors in our city? Why are we banning our most sustainable and appropriate land uses from the majority of land in Minneapolis? We need more intense land uses allowed everywhere in Minneapolis.	7/17/2018
3851	1	/policies/access-to-housing/	How does D dovetail with city efforts to undo the negative and long lasting consequences of redlining and downzoning if in effect we are saying that the only allowable housing types are those that were previously allowed under our structures of racism? If we truly care about racial equity, we need land use policy that undoes the grave and shameful harm implicit in the built form present in much of Lowry Hill, East Isles, Kenwood, and other parts of SW Minneapolis. One additional criteria for another level of land use planning should be whether the area (block by block) has a history of restrictive covenants, redlining, or the kind of low-density zoning that serves the same racist function as these, but less explicitly. When we â€œprotectâ€ â€œneighborhood characterâ€ or a given built form in white areas of wealth, we are choosing to use our legal system and our city policies to support racial segregation and legally exclude many long-marginalized people from huge swaths of the city.	7/17/2018
3852	66	/policies/air-quality/	I hope these plans are helpful in reducing pollution = keep it up	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3853	34	/policies/affordable-housing-preservation/	A strategy to create affordable housing: Instead of creating a full Inclusionary Zoning policy, explore the possibility of an opt-in approach with a reduction % in Property Taxes (subject to net increase of value) relative to % of affordable units proposed in the development. This should only apply to developments with greater than 99 units.	7/17/2018
3854	1	/policies/access-to-housing/	I am concerned that this policy does not go far enough to allow us to build the amount of housing we need. I am gravely concerned that the population forecasts do not adequately take into account our changing physical reality of increasing climate change, vis-a-vis a) an increasing but relatively unpredictable/unknown influx of new residents displaced by climate change, and 2) resource systems disruptions as climate change impacts not only resource procurement directly but also political systems and economics that we rely on for construction stability. We need to be "overproducing" housing now, given what we know we face with a minimum 1.5C temp increase by 2040 (per UN report leaked in Feb). And that's without addressing the emissions consequences from different levels of land use intensity and the modes of transportation they make feasible (higher=walking/biking/transit) or the dependency they force (lower=car & related low value/high cost infrastructure).	7/17/2018
3855	1	/policies/access-to-housing/	I think that these action steps are reasonable and appropriate. I had been concerned that Minneapolis would upzone some areas by too much, but it seems like most of these changes are incremental, and do little more than to revert Minneapolis to zoning similar to what it was in the 1950's. I think that increased density near shared amenities that public transit makes a lot of sense. I would welcome more of a mix of housing types. I hope that my children will choose to stay in Minneapolis when they become adults, and I imagine that they might like to live in a duplex, triplex, or four plex in our Southwest Minneapolis neighborhood - let's make those legal! And as I get older, I can envision wanting to move in to an apartment building in our Southwest Minneapolis neighborhood, let's make those legal too!	7/17/2018
3856	4	/policies/access-to-commercial-goods-and-service	I'd like to see an additional Action Step here: 1. Prioritize the implementation of protected bike lanes that connect Commercial areas to the existing bike network.	7/17/2018
3857	80	/policies/development-near-metro-stations/	I support all of these action steps, however I do want to make sure that we are upzoning incrementally. Portland has had a problem with upzoning too rapidly near their Public Transit hubs and it has made their housing market worse. See here: https://www.strongtowns.org/journal/2016/10/23/portland-housing-prices	7/17/2018
3858	0.1	/topics/land-use-built-form/	As a more-than-30-year resident at 2633 34th Ave S, and one who plans to live the rest of my life here, I am particularly concerned about the designation of 2648 34th Ave S as "Corridor 6", which would allow a building to be 6 stories high. This location, which is an effective cul-de-sac, is NOT AT ALL suitable for such a high density of living. The infrastructure in this area is almost entirely single house residential, with some 1-story buildings devoted to offices and light industry. It would be a stupid mistake to allow high density housing on this north side of the Greenway. The "business district" of the neighborhood is Lake Street, to the south of the Greenway. The only ways to get to Lake Street from 2648 34th Ave S, are either to go east on 27th Street more than 2 blocks, then south the 3 blocks to Lake Street, or else, to go north 1 block, then west 3 blocks to 31st, then south 4 blocks. Putting a lot more people in this location would mean a HUGE increase in the traffic on these small residential streets, especially 34th Ave S, and 27th Street. Generally it is pretty clear from the layout of the neighborhood in this area that NO SIGNIFICANTLY HIGHER DENSITY SHOULD BE PERMITTED on this north side of the Greenway, especially between 31st Ave S and 36th Ave S.	7/17/2018
3859	6	/policies/pedestrian-oriented-building-and-site-de	I strongly support the removal of off-street parking minimums throughout the city. This one action will significantly lower the cost of construction for new housing units, which will help with our housing shortage.	7/17/2018
3860	22	/policies/downtown-transportation/	I also strongly support not allowing any additional drive throughs, gas stations, and parking lots!	7/17/2018
3861	1	/policies/access-to-housing/	We should adopt congestion pricing to internalize the externalities associated with accommodating suburban commuters.	7/17/2018
3862	22	/policies/downtown-transportation/	I wholeheartedly support this proposal!	7/17/2018
			We should employ a time machine to go back in time and change the plan for the ongoing rebuild of 35W northbound into downtown to, at minimum, bury the entire stretch or better yet remove it entirely.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3863	6	/policies/pedestrian-oriented-building-and-site-de	I strongly support the removal of off-street parking minimums throughout the city. This one action will significantly lower the cost of construction for new housing units, which will help with our housing shortage.	7/17/2018
			I also strongly support not allowing any additional drive throughs, gas stations, and parking lots!	
3864	1	/policies/access-to-housing/	I support the increase in high density housing, particularly near downtown Minneapolis. I hope high density, mixed use developments can increase walk-ability and transit use in our city and I can live a low-car lifestyle.	7/17/2018
3865	34	/policies/affordable-housing-preservation/	If "NOAH" housing is removed for a new market-rate development, that amount + 5% must be added, and the developer must also pay for relocation assistance for the duration of construction, and the tenants may leave at any time.	7/17/2018
3866	7	/policies/public-realm/	I think that a lot of the niceness of the public realm has been lost due to our over-reliance of automobiles since the end of the streetcar-era. I think that devoting more space to humans and human-activities other than driving and parking would do the most to improve the public realm. The Northside Greenway demonstration project showed what a wonderful asset the street can be when the role of cars is reduced, or even eliminated from the street.	7/17/2018
3867	34	/policies/affordable-housing-preservation/	Allow the construction of SROs!!	7/17/2018
3868	8	/policies/public-safety-through-environmental-de	I like Action Step F, and would be interested to see such designs in action: Use innovative building designs and landscaping to limit or eliminate the opportunity for graffiti tagging.	7/17/2018
3869	33	/policies/affordable-housing-production/	<p>I believe I am in the top 5%. The way this looks in Mpls is that I live in a 3BR/1BA house in SW minneapolis with a family of 5. I am not complaining - I love our neighborhood and our home, but this is not luxury living. I feel like the mpls 2040 plan is for the lower class, against the upper class (me) and totally leaving out the middle class. I think it is ridiculous that a teacher for my son's public school would have difficulty affording a home in the neighborhood where he teaches - he would not qualify for the "affordable" housing. If 2040 were addressing this class which 1) would love to live in this neighborhood, 2)is stably employed and 3) are already informed and responsible community members/home owners, I would be supportive. As it is, I think the plan, is doomed to not succeed and many once active, involved community members (and tax payers) like me and my family will have lost their modest single family homes - I live on the block east of France.</p> <p>The housing aspect of 2040 is now totally overshadowing other aspects of the plan which are good and have a much higher likelihood to succeed.</p> <p>2040 is the agenda of a limited number of people, my objection is not the "not in my back yard argument" it is "not in my front yard/home" which is slated for extinction. I have been an active and involved member of mpls living in SW mpls for 20 years. My needs should not be disregarded to try and right historical wrongs.</p>	7/17/2018

3871	0.1	/topics/land-use-built-form/	"Growth for the sake of growth is the ideology of the cancer cell." - Edward Abbey	7/17/2018
3872	1	/policies/access-to-housing/	Protect existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, and especially within the Northeast Minneapolis Arts District.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3873	3	/policies/production-and-processing/	Protect Production Areas - do not allow non-production in Production Areas. Protect older industrial buildings for future production and processing uses (not Non-Production uses).	7/17/2018
3874	10	/policies/street-grid/	I'm not sure if I support this Policy in its entirety. In particular, I'm not sure that the KMart parcel should be opened back up. Nicollet north of Lake is a gem right now, and I am concerned that re-connecting Nicollet with itself without redesigning the street layout to slow down traffic could just turn Nicollet in to a 35W alternative, which would be an inappropriate use of that street. That being said, I really like Action Step E, especially the part about making some streets accessible only to pedestrians or bicyclists, like Milwaukee Avenue is. Similar streets could be fantastic!	7/17/2018
3875	5	/policies/visual-quality-of-new-development/	Require City funded projects to include public art which is purchased locally.	7/17/2018
3876	30	/policies/arts-and-cultural-assets/	Protect the existing infrastructure of production space within the Northeast Minneapolis Arts District.	7/17/2018
3877	31	/policies/creative-workers/	Provide Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of space forcing artists out of the City.	7/17/2018
3878	55	/policies/business-innovation-and-expansion/	Add preserving existing uses, assets and Art Districts.	7/17/2018
3879	56	/policies/supporting-small-businesses/	Add artists to this section (Support the development and growth of small business and artists.)	7/17/2018
3880	58	/policies/business-districts-and-corridors/	Support the existing Arts Districts Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement.	7/17/2018
3881	81	/policies/social-connectedness/	*Support the existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community. *Preserve existing buildings.	7/17/2018
3882	11	/policies/skyways/	I support all of these Action Steps. I'd like to see Skyway usage de-emphasized in order to encourage a more vibrant downtown street-level pedestrian experience.	7/17/2018
3883	0.1	/topics/land-use-built-form/	I am in a corridor 4 neighborhood which has seen some new businesses in the last couple years as well as a uptick in break ins, thefts and vandalism. We already have more than one multiple unit buildings with affordable housing, condos that are priced too high for lower income people to afford, as well as multiple converted buildings that sit empty. I have concerns for the livability of my neighborhood, and others in the city. It seems that there are ugly multi-use buildings all over the city already that have taken away from the character of the neighborhoods they are plopped in and contributed to making more crowded and already crowded city. I love Minneapolis but fear city leaders are set on making the entire city an extension of the Uptown area that has been drained of all soul. Sadly, I also have little faith that any feedback will change the plans of plopping multi-use buildings all over the city.	7/17/2018
3884	0.1	/topics/land-use-built-form/	Most of these streets in Southwest Minneapolis (Washburn, Oliver, Bryant, 49th, 51st, Sheridan) should not be Interior 3. They should at the MOST be interior 2, but likely interior 1. Adding large buildings to our residential streets will ruin the feel of our quaint southwest Minneapolis. The so called 'cooridors' aren't even being used up to their potential right now. Developers are coming in and creating unusable and unsaleable homes. Please reconsider the streets I mentioned above.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3885	1	/policies/access-to-housing/	<p>I oppose the housing density that is being proposed. I believe that allowing 3 or 4 unit housing on properties would destroy the "neighborhood" feeling. It is home owners that take pride in their property, maintain it and make it beautiful. It is also home owners that build the neighborhood because they place roots down and plan on staying for years. As a renter, your view on the neighborhood is different...you mainly view it as a place to live and not as a home. You don't get involved in the neighborhood because you only plan on being there for a year or two so don't waste time investing in your neighbors. In addition, maintaining a larger building takes time and money, and if you are not living in the property it is out of sight and out of mind, meaning the property would not be as beautiful as if you lived there.</p> <p>If higher density housing is installed in the quite single family home areas of the city, I envision, the qualities that attracted current residence would be lost and beauty of the neighborhood would be lost. I can tell you, if four-plexes where build on all sides of my property, I would move in a heart beat. I moved/live in Minneapolis knowing full well that my neighbor's house is only 5 feet away from mine, but it is a similar size as mine and only one-family lives in it. I can't image how unpleasant it would be to have a 4-story beast next to my house, over-shadowing my yard and blocking all natural light. In addition, the coming-and-going of four families would drive me insane.</p> <p>In Closing, I STRONGLY Oppose increasing the density of the city's housing density.</p>	7/17/2018
3886	0.1	/topics/land-use-built-form/	This city is fucked with policies and governmental BS. I can't Wait to move. Fuck your proposals. Stay out of Fulton and Linden hills	7/17/2018
3887	0.1	/topics/land-use-built-form/	The notion that Upton Avenue South, from 43rd Street to 50th Street, could functionally support 4-story apartment buildings anywhere along its length, and that 3-story apartments could workably flank them on the east and west, must have come from someone who has not attempted to navigate those blocks of Upton as they now are. Because of the on-street parking, any trip north or south is, intermittently, a trip along a one-lane street, where one is obliged to wait for oncoming traffic to pass before proceeding. What that traffic would look like if your plan is adopted is beyond imagining.	7/17/2018
3888	92	/policies/identify-and-evaluate-historic-resources/	City officials and policy should not over-emphasize claims of historical value, usually from wealthy landowners, that are often used simply to prevent land-use changes or improvements by willing owners.	7/17/2018
