Appendix J

Comprehensive Plan Amendments

This appendix provides information about the function and process for comprehensive plan amendments and includes a list and map of comprehensive plan amendments.

COMPREHENSIVE PLAN AMENDMENTS

The comprehensive plan amendment process is an opportunity for individuals, groups, and the City to propose changes to Minneapolis 2040. A typical application would suggest a change to the City's future land use and/or built form maps. As such, applicants will generally have a legal or equitable interest in the properties directly impacted by the proposed amendment. The City also retains the right to amend the plan as needed through an internal process, without initiation by an external applicant.

Like many other land use or zoning applications, comprehensive plan amendments require internal City review, public notification, and action by the City Planning Commission and City Council. Comprehensive plan amendments have the additional requirements of stakeholder outreach and engagement, including at least one in-person community meeting hosted by the applicant, and review by the Metropolitan Council. Most comprehensive plan amendments require a minimum of between four and eight months to complete the review process. The comprehensive plan amendment must be fully approved before any other applications or entitlements related to the subject property may move forward.

The following is a map (figure 1) and corresponding list (figure 2) of properties that have had changes in the future land use map and/or built form guidance since the adoption of Minneapolis 2040. Please note that not all properties have been rezoned to reflect the proposed comprehensive plan guidance, as rezoning requires a separate land use application submittal.