3889	17	/policies/complete-streets/	My concern is for elderly people, disabled folks, and those temporarily unable to walk more than a few steps from home. What will you do to give these people transportation options that are safe, close to -even at their homes- and inexpensive? I can still drive but I sure can't walk more than a few blocks and some can walk even less. Also please be sure NOT to let other modalities take handicapped parking spaces away from in front of buildings, including homes. I think every building should be required to have some handicapped parking; even if you are working to reduce car traffic. Please incent options like Uber. Hour car , 3 wheel scooters on call etc.	7/17/2018
3890	24	/policies/shared-mobility/	Add shared 3 wheel motorized scooters, recumbent bikes, 3 wheel bikes to the mix. Who knows what will come next? Be ready. Not everyone is able, nor wants to use a regular bike model nor take an uber/hour car. I'd rather be under my own control but cannot ride a regular bike.	7/17/2018
3891	25	/policies/innovations-in-transportation-and-infras	Sounds pretty good. I still think we need to allow for cars. What about using elevator parking garages like in new york? Think of a ferris wheel for cars!	7/17/2018
3892	0.1	/topics/land-use-built-form/	<p>Much refinement of the transit corridors rezoning should be done before this plan is approved. Not every street that has a bus go down it has the capacity for higher density. For example, 4 story apartment buildings lining Sheridan Ave So from 39th St. to 42nd St would be a disaster. The street is narrow and winding, with parking allowed on one side of the street currently. Traffic and parking are already at maximum density, exacerbated by all the activities at the lakes.</p> <p>If greater density is required, there must be parking required also. Not everyone can take the bus or walk or bike to work. People will still own cars.</p>	7/17/2018
3893	1	/policies/access-to-housing/	I strongly support this goal. I believe the city needs to increase its density particularly in transit-accessible areas and to make a wide range of housing available to all types of residents. This is essential if we hope to make housing more affordable as well as available in the city.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3894	0.1	/topics/land-use-built-form/	Why is only a part of 50th west of 34th designated corridor 4 which is currently mostly residential but east of 34th it is designated interior 1? All of 50th should designated interior 1. It is not a high frequency transit area and larger commercial buildings could negatively impact the Monarch Mile designated stretch of 50th.	7/17/2018
3895	43	/policies/housing-displacement/	Senior help link line is not enough. Help seniors keep their homes up and stay in them. Create housing for seniors that is one level living, access to services and goods, including green space and NOT overlooking a freeway (areas which are know to have higher air pollution)	7/17/2018
3896	52	/policies/human-capital-and-a-trained-workforce/	Please add age based research, planning and remedies to your mix. A majority of us do not have sufficient retirement savings and can't depend upon social security. Seniors need jobs too! They can't all be full time jobs either and must allow flexibility for doctor appointments and days when a senior doesn't feel well enough to work.	7/17/2018
3897	31	/policies/creative-workers/	Hi, I am writing from HUGE Theater in LynLake Minneapolis and we are excited about collaborating with the city. jill@hugetheater.com	7/17/2018
3898	82	/policies/aging/	Sounds pretty good! Happy you recognized the need to battle snow and ice which is often a barrier to folks getting out. Please consider adding snow removal on sidewalks and in alleys as a city responsibility. It doesn't work to fine people who physically can't do it! I doubt it would add much in taxes per individual.	7/17/2018
3899	6	/policies/pedestrian-oriented-building-and-site-de	Re:Eliminate off-street parking minimums throughout the City. It is naive to think that the marketplace will determine appropriate parking for a neighborhood when eliminating parking minimums for new housing construction and new businesses. Developers will relish being allowed to build without providing parking on the property. One new 4 plex on an existing residential lot could easily add another 6-8 cars parking on the street. Look at Uptown north of 36th St (and many of those buildings have some off street parking). New restaurants in the neighborhood are already causing parking headaches for the people living nearby. Look at the parking problems that Red Cow and other nearby restaurants at 50th & France have caused for homeowners.	7/17/2018
3900	0.1	/topics/land-use-built-form/	Interior 3 pretty much only shows up in south Minneapolis. Is the city seriously interested in decimating its turn of the century beautiful housing in favor of multi story, multi lot buildings like the 2 1/2 story, ugly brick apartment buildings on the early 70's. What will happen is this: developers will buy , not houses, but land - as cheap as possible. They will build as cheap as possible. They will charge as much as possible. Now you will have multi unit ugly buildings that are not affordable. At the very least put in tough requirements for materials & designs that do not look like brick, nor cement etc monoliths . that require some green space (setbacks); that respect the sunlight needs and esthetics of the neighbors. Folks should not have to lose the housing value the raised by dint of their own hard work through the years, as a result of ugly , shoddy, development. Also, loosen codes to allow homeowners to rent rooms and/or part of their houses again.	7/17/2018
3901	4	/policies/access-to-commercial-goods-and-service	I find the strong emphasis on No Cars is a huge hindrance to elderly and handicapped citizens. This coming from a person who does not own a car but I do depend on cabs and rides to get where I need to be. Also removing so much neighborhood parking makes it difficult for others to come visit us. This causes more isolation of the elderly and handicapped. I can not host an family function in my home because my children and grand children who live in the suburbs have no where to park.	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3902	1	/policies/access-to-housing/	<p>Density for density's sake seems to be an overarching principle. The need for affordable housing is laudable. Creating a glut of rental housing is a short term solution favoring developers. Rental housing is by nature transient housing and renters are victims of increasing housing costs of the ups and downs of the rental economy. Developers are almost universally absentee landlords and more interested in making profit from their renters than contributing to the neighborhood culture. from To make it affordable to enter the housing market is a nice idea but it does not guarantee that they will be able to stay and become engaged in the community and the development of its culture. We have already disrupted and displaced many from their communities by gentrification. The poorest cannot stay or afford to stay in places where they have little opportunity to afford to stay.</p> <p>Parking and movement of traffic remain important to consider as density increases. The Public transportation system is not up to speed to match the projected growth goals.</p> <p>The zones of the city outlined in the map are too neatly drawn. Within those blocks are many smaller neighborhoods with housing stock of differing quality, age or historical significance. There is a danger to disrupt these neighborhoods with structures that are out of scale with their neighbors. Presently in some neighborhoods "monster" homes further cut off sunlight with structures of greater height wedged next to smaller homes and yards. Green space and set-backs are sacrificed for density's sake or for creating structures with a higher selling point, but not always designed to fit into the street scape well or do not suggest that they are of any enduring quality. Areas near our lakes, river front and parks are increasingly surrounded abruptly by high-rise, high-density because of their closeness to the nearby natural amenities. They are not being designed to transition to the natural spaces but tend to form structural canyons that butt up to neighboring green space. There is too much room in this plan for greedy developers to destroy neighborhoods in the name of lofty housing ideals for the sake of their profit.</p>	7/17/2018
3903	1	/policies/access-to-housing/	a. Protect existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, especially within the Northeast Minneapolis Arts District.	7/17/2018
3904	3	/policies/production-and-processing/	<p>Include Arts Production as a protected class for production processing areas.</p> <p>Revise f. Establish land use regulations to protect older industrial buildings for future production and processing uses (not Non-Production uses).</p>	7/17/2018
3905	5	/policies/visual-quality-of-new-development/	Require City funded projects to include up to two percent of the total construction or renovation budget to purchase or commission original artwork by local artists for the site.	7/17/2018
3906	31	/policies/creative-workers/	Provide Property Tax Abatement opportunities to existing Arts Production Buildings to preserve affordability of work space for artists and creative businesses.	7/17/2018

3908	54	/policies/supporting-economic-growth/	<p>These action ignore the importance of existing infrastructure, community and production to continued economic growth.</p> <p>Add: improve existing properties and infrastructure.</p>	7/17/2018
3909	55	/policies/business-innovation-and-expansion/	Ignore importance of existing infrastructure, community and production to continued economic growth.	7/17/2018
3910	56	/policies/supporting-small-businesses/	Add: Preserve existing uses, assets and Art Districts.	7/17/2018
3911	83	/policies/people-with-disabilities/	<p>Add artists and arts related businesses to this section.</p> <p>TRANSPORTATION! The current model of using Metro Mobility is a wonderful first step but in practice, it is a horrible, inefficient, ineffective, maddening train-wreck of a solution. The routing software puts people who are 9 miles away from their destination on a magical 3-hour mystery tour that will take them tantalizingly close to their destination several times only to veer off unexpectedly to make another pickup or dropoff. The service is understaffed and overcommitted. There's no orderly addition of new riders (it's actually a surprise free-for-all for all involved). There's little or no access to online tools for most riders or most functions (seriously, it's the 21st century, come on!). Customer service is AWFUL. Minneapolis can lead the way, since the overwhelming majority of Metro Mobility "is" Minneapolis (clients, providers, etc.). Let's fix this for everyone!</p>	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3912	1	/policies/access-to-housing/	<p>In the Lyndale neighborhood, where I am a 20 year resident and single family homeowner, we have a healthy mix of single family and apartments and condos. The density is appropriate as we are closer to main commercial corridors and downtown. Each Mpls neighborhood has a unique feel however. While I generally agree with increased density, I suggest putting a cap on 4 plexes by block - say 50% max. I am especially concerned that these blocks of multifamily units can spread over several lots without apparent restriction. Limiting larger spreads over several lots (maybe 2-3 lot max - 1 per block) to a cap. These large spreads will be what brings in the big developers to just put up more overpriced, overly-shiny units (see Uptown) that can downgrade the more human scale feel of the existing built environment in the interior areas. This would probably address the biggest fears of the single family homeowners in these interior zones. Putting some caps on this helps maintain housing variety and spreads the burden of potential negligent absentee landlords. Limiting overzealous development will also ensure more balance in housing stock while maintaining some historic architectural interest in the physical texture our built environment.</p> <p>N.B - Be careful not to shame and vilify in your plan language those who have invested in and cared for these city neighborhoods as homeowners. How about providing us with real "big city" transit so we don't have to use our cars and we can reduce our carbon footprint? Trust me...I'd rather park it. (we all can't ride bikes to work). How about passing along some grants or loans so we can build ADUs in our back yards? We aren't the ones made of money just because we happen to have been able to afford our .1 acre when it was affordable and nobody else wanted to live here.</p> <p>Please work with a more expediency to correct a huge mistake of the past: choking Nicollet off for a KMart. This has been sitting in limbo for an embarrassingly long period of time. Use eminent domain, or whatever is needed, to force rotation of this store once and for all to face a newly opened Nicollet and fill this up with mixed use residential and main floor commercial. Let a shiny new KMart be the anchor. But make it happen. Such a waste of prime real estate that huge surface lot. TONS of room for new housing!</p> <p>PS. Create a small food truck court to house the taco truck and more of the same to part of the parcel :-). Sot of a mini - outdoor business incubator area.</p>	7/17/2018
3913	70	/policies/ecology-and-habitat/	<p>There needs to be a designation of areas that have high water tables such as parts of Linden Hills and a corresponding modification of building codes to prevent the drainage of these freshwater aquifers into storm sewers, sidewalks, streets and other drainage areas throughout the summer and sometimes into the winter months. The codes, as they stand now, allow for the building of basements into water tables and underground running streams, in areas which were historically part of Bde Maka Ska for example.</p> <p>The depletion of these water reserves will affect the health of avian populations, canopy, local climate and the health of our lakes.</p>	7/17/2018
3914	49	/policies/educational-and-economic-access/	<p>July 17, 2018 Dear Minneapolis 2040 Drafters It's important to recognize the history of Minneapolis. Up through the Sixties, it had a vibrant Black middle-class. There was racism, of course, and there were people on the margins. But the economic and educational disparities between Blacks and Whites were far less than at the present moment. Central High School, an integrated school, was closed and razed in the late Sixties (ironically over the objections of many in the Black community). It's important to realize that this change has been driven by, among other factors, a large in-migration from other U.S. cities and from third-world countries. It is unfortunate that our community, our leaders, and our schools (especially our teachers) have been blamed and at times attacked for not solving the difficulties of serving people who have arrived here from, for example, Chicago, Illinois, Gary, Indiana, East Africa, and Latin America. We need to serve them as best we can. We must find long-term solutions. However, upzoning is not a solution. It is too easy to embrace short-term thinking that seems to answer a pressing needâ€”yet will not do the jobâ€”and worse will unleash a host of unintended consequences (loss of open and green spaces, crowding, congestion, further degradation of the city lakes from paved over land, and more). This plan is based in ideology and wishful thinkingâ€”greased by big development money that is eager to have a free hand in our neighborhoods.</p> <p>Sincerely, Erik F. Storlie 3217 Humboldt Avenue South Minneapolis, MN 55408</p>	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3915	16	/policies/environmental-impacts-of-transportation/	(e) put toll booths on the freeways at city limits. If the feds won't let us do that, put them at the offramps to our city streets. use the funds to support non-car travel in the city.	7/17/2018
3916	0.2	/small-area-plans/	<p>July 17, 2018 Dear Minneapolis2040 Drafters I support the goals of racial equity and the creation of affordable housing. However, I see nothing in this plan that will achieve either. Rather our family-friendly R1 neighborhoods with lawns and open spaces will be exposed to the tender mercies of developers and the Zoning and Planning Commission, which approves 97% of variances now (ironically, allowing the bulldozing of 900 square foot two-bedroom homes all over the city to make way for monsterhousesâ€”destroying existing â€œnaturally occurringâ€ affordable housing). In fact, although zoned R1, the ECCO neighborhood is 70% rentersâ€”and their rents will be driven up by the Sons of Norway project, which projects rents 30% over existing levels. Minneapolis is a quilt of older neighborhoods and dense areas--with many areas, for example north of the Basilica, where apartment towers could be placed and neighborhoods developed with stores and services. Rather than encouraging folks to rent forever, we should think of how to bring back the urban homestead programs where ownership is developed. The old neighborhoods are like old-growth forest--easy to cut and impossible to replace once gone.</p> <p>Sincerely, Erik F. Storlie 3217 Humboldt Avenue South Minneapolis, MN 55408</p> .	7/17/2018
3917	1	/policies/access-to-housing/	<p>Regarding action step e.</p> <p>I'm not sure what you are trying to accomplish here. All cities should have areas that are zoned properly to include areas that are just single family. If you are hoping for a New York style (or Uptown Minneapolis for closer reference), I would suggest that those interested move there. The fastest way to have hardworking tax paying homeowners move is to put a 4-plex on a 40' x 127' lot. Parking will become a nightmare. If every block had 4 4-plexes on it with 2 cars per unit that is an additional 32 cars one a single block/street. If you don't think this will happen you haven't thought it through.</p> <p>Yes, I'm a bit angry about this. I chose our neighborhood specifically because there are limited multi family dwellings in our area. Over building multi-family housing creates transient areas with no ownership stake in the neighborhood. It causes short term rentals that don't allow for anyone to really create ties and lasting relationships. Crime will bump up with additional density. The larger selling will drown out any limited available sunlight and make gardening tough. We will end up fighting for parking in winter time especially on snow emergency days. This is a great way to get big companies buying up smaller properties and building as large a property as they can on very small city lots.</p> <p>If you think that density equals lower prices and affordability think about NYC, Paris, Hong Kong. Affordability is atrocious in those cities.</p> <p>Housing supply is currently low because no one is building anything that is available for sale. Just apartments that are overpriced due to all the resort like amenities that everyone wants.</p> <p>Basically if my council person backs this portion of the plan I will fight to see that they are not re-elected.</p>	7/17/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3918	67	/policies/climate-resilient-communities/	<p>The development and conservation of our canopy cannot be overstated. It is priceless: worth a lot and should not be for sale. In other words, we need to preserve sooner than replace, if at all possible.</p> <p>Too many old trees are being cut down at the prospect of any threat, when maintenance, especially good hydration might save them. An old tree can stand the threats of global warming much better than a sapling and it will take more than a 100 years to replace some of the elms and ash that are being taken now for lumber and chip wood under the threat of Dutch elm disease or Emerald ash borer.</p> <p>Trees, such as these, standing over 70 to 100 feet high harbor species of all sorts, sometimes over 200 different kinds. How long will it take a sapling planted today to replace a towering old tree, as the earth becomes more and more hostile to every living thing? Not only this, what of the difference an old tree can make of the climate under its boughs? The temperature difference can be 10 degrees or more and the air quality is phenomenal. Anyone who has stood under an ancient white pine can testify to the difference.</p> <p>I hope the city of Minneapolis protects the canopy we already have as they build for a better future.</p>	7/17/2018
3919	17	/policies/complete-streets/	Not sure about this. I hope that people over 50 were involved as I feel this will limit mobility of the older generation.	7/17/2018
3920	20	/policies/transit/	How about improving safety and the feeling of safety on public transportation. We need to have a method to keep non paying people off of the light rail. They are very scary at night. I've never felt more uncomfortable than on the light rail system in Mpls/St. Paul late night. Other cities don't seem to have that problem, but they all have turnstiles and ways to keep people out that ate non-paying.	7/17/2018
3921	33	/policies/affordable-housing-production/	How about working on programs that teach individuals how to create a personal plan that will allow them to grow in their job and make more money in order to keep up with raising rates. Personal life choices are a huge factor leading to why people don't have enough to pay for housing.	7/17/2018
3922	15	/policies/transportation-and-equity/	<p>Concerning transportation equity, a big issue, it would make sense to make this available to all, paid for through taxes. No one should be denied a ride and the options should be many. In fact, we need to make it so easy and so much better than driving that everyone will opt for public transportation.</p> <p>As it stands now, the buses are uncomfortable, jerky and can be extremely unpredictable depending on the route. The light rail from and to St Paul takes, practically speaking, as long as the bus ride. If one bus is missed or doesn't arrive, there may not be another for an hour, leaving one with no option but to get to work late and possibly lose a job. Some people are handicapped, or carrying groceries or children, infirm or unprepared.</p> <p>What would all-around premier public transportation look like to address all kinds of passengers? What would the transports look like that everyone would want to take and no one would be denied, rich or poor? Wouldn't it serve us in the long term to make this happen sooner than later by starting to divert highway funds in increments to make public transportation the priority with low carbon, no carbon systems the goal?</p>	7/18/2018
3923	14	/policies/tree-canopy-and-urban-forest/	Siting and relocating transportation corridors with minimal loss to old growth urban forests and priority given to areas that have fertile soils and abundance of wildlife, plant and animal.	7/18/2018
3924	3	/policies/production-and-processing/	Just an observation that this seems to be limited to a business support approach. Its great to support things that create a livable wage, but a livable wage is also dependent on how much a person (or family) spends on living! I believe that this public policy should also focus on keeping costs under control for the public in general - that the city policies should consider keeping housing costs affordable, helping families keep heating and cooling costs down (through efficiencies), keeping food costs reasonable, keeping transportation costs affordable, and keeping things like internet access costs under control. It isn't all about wages, it is also about costs!	7/18/2018
3925	0.1	/topics/land-use-built-form/	<p>The property at 3801 Park Ave is currently zoned OR1 (Office/Residential). If I understand the plan correctly, this would be changed to a commercial zone. The change would be inappropriate for this neighborhood. The neighborhood worked very hard in the past to achieve the current OR1 and would not appreciate a change.</p> <p>Also, I feel that allowing 4-plexes in the proposed areas, for example where I live withing 4 houses of 38th and Park, not only does not achieve the desired goals, but would encourage national companies to buy what is now affordable housing, pool lots, and build either shoddy housing or something that would certainly not be affordable. This policy does nothing for the neighborhoods, and everything for the building speculators. Please, work for us, and not for them.</p>	7/18/2018
3926	30	/policies/arts-and-cultural-assets/	Guaranteed income for everyone. This will allow the time for creative talents of all our community members to be focused individually and uniquely, often to society's benefit, without being overly concerned about making money. Where there's time and freedom, there is creativity.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3927	10	/policies/street-grid/	<p>This also requires working with the surrounding cities and the county. Sometimes it also requires working with the state legislature. I think this policy should recognize that more.</p> <p>Also, the city needs to recognize that the most important key roads in Minneapolis are NOT controlled by Minneapolis. Any East/West travel seems to end up going into Minneapolis Parkways - which seems to be controlled by the Park Department (as a separate legal entity). I am most familiar with the southern half of Minneapolis in this regard. Based on personal experience, the City and the Park governments don't work well together! Time to face it and actually plan better in this area. (To the person reading this comment, pull out a map and look at getting around the city in the east/west direction and there are no streets that actually go all the way through - even Lake street hits a park area near the former Lake Calhoun! Going further south, 39th curves around Lake Calhoun and Harriet up to 36th street. And 38th goes over Interstate 35W, but it dead ends into the cemetery on one end. Speaking of 42nd, it does over Interstate 35W, but is then useless going west, as it hits Lake Harriet. Dropping down to 50th gets into Minnehaha Parkway. North/South is not easy either, as Penn hits Lake Harriet. Xerxes hits the former Lake Calhoun, France is blocked by a railroad (why doesn't that go through anyway? It would really solve some of the traffic issues on the Northwest corner of the former Lake Calhoun), Hennepin dead ends into a cemetery (forcing southbound traffic to the parkways at the former Lake Calhoun or King's Highway. The more one looks at the major roads, the more one sees the importance of the parkways in Minneapolis and, hence, the reason for my comments)</p>	7/18/2018
3928	1	/policies/access-to-housing/	<p>Hey - things are not working as the city thinks they are. Our Linden Hills neighborhood plan was ignored by the central city authorities and a higher than should have been multi-use building was forced into our business district (and it is ugly!). This policy seems to think such buildings will keep rent costs down - it had the opposite impact! All the rents on existing places jumped because the new building was charging a premium for their view, marble countertops, and exclusive building. Even the small basement apartments in old buildings saw a larger rent jump than had happened in years due to that new building. Now developers are "circling like vultures" looking to do more of the same and totally change our neighborhood into a mini-down town. When they build this way they are NOT looking to make things affordable, they are looking to make as much money as possible. It's like the city wants to make a deal with the devil! These things have NO individual control for the families that see their neighborhood - so we expect the city to help us out here and the city is selling us down the river!!!!</p> <p>Also, part of what makes housing unaffordable in existing neighborhoods are limits to increases in property taxes. The city has been very poor here - in a four year time period (around 2002 to 2006), our annual property taxes jumped from \$2000 to \$4000 to \$8000 to \$10,000. This is a big part of keeping the city affordable and the city shifted the tax burden onto families to keep businesses happy. Shift it back!</p>	7/18/2018
3929	28	/policies/msp-airport/	Who is going to bike to the airport? That seems really impractical. Not travelers, with luggage.	7/18/2018
3930	12	/policies/lighting/	Please note that some cities have started to use LED lights to save costs. The American Medical Association put out a warning that such lighting causes sleep issues and should be avoided. It is more complex than that, but the city needs to be aware of it!	7/18/2018
3931	21	/policies/freight/	Very good idea to invest in existing railroad and maximize usage.	7/18/2018
3932	40	/policies/homelessness/	<p>In order to prevent homelessness we need good education for all, opportunity for all and equity in housing and the job market; but it all starts with a good equitable education. Taxes for public education should be divided equally throughout the city so that no one needs to be bused to another neighborhood in order to have a good fighting chance. There should be no "best schools". All schools should be the best we can make them.</p> <p>Counselors should be available that recognize difficulties early on in a child's life so that help can be given. We need experienced teachers who are respected and allowed to do their best, not trained to tests and dogmatic views, teachers who are well versed in interpersonal relations as well as good academic skills with respect for diverse opinions and equity.</p> <p>Funds should be available for adequate resources at the most vulnerable and impressionable time in a person's life, childhood. Teachers should not have to buy supplies for their students. Texts should be available for every child. We will get more from each dollar by spending the bulk of these dollars when the potential for benefit is greatest.</p> <p>When our communities are diverse and equitable, our schools will be diverse and equitable and vice versa. When this happens, there will be less risk of homelessness and greater potential that communities will work together in solidarity for the betterment of those in the communities they love, making homes where homes are needed.</p>	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3933	49	/policies/educational-and-economic-access/	<p>In order to prevent homelessness we need good education for all, opportunity for all and equity in housing and the job market; but it all starts with a good equitable education. 3934	33	/policies/affordable-housing-production/	Need to build affordable housing in downtown in addition to the luxury high rises, so people can live near their livable wage jobs.	7/18/2018
3935	17	/policies/complete-streets/	The problem I see is that this plan puts the slowest means of transportation as the highest priority. As such, it becomes a barrier to the free flow of goods and services. IE, it locks a person into their neighborhood for shopping and work, meaning that traveling to buy things or seek good employment is limited by transportation difficulties. People use cars to get around these barriers - and unless everyone turns to shopping and working online, cars will continue to be critical to peoples lives. I think walking and bike should be supported. I believe mass transit is critical (but as of yet not developed enough to be truly useful) and I hate the cost of a car. I, however, just don't think this policy statement fully reflex the complexity of the issue.	7/18/2018
3936	1	/policies/access-to-housing/	I have owned my small house in the Nokomis/Keewaydin neighborhood for almost thirty years. I grew up next door to a fourplex in the Powderhorn neighborhood. It would destroy the feel of the neighborhood to have fourplexes going up around here. I have chosen to stay here because I like the hominess of the area. A fourplex would take away privacy, add noise and parking problems. It would destroy the quality of my life, one that I purchased as a single parent, on a very limited budget. This house is all I have for retirement, and this plan threatens the quality of that retirement.	7/18/2018
3937	28	/policies/msp-airport/	I'm not sure what you mean by green, but hopefully it is to deal with water pollution caused by runoff from de-icing agents, and less killing of geese.	7/18/2018
3938	14	/policies/tree-canopy-and-urban-forest/	There should be more emphasis on saving trees rather than just cutting down all of one species, including the healthy trees. I've watched the ash trees be cut down, even when they seemed healthy, and had active nests in the tree. Also, sidewalks should be designed so that the roots aren't chopped up, making the trees more susceptible to storm damage.	7/18/2018
3939	54	/policies/supporting-economic-growth/	From what I have seen, Minneapolis is already all about business interests, to the detriment of the needs of citizens. There is always money available for big development - stadiums and office buildings and apartment complexes, but comparatively little for the people. I am opposed to the fourplex plan, but when I bought my little house in the Nokomis neighborhood, I did it with the help of a no interest loan from the city for first time home owners. That's the way that the government can help people.	7/18/2018
3940	0.1	/topics/land-use-built-form/	<p>Allowing dense development along Franklin Ave W into Lowry Hill and Kenwood will destroy the city's premier living area. Allowing greater density for the first few blocks along Franklin, where there already are apartment buildings, would be fine. Going beyond Emerson or Fremont would ruin the relative peacefulness of the neighborhood. There is some room for small multi-unit housing structures near the proposed light rail station, but even that poses a major threat to the city's most prestigious neighborhood.</p> <p>David Bjork, 1900 Mount Curve Ave</p>	7/18/2018
3941	5	/policies/visual-quality-of-new-development/	Minneapolis does not have a great reputation for supporting creative architecture that supports the existing and historic character of a neighborhood. Look at the North Loop. Most of the new buildings are pretty dismal . If there is development along Franklin Avenue, what is it going to look like and what is it going to do to the historic character of Lowry Hill? Keep the unattractive architecture and density along an already unattractive thoroughfare like Lyndale Avenue and Hennepin Avenue. Keep it out of my neighborhood, Lowry Hill .	7/18/2018
3942	80	/policies/development-near-metro-stations/	Keep the development out of Lowry Hill. Isn't anything sacred? You are already destroying the neighborhood by allowing light rail to travel through parkland. There are alternatives.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3943	1	/policies/access-to-housing/	Thank you got for this sensible approach to our lack of housing!	7/18/2018
3944	5	/policies/visual-quality-of-new-development/	No development in Lowry Hill. Protect one of the last remaining historic neighborhoods near downtown.	7/18/2018
3945	35	/policies/innovative-housing-types/	We have a very narrow neighborhood with modest single family homes that were once called "Starter Homes". During the recession many were gobbled up by absentee landlords and divided up into over-occupied rentals. Please consider the Land Trust idea to make modest homes affordable. The Land Trust owns the land and provides some money for improvements and the low-income person buys the house. It is a great path to home ownership and housing stability which is also good for the neighborhood. Tall high-rises and 4-plexes would overshadow existing homes, but affordable row-houses and shorter apartments with mixed use on the ground floor would be welcome in our community.	7/18/2018
3946	26	/policies/vision-zero/	Include train safety. We have a lot of students in our neighborhood who think nothing of taking a shortcut across the railroad tracks where there is no safety crossing. I know of 2 people who died crossing. One waited for the train to pass, but didn't see the one coming from the other direction. A young mother lost her life. The other was a recent high school graduate about to start college. I've seen people running back and forth across the tracks while laughing and throwing a cooler across and they have dumped mattresses and chairs there. Our neighborhood requested a fence on each side to prevent this. Instead one sign was placed that can only be seen if you are already half way across the tracks. Please prevent further tragedies.	7/18/2018
3947	35	/policies/innovative-housing-types/	I strongly support inclusionary zoning and making all Minneapolis neighborhoods accessible for people who want to rent or own their homes.	7/18/2018
3948	83	/policies/people-with-disabilities/	<p>First, make the Minneapolis Advisory Committee on People with Disabilities accessible remotely. Many of us can't get to or participate in person in meetings because of our disabilities. I'm working on this, but it is almost 2 years since I first requested access remotely.</p> <p>Second, start gathering statistics and data on residents with disabilities. How many of Minneapolis residents have a disability/ies but are still able to work gainfully? How many are receiving services? (Can be obtained from Hennepin County). How many people with disabilities are homeless? How many struggle to access the businesses they would like to patronize? How many opportunities are there to work? Breaking this down by neighborhood. Also tracking what Minneapolis housing/properties are accessible (physically AND chemically AND sensorily). Curb cuts. Snow removal on sidewalks (let's stop counting on our neighbors to do their duty because they JUST DON'T shovel and that's DANGEROUS for us let alone very disruptive to life. If my house was on fire and I can't get to my neighbors house because the sidewalks aren't shoveled....think about that for a sec.</p> <p>There are so many ways in which Minneapolis ignores people with disabilities, This is just the start of it. Can't remember if I submitted before, but I will again.</p> <p>Rebecca St. Martin (can't remember if I already submitted, but here is this, maybe again and maybe more...)</p>	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3949	83	/policies/people-with-disabilities/	<p>First, make the Minneapolis Advisory Committee on People with Disabilities accessible remotely. 3950	23	/policies/coordinated-development-strategy/	<p>I do not think the current plan will decrease disparities. In fact, I think it will make them worse. All the development will drive up rentals. Even if you include inclusionary housing, you will be creating increases in rents, taxes, and housing prices that will displace the middle class. I am all for affordable housing but giving the city to profit minded developers is not the way to go.</p>	7/18/2018
3951	16	/policies/environmental-impacts-of-transportation/	<p>I do not believe you will be able to get rid of cars, the way this plan suggests. None of your photos show cars. Even Mayor Frey says we will have driverless cars. If you do not plan for cars along with bikes, mass transit, and pedestrian sidewalks, you are condemning this city massive congestion.</p>	7/18/2018
3952	36	/policies/innovative-housing-strategies/	<p>It is a travesty to even think about tearing down the beautiful, historic homes around the Minnehaha Creek area. We and our neighbors have vowed to fight this with every fiber of our being!</p>	7/18/2018
3953	67	/policies/climate-resilient-communities/	<p>The new Bader development is a perfect example of why I don't like this plan. The excessive size of the development will force old trees to be taken down, storm water runoff that threatens the lake, increased mortality of migratory birds from tall glass buildings, and loss of green space. Why? So developers can line their pockets. 150 affordable housing units is great, but it's not worth what we're losing in terms of green space.</p>	7/18/2018
3954	66	/policies/air-quality/	<p>Ban woodsmoke restaurants, exchange woodsmoke fireplaces for gas, and you will go much further in reducing particle pollution. Instead you focus only on cars. I drive a hybrid and next year I plan to get electric. We have solar energy panels on our house, so my transportation will be 100 percent clean. This is what the city should be offering, along with mass transit and bike lanes. The plan doesn't take into effect the reality of most peoples' lives.</p>	7/18/2018
3955	1	/policies/access-to-housing/	<p>To benefit the poor, I am thinking it would be a good idea to distribute public and NGO subsidized low income housing equally among all the neighborhoods of Minneapolis. Add subsidized housing to neighborhoods that have very little, and reduce concentrations of subsidized housing in neighborhoods.</p>	7/18/2018
3956	36	/policies/innovative-housing-strategies/	<p>I am against the levels of density that are being pushed in this city. Sierra Club in California just went against a density proposal because of noise pollution. The very group that has pushed this policy is now seeing the light. Many people don't want to live in tall buildings or without green space. The huge developments planned on West Bde Maka Ska are excessive and will kill the intersection necessary to get to 100 on excelsior, highway 7, and 5.</p>	7/18/2018
3957	35	/policies/innovative-housing-types/	<p>I am fine with cooperatives, and I have fine with duplexes and triplexes in current housing. I am against fourplexes in neighborhoods will all single family homes. I believe speculators will buy up houses and increase to fourplexes to make money. I believe this will destabilize neighborhoods, drive up rents, taxes, and displace long time renters.</p>	7/18/2018
3958	35	/policies/innovative-housing-types/	<p>Heather Worthington said last week that single family homes were not the way people are going to accumulate wealth in the future. CM Bender said many people don't want single family homes. They have also said we are growing from immigrant communities. Last night at the planning meeting a Somali family bought a parcel in NE so they could build six single family homes for their siblings. Each family has ten children! If immigrant communities are growing, they may indeed want single family homes.</p>	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3959	18	/policies/walking/	Perhaps this is too granular for the comprehensive plan itself, but I do wish that the language of subsection f ("provide pedestrian connections...") were made more concrete, or supported by separately adopted city policy similar to Complete streets. For example, I'm thinking of several transit corridors with bus stops on two sides of the street (e.g., Franklin/Pleasant or Lyndale/27th) but without a marked crosswalk to allow transit users to easily use both stops. Some sort of policy mandating crosswalks (with either four way stop signs or lights) around transit stops would make for a much more transit and pedestrian friendly built environment.	7/18/2018
3960	5	/policies/visual-quality-of-new-development/	My problem with this plan is that is not what is happening the in the new developments. There is no pressure on architects to design interesting buildings. And there is no pressure on developers either. The precedent is all the look alike boring buildings in Uptown and around the U. They all the look the same, burnished something with two tones, square, symmetrical, uninteresting. Or glitzy high rises that belong at Southdale or Ridgedale. Sons of Norway combines Mall of America's entrance combined with ugly mismatched buildings. I believe the city is pushing through buildings that are destroying the beauty of our city. They've killed downtown, Nicollet, E Block, and now they're doing the same thing in every other neighborhood. Read the Harpers article on America Cities!	7/18/2018
3961	1	/policies/access-to-housing/	I think this is great, especially subsection e. If the structures will be built to the traditional lot sizes at similar scales, there's really no reason to mandate that a home has to be single-family, and allowing up to 4-units in such structures only makes sense.	7/18/2018
3962	1	/policies/access-to-housing/	I am against increased height along all transit corridors. Many of our transit streets are lined with single family homes. I do not think we should destroy neighborhoods that are functioning way.	7/18/2018
3963	16	/policies/environmental-impacts-of-transportation/	I very much appreciate subsection g of this policy. Building electric vehicle charging into new multi-unit developments, and perhaps even street parking spaces, will make zero-emissions vehicles much more accessible to renters. Coupled with incentives to add charging stations to existing apartments would also be helpful.	7/18/2018
3964	20	/policies/transit/	Would it be possible to add language encouraging the installation of permanent and clearly marked and enforced transit-only lanes along major corridors (e.g., Hennepin, Lyndale, University, etc.) in this policy? Or would that fall more under the Complete Streets Policy?	7/18/2018
3965	1	/policies/access-to-housing/	Please please please do not allow multi unit structures to be built within neighborhoods that are primarily single family units. For those who live in these areas, they do so to get away from high density and the traffic, parking issues, noise, crime and clutter that comes with it. We want peaceful neighborhoods. We also don't want slumlords and cheap housing that inevitably attracts crime and unkempt properties.	7/18/2018
3966	1	/policies/access-to-housing/	Please consider providing tax subsidies for buildings and homes that house artists. Consider more buildings zoned as work live for artists and allowing zoning for working studios in current residences. Artist create tons of wealth for this city. Consider dedicating a portion of all multi unit buildings to artist living.	7/18/2018
3967	1	/policies/access-to-housing/	This is a terrible idea. Changing historical homes and neighborhoods into commercial buildings might be good for developers but is terrible for the people of Minneapolis. This does not improve access to homes especially if they can all switch to condos. Make this stop.	7/18/2018
3968	80	/policies/development-near-metro-stations/	The Kenwood neighborhood never wanted the LRT. Increasing noise and busing in a historical neighborhood with family neighborhoods will only decrease home values, schools, and taxes as the people will all move.	7/18/2018
3969	5	/policies/visual-quality-of-new-development/	It is not a visual improvement to ruin historical homes and make high rises and condos. Ruins access to lakes and parks.	7/18/2018
3970	8	/policies/public-safety-through-environmental-de	It is not safe for children to live in areas with high traffic.	7/18/2018
3971	10	/policies/street-grid/	With no parking people will not get to access the areas.	7/18/2018
3972	1	/policies/access-to-housing/	Please do not change zoning to include building fourplexes or apartments in mostly single family home neighborhoods. As a longtime resident of Minneapolis, I am strongly opposed to this change. The architecture does not fit in with the current structures, next to smaller homes there will be a loss of natural sunlight (we are urban gardeners), loss of green space needed for bees, monarch's, and migrating birds, decrease in property value for current homeowner's, parking issues, increase in noise, traffic, crime, absentee landlords, tenants that have the ability to move and don't always invest long-term in the health of communities. Zoning might be really great for investors, but not for the fabric of neighborhoods and wouldn't be so naive to think the this will somehow translate into more affordable housing stock. Many of the less expensive lots that might be considered for investment might best serve first time homeowners. I could choose to live elsewhere if I wanted more density, I don't.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3973	1	/policies/access-to-housing/	<p>Please do not change zoning to include building fourplexes or apartments in mostly single family home neighborhoods. As a longtime resident of Minneapolis, I am strongly opposed to this change. The architecture does not fit in with the current structures, next to smaller homes there will be a loss of natural sunlight (we are urban gardeners), loss of green space needed for bees, monarch's, and migrating birds, decrease in property value for current homeowner's, parking issues, increase in noise, traffic, crime, absentee landlords, tenants that have the ability to move and don't always invest long-term in the health of communities. 3974	47	/policies/housing-maintenance/	<p>Require all duplex landlords to live in their duplexes to ensure the property and grounds are well-maintained, safe, and habitable.</p> <p>Require all rental properties to be decreased to a lower tier (Tiers 1, 2 and 3) if landlords break housing regulations. For example, if they don't buy a license for a repair, they are moved from Tier 1 to Tiers 2 or 3. Or if they provide faulty CO2 detectors, and building inhabitants and surrounding households/building inhabitants are endangered when CO2 is released, they are demoted to Tier 2 or 3. Both of these examples come from the absentee landlord who owns the property next to my</p> <p>Require vacant, substandard, or condemned housing to be appropriated by the city after a period of one year, even if the owner is paying the mortgage. For example, across the street from my homesteaded duplex, a condemned house has been vacant for eight years or so. The elderly owner is now in a nursing home and gave instructions to continue to pay the mortgage. Before she moved into a nursing home, a group of 10 or so male transients and a female leader took over the building for several months with the elderly owner still living in the house. The male transients lived there, and the female leader did not. The owner seemed to have dementia and it was a dangerous situation for her. She has two adult children, whom she does not trust, and one of them might have allowed the male transients to live in the house in exchange for money. So I called the city and asked them to investigate the situation. After they investigated they told me they couldn't do anything because she wouldn't accept help. Is this how the city of Minneapolis treats our citizens with dementia? Shame on you. At some point, someone moved her to a nursing home, but the vacant, condemned house is still there, rotting away. Vacant, condemned houses are a liability to the city, a deterrent to tenants moving into my duplex and other rental properties, and bring the value down of all surrounding properties.</p>	7/18/2018
3975	1	/policies/access-to-housing/	<p>Protect existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, and especially within the Northeast Minneapolis Arts District. The overall plan needs to address preservation of existing business and art spaces as well as areas for those places to grow and expand.</p>	7/18/2018
3976	3	/policies/production-and-processing/	<p>Add Arts Production as a protected class for production processing areas.</p> <p>d.&.e. Protect Production Areas - do NOT allow non-production in Production Areas.</p> <p>f. Protect older industrial buildings for future production and processing uses (not Non-Production uses).</p>	7/18/2018
3977	5	/policies/visual-quality-of-new-development/	<p>Require City funded projects to include public art which is purchased locally.</p>	7/18/2018
3978	29	/policies/creative-sector-economy/	<p>The policy doesn't acknowledge the importance of concentration and community to arts production.</p> <p>Protect and preserve the existing Arts Districts.</p>	7/18/2018
3979	30	/policies/arts-and-cultural-assets/	<p>The policy does not recognize existing arts infrastructure and community as critical to the local arts it calls to protect.</p> <p>Action: Protect the existing infrastructure of production space within the Northeast Minneapolis Arts District.</p>	7/18/2018
3980	31	/policies/creative-workers/	<p>This policy fails to acknowledge the importance of the existing infrastructure and community as "resources . . . to thrive".</p> <p>Action: Provide Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of space forcing artists out of the City.</p>	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3981	38	/policies/affordable-housing-near-transit-and-job-	This policy doesn't recognize the importance of production zones as equally important. Add: Except in existing industrial production areas.	7/18/2018
3982	54	/policies/supporting-economic-growth/	This policy Ignores importance of existing infrastructure, community and production to continued economic growth. Action: Add improve existing properties and infrastructure Own a family resident in Linden Hills.	7/18/2018
3983	0.1	/topics/land-use-built-form/	Linden Hills is a family friendly community, with low vehicle traffic, tree shaded streets and larger lots with abundant green space. The proposed density changes are too broad for Linden Hills. The plan should reflect current density street by street. The plan should honor existing scale of housing and density. The plan should not set a precedence for future high density. 4 plex housing should be limited to current high density areas. 4 plex is not suitable for most existing residential streets in Linden Hills. Single family houses should be protected and not replaced by multi family dwellings. The plan should maintain existing lot/parcel green space. The plan should not increase density at the expense of green space. Building height should not exceed existing code. The plan should implement methods to mitigate increased traffic on now quiet residential streets. The plan should incorporate child friendly sidewalks: Eliminate right turn on red at high pedestrian/high bike traffic intersections. Aggressively enforce traffic existing laws against texting while driving, running red lights/stop signs and speeding. Increase parking setback at intersections to eliminate obstructed vision of drivers by parked cars and vegetation. Child friendly neighborhoods roads: Utilize woonerfs (shared streets where pedestrians and cyclists have legal priority over motorists) Slow traffic along sidewalks that children heavily use by constructing speed bumps, chicanes, curb extensions, and sharp curves. Reduce crosswalk distance using a median island or sidewalk extension. Create interactive crossing signals, e.g., sounds, colorful flags, and visual pattern changes Differentiate the land material among crossing areas and the rest of road. Aggressive ticket motorists who stop on/obstruct crosswalks at intersections. Child-friendly public transit: sheltered waiting areas that protect children from the natural elements. Grant passes that are affordable to children. Provide frequent routes and stops. Locate and direct routes and stops near locations that children relish or commonly utilize (playgrounds, parks, schools) Ensure child safety by not accelerating too quickly, traveling at a consistent speed, employing safe drivers/operators, and creating secure pathways that lead to routes and stops. Eliminate dangerous carbon emissions, toxic gasses, noxious fumes and noise from diesel buses. Switch to electric buses/streetcars from	7/18/2018
3984	55	/policies/business-innovation-and-expansion/	Ignores importance of existing infrastructure, community and production to continued economic growth. Action: Add preserving existing uses, assets and Art Districts.	7/18/2018
3985	56	/policies/supporting-small-businesses/	Name the arts and arts production as business and not just amenities Action: Add artists to this section (Support the development and growth of small business and artists.)	7/18/2018
3986	58	/policies/business-districts-and-corridors/	Name the arts as economic drivers. Action: g. Support the existing Arts Districts h. Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

3987	81	/policies/social-connectedness/	This policy does not recognize the functional success of the mixed use neighborhoods in North East in achieving full social participation - there is no need to reinvent the wheel. Action: *Support the existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community. *Preserve existing buildings.	7/18/2018
3988	1	/policies/access-to-housing/	I am opposed to allowing housing to be built in city park and in current green spaces. I am strongly opposed to having 3-unit and 4-unit dwellings without off-street parking allowed to be built in all single family home areas throughout the city. This will dramatically impair the beauty of our unique neighborhoods. New multi family homes will NOT increase affordability. It will put money into the pockets of the developers and contractors. The architectural style and poor quality of building I am already seeing within the city where developers purchase small story to a story and a half houses are not only ugly, don't fit into the neighborhood, but will be falling apart within 10-20 years. Parking must be included with all multi family dwellings! People are not going to give up their cars to walk, bike or use mass transit. This is Minnesota where 5-6 months of the year we have cold weather, snow and ice. Already parking is an issue in our neighborhoods. By not requiring parking to be part of the duplex, 3-unit or 4-unit buildings, you are going to ruin our neighborhoods further.	7/18/2018
3989	19	/policies/bicycling/	The focus on bicycle lanes and transportation ignores the obvious demographic of the aging baby boomer generation who can not get around on bikes, and also do not want to take public transportation.	7/18/2018
3990	17	/policies/complete-streets/	You do realize that by 2040 most cars will be electric. People love cars, and it seems crazy that the city is designing what they they think people should have, and not designing what people actually want.	7/18/2018
3991	0.1	/topics/land-use-built-form/	Not a fan at all. We bought a house on Washburn at 55th, thinking we were buying a nice home in a quaint neighborhood. As the plan currently exists, we could potentially be staring at an uptown across the street from us. Four-story multi-unit buildings are absolutely not what we were looking for in a new neighborhood to plant our roots. In fact, it is why we moved here FROM uptown! I can understand blanket upzoning actual corridors, like Xerxes, which is right next to us, with these larger buildings, many already exists on these streets. The plan needs significant work.	7/18/2018

4089	1	/policies/access-to-housing/	This is a great idea and a great way to increase density	7/18/2018
4090	1	/policies/access-to-housing/	Protect existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, and especially within the Northeast Minneapolis Arts District.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4091	3	/policies/production-and-processing/	<p>It is very important to add Arts Production as a protected class for production processing areas.</p> <p>Protect Production Areas - do not allow non-production in Production Areas.</p> <p>Protect older industrial buildings for future production and processing uses (not Non-Production uses).</p>	7/18/2018
4092	5	/policies/visual-quality-of-new-development/	<p>Encourage developers to use local artists for their architectural elements. Supply them with information about artists in the NE Minneapolis Arts District.</p> <p>Require City funded projects to include public art which is purchased locally.</p>	7/18/2018
4093	29	/policies/creative-sector-economy/	<p>Protect existing Arts Districts by creating policies that keep artists in their studios- this happens by building the creative economy so artists can sell their work locally AND keeping their property taxes reasonable.</p>	7/18/2018
4094	30	/policies/arts-and-cultural-assets/	<p>Protect the existing infrastructure of production space within the Northeast Minneapolis Arts District.</p>	7/18/2018
4095	31	/policies/creative-workers/	<p>I would like to see the city provide Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of space forcing artists out of the City.</p>	7/18/2018
4096	38	/policies/affordable-housing-near-transit-and-job-	<p>Affordable housing is great and so is a mixed use living area but please protect industrial "maker/artist" space- especially in the NE Minneapolis Arts District.</p>	7/18/2018
4097	54	/policies/supporting-economic-growth/	<p>Neighborhood revitalization money was very helpful to us when e bought our first house. I hope this program will continue. These are the programs that help improve existing properties and infrastructure- which is a GREEN way to grow.</p>	7/18/2018
4098	55	/policies/business-innovation-and-expansion/	<p>When creating these policies it's important to preserve the existing uses, assets and Art Districts.</p>	7/18/2018
4099	56	/policies/supporting-small-businesses/	<p>Don't forget to add artists to this section. True that most artists are Small businesses but if we don't identify them this way they could be lost in the process.</p>	7/18/2018
4100	69	/policies/renewable-and-carbon-free-energy/	<p>Is it possible to look at renewable energy as a way to redistribute wealth? Such as, encouraging ownership through use of Co-ops.</p>	7/18/2018
4101	1	/policies/access-to-housing/	<p>I am totally against this blanket zoning change to take the small affordable homes in the Windom neighborhood. This would allow someone (most likely outside developers) to buy up our early 20th century quality built homes that have character, tear them down to jam cheaply made, box like mulit-plex units onto very small city lots. This will not only effect the Windom neighborhood but many of the Mpls neighborhoods that actually have a lot of the affordable single family homes. It's completely unfair to think most people want to live in apartment type housing. If so, I would have bought a condo. I have a single family home because I don't want shared walls, no control over my interior or exterior decor/maintenance and minimal to no green space to spend time in. This zoning plan needs to be re-done. How about working w/each neighborhood to see what changes would work best for that area. The reason everyone wants to move to Mpls is because of those of us who've maintained and made better all these diverse types of neighborhoods we support. To change this to one big cookie cutter city will be the downfall of Mpls.</p>	7/18/2018
4102	58	/policies/business-districts-and-corridors/	<p>Specify artists when you develop these strategies. Affordable studio and commercial space is very important to artists and they can't loose their space to a business that can pay more for rent. Artists will be pushed out of the city if they can't afford their studio rent. Add Artists whenever you talk about small businesses- they are the same in many ways but have specific needs.</p>	7/18/2018
4103	11	/policies/skyways/	<p>I'm glad to hear the plan is trying to address. I realize that not all skyway connections/plazas can be the crystal court...but putting in restrictions on new build and a set of rules for what kind/where new skyways can be build is a great first step. Hopefully we can recover/salvage the skyways...but not at the expense of the street!</p>	7/18/2018
4104	0.1	/topics/land-use-built-form/	<p>I oppose the plan to densify southwest Minneapolis where I live. The major appeal of these neighborhoods is open space and lack of density. For that, we residents put up with aircraft noise, traffic congestion and higher taxes and rates of crime compared with nearby suburbs. The city's plan to dump more people and housing units into these neighborhoods will tip the balance -- the negatives will overshadow the positives of living here -- and trigger a new era of urban flight. The state of Minnesota should have long ago permitted cities to grow by annexing suburbs and creating better-planned metro areas with mixtures of high-density and modest-density housing. Instead we allow our metro region to sprawl out of control. Now, Minneapolis proposes to backstab those urbanites who refused to join the last round of flight to the suburbs -- the people like me who for 32 years, through the crack epidemic, Murderapolis and the Great Recession, stayed put to support city schools and invest in their city. What a lousy way to treat the people who help make Minneapolis great.</p> <p>Dave Shaffer 5040 Logan Av. S</p>	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4105	81	/policies/social-connectedness/	Much of these goals are being met in the NE Arts District - it's important to use the arts to bring people together across cultural lines and ART can do that. Support the spaces in the Arts District and increase the spaces in the Arts District by encouraging or requiring new buildings that go up to have community space that shows, sells or teaches art.	7/18/2018
4106	5	/policies/visual-quality-of-new-development/	Relative to "g": Concern to preserve as vital and coordinate with new development "distinct" characteristics of communities, e.g. immigrant history and rich arts community of Northeast. Equitable standards but not one size fits all.	7/18/2018
4107	33	/policies/affordable-housing-production/	The affordable housing option is a nice theory. This plan says nothing about how this will be accomplished. Where does it say that all those developers who will be replacing already affordable single family homes with multi-plexes are required to make them affordable? No developer is going to do that, for them it is all about the bottom line. Without specific rules in place and a definite way for the city to enforce it, it won't happen. We all know forgiveness is easier to get in this city than permission. How many people will be forced out of the city or forced to live in the suburbs because very few of these thousands of new residences will truly be affordable? This needs to be re-worked and viable and enforceable plan needs to be created!	7/18/2018
4108	29	/policies/creative-sector-economy/	This is good. To which I would add: work with existing/developing COMMUNITY arts organizations to maximize integrative development.	7/18/2018
4109	1	/policies/access-to-housing/	Please protect existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, and especially within the Northeast Minneapolis Arts District.	7/18/2018
4110	3	/policies/production-and-processing/	<p>Add Arts Production as a protected class for production processing areas. Art will always be around, we need sculptors and painters.</p> <p>I find your declaration about older industrial areas a bit inaccurate. "Some areas that have been historically industrial are not well-suited to support new production and processing businesses because the existing building stock does not meet the needs of modern production businesses..." This is a bias!!!</p> <p>d.&e. Protect Production Areas - do not allow non-production in Production Areas. And allow enough space for those areas to function.</p> <p>f. Protect older industrial buildings for future production and processing uses (not Non-Production uses). Tax breaks and lower interest rates.</p>	7/18/2018
4111	30	/policies/arts-and-cultural-assets/	Significant phrase: "Focus on the rich and diverse character of the City's neighborhood and corridors" and action terms: "build upon" and "partner" Work with infrastructure/organizations already in place and to supplement/develop community to bring under represented sectors into the plan.	7/18/2018
4112	5	/policies/visual-quality-of-new-development/	Set aside a percentage of building costs to be used for art, to be included with the building process and to be purchased or commissioned from local MN artists.	7/18/2018
4113	29	/policies/creative-sector-economy/	Sustain and guard the already existing arts districts and arts areas now existing. Tax breaks and lower interest loans.	7/18/2018
4114	31	/policies/creative-workers/	Protect artists in already existing resources (e.g. studio buildings re-purposed from previous industrial life) from being priced out of a "burgeoning" market with tax abatements or other acts of sustainability.	7/18/2018
4115	1	/policies/access-to-housing/	We do not agree with the plan to build 4 family units in our neighborhoods. This will destroy our neighborhoods rich culture. It will drive up crime and there will be a loss of what we all love about our areas that we live in.	7/18/2018
4116	30	/policies/arts-and-cultural-assets/	Protect the existing infrastructure of production space within the Northeast Minneapolis Arts District. Also encourage homeowners to pass their homes to an artist. Offer low interest building and buying loans to the artists.	7/18/2018
4117	1	/policies/access-to-housing/	I support this housing plan. As an underemployed resident who has no wishes for a single-family home (nor sees a way of affording one), having access to housing throughout the city at affordable rates will help me thrive in Minneapolis. I especially like increased use of mixed housing types in new neighborhoods to meet these goals, and to reduce historic racial and economic disparities.	7/18/2018
4118	31	/policies/creative-workers/	Provide Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of space increase, thus forcing artists out of the City. Artists will always be needed and will always need space because colleges and universities gain accreditation by having an art program on their campus. Art is required!	7/18/2018
4119	1	/policies/access-to-housing/	more housing is fine but protect commercial/industrial properties that are in use by artists and small businesses esp. in the Northeast Arts district	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4120	0.1	/topics/land-use-built-form/	This plan is really smart - I appreciate the building guidelines based on use, and overall increase in allowance of housing density. I do hope that it makes space for low-income housing as well.	7/18/2018
4121	5	/policies/visual-quality-of-new-development/	require city funded projects to include public art purchased locally	7/18/2018
4122	13	/policies/landscaping/	Insuring that there is a diversity of tree species will make sure that disease or pest issues don't wipe out considerable amounts of the city urban forest (ie, Emerald Ash Borer). Make sure that no one species (including maples!) takes up more than 10% of the urban forest population. This plan looks great.	7/18/2018
4123	29	/policies/creative-sector-economy/	Protect existing arts districts	7/18/2018
4124	38	/policies/affordable-housing-near-transit-and-job-	Affordable housing is AFFORDABLE. Creative solutions must be incorporated with financial institutions. NOT everyone along the building pathway needs to add 20% to make a profit. Which means cost is \$44. add 10% plus another 20% and then another 20% and another 10% and we have the price set at \$100. or even \$200. higher than cost!	7/18/2018
4125	54	/policies/supporting-economic-growth/	Improve existing infrastructure too.	7/18/2018
4126	30	/policies/arts-and-cultural-assets/	Protect the existing infrastructure of production space in NE arts district	7/18/2018
4127	55	/policies/business-innovation-and-expansion/	Preserve existing uses, assets and Art Districts.	7/18/2018
4128	14	/policies/tree-canopy-and-urban-forest/	Having plans for how to retain mature trees and properly deal with construction as it relates to trees would be great. Choosing varieties that can deal with the challenges of urban situations would also be valuable. You may want to consider working with the Master Gardener Volunteers to help provide education and training on tree care for private landowners, as these volunteers aim to help people via horticulture create sustainable environments. And, making sure that there is increased diversity so that no one species makes up a considerable amount of the urban tree canopy would be important to prevent considerable loss when it comes to pests and disease, and improve overall health of the urban forest.	7/18/2018
4129	31	/policies/creative-workers/	provide property tax abatement opportunities to arts production buildings to keep the cost of space from forcing artists out of the city	7/18/2018
4130	56	/policies/supporting-small-businesses/	Name the arts and arts production as business and not just amenities. Add artists to this section (Support the development and growth of small business and artists.)	7/18/2018
4131	71	/policies/soil-health/	Will this plan also include guidelines for construction that aim to maintain proper soil health? And any aim towards public education so that private landowners can also work towards improving soil health? I think it's great that you'll be creating a soil health plan - it's vital to our ecosystems functioning well!	7/18/2018
4132	38	/policies/affordable-housing-near-transit-and-job-	except in existing industrial production areas	7/18/2018
4133	58	/policies/business-districts-and-corridors/	g. Support the existing Arts Districts h. Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement.	7/18/2018
4134	2	/policies/access-to-employment/	This seems a good first step. Also allow small home-based businesses out of any residence by right.	7/18/2018
4135	2	/policies/access-to-employment/	Transit is only one way to get to jobs; we need to focus on walking and biking as well.	7/18/2018
4136	2	/policies/access-to-employment/	We need to require parity in transportation. access support for employers: if employers want to provide free parking to their employees, they need to be required to not just offer bus passes, but provide benefits of an equivalent value to the cost of the parking space to all non-drivers, while also making the costs of parking clearer.	7/18/2018
4137	81	/policies/social-connectedness/	Social Connectedness: Why is there No recognition of the functional success of the mixed use neighborhoods in North East in achieving full social participation - no need to reinvent the wheel. Suggested Comment: *Support the existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community. *Preserve existing buildings.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4138	80	/policies/development-near-metro-stations/	<p>The idea of tucking parking under and behind buildings is a great idea. However in all these plans to add high density housing all over the city, they are not required to provide any off street parking. We all know a builder will save as much money as possible by not providing parking. It is completely short-sighted to think that making small neighborhoods that provide everything a person could need w/in walking, biking or bus distance and no cars or parking will be needed. How do you get from S Mpls to Ham Lake to visit family for a Sunday morning brunch? How do you get from N Mpls to Savage for a family celebration dinner? Even w/multiple bus rides you still will need a car to get to the end destination in so many cases. Most of us do not live our whole lives within one small area. Sometimes you have no control over where your doctor, family or job is and many times that is outside your immediate living area.</p> <p>I bought my house on a bus line as I did not own a car when I bought my house. I don't feel I should lose my home and neighborhood because I chose to buy near a bus stop which is now going to be allocated for high density homes and not for single family homes. For the city to decide the 25 years of blood, sweat, tears and so much money I put into home improvements to make my neighborhood and the city a better place is now going to be discounted for a new high density apartment type of life style with minimal if any green space and no off street parking is ridiculous.</p> <p>Keep in mind as the population ages, bike riding and walking often become more difficult not to mention any injuries or physical limitations (at any age) that can make it difficult for many to get around w/o a vehicle.</p> <p>If the zoning, parking and affordability issues that have been blatantly missing from this 2040 plan are not reworked you could see a mass exodus from the city. That will be those people who are responsible for making the city such a wonderful place to live. If you destroy all the different types of housing in all the different types of neighborhoods, you will destroy the city.</p>	7/18/2018
4139	1	/policies/access-to-housing/	<p>I am concerned about an overload of street parking with action steps "d" and "e". There is no mention of having off-street parking for a duplex or fourplex in residential neighborhoods with currently single family housing. Congested parking will REDUCE livability GREATLY. Public transportation for all will not be available by 2040 and unrealistic for everyone. I think this has the consequence of pushing people out to the suburbs to get away from congestion.</p>	7/18/2018
4140	1	/policies/access-to-housing/	<p>Yes! Please increase the mix of housing types throughout the City and most especially on transit corridors. As a Ward 13 resident, I fully support a mix of housing in all residential areas.</p>	7/18/2018
4141	75	/policies/waste-reduction/	<p>Action Steps a. & e.: Creating an opt-in organics program will get far less participation than an opt-out. It is the same for organ donors in countries around the world, opt-out programs have 80-90% participation, opt-in only have 15-20% participation. We are lazy, signing up is just too much work! Also, people want to keep up with their neighbors, if we think our neighbors are also doing their share to reduce then we want to do so as well, so the more green bins on the streets the better. I would also say the same for the recycling program, if we switched it so trash came every other week and recycling came weekly, it would force people to recycle more than waste. I find it hard currently, in a house of 4 residents, to not have recycling overflowing at the end of those two weeks. People could always opt-in to a program where trash is collected weekly but could pay a fee for the additional cost to the environment and city workers. Either buy-in to zero waste goals with effective policy or don't do it at all. Environmental and waste management issues are far too pressing to be one foot in and one foot out.</p>	7/18/2018
4142	23	/policies/coordinated-development-strategy/	<p>I am against allowing multi-unit housing in currently single-family unit zoned areas around Lake of the Isles. This jewel box neighborhood is a treasure and draws many residents and visitors. We should preserve the natural beauty and architectural beauty of the area. Let's not destroy what draws residents and visitors to the neighborhood.</p>	7/18/2018
4143	10	/policies/street-grid/	<p>The city should be looking for ways to foster freeway caps as part of its efforts to reconnect the street grid.</p>	7/18/2018
4144	6	/policies/pedestrian-oriented-building-and-site-de	<p>I love the new walk-up/walk-out apartment units in newer buildings throughout the city. I don't think most of these are particularly active use (usually people are not sitting outside and often shades are pulled on windows), they make the streetscape more interesting and particularly human. I think developers should be able to increase FAR and height in projects that provide walkouts. It would also be great to see more walkouts with larger stoop/deck areas that are slightly raised which could encourage use of the space and make the street even more interesting.</p>	7/18/2018
4145	35	/policies/innovative-housing-types/	<p>Can't agree with this enough. City desperately needs to construct missing middle -- housing that would have been today's NOAH had we not banned it in the 70s. Need fourplexes in all parts of the city (especially affluent neighborhoods that have traditionally fought multi-family development), conversion of parking lots to housing, and municipally funded transit options. Would also be interested in learning about possibility for TIF money towards inclusionary zoning. Why not have more affluent tenants of a housing development subsidize the rent of their poorer neighbors through their tax dollars?</p>	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4146	6	/policies/pedestrian-oriented-building-and-site-de	As an avid walker, I fully support points "n" and "o": Discourage the establishment of and minimize the size of surface parking lots. Prohibit the establishment of new drive-throughs and gas stations.	7/18/2018
4147	6	/policies/pedestrian-oriented-building-and-site-de	<p>RE: "Eliminate off-street parking minimums throughout the City."</p> <p>We are absolutely OPPOSED to this goal. Quite the opposite, we need to INCREASE the number of off-street parking required for new developments. As an independent consultant with a small business, it is critical that I be able to reach my clients and that means finding parking. I travel all over the metro area and I need to park a car for business.</p> <p>The lack of parking in Minneapolis hinder business and creates a huge problem for growth. Paid parking, street or off-street, is a necessary part of growth. Letting large developers off the hook so they need not provide parking for residents or workers is irresponsible and short-sighted. It has created disasters for other cities.</p> <p>WE CAN NOT eliminate off-street parking requirements for new development.</p>	7/18/2018
4148	6	/policies/pedestrian-oriented-building-and-site-de	<p>RE: "Eliminate off-street parking minimums throughout the City."</p> <p>We are absolutely OPPOSED to this goal. It has created disasters for other cities.</p> <p>WE CAN NOT eliminate off-street parking requirements for new development.</p>	7/18/2018
4149	0.1	/topics/land-use-built-form/	<p>"Discourage the establishment of and minimize the size of surface parking lots.</p> <p>Prohibit the establishment of new drive-throughs and gas stations.</p> <p>Prohibit the establishment of new auto repair facilities and other auto-oriented uses in areas designated Community and Destination Mixed Use on the Future Land Use Map.</p> <p>Mitigate the impacts of auto repair and other auto-oriented uses on the pedestrian environment through building and site design requirements."</p> <p>I find this anti-car policy ridiculous. I am in favor of transit, specifically light rail or non bus-focused transit. However, we need to accommodate those who need to use a car. We want a city that is transportation friendly for all citizens, including those with mobility issues, families with children, and seniors, who need cars to get around. Stop this lopsided approach to land use and make this plan more accommodating for car use in smart ways.</p>	7/18/2018
4150	10	/policies/street-grid/	In reconnecting broken parts of the street grid, like at the Kmart, the city should always prioritize people. Car circulation should always be a last consideration, after pedestrians, bicycles, and transit have been accommodated.	7/18/2018
4151	18	/policies/walking/	<p>RE: Improve safety for people walking when crossing streets; focus on crosswalks, lighting, and visibility</p> <p>We need MARKED pedestrian crossing on all city intersections. And we need education for bicyclists and drivers about what the laws are regarding pedestrian right of way and safety.</p>	7/18/2018
4152	19	/policies/bicycling/	<p>We need MANDATORY licensing of bicyclists in the city, with education and testing, similar to driver licensing.</p> <p>Reckless, law-breaking, rude bicyclists are a hazard to this city and are a danger to pedestrians, drivers, and other bicyclists who follow laws. In Minneapolis, we have done a lot to create safe places for bicycling, but it is irrelevant when you have careless, daredevils who run lights, ignore the right of way, blow through intersections, hit pedestrians, drive between car lanes, cut off other riders, and are a threat to others on the streets. Something must be done to make is safe for everyone.</p>	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4153	26	/policies/vision-zero/	<p>We need to limit speed by design. Our streets permit vehicle users to move at speeds that kill people, and the number one way to stop this is to slow the drivers by designing in a way that prevents killer speed.</p> <p>We also need to eliminate death road designs like Lyndale Ave S between Franklin and Lake. This section of street should be either a 4 lane to 3 lane conversion, or, if the political will is to keep it as a death thoroughfare, it should become a median divided street with HAWK signaled crossings and pedestrian refuges at all crossings. Left turns could be eliminated.</p>	7/18/2018
4154	15	/policies/transportation-and-equity/	<p>It should be made clear in the comp plan that prioritizing pedestrians first and bicycles and transit users second (and car drivers last) is a policy of equity. Cars are expensive, destructive, and wasteful, and giving cars priority anywhere in our city causes disproportionate harm to low income and people of color (who live in multi-family buildings on polluted corridors, who live near highways and other car congested corridors, and who rely on human power and transit to get to where they need to go).</p>	7/18/2018
4155	17	/policies/complete-streets/	<p>Critical area permits should be priced based on land value. Pricing parking permits at an appropriate level can help to fund enforcement efforts and street maintenance.</p>	7/18/2018
4156	7	/policies/public-realm/	<p>The Arts in Public Places program is extremely cumbersome to apply for and implement and very time consuming. The last project we did with the city took over 150 hours of staff time, which was almost matched with volunteer time. Most neighborhood's don't have the luxury of spending staff time (or volunteer time) in this way. As stated in the report filed to the City on this project:</p> <p>"Because we had done the project before we had a good handle on the tasks and timeline needed to accomplish it. What was cumbersome about the project was the increased amount of city paperwork and process involved in it. The grant application to Public Works was essentially duplicated by the Arts Commission but the project needed to be presented with a different focus because the two groups have different goals. This took an additional 15 hours, or the equivalent of over \$500 in organizational staff time. It was also incredibly nerve wracking needing to present a project that had received funding based upon its merits as a graffiti-prevention project with an artistic element, as an artistic project with full credentials as a practicing artist. We knew that if the arts commission did not like the images or project we would not be able to proceed and it felt unfair that they were given this power over a graffiti-prevention project. We also incurred the unexpected cost of permitting each utility box. Luckily we found other cuts to make in our budget to make up for this unexpected expense.</p> <p>The timing of this funding is also very awkward and pretty short to complete a project including all the graffiti tracking requirements. From approval of the grant to completion, taking into accounts the limited dates that the Arts Commission meets, it is almost impossible to complete a project of this scale. "</p>	7/18/2018
4157	53	/policies/quality-of-life/	<p>Stop marketing yourself and just do it. I feel like the City spends so much time talking about how great it is instead of just rolling up it's sleeves and doing the work.</p>	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4158	75	/policies/waste-reduction/	<p>a: Being in the Food Business, I see massive opportunities for donating, and Composting food, especially at the multiple Food Shows we do at the Mpls convention center and other Mpls locations. (I cringe at how much food gets wasted!)</p> <p>b: I think Mpls has been doing a great job of educating people on recycling, single sort seems to be very successful, but maybe take a closer look at separating cardboard/paper from the mix as this would really clean things up for the haulers. I believe people are starting to come around to organics Composting, but some additional education is still in order! As I drive down my alley, I see 3 to 4 Organic Compost bins, maybe a bin-sharing program would be something to consider as long as all residents had proper BPI Certified Bags. (I'm thinking of something like a Big sticker on my bin "OK TO USE MY BIN...") you get the picture, that way the bins could be better utilized, and people would have an alternative to stopping by the city Organics bins located at the various parks... make it easy:)</p> <p>f: There are State programs that allow cities/counties/state facilities to purchase BPI Certified Liners/Bags/Bins at discounted rates, these need to be leveraged!</p> <p>g: There are some Multi- Residential Composting systems out there that could quickly and easily shift Apartment/Dorm/Condo residents to the "Composting Lifestyle" and deal with the "Yuk Factor" as well!</p> <p>J: If businesses (And Residents) could save \$ by diverting their Organic waste that would likely be a good incentive!</p> <p>k: Refer to f above, But beyond that, EVERY School in Minneapolis should have an aggressive Organics Composting Program, very simply by having a bin lined with a BPI Certified Liner, Good signage, and a good schedule (every 2 days?)for pick up, you could Divert thousands of pounds of material to the RIGHT Stream!</p> <p>m: This is Super Important... as an example, I was attending an event at Minnehaha Park recently, and was happy to see Sea salt restaurants Compliance with the Compostable container ordinance, but then, the products were thrown away in the PLASTIC lined Bins with no Compostable Bins/Cans in sight:(</p> <p>Being in the Food Business, and working with products such as Compostable Liners/Bags/Bins, and Compostable containers, I may have a different take on things, but I believe the Goal of 50% of residents getting into Composting is very attainable! Thanks, Mpls Resident: Troy Rognrud 612-807-3932</p>	7/18/2018
4159	15	/policies/transportation-and-equity/	<p>The transportation goals and priorities in this plan are OFFENSIVE in its preference for young, single, able-bodied citizens over those who depend on a car for transportation. It focuses on strategies that are beneficial for those who work in one location without needed to bring anything with them.</p> <p>It blatantly discriminates against anyone with mobility issues. (I've seen people in wheelchairs stuck in the sidewalk ramps in the winter unable to move.) This plan makes getting around even harder for those who already struggle.</p> <p>It makes it impossible for seniors to meet their own needsâ€”driving them out of the city because they won't be able to carry groceries, get to a doctor appointment, and making them dependent on taxis or car-sharing services to get what they need.</p> <p>It drives families with young children into the suburbs, where they can use a car for transportation easily and economically. These transportation policies are so anti-family it is shocking.</p> <p>It makes it impossible for mobile businesses to do their work. We can't make deliveries, meet clients, etc. because this plan prohibits parking and car use.</p> <p>This can not be implemented as it is. It is drastically flawed and one-sided.</p>	7/18/2018
4160	7	/policies/public-realm/	<p>We need as much public art as possible. Minneapolis is very uneven in its public art execution.</p>	7/18/2018
4161	70	/policies/ecology-and-habitat/	<p>it is not clear if steps like this...</p> <p>"Discourage use of pesticides and herbicides and encourage organic practices to improve and maintain soil health and healthy habitat and ecosystems." And this....</p> <p>"Eliminate use of neonicotinoids, pesticides that are harmful to bee pollinator populations."</p> <p>...refer to the City working on City properties or apply to rules that the City will place on what is sold within the City from local stores and used by residents. If it doesn't go as far as banning use and sale of certain chemicals within the city an only applies to use BY the City, then it does not go far enough.</p>	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4162	1	/policies/access-to-housing/	Why should we not encourage ways to make home ownership attainable for more people. By removing single family homes I exchange for more multi unit buildings, we are making it much less attainable for people in the future. We should make sure we are zoning in order to preserve smaller single family homes- especially in the neighborhoods furthest from the city. This upzoning everywhere is serious mistake!	7/18/2018
4163	22	/policies/downtown-transportation/	"Manage the supply and design of parking downtown in a manner consistent with objectives for walking, bicycling, and transit users." I could not disagree with this more. NO. We need to manage the supply and design of parking to better accommodate a growing city, mandating off-street parking for all new residential and commercial development so that tenants and guests have off-street parking. This is a must-have. "make transit more convenient for users traveling through and within Downtown..." Comprehensive, extended light-rail and/or subways systems throughout the Downtown metro are needed. NOT MORE BUSES. Think 21st century, not 20th century transportation!	7/18/2018
4164	72	/policies/sustainable-water-system-management/	This "step" listed should be a Goal onto itself: "Carry out steps toward meeting the MPCA's "swimmable, fishable, fixable" water quality standards."	7/18/2018
4165	16	/policies/environmental-impacts-of-transportation/	Everything possible should be done to clean the chain of lakes and the Mississippi River. It is our responsibility.	7/18/2018
4166	1	/policies/access-to-housing/	good - do more to incentivize public transit by improving the network and allow people to live car free	7/18/2018
4167	19	/policies/bicycling/	sounds good to me.	7/18/2018
4168	84	/policies/public-safety/	Design bikeways to support biking--stop designing bikeways as a traffic calming device as a way to "use up" excess road space and try and slow car traffic down.	7/18/2018
4169	51	/policies/healthy-pre-k-development/	Should add action step: Get the police to stop shooting people. Improve police training, specifically in deescalation tactics and how to deal with people who are in crisis (people dealing with mental illness).	7/18/2018
4170	26	/policies/vision-zero/	Set up a network of child care facilities in the lower income areas that match the Kinderberry Hill curriculum - they focus on hard and soft skills. Ensure the staffing expertise is equivalent as well. Give the inner city kids the same foundation the kids in the suburbs are receiving. The goal should be to get 90%+ of the kids in the program by age 6 months. Set the kids up for success early. If we truly believe this is important then put the money up to support top-tier child care/development.	7/18/2018
4171	36	/policies/innovative-housing-strategies/	POTENTIAL SOURCE OF FUNDING: Why is MN paying close to twice as much for prisoners than surrounding states? Cut off the gravy train and reinvest in the kids.	7/18/2018
4172	0.1	/topics/land-use-built-form/	Remove enforcement measures that reinforce racial disparities. Tackle racial disparities in police enforcement throughout the city and improve officer training including bias awareness and mental health training.	7/18/2018
4173	6	/policies/pedestrian-oriented-building-and-site-design/	Figure out a model to reduce the strain of rising property taxes for low and fixed income residents. Look at other cities to see if there are models out there with a good balance between supporting tax collection and not forcing people out of their homes or forcing heirs to sell due to the deferred tax burden.	7/18/2018
			Making the city greener and adding affordable housing are admirable goals. However, I strongly oppose the current plans to do so. Specifically referring to the area where I own my home near 50th and Bryant Ave S, I am vehemently opposed to this plan. This seems more than anything else like a cash grab for developers at the expense of the residents. I have strong doubts that adding 4-plexes, condos and three-story apartments in this area of Minneapolis will add any kind of affordable housing. How about parking and other infrastructure - sewers, bridges, etc - be addressed? These neighborhoods have existed the way they are for decades. To suddenly start shoehorning in new, massive buildings will not only look unappealing, I cannot imagine the streets and sewers can support four times the population. These are the same points I've read over and over again, so I'm just one more opposition voice. I hope this plan fails, and fails miserably.	7/18/2018
			Elimination of off-street parking will lead to crowded parking conditions which puts pedestrians and bicyclists at risk by reducing visibility at crossings. Prioritize measures that remove need for car use through better public transit infrastructure. If you truly want people to reduce car ownership/dependence work against cultural stigma of not owning a car.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4174	1	/policies/access-to-housing/	How is public transit going to improve (and it needs to) in light of the on-going lack of legislative support? I bought where I did (near one of the transit corridors) over 40 years ago in part because of ready access to the bus. There is far less service today than there was then. To plan assuming better is dreaming.	7/18/2018
4175	17	/policies/complete-streets/	<p>YES! Let's make pedestrian friendly spaces. But this disregards those requiring automobiles. I was on crutches for 10 months, and was disadvantaged enough, without making the availability of parking, and use of an individual car more difficult - especially in Minnesota's winters.</p> <p>Furthermore, the anti-car stance greatly disadvantages those who want to age in place and can not walk or ride a bike to local stores. Our neighborhood is wonderful for its diverse ages and abilities and people with weird jobs that don't put them on a fixed bus route on a daily basis.</p>	7/18/2018
4176	54	/policies/supporting-economic-growth/	<p>We need policies that support SMALL businesses. Such as:</p> <ul style="list-style-type: none"> -a Business Diversity Ordinance that can ensure that independent, neighborhood-serving businesses don't get crowded out by chains. - economic development and incentive programs targeted at local, small businesses instead of big, international corporations. -improve the reach and impact of Target Market programs which is not getting much support. -require development projects to reserve a portion of their first-floor space for small storefronts and for locally owned, small businesses <p>- add language to specifically support WOMEN-owned businesses to all your policies that address inequalities and discrimination.</p>	7/18/2018
4177	1	/policies/access-to-housing/	Yes! Let's allow more types of housing across the city! Diversify the stock!	7/18/2018
4178	56	/policies/supporting-small-businesses/	I could not agree more with these!!! Yes!!!	7/18/2018
4179	6	/policies/pedestrian-oriented-building-and-site-de	To eliminate parking space requirements is nonsense. Absent significant improvements to the transit system, the idea that people will not have cars is a fantasy. In any event, people leave the city frequently for areas not served by transit. Eliminating off street parking requirements will only make street parking far worse than it is today. I have already mostly given up on Uptown for just that reason.	7/18/2018
4180	3	/policies/production-and-processing/	Add some prioritization and incentives for local and small businesses that are women-owned and diversity-focused to these policies.	7/18/2018
4181	1	/policies/access-to-housing/	I cannot believe that the this plan is being considered to allow MORE non owner occupied properties in our neighborhoods!!! Also, to allow old homes that can not be replicated to be torn down in favor of cheap multi family rental properties. I think after 32 years it may be time for my family to leave the city and I can bet money that others will follow!	7/18/2018
4182	0.1	/topics/land-use-built-form/	<ol style="list-style-type: none"> 1. The draft 2040 Plan's proposed heights are significantly too high, threatening affordability, opportunities for individual ownership, and quality of the urban fabric. 2. The Policy language of the proposed 2040 Plan remains dangerously open-ended and unenforceable while Built Form Plan heights are precisely defined. This will lead to irresponsible profit-oriented development. 3. The proposed 2040 Plan fails to adopt existing neighborhood plans, with their site-based expertise, or to explicitly recognize the role of neighborhood organizations in providing advice and recommendations regarding future development. 4. The draft 2040 Plan threatens the unique and historic character of neighborhoods by its "broad brush" approach. 5. The draft 2040 Plan limits the amount of parking required by new developments to untenable levels, without adequate transit infrastructure in place to realistically support bike / walk ideals. 6. Flaws in the proposed 2040 Plan will continue to compromise our city for decades to come. Time should be taken to substantially improve the Plan before it is approved. Let's take a lesson from the damages done by inadequate highway planning 60 years ago (which are still being remedied today). 	7/18/2018
4183	58	/policies/business-districts-and-corridors/	Support institutions that contribute to the success of women and racially-diverse, locally owned small businesses.	7/18/2018
4184	0.1	/topics/land-use-built-form/	As a homeowner on a street with proposed zoning for six story apartment buildings, this plan will effectively remove all the equity in my home. If MPLS 2040 is approved and my property value decreases as is estimated to only the value of the land, I intend to appeal my current exorbitant property tax rate. My neighbors and I should only be paying taxes on the value of the land.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4185	0.1	/topics/land-use-built-form/	Your MPLS 2040 plan does NOTHING to further your goals. It is a blatant attempt to line the pockets of developers. There is no plan to allow for diversity. In fact, this plan will decrease diversity due to exorbitant rental rates that will need to be charged for all the rental properties you will develop. The lack of parking in your plan is short sighted. Removing mature trees and building for height will destroy the park system and remove all desire for people to live here.	7/18/2018
4186	0.1	/topics/land-use-built-form/	Your MPLS 2040 plan does NOTHING to further your goals. It is a blatant attempt to line the pockets of developers. There is no plan to allow for diversity. 4188	1	/policies/access-to-housing/	<p>YES, increase the density in south Minneapolis along Hennepin, Lyndale, Lake Street and other transit corridors. Ease laws on mother-in-law apartments and conversions of 3rd floor, garages, basements into dwellings.</p> <p>But NO to destroying the single family neighborhoods, and beautiful housing stock that are the fabric of our unique city. In East Isles, we already have a very mixed housing stock with apartments, duplexes, etc.</p> <p>This is a RADICAL redesign of our city and undermines the investments of all who chose their home because of its current aesthetics and neighborhood feel.</p> <p>From discussions with a private developer in Seattle, this drive towards density has not worked anywhere but in Auckland, NZ where those responsible for transit, housing, parks, traffic, etc. ALL came together to build and implement a plan that was well communicated and worked on all counts.</p> <p>We chose Mpls, for its old, single family neighborhoods and homes. Destroying this housing stock and replacing it with new, cheaper materials that are often filled with toxins is ill-advised.</p> <p>Public health concerns: I am currently recovering from surgery brought on, in part, from the air and noise pollution brought on by construction on two sides of my home for the past 3.5 years. Construction can lead major health problems. I'm one of 4 in the immediate neighborhood who had serious upper respiratory problems exacerbated by the construction.</p>	7/18/2018
4189	8	/policies/public-safety-through-environmental-de	i support & agree with this policy & it's action steps.	7/18/2018
4190	31	/policies/creative-workers/	<ul style="list-style-type: none"> -increase the requirement for developers to install artworks on all residential projects and commercial projects as part of their developments, using local artists approved by the City. -Incent organizations to commission local artists -Address the ina 	7/18/2018
4191	9	/policies/open-spaces-in-new-development/	I support & agree with this policy & its action steps.	7/18/2018
4192	29	/policies/creative-sector-economy/	Agree!	7/18/2018
4193	5	/policies/visual-quality-of-new-development/	<p>Tearing down high quality, single family homes in favor of 2-4 plexes will greatly degrade the aesthetics of our wonderful neighborhoods. With minimal guidelines, and the current expense of wood, developers will almost certainly use cheaper, less attractive materials - even if they do use interesting architectural designs, which hasn't appeared to be the situation for the housing along the Greenway.</p> <p>Destroying these homes is reminiscent of the rush in the 50's and 60's to destroy neighborhoods in order to take advantage of Federal funding to build affordable housing. The fabric and unique character of our city would be ripped apart.</p> <p>A healthy design review process, by neighbors and community volunteers, is a must.</p>	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4194	1	/policies/access-to-housing/	Protect existing industrial/commercial zonings to allow for sustaining and growing arts production and small businesses, and especially within the Northeast Minneapolis Arts District.	7/18/2018
			dd Arts Production as a protected class for production processing areas.	
4195	3	/policies/production-and-processing/	d.&.e. Protect Production Areas - do not allow non-production in Production Areas.	7/18/2018
4196	5	/policies/visual-quality-of-new-development/	f. Protect older industrial buildings for future production and processing uses (not Non-Production uses).	7/18/2018
4197	29	/policies/creative-sector-economy/	Require City funded projects to include public art which is purchased locally.	7/18/2018
4198	30	/policies/arts-and-cultural-assets/	Protect existing Arts Districts	7/18/2018
4199	31	/policies/creative-workers/	Protect the existing infrastructure of production space within the Northeast Minneapolis Arts District.	7/18/2018
4200	38	/policies/affordable-housing-near-transit-and-job-	Provide Property Tax Abatement opportunities to Arts Production Buildings to prevent the cost of space forcing artists out of the Cit	7/18/2018
4201	0.1	/topics/land-use-built-form/	Except in existing industrial production areas.	7/18/2018
4202	54	/policies/supporting-economic-growth/	I think the comp plan is a great start, bring on the density! I think adding higher density at old streetcar stops, typified by existing businesses in an otherwise residential neighborhood, would also be good.	7/18/2018
4203	93	/policies/stewarding-historic-properties/	improve existing properties and infrastructure	7/18/2018
4204	55	/policies/business-innovation-and-expansion/	Great	7/18/2018
4205	56	/policies/supporting-small-businesses/	BUT neighborhoods, including around the lakes, have historic value and intrinsic worth as well.	7/18/2018
4206	58	/policies/business-districts-and-corridors/	East Isles is a mixed use, diverse community, and unique nation-wide in being a neighborhood that is close to downtown and lakes.	7/18/2018
4207	81	/policies/social-connectedness/	Destroying highly functioning neighborhoods (with apartment buildings, multi-family units, etc) with beautiful housing stock is very ill-advised.	7/18/2018
4208	1	/policies/access-to-housing/	dd preserving existing uses, assets and Art Districts.	7/18/2018
4209	1	/policies/access-to-housing/	Add artists to this section (Support the development and growth of small business and artists.)	7/18/2018
4210	33	/policies/affordable-housing-production/	g. Support the existing Arts Districts h. Develop programs & strategies specifically aimed at maintaining affordable rents for art studios and arts production space and minimizing displacement.	7/18/2018
			Support the existing mixed used Northeast Minneapolis Arts District as an example of a socially vital community.	7/18/2018
4208	1	/policies/access-to-housing/	Preserve existing buildings.	7/18/2018
4209	1	/policies/access-to-housing/	Why should we not encourage ways to make home ownership attainable for more people. By removing single family homes I exchange for more multi unit buildings, we are making it much less attainable for people in the future. We should make sure we are zoning in order to preserve smaller single family homes- especially in the neighborhoods furthest from the city. This upzoning everywhere is serious mistake!	7/18/2018
4210	33	/policies/affordable-housing-production/	Why should we not encourage ways to make home ownership attainable for more people. By removing single family homes I exchange for more multi unit buildings, we are making it much less attainable for people in the future. We should make sure we are zoning in order to preserve smaller single family homes- especially in the neighborhoods furthest from the city. This upzoning everywhere is serious mistake!	7/18/2018
4210	33	/policies/affordable-housing-production/	I don't believe this plan of more big buildings is actually going to create more affordable housing, much less housing equity. Thus far they are in "prime" locations identified by developers and benefit said developers and the property owner who sells the land/building. These fast and large developments are short sighted, increasing density and cost to areas and homeowners. They are also not providing affordable rent or addressing rent or living environment inequities. Address social justice issues, living wages, health care costs and affordable housing if you want to address these things. Stop building giant condos under the guise of "equity." Its BS and will not be looked back upon in a positive light. You are doing the exact opposite of what you propose.	7/18/2018

Minneapolis 2040 Website Comments (Phase 5: 3/22/18 - 7/22/18)

4211	35	/policies/innovative-housing-types/	I would like to know the success of the Hiawatha Corridor. I also would like to see more creative use of existing structures e.g, downtown high rises with low occupancy, development of industrial properties rather than tearing up a neighborhood. This smacks of soviet style socialization of housing. Are you going to reimburse me for the loss of equity in MY home when a 4 plex goes up next door? This plan is an ill conceived disaster. We are better than this.	7/18/2018
4212	1	/policies/access-to-housing/	We need to preserve areas for single family homes as well. Not everyone wants to live in a multi unit housing. There is no mention of ways to preserve this as an option. There should be incentives for updating and preserving smaller single family homes. Too many of these type of housing stock are torn down for much larger homes. This definitely affects affordability.	7/18/2018
4213	39	/policies/fair-housing/	How is this condo boom and plan to increase it actually addressing housing disparities? Its not.	7/18/2018
4214	70	/policies/ecology-and-habitat/	I would like to see some specific details about long-term planning and visioning around the Mississippi River and it's role in the public and ecological realm. There is talk about restoring some of the natural history on the river, particularly on the Minneapolis/Saint Paul border, but there doesn't seem to be a vision to work from or a clear champion from the public sector to lead this effort. Given its prominence in the City and the opportunities that exist, there should be specific policies around the river's future and I'm not talking about the existing park land adjacent to the river, but the river itself. To that point, it seems like DNR should be mentioned in here somewhere.	7/18/2018
4215	40	/policies/homelessness/	Then address livable wages and livable rents/cost of living. Building more condos and luxury buildings are not going to alleviate any this, but rather will continue to exacerbate disparities.	7/18/2018
4216	1	/policies/access-to-housing/	Why does the city OWE the Met Council, an unelected body a draft plan of anything? I would like to know the success of the Hiawatha Corridor and the level of affordable housing built in to that plan. Will the city reimburse me for the loss of equity in my home when a 4-plex goes up next door? When I read the 97 points in the draft, I thought it read like a "brain-storming" session of people who are taken with their own ideals. Who care if only 2 people live in a home? Maybe they worked hard for the space? This plan smacks of a socialist land grab where Minneapolis will look like East Berlin. So stupid. I have been to the meetings and Heather et. al are very condescending to the attendees. Why is that?	7/18/2018
4217	73	/policies/stormwater-management/	I find some of the specifics of this policy to be very nuanced, like "L", while others are very general. This implies some kind of high priority on the specific action steps. In that sense, there should be a specific policy about stormwater management being incorporated into public rights-of-way when streets are reconstructed. I would recommend an ordinance similar to the City of Milwaukee's: https://city.milwaukee.gov/ImageLibrary/Groups/ccClerk/Ordinances/Volume-1/CH120.pdf Hopefully, this would lead to more applications of stormwater management that look like this along our city streets: https://www.google.com/maps/@43.0446994,-87.9243907,3a,75y,308.19h,71.25t/data=!3m6!1e1!3m4!1sfaO8skpz3D_ur1imD5l-kw!2e0!7i13312!8i6656	7/18/2018
4218	10	/policies/street-grid/	Include a goal to reduce stormwater run-off into our waterways by an aggressive figure (I don't know exactly what a target should look like).	7/18/2018
4219	11	/policies/skyways/	I support & agree with this policy & its action steps.	7/18/2018
4220	68	/policies/energy-efficient-buildings/	Action Steps a. & e.: Tax breaks for geothermal and solar energy on residential and private properties, tax penalties for those without beginning in the year 20___. Use money from those energy tax penalties to fund geothermal and solar projects in low-income neighborhoods.	7/18/2018
4221	68	/policies/energy-efficient-buildings/	Action Steps a. & e.: Tax breaks for geothermal and solar energy on residential and private properties, tax penalties for those without beginning in the year 20___. 4222	6	/policies/pedestrian-oriented-building-and-site-de	<p>Step (k), "Eliminate off-street parking minimums throughout the City" is too drastic. Though I am sympathetic to the ultimate goal of reducing dependence on cars, the immediate negative consequences will be harmful to overall goals that I share, and it is irresponsible for city officials to implement a simplistic policy that will have such adverse impact on most neighborhoods.</p> <p>Some further explanation: I see this rule, and many of the themes of the plan in general, as an understandable reaction to frustration with the inability of society to provide affordable housing and public transport. But completely dropping off-street parking requirements, without any funding for transit or housing support, and hoping that somehow it will ultimately work out is just disruption -- like tossing a grenade into a building -- is just not responsible. Many working-class people will still have to drive to keep employment, and increasing demand on on-street parking will be disastrous for emergency vehicles, etc. And it's one of many well-intentioned positions in the plan that have clearly been co-opted by development interests...</p>	7/18/2018
